Other AV passages where "of" means "from" include 2 Cor. 5:1 ("a building of God"; RSV "from"); Mk. 9:21 ("of a child"; RSV "from childhood"). A still more obscure passage is Mt. 23:25, "full of extortion and excess" (cf. RSV). Elsewhere in the AV and RSV "full of" refers to the contents (cf. vv. 27f.), but here the expression translates Gk. *ek*, "out of," and denotes the source (cf. NEB "which you have filled inside by . . ."). For other examples of this use of "of," cf. the AV of Jth. 2:21 ("they went forth of Nineveh"); 2 Macc. 4:34 ("forth of the sanctuary"); Mt. 21:25 ("The baptism of John, whence was it? from heaven, or of men?").

(2) In some places the AV uses "of" rather loosely to connect an act with its source or motive — e.g., Mt. 18:13 ("rejoiceth more of that sheep"; RSV "over"); 1 Cor. 7:4 ("hath not power of her own body"; RSV "over").

(3) "Of" is very commonly used by the AV to designate the agent — a use complicated by the AV's frequent use of "by" for the same purpose. Thus in Lk. 9:7 ("all that was done by him . . . it was said of some"; RSV ". . . said by some") the two words are used side by side for the same preposition (Gk. *hypó*; the AV follows a MS tradition that adds *hyp' autoú*). In some passages "of" may be wrongly interpreted as a possessive: e.g., "which were made eunuchs of men" (Mt. 19:12; RSV "by men"); "There are left some clusters of them that diligently seek through the vineyard" (2 Esd. 16:30; RSV "by those"). Other obsolete uses occur in 1 Cor. 14:24 ("He is convinced of all, he is judged of all"; RSV "by all" in both places); Phil. 3:12 ("I am apprehended of Christ Jesus"; cf. RSV "Christ Jesus has made me his own").

(4) In some cases the older English usage does not provide sufficient explanation for the AV. In Mt. 28:23 "take account of his servants" is better rendered by the RSV as "settle accounts with his servants." In Acts 27:5 the "sea of Cilicia" means the "sea which is off Cilicia" (cf. RSV). In 2 Cor. 2:12 "A door was opened unto me of the Lord" should be "in the Lord" (so RSV). In 2 S. 21:4 "We will have no silver nor gold of Saul, nor of his house," is very loose, and the RSV rewrites the verse entirely. In He. 11:18 Gk. *prós* is ambiguous and may mean either "to" (so RV) or "of" (so AV, RSV, NEB; cf. He. 1:7, where "of" is necessary). B. S. EASTON

OFFEND [Heb. *ḥāṭā'*–'miss (a goal),' 'go wrong,' 'sin'] (Gen.40:1); [*'āšam*–'offend,' 'be guilty'] (Ezk. 25:12); [*ḥāḇal*–'act ruinously, corruptly'] (Job 34:31); [*lā'â*–'be weary,' 'be impatient'] (Job 4:2); [Gk. *skandalízō*–'cause to sin,' 'give offense to'] (Mt. 11:6 par. Lk. 7:23; Mt. 13:57 par. Mk. 6:3; Mt.15:12; 17:27; Jn. 6:61); [*hamartánō*–'do wrong, sin'] (Acts 25:8); AV also GRIEVE; NEB also INCUR GUILT, DO MISCHIEF, CAUSE OFFENCE, SHOCK, etc.; **OFFENDER** [Heb. hiphil part. of *ḥāṭā'*–'bring into guilt,' 'cause to sin'] ("who . . . make . . . out to

be an offender," Isa. 29:21); [*ḥaṭṭā'*–'exposed to condemnation,' 'reckoned as offender'] ("counted offenders," 1 K. 1:21); [Gk. *opheilétēs*–'debtor'] ("worse offenders," Lk. 13:4); AV "make an offender," "counted offenders," SINNERS; NEB "charge with a sin," "treat as criminals," "more guilty"; **OFFENSE** [Heb. *peša'*–'rebellion,' 'transgression'] (Gen. 31:36; Prov. 10:12; 17:9; 19:11); [*ḥēṭ'*–'sin'] (Dt. 19:15; 22:26; Eccl. 10:4); [*miḵšôl*– 'stumbling, means or occasion of stumbling'](Isa. 8:14); [*riš'â*– 'wickedness'] (Dt. 25:2); [Gk. *apróskopos*–'without offense, giving no offense'] (1 Cor. 10:32); AV also TRESPASS, SIN, TRANSGRESSION, STUMBLING, FAULT; NEB also MISTAKE, "which . . . shall run against"; **OFFENSIVE** [Heb. hiphil of *bā'aš*–'cause to stink'] ("make offensive," Ex. 5:21).

In the OT, Heb. *ḥāṭā'* and its derivatives represent the most common term for sin, but they have other nuances as well. Koch has questioned the classical basic meaning "miss (a mark)" (cf. Jgs. 20:16; Job 5:24; Prov. 8:35f.; 19:2) since this is found in late passages that reflect metaphorical uses (see *TDOT*, IV, 311). In Gen. 40:1 Heb. *ḥāṭā'* refers to rebellion against a king. This word often describes a wrong committed against another person (e.g., 1 S. 19:4; 24:11 [MT 12]; 26:21; 2 K. 18:14; Jer. 37:18). In Dt. 22:26 the cognate noun Heb. *ḥēṭ'* refers to a crime, and here to forcible rape, which was a capital offense (21:22). Dt. 19:15-21 is probably an elaboration of the ninth commandment (P. C. Craigie, *Book of Deuteronomy* [*NICOT*, 1976], p. 269), and v.15 stipulates the need of multiple witnesses to verify the commission of *ḥēṭ'*. The hiphil of Heb. *ḥāṭā'*, which means "cause to (or lead into) sin," occurs in Isa. 29:21. This same form is used in regard to Jeroboam, who "made Israel to sin" (1 K. 14:16; cf. 15:26, 30, 34). It is alleged in 1 K. 1:21 that if Adonijah were to become king he would perhaps use an accusation of treason to put away Bathsheba and Solomon. Though innocent, they would appear guilty and be "counted offenders."

The range of meaning for the qal of *'āšam* includes "act wrongly, become guilty, become culpable, atone for guilt" (*TDOT*, I, 435). In Ezk. 25:12 Heb. *'āšam* precedes an infinitive of the same root. This construction expresses either the intensity or the duration of the conflict between Judah and Edom.

In Job 34:31 "I will not offend any more" is syntactically parallel to "I will do it [iniquity] no more" in v. 32; therefore, "offend" (Heb. *ḥāḇal*) in v. 31 must also connote sin (cf. *TDOT*, IV, 186).

Several Hebrew nouns also deserve comment. In Gen. 31:36 Jacob asks Laban, "What is my offense? What is my sin . . . ?" Here "offense" translates Heb. *peša'* (< *pāša'*, "rebel," "transgress"). Prov. 10:12 states that "love covers all offenses," and indicates that "wrongs are endured and passed over for the sake of communal peace" (W. McKane, *Proverbs* [*OTL*, 1970; repr. 1977], p. 419). Similar to this is the thought of Prov. 17:9, which encourages a gracious silence about the shortcomings of others. And in Prov. 19:11 "to overlook an offense" favors the idea of a disciplined and magnanimous response toward provocation and personal insults. Heb. *miḵšôl* (<*kāšal*, "stumble, stagger, totter") may have both a literal and a figurative sense. The literal sense is evident in Lev. 19:14; here it refers to a stumbling block over which the blind fall. But in Isa. 8:14 the sense is figurative; it refers to the Lord who once was Israel's security but now will be a cause of its fall (R. E. Clements, *Isaiah 1-39* [*NCBC*, repr. 1980], pp. 99f.; cf. Isa. 57:14).

"Offensive" in Ex. 5:21 translates the hiphil of Heb. *bā'aš*, which graphically describes something foul and repulsive. The qal of Heb. *bā'aš* is used in reference to the odious smells associated with various plagues, e.g., the "foul" smell produced by dead fish in the rivers (Ex. 7:18, 21) and the stench arising from dying frogs (8:14 [MT 10]).

In the NT, Gk. *skandalízō* has several nuances. For example, a person who becomes "offended" may be someone who is unwilling to believe (e.g., Mt. 13:57 par. Mk. 6:3; cf. also *apistía*, "unbelief," in Mt. 13:58; Mk. 6:6), someone who is losing confidence (e.g., Mt. 11:6 par. Lk. 7:23; cf. *TDNT*, VII, 350), or hindered in his belief (e.g., Jn. 6:61; cf. v. 64). The report in Mt. 15:12 that the Pharisees "were offended" by Jesus' saying means that they were actually angered by His parable because it challenged their traditions. On another occasion Jesus encouraged Peter to pay the temple tax rather than "give offense" (Mt. 17:24-17). Here Jesus' concern was to avoid providing an occasion for unbelievers to reject the message of the gospel (cf. R. H. Gundry, *Matthew* [1982], p. 357).

Paul enjoined his readers to "Give no offense to the Jews or to the Greeks or to the church of God" (1 Cor. 10:32). Apparently the dietary practices of some at Corinth caused problems. Paul's advice may have been twofold, viz., a plea for minimizing an excessive scrupulosity and a warning against a flagrant violation of Jewish dietary laws (cf. J. Héring, comm. on 1 Corinthians [Eng. tr. 1962], p. 99). For Paul the concern is not a matter of personal liberty (libertinism) or dietary restrictions (legalism), but the glory of God (v. 31).

The meaning of "offend" in Acts 25:8 is quite significant. The Jews made various charges against Paul (25:7) that must have been serious enough to warrant capital punishment (25:11); Paul, however, maintained his innocence, claiming that he had not "offended" or committed any crime against the laws of the Jews (cf. 21:21), the temple (cf. 21:28), or Caesar.

In Lk. 13:4 "worse offenders" translates Gk. *opheilétēs*, which is used figuratively for "one who is guilty, culpable, at fault" (Bauer, rev., p. 598). When used in relation to God it means "sinner" (cf. *hamartōloí*, Lk 13:2). According to Jewish thought, a causal relationship existed between personal tragedy and guilt (see G. F. Moore, *Judaism* [1927], II, 248f.; SB, II, 193-97). But Jesus' rhetorical questions (vv. 2, 4) with the subsequent answers (vv. 3, 5) flatly deny this concept of divine retribution.

OFFER; OFFERING. *See* SACRIFICES AND OFFERINGS IN THE OT.

OFFICE. In the OT "office" translates several Hebrew terms and expressions. Heb. *kēn* designates the original status or place of the restored chief butler (Gen. 40:13; 41:13). In Nu. 3:3 *l'ḵahēn*, "to act as priest," is translated "office." The phrase "who is in office" renders *'ᵃšer yihyeh*, which the AV translates literally ("that shall be," Dt. 17:9; 26:3). In 1 Ch. 9:22 the gatekeepers are established in their "office of trust" (*'ᵉmûnâ*); the duties of this position required that the gatekeepers be trustworthy (*see* GATEKEEPER). In Isa. 22:19 *maṣṣāḇ* ("station [so AV], garrison") refers to Shebna's office as steward or majordomo (cf. *'ᵃšer 'al habbayiṯ*, lit. "who is over the house," v. 15), which was a very important position in Israel (see Mettinger, pp. 70-110).

In the NT "tax office" (AV "receipt of custom"; NEB "custom house") renders Gk. *telṓnion* (Mt. 9:9 par. Mk. 2:14; Lk. 5:27). According to O. Michel (*TDNT*, VIII, 97 n. 93) this was a customs house, although in Mt. 9:9

it refers to a "simple exchange-table." Gk. *episkopē* is translated "office" both in Acts 1:20 (AV "bishoprick"; NEB "charge"), referring to the office of apostle, and in 1 Tim. 3:1 (NEB "leadership"), referring to the office of bishop. Col. 1:25 has "office" (AV "dispensation"; NEB "task") for *oikonomía*, perhaps referring to the bishop's office (see Bauer, rev., p. 559). In He. 7:5 "priestly office" translates *hierateía* (AV "office of the priesthood"), and in 7:23 "continuing in office" (AV "to continue") renders *paraménō* (see Bauer, rev., p. 620).

OFFICER [Heb. *'addîr* (Nah. 2:5 [MT 6]), *'eḇeḏ* (Jer. 46:26), *nᵉṣîḇ* (1 K. 4:19), *niṣṣāḇ*, *pāqîḏ*, *pāqûḏ* (Nu. 31:14, 48), *pᵉquddâ* (2 Ch. 24:11), *rō'š* (1 Ch. 12:14, 18 [MT 15, 19]), *šālîš*, *śar*, *śar šālîšîm* (2 Ch. 8:9), *sārîs*, *šôṭēr*; Gk. *chiliarchos* (Mk. 6:21), *hypērétēs*, *práktōr* (Lk. 12:58 [twice]), *stratēgós* (Lk. 22:4, 52)]; AV also CAPTAIN(S), CHIEF (1 K. 14:27 par. 2 Ch. 12:10), EUNUCH (Jer. 52:25), GOVERNOR (1 Ch. 24:5 [twice]), etc.; NEB also CAPTAIN (Isa. 31:9), CHIEF (1 Ch. 12:14), CIVIL OFFICER (2 Ch. 32:3), etc.; **CHIEF OFFICER** [Heb. *nāgîḏ*, *pāqîḏ nāgîḏ* (Jer. 20:1), *raḇ* (Jer. 39:13; 41:1), *śar hannisṣāḇîm*]; AV CHIEF GOVERNOR (Jer. 20:1), PRINCE (Jer. 39:13; 41:1), RULER (*nāgîḏ*), etc.; NEB also CHIEF OVERSEER (2 Ch. 31:13), OFFICER (1 Ch. 9:11), OVERSEER (1 Ch. 26:24; 2 Ch. 31:12), PRINCIPAL OFFICER (1 Ch. 27:16); **OFFICIAL** [Heb. *'eḇeḏ*, piel part. of *šāraṯ* (Prov. 29:12), *'ōśeh hammᵉlā'ḵâ* (Est. 9:3), *piqqē(a)ḥ* (Ex. 23:8), *raḇ* (Est. 1:8), *sāḡān*, *śar*, *sārîs* (2 K. 8:6; 24:15), part. of *šāṭar* (2 Ch. 34:13); Aram. *šiltōn* (Dnl. 3:2f.), *ṭarpᵉlāy* (Ezr. 4:9); Gk. *basilikós* (Jn. 4:46, 49)]; AV NOBLEMAN (Jn. 4:46, 49), OFFICER, PRINCE (*śar*), RULER, etc.; NEB also CHIEF MEN (Jgs. 8:6), CHIEF OFFICER (Ezr. 10:8; Zeph. 1:8), CLERK (2 Ch. 34:13), etc.; **CHIEF OFFICIAL** [Heb. *ri'šôn* (1 Ch. 18:17)]; AV CHIEF; NEB "eldest"; **HIGH OFFICIAL** [Heb. *gāḇō(a)ḥ* (Eccl. 5:8 [MT 7]), *śar* (1 K. 4:2)]; AV PRINCE (1 K. 4:2), "he that is higher" (Eccl. 5:8); NEB OFFICER (1 K. 4:2), OFFICIAL (Eccl. 5:8); **PALACE OFFICIAL** [Heb. *sārîs* (2 K. 24:12; 1 Ch. 28:1)]; AV OFFICER; NEB EUNUCH.

Hebrew *śar* and *šôṭēr* designate a wide range of civil, military, and religious officials and sometimes function merely as generic terms for "officer." *Śar* is used collectively in 2 Ch. 32:21. Etymologically, *šôṭēr*, the part. of *šāṭar*, should mean "scribe" (cf. Akk. *šaṭāru*, "write"), and it does designate a scribal office in, e.g., 26:11.

Specific government officials are designated by Heb. *'eḇeḏ*, *niṣṣāḇ*, *ri'šôn*, and *sārîs*. The *'eḇeḏ* (lit. "servant") is a minister of the king in 1 K. 1:9; 9:22; 10:5 par. 2 Ch. 9:4; 2 K. 25:24; Jer. 46:26. The same word with like meaning is translated "servant" in 1 K. 1:47; 2 K. 5:6; 22:12 par. 2 Ch. 34:20. The *niṣṣāḇ* of 1 K. 4:5, 7, 27 is a royal governor of one of the twelve provinces into which Solomon divided Israel; cf. the *niṣṣāḇ* of Edom (RSV "deputy") under Jehoshaphat (1 K. 22:47). The *niṣṣāḇ* of 1 K. 5:16; 9:23; 2 Ch. 8:10 is a foreman of the drafted workers who constructed the temple. *Nᵉṣîḇ* in 1 K. 4:19 is probably an error for *niṣṣāḇ*, since the usual meaning of *nᵉṣîḇ* is "garrison," and the context seems to call for a royal governor of Judah equivalent to the twelve who ruled Israel (v. 7). Heb. *ri'šôn* in 1 Ch. 18:17 designates a high office of the royal service held by David's sons, though it can possibly be taken with "sons," as the NEB does, rendering it as the adjective "eldest." The *sārîs* is a EUNUCH (cf. Isa. 56:3-5); some, however, have rejected this meaning for Gen. 37:36; 39:1; 40:2, 7, since Potiphar

"Stele of the Necklaces" showing servants investing the high official Hor-Min with gold necklaces, a royal reward for great service. Pharaoh Seti I (1318-1301 B.C.) ooks on (Louvre; picture M. Chuzeville)

was married — although married eunuchs are indeed attested. Eunuchs were employed especially as overseers of the king's harem (Est. 1:10; 2:3, 14f.; 4:4f.; cf. 2 K. 9:32) but could perform a number of functions in the king's court (1 K. 22:9 par. 2 Ch. 18:8; 2 K. 8:6; 25:19 par. Jer. 52:25; Dnl. 1:3).

The *nāgîḏ* of 1 Ch. 9:11, 20 (RSV "ruler"); 26:24; 27:16; 2 Ch. 31:12f.; 35:8; Neh. 11:11 (RSV "ruler"); Jer. 20:1 is the head of a department in the cultic administration. In 2 Ch. 28:7, however, *nāgîḏ* designates the "commander" of the palace, unless "palace" (Heb. *bayiṯ*, lit. "house") should here be rendered "temple."

Hebrew *'ōśeh hammᵉlā'ḵâ* and *raḇ* as titles usually designate specific officials of the imperial governments of Mesopotamia and Persia, as do Aram. *šiltōn* and *ṭarpᵉlāy*. In Est. 3:9 the RSV translates the plural of *'ōśeh hammᵉlā'ḵâ* literally: "those who have charge of the king's business." Similarly in 9:3 some sort of financial officer is meant. Heb. *raḇ* in 1:8; Jer. 39:13; 41:1 refers to the heads over the various classes of government officials. The word occurs four times in Jer. 39:13, although the translation obscures this. Nebuzaradan is head of the bodyguards; Nebushazban is the head eunuch; Nergal-sharezer the head *māg*. These men acted in conjunction with the other head officers of the court. *Raḇ* similarly occurs in 2 K. 18:17; Jer. 39:3; Dnl. 1:3 (RSV "his chief eunuch"). The *raḇ* of Jonah 1:6 is head of the sailors, i.e., "the captain." Aram. *šiltōn* in Dnl. 3:2f. designates the administrator of a province in Nebuchadrezzar's empire. Little is known of the *ṭarpᵉlāy* of Ezr. 4:9. The suggestion that it is a Greek loanword meaning "the people of Tripolis" has not been generally accepted.

Greek *práktōr* in Lk. 12:58 designates the constable in charge of the debtors' prison. It is debated whether the term reflects Roman judicial procedure in contrast to the Jewish procedure implied by *hypērétēs* of the parallel passage, Mt. 5:25ff.

It is difficult to tell whether *sāgān*, which is used only in Ezra and Nehemiah, indicates a specific class of rulers or is merely a generic term for official. Although the rulers as a group were blamed for various undesirable conditions that prevailed, their specific functions are difficult to determine. *Sāgān* is translated "chief man" in Ezr. 9:2 and "official" in Neh. 2:16 (twice); 4:14, 19; 5:7, 17; 7:5; 12:40; 13:11.

An officer of Sennacherib (704-681 B.C.) wears a sash and splendid sword decorated with two lions as a sign of his rank. Detail of an alabaster relief from Sennacherib's palace in Nineveh (Staatliche Museen, Berlin, DDR)

The piel part. of *šāraṯ*, *mᵉšārēṯ* (lit. "servant"), on the other hand seems to be a general term for subordinates or assistants. It is translated "chamberlain" in Est. 1:10. Heb. *pāqîḏ* is a general term for governmental commissioner, whether appointed by a higher official to carry out his wishes or chosen by a group of people as their leader and representative. It is translated "officer" in Jgs. 9:28; 2 Ch. 24:11; Est. 2:3 but "overseer" in Gen. 41:34; Neh. 11:9, 14, 22 and "leader" in Neh. 12:42. The words *pāqîḏ nāḡîḏ* in Jer. 20:1 are probably not a compound title "chief deputy" but two separate titles. Pashhur was a deputy — specifically, the minister in charge of the temple of the Lord.

Greek *hypērétēs* in the NT is likewise a generic term for "deputy," "assistant." Jn. 7:32, 45f.; 18:3, 12, 18, 22; 19:6; Acts 5:22, 26 refer to the deputies of the chief priests and Pharisees, but Mt. 5:25 (RSV "guard") refers to the judge's deputy. In both cases, however, the deputies are officers of the law with police prerogatives. Similarly, the pl. of Gk. *stratēgós* (Lk. 22:4, 52) refers to the temple police (I. H. Marshall, *Gospel of Luke* [*New International Greek Testament Comm.*, 1978], p. 788) or overseers (J. Jeremias, *Jerusalem in the Time of Jesus* [Eng. tr. 1969], pp. 165f.; cf. MM, pp. 592f.).

A few specific terms occur for military officers. Of the *'addîr* of Nah. 2:5 (AV "worthy") little is known. The word also designates a military officer in Jgs. 5:13; Nah. 3:18, translated "noble" both times by the RSV. A similar uncertainty prevails regarding the military use of *rō'š* (lit. "head"; 1 Ch. 12:14, 18), and the *šālîš* of Ex. 14:7; 15:4; 2 K. 10:25 (twice); 2 Ch. 8:9; Ezk. 23:15, 23, etc. The LXX uses Gk. *chiliárchos* for the "commander of a thousand troops." In the NT it refers to the Roman *tribunus militum*, or commander of a cohort (= 600 men).

Hebrew *pāqûḏ* of Nu. 31:14, 18 seems to be a general term for any commissioned officer. It also occurs in this sense but is translated differently in 2 K. 11:15 par. 2 Ch. 23:14.

The RSV has taken as designations of officials a few words that have doubtful meanings or are best understood in another sense. Gk. *basilikós* (lit. "royal person") in Jn. 4:46, 49 may mean either "royal officer" or "member of the royal family." Heb. *pᵉquddâ* (2 Ch. 24:11) probably refers not to officials but to the royal treasury; cf. "what they have laid up" in Isa. 15:7. Heb. *gāḇō(a)h* in Eccl. 5:8 simply means "one who is in a high position" and is not really a title. Lastly, *piqqē(a)ḥ* (Ex. 23:8) should mean something like "the open-eyed" (cf. AV and NEB); i.e., a bribe blinds the one who really sees everything clearly, so that he pretends not to see.

OFFICES OF CHRIST. *See* CHRIST, OFFICES OF.

OFFSCOURING [Heb. *sᵉḥî* (Lam. 3:45); Gk. *perípsēma* (1 Cor. 4:13)]. NEB also DREGS. "Offscouring" appears in the RSV OT only as a translation of the Hebrew hapax legomenon *sᵉḥî*. The noun, from the verb *sāḥâ*, "scrape" (which occurs only in Ezk. 26:4), means "sweepings" or "scrapings." In Lam. 3:45 the prophet recognizes that, due to God's judgment upon the sins of Israel, His chosen people are a picture of rejection and ridicule before the nations. Formerly in a position of favor, Israel is now represented as mere filth.

The Greek hapax legomenon *perípsēma* derives from the verb *peripsáō*, "wipe all around," "wipe clean." Thus the noun means "that which is wiped off." In literature outside the NT it may also refer to the means or instrument of wiping, or figuratively to the means of religious cleansing or expiation, sacrifice. In 1 Cor. 4:13 it is probably a term of contempt; Paul contrasts the apostles, who are regarded as filth among men, with the self-satisfied Corinthians.

G. L. KNAPP

OFFSET. The term is used as a noun in two passages. In 1 K. 6:6 the Heb. *migrāʿ* (<*gāraʿ*, "diminish") denotes a shelf (AV "narrowed rests," NEB "rebates") in the wall of the side chambers of Solomon's temple, formed by decreasing the wall's width, so that the beams of the second and third stories would not penetrate the walls of the temple proper. The RSV also uses the term in Ezk. 41:6f., following the LXX, which understands a similar structural arrangement in the obscure details of Ezekiel's temple (so also the NEB, "intake"). The AV ("they entered") follows the corrupt MT version (*bāʾôṯ*) of the passage. See the comms., most of which follow the LXX, but cf. KD, *in loc.*

As a verb "offset" occurs in Hos. 12:8 (MT 9), but as the RSV mg. indicates, its reading is a conjecture based on the LXX (cf. NEB "pay"). The AV "find" is a literal translation of the Heb. *yimṣᵉʾû*, which can also be translated "bring" (H. W. Wolff, *Hosea* [Eng. tr., *Hermeneia*, 1974], p. 207; cf. p. 214) or "catch up" (F. I. Andersen and D. N. Freedman, *Hosea* [*AB*, 1981], p. 594).

G. WYPER

OFFSPRING [Heb. *zeraʿ*–'seed,' also *ṣeʾᵉṣāʾîm* (Job 5:25; 21:8; 27:14; Ps. 22:24 [MT 25]; etc.), *pᵉrî*–'fruit' (Dt. 28:51, 53; Ps. 21:10 [MT 11]; Lam. 2:20), *nîn* (Gen. 21:23; Job 18:19; Isa. 14:22), part. of *yāṣāʾ yārēḵ*–'come out of the loins' (Gen. 46:26; Ex. 1:5; Jgs. 8:30), *bēn*–'child' (1 Ch. 7:13), *yeleḏ* (Job 39:3), *môleḏeṯ* (Gen. 48:6); Gk. *spérma*–'seed' (Gal. 3:16, 19, 29; Rev. 12:17), *génos*–'family, race' (Acts 17:28f.; Rev. 22:16)]; AV also SEED, FRUIT, "that came out of the loins," ISSUE, SON, etc.; NEB also CHILD, CHILDREN, FAMILY, ISSUE, DESCENDANTS, etc. The progeny of a person or animal. The biblical writers frequently use terms from plant life (Heb. *zeraʿ* and *pᵉrî*; Gk. *spérma*) in a metaphorical sense to denote human children or descendants. While the RSV sometimes follows the AV in translating these terms "seed" or "fruit," it more often supplies the figurative sense of the term. In Acts 17:28f. Luke records a quotation by Paul from the Stoic poet Aratus (*Phaenomena* 5): "For we are indeed his offspring." Paul uses "offspring" not in the pantheistic sense intended by the Stoics but in the sense of being created by God in His image (see comms. on Acts, esp. F. F. Bruce [*NICNT*, repr. 1971], pp. 360f.).

See CHILD; FAMILY; FRUIT I.A.; SEED. N. J. O.

OFTEN. In the OT "often" is usually part of the phrase "as often as" in the RSV (AV "when," "after"; NEB also "when," "whenever"). It translates the Hebrew *middê*, "as often as" (e.g., 1 S. 1:7; 18:30; 1 K. 14:28; 2 Ch. 12:11; Isa. 28:19; Jer. 31:20). The RSV uses "how often" twice to translate *kammâ* (Job 21:17; Ps. 78:40). An additional use of "often" is found in Prov. 29:1, where "he who is often reproved" (RSV) renders Heb. *ʾîš tôḵāḥôṯ*, literally "a man of reproofs." Similarly, "had often been at war" (2 S. 8:10; 1 Ch. 18:10) translates *ʾîš milḥᵃmôṯ*, "a man of wars."

In the NT "often" generally renders the Greek adverb *pollákis*, "many times, frequently, often" (Mt. 17:15; Mk. 5:4; 9:22; Jn. 18:2; Acts 26:11; Rom. 1:13; 2 Cor. 8:22; 11:23, 27; Phil. 3:18; 2 Tim. 1:16; He. 6:7). The RSV uses "how often" three times to translate *posákis*, "how many times, how often," in the questions posed in Mt. 18:21; 23:37; Lk. 13:34. The phrase "as often as" translates *hosákis*, "as many times as," in 1 Cor. 11:25f.; Rev. 11:6. Also, "often" translates *pyknós* (Lk. 5:33), *pyknóteron* (neut., comparative of *pyknós*, Acts 24:26), and "so often" (AV "much"; NEB "all the time") renders *tá pollá* (Rom. 15:22; var. *pollákis*).

The use of *hosákis* is significant in 1 Cor. 11:25f. Some apply vv. 25f. to any common meal (Orr and Walther, p. 273) or to any occasion when wine was available (see Barrett, pp. 269f.), but the immediate context limits the reference to the Lord's Supper (Robertson and Plummer, p. 247). The verbs "eat" and "drink" in vv. 25f. have an anticipatory mood and continuative verbal aspect. Therefore, this memorial ought to be repeated; however, the presence of *hosákis* makes the frequency of future observances indefinite.

OG og [Heb. *ʿôg*, *ʿōg*]. Amorite king of the territory of BASHAN; last of the giant REPHAIM race. Og's empire E of the Jordan was conquered by Moses and the Israelites in preparation for the invasion W of the Jordan (Nu. 21:33-35; Dt. 3:1-12). Bashan was assigned mainly to the half-tribe of Manasseh, though partly to Reuben and Gad (Nu. 32:33; Dt. 3:12f.).

After they conquered the kingdom of Sihon (Nu. 21:21-32), the Israelites headed north to the fertile region of Bashan (a territory extending from Mt. Hermon to the river Jabbok). At Edrei, Og and his army met the Israelites (Nu. 21:33). Bashan was powerful, noted for its sixty fortified cities, with "high walls, gates, and bars" (Dt. 3:4f.). But God encouraged Israel, and in the ensuing battle Og and his sons were killed (Nu. 21:35), thus ending the line of the Rephaim.

Og's great stature is evidenced by reference to his *ʿereś barzel*, translated variously "bedstead of iron" (RSV, AV) or "sarcophagus of basalt" (NEB), which measured about 2 m. by 4 m. (6 ft. by 13½ ft.). It came into the possession of the Ammonites and was on display at their capital, Rabbah, at the time of the writing of Dt. 3:11. Since many basalt sarcophagi have been found in the general region of Bashan, and since black basalt is an ironlike rock, the conjecture that Og's "bedstead" was really a sarcophagus has gained popularity. Against this interpretation is the fact that *ʿereś* never means sarcophagus elsewhere. At any rate, the outsized bedstead or sarcophagus would indicate only that Og's stature was larger than normal, and affords no precision as to his actual height.

The conquest of Og and his kingdom is remembered in

the OT as one of Israel's greatest victories (Dt. 1:4; 4:47; 29:7 [MT 29:6]; 31:4; Josh. 2:10; 9:10; 12:4; 13:12, 30f.; 1 K. 4:19; Neh. 9:22; Ps. 135:11; 136:20). D. STUART

OHAD ō'had [Heb. *'ōḥaḏ*]. Third son of Simeon (Gen. 46:10; Ex. 6:15). The name is lacking in the parallel lists in Nu. 26:12-14; 1 Ch. 4:24f.

OHEL ō'hel [Heb. *'ōhel*–'tent']. A son of Zerubbabel, descendant of David (1 Ch. 3:20).

OHOLAH ō'hə-lä [Heb. *'oh°lâ*]; AV AHOLAH. A symbolic name for Samaria. Ezk. 23 presents an allegory in which Samaria ("Oholah") and Jerusalem ("Oholibah"), i.e., the northern and southern kingdoms, respectively, are sisters married to the Lord, but faithless to Him from the beginning of their relationship. Although both Oholah and OHOLIBAH are clearly connected with Heb. *'ōhel*, "tent," the precise meanings are obscure (see comms., esp. W. Eichrodt, *Ezekiel* [Eng. tr., *OTL*, 1970], pp. 321f.).

Both sisters entangled themselves in profligate harlotries — in political mésalliances with Assyria (vv. 5, 12) and in religious debaucheries in Molech worship (v. 37). Thus both Oholah and her lewd sister were marked for judgment (v. 49). Oholah was delivered to her lover Assyria (vv. 9f.), where she was shamefully treated. Her sister Oholibah failed to learn the lesson of the results of being faithless to Yahweh. She became even more corrupt in her inordinate lust for foreign entanglements than was her sister (vv. 11-21).

Ezekiel 16 presents a similar allegory on Israel's spiritual nymphomania, her unbridled lust for other lovers (gods).

R. B. ALLEN

OHOLIAB ō-hō'li-ab [Heb. *'oh°lî'āḇ*–'father's tent']; AV, NEB, AHOLIAB. A Danite, son of Ahisamach, appointed by Moses to assist Bezalel in supervising the construction of the tabernacle and its furniture. He and Bezalel are described as divinely inspired master craftsmen (Ex. 31:6; 35:34; 36:1f.; 38:23).

OHOLIBAH ō-hō'li-bə [Heb. *'oh°lîḇâ*–'my tent is in her'(?)] (Ezk. 23:4, 11, 22, 36, 44); AV AHOLIBAH. An opprobrious and symbolic name given by Ezekiel to Jerusalem (23:4) in an allegory depicting Judah's unfaithfulness to Yahweh and the judgment that awaited her. Like her sister OHOLAH (Samaria), Oholibah played the HARLOT with heathen nations — i.e., she formed political alliances with them and adopted their idolatrous practices, including religious prostitution. Like her sister, she was promised the judgment of destruction at the hands of her "lovers" (cf. vv. 22-35). For another allegory using harlotry as a symbol of Jerusalem, see ch. 16; cf. also Jer. 3:6-11.

N. J. O.

OHOLIBAMAH ō-hō-li-bä'mə [Heb. *'oh°lîḇāmâ*–'tent of the high place']; AV AHOLIBAMAH.

1. Daughter of Anah and granddaughter of Zibeon the Horite ("Hivite," Gen. 36:2); one of Esau's wives (vv. 2, 5, 14, 18, 25). Curiously, her name is missing from the lists of Esau's wives in 26:34 and 28:9. No satisfactory explanation has been given for these apparently conflicting traditions.

2. An Edomite clan chief (Gen. 36:41; 1 Ch. 1:52).

OIL [mainly Heb. *šemen*; Gk. *élaion*; but see below].

I. Terms.–By far the most common term is Heb. *šemen* <*šāman*, "to grow fat." It appears often with *zayiṯ*, "olive" (Ex. 27:20; 30:24). Heb. *šemen* refers to olive oil except in Est. 2:12, which specifically mentions oil of myrrh. Heb. *yiṣhār* <*yāṣhar*, "shine" (cf. Job 24:11), occurs less frequently (e.g., 2 K. 18:32). The etymological reference is to either the light-giving qualities of the oil or the brightness of newly pressed oil. Aram. *m°šaḥ* occurs twice (Ezr. 6:9; 7:22) and has the same root as "Messiah," "the Anointed One." Gk. *élaion* is the NT term, a neuter noun <*elaía*, "olive," related to Eng. "oil" (cf. Lat. *olea*, "olive").

II. Production.–Almost all the oil used by the Israelites came from the beautiful and plentiful olive tree. The olive harvest, which terminated the season, ripened about October-November, although for the fine-quality "beaten oil" (Heb. *šemen kāṯiṯ*, Ex. 27:20; Nu. 28:5; 1 K. 5:11) some of the berries were picked before they were fully ripe. They were then gently pounded in a stone mortar and carefully decanted to remove every possible impurity. This oil had special uses; see III.E,F below. Such a process would have been uneconomical for general use, so a different method was adopted for most of the berries. The ripe olives (black or almost so) were either shaken or beaten from the trees with long poles (Dt. 24:20), although sometimes they were picked by hand, and then carried in baskets on the head — or if necessary by asses — to the place of processing. The olives that remained on the trees were left for the poor (Dt. 24:20).

There were various methods for crushing or bruising the berries, which was necessary before the oil could be extracted. These included treading the fruit with the bare feet (Mic. 6:15) as for grapes, pounding in a mortar, and crushing with a stone roller. For larger quantities a mill was used.

The mill consisted of a circular stone basin about 2.5 m. (8 ft.) in diameter, fitted with a vertical millstone revolving around a central pivot. A long pole extended from the center of the vertical stone, which was attached to the pivot about a foot from the end. Two people pushing the other end of the beam could then revolve the stone around the lower basin. Some of the oil was squeezed out and collected in vats or jars; the remaining pulp was carried on reed or goat-hair mats or in baskets to the presses.

There were various kinds of presses. The most common probably consisted of a pole whose lower end was wedged into a hole in the rock and upper end weighted with stones. The crushed olives in their containers were placed on a "table" of stone, and the pole was placed on top. When pressure was exerted the oil would drip from the pulp into an excavated stone basin near the table. The oil was carefully refined by allowing it to settle for some time, and it was then stored. Another method was sprinkling the pulp with hot water so that the oil came to the surface and could easily be collected.

Domestic oil was stored in small jars or cruses (1 K. 17:12; 2 K. 4:2); oil for religious purposes such as anointing was often kept in horns (1 S. 16:13; 1 K. 1:39). Larger amounts were stored in 380- to 760-liter (100- to 200-gallon) jars or in cisterns (1 Ch. 27:28; 2 Ch. 11:11; Neh. 13:5-8). The royal treasury boasted large amounts (2 K. 20:13). A supply of pure oil was always kept in the temple (Josephus *BJ* v.13.6 [565]).

Traces of oil-processing equipment dating from earliest times to the beginning of the Christian era have been found in Palestine. The Mishnah (*Menahoth* viii.4) claimed that the oil of Tekoa was best.

III. Uses.–A. Commodity of Exchange. Since olive oil could retain its sweetness for years when properly stored, it served as good merchandise both for home trade (2 K. 4:7; Lk. 16:6) and export (Solomon annually gave 20,000 cors of "beaten oil" to Hiram of Tyre for his help in

building the temple [1 K. 5:11; cf. 2 Ch. 2:10]). See also Ezr. 3:7; Isa. 57:9; Ezk. 27:17; Hos. 12:1; Rev. 18:13.

B. Toiletry. Oil was and still is used abundantly as a cosmetic. In the desert regions of the East it kept the skin and scalp soft. Generally it was used after the bath (Ruth 3:3; 2 S. 12:20) and was often scented. It was also a useful protection against sunburn, flies, and vermin. On arrival at a feast the guests' feet were washed and their heads anointed with oil. Pliny claimed that it was a useful protective against the cold. See also Est. 2:12 ("oil of myrrh"); Ps. 104:15; Ezk. 16:9; Mic. 6:15; Lk. 7:46. To abstain from using oil was a sign of mourning (2 S. 14:2).

C. Food. Oil took the place of butter and animal fat to a very large extent in the diet of the people of Mediterranean countries. It was used with meal for making cakes (1 K. 17:12, 14, 16), although sometimes oil was poured over the cooked dough (*see* BREAD IV). It is often mentioned with other items of food such as wine (Rev. 6:6), fine flour (Lev. 2:1, 4f., etc.), and honey (Ezk. 16:13). See also Nu. 11:8; Prov. 21:17; Hag. 2:12.

D. Medicine. Olive oil has certain curative qualities and is still used in modern medicine. Celsus mentioned its use for fevers, and Josephus (*Ant.* xvii.6.5 [172]) said that Herod was given an oil bath in an attempt to cure him of his deadly disease. Isaiah wrote of it as softening wounds (1:6). The Good Samaritan mixed it with wine and poured the resultant antiseptic fluid into the wounds of the stricken traveler. Mk. 6:13 and Jas. 5:14 are concerned with its symbolic significance more than its curative qualities, though the latter are not to be excluded. The application of a substance in certain cases, such as the clay used by Jesus (Jn. 9:6), served to reinforce the evidence of the ear (the prayer for the sick man), and such may be the purpose of the use of oil in Jas. 5:14. On the other hand, anointing with oil may be a symbol of the life-giving Holy Spirit (1 Jn. 2:27) and thus comparable to laying on of hands.

E. Light. Only oil was used for lighting in biblical times. Most of the houses faced north because of the heat and glare of the sun, and the apertures in the walls were certainly not for lighting. Hence an oil lamp was kept burning continuously. Hundreds of specimens of lamps have been excavated, the most common being the saucer with a lip (*see* LAMP). A special supply of "beaten oil" was kept for the lamps in the tabernacle and the temple (Ex. 25:6; 27:20). See also Mt. 25:3f., 8.

F. Ritual. Apart from the lamps in the holy place mentioned above, pure oil was used in a number of religious rites, particularly offerings and consecration. "Beaten oil" was used in the continual burnt offering or offering by fire (Ex. 29:38-42; cf. Nu. 28:3-6. Oil had to be mixed with or poured over almost all food offerings (Ex. 29:40; Lev. 2:1ff.; Nu. 28:5; Ezk. 45:24). The exceptions were the sin offering (Lev. 5:11) and the jealousy offering (Nu. 5:15). Oil was also used in the offering for the purification of leprosy (Lev. 14:10ff.), the offering of firstfruits (Dt. 18:4; 2 Ch. 31:5; Neh. 10:37, 39 [MT 38, 40]; 13:5, 12), and tithes (Ezk. 5:14; 45:25).

The oil used for religious anointing is described in Ex. 30:22-25. It had a variety of constituents, including olive oil, and was used to consecrate the tabernacle and its furniture (Ex. 40:9ff.), priests (Ex. 29:7ff.; Lev. 8:12), Kings (1 S. 10:1; 1 K. 1:39; 2 K. 9:1, 3, 6; Ps. 89:20 [MT 21]), prophets (1 K. 19:16), and weapons of war (2 S. 1:21). Jacob's stone (Gen. 28:18) and pillar (35:14) were also anointed, although not with this special preparation.

G. Burial. The Egyptians, Greeks, and Romans used oil to embalm the dead, and the Jews also may have known the custom, although the OT does not mention it. Jesus referred to it in connection with His own burial; that oil, however, was only the basis of a more costly unguent (Mt. 26:12; Mk. 14:3-8; Lk. 23:56; Jn. 12:3-8; 19:40).

IV. Figurative Uses.–Abundant oil indicated general prosperity (Dt. 32:13; 33:24; 2 K. 18:32; Job 29:6; Joel 2:24), while lack of it signified economic distress (Joel 1:10; Hag. 1:11). It symbolized joy and gladness (Ps. 45:7 [MT 8]; He. 1:9), especially in connection with the gospel (Isa. 61:3). It is spoken of in connection with friendship and fellowship (Ps. 133:1f.) and restoration of strength (92:10 [MT 11]). Words of deceit are softer than oil (55:21 [MT 22]; Prov. 5:3). The wicked curse as readily as oil soaks into bones (Ps. 109:18, perhaps a reference to the medicinal use of oil; see the comms.). The careful use of oil indicates wisdom (Prov. 21:17, 20). It may also be a symbol of the Holy Spirit as life-giving agent, although this is not stated specifically (cf. 1 S. 16:13; Isa. 61:4).

J. A. BALCHIN

OIL, ANOINTING [Heb. *šemen hammišḥâ*] (Ex. 25:6; 29:7, 21; etc.). Also referred to as "holy anointing oil" or simply "holy oil" (Nu. 35:25; Ps. 89:20 [MT 21]).

In Ex. 30:22-33 Moses is instructed to use myrrh, cinnamon, aromatic cane, cassia, and olive oil to make a special anointing oil, holy to Yahweh "throughout your generations." It was to be used for anointing the tent of meeting with all its furnishings, the ark, and the altar, and for consecrating Aaron and his sons as priests. Any use of it with "ordinary men" was a grave offense (vv. 32f.). The instructions for its use are repeated in Ex. 40:9-15 and carried out in Lev. 8:10-13. Ex. 37:29 indicates that the craftsman Bezalel made the first anointing oil; the responsibility later passed to Eleazar son of Aaron (Nu. 4:16). In many passages the anointing oil is connected with the fragrant incense prepared for use in the tabernacle (Ex. 30:34-38). It is not stated whether the same oil was used for anointing kings in Israel, although Ps. 89:20 seems to claim this for David.

OINTMENT [Heb. *šemen* (Eccl. 7:1; 10:1), *merqāḥâ* ("pot of ointment," Job 41:31 [MT 23]), *tamrûq* (Est. 2:3, 9, 12); Gk. *mýron* (Jth. 10:3; Mk. 14:3-5 par.; Lk. 23:56) *myrismós* (Jth. 16:8 [LXX 7]) *smḗgma* (Sus. 13:17)]; AV also "things for purifying/purification," "washing balls"; NEB also COSMETICS, PERFUME, OIL, SOAP. Ointments were made from a basic olive OIL to which were added various ingredients, sometimes spice (Ex. 25:6; Lk. 23:56) such as cassia (Ex. 30:24), or PERFUME (Ex. 30:25; Jn. 12:3) such as from the pistachio nut (Mk. 14:3; Cranfield takes *pistikḗs* [RSV "pure"] as a transliteration of the Aram. *pištāqā'*, "pistachio nut"). The ingredients were crushed and mixed together, then boiled in the oil (hence the image in Job 41:31), which would absorb the odors of the ingredients.

An alabaster or glass flask or jar was used as a container (Mk. 14:3; Lk. 7:37), especially when the ointment was expensive (Mk. 13:3-5 par.), alabaster being considered

the best material for this use (Pliny *Nat. hist.* xiii.19; see A. McNeile, comm. on Matthew [1915], *in loc.*, for more references), as large disoveries of such jars show. Since the container was sealed, it was necessary to break the jar in order to pour out the contents (Mk. 14:3): doing so meant the whole contents were used at once (cf. *TDNT*, IV, 801), hence the criticism of the woman as extravagant.

Ointments had various uses and symbolic values: (1) as a body lotion to protect the skin in a dry climate (Sus. 13:17) and to add sexual attraction (Est. 2:3, 9, 12; Jth. 10:3f.; 16:8; cf. Cant. 1:3); (2) as an act of hospitality, especially when a guest's head and feet were parched from traveling in the sun on hot, dusty roads (Lk. 7:36-39: the failure of Jesus' host to provide ointment was a lack of hospitality); (3) as a part of the burial rite (Lk. 23:56).

Probably the most important passages describing the use of ointment are those in which a woman anoints Jesus (Mt. 26:6-13; Mk. 14:3-9; Lk. 7:36-50; Jn. 12:1-8). These passages have many similarities but also important differences, in both the setting and the significance of the anointing. In all the Gospels but Luke the theological significance of the anointing is Jesus' death, specifically His burial. The woman's act of devotion suggests (unwittingly for her) embalmment, thus prophesying Jesus' death. This is especially true in John's account (which is preceded by the Sanhedrin's condemnation of Jesus to death), where the *feet* are anointed: Brown suggests this is more likely for a dead person than for a living one, who would be anointed on the head, as in Mark's account. (The feet are anointed in Luke's account as well, first with tears, then perfume. Marshall explains this anointing of the feet as accidental, though kissing the feet was a sign of deep reverence, e.g., for teachers.)

Luke's account attaches a different significance to the anointing: it speaks of the woman's love and devotion as a consequence of having been forgiven. It is a sacrificial gift, costing almost a year's wages (though Luke does not mention the high cost, which in the other accounts leads to criticism of the woman), testifying to the strength of the woman's awareness of how much she has been forgiven. Lk. 7:47 speaks of her love as evidence of prior forgiveness, not as the grounds on which she is about to be forgiven (Marshall). Her deep devotion, showing keen awareness of much forgiven, stands in stark contrast to the host's perfunctory reception of Jesus, showing his lack of awareness of being forgiven or even of needing forgiveness. This contrast is illustrated by the parable of Lk. 7:41-43 (see Marshall).

Egyptian unguent dish of (fossilized) ivory with turquoise glaze (18th Dynasty). On its sides are scenes from the afterlife. Actual size: 2.5 cm. (1 in.) high, 7 cm. (2¾ in.) long, 4.4 cm. (1¾ in.) broad (Louvre)

OLD AGE. The nearest biblical equivalents of the modern definition of old age are Heb. *ḥeleḏ*, "life," "lifetime," and Gk. *hēlikía*, "full age" or "manhood." The Hebrews sometimes used *yôm*, "day," to express age, as with Jacob (Gen. 47:28), but in Job 5:26 *kelaḥ* means "ripe old age" (NEB "sturdy old age"). The adjective *zāqēn* also described an aged person (2 S. 19:32; Job 32:9; Jer. 6:11; etc.) as well as an "elder" of Israel.

The NT also used *presbýtēs* for "aged" (Tit. 2:2; Philem. 9); *presbýtis* for "aged woman" (Tit. 2:3); *gḗras* for "old age" (Lk. 1:36), and *probebēkṓs en hēmérais* for "advanced in days" (Lk. 2:36).

The orientals honored the aged (cf. Lev. 19:32) and greatly desired the blessings of old age, regarding them as a mark of divine approval (Gen. 15:15; Ex. 20:12; Job 5:26; etc.). Thus old age was anticipated in faith and hope (Ps. 71:9, 18). Superior wisdom was credited to the aged (Job 12:20; 15:10; 32:7); hence positions of authority were given to the "elders." R. K. H.

OLD MAN. *See* OLD NATURE.

OLD NATURE; OLD SELF [Gk. *palaiós ánthrōpos*–'old man']; AV OLD MAN; NEB also OLD HUMAN NATURE; "man we once were." Paul used the Greek phrase three times to signify the unrenewed, sin-dominated self, i.e., the person that the Christian was in Adam before conversion. Paul said that one's "old nature" has been both "crucified with Christ" (Rom. 6:6) and "put off" by a deliberate decision in response to the gospel summons (Eph. 4:22; Col. 3:9). This "putting off" is the negative side of "putting on the new nature," i.e., accepting the new identity offered in Christ through coresurrection with Him (cf. Col. 3:10 with 2:12f.; 3:1-4; Eph. 4:24 with 2:5f.). The two phrases together reveal the christological content and significance of repentance and faith, whereby people pass from "the present evil age" (Gal. 1:4), in which they bear Adam's image, are ruled by sin, and stand under judgment, into the new age, in which they bear Christ's image, share His life, and by His Spirit enter into knowledge of God and holiness of conduct (Col. 3:10; Eph. 4:24).

J. I. PACKER

OLD PROPHET. A prophet from Bethel during the reign of Jeroboam I (931-910 B.C.) and a central character in one of the most perplexing, and important, prophetic narratives in the OT (1 K. 13:11-32). The background for this narrative is 12:25–13:11, which relates Jeroboam's establishment of cult centers at Bethel and Dan, the denunciation of the Bethel altar by a "man of God" from Judah,

Jeroboam's initially violent reaction, divine intervention, Jeroboam's attempt at reconciliation through hospitality, and the Judahite's rejection of that hospitality. The Judahite begins his journey home, but the old prophet from Bethel, having heard of the incident at the altar, catches up with the Judahite and offers him hospitality (just as Jeroboam had). At first the Judahite refuses, but he relents when the old prophet claims (falsely) to have "a word of the Lord" countermanding the Judahite's previous "word of the Lord." After their meal the old prophet receives a genuine word from God, a judgment on the Judahite for disobeying God's original instructions. The Judahite departs, but a lion kills him on the way; when the old prophet hears of it he retrieves the body, buries it in his own grave, and instructs his sons to bury his body beside the Judahite's. The postscript to this story comes in 2 K. 23:15-18, during Josiah's reformation. At that time the prediction made by the man of God from Judah (1 K. 13:2f.), and confirmed by the old prophet from Bethel (vv. 31f.), was fulfilled.

This summary does not do justice to the many twists and turns of the story, nor to the story's details that have interesting parallels elsewhere in Scripture (see esp. Barth, Simon). The puzzling character of the story has exercised scholars for many years. It has been called a parable (Rofé, pp. 158-163), a midrash (Montgomery and Gehman, pp. 259-265), a prophetic legend (Gray, p. 324; Long, pp. 150f.), or a *vaticinium ex eventu* (prophecy after the event; see A. Guillaume, *Prophecy and Divination* [1938], pp. 421-23). Since the work of Noth, renewed scholarly interest in the so-called Deuteronomistic History has prompted much discussion of this narrative's place in that work (see Dozeman, Lemke, Long). The purpose of the narrative has also been debated: to denounce Jeroboam's cult (Jepsen), to distinguish between true and false prophets (Dozeman, Crenshaw), to demonstrate the supremacy of God's word (Simon, p. 86; cf. *CD*, II/2, 409).

Each of these proposals has some merit, but none explains the various features of the story as well as Barth's analysis, which shows how the story may be interpreted in the larger context of Scripture, how it fits into the central theme of Scripture. Barth treated this passage as an "illustration of the differentiating election of God," which he viewed as the "sum of the Gospel" (*CD*, II/2, 3) and therefore implicit in all Scripture (p. 341). The man of God from Judah — first elected to bear the divine word of judgment against the Bethel cult and then rejected for disobedience — and the old prophet from Bethel — first part of the rejected Bethel cult and then the bearer of the divine word of judgment against the Judahite — may be regarded as together prefiguring Jesus Christ, who was elected for rejection (pp. 351, 353f.). Thus 1 K. 13 is prophecy, fulfilled in Jesus Christ (p. 409).

Some have identified the man of God from Judah as the Iddo (or Yadon) mentioned in 2 Ch. 13:22 (see Josephus's embellished account in *Ant.* viii.8.5–ix [230-245]), while others have identified him with Amos (see Crenshaw, pp. 41f.; cf. Lemke, pp. 315f.). But such identifications must remain speculative.

OLEASTER ō-lē-as'tər. Hebrew *'ēṣ šemen*, which appears in 1 K. 6:23, 31-33; Neh. 8:15; Isa. 41:19 (and possibly 1 Ch. 27:28), is rendered in various ways by the versions (AV "olive tree," "pine," "oil tree"; RSV "olivewood," "wild olive," "olive"; NEB always "wild olive"); but in each case it probably refers to the narrow-leaved oleaster, *Elaeagnus angustifolia* L., a graceful shrub with fragrant flowers and grey-green leaves. The wood is hard and finely grained and was used in antiquity for images and idols. Although sometimes designated "wild olive," it bears no relation to the true olive. The oleaster yields an inferior oil, probably mentioned in Mic. 6:7. R. K. H.

OLIVE. *See* OLIVE TREE.

OLIVE BERRIES. *See* OLIVE TREE.

OLIVE, CULTIVATED [Gk. *kalliélaios*] (Rom. 11:24); AV GOOD OLIVE. *See* GRAFT; OLIVE TREE.

OLIVE, GRAFTED. *See* GRAFT; OLIVE TREE.

OLIVE TREE [Heb. *zayiṯ*; Ugar. *zt*; Gk. *elaía*]. One of the most valuable trees in ancient Palestine, the olive (*Olea europaea* L.) was often the only tree of any size in the locality. It was the first-named "king" of the trees (Jgs. 9:8), which attests to its economic importance in antiquity. *See also* ORCHARD; Plate 57.

The olive was apparently native to western Asia. It symbolized beauty, strength, peace (cf. Gen. 8:11), friendship, prosperity, and divine blessing. Jer. 11:16; Hos. 14:6 refer to its beauty, and Ps. 128:3 to its fruitfulness. The oil was used in the sacrificial offerings and as an emblem of sovereignty was prominent at coronations.

The olive is a slow-growing tree requiring years of patient work before attaining maturity. The branches of the wild olive are stiff and spiny, but the cultivated tree is a multibranched evergreen with a gnarled trunk covered with a smooth ash-colored bark. The leaves are leathery and oblong. The fleshy portion of the large, oval-shaped fruit is usually eaten raw and yields the valuable commercial olive oil. At maturity the tree can exceed 6 m. (20 ft.) in height and is difficult to kill merely by cutting, since new sprouts arise from the stump and roots to form as many as six new trunks. Old trees send up shoots in this manner; and if the parent trunk is undecayed, the shoots should be pruned away, since they are of the wild olive variety and need grafting before they can be of use.

The olive tree flowers about May, and when the blooms fall (Job 15:33) the fruit begins to form, maturing between September and December, depending on the locality. The trees are beaten with long sticks (Dt. 24:20), and the

immature fruit is left behind (cf. Isa. 17:6) for the poor to glean (Dt. 24:20). The yield is unpredictable, and in antiquity a poor season often brought great hardship.

Olive oil was widely used in cooking and as a cosmetic, fuel, unguent, and article of commerce. It was extracted in biblical times by crushing olive berries in the hollow of a stone (cf. Ex. 27:20) or treading them underfoot (Mic. 6:15). As larger stone presses were devised, they were set up by the olive yards. Donkeys carried baskets of berries to the presses, and the oil was extracted by a circular millstone revolving upright around a central pivot. *See* OIL.

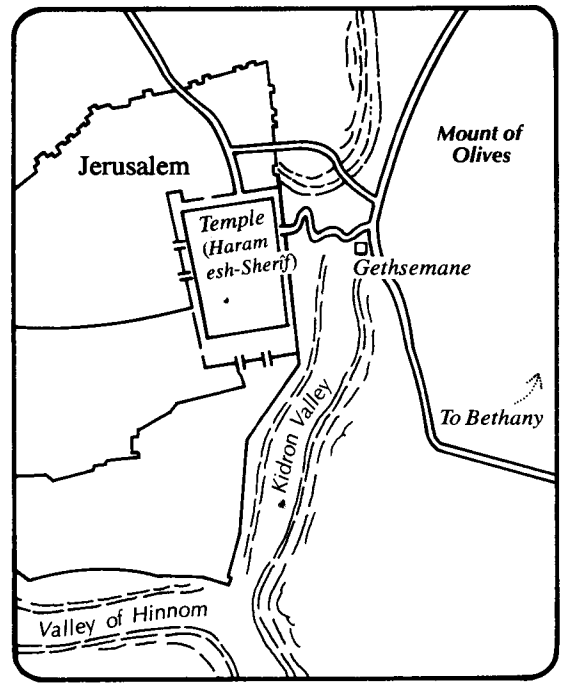
An abundant oil harvest signified divine blessing (Joel 2:24; 3:13 [MT 4:13]). People displayed faith when they could rejoice in the Lord despite losses among their olive trees (Hab. 3:17). The palmerworm or locust (Am. 4:9) devastated the olive tree along with other green vegetation. Although the trees are still plentiful in Palestine, they were much more abundant in antiquity.

In its wild state the olive fruit is small and worthless and is made plentiful only by grafting in branches from good stock. Paul stressed the obligations of the Gentiles to the true Israel (Rom. 11:17) by showing that, contrary to nature (11:24), God had grafted wild olive shoots onto good stock. *See also* GRAFT.

On 1 K. 6:23, 31-33; Neh. 8:15; Isa. 41:19; *see* OLEASTER.

R. K. H

OLIVE, WILD [Heb. *'ēṣ šemen*–'tree of oil'; Gk. *agriélaios*]; AV also PINE (Neh. 8:15). The Heb. *'ēṣ šemen*, which is rendered "wild olive" always by the NEB but only once by the RSV (Neh. 8:15), probably refers to the OLEASTER, which is not related to the true olive. The Gk. *agriélaios* (Rom. 11:17, 24), on the other hand, refers to the uncultivated OLIVE TREE. *See also* GRAFT.



OLIVES, MOUNT OF [Heb. *har hazzêṯîm*–'the mountain of olive trees' (Zec. 14:4), *ma'ᵃlēh hazzêṯîm*–'the ascent of olive trees' (2 S. 15:30); Gk. *tó óros tôn elaiôn*–'the mountain of the olive trees' (Mt. 21:1, etc.)]; **OLIVET** [Gk. *tó óros tó kaloúmenon elaiôn*–'the mountain called "of olive trees,"' (Lk. 19:29; 21:37), *toú elaiônos*–'of the olive grove' (= Olivet) (Acts 1:12; but cf. Bauer, rev., p. 248)]. The name of the ridge, or portion of the ridge, E of Jerusalem.

I. Names
II. Location and Description
III. OT
IV. NT
V. Subsequent History and Tradition
VI. Eschatology

I. Names.–The common name for the ridge, or a portion of it, is related to words for "olive, olive trees, olive grove," as indicated above. There is discussion concerning the reading in some texts, since Gk. *elaiôn* can be the pl. gen. of *elaía*, "olive tree," or the sg. masc. of *elaiôn*, "olive grove, orchard," but the meaning is scarcely affected. The plural "olive trees" certainly conveys the same idea as the singular "olive grove." The term "Olivet" comes from the Lat. *olivetum*, "olive grove." Josephus uses both "Olivet" (*toú Elaiōnos óros, Ant.* vii.9.2 [202]; *BJ* v.12.2 [504] and "the mount called 'Olivet'" (*tó Elaiōn kaloúmenon óros, BJ* v.2.3 [70]; *óros tó prosagoreuómenon Elaiōn, Ant.* xx.8.6 [169]. In T.P. *Taanith* 69a the same term is used, Aram. *ṭûr zêṯā'*, "mountain of the olive grove." The expression used in 2 S. 15:30 (RSV "the ascent of the Mount of Olives") doubtless refers to a road or path that received its name because it traversed the ridge in that area.

2 Kings 23:13 refers to high places which Solomon built "to the south of the mount of corruption" (*har hammašḥîṯ* <*šḥt*, "to destroy"). This name appears to be a play on words, based on a proposed original *har hammišḥâ*, "mount of anointing oil" (<*mšḥ*, "to anoint"). More recently the ridge has been called Jebel eṭ-Ṭûr ("the mountain of the tower [or mountain]"), Jebel Ṭur ez-Zait ("the mountain of the mount of olives"), and Jebel ez-Zaitun ("the mountain of the olive trees"). In Jewish usage it was also called "the mountain of lights," since it was the location of the signal fire that announced, by means of similar fires on other hills, the appearance of the new moon (T.B. *Rosh Ha-Shanah* 22b). In Christian usage it is sometimes called "mount of the Ascension," since it is designated in the NT as the location of Christ's ascension (Acts 1:9, 12).

II. Location and Description.–The ridge is a spur of the Central Mountain Range (*see* PALESTINE) about 3 km. (2 mi.) in length, which is divided from the principal range by Wâdī ej-Jôz, the Kidron Valley, and Wâdī en-Nâr (*see* JERUSALEM II.B). In turn the spur is divided into three summits by lesser valleys or depressions. From north to south these summits are: (1) Mt. Scopus, although this name is somewhat incorrect. Josephus referred to *Skopos* as a place (not a mountain; cf. *BJ* ii.19.4 [528], 7 [542]; v.2.3 [67]; 3.2 [106, 108]) that lay N of the city, calling it also "Lookout" (Gk. *Saphein* [*Ant.* xi.8.5 (329)], probably < Aram. *ṣāp̄în*; cf. Heb. *ṣōp̄îm*, "watchmen" [1 S. 14:16], whence the modern *har haṣṣōp̄îm*, where Hebrew University is located). G. A. Barrois pointed out that this name properly refers to the entire ridge (*IDB*, III, 597). Mt. Scopus today is identified with Ras el-Mesharif, 820 m. (2690 ft.), one of the highest points in the Jerusalem area. The summit to be included in the Mt. of Olives, then, would more correctly be Ras Abū Kharnub, location of the German hospice and possibly the site of Nob. South of this summit the ancient Roman road

to Jericho passed through a saddle, and the modern road from the northeast corner of the old city turns at this place to go to the Mt. of Olives.

(2) Jebel et-Ṭûr, 818 m. (2684 ft.) is the Mt. of Olives proper, located E of the temple area (Ḥaram esh-Sherîf, the Dome of the Rock). To the south of this summit there is a more noticeable saddle through which the modern highway to Jericho passes.

(3) Jebel Bāṭn el-Hawā ("the mountain of the womb of the wind"), possibly the Mt. of Corruption (2 K. 23:13; *see* CORRUPTION, MOUNT OF). It is generally identified as *Mons Scandali,* the mountain of offense. On the western flank of this hill the village of Silwān is located, while the southern end falls off to Wâdī en-Nâr, which is formed by the confluence of the Kidron and Hinnom valleys.

The main ridge is capped with nari (Arab. *ka'kuli*), beneath which is soft chalk and chalky limestone containing flint. The flint was used by settlements of paleolithic man; the limestone decomposed to form soil that is good for orchards, particularly olives. The western flanks receive moisture from the rains and dews, but the eastern flanks, facing the Wilderness of Judea and the Jordan Ghor, become suddenly arid. In the early morning, before heat haze forms, the view from the Mt. of Olives to the Jordan Valley, the Dead Sea, and the mountains of Moab is spectacular.

III. OT.–The account of David's flight from Absalom (2 S. 15–16) contains several geographical details. After "the king crossed the brook Kidron" (15:23), he "went up the ascent of the Mt. of Olives" (v. 30) and "came to the summit, where God was worshiped" (v. 32). Beyond the summit he "came to Bahurim" (16:5), and finally he "arrived weary at the Jordan" (v. 14). All the details cannot be precisely established, but there is no doubt that the route traversed the Mt. of Olives. The location of BAHURIM is not certain, but it would seem to be to the N or NE of the Mt. of Olives, and the route would probably be close to the Roman road to Jericho built a millennium later. The place of worship likewise cannot be established with precision. If Nob is to be located on Mt. Scopus (i.e., Ras Abū Kharnub), it is tempting to identify this with the place of worship (cf. 1 S. 21:1; 22:9-11).

Solomon built high places for Chemosh and Molech "on the mountain east of Jerusalem" (1 K. 11:7). These high places are further described as "east of Jerusalem, to the south of the mount of corruption" (2 K. 23:13). The suggestion that this name was deliberate irony, based on "mount of anointing oil" (cf. T.B. *Shabbath* 56b and comms. of Rashi and Radak), has been mentioned, and the location certainly agrees with that of the Mt. of Olives. The ascription of the name *Mons Offensionis,* "mount of offense," however, cannot be traced back before Quaresmius in the 17th century.

Ezekiel saw the glory of God depart from the temple to stand "upon the mountain which is on the east side of the city" (Ezk. 11:23). In his vision of the new Jerusalem, he saw this glory return and enter the temple (43:2-5). It is commonly understood that the mountain referred to is Olivet.

In Zechariah's description of the Day of Yahweh (Zec. 14), he states: "On that day his [i.e., the Lord's] feet shall stand on the Mount of Olives which lies before Jerusalem on the east; and the Mount of Olives shall be split in two from east to west by a very wide valley; so that one half of the Mount shall withdraw northward, and the other half southward" (14:4). He goes on to say, "On that day living waters shall flow out from Jerusalem, half of them to the eastern sea and half of them to the western sea; it shall continue in summer [the dry season] as in winter" (v. 8).

IV. NT.–Most of the NT references to the Mt. of Olives are connected with the final week of Jesus' earthly ministry ("Passion Week"). The only exceptions are Jn. 8:1 (the passage on the woman taken in adultery, the inclusion of which at this point in the Fourth Gospel is seriously questioned) and Acts 1:12 (cf. Lk. 24:50-53, the reference to the Ascension). It is reasonable to assume that the incident with Mary and Martha (Lk. 10:38-42) also occurred in Bethany on the eastern side of the Mt. of Olives, but the place is not named. The raising of Lazarus (Jn. 11) likewise took place at Bethany, which is described as "near Jerusalem, about fifteen stadia [2.8 km. or 1.8 mi.] distant" (11:18), but again, the Mt. of Olives is not named. Likewise, the feast "six days before the Passover" was held at Bethany (12:1; cf. Mt. 26:6-12; Mk. 14:3-9).

The feast at Bethany was followed the next day (Jn. 12:12) by the palm-strewn procession to Jerusalem (vv. 13-15). This is specifically located with reference to Bethphage and the Mt. of Olives (Mt. 21:1-11; Mk. 11:1-10; Lk. 19:28-39). As Jesus approached the city, He wept over it (Lk. 19:41-44) at a place traditionally marked by the Dominus Flevit chapel.

According to Lk. 21:37 Jesus did not lodge in Jerusalem during that week, but "at night he went out and lodged on the mount called Olivet." This is supported by other accounts. For example, the "cursing of the barren fig tree" took place the day after the Triumphal Entry as Jesus was returning to the city from Bethany (cf. Mt. 21:17-19; Mk. 11:11-14, 19f.). The Olivet Discourse on the signs of the end of the age (Mt. 24; Mk. 13) was given "on the Mount of Olives opposite the temple" (Mk. 13:3; cf. Mt. 24:3), as Jesus was returning from Jerusalem (Mk. 13:1; Mt. 24:1). He sent Peter and John "into the city" (Mt. 26:18; Lk. 22:8) to prepare the Passover, and when it was evening He and the other disciples observed the Feast (Mt. 26:20; Mk. 14:17; Lk. 22:14). After the meal they sang a hymn and "went out to the Mount of Olives" (Mt. 26:30; Mk. 14:26; Lk. 22:39; cf. Jn. 18:1). They came to a place called Gethsemane (Mt. 26:36) where Jesus underwent His agony, and later was seized by the soldiers and taken to trial (Jn. 18:12, cf. Mt. 26:47-57; Mk. 14:43-50; Lk. 22:47-54).

V. Subsequent History and Tradition.–The Mt. of Olives and the portion of the Kidron Valley which is immediately adjacent, often identified as the Valley of Jehoshaphat (cf. Joel 3:2 [MT 4:2]), are of primary significance to Jews, Christians, and Moslems (cf. W. S. LaSor). In the Haggadah this mount was the location where the dove that had been released by Noah plucked the olive leaf (Midr. *Gen. Rabbah* xxxiii.9; *Lev. Rabbah* xxxi.8; *Lam. Rabbah* ii.5). The ritual of the burning of the red heifer (cf. Nu. 19:2) was performed on the Mt. of Olives (Mish. *Parah* iii.6). Storehouses for the temple were located on the Mount (T.P. *Taanith* iv.5). The signal fire to indicate the new moon has already been mentioned; a similar signal was used for the time of the burning of leaven on the eve of Passover (T.B. *Pesahim* 14a). And because of the importance of the Valley of Jehoshaphat on judgment day, where the resurrection is to take place, in order for those who have been buried elsewhere to get to the site, "The Holy One, Blessed be He, makes subterranean passages for them, and they burrow and roll in them until they come under the Mount of Olives" (from M. Hacohen; cf. T.P. *Ketubim* 35b, quoted in C. G. Montefiore and H. Loewe, *Rabbinic Anthology* [repr. 1974], p. 600, no. 1651; cf. also G. F. Moore, *Judaism* [1927], II, 379f.). On the slopes of the mount overlooking the Kidron is a vast Jewish burial ground, reputed to be the largest Jewish cemetery in the world.

Christian tradition concerning the Mt. of Olives is largely

related to the NT events, which have been discussed above. In addition, the identification of "the exact spot" has often been added. (For sources of many of these traditions, cf. D. Baldi, pp. 383-426, 752-780, and notes in LaSor.) The identification of the Valley of Jehoshaphat with the Kidron is mentioned by the Pilgrim of Bordeaux (A.D. 333). The Breviary of Jerusalem (A.D. 530) is the first to identify the "Galilee" of Mt. 28:16 with a place on the Mt. of Olives known as *Viri Galilaei* (the words taken from Acts 1:11), now marked by a church. According to one tradition, mentioned by Rauwolf (A.D. 1573), this was where pilgrims to Jerusalem from Galilee encamped. A basilica erected by Constantine as a memorial to his mother Helena marked the spot of the Ascension; St. Paulinus Nolanus (A.D. 403) mentions the basilica and also the footprints left by Jesus, which are at present shown to the visitor to the Chapel of the Ascension. Aetheria (A.D. 395) mentions a church called the Martyrium under which was a grotto where the Lord taught the disciples. The foundations of the basilica are located at the Eleōna, where the Carmelite Cloister of the Pater Noster was later erected. On the walls of this cloister the Lord's Prayer is recorded in sixty languages (E. Hoade, p. 323). The chapel of the Ascension, at the summit of the mountain, was built in 1834 near the earlier Church of the Ascension which had been turned into a mosque in 1187. A stone with the footprints of Jesus is located in the octagonal chapel.

The site of Gethsemane is marked by a Franciscan complex, which includes the garden with its gnarled olive trees and the Church of All Nations with the Stone of the Agony in front of the altar. Because of the importance of the Valley of Jehoshaphat with reference to the resurrection, there is an extensive history of Christian burials, as well as Jewish and Moslem, on the Mt. of Olives. The anonymous Placentius (A.D. 570) mentions that James, Zebedee, and many of the saints lie in this mountain, and the tomb of Mary is mentioned in an Armenian description of the holy places dating from the 7th century. Grethenios (A.D. 1400) believed that the tombs of Joachim and Anna, parents of Mary, were in the same place that marked the tomb of Mary, and Greffin Affagrat (A.D. 1533) held that in addition there was another tomb "which some say to be that of St. Joseph, spouse of the virgin Mary." The Armenian Gethsemane, opposite that of the Fransciscans, is the present location of the tomb of Mary.

In Moslem tradition the Grand Assize of all mankind will take place in the Kidron Valley between the Dome of the Rock and the Mt. of Olives. Ibn el-Gaqih describes it: "The Mount of Olives faces the Mosque [el-Aqsa], and between them is found the Valley of Ben Hinnom, and from it 'Isa [Jesus] ascended to Heaven. And on the Day of Judgment all souls will be gathered to it and they will cross the bridge over the Valley of Jehoshaphat, some to Paradise and some to Gehennam." Burhān ed-Dīn el-Farkah of Damascus (d. 1329) wrote that the sanctity of the place "rests on a deed of Saffiya, the wife of the prophet who went up on the mount and prayed there." There are many Moslem tombs on the western slopes of Wâdī Sitti Maryam (the Arab name of that portion of the Kidron Valley E of Ḥaram esh-Sherîf).

VI. Eschatology.–The eschatological significance of the Mt. of Olives is based on the prophecies in Ezekiel and Zechariah, to which have been added Jewish, Christian, and Moslem interpretations and traditions. Ezekiel saw the glory of the Lord (in later Jewish terminology, the Shekinah) depart from the temple and stand above the Mt. of Olives (Ezk. 11:23). This, however, was not the end of the covenantal relationship, for in his vision of the new Jerusalem Ezekiel saw the glory of Yahweh coming "from the east" (where the Mt. of Olives was located, 11:23) and entering the temple, to make it His throne (43:2-7). When this prophecy is added to the vision of the Day of the Lord which Zechariah records (Zec. 14:1-9), the gathering of the nations before Jerusalem to destroy it and the coming of the Lord to the Mt. of Olives to destroy them become part of the eschatological scheme. If, then, the prophecy of the gathering of the nations in the Valley of Jehoshaphat (Joel 3:2) is added, the basis for Jewish, Christian, and Moslem beliefs about the importance of the Mt. of Olives in the end times is established.

OLYMPAS ō-lim'pəs [Gk. *Olympas*; perhaps an abbreviated form of *Olympiodōrus*] (Rom. 16:15). An unknown slave or freedman; one of five members of a Roman household church. Philologus and Julia may have been his parents, and Nereus and his sister were perhaps Olympas's siblings. J. J. HUGHES

OLYMPIAN ZEUS ō-lim'pē-ən zo͞os [Gk. *Dios Olympios*]; AV JUPITER OLYMPIUS. An epithet of the Greek god ZEUS, and the name given to the temple in Jerusalem by Antiochus Epiphanes in 168 B.C. as part of his attempt to hellenize the Jews (2 Macc. 6:2). The epithet came from Mt. Olympus in Thessaly, where Zeus was thought to preside over the court of the gods.

OLYMPIUS ō-lim'pē-əs (2 Macc. 6:2, AV). *See* OLYMPIAN ZEUS.

OMAERUS om-ə-ē'rəs (1 Esd. 9:34, AV). *See* AMRAM 2.

OMAR ō'mär [Heb. *'ômār* < *'āmar*–'speak'(?)]. Son of Eliphaz and grandson of Esau; an Edomite clan chief (Gen. 36:11, 15; 1 Ch. 1:36).

OMEGA. *See* ALPHA AND OMEGA.

OMEN [Heb. *naḥaš*–'divination,' 'enchantment,' 'omen'] (Nu. 24:1); AV ENCHANTMENT; NEB DIVINATION; [*nāḥaš*–'practice divination'] ("watch for an omen," 1 K. 20:33); AV "observe whether anything would come"; ['*ôṯ*–'sign'] (Isa. 44:25); AV TOKEN; NEB SIGN; [*môpēṯ*–'sign, wonder'] ("good omen," Zec. 3:8); AV "wondered at"; [Gk. *éndeixis*–'sign, omen, proof'] ("clear omen," Phil. 1:28); AV EVIDENT TOKEN; NEB SURE SIGN. Any phenomenon that is believed to portend a future event. Isa. 44:25f. affirms that Yahweh, the Creator and sovereign Lord of history, makes nonsense out of the predictions of the diviners (possibly the Babylonian *bārû* priests) based on "signs" or "omens," but brings to pass the words spoken by His messengers, the true prophets. On Nu. 24:1 and 1 K. 20:23, *see* MAGIC II.A (6). *See also* DIVINATION; PROPHECY I.C; II.C.

In two other passages "omen" has no divinatory con-

notations but simply denotes a sign of something that will happen in the future. Zec. 3:8 prophesies that Joshua (who has just been absolved of his guilt and made fit for the high priesthood) and his fellow priests are "good omens" (Heb. *môpēṯ*, usually translated "wonder"; see *TDOT*, I, 168), i.e., they are signs of a happy future, when God's grace will be more fully revealed in the messianic age. In Phil. 1:28 Paul states that the Philippian Christians' steadfastness in the face of persecution is a clear sign to their adversaries of their adversaries' ultimate destruction and the Christians' ultimate salvation, since it is proof that the Christians have God on their side (cf. Acts 26:14).

OMER ō'mər [Heb. *'ōmer*] (Ex. 16:16-36). A dry measure equivalent to a tenth of an ephah. *See* WEIGHTS AND MEASURES.

OMNIPOTENCE om-nip'ō-təns. The condition of being all-powerful; an attribute of God.

BIBLICAL BASIS OF THE DOCTRINE

I. Terms and Usage.–The noun "omnipotence" is not found in the English versions, nor is any noun exactly corresponding to it in the original Hebrew or Greek. The adjective "omnipotent" occurs in Rev. 19:6, AV, for Gk. *pantokrátôr*, "all-powerful." This word (RSV always "almighty") appears also in 1:8; 4:8; 11:17; 15:3; 16:7, 14; 19:15; 21:22; and 2 Cor. 6:18. It is found frequently in the LXX, especially in the rendering of the divine names Yahweh Sabaoth and El Shaddai.

II. The Concept in OT Names of God.–The formal conception of omnipotence as worked out in theology does not occur in the OT. The substance of the idea is conveyed in various indirect ways. The notion of strength is inherent in the OT conception of God from the beginning, being already represented in one of the two divine names inherited by Israel from ancient Semitic religion, 'El. According to one etymology strength is also inherent in the other name, 'Elohim, which by its plural form brings out the fulness of power in God and marks an approach to the idea of omnipotence (cf. *TDOT*, I, 273).

The concept of might occupies a prominent place in the patriarchal religion, as is indicated by the name characteristic of this period, 'El Shaddai (cf. Gen. 17:1; 28:3; 35:11; 43:14; 48:3; 49:24f.; Ex. 6:3). This name, however, designates the divine power as standing in the service of His covenantal relation to the patriarchs, as transcending nature and overpowering it in the interests of redemption.

Another divine name that signals this attribute is Yahweh Sabaoth (RSV "Lord of hosts"). This name, characteristic of the prophetic period, describes God as the king surrounded and followed by the angelic hosts (Heb. *ṣᵉḇā'ôṯ*). Since the might of an oriental king is measured by the splendor of his retinue, God is of great, incomparable power, the King Omnipotent (Ps. 24:10; Isa. 2:12; 6:3-5; 8:13; Jer. 46:18; Mal. 1:14).

Other names expressive of the same idea are 'Abir, "Strong One," compounded with Jacob or Israel ("Mighty One," Gen. 49:24; Ps. 132:2-5; Isa. 1:24; 49:26; 60:16), and 'El Gibbor, "God Hero" ("Mighty God," Isa. 9:6 [of the Messiah]; cf. Jer. 20:11). God is figuratively designated as *ṣûr*, "rock," in Dt. 32:4, 15, 18; Ps. 18:2, 31, 46 (MT 3, 32, 47); 19:14 (MT 15); 89:26 (MT 27); Isa. 17:10; 26:4; 30:29; Hab. 1:12. The specific energy with which the divine nature operates finds expression also in the name of 'El Ḥay, "Living God," which God bears over against the impotent idols (1 S. 17:26-36; 2 K. 19:4-16; Ps. 18:46; Jer. 23:36; Dnl. 6:20-27 [MT 21-28]). References to God's "hand," "arm," and "finger" anthropomorphically describe His power; e.g., in Dt. 5:15; 7:19; etc., God delivers Israel from Egypt by His "mighty hand" and "outstretched arm." *See* GOD, NAMES OF.

III. Other Modes of Expression.–Some of the attributes of God have an intimate connection with His omnipotence. Under this head, God's nature as Spirit and His holiness especially may be considered. The representation of God as Spirit in the OT does not primarily refer to the incorporeality of the divine nature but to its inherent energy. The physical element underlying the conception of Spirit is that of air in motion, and in this at first not the invisibility but the force forms the point of comparison. The opposite of "spirit" in this sense is "flesh," which expresses the weakness and impotence of the creature over against God (Isa. 2:22; 31:3).

The holiness of God in its earliest and widest sense (not restricted to the ethical sphere) describes that majestic, specifically divine character of His being, that which evokes in mankind religious awe. Holiness is not a single attribute coordinated with others, but a peculiar aspect under which all the attributes can be viewed, that which renders them distinct from anything analogous in the creature (1 S. 2:22; Hos. 11:9). In this way holiness becomes closely associated with the power of God, indeed sometimes becomes synonymous with divine omnipotence (Ex. 15:11; Nu. 20:12). In Ezekiel, especially, God's "holy name" is often equivalent to His renown for power, hence interchangeable with His "great name" (Ezk. 36:20-24). The Spirit as a distinct essence and as the agent and a person of the Godhead also represents the divine power (Isa. 32:15; Mt. 12:28; Lk. 1:35; 4:14; Acts 10:38; Rom. 15:19; 1 Cor. 2:4).

IV. Unlimited Extent of the Divine Power.–All these expressions predicate a great and unique power of God. Statements that explicitly affirm the absolutely unlimited extent of this power are rare. The reason, however, lies not in any actual restriction placed on this power, but in the concrete, practical form of biblical thinking, which prevents abstract formulation of the principle. The point to be noticed is that not one statement exempts anything from the reach of divine power. Nearest to a general formula come such statements as "Nothing is too hard for [God]" (Jer. 32:17; cf. Gen. 18:14) and "whatever the Lord pleases he does, in heaven and on earth" (Ps. 135:6; cf. 115:3). The thought is also phrased negatively: no one "can hinder" God from carrying out His purpose (Isa. 43:13); God's hand is not "shortened" (Nu. 11:23). NT expressions are "with God all things are possible" (Mt. 19:26 par. Mk. 10:27; Lk. 18:27) and "with God nothing will be impossible" (Lk. 1:37; RV "no word from God shall be void of power"). God's omnipotence is indirectly implied in the effect ascribed to faith (Mk. 9:23 par. Mt. 17:20, "all things are possible to him who believes"), because faith puts the divine power at the disposal of the believer. On its subjective side, the principle of inexhaustible power finds expression in Isa. 40:28: God is not subject to weariness. Because He is conscious of the unlimited extent of His resources, nothing is marvelous in His eyes (Zec. 8:6).

V. Forms of Its Manifestation.–The distinctive quality of the divine power that renders it omnipotent becomes apparent chiefly through its forms of manifestation. The divine power operates not merely in single concrete acts but is comprehensively related to the world. In nature and in history, in creation and in redemption, this power produces, controls, and directs everything that comes to pass. Nothing in the realm of actual or conceivable things can withstand it (Am. 9:2f.; Dnl. 4:35); it extends and

masters all details of reality, even to the minutest and most recondite sequences of cause and effect (Mt. 10:30; Lk. 12:7). Nothing happens by chance (1 S. 6:9; cf. v. 12; Prov. 16:33). Divine power need not operate through second causes; it itself underlies all second causes and makes them what they are.

Divine power is creative, producing its effect through a mere word (Gen. 1:3ff.; Dt. 8:3; Ps. 33:9; Rom. 4:17; He. 1:3; 11:30). Among the prophets, Isaiah emphasized this manner of the working of God's power in its immediateness and suddenness (Isa. 9:8; 17:13; 18:4-6; 29:5). All the processes of nature are ascribed to the causation of God (Job 5:9ff.; 9:5ff.; 38–39; Isa. 40:12ff.; Am. 4:13; 5:8f.; 9:5f.), especially God's control of the sea (Ps. 65:7 [MT 8]; 104:9; Isa. 50:2; Jer. 5:22; 31:35).

God also has power over the processes of history. He sovereignly uses not merely Israel but all nations, even the most powerful, e.g., the Assyrians, as His instruments for the accomplishment of his purpose (Am. 1:1–2:3; 9:7; Isa. 10:5-15; 28:2; 45:1; Jer. 25:9; 27:6; 43:10). The prophets do not ascribe to God merely relatively greater power than the gods of the nations; rather, the prophets show that His power extends into the sphere of the nations, and they ignore the heathen gods in estimating His might (Isa. 31:3).

Even more than the sphere of nature and history, that of redemption reveals the divine omnipotence, from the point of view of the supernatural and miraculous. Thus Ex. 15 celebrates the power of God in the wonders of the Exodus. It is God's exclusive prerogative to do wonders (Job 5:9; 9:10; Ps. 72:18); He alone can make "a new thing" (Nu. 16:30; Isa. 43:19; Jer. 31:22). In the NT the great embodiment of this redemptive omnipotence is the resurrection of believers (Mt. 22:29; Mk. 12:24) and specifically the resurrection of Christ (Rom. 4:17, 21, 24; Eph. 1:19ff.). God's power is evidenced in the whole process of redemption (Mt. 19:26; Mk. 10:27; Rom. 8:31; Eph. 3:7, 20; 1 Pet. 1:5; Rev. 11:17).

VI. Its Significance for Biblical Religion.–The significance of the idea of divine omnipotence may be traced along two distinct lines. First, it appears as a support of faith. Second, it is productive of that specifically religious state of consciousness which Scripture calls "the fear of the Lord." Omnipotence in God is that to which human faith addresses itself. In it lies the assurance that He is able to save, as in His love lies the assurance that He is willing to save (Ps. 65:5f. [MT 6f.]; 72:18; 118:14-16; Eph. 3:20).

As to the other aspect of its significance, the divine omnipotence in itself, and not merely for soteriological reasons, evokes a specific religious response. This is true, not only of the OT, where the element of the fear of God stands comparatively in the foreground, but remains true also of the NT. Even in Our Lord's teaching, the prominence given to the fatherhood and love of God does not obscure the transcendent majesty of the divine nature, including omnipotence, which is made a potent factor in the cultivation of the religious mind (Mt. 6:9). The beauty of Jesus' teaching on the nature of God consists in His keeping the exaltation of God above every creature and God's loving condescension toward the creature in perfect equilibrium, and His making this exaltation and condescension fructified by each other. Religion is more than the inclusion of God in the general altruistic movement of the human mind; it is a devotion at every point colored by the consciousness of that divine uniqueness in which God's omnipotence occupies a foremost place.

HISTORY OF THE DOCTRINE

I. Church Fathers
II. Schoolmen and Reformers
III. Modern Theologians

I. Church Fathers.–The doctrine of God's omnipotence as expressed by the fathers derived naturally from the doctrine of God's creation of the world and sovereignty over it. One of the earliest Christian writings, the Didache (10:3), adopted the concept of God as almighty, which found its way into the Apostles' Creed. 1 Clement has a passing reference to God's mastery over all things (8:2). Justin Martyr introduced attributes from contemporary philosophy — "the everlasting, ineffable, impassible, and ingenerate nature of God" (*Apol.* 1.9) — which strongly reinforced the idea of God's omnipotence, while Theophilus (*Ad Autolycum* ii.4) found a clear manifestation of the divine power in God's making of all things precisely as He desired and willed. Against the Gnostic theory of a limited demiurge as the maker of this world, Irenaeus stressed the equation of the Creator with the true God, for "otherwise the title 'Almighty' will be reduced to nought" (*Adv. haer.* ii.1.5). He, too, located the supremacy of the divine power in the ability of God not merely to fashion existing materials but also to furnish the very stuff of the world itself, thus making all things out of nothing (ii.10.4).

In the 3rd cent. Origen raised a central question about the omnipotence of God when discussing the rationality of prayer (*On Prayer* 5): if God in His almightiness ordains all that happens, what place can there be for prayer? According to the appointed order of the universe, the sun, for example, will rise in any case, and therefore praying that it do so seems pointless. Human responsibility, however, implies freedom of action, which in turn apparently imposes a limit on the omnipotence of God. To avoid this implication, Origen suggested that God's omnipotence must extend to the freedom of human choice and providentially comprehends it. Prayer and other acts that presuppose and express human freedom constitute elements in the overruling of divine omnipotence.

In the more developed fourth-century theology represented, e.g., by Cyril of Jerusalem in his *Catecheses,* the divine omnipotence comprises seven main elements. First is the noncontingency of the divine will; God in His willing is not subject to any extraneous events, fate, or chance (4.5). Second is God's absolute supremacy; He has "none mightier than Himself, no successor to drive Him out of His kingdom" (6.7). Third is the universal extent of the power of God; it covers all things and all people and cannot be restricted, e.g., to heaven alone or simply to the soul (8.1-3). Fourth is the divine forbearance of evil; God's omnipotence is not limited by opposition but teleologically tolerates it in order to achieve the greater victory (8.4). Fifth is the divine overruling of all things to serve both God and His people; in this regard Cyril warned his congregation against saying that money or property is the devil's and taught them to regard them as something that may and should be used for God (8.5-7). Sixth is the analogous expression of the divine omnipotence in the powerful works of the natural world that God has made (9.2). Seventh is full manifestation of God's omnipotence in the Son and the Spirit no less than in the Father, since the Son and the Spirit stand outside the things that merely serve God (8.5). The plenitude of power is seen in the Son as the Creator and as the risen, ascended, and returning Lord (11.10, 22f.), and is seen in the Spirit as the all-powerful Giver whose ministry includes baptism, tongues, healing, preaching, sanctification, and forgiveness (16.22; 17.14-38).

At the end of the patristic age John of Damascus added the following points to the discussion. First, he equated

the divine omnipotence more completely with the operation of the Holy Spirit, whom he described as living, endowed with will, self-moving, active, exercising His power in the prosecution of every design in accordance with His will (*De fiae orthodoxa* i.7). Second, he related God's power very strictly to His will, by which alone it is measured; omnipotence is the ability of God to do what He wills to do (i.7). Third, he linked omnipotence to the Greek term for God, *théos*, derived from the word for "run," *théō*, thus denoting God's power to run through all things, and care for them (i.9). John, too, found the power of God preeminently displayed in the divine victory over death in the death of Christ (4.4,11), though he did not bring out as clearly as Gregory of Nyssa had done in his *Oratio catechetica* (24) that the divine omnipotence is so great that at the cross it could take the paradoxical form of impotence and thus express itself with all the greater force.

II. Schoolmen and Reformers.–Medieval theology saw some significant but not uniformly helpful developments in the relation to the divine omnipotence. Anselm in his *Proslogion* tackled the apparent contradiction that Scripture says the omnipotent God cannot do certain things, e.g., tell a lie or change His nature. He pointed out that this implies consistency rather than contradiction, for things such as lying are negative and passive expressing impotence rather than omnipotence. God's inability to do things of this kind is thus the greater evidence of His almightiness (7).

Thomas Aquinas raised the issue of limitation in a different way. Asking whether God can do things that He has not done as well as those that He has, Aquinas concluded that He can; thus he came to distinguish between God's absolute power, which covers such acts, and His ordained power, which extends to that which He has in fact done. While intrinsically correct, this answer should not be reinterpreted as positing a distinction between God's extraordinary power, manifested, e.g., in miracles, and His ordinary power, expressed in the natural order. Nor should it be used to set up for God a new group of impossibilities relating, not to Himself, but to His creation, e.g., to a reversal of the law of noncontradiction or of the established mathematical structure of the universe (cf. *Summa Theol.* i.25.3). In such matters the real issue is not whether there can be such a reversal, but why there cannot be. God's omnipotence is not limited by an external impossibility imposed upon Him; the restriction is rather that of an impossibility that He Himself imposes. Later nominalists like William of Occam developed this principle to the point of suspending everything — the structure of morality as well as reality — on the omnipotent but apparently arbitrary will of God, whose free decision it is that right should be right and wrong wrong, but who hypothetically might have reversed things.

Among the leading Reformers, Calvin, in his comparatively few references to the divine omnipotence, retained the emphasis upon God's will but did so with a much more theological than philosophical concern. He evinced no interest in the inner omnipotence of God and focused on its outer manifestation, which he discovered extensively in creation and providence (*Inst.* i.5.1, 9). He believed firmly that Satan and sinners in no way limit this divine power by their opposition, for it is "dependent upon God's sufferance," so that even Satan can "do only those things which have been divinely permitted to him," "his malice being directed to the fulfilment of divinely appointed goals" (i.18.1). Like the fathers, Calvin saw the power of God at work specifically in the ministry of Christ in creation and redemption (i.13.12f.) and also in the work of the Holy Spirit in regeneration, sanctification, and the bestowal of power, grace, and gifts (i.13.14). For Calvin omnipotence meant God's continuous action whereby all that occurs does so by His knowledge and deliberation (i.16.3). He made this point succinctly in the *Genevan Catechism* when answering the question of the meaning of almightiness: "Not only has God might He does not exercise but He also has all things under His power and hand" (*LCC*, XXII, 93f.). In his *Brief Reply* (*ibid.*, p. 339) he stressed that even reprobation manifests God's omnipotence, for "as regards themselves the wicked did what God did not will, but as regards God's omnipotence they were by no means to prevail against His will, so that through them, even as they did what was against the will of God, His will was done." God would never let evil be done — a thought of Augustine is echoed here — "unless as omnipotent he were able to make good out of the evil."

III. Modern Theologians.–During the 17th cent. theologians devoted much time and energy to discussions of the divine omnipotence. Heidegger defined it as the attribute by which God adequately carries out whatever He wills in accordance with His nature (cf. H. Heppe, *Reformed Dogmatics* [Eng. tr. 1950; repr. 1978], p. 95). Mastricht equated it with the very essence of God and therefore described it as eternal, infinite, and independent (in Heppe, pp. 99f.). What is possible or impossible for it is determined by the divine glory; all that will glorify God is possible, while what will not is impossible. What lies outside the divine omnipotence is thus nonexistent. Heidegger advanced the important thesis that speaking of impossibilities in no way implies a limitation of divine omnipotence but rather suggests the perfection of God's power, which God Himself will never contradict. Being "omnipotent is doing what he wills, not suffering what He does not will" (*ibid.*, pp. 101f.). Braun argued similarly that God cannot perform contradictions because "they are nothing" and would overturn His perfection. Thus God cannot produce an infinitely perfect creature, for infinite perfection includes the necessity of existence, which by nature a creature cannot have (*ibid.*, pp. 102). Heidegger agreed with Aquinas in distinguishing between absolute and ordered (or actual) power. He also saw a difference between power *(potentia)* and the right by which God uses it *(potestas)*, which itself subdivides into absolute right, God's absolute power of free will, and ordered right, i.e., God's right to act in accordance with what He has ordained. In all these discussions omnipotence is handled exclusively in relation to the world and not to God in Himself, so that although Wollebius (*Compend* I, 3) found omnipotence in the inner work of God, this tended to be isolated from creaturely action and narrowly equated with the divine omnicausality.

The problem of God's general omnipotence was compounded by the vigorous controversy that arose in the later 16th and 17th cents. over the relation between divine and human action in grace and salvation. Arminianism and Molinism seemed to many to threaten a strict doctrine of divine omnipotence. Although Molinism had a more direct bearing on the related question of divine omniscience (or prescience), it carried the implication of a restriction of the divine power. Both Arminians and Molinists tried in different ways to protect human freedom against divine almightiness, but in so doing they seemed to weaken the almightiness. Thus they produced a reaction that tended to equate the divine omnipotence with an abstract predetermination of all things but that compensated by allowing for a system of conditions within the fixed and irrevocable order (F. Gomarus, *Works* [1644], III, 34), the "secondary causes" to which the Westminister Confession refers in 3.1.

Emphasis on human freedom caused divine omnipo-

tence to be questioned in the 17th cent. and the problem of evil intensified the challenge in the eighteenth. The problem, which was not new, took the simple form that evil ought not be to be present in the creation of an all-loving and all-powerful God. For a time the philosophical optimism of Leibniz's *Theodicy* — that all is ultimately for the best in the best of all possible worlds — offered an apparently satisfactory solution to the difficulty, although with a hint at some limitation of the Creator's power. But the Lisbon earthquake in the middle of the century and Voltaire's merciless ridiculing in his *Candide* of a facile and fatuous optimism revived the uneasiness of the period and opened the door, not to the concept of a limited or hostile God, but to doubt about the very existence of God.

An enhanced concern for the humanity of Jesus produced a new line of thought in the 19th century. The so-called kenotic Christology associated with I. A. Dorner, G. Thomasius, F. H. R. Franck, and C. Gore divided the divine attributes into two groups: attributes of majesty (e.g., omnipotence), and more moral or personal attributes (e.g., love). Christ in His incarnation supposedly abandoned the attributes of the first group, which were incompatible with real humanity, but retained those of the second group, which were compatible. In the person of Christ, who did the work of revelation and reconciliation, God thus surrended Himself to external forces in a supreme and victorious expression of His never-failing love.

Early in the 20th cent. the philosopher A. N. Whitehead, attempting to provide Christianity with a metaphysical basis, advocated a concept of God in which He shares in the universal process of being and thus suffers from necessary restriction even while exercising a certain measure of control. Whitehead's views received little support at first, but the representatives of process theology revived them virtually unchanged in the second half of the century. In the meantime the horrors of National Socialism forced Dietrich Bonhoeffer to a radically new vision of the omnipotence of God in the light of Christ's crucifixion. Human autonomy, he thought, renders God "weak and powerless in the world, and that is precisely the way, the only way, in which he is with us and helps us" (*Letters and Papers from Prison* [Eng. tr. 1971], pp. 360ff.). Yet Bonhoeffer was not surrendering the divine omnipotence. In a manner similar to that of Gregory of Nyssa, and to early concepts and illustrations of Christ's redeeming work, he was redefining it as an omnipotence that paradoxically triumphs in and through its very impotence.

Karl Barth expressed the same thought in his massive treatment of reconciliation in *CD*, IV (esp. IV/1). He, too, stressed that in order to exercise His lordship in our behalf, God in Christ became a servant (§59), and that in order to carry through His decisive action, He submitted voluntarily to the Passion. Nowhere, in fact, did God demonstrate His omnipotence more fully than by showing that even in the impotence of suffering and death He could still be almighty and accomplish His own purposes, not just in spite of, but precisely by means of the apparently victorious might of His opponents. Taking up the same point in *Christian Faith* (Eng. tr. 1979), H. Berkhof selected what he took to be a more accurate title, "The Defenseless Superior Power," for the section (21) that an older dogmatician would have put under the heading "Omnipotence."

Barth, however, realized that this insight could not altogether supersede the older theologians' view of omnipotence. He took care to avoid onesidedness by balancing the newer view of divine power with a treatment of divine constancy in a long subsection (§ 31.2) of *CD* II/1. He fully considered the biblical data and earlier theological discussions and made a number of significant points. (1) God as omnipotent differs from the changeable, which cannot do all that it wills and can do what it does not will. (2) God as omnipotent differs from the unchangeable, which suffers from a restriction of possibility and thus from final incapacity. (3) God as omnipotent is Lord of all creation, whether in life or in death. (4) God defines His own omnipotence rather than being defined by it. (5) Omnipotence covers both physical possibility *(potentia)* and moral or legal possibility *(potestas)*. (6) It extends to more than God's past, present, and future works and hence should not be too directly equated with His omnicausality. (7) Omnipotence is God's power to be Himself and to live in and by Himself as Father, Son, and Holy Spirit; it is thus delimited by His essence and nature. (8) It is power over everything; and thus it limits and determines all other powers, is not itself limited or determined by them, and is always absolute power (God's ongoing choice) even though it may take the form of ordered power (a particular choice). (9) It is the omnipotence of the divine knowing, willing, and loving as these are known by revelation. (10) Its revelation-defined character dispels all erroneous notions that it impairs or threatens the independence of the creature. (11) Omnipotence is known as active, historical, and personal power; the particularity of its exercise protects it against abstract generality but in no way excludes its universality as power over all things. (12) Its exercise has a specific center or location from which God lovingly knows and wills and which in Barth's view is ultimately to be identified as Jesus Christ, the personal Logos or incarnate Word. "This centre is the omnipotent Word by which He created and governs and upholds the world, withstands its rebellion, and restores it to Himself .... omnipotently [even in the impotence of the cross and Passion as well as in the naked power of the Resurrection] bringing it back to peace with Himself."

The full import of Barth's presentation does not seem to have been grasped by theologians who are preoccupied with the complementary ideas of human power, divine weakness, and cosmic process. Barth reminds us that while some redefinition or refocusing may be necessary, the themes with which earlier scholars wrestled have a genuine biblical basis and still deserve a place in theological study. There is no need, of course, to follow Barth slavishly either in his assessment of others or in his own reconstruction. There is a need, however, to keep all aspects of the divine omnipotence in view, to hold God's omnipotence in balance with its specific expression in the work of the incarnate Son, to work out the concept in authentically biblical terms, and to protect it against the constant pressure of dissolution in philosophical abstractions.

G. W. BROMILEY

OMNIPRESENCE om-ni-prez' əns. The condition of being present everywhere at once; an attribute of God.

BIBLICAL BASIS OF THE DOCTRINE

I. Terms and Usage.– Neither the noun "omnipresence" nor the adjective "omnipresent" occurs in Scripture, but the idea that God is everywhere present is throughout presupposed and sometimes explicitly formulated. God's omnipresence is closely related to His omnipotence and omniscience: that He is everywhere enables Him to act everywhere and to know all things, and conversely, through omnipotent action and omniscient knowledge, He has access to all places and all secrets (cf. Ps. 139). Thus conceived, the attribute is only the correlate of the monotheistic conception of God as the Infinite Creator, Preserver and Governor of the universe, immanent in His works as well as transcendent above them.

II. Philosophical and Popular Ideas.–The philosophical idea of divine omnipresence is that of exemption from the limitations of space, subjectively as well as objectively. God is subjectively omnipresent in that His consciousness and knowledge do not depend on sense perception of the spatial world. He is objectively omnipresent in that space relations in the created world do not limit His presence and operation. This metaphysical conception of transcendence above all space is, of course, foreign to the Bible, which in regard to this, as in regard to the other transcendent attributes, clothes the truth of revelation in popular language and speaks of exemption from the limitations of space in terms and figures derived from space itself. Thus the very term "omnipresence" in its two parts "everywhere" and "present" contains a double inadequacy of expression, for both parts express spatial concepts.

The mode of divine omnipresence is another point at which the popular nature of the biblical teaching must be kept in mind. In treating the concept philosophically, it is important to distinguish among its applications to the essence, to the activity, and to the knowledge of God. The Bible does not draw these distinctions in the abstract. Although sometimes it refers to the pervasive immanence of God's being, it frequently contents itself with affirming the univeral extent of God's power and knowledge (Dt. 4:39; 10:14; Ps. 139:6-16; Prov. 15:3; Jer. 23:23f.; Am. 9:2).

III. Divine Omnipresence of Being.–The last observation has given rise to the theories of a mere omnipresence of power or omnipresence by an act of will, as distinct from an omnipresence of being. But plainly such a distinction is foreign to the intent of the biblical statements. The writers of these passages contented themselves with describing the practical effects of omnipresence without reflecting upon the difference between these and the attribute's ontological aspect; the latter is neither affirmed nor denied. Jer. 23:23f. shows that no denial of the omnipresence of being is intended. The first statement in v. 24, that no one can hide from God, expresses the omnipresence of v. 23 in terms of omniscience; in the second statement in v. 24, that God fills heaven and earth, omniscience finds ontological expression. The presence of God's being in all space is similarly affirmed in Ps. 139 (cf. v. 2 and vv. 13-16 with vv. 7-12) and in 1 K. 8:27; 2 Ch. 2:6; Isa. 66:1; Acts 17:28.

IV. Omnipresence in Earlier Parts of the OT.–Since omnipresence is the correlate of monotheism, it is said to be lacking in the earlier parts of the OT by those who date the development of monotheism to the prophetic period (8th cent. B.C.). It is undoubtedly true that the earliest narratives speak very anthropomorphically of God's relation to space, of His coming and going. But it does not follow from this that the writers conceived of God as being circumscribed by space. Their anthropomorphic statements refer to God's visible presence in theophany, not to His presence in general. If one inferred from the local elements in these descriptions that God is limited by space, then one might with equal warrant, on the basis of the physical elements in the descriptions, impute to the writers the view that God is corporeal.

V. Special Redemptive and Revelatory Presence of God.–The theophanic form of appearance does not disclose what God is ontologically in Himself but merely how He condescends to appear and work for the redemption of His people. It establishes a redemptive and revelatory presence in definite localities without detracting from the divine omnipresence. Hence theophany is not confined to one place; the altars built by the patriarchs to commemorate theophanies coexisted in several places, each and all offering access to the special divine presence.

It is significant that as early as the patriarchal period these theophanies and the altars connected with them were confined to the Holy Land. This shows that the idea embodied in them had nothing to do with a crude conception of the deity as locally circumscribed but marked the beginning of that gradual restoration of the gracious presence of God to fallen humanity, the completion of which forms the goal of redemption. Thus God is said to dwell in the ark, in the tabernacle, on Mt. Zion (Nu. 10:35; 2 S. 6:2; 2 K. 19:15; Ps. 3:4 [MT 5]; 99:1); in the temple (1 K. 8; Ps. 20:2 [MT 3]; 26:8; 46:5 [MT 6]; 48:2 [MT 3]; Isa. 8:18; Joel 3:16, 21 [MT 4:16, 21]; Am. 1:2); in the Holy Land (1 S. 26:19; Hos. 9:3); in Christ (Col. 2:9); in the Church (Jn. 14:23; Rom. 8:9, 11; 1 Cor. 3:16; 6:19; Eph. 2:21f.; 2 Pet. 2:5); in the eschatological assembly of His people (Rev. 21:3).

The presence of God in heaven must similarly be understood not as an ontological presence but as a specific theocratic manifestation (1 K. 8:27; Ps. 2:4; 11:4; 33:13-15; 104:3; Isa. 6:1-3; 63:15; 66:1; Hab. 2:20; Mt. 5:34; 6:9; Acts 7:48f.; Eph. 1:20; He. 1:3). How little the idea of heavenly presence is meant to exclude God's presence elsewhere may be seen in references to God's self-manifestation both in heaven and in the earthly sanctuary (1 K. 8:26-53; Ps. 20:2-6 [MT 3-7]; Am. 9:6). It has been alleged that the idea of God's dwelling in heaven marks a comparatively late attainment in the religion of Israel, of which no trace in the preprophetic period can yet be discovered (so B. Stade, *Biblische Theologie des AT* [1905], I, 103f.). But a number of passages in the Pentateuch bear witness to the early existence of this belief (Gen. 11:1-9; 19:24; 21:17; 22:11; 28:12). God comes, according to the belief of the earliest period, with the cloud (Ex. 14:19f.; 19:9, 18; 24:15; Nu. 11:25; 12:5). That even in the opinion of the people God's local presence is an earthly sanctuary need not have excluded Him from heaven follows also from the unhesitating belief in His simultaneous presence in a plurality of sanctuaries. Since in the biblical view God's presence is not confined to a certain sanctuary, it follows that He can be simultaneously in heaven and on earth (cf. H. Gunkel, comm. on Genesis [*Hand Kommentar zum AT*, 4th ed. 1917], p. 157).

VI. Religious Significance.–Both from a generally religious and from a specifically soteriological point of view the omnipresence of God is of great practical importance for the religious life. In the former respect it guarantees that the actual nearness of God and a real communion with Him may be enjoyed everywhere, even apart from the places hallowed for such purposes by a specific gracious self-manifestation (Ps. 139:7-12). In the other respect divine omnipresence assures the believer that God is at hand to save in every place where from any danger or foe His people need salvation (Isa. 43:2). *See also* PRESENCE; PRESENCE OF GOD.

HISTORY OF THE DOCTRINE

I. Patristic Period
II. Scholastic Period
III. Reformation Period
IV. Modern Period

I. Patristic Period.–The earliest Christian theologians accepted without difficulty the doctrine of God's omnipresence. The doctrine of creation enabled them to resist any temptation toward a localization of God (even in heaven), while their belief in the Incarnation plainly ruled out any absence of God from His world. Hence the fathers'

strong insistence on divine transcendence, which for the Apologists had a philosophical as well as biblical support, found its most comfortable expression in the thought of the God whom nothing contains but who Himself contains all things and is thus present in and to all things.

The attribute of noncircumscription (or incomprehensibility) played an important role in the patristic understanding of omnipresence. It formed a powerful argument against the idolatry of the age and the related concept of localized deity. Clement of Alexandria, e.g., pointed out that God has no bodily shape and cannot therefore be circumscribed (*Misc.* vii.5). Origen contended for the same truth in his discussion of the statement "who art in heaven" in the Lord's Prayer (*On Prayer* xxiii.1f.). This phrase cannot mean that heaven contains God, for "all things are contained and held together by Him." He said that the ascension of Jesus similarly must be understood in a mystical, not a spatial, sense. Localization implies divisibility, materiality, and corporeality and thus contradicts God's nature as disclosed by the Bible. So firmly did the fathers resist God's localization, except in the Incarnation, that they hazarded the dubious paradox that God is both everywhere and nowhere, which would seem to imply omniabsence as well as omnipresence.

A later theologian like Cyril of Jerusalem (4th cent.) formulated the divine omnipresence more cautiously. He established God's transcending of space and time by stating that God is not circumscribed in any place. The heavens as well as the earth are His work. Transcendence, however, does not mean absence. On the contrary, being transcendent, God is "in all things and about all" (*Catecheses* iv.5). Cyril repeated the point in a list of the divine perfections, arguing that as the creator of space God knows no limitation by it, existing in all things but circumscribed by none (vi.8). Because God cannot be contained, Hilary of Poitiers could say at the same period that apart from revelation He "is far beyond the power of comprehension" (*De trinitate* i.7). Augustine echoed Hilary's thought (*Trinity* xv.13 [22]). John of Damascus forcefully asserted the underlying divine transcendence (*De fide orthodoxa* 1.4), explaining that where God is said to be in a place, the meaning is that "His operation is plainly visible, God Himself being wholly in all things and over the universe." Like his predeceessors, John related omnipresence to incorporeality. He recognized, of course, that God could take a body and thus restrict His omnipresence, as in the incarnation of the Son. But this does not imply essential coporeality or impair God's eternal omnipresence by nature.

II. Scholastic Period.–Among the early schoolmen, Anselm of Canterbury expressed his belief that all spiritual beings are uncircumscribed and eternal but that God is uniquely so, for He alone is everywhere and always (*Proslogion* 13). While accepting God's omnipresence, Peter Lombard introduced a threefold differentiation of His presence: (1) a general presence in all things, (2) a more excellent presence by grace in holy spirits, and (3) a most excellent presence of all in the man of Jesus, not by the grace of adoption but by the grace of union. Although this distinction raised problems of its own, it offered a safeguard against pantheism and protected the uniqueness of the presence of God in the incarnate Son.

III. Reformation Period.–In keeping with the general tenor of reformation theology, Calvin offered no abstract discussion of the omnipresence of God. He related the divine presence to the work of salvation, first through the covenant people, then through Christ and the Holy Spirit. He stated, e.g., that in the benefits conferred by Christ "the pious mind perceives the very presence of God" (*Inst.* i.13.13). Similarly, he claimed, that the Holy Spirit, "everywhere diffused, sustains all things. . . . Because he is circumscribed by no limits, he is excepted from the category of creatures; but in transfusing into all things his energy . . . he is indeed plainly divine" (i.13.14). The thought of the constant presence of God gave Calvin confidence in the trials of life (iii.2.21). He saw prayer to God as an invoking of the presence "of his providence . . . , and of his power . . . and of his goodness . . . and, in short, it is by prayer that we call him to reveal himself as wholly present to us" (iii.20.2).

A special problem that greatly exercised the Reformers was that of the nature of the presence of Christ's humanity at the Lord's Supper. They agreed that in virtue of His omnipresence Christ was present according to His divine nature. They also agreed that the medieval idea of a real presence of the human nature by transubstantiation, i.e., the replacement of the substances of bread and wine by those of Christ's physical body and blood, should be rejected. Luther, however, continued to confess a real presence of the body and blood alongside the bread and wine. He defended this conviction on the ground that because Christ's human and divine natures interact as one essence, His divine nature enables His human nature also to be omnipresent. Beginning with Zwingli, the Reformers resisted this form of ubiquitarianism, as they called it. They denied neither the presence of the divine Christ nor, indeed, the presence of the human Christ through the Holy Spirit to faith, but they rejected both the literal presence of the body and blood and the christological understanding on which it rested.

IV. Modern Period.–The Protestant theologians of the 17th cent. discussed omnipresence with great thoroughness. Heidegger related it to infinity, of which eternity was the temporal aspect and omnipresence the spatial aspect (in H. Heppe, *Reformed Dogmatics* [Eng. tr. 1950; repr. 1978], pp. 64f.). Polanus equated omnipresence with immensity, which signifies that the divine essence is not "limited, circumscribed, or bounded by any place" but penetrates and fills all places everywhere and is present to all things (in Heppe, pp. 64f.). Riissenius, however, distinguished between the two, describing immensity as an eternal attribute but relating omnipresence to creation as "a dwelling locally which exists in time" (in Heppe, pp. 64ff.).

Alsted said that omnipresence is a containing of all places rather than a dwelling in them. S. van Til described omnipresence as "the very actuality of existing related to corporeal creatures." Polanus insisted that it excludes spiritual and supernatural as well as physical circumscription, God being neither in a circumscriptive place, like corporeal beings, nor in a definitive place, like such intelligent forms as souls or angels. Riisseninus observed that, although God is also outside the world, He is not in some other space; rather, He is outside it "So far as all the spaces in the world do not exhaust the immensity of God." Polanus added the further delimitation that omnipresence differs from infinite extension, since God is both within all things and outside all things. Marck preferred the term immensity to omnipresence because the latter suggests that the divine immeasurability is tied to creation instead of being essential to God. Mastricht tried to make the same point by stating that the divine omnipresence is not just operative but is an essential all-presence in the world (in Heppe, pp. 66-69).

The Lutheran and Reformed theologians of this age continued a sharp debate on ubiquity in relation to the eucharist. Gerhard argued for the eucharistic presence of Christ's body and blood in virtue of the hypostatic union,

although he conceded that the human Christ has no omnipresence by essence or nature. Polanus, however, accepted the ubiquity of the whole Christ, both human and divine, but laid great stess on the humanity of Christ by taking its limitation more seriously, by locating it at the right hand of the Father between the Ascension and the Second Coming, and by finding at the Supper only a presence by the Holy Spirit, along the lines suggested by Calvin and his generation.

During the 18th cent. an upsurge of pantheism or panentheism, due in no small measure to the influence of Spinoza, brought with it a tendency to play down God's transcendence in favor of His immanence. Schleiermacher represented this development in *Reden über die Religion* (Eng. tr., *On Religion,* 1958) in the first edition of which (1799) he replaced the term God by the tendentious term *universum.* Even when God's omnipresence was not so strictly related to the world, an abstract and negative concept of infinity tended to crowd out the thought of the personal God who is over all things and yet also present with and to them. Thus Schleiermacher in his more mature work, *Der christliche Glaube* (1821-22; Eng. tr., *Christian Faith,* 1928), defined eternity and omnipresence as a timeless causality that conditions time and space and everything in them (§§52f.). Similarly, Biedermann in *Dogmatik* (1869, p. 627), saw in these divine qualities the internal essence of the ground of the world. Wickelhaus in *Lehre der heiligen Schrift* (1892, p. 339) advocated much the same understanding when he spoke of the retreat of time and space and the manifestation of an essence that is utterly other. Almost imperceptibly, then, a type of impersonal transcendence replaced the equally impersonal immanence of the pantheistic equation. Omnipresence was incidently included among the attributes of majesty that Christ supposedly renounced in His self-emptying *(kenosis),* but in contrast to omniscience and omnipotence it played little role in the development of kenotic Christology.

The 20th cent. brought with it an interesting but not very successful attempt to banish spatial terminology from the doctrine of God. This attempt naturally accepted the divine omnipresence but disputed the idea of a transcendent God who is "up or out there." In contrast, it had a tendency, as in Paul Tillich, to depersonalize or subjectivize the divine omnipotence by finding God especially "in here" as the ground of individual being. By focusing on the divine immanence in this form, the movement had a definite contribution to make, but it suffered from two disadvantages. Superficially, it could not avoid a measure of self-contradiction, for spatial terminology is not avoided by the replacing of God out there by a God within. More seriously, this concept of the immanence of God could hardly do justice to the full range or the implied sovereignty of God's omnipresence, although J. A. T. Robinson (*Honest to God* [1963], p. 46) conceded that God is in principle more and other than "the infinite and inexhaustible depth of the ground of all being."

A more conservative and comprehensive treatment of omnipresence may be found in Barth's stimulating discussion in "The Perfections of the Divine Freedom" in *CD,* II/1, § 31.1. Barth paired God's omnipresence with His unity and grounded the former in the divine uniqueness and simplicity (p. 461). But he also regarded omnipresence as the presupposition of God's sovereignty, there being in creation "no presence without His presence: a presence with all the wealth and unity of His perfections; His presence as Himself in the sequence and simplicity in which He is Himself." Barth pointed out that the concept of divine omnipresence adds to that of divine unity the idea of a universe to which God is present (p. 462). Divine omnipresence also helps to show how God is love, an idea that cannot be explained simply by His unity. Yet the relation between omnipresence and love is reciprocal, for God does not have to be present to others but is so in the freedom of His love. Thus there would be no other at all were it not for the love of God, but there would also be no love were not God freely present to the other (p. 463).

Diverging from the dogmaticians of the 17th cent. Barth opposed the subsuming of omnipresence and eternity under the more general category of infinity, which does not properly define the nature of God (p. 464). Attempting his own definition, Barth advanced the thesis that omnipresence is the perfection in which God is present and in which, distinct from all else and preeminent over it, "He possesses His own place" (p. 468). He discarded the idea of God's nonspatiality, arguing that God is spatial "always and everywhere in such a way that His spatiality means the manifestation and confirmation of His deity" (pp. 468f.). Along these lines he found he could not agree with the conclusion that God is nowhere as well as everywhere. "There is nowhere where God is not, but He is not nowhere.... He is always somewhere... from there seeking man and there to be sought by man, there in His remoteness and from there drawing near, present here as the One who is there" (p. 471). Yet Barth accepted the thought of a differentiated presence, i.e., God's freedom to be present in a specific way (pp. 472f.).

As characteristics of God's omnipresence Barth listed (1) His possession of a space that is exclusively His own and in which He is present exclusively to Himself (p. 474); (2) His presence in creation, which is both general, invoking distinction and relationship, and special, occurring in the context of the divine work of revelation and reconciliation (pp. 471f.); and (3) The Incarnation, as the "basis and constituent centre" of the special presence (pp. 483f.). The final form of God's omnipresence led Barth to the positive conclusion that the God who is present to Himself as the Triune God, being present in Jesus Christ, not only gives humanity created space from His own uncreated and creative space but also gives it His own space. He thus "reveals Himself to be omnipresent in Himself, and as such outside Himself, in His special work (whose centre is His action in... the man Jesus Christ) and in His general work which is subservient to this special work, finding its goal and completion and therefore its meaning and origin in it" (p. 487).

By way of appendix Barth considered the ubiquitarian issue in eucharistic theology. He tried to preserve the qualities and avoid the defects of both sides by (1) agreeing to a human presence, the presence of the undivided Mediator, (2) differentiating the spiritual mode of this presence from that of the proper and original presence at God's right hand, and (3) insisting that in this mode He is no less here than there, but "really present both there and here, in both places the whole Christ after His divine and also after His human nature" (p. 490).

G. W. BROMILEY

OMNISCIENCE om-nish'əns. The condition of knowing everything; an attribute of God.

BIBLICAL BASIS OF THE DOCTRINE

I. Terms and Usage.–The term itself does not occur in Scripture, either in its nominal or its adjectival form. The OT expresses omniscience in connection with such words as Heb. *daʿaṯ,* "knowledge," *bînâ* and *tᵉbûnâ,* "understanding," and *ḥokmâ,* "wisdom." "Seeing" and "the eye," "hearing" and "the ear" occur as figures for God's knowledge, just as "arm," "hand," and "finger" are used in metaphors of His power. The NT terms that express

omniscience are Gk. *ginōskein* and *eidénai*, "know," *gnōsis*, "knowledge," and *sophía*, "wisdom."

II. Tacit Assumption and Explicit Affirmation.–Scripture everywhere teaches the absolute universality of the divine knowledge. The historical books, although lacking any abstract formula and occasionally referring anthropomorphically to God's knowledge of things (Gen. 11:5; 18:21), nonetheless presuppose divine omniscience in relating how God knows what people are doing, hears prayer, and discloses the future (1 S. 16:7; 23:9-12; 1 K. 8:39; 2 Ch. 16:9). Explicit affirmation of omniscience is made in the Psalter, the Prophets, the wisdom literature, and the NT. This is due to the increased internalizing of religion, by which its hidden side, to which the divine omniscience corresponds, receives greater emphasis (Job 26:6; 28:24; 34:21f.; Ps. 139:12; 147:5; Prov. 15:3, 11; Isa. 40:26; Acts 1:24; He. 4:13; Rev. 2:23).

III. Extension to All Spheres.–The absolute universality of divine knowledge is affirmed with reference to the categories that comprise all that is possible or actual. God knows His own being, possessing perfect consciousness of it; the unconscious finds no place in Him (1 Jn. 1:5). God also knows what exists outside Himself, the created world in its totality. This knowledge extends to small as well as to great affairs (Mt. 6:8, 32; 10:30); to the hidden heart and mind of mankind as well as to that which is open and manifest (Job 11:11; 34:21, 23; Ps. 14:2; 17:2f.; 33:13-18; 102:19f. [MT 20f.]; 139:1-4; Prov. 5:21; 15:3; Isa. 29:15; Jer. 17:10; Am. 4:13; Lk. 16:15; Acts 1:24; 1 Thess. 2:4; He. 4:13; Rev. 2:23). It extends to all the divisions of time, the past, present, and future alike (Ps. 56:8 [MT 9]; Isa. 41:22; 44:6-8; Jer. 1:55; Mal. 3:16). It embraces that which is contingent from the human viewpoint as well as that which is certain (1 S. 23:9-12; Mt. 11:22f.).

IV. Mode of Divine Knowledge.–Scripture connects God's knowledge with His omnipresence. Ps. 139 is the clearest expression of this. Omniscience is the omnipresence of cognition (Jer. 23:23ff.). It is also closely related to God's eternity, which makes Him in His knowledge independent of the limitations of time (Isa. 43:8-12). God's creative relation to all that exists is represented as underlying His omniscience (Ps. 33:15; 97:9; 139:13; Isa. 29:15). His all-comprehensive purpose forms the basis of His knowledge of all events and developments (Isa. 41:22-27; Am. 3:7).

God's knowledge of things, however, is not identical with His creation of them, as Augustine and others have suggested. The act of creation, while necessarily connected with the knowledge of that which is to be actual, is not identical with such knowledge or with the purpose on which such knowledge rests, for in God, as well as in man, the intellect and the will are distinct faculties. In the last analysis, God's knowledge of the world has its source in His self-knowledge. Since the world is a revelation of God, all that is actual or possible in it is a reflection in created form of what exists uncreated in God. Thus the knowledge of the creation becomes a reproduction of the knowledge of the mind of God (Acts 17:27; Rom. 1:20). The divine knowledge of the world also is like the divine self-knowledge in that it is never dormant.

The Bible nowhere represents God as attaining to knowledge by reasoning but everywhere as simply knowing. For embracing the multitude and complexity of the existing world He does not depend on such mental processes as abstraction and generalization. From what has been said about the immanent sources of the divine knowledge, it follows that such knowledge is not a posteriori derived from its objects, as all human knowledge based on experience is, but is exercised without receptivity or dependence. In knowing, as well as in all other activities of His nature, God is sovereign and self-sufficient. In cognizing the reality of all things He needs not to wait upon the things but draws His knowledge directly from the basis of reality as it lies in Himself. Although God's knowledge of Himself and knowledge of the world are thus closely connected, it is nevertheless important to distinguish between them and also between His knowledge of the actual and His knowledge of the possible. These distinctions mark off the theistic conception of omniscience from the pantheistic conception. God's life is not bound up with the world in such a way that He has no scope of activity beyond the world.

V. God's Omniscience and Human Free Will.–Since Scripture includes in the objects of divine knowledge the issue of human exercise of free will, the problem arises how the contingent character of such decisions and the certainty of divine knowledge can coexist. It is true that the knowledge of God and the purposing will of God are distinct, and that only the latter determines the certainty of the outcome of an event. Consequently the divine omniscience adds or detracts nothing in regard to the certainty; it does not produce but presupposes this certainty. But precisely because omniscience presupposes certainty, it appears to exclude every conception of contingency in the free acts of human beings and thus to render them in every essence determined. The knowledge of the issue of an act must have a fixed point of certainty to terminate upon, if it is to be knowledge at all. Those who make the essence of freedom absolute indeterminateness must, therefore, exempt this class of events from the scope of divine omniscience. But this is contrary to all the testimony of Scripture, which distinctly makes God's absolute knowledge extend to such acts (Acts 2:23).

Some have attempted to construe a peculiar form of divine knowledge, the *scientia media*, which would relate to this class of acts specifically. It would be distinguished from the *scientia necessaria*, which has for its object God Himself, and the *scientia libera*, which terminates upon the certainties of the world outside God, as determined by His free will. This *scientia media* would then be based on God's foresight of the outcome of the free choice of man. It would involve a knowledge of receptivity, a contribution to the sum total of what God knows that would derive from His observation of the world process. That is to say, *scientia media* would be knowledge a posteriori in essence, although not in point of time. It is, however, difficult to see how such a knowledge can be possible in God, when the outcome is psychologically undetermined and undeterminable. The knowledge could originate no sooner than the determination originates through the free decision of a person. It would, therefore, necessarily become a posteriori knowledge in time as well as in essence. The appeal to God's eternity as bringing Him equally near to the future as to the present and enabling Him to see the future decisions of human free will as though they were present cannot remove this difficulty, for when once the observation and knowledge of God are made dependent on any temporal issue, divine eternity itself is thereby virtually denied. Nothing remains but to recognize that God's eternal knowledge of the outcome of the free will choices of human beings implies that there enters into these choices, notwithstanding their free character, an element of predetermination, to which the knowledge of God can attach itself.

VI. Religious Importance.–Divine omniscience is most important for the religious life. The very essence of religion as communion with God depends on His all-comprehensive cognizance of the life of every person at every moment. Hence the irreligious characteristically deny the omni-

science of God (Ps. 10:11f.; 94:7-11; Isa. 29:15; Jer. 23:23; Ezk. 8:12; 9:9). Especially along three lines this fundamental religious importance reveals itself: (1) it lends support and comfort when the pious suffer from misunderstanding and misrepresentation; (2) it acts as a deterrent to those tempted by sin, particularly secret sin, and becomes a judging principle to all hypocrisy and false security; (3) it furnishes the source from which mankind's desire for self-knowledge can obtain satisfaction (Ps. 19:12 [MT 13]; 51:6 [MT 8]; 139:23f.).

HISTORY OF THE DOCTRINE

I. The Early Church
II. The Medieval Church and The Reformation
III. The Modern Era

I. The Early Church.–The omniscience of God, like His omnipotence and omnipresence, stands in close relationship to His creative sovereignty. In making and controlling the world, God in His wisdom knew and knows all things in it. He can thus take into account all factors and possibilities and will not be surprised, checked, or defeated by any eventuality. Omniscience is both a prerequisite and a consequence of the divine omnipotence.

The early fathers accepted the omniscience of God without question, but it was left to later theologians to state and formulate the doctrine more specifically. Cyril of Jerusalem (4th cent.), e.g., stressed two aspects in his *Catecheses*. First, God in His omniscience knows the intents of the human heart. Thus the heart's response must be sincere, for a mere assent of the lips cannot deceive God. Discerning "who is genuine and who is only acting a part," God "is able both to keep the sincere safe and to make a believer of the hypocrite" (*Procatechesis* 17). Second, the divine omniscience extends to all things and implies the noncontingency of the divine will. God "knows all things . . . not being subject to any sequence of events or nativity or chance or fate" (*Catecheses* iv.5). Cyril kept the divine omniscience in balance by noting that all God's attributes are perfect, so that omniscience is the complete knowing not only of His wisdom but also of His goodness and greatness. God possesses "wisdom and loving-kindness in like measure," "not abounding on one side and deficient on another."

John of Damascus developed another aspect of the omniscience of God by relating it to His beneficent providence. Knowing all things, God provided ("foresaw") for all of us according to our needs. This applied to revelation too, which God adapted to what we can bear, making known to us "what it was expedient for us to know" (*De fide orthodoxa* i.8). The preexistent element in the divine knowledge also claimed John's attention. Discussing the possible derivation of the word *theós* (God) from *theásthai* (to see), he explained that nothing escapes God: "He saw all things before they came to pass" and "conceived of them independently of time" (i.9). For John the divine knowledge included the divine self-knowledge. Whereas God is incomprehensible and undefinable for us, He has "a clear vision of Himself" (i.13). As regards creation, God sees all things at once "with His divine, all-seeing, and immaterial eye"; hence He does not experience the temporal (or spatial) limitation of knowledge familiar to His creatures.

The strong element of foreknowledge in God's omniscience raised problems with regard to human freedom. Origen dealt with the obvious question whether there is any point in bringing petitions to God if He already knows our needs and the way to meet them (*On Prayer* 5). He said that rational creatures have been given the gift of self-movement, which implies self-will, and that this freedom, far from conflicting with God's knowledge, is included within it: "With all else it has been known to God" (6). John of Damascus, tackling the same general issue, accepted the premise that "every rational being is free" (*De fide orthodoxa* ii.3). He then explained the divine predestination in terms of the divine omniscience. In moral choices "God in accord with His foreknowledge justly cooperates with those who in right conscience choose the good," but He "abandons those who choose and do what is bad." Hence John distinguished sharply between foreknowledge and predestination. God foreknows all things but does not predestine them all, predestination being "the result of the divine command made with foreknowledge" (i.30). Some matters, of course, do not ultimately depend on human decision, e.g., the attainment of salvation, and here predestination and foreknowledge coincide, for "through His foreknowledge God has already decided all things beforehand in accordance with His goodness and justice." It will be seen that John, like Cyril, avoided any isolation of God's omniscience from His other perfections.

II. The Medieval Church and the Reformation.–Although the theologians discussed omniscience in great detail, they did not greatly develop the doctrine. Thomas Aquinas, for example, related it to providence in much the same way as Origen and John of Damascus. That God knows all things may imply necessity in some areas but not in all, since contingent causes are provided for some effects just as necessary causes are for others (*Summa Theol.* i.22.3). In matters of salvation, Thomas recognized the divine freedom of election. Foreknown merits are not the cause of predestination but at most only the effects. The number of the elect is materially foreordained as well as foreknown by God (i.23.5).

The Reformers decisively changed the later scholastic emphasis on philosophical rather than theological considerations in discussions of the divine omniscience. Although the Reformed confessions gave brief lists of the attributes of God, they tended to subsume God's omniscience under His wisdom. Thus the *French Confession* (1559) described God as "all-wise, all-good, all-just, and all-merciful" (art. I), the *Belgic Confession* (1561) called Him "perfectly wise" (art. I), the *Scots Confession* (1560) spoke of His "eternal wisdom" (art. I), and the *Anglican Articles* (1571) stated that God is "of infinite power, wisdom, and goodness" (art. I). Only the later and more expansive *Westminster Confession* (1647) developed the theme of omniscience, but even this document did not employ the term in the statement "His knowledge is infinite, infallible, and independent upon the creature, so as nothing is to Him contingent or uncertain" (art. II, 2).

Among the leading Reformers, Calvin evinced little interest in the theoretical issues of omniscience. He tied the knowledge of God very strictly to His will, which is the cause of all things. Rejecting the idea of a purely passive or permissive will of God in the case of wicked human acts (*Inst.* i.18.1), Calvin made several important deductions from the divine omnivolence (all-willingness). First, the righteousness of what God does must be accepted. Whatever He wills, by the very fact that He wills it, must be considered righteous even when human beings do not understand it (i.17.2). Second, the will of God may appear to be manifold, but in reality it is a unity (i.18.3). Third, God uses the wicked for His own purpose, which He Himself knows, although this does not mean that the

wicked are "excusable, as if they had obeyed his precept" (i.18.4). Hidden though the ways of God may often be, one can have confidence that His wisdom or all-encompassing knowledge informs all that He wills and does.

When he turned to the more direct matters of salvation, Calvin made two points of great significance. First, election rests on God's will alone, so that He does not have to give reasons for it that mankind can understand (iii.23.11). Second, foreknowledge and foreordination are both to be placed in God, but they must neither be confused nor one subordinated to the other. Calvin plainly equated foreknowledge with omniscience: "We mean [by it] that all things always were, and perpetually remain, under his eyes, so that to his knowledge there is nothing future or past, but all things are present... in such a way that he not only conceives them through ideas,... but he truly looks upon them and discerns them as things placed before him." This knowledge extends "throughout the universe to every creature." Predestination, in contrast, is God's eternal decree for each person, eternal life being foreordained for some and eternal damnation for others (iii.21.5). Calvin discussed the order of foreknowledge and foreordination in his commentary on Acts (2:23). Foreknowledge comes first, since God contemplates what He will ordain before He ordains it. But Luke put God's decree first "to teach us that God neither wills nor decrees anything without having long before directed it to its proper end." In this way Scripture refutes the error that "even while God foresees everything, he lays no constraint upon his creatures." "It belongs to God, not only to know the future, but also to ordain by his will whatever he wants to be done." With special reference to salvation Calvin ruled out any idea of God's electing being simply an acceptance "of those whom he foresaw as worthy of his grace." The truth according to Rom. 8:28-30 is that "God's knowing the elect rests upon his own good pleasure, because he foreknew nothing outside himself which led him to will the adoption of sons." By means of the divine will Calvin thus linked the all-knowing God to His self-knowing.

III. The Modern Era.–The dogmatic theologians of the 17th cent. regarded knowledge and will as the essence of the life of God. They defined knowledge as cognition and intelligence, seeing in it the perfection of God's intellect whereby He uniquely understands and knows all things outside Himself — past, present, future, and possible (Heidegger, in H. Heppe, *Reformed Dogmatics* [Eng. tr. 1950; repr. 1978], p. 69). This knowing is absolute and comprises knowledge of God Himself as well as of things outside Himself. As in the case of all the divine attributes, God is Himself knowledge; He does not merely have the capacity for it, as human creatures do. Knowledge, then, is for God neither a potentiality nor a faculty but an act in which He does not simply have knowledge but knows. In consequence His knowledge is eternal and intuitive (Heppe, p. 70). He does not take up things from outside into His knowledge,which would be to change, expand, or modify Himself. As a single act, God's knowledge is not successive but simultaneous, not acquired through a survey of things but itself conditioning them and arising out of the divine self-knowledge (Keckerman, in Heppe, p. 70). In a comprehensive definition God's omniscience may thus be described as "one, absolutely simple, unconditioned, infinite, simultaneous, eternal, unchangeable, and absolutely perfect and certain intuition" (Heppe, p. 71).

While the divine knowledge is unitary, it has different aspects which call for notice. First is God's natural and necessary knowledge, a direct awareness of His own being and of all possibilities of being insofar as He is their conditioning cause. Second is His free knowledge, an awareness comprising all realities and resting on the absolute decree of His will. Third is the knowledge of vision, the seeing of all things as present, the knowledge of them in their secondary causes, and the knowledge of their essence (Voetius, in Heppe, pp. 72f.). Fourth is the knowledge of simple intelligence, by which "God knows the things which might eventuate, but which never eventuate, which will never exist," so that He does not know them "in willing them, because He does not will them to eventuate, or in their secondary causes (they do not have any), or in themselves, because they will never exist" (Polanus, in Heppe, p. 74).

The foreknowledge (or prescience) of God demands special treatment because in a sense it does not exist in itself but only in human perception of the matter. In virtue of His absoluteness God knows the future. Only what is possible and what God allows are future. It is as God determines things that He knows the future. In this knowledge, however, He sees it as present. His prescience is thus infallible and in its determinative character immutable. In this determinative character it is a special aspect of God's knowledge, extending only to things that are still to be, and in this sense subordinate to His will (Bucanus, in Heppe, pp. 74f.). Prescience, then, rests on the divine decree, so that a twofold necessity arises for the future, "the one that of necessity, since it is a decree, the other that of infallibility as regards prescience" (Hottinger, in Heppe, p. 76).

Along these lines Reformed theology distinguished prescience from permission, which Arminian and Jesuit teaching postulated as a kind of "middle knowledge," i.e., "a conditional knowledge of future contingencies by which from eternity, not absolutely but contingently, God knows what men and angels would be doing with their freedom in given circumstances" (Voetius, in Heppe, p. 77). The Arminian concept of election, that God predetermines the salvation of believers in Christ but only foreknows and does not foreordain the act of belief itself, conforms to the idea of "middle knowledge," which Reformed orthodoxy rejected.

The theology of the 16th-17th cents. devoted a separate section to the intimate relation between the all-willing and the all-knowing of God. It equated God's will with His being and thus ascribed to it, as to God's knowledge, absolute singleness, eternity, infinity, immutability, and activity (Mastricht, in Heppe, pp. 81ff.). While differentiating God's will from His knowledge, it saw the two as coincident, the former being the obverse of the latter. Like the divine knowledge, the divine will is both a willing of God Himself and a willing of things outside Him; God wills Himself necessarily and creatures freely, in such a way that "no element in creaturely life can be a determining reason for the divine will." Various distinctions could be made relative to God's will for His creatures, especially between His perceptive will and His discerning will, which itself could be subdivided into His effective will and permissive (but still active) will by which God lets evil happen to reveal His glory. Heidegger also distinguished between the revealed will of God (in Scripture and experience) and His hidden or secret will that has still to be disclosed (in Heppe, pp. 88ff.). In every form God's will stands in the closest possible relation to His knowledge, as it does also to His holiness, righteousness, and goodness.

The Arminian controversy greatly influenced the discussion of God's omniscience. Against the wedge that Arminius was driving between God's foreknowledge and His foreordination, the projected *Lambeth Articles* (1595) claimed that the foreknowledge of faith is not the moving

or effective cause of predestination to life. The Synod of Dort (1619) similarly argued that election does not mean that God, foreseeing all possible qualities of human actions, elected certain of these as a condition of salvation (I, 9). Later, the *Westminster Confession* stated that effectual calling is "of God's free and special grace alone, not from anything at all foreseen in man" (X, 2). The point of these assertions was not to deny God's foreknowledge but to prevent its isolation from His foreordination, as though God were simply predestinating to salvation those whom in His omniscience He knew in advance would believe.

Echoes of this controversy could still be heard in the 18th cent., as in the debate between Wesley and the Calvinists, but attention gradually shifted to other problems of omniscience, especially those of theodicy and incarnation. As regards theodicy, philosophical optimism promoted the view that God in His omniscience, foreseeing all possibilities, created the best of all possible worlds in which even the unavoidable element of evil contributes to the general good. A growing realization of the extent of evil, both natural and historical, shattered what seemed to many to be the intolerable complacency of this optimism but in so doing cast doubt on the divine goodness, the divine power, or the divine knowledge, or possibly all three. Some circles sought relief in the deistic concept of a God who is indeed omniscient but who has left the world of His creation to its own devices. Others abandoned the idea of a transcendent God in favor of pantheism, whereby God is equated with the universe itself.

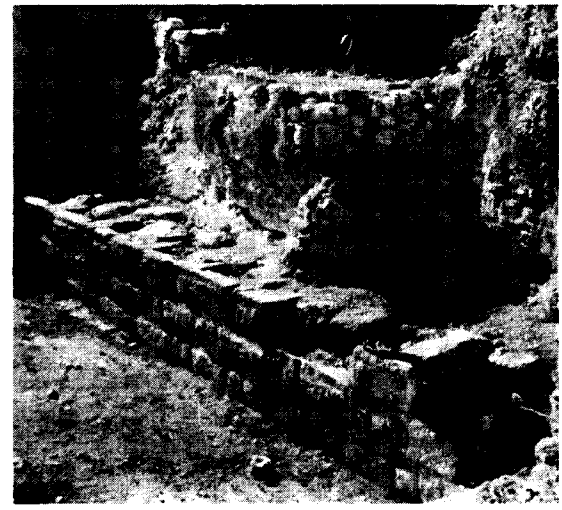
In the 19th and 20th cents. some thinkers took the more drastic course of postulating a transcendent being of limited powers. Process theology, heavily influenced by evolutionism, developed the concept of a God who is Himself implicated in the world process, so that even with His superior resources He has to face new and unforeseen contingencies and problems. More orthodox theology, of course, was not prepared to accept such forfeitures of the divine omniscience.

As regards the Incarnation, the kenotic theologians of the 19th cent. (e.g., I. A. Dorner, G. Thomasius, and C. Gore) perceived an incompatibility between the true humanity of Jesus and His divine omniscience. Drawing a distinction between God's moral or essential attributes and His attributes of majesty, they argued that in the self-emptying *(kenosis)* of the Incarnation Jesus retained the former (e.g., love, righteousness, and mercy) but relinquished the latter (e.g., omnipotence, omnipresence, and omniscience). In His life, then, as the incarnate Son, Jesus shared in the limitation of knowledge that all humans experience, enjoying a gift of discernment but in the great intellectual disciplines having no advantage over contemporaries in His own sphere of life. Whether this restriction of knowledge included misinformation or error became a matter of heated discussion when the authority of Jesus was invoked, e.g., for the Mosaic authorship of the Pentateuch. In some circles this appeal was ruled out on the ground that Jesus knew no more about such matters than anyone else, that He shared traditional beliefs about them without being committed to their correctness, and that He had not in any case come into the world to give superior information on literary and historical issues. Others were prepared to accept that the incarnate Son voluntarily restricted His use of knowledge, but not that His knowledge itself was limited, so that He would have held or imparted erroneous information.

Preoccupation with individual issues of this kind tended to inhibit more comprehensive dogmatic discussion of omniscience, but the 20th cent. saw a reversal of this trend with the extensive treatment of the divine perfections by Karl Barth in *CD*, II/1, § 31.2. Barth divided the perfections into two groups, those of love and those of freedom, but kept the groups in close relationship; he dealt with the divine omniscience within the context of the divine omnipotence, which as a perfection of love he paired off with the constancy of God, which is a perfection of freedom. (He had a separate discussion of the wisdom of God, a perfection of freedom, in connection with the perfection of patience, in II/1, pp. 422ff.) An interesting point here is that in contrast to the kenotic theologians Barth did not group God's omnipresence, omnipotence, and omniscience apart from His love but saw precisely in these three (along with omnivolence) attributes of love rather than of freedom.

Omniscience forms part of God's omnipotence because the latter was for Barth the specific omnipotence of His knowing (omniscience) and His willing (omnivolence) (p. 545). In relation to this omniscience of omnipotence Barth made the following points: (1) Omniscience displays God's revelation, for in revelation God speaks about Himself, about us, and about all things, thus showing Himself to be One who knows, and letting us know ourselves as those who are known by Him (p. 546). (2) Knowledge of God's omniscience arises in the fellowship with Him that He has granted us despite our sin, for this is also a fellowship of knowledge (p. 546). (3) Being so closely tied to God's redeeming purpose, God's omniscience presents itself to us as "a complete act of will" which is "the supreme contingency in the essence of God," unlimited by any extraneous necessity (p. 547). (4) In view of this link between God's knowledge and His will, sharing God's knowledge cannot be a purely intellectual affair but involves conformity to His will (p. 548). (5) God's knowledge, like His other perfections, is God's being, God Himself, as His being is also His knowledge (p. 549). (6) Knowledge and will may be cautiously equated in God, since both are God, but not so as to deprive God of the particular characteristic of either, nor so as to ascribe a primacy to either (p. 551). (7) God's omniscience and omnivolence are both free in the sense of being superior to everything distinct from God (p. 552). (8) God's omniscience is complete in its range but should not be called infinite, since it is defined by itself and by God's will, establishing its own limit beyond which everything is null and void (p. 552). (9) Human beings cannot escape God's omniscience, for all things are open to God and every possible path of escape lies within the realm of His knowledge (p. 554). (10) Like God's knowledge, His will is exhaustive (though not infinite), extending to all that opposes it and allowing no escape by hostility or attempted neutrality (pp. 555f.). (11) The prescience in omniscience affirms God's eternal supremacy: "The 'fore' denotes the absolute priority and superiority of God Himself to every possible existence distinct from His own, His dignity as the Creator of being and as the Lord and master even of non-being" (p. 556). It also expresses the eternity of God's knowledge: "All things in all ages are foreknown by God from all eternity . . . no less and no different in their future than in their past and present" (p. 559). (12) In the divine omnivolence what corresponds to the divine foreknowledge is freedom, God's will taking precedence of all else apart from God Himself, but in such a way that creatures may have a relative freedom as well as relative necessity (pp. 560ff.). (13) The character of the divine willing and knowing manifests the truth of the divine personhood in which God is Lord of His own power, putting His will and knowledge to work in a differentiated use of it (pp. 566f.). (14) All valid distinctions in God's knowledge are grounded in God Himself and not in outside objects: "As the One

who is over all things He knows all things, and as the One who knows He has power over Himself and all things" (p. 567). (15) The divine will is similarly manifested in its exercise in a free and living act of the divine person, especially in our reconciliation in which God acts for us "without any deserts on our part," not being compelled to do what He does, but doing it "because He wills it" (pp. 588f.).



An important feature of Barth's discussion is that his strict relating of omniscience to revelation and his accompanying emphasis on differentiation offer a solution to the incarnational problem of the apparent incompatibility of omniscience and humanity. In this view God's omniscience, like His omnipotence and omnipresence, is not abstractly infinite but is defined by God Himself. With no extraneous limits, God has all the capacity that He wills and needs both to be Himself and to accomplish all aims outside Himself. When, therefore, the eternal Son assumed humanity in order to fulfil the divine purpose of revelation and reconciliation, His omniscience took the particular form appropriate to this purpose and action. Jesus Christ did not relinquish omniscience and even restrict it. His incarnation involved no alteration or diminution of His deity. As God, He continued to enjoy and exercise the knowledge that He shares eternally with the Father and the Holy Spirit. As man, however, He enjoyed and exercised it in the specific way that involves no incompatibility with His true humanity (which was, of course, real humanity in contrast to our fallen humanity). This view poses no difficulty unless it is erroneously assumed either that omniscience is always abstractly infinite or that because human knowledge cannot take a divine form, divine knowledge cannot take a human form. The former assumption makes the mistake of defining God by omniscience instead of omniscience by God, while the latter errs by imposing a human definition on both.

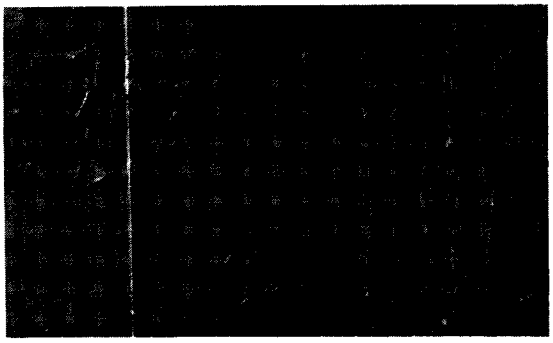
G. W. BROMILEY

OMRI om'rī, om'rē [Heb. *'omrí*; Gk. *Ambri*; similar names in Arabic, indicate that it derives from a triliteral root *'mr*– 'thrive,' 'live long'].

1. One of the great kings of the northern kingdom of Israel, who founded a dynasty that lasted some fifty years. The sources for the reign are 1 K. 16:16-30; 20:34; Josephus *Ant.* viii.12.5 [309-313]; the Moabite Stone set up by King Mesha and the Assyrian inscriptions (*ANET,* pp. 320f., 280, 284f.).

Scholars have assigned rather different lengths to Omri's reign, depending upon the point from which the sources reckoned his kingship. 1 K. 16:15-17 recorded that Omri, the Israelite commander, besieged Tirzah, where Zimri had assassinated Elah of Israel (*ca.* 885 B.C.). Though Zimri, a commander of chariotry who had aspirations to the throne, reigned only a week before committing suicide, he precipitated a period of civil instability during which yet another claimant, Tibni, arose but was ultimately defeated (vv. 21f.). Following this, Omri became king in the thirty-first year of Asa of Judah, and reigned for twelve years (v. 23). Yet that same source also recorded that he reigned at Tirzah for six years, implying that Omri was not king over the entire nation at that time. Omri doubtless occupied Tirzah when Zimri died, but needed some four years to consolidate his position against Tibni before becoming king "over Israel" with his undisputed capital at Samaria. The correlation with Asa of Judah indicates a reign of eight years (vv. 23, 29), but when the four years of conflict with Tibni are added, the period of twelve years mentioned in v. 23 is still correct. Overall dates for Omri would thus be *ca.* 885-873 B.C.

Part of the wall of Omri's palace at Samaria (J. C. Trever)



Omri had demonstrated his military abilities both against the Philistines prior to the assassination of Elah, and also against the ambitious Tibni, who had claimed a surprising measure of popular support. But once established as king of Israel, Omri founded a new dynasty, the *Bit-Ḫumri* (house of Omri) of Assyrian records. He was the father of Ahab, another vigorous military leader who also promoted the commercial growth of the northern kingdom. His might, as the Bible phrases it, appears in his friendly alliances with Judah and Phoenicia and in his construction of the new capital, Samaria, on a very strategic site, an isolated hill. It was so strong that the Assyrians captured it only after a three-year siege.

Omri's military prowess was also seen clearly in his subjugation of Moab, which was forced to pay heavy tribute to Israel (2 K. 3:4) during the reigns of Omri and Ahab. The Moabite view of the situation was inscribed on the MOABITE STONE, the oppression by Omri being attributed to the displeasure of the national deity Chemosh with his land. The inspired historian of Kings, writing some years later, was not impressed by any of these things; the alliance with Phoenicia and the marriage of the crown prince Ahab to the daughter of Ethbaal priest-king of Sidonia only opened the door for Baal-worship.

While Omri had evidently lost some territory in the north to Ben-hadad (1 K. 20:34), supplementing that already acquired by the Syrians in the time of Baasha of Israel (1 K. 15:20), his successful attack on the Moabites may have deterred Ben-hadad from further thoughts of territorial expansion in Israel. His position in relation to the Aramean dynasty was strengthened further when he entered into a highly profitable trading alliance with Phoenicia, thereby making access to the Mediterranean by the Syrians considerably more difficult.

Omri was succeeded *ca.* 873 B.C. by Ahab his son, who followed the political, social, and religious patterns established by his father. Three decades later the name of Omri was still being commemorated in the Black Obelisk of Shalmaneser III (*ca.* 842 B.C.) in a reference to Jehu, a man who had overthrown the *Bit-Ḫumri.* In Mic. 6:16 the allusion to the "statutes of Omri" saw the prophet blaming him for the replacement of Sinaitic covenant religion in Israel by the gross idolatry of Canaanite worship.

2. A Benjaminite, son of Becher (1 Ch. 7:8).

3. A Judahite, descendant of Perez and father of Ammihud (1 Ch. 9:4).

4. The tribal chief of Issachar in David's time (1 Ch. 27:18). R. K. HARRISON

ON on [Heb. *'ôn*]. Son of Peleth; a Reubenite who joined with Korah, Dathan, and Abiram in their revolt against Moses and Aaron (Nu. 16:1). If PELETH (1) is the same as Pallu (cf. 26:5, 8-10), then On would have been the uncle of Dathan and Abiram; but some commentators have suggested that "On" is a textual corruption and should be deleted (see, e.g., G. B. Gray, comm. on Numbers [*ICC*, 1903], pp. 194f.).

ON on [Heb. *'ôn*; Gk. *ōn*; Egyp. *ỉwnw*]. An Egyptian city, also called HELIOPOLIS, center of the ancient cult of Atum-Re, the sun god. Its ruins have been excavated 16 km. (10 mi.) N of modern Cairo.

After his rise to power in Egypt, Joseph married Asenath, daughter of "Potiphera priest of On" (Gen. 41:45, 50; 46:20), undoubtedly a priest of Re, as his name implies. The prophets refer to On in different ways. In his prophecy against Egypt Jeremiah pronounces judgment on the "pillars of *bēṯ šemeš*," the "house of the sun" (Jer. 43:13; RSV "obelisks of Heliopolis"), i.e., On. In an oracle against the cities of Egypt Ezekiel refers to the "young men of *'āwen*," "wickedness," a pejorative vocalization of On (Ezk. 30:17; cf. AV Aven).

For the question of whether Isa. 19:18 refers to On, *see* CITY OF THE SUN.

See also EGYPT. E. M. COOK

ONAM ō'nam [Heb. *'ônām*–'vigorous'].

1. Fifth son of Shobal and ancestor of a Horite clan group in Edom (Gen. 36:23; 1 Ch. 1:40).

2. A Judahite, son of Jerahmeel by Atarah (1 Ch. 2:26, 28); possibly related to ONAN son of Judah.

ONAN ō'nan [Heb. *'ônān*–'vigorous']. Second of the three sons of Judah and the Canaanite Bath-shua (Gen. 38:4, 8f.; 46:12; Nu. 26:16; 1 Ch. 2:3). When the Lord slew his elder brother Er, because of his wickedness, Er's wife Tamar was given to Onan (*see* MARRIAGE IV.A.2; TAMAR). Onan's continuing refusal to impregnate her was displeasing and thus he too was slain by the Lord. C. G. RASMUSSEN

ONE. *See* NUMBER.

ONESIMUS ō-nes'ə-məs [Gk. *Onēsimos*]. A name occurring twice in the NT (Philem. 10; Col. 4:9) in reference to one person. The name means "useful" and as such was a common Greek name for slaves (see Bauer, rev., p. 570). Paul plays on the meaning of the name when he says (Philem. 11; cf. v. 20) that Onesimus was formerly "useless" to his master but is now "useful" both to his master and to Paul (presumably as a companion and helper to the imprisoned apostle). Paul is nevertheless unwilling to retain Onesimus in his service without first asking Onesimus's owner, usually assumed to be Philemon (though it could be Archippus, or even Apphia, to whom the Epistle of Philemon is also addressed), the favor of permitting Onesimus to serve Paul on Philemon's behalf (vv. 12-14).

Paul shows great care in dealing with this matter: he gently (or perhaps not so gently; cf. Church, p. 27) urges Philemon to receive the slave who "was parted" from him — a delicate reference to Onesimus's running away. Paul's care in presenting his case certainly indicates the sensitivity of the situation for Philemon personally (Church, p. 21, calls it a "difficult," "discreditable," or "scandalous" case) — though the letter is a "public" one. There may also have been a growing sensitivity to the practice of slave ownership by Christians (see below). At any rate, Paul sends Onesimus back to his master with the letter to Philemon. (On the same journey Onesimus and Tychicus [Col. 4:9] took the Epistle to the Colossians; that Philemon lived in Colossae is known from the names of five persons greeted in both Philem. 23f. and Col. 4:10-14.) Paul requests that Onesimus be sent back to him (perhaps implying that Onesimus be given his freedom; cf. Stuhlmacher, *in loc.*), reminding Philemon of his indebtedness to Paul (Philem. 19b). Onesimus's debt to his master — a debt that Paul promises to repay — may have involved not only the inconvenience and loss of service incurred by the slave's flight, but perhaps also robbery to finance it.

Paul notes three positive results of Onesimus's running away and subsequently being converted by Paul (Philem. 10): (1) the formerly "useless" slave (because he ran away?) is now "useful" both to his master and to Paul (vv. 11, 20); (2) the master, parted from Onesimus "for a while," will now have him "forever" (v. 15); and (3) before Onesimus was a "slave," but now he is a "beloved brother" (v. 16). The implications of the last statement for the institution of slavery (the contradiction of holding a brother as a slave) may be more obvious to the modern reader than they were to the early Christian community (*DNTT*, III, 595f.). Manumission of a fellow Christian was certainly not automatic (Col. 3:22–4:1; Eph. 6:5-9; 1 Pet. 2:13-25). Nevertheless, some elements in the early Church (e.g., the Corinthian "enthusiasts"; see Gayer) may have urged the abolition of slavery. Paul's approach, however, is not to attempt to abolish slavery as an institution but to call Christians to live out the implications of their common status as members of the redeemed community. Thus he sowed the seeds for a "spiritual" — rather than bloody — revolution. (*See also* SLAVE.)

The great affection in which Paul holds Onesimus is seen in Philem. 10, where he calls Onesimus his child (a reference to Onesimus's Christian conversion under Paul's influence), and in v. 16, where he calls Onesimus a "beloved brother, especially to me." In Col. 4:9 Paul praises Onesimus's character, calling him a faithful and beloved brother. If Onesimus is the ONESIPHORUS of 2 Tim. 1:16-18, the reasons for Paul's appreciation are clear: "He has often refreshed me and he was not ashamed of my chains but eagerly sought me out in Rome."

Some readers connect Onesimus with the bishop praised by Ignatius of Antioch in his letter to the church at Ephesus in the early 2nd century. As in Philemon, there is a pun

on the name of the commended bishop. If he was the same Onesimus, he must have been advanced in years — even had he been a youth when he ran away and met Paul in Rome.

ONESIPHORUS ō-nes'ə-fôr'əs, on'ə-sif'ə-rəs [Gk. *Onēsiphoros*–'profit-bringer' (2 Tim. 1:16; 4:19)]. Onesiphorus, well known to both Paul and Timothy, made a significant contribution to the Ephesian church and also to Paul during his final imprisonment (2 Tim. 1:15-18). Paul laments that "all" the Asians were ashamed of him in his imprisonment and had deserted him. But in contrast to these, Onesiphorus came to Rome, searched diligently for Paul, and ministered to him. This involved much effort and personal danger, for during the Neronian persecution in the mid-60's it was not only difficult to track down a prisoner, but also dangerous to approach one imprisoned because of the persecution. Paul praised Onesiphorus for this frequent ministry of refreshment (*anapsýchō*) as well as his service in Ephesus (cf. 2:1).

A puzzling fact is that Paul does not speak of Onesiphorus in the present tense but only in the phrase "the house [*oíkos*] of Onesiphorus" (1:16; 4:19). There are no personal greetings for Onesiphorus even in the context of such greetings (4:19-21). This, along with the tone of the prayer in 1:18, has led many scholars to conclude that Onesiphorus was now dead (e.g., see J. N. D. Kelly, *Pastoral Epistles* [*HNTC*, 1963], pp. 169f.). Others suggest that he was absent from home or was to be included in the phrase "house of Onesiphorus" (see, e.g., E. K. Simpson, *Pastoral Epistles* [1954], p. 129). The evidence is inconclusive, but it is possible that Onesiphorus had died.

If Onesiphorus was dead, Paul's prayer in 1:18 is the earliest prayer for the dead in Christian literature, as well as the only one in the NT (cf. 1 Cor. 15:29). There was a Jewish precedent in 2 Macc. 12:43-45, and prayers on behalf of the dead did become a common practice in the early Church. If Paul is to be understood this way, it is a general prayer simply asking God for mercy for the deceased. No doctrine of prayer for the dead can be erected on this isolated passage, nor does it offer solid scriptural support for the practice.

More detailed information about Onesiphorus is not forthcoming. Attempts to identify him with ONESIMUS are not convincing. There is mention of Onesiphorus in later pseudepigraphical literature (e.g., Acts of Peter and Andrew, Acts of Paul and Thekla), but this material is of little value historically. Finally, personal references like this are difficult to explain if not authentically Pauline, whether by his own hand, the hand of an amanuensis, or the work of a later disciple using genuine material.

V. R. GORDON

ONIARES. *See* ONIAS.

ONIAS ō-nī'əs [Gk. *Onias*].

1. (AV also ONIARES, 1 Macc. 12:19). Onias I, son of the high priest Jaddua and father of the high priest Simon I according to Josephus (*Ant.* xi.8.7 [347]; xii.2.5 [43f.]). He was high priest from 320 to 290 B.C., when Arius was king of the Spartans (309-265 B.C.). According to 1 Macc. 12:7-24 Arius wrote a letter to Onias declaring an alliance and friendship with the Jews. Josephus incorrectly states that this letter was sent to the high priest Onias III (*Ant.* xii.4.10 [225]). If this letter was written late in the reign of Arius, the recipient would have been the high priest Onias II (J. A. Goldstein, *I Maccabees* [AB, 1976], pp. 455f.).

2. Onias II, son of Simon I. Too young to succeed his father directly as high priest, Onias II became high priest only after his uncle Eleazar (*Ant.* xii.2.5 [40-50]) and his great uncle Manasseh (*Ant.* xii.4.1 [156-58]). Josephus portrays him as "small-minded and passionately fond of money" (*Ant.* xii.4.2 [161f.]) and states that he refused to pay Ptolemy of Egypt the twenty talents of silver that his predecessors had paid. (This was Ptolemy III Euergetes. For discussion of the chronological problems, cf. Tcherikover, *Hellenistic Civilization*, pp. 128-130.) Apparently Onias's refusal to pay the tax was related to his pro-Seleucid stance during the Third Syrian War. When Ptolemy threatened to invade Judea and parcel out the land to his soldiers, Joseph the son of Tobiah and nephew of Onias intervened with the king. From this time on, the Tobiads were a strong rival of the high priest's family, the Oniads.

Bibliography.–V. Tcherikover, "The Political Situation From 332 to 175 B.C.E.," in A. Schalit, ed., *World History of the Jewish People*, VI (1972), 76f.; *Hellenistic Civilization and the Jews* (Eng. tr. 1959), pp. 127-134.

3. Onias III, son of Simon II and grandson of Onias II, high priest during the reign of Seleucus IV Philopator (187-175 B.C.). Onias III was a pious man (2 Macc. 3:1) who gained the respect even of Seleucus IV. But a disagreement between the high priest, who was pro-Ptolemaic, and Simon, the captain of the temple, led Simon to turn to Apollonius, governor of Coelesyria and Phoenicia, with the claim that large amounts of money that did not belong to the account of the sacrifices were in the temple treasury and could be taken by King Seleucus. When the king learned of this, he sent one of his high officials, Heliodorus, to Jerusalem to confiscate the money. Onias met Heliodorus, explained that Simon had misrepresented the facts, that the amount of money was much smaller and belonged to widows and orphans, and to Hyrcanus son of Tobias. Despite Onias's objections, Heliodorus entered the temple, whereupon "the Sovereign of spirits and of all authority caused so great a manifestation" that he would have died had not Onias prayed for his recovery (2 Macc. 3:1-40).

After this incident, Simon continued to plot against Onias. Finally, the high priest made a trip to Antioch to plead his case before the king; but before he arrived Seleucus IV was assassinated and his brother Antiochus Epiphanes became king in 175 B.C. (2 Macc. 4:1-6). The historical sources do not relate what happened between Onias and Antiochus, but it is clear that Onias was not successful. His own brother Jason bought the office of high priest from the king and "at once shifted his countrymen over to the Greek way of life" (2 Macc. 4:7-20). Three years later Menelaus, the brother of the above-mentioned Simon, bought the office of high priest for himself. Menelaus then stole some of the temple's golden vessels in order to use them as payment to secure his own position. When Onias publicly reproached Menelaus, Menelaus plotted Onias's death (2 Macc. 4:23-34).

The fate of Onias is disputed by scholars. According to 2 Macc. 4:34, Andronicus, the king's deputy, was prompted by Menelaus to trick Onias out of his sanctuary at Daphne and murder him (cf. Dnl. 9:26). Josephus, however, states that Onias fled to Egypt, where King Ptolemy warmly received him and gave him land at Heliopolis on which to build a temple (*BJ* i.1.1 [33]; vii.10.2-3 [421-432]).

Bibliography.–S. Tedesche and S. Zeitlin, *Second Book of Maccabees* (1954), pp. 9-15, 140f.; V. Tcherikover, *Hellenistic Civilization and the Jews* (Eng. tr. 1959), pp. 156-172, 469.

4. Onias IV, son of Onias III and builder of the Jewish temple in Leontopolis according to some accounts (Josephus *Ant.* xii.9.7 [388]; xiii.3.1-3 [62-73]). When Antiochus V killed Menelaus and made Alcimus high priest (*Ant.* xii.9.7 [385f.]), Onias IV fled to Egypt and built a temple with the permission of the Egyptian monarch. He justified the building of this temple by the prophecy of Isa. 19:19: "In that day there will be an altar to the Lord in the midst of the land of Egypt. . . ." Josephus's accounts are contradictory. In *BJ* he credits Onias III with building the temple in Egypt; in *Ant.* xii, xiii he credits Onias IV.

See V. Tcherikover, *Hellenistic Civilization and the Jews* (Eng. tr. 1959), pp. 276-281.

5. Onias, a high priest. Also known as Menelaus, he usurped the office of high priest from Jason by buying it from Antiochus IV (2 Macc. 4:23-26). In 2 Macc. 4:23 Jason and Onias III are identified as brothers; and Menelaus and Simon, the temple captain, are called brothers in 4:7. Josephus, however, refers to Onias-Menelaus as a brother of Jason and Onias III (*Ant.* xii.5.1 [237-39]; xv.3.1 [41]). Probably Onias-Menelaus was a cousin (Gk. *exádelphos*) of Onias III. *See also* MENELAUS.

R. L. OMANSON

ONIONS [Heb. *bᵉṣālîm*; Gk. *krómmyor*]. An Egyptian delicacy for which the Israelites longed (Nu. 11:5). The onion (*Allium cepa* L.), a staple item of diet, was widely cultivated in ancient Syria, Egypt, and Palestine.

R. K. H.

ONLY BEGOTTEN. The AV translation of Gk. *monogenḗs* in six NT passages (Jn. 1:14, 18; 3:16, 18; He. 11:17; 1 Jn. 4:9), usually in the phrase "only begotten Son" (all the references except that in He. 11:17 are to Jesus' relationship to God). The RSV and NEB render *monogenḗs* by "only" — a translation supported by the use of *monogenḗs* in the LXX. In each of its four occurrences in the LXX OT, *monogenḗs* translates Heb. *yāḥîḏ* (lit. "only one," "solitary," "beloved"): Jgs. 11:34 (AV, RSV, "only child"); Ps. 22:20 (MT 21; LXX 21:20; AV "darling," mg. "dear life"; RSV "life," mg. "only one"); 25:16 (LXX 24:16; AV "desolate"; RSV "lonely"); 35:17 (LXX 34:17; AV "darling," mg. "dear life"; RSV "life"); cf. also the use of *monogenḗs* in Tob. 3:15; 6:11; 8:17. Elsewhere the LXX renders Heb. *yāḥîḏ* by Gk. *agapētós* (lit. "[only] beloved"; see Gen. 22:2, 12, 16; Jer. 6:26; Am. 8:10; Zec. 12:10).

Scholars are divided over the legitimacy of the AV rendering "only begotten" in the six passages mentioned above. The position against the AV translation was stated clearly by D. Moody, who insisted that *monogenḗs* means "one," "only," or "unique" rather than "only begotten." Moody's major arguments include the following. (1) The standard lexicons support this meaning (e.g., see MM, pp. 416f.; Bauer, rev., p. 527). (2) The Old Latin MSS rendered *monogenḗs* by Lat. *unicus* ("only") rather than *unigenitus* ("only begotten"). In the Vulgate Jerome changed *unicus* to *unigenitus* ("only begotten") for theological reasons, i.e., to ensure the doctrine that Jesus was "begotten, not made." (In passages that lack this theological interest [Lk. 7:12; 8:42; 9:38] he kept *unicus* as the translation of Gk. *monogenḗs*.) The Vulgate exercised a formidable influence on the AV and subsequent English translations. (3) The LXX use of *monogenḗs* for Heb. *yāḥîḏ* and NT usage of the term in Lk. 7:12; 8:42; 9:38; He. 11:17 clearly support the meaning "only." (4) The reference in 1 Clem. 25:2 to the phoenix bird (which was neither born nor begotten) as *monogenḗs* demands the meaning "only one of its kind." (5) John's emphasis on Jesus' uniqueness as *monogenḗs* is underscored by his reservation of the term *huiós* to Jesus alone; believers he calls *tékna*, "children."

Other scholars who have taken this position include J. H. Bernard, R. E. Brown, C. H. Dodd, L. Morris, B. F. Westcott, and D. G. Vanderlip. Brown, e.g., stated: "Literally the Greek means 'of a single [*monos*] kind [*genos*].' Although *genos* is distantly related to *gennan*, 'to beget,' there is little Greek justification for the translation of *monogenḗs* as 'only begotten.'" The word describes Jesus' uniqueness, "not what is called in Trinitarian theology his 'procession'" (p. 13).

A contrary position has been argued by C. K. Barrett, J. B. Bauer, F. Büchsel, R. H. Lightfoot, B. Lindars, and R. Schnackenburg. While admitting the linguistic strength of the preceding view, these scholars have argued that in the Johannine passages *monogenḗs* denotes Jesus' origin in addition to His uniqueness. Jesus is not only the "only" Son of the Father: He is the "begotten" Son because He derives His being from the Father. Barrett, e.g., insisted that the Son proceeds from the Father in personal though never independent existence (p. 166). J. B. Bauer held that in John *huiós* designates Jesus' origin and contains the idea of His eternal begetting by God (p. 868).

The interpretation of *monogenḗs* is further complicated by the textual problem in Jn. 1:18. Whereas some witnesses (including later Greek MSS, versions, and some church fathers) read *monogenḗs huiós*, the earliest Greek MSS (p^{66} ℵ B C) have *monogenḗs theós*. Textual critics and exegetes are divided over the proper reading of the text. Exegetes preferring *monogenḗs huiós* include C. K. Barrett, F. Büchsel, R. Bultmann, M. Dods, and R. Schnackenburg; those preferring *monogenḗs theós* include J. H. Bernard, R. E. Brown, and L. Morris. While those who translate *monogenḗs* by "only begotten" can make sense of *monogenḗs huiós* ("only begotten Son"; cf. Jn. 3:16, 18; 1 Jn. 4:9), they run into enormous theological difficulties with *monogenḗs theós* ("only begotten God").

In conclusion, an assessment of the linguistic evidence seems to indicate that "only" or "unique" may be an adequate translation for all occurrences of *monogenḗs* in the Johannine literature (see Bauer, rev., p. 527). Discussions about the origin or derivation of the Son in relationship to the Father should be conducted along theological rather than linguistic lines.

C. B. HOCH, JR.

ONO ō′nō [Heb. *ʾônô*; Gk. B *Ōnan*, A *Ōnō*]; AV and NEB Apoc. ONUS (1 Esd. 5:22). A biblical Palestinian town identified as modern Kefr ʿAnā NW of Lydda. Neh. 11:35 associates Ono with "the valley of the craftsmen." It is named along with Lod as being built by descendants of Benjamin (1 Ch. 8:12). "The sons of Lod, Hadid, and

Ono" were among the Jews who returned from the Babylonian Captivity (Ezr. 2:33; Neh. 7:37). During the rebuilding of the wall of Jerusalem, Sanballat and Geshem proposed that Nehemiah confer with them in "one of the villages in the plain of Ono," but Nehemiah recognized the invitation as an attempt against him (Neh. 6:2). Benjaminites reoccupied Ono in the resettlement of the country (11:35). C. E. DE VRIES

ONUS ō'nəs. *See* ONO.

ONYCHA on'i-kə [Heb. *śᵉḥēleṯ*; LXX *ónyx*]; NEB AROMATIC SHELL. One of five substances making up the composition of the INCENSE which was burned on the gold altar in the tabernacle (Ex. 30:34f.). The Gk. *ónyx* means "nail" or "nail shaped" and has been taken to refer to the shell of a cockle or mollusk. Mollusks are found in the shallow waters of the Mediterranean and Red seas. Such shells give off a pungent odor when burned.
C. G. RASMUSSEN

ONYX on'iks. *See* STONES, PRECIOUS.

OPEN. In the OT usually the translation of Heb. *pāṯaḥ*. Other OT terms include *pāṣâ* (of opening the mouth, e.g., Gen. 4:11; Jgs. 11:35f.; Ezk. 2:8), *pāqaḥ* (of opening the eyes, e.g., Gen. 21:19; 2 K. 4:35), *gālâ* (lit. "uncover," e.g., Job 33:16; Ps. 119:18 [piel]), *rᵉḥōḇ* ("open square," e.g., Jgs. 19:15, 17; AV "street"; *see* SQUARE), *pᵉnê* (lit. "face of," esp. of an open field, e.g., Lev. 14:7, 53), *śāḏeh* ("open country," e.g., Dt. 21:1; AV "field"; *see also* FIELD). In the NT "open" usually translates Gk. *anoígō*, which is used of opening the heavens (e.g., Mt. 3:16), the mouth (e.g., Lk. 1:64), the eyes (e.g., Jn. 9:10), a door (e.g., Acts 16:26), a scroll (e.g., Rev. 5:3), etc. Other NT terms include *dianoígō* (e.g., Mk. 7:34f.), *schízō* (lit. "rend," Mk. 1:10), *anaptýssō* (lit. "unroll," Lk. 4:17), *trachēlízō* (lit. "twist the neck," He. 4:13), etc.

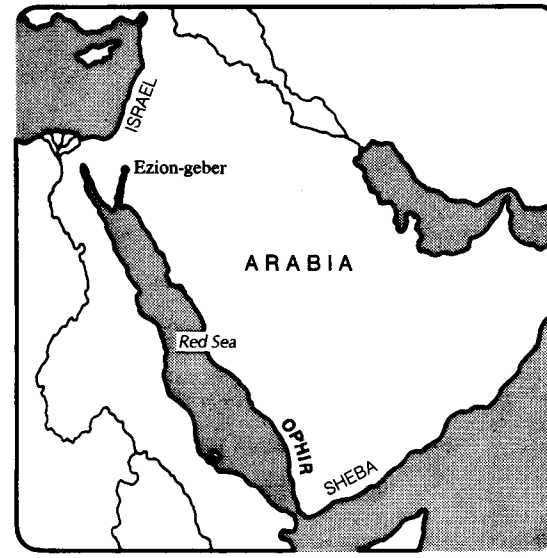
OPEN PLACE. The AV translation "in an open place" in Gen. 38:14 is based on a misunderstanding of Heb. *bᵉpeṯaḥ ʿênayim*, which was taken to mean "in an opening openly" (cf. AV "openly," v. 21, for *ʿênayim*) instead of "in an opening of Enaim." The RSV reading, "at the entrance to Enaim," is supported by Tg. Onk., Syr., and Vulg., which understand the phrase to mean the road junction for ENAIM (see comms., esp. E. A. Speiser, *Genesis* [*AB*, 2nd ed. 1964], p. 298). Cf. the NEB rendering, "where the road forks in two directions."

OPENLY. *See* PLAIN, PLAINLY.

OPERATION. *See* WORK.

OPHEL ō'fəl [Heb. *hāʿōp̄el*] (2 Ch. 27:3; 33:14; Neh. 3:26f.; 11:21; without the definite article the Heb. *ʿōp̄el* is translated "hill" in Isa. 32:14; Mic. 4:8). In all the references with the article the RSV has simply "Ophel," except in 2 K. 5:24 (see below), but the AV mg. adds "the tower." When the Hebrew has no article, the RSV renders it "hill" and the AV and NEB have various suggestions in text and margin: "hill," "tower," "stronghold," "secret place," "citadel." The root of the word indicates a "bulge" or "swelling"; the same noun is rendered "tumor" in 1 S. 5:9; etc. Evidently it could be applied to a mound and in some cases became a proper name (JB always treats it as a proper name).

A site clearly described as on the east hill of Jerusalem S of the temple was named Ophel (2 Ch. 27:3; 33:14; Neh. 3:26f.). Josephus stated (*BJ* v.4.2 [142-45]) that the eastern wall of the city ran from Siloam "and reaches as far as a certain place which they call Ophlas when it was joined to the eastern cloister of the temple." In *BJ* v.6.1 (254) he stated, "John held the temple with much of the environs, Ophla and the valley called Kedron." This place is not identical with the "Acra" and "Lower City," which were held by Simon. The name Ophel cannot be applied, as has been so commonly done, to the whole southeastern hill.



It is disputed whether the Ophlas of Josephus was identical with the OT Ophel. The OT references make clear that Ophel was a quarter of Jerusalem to whose defenses such kings as Jotham and Manasseh paid great attention. Excavations have revealed remains of fortifications erected at widely differing dates.

See J. Simons, *Jerusalem in the OT* (1952), pp. 60-67; *see also* JERUSALEM III.D.5.r; F.2.t.

Another "Ophel," translated "hill" by the RSV, was situated apparently in Samaria (2 K. 5:24), where Gehazi took his ill-gotten presents from the hands of the servants of Naaman the Syrian. According to J. Gray (*I & II Kings* [2nd ed., *OTL*, 1970], p. 510), the definite article with Heb. *ʿōp̄el* here suggests a more specific feature than simply a hill, perhaps the citadel of Samaria. For a similar use Gray appeals to the reference in the MOABITE STONE, an inscription of Mesha king of Moab, contemporary with Omri. Mesha said (lines 21f.): "I built QRḤH . . . and the wall of the citadel [or Ophel]." Most scholars (e.g., W. F. Albright in *ANET*, p. 320) translate *h'pl* here rather than transliterate it as a proper name (contra *IDB*, III, *s.v.* [G. A. Barrois]). E. W. G. MASTERMAN
D. F. PAYNE

OPHIR ō'fər [Heb. *ʾôp̄îr*]. A son of Joktan, descendant of Shem (Gen. 10:29; cf. 1 Ch. 1:23) and presumably eponymous settler of the region of Ophir.

OPHIR ō'fər [Heb. *ʾôp̄îr*; Gk. *Ōpheir, Oupheir, Sōpheir, Sōpheira, Sōphēra, Soupheir, Souphir*]. A region, the gold of which was proverbial, located in or near the southern Arabian peninsula, named for a son of Joktan, descendant of Shem (Gen. 10:29).

In the Bible, "gold of Ophir" is considered among the most precious of substances (Isa. 13:12; Ps. 45:9 [MT 10]; Job 28:16; Sir. 7:18). Indeed, in one verse (Job 22:24) "Ophir" is used as a metonymy for "gold." It is possible that the "gold of Uphaz" of Jer. 10:9 and Dnl. 10:5 is a textual error for "gold of Ophir" (so NEB).

Ophir is mentioned most prominently in the account of the joint expedition of the men of Solomon and Hiram of Phoenicia (1 K. 9:26-28). Solomon outfitted a fleet at Ezion-geber on the Gulf of Aqaba and Hiram supplied expert sailors for it. The fleet returned from Ophir bearing 420 talents of gold. The parallel account in 2 Ch. 8:17f. implies that Hiram supplied the fleet itself as well as the men and reports the amount of gold as 450 talents. The cargo of the fleet is further specified in 1 K. 10:11f. (par. 2 Ch. 9:10f.) as "almug wood [sandalwood] and precious stones." Jehoshaphat's attempt to mount a similar expedition to Ophir met with failure (1 K. 22:48; but cf. 2 Ch. 20:35-37, which gives a different account).

The notice in 1 K. 10:22 (par. 2 Ch. 9:21) that every three years the Israelite-Phoenician "ships of Tarshish" would bring a cargo of "gold, silver, ivory, apes, and baboons" (RSV mg.) is commonly associated with the Ophir expedition, but there is no real reason to connect the two — Ophir is not mentioned in the verse — and thus no evidence in these exotic goods for the location of Ophir. (Indeed, the parallel passage in 2 Chronicles says the ships went *to* Tarshish.) If the tradition recorded in 1 Ch. 29:4 is to be taken at face value David in his day was able to obtain gold from Ophir. It seems likely that Hiram was the middleman here as in so many of Israel's commercial ventures.

Ophir is also mentioned in an inscribed potsherd from Tell el-Qasîleh, N of Tel Aviv on the plain of Sharon, perhaps biblical APHEK: "Gold of Ophir for Beth Horon, 30 shekels." It is unclear whether this is really gold from Ophir, or simply fine gold; but Aphek's position athwart the main north-south caravan route in Palestine would make it an ideal distribution point for goods coming from Ezion-geber to all points north, including Phoenicia.

The location of Ophir is much disputed. The biblical writers themselves associate Ophir with the Arabian peninsula. In the Table of Nations of Gen. 10, Ophir as one of the sons of Joktan is placed among names of Arabian tribes. And it is perhaps no mistake that the account of the Ophir expedition in 1 Kings is interrupted by a lengthy description of the visit by the Queen of Sheba, an Arabian kingdom (1 K. 10:1-10). The attribution of gold, sandalwood, and precious stones to Ophir is consistent with a location in south Arabia. But there was a tradition, albeit postbiblical, in ancient times that Ophir was to be sought in India. The otherwise inexplicable transliterations of the LXX (see above) may point to ancient Supara, a locality N of Bombay. This Indian theory is attested also in Josephus (*Ant.* viii.6.4 [163f.]) and Jerome (in translating Job 28:16). But this seems to be nothing more than an example of the widespread (then and now) desire to actualize the text by identifying an otherwise unknown location with one known to the reader.

Other proposed locations in Africa and the Near East (see G. Ryckmans) are based on the evidence of 1 K. 10:22, which, as noted above, is debatable.

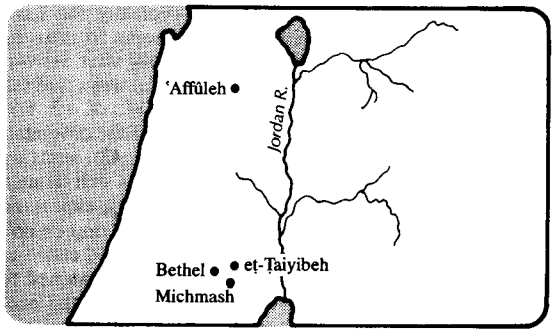
Inscribed potsherd from Tell el-Qasîleh mentioning "gold of Ophir" (Israel Department of Antiquities and Museums)

OPHNI of'nī, of'nē [Heb. *'opnî*; Gk. (Lucian) *Aphnē*, lacking in LXX] (Josh. 18:24). A town in the territory allotted to Benjamin. In Joshua's list of Benjaminite cities (18:21-28) it is named between Chephar-ammoni (site unidentified) and Geba, modern Jeba', 9 km. (5½ mi.) N of Jerusalem. Ophni is thus often identified with Jifna, about 5 km. (3 mi.) NW of Bethel on the route descending from Bethel to Aphek near its intersection with the Jerusalem-Shechem highway (*LBHG*, rev., p. 60; *GTTOT*, § 327, p. 174). Jifna is the Gophna of Josephus (*BJ* iii.3.5 [55]), which was then head of one of the eleven toparchies in Judea. If this identification is correct, it implies a northward bulge in the territory of Benjamin, which is not in agreement with Josh. 18:12 (cf. *GTTOT*, § 326, p. 171).

D. E. WARING

OPHRAH of'rə [Heb. *'oprâ*–'young hind']. A man of the tribe of Judah, son of Meonothai (1 Ch. 4:14).



OPHRAH of'rə [Heb. *'oprâ*–'young hind'; Gk. B *Iephratha*, A *Aphra*].

1. A city in the territory allotted to Benjamin (Josh. 18:23). The other cities listed suggest a location NE of Jerusalem. Ophrah is also mentioned in 1 S. 13:17f., as the destination of one of the three raiding parties sent out by the Philistines. From Michmash one party went toward Beth-horon on the west, one toward the wilderness on the east, and the third toward Ophrah and SHUAL, presumably to the north, since Saul was camped at Geba to the south.

Ophrah is generally identified with the Ephron of 2 Ch. 13:19, the Ephraim of 2 S. 13:23; Jn. 11:54, and the Aphairema of 1 Macc. 11:34 (*GAB*, p. 158). The proximity of Ephron to Bethel and of Ephraim to Baal-hazor helps to determine a more precise location.

Jerome, identifying Ophrah with Ephraim, placed it 5 Roman miles (7.4 km., 4.6 mi.) E of Bethel. This location supports an identification with modern eṭ-Ṭaiyibeh, a site about 6.5 km. (4 mi.) NE of modern Beitîn (Bethel) and 8 km. (5 mi.) N of ancient Michmash. Since Hebrew names from the roots *'pr* (e.g., Ophrah) and *ḥpr* resemble Arab. *'ifrit*, "demon," they are commonly changed to the euphemistic name *eṭ-Ṭaiyibeh*, "the favor" (cf. *LBHG*, rev., p. 121).

2. A city in the territory W of the Jordan allotted to Manasseh; it belonged to the clan of Abiezer (Jgs. 6:11,

15, 24, 34; 8:32; 9:5; cf. Josh. 17:2; 1 Ch. 7:18). Ophrah was the home of Gideon and the place where he received a divine commission to deliver Israel from the oppressing Midianites, built an altar to Yahweh, and destroyed the local high place (Jgs. 6:11-32). Under Gideon it became a tribal cultic center, but the golden ephod that he set up there proved a snare to his house and to all Israel (8:22-28). At Ophrah Gideon's son Abimelech slew seventy of his brothers whom he saw as possible rivals to his claim of kingship; only Jotham escaped alive (9:1-6).

The location of Ophrah is uncertain. Many suggestions have been made, including Fer'ata, W of Shechem; Tell el-Fâr'ah, NE of Shechem; Silet ed-Dahr, N of Shechem; the eṭ-Ṭaiyibeh S of Tul Karm; and the eṭ-Ṭaiyibeh NW of Beth-shean. Ophrah has usually been identified with the latter eṭ-Ṭaiyibeh, which is NE of the hill of Moreh and near the well of Harod, the Jezreel Valley, and Tabor — places that figure in the events of Jgs. 6–8. It has also been argued that eṭ-Ṭaiyibeh is more likely the site of the Hapharaim belonging to Issachar (Josh. 19:19) and that Ophrah should possibly be identified with 'Affûleh, which is SW of the hill of Moreh and in the center of the Jezreel Valley. This site seems to agree with the *ʿ-p-r* in the list of Thutmose III (no. 53) and also fits the testimony of Eusebius (*Onom.* 28.25), who placed *Aphraia* about 9 km. (6 mi.) N of Legio. In addition, a tell with both Bronze and Iron Age remains is at 'Affûleh. Although the Abiezer clan is known to have been located in Mt. Ephraim, possibly some of them had migrated to the Jezreel Valley in the north. In support of this position, Josh. 17:11 may hint at a territorial expansion of Manasseh at the expense of Issachar (*LBHG*, rev., pp. 263f.). D. E. WARING

OPINION [Heb. *sᵉʿippâ*–'division,' 'branch'] (1 K. 18:21); NEB "sit on the fence"; [*dē(a)ʿ*–'knowledge'] (Job 32:6, 10, 17); NEB also KNOWLEDGE; [*lēḇ*–'heart'] (Prov. 18:2); AV HEART; NEB WIT; [Gk. *dialogismós*–'thought, reasoning, argument'] (Rom. 14:1); AV, NEB, DOUBTFUL; [*gnṓmē*–'mind,' 'opinion,' 'judgment'] (1 Cor. 7:25); AV, NEB, JUDGMENT. A personal judgment, appraisal, or belief that may or may not be generally shared.

In 1 K. 18:21 Elijah taunts the prophets of Baal as he addresses the people, "How long will you go limping [*pāsaḥ*] with two different opinions?" (the NEB modernizes, "sit on the fence"). Heb. *sᵉʿippîm* serves as a fine paronomasia: the people's indecision between allegiance to Baal or to Yahweh is matched by the torturous dance of the prophets of Baal (cf. piel of *pāsaḥ*, "limp [in the dance]," v. 26). While the general sense of the expression is clear, the precise meaning of *sᵉʿippîm* is uncertain. The cognate noun *sāʿîp* can denote a "cleft" (e.g., Jgs. 15:8, 11) or a "branch" (e.g., Isa. 17:6); the piel of *sāʿap* means to "cut down (branches)." If the basic meaning is "cleft," then the expression might be translated "hobble between two forks (of a road)," i.e., between two opinions or allegiances. J. Gray (p. 396) prefers the translation "hobble on two crutches (made from branches)," but this rendering detracts from the word-play.

Three times in the speeches of Elihu the AV and RSV translate *dē(a)ʿ* "opinion" (Job 33:6, 10, 17). Several commentators, however, prefer the literal translation "knowledge" (e.g., F. I. Andersen, S. R. Driver and G. B. Gray, H. H. Rowley). Elihu shows deference to his elders in waiting his turn to speak, but he is fully confident that what he has to say is "knowledge" imparted by God (v. 8), and that it is superior to the wisdom of his elders (vv. 9-15).

The meaning of Prov. 18:2 is clear: the fool has no interest in understanding but only in spewing out his own ideas, feelings, and opinions (*lēḇ*); therefore he speaks impulsively without bothering first to listen to others (v. 13) or to acquire knowledge (cf. v. 15), and his rash words often lead to ruin (vv. 6f.).

In Rom. 14:1 the RSV translates Gk. *eis diakríseis dialogismṓn* "for disputes over opinions" (AV "to doubtful disputations"; NEB "attempting to settle doubtful points"). Paul's point seems to be that the Roman Christians are to receive into their fellowship those whose faith is weaker (i.e., those who have scruples about eating and drinking, observance of special days, etc.) without provoking disputes about these scruples (see J. Murray, pp. 174f.).

Because he has no ruling from the Lord concerning virgins, Paul simply gives his own "opinion" or "judgment" (AV, NEB) about the matter; but he wants his advice to be taken seriously because of his own trustworthiness (1 Cor. 7:25).

The OT is everywhere concerned about oppression. The Law, the Prophets, and the Writings join their voices in their condemnation of the oppressor, their exhortation not to oppress, and their comforting assurance to the oppressed that God is on their side.

I. Vocabulary of Oppression.–A wide variety of Hebrew words are translated "oppress," "oppression," and "oppressor." The most common word is *ʿāšaq*, which usually signifies the oppressor's enriching himself by violating a neighbor's property rights. Thus in the law it is in a series with "fraud," "robbery," and "deception" about found articles (Lev. 6:2ff.). It parallels "false balances" in Hos. 12:7 and stands in apposition to "coveting" and "seizing one's fields and house" in Mic. 2:2. One delivers the robbed from his "oppressors" (Jer. 21:12; 22:3); in 22:17 *ʿāšaq* stands to "dishonest gain" as "violence" stands to "shedding innocent blood." The word sometimes refers explicitly to withholding the wages of the worker (Lev. 19:13; Dt. 24:14f.; Mal. 3:5), but by extension it can cover any form of oppression. Indeed, the derivative Heb. *ʿošqâ* is used in Hezekiah's prayer (Isa. 38:14) as an emotive cry of distress even though no rights have been violated.

Hebrew *yānâ* has general reference to ill treatment. Other Hebrew words indicate various oppressive uses of power: *nāgaś*, exacting and driving tyranny; *ʿārîṣ* and *ḥāmôṣ*, formidable ruthlessness; *šōḏ*, ruinous violence; and, more mildly, *ṣûq*, constraint, and *ʿōṣer*, restraint.

Hebrew *ʿānâ* and its derivatives suggest the humiliation effected. *Tōḵ* refers to the injury inflicted, *ʿāmāl* to the trouble caused, and *ṣārar* to the hostility shown.

Hebrew *lāḥaṣ*, "squeeze" or "press," *rāṣaṣ*, "crush," *daḳ*, "crushed," *dāḥaq*, "crowded," and *ʿāqâ*, "pressure," are used figuratively.

II. Oppression of the Nation.–Oppression may characterize relations between or within nations. The victims are typically Israel or Judah (except Sidon, Isa. 23:12; Egypt, Jer. 46:16; and Babylon, Jer. 50:16 — all oppressed in judgment and reversal) and the poor and powerless.

The oppression of the Jews by other peoples is important in salvation history. The patriarchs, the Exodus, the judges, the kingdom, the Exile — in the whole story of oppression and deliverance God's covenantal faithfulness is seen, celebrated, and trusted. The song of Asaph celebrates God's covenantal faithfulness in His protection of the wandering patriarchs (1 Ch. 16:21 par. Ps. 105:14, Heb. *ʿāšaq*). The Exodus is remembered and celebrated as God's deliverance from the oppressor Egypt (e.g., Gen. 15:13, in the promise to Abraham, Heb. *ʿānâ*; Ex. 3:9, in the call of Moses, *laḥaṣ* [E; cf. *ʿonî*, "affliction," 3:7; *ʿabōḏâ*, "bondage," 6:6]; Dt. 26:7, in the ancient confession of faith at the offering of first fruits, *laḥaṣ*). The Deuteronomic historians recall the cycle of oppression, repentance, and deliverance in order to lead a threatened people to repentance and recovery. Typically the Lord was moved by pity for His groaning people to raise up judges to deliver them from oppression, but after deliverance the people returned to their unfaithful ways and fell into the hands of oppressors again (Jgs. 2:18f.; cf. 4:3; 6:9; 10:12; 1 S. 12:8ff.; 2 K. 13:4, 22). The song of the covenant, Ps. 106, especially vv. 42-45 (Heb. *lāḥaṣ*, v. 42), sums up the history. Psalmists also celebrated God's deliverance of the nation from oppression (76:9; 107:38f.), expressed their confidence in God as "a stronghold for the oppressed" (9:9), and lamented their present oppression and called to God for deliverance (44:24). The prophets threatened to invoke oppression of the nation as judgment for the people's faithlessness to the covenant (Am. 6:14; Hos. 5:11; cf. the covenant curse of Dt. 28:29, 33), but they were confident that God remained the faithful deliverer of the oppressed (Isa. 9:4; 52:3; Jer. 50:33f.). They thus promised an eventual end of oppression. Sometimes that end is depicted in terms of God's deliverance (Zeph. 3:19; Jer. 30:20), sometimes in terms of the deliverance brought by God's agent (Zec. 9:8). Sometimes the deliverance brought a great reversal, with the oppressed exalted over their oppressors (Isa. 14:2, 4; 60:14; the oppressor Moab pleading for protection from Zion is a gentle form of the same theme, 16:4). Sometimes the promised destruction of the oppressors is gruesomely described (49:26), but sometimes their fate is quite left out of view (54:14). On the other hand, 19:19-25 beautifully tells of an end to oppression; Egypt, Assyria, and Israel, the oppressors and the oppressed, would together worship God.

Even when God delayed deliverance from the oppressor He blessed the people (Ex. 1:12). The whole story serves the prophetic appeals that the people repent and trust God rather than fear the fury of the oppressor (Isa. 51:13).

III. Oppression Within the Nation.–Within the nation the oppressors were the rich and powerful, and their victims were the poor and powerless, the orphan and widow, the slave, the sojourner, and the helpless. The law stands against such oppression (apodictic commands: Ex. 22:21; 23:9; Lev. 19:13; Dt. 23:16; 24:14; casuistic law: Lev. 6:2-5). The context in law sometimes specifies the act, sometimes the victim. An explicitly proscribed act is usually an offense against property (Lev. 6:2-5; 19:13, Heb. *ʿāšaq*). The particular groups mentioned in laws against oppression are poor or powerless (the stranger, Ex. 22:21; 23:9; the slave, Dt. 23:16).

The prophets stood with the law in condemning such oppression (e.g., Isa. 58:3 [Heb. *nāgaś*], where the victims are the workers; Jer. 6:6 [*ʿōšeq*]; 9:6 [*tōḵ*]; Ezk. 22:29 [*yānâ*], where the victims are the poor and needy; Hos. 12:7 [*ʿāšaq*]; Mic. 2:2 [*ʿāšaq*]; Zec. 7:10 [*ʿāšaq*], where the victims are the widow, the fatherless, the sojourner, and the poor; Mal. 3:5 [*ʿāšaq*], where the victims are the hireling, the widow, and the orphan). Perhaps the most memorable condemnation is Amos's line about the cows of Bashan "who oppress the poor, who crush the needy, who say to their husbands, 'Bring, that we may drink'" (Am. 4:1). The prophets pronounced God's sentence against such oppression. In Isaiah the sentence is that God leaves the people in their oppression; in 3:5, 12 oppression and the resulting chaos evince the wrathful judgment of God. Oppression makes worship a mockery and blasphemy (1:12-17 [*ḥāmôṣ*]; 58:5-8 [*rāṣaṣ*]; Jer. 7:4-7 [*ʿāšaq*]). Such oppression is included explicitly by Isaiah (59:13 [*ʿōšeq*]) and implicitly by all the classical prophets among the heinous national sins.

The rulers had a special obligation to stop oppression. Jeremiah exhorted the king to "deliver from the hand of the oppressor he who has been robbed" (Jer. 21:12; 22:3),

and he judged Jehoiakim sternly (22:17). Ezekiel condemned the oppression by the princes of Israel and promised a time when princes would "no more oppress my people" (Ezk. 45:8f.). Even Nebuchadrezzar was exhorted to show mercy to the oppressed (Dnl. 4:27). Ps. 72, a royal Psalm, petitions God, "Give the king thy justice" (v. 1), "may he defend the cause of the poor of the people, give deliverance to the needy, and crush the oppressor" (v. 4; cf. v. 14).

For all the importance of the rulers, it is finally God who is and can be trusted to deliver the oppressed. The king was only to reflect God's siding with the oppressed, as Ps. 72 makes clear. Even while he lamented the arrogance of the oppressor, the psalmist was certain that God would "do justice to the fatherless and the oppressed, so that man who is of the earth may strike terror no more" (10:18). The hymns praise and invite others to praise God, for He "works vindication and justice for all who are oppressed" (103:6; cf. 146:7). Jesus revealed Himself as God's agent when in His inaugural address He announced that His mission included the liberation of the oppressed (Lk. 4:18, quoting Isa. 61:1f.).

Wisdom literature is not based on the law or covenant traditions and does not have grand visions of an eschatological future. But it, too, denounces oppression. The theological emphasis in wisdom literature falls on God the Creator and Sustainer rather than on God the deliverer and lawgiver. Wisdom literature generally sees mankind not as distressed but as sharing responsibility for the well-being of God's creatures. Wisdom's stance toward oppression is caught nicely in Prov. 14:31, "He who oppresses a poor man insults his Maker" (cf. 29:13).

Sometimes the stress on God as Creator and Sustainer and the consequent order in the world led Wisdom to make naive appeals to the prudence of righteousness over against oppression (Prov. 22:16; the Hebrew is very difficult, however). The author of Ecclesiastes, of course, was anything but naive, and one of his complaints against the world was the abuse of power and the resultant unrelieved suffering: "Behold, the tears of the oppressed, and they had no one to comfort them! On the side of their oppressors there was power, and there was no one to comfort them" (Eccl. 4:1). An appeal to the prudence of wicked and vain oppressors is naive because for them self-interest rather than the justice of God, which is written in the covenant and announced by the prophets, determines what is prudent. A more firmly based appeal to prudence shows that oppression is contrary to the order intended by God the Creator.

Characteristically, Luke said more about the oppressed than did any other NT writer. Among the Synoptists only Luke included the account of Jesus' synagogue reading of Isa. 61:1f., in which liberating the oppressed is stressed (Lk. 4:18f.; cf. Acts 10:38; also I. H. Marshall, *Gospel of Luke* [*NIGTC*, 1978], p. 182, who pointed out a similar use of Isa. 61:1f. at Qumrân with reference to the teacher of righteousness). In Acts 7:34 Stephen noted Moses' role as the liberator from oppression. Finally, James pointed out to his readers that the rich were oppressing them and thus deserved no special privileges (Jas. 2:1-7).

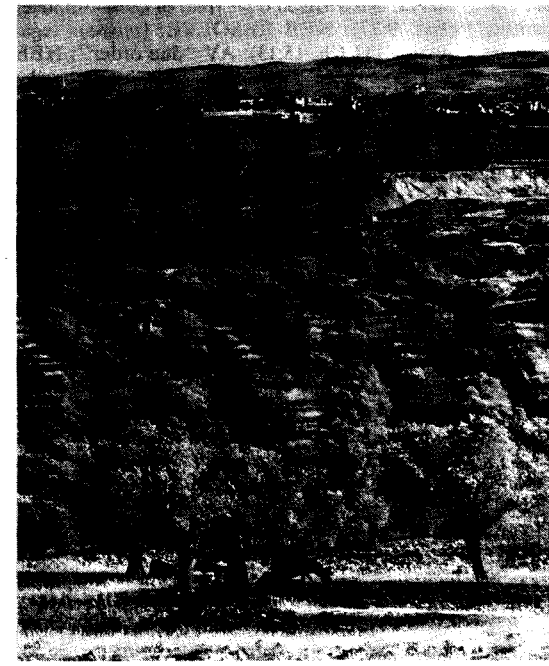
OR. Used in an archaic sense by the AV and RSV once for Heb. *'ô*, "either" (NEB, NIV), "whether" (JB, NAB), in 1 S. 26:10 (but cf. KD). In Ps. 90:2 the AV and RSV translate Heb. *w*^{e} as "or ever" (cf. AV in Eccl. 12:6; Cant. 6:12; Dnl. 6:24; Sir. 18:19).

ORACLE. *See* PROPHECY IV.B.

ORACLES, SIBYLLINE sib'ə-lēn. *See* PSEUDEPIGRAPHA V.F.

ORATION [Gk. *dēmēgoréō*] ("make an oration," Acts 12:21); NEB HARANGUED; **ORATOR** [Heb. *laḥaš*] (Isa. 3:3, AV); RSV "(expert in) charms"; NEB "enchanter"; [Gk. *rhḗtōr*] (Acts 24:1, AV); RSV SPOKESMAN; NEB ADVOCATE.



The verb *dēmēgoréō* is a hapax legomenon in the NT meaning "deliver a public address." In Acts 12:21 it was Herod who "made an oration" to the crowd (cf. 4 Macc. 5:15; Josephus *Vita* 17 [92]).

In Isa. 3:3 the phrase *n*^{e}*bôn laḥaš* (lit. "one who perceives a whisper") is translated "eloquent orator" in the AV. However, *laḥaš* derives from the verb *lāḥaš*, "whisper" or "charm," which probably denotes snake charming in Ps. 58:5 (MT 6). Thus in Isa. 3:3 the noun probably refers to one skillful in muttering charms or magical incantations (cf. Eccl. 10:11; Jer. 8:17), not to speech in general.

Used generally to mean "public speaker" (Philo *De Vita Contemplativa* 31; Josephus *Ant.* xix.2.5 [208]), *rhḗtōr* also meant "advocate, lawyer." The latter sense is attested in an early papyrus MS (Oxy. P. 37, i, 4, N.D.). Tertullus is called *rhḗtōr* in Acts 24:1, AV. The Sanhedrin enlisted him since he was familiar with Roman and Jewish law (E. Haenchen, *Acts of the Apostles* [Eng. tr. 1971], pp. 652, 657). Here he registers a formal complaint before Felix against Paul. G. L. KNAPP

ORCHARD [Heb. *pardēs* < Pers. *pairi-daēza* (cf. Gk. *parádeisos*)–'paradise,' 'park, forest'] (Cant. 4:13); [*ginnâ*–'garden'] (Cant. 6:11); AV, NEB, GARDEN; **OLIVE ORCHARDS** [*zayiṯ*–'olive tree, olive plantation']; AV OLIVE-

Terraced orchard of fig trees outside Bethlehem (TWA)

YARD, OLIVES; NEB OLIVE-GROVE, OLIVE YARD, OLIVE-TREES.

Palestine was known in the ancient Near East as a land rich in fruit trees. When the Israelites took possession of the land, they inherited the orchards of the Canaanites (cf. Dt. 6:11; 8:8; Neh. 9:25). These were so important to the economy that the Israelites were forbidden to destroy them even in time of war (Dt. 20:19f.). Most important of the cultivated trees was the OLIVE TREE. Olive orchards and vineyards are frequently mentioned as vital to the economy of Israel (e.g., Ex. 23:11; Dt. 28:39f.; 2 K. 5:26; 18:32; 1 Ch. 27:27f.). Next in importance was the FIG tree (see Jotham's parable, Jgs. 9:7-15; cf. Am. 4:9; Hab. 3:17). The POMEGRANATE was another favorite fruit (cf. Nu. 13:33; Dt. 8:8; Cant. 4:13; Joel 1:12; Hag. 2:19). Other cultivated trees included the ALMOND and other NUT trees (cf. Cant. 6:11), the PALM TREE, and the SYCAMORE fig. *See also* FRUIT II; Vol. II, Plates 10, 13, 14.

All the kings of the ancient Near East owned vast estates that included orchards. Samuel warned the Israelites that a king would take their orchards and give them to his servants to work (1 S. 8:15). This happened as early as the reigns of Saul, David, and Solomon (cf. 1 S. 22:7; 1 Ch. 27:26-28; cf. also Eccl. 2:4-6, where *pardēsîm* [v. 5] is rendered "parks" by the RSV). Although in the ideal picture of peace and prosperity every Israelite family lived off the fruit of its own plot of land (cf. 1 K. 4:25; 2 K. 18:31; Isa. 36:16; Mic. 4:4; Zec. 3:10), the confiscation of lands and orchards by unscrupulous creditors was a problem throughout Israel's history (cf. Neh. 5:11).

ORDAIN [Heb. *millē' yāḏ*–'fill the hand'] (Ex. 28:41; 29:9, 29, 33, 35; 32:29; Lev. 8:33; Nu. 3:3); AV CONSECRATE; NEB INSTALL, INSTALLATION, CONSECRATE; [*ṣāwâ*–'order, command'] (2 S. 17:14; Ps. 44:4 [MT 5]; Lam. 2:17; 3:37); AV COMMAND, APPOINT; NEB also PURPOSE, BIDDING, "forbid"; [*'āśâ*–'make, appoint, institute'] (Nu. 28:6; 1 K. 12:33); NEB "regular," INSTITUTE; [*nāṯan*–'give, set'] (2 K. 23:5); NEB APPOINT; [*śûm*–'set, place'] (Hab. 1:12); NEB APPOINT; [*šāpaṭ*–'set'] (Isa. 26:12); NEB BESTOW; [piel of *qûm*–'impose, institute'] (Est. 9:27); NEB RESOLVE; [*mišpāṭ*–'legal decision,' 'justice'] (1 Ch. 15:13); AV "due order"; NEB "as we should have done"; supplied contextually by the RSV in 2 Ch. 2:4 (MT 3); 22:7; [Gk. *horízō*–'determine,' 'appoint'] (Acts 10:42; cf. 3 Macc. 6:36); NEB DESIGNATE; [*diatássō*–'order, direct, command'] (Gal. 3:19); NEB PROMULGATE; [*tássō*–'assign'] (Acts 13:48); NEB MARK OUT; [*protássō*–'fix, determine'] (2 Macc. 8:36); AV, NEB, GIVE; [*dídōmi*–'give, grant'] (1 Esd. 1:32); AV ORDINANCE; NEB PROCLAIM; [*plēróō tás cheíras*–'fill the hands'] (Sir. 45:15); AV CONSECRATE; [*gráphō*–'write'] (Tob. 1:6); NEB PRESCRIBE; [*kosméō*–'adorn,' 'set in order'] (Sir. 42:21); AV GARNISH; NEB SET IN ORDER.

Of the Hebrew terms cited, only the expression *millē' yāḏ* refers to consecration of individuals for functions within the community. None of these Hebrew or Greek terms bear the specialized meaning that "ordain" has come to have in postcanonical ecclesiastical circles, namely, appointment to, or installation in, an office that is both limited to recipients of a specific rite and dependent for its validity upon authorization from recognized channels within an ecclesiastical structure.

In the English versions "ordain" is used with at least three different shades of meaning. (1) "Set in order," "arrange." This sense (cf. Lat. *ordināre*), now obsolete, occurs several times in the AV (e.g., Ps. 132:17; Isa. 30:33; Heb. *'ārak*; RSV "prepare"). In the RSV it occurs only at Sir. 42:21. (2) "Establish," "bring about," "issue a decree." This is the most common meaning of "ordain" in the RSV OT and Apocrypha. Most often it refers to divine purposes, judgments, or decrees (e.g., 2 S. 17:14; Ps. 44:4 [MT 5]; Is. 26:12; Lam. 2:17; 3:37; Hab. 1:12), although it occasionally refers to a human action (e.g., 1 K. 12:33; Est. 9:27). In Gal. 3:19 it denotes angelic instrumentality. (3) "Set apart (for a special function)," "appoint." "Ordain" in this sense occurs frequently in the AV (e.g., 1 Ch. 9:22; 2 Ch. 11:15; Jer. 1:5; Dnl. 2:24; Jn. 15:16; Acts 14:23; 17:31), and the RSV has usually changed it to "appoint." The RSV uses "ordain" in this third sense only to translate Heb. *millē' yāḏ* (cf. Sir. 45:15; see *TWOT*, I, 363), an expression used primarily of the consecration of priests; in the NT "ordain" occurs in this third sense only twice, both times with God as the subject (Acts 10:42; 13:48).

In technical ecclesiastical usage "ordain" and "ordination" ordinarily refer to special status accorded ministers or priests through officially sanctioned rites, with associated emphasis on authority to proclaim the Word or to administer sacraments, or to do both. Underlying such terminology is usually a distinction between clergy and laity — a distinction that fails to do justice to the broad spectrum of function and service enjoyed by the people of God (see, e.g., Rom. 12:4-8; 1 Cor. 12:4-31; Eph. 4:7-16), including also ministry by women (e.g., Jn. 20:18; Acts 18:26; Rom. 16:1; 1 Cor. 11:5; Phil. 4:3).

The principal biblical passages that have been cited to support a specialized ordination include Mk. 3:14; Jn. 15:16; 20:21-23; Acts 6:1-6; 13:1-3; 14:23; 1 Tim. 4:14; 2 Tim. 1:6. Of these, neither Mk. 3:14 nor Jn. 15:16 refers to a rite, and the RSV appropriately renders Gk. *poiéō* and *títhēmi* by "appoint" instead of "ordain" (AV). The point of Jn. 20:21-23 is not to specify channels of consecration for declaring forgiveness but to teach the Christian community's independence from Jewish cultic tradition in dealing with sin. According to Acts 6:1-6 the apostles chose the "Seven," on the basis of the gifts they already possessed, to administer distributions to widows; and to ratify this decision the apostles laid their hands on them. This laying on of hands is not a hierarchical prerogative; for subsequently (13:1-3) Barnabas and Saul (Paul) were "set apart" (*aphorízō*; AV "separate") by prophets and teachers, not for an office but for fresh tasks. Despite their rejection by traditionalist Jews (14:19), Barnabas and Paul continued their evangelizing efforts and "appointed" (*cheirotonéō*; AV "ordained") elders (v. 23). No specific rite is indicated. The use of *kathístēmi* to denote official action is amply attested in the Hellenistic world; but in Tit. 1:5 (AV "ordain"; RSV "appoint") there is no hint of any special rite. In keeping with the perspective of Rom. 12:6, the author of 1 Tim. 4:14 affirmed that Timothy received a special gift (*chárisma*) for functioning in the manner outlined in vv. 11-13, when elders assembled and laid hands on him. Similarly, in 2 Tim. 1:6 Timothy received assurance that Paul's own spirit of courageous action, affection, and prudence had been conveyed to him through Paul's hands. Neither passage endorses ecclesiastical prerogative. The referent for the laying on of hands in He. 6:2 cannot be determined (see comms.).

Evidence for the ways in which early Christian communities publicly recognized those who were already functioning or were about to function in various capacities is admittedly slender. Nor can any consistent pattern be established; but fasting, prayer, and laying on of hands appear to be primary features.

In view of the fluidity of practice in the early Christian communities and the technical meanings that "ordain" has acquired, it is probably best to avoid the use of this

term in rendering biblical terms that deal with appointments to various types of service. Awareness of this hazard of anachronism should not, on the other hand, prejudice the privilege of each Christian community to adopt such practices and rites as may assist the Church in expressing and discharging its principal responsibility, the proclamation of the gospel. *See also* BISHOP; HANDS, LAYING ON OF.

ORDER. A term used as both a noun and a verb, with a variety of meanings: (1) the arrangement of persons, objects, or events in their proper places in relation to one another; (2) a proper condition, in which things are harmoniously arranged or regulated according to a set pattern or rule; (3) a classification; (4) an authoritative directive or command.

(1) The arrangement of persons, objects, or events in their proper places in relation to one another. The Hebrew verb *'ārak* often means setting in layers or rows: e.g., arranging wood or offerings on an altar (Gen. 22:9; Lev. 1:7f., 12; 6:12 [MT 5]; 1 K. 18:33; cf. *ma'ᵃrāḵâ*, Jgs. 6:26), the bread of the Presence on the table (Ex. 40:4, 23; Lev. 24:8), lamps in the tabernacle (Lev. 24:3f.), stalks of flax on a roof (Josh. 2:6).

In Job 33:5 *'ārak* has the sense of setting forth arguments in a legal case (cf. 13:18; 23:4; 32:14; 37:19). It has a similar forensic meaning in 2 S. 23:5, where David praises God for having made a covenant that is "ordered in all things" (*'ᵃrûḵâ ḇakkōl*); i.e., its terms are fully set forth. The same verb is used of lining up troops in battle ARRAY (cf. 1 Ch. 12:38 [MT 39], *ma'ᵃrāḵâ*; AV "rank"). In Nu. 10:28 the RSV and NEB render "order of march" for the plural of *massa'* (cognate of *nāsa'*, "set out," v. 28b; cf. AV "journeyings"). A chronological sequence of generations is indicated by *tôlēḏôṯ* (Gen. 25:13; Ex. 28:10). Gk. *kathexḗs* indicates that events are narrated in chronological or logical sequence ("orderly," Lk. 1:3; "in order," Acts 11:4). The frequently occurring phrases "in order to" and "in order that" express a causal sequence, and therefore purpose.

In some instances the verb "order" has the sense of "arrange or regulate to bring about order." Wisd. 8:1 praises Wisdom because "she orders [Gk. *dioikéō*, lit. "keep house, manage"] all things well." The AV frequently uses the verb in this sense: e.g., Aaron "shall order [Heb. *'ārak*] the lamps upon the pure candlestick before the Lord continually" (Lev. 24:4; cf. v. 3; Ex. 27:21; Jer. 46:3; cf. also Ps. 119:133 and Isa. 9:7, where "order" renders the hiphil of *kûn*, "establish" [RSV "keep steady," "establish"]). Sometimes "to order" means to regulate one's own life or behavior. "So Jotham became mighty, because he ordered [hiphil of *kûn*] his ways before the Lord his God" (2 Ch. 27:6). In Ps. 50:23 Yahweh promises, "To him who orders [*śîm*, "sets, fixes"] his way aright I will show the salvation of God." In Gen. 41:40 Pharaoh promises Joseph that all the Egyptians "shall order themselves as you command." The MT *'al-pîḵā yiššaq* literally means "shall kiss you on the mouth"; most versions follow the LXX (*hypakoúsetai*), emending the Hebrew verb to *yāšōq* or *yaqšēḇ*.

(2) A proper condition, in which things are harmoniously arranged or regulated according to a set pattern or rule. In the OT it was considered important that worship be conducted in an orderly fashion. The Levites in charge of the service of song performed their duties "in due order" (Heb. *kᵉmišpāṭ*, lit. "according to custom [or judgment]," 1 Ch. 6:32 [MT 17]). Paul also taught that worship should be conducted "decently and in order" (Gk. *euschḗmónōs kaí katá táxin*, 1 Cor. 14:40). In Col. 2:5 *táxis* describes disciplined Christian behavior, while in 1 Cor. 7:35 *euschḗmōn* denotes moral conduct that will not offend unbelievers (see *TDNT*, II, *s.v.* εὐσχήμων [H. Greeven]). A house that is "put in order" (*kosméō*, Mt. 12:44 par. Lk. 11:25) is one that is tidied (cf. NEB), but the Greek verb may also mean "decorate" (hence AV "garnished"; cf. Lk. 21:5, RSV "adorned").

The phrase "set your house in order" (Heb. *ṣaw lᵉḇêṯeḵâ*), used of Hezekiah (2 K. 20:1; Isa. 38:1) and Ahithophel (2 S. 17:23), means to give final instructions to one's household or to make one's will. Cf. Gen. 49:29 (Jacob) and 1 K. 2:1 (David), where the same verb (RSV "charged") denotes the final injunctions of a dying man. Although usually read as the piel of *ṣāwâ* ("command"), the verb may be a cognate of Arab. *waṣiya*, "make a last testament" (see J. Gray, *I & II Kings* [*OTL*, 2nd ed. 1970], p. 697).

(3) A classification. "Second order" (Heb. *mišneh*, "second") designates a secondary division of priests (2 K. 23:4) or musicians (1 Ch. 15:18). Gk. *tágma* (1 Cor. 15:23) is a military term designating rank. Paul taught the Corinthians that there would be two resurrections: first that of Christ, and then, at His coming, that of the second rank, composed of those who belong to Him.

Psalm 110, traditionally interpreted as a messianic Psalm, speaks of a priest "after the order of Melchizedek" (Heb. *'al-diḇrāṯî malḵî-ṣeḏeḵ*, v. 4). The author of Hebrews quotes the LXX of this text (*katá tḗn táxin Melchisedek*) five times and applies it to Christ (He. 5:6, 10; 6:20; 7:11, 17). Here "order" refers to the higher rank and "the entirely different nature of Melchizedek's priesthood compared with that of Aaron" (Bauer, rev., p. 804; see comms.; *see also* MELCHIZEDEK).

(4) An authoritative directive or command. In the RSV OT the verb "order, give orders" frequently translates the Heb. piel of *ṣāwâ* (Gen. 12:20; 42:25; 2 S. 14:8; 18:5; Est. 4:5, 17; Jer. 36:5, 8; 37:21; AV usually "command" or "give a commandment"). When used of a ruler or person in authority, *'āmar* ("say") sometimes has the sense of "order, command" (e.g., 2 K. 1:11; 10:20; Neh. 13:9, 19; Est. 6:1; 9:25; cf. Aram. *'ᵃmar*, Dnl. 3:19f.). Other verbs are the piel of *yāsaḏ* (Est. 1:8; AV "appoint"; NEB "lay it down"), the piel of *dāḇar* (lit. "speak," Nu. 32:27), and Aram. *šᵉlaḥ* (lit. "send an order," Ezr. 6:13; cf. AV, NEB). Nouns rendered "order" include Heb. *yāḏ* (lit. "hand," 1 Ch. 25:6; 2 Ch. 23:18), *'ēṣâ* (lit. "advice," Ezr. 10:8), *dāḇār* (lit. "word," Est. 1:19; 2:8; 3:15), and Aram. *millâ* (lit. "word," Dnl. 3:22). In Jer. 31:35f. *ḥuqqîm* is rendered "fixed order," i.e., Yahweh's "decrees" (AV "ordinances") that govern the operation of the universe (*see also* HEAVEN, ORDINANCES OF).

In the NT "order" or "give orders" most often renders Gk. *keleúō* (Mt. 8:18; 14:19; 18:25; 27:58, 64; Acts 5:34; 12:9; etc.; AV usually "command"). Other verbs (usually rendered "command" by the AV) are *epitimáō* (lit. "warn," Mt. 12:16; Mk. 3:12), *epitássō* (Mk. 6:27), *diatássō* (Acts 24:23), *parangéllō* (Acts 23:30; NEB "instructed"), and *diastéllō* (He. 12:20). In Jn. 11:57 "orders" (AV "commandment") renders the noun *entolḗ*.

N. J. OPPERWALL

ORDINANCE [Heb. *mišpāṭ*]; AV also JUDGMENT, MANNER, CEREMONY (Nu. 9:3), etc.; NEB also MANNER, CUSTOM, LAW, etc.; [Heb. *ḥōq*, *ḥuqqâ*]; NEB also RULE, LAW, JUDGMENT, etc.; [Aram. *qᵉyām*] (Dnl. 6:7, 15 [MT 8, 16]); AV STATUTE; NEB DECREE;

[Gk. *dikaíōma* (Lk. 1:6), *dógma* (Eph. 2:15)]; NEB also REGULATION. An established religious rite, a statute enacted by a legitimate governing authority, a prescribed order of things, or an authoritative command. The word "ordinance" has an unmistakable legal connotation, apparent in its frequent use in lists alongside such words as "statutes," "testimonies," "commandments," "charges," and "laws" (cf. Dt. 4–30; 1 K. 2:3; 8:58).

The words *ḥōq* and *ḥuqqâ* are derived from a Semitic root meaning to inscribe or engrave. These words are often also translated "statute" or "decree," suggesting that this type of law is specifically prescribed in writing. The word *mišpāṭ* has a much broader meaning, ranging from "justice" (i.e., the desired ideal) to "judgment" to "custom" (i.e., the practiced norm). Behind these nuances perhaps lies the notion that the ideal is the norm in the community ruled by God; customs are not valued for tradition's sake alone but because they provide a channel for the realization of justice. In summary, the word "ordinance" may suggest a specific written code in some instances, while at other times it seems to refer to general, commonly held norms.

(1) In cultic contexts the word "ordinance" designates *an established religious rite*. More specifically, it appears to refer to the customary guidelines and procedures for performing certain rituals and ceremonies, such as the Passover (Ex. 12; Nu. 9; 2 Ch. 35:13), the Feast of Booths (Neh. 8:18), and regular Sabbath observances (Ezk. 20). It also covers the prescribed liturgical practices of temple worship (Ezk. 43:11, 18; 44:5), including the proper manner for performing sacrifices (Nu. 15:16, 24; Nu. 29) and burnt offerings (Lev. 5:10; 9:16; Ezr. 3:4; Ezk. 46:14). While the Israelites believed all these rites and ceremonies to be ordained and established by God, the temple priests undoubtedly were the authoritative interpreters and enforcers of these ordinances. It is quite possible that texts in the Jerusalem temple described in detail the proper liturgical practice of these ordinances (cf. Lev. 1–16).

(2) The word "ordinance" can designate *a statute enacted by legitimate governing authority* (i.e., a specific and binding policy of law). A king had the legal authority to establish an ordinance (see Dnl. 6:7, 15, where a signed document is involved), but he also had the more informal authority of prestige to set a precedent by his own example (cf. 1 S. 30:25; 2 Ch. 8:14).

(3) "Ordinance" is also used in the restricted sense of *a prescribed or "given" order of things*. Behavior that is consistent and predictable is sometimes attributed to underlying laws that govern and control it. The regularity of some natural phenomena suggests underlying laws which govern nature; the Bible declares these to be ordinances established or prescribed by God (Job 38:33; Jer. 33:25). Similarly, human traditions, customs, and norms (which constitute a fairly predictable part of the given social order) belonging both to the faithful (2 Ch. 35:25) and to pagans (Ezk. 5:7; 11:12) are also called "ordinances."

(4) The most comprehensive definition of the word "ordinance" is *an authoritative command*, the authoritative command of God, especially as it relates to the appropriate social behavior of His people. Ancient Israel did not sharply distinguish between the secular and the sacred; everyday conduct was to be shaped according to the ordinances of God (cf. the "Holiness Code," Lev. 18–26).

In some instances God's authoritative command for human conduct seems to have been understood in the narrow legal context of written codes (Josh. 24:25; 2 K. 17:37). In other instances, however, God's authoritative commands appear to have been understood more broadly. God's ordinances were identified more generally with God's ways (Dt. 5:31-33; Ps. 18:21f. [MT 22f.] Isa. 58:2), God's word (Ps. 119:13; 147:19), and the fear of the Lord (Ps. 19:9 [MT 10]). As such, God's ordinances are based upon His gracious activity (Dt. 6:20ff.) and are an integral part of the bond of love uniting God and His people (Dt. 11:1; Ezk. 11:20). They are viewed as the source of life and salvation (Lev. 18:5; 2 Ch. 7:17ff.; Ezk. 20:11, 13). God's ordinances can be viewed less as a formal legal code of commands and prohibitions and more as a fully integrated, deliberate, and disciplined reorientation of life away from self-centered desires (Dt. 8:11ff.). Obedience to God's ordinances therefore is not simply a matter of human effort to conform to a code; rather it reflects the indwelling presence of God's Spirit (Ezk. 36:26ff.).

The tension between God's ordinance as a written, legal code and as a spiritual, righteous will is reflected in Ezk. 20:25, where God seems to admit candidly that legal codes at best have a limited effect in producing true righteousness, and that often they mirror more of the degenerate human condition than they do the transcendent will of God (cf. Mk. 10:2-9). The tension is partially resolved in the NT (cf. Rom. 2:25-29), where righteousness is declared to have appeared in Christ, independent of the law (Rom. 3:21). Reconciliation with God is therefore achieved not through ordinances but through Christ, who abolished the law of commandments and ordinances (Eph. 2:15).

G. A. HERION

ORDINANCES OF HEAVEN. *See* HEAVEN, ORDINANCES OF.

ORDINATION. *See* ORDAIN.

ORDINATION, RAM OF [Heb. *'êl hammillu'îm*] (Ex. 29:22 [without the definite article], 26f., 31; Lev. 8:22, 29); AV RAM OF CONSECRATION; RAM OF INSTALLATION. The "ram of ordination" was the second of two rams sacrificed in the installation ceremony of Aaron and his sons. Because Aaron and his sons had not yet assumed office, the right thigh — normally the priest's portion — was burned on the altar and the breast was eaten by Moses, who was officiating as priest.

See also ORDAIN; PRIESTHOOD; SACRIFICES AND OFFERINGS IN THE OT V.

ORE [Heb. *'eḇen*–'stone'] (Job 28:2f.); AV STONE. Ore was plentiful in the Arabah (cf. Dt. 8:9); thus Job 28 reflects the Edomite setting of the book. The human capacity to dig deep mine shafts and smelt precious metals from the ore (vv. 1-11) is contrasted here with people's inability to find wisdom (vv. 12-28).

OREB ôr'əb [Heb. *'ōrēḇ* or *'ôrāḇ*–'raven']. A Midianite leader captured and killed by Gideon and the men of Ephraim. It is also the name of a rock where Oreb was killed.

Judges 7:25 concludes the chapter which describes Gideon's miraculous rout of the Midianite army from the valley near the hill of Moreh by the use of only three hundred soldiers armed with trumpets and torches. Along with Zeeb, another leader, the Ephraimites captured and killed Oreb at a rock named after him (no longer identifiable). The Ephraimites, at first angry with Gideon because he did not include them in the original battle, were pacified by Gideon's praise of their capture and execution of these Midianite leaders (8:3). Ps. 83:11 (MT 12) and Isa. 10:26 recall that victory in petition and praise to God.

R. L. ALDEN

OREB ôr'əb (2 Esd. 2:33, AV). *See* SINAI.

OREN ôr'ən [Heb. *'ōren*–'laurel']. A son of Jerahmeel and descendant of Judah (1 Ch. 2:25).

ORGAN [Gk. *mélos*–'part,' 'limb'] (1 Cor. 12:18f.); AV MEMBER. *Mélos* is elsewhere rendered "member" (e.g., vv. 12, 14, 25-27) or "part" (vv. 20, 22) by the RSV. *See* MEMBER.

The AV uses "organ" to translate Heb. *'úgāḇ* (or *'uggāḇ*) in Gen. 4:21; Job 21:12; 30:31; Ps. 150:4 (RSV "pipe"). *See* MUSIC II.C.2.

ORGIES [Heb. *hāmôn*–'tumult,' 'crowd'] (Jer. 3:23); AV MULTITUDE; NEB CLAMOUR. The AV and NEB are much more literal here than the RSV, which interprets this verse in the light of vv. 6-10 (see KD, *in loc.*). Thus according to the RSV, Jeremiah regarded with shame the Canaanite fertility rites practiced by Judah during his time. *See also* HIGH PLACE; RELIGIONS OF THE BIBLICAL WORLD: CANAANITE.

ORIENTATION. The means of fixing directions.

I. OT.–In the OT world several methods of fixing directions were used and fluidly combined. (1) Directions are often designated relative to the perspective of the person giving the directions. In this case *qeḏem* signifies what is "in front of" or "before" one, while *'āḥôr* refers to that "behind" or "to the rear." (The concept of four primary directions extending out from the individual or object is clearly expressed in Ezk. 1:17, Heb. *'arbaʿaṯ riḇʿêhen*, "their four sides," translated in the RSV as "their four directions.") *Śᵉmô'l*, "left (hand)," and *yāmîn*, "right (hand)," complete the four primary directions. The limitations of such a system are obvious. The directions expressed are not absolute, but relative to the position of the individual and therefore cannot provide fixed reference points.

(2) Directions based on solar movements are also known in the OT and provide a first step toward fixed or absolute reckoning. Here *mizrāḥ*, "place of coming forth" (cf. Nu. 21:11; Ps. 113:3), and *môṣā'*, "going out" (Ps. 75:6 [MT 7]), designate the "place of (the sun's) rising," while the corresponding "place of setting" is indicated by "place of entering of sun" (Dt. 11:30), *mᵉḇô' šemeš* or by *maʿᵃrāḇ* (1 Ch. 7:28; Ps. 75:6).

(3) The combination of these systems provides a more complete method of determining direction based on solar orientation. This is accomplished by fixing the direction one "faces" toward the sunrise. Thus *qeḏem* becomes synonymous with *mizrāḥ* and regularly signifies "east." In consequence, the other relative terms are fixed as well: *'āḥôr* = *maʿᵃrāḇ* = west; *śᵉmô'l* = north; *yāmîn* = south. Points of the compass between these major coordinates are not usually expressed.

(4) Geographical and topographical features were also employed to produce a system that was absolutely fixed, at least for the locality served. Under this system certain topographical features served to mark the compass points while directions were fixed in relation to them. For Israel in Canaan, west came to be associated with *yām*, "sea," in reference to the Mediterranean, its most prominent topographical feature and the country's western boundary. Similarly north was called *ṣāpôn* from the mountain of the same name that was visible in that area. (Mt. Saphon is identified as Mons Cassius, located in Syria.) Following this pattern, south was designated *negeḇ* for the dry, desert region that marked the southern border of Israel. East does not seem to have a consistent designation, though the term *hāʿᵃrāḇâ* or perhaps *'ēḇer hayyārdēn* may have served this purpose (Gen. 50:10). Most often the terms *mizrāḥ* and *qeḏem* continue to be used (see Josh. 12:1, where *mizrāḥ* serves to qualify both *'ēḇer hayyārdēn* and *hāʿᵃrāḇâ*).

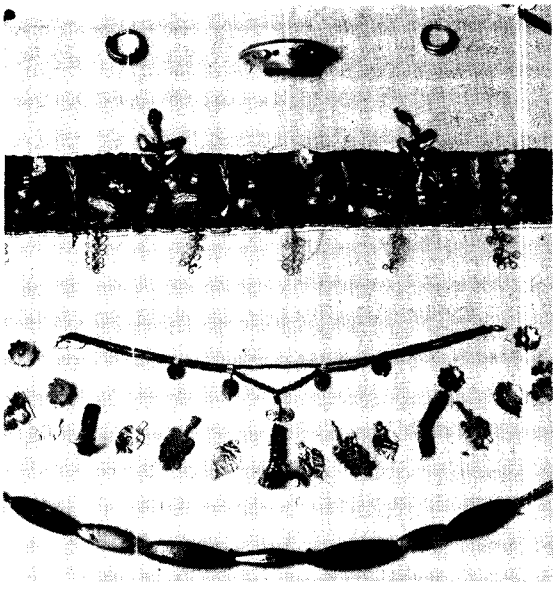
(5) In a more limited sense, direction (or motion) toward or from a particular point can be expressed in a variety of ways. First, simple prepositions, either separable or inseparable, may be used. Thus motion to or toward a point is regularly indicated by the use of the prepositions *'el*, *'aḏ*, and the inseparable preposition *lᵉ-*. Motion away from a point is expressed most frequently by the various forms of the preposition *min*. On other occasions the inseparable preposition *bᵉ-* (which normally indicates motion within a sphere of action) can, in combination with the prepositions *'aḏ*, *lᵉ-*, and with *hê locale*, indicate motion "away from" a given point (Dt. 1:44, *bᵉśēʿîr 'aḏ ḥormâ*, "from Seʿir to Hormah").

II. NT.–In the NT world two systems of orientation were commonly used: solar-stellar and a nautical system relying on wind direction.

A. Solar-stellar Orientation. Here, as in the OT, orientation is fixed according to solar movements. East is *anatolḗ* or "rising" and sometimes occurs with *hḗlios* ("sun") explicitly expressed. West by correspondence becomes *dysmḗ*, "setting [of the sun]" (Mt. 8:11). In addition to these two obvious solar directions, the Greek employs *mesēmbría*, "midday," to indicate south, the position of the sun at noon (Acts 8:26). Since there is no appropriate solar position to mark the final compass point, Greek employs the stellar terminology *árk(t)os*, "the bear" (i.e., Ursus Major, connected with the Polar Star) to designate north.

B. Nautical Orientation. The Greeks were master sailors and thus well acquainted with the winds on which their navigation depended. It is not surprising, therefore, that the most frequently employed means of orientation was based on wind direction. Names were given to the winds that emanated from certain points of the compass: north = *aklýdōn*/*akýlōn* (Lat. *aquilo*; sometimes known as *borrás*, Lk. 13:29; Rev. 21:13); south = *nótos* (Lat. *notus*); east = *eúros* (Lat. *eurus*); west = *zéphyros* (Lat. *zephyrus*). It was also possible to designate intermediate winds between these points: northwest = *chóros* (Lat. *corus*; Acts 27:12); southwest = *líps* (Lat. *africus*; Acts 27:12); northeast = *eurakýlōn* (between *eúros* and *akýlōn*; Lat. *euro-aquilo*; Acts 27:14); southeast = *eúro-nótos* (between *eúros* and *nótos*; Lat. *phoenix*/*vulturnus*).

See O. Eissfeldt, *Baal Zaphon, Zeus Kasios, und der Durchzug der Israeliten durchs Meer* (1932).



G. H. WILSON

ORION ō-rī'ən [Heb. *kᵉsîl*] (Job 9:9; 38:31; Am. 5:8). A brilliant constellation (the translation of *kᵉsîl* in Isa. 13:10) of stars dominating the winter night sky in northern latitudes, named after the mythical Greek hunter. The three OT references mention it as demonstrating the transcendent creative power of the Lord. See G. R. Driver, *JTS*, 7 (1956), 1-11.

Most commentators (see the comms. on Job by KD, Driver and Gray [*ICC*], Rowley [*NCBC*], Pope [*AB*]; comms. on Amos by Driver [*CBSC*], Wolff [Eng. tr. *Hermeneia*]) have explained that *kᵉsîl*, "Orion," is directly related to *kᵉsîl*, "fool," i.e., the ancients viewed Orion as a foolish giant (cf. Syr. *gabbārā'*, "giant," in Job 9:9; 38:31) who offended the gods and was punished with death. Cf. T. Gaster, *Thespis* (2nd ed. 1961), pp. 260, 320-29.

N. GREEN G. A. L.

Various ornaments from the tomb of Queen Shubad (Ur, ca. 25th cent. B.C.) (University Museum, University of Pennsylvania)

ORNAMENT [Heb. *ʿᵃḏî*] (Ex. 33:4-6; 2 S. 1:24; etc.); NEB also JEWEL, JEWELLERY, FINERY; [*ḥᵃlî*] (Prov. 25:12); NEB NECKLACE; [*meged*–'precious gift'] ("costly ornament," Gen. 24:53); AV PRECIOUS THING; NEB COSTLY GIFT; [*tôr*–'string (of jewels)'] (Cant. 1:10f.); AV ROW (OF JEWELS), BORDER; NEB PLAITED TRESS, BRAIDED PLAIT. A decorative article used for personal adornment. In the RSV "ornament" usually represents Heb. *ʿᵃḏî*, a general term derived from *ʿāḏâ*, "adorn" (e.g., Jer. 2:32; 4:30). Archeological excavations have uncovered many fine examples of jewelry in Palestine and other countries of the ancient Near East. In biblical times both men and women wore ornaments fashioned from gold, silver, and semiprecious stones (*see* GARMENTS IX; JEWEL; STONES, PRECIOUS; pictures in GARMENTS and GOLD; *see also* individual articles ARMLET; BRACELET; EARRING; NECKLACE; PENDANT; RING).

The precise meaning of *tôrîm* in Cant. 1:10f. is uncertain. If it is derived from the stem *twr*, "go around, turn," it may refer to a round object, a series or string of objects (see *CHAL*, p. 388; cf. AV), or something plaited (see KoB, p. 1023; cf. NEB; RV "plait"). Most commentators agree that *tôrîm* represents some sort of ornamentation worn on the cheeks of a horse or a woman (see M. Pope, *Song of Songs* [*AB*, 1977], pp. 343f.). N. J. O.

ORNAN ôr'nən. *See* ARAUNAH.

ORPAH ôr'pə [Heb. *ʿorpâ*–perhaps 'neck'; LXX *Orpha.*] Ruth's sister-in-law.

The family of Elimelech had left Bethlehem during a famine in the period of the judges (Ruth 1:1). After Elimelech died (v. 3), his two sons, Mahlon and Chilion, married Moabite women, Ruth and Orpah, respectively (cf. 4:10). Ten years later both sons died (1:5). When Naomi heard that the famine in Judah was over, she decided to return to her homeland. Her daughters-in-law were determined to go with her, but Naomi urged them to return to their homes, where they might have the opportunity to remarry (vv. 8-13). In an intensely emotional scene Orpah relented and returned to her people and to her gods (vv. 14f.), but Ruth would not be dissuaded from following Naomi (vv. 16f.).

Though the biblical text does not condemn her — indeed, only praises her (v. 8) — her behavior contrasts sharply with the devotion of Ruth. Thus in Jewish tradition the name Orpah acquired a negative meaning because of her action of turning her back on the Lord (Midr. *Ruth Rabbah* ii.9).

See also RUTH. R. B. ALLEN

ORPHAN [Heb. *yāṯôm*; Gk. *orphanós*]; AV, NEB, also FATHERLESS (CHILD).

The Heb. *yāṯôm* occurs three times (Ex. 22:22 [MT 21]; Hos. 14:3 [MT 4]; Mal. 3:5) in the singular and once (Lam. 5:3) in the plural. The remedying of social abuses involving orphans and widows had formed an important part of social reform movements in Sumer during the 3rd millennium B.C., led by such rulers as Urukagina of Lagash (*ca.* 2350 B.C.) and Ur-Nammu, the founder of the Third Dynasty of Ur (*ca.* 2100 B.C.; cf. *ANET*, p. 524). Hammurabi claimed to promote justice for the orphan (*ANET*, p. 178). The Ugaritic myths also stress the virtue of caring for orphans (*ANET*, pp. 149, 151, 153).

The law of Moses showed special concern for the fatherless (Ex. 22:22; Dt. 10:18; 24:17-22; etc.), pleading for justice on their behalf (P. C. Craigie, *Deuteronomy* [*NICOT*, 1976], pp. 206, 310f.). This concern was rooted in God's redemption of Israel from Egypt.

Orphans were included with widows, resident aliens, and Levites as beneficiaries when the special tithe was apportioned at the end of a three-year period (Dt. 14:29; 26:12). At harvest time the workers were encouraged to leave some fallen fruit, small sheaves, or incompleted mowings for the widows, orphans, and aliens. These "gleanings" helped such underprivileged classes to feel an integral part of the covenant community of Israel (Craigie, p. 311), and assured them that justice in society existed for them also. Strong humanitarian concerns were an important characteristic of the Torah, expressing the nature of a God who was the "father of the fatherless" (Ps. 68:5 [MT 6]; cf. 10:14).

Orphaned daughters were especially vulnerable in the ancient Near East, and even though they might have inherited ancestral property in the absence of brothers, they could still fall prey to the greedy and unscrupulous. Consequently legislation was enacted in the Torah (Nu. 27:7-11) that safeguarded the rights of such women in Israel with all the authority of "statute and ordinance."

The tradition of providing for orphans and widows was a continuing feature of Israelite life. The preexilic prophets, following the doctrines of the Mosaic law, were insistent in their demands for justice for the "fatherless" (Isa. 1:17; cf. R. E. Clements, *Isaiah*, I [*NCBC*, 1980], 34; Jer. 22:3; Zec. 7:10). Hosea affirmed that the orphan found mercy at God's hands (14:3). In Sirach a man was instructed to be like a father to orphans, and in this way would become like a son of the Most High (4:10; cf. 2 Esd. 2:20). In the Maccabean period, when the Jewish forces defeated the soldiers of Nicanor in battle, they included the widows and orphans of the district among the recipients of plunder (2 Macc. 8:28, 30). The Talmud regarded as most worthy of commendation any act of charity to orphans.

The biblical orphan is usually the child of the widow. There is no clear case where the term implies the loss of both parents. Hence the translation "orphan" instead of "fatherless" is arbitrary (except in Lam. 5:3, where it is chosen for stylistic reasons); the connotations of "orphan" are the same as those of "fatherless."

The widow and orphan typify the helpless and defenseless among God's people. In exile Israel called itself an

orphan to express its helplessness (Lam. 5:3). Like the orphan, Israel confessed that God alone could help it (Hos. 14:3). Thus "orphan" becomes associated with the redemption promised by God. The prophet promised that the Day of the Lord would bring vindication for the widow and orphan and judgment for their oppressors (Mal. 3:5).

Greek *orphanós* occurs twice in the NT (Jn. 14:18; Jas. 1:27). In Jn. 14:18 the term is often not translated "orphan" (AV "comfortless"; RSV "desolate"; NEB "bereft"; but cf. JB, NIV, NAB, NASB). Some scholars suggest that a similar usage is found in Greek and rabbinic literature, which apply "orphan" to disciples whose teacher or rabbi has died (e.g., cf. B. Lindars, *Gospel of John* [*NCBC*, repr. 1981], p. 480). The gospel, however, presents Jesus as more than a teacher and implies that he used *orphanós* to assure His disciples that His departure would not cancel the vindication promised by the OT prophet.

James's definition of true religion continues the OT requirement to protect the widow and orphan (Jas. 1:27; cf. Dt. 24:17f.). The redemption received by God's people obligates them to assist and to seek justice for those who are oppressed and cannot help themselves.

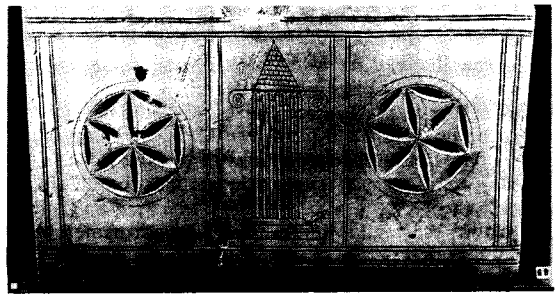
OSNAPPAR os-nap'ər [Aram. *'osnappar*]; AV ASNAPPER; NEB ASNAPPAR. An Assyrian king who deported and resettled foreign peoples in Samaria (Ezr. 4:10). He is usually identified with ASHURBANIPAL.

OSPREY os'pri [Heb. *'oznîyâ*] (Lev. 11:13; Dt. 14:12); AV OSPRAY; NEB BEARDED VULTURE. One of the birds of abomination.

Because the osprey (*Pandion haliaetus*) is a fish-eating bird, and since fish are to be found only in a few places in Palestine, the short-toed eagle (*Circaetus gallicus*), which closely resembles the osprey, has sometimes been a preferred identification.



The NEB rendering "bearded vulture" (*Gypaetus barbatus*) may be appropriate enough in that that bird is a resident Palestinian species, but it is doubtful that the ancients could have approached that creature closely enough to have observed the so-called beard (G. Cansdale, *Animals of the Bible* [1970], p. 145). Some type of vulture, though, would seem suitable in the context of birds prohibited as food. The vulture's habit of feeding on carrion would have been sufficient to include it on the list of proscribed foodstuffs.

G. WYPER

OSSIFRAGE os'ə-fräj [Heb. *peres*–'breaker'] (AV Lev. 11:13; Dt. 14:12). *See* VULTURE.

OSSUARIES osh'ə-wār-ēz [Gk. *ostophágoi*; Lat. *ossuarium*–'for bones']. Small clay or limestone chests, usually 50-75 cm. (20-30 in.) long, 30-50 cm. (12-20 in.) wide, and 25-40 cm. (10-16 in.) deep, used for burial of human bones. The corpse was buried in a cave or tomb in the rocks until it decomposed enough for the bones to be gathered into a small receptacle for reburial; this procedure was followed to make room for new burials. Hundreds of these bone-boxes have been found near Jerusalem and Nablus and in Galilee, most of which date before A.D. 70. In 1945 E. L. Sukenik found several in a family tomb in a Jerusalem

Side of a limestone ossuary (Israel Department of Antiquities and Museums)

Aramaic inscription, "Simeon, builder of the sanctuary," on an ossuary from Giv'at ha-Mivtar (Israel Department of Antiquities and Museums)

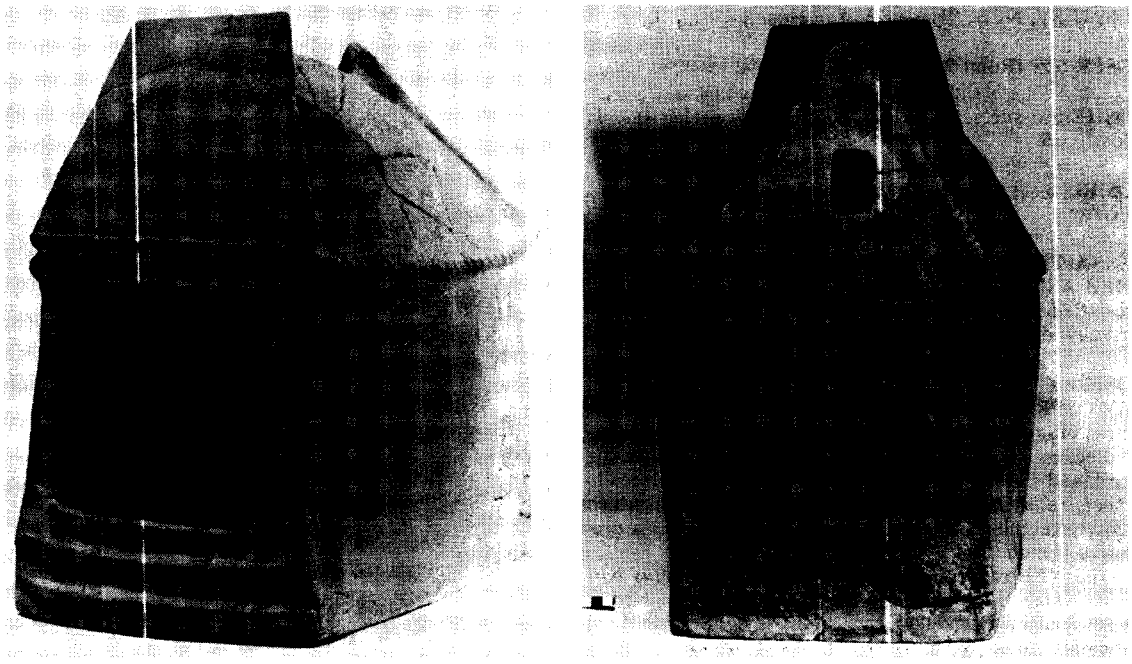
suburb, Talpioth, on the road to Bethlehem; one contained a coin of Herod Agrippa dating to A.D. 42-43. Others which reflect the Chalcolithic period (4300-3150 B.C.) have been found in Haderah, Bene-berak, and Azor. The ossuary was used as late as the Gaonic period (6th-11th cents. A.D.).

Some ossuaries are plain; others have paneled framework and decorations of plants, buildings, gates, crosshatchings, or rosettes. The lids are flat, rounded, or gabled. Some of the chests are shaped like a four-legged receptacle with a vaulted roof, a door with a bolt in the facade, and windows in the rear. Some facades even have the appearance of human faces.

Many of the ossuaries have brief inscriptions in Greek or Aramaic, or both, that give the names and sometimes the professions of the departed. One ossuary found at Giv'at ha-Mivtar in 1968 is inscribed with the name "Simon" followed by Aramaic words, which are problematic but seem to be translatable as "one of the builders of the sanctuary." Thus Simon was probably one of the master masons or engineers who worked on Herod's temple. Another ossuary is inscribed, "The bones of the sons of Nicanor, who made the door." Possibly these were the workers on the doors of the Nicanor Gate in the second temple.

Another interesting inscription is one presented by S. Klein (1929), which reads, "Herein were placed the bones of Ussia, the King of Judah. And [the ossuary] is not to be opened." *See* picture in UZZIAH. Many other names on ossuaries are also known from the Bible, e.g., "Jesus son of Joseph" in an Aramaic inscription, which dates to the 1st cent. A.D. but has no bearing on the belief in the resurrection of Jesus, since both names were common at that period.

The ossuary found at Giv'at ha-Mivtar, mentioned above, was only one of fifteen found in three burial caves. These contain the remains of thirty-five individuals. Five ossuaries contain evidence of death by violence: by crucifixion, conflagration, a blow from a mace, starvation, and once death in childbirth. The case of crucifixion is of particular interest, since the bones include two pierced by a large iron nail; this evidence has a bearing on the position of the body and the techniques used in crucifixion. *See* CROSS VI.B.



These ossuaries are important because they indicate the physical characteristics of the people who lived in Jerusalem just prior to the destruction of the second temple and because the skeletal remains in them bear certain marks of violence, which lend emphasis to the chaotic events of that time.

OSTRACA os'trə-kä. Potsherds, specifically those used as writing materials. Gk. *óstraka* is the plural of *óstrakon*, a term used in the LXX (Job 2:8; Ps. 21:16 [Eng. 22:15]; Isa. 30:14) and elsewhere to refer to a POTSHERD (piece of broken pottery). Unglazed pottery was common in antiquity, and potsherds, which could be picked up in any rubbish heap, were often used (and sometimes reused after washing) for ephemeral records such as school exercises, letters, receipts, memoranda, bills, and short-term contracts. Ostraca could be used even by the poorest classes, who could not afford anything else to write on.

Ostraca were commonly used in Egypt from the Old Kingdom (*ca.* 2650-2150 B.C.) on, though the majority are of New Kingdom date (*ca.* 1550-1050 B.C.). Although the writing on most ostraca is in ink, some are incised. Their use in Mesopotamia was more limited because potsherds were more suitable for scripts easily written with pen and ink (such as Aramaic) rather than for those usually inscribed with a stylus (such as cuneiform).

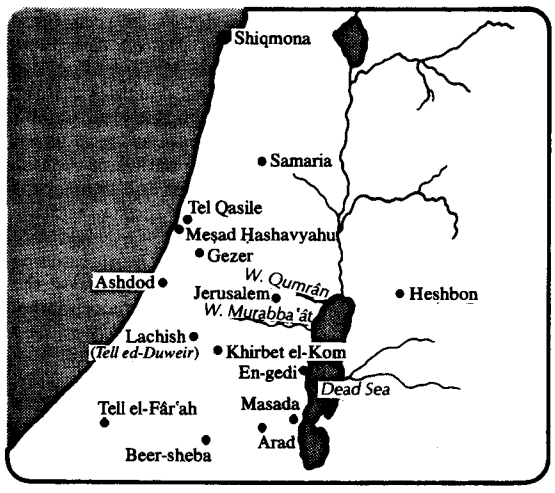
OSTRACA



Since ostraca tend to be preserved under conditions that would readily destroy parchment, leather, or papyrus, they have been found even in Palestine. Excavators in Israel and Jordan are taking greater care now, and increasing numbers of ostraca are being discovered. Such finds are valuable for linguistic and paleographic study as well as for revealing the life of the common person in both the ancient and classical worlds.

In ancient Greek cities ostraca were used for casting votes. Thousands of these potsherds inscribed with the names of candidates for banishment have been discovered in Athens; thus "ostracize" (Gk. *ostrakízein*) came to mean voting for the banishment of an accused person (cf. Aristotle *Constitution of Athens* xxii.6).

I. Hebrew and Aramaic Ostraca.–In 1908-1910 the excavation of a palace storeroom in SAMARIA uncovered more than sixty Hebrew ostraca containing memoranda related to the delivery of wine and oil from districts in western Manasseh to the Israelite royal court. The exact dating of these texts is in dispute. Suggestions range from the first half of the 9th cent. B.C. to the second half of the 8th cent. B.C. If as late as the latter, these texts, inscribed with ink in a Paleo-Hebrew script, may reflect the tribute exacted by King Menahem in 738 B.C. in order to appease Tiglath-pileser III, king of Assyria (2 K. 15:19f.).

In 1935 and 1938 excavations in the gatehouse at Tell ed-Duweir (LACHISH) revealed twenty-one ostraca from the early 6th cent. B.C. in Paleo-Hebrew script. One is dated in the ninth year of King Zedekiah (589/588), when Nebuchadrezzar besieged and destroyed Jerusalem (2 K. 25:1). These ostraca, containing a series of reports to the military commander of Lachish, reflect the situation of Jer. 34:6f., when Lachish and Azekah were the only Judean cities that remained standing against the Assyrian armies. Two of the documents refer to the "the prophet." Though there are other candidates, many scholars believe him to have been Jeremiah. In any case, the tetragrammaton appears and the Yahwistic religious context of these ostraca is clear. (*See also* LACHISH LETTERS.)

Excavations at ARAD (begun in 1962) uncovered over a hundred ostraca, some incised but most written in ink. Roughly half were written in Hebrew from various periods of the Iron Age; most of these are letters and dockets. Some letters refer to rations for the KITTIM, known from both the OT and the Dead Sea Scrolls, and one letter mentions the *byt yhwh*, "house of Yahweh," thus providing the first direct reference to the Jerusalem temple in Hebrew epigraphy. Other ostraca had only a name inscribed, but two of these names are known from the Bible; the priestly families of Meremoth and Pashhur. The Aramaic ostraca, from *ca.* 400 B.C., are mostly dockets of the Persian garrison.

Excavations at Masada have yielded eleven ostraca bearing personal names, including Ben Ya'ir, probably referring to Eleazar ben Jairus, the commander of the Zealot stronghold destroyed in A.D. 74 by Silva and his Roman legionnaires. These ostraca present grim evidence of the casting of lots by Eleazar and his ten leaders for the executioner's role in the final stage of the besieged defenders' mass suicide (Josephus *BJ* vii.9.1 [389-401]; *see also* MASADA IV). Other important Dead Sea ostraca of the Roman period come from Wādī Qumrân and Wādī Murabba'ât.

In addition to the major groups of Palestinian ostraca mentioned above, the following smaller finds are noteworthy: examples as early as the 16th cent. B.C. come from Gezer and Lachish; from the 8th cent. B.C. the "Ophir ostracon" from Tel Qasile (Tell el-Qasîleh) and the "Simeon ostracon" from Beer-sheba; from the 7th cent. B.C., an ostracon illustrating Ex. 22:26f. found at Meṣad Ḥashavyahu as well as the "Ophel ostracon" from Jerusalem; from the 6th cent. B.C., a whole series of Ammonite ostraca from HESHBON (Tell Ḥesbân); from the 5th cent. B.C. agricultural ostraca from Ashdod and Tell el-Fâr'ah (S); from the 5th/4th cent. B.C., "barley" ostraca from Arad and an abecedary from Shiqmona; and from the 4th cent. B.C., Aramaic ostraca from Tell el-Kheleifeh, En-gedi, and Beer-sheba. Though they were found in Egypt, the Aramaic ostraca from Elephantine (5th cent. B.C.) are extremely important for Palestine.

II. Greek and Coptic Ostraca.–The earliest Greek inscription found in Palestine was the third-century B.C. bilingual (with Aramaic) ostracon from Khirbet el-Kôm. But the great bulk of Greek ostraca, many preserving documents of various kinds (chiefly tax receipts), have been found in Egypt. The texts of more than four thousand have been published, including major collections held by the United Kingdom, Belgium, Germany, Canada, and the United States. These texts illustrate in unexpected ways the everyday Greek speech of the common people of Egypt through the Ptolemaic, Roman, and Byzantine periods. Like the papyri, they help to illumine the syntax and lexicography of the NT as well as daily life in the ancient world. No remains of classical literature have been found on ostraca except for excerpts that were apparently used for school exercises, and possibly a quotation of some Sappho verses (cf. G. Vitelli, *et al.*, eds., *Papiri greci e latini* [1912-], no. 1300).

In some instances Christian literary texts are preserved on Egyptian ostraca. Most remarkable is a series of twenty ostraca of various sizes, probably from the 7th cent. A.D., inscribed with the Greek texts of parts of Matthew, Mark, Luke, and John. The longest continuous text is Lk. 22:40-71, written on ten numbered pieces. The texts, written in three different hands, attest the poor's interest in the NT text at the time of the Arab conquest. They also display an early form of the NT text that was widespread in Egypt — a form supported by the distinguished codices Vaticanus and Sinaiticus. Although these ostraca were cataloged among NT MSS by C. R. Gregory (0153), they are not MSS in the technical sense and have not been treated as such in subsequent inventories by K. Aland and others.

Coptic ostraca are numerous, especially from the Byzantine period, and of even more interest for Christian history than Greek ostraca. A Sahidic ostracon preserves

the pericope on the woman taken in adultery (Jn. 7:53–8:11), which is otherwise unattested in the Sahidic MSS of the NT. A Christian hymn to Mary, akin to the canticles in Luke, and many Christian letters have been found. Coptic ostraca provide unusually valuable information on the religious and economic history of Egypt from the time of the Arab conquest onward.

OSTRICH [Heb. *baṯ hayya'ᵃnâ*–'daughter of greed' or 'daughter of the desert'] (Isa. 13:21; 34:13; 43:20; Jer. 50:39; Mic. 1:8); AV OWL; NEB DESERT-OWL, OWL; [*Q yā'ēn*–'greedy one' or 'desert one'] (Lam. 4:3); [*r'nānîm*–'ringing cries'] (Job 39:13); AV PEACOCK. The largest bird now living (*Struthio camelus*); once an inhabitant of all the semi-desert regions of the Near East from Egypt to Mesopotamia, but now confined (in the wild) to Africa. Standing 2-2½ m. (6-8 ft.) tall and weighing up to 140 kg. (300 lbs.), the ostrich does not fly but runs very swiftly, using its wings as sails. It has been known to reach speeds of 80 km. per hour (50 mph) in open country.

The ostrich was hunted in the ancient Near East both for its feathers and for food. In the OT, however, it is listed among the "unclean" birds that the Israelites were forbidden to eat (Lev. 11:16; Dt. 14:15). In most of the other OT references the ostrich is associated with other wild creatures (esp. the jackal) that frequent uninhabited areas such as deserts and ruins. Two passages refer to its plaintive night cry (Job. 30:29; Mic. 1:8).

Although the identification of the *baṯ hayya'ᵃnâ* with the ostrich goes back to the Targums and the LXX (cf. *strouthós* in Lev. 11:16; Dt. 14:15; Job 30:29), G. R. Driver rejected this translation (though he accepted it for *yā'ēn* and *r'nānîm*) and argued that the expression denotes a type of owl (*HBD, s.v.* "Ostrich," "Owl"; *PEQ*, 87 [1955], 12f.; *see also* ABOMINATION, BIRDS OF). Many scholars have followed his suggestion (e.g., cf. NEB, NIV; see also *CHAL*, p. 138; Cansdale, pp. 190f.), although others continue to support the traditional identification with the ostrich. Some relate the terms *ya'ᵃnâ* and *yā'ēn* to an Arabic term meaning "barren ground, desert" (the ostrich's habitat); others relate these terms to a Syriac term meaning "greedy" (perhaps from the ostrich's habit of swallowing any object it can find, even if it is inedible).

The hapax legomenon *r'nānîm* may be a poetic name for the ostrich derived from its disturbing cry (see BDB, p. 943). Although the Hebrew text of Job 39:13 is unintelligible and so has spawned numerous emendations and translations (see comms.), most scholars agree that *r'nānîm* refers to the ostrich. Verses 14f. probably refer to the female habit of covering her eggs with sand and leaving them to be warmed by the sun in the heat of the day. The eggs have a thick shell (about 6 mm. or ¼ in.), and thus only a few animals can destroy them. It is usually the male, with his darker plumage, who incubates the eggs at night. Extra eggs are placed near the incubated ones to serve as food for the young. When danger approaches, both the cock and the hen run off in an attempt to divert attention from the nest; the chicks' feathers provide good camouflage when they lie still. It was perhaps misunderstanding of these habits that led to the female ostrich's reputation for cruelty to her young (v. 16; cf. Lam. 4:3). The charge of stupidity (Job 39:17) may have derived from the ostrich's tendency to swallow hard objects or from its well-known habit, when cornered, of lowering its head rather than attempting to escape. In open country, however, an ostrich can easily outstrip a horse and its rider (v. 18; see Bodenheimer).

Assyrian cylinder seal showing a man, bow and arrow on his back and sword in hand, throttling an ostrich (9th-8th cent. B.C.) (The Trustees of the Pierpont Morgan Library)

OTHNI oth'nī [Heb. *'oṯnî*]. Son of Shemaiah; a Levitical gatekeeper (1 Ch. 26:7).

OTHNIEL oth'ni-əl [Heb. *'oṯni'ēl*]. Reputations for good or ill are sometimes gained in a single important event in one's life. Othniel is remembered for his military victory over Debir (Josh. 15:17; Jgs. 1:13). Debir, previously known as Kiriath-sepher, had initially been conquered by Joshua (Josh. 10:38f.), but apparently needed to be recaptured after the tribal inheritances had been allotted. Caleb had been granted a portion in Judah (Josh. 15:13) and needed help capturing Debir. He promised his daughter Achsah as a wife to whoever would smite Debir. Othniel, Caleb's younger relative (either brother or nephew), rose to the challenge and captured Debir. At the urging of Achsah and through her request, Caleb gave her and Othniel the "upper and lower springs" as land for their use (Josh. 15:19; Jgs. 1:15).

In addition to this military exploit, Othniel is remembered as the first judge and deliverer of Israel following the death of Joshua. Without a theocratic mediator, Israel followed the desires of its heart and was quickly enticed to worship Baal, the native deity of the land (Jgs. 3:7). A certain Cushan-rishathaim, king of Mesopotamia, was the instrument of God's wrath into whose hand Yahweh sold Israel (Jgs. 3:8). For eight years Israel was "slave" of Cushan-rishathaim, but Israel's cries for help were answered by Yahweh in raising up a deliverer for His people — Othniel.

He was the first of many such deliverers, and the pericope (Jgs. 3:7-11) detailing Othniel's role is paradigmatic of successive deliverers. That the deliverer and judge is raised up by Yahweh indicates that the Lord's leadership is paramount and not that of the deliverer. Whatever personal and military qualities Othniel may have had, his role in this event is determined not by the people's choice but by Yahweh's selection. Yahweh's kingship is served by a leader of His choosing.

Furthermore, the "Spirit of the Lord" (Jgs. 3:10) came upon Othniel to enable him for his task as it did his successors Gideon (6:34), Jephthah (11:29), and Samson (14:6). The Spirit of the Lord frequently was granted those who were Yahweh's co-workers in the working out of His plan of salvation in history. Othniel was endowed with this Spirit so that he could judge Israel, set it on the pathway of obedience, and wage warfare against the enemies of the Lord and His people. The benefits of the Spirit such as wisdom, understanding, counsel, might, and fear of the Lord were apparently granted Othniel as he judged (i.e., set on the right course) Israel and overcame its oppressor.

Othniel's work resulted in a period of "rest" for forty years (Jgs. 3:11), a characteristic refrain in Judges. The unrest of Israel was a consequence of disloyality to its covenant suzerain (2:20). Apostasy from Yahweh, forgeting Yahweh's saving acts which gave it birth (2:10), mingling with the people of the land, and adopting their ways (2:6–3:6) all contributed to making the land of promised rest a land of unrest. The deliverers thus had to do more than win battles against external foes — they had to redirect the loyalties of the people as well. Othniel's judging was more than condemnation; it was also a work of leading to reconciliation. Othniel delivered Israel from external oppression (Cushan-rishathaim) and saved it from its own evil ways. Only then could the land return to the true rest.

D. H. ENGELHARD

OTHONIAH oth-ə-nī'ə [Gk. *Othonias*]; AV, NEB, OTHONIAS oth-ə-nī'əs. A layman who had married a foreign woman and was required to divorce her (1 Esd. 9:28); called MATTANIAH (11) in Ezr. 10:27.

OUCHES. An archaic term designating a setting for a precious stone, used by the AV to translate Heb. *mišbᵉṣôṯ* in Ex. 28:11, 13f., 25; 39:6, 13, 16, 18 (RSV "settings"; NEB "rosettes"). The Hebrew term is probably derived from the verb *šāḇaṣ*, "weave in a pattern"; thus the settings were not of solid gold but were formed of gold wire woven around the stones (cf. RSV "settings of gold filigree" when *mišbᵉṣôṯ* is combined with *zāhāḇ*, "gold"; *see* FILIGREE). Ex. 39:3 describes how this wire was produced.

OUTCAST [Heb. niphal of *nāḏaḥ* and *dāḥaḥ*–'be cast out, scattered']; AV also EXPELLED, DRIVEN OUT; NEB also BANISH, BANISHMENT, SCATTERED SONS, DRIVEN OUT, HOMELESS (PEOPLE), DISPERSED. As used by the RSV, "outcast" generally refers to a people who have been expelled from their homeland. The Israelites were warned that their apostasy would be punished by banishment from their land (cf. Dt. 28:63f.) — a threat that was fulfilled when they were taken into exile by Assyria and Babylon (*see* CAPTIVITY). When they repented, however, they were promised a restoration to their homeland (cf. Dt. 30:3-5; Isa. 11:11f.; 56:8; Jer. 30:17f.; Zeph. 3:19; cf. also Ps. 147:2). Many of Israel's neighbors and enemies also suffered banishment (e.g., Moab, Isa. 16:3f.; cf. Jer. 30:16).

Absalom chose banishment to the Aramean kingdom of Geshur, the home of his maternal grandfather (2 S. 13:37f.), to escape punishment for murdering his half-brother Amnon (vv. 28f.; *see* PUNISHMENTS); but through the intervention of Joab and a woman of Tekoa, David was later persuaded to restore Absalom to his own home (14:13f., 21-24).

See also FUGITIVE; DISPERSION. N. J. O.

OUTER COURT. *See* TEMPLE; *see also* floor plan in EZEKIEL.

OUTER DARKNESS [Gk. *skótos exṓteron*]; NEB THE DARK. An expression occurring only in Matthew (8:12; 22:13; 25:30), describing the future state of those who because of their unfaithfulness have been denied entrance into the brightly lit banquet hall that symbolizes the joy of the Kingdom. In Jewish literature "darkness" was associated with the place of eternal punishment (cf. 1 En. 103:5-8: "Woe to you, ye sinners, when ye have died, . . . and into darkness and chains and a burning flame where there is grievous judgement shall your spirits enter; and the great judgement shall be for all the generations of the world . . ." [*APOT*, II, 275]; for rabbinical references, see SB, IV, 1075-83), and Jesus was apparently using it in the same sense.

See also DARK; GNASH; HELL. N. J. O.

OUTER NATURE [Gk. *éxō ánthrōpos*] (2 Cor. 4:16); AV OUTWARD MAN; NEB OUTWARD HUMANITY. *See* INNER MAN; NEW NATURE.

OUTER TENT. The RSV translation of Gk. *hē prṓtē skēnḗ* (lit. "the first tent/tabernacle"; cf. AV, NEB) in He. 9:2, 6, 8. The outer tent (HOLY PLACE) was the first part of the TABERNACLE that was entered by the high priest on the Day of Atonement; it was separated from the "second" (*deutéra*, v. 7; i.e., the Holy of Holies) by a curtain (cf. vv. 2f.). Many commentators, with the RSV, interpret the phrase in v. 8 in the same way as in vv. 2 and 6 (e.g., J. Moffatt [*ICC*, 1924]; cf. also *TDNT*, VII, *s.v.* σκηνή [W. Michaelis]); according to this view, the Holy Place was a *parabolḗ* (v. 10, RSV "symbolic"), because it blocked the people's access to the presence of God. Others, however, with the NEB ("the earlier tent"), have interpreted the phrase to mean that the entire tabernacle with its Levitical ritual (cf. v. 1) was a sign that free access to God was not yet possible (e.g., F. F. Bruce [*NICNT*, 1964]; P. E. Hughes [1977]). N. J. O.

OUTGOINGS [pl. of Heb. *môṣā'*] (Ps. 65:8 [MT 9]). The Heb. *môṣā'* (<*yāṣā'*, "go forth") here probably refers to the place from which the morning and evening go forth, i.e., the east and the west, and hence is an expression (merismus) for the whole earth (so A. A. Anderson, *Psalms*, I [*NCBC*, repr. 1981], p. 470; BDB, p. 425). Others, however, think it refers to "the limits of the day, and so the goings out of morning and evening worship in the temple" (C. A. Briggs and E. G. Briggs, comm. on Psalms, II [*ICC*, 1907], 82; on p. 85 Briggs notes that *môṣā'* in Ps. 19:6 [MT 7] refers to dawn). G. A. L.

OUTLANDISH. Used by the AV with its original meaning "out of the land," i.e., "foreign" (RSV, NEB), translating Heb. *nokrî* (Neh. 13:26). Nehemiah used the argument from the history of Solomon and his foreign wives (cf. 1 K. 11:1-10) to convince the Jewish leaders of the extreme danger brought in by intermarriage with foreigners.

OUTRAGE; OUTRAGEOUS. The adjective in Prov. 27:4, AV, translates Heb. *šeṭep*, "flood." "Anger is overwhelming" (RSV) and "anger is a deluge" (NEB) are better translations. The RSV uses the verb in He. 10:29

to translate Gk. *enybrízō*, "insult, offend, outrage" (AV "hath done despite unto"; NEB "affronted").

OUTROADS. An obsolete term (cf. its opposite, "inroads," still used in modern English) used by the AV to translate Gk. *exodeúō*, "go forth, march out," in 1 Macc. 15:41 ("that . . . they might make outroads upon the ways of Judea"; cf. RSV "make raids"; NEB "patrol").

OUTSIDER [Heb. *zar*] (Ex. 29:33; 30:33; Lev. 22:10, 12f.); AV STRANGER; NEB UNQUALIFIED PERSON; [Gk. *idiṓtēs*] (1 Cor. 14:16, 23f.); AV UNLEARNED; NEB PLAIN MAN, UNINSTRUCTED PERSON; RSV mg. "him that is without gifts" (v. 16); [*ho éxō* (1 Cor. 5:12; Col. 4:5; 1 Thess. 4:12), *ho éxōthen* (1 Tim. 3:7)]; AV "them that are without"; NEB also "those outside your own number." "the non-Christian public."

Hoi éxō and *hoi éxōthen* clearly refer to those outside the Christian fellowship (cf. "those outside," Mk. 4:11). The meaning of *idiṓtēs*, however, is disputed. Bauer (rev., pp. 59f., 370) interprets literally the expression *ho anaplērṓn tón tópon toú idiṓtou*: "he who takes the place of the inquirer" (i.e., a group of proselytes or catechumens — distinct from both the *pistoí* ["believers"] and the *ápistoi* ["unbelievers"; cf. vv. 22-24] — who had a part of the room reserved for them). Most scholars, however, interpret the expression as referring figuratively to those in the position of the non-ecstatic who could not understand tongue-speaking (*see* TONGUES, GIFT OF). Some identify the *idiṓtai* with the *ápistoi* ("unbelievers") with whom they are mentioned in vv. 23f. (e.g., see *TDNT*, III, *s.v.* ἰδιώτης [H. Schlier]; cf. H. Conzelmann, *1 Corinthians* [Eng. tr., *Hermeneia*, 1975], pp. 238f.).

See also STRANGER (OT). N. J. O.

OUTWARD MAN; OUTWARD HUMANITY. *See* OUTER NATURE.

OVEN [Heb. *tannûr*; Gk. *klíbanos*]; NEB also FURNACE, STOVE. The Heb. *tannûr* refers to the small domestic oven (Ex. 8:3 [MT 7:28]; Lev. 11:35) used for baking breads of various types (Lev. 2:4; 7:9; 26:26). It is seen blazing with fire as a sign of Yahweh's wrath (Ps. 21:9 [MT 10]; Mal. 4:1 [MT 3:19]; cf. "furnace" in Isa. 31:9). The results of Yahweh's wrath are seen in Lam. 5:10, where the people's skin is as hot as an oven, due to a scorching famine. A portable, smoking *tannûr* (RSV "fire pot") is a symbol of Yahweh's presence before Abraham in Gen. 15:17. In Hos. 7:4, 6f. wicked ones in Israel burn hot like an oven with evil deeds and intrigue. The LXX translates *tannûr* by *klíbanos* except in Isa. 31:9. The NT also uses *klíbanos* (Mt. 6:30 par. Lk. 12:28). (On Neh. 3:11 and 12:38, *see* OVENS, TOWER OF THE.)

Many different cooking devices are known from all over the Near East, from earliest times to the present. The *tannûr* was the most common baking oven, with two basic types, both made of clay. One was cylindrical or slightly conical, about 70-100 cm. (27-39 in.) high and 50-60 cm. (20-24 in.) wide, with an open top. It was usually placed in the ground, either indoors or with a small cubical hut above it to keep out the rain. The other was about the same size, but more egg-shaped, even pointed, with small openings in the top and the base. It was usually above ground, topped with a flat stone or clay cover. Large, inverted water jugs were sometimes used as substitutes.

A fire was first built on a layer of small stones on the oven floor. Then the coals were raked or scooped out so that the bread dough could be placed against the hot inner walls (though occasionally outside as well), or on the hot stones, and peeled off when done. In some cases, the walls were covered with mud or potsherds the better to preserve heat. The common fuels were wood, charcoal, dried grasses and weeds (cf. Mt. 6:30 par. Lk. 12:28), straw, and animal dung (cf. Ezk. 4:12, 15).

Small oven at Qumrân (W. S. LaSor)

D. M. HOWARD, JR.

OVENS, TOWER OF THE [Heb. *migdal hattannûrîm*]; AV TOWER OF THE FURNACES. A tower in the wall of Jerusalem, rebuilt under Nehemiah (Neh. 3:11; 12:38). It was in the northwestern corner of the city, near the Broad Wall (cf. 3:8; 12:38). Very likely it was the tower built as a fortification of the Corner Gate by King Uzziah (2 Ch. 26:9). The name suggests that baker's ovens were located in this vicinity (*see* BAKERS' STREET). *See also* JERUSALEM III.F.2.d'.

OVERCHARGE. A term used twice by the AV in the archaic sense "to weigh down with an excessive load." It translates Gk. *barýnomai* (lit. "be weighed down" [so RSV]) in Lk. 21:34 and *epibaréō* (lit. "weigh down"; RSV "put it too severely") in 2 Cor. 2:5.

OVERCOME [Heb. niphal of *hāyâ*–'happen, occur' (Dnl. 8:27), *hālam*–'strike' (Isa. 28:1), *ḥāzaq*–'be strong' (1 K. 16:22), *yāḵōl*–'be able to, can' (Nu. 13:30; Jer. 20:10f.), hiphil of *nāḵâ*–'strike, hit,' 'conquer' (1 S. 30:1), *ʿāḇar*–'cross, go over' (Jer. 23:9), *qûṣ*–'feel disgust, dread' (Nu. 22:3), *rûḏ*–'roam' (Ps. 55:2 [MT 3])]; AV also "faint," "smite," (BE) DISTRESSED, "mourn"; NEB also "prove stronger," CONQUER, "catch," ATTACK, etc.; [Gk. *nikáō* (1 Jn. 2:13f.; 4:4; 5:4f.; etc.), *katalambánō*–'seize', *kataphérō*, *hēttáomai*–'be defeated (by), succumb (to)']; AV also "astonished," "comprehended," "sunk down"; NEB also OVERPOWER, MASTER, CONQUER, DEFEAT, BE VICTOR OVER, "be beside oneself."

The RSV OT uses "overcome" in several different contexts. In military contexts "overcome" refers to the conquest of one people or faction by another. Thus the Amalekites conquer Ziklag (1 S. 30:1), and Omri's followers prove too strong for Tibni's supporters (1 K. 16:22). The great numbers of the Hebrews apparently caused the Moabites to be overcome with fear (Nu. 22:3; cf. Ex. 1:12, where the same verb is used to describe the Egyptians' dread

of the rapidly multiplying Hebrews). In Nu. 13:30 Caleb confidently predicts that the Hebrews can conquer Canaan. Here *yāḵôl nûḵal* (lit. "to be able we are able"), the infinitive absolute followed by a finite verb form, expresses emphasis, which the RSV, AV, and NEB amplify a bit more than the Hebrew form warrants (cf. more accurate translations in the NIV, JB, NAB).

The Heb. *yāḵōl* also occurs in the context of a more personal or individual use of "overcome": Jeremiah's enemies hoped to silence his opposition to them, but he was confident that, since the Lord was on his side, he would not be overcome (Jer. 20:10f.; cf. v. 7, where the same verb is translated "prevail"). Similarly, the psalmist prayed for help because he was overwhelmed by his troubles (Ps. 55:2), which apparently refers to oppression by enemies (v. 3). Although the form and precise meaning of MT *'ārîḏ* are problematic (see comms.), the context seems to require a meaning like the RSV. Another problematic text is Dnl. 8:27, where the RSV translates the niphal of *hāyâ* as "overcome" (AV "fainted" and NEB "strength failed" are similar). Usually this form of the verb means "was fulfilled, brought about," but that meaning hardly fits the context here. Although scholars have suggested various explanations and emendations (see comms.), none is satisfactory.

Two texts speak of being overcome by wine. In both instances the verbs used are unusual. In Isa. 28:1 the prophet pronounces a woe against the drunkards of Ephraim (i.e., the northern kingdom), who are "overcome by wine" (Heb. *hᵃlûmê yāyin*, lit. "those struck [down] by wine"; usually *hālam* means simply "hit"). In Jer. 23:9 Jeremiah likens his prophetic experience to drunkenness; cf. the similar use of *'āḇar* with water (i.e., a flood that overwhelms a person) in Jonah 2:4 (cf. also Ps. 38:4 [MT 5]).

The most common NT term is Gk. *nikáō*, the usual Greek word for gaining victory in individual physical conflict (as in Lk. 11:22) or war. It is related to the nouns for "victory," *níkē* (1 Jn. 5:4) and *níkos* (Mt. 12:20; 1 Cor. 15:54f., 57). In the NT it is usually applied to winning in spiritual or eschatological conflict, either by Christ (e.g., Jn. 16:33) or the believers (e.g., Rom. 12:21; cf. the translation "prevail" in 3:4). Bauernfeind correctly says that in the NT it is "a word of promise, an eschatological word" (*TDNT*, IV, 945). In addition to the six times it appears in 1 John, *nikáō* is used often in Revelation (2:7, 11, 17, 26; 3:5, 12, 21; 5:5; 6:2; 11:7; 12:11; 13:7; 15:2; 17:14; 21:7; RSV always "conquer"). At the close of each of the seven letters of Rev. 2–3 the believer who "conquers" is promised an eschatological reward. *See also* CONQUER.

In Jn. 1:5 the term is *katalambánō*, which can mean "win, make one's own," "suppress," or perhaps even "grasp" in an intellectual sense, i.e., "comprehend." This term is only one part of a difficult verse that has received varying interpretations. For more complete discussion see the comms.; also Bauer, rev., p. 413.

In Acts 20:9, the story of Eutychus, both "sank into (a deep sleep)" and "being overcome (by sleep)" use passive forms of Gk. *kataphérō*. The first use is in the present tense, probably indicating the process of falling asleep, while the second use is a past tense (aorist) that would indicate being sound asleep (cf. F. F. Bruce, *Acts of the Apostles* [2nd ed. 1952], p. 373).

"What overcomes a man" in 2 Pet. 2:19 represents Gk. *hō̧... tis hḗttētai*, lit. "by which (thing)...someone is defeated." The same verb is translated "(be) overpowered" in the next verse.

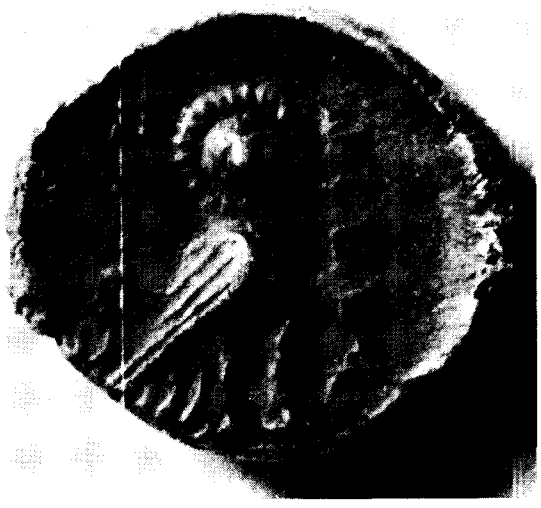
In Mk. 5:42 RSV "overcome" is used to avoid an awkward rendering of the Gk. *exéstēsan ekstásei megálę̄* (lit. "amazed with great amazement"), probably an example of Semitic influence on the style of NT Greek (cf. BDF, §198[6]).

R. H. MOUNCE
G. A. L.

OVERLAY [Heb. *ṣāpâ*] (Ex. 25–27; 30:3, 5; 36–37; 38:2, 6, 28; 1 K. 6:20ff.; 10:18; 2 K. 18:16; 2 Ch. 3:4; 4:9; 9:17); NEB also PLATE; [*ṣippûy*] (Ex. 38:17, 19); [*ṭû(a)ḥ*] (1 Ch. 29:4); [*ḥāpâ*] (2 Ch. 3:8f.); [*rāqaʿ*] (Isa. 40:19); AV SPREAD OVER; NEB "covers with plate"; [*tāpaś*] (Hab. 2:19); AV LAID OVER; NEB ENCASED. Both the tabernacle and the temple extensively used overlay of gold, silver, and bronze. In 2 K. 18:16 Hezekiah stripped the overlay from the doors of the temple to provide the thirty talents of gold demanded by Sennacherib. Isa. 40:19 and Hab. 2:19 refer to the custom of overlaying wooden idols with gold.

OVERPASS. An obsolete verb used three times by the AV as a translation of Heb. *'āḇar* ("pass over"). In Ps. 57:1 (MT 2) and Isa. 26:20 it has the meaning "pass" or "pass by" (cf. RSV, NEB). In Jer. 5:28 it means "pass over the boundaries" (cf. RSV "know no bounds").

OVERPLUS. The AV translation of Heb. *hāʿōḏēp* (part. of *'āḏap*, "remain over"), i.e., "that which remains over, surplus," in Lev. 25:27 (RSV "overpayment"; NEB balance").



OVERSEER; OVERSIGHT. In the RSV OT, usually the translation of a form of Heb. *pāqaḏ* ("appoint"; e.g., hiphil in Gen. 39:4f.; hophal in 2 K. 12:11 [MT 12]) or one of its cognates: *pāqîḏ* ("officer," e.g., Gen. 41:34) and *pᵉquddâ* ("commission," e.g., Nu. 3:32). Other OT terms are *mišmereṯ* ("custody, service," Nu. 3:32) and the piel of *nāṣaḥ* ("supervise," 2 Ch. 2:18 [MT 17]; Ezr. 3:8f.). These terms designate various types of supervisors or officers; e.g., a steward in charge of an Egyptian officer's house (Joseph, Gen. 39:4f.); foremen assigned to supervise slave levies (2 Ch. 2:2, 18); overseers of various tasks in the tabernacle and temple (e.g., Nu. 3:32; 2 Ch. 31:13; cf. Ezk. 44:11).

In the NT Gk. *episkopos* is rendered "overseer" by the AV and some editions of the RSV in Acts 20:28; cf. also the RSV mg. of Phil. 1:1 (AV, RSV, NEB, "bishop"). The AV (cf. RSV mg.), following certain ancient MSS, renders "take oversight" for *episkopéō* in 1 Pet. 5:2. *See* BISHOP: GENERAL II; GUARDIAN.

N. J. O.

OWL [Heb. *kôs*] (Lev. 11:17; Ps. 102:6; Zeph. 2:14 [emended reading of the Hebrew text, which has *qôl*, "voice"]; "little owl," Dt. 14:16); AV also "voice" (Zeph. 2:14); NEB also TAWNY OWL; [*yanšûp, yanšôp*] (Isa. 34:11; "great owl," Dt. 14:16); NEB SCREECH-OWL; [*qippôz*] (Isa. 34:15); NEB SAND-PARTRIDGE. The name of the nocturnal birds of prey forming the order *Strigiformes*. All owls are characterized by a large head and eyes, a short hooked bill, and powerful talons.

Identifying Hebrew terms for owls has always caused problems for translators, as the widely varying translations show. Most scholars agree that Heb. *kôs* and *yanšûp* designate owls, although there is less agreement about the species they refer to. There is less agreement about *qippôz* (Isa. 34:15), which has often been translated "arrowsnake" (cf. ASV "dart-snake"; JB "viper"), based on a derivation from Aram. *qᵉṗaz* ("leap, spring"); others, however, prefer the translation "owl," since the arrow snake does not incubate eggs (cf. BDB; KoB; KD). The NEB's translation "sand-partridge" follows the suggestion of G. R. Driver. Many scholars also believe that Heb. *baṯ yaʿᵃnâ* (RSV "ostrich") designates a species of owl (so AV, NEB; *see*

Silver hemiobol showing an owl. The inscription reads "Yehezekiah the satrap" (Jerusalem, ca. 350 B.C.) (Israel Museum, Jerusalem)

OSTRICH). On the AV's rendering "screech owl" for Heb. *lîlîṯ* in Isa. 34:14, *see* NIGHT HAG

Owls are listed among the "birds of abomination" that the Israelites were forbidden to eat (Lev. 11:17 [here the RSV renders *kôs* "owl" but, inexplicably, renders *yanšûp* IBIS]; Dt. 14:16). Probably they were considered unclean because they eat flesh with blood in it. G. R. Driver (*PEQ*, 87 [1955], 5-20) attempted a scientific analysis of the birds on these lists (Lev. 11:13-19; Dt. 14:11-20) and concluded that no less than eight of the terms refer to various kinds of owls, beginning with the largest species and ending with the smallest (*see* ABOMINATION, BIRDS OF; see also *HDB*). The NEB has largely followed his suggestions. These identifications must remain tentative at best, however. Because owls are basically nocturnal birds, it is unlikely that ancient peoples could have observed them closely enough to identify so many species; moreover, several of the birds on Driver's list appear in Palestine only rarely or in migration. Furthermore, as Driver himself conceded, "some of the words may be alternative or local names for the same bird" (*HDB*).

While all identifications of Hebrew terms with particular species of owls remain tentative, it is quite possible that the OT writers were familiar with some of the species that are now present in Palestine. The most common is the little owl (*Athene noctua*), which is only about 27 cm. (10½ in.) long and can be found nearly everywhere, especially in lonely places such as thickets, tombs, and ruins. "Little owl" is the AV and RSV translation of *kôs* in Dt. 14:16 (Driver used this translation for *tinšemeṯ*; see NEB Lev. 11:18; Dt. 14:16; cf. RSV "water hen"). The eagle owl *(Bubo bubo)*, the largest and fiercest of the owls in Palestine (about 45 cm., 18 in. long), is common in semi-desert areas covered with scrub; it is Driver's translation of *baṯ ya'ᵃnâ* (Lev. 11:16; Dt. 14:15; RSV "ostrich"). The tiny scops owl *(Otus scops)*, only about 20 cm. (8 in.) in length, is a summer visitor to Palestine. Although it is seldom seen, its call is often heard. Driver suggested this as the bird designated by *qā'āṯ* (RSV "pelican," Lev. 11:18; Dt. 14:17). The tawny owl (Driver's translation of *qā'aṯ* (see NEB Lev. 11:17; Dt. 14:16), about 40 cm. (16 in.) in length, is a fairly common resident in Palestine; but like the scops owl it is heard much more often than it is seen. The screech owl (Driver's translation of *yanšûp*; cf. RSV "great owl," Dt. 14:16), about 33 cm. (13 in.) in length, is also abundant in Palestine. Although seldom seen by day, it is easily recognized by its peculiar hissing or snoring noises and its raucous screech in flight. The short-eared owl (Driver's translation of *taḥmās*, Lev. 11:16; Dt. 14:15; RSV "night hawk") migrates through Palestine, and the long-eared owl (Driver's translation of *šāḥap*, Lev. 11:16; Dt. 14:15; RSV "sea gull"), rarely seen, visits the forests of Palestine during the winter. The fisher owl (Driver's translation of *šālaḳ*, Lev. 11:17; RSV "cormorant") is not known to reside in Palestine.

Apart from the references in Lev. 11 and Dt. 14, owls appear in the OT only figuratively. Along with other wild creatures that haunt wastelands and ruins, the owl symbolizes the loneliness of a tormented psalmist (Ps. 102:6 [MT 7]) and the desolation of nations upon which the judgment of the Lord has descended (Edom, Isa. 34:11, 15; Assyria, Zeph. 2:14).

OWL, SCREECH. *See* NIGHT HAG; OWL.

OX ŏx [Gk. *Ōx*]. Grandfather of Judith; father of Merari; descendant of Israel (Jth. 8:1).

OX; OXEN [Heb. *šôr*] (Gen. 32:5 [MT 6]; 49:6; Ex. 20:17; etc.); AV also BULLOCK, "wall" (reading *šûr*, Gen. 49:6); NEB also BULL, CATTLE, HERD; [*bāqār*] (Gen. 12:16; 20:14; 21:27; etc.); [*ben-habbāqār*–'son of the herd,' 'calf,' 'ox'] (Isa. 65:25); AV BULLOCK; NEB CATTLE; [*par*–'young bull'] (Ex. 24:5); NEB BULL; [pl. of *'elep*–'cattle'] (Ps. 8:7 [MT 8]; Isa. 30:24); [Aram. *tôr*] (Dnl. 4:25, 32f. [MT 22, 29f.]; 5:21); [Gk. *boús*–'bull,' 'cow'] (Lk. 13:15; 14:5, 19; Jn. 2:14f.; 1 Cor. 9:9; 1 Tim. 5:18); NEB also CATTLE; [*taúros*–'bull'] (Mt. 22:4; Acts 14:13); NEB also BULLOCK; [*móschos*–'calf,' 'young bull,' 'ox'] (Rev. 4:7); AV CALF. A domesticated, horned, bovine mammal descended from *Bos primigenius* (called the aurochs in Europe; *see* WILD OX); more specifically, a full-grown male ox. Heb. *bāqār* (also rendered "herd," "cattle," etc.) is a collective term for bovine cattle, which can include bulls, cows, calves, and heifers. Heb. *šôr* and the Aramaic cognate *tôr*, on the other hand, usually denote the adult male of the species, i.e., a bull or steer. *See* CATTLE.

On Dt. 22:10, *see* YOKE; on Dt. 25:4 (LXX quoted in 1 Cor. 9:9; 1 Tim. 5:18), *see* MUZZLE. N. J. O.

OX-GOAD. *See* GOAD.

OXYRHYNCHUS SAYINGS OF JESUS. *See* LOGIA II.

OZEM ō'zəm [Heb. *'ōṣem*].

1. The sixth son of Jesse and older brother of David (1 Ch. 2:15). The LXX (*Asom*) and Vulgate readings suggest that his name should be pointed *'āṣōm*.

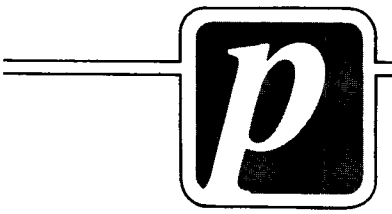
2. The fourth son of Jerahmeel, a descendant of Judah (1 Ch. 2:25).

OZIAS ō-zī'əs.

1. (AV, NEB, Jth. 6:15f.; 7:23; 8:9; etc.). *See* UZZIAH **2.**

2. (2 Esd. 1:2, AV). *See* UZZI **7.**

3. (Mt. 1:8f., AV). *See* UZZIAH **1.**



OZIEL ō'zi-əl [Gk. *Oziēl*]. An ancestor of Judith (Jth. 8:1).

OZIUS ō-zī'əs (1 Esd. 5:31, NEB). *See* UZZAH **5.**

OZNI oz'nī [Heb. *'oznî*–'my ear'(?)]. A descendant of Gad and head of the family of the Oznites (Nu. 26:16). He is called Ezbon in Gen. 46:16.

OZNITES oz'nīts [Heb. *hā'oznî*]. The clan descended from OZNI (Nu. 26:16).

OZORA ō-zôr'ə (1 Esd. 9:34, AV). *See* EZORA.

P. The Priestly source in the Pentateuch, according to the Graf-Wellhausen development hypothesis. P is generally dated after the Babylonian Exile. *See* CRITICISM II.D.5.

PAARAI pā'ə-rī [Heb. *pa'ᵃray*]. An ARBITE; one of David's valiant men known as the "thirty" (2 S. 23:35). He is called "Naarai the son of Ezbai" in 1 Ch. 11:37.

PACATIANA pā-kə-ti-ā'nə, pak-ə-tī'ə-nə. The AV follows certain late Greek MSS in adding a subscription to 1 Timothy: "The first to Timothy was written from Laodicea, which is the chiefest city of Phrygia Pacatiana [Gk. *Pakatianē*]." The name did not appear until *ca.* A.D. 300, when Diocletian divided the province of Asia into seven parts; two of the new provinces were named Phrygia Prima (Pacatiana) and Phrygia Secunda (Salutaris). See *HDB*, III, 865.

PACE [Heb. *regel*–'foot'] (Gen. 33:14); AV GO, "be able to endure"; [infinitive of *rāḵaḇ*–'ride'] (2 K. 4:24); AV RIDING; [*ṣa'aḏ*] (2 S. 6:13); NEB STEP. A rate of movement (walking [Gen. 33:14]; riding an ass [2 K. 4:24]); or a distance based on one human step (2 S. 6:13).

PACHON pā'kŏn [Gk. *Pachōn*]. The name of the ninth month (April 26-May 25) in the Egyptian calendar (3 Macc. 6:38).

PADAN; PADDAN pad'ən. *See* PADDAN-ARAM.

PADDAN-ARAM pad'ən-ā'ram or -âr'əm [Heb. *paddan ᵓᵃrām*; Gk. *Mesopotamia, Mesopotamia Syrias*]; AV PADAN-ARAM. The region of Harran in upper Mesopotamia. "Paddan-aram" and "Haran" may be dialectical variants for the same locality, since *padānu* and *ḫarrānu* are synonyms for "road" or "caravan route" in Akkadian. It should not be identified with Tell Feddan, which R. O'Callaghan called "a factitious localization of Paddan Aram in later Syrian tradition" (*Aram Naharaim* [1948], p. 96).

In the Bible the name designates the home of Bethuel, father of Isaac's wife Rebekah (Gen. 25:20). Jacob was sent there by his father to find a wife and to escape his brother Esau's wrath (ch. 28). Jacob lived in Paddan-aram about twenty years, tending the flocks of his father-in-law Laban as the bride price for his wives Leah and Rachel. In this way he also earned a sizable flock for himself before returning to the land of Canaan. This area is referred to simply as "Paddan" in 48:7, but this may be a textual error (cf. the NEB); the LXX, which includes *tēs Syrias*, may indicate a text that read "Paddan-aram" (the Sam. and Syr. also support this reading). The people who lived in the area were called "Arameans" (31:24) and the language was "Aramaic" (v. 47). D. H. MADVIG

PADDLE. *See* STICK.

PADON pā'don [Heb. *pāḏôn*; Gk. Apoc. *Phadōn, Phalaios*]; AV Apoc., NEB Apoc., PHALEAS. The head of a family of temple servants (NETHINIM) who returned from exile with Zerubbabel (Ezr. 2:44 par. Neh. 7:41; 1 Esd. 5:29).

PAEDIAS pə-dī'əs (1 Esd. 9:34, NEB). *See* BEDEIAH.

PAGANS. A term increasingly used in modern versions as an occasional rendering for Gk. *éthnē*, which the AV translates "Gentiles." Moffatt used "pagans" rather frequently in the OT and four places in the NT (Mt. 5:47, where the original is *ethnikoí*; 1 Cor. 10:20; 12:2; Eph. 4:17). Goodspeed used "heathen" in such passages. "Pagans" appears in Mt. 5:47 (JB, NIV); 1 Cor. 5:1 (RSV, NEB, JB, NIV); 10:20 (RSV, NIV); 12:2 (NASB, NEB, JB, NIV); Eph. 2:11 (JB); 4:17 (NEB, JB); 1 Thess. 4:5 (NEB, JB, NIV); 1 Pet. 2:12 and 4:3 (NEB, JB, NIV). The guiding principle in most instances is that when *éthnē* is used in communications addressed to churches that are mainly gentile in such a way as to distinguish the *éthnē* from the readers, then the rendering "pagans" is appropriate.

See also NATIONS. E. F. H.

PAGIEL pā'gi-əl [Heb. *pag'î'ēl*–'fortune of God' (?)]. Son of Ochran and leader of the tribe of Asher (Nu. 1:13; 2:27; 7:72, 77; 10:26). He was one of twelve tribal leaders who assisted Moses in taking the census and who made offerings at the dedication of the tabernacle.

PAHATH-MOAB pā'hath mō'ab [Heb. *paḥaṯ mô'āḇ*–'governor of Moab'; Gk. *Phaathmōab*]; AV Apoc. also PHAATH MOAB (1 Esd. 5:11); NEB Apoc. PHAATH-MOAB. Possibly the tribal name of the 2,812 descendants, divided among the clans of Jeshua and Joab, who returned from the Babylonian captivity under the leadership of Zerubbabel (*ca.* 538 B.C.; Ezr. 2:6; Neh. 7:11 has 2,818). An additional two hundred males from the tribe of Pahath-moab, led by Eliehoenai, traveled with Ezra from Babylon to Judah (*ca.* 458 B.C.; Ezr. 8:4). After Ezra denounced

mixed marriages, some of the members of the tribe put away their foreign wives (Ezr. 10:30). During the governorship of Nehemiah (*ca.* 445 B.C.), Hasshub (a son of Pahath-moab), and presumably his associates, repaired a portion of the wall of Jerusalem as well as the "Tower of the Ovens" (Neh. 3:11). Eventually an individual named Pahath-moab, perhaps the clan chief, was among those who affixed their names to the covenant document drawn up during the days of Nehemiah (Neh. 10:14 [MT 15]).

It has been suggested that the tribal name was derived from someone who had in fact been the governor of Moab. B. Mazar (*IEJ*, 7 [1957], 232) has plausibly suggested that some of the Reubenites who had settled in the area of Moab (1 Ch. 5:3-8) and who had been captured and deported by Tiglath-pileser III (*ca.* 733 B.C.) were the core of this tribe. The returnees noted above would thus be descendants of these early exiled Israelites.

C. G. RASMUSSEN

PAI pā'ī, pī [Heb. *pā'î*; Gk. *Phogōr*]. The royal city of Hadad or Hadar, king of Edom (1 Ch. 1:50). The name should probably be read "Pau" (Heb. *pā'û*, "groaning," "bleating"; so Lucian, Syr., Vulg., Tg.), as in Gen. 36:39. Neither verse indicates its location; it has not been identified.

PAIN; PAINFUL [Heb. *kā'aḇ*] (Job 14:22; Ps. 69:29 [MT 30]); AV also SORROWFUL; NEB "becomes black," DISTRESS; [Heb. *k'ē'ēḇ*] (Job 16:6; Isa. 17:11; 65:14; Jer. 15:18); AV, NEB, also SORROW; [Heb. *maḵ'ôḇ*] (Job 33:19; Ps. 38:17 [MT 18]; Eccl. 2:23; Jer. 30:15; 45:3; 51:8); AV also SORROW, GRIEF; NEB also SUFFERING, SORE, TRIALS, WOUND; [Heb. *ḥîl*] (Jer. 6:24; 22:23; 50:43); AV also PANG; NEB ANGUISH, PANGS; [Heb. *ḥûl*] (Job 15:20; Jer. 4:19; 51:29) AV also TRAVAIL, SORROW; NEB ANXIETY, WRITHING; [Heb. *ḥîlâ*] (Job 6:10); AV SORROW; NEB ANGUISH; [Heb. *ḥēḇel*] (Job 21:17; Isa. 66:7); AV also SORROW; NEB also SUFFERING; [Heb. *'eṣeḇ*] (Gen. 3:16; probably Ps. 13:2 [MT 3] with the support of the Syr.; MT *'ēṣâ*–'counsel'); AV SORROW, "counsel"; NEB "labour," ANGUISH; [Heb. *'iṣṣāḇôn*] (Gen. 3:16); AV SORROW; NEB "labour"; [Heb. *ōṣeḇ*] (1 Ch. 4:9; Isa. 14:3); AV SORROW; [Heb. *ṣîr*] (1 S. 4:19; Dnl. 10:16); AV also SORROW; NEB "labour," "pierced"; [Heb. *mar*] (Nu. 5:24, 27); AV "bitter"; NEB omits; [Heb. *rā'â*] (Eccl. 11:10); NEB TROUBLES; [Heb. *'ānî*] (1 Ch. 22:14); AV, NEB, TROUBLE; [Heb. *'āraq*] (Job 30:17); AV "sinews"; NEB "throbbing in my veins"; [Gk. *lypéō*] ("cause pain," 2 Cor. 2:2, 4f.); AV MAKE SORRY, BE GRIEVED, CAUSE GRIEF; NEB also OFFENDED, INJURY; [Gk. *lýpē*] (2 Cor. 2:1, 3; He. 12:11; 1 Pet. 2:19); AV "heaviness," GRIEVOUS, GRIEF; [Gk. *pónos*] (Rev. 16:11; 21:4); [Gk. *askéō*] (Acts 24:16); AV "exercise"; NEB "train"; [Gk. *básanos*] (Mt. 4:24); AV TORMENTS.

None of these words allow any clear division between somatic and psychic pain or between social and individual suffering. Since humans are a unity and always part of a community, the same words refer to the pain of the body and the pain of the spirit, to the pain of individuals and the pain of communities.

Thus Heb. *kā'aḇ*, e.g., can designate the pain of circumcision ("sore," Gen. 34:25) and the pain of being unjustly insulted and reproached (Ps. 69:29). Heb. *maḵ'ôḇ* can mean either Israel's pain in exile (Jer. 30:15) or the individual anguish of Baruch (45:3). Heb. *ḥûl* and *ḥîl* and the associated words refer to the bodily movements of twisting and writhing caused by severe pain, often that of childbirth (cf. Isa. 26:17; Jer. 6:24; 22:23; 50:43). Far from being restricted to individual bodily pain, however, these words often describe, either directly or metaphorically, the mental anguish of individuals (Job 6:10; 15:20; 21:17, although the text of this last reference is questionable) as well as the severe pain and anguish of kings (Jer. 50:43), nations (6:24; 22:23), and even the earth (51:29, at the judgment of Babylon). Even Heb. *'ōṣeḇ* and words related to it, which rarely mean physical pain, can in one instance refer to an individual's physical pain (1 Ch. 4:9, travail; cf. Gen. 3:16) and in another to national servitude (Isa. 14:3, with reference to the Exile). Gk. *lýpē* refers to the pain associated with childbirth ("sorrow," Jn. 16:21) as well as to the pains of the strained relationship between Paul and the Corinthian church (2 Cor. 2:1ff.; "grieve," 7:8ff.).

Pain, like the unity of humanity, is multidimensional in Scripture. People and human pain have physical, biological, psychological, mental, communal, and historical dimensions in Scripture. It is possible, important, and legitimate to focus on one or another of these dimensions at any particular time, but it is essential to remember that they are always related. The curse brought pain for both male and female (Gen. 3:16, "I will greatly multiply your pain [Heb. *'iṣṣāḇôn*] in childbearing; in pain [Heb. *'eṣeḇ*] you shall bring forth children"; v. 17, "in toil [Heb. *'iṣṣāḇôn*] you shall eat of it [the ground] all the days of your life"). This pain is not merely physical but multidimensional, pointing to people's estrangement from one another, from God, and from nature.

The prophets assumed the intimate relationship between sin and pain suggested by the curse when they explained or predicted the judgment of pain upon Israel's sins (e.g., Jer. 30:15). But this relationship can be distorted to presume a strict correlation between particular offenses and specific pains (*see* EVIL). This is the presumption of Job's friends (Job 15:20; 33:19), but Job refuses to accept it (16:5f.; 21:17). This is also the presumption of trial by ordeal (Nu. 5:24, 27); although the multidimensional unity of mankind may give such an ordeal effectiveness because of psychological suggestion, judging a person guilty if he feels pain is certainly a presumption and a distortion.

Pain is never presented as something to be sought. Eccl. 11:10 sagely advises the young person to "remove vexation from your mind, and put away pain from your body," for youth is fleeting. Paul sought assiduously to avoid another painful visit to the Corinthians (2 Cor. 2:1-5). But pain is accepted. The author of Ecclesiastes knew that it is characteristic of this world (2:23). Paul reached the higher vision that pain may be risked and borne by those who pursue the cause of God and accept the passion of Christ in this world (2 Cor. 2:4, "For I wrote you out of much affliction and anguish of heart and with many tears, not to cause you pain but to let you know the abundant love that I have for you"). Christians are to be willing to bear pain for the sake of love but to strive not to cause it. Thus Paul admonished the reconciled Corinthians to forgive and to comfort the one that they had been punishing (2 Cor. 2:7f.). 1 Pet. 2:19 instructs slaves, "One is approved if, mindful of God, he endures pain while suffering unjustly," for "to this you have been called, because Christ also suffered for you, leaving you an example" (v. 21). The Christian standing toward pain is thus somewhat paradoxical; it is a consequence of sin, evil, and humanity's estrangement, but it is accepted as part of the Christian calling. Other doctrines of pain, including the lofty examples of Buddhism and Stoicism, seek to avoid pain and strive to become insensitive to it and dispassionate (Berdyaev, pp. 117-19; on the Stoics, see *TDNT*, IV, 315f.). Paul never ceased to be passionate toward the Corinthians, and although he did not seek pain,

he endured it voluntarily because he loved them. This attitude is quite far from the Buddhist refuge in nonbeing or the Stoic retreat to *apátheia*.

Just as people and human pain are multidimensional unities in Scripture, so the balm for pain is a multidimensional unity. The hope for balm is a hope for a multidimensional unity of salvation and health (Rev. 21:4). This hope is the backdrop against which the healings of Jesus are performed and recorded (Mt. 4:24; cf. 9:1-9). They point beyond themselves to the one Healer, the one Savior.

Bibliography.–N. Berdyaev, *Destiny of Man* (Eng. tr., repr. 1960); C. S. Lewis, *Problem of Pain* (1962); *TDNT*, IV, *s.v.* λύπη (Bultmann). A. D. VERHEY

PAINT; PAINTED; PAINTING [Heb. *pûḳ, kāḥal, māšaḥ*]; NEB also ANTIMONY (Jer. 4:30). In two instances *pûḳ* means "black eye paint": Jezebel painted her eyes with it when she heard that Jehu was coming after her to kill her (2 K. 9:30), and Jerusalem is seen as a harlot "enlarging" her eyes with it (Jer. 4:30). It also occurs in the name of one of Job's daughters, Keren-happuch (lit. "the horn of eye paint," Job 42:14). Ezk. 23:40 describes Oholibah as a harlot representing Jerusalem, who paints (*kāḥal*) her eyes as she awaits her lovers. In Jer. 22:14 *māšaḥ*, usually translated "anoint," refers to painting cedar walls with a bright red paint.

Cosmetic eye paints were common in the ancient Near East, with the most detailed information coming from Egypt. Their earliest use was for magico-religious purposes — for protection by the gods. Later they were used as beauty aids (cf. Jer. 4:30). The most common Egyptian eye paint was made of galena (not stibium or antimony; see Lucas and Harris, pp. 80ff., 195ff.; Cohen), a dark gray lead sulfide (Egyp. *msdmt*; cf. Akk. *guḫlu*; Heb. *kāḥal*, probably also *pûḳ*; Arab. *koḥl*). Prior to the 2nd millennium B.C. it was applied to the upper eyelid with a finger, and later with a "kohl stick," a small rod of wood, bone, ivory, metal, or glass that was moistened and dipped into the cosmetic powder. Malachite, a green copper ore, was commonly applied to the lower eyelid. Akkadian texts occasionally refer to yellow eye paints and even the use of red ochre.

These cosmetics were stored in crude form in small linen or leather bags. Prepared forms (powders, or pastes made with water-soluble gums [fats, oils, or resins were not used]) were stored in shells, sections of hollow reeds, or small vases, or wrapped in plant leaves.

It is interesting that the Bible so rarely mentions artistic painting per se. Bright, red-lead paint (*šāšar*; not vermilion; see Forbes, p. 221) is mentioned in Jer. 22:14 (see above) and Ezk. 23:14, where the Chaldeans are painted in red on murals. In the intertestamental period the Wisdom of Solomon mentions painting idols with red paint (13:14) or various colors (15:4). 2 Macc. 2:29 refers to painting and decorating a house, and 4 Macc. 17:7 shows knowledge of painting of pictures.

The art of painting is well attested in the biblical world, however. Egyptian painting survives from most periods; most notable are the elaborate and colorful tomb paintings. Less is left from Mesopotamia, but colorful frescoes and even traces of paint on stone reliefs do remain. In Palestine the principal surviving painting is on pottery, although painting on walls of rich homes is known from the vicinity of NT Jericho and Samaria. Extant Greek painting is also primarily from pottery, but Greek art (along with Etruscan) influenced the later Roman tomb painting, as well as the spectacular Roman murals of the 1st cents. B.C. and A.D. found on the walls of private homes and public buildings, most notably at Pompeii. Jewish synagogues had colorful floor mosaics and wall paintings; the earliest evidence for these comes from the 3rd cent. A.D.

Ancient painters had well-developed crafts. For example, some fifteen colors were standard in Egypt. Painting was done on pottery, plaster, stone, wood, canvas, papyrus, ivory, metal, and even semiprecious stones. Various palettes and mortars and pestles for mixing of paints survive, as do different brush types, usually of reeds, grasses, or fibrous wood, with ends frayed by soaking in water. Many media were used in different periods, including gums, gelatine, milk curds, egg whites, and beeswax; varnishes or wax often covered the paintings.

PALACE [Heb. *'armôn* (Isa. 23:13; 25:2; 32:14; etc.), *bayiṯ*– 'house' (1 K. 4:6; 2 K. 10:5; 11:6; etc.), *bîrâ* < Akk. *birtu*– 'citadel' (1 Ch. 29:1, 19), *biṯān* < Akk. *bitānu* (Est. 1:5; 7:7f.), *hêḳal* < Akk. *ekallum* < Sum. É.GAL–'big house' (1 K. 21:1; 2 K. 20:18; 2 Ch. 36:7; etc.); Aram. *hêḳal* (Ezr. 4:14; Dnl. 4:4, 29 [MT 1, 26]; 5:5; 6:18 [MT 19]; Gk. *aulḗ* (Mt. 26:3; Mk. 15:16; Lk. 11:21)]; AV also HOUSE, HOUSEHOLD, TEMPLE, HALL; NEB also HOUSE, CASTLE, MANSION, etc. A building or complex of buildings that serves as the residence of a king, a prince, a governor, or other dignitary. It is usually of exceptional size with lavish furnishings and decorations.

We have several sources of information on ancient palaces. Homer describes the splendid Mycenaean palaces, the OT describes Solomon's palace, and Josephus describes Herod's many residences. Royal inscriptions of Assyria and Persia, in particular, give details about the workers and materials used in the construction of palaces. From standing ruins and excavations we have foundations, walls, and occasionally fragments of columns and roofs. In a few cases magnificent frescoes and stone reliefs have been recovered, e.g., from Minoan and Assyrian palaces.

I. In the Ancient Near East.–Although a number of palaces have been excavated, only a few will be mentioned here. *See also* ASSYRIA VIII; BABYLON IV.E; CRETE; MARI II; PERSEPOLIS; TELL MARDIKH.

About twenty Neo-Assyrian palaces have been found, including those from the provincial capitals and from the major capitals of Nimrûd (CALAH), Khorsabad (Dûr-Šarrukin), and Nineveh. Of these only about a third have been excavated extensively. Most of these palaces were arranged around two courts. The *bābānu* (< Akk. *bābu*, "gate") or forecourt had administrative offices, service quarters, and storerooms. The *bitānu* (< Akk. *bītu*, "house") or inner court had the reception and residential rooms. The throne room was located between these courts.

The most thoroughly investigated Assyrian palace is that of Sargon II at Khorsabad, 25 km. (15 mi.) NE of Nineveh. This palace, covering 10 ha. (24 acres), was erected on a huge brick platform. It contained over two

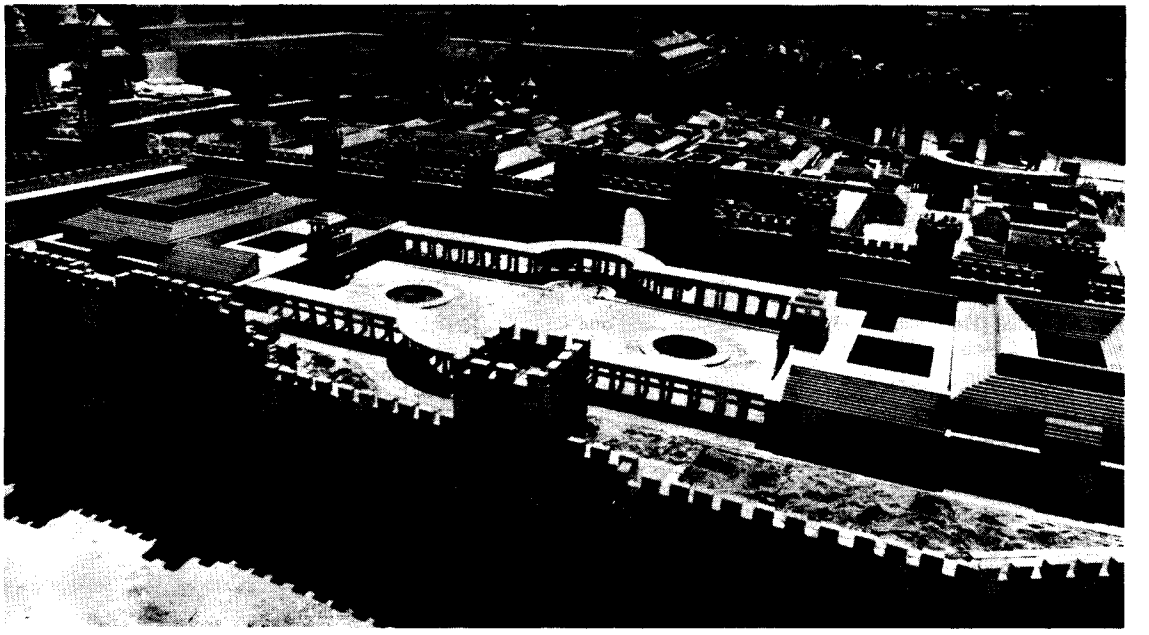
Aerial view showing excavations of Herod's palace at Jericho (site excavated by Dr. Ehud Netzer on behalf of the Hebrew University in Jerusalem) (E. Netzer)

hundred rooms. The ceremonial court covered a quarter of an acre; the throne room measured 49 by 11 m. (161 by 36 ft.). The palace was equipped with granaries, kitchens, bakeries, and wine cellars. The entrances were guarded by stone statues of the Lamassu, winged bulls 4 m. (13 ft.) high. Floors were paved with brick tiles and the walls were decorated by some 500 sq. m. (6000 sq. ft.) of stone reliefs (*see* pictures in BIT; HUNTING).

NINEVEH was the great Assyrian capital on the Tigris River to which Jonah was sent. Over a dozen Assyrian kings built at the site, but the two principal palaces at Kuyunjik (the larger of the two mounds on the site) are those of Sennacherib (704-681) in the southwest and of Ashurbanipal (662-628) in the north. Sennacherib's "palace without a rival" covered 2 ha. (5 acres) and contained seventy halls. The halls were adorned with more than 3000 m. (10,000 ft.) of sculptured stone slabs (*see* pictures in COMMERCE; GESTURE). Of particular interest are the reliefs of room 36, now in the British Museum, which depict the king's conquest of the Judean city of Lachish (2 K. 18:13-17). The most significant discovery was the famous library of Ashurbanipal, who collected all the literature of previous generations, including the Babylonian flood story contained in the Gilgamesh Epic. His palace was also adorned with frescoes; *see* pictures in ARABIA; ARCHEOLOGY OF MESOPOTAMIA; ASHURBANIPAL; CART; EAT; HORSE.

SUSA was the site of the story of Esther in the days of Ahasuerus, i.e., Xerxes (485-465). The author of Esther refers to the gate of the king (2:19), the outer court (6:4), the inner court (4:11), the house of the women (2:9), and a second area for concubines (2:14). The use of the word *bîṯān* is striking; in context (1:5; 7:8) it may mean garden kiosk. Darius made Susa the administrative capital of the Persian empire in 522. From a detailed inscription we know that from 518 to 512 Darius built a palace on the Apadana mound by employing materials and workmen from every part of his realm. The remains of the Apadana palace as we see them today belong to the reconstruction of Artaxerxes II (404-359). The building included a square central hall, 59 m. (194 ft.), with six rows of six columns and porticoes on three sides. The columns were 20 m. (65 ft.) high, capped by double bull protomes.

II. In Palestine.–Saul, the first king of Israel, rebuilt a fortress-palace at the site of GIBEAH (Tell el-Fûl), 5 km. (3 mi.) N of Jerusalem (1 S. 15:34ff.). The site was excavated by W. F. Albright in 1922-23 and 1933 and by P. Lapp in 1964. As reconstructed from the preserved corner the fortress would have been 52 by 35 m. (171 by 115 ft.).



All that we know about David's palace is that it was constructed with the aid of cedar beams, carpenters, and stone masons sent to him by Hiram king of Tyre (2 S. 5:11; 1 Ch. 14:1). Hiram later sent similar supplies and workmen to aid Solomon in his construction of the temple (1 K. 5:1-11), and presumably also for the building of his palace.

A detailed description is given of the construction of Solomon's palace in 1 K. 7:1-12. We learn that whereas Solomon spent seven years in building the temple (6:38), he spent thirteen years in building his palace (7:1). Several distinctive structures are described:

(1) The House of the Forest of Lebanon (vv. 2-5) was a great hall, 100 cubits long, 50 broad, and 30 high (46 by 23 by 13.5 m.; 150 by 75 by 45 ft.), which received its name from forty-five cedar columns. There is some uncertainty as to whether these were arranged in four rows (MT) or in three (LXX, Vulg.). This building evidently served as an armory for the storage of weapons (1 K. 10:17, 21; Isa. 22:8) and as a treasury for precious objects (2 Ch. 9:20).

(2) A colonnade, 50 cubits by 30 (23 by 13.5 m.; 75 by 45 ft.) with a porch may have served as a waiting room or reception hall (1 K. 7:6).

(3) The throne room served as the Hall of Judgment (v. 7). It was paneled from the floor to the ceiling with cedar. The interspersing of timber courses among the courses of stone (vv. 9-11) was designed as protection against earthquakes. Solomon's throne was inlaid with ivory and gold (2 K. 10:18-20).

Jerusalem Model of Herod's palace (W. S. LaSor)

(4) Of the residences themselves we are simply told that he built a similar palace for himself and a separate one for the pharaoh's daughter (1 K. 7:8; 10:24), who was the most important of his foreign wives.

In his expanded description of Solomon's palaces Josephus (*Ant.* viii.5.2 [137f.]) speaks of "a very splendid hall for feasts and banquets, filled with gold."

Unfortunately archeologists have been unable to recover any of Solomon's buildings at Jerusalem, with the possible exception of a fragmentary wall uncovered by K. Kenyon. But two palaces attributed to Solomon have been identified by Y. Yadin at Megiddo. The south building 1723, measuring 23 by 21 m. (75 by 69 ft.), was surrounded by a large court with a plastered floor. The outer walls were made of finely drafted ashlars in alternating headers and stretchers. Two proto-Aeolic capitals were recovered. The northern palace, building 6000, resembled the *hilāni* palaces of Neo-Hittite Syria, i.e., a rectangular room that was a pillared forehall with its entrance on one of its long sides.

Ahab's palace at Samaria was excavated by J. Crowfoot and K. Kenyon. They uncovered finely drafted header-and-stretcher ashlars that were probably the work of Phoenician masons employed by Jezebel from her homeland. About two hundred ivory plaques, comparable to those found at Nimrûd and Arslan Tash, illustrate the ostentatious luxury denounced by Amos (Am. 6:4; 1 K. 22:39; Ps. 45:8 [MT 9]).

Jeremiah (22:13-19) upbraided Jehoiakim for exploiting his people by building a great palace with spacious upper rooms. Y. Aharoni believed that he uncovered this palace at Beth-haccherem (Ramat Raḥel) just S of Jerusalem. The inner citadel or palace covered an area 90 by 50 m. (295 by 164 ft.). Aharoni recovered four proto-Aeolic capitals, some imported Assyrian palace ware, the painting of a bearded king on a sherd, and decorations from windows that correspond to those described in Jeremiah's diatribe (v. 14).

Herod the Great (40-4 B.C.) was one of the most prodigious builders of antiquity. Josephus describes numerous palaces built by Herod (e.g., at Caesarea, *BJ* i.21.5 [408]), some of which have been uncovered by archeologists. *See also* MASADA III.

At the artificially heightened hill of Herodian near Bethlehem, Herod was finally laid to rest. According to Josephus *BJ* i.21.10 [420]: "The enclosure was filled with gorgeous palaces, the magnificent appearance of which was not confined to the interior of the apartments, but outer walls, battlements, and roofs, all had wealth lavished upon them in profusion." Excavations by V. Corbo uncovered remains of a triclinium or dining hall, 15 by 11 m. (49 by 36 m.), baths, and mosaic pavements. Excavations by E. Netzer since 1972 at the base of the steep hill have revealed a complex of subsidiary palaces, including a huge audience hall, 130 by 55 m. (427 by 180 ft.) overlooking a hippodrome.

Near the present site of the Jaffa Gate in Jerusalem Herod erected three magnificent towers called Hippicus, Phasael, and Mariamme (Josephus *BJ* v.4.3 [161-69]). The base of Phasael is still preserved in the so-called David's Tower. It was just S of these towers that Herod erected his palace, which according to Josephus (*BJ* v.4.4 [176-181]) defied description. It contained "immense banqueting-halls and bed-chambers for a hundred guests." There were also groves of trees, canals, and ponds. Excavations in the area of the Armenian Gardens by M. Broshi and D. Bahat have revealed that the palace was erected on a podium about 350 by 60 m. (1080 by 190 ft.). Only a few rooms in the northwest were preserved; Corinthian and Ionic capitals were recovered.

The wealthy Sadducean high priests had their palatial homes in the Upper City of Jerusalem. Jesus was brought at night before the residences of Annas and Caiaphas (Mt. 26:3, 58, 69; Mk. 14:54; Lk. 22:55; Jn. 18:15). Gk. *aulḗ*, which the AV translates "palace" in these passages, means "court" or "courtyard."

The Hasmoneans built a palace W of the temple in Jerusalem. Herod Agrippa II, who made additions to the palace in the reign of Nero (A.D. 54-68), enjoyed viewing the proceedings in the temple from this palace. This provoked the priests who built a wall to block his view

(Josephus *Ant.* xx.8.11 [189-193]). During the siege of Jerusalem by the Romans the Jewish insurgents burned down the palace because they resented Agrippa II's collaboration with the Romans (Josephus *BJ* ii.17.6 [426]).

E. M. YAMAUCHI

PALAL pā'lal [Heb. *pālāl*–'judge']. Son of Uzai, and one who helped Nehemiah to rebuild the wall of Jerusalem (Neh. 3:25).

PALANQUIN pal-ən-kēn', pə-lan'kwin [Heb. *'appiryôn*; LXX *phoreíon*]; AV CHARIOT. A canopied portable couch or throne, carried on men's shoulders by means of poles (Cant. 3:9). Heb. *'appiryôn* is a hapax legomenon, and there have been many theories about its origin and some debate about its meaning. According to G. Gerleman (comm. on Canticles [*BKAT,* 17, 1965], pp. 139-142) the description suggests a building rather than a throne or litter; he proposed an etymology from Egyp. *pr,* "house." Others have sought a similar sense by emending the text to read *'appeḏen,* a Persian loanword meaning "palace" (cf. M. Pope, *Song of Songs* [*AB,* 1977], pp. 441-43). Still other scholars derive it from Gk. *phoreíon,* "litter," but this would require a date for the Song after *ca.* 300 B.C., since that is the earliest known usage of *phoreíon.*

G. A. L.

PALATIAL TENTS [Heb. *'ohᵉley* (sic; see *BHS*) *'appaḏnô*] (Dnl. 11:45); AV TABERNACLE OF HIS PALACE; NEB ROYAL PAVILION. The "palatial tents" pitched by the hostile king of the north were meant to serve as his headquarters. Heb. *'appeḏen* derives from Akk. *appadān,* which is a loanword from Old Pers. *apadāna,* "palace." Cf. Aram. *'appaḏnā',* used in the Tg. of Jer. 43:10 to translate Heb. *šaprîr,* "royal canopy"; cf. also Syr. *'āpadnā',* "palace, citadel." For a picture of the Apadana at Persepolis, *see* Vol. I, Plate 1.

G. A. L.

PALESTINA pal-ə-stī'nə [Heb. *pᵉlešeṯ*] (AV Ex. 15:14; Isa. 14:29, 31); **PALESTINE** pal'ə-stīn (Joel 3:4, AV). *See* PHILISTIA.

PALESTINE pal'ə-stīn [Heb. *pᵉlešeṯ*–'Philistia'; Gk. *Palaistinē* (sometimes with *Syrie*–'Palestine Syria']. A term used for the Philistine coastal region, for the Cisjordan region occupied by the Israelites ("the land of the Canaanites"), and for a larger area including a portion of Transjordan; hence not a clearly definitive term.

XII. The Land in Prophecy

I. Names.–A. Palestine. The use of the name Palestine for the region W of the Jordan Rift (Cisjordan) became popular in the time of the British Mandate (1918-1948; after World War I Iraq, Transjordan, and Palestine were mandated to the British, while Syria and Lebanon were placed under French control). It is not so used in the Hebrew OT. In Ex. 15:14; Isa. 14:29, 31, Heb. *pᵉlešeṯ* (AV "Palestina") should be translated "Philistia" (cf. RSV, NEB). In Joel 3:4 (MT 4:4) the term is clearly used for the coastal region of Philistia. Gk. *Palaistinē* does not occur in the NT.

The earliest known use of the name Palestine occurs in Herodotus, who used the expressions "in Palestine Syria" (i.105; ii.106), "the Syrians which are in Palestine" (ii.104; vii.89), and "the Palestine Syrians" (iii.5). It is not clear, however, what territory Herodotus intended to include. In one passage the term seems limited to the coastal region: "These Phoenicians . . . now inhabit the seacoast of Syria; that part of Syria and as much of it as reaches to Egypt, is all called Palestine" (vii.89). Josephus, who also used the expression "Palestine Syria" (*Ant.* viii.10.3 [260]), distinguished Palestine from Coelesyria (i.6.4 [145]) but did not specify what he included in the

term. In *CAp* i.22 (171) he spoke of the Jews as "inhabitants of Palestine"; but since this occurs in a discussion of Herodotus, it is not clear how Josephus was using the term. Jerome spoke of "the land of Judea, which is now called Palestine" (*In Ezechiel* 37:17, quoted by F.-M. Abel [*GP*, I, 313], who said that this usage became official in the Roman and Byzantine Chancellery, and even included the southern portion of Transjordan).

The Heb. *p'lešeṯ* and the gentilic *p'lišti(m)* ("Philistine[s]") can be traced to one of the sea-peoples who invaded the coastal regions early in the 12th cent B.C. They are referred to in Egyptian records as *prst* (Egyptian lacked a symbol for *l*; cf. inscriptions of Ramses III and references to sources in *ANET*, p. 262) and in Assyrian as *palaštu* (inscriptions of Adad-nirari III; cf. *ARAB*, I, §§ 734, 739). Their name took prominence among those of the sea-peoples and ultimately was applied to the hinterland as well as to the coastal region.

B. Syria. In the LXX *Syria* was used to translate Heb. *'ᵃrām* ("Aram"), and the term is considered a corruption of "Assyria," referring to lands placed under Assyrian control. (Thus certain Christians in the Near East who use the Syriac Scriptures refer to themselves as "Assyrians.") Herodotus confirmed this tradition when he said of the Assyrian army, "These are called by Greeks Syrians, but by the barbarians they were called Assyrians" (vii.63). But he distinguished Syria as a geographical entity that bordered on Egypt and was inhabited by the Phoenicians (ii.116). Xenophon listed Syria, Assyria, Phoenicia, and Arabia as separate regions (*Anabasis* vii.8.25).

Syria was divided into two parts. Upper Syria (Gk. *hē ánō Syria*) stretched from Babylonia to Cilicia; it was known in the OT as Heb. *'ᵃram nahᵃrayim*, "Syria between the Rivers" ("Mesopotamia," Gen. 24:10). (For the various meanings that *'ᵃrām*, i.e., Upper Syria, could have in the OT, see BDB, p. 74.) Under the Seleucids Syria became a political unit that extended from eastern Asia Minor to Persia and for a time included Palestine. In 64 B.C. Syria became a Roman province with its capital at Antioch (cf. Acts 15:23, 41; Gal. 1:21). The name COELESYRIA ("hollow Syria") was used of the region S of the lower Orontes basin and the great bend of the Euphrates, extending to Ashkelon and Jerusalem. It was so named because of the numerous valleys throughout much of Coelesyria (cf. *GP*, I, 8-11, 310-12).

C. Canaan. Abram (Abraham) migrated to "the land of Canaan" (Gen. 12:5), and God promised to give him "this land" (v. 7). Later it was defined as "the land of the Kenites, the Kenizzites, the Kadmonites, the Hittites, the Perizzites, the Rephaim, the Amorites, the Canaanites, the Girgashites, and the Jebusites" (15:19-21), or simply "all the land of Canaan" (17:8).

The etymology of the words Canaan and Canaanite (Heb. *kᵉna'an*, *kᵉna'anî*) is disputed (*see* CANAAN I). The most plausible explanation may be a derivation from *kinaḫḫu*, a word meaning "blue or purple colored cloth" in the Nuzi letters (cf. M. Noth, *OT World*, pp. 51f.; *GTTOT*, § 45). This theory has been challenged by B. Landsberger (*JCS*, 21 [1967], 166f.); but Landsberger's suggestion that this word is related to Akk. *uqnû* and Gk. *kyános* is not convincing. The *'ayin* in Heb. *kᵉna'an* was probably an original *ghayin* (since it is reflected in Akkadian as *ḫ*, whereas *'ayin* is reflected as *'aleph*), and the *ghayin* is found in the Hurrian word that lies behind *kinaḫḫu* at Nuzi. Moreover, the word occurs in Akkadian also as *kinaḫnu* (apparently meaning "merchant"), which would seem to be the original form from which *kinaḫḫu* developed by assimilation. If this etymology is sustained, the "Canaanite" was originally a merchant who traded in cloth dyed in blue-purple (cf. Gk. *phoiníke*, "Phoenicia" < *phoinikoús*, "purple-red").

The use of the word to refer to the land rather than the trade (cf. B. Maisler [Mazar], *BASOR*, 102 [Apr. 1946], 7-12) may go back at least to the time of the Ebla tablets. Dagan is called "the god of Canaan" (G. Pettinato, *Testi amministrativi della biblioteca L.2769* [*Materiali Epigrafici di Ebla*, 2; 1980], text 3, verso III.4; text 48, verso V.4), Canaan being spelled in syllabograms as *ka₂-na-na-um* and *ka₂-na-na-im*, respectively. But the absence of an *'ayin/ghayin* makes this identification suspect. The word *knᶜny* ("Canaanite") does occur in the 14th cent. B.C. in Ugaritic (*UT*, 311:7). In the Amarna Tablets from the same period the name is apparently used of the land; in the expressions ^{mat}*ki-na-aḫ-ḫi*, ^{mat}*ki-na-aḫ-ni* (and other spellings), the determinative *mat* could alternatively be read as a noun in construct, "the land of the Canaanites" (Am.Tab. 8:15, 17); but in 30:1 ("to the kings of ^{mat}*ki-na-a-aḫ[-ḫi]*"), where the land is divided among petty kingdoms, and in 36:15 (*[p]i-ḫa-ti ša ki-na-ḫi*, "the district of Canaan"), it clearly seems to be a place name. (*See also* CANAAN II.)

Because the Phoenicians are often considered the descendants of the Canaanites (cf. S. Moscati, *World*, pp. 3-7), and because Ugaritic is often referred to as a Canaanite language (cf. W. F. Albright, *Yahweh and the Gods of Canaan* [repr. 1969], p. 115), the question may be raised whether "Canaan" was used only of the coastal region. Isaiah so uses the term in an oracle against Tyre (23:11), and Zephaniah speaks of Canaan as "land of the Philistines" (2:5). But in the OT "Canaan" was also applied to Galilee, the plain of Jezreel, Ephraim, Judah, the Shephelah, and the Negeb (cf. Gen. 12:6; 24:3; 38:2; Nu. 21:1; Jgs. 1:3, 9f., 27, 29, etc.). Nicolas of Damascus is quoted by Josephus as referring to the land where Abraham settled as "then called Canaan but now Judaea" (*Ant.* i.7.2 [160]), and Josephus repeatedly used "Canaan" to describe the land of the patriarchs (*Ant.* i. *passim*). The NT uses "Canaan" for the land of the fathers (Acts 7:11) as well as for the Phoenician area (Mt. 15:22; cf. par. Mk. 7:26). (Cf. Noth, *OT World*, pp. 49-53; E. A. Speiser, *AASOR*, 16 [1936], 121f.; A. Goetze, *JCS*, 10 [1956], 10.)

D. The Land. A very common expression in the OT is "the land" (Heb. *hā'āreṣ*, e.g., Ruth 1:1), often qualified as "the land of Canaan (or the Canaanites)" (e.g., Gen. 12:5; Ex. 3:17), "the land of the Hebrews" (Gen. 40:15; cf. *Ant.* vii.12.2 [303]), "the land of Yahweh" (Hos. 9:3), "the land which he promised them" (Dt. 9:28), "the land of Israel" (mostly postexilic, e.g., Ezk. 7:2), and "the holy land" (only in Zeph. 2:5). The NT uses several expressions that include Gk. *gē*: "the land of Canaan" (Acts 13:19), "the land of Israel" (Mt. 2:20), "the land of Judea" (Mk. 1:5; as in Mt. 2:6, however, this may refer only to the southern portion of Palestine), "the land" (Lk. 21:23), and "the land of promise" (He. 11:9). Other expressions use *chṓra*, which is sometimes translated "land" but more properly means "region, district" (cf. Mk. 1:5; Acts 26:20; see Bauer, rev., p. 889); Josephus seems to prefer *chṓra* (*Ant.* vii.12.2 [303]; viii.13.7 [353]). The modern state of Israel is called *'ereṣ yiśrā'ēl* ("the land of Israel"), commonly abbreviated to *hā'āreṣ* ("the land").

E. Judah/Judea. In the LXX *Ioudaia* ("Judea") is used to translate Heb. *yᵉhûḏâ* ("Judah," i.e., the southern kingdom; e.g., 1 S. 23:3), and after the return from exile this was somewhat expanded to include a portion of what had been Israel (the northern kingdom; cf. Neh. 3; Jth. 4:1, 3; 1 Macc. 3:34). Gradually "Judea" was extended to include the land inhabited by the Jews (cf. Josephus *CAp.* i.22 [179], where it is traced to Aristotle through Clearchus in an unlikely story; also *Ant.* i.6.2 [133]; xiv.1.3

[9]). This usage is reflected in 1 Thess. 2:14 and Acts 26:20; in Mt. 19:1 the term includes a portion of Transjordan. Coins minted by Vespasian bore the inscription *Judea capta*. In a narrower sense Judea denoted a southern part of Palestine, distinct from Idumea, Samaria, Galilee, Perea, and other regions (cf. Mk. 3:7; Acts 1:8; 9:31). Josephus speaks of "Judaea and the three toparchies adjoining it, Samaria, Galilee, and Peraea" (*Ant.* xiii.2.3 [50]). (*See also* JUDAH, TERRITORY OF; JUDEA.)

F. Beyond the River. In the Persian period the satrapy of Aram. *ʿăbar-nahʿrâ* (Gk. *péran Euphratou/potamoú*), "Trans-Euphrates" or "Beyond the River," included Syria, Phoenicia, Palestine, and Cyprus (*CAH*, IV [1930], 195-97). It is mentioned in Ezr. 4:17, etc.; Neh. 2:7, 9.

II. General Description.–A. Location. Palestine lies within the region between the Mediterranean Sea and the Arabian Desert (34°–36° east longitude) and between Sinai and the mountains of Lebanon (29°30′ – 33°30′ north latitude), within the southern portion of the Temperate Zone. Situated at the eastern end of the Mediterranean Sea, it is part of the Levant (the Levantine states are usually considered Syria, Lebanon, and Palestine or Israel). Palestine is located at the southwestern end of "the Fertile Crescent," the fertile lands extending along the Tigris-Euphrates valley and the Levant.

An almost continuous chain of mountain ranges extends from the Pyrenees (between France and Spain) to the Himalayas (between India and Tibet), affording protection to the lands along the southern flanks of the mountains from the colder and wetter climate of the Eurasian land mass. Similarly, the deserts of northern Africa and Arabia form a southern separation of the Mediterranean region. Thus the shores and islands of the Mediterranean form a somewhat homogeneous area in terms of climate, peoples, and biota. Palestine is an integral part of this Mediterranean world. At the same time, passes such as the Danube and the Nile valleys afforded relatively easy communication between the Mediterranean world and Europe to the north and Africa to the south.

The Arabian desert is generally considered the home of the Semites (an oversimplification that needs qualification). The attraction of the more fertile regions lying to the north and west of Arabia is believed to have been an important element in the periodic migrations of Arabian (Semitic) peoples into Mesopotamia, Syria, and Canaan. This is sometimes presented as the tension between "the Desert and the Sown." Abram's migration to the land of Canaan is often related to population movements that resulted from this tension; however, the Bible nowhere indicates that Abram was part of such a migration but rather presents his journey as that of a single family led by what Abram believed to be a divine impulse (Gen. 11:31–12:7).

The TABLE OF NATIONS (Gen. 10) portrays the population of the "earth" after the Flood as comprising three divisions descended from the three sons of Noah and their descendants. The Japhetic peoples, so far as they can be identified, occupied the regions to the north of the Semites, and the Hamitic peoples the regions to the south. It is important to distinguish, however, between the ethnic relationships (given in Gen. 10) and the linguistic relationships; e.g., some of Ham's descendants are considered "Semitic" because they came to speak Semitic languages (e.g., Canaan, Sheba, Babel, etc.), and at least one of the Semites (Elam) is classified linguistically as non-Semitic.

B. Size. Because of the imprecision of what is included as "Palestine" it is necessary to describe the size in various ways. The distance "from Dan to Beer-sheba" (1 S. 3:20; etc.) is 240 km. (150 mi.), from Beer-sheba to Ezion-geber 200 km. (125 mi.), and from Dan to Hamath (Nu. 13:21; but *see* HAMATH) 225 km. (150 mi.). From the River of Egypt to the Euphrates (Gen. 15:18) is nearly 700 km. (435 mi.; all distances are air-line). From the Mediterranean Sea to Dan is 40 km. (25 mi.), while from Joppa to the Jordan River is 80 km. (50 mi.), and at the latitude of Beer-sheba the land is 130 km. (80 mi.) in width. Cisjordanian Palestine is 15,500 sq. km. (6000 sq. mi.) and if Transjordan is added it is 26,000 sq. km. (10,000 sq. mi.). The Negeb adds about 9000 sq. km. (3500 sq. mi.; the figures differ in different works, depending on what is included). Cf. P. Lemaire and D. Baldi, *Atlante storico della Bibbia* (1955), pp. 22f.; Israel 1:100,000 maps published by the State of Israel, Survey of Israel (1977).

C. Importance. Palestine occupies a strategic part of the only land-bridge connecting Europe and Asia with Africa, and before the creation of the Suez Canal it was the only means of connecting maritime trade between East and West. Thus ancient Palestine lay at the crossroads of the world of its day. Trade routes, which go back a millennium or more before written records, connected Egyptian with European and Asiatic trade centers. These merchants must of necessity have passed through Palestine. Armies also marched through Palestine: Egyptian and Ptolemaic armies moving against northern foes, and Babylonian, Persian, and Roman armies against enemies to the south; thus Palestine was often occupied by armies of other nations. With the development of maritime trade, largely by the Phoenicians (of which Tyre is symbolic; cf. Ezk. 28), the sea routes connecting merchant centers brought Palestine into closer contact with both the positive and negative elements of the highly developed civilizations. At the same time, because of Palestine's generally mountainous topography, the main highways were located to the east along the edge of the desert (sometimes called the Way of the Kings or the King's Highway) and to the west along the coast (often called the Way of the Sea; see IV.D below). As a result, Palestine is sometimes depicted as situated in "splendid isolation" (*WHAB*, p. 6). Both internationalism and isolationism can be found in the history of Palestine; the latter applies more to the southern portion (Judah), while the former applies more to Samaria and especially to lower Galilee.

III. Geology.–In this article only those geological elements that are particularly relevant to understanding the Bible will be considered (for a fuller discussion, see the thorough chapters in *CAH*, I/1 [3rd ed. 1971], esp. p. 2 and chs. 2, 3, and 5; cf. also *GB* [rev. ed. 1974]). *See* Plate 46.

A. Formative Periods. Geologists commonly divide the earth's geological history into four principal eras, to which one or two others are prefixed:

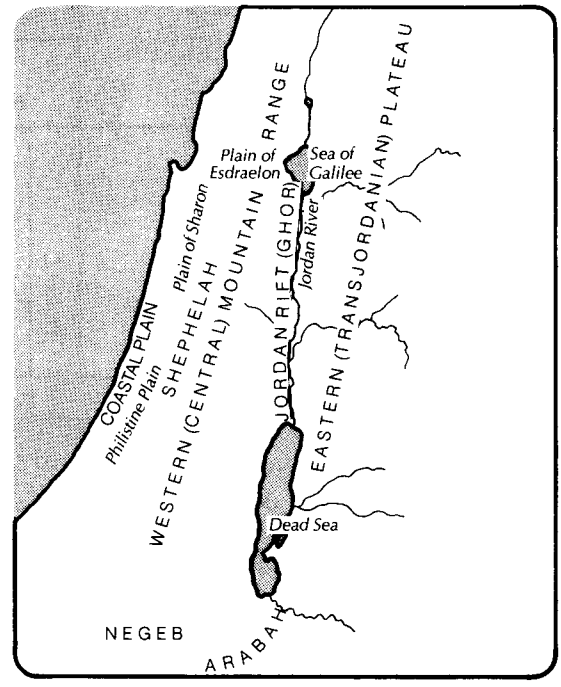
Archeozoic Era, 4.5 billion years B.P.
(B.P. = Before the Present)
Proterozoic (Pre-Cambrian) Era, 1.5 billion years B.P.
Primary (Paleozoic) Era, 600 million B.P.
- Cambrian Period, 600-500 million B.P.
- Ordovician, 500-440 million B.P.
- Silurian, 440-400 million B.P.
- Devonian, 400-350 million B.P.
- Carboniferous, 350-270 million B.P.
- Permian, 270-220 million B.P.

Secondary (Mesozoic) Era, 220 million B.P.
- Triassic Period, 220-180 million B.P.
- Jurassic Period, 180-135 million B.P.
- Cretaceous Period, 135-70 million B.P.
  - Cenomanian Epoch
  - Turonian Epoch
  - Senonian Epoch

Tertiary (Cenozoic) Era, 70 million B.P.

Paleocene Period, 70-60 million B.P.
Eocene Period, 60-40 million B.P.
Oligocene Period, 40-25 million B.P.
Miocene Period, 25-12 million B.P.
Pliocene Period, 12-1 million B.P.
Quaternary Era, 1 million B.P.
Pleistocene Period, 1 million to 10,000 B.P.
Holocene (Recent) Period, 10,000 B.P. to present

There is some variation in the dates and names assigned to the various divisions. Some geologists consider the Quaternary as part of the Cenozoic, or identify it with the Pleistocene Period. The eras are subdivided into either "periods" or "systems," and these are further subdivided into "epochs" (for which some scholars use "systems").



It is generally believed that the hard, crystalline rock that forms the Arabian platform was laid down in the Archeozoic (Pre-Cambrian) era. Life forms consisting of fish, insects, and reptiles (cf. Gen. 1:20f.) appeared in the Paleozoic and continued into the Mesozoic. According to some geologists, Africa, Arabia, and the Deccan of India formed a land mass that has been named Gondwanaland (others believe that this was several land masses in juxtaposition); this was separated from the Russian platform on the west by a great sea called Tethys Sea (of which the Mediterranean Sea is a remnant). The advances and regressions of the sea during the Triassic, Jurassic, and Cretaceous periods left sedimentary deposits. In the Sinai basin these were mostly of limestone, 1500 m. (5,000 ft.) thick; the wilderness of Judea received thick deposits of Nubian sandstone. During the Cenomanian, Turonian, and Senonian epochs of the Upper (Later) Cretaceous period deposits of limestone and chalk formed the basic structure of Palestine. (*See* Plate 48.) In this period there were also outpourings of lava through rifts in the basaltic and granitic layers of the earth's surface, and perhaps the same tectonic forces separated the African-Arabian part of Gondwanaland from the Indian part (*CAH*, I/1 [1971],119).

During the Cenozoic era land vegetation approached its modern aspect. An uplifting of the land caused the Tethys Sea to recede. Modern birds and mammals appeared in the Paleocene and the Eocene periods (cf. Gen. 1:22-24). The Eurasian and Afro-Arabian land masses seem to have been joined in the Oligocene period. The Miocene period saw the folding of the earth's surface, the elevation of the mountains, doming and the beginning of rifting, along with the opening of the eastern Mediterranean. Most of the present-day genera were present in the Pliocene period, during which time the kurkar of the Palestinian coast, the Mousterian red sandstone of Sharon, and the windblown deposits of loess around Gaza were laid down.

In the Quaternary era the Palestine rift was formed. Most present-day species were present, and man appeared (cf. Gen. 1:26; the present writer distinguishes between "man" as defined anthropologically and "the Adam" as presented in the Bible). The glacial periods in the more northerly regions were approximately paralleled by pluvial periods in the Mediterranean and Near Eastern regions.

B. Pluvial Ages. Students of European and North American geology report four successive periods of glaciation (named respectively Gunz, Mindel, Riss, and Würm), when ice covered the northern latitudes of these continents. In Palestine (and regions of equal latitude) these periods were times of excessive rainfall and hence are called Pluvial ages. But there is evidence of only three such ages in Palestine: Pluvial A (Grand Pluvial, 600,000–300,000 B.P.), corresponding to the first two glacial ages; Pluvial B (200,000–120,000 B.P.), corresponding to Riss; and Pluvial C (70,000–14,000 B.P., broken by an interstadial period 48,000–32,000 B.P.), corresponding to Würm. Interpluvial periods corresponded to the interglacial periods.

Apart from the Bible scholars who identify the biblical Adam with the anthropoid creatures that existed prior to the glacial/pluvial ages, and who identify the Noachian Flood with one of these ages, biblical scholarship generally places all the biblical events from the creation of Adam after the last glacial/pluvial period. Our discussion of Palestine will therefore be confined largely to the latter part of the Quaternary, commonly called the Holocene or Recent period, which is dated from the end of the glacial/pluvial period.

The highest mountain in the Palestine area, Jebel Rām (about 45 km. [28 mi.] E of Elath), a mass of red Nubian sandstone on a pre-Cambrian granite platform (A. D. Baly)

	Geological	Climatic		Archeological and Cultural Anthropological
600,000 B.P.	Early Pleistocene	Grand Pluvial		Lower Paleolithic
300,000 B.P.	Middle Pleistocene	First Interpluvial		
200,000 B.P.		Pluvial B		
120,000 B.P.		Last Interpluvial		
70,000 B.P.	Late Pleistocene	Pluvial C	Early Pluvial C	Middle Paleolithic
48,000 B.P.			Gottweig Interstadial	
32,000 B.P.			Late Pluvial C	Upper Paleolithic
14,000 B.P.	Food-producing activities begin			
	Holocene (Recent)	Postpluvial		Mesolithic
				Neolithic
8000 B.C.	Food-producing activities become dominant			
5000 B.C.				Chalcolithic
3200 B.C.				

Geological, Climatic, and Archeological/Cultural Anthropological Ages (after a chart from E. Anati, *Palestine Before the Hebrews*)

IV. Geography.–A. North-South Divisions. Four features running approximately N-S are common to the entire Levant: (1) the littoral or coastal plain; (2) a western (sometimes called central) mountain range; (3) the rift-valley; (4) an eastern mountain range or high plateau. These features, with some local variations, are characteristic of Palestine. Three portions of these regions — the Shephelah, the Valley of Esdraelon, and the Negeb — must be considered separately. (*See* Vol. I, Map II; cf. *HGHL*, pp. 52-62; *WHAB*, pp. 17-20.)

Kurkar ridge of cliffs along the coast of Ashkelon (A. D. Baly)

1. Coastal Plain. This littoral plain extends practically the entire length of Palestine. At the northern end, at Ras en-Naqûrā (Rōsh ha-Niqrāh), the coastal plain is broken by a mountain spur that reaches the sea (the "Ladder of Tyre," 1 Macc. 11:59; cf. *Ant.* xiii.5.4 [146]; *BJ* ii.10.2 [188]). The plain is also broken at the foot of Mt. Carmel. The littoral of Palestine accordingly is divided historically and geographically into three parts. (1) The plain of Asher extends S from the Ladder of Tyre to Mt. Carmel, where the plain widens to about 10 km. (6 mi.); it is known today as the plain of Zebulon. (2) The plain of SHARON (Isa. 33:9; 65:10) extends S of Mt. Carmel from the Crocodile River (Nahr ez-Zerqā) to the Yarkon (Naḥal Yarqôn), a distance of about 50 km. (31 mi.) N-S and from 10 km. (6 mi.) to 15 km. (9 mi.) E-W. It is characterized largely by sand dunes (kurkar ridges) from the Pliocene period. In the central part of the plain an outcropping of Mousterian red sand, once covered with oak, rises to about 55 m. (180 ft.). Watered by perennial rivers and seasonal wadis, Sharon was capable of fertility (cf. 1 Ch. 5:16; Isa. 65:10) and indeed has become fertile in modern times. (3) The rest of the coast of Palestine is loosely identified as the Philistine plain (Jgs. 1:19, 34), which extends to Gaza (70 km., 42 mi.). The plain broadens to about 30 km. (18 mi.) in the southern

part. Sand dunes, some 45 m. (150 ft.) in height, were once thought to be formed of sand from the Nile, but now they are explained as soft chalk and limestone brought down from the Shephelah by the numerous wadis (cf. *GB*, p. 136). The five principal cities of the Philistines (Ashdod, Ashkelon, Gath, Gaza, and Ekron; cf. 1 S. 6:17) were in this plain. (See *GB*, pp. 121-143; *HGHL*, pp. 101-143) 101-143.)

Because of the nature of the coastal plain, the only good natural harbor was at Acco. The Philistines (or earlier peoples) made use of the Yarkon at Tell el-Qasîleh (*LBHG* [rev. ed. 1979], pp. 273, 275); this may also have been used by the Phoenicians bringing materials for Solomon's temple. At the Phoenician fortification known as Strato's tower Herod constructed a city and harbor, which he renamed CAESAREA (*Ant.* XV.7.3 [217], 9.6 [331-341]; cf. Acts 18:22).

2. Shephelah (pronounced shə-fē'lə). Between the coastal plain and the central mountain range are sections of piedmont or foothill: E of the plain of Zebulun (the Shephelah of Galilee; cf. *GB*, p. 162), E of the Sharon plain (the Shephelah of Israel; cf. Josh. 11:16; *GB*, p. 141), and most notably E of the Philistine plain (the Shephelah of Judah, commonly called simply the Shephelah). The name Shephelah (Heb. *šᵉpēlâ*) was obviously given to the area by people who lived on the mountain range, for it means "lowland" (cf. Josh. 11:16). The Shephelah (of Judah) is about 45 km. (27 mi.) long and 15-20 km. (9-12 mi.) in width, and is very fertile; hence it was the region of frequent battles between the Philistines and the Hebrews.

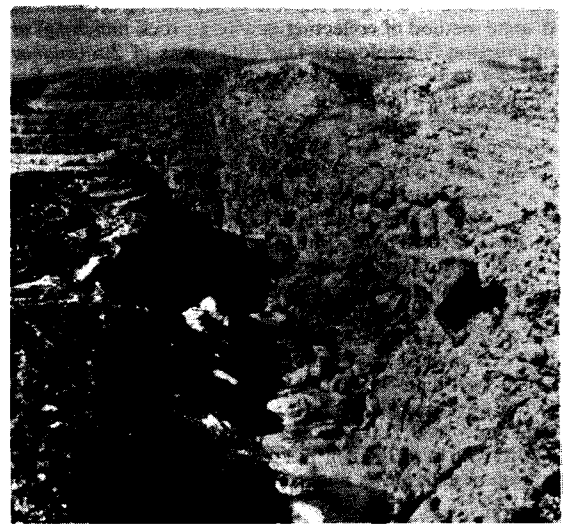
The Shephelah is cut by several valleys that formed routes between the coastal region and the cities on the mountain range. Among these are the valley of Aijalon (Josh. 10:12), the valley of Sorek (Wâdī eṣ-Ṣarâr) (Jgs. 16:4), and the valley of Elah (Wâdī es-Sanṭ) (1 S. 17:2).

(See *GB*, pp. 121-130; *HGHL*, pp. 112-143; *see also* SHEPHELAH.)

3. Western (Central) Mountain Range. This range extends the length of Palestine except for the plain of Jezreel (Esdraelon). D. Baly has pointed out that the range is actually composed of a number of uplifts or domes in regions that run approximately NE-SW, cut by faults and depressions (*GB*, pp. 7f., 28-30). To the visitor untrained in geology, however, it appears to be an almost continuous range, with high points at Har Meron in Upper Galilee (1208 m., 3962 ft.), at Mt. Ebal in Samaria (940 m., 3084 ft.), and in the south toward Hebron (1012 m., 3320 ft.). The range continues SW into the "high Negeb," where several peaks rise above 1000 m. (3300 ft.), the highest being Har Ramôn (1033 m., 3389 ft.). North of Galilee the western range is named the LEBANON and the eastern the Hermon (*see* HERMON, MOUNT), but because the Hermon lies in a northeast-southwest plane, it sometimes gives the appearance of belonging to Cisjordan more than to Transjordan; indeed, as Baly has shown (*GB*, p. 7 map 3), the mountains of Upper Galilee and the Anti-lebanon to which the Hermon belongs are part of the same geological pattern. *See* Plate 50.

The northern portion of the western range has been known historically as GALILEE, including Upper and Lower Galilee (*see* Vol. II, Plates 15, 19) and the plain of Esdraelon. The continuation of the western range from the southern edge of the plain of Esdraelon to about the latitude of Jerusalem was known as Samaria (Ob. 19; Ezr. 4:7; *see* SAMARIA, COUNTRY OF) after the capital founded by Omri (1 K. 16:24); prior to that it was the region of Manasseh and Ephraim (cf. 12:25). The southern portion of the range came to be called JUDAH after the principal tribe (cf. 12:17). South of Beer-sheba the region was called the Negeb (or Negev; Gen. 20:1).

The Israelites lived principally in the mountains of Galilee, Samaria, and Judah. A major north-south road, sometimes called the Way of the Water-parting (*GB*, p. 98) — although unnamed in the Bible — wound between mountain heights and climbed over lesser hills. There were no rivers — only seasonal watercourses (wadis). But there were a number of springs of "living waters" (Heb. *ʿayin*, "spring, source"), which together with dug wells (Heb. *bᵉʾēr*, "well") provided water. Place names with ʿAin (ʿEn), however, do not always indicate the presence of a spring (*HGHL*, p. 72 n. 1).



The western slopes of the central range are gentle and well watered, often forming the "lowlands" or Shephelah. The eastern slopes, on the other hand, are steep, arid, and forbidding. Apart from some lesser-known and difficult ways, the only roads connecting the central range with the Ghor (the rift-valley between the Sea of Galilee and the Dead Sea) were at the valley of Jezreel, the valley formed by Wâdī Fârʿah, and the valley from Bethel to Jericho. *See* Plate 49.

(See *GB*, pp. 152-190; *HGHL*, pp. 171-240.)

4. Plain of Esdraelon (Valley of Jezreel). The valley that extends from the Mediterranean to the Jordan, separating the hills of Lower Galilee from the complex formed by Mt. Carmel, the mountains of Samaria, and Mt. Gilboa, is in the Bible called Heb. *ʿēmeq yizrᵉʿēʾl* ("Valley of Jezreel," Josh. 17:16) or *biqʿaṭ mᵉgiddôn* ("plain of Megiddo(n)," Zec. 12:11, if indeed this refers to the same place; but cf. W. S. LaSor, *The Truth about Armageddon* [1982], pp. 141, 144f.). In Jth. 1:8 this appears as Gk. *pedíon Esdrēlōn* ("plain of Esdraelon"). Further complicating the nomenclature, some modern scholars have applied the name "plain of Esdraelon" or "plain of Megiddo" to the western portion of the valley and "Valley of Jezreel" to the eastern — a convenient distinction but without any biblical support. The modern name, ʿEmeq Yizreʿel, is applied to the entire valley. *See* JEZREEL, VALLEY OF.

The valley is divided by the watershed, with the Kishon River (Nahr el-Muqaṭṭaʿ) flowing W to the Mediterranean, and the Harod River (Nahr Jālûd) flowing E to the Jordan near Beth-shan. Until modern times the valley was poorly drained and therefore a swamp in the wet season (cf. 1 K. 18:44; Jgs. 4:13-16; 5:19-21). The western part, from the narrow gap between Mt. Carmel and the hills of Galilee at Harosheth eastward to Zerʿîn (Jezreel), is roughly triangular in shape, about 40 km. (25 mi.) on the northern and southern sides. It is bordered on the north by the

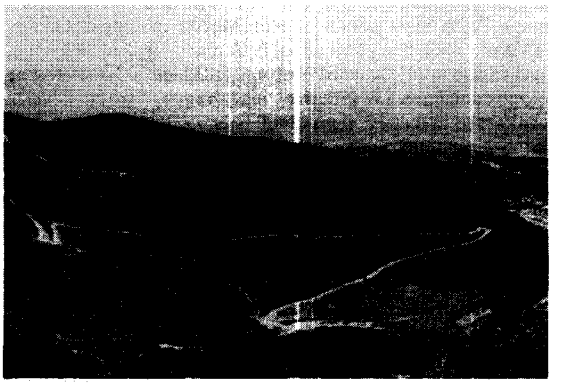
Wadi between Jericho and Jerusalem (B. VanElderen)

scarp of the hills of Lower Galilee, Nazareth being a prominent city. At the southwest corner, Mt. Carmel rises steeply from the plain and runs SE, joining with the mountains of Samaria. The watershed is approximately at Jezreel, which is often considered the eastern end of the plain of Megiddo (Esdraelon). At this point the plain suddenly narrows from about 20 km. (12 mi.) to enter what is today called the valley of Jezreel (in distinction from the plain of Megiddo, as mentioned above) — a valley of never more than 3 km. (2 mi.) in width. With the hill of Moreh forming the northern border and Mt. Gilboa the southern (*see* Vol. II, Plate 16), the valley descends rather sharply to the Jordan Ghor near Beth-shan, reaching sea level at the spring of Harod (ʿAin Jālûd; cf. Jgs. 7:1) and dropping to 225 m. (740 ft.) below sea level at the Jordan, a distance of only about 25 km. (15 mi.). The western portion of the plain of Esdraelon belonged to Zebulon, the eastern portion to Issachar. The coastal region at the western end was part of the plain of Asher (known today as the "plain of Zebulon").

The plain of Esdraelon was thus mostly landlocked, and the means of ingress and egress were few but nevertheless very important. A main route to the west passed through the gap into the plain of Asher (Zebulon) and the gulf of Acco; the route to the east passed through the narrow valley to Beth-shan. The road to the north went past Mt. Tabor, forming part of the major highway from Damascus to Egypt that was often called the Way of the Sea (see IV.D below). To the south there were several exits; the best known was guarded by Megiddo and went via Wâdī ʿAra (Naḥal ʿIrôn) to the plain of Sharon; NW of Megiddo a fortified exit at Jokneam (Josh. 12:22) guarded the route leading to Dor; SE of Megiddo a route guarded by Taanach (Jgs. 5:19) also led to the plain of Sharon; and still further SE a road went up by the ascent of Gur (2 K. 6:13) to Ibleam, Dothan, and Samaria.

(See *HGHL*, pp. 246-266; *GB*, pp. 144-151.)

5. Negeb. The region S of Beer-sheba is referred to as the NEGEB (pronounced and sometimes spelled "Negev"). It has been suggested that the word came from a root meaning "parched," but it is usually defined as "south." Heb. *negeḇ* can be used either as a proper noun for the region S of Palestine (e.g., Jgs. 1:16) or as a common noun meaning "south" (e.g., Gen. 13:14). Because the term is often associated with Heb. *miḏbār*, "desert," the Negeb is sometimes thought of as an empty, perhaps sandy, wilderness. But *miḏbār* refers to a region of marginal rainfall, with soil composed more often of shingle than of sand — a region capable of supporting settlements if some method of collecting dew (e.g., rock mulching) or of irrigaton is employed. The Wilderness of Zin (*miḏbar ṣîn*, not to be confused with the Wilderness of Sin, Ex. 16:1) is in the Negeb (Nu. 13:21).



The Negeb is shaped like an elongated triangle with its apex to the south. Its northern limit follows approximately the line formed by Gaza-Beer-sheba-Sodom, about 110 km. (70 mi.); its eastern border is the Arabah from the Dead Sea to the Gulf of Aqabah, about 170 km. (105 mi.); and its southwestern border runs from a location about 30 km. (20 mi.) S of Gaza to Eilat on the Gulf of Aqabah, about 210 km. (130 mi.). It has the physical features of the rest of Palestine: a coastal plain (in modern times known as the Gaza Strip), the Shephelah, the central mountain range (skewed toward the southwest in the Negeb and often called the "high Negeb"), and the rift-valley, here known as the Arabah. Its highest points include Har Ramôn (1033 m., 3389 ft.) near the present Sinai border; Har Saggî (1006 m., 3300 ft.), 18 km. (13 mi.) S of Har Ramôn; and numerous peaks above 900 m. (2950 ft.). In general the central (or western) range descends from just S of Hebron and then begins to rise again around Dimonah (opposite the south end of the Dead Sea); the highest points are at the Sinai border, at which point the range descends quite sharply to the Wilderness of Paran (*miḏbar pārān*).

(See *HGHL*, pp. 189-195; *GB*, pp. 99-111, 247-251; N. Glueck, *Rivers in the Desert* [1959].)

6. Jordan Rift. The Jordan Rift is part of a huge geological rift that extends from the KaraSu valley in Turkey to the Zambesi River in Africa. Within Palestine it extends from the foot of Mt. Hermon to the Gulf of Aqabah, about 420 km. (260 mi.). In biblical times the streams flowing from Mt. Hermon formed a lake in the Huleh basin (Lake Semechonitis/Semachonitis in *Ant.* v.5.1 [199]). Lake Huleh was approximately 70 m. (230 ft.) *above* sea level (at some point in the past a mapmaker erroneously indicated that it was below sea level, and this error has been reprinted in countless Bibles and atlases), the same as present-day low spots in the Huleh basin. (In modern times the lake has been drained and the waters contained in a channel.) From there the Upper Jordan River cuts its way through a basalt plug (in comparatively recent times named Jisr Banât Yaʿaqub, "Bridge of the Daughters of Jacob"), descends about 250 m. (800 ft.), and empties into the Sea of Galilee (210 m., 688 ft. below sea level), a lake 12 km. (7 mi.) wide and 21 km. (13 mi.) long. *See also* GALILEE III.E; Plate 51.

The Jordan River proper originates with the waters from the Sea of Galilee, to which are added the Yarmûk and Jabbok (Wâdī Zerqā) and numerous lesser wadis that drain the Transjordan plateau, as well as the Wâdī Fârʿah and other (almost insignificant) wadis that descend from the western range. The river, except in flood, is contained in a narrow, meandering valley. This is located in a wider valley that the Arabs call the Zôr but which is called the "pride" or "jungle" of the Jordan in Jer. 12:5; 49:19; Zec. 11:3 (perhaps better translated "the swelling of the Jordan," since it is the portion of the Ghor that has been cut by the swollen flood waters). *See* JORDAN; *see also* Plate 52.

The KaraSu Valley in Turkey where the Great Rift begins (W. S. LaSor)

The Jordan empties into the Dead Sea (Salt Sea, Gen. 14:3; sea of the Arabah, Dt. 3:17; eastern sea, Ezk. 47:18; Lake Asphaltitis, *BJ* i.33.5 [657]) at about 393 m. (1292 ft.) below sea level (this measurement varies from year to year). The Dead Sea is 83 km (52 mi.) long and 16 km. (10 mi.) wide, and its bottom — the lowest point of the rift — is about 800 m. (2600 ft.) below sea level. Its northern end is at the latitude of Jerusalem; its southern end is about 16 km. (10 mi.) S of the latitude of Beer-sheba.

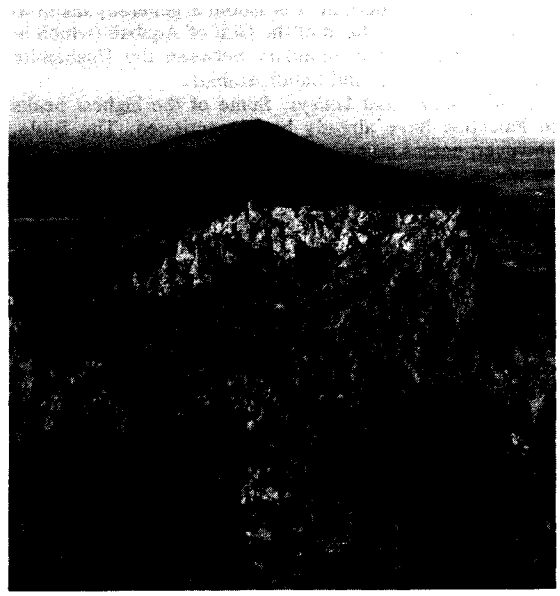
The valley S of the Dead Sea is called the ARABAH

PALESTINE

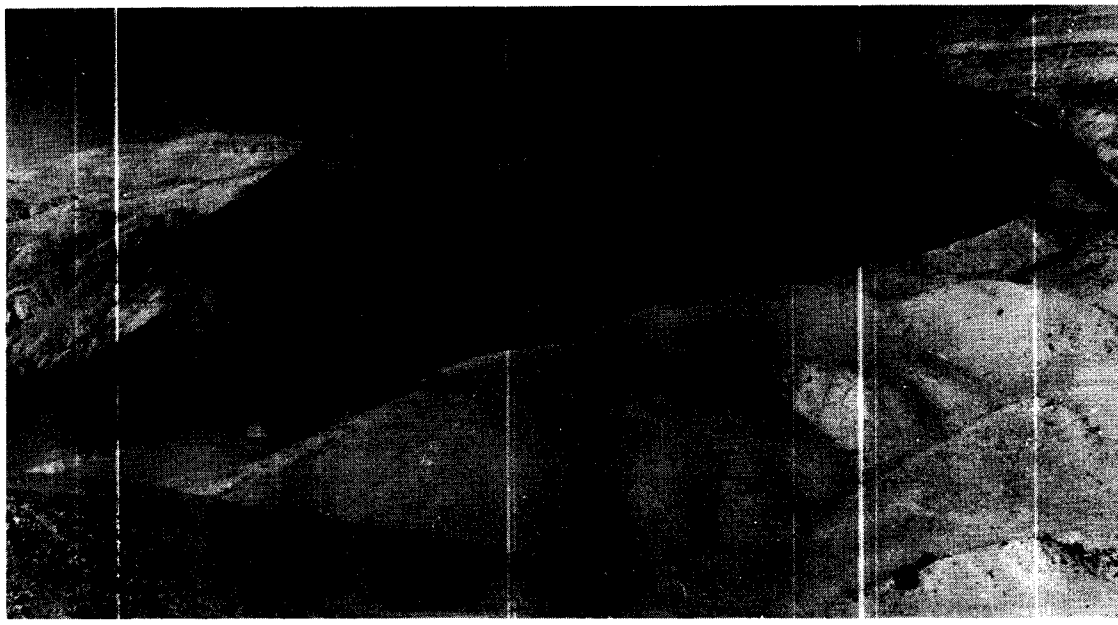
Cracked surface of mud flats in the Arabah (A. D. Baly)

The Yarmûk River in upper Transjordan (B. VanElderen)

The Jabbok River (W. S. LaSor)



(a name given also to other portions of the rift; cf. BDB, p. 787). From the Dead Sea to the Gulf of Aqabah the Arabah is about 170 km. (105 mi.) long. It rises gradually from the level of the shore of the Dead Sea to a point about 90 m. (300 ft.) above sea level (at about the latitude of Petra) and then descends gradually to sea level at the head of the Gulf of Aqabah (Ezion-geber; cf. Nu. 33:35; 1 K. 9:26-28).



The rift (Ghor) becomes increasingly arid from the region where the Jabbok enters, and the Jordan draws salts from the valley. All water entering the Dead Sea leaves by evaporation, with the result that the salt content of the Dead Sea is exceedingly high (estimated at 25-30 percent). (See N. Glueck, *River Jordan* [1946]; *GB*, pp. 191-209; *HGHL*, pp. 284-331.)

7. Eastern (Transjordanian) Plateau. A high plateau stretches from the Jordan Rift eastward to the Arabian Desert. It lies at an average elevation of 600 m. (2000 ft.) and is cut by a complex drainage system of numerous wadis that form several deep gorges as they descend to the Jordan River or the Dead Sea. These gorges divide Transjordan into distinct regions. From north to south the gorges are: the Yarmuk, separating Bashan and the Golan from the dome of Gilead; the Jabbok (Wâdī Zerqā), separating Gilead from Ammon (Dt. 3:16); the Arnon (Wâdī el-Môjib; *see* Plate 43), at times the natural boundary between Ammon and Moab (Nu. 21:13, although Moab often extended further north; cf. v. 26); and the Zered (Wâdī el-Ḥesā), a natural boundary between Moab and Edom (cf. Dt. 2:13). The Arnon empties into the Dead Sea 35 km. (22 mi.) S of its northern end, and the Zered empties into it near its southern tip. Numerous other wadis cut the western scarp of the Transjordan plateau, the most important of which are the Kufrinjeh and the Râjeb in Gilead, the Nimrîn (Shu'eib), Kefrein, and Ḥesbân in the plains of Moab, and the Zerqā Mā'în 18 km. (11 mi.) N of the Arnon, with which it is sometimes confused (cf. Abel, *GP*, I, 171-78).

BASHAN, the region N of the Yarmuk, as a result of volcanic activity, was covered by very rich soil. The

Volcanoes in the area of Jebel ed-Druze. In the foreground is a hard volcanic plug and in the background are softer cinder cones (A. D. Baly)

Jebel edh-Dhakar, a mass of volcanic basalt that forced its way through the Kurnub sandstone of the Zered region (A. D. Baly)

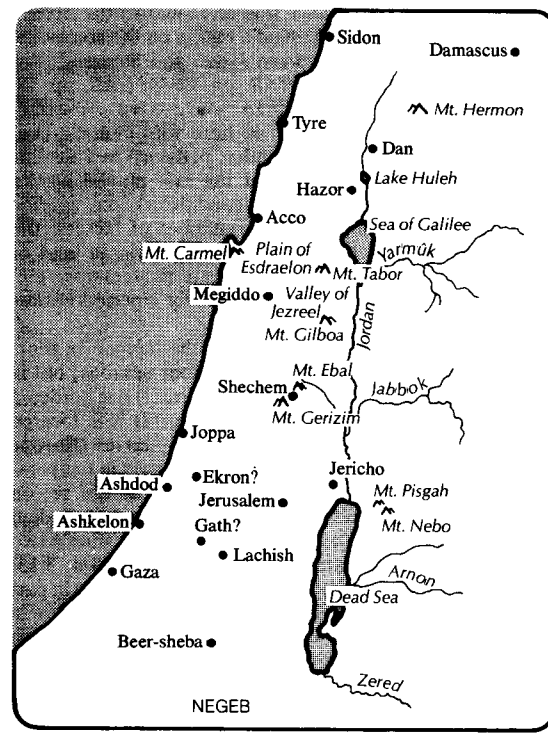
volcanic activity also resulted in great heights, with the range known as Jebel ed-Druze or Jebel Ḥaurân reaching an altitude of 1765 m. (5789 ft.), the highest point in either Cisjordan or Transjordan (*see* HAURAN). Between the Yarmuk and the Jabbok is the region of GILEAD (although at some periods the name included territory S of the Jabbok). The terrain is rugged and in biblical times was well forested (cf. Jer. 22:6; *see* Plate 47). The territory between the Jabbok and the Arnon is often simply called AMMON, and the region between the Arnon and the Zered, MOAB. But although the physical geography is established by the river gorges, the historical picture is considerably more complex. South of the Zered (Wâdī el-Ḥesā) was EDOM, which at some periods extended across the Arabah into the Negeb. Although historically it is not beyond question, the southern limit of Edom is generally taken to be just south of the head of the Gulf of Aqabah (which in modern times is the boundary between the Hashemite Kingdom of Jordan and Saudi Arabia).

B. Mountains and Valleys. Some of the highest peaks in Palestine have already been mentioned. The Bible, however, names many others, usually in connection with significant events. These include the following: Abarim in Moab (e.g., Nu. 33:44); Carmel N of Sharon (Jer. 46:18); Ebal in Samaria (Dt. 27:13); Jearim on the northern border of Judah (Josh. 15:10); Jerusalem (or Zion; often); Moriah (Gen. 22:2; generally identified with the temple mount); Nebo in Moab (Dt. 32:49); Olivet E of Jerusalem (Lk. 21:37); Pisgah in Nebo (Nu. 21:20); Seir in Edom (Gen. 32:3 [MT 4]); Shepher in the wilderness (Nu. 33:23); Sinai (Ex. 19:11); Sirion (Senir, Hermon, Dt. 3:9); Tabor in Galilee (Ps. 89:12 [MT 13]); Zalmon near Shechem (Jgs. 9:48); and Zemaraim in Ephraim (2 Ch. 13:4). It is important to note that the term "mountain" (Heb. *har*; Gk. *óros*) can be used not only of high mountains (e.g., the Hermon) but also of what may commonly be called hills. Thus, for example, "Mount" Tabor rises to an elevation of only 562 m. (1843 ft.). *See also* HILL; Plate 50.

The importance of valleys in a mountainous land such as Palestine cannot be overestimated. Valleys and plains of Cenomanian and Turonian rock that has broken down and weathered into terra rossa provide fertile areas for agriculture (*see* Plate 54), while valleys of Senonian chalk, not suitable for agriculture, are usually smooth and dry and afford good roads. Many valleys are named (over thirty by one count); but the subject is complicated by the variety of Hebrew and Greek words translated "valley." It would seem that Heb. *ʿēmeq*, from a root meaning "to be deep," should denote a depth, a low place, and that *biqʿâ*, from a root meaning "to cleave," should denote a cleft or a narrow valley. But both words seem to be used without regard to the root meanings. The plain of Megiddo is called *biqʿaṯ mᵉgiddô* (2 Ch. 35:22), but the valley of Jezreel where it spreads out by the hill of Moreh is called *ʿēmeq* (Jgs. 7:1; cf. 6:33). Isa. 40:4 (". . . and the rough places [shall become a] plain") uses *biqʿâ* for "plain." Heb. *naḥal* ("torrent, torrent-valley, wady," BDB, p. 636) is properly a seasonal riverbed; yet it can be used of the Arnon, which is a deep gorge with water in all seasons (Dt. 2:36), as well as for the Valley of Eshcol, a gentle valley with a seasonal river (Nu. 13:24). Heb. *gay'* is used both of the valley of Hinnom (Josh. 15:8) and of the "valley of the craftsmen" in the southern part of the plain of Sharon (Neh. 11:35; cf. 1 Ch. 4:14 mg.); it is unlikely that a valley similar to the Hinnom would be found in the Sharon.

The LXX is not consistent in translating these terms. It uses Gk. *pháranx* ("chasm, ravine") for *gay'* (Hinnom, Josh. 15:8), for *naḥal* (Zered, Nu. 21:12), and for *ʿēmeq* (Aijalon, Josh. 10:12); Gk. *cheímarros* ("winter-flowing," hence a wadi) for *naḥal* (Arnon, Dt. 2:36) and for *biqʿâ* (Dt. 8:7); Gk. *koilás* ("hollow") for *ʿēmeq* (e.g., Jezreel, Josh. 17:16); and Gk. *pedíon* ("plain") for *biqʿâ* (Megiddo, 2 Ch. 35:22). The neat differentiation in usage suggested by S. R. Driver (*HDB*, III, *s.v.* "Plain"; IV, *s.v.* "Vale, Valley") does not appear to be supported by the evidence.

C. Seas and Rivers. Hebrew *yām* may denote a sea, a lake, or even a river. In Palestine there are no large seas. The land borders on the MEDITERRANEAN SEA, which is called "the sea" (Nu. 13:29), "the Great Sea" (Nu. 34:6),



"the western sea" (lit. "the sea behind"; east was always "before"; Dt. 11:24), and "the sea of the Philistines" (Ex. 23:31). The DEAD SEA is called "the Salt Sea" (e.g., Gen. 14:3), "the sea of the Arabah" (Dt. 3:17), and "the eastern sea" (lit. "the sea in front," Ezk. 47:18). The Sea of Galilee (*see* GALILEE, SEA OF) is most commonly called by that name, although it is also known as "the sea of Chinnereth" (Nu. 34:11; Josh. 12:3), "the Sea of Tiberias" (Jn. 6:1), and "the lake of Gennesaret" (Lk. 5:1). The Dead Sea and the Sea of Galilee, like the Mediterranean, can be called simply "the sea" (Isa. 16:8; Mt. 4:13). Lake Huleh (Semechonitis in *BJ* iii.10.7 [515]; iv.1.1 [2f.]; in Arabic known as Baḥret el-Ḥûleh) is not named in the Bible. It is often identified with the "waters of Merom" (Josh. 11:5), but this is questionable, since the location was not suitable for the military campaign described in Josh. 11:1-9 (*see* MEROM, WATERS OF). The RED SEA is a translation of Heb. *yām sûp* (lit. "sea of reeds," Ex. 13:18); it is probably also "the sea of Egypt" (Isa. 11:15). Heb. *hayyām* ("the sea") can also denote the Nile (RSV "the Nile"; lit. "the sea," Isa. 19:5) and the Euphrates (Isa. 21:1; Jer. 51:36; but the reference in Isa. 21:1 may be to the Persian Gulf; cf. BDB, p. 411).

Some of the rivers in Palestine have already been discussed. Heb. *nāhār* ("ever-flowing stream, river") is not used of rivers within Palestine. The single great river in Palestine is, of course, the Jordan, which is called simply "the Jordan" (Heb. *hayyardēn*; Gk. *ho Iordanēs*). Cisjordan has no rivers of great size; but numerous brooks or rivers — some of which have water only in the rainy season — are named, e.g., the Kishon (Jgs. 4:7), the Kidron (2 S. 15:23), and the Cherith (1 K. 17:5). The BROOK OF EGYPT (Nu. 34:5) probably refers to the Wâdī el-'Arîsh in Sinai. (On the watercourses that flow into the Jordan from Cisjordan, see *GP*, I, 169f.; on the great rivers that flow into the Jordan and Dead Sea from Transjordan, see IV.A.7 above; cf. *GP*, I, 171-78.)

See Vol. I, Map II.

D. Roads. The principal roads in Palestine generally ran N-S. Because of the mountainous character of Cisjordan and the deep gorges in Transjordan, the trunk roads of necessity were either in the Mediterranean littoral or toward the east in the Transjordanian plateau. A major highway from very ancient times joined Damascus (and points to the east) with Egypt; it proceeded along the southeastern flanks of Hermon, crossed the Upper Jordan just before it enters the gorge at "the Bridge of the Daughters of Jacob" (see IV.A.6 above), and thence ran across Galilee to the plain of Esdraelon via one of the passes that cut the Carmel range (probably Wâdī 'Ara, alongside Megiddo), into the Sharon plain, and S to Gaza and Egypt. This, or some part of it, was called the Way of the Sea (Via Maris; cf. Isa. 9:1); since "sea" was a common term for "west," the name may have meant simply "the western road." At its southern end it was known as the "way of the land of the Philistines" (Ex. 13:17). Toward the east of the Transjordanian plateau the KING'S HIGHWAY (Nu. 20:17) led from Damascus to the head of the Gulf of Aqabah. Rebuilt by Trajan (*ca.* A.D. 106), it was known also as Trajan's Road, and by Arabs as Tariq es-Sulṭan (the Sultan's Highway). The modern highway was relocated further to the east; it follows more or less the "Pilgrim's Road," which avoids some of the deep river valleys crossed by the King's Highway (see *GB*, p. 95 map 40).

There were other north-south roads. In Cisjordan one ran along the Jordan Valley and another along the waterparting of the central mountain range. Numerous east-west roads had great local importance but were little used by international merchants or military forces. These followed

the valleys that led from the central range either to the Jordan Ghor or to the coastal plain. Principal cities were located on these routes. (See IV.A.4 above; *see also* Vol. I, Map V.)

E. Cities. There were no great cities in Palestine; nevertheless, the Bible refers to scores of cities, towns, and villages, and many significant persons and events in the Judeo-Christian tradition are connected with these places. The principal city was the capital, JERUSALEM. The cities of the Philistine Pentapolis (Ashdod, Ashkelon, Gath, Gaza, and Ekron) are named several times, as are the capital cities of Ammon (Rabbah, Josh. 13:25; Dt. 3:11) and Moab (Kir-haresheth, 2 K. 3:25) and some of the cities of the DECAPOLIS. Cities that guarded passes or roads leading into the central highlands are referred to more for their strategic locations than for their size or cutural contributions (e.g., Jericho [Josh. 7:2], Lachish [10:31], Hazor [11:10], and many others; see also IV.A.4 above). Some of the communities mentioned in the Bible were so insignificant that their locations can no longer be determined; and some places of political significance were deemed hardly worthy of notice in the Bible (e.g., Omri's capital at Samaria). These facts underscore the observation that the Bible is concerned with the revelatory and redemptive acts of God and the responses of His people, rather than with a history of Palestine.

See G. A. Barrois, *Manuel d'archéologie biblique*, I [1939], 127-212; *GB*, pp. 182-190; *see also* CITY.

F. Tribal Portions. The tribes of Asher, Zebulun, Naphtali, and Issachar were allotted portions in Galilee. Later Dan was relocated in the extreme north of that region. The tribes of Ephraim and Manasseh were located in Samaria; Manasseh was also given a portion in northern Transjordan (Gilead). Also apportioned land in Transjordan were Reuben (Moab and Ammon) and Gad (Ammon). Judah, Simeon, and Dan were located in the southern part of Palestine (later called Judah, since Judah appears to have

absorbed Simeon, and Dan was relocated in the north). The tribe of Benjamin occupied a region on the somewhat poorly defined border between Judah and Samaria. (*See* Vol. I, Map VI; see also *WHAB*, pp. 42-44; *GAB*, pp. 58-61, Map 11; *LBHG*, pp. 191-285.)

V. Climate.–We are concerned here with climatic conditions (i.e., characteristic weather patterns) in Palestine from approximately the end of the last pluvial age to postbiblical times. Local weather conditions at any specific point in time are governed by a number of factors: the season of the year, location in relation to large land or sea masses, latitude, topography, air movements, etc. The combination of all these factors over a period of time produces the climate of the region.

A. Seasons. Because it lies within the temperate zone, Palestine might be expected to have four seasons; but in fact it has only two, due to several factors: (1) it is bordered on the west by the Mediterranean Sea; (2) it is located relatively close to two large continental masses (Europe and Africa) that have considerable differences in temperature and moisture; (3) it is on the edge of the region affected by the monsoons of southern Asia and the Indian ocean, which produce a two-season year. Palestine's two seasons are dry ("summer," e.g., Gen. 8:22; Am. 3:15) and wet ("winter," e.g., Gen. 8:22; Jer. 36:22). Due in part to the rotation and the inclination of the earth, winds in Palestine are prevailingly from the west: from the northwest in WINTER and from the southwest in SUMMER. These are known as "Etesian [periodic] winds." In summer they are affected by the warm, dry climate of northern Africa and in winter by the cold, moist climate of Europe. The presence of the Mediterranean, however, moderates these conditions so that extremes of temperature and rainfall are within relatively narrow limits. The seasonal climate is comparable to that of the western part of southern California. *See* Plates 55, 56.

B. Former and Latter Rains. Because of the frequency of these terms in the Bible, it is sometimes thought that Palestine had two rainy seasons — an error apparently resulting from unfamiliarity with the land and misunderstanding of the biblical terms. The rainy season is separated from the dry by transitional periods during which some rain may fall. Between summer (June-September) and winter (December-March) such rains are the "former rains," and between winter and summer they are the "latter rains." RAIN regularly falls in winter, usually in two- or three-day periods at intervals of about one week, and this was accepted as normal by the people of the Bible. The early (former or autumn) rains (e.g., Dt. 11:14; Jer. 5:24; Joel 2:23) afforded the farmer a period for preparing the fields and planting, and the latter (or spring) rains (e.g., Jer. 5:24; Hos. 6:3) extended the growing season. These were looked upon, if abundant, as a blessing from the Lord (Dt. 11:14); lack of them was viewed as punishment. Times of drought or "no rain" were probably years in which early and latter rains were lacking and winter rainfall was subnormal rather than completely absent, based on the fact that no year of complete absence of rain has been recorded in modern Palestine.

C. East Wind. During the transitional seasons (April-early June, September-early November) there are seasons of excessive dry heat, described as the "east wind" (e.g., Jonah 4:8), "hot wind" (e.g., Jer. 4:11), and "south wind" (e.g., Lk. 12:55). In modern times this is called the *sirocco* or *khamsin* (Arab. *ḫamsin* means "fifty"; at one time it was thought there were fifty such days a year); in modern Hebrew it is the *šaraḇ*. The wind blows from the southeast (or east or south), the temperature rises by 10° C (18° F) or more, the air becomes filled with very fine sand and takes on the color of lead, the humidity falls, vegetation wilts, and human beings and animals become irritable. It usually lasts two or three days but may last a week or more. To the people of the Bible this was a warning or figure of God's judgment (cf. Hos. 12:1 [MT 2]; Isa. 27:8; Ezk. 17:10). (*See also* WIND.)

D. Other Features. DEW was a very important feature of the climate, often furnishing moisture when there was no rain, particularly on the windward slopes. An abundance of dew was a blessing from the Lord (Dt. 33:28), whereas its absence was a curse (Hag. 1:10). It could be heavy enough at night to soak a garment (cf. Jgs. 6:38) and hang like a cloud (Isa. 18:4), but it disappeared quickly after the sun came up (Hos. 13:3). SNOW falls only rarely in Palestine, and then only on the higher portions of the Cisjordanian and Transjordanian ranges. HAIL, which results from the rapid currents in heavy formations of cumulus clouds, was likewise considered a punishment from the Lord (Ezk. 13:11, 13), although on occasion it was seen as His intervention on behalf of His people (Josh. 10:11). Since such cloud formations are unusual in Palestine, hail is not common. The WHIRLWIND was a phenomenon of indefinite characteristics, ranging from dust devils to tornado-like winds; the latter were usually along the coastal plain.

E. Effects of Latitude and Topography. In general, rainfall decreases from N to S and from higher to lower altitudes in Palestine; but this statement must be modified by other factors. Since the wind is prevailingly from the west, and since it gathers moisture only when it moves over bodies of water, more rain falls on the western slopes of the central mountain range and on the Transjordanian plateau than on the eastern slopes (known as the "rain shadow"). Likewise, since the Jordan Ghor is below sea level, the northern part of it is drier than surrounding regions and the southern part is without rain during almost the entire year, largely because it lies within the rain shadow. The almost total absence of weather fronts means that whatever rainfall there is must come from condensation of moisture in the clouds as they move over higher elevations. As a result the low-lying coastal region (which is nearest the source of the moisture) gets less rainfall than the Shephelah, the windward side of the central range, or even the western portion of the Transjordanian plateau.

F. Has the Climate Changed? Because the Bible contains statements stressing the fecundity of the land (e.g., "flowing with milk and honey," Nu. 13:27), some have theorized that the climate of Palestine has changed since biblical times. This is strongly denied by certain other writers who state that the climate has not changed in the last eight or nine thousand years — certainly well before any description of Palestine in the Bible. D. Baly (*GB*, pp. 64-76) makes the most acceptable statement: "The answer to this very vexed question is both yes and no" (p. 64). The biblical period had a fairly uniform climate, bracketed by an earlier wetter period (prior to 4000 B.C.) and a later wetter period (*ca.* 400 B.C. to the first part of the common era). There have been climatic fluctuations or cycles, although none has been anything like the change that occurred at the end of the pluvial ages.

But certain factors have altered the land's floral and faunal characteristics and to some extent its fertility. The principal factor has been human occupation. With the shift from nomadism to settled communities, certain animals withdrew. Trees were cut down to provide space for planting and grazing (Josh. 17:14-18), as well as for building materials and firewood (this was greatly accelerated under the Ottoman empire, which imposed a tax on trees). Goats

were widely raised, and they destroyed young trees and other vegetation. The diminishing of the forests led to a decrease in the retention of moisture as well as to some increase in wind and rain erosion. These and similar factors resulted in conditions that have sometimes appeared to be the result of climate changes. In the last few decades these effects have been noticeably reversed through cultivation of the land, irrigation, and reforestation. (*See also* FLORA II.)

(See C. E. P. Brooks, *Climate Through the Ages* (1949); H. H. Lamb, *The Changing Climate* (1968); A. D. Crown, *JNES*, 31 [1972], 312-330; *GP*, I, ch. V; *GB*, chs. 4–6; *HGHL*, pp. 62-88.)

VI. Biota.–*A. Flora.* Within the short space of 200 km. (125 mi.) almost every kind of vegetation from arctic (on Mt. Hermon) to subtropical (Sea of Galilee, Jordan Ghor, and Dead Sea basin) is present in Palestine. Writing of the plain of Gennesaret, Josephus stated with understandable exaggeration: "There is not a plant which its fertile soil refuses to produce, and its cultivators in fact grow every species. . . . One might say that nature had taken pride in thus assembling, by a *tour de force*, the most discordant species in a single spot, and that, by a happy rivalry, each of the seasons wishes to claim this region for her own" (*BJ* iii.10.8 [516-18]). One does find typical Mediterranean flora along the littoral and into the Shephelah, vegetation of the temperate zone on the central and eastern heights, and tropical vegetation in the rift-valley from the Sea of Galilee to the lower end of the Dead Sea, wherever water is plentiful (e.g., Jericho and En-gedi). Desert varieties are found in the Negeb and in arid regions of the Jordan Ghor and Transjordan.

Certain regions are noted in the Bible for their particular vegetation. Olives, vines, and grain were common in the Shephelah as well as in other regions (cf. Hos. 2:8 [MT 10]; Jgs. 15:5). The oaks of Bashan were proverbial (Isa. 2:13; Ezk. 27:6; Zec. 11:2). Because of the close connection between vegetation and weather, the prophets often spoke of the abundance or the destruction of trees and vegetation as a manifestation of Yahweh's blessings and punishments (cf. Joel 1; Hos. 2:9 [MT 11]).

A word of caution is in order. The names for plants and trees given in the standard Bible translations are not always reliable. As a comparison of English versions will show, much uncertainty exists over the meanings of some biblical terms, especially the Hebrew, and the LXX and Vulg. equivalents are sometimes misleading.

(*See* FLORA; see also *MPB*; G. E. Post, *Flora of Syria, Palestine, and Sinai* [2nd ed., 2 vols., 1932-1933].)

B. Fauna. Because of its geographical location, Palestine has been as open to animal migrations as to human, especially those from southern Europe, southwestern Asia, and northern Africa. Accordingly, the remains of a great many species have been found, and the biblical record refers to many "kinds" of FISH, BIRDS, CATTLE, creeping things, and beasts of the earth (cf. Gen. 1:21-25).

Again, caution is necessary, for the precise meanings of some of the Hebrew words is not known, and some of the identifications made in Modern Hebrew are inaccurate; thus the various translations of these terms are confused and misleading. Caution and humility are also required by a recognition that changes have occurred in the fauna of Palestine. The climatic changes that occurred in the Quaternary, particularly during the Pluvial periods, caused faunal relocations. The domestication of animals that characterized the Neolithic caused further disturbances in the faunal situation, for the husbandmen attempted to drive off predators, while other species withdrew from the vicinity of human communities.

Domesticated animals mentioned in the Bible include the horse (Gen. 47:17), ass (12:16), mule (2 S. 13:29), pig (an abominable thing; cf. Isa. 65:4), camel (Gen. 32:15 [MT 16]), and small and large cattle (e.g., sheep, ox; cf. Gen. 13:2, 5-7). It is often claimed that both the horse and the camel are mentioned anachronistically in the Bible. Current knowledge supports the presence of these animals in Palestine well before the patriarchal period, but the date of domestication is still in question. Wild animals include the wolf (Gen. 49:27), jackal (possibly the term includes the fox; cf. Ps. 63:10 [MT 11]), bear (2 S. 17:8), lion (Isa. 30:6), and possibly the leopard or cheetah (cf. Hab. 1:8). The bear and the lion are now extinct in Palestine.

(*See* ZOOLOGY; see also F. S. Bodenheimer, *Animal and Man in Bible Lands* [Eng. tr. 1960]; *GP*, I, 219-233.)

VII. Cultural Ages.–Physical anthropologists have given names to certain periods based on the material used for tools. The Stone Age is divided into the Old Stone Age (Paleolithic), the Middle Stone Age (Mesolithic), and the New Stone Age (Neolithic). In Palestine the Paleolithic Age extended throughout the Pleistocene (2,000,000-14,000 B.P.). (*See* Chart on p. 636.)

A. Lower Paleolithic. During the Lower Paleolithic Age (600,000-70,000 B.P.) three principal traditions of stone industries have been identified: the Chopper (Pebble) tradition, the Bifacial tradition, and the Tayacian tradition (called Tabunian in the Near East, after Tabun in Mt. Carmel). Remains of the Pebble tradition have been found in sites from the Grand Pluvial periods in the Jordan Valley, and also on the shores of what was probably an early Quaternary lake in the same valley (cf. E. Anati, pp. 59f.). Remains of the Bifacial tradition are quite extensive in Palestine. These people were hunters of large animals (elephants, rhinoceroses, hippopotamuses), and they learned to master fire. Evidence from Pluvial B (*ca.* 200,000 B.P.) is found in the upper Jordan Valley and in the Judean desert. Other finds were made on the northern coast of Israel, in the Negeb, and on the Transjordanian plateau (see Anati, pp. 62-70). The Tabunian tradition is also found at Umm Qatafa in the Judean desert and at Yabrud on the eastern slopes of the Anti-lebanon. Some scholars believe that the makers of these tools were food-collectors rather than hunters. In the late Tabunian (Pluvial C) new types of tools are found, some of which appear to be transitional to the Mousterian culture (Anati, p. 76).

B. Middle Paleolithic. Several hundred sites of this age, often called Mousterian, have been found in Palestine. It originated about the beginning of Pluvial C (the Würm glaciation in Europe, *ca.* 70,000 B.P.) and continued for about 40,000 years. Radiocarbon datings from Tabun date Level C at *ca.* 41,000 B.P. and Level B at 39,500 B.P. Many new species of animals are attested, including bears, foxes, hares, squirrels, and wolves; very likely they migrated

Skeleton of Skhul man (W. S. LaSor)

from Europe to escape the cold. This faunal break occurred between Levels B and C at Tabun, hence sometime after the Gottweig Interstadial period (between Early and Late Pluvial C) had begun. Human skeletal remains from Tabun and from Skhul (Sukhul) — two sites separated by less than 125 m. (400 ft.) — also show notable differences, suggesting to some scholars that a different species of hominid entered the land during the same period. The Skhul man, moreover, was different from both the Neanderthal of the Middle Paleolithic and the Homo Sapiens of the Upper Paleolithic (a problem that is further complicated by the fact that scholars are not yet in agreement in dating or defining Homo Sapiens). (See *AP* [rev. 1960], pp. 49-64.)

C. Upper Paleolithic. This age began with the late stages of the Würm glaciation (*ca.* 28,000 B.P.). The introduction of a new culture S of the chain of mountain ranges separating northern Europe from the Mediterranean region suggests that people were seeking a milder climate. They were of a new physical type, apparently of a higher intelligence, and left traces of the earliest man-built structures, living in either tents or huts. They had an aesthetic or artistic sense, clothed themselves, and fashioned a figurine that seems to represent a goddess of fertility. This culture spread over much of the northern hemisphere and lasted 20,000-25,000 years. It ended suddenly and was followed by what some have pictured as a dark age.

D. Mesolithic. The Middle Stone Age is a transitional period and is not even considered a separate age by many anthropologists. The greatest concentration of Mesolithic sites in southwestern Asia is found in western Palestine, where the dominant culture is called Natufian. Primitive boats enabled people to reach offshore islands; the invention of the rope led to the discovery that mechanical power could be generated by tightening and releasing the rope; and the invention of the bow and trap made hunting less dangerous. Mankind was on its way to becoming a food-producer, the characteristic of the "Neolithic revolution" (Anati, pp. 139-214).

E. Neolithic. The New Stone Age began approximately with the end of the Glacial and Pluvial ages and is generally considered the dividing point between the Pleistocene and the Holocene (Recent) periods. According to available data the earliest evidence of food production is dated *ca.* 11,000 B.P. (= 9000 B.C.), at which time it was limited to the region SW of the Zagros and SE of the Taurus mountains. In the Jordan Valley the Neolithic Age began *ca.* 7500 B.C. The earliest stage of Neolithic is called Aceramic (or Pre-pottery), so named because human beings had not yet discovered how to make pottery. Pre-pottery Neolithic is found at Jericho and at Beidha, which lies 8 km. (5 mi.) S of Petra in Transjordan. The lowest carbon-14 date for Pre-pottery Neolithic at Jericho is *ca.* 5850 B.C. The cultures at Jericho, Yarmuk, and the coastal region (in the vicinity of Byblos) all developed pottery traditions. Carbon-14 dates of *ca.* 4600 B.C. have been obtained for the coastal culture. Megalithic monuments (e.g., DOLMENS) were erected during this period in Palestine — the only place in the world where they are found so early (Anati, p. 279). (See *FSAC*, pp. 135-37.)

F. Chalcolithic. This age is so named because bronze (actually, copper) tools and instruments began to appear alongside the stone tools. Agriculture and cattle-raising were fairly well developed. In the coastal tradition burials have been found in pottery vases that were stored in caves dug in Kurkur. In the late 34th and 33rd cents. northern cultural influences reached northern Palestine (Anati, p. 295), preparing the way for the new Urban Age. Other groups of people entered the south in the western Negeb, the region around Beer-sheba, the Judean desert, and Moab (including the site of Teleilât el-Ghassûl, where fully sedentary village life is attested [Anati, p. 306]). (See *FSAC*, pp. 137-146; *AP*, pp. 65-79.)

G. Bronze. With the Urban Age (which was — and often is still — called Early Bronze) we enter the "historical" period. Urban settlements have been found in Palestine at an earlier date than in the European Bronze Age. New tribes and peoples entered Palestine. The dominant race was (Proto-)Mediterranean, probably descended from the Mesolithic Natufian people; but other peoples — Alpine, Armenoid, and Eurafrican — can be distinguished, so that E. Anati has observed, "The picture we obtain is that of a great racial and cultural symbiosis equaled in no other historic or prehistoric period" (p. 323; cf. *GAB*, p. 15). In the light of this evidence there appears to be no sound basis for the theory that Gen. 10 is based on a late tradition representing conditions of the 1st millennium B.C. (See *CAH*, II/1 [1973], 77-116; *AP*, pp. 80-109.)

H. Iron. With the introduction of iron as a common material for making tools, the Iron Age opened (*ca.* 1200 B.C.). Since this falls well within the historical period, physical anthropology is of diminishing relevance for the present article.

(See P. Lemaire and D. Baldi, *Atlante storico della Bibbia* [1955], table on p. 15; C. C. McCown, *Ladder of Progress in Palestine* [1943], pp. 18-84; V. G. Childe, *New Light on the Most Ancient East* [1935], pp. 21-84; J. Mellaart, *Earliest Civilizations of the Near East* [1965], pp. 11-63; *BHI*, pp. 24-44.)

VIII. History.–The history of Palestine is reconstructed from archeological and literary evidence, the latter including both biblical and extrabiblical. For our purposes Palestine's history can be divided into (1) prehistoric, (2) pre-Israelite, (3) biblical (including the OT, intertestamental, and NT periods), and (4) postbiblical.

A. Prehistoric. To speak of "prehistoric" history may seem to be a contradiction of terms, but an outline of events, in greater or lesser detail, can be constructed from geological, anthropological, and archeological evidence (see VII above; *see also* ARCHEOLOGY OF PALESTINE AND SYRIA). It is clear that Palestine was inhabited from the Lower Paleolithic, and that hominids of higher intelligence appeared in the Upper Paleolithic and spread widely in the Mesolithic. Communities that can be called cities are found in the Neolithic, and evidence of walls and a large tower have been uncovered at Jericho. The "Urban" period, however, begins with Early Bronze, *ca.* 3200 B.C. At that time the population of Palestine was quite diverse, probably with Natufian descendants and also Alpine, Armenoid, and Eurafrican peoples. (See *AP*, pp. 49-79; *FSAC*, pp. 128-168.)

B. Pre-Israelite. When the Israelites entered Palestine it was inhabited by a number of peoples, such as those named in Gen. 15:19-21. Among these, the Canaanites, Amorites, and Jebusites appear to have been the most important, and the designation of Palestine as "the land of Canaan" suggests that the Canaanites were the most significant.

According to Gen. 10:15-20 Canaan was descended from Ham; linguistically, however, the Canaanites are identified as Semitic. Three considerations help to explain this problem. (1) Peoples from northern Africa were undoubtedly among the mixture of tribes and peoples in prehistoric Palestine (see VII.G above). This can be demonstrated not only by anthropological and archeological evidence but also by the comparative study of ancient Egyptian and Semitic languages, which show marked similarities in morphology, syntax, and vocabulary (see W. S. LaSor, "Semitic Phonemes" [Diss., Dropsie College, 1949]; cf.

CAH, I/1 [1971], 132-36). If the Canaanites were originally Hamitic as the biblical tradition indicates, the language does not present a serious problem, for it would not be the only time that an immigrant people — whether by peaceful means or by conquest — adopted the language of their new homeland. (2) If, as suggested above (I.C), "Canaanite" is related to the word for "purple," the term underwent semantic development; originally it probably indicated either (a) the people of the land where the purple dye was produced, or (b) a merchant or trader (cf. Hos. 12:7; Isa. 23:8; *ANET*, p. 246 n. 29). (3) "Canaanite" was quite likely not this people's original name, for the names of peoples are usually given to them by others (a well-established example is the name "Hittite"). The homogeneity of the Canaanites (cf. *AP*, p. 109) has to be viewed as resulting from an ethnic if not racial mixture, as is indicated in Gen. 10:15-19. (See S. Moscati, *Ancient Semitic Civilizations* [Eng. tr. 1958], pp. 99-123; *Face of the Ancient Orient*, pp. 203-229; E. Anati, pp. 411-437.) *See also* CANAAN.

Second in importance were the AMORITES, who are generally identified with the Amurru ("westerners") of cuneiform records (Sum. mar-tu; Akk. *amurru*). These people apparently moved westward from Mesopotamia and occupied parts of Syria and Palestine, perhaps in the middle of the 3rd millennium. The earliest cuneiform references (latter part of the 3rd milennium) indicate that the Amurru were a culturally inferior group of nomads or seminomads located in Syria; they are later portrayed as petty states with powerful kings (*CAH*, I/2 [1972], 562-66). They were responsible to some degree for the end of Ur III; later they established the Amorite dynasty in Babylon, of which Hammurabi is the best-known ruler. In the middle of the 2nd millennium Amurru was the northernmost administrative district of Egypt, bordering on the north of Canaan (*CAH*, II/1 [1973], 472), and after this it came under Hittite control (cf. *ANET*, pp. 203-205). The Amarna letters (e.g., 60, 70, 158) refer to a number of Amorite city-states. With the invasions of the sea-peoples and the Hittite wars the Amurru vanish from history.

Biblical evidence, on the other hand, suggests that the Amorites were a Canaanite tribe (Gen. 10:15f.; Ex. 3:8), that they dwelt in the mountains (Dt. 1:19) whereas the Canaanites dwelt in the valleys and plains, and that they had "kingdoms" in Transjordan at Heshbon and Bashan (Josh. 9:10). It is within the realm of possiblity that two or more different names have become mixed, since Heb. *'aleph, hê, ḥêṭ* (= Arab. *ḥa* but not *ḫa*), and *'ayin* (but not *ghayin*) are all reflected in Akkadian by *'aleph* (or simply an initial vowel). That the traditions of the Amurru and the biblical Amorites are interrelated cannot be denied, but to assume that the terms are everywhere identical is unwarranted (cf. Noth, *OT World*, pp. 77, 237f.).

The Jebusites occupied JEBUS, the city that later became the Israelite capital under David (*see* JERUSALEM III.A, B). According to the biblical account the Jebusites were descendants of Canaan (Gen. 10:16). In Josh. 10:5 Adonizedek, the (Jebusite) king of Jerusalem, is named as one of five Amorite kings.

The HORITES, described as the original inhabitants of Seir (Gen. 14:6), are usually identified with the HURRIANS, a non-Semitic people who were present in Alalakh in the 18th cent. and in Palestine in the 16th cent. (see I. J. Gelb, *Hurrians and Subarians* [1944]). This identification is not, however, without problems. That non-Semitic peoples were in Palestine before the patriarchal period is undeniable; but the theory that "Horites" in Gen. 14:6 is a proleptic reference to the later Hurrian invasion is not convincing. Similarly, the HITTITES (Gen. 15:20; "sons of Heth," 23:3 [RSV "Hittites"]) present a problem that has not been satisfactorily solved. The history of the Hittites is so complicated by the use of various names ("Hittite," "Hattic," "Proto-Hittite") and by the various peoples that enter into the early history (cf. O. R. Gurney, *Hittites* [1952], pp. 15-21) that it is necessary to ask, "What is meant by 'Hittite'?" The Hittites of Genesis should not necessarily be equated with the Hittites of the 16th cent. B.C., nor is it certain that the "Heth" of Gen. 10:15 is the physical ancestor of the "sons of Heth" in 23:3, since "father of" and "son of" in the Semitic languages can have expanded meanings.

Palestine during the 3rd millennium was thus inhabited by peoples of different descent, some of them living in city-states and maintaining separate ethnic or tribal names. In the 2nd millennium Palestine came under Egyptian influence, as witnessed by the AMARNA TABLETS.

(See K. M. Kenyon, *Amorites and Canaanites* [1966]; J. Gray, *Canaanites* [1964]; Moscati, *Face of the Ancient Orient*, pp. 161-233; *World*, pp. 1-110; Anati, pp. 317-437; Noth, *OT World*, pp. 49-104; A. T. Clay, *Amurru* [1909; needs much updating]; *CAH*, I/2 [1971], 208-237, 538-594; II/1 [1973], 77-116, 526-556; G. Buccellati, *Amorites of the Ur III Period* [1966]; A. Haldar, *Who Were the Amorites?* [1971].)

C. Biblical Period. Abraham entered the land of Canaan near the end of the 3rd or beginning of the 2nd millennium (some scholars would date this event as late as the middle of the 2nd millennium, if indeed they recognize it as having happened at all). The patriarchal period gives evidence of numerous tribes and several petty kingdoms (cf. Gen. 14:1f., 8f., 18) as well as of Egyptian influence (12:10-20), especially toward the end of the patriarchal period (chs. 42–50). The Israelite "conquest" of Canaan occurred after the middle of the 2nd millennium (*see* EXODUS, DATE OF THE), when there were still numerous city-states, and Canaanite enclaves continued to exist long after the Israelites were established in the land (cf. Jgs. 1; 3:1-5). At the beginning of the 12th cent. the sea-peoples occupied a number of locations in the littoral, and conflict between the Philistines and the Israelites was frequent (cf. Jgs. 14:4; 1 S. 17) until the reign of David (cf. 2 S. 19:9). (See *BHI*, pp. 67-182; *LBHG*, pp. 133-285; Noth, *OT World*, pp. 234-245; *NHI*, pp. 53-163; LaSor, *et al.*, *OT Survey*, pp. 68-226.)

The consolidation of the land into a kingdom was the result of David's military efforts (*ca.* 1000 B.C.) and Solomon's administrative genius. At that time Israel's borders were extended beyond the limits of what is defined in this article as Palestine. After Solomon the kingdom was divided into the northern kingdom (Israel) and the southern kingdom (Judah). Israel was captured by the Assyrians (Samaria fell in 722/21), and Judah was captured by the Babylonians (Jerusalem fell in 597 and was destroyed in 586; *see* JERUSALEM III.E). Egyptian influence was seriously threatened and finally terminated by the Babylonians; and, following the conquest of Babylon by the Persians, Palestine became part of the Persian satrapy of "Beyond the River" (see I.F above). The Judahites who returned from Babylonian captivity (by that time known as Judeans or Jews) occupied portions of Palestine, while other parts were occupied by Samaritans, Idumeans (Edomites), and other peoples. (See *LBHG*, pp. 286-423; *BHI*, pp. 184-464; *NHI*, pp. 164-356; LaSor, *et al.*, *OT Survey*, pp. 227-297; *CAH*, II/1 [1973], 54-64, 417-525; II/2 [1975], 49-116, 152-273, 307-330, 359-378, 443-481, 507-536, 537-605.)

With the break-up of Alexander's kingdom, Egypt became the portion of Lagos and his descendants the Lagides

(Ptolemies), and Syria became the portion of Seleucus and the Seleucids. The Ptolemies controlled Palestine until 198 B.C., at which time the Seleucid Antiochus III took over Coelesyria, including Palestine. The Hasmonean (Macabbean) revolt occurred in the time of Antiochus IV and his successor, and there was a nominal Jewish kingdom until the Roman Pompey took Jerusalem in 63 B.C. The Idumean Herod became king of the Jews under the aegis of Rome in 37 B.C., and the Herodian family continued to rule all or parts of Palestine under increasing control by Roman governors and legions until the destruction of Jerusalem in A.D. 70. The land was divided politically into ethnarchies and tetrarchies in the NT period (*Ant.* xvii.9.5–11.4 [218-320]; *BJ* ii.2.1–6.3 [14-100], etc.; Lk. 3:1). Geographically, the main areas in Cisjordan were Galilee, Samaria, and Judea; in Transjordan (or Perea) they were the cities of the Decapolis. (See *BHI*, pp. 343-464; *NHI*, pp. 300-428.)

D. Postbiblical Period. Roman rule of Palestine continued until the division of the empire into East (Byzantium) and West (Rome); in A.D. 324 Palestine became part of the Byzantine empire. Moslem rule commenced in 638 and continued (with the Crusader interruption, 1099-1187) until 1250. This was followed by the Mameluke period (1250-1517) and then the Ottoman Turkish rule (1517-1917). Palestine came under the British Mandate in 1917. When Great Britain terminated this and the United Nations established a Jewish State in November, 1947, the stage was set for increased Arab-Jewish hostilities and several wars. The State of Israel was established in May, 1948.

Throughout this entire postbiblical period there were Jewish settlements in Palestine at Modein, in Galilee, and elsewhere. The large Jewish center at Tiberias in Galilee produced the Palestinian Talmud during the early centuries of the Common Era. The "western Masorah" was also the product of Tiberian Masoretes.

E. Population. The figures for the population of Palestine in biblical times vary considerably in scholarly works. Three methods are commonly used, but each has weaknesses. One method is based on population density, i.e., the average number of inhabitants per unit of area. Although often presented as "scientific," this method is demonstrably unreliable, as evidence from Ebla has shown (*see* JERUSALEM III.D.5.b). A second method is based on the figures in the Bible. Nu. 1:1-46 states that at the first census after the Exodus there were 603,550 able-bodied men; adding the women, children, and those unfit for military duty would give a total population estimated at two to three million (cf. 26:1-63, which gives the census at a later date as 601,730). David's census (2 S. 24:9) lists the men fit for war as 800,000 in Israel and 500,000 in Judah, for a total of 1,300,000. Using the average of one man of military capability for every five persons, this would give a total population of 6,500,000. To challenge these figures is not, however, to deny the authority of the Bible, for biblical statements make it clear that the Israelites were not the most numerous or most powerful people in the region (Dt. 7:7; cf. Ex. 23:29); rather, the peoples in Canaan were described as "seven nations greater and mightier than yourselves" (Dt. 7:1). When the Israelites entered the land of promise they were unable to drive out the nations that dwelt there (cf. Jgs. 1), and this does not fit well with the figure of 600,000 fighting men. A third method of estimating the population is to compare it with modern Israel, which is over three million. But this method also is open to question, due in part to the large number of Jewish immigrants in the 20th century.

Biblical statements lead us to conclude that the number of Israelites who entered the land under Joshua was not greater than that of the people already dwelling there and that this figure did not increase dramatically in the following centuries — for Saul was unable to suppress the Philistines, and the forces of Ahab were not significantly greater than those of Hadadezer of Damascus or Irḥuleni of Hamath (according to Shalmaneser's figures; see *ARAB*, I, § 611; *ANET*, pp. 278f.; cf. LaSor, *et al.*, *OT Survey*, p. 168 n. 11). To attempt to give a figure to this population is futile, as is demonstrated by the wide disparity in estimates of the population of Jerusalem in the time of Jesus (ranging from 20,000 to 12,000,000; *see* JERUSALEM III.H.30).

IX. Languages and Writing.—Long gone are the days when scholars could say that Palestine was a backward region with little culture and that writing could not have developed earlier than Homer. Writing was known in the Levantine area from the middle of the 3rd millennium, and several forms of writing in several languages were in existence in the first half of the 2nd millennium. Where evidence is lacking for the language itself, some conclusions can be drawn from the study of personal and divine names.

A. Cuneiform. The use of CUNEIFORM (wedge-shaped) writing dates back before 3000 B.C. in Mesopotamia. The large number of tablets discovered at Tell Mardikh (Ebla) gives evidence of the use of this medium of writing (using syllabograms and logograms) in Syria from *ca.* 2300 B.C. But the fact that Ebla was a center of commerce and that its mercantile activities stretched over a large area in the Near East, including a number of places in Palestine named in the documents, implies that there were scribes in Palestinian cities who were capable of reading Eblean (or Eblaite) cuneiform. Cuneiform Akkadian was the medium of communication in the Near East throughout the 2nd millennium, but our most important evidence of its use in Palestine comes from the AMARNA TABLETS. These documents, written on clay tablets and dating from the middle of the 14th cent. B.C., were found in Egypt; but they include about three hundred letters written by scribes in the Levant, of which approximately half were written either to or from Palestine. Cuneiform documents have been found also in Palestine (at Hazor, Megiddo, Taanach, Shechem, Jericho, and Gezer), dating from *ca.* 1450-1350 B.C., and one Amarna-type letter has been found at Tell el-Ḥesī (cf. G. A. Barrois, *Manuel d'archéologie biblique*, 2 [1953], 149-153; *see* EGLON III). Two other systems might be mentioned here: the inscriptions from the early 2nd millennium in Syria and Palestine (e.g., at Tell ed-Duweir), named "pseudo-hieroglyphic" by M. Dunand (cf. *AP*, p. 185), which may be an early development of hieroglyphic writing into syllabograms; and the alphabetic cuneiform of Ugarit from the middle of the 2nd millennium (see IX.B below).

B. Alphabetic Writing. The invention of the alphabet is usually attributed to the Phoenicians, though this has been challenged on the grounds that the alphabet is not phonemically (and phonetically) suited to Phoenician. Whatever the origin of the Phoenician alphabet, there can be no doubt that it became the basis of a great many other alphabets (Noth, indeed, says "all of the alphabetic scripts in the entire world" [*OT World*, p. 211]), including Aramaic (the "square letters"), Syriac, Arabic, Greek, Cyrillic, Latin, and others, doubtless through the widespread mercantile colonies and shipping routes of the Phoenicians and Greeks. Although the Phoenician centers were located to the north of Palestine (Acco, Tyre, Sidon, Byblos, Arwad), their effects were quickly and deeply felt in Palestine. It can be stated unequivocally that several systems

of writing were known in Palestine in the 2nd millennium, some of which were certainly in use at many locations by the early 1st millennium B.C. (cf. *FSAC*, p. 43).

The earliest efforts to develop an alphabetic system of WRITING are often traced to the INSCRIPTIONS at the turquoise mines at Serābîṭ el-Khâdim in Sinai. These inscriptions, dated between 1900 and 1500 B.C., have not yet been satisfactorily deciphered, and the question whether such a revolutionary idea as an alphabet could have been invented by "an ignorant mine boss" (C. C. McCown, *Ladder of Progress in Palestine* [1943], p. 112; cf. A. Gardiner, *PEQ* [1929], 48-55) has not been convincingly answered. One theory traces the development of the alphabet to acrophonic use of Egyptian hieroglyphs (i.e., using the symbol to represent its first sound). Certainly an alphabet, written in cuneiform characters, was in use at Ugarit (Râs Shamrah in Syria) by the 14th century. It consisted of thirty consonantal characters, three of which were various vocalizations of *aleph* (*aleph, ileph, uliph*; *see* table in CUNEIFORM). It is true that both Serābîṭ el-Khâdim and Ugarit are at some distance from Phoenicia (or Palestine) and that these systems may not have penetrated to this region (although texts in a shorter form of the Ugaritic alphabet have been found near Mt. Tabor and at Taanach and Beth-shemesh; see P. C. Craigie, *Ugarit and the OT* [1983], p. 50). Their influences, however, may have contributed to the development of the Phoenician alphabet.

Early Hebrew inscriptions include the GEZER CALENDAR (10th cent. B.C.) and a quantity of Hebrew and Phoenician inscriptions found at Kuntillet ʿAjrūd in Sinai, which are dated to the 9th and 8th centuries. Early Phoenician inscriptions on arrowheads are dated to the 12th cent. (Moscati, *World*, pp. 89f.), while the Ahiram inscription dates from *ca.* 1000 B.C. and the Mesha Inscription in Moabite (*see* MOABITE STONE) makes use of the same alphabet (mid-9th cent.).

With the hellenization of the Near East, and especially with the Seleucid rule over Palestine, Greek came into use. It would be equally erroneous to assume either that all Jews spoke Greek or that none spoke it. Contrary to a popular view, Greek rather than Latin, was used widely by the Romans (cf. the works of Josephus, addressed to his Roman patron but written in Greek; Paul's Epistle to the Romans was likewise written in Greek). It is commonly assumed that by NT times Aramaic was the common language of Palestinian Jews, and where the word "Hebrew" occurs in the NT it is usually interpreted to mean "Aramaic." But the extensive use of Hebrew by the Qumrân community, even for its Manual of Discipline and its commentaries, and the almost complete absence of Aramaic, have led some scholars to conclude that Hebrew was the more common language, at least through the 1st cent. A.D. In the Byzantine period Greek was presumably still used by the governmental representatives and probably also by certain other persons. With the Moslem conquest Arabic came to be used; ultimately it became one of the three official languages of modern Palestine under the British mandate, along with Hebrew and English.

C. Proper Names. The study of names (whether of persons or deities), while not providing sufficient evidence to reconstruct otherwise unknown languages, has shed considerable light on the movements of peoples and their languages. Hittite, Hurrian, and Amorite names have been identified at various sites in Palestine, lending a measure of support to the biblical accounts that Hittites, Horites (possibly orthographically corrupted to "Hivites" in some passages), and Amorites were among the many peoples of Palestine. The Philistines were probably related to or identical with the Pelasgians, an Aegean people. Thus we may conclude that Palestine at various times was inhabited by or had extensive relations with peoples of Indo-European, Indo-Aryan, and various Semitic origins, and that these languages and cultures left their marks on the peoples of Palestine. (See *CAH*, II/1 [1973], 1-41; II/2 [1975], 252-273, 507-536; see also W. L. Moran, "Hebrew Language in Its Northwest Semitic Background," in *BANE*, pp. 54-72; *AP*, pp. 177-203; M. Sprengling, *The Alphabet: Its Rise and Development from the Sinai Inscriptions* [1931]; *CAH*, I/1, [1970] 136-138; W. F. Albright, *Proto-Sinaitic Inscriptions and Their Decipherment* [1966]; H. B. Huffmon, *Amorite Personal Names in the Mari Texts* [1965].)

*X. **Religion.***—A small country populated by so many peoples of diverse backgrounds must as a matter of course have included not only many religions but also eclectic or syncretic mixtures of these systems. It is a gross oversimplification, entirely without biblical support, to suppose that the Israelites had a common and pure religion of Yahwism. Their ancestors were worshipers of pagan gods (Josh. 24:2). The Hebrews who left Egypt brought elements of Egyptian religion with them (Ex. 32:7f.), and Moses warned them against turning to the gods in the land they were about to enter (Dt. 8:19). Joshua admonished them to put away their foreign gods (Josh. 24:23), and the days of the Judges saw repeated apostasies (Jgs. 3:5f.; etc.). Solomon not only tolerated and encouraged the cultic practices of his foreign wives (1 K. 11:1-8) but even turned from Yahweh to these pagan deities himself (vv. 9, 23). The prophets continually preached against the religious beliefs and practices of the Israelites who had mixed false doctrine with their Yahwism or had turned to serve Baals (cf. Isa. 2:6-8; Jer. 5:4-11; etc.). The people were punished for their apostasy by exile in Assyria and Babylon (Isa. 10:5f.; Jer. 21:10). After their return from the Babylonian Exile the Jews appear to have forsaken idolatry, for this sin is not mentioned again in biblical texts (although there is evidence of religious eclecticism in the Aramaic papyri from Egypt and other sources). As a result of Ezra's reforms zealous legalism or cold indifference replaced idolatry, and the inroads of hellenization during the rule of the Seleucids resulted in the reaction of the Hasidim and their successors, the Pharisees. The NT witnesses to the same tendency of human beings to construct their own forms of religion; even many of Jesus' followers left Him when it became apparent that His teachings differed from their hopes (Jn. 6:66). Apostasy takes many forms (cf. Mal. 3:5-7), as is demonstrated by anti-Semitism, militarism, and the introduction of many elements of pagan religions into Christianity.

The once-popular History of Religions School attempted simplistically to trace the development of religion from animism to monotheism, altering the biblical account to fit the theory (cf. W. O. E. Oesterley and T. H. Robinson, *Hebrew Religion* [2nd ed. 1937]). More careful study has produced a much more complex picture, with a mixture of Aryan, Indo-European, Semitic, and other deities, as theophoric names attest. Accordingly some cultic practices in Israel were quite likely taken over (and "sanctified") from a pagan source (e.g., circumcision, and the Feast of Unleavened Bread). Some vestiges of animism may indeed have remained (cf. the terebinth at Mamre [Gen. 13:18]; the water at Bethesda [Jn. 5:7]; the pillars at the entrance to the temple [2 Chr. 3:17]). A remnant of polytheism may be seen in the Hebrew word *ʾēlîm* (lit. "gods") in passages such as Ps. 29:1 (lit. "sons of gods") or Ex. 15:11. Some terms are so veiled in obscurity that there is no consensus concerning their origin or meaning (cf. "Azazel,"

Lev. 16:7-28; "Lilith" [RSV "night hag"], Isa. 34:14). The Israelites were repeatedly reproved for resorting to the "high places" (*bāmôṯ*), "groves" (*ʾᵃšērôṯ*), and Baals. Deities such as Ashtoreth, Chemosh, and Milcom (1 K. 11:5, 7; 2 K. 23:13) are also named. The discovery of the Ugaritic religious literature has shed much light (and some nonsense) on the study of Israelite religion, particularly the Canaanite influences on it. (*See also* IDOL; IDOLATRY; RELIGIONS OF THE BIBLICAL WORLD: CANAANITE.)

To mention such data is not to deny the unique character of Yahwism. The God of Israel is portrayed by the Bible as One who takes His people in whatever circumstances they may be, speaks their language and uses their figures and images, and ultimately leads them from ignorance to knowledge, from falsehood to truth. Unless the Israelites were in bondage to false gods, the OT prophets were little more than haranguers. That the people had for the most part continued to ignore and persecute the prophets was the charge made by John the Baptist and by Jesus.

To attribute the survival of Israel's religion to "the Semitic genius for religion" is either a truism or an absurdity. There were other Semitic religions, and some of them existed within the same geographical and temporal framework as Israel; but the verdict of history is clear: they have not survived. The religion of Israel survived and ultimately spread beyond Palestine because of two factors, the first of which is an item of faith: the God of Israel is a living God who works in historical situations to make Himself and His redemptive purpose known; second, the people who worship this God believe that He is such a God.

(See H. H. Rowley, *Worship in Ancient Israel* [1967]; H. Ringgren, *Israelite Religion* [Eng. tr. 1966]; T. C. Vriezen, *Religion of Ancient Israel* [Eng. tr. 1967]; W. F. Albright, *Yahweh and the Gods of Canaan* [1968]; P. C. Craigie, *Ugarit and the OT* [1983], pp. 67-90; R. de Vaux, *Ancient Israel* [Eng. tr. 1961], II.)

XI. Cultural Contributions.–Palestine in antiquity was largely an agricultural nation. It did have a few mercantile centers, outposts of commercial nations such as Ebla. But until comparatively modern times Palestine did not make great contributions in arts and crafts, trade and commerce, or industry and science. Because the coast offered no suitable harbors (except at Acco) there was little maritime trade. At certain periods of Israelite history the Gulf of Aqabah, with its port at Elath, became the terminus of a trade route, but the sailors were not Israelite (cf. 1 K. 10:22). Likewise, the skilled craftsmen who built Solomon's capital were Tyrians (5:1-6 [MT 15-21]; 7:13-45; this "Hiram" [or "Huram(abi)," 2 Ch. 2:13; 4:11], is to be distinguished from King Hiram). Galilee had a major highway (the Way of the Sea) that connected Egypt and the port at Acco with Damascus, and a trade route ran from Gaza to Edom at the southern end of Palestine; but the trunk roads lay near the coast on the west of Cisjordan and toward the desert on the east of Transjordan, leaving Palestine largely free from stimuli that might have developed arts and crafts.

The Egyptians and Greeks made great contributions in architecture and sculpture, the Ebleans and Assyrians and later the Phoenicians and Greeks in trade and commerce, the Hittites and Anatolian peoples in metallurgy, the Persians and Romans in government — but what was the distinctive contribution of Palestine? The answer must lie in historiography and Yahwistic monotheism, with the sense of history largely if not totally dominated by belief in the redemptive activities of Israel's God.

This unique contribution brought about other cultural developments in the course of history. The Psalms gave rise to psalmody; the imagery of the Scriptures encouraged representations in ikons and sculptures; and the concern for the poor, the widow, and the orphan led to charitable organizations. The tradition of worship in the temple gave rise to the synagogue and the church, and in turn to architectural and cultic forms to satisfy the need for corporate worship. Nascent Judaism originated in Palestine; the rabbis' grapplings with the implications of the Scriptures produced rabbinic literature and the Palestinian Talmud; and the scribes at Tiberias helped to preserve the correct reading of the Hebrew Bible through the Masorah. Even the alphabet is indebted to the Judeo-Christian Scriptures for its widespread use (e.g., Syriac, Cyrillic, and many modern adaptations used to publish the Scriptures in modern tongues).

See also ART VI.

XII. The Land in Prophecy.–The concept of the LAND first appears in the call of Abram (Gen. 12:1, 7). The promise was repeated to Abram/Abraham (13:14-17; 15:18-21; 17:8), to Isaac (26:34), to Jacob at Luz (48:4), and was known to Joseph (50:24). Statements that Yahweh "swore" or performed an oath to "give" the "land" occur repeatedly in the first seven books of the OT. In the Decalogue the only commandment with promise speaks of the possession of the land (Ex. 20:12); the implicit threat of exile from the land is made explicit in other passages, notably Dt. 28 (cf. vv. 36, 64-67). Israel, which had been "planted" in the land, would be "plucked up" (Dt. 28:63; Jer. 12:14), "rooted up" (1 K. 14:15), "cut off from" (9:7), "exiled from" (2 K. 17:23; 25:21; Jer. 52:27), and would "perish from" this land (Josh. 23:13, 16).

But Yahweh's word could not be voided. Several prophets refer to the replanting, rebuilding, or return to the land. Ezk. 37 (part of the longer eschatological passage that includes chs. 34–39) promises the resurrection of both Israel and Judah (37:19-22) and an "everlasting covenant" (vv. 26-28); this is followed by the Gog-Magog conflict (chs. 38f.) — a figure that is taken up in Revelation's description of the end time (Rev. 20:7-10). Likewise the book of Zechariah depicts the restoration of Judah and Joseph/Ephraim (= Israel) and the return from exile (10:6-11) in connection with the end time events (cf. 9:9; 14:4-9). Other passages in the prophets refer to blessings involving the land "in the latter days." The promise of a "Wonderful Counselor" (Isa. 9:6) is immediately associated with the throne of David (v. 7) and the "remnant" that will return (10:21). The messianic promise in 11:1-5 is followed by a picture of an idyllic kingdom (vv. 6-9) and the return of the remnant of Israel and Judah (vv. 11-16). Joel's prophecy of the outpouring of the Spirit specifically mentions Mt. Zion, Jerusalem, the valley of Jehoshaphat, Tyre, Sidon, and other place names (Joel 2:28–3:21 [MT 3:1–4:21]). Jeremiah's prophecy of the new covenant (Jer. 31:31-34) is in a context that speaks of the rebuilding of Jerusalem with specific geographical details (vv. 38-40). Many additional passages could be cited.

Jewish interpreters and some Christian interpreters (early Chiliasts and recent Premillennialists) have held that the promises of the restoration of the Jews to the land, the reign of the messianic king in Jerusalem (Zion; cf. Ps. 2:6; 110:2), the desire of the Gentiles ("nations") to learn the way of the Lord from Israel (Isa. 2:2-4; Mic. 4:1-3), peace on earth and the concomitant blessings of the messianic age, are to be fulfilled, with a literalness that is temporal and spatial (allowing for some poetic language). Other Christian interpreters would claim that the Jews lost these promises when they rejected their Messiah and that the Church is now the "Israel of God" (cf. Gal. 6:16; *see also* ESCHATOLOGY IX). This hermeneutical problem cannot be solved here (cf. W. S. LaSor, *The Truth about Arma-*

geddon [1982], pp. 75-89, 150-174), but the question must be faced: does not the common Christian interpretation fail to grapple exegetically with the passages that include the land promise? The land of Palestine is an integral part of the covenant with Abraham, just as the throne of David is an integral part of the covenant with David (cf. Jer. 33:20-22). According to the NT the covenant with Abraham is still in force (Gal. 3:15-18; Rom. 4:13-24), as is the covenant with David (Lk. 1:32f.; cf. Acts 2:25-36). The new covenant, which includes the possession of the land (Jer. 31:27-34), is now in force (He. 8:8–9:15). The hermeneutical problem requires careful attention, and a serious effort should be made to reach an exegetically satisfactory solution. Meanwhile it must be recognized that, however the relevant passages are to be understood, the redemption of sinful humanity and the blessings of righteousness and peace have their basis in time and space in the land of Palestine. (*See also* GEOGRAPHY, BIBLICAL.)

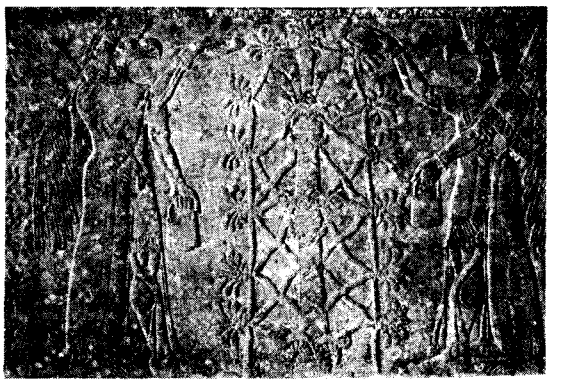
W. S. LASOR

PALLET. *See* BED.

PALLU pal'o͞o; **PALLUITES** pal'o͞o-īts [Heb. *pallû'* < *pālā'*–'be conspicuous, extraordinary']; AV also PHALLU. The second son of Reuben (Gen. 46:9; Ex. 6:14; Nu. 26:5; 1 Ch. 5:3), and the father of Eliab (Nu. 26:8). The patronymic (Palluites) occurs in Nu. 26:5.



PALM (OF THE HAND) [Heb. *kap*]. The Hebrew term properly denotes the "hollow of the hand" (cf. the metaphorical use of *kap* for a concave DISH). It is usually translated "hand" by the English versions (e.g., cf. the gesture of stretching out the *kappîm* in prayer; *see* GESTURE I), but the translation "palm" occurs four times in the RSV (e.g., 2 K. 9:35). In Lev. 14:15, 26 it refers to the cupped left hand of the priest, into which sacrificial oil is poured. In Isa. 49:16 Yahweh assures Zion of His constant love for her by the use of a beautiful metaphor: He has carved her name on His hand so that He will never forget her (for other examples of this type of practice, *see* MARK I).

See also HAND.

N. J. O.

PALM TREE [Heb. *tāmār*; Gk. *phoínix*]. The many references to palm trees are unquestionably to the date palm (*Phoenix dactylifera* L.), one of the most characteristic trees of the Orient. The date palm ranges extensively from India to North Africa and is the principal desert foodplant. In oriental architecture palm figures were used as ornamentation (cf. 1 K. 6:29, 32; Ezk. 40:31); the palm was a symbol of grace, elegance, and dignity (*see* TAMAR). The large leaves were used in making roofs or repairing fences, smaller ones became containers, and the integument in the crown furnished material for rope.

The dates, hanging down in immense clusters, were the chief food of many ancient peoples, as they are for some modern peoples. The Babylonians made intoxicating liquor by extracting the syrupy content of the spathe surrounding the flowers. This liquor was probably the "strong drink"

Griffin-demons scraping and collecting sap from a palm tree; the sap was used to anoint the king to enhance his fertility. From the palace of Ashurnasirpal II at Nimrûd, 9th cent. B.C. (Trustees of the British Museum)

of Lev. 10:9; Nu. 6:3; Jgs. 13:4; Isa. 5:11; Mic. 2:11; etc. It was also known euphemistically as "honey" (Heb. *dᵉḇaš*) and as such is doubtless intended in Gen. 43:11; 1 S. 14:25; Isa. 7:15; Cant. 4:11; Rev. 10:9; etc. Strabo, Pliny, and Herodotus recorded that the Orientals made wine and honey from the date palm.

From early times the staminate (male) flowers were used in artificial fertilization of the pistillate (female) flowers. Assyrian sculptures and Egyptian bas-reliefs depict winged figures shaking a bunch of male flowers over female blooms. Names like Baal-tamar, Hazazon-tamar, and Bethany ("house of dates") indicate the date palm's abundance in ancient Palestine. Jericho was called the "city of palm trees" (Dt. 34:3; Jgs. 1:16; 3:13; 2 Ch. 28:15).

The righteous flourish like the palm tree (Ps. 92:12-15 [MT 13-16]). Its branches indicated the highest of the people (Isa. 9:14 [MT 13]; 19:15) as contrasted with the rush, or lowest people. Palm branches were used at the Feast of Tabernacles (Lev. 23:40; cf. Neh. 8:15; 2 Macc. 10:7) and by the multitudes who escorted Christ to Jerusalem (Jn. 12:13). In Rev. 7:9 the uncounted multitude stood before the Lamb holding palm branches.

In Ps. 65:11 (MT 12) the NEB reading "palm trees" for MT *ma'gāleykā* (RSV "tracks of your chariot") is not supported by either the MT or LXX and must be regarded as strictly conjectural.

See Plate 59.

R. K. H.

PALMERWORM. The AV translation of Heb. *gāzām* (lit. "cut") in Joel 1:4 (RSV "cutting locust"); 2:25 (RSV "cutter"); Am. 4:9 (RSV "locust"). The palmerworm is a caterpillar that appears in great numbers and devours vegetation; but the reference here is apparently to a type of LOCUST (cf. NEB), or the locust at a particular stage of development.

PALMYRA. *See* TADMOR.

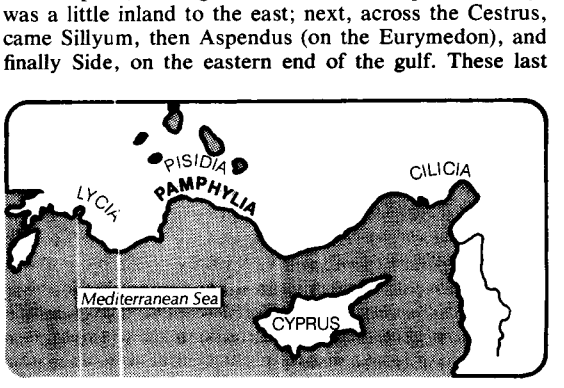
PALSY. The AV translation of Gk. *paralytikós* and *paralelyménos* (pf. pass. part. of *paralýō*). Eng. "palsy" is a sixteenth-century form derived from French *paralysie* (< Lat. *paralysis*); today it is usually replaced by Eng. "paralysis" or "paralyzed" (cf. RSV, NEB; *see* PARALYTIC). Palsy designates various conditions characterized by a loss of ability to move or to control movements of the body. It generally results from damage to the brain or spinal cord or from a disease of the central nervous system. *See* DISEASE IV.B.

PALTI pal'tī [Heb. *palṭî*–'Yahweh delivers' or 'my deliverance']; AV also PHALTI (1 S. 25:44).

1. Son of Raphu; as a leader of the tribe of Benjamin, he was one of the twelve spies sent by Moses to explore the land of Canaan (Nu. 13:9).

2. Son of Laish, from Gallim in Benjamin; the man to whom Saul gave his daughter Michal, David's wife, when David was outlawed (1 S. 25:44). Later, however, through the intervention of Abner, Michal was taken from her grief-stricken husband (here called Paltiel) and restored to David (2 S. 3:15f.).

PALTIEL pal'ti-əl [Heb. *palṭî'ēl*–'God delivers' or 'God is my deliverance']; AV also PHALTIEL (2 S. 3:15).



1. Son of Azzan; a leader of the tribe of Issachar appointed to assist Eleazar and Joshua in dividing the land W of the Jordan among the tribes of Israel (Nu. 34:26).

2. An alternate form of PALTI **2.**

PALTITE pal'tīt [Heb. *palṭî*–'Yahweh delivers' or 'my deliverance'; Gk. A *Phellōnei*, B *Kelōthei*]; NEB "from Beth-pelet." A descriptive adjective applied to Helez, one of David's valiant men called the "thirty" (2 S. 23:26). Paltite may be a patronymic of Palti; but more probably it means an inhabitant of BETH-PELET in the Negeb of Judah. In 1 Ch. 11:27; 27:10 Helez is called "the Pelonite"; most scholars agree that the text is corrupted in these places and should be emended to "the Paltite" (cf. *BHS*; but *see* HELEZ **1**; PELONITE).

PAMPHYLIA pam-fil'ē-ə [Gk. *Pamphylia*]. A highly fertile alluvial plain in Asia Minor bordered on the south by the Mediterranean and on the north by Pisidia, and enclosed by the two massive outcrops of the Taurus Mountains that constitute Lycia to the west and Cilicia Tracheia to the east. Its physical features greatly resemble those of its eastward counterpart, Cilicia Pedias, but it is much smaller and had virtually no strategic significance in the history of Asia Minor. Two great rivers, the Cestrus and the Eurymedon as they were called in antiquity, drain the Pisidian hinterland and with the lesser Catarrhactes and Melas at the western and eastern extremities, respectively, have built up the plain. The land was rich in fruit and crops and was a center of pharmaceutical products.

A chain of five major Greek cities, set in a slight arc in relation to the seacoast, spanned about 64 km. (40 mi.) of the Pamphylian plain. The greatest and most recent (as its name, honoring the second-century-B.C. dynasty of Pergamum, makes clear) was Attaleia, modern Antalya, at the western end of the gulf. (The older Olbia, still farther W, was apparently dispossessed to make way for the new foundation. To the east lay an obscure Magydus, also eclipsed, although revived in the NT period.) Perga was a little inland to the east; next, across the Cestrus, came Sillyum, then Aspendus (on the Eurymedon), and finally Side, on the eastern end of the gulf. These last four cities (with the two overshadowed by Attaleia) were ancient foundations whose tradition went back to the migrations after the Trojan War. The miscellany of peoples in the region allegedly accounted for the name Pamphylia, the place "of all peoples." The peculiar dialectical features of their coinage lend some support to the claim of such antiquity and also indicate the mixing of Greek and non-Greek in what was then a remote frontier of Greek settlement.

Pamphylia came under Roman sovereignty at the end of the 2nd cent. B.C., when the Cilician pirate menace compelled Roman intervention. It was later attached to the province of Asia and then to Galatia; in A.D. 43 Claudius made it and its western neighbor Lycia into a new province.

What took Paul to Pamphylia after he left Paphos in Cyprus (Acts 13:13) is not specified. But since Pamphylian Jews were at Pentecost (2:10), one would naturally assume that he expected to preach in their synagogues. There must have been some value attached to working in Pamphylia if one is to explain the defection of Mark when Paul decided to go to Pisidian Antioch and Lycaonia in the interior. The breach with Mark is the only recorded happening in Pamphylia (13:13; 15:38); this fact and the way that 14:25 mentions the preaching on the return journey imply that no church had been formed in Perga. The visit to Attaleia (v. 25) was apparently for convenience of travel; again, no details are given. Certainly Pamphylia does not attract any subsequent concern of Paul's, as one would expect had a successful mission been conducted there.

Bibliography.–Strabo xiv.4.1-3; Pauly-Wissowa; *RRAM*, I, 260-63; *CERP*, pp. 124-147; *SPT*, pp. 89-97. E. A. JUDGE

PAN [Heb. *kîyôr*] (1 S. 2:14); NEB CAULDRON; [*maśrēṯ*] (2 S. 13:9); [*marḥešeṯ*] (Lev. 2:7; 7:9); AV FRYINGPAN; [*ṣēlāḥâ*] (2 Ch. 35:13). A cooking utensil used for preparing various items of food.

The term *kîyôr* is used twenty-three times in the OT, but is translated "pan" only once. It most often refers to the LAVER in the temple, so the term most likely indicates some large container for holding liquids. In 1 S. 2:14 it is used for cooking the sacrifices at the Shiloh sanctuary where the boiling of meat is mentioned in v. 13. The *kîyôr*, when used for cooking, was probably a large boiling pot.

The term *maśrēṯ*, used only in 2 S. 13:9, seems to have been a utensil for baking cakes (probably very much like pancakes). It may have been a flat sheet, a frying pan, or even a convex sheet intended to stretch over a small fire of brush much like that which the modern Arab village housewife uses for the local flatbread.

Use of the *marḥešeṯ* seems to have been similar to that of the *maśrēṯ*, except that it occurs only in ritual contexts for preparing cereal offerings. The verbal root means "moving" or "stirring," indicating that the contents were meant to be stirred.

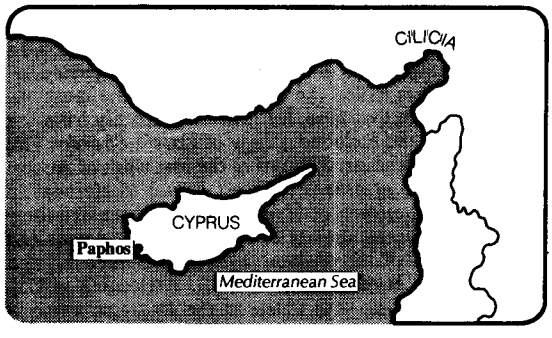
The *ṣēlāḥâ*, mentioned only in 2 Ch. 35:13 (but cf. *ṣalaḥaṯ*, "dish," e.g., 2 K. 21:13), was used for boiling offerings at Josiah's Passover. The vessel was thus probably a type of closed cooking pot.

See also GRIDDLE; PLATE; POT. L. G. HERR

PANEL [Heb. *misgereṯ*] (1 K. 7:28ff.); AV BORDER; [*sap*] (Ezk. 41:16a); AV DOOR POST; [*ʿᵉḥîp*] (Ezk. 41:16b); AV CIELED; [*sāpan*] (Jer. 22:14; Hag. 1:4); AV CIELED; NEB also WELL-ROOFED. Hiram of Tyre made for Solomon's temple ten large bronze stands having panels figured with lions, oxen, and cherubim (1 K. 7:28ff.). Jer. 22:14 and Hag. 1:4 use different forms of the verb *sāpan*, "cover"; in the context the RSV "paneling" appears preferable to the AV "cieled." The RSV "paneled" of

Ezk. 41:16a is a conjecture based on the LXX *pephatnōména*, which presupposes *s'pûnîm* (cf. *BHS*) for MT *hassippîm* ("doorsill, threshold"). G. WYPER

PANNAG pan'ag. In Ezk. 27:17 the AV transliterates Heb. *pannag* as a place name, but from the context it is obviously some kind of food. The RSV "early figs" is based on the reading *pagag* and does fit the context well. But the Tg. *qôlyā'*, "parched grain," as well as the Akkadian cognate *pannigu*, "meal, flour," suggests some kind of grain product (cf. NIV "confections"; NASB "cakes"). H. Cohen (*Biblical Hapax Legomena in the Light of Akkadian and Ugaritic* [1978], p. 118) noted that in one text Akk. *pannigu* occurs with *dišpu*, "honey," a cognate of Heb. *dāḇaš*, which follows *pannag* in Ezk. 27:17.



G. A. L.

PAP. An obsolete term used by the AV to translate Heb. *šaḏ* in Ezk. 2:21 (RSV, NEB, "breast") and Gk. *mastós* in Lk. 11:27; 23:29; Rev. 1:13 (RSV, NEB, "breast"). Heb. *šaḏ* means "female breast"; Gk. *mastós* has a wider meaning, inlcuding the male chest. *See* BREAST.

PAPER [Gk. *chártēs*] (2 Jn. 12); NEB paraphrases "black and white." *See* PAPYRUS; WRITING.

PAPER REEDS. The AV translation of Heb. *'ārôṯ* in Isa. 19:7. According to KoB (p. 734), the noun *'ārâ* means "(bul)rush." But other scholars read it as a derivative of the verb *'ārâ*, "be naked or bare" (see BDB, p. 788; cf. KD); thus the RSV rendering "bare places." For the NEB's use of "lotus," see T. W. Thacker, *JTS*, 34 (1933), 163-65.

PAPHOS pā'fos [Gk. *Paphos*]. A town on the southwest coast of Cyprus. Old Paphos (now known as Kouklia) seems to have been settled by Greek colonists during the Mycenaean period, although some attribute the original settlement to the Phoenicians. New Paphos, 16 km. (10 mi.) NW of Old Paphos, developed as the port of the old city and became the more important of the two during the Ptolemaic period. The Paphos of Acts is the New Paphos.

The ancient fame of Paphos was tied to the worship of the Greek goddess of love, Aphrodite. It became a popular place of pilgrimage when the legend of her birth was localized there. When Cyprus came under Roman control in the mid-1st cent. B.C., it was treated administratively as a part of the province of Cilicia. Some twenty-five years later it was made a separate imperial province with its own military governor. Shortly thereafter its status was again changed to a senatorial province under a proconsul. Paphos was the government seat and hence the residence of Sergius Paulus (Acts 13:7). During the Byzantine period the capital was changed from Paphos to Constantia (Salamis).

The story of the visit of Paul and Barnabas to Paphos (Acts 13:4-12) and the resulting conversion of Sergius Paulus marks the first time that a ruler became a Christian. Cyprus thus was the first territory to be governed by a Christian ruler.

PAPIAS. *See* APOSTOLIC FATHERS VIII.

PAPYRUS pə-pī'rəs [Lat. *cyperus papyrus*–'the Egyptian papyrus'; Heb. *gōme'*] (Job 8:11); AV RUSH; [Gk. *býblos, bíblos*–'papyrus plant or roll made of papyrus'], whence "book" (Mk. 12:26). A plant and the writing material that was made from it.

The papyrus was a marsh or water plant, abundant in Egypt in ancient times, that served many purposes in antiquity. The papyrus tuft was the emblem of the northern kingdom in Egypt and, like the lotus, was a favorite design on the capitals of columns. Ropes, sandals, and mats were made from its fibers (cf. Homer *Od.* xxi.391; Herodotus ii.37, 69), and bundles of the long stalks were bound together into light boats (Isa. 18:2; cf. Job 9:26)

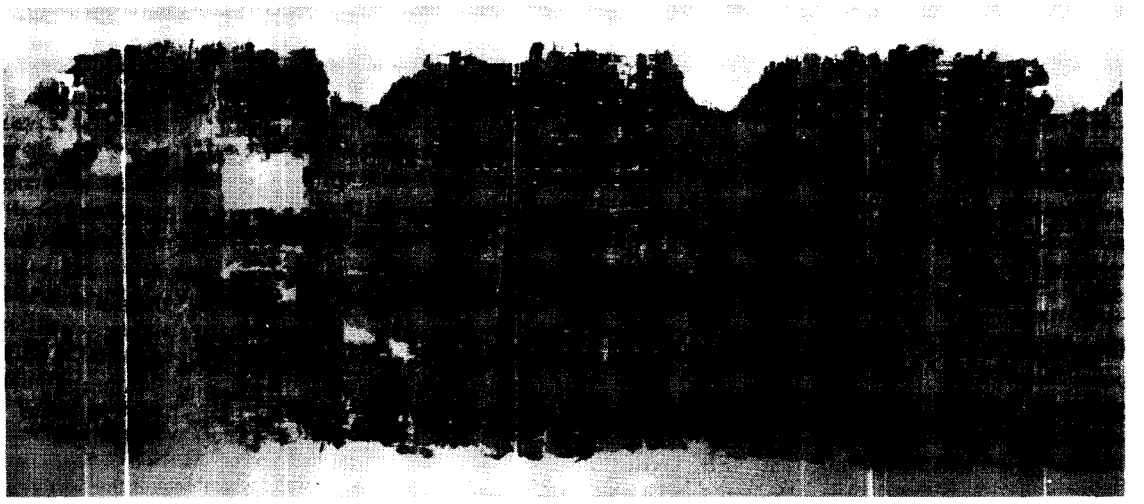

Illustration of the construction of a boat from papyrus reeds. From a tomb at the pyramids.

VI. Contribution to Biblical Study

I. Papyrus Paper.– From the papyrus plant early Egyptians made the tough and inexpensive paper that became the common writing material of the ancient world. The white cellular pitch of the long, triangular papyrus stalk was stripped of its bark or rind and sliced into thin strips. Two layers of these strips were laid at right angles to each other on a hard surface, forced together by pounding, dried, and smoothed with pumice. The sheets thus formed were pasted together to form a roll of any length desired. Pliny the Elder described the process and the product (*Nat. hist.* xiii.11-13).

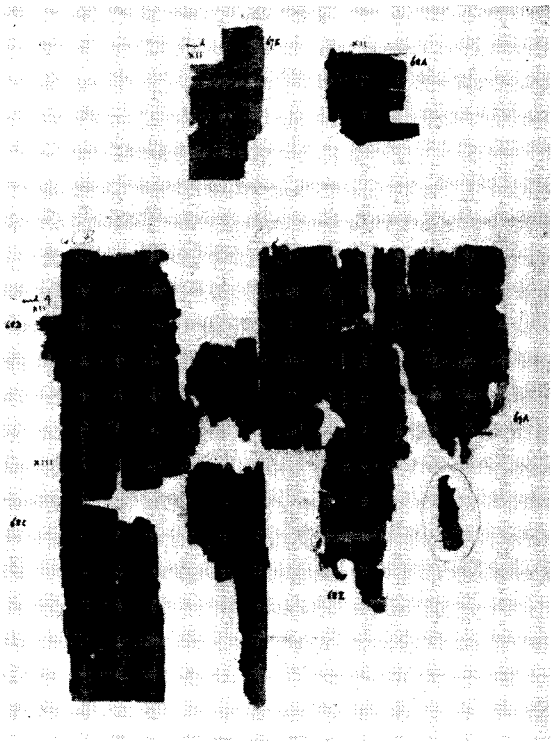
II. Egyptian Papyri.–Extant Egyptian papyrus rolls date from the 27th cent. B.C. and no doubt papyrus had been manufactured for centuries before. The Egyptian rolls were sometimes very long and were often beautifully decorated with colored vignettes (*The Book of the Dead*).

Four columns of hieratic script from the Harris Papyrus: the last two columns of "The Taking of Joppa" (right; see *ANET*, pp. 22f.) and the first two columns of "The Tale of the Doomed Prince" (left; see W. K. Simpson, ed., *Literature of Ancient Egypt* [1973], pp. 85-91) (Trustees of the British Museum)

Egyptian documents of great historical value have been preserved on these fragile rolls. The Ebers Papyrus of the 16th cent. B.C. sums up Egyptian medical lore from the time of Amenhotep I. The Harris Papyrus, 41 m. (133 ft.) long in 117 columns, dates from the mid-12th cent. B.C. and records the benefactions and achievements of Ramses III. Papyri of the 19th, 20th, and 21st Dynasties are relatively numerous, and their contribution is important for Egyptian history, life, and religion. By 1000 B.C. papyrus was used for writing far beyond the limits of Egypt. The Wen-Amon Papyrus (11th cent. B.C.) relates that five hundred rolls of papyrus were among the goods sent from the Delta to the prince of Byblos, but except in rare instances papyri have escaped destruction only in Upper Egypt, where the dry climate favored their preservation.

III. Greek Papyri.–With Alexander's conquest of Egypt (332 B.C.) and the subsequent Ptolemaic dynasty, Greeks came more than ever before into Egypt, and from Greek centers like Alexandria and Arsinoë in the Faiyûm the Greek language began to spread. Greek papyri are abundant from the Ptolemaic (323-30 B.C.), Roman (30 B.C.-A.D. 292/3), and Byzantine (A.D. 292/3-642) periods, i.e., from the death of Alexander to the Arab conquest. The three hundred Aphrodito Greek and Coptic papyri, published by Bell and Crum, date from A.D. 698-722 and show how Greek persisted in the Arab period.

A. Discovery. The first important discovery of Greek papyri in modern times was made in 1752 among the ruins of Herculaneum, near Naples. There in a house that had been destroyed and buried by volcanic ash from Vesuvius (A.D. 79) was found a whole library of papyrus rolls, charred by the heat. With the utmost pains many of these carbonized rolls were unrolled and deciphered, and the first part of them was published in 1793. They consist almost wholly of works of Epicurean philosophy.



The first Greek papyri discovered in Egypt were forty or fifty papyrus rolls that local residents claimed to have unearthed in a box of sycamore wood in Giza. One roll, purchased by a dealer, was presented to Cardinal Stefano Borgia in 1778; the others were destroyed as worthless. N. I. Schow published the Borgia Papyrus ten years later;his edition included the first documentary text on papyrus, a list of certain peasants forced to work on the Nile embankment at Tebtunis in A.D. 192.

In 1820 natives found papyri, mainly from the 2nd cent. B.C., in an earthen pot at the site of the Serapeum in Memphis. The papyri fell into various hands and are now in the museums of London, Paris, Leiden, and Rome. With them papyri began to flow steadily into the British and Continental museums. The present period of papyrus recovery dates from 1877, when an immense mass of Greek and other papyri, most documentary rather than literary, was found at the mound (*kom*) el-Faris in the Faiyûm, on the site of the ancient Arsinoë. The bulk of this collection passed into the hands of Archduke Rainer at Vienna; the museums of Paris, London, Oxford, and Berlin secured minor portions. These texts belong mainly to the Byzantine period.

Most of these discoveries were made by natives digging for fertile earth (*sebakh*) at ancient sites and occasionally finding antiquities to sell to tourists or dealers. By this time, however, the Egypt Exploration Fund (later Society) had begun its operations in Egypt, and Flinders Petrie was at work there. Digging among Ptolemaic tombs at Gurob in 1889-1890, Petrie found many mummies, with mummy-casings made of "cartonnage," papyri pasted together. Scholars hailed the Petrie papyri as the most important found to that time, for they were mainly from the 3rd cent. B.C. and included a copy of Plato's *Phaedo*. The British Museum secured papyri of the lost work of Aristotle, *Constitution of Athens*, the lost *Mimes* of Herodas, a fragment of an oration of Hyperides, and extensive literary papyri of works already extant. The Louvre acquired the larger part of the *Oration Against Athenogenes*, the masterpiece of Hyperides. In 1894 B. P. Grenfell of Oxford began working with Petrie in the Egyptian excavations and secured papyri, with D. G. Hogarth, for England.

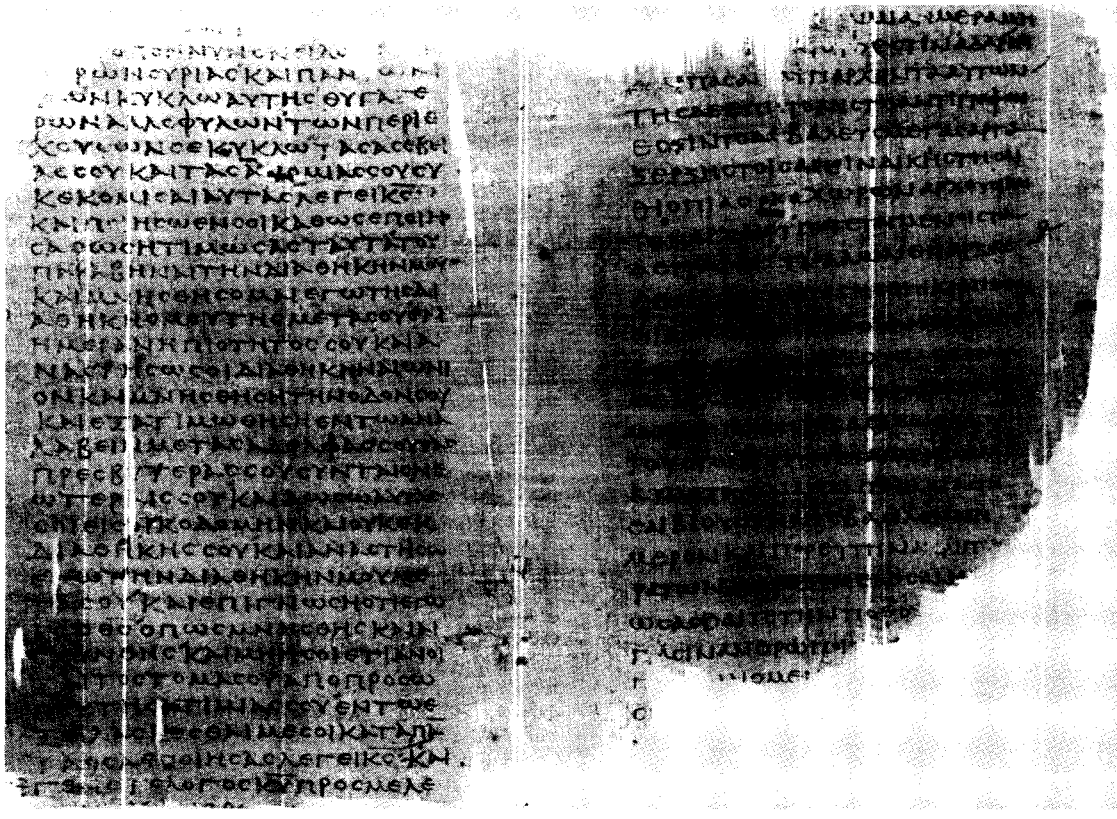
With A. S. Hunt of Oxford, Grenfell excavated in 1896-1897 at Behnesa, the Roman Oxyrhynchus, and unearthed the greatest mass of Greek papyri of the Roman period thus far found. Their discovery in 1900 of a great mass of Ptolemaic papyri at Tebtunis in the Faiyûm was comparable in importance to their Oxyrhynchus find. One of the most productive sources of papyri at Tebtunis was the crocodile cemetery, where many mummies of the sacred crocodiles were wrapped in papyrus cartonnage. Grenfell and Hunt also excavated important Ptolemaic

PAPYRUS

Plato *Phaedo* 67E-69A. From cartonnage at Gurob (Trustees of the British Museum)

texts imbedded in mummy cartonnage in 1902 at Hibeh, and P. Jouguet made similar finds in 1901 at Ghoran and in 1902 at Medinet en-Nahas. Excavations by Grenfell and Hunt at Oxyrhynchus in 1903-1907 produced results almost as astonishing and quite as valuable as those of the first excavations there. The work of L. Borchardt and a German team at Abusir in 1902 has exceptional interest, for it uncovered the then-earliest Greek papyrus text, a fourth-century papyrus roll of the verses of Timotheus of Miletus. The Timotheus roll held this precedence until 1962, when a fourth-century papyrus roll containing an allegorical commentry on the Orphic hymns was discovered in the funeral pyre of a tomb at Derveni near Thessalonica in Greece. The acquisition of papyri by purchase and excavation continues to the present, chiefly in Egypt but also occasionally elsewhere, e.g., at Dura-Europos on the Euphrates and at numerous sites in the Judean desert.

B. Literary. More than 1500 Greek literary papyri, great and small, of works other than biblical and theological have been published. That about one-half are Homeric attests the great popularity of the *Iliad* and *Odyssey* in Greco-Roman times. These are now so abundant and extensive that they make an important contribution to Homeric textual studies. Rather less than one-third preserve works of other ancient writers that were already known through medieval or modern copies. Among these are works of Plato, Demosthenes, Isocrates, Thucydides, Euripides, Sophocles, Aeschines, and Herodotus. Another extensive group preserves works or fragments of works that were usually regarded as lost or were unknown. They include portions of Alcman, Sappho, and the lost *Antiope* and *Hypsipyle* of Euripides, fragments of the comedies of Menander and the Iambi of Callimachus, *Mimes* of Herodas, poems of Bacchylides, Aristotle's *Constitution of Athens*, the *Persae* of Timotheus, and six orations, one of them complete, of Hyperides.

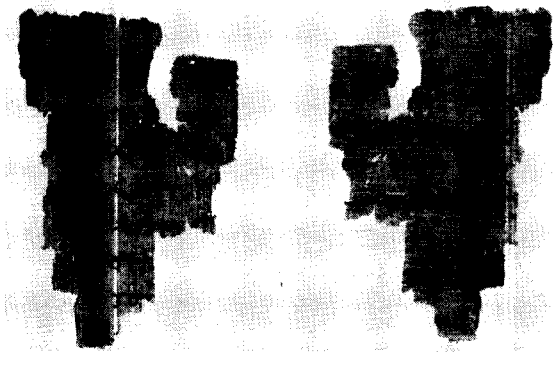


C. Documentary. The overwhelming majority of published Greek papyri — more than 15,000 — have been documentary. This category embraces every kind of public and private text, including letters, accounts, wills, receipts, contracts, leases, deeds, complaints, petitions, notices, and invitations. The value of these contemporary and original documents for the illumination of ancient life can hardly be overestimated. The life of Upper Egypt in Ptolemaic and Roman times is now probably better known than that of any other period of history down to recent times. Among the most important of the Ptolemaic documentary papyri are the revenue laws of Ptolemy Philadelphus (259 B.C.) and the forty-seven decrees of Ptolemy Euergetes II (118 B.C., 140-139 B.C.). In 1910 a papyrus now in Hamburg supplied the *Constitutio Antoniniana*, by which Roman citizenship was conferred upon the *peregrini* (non-Italians) of the empire. The private documents are even more important illustrations of the life of common people in antiquity.

D. Septuagint. More than 150 papyri of the LXX have been discovered. Perhaps the most important is the Berlin Genesis (3rd or 4th cent. A.D.) in a cursive hand, purchased at Akhmîm in 1906. Other papyri preserving parts of Genesis among the Amherst, British Museum, and Oxyrhynchus papyri date from the 3rd or 4th century. British Museum 230 (3rd cent.) preserves Ps. 12:7–15:4. A Berlin papyrus contains Ps. 40:26–41:4. An Amherst papyrus (7th cent.) shows parts of Pss. 108, 118, 135,138–140. Of the Prophets the chief papyrus is the Heidelberg Codex (7th cent.), which contains Zec. 4:6 to Mal. 4:5. The John Rylands Library of Manchester has papyrus fragments of Dt. 23–28 from mummy cartonnage dating from the 2nd cent. B.C.; with a Fuad papyrus of Dt. 31:36–32:7 they comprise the earliest witnesses to the LXX. The important Chester Beatty collection in Dublin contains portions of several LXX codices, including two of Genesis (3rd cent. and 4th cent.), Numbers and Deuteronomy (2nd cent.), Isaiah (3rd cent.), and Ezekiel and Esther (3rd cent.). Papyrus fragments of the LXX discovered in caves near Khirbet Qumrân date from the 1st cent. B.C. (*see* DEAD SEA SCROLLS). The great antiquity of some of these documents gives special interest to their readings.

E. NT. Eighty-three papyri containing parts of the Greek NT have been discovered in Egypt. They vary in age from the 2nd to the 7th cents. and in extent from scraps of a few verses to almost complete codices of a Gospel, Acts, or the Pauline letters. The fragment of Jn. 18:31-34, 37f. in the John Rylands Library, dated *ca.* 125, is the oldest witness to the NT text. Another remarkable MS is Bodmer Papyrus XIV and XV, a third-century codex containing most of Luke and John. It preserves an early and important text-type found in the famed Codex Vaticanus. The Bodmer collection of Geneva includes another important papyrus codex of John from *ca.* 200. The last leaves of this codex belong to the Chester Beatty collection, which also has a valuable codex of the Gospels and Acts from the 3rd cent. and a codex from *ca.* 200 originally containing Romans, Hebrews, 1 and 2 Corinthians, Ephesians, Galatians, Philippians, Colossians, and 1 and 2 Thessalonians, in that order.

Eighty of the known NT papyri are parts of codices. The three remaining papyri are parts of rolls that originally carried classical and OT texts and were inscribed later on their backs (verso) with NT passages.



F. Theological. Of the numerous Greek theological papyri that have come to light, thirty-one fragments of NT

LXX text of Ezk. 16:57-63 (left) and Est. 3:13 (including the long LXX additions) (Chester Beatty Library; picture P. Davison International Ltd.)

apocryphal writings have been published. The Oxyrhynchus sayings of Jesus, dating from 2nd and 3rd cents., are probably the best known (*see* LOGIA). Other Oxyrhynchus papyri preserve parts of the Apocalypse of Baruch (chs. 12–14; 4th or 5th cent.); the Acts of John (4th cent.); and Irenaeus *Adv. Haer.* iii.9 (3rd cent.). The Shepherd of Hermas is now attested by numerous papyrus fragments from the 2nd to 6th centuries. Among the valuable theological papyri discovered in 1941 at Tura were the lost commentaries on the Psalms, Job, and Zechariah by Didymus the Blind (6th or 7th cent.) and several works of Origen, including commentaries on Exodus and Romans, a homily on 1 Kings, *Contra Celsum*, and the lost *Dialogue with Heracleides*, all from the 6th and 7th centuries. Several Greek papyri from the 3rd to 5th cents. contain the *Homily on the Passion* by Melito of Sardis. The papyri continue to furnish important texts of patristic literature as well as early Christian homilies, hymns, prayers, letters, and amulets.

The oldest extant NT manuscript: fragments of Jn. 18:31-34, 37f. (John Rylands University Library, Manchester)

IV. Aramaic and Hebrew Papyri.–From 1893 to 1908 numerous Aramaic papyri, dating from the 5th cent. B.C., were found on Elephantine (Egyp. *Yeb*), an island near Aswân (Egyp. *Sewen;* cf. SYENE [Heb. *sᵉwēnēh*] of Ezk. 29:10, denoting the southern border of Egypt). The literary papyri contain portions of the Book of Ahiqar and an Aramaic version of Darius's Behistun inscription. The documentary texts reflect the affairs of a colony of heterodox Jews doing business and serving as a military outpost under Persian control and worshiping their god Yahu in a temple, in which they made meal, incense, and burnt offerings. When Egyptian priests destroyed the temple of Yahu in 410 B.C., the Jews appealed for redress to the Persian governor, under whose patronage the temple was rebuilt by 399 B.C.

In 1942 an Aramaic papyrus letter that has been dated *ca.* 603/602 B.C. was discovered at Saqqârah (Memphis). In it the Palestinian king Adon (of Ashkelon?) sought military aid from Pharaoh Neco II against the invading armies of the Babylonian Nebuchadrezzar. Other important Aramaic papyri were discovered in 1962 and 1963 in two caves of the Wâdī Dâliyeh N of Old Jericho. These texts, dating from 375 to 335 B.C., contain about forty fragments of contracts, loan agreements, and other business documents written in Samaria.

Beginning in 1947 and continuing for more than a decade, Aramaic and Hebrew manuscripts were found near Qumrân and other ancient sites in the wilderness of Judea

W of the Dead Sea (*see* DEAD SEA SCROLLS). Although most of these materials are leather, some are papyrus. The Aramaic papyri consist chiefly of documentary texts dating from the First and Second Jewish Revolts. The Hebrew papyri derive largely from the same periods and contain several remarkable letters of Simon bar Cochba, the legendary leader of the Second Jewish Revolt against Rome. These finds near the Dead Sea include the oldest papyrus found outside Egypt, a Hebrew letter dated *ca.* 750 B.C. found in a cave of Wâdī Murabba'ât (P. Mur. 17). This letter, reused in antiquity to record a list of contributors, belongs to the period of King Uzziah's economic activity in the Judean desert and the Negeb (2 Ch. 26:2, 7, 10).

V. Other Papyri.–*A. Coptic.* Coptic papyri have made special contributions to early Christian literature. C. Schmidt published a considerable Coptic fragment of the Acts of Paul and a Coptic (Akhmîmic) codex of 1 Clement, almost complete. Texts of Psalms, Proverbs, and homilies were discovered at the White Convent near Panopolis (Akhmîm); indeed, biblical papyri in Coptic are fairly numerous and are being rapidly enriched by such discoveries as the Bodmer Papyri III (John and Genesis), XVI (Exodus), XVIII (Deuteronomy), and XIX (Matthew and Romans). The library of Coptic papyrus codices found near Nag Hammadi in 1945 is a remarkable collection of Jewish and Christian gnostic writings (*see* NAG HAMMADI).

B. Arabic. Arabic papyri, from the period after the Arab conquest, A.D. 640, first began to appear from Egypt in 1825 when three pieces were brought to Paris and published by S. de Sacy. Not until the great papyrus finds of 1877-1878, however, did any considerable number of Arabic papyri find their way into Europe. The chief collections are at Vienna (Rainer Collection), Berlin, and Cairo. Large archives of Arabic papyri were discovered at the turn of the century in Aswân (Syene). A few fragments of documentary and magical Arabic papyri from the 10th cent. were found among the manuscripts in Wâdi Murabba'ât.

C. Latin. Latin papyri are comparatively rare. Of the one hundred literary papyri that have been published, Vergil's *Aeneid* is most frequent, with the works of Cicero next best attested. Latin papyri, chiefly after Diocletian, were discovered in Egypt, although some texts came to light at Herculaneum, Dura-Europos in Mesopotamia, and Palestine. The literary texts are accompanied by Latin-Greek glossaries, lexica, and grammars reflecting the schools of Roman Egypt. Nonliterary Latin papyri have become especially valuable in elucidating Roman military and legal traditions.

VI. Contribution to Biblical Study.–The papyri have made a valuable contribution to textual criticism of both the OT and the NT. For early Christian literature their testimony has been of unusual interest (the Oxyrhynchus Logia and Gospel fragments). Both literary and documentary papyri have illuminated the religious and cultural environment of the Bible: parallel structures and expressions in the papyri have made biblical literary forms clearer.

A series of uncial MSS from the six centuries preceding the Codex Vaticanus bridges the gap between what were the earliest uncials and the hand of the inscriptions and allows more accurate dating of uncial MSS. Minuscule or cursive hands, too, so common in the NT MSS of the 10th and later cents., appeared in a new light when such writing was seen not as a late invention arising out of the uncial but as the ordinary hand, as distinguished from the literary or book hand, that had existed side by side with the uncial from at least the 4th cent. B.C. *See* WRITING.

The philological contribution of the documentary papyri has been considerable. Like the NT writings, they reflect the common as distinguished from the literary language of the times, and words that had appeared exceptional or unknown in Greek literature have been shown to have been in common use. The problems of NT syntax are similarly illuminated.

Specific historical notices sometimes light up dark points in the Bible. For example, a British Museum decree of Gaius Vibius Maximus, prefect of Egypt (A.D. 104), ordered all who were out of their districts to return to their homes in view of the approaching census (cf. Lk. 2:1-5). Most important of all is the contribution of the papyri to a sympathetic knowledge of ancient life. They present a veritable gallery of biblical characters. A strong light is sometimes thrown upon the social evils of the time, of which Paul and Juvenal wrote so sternly. The child, the prodigal, the thief, the host with his invitations, the steward with his accounts, the thrifty householder, the soldier on service receiving his *viaticum* or retired as a veteran upon his farm, the husbandman, and the publican, are met at first hand in the papyri, which often they themselves had written. The worth of this material for the historical interpretation of the Bible is very great.

I. OT.–Although "parable" occurs only twice in the RSV OT, Heb. *māšāl* occurs thirty-nine times with a broad semantic range. It can mean "byword" or "taunt" in an expression of irony or contempt (1 K. 9:7; Job 17:6; Ezk. 14:8); "proverb," either as a short popular saying (1 S. 10:12; Ezk. 18:2) or as a concise word of wisdom (1 S. 24:13; Prov. 1:1; 10:1; 25:1); "allegory" (Ezk. 17:2; 24:3); or prophetic or didactic "discourse" (Nu. 23:7; Job 27:1). In many instances the *māšāl* draws much of its force and relevance from its historical context, confronting its hearers with a comparison or figurative saying that sheds new light on a contemporary situation, often a crisis. In Ps. 78:2a "parable" parallels "dark sayings" in v. 2b; the psalmist declares that he will reveal the hidden significance of Israel's history. In Hos. 12:10 (MT 11) "I . . . gave parables" translates the piel of *dāmâ*, "make comparisons," which in this verse parallels the "visions" that the Lord "multiplied."

Several OT narratives, not specifically labeled as *mᵉšālîm*, form close parallels to Jesus' parables. Some are actually fables, involving talking plants and animals (usually as symbols for kings and their nations — Jgs. 9:8-15; 2 K. 14:9f.); others more closely approximate the nature parables of Jesus (Isa. 5:1-7, which probably forms the background for Mk. 12:1-9 par.; and Ezk. 17:22-24; cf. Mk. 4:32). By far the closest parallel in form is Nathan's parable of the ewe lamb, which convicted David of his sins against Uriah and Bathsheba (2 S. 12:1-7); the point is grasped only when the main point of comparison is recognized at the end of the parable.

II. Intertestamental Period.–In Judaism *māšāl* and its Aramaic equivalent *maṯlā'* took on an even wider variety of meanings: "parable, similitude, allegory, fable, proverb, apocalyptic revelation, riddle, symbol, pseudonym, fictitious person, example, theme, argument, apology, refutation, jest" (Jeremias, p. 20). In the Apocrypha *mᵉšālîm* were predominantly proverbs, especially in the Wisdom of Solomon and Sirach. In the RSV "parable" occurs in Sir. 3:29 as the object of a wise man's rumination; in 39:2f. as a parallel to discourses and proverbs, with "subtleties" and "obscurities" to interpret; and in 47:15, 17, along with riddles, songs, proverbs, and interpretations, as characteristic of Solomon's wisdom. 2 Esd. 8:2f. presents a similitude remarkably parallel to synoptic teaching in both form and content, comparing the small amount of gold dust out of all the earth's clay to the few who will be saved out of all God's creation. 2 Esd. 4:47, on the other hand, uses "parable" to refer to a symbolic vision that the Lord reveals to His seer. Such visions recur regularly in the Pseudepigrapha, especially in the apocalyptic literature. The most famous collection of these is 1 En. 37–71, known as the Parables or Similitudes of Enoch. The highly symbolic and allegorical revelations are quite different from the parables of Jesus; but they do provide important background for the symbolism of NT eschatology and (if their pre-Christian origin can be maintained) for Jesus' use of the title "Son of man." Gk. *parabolē* in the LXX always reflects an underlying Heb. *māšāl*, so "parable" by NT times had clearly inherited a broad semantic range. In classical Greek literature, that range was much narrower; Aristotelian definition limited "parable" to a comparison of a known to an unknown object that made exactly one main point (*Rhet.* 2.20).

III. Jesus' Ministry.–All the RSV NT uses of "parable" occur in the Gospels. Jesus' mastery of the art of telling parables is demonstrated by the complete lack of any attempt by any other NT character or writer to imitate Him. Even in post-NT Christian literature, only a few narratives receive the label "parable," and these (e.g., Shep. Herm. Sim. 1–9) resemble the similitudes of intertestamental apocalyptic more than the teaching of Jesus. The criterion of "dissimilarity" has thus often been invoked to establish the authenticity of the parables as the core of Jesus' teaching, even by those who doubt the genuineness of many of the Gospel sayings attributed to Him.

A. Synoptic Gospels. 1. History of Interpretation. Several different trends of interpretation have dominated successive periods of church history; current scholarship is trying to consolidate and synthesize the contributions of each of these trends.

a. Epochs in Research. Although distinctions can be drawn between the periods of the early church fathers, the Middle Ages, and the Reformation and its legacy (Stein, pp. 42-52), the dominant form of parable interpretation during the eighteen centuries from *ca.* 100 to 1900 was "allegorizing" (*see* ALLEGORY). Symbolic significance was discovered for as many details as possible in each parable. The most famous example of this method is Augustine's interpretation of the parable of the Good Samaritan (Lk. 10:25-37); the man going down from Jerusalem was Adam leaving the city of heavenly peace; the robbers beating him were the devil and his angels, persuading the man to sin; the priest and the Levite stood for the Law and the Prophets; the Samaritan was Christ; the oil and wine, comfort and exhortation; the beast, the body of Christ; the inn, the Church; and the innkeeper, the apostle Paul (*Quaestiones Evangeliorem* ii.19). To be sure, commentators debated the significance of such details, but all agreed that hidden meanings were present.

Around the turn of this century A. Jülicher's magisterial *Die Gleichnisreden Jesu* broke with these centuries of tradition, arguing that, as in classical Greek usage, each parable may have only one *tertium comparationis* (point of comparison). He also introduced a threefold distinction between the similitude (Ger. *Gleichnis*), a short present-tense comparison; the parable (*Parabel*), a complete story, usually in past tense; and the example-story (*Beispielerzählung*), a parable in which the "moral" is more secular than religious (Jülicher, I, 112-17). Again, commentators disagreed concerning the main point of a given parable — usually on the basis of their differing understandings of Jesus' eschatology (*see* ESCHATOLOGY; the history of interpretation described there closely parallels that of the parables) — or concerning which parables fell into which of the three categories, but the majority of twentieth-century scholars have preferred Jülicher's principles to those of his predecessors. The parable of the Good Samaritan, e.g., is now often viewed as an example-story of which the main point is to imitate the Samaritan's neighborliness.

The most famous pioneer of form criticism (*see* CRITICISM III), R. Bultmann, initiated a complementary approach that examined tendencies in the oral transmission of teachings like those attributed to Jesus in the Synoptics.

The typical form of a parable includes conciseness of narrative and numbers of characters, the use of direct speech and soliloquy, climactic repetition, and the law of end-stress (*HST*, pp. 188-192). J. Jeremias, whose work remains the most important study of the parables still in print, built on both Jülicher's and Bultmann's insights to formulate ten "laws" governing the "transformation" of Jesus' original words in early Church tradition and by the Evangelists' redaction: (1) translation into Greek; (2) changing imagery to communicate better with a Hellenistic audience; (3) embellishment of details; (4) introduction of themes from the OT and folk literature; (5) addressing to the Church parables originally intended for Jesus' opponents; (6) a shift from eschatology to exhortation; (7) application to missionary contexts; (8) allegorical interpretation; (9) collecting and conflating parables, and (10) inventing settings and generalizing conclusions where none was provided in the tradition (Jeremias, pp. 113f.). Returning to the example of the Good Samaritan, most form and redaction critics consider Lk. 10:25-29 and 37b an artificial context that did not originally belong to the parable itself.

Recent parable research has emphasized literary more than historical analysis. The "new hermeneutic" (*see* INTERPRETATION, HISTORY OF IV.H.3) highlights the power of Jesus' parables and enjoins expositors to give their attention not to intrepreting them so much as to recreating the "language event" (*Sprachereignis*) that Jesus' original audiences experienced (Linnemann). Structuralism applies the categories of modern linguistics to analyze "surface" and "deep" structures of the texts, based on, e.g., the type of plot (see Via's excellent work on "comedy" and "tragedy"), the functions of the various "actants" (roughly equivalent to "characters"), and the types of opposition and resolution in the various "sequences" of the narratives (Patte). K. E. Bailey's recent works call attention to often unnoticed parallelism (esp. chiastic or inverted parallelism) within the various parables. The result of all these literary analyses for the example of the Good Samaritan is that a good case can be made for the historical unity and authenticity of all of Lk. 10:25-37, for the narrative as a pure parable and not an example-story, and for the main point being that even one's enemy is one's neighbor (see Bailey, *Poet*, pp. 72-74; Funk, pp. 29-34; P. Jones, p. 228).

b. Current Syntheses. Many Gospel passages closely match the form of the principal narrative parables, even though they are not specifically introduced as parables (see below). Conversely, Luke can apply the term *parabolḗ* even to a saying as short as "Physician, heal yourself" (4:23). In Lk. 4:23 the RSV translates *parabolḗ* as "proverb," while the saying labeled a "parable" in 6:39 ("Can a blind man lead a blind man? Will they not both fall into a pit?") is not much more than a proverb. Clearly, the word "parable" as used by almost all interpreters includes both more and less than what the Synoptics specifically call parables (for an appeal to abandon this approach, see Sider). C. H. Dodd's classic definition remains unsurpassed: "a metaphor or simile drawn from nature or common life, arresting the hearer by its vividness or strangeness, and leaving the mind in sufficient doubt about its precise application to tease it into active thought" (Dodd, p. 16). This definition can be overly pressed; the parables contain key "atypical features" (Huffman) as well, which need not be jettisoned as inauthentic. Twentieth-century interpreters often forget the shock value of a Samaritan hero, a justified tax-collector (Lk. 18:14), or a father running to welcome his prodigal son (15:20).

Perhaps no issue has dominated parable research as much as the relationship between parable and allegory. Jülicher's reaction against centuries of abuse was an overreaction; the Hebrew as well as the Greek background for *parabolḗ* must be retained. More scholars have come to recognize that Jesus' parables often have important details with hidden symbolism, and that the mistake of past interpreters was more one of anachronistic allegorizing than of allegorical interpretation as such (see esp. Klauck). Especially where component metaphors allude to well-known OT passages and stock Jewish symbols, the interpreter must be open to a partially allegorical approach, such as Jesus Himself employed for the parables of the Sower (Mk. 4:3-9, 14-20 par.) and of the wheat and tares (Mt. 13:24-31, 37-43). (On the authenticity of this type of interpretation, which has often been challenged, see Payne.) In fact, according to purely literary criticism, any "extended metaphor in narratory form" is an allegory (Boucher, p. 20); the only narrative parables of Jesus that are not allegories are His example stories, which are extended synecdoches.

Another key issue in interpreting parables is their purpose. Clearly Jesus used the parabolic form of speech to illustrate and clarify the nature of the kingdom of God. Yet in Mk. 4:11f., He tells His disciples that "for those outside everything is in parables; so that they may indeed see but not perceive, and may indeed hear but not understand; lest they should turn again, and be forgiven." Apparently Jesus intended to conceal as well as to reveal. This passage has regularly been labeled a creation of Mark, or of church tradition before him, or at least as out of context. Of those who accept its authenticity in this context, some have tried to avoid the problem of its apparent meaning by explaining the *hína*-clause ("so that . . .") as result rather than purpose, or as part of the OT quotation on which it is based (Isa. 6:9f.); but neither of these suggestions evades the force of the *mḗpote*-clause ("lest . . ."). It is best to allow the full weight of these words to be felt. Jesus' teaching confronted people with radical demands, and not all were willing to comply. Some followed Him in discipleship, but others were actually driven further from the Kingdom (cf. Mt. 12:34f. par.). The key is not in the meaning of "so that" but in the phrases "see but not perceive, . . . hear but not understand." It is not intellectual but volitional blindness and deafness that is in view (cf. Lk. 20:19). Klauck puts it best: "they understand the provocative claim of the parables very well, but they are not prepared to accept it. For Mark, Jesus' speaking in parables is not a riddle as such. What is perplexing is the behavior that it calls forth — that man can see salvation personified and nevertheless not come to conversion and belief" (p. 251).

Finally, many of Jeremias's "laws of transformation" have been questioned. The interpreter need not feel misled by the audience or interpretation assigned to the parable by the Synoptist (Blomberg, *Trinity Journal*, N.S. 3 [1982], 11-14). Although Jesus' exact words (*ipsissima verba*) have been altered, as a comparison of Gospel parallels demonstrates, the essential meaning or authentic voice (*ipsissima vox*) behind them has not been changed. (For the best, most comprehensive discussion of each Synoptic parable and its parallels with defense of this viewpoint, see Kistemaker.) The Evangelists' differing redactional styles and interests become clearly visible in their renditions of the double- and triple-tradition parables (see Carlston), but their revisions are mostly paraphrastic, explanatory, and abbreviating in nature. The most drastic differences and apparent distortions often come between pairs of parables that may not be variants of one original after all, but two separate narratives from different occasions in Jesus' life

(e.g., Mt. 22:1-14 and Lk. 14:16-24; Mt. 25:14-30 and Lk. 19:12-27; Mt. 18:12-14 and Lk. 15:4-7; see Blomberg, *WTJ* [1984]).

2. Classification. Of the Synoptic passages specifically called parables, some are really simple metaphors or comparisons rather than genuine "parables" as the word is generally used: Mt. 15:13f. par. (the blind leading the blind); Mk. 3:23-27 (plundering the strong man's house); 7:14-16 (on defilement); Lk. 5:36-39 (wineskins and garments); and 21:19-31 (the budding fig tree). Here the influence of Heb. *māšāl* broadens the application of the more technical Gk. *parabolḗ*. Many other teachings of Jesus fall into this broader category, e.g., the lamp and bushel (Mk. 4:21 par.), savorless salt (Mk. 9:50), weather signs (Lk. 12:54-56 par.), the city on a hill (Mt. 5:14), and the lamp of the body (Mt. 6:22 par.). (For longer lists, see Hunter, *Parables*, pp. 12lf.; Perkins [who calls these "parables derived from proverbs"], pp. 10-12; *DNTT*, II, 749-751.)

The remaining occurrences of "parable" appear with full narratives of the type usually associated with this term. These have often been classified according to content, e.g., the "coming," "grace," "men," and "crisis" of the Kingdom (Hunter, *Parables*); or the "Kingdom as present," "Kingdom as demand," "God of the parables," and "final judgment" (Stein). More natural groupings arise out of recent literary and structural analyses, as in Crossan's threefold classification of parables of "advent," "reversal," and "action," or Via's twofold comic/tragic division. Special studies have also analyzed such subgroups as "servant" or "parousia" parables (Weiser, Schneider). M. D. Goulder has even grouped the parables by Gospel, arguing that the narratives in Matthew and Luke are so shaped by those Evangelists' own distinctive styles and interests that only the narratives in Mark are authentic. A better case can be made for seeing earlier (pre-Markan) collections of similar parables as sources for the Evangelists' redactions (cf. Mk. 4; Mt. 13; parts of Lk. 9:51–18:34; see Blomberg, "Midrash"). The following classification combines the insights of several of these methods.

"Nature parables" include the Sower (Mk. 4:1-9 par.), the seed growing secretly (4:26-29), the mustard seed (4:30-32 par.), and the leaven (Mt. 13:33 par.). These all illustrate the remarkable growth of the Kingdom from small beginnings. The most elaborate of these is the first. Theologians have wrestled with the significance of the four soils, especially for the doctrine of the "perseverance of the saints," but it is unlikely that the imagery can resolve the debate. The parable of the fig tree (Lk. 13:6-9 also employs agricultural imagery, but deals with potential death rather than growth. As a stock symbol for Israel and its leaders, the fig tree graphically depicted the impending judgment on the Jews who did not repent.

"Discovery parables" include the hidden treasure (Mt. 13:44), the pearl of great price (vv. 45f.), and the dragnet (vv. 47-50). These tie in closely with Matthew's collection of nature parables, but they make a slightly different point: the value of God's kingdom is so great that its discovery leads wise people to abandon all for its sake.

"Contrast parables," of which there is a large number, compare one or two examples of negative attitudes or actions related to God's kingdom with a positive example — or vice versa. Those with "comic" (happy) endings include the lost sheep, coin, and son (Lk. 15:4-32 — although the last of these has an open-ended conclusion as the father awaits the reaction of the prodigal's older brother), the Good Samaritan (10:25-37), and the Pharisee and publican (18:9-14). All illustrate God's surprising mercy for the lost, outcast, and dispossessed. Those with "tragic" (usually judgmental) endings include the two builders (Mt. 7:24-27 par.), the faithful and unfaithful servants (24:45-51), the talents/pounds (25:14-30; Lk. 19:11-27), the unforgiving servant (Mt. 18:23-35), and the rich man and Lazarus (Lk. 16:19-31; this parable has spawned numerous unjustified descriptions of the afterlife, and the interpreter must avoid confusing the worlds depicted here with reality; Jesus' imagery is probably borrowed from Egyptian and Jewish folklore; see *TDNT*, I, 146-49). In several instances, contrast parables balance positive and negative examples so evenly that it is difficult to assign emphasis to either (the two sons, Mt. 21:28-32; the two debtors, Lk. 7:40-43; the wheat and tares, Mt. 13:24-30; the ten virgins, 25:1-13). Although it is usually possible to identify one overarching point in a contrast parable, this point is often elaborated best under two or three subheadings corresponding to the main characters or groups of characters portrayed. Thus the parable of the prodigal teaches not only the joy of repentance but also God's welcome for sinners, and it further warns against the hard-heartedness that resents God's mercy for others.

Contrast parables can be divided not only into comic and tragic, but also into "expected" and "unexpected" types. The reward and punishment of the faithful and unfaithful servants surprised no one, but the justification of the publican and condemnation of the Pharisee upended all social convention. Several other parables that focus on a single character or group also present surprising switches. These "reversal parables" include the great dinner and wedding feast (Lk. 14:16-21 and Mt. 22:1-14), in which the invited guests' refusal excludes them from the banquet; the wicked husbandmen (Mk. 12:1-12 par.), in which the (presumably Jewish) tenants' rejection of their landlord's servants and son leads to the vineyard being leased to others (Gentiles?); the laborers in the vineyard (Mt. 20:1-16), where last-minute workers receive a full day's wage; the rich fool (Lk. 12:16-21); and the places at table (Lk. 14:7-11).

"A fortiori parables" refer to those that employ the logic of "how much more . . . ?" or "from lesser to greater" (Heb. *qal wāḥômer*), which if missed can result in grave misinterpretation. God is *not* reluctant to give like the sleeping man in the parable of the friend at midnight (Lk. 11:5-8); Jesus' appended comments make this clear: "how much more will the heavenly Father give . . . ?" (v. 13). The same logic is implicit in the parables of the unjust judge (Lk. 18:1-8), the unjust steward (Lk. 16:1-13; it is only the shrewdness that the master praises), the unprofitable servants (17:7-10), the tower-builder and warring king (14:28-33), the asking son (11:11-13), and the animals in the well (14:5). Several of these shorter parables share the additional feature of interrogative form, introduced by *tís ex hymôn* ("which one of you [would do such and such]?"), which expects an emphatically negative response. The a fortiori logic is thus made clear: if even human beings would not act in a certain evil or foolish way (or conversely, if they would act positively), how much more can God be depended on to behave righteously!

B. Gospel of John. The word "parable" does not occur in John, but "figure" in 10:6; 16:25, 29 translates *paroimía* ("riddle" or "wise saying") — a term used by the LXX in several instances for *māšāl*. These Johannine uses apply the term to Jesus' metaphors of the Good Shepherd (10:1-5) and the woman in travail (vv. 20-24), which closely parallel the shorter Synoptic similitudes. A. M. Hunter (*John*, pp. 78f.) has in fact identified thirteen "parables" in John (3:8, 29; 4:35-38; 5:19-20a; 8:35; 10:1-5; 11:9f.; 12:24, 35f.; 13:1-15; 14:2f.; 15:1f.; 16:21). None of these approximates in form the longer narrative parables in the Synoptics, but

Jesus' characteristic style of teaching is still discernible. The Johannine "parables" provide an important link with Synoptic tradition for establishing the historical continuity between the Fourth Gospel and its predecessors.

C. Gospel of Thomas. The main extracanonical source for parables attributed to Jesus is the Gospel of Thomas (*see* APOCRYPHAL GOSPELS V.J.1). Of its 114 sayings, over half have parallels in the NT Gospels, including eleven of its thirteen parables: 8 (dragnet), 9 (sower), 20 (mustard seed), 57 (wheat and tares), 63 (rich fool), 64 (great dinner), 65 (wicked husbandmen), 76 (pearl of great price), 96 (leaven), 107 (lost sheep), and 109 (hidden treasure). Two previously unknown parables compare the Kingdom to a woman with a broken jar of meal that loses its contents without her knowledge as she walks home (97; a warning against taking "salvation" for granted?) and to a would-be assassin who practices sword thrusts into the wall of his house before leaving to slay his monarch (98). This latter parable closely parallels Lk. 14:28-33 on counting the cost, and many scholars consider both new parables authentic. The eleven parables with NT parallels have incited more controversy. Two basic approaches compete for acceptance. One views Thomas as having preserved versions more original than those found in the Synoptics, because its versions are consistently shorter and simpler. Others find in Thomas clear signs of dependence on the canonical Gospels and of Gnostic redaction, and they attribute Thomas' accounts to at least a second-century date. Arguments for the latter view generally appear stronger (see Lindemann; Blomberg, "Thomas").

IV. The Rest of the NT.–The term "parable" does not occur elsewhere in the RSV NT, but Gk. *parabolē* does reappear twice. In He. 9:9 (lit. "a parable") and 11:19 (lit. "in a parable") the RSV translates the Greek as "symbolic" and "figuratively speaking," respectively. The metaphor in 9:9 compares the tabernacle and the sacrifices to the "present age," which is passing away; 11:19 compares Isaac's reprieve from slaughter to the resurrection of the dead.

V. Rabbinic Literature.–Literally hundreds of passages in the Midrashim, Tosefta, and Talmuds begin with the label *māšāl*, and they often use introductory formulas identical to those found in the Synoptics ("it is like . . . ," "to what shall it be compared . . . ?" etc.). Similar imagery also affords sometimes striking parallels with Jesus' parables. (Cf., e.g., T.B. *Shabbath* 153a [about a king who announced an impending banquet and the division between servants who clothed themselves for the festivity and those who did not] with Mt. 22:1-14 and 25:1-10. Those who argue against the authenticity or unity of composition of these Synoptic parables might need to reconsider.) The rabbinic *m^{e}šālîm* make plentiful use of stock symbols such as father, king, judge, and shepherd for God; vineyard, vine, and sheep for God's people; the enemy for the devil; harvest and grape gathering for the final judgment; and weddings, feasts, and festal clothing for the eschatological consummation. They also regularly conclude with explanatory comments. These factors alone should caution interpreters against refusing to see similar "allegorical" elements and "generalizing conclusions" in Jesus' parables as authentic. It is simply false to claim that a master storyteller need never interpret his parables; the psychological states of his audience regularly require it (see Magass).

On the other hand, the parables of the early Rabbis (Tannaim) reveal significant differences from those of Jesus. The most important difference is that parables in the rabbinic literature almost always illustrate or expound a biblical (OT) text that is mentioned in the introduction or conclusion of the narrative. The NT parables, however, almost never function in this way; Jesus came not to exegete Scripture, but to reveal the new age of God's kingdom.

C. L. BLOMBERG

PARACLETE. The transliteration of Gk. *paráklētos*, a noun that occurs four times in John's Gospel (14:16, 26; 15:26; 16:7, all rendered "Paraclete" in the NAB). The word has been translated as "Comforter" (AV), "Counselor" (RSV, NIV), "Advocate" (JB), "your Advocate" (NEB), and "Helper" (Today's English Version). Its only other NT occurrence is in 1 Jn. 2:1, where it is rendered "advocate" (AV, RSV), "intercessor" (NAB), or "one to plead our cause" (NEB). In John's Gospel Jesus uses *paráklētos* as a designation of the "Holy Spirit" (14:26) or "Spirit of truth" (14:16; 15:26; 16:7), while 1 Jn. 2:1 applies the term to Jesus Himself, now in the presence of God the Father.

The first NT occurrence of *paráklētos* refers to the Spirit as "another Paraclete" (Jn. 14:16, NAB), apparently in relation to Jesus Himself. The meaning is either that Jesus in His earthly ministry was actually the first "Paraclete" or that He is promising "another Person . . . as your Paraclete" without implying that the title belonged to Him first (cf. His cryptic references to "another" in Jn. 5:32, 42). Although 1 Jn. 2:1 refers to Jesus as *paráklētos* specifically in His exalted state, it can be assumed that *paráklētos*, like the accompanying term *díkaios* ("righteous one"), applies to the whole scope of Jesus' ministry both

before and after His resurrection. Whether or not Jesus explicitly applied the term to Himself, He clearly used it to designate the Spirit as His successor and continuing representative on earth after His departure.

The noun *paráklētos* is derived from the verb *parakaléō*, "call for," "make an appeal," "comfort," or "counsel." Such noun formations are normally understood in a passive sense, i.e., "one who is called for or summoned" (cf. Lat. *advocatus* in the Vulg. of 1 Jn. 2:1). In John's Gospel the Paraclete is introduced precisely as one summoned, a messenger sent from the Father in answer to Jesus' prayer (Jn. 14:16; cf. also v. 26; 15:26; 16:7). These considerations tend to justify such translations as "Advocate," "Helper," or "Mediator." But because *parakaléō* is an important verb in the NT, some scholars have argued that the verbal noun has an active sense: "one who appeals, counsels, or consoles"; hence the popular translations "Comforter" or "Counselor."

Undoubtedly the Paraclete in John's Gospel does carry out some functions that are aptly expressed by the verb *parakaléō*. Yet the Paraclete's role is best understood not by sketching the range of meaning of *parakaléō* (which does not occur in the Johannine writings) but by noting the verbs actually used by John to describe what the Paraclete will do:

(1) In relation to Jesus' disciples, the Paraclete will *be with* them forever (14:16f.) to *teach* and *remind* them of what Jesus has already taught (v. 26). "He" (the masculine article and pronoun indicate personality, not gender) will *testify* to them, and through them to the world, about Jesus (15:26f.). He will *guide* them into all the truth and will *glorify* Jesus by *speaking* what He hears from the Father. He will even *predict* things to come (16:13-15).

(2) In relation to the world, the Paraclete will act as God's advocate, to *convict* the world of sin and *prove it wrong* in its standards of justice and judgment (16:8-11).

Because a survey of the predicates describing the Paraclete's activity provides a better understanding of His nature than an analysis of the term *paráklētos* itself, the term's "background" in Jewish and Hellenistic thought is not of great significance for its NT usage. There is in fact no real conceptual background for Jesus' distinctive use of *paráklētos* — neither in the figure known as the *Yawar*, or "Helper," in the late Gnostic Mandean literature (as Rudolf Bultmann and others have proposed), nor in Hellenism, nor in the OT, nor in Jewish apocalyptic or rabbinic literature, nor in the writings of the Qumrân community. None of these could provide the conceptual background for the use of *paráklētos* in John's Gospel, for the Paraclete is the successor of Jesus. The Paraclete's nature and function presuppose the historical career of Jesus and depend on that career for their meaning.

One does find in Jewish literature, however, the conceptual background for at least two specific elements of Jesus' teaching about the Paraclete. (1) The Scriptures provide several examples of two successive figures with the second either completing or fulfilling the work of the first, e.g., Moses and Joshua, Elijah and Elisha, Moses and the "prophet like Moses" (Dt. 18:15-18), John the Baptist and "the Coming One" (as John expected Him), John the Baptist and Jesus (as He actually appeared in history). Sometimes the first is the "greater," while at other times the second is greater; sometimes there are simply parallels between the two, while other examples present contrasts as well. In some cases (though in different ways) the Spirit of God provides the link between the two figures (Dt. 34:9; 2 K. 2:9, 15; cf. Mk. 1:8). (2) Late Jewish angelology provides parallels for the function of angels or "spirits" as revealers (in Jewish apocalyptic literature) and as defenders of God's people (in the Qumrân documents, sometimes with the designation "Spirit of truth").

Nowhere except in the Gospel of John do these two elements come together. As in the case of John the Baptist and "the Coming One," a flesh-and-blood historical person (Jesus) is to be succeeded by a supernatural figure (the Paraclete). But what makes the latter succession unique is that Jesus never says, as John does, "He who comes after me ranks before me" (Jn. 1:15) or "is mightier than I" (Mk. 1:7). Jesus does not testify about the Paraclete but promises that the Paraclete will testify about Him. Although Jesus does not specifically address the issue of relative greatness, His own role is the primary one while the Paraclete's role is derivative ("He will glorify me, for he will take what is mine and declare it to you," Jn. 16:14).

The link between the Spirit and the historical Jesus is stronger in these passages than in similar passages in which the term *paráklētos* does not occur: e.g., Jesus' promise of the Spirit to His disciples in times of persecution (Mk. 13:11; Mt. 10:19f.; Lk. 12:11f.), the references in 1 Jn. 2:20, 27, to an anointing (*chrísma*) from God given to teach the disciples and guard them against lies and false doctrine, and the reference in 2 Jn. 2 to "the truth which is in us and will be with us forever" (cf. 1 Jn. 5:6, "the Spirit is the truth"). "Paraclete" as a title for the Holy Spirit is limited to passages in which the Spirit functions specifically as Jesus' successor and testifies specifically about Jesus. The term seems to have been applied first to Jesus — either by Himself or by His disciples — but only as an informal designation of His role (*paráklētos* without the definite article, Jn. 14:16; 1 Jn. 2:1), not as a title or technical term (*ho paráklētos*, "the Paraclete," in all other NT uses). The formal title was reserved for the Spirit; once Jesus had introduced the "Spirit of truth" as *állos paráklētos*, the titular form prevailed in the Johannine farewell discourses. The effect was to emphasize both the Spirit's personality and the Spirit's continuity with Jesus.

Other NT writers did not use *paráklētos*, but they occasionally made a similar point by using phrases such as "the Spirit of Jesus" (Acts 16:7), "the Spirit of Jesus Christ" (Phil. 1:19), or "the Spirit of Christ" (Rom. 8:9; 1 Pet. 1:11; cf. 2 Cor. 3:17). In the figure of the Paraclete more than anywhere else, the Spirit of God wears a human face, and it is the face of Jesus.

PARADISE par'ə-dīs [Gk. *paradeisos* (Lk. 23:43; 2 Cor. 12:4; Rev. 2:7; 2 Esd. 4:7; 6:2; 7:36, 123; 8:52)]; NEB also GARDEN (Rev. 2:7). Paradise is a Persian loanword (*pairi-daēza*) which was taken over by Hebrew (*pardēs*), Greek, and Aramaic (*pardêsā'*). The Persian word originally meant "an enclosure" and came to mean "a park surrounded by a wall." The loanword thus came to mean "park, garden," often with the idea of being surrounded by a wall. The three OT occurrences (Neh. 2:8; Eccl. 2:5; Cant. 4:13) follow this secular meaning. Xenophon first used the Greek word to refer to the parks of Persian kings and their nobility. By the 3rd cent. B.C. *parádeisos* was a general term for "park."

The LXX used *parádeisos* forty-seven times, translating four Hebrew words (*pardēs, gan, ganâ, 'ēpen*). While the LXX sometimes used *kêpos* to translate *gan*, in Gen. 2 and 3 it used *parádeisos* all thirteen times. Thus, the garden of Eden became increasingly identified in the Jewish mind with *parádeisos*. In addition to these thirteen uses,

the LXX also used *parádeisos* another seven times (3 in Isaiah; 4 in Ezekiel) to refer to a garden of God. These twenty uses of *parádeisos* show a significant shift from secular to religious meaning.

Parádeisos developed into a specific eschatological concept in the Jewish intertestamental writings, especially in the apocalyptic literature. The starting point for all Jewish thinking about paradise, under the influence of the LXX, was the garden of Eden. A recurring theme in the apocalyptic literature is the return of the beginning in the last days (as God says in Barn. 6:13, "Behold, I make the last things as the first"). Thus a natural development of the concept of paradise occurred.

The identification of the future paradise with Eden became widespread in the apocalyptic literature. The first instance is T. Levi 18:10 (probably 2nd cent. B.C.; cf. Isa. 51:3 and Ezk. 36:35 for the closest OT parallels). *Parádeisos* shortly became a technical term. This idea that the future paradise is identical with the original paradise led to the further notion that paradise must exist now. Thus paradise was seen not only as a future home for the righteous, but as existing in the present, between creation and the final age, although now in hidden form (first found in 1 En. 60:7f., 23; 61:12; 70:4).

There are three stages of the one paradise: the ancient garden, the present paradise which is hidden, and the future paradise. *Parádeisos* in the apocalyptic literature usually refers explicitly to one of these three stages. The word is often used of the present intermediate state of the righteous dead, best defined as the home or abode of the departed righteous (Apocalypse of Moses 37:5; Testament of Abraham 20A). But this intermediate resting place is also their future home in the final age, i.e., the future paradise of the final consummation of blessedness (T. Levi 18:10f.; T. Dan 5:12; 1 En. 25:4f.; 2 Esd. 7:36, 123; 8:52).

Another development also took place. Now the departed righteous no longer dwell in Sheol (*šᵉ'ôl*) but in paradise. Only the ungodly are in Sheol or Hades (*hádēs*). Actually, both the old view (all the dead are in Hades) and the new view (only the ungodly dead are in Hades) can be found in first-century Jewish literature (cf. Josephus *Ant.* xviii.1.3 [14]; *BJ* ii.8.14 [163]; iii.8.5 [375]; Lk. 16:19-31).

The NT concept of paradise is dependent on the Jewish intertestamental use. The word occurs three times, always of an eschatological paradise and never of a garden or park as in secular Greek.

Parádeisos is found once in the Gospels. Jesus says to the thief on the cross, "Truly, I say to you, today you will be with me in Paradise" (Lk. 23:43). The thief asks Jesus to remember him at the parousia, i.e., "when you come in your kingly power" (23:42). Jesus responds with the gracious and surprising "*amen*" saying. The forgiveness of the new age that God now provides through Christ is unlimited. Clearly, this use of *parádeisos* reflects the Jewish apocalyptic idea of a present, hidden paradise. The "today" reinforces the idea that Jesus is speaking of an intermediate abode of the righteous. Although *parádeisos* is not used, this same understanding of existence after death can be seen in Lk. 16:19-31 where the intermediate abode of the righteous (Abraham's bosom, v. 22) and the ungodly (Hades, v. 23) are found together (cf. 2 Esd. 7:36).

All Jesus tells the thief about existence in paradise is that it will entail fellowship with Him. This may seem to be difficult in the light of other NT passages that suggest that Jesus descended into Hades before His resurrection (Mt. 12:40; Acts 2:27, 31; Rom. 10:7; Eph. 4:8-10[?]; 1 Pet. 3:19). However, this difficulty comes from pressing the language of apocalyptic imagery too far and "is more imaginary than real" (I. H. Marshall, *Gospel of Luke* [*NIGTC*, 1978], p. 873). The saying should probably be seen in the light of T. Levi 18:10f., which says that the Messiah "will open the gates of Paradise . . . and give the saints to eat of the tree of life." Jesus, acting as the Messiah, opens paradise for His followers through His death and resurrection. The gates are now open and Jesus assures the thief of immediate entry.

In 2 Cor. 12:4 Paul also uses *parádeisos* of the present, hidden home of the departed righteous. In the context of reluctant boasting to defend his apostleship, Paul speaks of his "visions and revelations of the Lord" (12:1). He focuses on a particularly impressive instance of fourteen years ago when he was caught up into the third heaven and paradise, either in or out of the body (12:2f.). Commentators are largely agreed that no differentiation is to be made between "the third heaven" and paradise. (2 En. 8:1 [B] and Apocalypse of Moses 37:5 locate paradise in the third heaven. There is not enough evidence here to make judgments about Paul's enumeration of the heavens.) Although Paul cannot relate the content of this revelation (12:4), he seems to be saying that he heard and possibly saw Christ in paradise (12:1f., 4). "Paul is granted in this life an experience of this aspect of heaven which thus anticipates both 'the intermediate state' and the glory of the final consummation" (Lincoln, p. 80).

The only NT use of *parádeisos* for the future and final home of the righteous is in Rev. 2:7. Jesus promises to grant to him who conquers "to eat of the tree of life" in "the paradise of God." As often in the apocalyptic literature (T. Levi 18:10f.; 1 En. 25:4f.; 2 Esd. 8:52), the tree of life is located in paradise (cf. Gen. 2, 3; Rev. 22:1-5, 14). In this eschatological paradise humanity will enjoy fellowship with God as it was in the beginning.

Thus the NT concept of paradise participates in the development of *parádeisos* which begins in the LXX and flowers in Jewish apocalyptic. The key characteristic of the intermediate paradise is, as always in the NT, fellowship with Christ (Acts 7:59; 2 Cor. 5:8; Phil. 1:23). John looks forward to the final consummation when all the people of God will dwell together with God in the eternal paradise (Rev. 22:1-5). Jesus and the NT writers give new understanding to the present hidden paradise and the future paradise by characterizing it primarily as fellowship with Christ. This content, and not the concept of paradise itself, was what was important to the NT writers. The concept of paradise was open to the abuse of grandiose speculation (which began to happen in the second-century Church), and this may explain its rarity in the NT. "What really matters is not the felicity of Paradise, but the restoration of the communion with God which was broken by Adam's fall" (Jeremias, p. 773).

V. R. GORDON

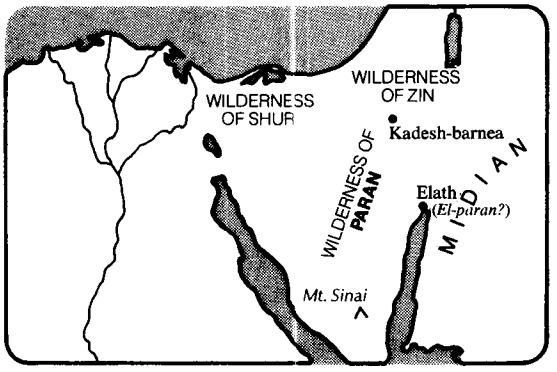
PARAH pā'rə [Heb. *pārâ*–'heifer'(?); Gk. B *Phara*, A *Aphar*]. A town in the territory allotted to Benjamin (Josh. 18:23). Parah is usually identified with the modern Khirbet el-Fârah, located about 9 km. (5½ mi.) NE of Jerusalem and near the spring 'Ain Fârah, which is the source of Wâdī Fârah and provides water for the Old City of Jerusalem. It is also possible that Parah is the location of the biblical brook of Perath (Jer. 13:4-7, NEB; Heb. *pᵉrāṯâ*; AV, RSV, "Euphrates") as well as the valley of Pheretae of Josephus (*BJ* iv.9.4 [512]); but cf. *GTTOT*, §81, p. 33 n. 13.

D. E. WARING

PARALEIPOMENA, PARALIPOMEA. *See* CHRONICLES, BOOKS OF.

PARALYTIC [Gk. *paralytikós*] (Mt. 4:24; 9:2, 6; Mk. 2:3-5, 9f.); AV "sick of the palsy"; NEB PARALYZED (MAN); **PARALYZED** [*paralelyménos* (pf. pass. part. of *paralýō*) (Lk. 5:18, 24; Acts 8:7; 9:33), *paralytikós* (Mt. 8:6)]; AV "taken with palsy," "sick of the palsy"; NEB also PARALYSIS; [*xērós*] (Jn. 5:3); AV WITHERED. *See* DISEASE III.C; IV.B.

PARAMOUR [Heb. *pilleges*]; NEB MALE PROSTITUTE. The Hebrew term usually designates a female concubine (e.g., Gen. 22:24), but in Ezk. 23:20 it is applied to a male lover. KoB (p. 761) and others have suggested that the MT be emended to *p'lištîm* (Philistines); but the passage is concerned with Judah's pro-Egypt policy (cf. v. 27), and a reference to the Philistines would be out of place.



PARAN pā-rən' [Heb. *pā'rān*]. A biblical term used geographically with reference to ill-defined areas of desert to the S and SW of Palestine. Although Paran usually designates an area of wilderness or desert, the term apparently forms a part of a place name EL-PARAN in Gen. 14:6, and Dt. 33:2 and Hab. 3:3 refer to Mt. Paran. Although the latter passages are poetic, Mt. Paran may reasonably be interpreted as another appellation for Mt. Sinai (*see* SINAI, MOUNT).

In the earliest reference to Paran, El-paran marks the southern limit of Chedorlaomers's campaign (Gen. 14:6). El-paran, possibly Elath at the head of the Gulf of Aqabah, is said to be "by [Heb. *'al*] the wilderness." Ishmael lived in the Wilderness of Paran after his expulsion by Abraham (Gen. 21:21). Later, the Israelites journeyed to the Wilderness of Paran from the Wilderness of Sinai after the giving of the Law (Nu. 10:12; 12:16). Three sites — Taberah, Kibroth-hattaavah, and Hazeroth — are mentioned in connection with the journey (e.g., 11:3, 34f.) and probably should be located in the Wilderness of Paran. Unfortunately, none can be identified with certainty, although Hazeroth has been equated by some with 'Ain Khaḍrā, a site NW of Jebel Mûsā in southern Sinai.

Moses sent the twelve spies into Canaan from the Wilderness of Paran, and they returned to Kadesh, which by implication is located in the Wilderness of Paran (Nu. 13:3, 26). Yet in other passages Kadesh is stated to be in the Wilderness of Zin (Nu. 20:1). Interestingly, the wilderness itinerary of Nu. 33 does not include a reference to Paran in the text, although the LXX includes the Wilderness of Paran and identifies it with Kadesh (LXX Nu. 33:36). *See* KADESH 1.

Later references include 1 S. 25:1, which relates that David went to the Wilderness of Paran. One version of the LXX, however, reads the "wilderness of Maon," a more likely reading since the village of Maon in Judah is mentioned in 25:2. Finally, Hadad the Edomite fled from Midian through Paran to Egypt (1 K. 11:18).

These passages furnish some general information helpful in delimiting the Wilderness of Paran. Paran must be W of Midian and E of the Wilderness of Shur on the border of Egypt. Paran may have extended to the southern borders of Judah if the MT of 1 S. 25:1 is correct. Most references, however, associate the Wilderness of Paran with the area between Mt. Sinai and the region of Kadesh-barnea and Elath. Depending on where one locates Mt. Sinai, this area would include portions of central and northeastern Sinai. Many scholars identify the Wilderness of Paran with portions of the desert et-Tîh, a rugged high plateau drained by the Wâdī el-'Arîsh. This would be on the route of Hadad as he fled to Egypt (1 K. 11:15) and fits the biblical description of "that great and terrible wilderness" Israel traversed on the way from Mt. Sinai to Kadesh (Dt. 1:19).

Aharoni suggested that Paran is a more general term that originally referred to most or all of the Sinai Peninsula. He argued that this would explain the absence of Paran in the list of Nu. 33, since this list includes only specific locales. Further, if Paran refers to a much larger region, this would explain how Kadesh could be alternately said to be in the Wilderness of Paran and Zin, for Paran could include Zin.

Bibliography.—Y. Aharoni, *LBHG* (rev. ed. 1979), p. 199; B. Rothenberg, *God's Wilderness: Discoveries in Sinai* (1961), pp. 165-69. T. V. BRISCO

PARAPET [Heb. *ma'aqeh*] (Dt. 22:8); AV BATTLEMENT. The term seems to be related to Arab. *'q'*, "hinder," and denotes a low wall or protective railing built around the edge of a flat roof to prevent people from falling.

PARBAR pär'bär [Heb. *parbār*; pl. *parwārîm*; LXX *pharoureím*]. Four gatekeepers were assigned for the "parbar" (AV, RV, RSV) at the road in the area to the west of the temple and two in the "parbar" itself (1 Ch. 26:18). This may have been an open pavilion or court (NEB "colonnade"; NIV "court"; cf. Ezk. 41:12).

In 2 K. 23:11 the plural form (AV "suburbs"; RSV, NAB, "precincts"; NEB "colonnade"; NIV "court") designates the location of the chamber of Nathan-melech, in the area where Manasseh had kept the horses and chariots dedicated to the sun.

Though it is difficult to accept such an etymology for the 2 Kings passage, scholars have derived the word from the Pers. *parwār*, meaning etymologically "having light" and designating an open summerhouse or kiosk. In 1916 E. Littmann published an Aramaic-Lydian inscription from Sardis which uses the word *prbr* for the open anteroom of a tomb (*Sardis*, VI/1, 25). In the Mishnah and the Targumim the word signified "suburbs."

J. M. Allegro interpreted item 31 in the Copper Scroll from Qumrân as an "open pavilion" or "summer house" (*Treasure of the Copper Scroll* [1964], p. 137).

See also PRECINCT. E. M. YAMAUCHI

PARCEL. Used by the AV in the sense of a "piece of land" to translate Heb. *ḥelqâ* (Gen. 33:19; Josh. 24:32; Ruth 4:3; 1 Ch. 11:13f.) and Gk. *chōríon* (Jn. 4:5). The RSV changes it to "piece," "portion," "plot," or "field," but keeps "parcel" in Ruth 4:3.

PARCHED [Heb. *qālâ* (Lev. 2:14; "parched grain," Josh. 5:11), *qālî* ("parched grain," Lev. 23:14; Ruth 2:14; 1 S. 17:17; 25:18; 2 S. 17:28), *ṣe'hîḥâ* (Ps. 68:6 [MT 7]), *ṣiheh* (Isa. 5:13), *ṣîyâ* (Ps. 107:35; Hos. 2:3 [MT 5]; Joel 2:20), *'ăyēp* (Ps. 143:6), *ḥāraḇ* (Isa. 19:5; Hos. 13:15), niphal of *ḥārar* (Ps. 69:3 [MT 4]), *ḥa'rērîm* ("parched places," Jer. 17:6), *nāšaṭ* (Isa. 41:17), *ṣāmā'* ("parched ground," Jer.

48:18)]; AV also DRY, THIRSTY, BARREN, etc.; NEB also ROASTED, SCORCHING, SORE, THIRSTY, etc.

The seven RSV instances where "parched" translates *qālâ* and *qālî* all refer to roasted GRAIN. Two methods of parching were used: a small bundle of stalks of grain could be held over an open fire (Lev. 2:14) until the heads of grain were thoroughly roasted, after which the hulls could be rubbed off and the grain eaten; or the heads could be put in a pan over a fire until they were roasted enough to eat. Previously prepared parched grain was a popular ready-to-eat food for persons away from home (Ruth 2:14; 1 S. 17:17; 25:18; 2 S. 17:28; cf. also Lev. 23:14; Josh. 5:11).

The other instances where the RSV employs "parched" refer to excessive dryness, and these occur in contexts of judgment and mercy. Those who rebel against God (Ps. 68:6; Jer. 17:6) or refuse to repent (Isa. 5:13; Hos. 2:3; 13:15) shall dwell in a parched land (cf. also Isa. 19:5; Jer. 48:18; Joel 2:20). But God will quench the thirst of the oppressed and deliver them from parched lands (Ps. 107:35; 69:3; Isa. 41:17; cf. Ps. 143:6). Like all peoples who live near deserts, the Hebrews knew the destructive force of the dry climate and the vital importance of relief from that dryness. E. WALHOUT G. A. L.

PARCHMENT [Gk. *membrána* (2 Tim. 4:13); Lat. *membrana*]. The word "parchment" is derived from Lat. *pergamena* (Gk. *pergamēnós*), pertaining to PERGAMUM, an ancient city in Mysia of Asia Minor. There, according to Marcus Varro (*ca.* 116-27 B.C.) as cited by Pliny (*Nat. hist.* xiii.21f.), King Eumenes developed parchment for WRITING material in the 2nd cent. B.C. Since parchment documents from other sites can be dated to earlier times Varro's legend probably reflects the widespread fame of Pergamum as a parchment trade center rather than the actual invention of parchment in that city.

Parchment is made chiefly from the skins of sheep and goats. The hair and fleshy portions of the skin are removed as in tanning by first soaking the skin in limewater and then dehairing, scraping, and washing it. In contrast with the process of tanning a LEATHER skin (Gk. *diphthéra*), the skin for parchment is then stretched on a frame, treated with an absorptive agent such as chalk or alum to remove the fatty substances, and dried. It is finally given a smooth surface by rubbing it with pumice and dressing it with chalk. A finer grade of parchment, vellum, is made from the skins of calf and kid.

Parchment was used extensively in the Greco-Roman world for rolls, codices, legal documents, etc., vying with the less expensive papyrus for that purpose. Due to its greater beauty, erasability, and durability, parchment supplanted papyrus as the basic book material in the 4th cent., after which almost all Christian codices were of parchment. Two of the most widely renowned biblical MSS in Greek are Codex Sinaiticus and Codex Vaticanus, parchment codices of the 4th cent. that display an early and important type of NT text, one also preserved in some NT papyri from Egypt; these codices have served as the basis for most modern critical editions of the Greek NT.

Parchment continued in use as the chief material for book production through the late Middle Ages, at which time paper began to displace it. With the introduction of printing, parchment was relegated to use in book binding and ceremonial documents.

The only biblical reference to parchment (2 Tim. 4:13) is so elusive that it precludes positive identification. The "parchments" requested have been taken to mean a collection of blank writing sheets, a collection of the author's notes, a set of official documents attesting his citizenship, or a special class of books. The last seems most plausible, for the author omits "and" before "above all" (contra RSV; cf. NEB, NIV, JB). If the reference is to books, however, their content must remain a subject of conjecture.

Lüthi, *Das Pergament, seine Geschichte, seine Anwendung* (1938); H. J. Plenderleith, *The Conservation of Antiquities and Works of Art* (1956), pp. 44-50; W. Schubart, *Das Buch bei den griechen und Römern* (3rd ed. 1961), pp. 23-28.

I. A. SPARKS

PARDON [Heb. *sālaḥ*–'pass over' (Ex. 34:9; Nu. 14:19f.; Dt. 29:20 [MT 19]; etc.), *nāśā'*–'lift up' (Ex. 23:21; 1 S. 15:25; Job 7:21; Mic. 7:18), piel of *kāpar*–'cover' (2 Ch. 30:18), *kāsaḥ*–'cover' (Ps. 85:2 [MT 3]), niphal of *rāṣâ*–'be paid off' (Isa. 40:2); Gk. *chárin déomai*–'ask favor' ("beg pardon," Wisd. 18:2), *paraitéomai*–'ask to be excused' ("beg pardon," 3 Macc. 6:27), *syngnōstós estin*–'is pardonable' (Wisd. 6:6), *lýō*–'set free' (Sir. 28:2), *aphíēmi*–'cancel, forgive, pardon' (1 Macc. 13:39); Lat. *ignoscō*–'pardon, forgive, excuse' (2 Esd. 7:139)]; AV also SPARE, COVER, FORGIVE; NEB also FORGIVE, TAKE AWAY (Mic. 7:18), BE PAID (Isa. 40:2), "beg as a favour" (Wisd. 18:2), FORGIVENESS.

As used by the RSV OT ("pardon" does not occur in the RSV NT), there is little difference in meaning between "pardon" and "forgive(ness)." In some contexts "pardon" may have a somewhat narrower focus than "forgiveness": "pardon" may signify simply the releasing of an offender from the penalty for the offense, whereas "forgiveness" tends to emphasize the relinquishment of resentment toward the offender, opening the way to a restoration of fellowship. All the Hebrew terms rendered "pardon" are elsewhere rendered "forgive" or "forgiveness" by the RSV, with the exception of the niphal of *rāṣâ* (Isa. 40:2; the NEB translation is more accurate: "be paid").

See FORGIVENESS. N. J. O.

PARENT. *See* CHILD II; CRIME: Parents, Crimes Against; EDUCATION II; FATHER II; MOTHER; RELATIONSHIPS, FAMILY.

PARK [Heb. *pardēs*; cf. Akk. *pardīsu*; Avestan *pairidaēza*; Gk. *parádeisos*] (Eccl. 2:5); AV ORCHARD. A wooded enclosure. Most scholars assume that Heb. *pardēs* is a loanword from Avestan *pairidaēza*, "circular enclosure" (cf. M. Ellenbogen, *Foreign Words in the OT* [1962], p. 136).

PARLOUR. The AV translation of Heb. *ḥeḏer* (1 Ch. 28:11; RSV "chamber"; NEB "court"), *liškâ* (1 S. 9:22; RSV "hall"; NEB "dininghall"), and *ʿălîyâ* (Jgs. 3:20-25; RSV, NEB, "roof chamber"). *See* CHAMBER; HALL; HOUSE V.

PARMASHTA pär-mash'tə [Heb. *parmaštā'*]. One of the ten sons of Haman (Est. 9:9).

PARMENAS pär'mə-nəs [Gk. *Parmenas*, possibly a shortened form of *Parmenidēs*–'steadfast']. One of the Seven chosen by the Jerusalem church to assist the apostles in the daily distribution of charitable relief (Acts 6:5). According to tradition he was martyred at Philippi during the reign of Trajan.

PARNACH pär'nak [Heb. *parnāḵ*]. Father of the Zebulunite leader Elizaphan, who was appointed by Moses to assist Eleazar and Joshua in the division of the land W of the Jordan among the Israelite tribes (Nu. 34:25).

PAROSH pâr'osh [Heb. *parʿōš*–'flea' (cf. 1 S. 24:14)]; AV also PHAROSH (Ezr. 8:3).

1. [Gk. Αρος. *Phoros*, B *Phares* (1 Esd. 8:30)]; AV PHOROS, PHAREZ; NEB PHOROS. Head of a family that returned from the Exile in part with Zerubbabel (Ezr. 2:3 par. Neh 7:8; 1 Esd. 5:9) and in part with Ezra (Ezr. 8:3 par. 1 Esd. 8:30). Some members of the family had married foreign women and were required to divorce them (Ezr. 10:25 par. 1 Esd. 9:26).

2. A chief who sealed the covenant with Nehemiah in the time of Ezra (Neh. 10:14).

3. Father or ancestor of Pedaiah, who helped to rebuild the wall of Jerusalem in the time of Nehemiah (Neh. 3:25); possibly the same as **1** or **2**.

PAROUSIA pär-o͞o-sē'ə, pär-o͞o'zhi-ə. A Greek word used by theologians as a technical term for Christ's return at the end of the age. The basic meaning of *parousía* is "presence," from which "coming to be present" derives. In the NT it sometimes simply means "presence" (e.g., 2 Cor. 10:10), but the more usual meaning is "arrival," "coming." In six instances it is used of common human arrivals: of Paul (Phil. 1:26), of Titus (2 Cor. 7:6f.), of Stephanus and his friends (1 Cor. 16:17). It refers once to the coming of "the lawless one" (2 Thess. 2:9) and once to that of "the day of God" (2 Pet. 3:12). On all other occasions the term is used of Christ: once of His coming at the Incarnation (2 Pet. 1:16) and fifteen times of His coming again at the end of the age (e.g., Mt. 24:3). In modern times it has become customary to refer to His "Second Coming" or "Second Advent," but these terms are not found in the NT (though He. 9:28 says that Christ "will appear a second time"); the expression "Second Coming" seems to have originated with Justin Martyr in the 2nd century. In the NT Christ's coming at the end of the age is simply "the coming." *Parousía* was in use as a technical term for the arrival of the emperor or other dignitary when he visited his subjects (Deiss.*LAE*, pp. 368ff.). This was a great event, sometimes marked by the striking of special coins or the erection of monuments. The word thus has overtones of greatness that should be kept in mind when it is used of Christ's return.

V. Conclusion

I. Terms Used of Christ's Coming.–Among the other terms — in addition to *parousía* — used of Christ's coming is the verb *érchomai*. Jesus is described as "he who comes" or "the coming one" with reference both to His first coming (Mt. 21:9; Lk. 7:19f.) and to His second (2 Thess. 1:10; Rev. 1:7; 22:7). He is distinctively "the coming one." On the first occasion He came (in fulfillment of prophecy) to accomplish the divine work of salvation; on the second He will come in fulfillment of further prophecy) to bring God's saving purpose to its consummation.

The term *apokálypsis*, "revelation" (1 Cor. 1:7; 2 Thess. 1:7), points to the decisive "making known" of Christ. At present He is in the realm of the unseen; it is possible for people to deny that He saves or even that He exists. When He returns, however, His reality will be clear to all (Mt. 24:30; Rev. 1:7). The term *epipháneia*, "manifestation" or "appearance" (2 Thess. 2:8; 1 Tim. 6:14), is used in a number of religions to denote "a visible manifestation of a hidden divinity" (Bauer, rev., p. 304). It often includes the notion of manifestation in splendor. As things are, people do not see Christ, but at the Parousia He will become manifest to all and be manifest as a supreme, glorious being.

The same event may be referred to with some combination using the word "day," e.g., "the day of God" (2 Pet. 3:12); "the day of the Lord" (1 Thess. 5:2); "the day of the Lord Jesus" (2 Cor. 1:14); "the day of our Lord Jesus Christ" (1 Cor. 1:8); "the day of Jesus Christ" (Phil. 1:6); "the day of Christ" (Phil. 2:16); "[the Son of man's] day" (Lk. 17:24); "the day of redemption" (Eph. 4:30); "the day of wrath" (Rom. 2:5; better, "day of wrath and revelation . . ."); "the day of judgment" (2 Pet. 2:9); "the last day" (Jn. 6:39); "the great day" (Jude 6); "that day" (2 Thess. 1:10); or simply "the day" (Rom. 13:12). In the OT "the day of the Lord" is often looked for as the day of God's decisive and final intervention in history to destroy all evil. On that day all people will be judged and God's will will be done perfectly. The NT clearly applies this expectation to the activity of Christ at the end of this age. All terminology that stresses the "day" points to the critical time, the consummation of God's purpose throughout the history of the world.

There are still other ways of describing the same event. It is the time when Christ will "be manifested," "be revealed" (pass. of *phaneróō*, Col. 3:4; 1 Pet. 5:4). Once Jesus spoke of the Twelve as sitting on twelve thrones and judging Israel in "the new world" (Mt. 19:28; *palingenesía*, "rebirth," which may be used of the world or of people). Sometimes the coming is referred to with nontechnical words (e.g., Phil. 3:20; 4:5; 1 Thess. 1:9f.; 4:14). Thus "our blessed hope" (Tit. 2:13) uses no technical language but surely points to the coming of Christ that is the hope of all believers. In this spirit the NT Christians prayed for the coming (1 Cor. 16:22; Rev. 22:20).

From all this it is clear that the Parousia was a concept of great importance for the early Christians. They spoke about it in a variety of ways and referred to it often, probably more often than to any other single doctrine in the NT. They looked with eager longing for the day when Jesus would return.

II. The Manner of the Coming.–It is important to recognize the limitations of our knowledge when attempting to describe in detail what will happen at Our Lord's return. That He will return, the NT leaves no doubt. But concerning what will precede or follow the Parousia, much is not clear. There is room, therefore, for a decent humility and a readiness to consider the insights of others.

At the time of the Ascension angels told the disciples, "This Jesus, who was taken up from you into heaven, will come in the same way as you saw him go into heaven" (Acts 1:11). This apparently means that the Parousia will be a personal and visible return, one visible on the widest scale (Mt. 24:27). It will be seen by unbelievers as well as believers, for "all the tribes of the earth will mourn" when they see the Son of man coming, after which He will send His angels to gather His elect (Mt. 24:30f.). Sometimes it is said that He will come "on the clouds" (Mt. 24:30; 26:64; cf. Lk. 21:27; Rev. 1:7). This will be no localized event, for that day "will come upon all who dwell upon the face of the whole earth" (Lk. 21:35; cf. 17: 24). Jesus will come in glory and will be attended by angels (9:26). His coming will be "with a cry of command,

with the archangel's call, and with the sound of the trumpet of God" (1 Thess. 4:16). Clearly the NT envisages a public, open, and splendid event — something very different from His lowly first coming.

The coming will be quite unexpected (Mk. 13:35-37). Preoccupied with worldly affairs, unbelievers will be surprised like those on whom the Flood came or those who were destroyed in Sodom (Lk. 17:26-30, 34). The Parousia will be as sudden and unexpected as the coming of a thief (1 Thess. 5:2, 4; 2 Pet. 3:10). Neither the incarnate Son nor the angels know the time of it (Mk. 13:32), thus it is obviously quite impossible for human beings to determine it. But though we cannot know exactly when Jesus' coming will occur, we are informed of certain signs that will precede it. "The gospel must first be preached to all nations" (Mk. 13:10; cf. Acts 1:7f.). There will be widespread apostasy (Mt. 24:10; 2 Tim. 3:1-9; 2 Pet. 3:3f.), an increase in wickedness and a growing cold of love (Mt. 24:12). A being will appear called "the man of lawlessness" (2 Thess. 2:3f.), probably to be identified with the "antichrist" (1 Jn. 2:18; 4:3). John's use of the plural indicates that more than one being can manifest the essential qualities of antichrist, and some have suggested that Nero, e.g., may be regarded as a type or foreshadowing of antichrist. Jesus Himself spoke of "false Christs and false prophets" arising and showing "signs and wonders" in those days (Mk. 13:22; cf. v. 6). It seems clear to most scholars, however, that in addition to these false messiahs the Bible points to one especially evil and powerful being who will arise in the last days.

The troubles of that time will be so great that Jesus said, "in those days there will be such tribulation as has not been from the beginning of the creation which God created" (Mk. 13:19). Widespread calamities will strike, e.g., wars, rumors of wars, earthquakes, famines (vv. 7f.), and signs in the heavens (vv. 24f.). We read also of persecutions of believers (v. 9) and a mysterious reference to "the desolating sacrilege set up where it ought not to be" (v. 14). But despite the fulfillment of such predictions people will still scoff at the idea of Christ's coming (2 Pet. 3:3f.; cf. Lk. 18:8). The signs are evidently not meant to enable accurate predictions of the time of the coming. Indeed, the function of prophecy in general is not so much to enable us to predict future events as to assure us of the hand of God in the events foretold. Who could have informed us, OT in hand, of even the main outline of the life and work of the incarnate Christ? Yet again and again the Gospels tell us that things happened "that what was spoken by the prophets might be fulfilled."

At Christ's coming the dead will be resurrected. Some passages speak as though all will be raised, believers and unbelievers alike (e.g., Jn. 5:28f.), but others mention only believers (e.g., Jn. 6:40; 1 Cor. 15:23; 1 Thess. 4:16). Those still alive at that time will undergo change (1 Cor. 15:51-57). All will be judged, both the living and the dead (2 Tim. 4:1; 1 Pet. 4:5); some passages even speak of angels as undergoing judgment (2 Pet. 2:4; Jude 6). The judgment will be God's (Rom. 2:2; He. 10:30; 12:23), although some passages refer to Christ as the judge (Jn. 5:22; Acts 10:42). Perhaps it is best to understand that the Father will judge through the agency of the Son (Acts 17:31; Rom. 2:16). Paul makes it clear in 1 Cor. 15 that the new order that will follow the resurrection will be quite different from any that exists at present. Several passages speak of the present universe ceasing to exist (Mt. 24:35; 2 Pet. 3:7, 10), and Rev. 21–22 describes in some detail the new heaven and the new earth (cf. Isa. 65:17; 66:22).

Christians are instructed to maintain an attitude of watchfulness (Mk. 13:35-37; Lk. 21:28; 1 Cor. 1:7) and of eager expectation, "waiting for and hastening the coming of the day of God" (2 Pet. 3:12). Christians are those who "have loved his appearing" (2 Tim. 4:8) and are "awaiting our blessed hope, the appearing of the glory of our great God and Savior Jesus Christ" (Tit. 2:13).

III. Modern Views.—The NT contains much teaching about the coming. But in modern times there is considerable dispute about how this material should be understood. Liberalism gave little attention to this strand of NT teaching. Many scholars held that Jesus did not originate the teaching ascribed to Him on this subject, but that it had been produced by the early Church and read back onto the lips of Jesus. Those scholars who did ascribe this teaching to Jesus Himself saw it as a piece of nonessential trimming attached to the fringes of His real message. But A. Schweitzer compelled the theological world to take Jesus' eschatology seriously (*QHJ*). He taught that Jesus saw the kingdom of God in apocalyptic terms and thought that He would establish it Himself, but He died in the attempt to make it a reality. Not many scholars have agreed with Schweitzer's basic position, but all who have written since his monumental work have had to reckon with the eschatological element in Jesus' sayings.

A. Realized Eschatology. One way of dealing with the problem of Jesus' eschatology has been to ascribe teaching on the Parousia to the early Church and to see Jesus as teaching "realized eschatology." According to this view Jesus held that the action of God was to be seen in His ministry: "The *eschaton* has moved from the future to the present, from the sphere of expectation into that of realized experience" (C. H. Dodd, *Parables of the Kingdom* [rev. ed. 1961], pp. 40f.). Scholars such as Dodd have held that Jesus may well have predicted that He would survive death and that the cause of God would triumph, but the Church understood Him not in the way that He meant this but in the light of its own experience. "Where He had referred to one single event, they made a distinction between two events, one past, His resurrection from the dead, and one future, His coming on the clouds" (Dodd, *Parables*, pp. 76f.). The Parousia is thus seen as the invention of the Church, not the authentic teaching of Jesus. Jesus is supposed to have been concerned solely with what God was doing in His ministry during His life on earth.

It is probably true that in the past Christians have paid too little attention to the present aspect of the kingdom of God. Thus Dodd and others have rendered a service in highlighting this aspect of Jesus' teaching. But it is unbalanced to claim that this is all that Jesus taught.

A similar objection may be made to other views, e.g., that of J. A. T. Robinson. He contended that Jesus emphasized two major themes: vindication and visitation. In the Resurrection and Ascension we see Him vindicated before God, and at the end of the age God will visit His people in judgment (see *Jesus and His Coming* [1957]). This view, too, understands the Parousia as a creation of the Church. Such a view allows for more than realized eschatology but rejects the idea that Jesus taught that He would come again. To eliminate the idea of the Parousia from Jesus' teaching, however, requires much critical surgery. If the Gospels give anything like a reliable account of what He said, then He did teach that He would return at the end of the age.

B. A Present and a Future Kingdom. Recent scholarship has widely recognized that the kingdom of God has a future aspect as well as a present aspect and that Jesus did teach that He would come back to inaugurate the future aspect. The two aspects are inextricably linked. The Parousia and the events associated with it are the culmination of the work of salvation seen in the life, death, resurrection,

and ascension of Christ. The expression "inaugurated eschatology" points to the truth that the kingdom was begun during Jesus' earthly ministry but its consummation awaits His return. Exactly what "return" means, however, is not clear in much writing. For most critical scholars the NT concept of the Parousia is illusory, whether it was taught by Jesus or not. Many hold that the early Church expected the Parousia within a few years of Jesus' death, certainly within the lifetime of many of His contemporaries; but it did not happen. For such scholars, therefore, the whole concept was mistaken. Jesus never intended to return or, if He did, He was wrong. They maintain that a piece of first-century Jewish apocalyptic like this should have no place in a genuinely Christian theology.

Such opinions, however, proceed from the climate of modern secular thinking rather than from a study of the NT. Any doctrine alluded to in the NT as frequently as this one must be accepted as an integral part of the Christian way — unless one proposes to rewrite Christianity to make it conform to twentieth-century thought. The Parousia cannot be discarded on any fair representation of NT teaching, although it may need to be interpreted carefully. It enshrines the very important truth that in the end good will triumph over evil and God's will will be perfectly done. To accept as the final state of affairs the evil we see working so powerfully in the modern world is to despair. However one understands the Parousia, it stands for the final, decisive intervention of God and the total overthrow of evil. If one surrenders this, what is left is not authentic Christianity.

C. The Delay of the Parousia. Many scholars contend that the first Christians expected Jesus to return speedily and that the delay of the Parousia was an embarrassment for the early Church. This problem is thought to have influenced or even shaped the theology of the later NT writers. But it is not easy to demonstrate that the first Christians expected an imminent parousia and later abandoned the idea. The evidence often allows more than one interpretation. R. J. Bauckham has also pointed out that the problem is not peculiar to Christianity. For a long period Jewish apocalyptic taught the imminence of God's eschatological salvation, and its failure to arrive did not discredit apocalyptic (*Tyndale Bulletin,* 31 [1980], 3-36). Christians such as the writers of 2 Peter and Revelation were accustomed to the tension between imminence and delay. Thus one should not exaggerate the problem that this tension presented.

1. The Teaching of Jesus. Did Jesus teach that He would return within the lifetime of His hearers? Attempts to find this in the words of Our Lord usually center on passages such as Mk. 9:1 and Mt. 10:23. In the former Jesus says, "Truly, I say to you, there are some standing here who will not taste death before they see that the kingdom of God has come with power." The coming of the kingdom with power is taken to mean the Parousia with its attendant events. But the passage is far from being an unambiguous reference to the Parousia. Many see a reference to the Transfiguration and hold that the way the Evangelists arrange their material shows that this was their view. Those who espouse "realized eschatology" read it as expressing the truth that the kingdom has come already (e.g., Dodd, *Parables,* pp. 37f.). Others think of an event such as the destruction of Jerusalem or the Day of Pentecost. These and other interpretations that have been suggested show that His saying does not offer clear proof that Jesus expected to return during the lifetime of His hearers.

In Mt. 10:23 Jesus says, "you will not have gone through all the towns of Israel, before the Son of man comes." This is a puzzling passage, and again many interpretations have been proposed. Some, e.g., see a reference to the exaltation of Jesus in the Resurrection, others to the events associated with the fall of Jerusalem. Perhaps the best interpretation has been offered by S. S. Smalley: "In this case we are presented with a further example of the double perspective already encountered in the teaching of Jesus, in which the fall of Jerusalem becomes proleptic of the end" (*JBL,* 83 [1964], 47).

Neither of these passages, then, proves that Jesus expected an early parousia (though, of course, both would be consistent with such an idea if it could be demonstrated elsewhere). An examination of other passages would yield the same conclusion. Running throughout the teaching of Jesus is a tension between the present and the future, and there is no point in trying to minimize it. N. Perrin finds it in such a familiar and well-loved source as the Lord's Prayer (*Kingdom of God in the Teaching of Jesus* [1963], pp. 191ff.). Neither side of this tension may safely be neglected, nor may the tension be dismissed by asserting that for Jesus "the future" meant "the immediate future." The simplistic line of ascribing to Jesus the expectation that all would be over within a year or two resolves the problem no more than interpreting His teaching as pure apocalyptic or pure realized eschatology.

2. Lukan Eschatology. A further problem arises with Luke's eschatology. A common view among scholars posits that Luke inherited a tradition containing teaching about the imminence of the Parousia, but that by the time he wrote Luke-Acts the nonfulfillment of this expectation had become an agonizing problem. Luke's solution was to minimize the teaching on the imminence of the Parousia and to replace it with something else. H. Conzelmann asked, "If Luke has definitely abandoned belief in the early expectation, what does he offer on the positive side as an adequate solution of the problem?" And he answered, "An outline of the successive stages in redemptive history according to God's plan" (*Theology of St. Luke* [Eng. tr. 1961], p. 135). According to H. Flender, Luke replaced a belief in an imminent parousia with an emphasis on two things: the heavenly reality and earthly history. A problem exists, in that "redemption has become an event in the past. . . . His solution is to give simultaneous expression to the supernatural mystery and the earthly visibility of Christ and his history" (*St. Luke: Theologian of Redemptive History* [1967], p. 167). E. Käsemann held that Luke replaced the vivid expectation of the Parousia with an emphasis on the Church as an institution, resulting in what is called "early catholicism" (*Frühcatholizismus*).

The difference between Luke and the other Synoptists should not be exaggerated, however. Matthew and Mark also know of a delay before Jesus comes, and imminence is not their total eschatology. Further, it is simply not true that Luke's interest is in the institution rather than eschatology. To start at the beginning, Luke retains words of John the Baptist that speak of the coming judgment (3:9, 17). Luke sees the approach of the kingdom of God in the ministry of Jesus and reports (as the other Synoptists do not) that Jesus instructed the Seventy to say, "The kingdom of God has come near to you" (Lk. 10:9; cf. similar words to the Twelve in Mt. 10:7). The words, "nevertheless know this, that the kingdom of God has come near," are reported by Luke (10:11) but are lacking in Matthew's similar passage (Mt. 10:14). Luke alone has the passage about the servants being ready for the Master's return (Lk. 12:35-38; cf. vv. 39f. par. Mt. 24:43). Luke records a note of urgency in connection with judgment and the coming of the Son of man (Lk. 13:6-9; 18:8). In the great eschatological discourse he distinguishes more clearly than the other Synoptists between those sayings

that refer to the Parousia and those that refer to the fall of Jerusalem. After the words, "And then they will see the Son of man coming in a cloud with power and great glory," only Luke adds, "Now when these things begin to take place, look up and raise your heads, because your redemption is drawing near" (21:27f.). Further, he retains some words that look for the Parousia as definitely as any in the NT: "Truly, I say to you, this generation will not pass away till all has taken place" (21:32). Similarly, in Acts 1:11 he records the angels' prediction that Christ would come back in the same way as He went. Luke reports Peter's words about looking for God to send Christ at the appointed time (Acts 3:20f.) and about Christ being judge of the living and the dead (10:42); he also has Paul's words about God judging the world by Christ (17:31). Acts ends with Paul "preaching the kingdom of God" (28:31).

In the face of this evidence it is difficult to maintain that Luke had no interest in the Parousia. He omits some teaching about it that is found in the other Synoptic Gospels, but he also has some references to it that the others lack. Luke has his own way of dealing with the Parousia and associated events. Although he gives the Parousia a different emphasis from some of the other NT writers as he brings out its significance in his own way, he certainly does not abandon it.

3. Pauline Eschatology. Those who hold that the first Christians thought of the Parousia as taking place within their lifetimes usually appeal to Paul's words: "then we who are alive, who are left, shall be caught up together with them in the clouds to meet the Lord in the air" (1 Thess. 4:17). It is argued that these words show that Paul expected to be alive at Christ's return. But exactly the same line of reasoning, if applied to other passages (e.g., 1 Cor. 6:14: "God raised the Lord and will also raise us up by his power"; so also 2 Cor. 4:14; Phil. 3:11; cf. Acts 20:29; 2 Tim. 4:6f.), would show that Paul expected to be dead at that time. As early as 1 Thess. 5:10 Paul saw his own death as a possibility: Christ "died for us so that whether we wake or sleep. . . ." This simply demonstrates that Paul had the habit of classifying himself with those to whom he wrote. Such expressions prove nothing about his expectation of being alive at the Parousia. Furthermore, Paul's exhortations to upright living in his early writings (e.g., 1 Thess. 4:1-12; 2 Thess. 3:6-12) imply an interval before the Parousia during which his correspondents could practice these ethical virtues. And Paul nowhere indicates the length of the interval. That his expectation of the Parousia did not fade is clear from its presence in Philippians, which all agree is among the later letters (e.g., Phil. 1:6; 2:16; 3:20f.; 4:5).

4. Other Considerations. Dating the NT documents is not easy, and the experts are far from being in agreement. But whichever document is dated late, one is apt to find in it the expectation of the Parousia. In addition to the passages noted so far, we may observe this expectation in Mt. 24; Lk. 21; Jn. 5:28f.; 6:44; Acts 1:11; Eph. 4:30; Col. 3:4; He. 10:25; Jas. 5:8; 1 Pet. 1:5; 2 Pet. 3; 1 Jn. 3:2; Rev. 1:7; etc. In fact, it is found in every NT book except Galatians and the short Philemon, 2 John, and 3 John. Any balanced reading of the NT reveals that the future Parousia is part of the teaching of Jesus and that it was retained in the early Church. Perhaps there were some in the early Church who thought that the Parousia would take place very soon. This has been a common phenomenon throughout the history of the Church, and there is no reason to doubt that it occurred also in the first days of the Church. But nothing recorded in the NT compels belief that the Parousia was to take place in the immediate future, as A. L. Moore has shown quite plainly (*Parousia in the NT* [1966]). The expectation of the Parousia may have receded to some extent during the NT period, but we can scarcely say more than that.

By contrast with the scholars we have been considering, theologians such as J. Moltmann (*Theology of Hope* [Eng. tr. 1967]; *The Experiment Hope* [Eng. tr. 1976]) and W. Pannenberg (*Jesus — God and Man* [Eng. tr. 1968]; *Basic Questions in Theology* [3 vols., Eng. tr. 1970-73]) have put considerable emphasis on the future. For them the thought of the future consummation is all-important. Although they do not stress the Parousia as such, their emphasis on the future hope is a great improvement over theologies that see nothing beyond the here and now.

D. Imminence. We must reckon with the fact that the NT does use the language of imminence. "Surely I am coming soon" said the risen Lord to the seer (Rev. 22:20), and similar words can be found elsewhere. Such words, of course, could mean that the Parousia is near on our ordinary time scale. But it is also possible that the language of imminence is used of the Parousia because it refers to an action of God rather than of man, and the imminence is on God's time scale, not man's. However delayed it may be by our measurements, it has always the characteristic of being imminent. R. L. Saucy speaks of "the always-impending intervention of God with its strong ethical exhortation for life" (*Expositor's Bible Comm.*, I [1979], 104). To live in the conviction that the Parousia is imminent does not mean to be in a continuous ecstasy of enthusiasm. It means to have a deep-seated hope and to occupy oneself in doing what pleases the Master so that when He comes His servant will be found ready.

IV. The Millennium.– Among Evangelicals there has been much discussion about the way the Parousia relates to the MILLENNIUM (< Lat. *mille*, "thousand," and *annus*, "year"), the thousand-year reign spoken of in Rev. 20. The millennium itself is understood in several ways.

A. Premillennialism. Significant differences exist among premillennialists, but common to them all is the view that the Parousia will inaugurate a thousand-year reign of Christ with His saints (Rev. 20:4), and that this reign will take place here on earth. The Parousia precedes the reign; hence the name "premillennial." Premillennialism rejects the postmillennialist view that the millennium will be a long reign of goodness before Christ comes. Premillennialists point to the parable of the Wheat and the Tares as envisaging the presence of evil on the earth to the end of the age (Mt. 13:24-30, 36-43). Evil will be strong in the last days, and this will be the state of affairs right up to the time that Christ comes (cf., e.g., 2 Tim. 3:1-5; 2 Pet. 3:3-13). The millennium will be a time of worldwide peace, righteousness, and prosperity, with Christ as King of the whole earth. During the thousand years Satan will be "bound" (Rev. 20:1-3). Opinions differ about how this binding should be understood, but premillennialists are certain that it signifies a severe curtailment of the activities of the evil one, with the result that goodness will have a wide scope such as we can only dream of in present conditions.

Although they are in general agreement on the millennium itself, premillennialists are not united on other questions, notably the relationship of the Rapture to the Great Tribulation. The Rapture (< Lat. *rapiō*, "snatch up") is the catching up into the air of believers who are alive at the Parousia, so that they will be with Christ forever. The primary basis for this doctrine is 1 Thess. 4:17: "then we who are alive, who are left, shall be caught up together with them in the clouds to meet the Lord in the air; and so we shall always be with the Lord." The Bible also

speaks of sufferings and difficulties in the last times (e.g., Isa. 60:2; Jer. 30:7; Dnl. 12:1; Mt. 24:6-12, 21; Mk. 13:19; 1 Tim. 4:1-3; 2 Tim. 3:1-5; 2 Pet. 3:3f.; Jude 17-19; Rev. 7:14). These texts point clearly to a Great Tribulation, though its duration is not specifically mentioned. It is usually identified with the seventieth week of Daniel's prophecy (Dnl. 9:24-27). If a "week" in this prophecy denotes a week of years, this gives seven years as the length of the Great Tribulation.

What Scripture does not make clear is whether this time of trouble precedes or follows the rapture of the saints. Pretribulationists hold that the Rapture takes place before the Great Tribulation so that the Church does not go through it, while posttribulationists maintain that the Rapture follows the troubles and that the Church endures the Tribulation along with the rest of the world.

Classic premillennialism takes the latter path. It emphasizes that the NT nowhere says that the Rapture will take place at the beginning of or before the Great Tribulation, and that the natural reading of the relevant passages is that the Rapture will follow the Great Tribulation. They agree, however, that the Church will not suffer the wrath of God, which is at the conclusion of the Tribulation (Rev. 15:1); they hold either that the Church will be protected by God during this time or that the Rapture will take place immediately before the outpouring of the divine wrath. C. R. Erdman, setting out the premillennial position, could write: "There is no support in Scripture for the theory that this Rapture of the Church is to be 'secret,' that it is imminent, that it may be 'at any moment,' that it will precede the Apostasy, and Great Tribulation, and indeed will occur 'three and a half years' or 'seven years' before the actual Reappearing of Christ" (*ISBE*, IV, 2251E). He further maintained that, according to Rev. 20:4-6, those martyred during the Great Tribulation would be included among those who undergo the first resurrection. This, of course, means that the Rapture must follow the Great Tribulation. In this form of premillennialism the Parousia is followed immediately by the judgment of all, good and evil alike (Mt. 25:31-46; Rev. 20:11-15). Finally comes the rule of Christ. Those who hold such views maintain firmly that signs will precede the Parousia, and thus it cannot occur "at any moment." Paul recognized toward the end of his life that he would die (2 Tim. 4:6-8) and made no mention of any possibility that Christ might return to deliver him. But such premillennialists do not therefore conclude that Christians may ignore the NT calls for watchfulness and postpone the Parousia into some remote future. The signs are such that they might well occur in any generation. Therefore believers must always be on the watch, for the signs may be beginning before their very eyes.

Pretribulationists are premillennialists who hold that the Church will not go through the Great Tribulation, for before it begins they will be caught up in the Rapture. The Rapture is "secret" in that the world will know nothing of it; Christians will be caught up to meet the Lord, and unbelievers will know only that the believers are no longer on earth. This view divides the Parousia into two phases: Christ's coming for His saints at the Rapture and His coming for judgment at the end of the Great Tribulation. Those who hold this view point out that the passages that deal with the Tribulation contain no references to the Church and nothing to indicate that the Church will be involved in these terrible experiences. Neither the descriptions of what will happen nor the warnings to the Church in the Epistles instruct church members about how they should conduct themselves during those trying days or admonish them to beware of these days and be ready for their coming. Often pretribulationists point to Rev. 3:10: "Because you have kept my word of patient endurance, I will keep you from the hour of trial which is coming on the whole world, to try those who dwell upon the earth." They hold that the most likely meaning is that the Church will be kept out of the Great Tribulation. Furthermore, they maintain that the Rapture does not fit easily with the events at what might be called the Second Coming proper. The inference is that there are two events which, while connected, are not identical. Pretribulationists sometimes also use an argument based on the NT teachings about the imminence of the coming. If a whole series of events must precede the Parousia, then it is difficult to see how it is imminent. But if the Rapture is the next great event to take place, then we may well speak of Christ's coming as though it might happen at any moment.

Most of the discussion seems to take place between pre- and posttribulationists. But some premillennialists take up neither position. The duration of the Great Tribulation is usually understood to be seven years, i.e., the "seventieth week" of Daniel's prophecy. But Daniel speaks not only of "one week" but also of "half of the week" (Dnl. 9:27; cf. 7:25; 12:7), which is paralleled in Revelation by a number of expressions denoting a period of three and a half years (Rev. 11:2f.; 12:6, 14; 13:5). Some premillennialists think that the Parousia will take place in the middle of this week of Tribulation; as a result they are called midtribulationists. The first part of the seven years will be a time of comparative peace and security; it is at the midpoint that the real trouble will begin. At this point Christ will come and snatch up His Church (cf. 1 Thess. 5:3). The position resembles that of the posttribulationists in deferring the Rapture to a point well past the beginning of the seven years. But its upholders are one with the pretribulationists in maintaining that the Church will not pass through the Great Tribulation.

All premillennialists emphasize the importance of taking literally the teaching of Rev. 20 about the millennium. They reject interpretations that see this part of Scripture as metaphorical, claiming that the words of the Bible must always be understood in their literal sense unless there is some compelling reason to understand them otherwise. They find no such reason here. Thus we must see a reign of Christ on earth with His saints for a literal thousand-year period following the Parousia. The reference to the "first resurrection" (Rev. 20:5f.) shows that more than one group will be raised. The only natural understanding, they maintain, is that the faithful are raised first and unbelievers are raised at a later time. Satan is to be restrained during this period of blessedness (vv. 1-3), but at its conclusion he will be released for a short period (vv. 3, 7). As a result of his activities the forces of evil designated "Gog and Magog" (v. 8) will be gathered for one final rebellion against God and God's people. But these forces will be destroyed by fire from heaven, and the devil and his helpers will be cast into the lake of fire (vv. 9f.). Then follows the judgment at the great white throne (vv. 11-15), after which comes the setting up of the new heavens and the new earth (chs. 21–22).

Some premillennialists greatly emphasize the place of the Jews in God's plan. They point out that many OT prophecies envisage Israel having its own land and prospering therein (e.g., Gen. 15:18-21; Nu. 23:9) and see the nations of the world learning of God's ways from His dealings with Israel (e.g., Ps. 102:14-16 [MT 15-17]; Ezk. 39:21-29). Some have objected that these prophecies refer only to the OT period, for the NT states that "he is not a real Jew who is one outwardly" but "He is a Jew who is one inwardly" (Rom. 2:28f.). They suggest that as a result

of the work of Christ the people of God is now the Church and that there is therefore no significant place for Israel as a nation: Jews are now on the same footing as everyone else. But these premillennialists counter that in the NT the Jews do have a special place. Jesus spoke of a time when He would return and the Twelve would "sit on twelve thrones, judging the twelve tribes of Israel" (Mt. 19:28). Some of the songs in the first part of Luke's Gospel speak of the greatness of Christ in terms of Israel, which seems to indicate a continuing role for that nation (Lk. 1:32f., 54f., 68-79). At the Ascension the disciples ask Jesus, "Lord will you at this time restore the kingdom to Israel?" and Jesus seems to respond only to the question of when this will take place (Acts 1:6f.). Again, Paul makes it clear that God has not rejected the Jews (Rom. 11:1f.). The apostle looks for a time when "all Israel will be saved; as it is written, 'The Deliverer will come from Zion, he will banish ungodliness from Jacob . . .'" (v. 26).

Jerusalem will be "trodden down by the Gentiles," but this is only "until the times of the Gentiles are fulfilled" (Lk. 21:24; cf. Rev. 11:2). Then the Lord will return (Mt. 24:30), and the deliverance spoken of in Rom. 11:23-31 will be brought to pass. The Great Tribulation is "the time of Jacob's trouble" (Jer. 30:7, AV). Putting all this together, some premillennialists conclude that Israel will come to recognize Jesus as the true Messiah when He comes back in glory. The "veil" will be taken from their minds and they will turn in faith to Christ (2 Cor. 3:15f.). This does not mean that Israel will escape the Great Tribulation. Indeed, it is precisely then that the Jews will have a most important function. Since the Church has been removed at the Rapture, converted Israel is the only part of mankind left on earth that is faithful to God. So the purposes of God, specifically His missionary purposes, are worked out through Israel. That nation will occupy a key position during the events of the end time.

B. Postmillennialism. Postmillennialists put strong emphasis on biblical passages that speak of the advance of the gospel. Jesus Christ commissioned the Church to evangelize the world and the Holy Spirit gave it the power to carry this out. The parable of the leaven suggests that the Kingdom will steadily transform the world (Mt. 13:33). The gospel will be preached and more and more people will be converted until the entire world is christianized. The millennium will be a long period of peace and righteousness at the end of which Christ will return. Postmillennialists do not agree on whether the millennium will last for precisely a thousand years or will be much longer. And they do not suggest that the world will ever be perfected: there will be some whose Christianity will be purely nominal and others who do not respond to the gospel at all (although these will not be typical). They are certain, however, that the conversion of millions will bring enormous changes and that in the end the whole world will be christianized.

Postmillennialists emphasize that they are not speaking of a humanist ideal of progress by purely human effort. They do not look for a natural evolution of institutions and culture into a kind of secular heaven on earth. Rather, they envisage spiritual progress in the power of God. They point out that in the Great Commission Jesus commanded His followers not only to preach but also to "make disciples of all nations" (Mt. 28:19). This, they say, means more than that the gospel be preached as a form of witness to the nations (though that is included; cf. Mt. 24:14): it means that the preaching will be effective, that people will be converted and transformed. Since "all authority" has been given to Christ for the accomplishment of this commission, postmillennialists hold that it would be presumptuous to doubt that the commission can be fulfilled. Christians are not called to carry out a kind of experiment in preaching, the outcome of which is problematical, but to evangelize in the name of Christ and in the power of the Holy Spirit: thus they are certain of the gospel triumph. Postmillennialists often chide the Church and particularly themselves for slowness in carrying out the command of Christ.

In addition to the scriptural basis of their position, postmillennialists often point out that the world today, despite its many shortcomings, is better than it used to be. They contrast the cruelties, superstitions, and needless sufferings of earlier days with conditions at the present time. Opponents of this view point out that the present time, with its world wars, depressions, starvation, etc., is far from ideal. Postmillennialists reply that progress is never uniform, and there have always been times when people have regressed. Thus a long perspective is needed. Despite the presence of much evil, there is abundant evidence that God is at work in our world and that progress is being made.

Postmillennialism holds that when the millennium of peace, progress, and spiritual power has been accomplished, Christ will return. His coming will inaugurate not a millennial reign on earth but rather a general resurrection of saved and unsaved alike, the judgment of all mankind, and entrance into heaven or hell. Postmillennialists sometimes stress that the biblical picture of the judgment cannot easily be reconciled with the premillennial view of a rapture of the saints followed by the judgment of the wicked. The Bible usually pictures the judgment of all persons as one event; if there is a separation of judgments, the parable of the Tares puts the judgment of the wicked before the gathering of the saints (Mt. 13:30). Also, if the wicked are destroyed and the saints gathered in, no subjects will remain for the millennial reign.

Postmillennialists further point out that while the return of Christ is connected directly with judgment in official declarations of the Church, e.g., the Apostles Creed, the Nicene Creed, the Athanasian Creed, the Augsburg Confession, the Westminster Confession, and the Thirty-nine Articles, no part of the Church has an official statement of belief that includes a millennial reign on earth by Christ with the saints. Premillennialism in all its forms remains a private speculation and in its pretribulation form a very late speculation (not found before the 19th cent.).

Postmillennialism is not as popular as it once was, but its strength should not be underestimated. Those who hold this view take seriously certain important scriptural passages of which all must take due account.

C. Amillennialism. In Greek the letter *alpha* (*a*) is a negative prefix like "un-" in English; "amillennial" accordingly means "not millennial." The amillennial view is that there will be no literal millennium either before or after the Parousia, that the language about the millennium is metaphorical and must be understood as such. Amillennialists point out that the millennium is mentioned in only one passage of the Bible, Rev. 20. They find this a flimsy foundation on which to build a worthwhile edifice. They point out that no book of the Bible has more symbolic and metaphorical language than Revelation, and that "a thousand" has every appearance of being symbolic: it is the cube of ten, the number of completeness, and symbolizes something like the complete time that God has determined. Moreover, not even the most ardent millennarians, despite their claims, interpret all of Rev. 20 literally; e.g., Satan cannot be bound by a literal chain and thrown into a literal pit (vv. 1-3). Amillennialists see it as relevant also that those who reign with Christ are

"souls" (not resurrected bodies as the millennial system requires) and that "the second death" cannot mean literal death. Furthermore, they point out that Rev. 20 says nothing about the coming of Christ, and the words to which appeal is made in the preceding chapter say nothing about His coming and may well be interpreted otherwise. They claim that nothing in Rev. 20 shows that the thousand-year reign is to take place on earth; the description of the participants as "souls," as well as John's use of "throne," accords better with the reign taking place in heaven. They conclude, purely on the basis of exegesis, that Rev. 20 refers to the heavenly triumph of the faithful martyrs rather than to a millennial reign on earth by all the saints. With this basis for millennial theory thus removed, amillennialists find nothing to substantiate the theory. Although certain other scripture passages may not contradict the idea of the millennium, none of them proves it.

Amillennialists find a considerable objection to any millennial view in that, while the NT mentions the second coming repeatedly (probably more than any other doctrine), it mentions the millennium explicitly only in Rev. 20. If this doctrine is so important, they ask, why is it so widely ignored? Furthermore, the great apostasy (see II above) presents a great problem if one looks for a literal millennial reign of Christ on earth. If, as some premillennialists say, Christ will have reigned on earth for a thousand years and all mankind will have known the blessings of His rule during this time, how is it that so many will turn away from Him at the first opportunity? And if evangelism is to make the whole world Christian, as postmillennialists say, where will Satan find his recruits (especially if one believes in the perseverance of the saints, as do many postmillennialists)?

A further problem found in premillennial views is that the way the Bible refers to the resurrection of mankind seems to envisage all rising simultaneously, not in two groups separated by a thousand years (e.g., Dnl. 12:2; Jn. 5:28f.; but cf. LaSor, *Truth about Armageddon*, pp. 150-179). Likewise, the repeated references to the judgment of the righteous and the unrighteous give no indication that these will be separated by a thousand years (e.g., Mt. 13:30, 41-43; 16:27; 25:31-46; Rom. 2:5-10, 16; 1 Cor. 3:12-15; 2 Cor. 5:10; 2 Thess. 1:6-10; Rev. 20:11-15). Amillennialists find no place for a millennial reign on earth in passages that speak of the destruction of this earth and the coming of a new heaven and earth (e.g., 2 Pet. 3:10), because the renewal of the world seems to be connected with judgment rather than a millennial kingdom (Mt. 19:28). Moreover, to amillennialists the whole concept of a millennial reign is Jewish rather than Christian. The concept occurs unambiguously in passages such as 2 Esd. 7:27-29, but the NT emphasizes not a material kingdom but a kingdom of "righteousness and peace and joy in the Holy Spirit" (Rom. 14:17; cf. Col. 1:13f.). In accordance with this, some passages appear to indicate that Christ's kingdom is a present reality rather than a reign at the end of the world (e.g., Acts 2:30f.). To amillennialists, the premillennial insistence on a literal fulfillment of many scriptural prophecies appears to be a repetition of the Jews' error at Jesus' first coming. Those Jews looked for a literal, physical kingdom of David with Jerusalem as its capital, and they never did understand that Jesus' kingdom is "not of this world" (Jn. 18:36).

Some of these points are objections to one of the millennial views and some apply to both. Taken together, they convince amillennialists that the Bible has no solid evidence for a thousand-year reign of Christ and the saints on earth, either before or after the Parousia. They see the struggle between good and evil as continuing in the world up to the time of Christ's coming. Meanwhile, the Church must be active in evangelism, but not with the idea that it is bringing in the millennium (as postmillennialists hold). In the end, at His appointed time, Christ will return. This will be followed not by a millennial reign on earth (as premillennialists teach) but by the resurrection of all mankind, the final judgment, and the entrance into heaven or hell.

V. Conclusion.–From all of this it is plain that the Parousia is of the first importance in NT teaching. It will be the consummation of the whole process of salvation that Jesus Christ inaugurated when He came to earth. The death of Jesus, the means whereby sins are put away, shows the depths of God's love (Jn. 3:16; Rom. 5:8) and His determination to bring salvation to sinful people. The Parousia provides assurance that the work that was begun at such cost will not be allowed to fail. In His own good time God will bring this world with all its evil to an end and will bring in that perfect kingdom where His will is completely done. The purpose of the Parousia is not to cause Christians to occupy themselves with working out the precise way in which these prophecies will be fulfilled. Rather, it is God's assurance that He will allow nothing to stand in the way of the final fulfillment of His purpose. Christ will return. All evil will be put away as "the kingdom of the world" becomes "the kingdom of our Lord and of his Christ, and he shall reign for ever and ever" (Rev. 11:15).

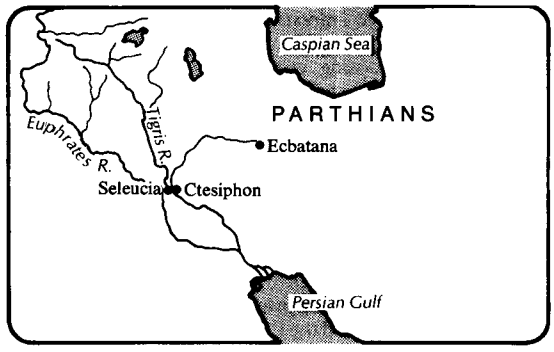
PARSHANDATHA pär-shan-dā'thə [Heb. *paršandāṯā'*–'made for battle'(?)]. The first of the ten sons of Haman (Est. 9:7). The name is Persian and has been explained in various ways. H. S. Gehman (*JBL*, 43 [1924], 327) translated it "the inquisitive one," from Avestan *frašna*, "question," plus *dāta*, "given to"; cf. other explanations in L. B. Paton, comm. on Esther (*ICC*, 1908), p. 70.

PARSIN. *See* MENE, MENE, TEKEL, AND PARSIN.



PART. The noun is a general term designating one of a number of units or subdivisions that together constitute a whole. It is frequently supplied by the RSV in rendering a Hebrew or Greek genitive construction (e.g., cf. Ex. 29:12, 20f.; AV, lit., "take of the blood"; cf. also 1 Cor. 12:15f.; AV, lit., "not of the body"). Elsewhere it represents a variety of terms, including Heb. *dāḇār* (lit. "thing"; 1 K. 6:38), *ḥelqâ* (lit. "plot of land"; Ruth 2:3), *beṯer* (lit. "piece [of sacrificial meat]"; Jer. 34:18f.), *ḥeḏer* ("inner [most] parts," Prov. 18:8; 20:27, 30; etc.), *qāṣeh* ("outlying parts," Nu. 11:1; "uttermost parts," Dt. 30:4), *yᵉrēḵâ* ("farthest parts," Jer. 6:22; 25:32; etc.; "innermost parts," 1 S. 24:3 [MT 4]; Am. 6:10; "uttermost parts," Ezk. 32:23; etc.), *'aḥᵃrîṯ* ("uttermost parts," Ps. 139:9). In the NT it most often renders Gk. *méros* (lit. "part, portion, region"; e.g., Lk. 11:36; Jn. 13:8; 19:23); but cf. *merís* in

Acts 8:21 and *mélos* in 1 Cor. 12:20, 22 (*see* MEMBER). The RSV uses "take part" to translate *koinōnós* (Mt. 23:30; AV "partaker"), *koinōnía* (2 Cor. 8:4; AV "fellowship"), and *synkoinōnéō* (Eph. 5:11; Rev. 18:4; AV "have fellowship with," "be partaker of"), and "take [my] part" to render *paragínomai* (2 Tim. 4:16; AV, lit., "stand by"). On the expression "do the part of the next of kin" (Ruth 3:13), *see* KIN I. The AV uses "part" interchangeably with "portion" as a translation of Heb. *ḥēleq*, while the RSV more consistently uses the latter term (*see* PORTION).

The verb "part" generally means to divide into parts (e.g., Lev. 11:4-7, etc. [Heb. hiphil of *pāras*]; 2 K. 2:8, 14 [niphal of *ḥāṣâ*]; Jn. 19:24 [Gk. *diamerízō*]) or to separate from or take leave of someone (e.g., Josh. 22:9 [Heb. *yālaḵ*]; Lk. 9:33 [Gk. pass. of *diachōrízō*]; 24:51 [*diístēmi*]; Acts 21:1 [*apospáō*]; Philem. 15 [*chōrízō*]). The AV uses the verb in several ways that are no longer familiar: e.g., for Heb. *ḥālaq* in 1 S. 30:24 (cf. RSV "share") and for the piel of *pāraḏ* in Prov. 18:18 (cf. RSV "decide between").

N. J. O.

PARTHIANS pär'thi-ənz [Gk. *Parthoi* < Old Pers. *Parthava*] (Acts 2:9). The people inhabiting the area southeast of the Caspian Sea (its exact ancient boundaries are uncertain). They apparently came from the same peoples as the Turanians and entered Iran from Central Asia. They fell under the rule of various ancient nations: Assyrians, Medes, Persians, Greeks (Alexander), Seleucids, Romans, and finally the Persian Sassanids *ca.* A.D. 226. Nevertheless, they were responsible to a great extent for the failure of Alexander's successors to maintain and enlarge their eastern territories.

The Behistun inscription of Darius I (*ca.* 520 B.C.) first mentions the name *Parthava*. Parthia's history as a Persian satrapy is not well known. It was still a province of the Persian empire when Alexander the Great conquered Persia (332 B.C.). After the breakup of Alexander's empire the Parthians were under the Seleucids until 250 B.C., when Arsaces freed them from the Seleucids and launched the kingdom of the Parthians. Arsaces became king and his brother Tiridates followed him and took his name. Henceforth the name "Arsaces" became the generic name of succeeding Parthian kings. The classical sources aid us greatly in identifying these kings by using their individual names. The Parthian kings traced their ancestry back to the Persian king Artaxerxes II. The Parthian kingdom was made up of small vassal kingdoms that referred to the Parthian king as "king of kings." By the time the Romans appeared in the East the Parthian empire reached the Euphrates. The first great Parthian king was Mithradates I (*ca.* 171-138 B.C.). He extended the kingdom's rule to Babylon, and at its height the kingdom stretched across modern Iran to the Indus River.

Inevitably the Romans and Parthians became the two dominant competing powers in the Orient. Several wars were fought, but in 53 B.C. Crassus and his Roman army were totally defeated and their Roman standards were lost at Carrhae (Ḥarrân). Crassus had despoiled the Jewish temple and the Jews began to look upon the Parthians as possible liberators from the Roman yoke and Greek cultural tyranny. Later Mark Antony also suffered defeat at the hands of the Parthians. The Parthian military became famous for its cavalry and the accuracy of its bowmen — "a Parthian shot" being coined as a proverb because of certain strategies of the Parthian cavalry. The Roman legions (on foot) were often effectively harassed by the Persian cavalry in desert areas. Indeed, the most original contributions of the Parthians were in their military prowess and strategy. The Parthians were also famous for their horses.

The Roman emperor Trajan carried on war successfully against the Parthians (A.D. 114-117). The Romans retreated under Hadrian and Roman power did not extend farther east again. Several cities served as capitals during the Parthian era: Dara (under Arsaces probably the first capital), Ecbatana, Seleucia (on the Tigris River), and Ctesiphon. The fate of the nation fluctuated from A.D. 117 to 217 until the Persian Artaxerxes defeated the Parthians and thereby created the Persian Sassanian Empire (A.D. 226).

The Parthians did not establish a significant civilization. They took most of their culture, such as they had, from the Greeks, Persians, and Babylonians. Their religion was Persian — they served Ahura-Mazda — and they spoke Pahlavi (north Persian dialect). They themselves seemed to be quite tolerant in religious matters and the Jews were not persecuted in Parthia for religious reasons. For a brief time the Jews looked upon the Parthians as deliverers from the power of Rome, especially in 40-37 B.C. when they helped establish Antigonus as the last Hasmonean king of the Jews. But other events seem to indicate that any realistic hope of ultimate deliverance from Rome by Parthia was unlikely.

Josephus noted that many Jews settled in Parthian territory (*Ant.* xv.2.1f. [11-17]). They spoke an Aramaic dialect and sent tribute to the Jerusalem temple (*Ant.* xviii.9.1 [310-13]). He relates two stories that show the unfortunate hostility that arose from time to time between the Jews in Parthia and their neighbors. One concerns the foolish behavior of two Jewish brothers and the other the terrible massacre of fifty thousand Jews by indignant Syrians and Greeks in Seleucia on the Tigris (*Ant.* xviii.9.1-9 [310-379]). The stories show that help from the Parthians in the Jews' struggles against Rome was largely illusory.

The Parthians are mentioned in 1 En. 56:5 as the object of divine judgment. The NT book of Acts states that Parthians were in Jerusalem on Pentecost (Acts 2:9-11). These may have been Jews or proselytes. The book of Revelation (13:3; 17:8, 17, etc.) is said by some to refer to a legend that had grown up about Nero (cf. comms. by R. Mounce [*NICNT*, 1977], pp. 252f.; G. R. Beasley-Murray [*NCBC*, rev. ed. repr. 1981], pp. 210f.). Nero was expected to return from the East at the head of the Parthian army as antichrist. Rev. 6:1-8 may have the famous Parthian horsemen and bowmen as its model.

E. E. CARPENTER

PARTIALITY; SHOW PARTIALITY; BE PARTIAL [Heb. hiphil of *nāḵar* + *pānîm* (Dt. 1:17; 16:19; Prov. 24:23; 28:21; Isa. 3:9), *nāśā' pānîm* (Lev. 19:15; Dt. 10:17; Job 13:8, 10;

32:21; etc.), *maśśō' pānîm* (2 Ch. 19:7), *hāḏar* (Ex. 23:3); Gk. *prósōpon lambánō* (Lk. 20:21; Gal. 2:6), *prosōpolēmpsía* (Rom. 2:11; Eph. 6:9; Col. 3:25; Jas. 2:1), *prosōpolēmptéō* (Jas. 2:9), *prosōpolēmptēs* (Acts 10:34), *prósklisis* –'inclination' (1 Tim. 5:21)]; AV also RESPECT OF PERSONS, ACCEPT ONE'S PERSON, COUNTENANCE, etc.; NEB also (SHOW) FAVOUR, TAKE ONE'S PART, etc.

The Hebrew phrase *nāśā' pānîm* (lit. "lift up the face") originally referred to the graciously accepting act of raising up the face of one who had prostrated himself (cf. Gen. 40:13, 20; "accept," 32:20; *see also* FAVOR). As a judicial expression, however, the phrase came to be used pejoratively to denote unjust preferential treatment (*THAT*, II, 442). A similar development occurred with the phrases *hikkîr* (hiphil of *nāḵar*, lit. "pay attention to") *pānîm* and *hāḏar* (lit. "show respect, honor") *pānîm* (cf. *hāḏar pānîm* [RSV "defer"] used in parallel with *nāśā' pānîm* ["be partial"] in Lev. 19:15; *hāḏar* occurs alone in Ex. 23:3; see *TDOT*, III, 341). Through the LXX the Hebraism *prósōpon lambánō* (lit. "take or accept the face") entered NT Greek. This phrase and the compound forms derived from it (Gk. *prosōpolēmpsía*, etc.) have not been found in pre-Christian secular Greek.

In biblical times judges were continually tempted to pervert justice by showing favoritism. Most often the temptation was to favor the rich and powerful (cf. the association of partiality with taking bribes in Dt. 10:17; 16:19; 2 Ch. 19:7; Sir. 35:12); but covenant law also forbade discrimination in favor of the poor (Ex. 23:3; Lev. 19:15; cf. Dt. 1:17). The evil of judicial partiality was denounced by wisdom teachers (e.g., Prov. 18:5; 24:23-25; 28:21; cf. 17:15; Job 13:8, 10; etc.) and by the prophets (e.g., Isa. 3:9; cf. Ps. 82:2; Mal. 2:9 condemns priestly partiality). The early Christian community continued to struggle with the problem of discrimination based on worldly social distinctions (Jas. 2:1-9; cf. 1 Tim. 5:21).

The standard for human justice is the righteousness of God, who "shows no partiality" in His dealings with rich and poor (Job 34:19; cf. Dt. 10:17f.; 2 Ch. 19:7; Sir. 35:12f.), Jew and Gentile (Acts 10:34; Rom. 2:11), masters and slaves (Eph. 6:9; Col. 3:25), and those of small or great reputation (Gal. 2:6), but "judges each one impartially [Gk. *aprosōpolēmptōs*] according to his deeds" (1 Pet. 1:17). In Lk. 20:21 the scribes and chief priests (with simulated sincerity) address Jesus as a *didáskalos* who teaches "the way of God" without partiality.

N. J. O.

PARTICULAR; PARTICULARLY. The adverbial phrase "in particular" occurs twice in the AV, both times with the obsolete meaning of "individually": 1 Cor. 12:27 (Gk. *ek mérous*; RSV "one by one") and Eph. 5:33 (*hoi kath' héna hékastos*; AV "every one of you in particular"; RSV "each one of you"). The adverb "particularly" occurs in the same sense in the AV of Acts 21:19 (*kath' hén hékaston*; RSV "one by one"). In He. 9:5, AV, it renders *katá méros* (lit. "part by part"; RSV "in detail"); cf. the AV's use of the plural noun to render the same Greek phrase in 2 Macc. 2:30 (RSV "with details"). The adjective occurs in the sense of "special" (Vulg. *peculiares*) in the first Prologue to Sirach, AV (the whole section is omitted by the RSV).

D. M. EDWARDS

PARTRIDGE [Heb. *qōrē'*] (1 S. 26:20; Jer. 17:11).

Three species of partridge are to be found in Palestine: the rock or Greek partridge or chukar (*Alectoris graeca*), the desert or sand partridge (*Ammoperdix heyi*), and the black partridge or francolin (*Francolinus francolinus*), found in marshes or dense vegetation.

One ancient method of hunting these stout-bodied game birds appears in the psalmist's reference to the snare of the fowler (Ps. 91:3; cf. 1 S. 26:20). Another method involved the use of tame partridges as decoys (Sir. 11:30). But whether inhabiting the rocky highlands, the deserts, or marshy areas, these birds were adept at hiding both themselves and their eggs from those that preyed upon them.

Explanations of the allusion to the actions of partridges in Jer. 17:11 are numerous. Perhaps the meaning is that more than one hen laid eggs in the same nest (V. C. Holmgren, *Bird Walk through the Bible* [1972], p. 134). The hen that completed the incubation process would thus hatch a mixed brood, some of which did not belong to her.

G. WYPER

PARTY [Gk. *haíresis*] (Acts 5:17; 15:5; 26:5; Gal. 5:20, "party spirit"); AV SECT, HERESIES (Gal. 5:20); NEB also GROUP; [*méros*] (Acts 23:9); AV PART; **CIRCUMCISION PARTY** [*hoí ek (tḗs) peritomḗs*–'those from the circumcision'] (Acts 11:2; Gal. 2:12; Tit. 1:10); AV THEY THAT WERE OF THE CIRCUMCISION; NEB THOSE WHO WERE OF JEWISH BIRTH, ADVOCATES OF CIRCUMCISION, JEWISH CONVERTS. A group of persons committed to certain religious or philosophical teachings and practices. Sometimes the word occurs in a pejorative sense.

In classical usage *haíresis* and its cognate verb *hairéō* may refer to the capture of a town (Herodotus iv.1), the act of taking or choosing, or the choice made (i.11). A plan, purpose, thought, or course of action can also be denoted (Plato *Phaedrus* 256c). In the middle voice (*hairéomai*) the word may denote joining a party (Herodotus i.108) or adopting an opinion (iv.137). Hence *haíresis* came to mean those who "chose" to associate with a political party, a philosophical school, or a religious community espousing a particular view. Thus Josephus mentioned Herod's murdering forty-five men of Antigonus's "party" (*Ant.* xv.1.2 [6]); he also described the three major religious groups (*treís haireseis*) in Judaism prior to Christianity: the Pharisees, the Sadducees, and the Essenes (*BJ* ii.8.2-14 [119-166]).

The NT likewise mentions the "parties" of the Pharisees and Sadducees (Acts 5:17, *haíresis tôn Saddoukaiōn*; 15:5, *tḗs hairéseōs tôn Pharisaiōn*), with the Pharisees referred to as "the strictest party" (26:5, *katá tḗn akribestátēn haíresin*). These two parties held conflicting opinions on certain theological matters, e.g., resurrection and the reality of angels (23:6-10). *Méros* (lit. "part") in Acts 23:9 denotes the part of the crowd that were Pharisees in opposition to the Sadducees.

The term "circumcision party" (Acts 11:2; Gal. 2:12; Tit. 1:10) calls for comment. B. H. Throckmorton, Jr. (*IDB*, III, *s.v.*) and J. N. D. Kelly (*Pastoral Epistles* [*HNTC*, 1963], p. 234) interpreted this phrase to denote Jewish Christians. This is unsatisfactory, however, since some other Jewish Christians (e.g., Paul) would probably not have pressed for stringent obedience to the law, especially as regards circumcision, even before the Apostolic Council ruled that it was not necessary. F. F. Bruce (*Comm. on the Book of the Acts* [*NICNT* 1954], p. 234) stated that Acts 11:2 denotes Jewish Christians zealous for the law, whereas Acts 10:45 denotes nothing more than "Jews."

H. Conzelmann (*Die Apostelgeschichte* [*HNT*, 1963], p. 66) claimed that "circumcision party" denotes the entire (Jewish) Christian community in Jerusalem. But one wonders whether every Jewish Christian in Jerusalem would be so militant.

"Circumcision party," especially as it occurs in Acts 11:2, may best be interpreted in the light of Acts 15:5, where the instigation for circumcision came from "some believers who belonged to the party of the Pharisees." Like 11:1f., Acts 15:1-5 mentions both the circumcision issue and Judea, the residence of those who would be most concerned about circumcision: the believers among the Pharisees. Gal. 2:12 may also be interpreted in the light of Acts 15:1-5. Though the controversy took place in Antioch, Paul's opponents had come from James in Jerusalem. These opponents were Pharisees who had professed belief in Jesus as Messiah, but desired all adherents to the faith to keep the laws of Moses, especially circumcision (so M. Hengel, *Acts and the History of Earliest Christianity* [Eng. tr. 1979], p. 116).

Haíresis when used pejoratively denotes a group whose belief or practice differs from what is considered orthodox. This use is found in both Hellenistic Judaism and apostolic Christianity. The Hebrew antecedent here is *mîn*, which in biblical Hebrew means biological kind or species (Gen. 1:11f.; cf. CD 12:14). Later, however, the term came to denote varieties of iniquity (CD 4:16, *šlwšt myny ḥṣdq*, "three kinds of whoredom") and the practitioner of the unorthodox (including Jewish Christians): "Who is a *min*? (A Jew) who worships idols" (T.B. *Horayoth* 11a).

Thus the rabbis used *mînîm* as a common noun to describe religious movements that they opposed, such as Jewish Christianity (T.B. *Berakhoth* 28b), Gnosticism, and heretical Judaism (*Jew. Enc.*, VIII, 594f.; Jastrow, p. 775). This kind of thinking is identical to that of Paul's accusers in Acts 24:5, who charged him with being a "ringleader of the sect of the Nazarenes." In v. 14 Paul defended the teaching of the primitive Church, "the Way, which they call a sect [*haíresin*]." This new "Way" claimed a definite continuity with OT revelation, shared some of the important doctrines of rabbinic Judaism (e.g., the resurrection of the body, the age to come, the inspiration of the Scriptures), and exhibited many characteristics of the scriptural exegesis of the early rabbis. It did not, however, consistently or rigorously observe certain pharisaic practices such as circumcision, strict sabbath observance, and ritual cleansing.

The NT authors also used *haíresis* to denote groups at variance with the teachings and practices of the apostolic Church. In Gal. 5:20 "party spirit" is grouped with "selfishness" (*eritheíai*) and "dissension" (*dichostasíai*) as "works of the flesh." The *haíresis* ("faction") in 1 Cor. 11:19 is the group that is not "approved" (AV; cf. NIV; Gk. *dókimos*) and that separates itself from the body of Christ. 2 Pet. 2:1 similarly depicts "false teachers" (*pseudodidáskaloi*) and "false prophets" (*pseudoprophḗtai*), who will introduce "destructive heresies" (*haíreseis apṓleías*). In the postapostolic age *haíresis* became a technical term for heresy (e.g., Ign. Eph. 6:2).

PARUAH pə-rōō'ə [Heb. *pārû(a)ḥ*]. Father of the Jehoshaphat who was one of the twelve officers assigned to provide food for Solomon's household; Issachar was his district (1 K. 4:17).

PARVAIM pär-vā'əm [Heb. *parwāyim*]. A region famous for its gold, which was used as one of the decorative elements in the temple (2 Ch. 3:6). Suggested identifications of this source of gold include *Farwa* in south Arabia or *el-Farwein* in north Arabia. On the basis of rabbinic statements it has also been suggested that it had a reddish hue (Midr. *Cant.* 3:10), or that the reference is to some miraculous golden trees which bore golden fruit (T.B. *Yoma* 21b, 39b). Parvaim also appears in a scroll from Qumrân (1QapGen 2:23) as the "home" of Enoch.

PASACH pā'sak [Heb. *pāsaḳ*]. Son of Japhlet, descendant of Asher (1 Ch. 7:33).

PASCHAL LAMB. *See* PASSOVER.

PAS-DAMMIM pas-dam'əm [Heb. *pas dammîm*]. The site of one of David's victories over the Philistines (1 Ch. 11:13). *See* EPHES-DAMMIM.

PASEAH pə-sē'ə [Heb. *pāsē(a)ḥ*—'limping']; AV also PHASEAH (Neh. 7:51).

1. Son of Eshton, descendant of Judah (1 Ch. 4:12).

2. [Gk. Apoc. *Phinoe*]; AV PHINEES; NEB PHINOE. The head of a family of temple servants (*see* NETHINIM) who returned from the Exile with Zerubbabel (Ezr. 2:49 par. Neh. 7:51; 1 Esd. 5:31).

3. Father of Joiada who helped to repair the Old Gate of Jerusalem (Neh. 3:6).

PASHHUR pash'ər [Heb. *pašḥûr* < *paššāḥ*—'destruction' + *sᵉḥôr*—'all around' (see J. A. Thompson, *Book of Jeremiah* [*NICOT*, 1980], p. 455), or possibly Egyp. *Pš Ḥōr* (KoB, p. 784)]; AV PASHUR.

1. Son of Immer; a priest and chief officer in the temple in the time of Jeremiah (Jer. 20:1). His function was apparently to maintain order in the temple precincts. He punished Jeremiah for his gloomy prophecy by beating him and putting him in stocks (v. 2). Following his release, Jeremiah pronounced on Pashhur the judgment of seeing his family and nation carried into exile by Babylon because he had prophesied falsely (vv. 3-6). Jeremiah also gave him a new name, MAGOR-MISSABIB (RSV "Terror on every side"), which is a wordplay on "Pashhur" (v. 3). He was probably one of the officials deported in 598 B.C., because soon after that his position was occupied by Zephaniah son of Maaseiah (29:25f.). This Pashhur may be the same as **2** below.

2. Father of Gedaliah, one of the princes who attempted to have Jeremiah executed (Jer. 38:1-6); possibly the same as **1** above.

3. Son of Malchiah; a prince of Judah. When Jerusalem was under siege by Babylon, he was sent by King Zedekiah to request an oracle from Jeremiah (Jer. 21:1f.); but Jeremiah's response was a prophecy of doom (21:3ff.). Later he was among those who heard Jeremiah's advice to capitulate to Babylon and sought King Zedekiah's permission to have Jeremiah executed for treason (38:1-6). One of his descendants (Adaiah) was among the priests who lived in Jerusalem after the Exile (1 Ch. 9:12 par. Neh. 11:12).

4. [Gk. Apoc. *Phassour, Phaisour*]; AV PHASSARON, PHAISUR; NEB PHASSURUS, PHAESUS. Head of a priestly family that returned from the Exile with Zerubbabel (Ezr. 2:38 par. Neh. 7:41; 1 Esd. 5:25). Some members of this family had married foreign women (Ezr. 10:22 par. 1 Esd. 9:22).

5. A postexilic priest who sealed the covenant with Nehemiah (Neh. 10:3). N. J. O.

PASS [Heb. nouns: *maʿᵃḇār* (1 S. 13:23), *maʿbārâ* (e.g., 1 S. 14:4)]: AV also PASSAGE; [Heb. verbs: usually *ʿāḇar*–'pass by, through, or over,' also *pāsaḥ*–'skip over,' *hālaḵ*–'go,' *ḥālap*–'pass by or away' (e.g., Job 9:11), *ʿāḏâ*–'walk over' (28:8), qal and hiphil of *bārah*–'pass through' (e.g., Ex. 26:28), *yāṣâ*–'go forth' (e.g., Nu. 34:4), qal and hiphil of *bôʾ* (e.g., "come to pass," Dt. 13:2; "bring to pass," 2 K. 19:25), *hāyâ*–'be' (e.g., 1 K. 1:21), piel of *kālâ*–'finish' (Prov. 16:30), etc.]; AV also GO ON, ABIDE, etc.; NEB also CONTINUE, GO, CROSS, AVOID, VANISH, etc.; [Gk. *érchomai*–'go' (Mt. 15:29), *parérchomai*–'pass by or away' (e.g., Mt. 5:18), *antiparérchomai*–'pass by on the other side' (Lk. 10:31f.), *diérchomai*–'pass through' (e.g., Mt. 12:43), *apérchomai*–'go away' (e.g., Rev. 9:12), *proérchomai*–'go forward' (Acts 12:10), *paraporeúomai*–'pass by' (e.g., Mt. 27:39), *diaporeúomai*–'go through' (Rom. 15:24), *ekporeúomai*–'go out' (Mk. 7:19), *parágō*–'pass by' (e.g., Mt. 9:9, 27), *diágō*–'draw through,' 'live' (Tit. 3:3), pass. of *katargéō*–'nullify, abolish' (e.g., 1 Cor. 2:6), *diabaínō*–'go through' (Lk. 16:26), *metabaínō*–'pass over' (e.g., Jn. 5:24), *diodeúō*–'travel through' (Acts 17:1), *ekbállō*–'throw out' (Mt. 15:17), *chōréō*–'go out' (15:17), *páresis*–'passing over,' 'remission' (Rom. 3:25), *hypérechō*– be above' (Phil. 4:7), *gínomai*–'happen' (e.g., Mk. 11:23), *diagínomai*–'go through' (e.g., Mk. 16:1), pass. of *plēróō*– 'fill up' (Acts 7:30; 9:23)]; AV also BE PERFORMED, COME, JUDGE, CEASE, etc.; NEB also DISAPPEAR, VANISH, VISIT, etc.; **PASSAGE** [Heb. inf. of *ʿāḇar*] (Nu. 20:21); NEB CROSS; [*lišká*–'hall'] (Ezk. 42:4, 11f.); AV CHAMBER; [Gk. *periochḗ*–'portion (of Scripture)'] (Acts 8:32); AV PLACE; [*epí*–'at, on'] (Mk. 12:26; Lk. 20:37); AV "in"; NEB "in the story of"; **PASSER-BY** [Heb. part. of *ʿāḇar* (Ezk. 16:15, 25); Gk. part. of *parágō* (Mk. 15:21)]; AV, NEB also, PASS BY.

As a noun, "pass" denotes a narrow route through mountainous terrain (e.g., 1 S. 14:4; Isa. 10:29; *see also* MICHMAS; cf. the use of *maʿᵃḇār* and *maʿbārâ* to denote a place where one crosses a body of water; *see* FORD). "Passage" occurs in three different senses: (1) permission to pass through someone's territory (Nu. 20:21), (2) a long, narrow hall in the temple (Ezk. 42:4, 11f.), and (3) a specific portion of Scripture (Mk. 12:26; Lk. 20:37; Acts 8:32).

As a verb, "pass" (in the OT, usually Heb. *ʿāḇar*) most often denotes movement from one place to another. Persons or nations "pass through" a land (e.g., Gen. 12:6; Dt. 2:4, 18; Jgs. 11:17, 19) or "pass over" a river (e.g., Dt. 27:12; Josh. 3:14). For Israel the crossing of the Jordan (cf. Josh. 3–4), the last barrier before the Promised Land, signified the fulfillment of God's promises (cf. Dt. 9:1; 11:31; 27:2; etc.). This "passing over" the Jordan is reminiscent of Israel's "passing over" the Red Sea (Josh. 4:23). Heb. *ʿāḇar* signifies judgment, however, when on the night of Israel's liberation the Lord "passes through" (*ʿāḇar*) the land, slaying the firstborn of the Egyptians, but "passes over" (*pāsaḥ*) the Israelite houses that had blood on the doorposts (Ex. 12:12f., 23, 27; *see also* PASSOVER). Picking up this image, Amos later prophesies that a time will come when the Lord will no longer "pass by" (*ʿāḇar*) Israel (Am. 7:8; 8:2) but will "pass through" (*ʿāḇar*) the land in judgment (5:17; see Mays, pp. 99, 133). Ezekiel likewise prophesies judgment on Judah for foolishly playing the harlot with passers-by (Ezk. 16:15, 25; cf. Prov. 9:15). Laid waste so that none can "pass through" (*ʿāḇar*, Jer. 9:12), Judah becomes an object of horror and hissing for all who "pass by" (*ʿāḇar*, 18:16; this fate also awaits Edom [49:17] and Nineveh [Zeph. 2:15]). Yet this is not God's last word for His chosen people, for He promises that "when you pass through the waters I will be with you" (Isa. 43:2).

The expression "it came to pass" occurs thousands of times in the AV as a translation of Heb. *wayᵉhî* (Gk. *kaí egéneto* in the NT), an introductory formula used to connect sections of narrative. The RSV most often omits the formula, but it occasionally uses "come to pass" or "bring to pass" to emphasize God's action in causing historical events and fulfilling prophecies (e.g., 2 K. 15:12; 19:25; Isa. 37:26; 46:11; Lam. 3:37; cf. Mk. 11:23; Lk. 1:20; 1 Cor. 15:54).

In the NT Gk. *parérchomai* sometimes has the literal sense of "pass by" or "go by," e.g., used of Jesus walking past the disciples on the lake (Mk. 6:48) or walking through a city (Lk. 18:37). But it occurs more often in the figurative sense of "pass away" or "disappear," especially in passages with a strong eschatological note (e.g., 2 Pet. 3:10). Paul speaks of the old condition that has "passed away" (i.e., lost force, become invalid) when a person becomes a "new creation" in Christ (2 Cor. 5:17). Jesus promised that while heaven and earth will "pass away," His words will remain (Mt. 24:35; Mk. 13:31; Lk. 21:33; cf. *apérchomai*, Rev. 21:1, 4).

Greek *páresis* occurs in the NT only at Rom. 3:25 (RSV "pass over"; AV "remission"; NEB "overlook"). In classical Greek it sometimes meant simply "passing over," but it also occurred with the legal meaning "letting go unpunished" (Bauer, rev., p. 626; *see* FORGIVENESS I; also W. G. Kümmel, *Journal for Theology and the Church*, 3 [1967], 1-13; J. Murray, pp. 119f.; *TDNT*, I, 511).

The author of the Epistle to the Hebrews draws a comparison between Jesus and the Aaronic high priests. Whereas the latter were given the privilege of passing through the veil into the holy of holies once each year, Jesus, the "great high priest," has "passed through [*diérchomai*] the heavens" to the very throne of God (4:14; see Bruce, p. 85).

PASSING OF MARY. *See* APOCRYPHAL GOSPELS II.F.

PASSION; PASSIONS [Heb. *qinʾâ*–'jealousy, ardor'] (Prov. 14:30); AV ENVY; [Gk. *epithymía*] (Rom. 6:12; Eph. 2:3; 2 Tim. 2:22; Tit. 2:12; 3:3; 1 Pet. 1:14; etc.); AV LUSTS; NEB DESIRES, SENSUALITY, IMPULSES, etc.; [*hēdonḗ*] (Jas. 4:1, 3); AV LUSTS; NEB BODILY DESIRES, PLEASURES; [*órexis*] (Rom. 1:27); AV, NEB, LUST; [*páthos*] (Rom. 1:26; Col. 3:5; 1 Thess. 4:5); AV AFFECTIONS, INORDINATE AFFECTION, LUST; NEB also "giving way"; [*páthēma*] (Rom. 7:5; Gal. 5:24); AV MOTIONS, AFFECTIONS; [*thymós*] (Rev. 14:8; 18:3); AV WRATH; NEB FIERCE, mg. WRATH; [*páschō*] (Acts 1:3); NEB DEATH; [*p*]*roúmai*–'be burned'] ("be aflame with passion," 1 Cor. 7:9); AV BURN; NEB "burn with vain desire"; [*hypérakmos*] ("passions are strong," 1 Cor. 7:36); AV "pass the flower of her age"; NEB "instincts are too strong," mg. "ripe for marriage."

These terms are used in the RSV with three basic meanings.

1. Suffering.–This is the original meaning of "passion," which is derived from Lat. *passio* ("suffering"), from the verb *patior*, a cognate of Gk. *paschō* ("suffer," "undergo, experience"). This use of "passion" is now obsolete except in reference to Jesus' SUFFERING. In Acts 1:3 "after

his passion" (RSV, AV, and most earlier English versions) is influenced by the Vulg. *post passionem suam,* which translates Gk. *metá tó patheín,* literally "after he had suffered." In this context *patheín* (aorist infinitive of *páschō*) refers specifically to Jesus' death (cf. NEB; cf. also *páschō* in the sense of "die" in Lk. 24:26, 46; Acts 3:18; 17:3; 26:23), which is contrasted with His resurrection (see *TDNT,* V, 913).

The Passion narratives are those sections of the Gospels that deal with Jesus' suffering during the last few days of His earthly life, including the Last Supper, His agony in Gethsemane, His arrest and trial, and His crucifixion. *See* LORD'S SUPPER; JESUS CHRIST IV.D; JESUS CHRIST, ARREST AND TRIAL OF; CROSS VI.

II. Intense Sensual Desire.–The RSV uses "passion" or "passions" once in the OT (Prov. 14:30) and twenty-five times in the Epistles to indicate lust for bodily pleasures, e.g., sex, drunkenness, and material possessions. The most common term, Gk. *epithymía,* can represent "desire" in a morally neutral or positive sense (cf. Jn. 8:44; Phil. 1:23; 1 Thess. 2:17; 1 Tim. 3:1); but in the NT it usually indicates an evil desire — or, more precisely, the inability to renounce or control, for the sake of obedience to God, desires that may in themselves be natural. *Hēdonḗ* (cf. *hēdýs,* "sweet") can simply mean "pleasure" (cf., e.g., Lk. 8:14; 2 Pet. 2:13; *see* PLEASE), but in the NT it usually denotes "desire for sensual pleasure." Thus *epithymía* and *hēdonḗ* are closely related and can be used as synonymous parallels (Tit. 3:3).

Páthēma (from *páschō*) usually means "suffering" and is so rendered by the RSV elsewhere (e.g., Rom. 8:18; 2 Cor. 1:5-7; Phil. 3:10; Col. 1:24). But in Gal. 5:24 (cf. also Rom. 7:5) the *pathḗmai* ("passions") and *epithymíai* ("desires") of the *sárx* ("flesh") clearly represent the impulse to engage in the vices listed in 5:19-21. The cognate *páthos* can also mean "suffering," "experience," or "emotion" in a general sense (cf. *homoiopathḗs,* lit. "of similar experiences or feelings," Acts 14:15; Jas. 5:17; AV "[of] like passions"; RSV "of like nature"). Paul, however, used it only in the sense of "passion" — specifically "erotic passion" (e.g., Rom. 1:26). In Col. 3:5 *páthos* ("passion") appears with *epithymía kakḗ* ("evil desire") in a list of vices, and in 1 Thess. 4:5 *en páthei epithymías* is rendered "in the passion of lust" (AV "in the lust of concupiscence"; NEB "giving way to lust").

Órexis, which occurs only once in the NT, is related to the verb *orégomai,* which is used in a positive sense in 1 Tim. 3:1 ("aspire") and He. 11:16 ("desire") but in a negative sense in 1 Tim. 6:10 ("craving"); in Rom. 1:27 the noun denotes "sexual desire." In 1 Cor. 7:36 Paul's use of *hypérakmos* (from *hypér,* "beyond," and *akmḗ,* "highest point" or "prime") is ambiguous: it could refer either to the man's sexual desire (cf. RSV, NEB) or to the woman's maturity (cf. AV, NEB mg.), but the context makes the former more likely.

The authors of the NT Epistles viewed sensualism as a serious threat to the Christian community, and they strongly opposed those who taught that bodily actions were a matter of moral indifference (*see* GNOSTICISM VI.C). Uninhibited indulgence of sensual desires is characteristic of the old nature — of living according to the flesh rather than the Spirit (e.g., Rom. 7:5; Gal. 5:16-21; Eph. 2:3; 1 Pet. 2:11). Those who make their "own passions" (*ídiai epithymíai,* 2 Pet. 3:3; "own likings," 2 Tim. 4:3; "own desire," Jas. 1:14) the goal of their lives are "ungodly" (Jude 14-19), because they have chosen to follow their own will instead of God's (cf. 1 Pet. 4:2). They are "lovers of self . . . lovers of pleasure [*philēdonoi*] rather than lovers of God" (2 Tim. 3:2-4). Their LICENTIOUS life-style promises freedom, but it makes them slaves to sin and death (Rom. 6:16; 2 Pet. 2:18f.). When *hēdonḗ* (lust for sensual pleasures) rules one's life, it creates conflict within oneself (Rom. 7:18-23), with other persons (Tit. 3:3; Jas. 4:1f.), and with God (4:3f.; cf. 1 Jn. 2:15-17). Freedom from its enslavement can be found only by dying to the old sinful self and rising through Christ to a new life ruled by the Spirit (Rom. 6:6-11; 8:1-11; Gal. 5:22-24; Eph. 4:22-24; cf. Col. 3:5-10; *see* NEW MAN; OLD SELF).

See also DESIRE; FLESH III.B; LUST; SLAVE.

III. Wrath.–In Rev. 14:8; 18:3 the RSV renders Gk. *toú oínou toú thymoú tḗs porneías* "the wine of her impure passion." The AV's literal translation, "the wine of the wrath of her fornication," is more accurate. In the NT *thymós* always means WRATH, and in Revelation it almost always means divine wrath (e.g., Rev. 14:19; 15:1, 7; 16:1; cf. the synonym *orgḗ* in 6:16f.; 11:18; 16:19; 19:15). In 14:8; 18:3 two images are combined: "the wine of God's wrath," which must be drunk by all who have worshiped the beast (14:9f.), and "the wine of fornication" of the great HARLOT (Rome, symbolized by Babylon), drunk by the kings of the earth (17:2). "The wine of wrath" represents God's judgment upon those who have been seduced by Rome's corrupt practices (cf. Jer. 25:15-29, which pictures divine punishment as a "cup of the wine of wrath" which the nations are forced to drink).

N. J. OPPERWALL

PASSION, THE. A term that refers to Jesus' suffering during the last two days of His earthly life, especially His crucifixion. *See* PASSION I. As an adjective "Passion" is used of the last week (or last two weeks) of Lent and of musical settings and plays that deal with Jesus' suffering and death.

PASSOVER [Heb. *pesaḥ*; Gk. *páscha*; cf. Aram. *pisḥā'*; note also Eng. "paschal"]. A major festival held in the spring to commemorate Israel's deliverance from Egypt. The term is often used of the entire festival celebration (e.g., Ex. 12:48; 2 K. 23:21). It may also designate the Passover sacrifice to be eaten (Ex. 12:11; 2 Ch. 30:18) and the animal victim, i.e., the "Passover lamb" (Ex. 12:21; 2 Ch. 30:15).

I. Origin
II. In OT Times
III. In NT Times
IV. Passover Today

I. Origin.–*A. Etymology.* The noun *pesaḥ* is derived from the verb *pāsaḥ.* Its etymology, however, is much disputed, and various theories have been proposed.

Many scholars have argued that *pāsaḥ* may come from two separate roots (so BDB, p. 820). The first root means "pass" or "leap over" (Ex. 12:13, 23, 27). At the time of the Exodus, each Israelite household that had blood smeared on its doorposts was "passed over" (i.e., omitted, left out) by God when He struck down the Egyptians. A second Hebrew verb (using the same radicals but coming from a different root) means "be lame, limp." It is often distinguished from the former meaning in several passages unrelated to the context of the Passover (see 2 S. 4:4; 1 K. 18:21, 26). Some scholars, however, have sought to derive all the meanings of *pāsaḥ* from this second root (cf. *CHAL,* p. 294). Thus, in comparison to the limping dance of the prophets of Baal (1 K. 18:21, 26), God is seen "to skip by, spare" the houses of the Israelites on the eve of the Exodus (Ex. 12).

Glasson argued that the three occurrences of *pāsaḥ* in

Ex. 12 should not be rendered "passover," but "defend, protect" (thus the alternate reading to Ex. 12:13, NEB, "to stand guard over"). This interpretation is based largely on the use of *pāsaḥ* in Isa. 31:5, where it parallels words meaning "defend, protect." The context pictures a bird protectively hovering over its nest guarding its young. Isaiah thus depicts the Lord as Israel's protector, defending each home by forbidding the destroyer to enter (Ex. 12:23; cf. He. 11:28). The LXX and Tgs. give additional support to this sense.

Attempts have also been made to link *pesaḥ* to a variety of non-Hebraic roots. For example, *pesaḥ* has been tied to Akk. *pašāḫu*, "to appease, placate" (a god). Others have tried to relate it to Egyp. *peš*, "to spread wings over" (in order to protect), or to Egyp. *pȝ sḥ*, "blow, stroke," supposedly an allusion to the tenth plague that struck dead the firstborn of the Egyptians. Such non-Hebraic etymological hypotheses are extremely tenuous, and while the etymology is evasive, earlier explanations are more plausible.

B. Background. Passover is the oldest of Jewish festivals, originating over three thousand years ago. Passover appears originally to have conflated two separate spring festivals. One rite involved unleavened bread, the other a sacrificial lamb. The OT (Ex. 34:18, 25) distinguishes the festivals by using the terms "Feast of Unleavened Bread" (*ḥag hammaṣṣôṯ*) and "Passover Feast" (*ḥag happāsaḥ*). The NT (Mt. 26:17; Mk. 14:1; Lk. 22:1) refers to both of these as "the Passover" (*tó páscha*) and the "Feast of Unleavened Bread" (*tá ázyma* or *hē heortḗ tôn azýmōn*). These festivals were held in immediate sequence. Passover was celebrated at twilight of the 14th day of the month (Ex. 12:6) and the Feast of Unleavened Bread for the seven days following, namely, the 15th to the 21st (Ex. 12:15; Lev. 23:5f.; Nu. 28:16f.; 2 Ch. 35:1, 17). Toward the end of the NT era, however, the one term, "Passover" was generally used to designate the integrated celebration of what had begun as two festivals. Though, by that time, the title "Feast of Unleavened Bread" had not disappeared, Josephus (*Ant.* xiv.2.1 [21]; xvii.9.3 [213f.]) indicates that "Passover" was commonly used to refer to both festivals. The mishnaic tractate *Pesahim* reveals a similar popular combining of the feasts.

Some scholars have postulated a prehistory to the Passover from references in Exodus, e.g., "Let my people go, so that they may hold a festival to me in the desert" (5:1; cf. 10:9). This may have reference to a shepherd's festival kept by Semitic nomads in the spring as they would head for new pastures before the start of the dry season. The Feast of Unleavened Bread may have had its origin in an agricultural festival related to the spring barley harvest. After entering Canaan, the Israelites may have adopted aspects of this feast from the Canaanites (cf. de Vaux, 490-93).

The critical view has held that these separate festivals were not combined or historicized (connected to the actual Exodus) until about the time of the Exile or later. This line of reasoning, of course, is conjecture. Whatever the exact prehistory of the Passover, the festival cannot be separated from that historic moment in Israel's past that brought miraculous deliverance from Egypt.

II. In OT Times.–The Exodus was the redemptive event par excellence in the life of God's covenant people. The Passover reenacted annually the greatest miracle Yahweh performed out of grace for His chosen; it was to become the focal point of Jewish history. The Passover celebration retold the story of freedom after more than four hundred years of Egyptian bondage. The frequent OT allusions to that deliverance indicate that it was a source of hope for the nation's future redemption.

Instructions regarding the observance of Passover are found mainly in the Pentateuch. The account in Ex. 12:1–13:16 outlines the historical setting and ordinances governing the last meal in Egypt: (1) Celebration was to be at the full moon (Ex. 12:6) on "the first month" (Ex. 12:2) of spring (i.e., Abib; cf. Ex. 13:3f.; Dt. 16:1; later called Nisan). It marked the start of the barley harvest. (2) On the 10th day of the month a year-old male lamb or kid, without defect, was to be selected according to the size of the household (Ex. 12:3-5). (3) On the 14th of the month at twilight (lit. "between the two evenings") the lamb was to be killed (12:6). (4) Blood from a basin must be applied by hyssop (a leafy plant) to the doorframes and lintels of the houses where the people gathered to eat the lambs (vv. 7, 22). (5) The lamb must be roasted over the fire — head, legs, and inner parts, no bones broken (vv. 9, 46). (6) Bitter herbs (*mᵉrōrîm*) and bread made without yeast (*maṣṣôṯ*) must also be eaten (v. 8). (7) Any remains of the meal not consumed were to be burned (v. 10). (8) The meal was to be eaten in haste with cloak tucked into belt, sandals on feet, and staff in hand (v. 11). (9) All future generations of Israelites were to celebrate Passover as a lasting ordinance (vv. 14, 24, 42, 47). (10) Slaves and resident aliens were permitted to join the meal, provided they had been circumcised (vv. 44, 48).

On the next day, the 15th of Abib (Nissan), the Feast of Unleavened Bread began. This observance, distinct from Passover, was to last seven days. During this time all bread made with yeast was to be destroyed and only unleavened bread eaten (12:15, 17-20; 13:6f.). The first and seventh days were for holding sacred assemblies; no work was to be done, except to prepare food (12:16).

The Passover was to be an opportunity for the father to teach his children. He (not a substitute) was obliged to explain the meaning of the ceremony when his children asked (12:26f.; 13:8, 14). From this practice of ritual questioning the term *Haggadah* (lit "explaining, telling") took on increased importance in the life of the community. (Today the term is used for the book that explains the meaning of the celebration at the Passover meal.) The importance played by recital of the magnalia (the great redemptive events of biblical faith) throughout Israelite history (e.g., Dt. 26:5-9; Josh. 24; 1 S. 12; cf. Acts 7) was vital in preserving memory of the Exodus "for generations to come" (Ex. 12:42).

Other major pentateuchal references to the Passover (Lev. 23:5-8; Nu. 28:16-25; Dt. 16:1-8) indicate that the Feast of Unleavened Bread was closely integrated to it. Various offerings were specified throughout the week (Nu. 28:19-24). *Maṣṣôṯ* is now referred to as the "bread of affliction" (Dt. 16:3). Though Passover began as a family festival of the home (Ex. 12:21-23, 46), Deuteronomy anticipates the time when wilderness wanderings would lead to permanent residence in Canaan, with worship at a central sanctuary (Dt. 16:2, 6f.). The changed circumstances were to transmute the Passover into a pilgrimage festival at which all adult males were to appear (cf. Ex. 23:14-17; 34:23). The law of Moses also makes provision for a second Passover, or "minor Passover" as it was called in the rabbinic period. This was celebrated a month later (14th day of the second month) for any who were ceremonially unclean or away on a journey at the regular time (Nu. 9:1-14; cf. 2 Ch. 30:2).

Various Passover celebrations are recorded in the OT, beginning from the moment Israel entered Canaan. On the plains of Jericho, prior to the Conquest, Passover was conducted under the leadership of Joshua (Josh. 5:10-12). Solomon celebrated the three pilgrimage festivals that now centered in Jerusalem (2 Ch. 8:13). From this point on, Passover focused upon a permanent central sanctuary,

the blood of the paschal lamb now sprinkled by priests on the altar of burnt offering. Being more of a public ceremony, Passover was sometimes given strong support by religiously sensitive national leaders.

The Chronicler records two great Passover celebrations at the temple in Jerusalem (2 Ch. 30:1-27; 35:1-19; cf. 2 K. 23:21-23). These followed revivals during the reigns of King Hezekiah (716-687 B.C.) and King Josiah (640-609 B.C.). The magnitude of these observances was unparalleled in Israel for centuries (2 Ch. 30:26; 35:18). The last historical text to mention the Passover festival is Ezra. After rebuilding the temple upon return from exile, the people celebrated Passover with considerable joy (Ezr. 6:19-22). The OT prophets have no specific references to Passover feasts apart from one projected by Ezekiel in his description of the new temple (Ezk. 45:21-24).

During the intertestamental period, despite Seleucid and Roman control of Jerusalem, it appears that Passover was still celebrated with some regularity. Two noncanonical writings from the 2nd cent. B.C. give emphasis to the Passover theme. 1 Esdras opens with an account of Josiah's Passover (1:1-22; cf. 2 Ch. 35:1-19), and Jubilees gives detailed procedures about the Passover festival (49:1-23).

III. In NT Times.–Our understanding of the Passover during the NT era comes largely from the writings of Josephus, the mishnaic tractate *Pesahim*, and the NT itself. Pilgrimages were made annually to Jerusalem for the Passover sacrifice until the temple was destroyed in A.D. 70. Following this time, many Jews found themselves in *gālūṯ* (exile), scattered in communities among the nations of the world. Passover ceased being a pilgrimage festival at a central sanctuary. Once again, as in pharaonic Egypt, the Passover feast began to center upon the family in the home, a place where it has remained for more than nineteen centuries.

Passover in NT temple days was a spectacle of excitement and devotion. Pilgrims near and far ascended to the holy city in large numbers (cf. Jn. 11:55). Considering the area of Jerusalem at this time, scholars look on Josephus's figure of about three million Jews present for Passover (*BJ* ii.14.3 [280]; vi.9.3 [420-25]) as extremely exaggerated. Many historians have suggested a more realistic figure would be under 200,000. Accommodations for both sleeping and feasting were sought out in every available space (cf. Mk. 14:15). In lieu of rent hosts entertaining pilgrims in their homes were given the hides of the animals slaughtered and consumed by their guests (T.B. *Yoma* 12a). Perhaps to help defuse the smoldering Jewish resentment of their presence, local Roman authorities released a prisoner at Passover time (Mk. 15:6-15; cf. Mish. *Pesahim* ix.6a).

Days before Passover began, Jerusalem was a hubbub of commercial activity. Many pilgrims who were also merchants arrived early to sell or barter their wares (cf. Mt. 21:12f.; Jn. 2:13-16). Beggars stationed themselves strategically by the bustling gates of the city. Jerusalem became not only an emporium for such domestic goods as clothing, jewelry, and exotic ointments, but also for spices, herbs, condiments, wheat, fish, and wine used throughout the week-long festivities. Of utmost importance to pilgrims, however, was the purchasing of sheep and goats for sacrifice at the temple. The animal (preferably a lamb) was selected on the 10th of Nisan (*Pesahim* ix.5). The size of the lamb varied since a single individual was forbidden to eat an entire animal. Family groups, or companies of at least ten people (e.g., the disciples with their Master), were required to eat the entire lamb at one sitting (T.B. *Pesahim* 64b). No part of the animal was to remain until the next day.

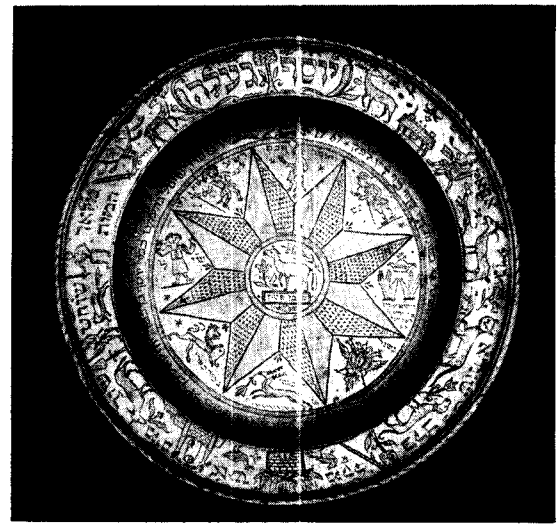
Before the family meal on Passover eve, the day was filled with preparation for the event. A full contingent of priests — twenty-four divisions instead of the usual one — came early to the temple. Their first task was the burning of the leaven (*ḥāmēṣ*). This had been searched for by candlelight in each home the night before and then removed for burning the next morning (*Pesahim* i-iii). By midday all work stopped.

The afternoon was set aside for the ritual slaughtering of the lamb. The offering of the Passover sacrifice at the temple began about 3:00 P.M. (*Pesahim* v.1), and was conducted in three massive shifts. When the temple court was filled with the first group of offerers, the gates of the court were closed. The ram's horn was sounded and the sacrifice began (*Pesahim* v.5). Each Jew slaughtered his own lamb. The priests stood in two rows, one holding gold basins, and the other silver. After the blood was drained into a basin, it was tossed against the base of the altar (*Pesahim* v.6). While the offerings were going on, the Levites sang the Hallel (Pss. 113–118). Each lamb was then skinned and its fat with kidneys removed for burning on the altar (*Pesahim* v.9f.; cf. Lev. 3:3-5). Before leaving the temple, each offerer slung his lamb — wrapped in its own hide — over his shoulder (T.B. *Pesahim* 65b). He then departed with his company to prepare the Passover meal. Immediately, the next division of offerers filed into the temple court and the ritual was repeated.

The Passover evening meal was held at home or in a room within the city reserved for the occasion (cf. Mt. 26:17-19 par.). In the courtyard of the home the carcass of the lamb, with legs unbroken, was roasted. It was placed in a clay oven on a skewer of pomegranate wood (*Pesahim* vii.1). Inside, the company gathered, festively dressed in white. The room was prepared with floor cushions for reclining and small tables for serving. At the head of the room sat the one leading the ritual meal.

By NT times the Passover observance had features added to those already specified in the OT. A *seder*, meaning a set "order of service," was now followed (cf. *Pesahim* x.1-9). It was a festival that celebrated freedom, hence celebrants ate reclining (cf. Ex. 12:11). Each had to "regard himself as if he came forth himself out of Egypt" (*Pesahim* x.5). The meal included various symbolic elements, each consumed at specified points throughout the evening. These included roasted lamb, bitter herbs, unleavened bread, *ḥ^{a}rōseṯ* (pasty mixture of nuts, fruit, and wine), and a raw vegetable dipped into a tart liquid. At various intervals four cups of wine, a symbol of joy, were consumed. The wine was probably mixed with water and heated (cf. *Pesahim* vii.13). Ritual hand-washings, prayers, and portions of the Hallel (Pss. 113–118) also punctuated the observance. A key point of instruction in Israelite tradition came when the son asked his father the ceremonial question, "Why is this night different from other nights?" (*Pesahim* x.4). The father responded by giving a historical synopsis of God's redemptive dealings with Israel that led to deliverance from Egypt. The ceremony concluded late, but many feasters then returned to the streets of Jerusalem to continue their celebration. Others returned to the temple mount to await the reopening of the temple gates at midnight so that they might spend the rest of the night in worship and prayer (cf. Josephus *Ant.* xviii.2.2 [29]).

Scholars have debated whether the Last Supper was a Passover meal (see standard NT comms.). The Synoptic Gospels state that it was (Mt. 26:17 par.), but Jn. 19:14 has cast some doubt on this. The Johannine passage need not be in conflict with the Synoptic tradition, however, if the expression "day of Preparation of the Passover" (RSV) be understood as "day of Preparation of Passover Week" (NIV). In this context, "day of preparation" would refer to Friday, since every Friday was the day of prepara-



tion for the weekly Sabbath. The term "Passover" would be used here to include reference to the week-long Feast of Unleavened Bread, which by this time had merged by popular usage with Passover into one long feast (see G. Archer, *Encyclopedia of Bible Difficulties* [1982], pp. 375f.; cf. I. H. Marshall, *Last Supper and Lord's Supper* [1981], pp. 57-75).

From the NT record it seems clear that Jesus instituted the Lord's Supper by associating it with the third cup of wine, which came after the Passover meal was eaten (cf. 1 Cor. 11:25). It was known as the "cup of redemption," linked in rabbinic tradition to the third of the fourfold promise of redemption in Ex. 6:6f., "I will redeem you." Jesus associated this cup of red wine with His atoning death in saying, "This cup which is poured out for you is the new covenant in my blood" (Lk. 22:20; cf. 1 Cor. 11:25). According to some scholars (e.g., W. Lane, comm. on Mark [*NICNT*, 1974], pp. 508f.; *see also* LORD'S SUPPER III, IV.A) He refused, however, to drink the fourth cup (Mk. 14:25 par.; cf. *Pesahim* x.7), referred to as the "cup of consummation" (cf. Ex. 6:7) based on the promise that God will take His own people to be with Him (cf. V. Taylor, comm. on Mark [repr. 1959], p. 547; cf. also J. Jeremias, *Eucharistic Words of Jesus* [Eng. tr., rev. ed. 1977], pp. 84-88, 207-218). The unfinished meal of Jesus was a pledge that redemption would be consummated at that future messianic banquet when he "drinks it anew in the kingdom of God" (Mk. 14:25; cf. Mt. 26:29; Rev. 3:20; 19:6-9). The Lord's Supper concluded with the singing of a hymn (Mt. 26:30; Mk. 14:26), doubtless the second half of the Hallel (Pss. 115–118).

In referring to His death as a sacrifice, Jesus was comparing Himself to the Passover lamb (cf. Rev. 5:12, "Lamb who was slain"). John the Baptizer calls him "the Lamb of God" (Jn. 1:29, 36). Paul reflects this same rich symbolism: "For Christ our Passover lamb, has been sacrificed" (1 Cor. 5:7). Peter describes God's children as redeemed "with the precious blood of Christ, a lamb without blemish or defect" (1 Pet. 1:18f.). This blood-redeemed community is called a new lump of "unleavened dough" (1 Cor. 5:7). The prophetic significance of Christ's death, "Not one of his bones will be broken" (Jn. 19:36), is a fulfillment of Scripture that states the bones of the Passover lamb were not to be broken (Ex. 12:46; Nu. 9:12; cf. Ps. 34:20 [MT 21]).

IV. Passover Today.–Only the Samaritans, a small community of several hundred located near Shechem (modern Nablûs), still observe annually the blood sacrifice of the Passover lamb. Unchangingly committed to the Law of Moses since Bible times, the entire Samaritan community gathers on the slopes of the "chosen place" (cf. Dt. 16:2, 6f.), Mt. Gerizim, where they live for the full festival. For the Jewish community, however, since the destruction by Rome of Mt. Zion and the temple, sacrifices have ceased and Passover has once again returned to the home. In the contemporary Passover meal (called a seder [< Heb. *sēḏer*, "order"]), in order to bring to mind the days of the temple, a shankbone and roasted egg are placed on the seder plate. These symbolize the roasted paschal sacrifice and the festival offering brought when the temple was still standing.

The modern Passover seder makes use of a written explanatory text called a *Haggadah*. It is traditional on the first night of Passover to hold a family seder at home, and on the next night to hold a community seder at the synagogue. On the seder table is placed the "cup of Elijah," a goblet of wine poured, but not drunk. According to scriptural tradition, Elijah, who ascended to heaven in a fiery chariot (2 K. 2:11f.), would return as the herald and messenger of the coming Messiah (Mal. 4:5 [MT 3:23]).

An engraved pewter seder plate with symbols associated with Passover, representations of the required foods, and some details from the *Haggadah* (Israel Museum, Jerusalem)

Page from the *Birds' Head Haggadah* (Germany, *ca.* A.D. 1300). The birds' heads were used to avoid depicting human features (Israel Museum, Jerusalem)

Thus, in Jewish belief, messianic hope is kindled more strongly during Passover than at any other season for it is the "season of redemption" (cf. Midr. *Ex. Rabbah* 15:12).

Synagogue liturgy at Passover includes several special emphases. On the first day of Passover a prayer for dew is recited, a reminder that in Israel the rainy season has now ended and the dry season is fast approaching. The second night of Passover begins the "Counting of the *Omer*" (lit. "sheaf" [of barley]). This period of seven weeks culminates in the festival of *Shavuot* (Weeks), often called Pentecost, which means fiftieth day. Also during the Passover festival the book of the Canticles is read. Alluding to the beauty of springtime (Cant. 2:11-13), the very season of Passover, the rabbis interpreted this book as a picture of God's love for His people Israel. Toward the end of Passover week, the Torah reading in the Synagogue is the Song of Moses (Ex. 15:1-18), an ancient, poetical paean of praise rehearsing the triumphant deliverance of Israel through the waters of the Red Sea.

M. R. WILSON

PASTOR [Gk. *poimḗn*–'shepherd']. One of five gifts given to the Church for leadership by the ascended Lord (Eph. 4:8, 11). Whereas apostles, prophets, and evangelists minister in the Church at large, pastors and teachers serve in the local congregation. By these gifts Christ guides the Church to realize the riches of its election (1:17ff.), by being equipped, built up (4:12), growing into the fulness of His stature (v. 13), all of which results in holy living (vv. 22-24).

As used by the NT, "pastor" designates both an endowment for ministry and the one who fills that ministry, but it implies no fixed office. The pastoral ministry may be performed by a *presbýteros* (1 Pet. 5:1f.), an *episkopos* (1 Tim. 3:2), or even both (cf. Acts 20:17, 28). Rather than an office, it suggests a moral or spiritual relationship. A pastor must be faithful to Christ the Chief Shepherd (1 Pet. 2:25; cf. He. 13:20), self-sacrificing (cf. Jn. 10:11), seeking the lost (cf. Mt. 18:12-14). Secular usage also connotes governance. So Paul instructs the Ephesian elders "to care for" (Gk. *poimaínein*) the church of God and to protect it from heretical "wolves" (Acts 20:28f.).

Use of "pastor" as a title for the congregation's leader derives substantially from the Geneva Bible. Following Calvin's sharp, formal distinction between *poimḗn* (Lat. *pastor*) and *didáskalos* ("teacher," Lat. *doctor*) in his commentary (comm. on Ephesians [Eng. tr. 1965], pp. 179f.; cf. also *Inst.* iv.3.1-8), the Geneva translation adopted the Latin term instead of "shepherd," which both Wyclif and Tyndale had used.

I. Title.–The two Epistles to Timothy and the Epistle to Titus have been known collectively as the Pastoral Epistles since the 18th century. They bear this title as letters written by Paul, the chief pastor, to alert the recipients to their pastoral duties. Their many similarities necessitate treating them as a whole, since most of the problems that arise for one arise also for the others, although each has its own special characteristics. In considering the variety of issues relating to them, one can therefore deal with them sometimes separately and sometimes together.

II. Characteristics.–All three Epistles are addressed to individuals, and this at once marks them out from the Pauline letters written to churches. They are evidently intended, however, to have wider implications than has merely private correspondence. They were to strengthen the hands of the apostle's lieutenants and are therefore especially valuable for the insight that they give into Paul's advice to his helpers. It would be correct to call them semipersonal and perhaps semiecclesiastical.

Each Epistle contains some teaching on ecclesiastical problems and information on conditions within the early Church. 1 Timothy and Titus have directions regarding choice of church officers, and all three give guidelines for Christian behavior and activity within the Church. Yet intermixed with this semiofficial material are more personal exhortations intended for the individuals addressed. Timothy is more than once encouraged to deal courageously with all the problems confronting him. All three Epistles contain exhortations regarding false teachers and various other admonitions.

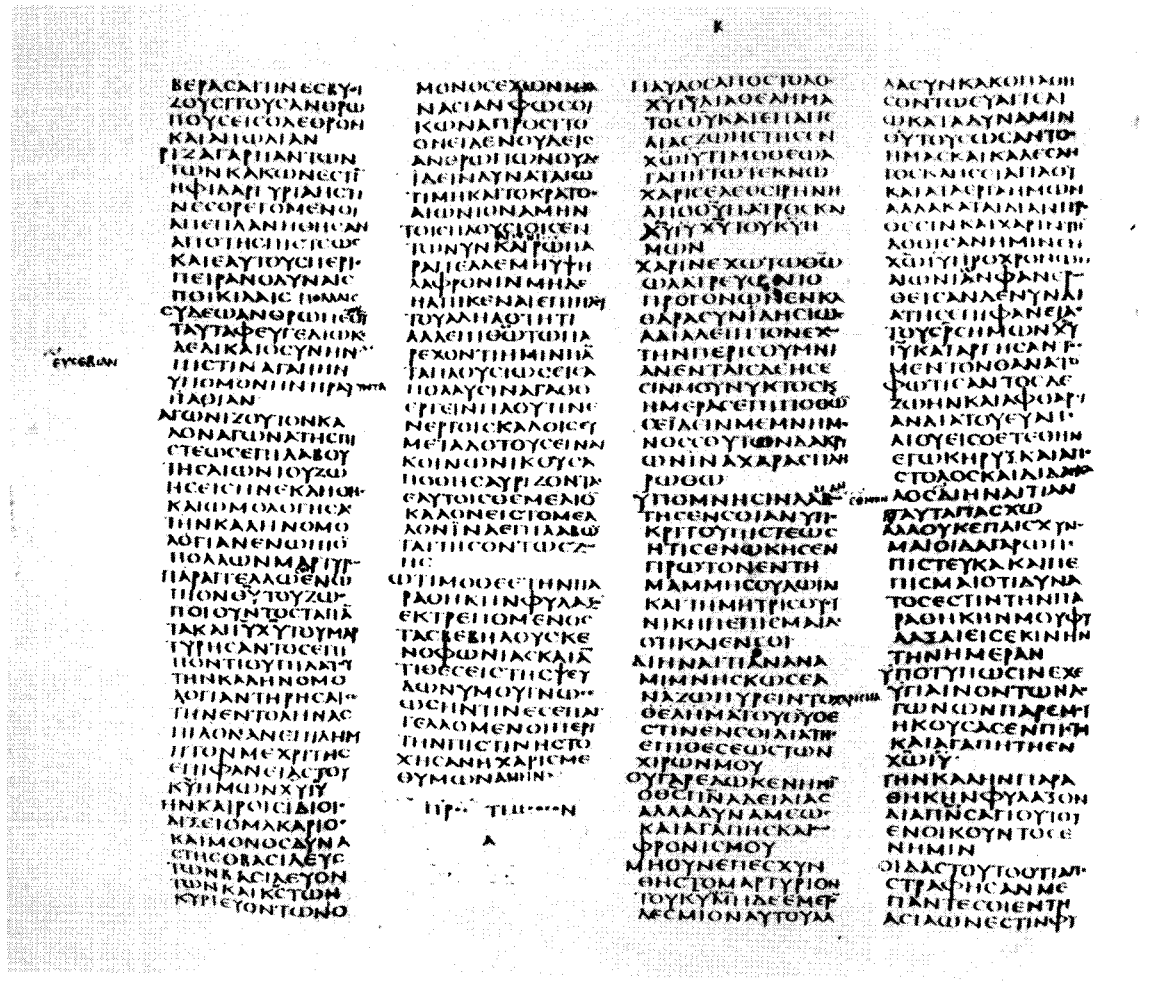
While each Epistle has revelations of the author's character and personality, these are most pronounced in 2 Timothy. In ch. 4 the many personal details throw much light on the conditions of the apostle's closing days and lend themselves to imaginative reconstruction. Paul had left behind a cloak at Troas and asked for his parchments to be collected. Such details add pathos to an Epistle that has been not inappropriately called "Paul's swan song." Because these Epistles are the apostle's latest literary productions they make a significant contribution to knowledge of his outlook, particularly as he contemplated the finish of his earthly race.

III. Authenticity.–There have been stronger attacks upon

PASTORAL EPISTLES

the authenticity of these Epistles than upon any other letters bearing the name of Paul in the NT. In fact, these Epistles are still widely regarded as non-Pauline; thus all the factors affecting authenticity must be carefully assessed.

A. External Attestation. Many traces of these Epistles are in the early Apostolic Fathers, although the loose citation of NT books during this period makes it difficult to prove that authors like Clement of Rome and Ignatius knew the Epistles. It is at least probable that they did. The many similar phrases in the Pastorals and Clement are more adequately explained by Clement's use of the former than vice versa, in spite of the claims of, e.g., B. H. Streeter (*Primitive Church* [1929], p. 153). Most scholars, however, have been cautious about postulating Clement's or Ignatius's use of the Pastorals.



It is difficult to deny that Polycarp showed acquaintance with these Epistles, at least with 1 and 2 Timothy (cf., e.g., Polyc. Phil. 4:1 and 1 Tim. 6:7, 10; Polyc. Phil. 5:2 and 1 Tim. 5:8; 2 Tim. 2:12). Some scholars, like A. E. Barnett (*Paul Becomes a Literary Influence* [1941], pp. 182-84), have claimed that both Polycarp and the author of the Pastorals drew from a common source, but this is an unsatisfactory method of dealing with external evidence because it allows the early attestation of any NT book to be summarily dismissed.

After Polycarp the evidence becomes more impressive both in clarity and quantity. It is reasonably certain that Justin Martyr (*Dial.* cxviii), Athenagorus (*Supplicatio* xvi), and Theophilus (*Ad Autolycum* ii.16) all knew and esteemed these letters. In fact, Theophilus took for granted that they came from the divine Word. Irenaeus's testimony is indisputable. By his time the authority of these Epistles was unchallenged; further proof is the MURATORIAN FRAGMENT, which shows that the church of Rome highly esteemed them.

This testimony reveals no early doubts about the authenticity of the Epistles. None of the witnesses mentioned raised any dissenting voice. In fact, there is evidence of only one second-century writer on the NT who rejected them — Marcion (according to Tertullian *Adv. Marc.* v.1, 21), who hardly represents any general ignorance of or rejection of these Epistles in that century. Certain parts of the Pastorals would have been against Marcion's presuppositions (e.g., 1 Tim. 1:8 on the goodness of the law). Moreover, Marcion customarily cut out the biblical books that did not appeal to him, e.g., all the Gospels except Luke, and even those that he accepted he extensively amended.

Scholars have stressed the absence of the Pastorals from the Chester Beatty codex p^{46} as evidence that they were questioned during the 3rd century. The evidence of

A facsimile of Codex Sinaiticus (4th cent. A.D.) showing 1 Tim. 6:9–2 Tim. 1:15 (Trustees of the British Museum)

these papyri, however, is inconclusive. The codex of the Pauline Epistles is incomplete. It has been calculated that the rest of the codex would not have had room for the Pastorals; but the scribe could have reduced the size of his writing toward the end or could have added MS pages — a procedure known in the ancient world — and thus could have included the Pastorals.

It is against such a firm background of acceptance of authenticity and of Pauline authorship that the problem of authorship will be discussed. The next consideration will be the internal claims of the letters.

B. Internal Claims. All three of these Epistles purport to come from the apostle Paul, in a manner completely in harmony with the claims of the other Pauline letters. But those who on other grounds have disputed the Pauline authorship have regarded Paul's name as pseudonymous. It should at once be observed that this is the only alternative to taking the claims of the Epistles at their face value. Many pseudonymous works were indeed produced by Jewish and Christian (Gnostic) writers, but epistolary imitations are very difficult and were generally avoided in favor of gospels, acts, and apocalypses. Those who postulate a pseudonymous origin for the Pastorals cannot ignore this factor. Moreover, the self-claims of any literary work should be given some weight unless they can be shown to be historically unlikely or false on other grounds.

In addition to the name of Paul in the opening greetings, each Epistle has many other indications that the author is Paul. The first-person singular is used quite naturally and reflects a personal acquaintance of the author with the person addressed (e.g., 1 Tim. 1:3, 18; 3:14; 5:21; 6:14; 2 Tim. 1:3ff.; 2:9; 3:10ff.; 4:1, 6ff.; Tit. 1:5; 3:8, 12ff.). The presence of other pronounced personal allusions (1 Tim. 1:12ff.; 2:7; 2 Tim. 1:2; 2:10; 4:7) in a manner typical of Paul adds considerable support to the self-claims of the salutation. Even many who have not maintained Pauline authorship have recognized that these reminiscences are strongest in 2 Timothy and have postulated that the Epistle incorporates genuine fragments of Pauline material (see III.C below).

In spite of these internal claims many scholars have challenged Pauline authorship on a number of grounds, which must be weighed carefully. They may conveniently be grouped under five headings.

1. Historical Background. The Pastorals contain a group of historical allusions that must be placed in their historical context. The attempt to do so has caused such difficulties that some scholars have declined to regard the allusions as historical at all or have fitted each allusion separately into some known Pauline situation, although recognizing the impossibility of fitting them in as a whole.

The historical data may be summarized as follows. Paul had left Timothy at Ephesus and Titus at Crete to have them carry out certain church arrangements (1 Tim. 1:3; Tit. 1:5). In 1 Timothy Paul indicated that he had moved on to Macedonia; in Tit. 3:12 he spoke of spending the winter at Nicopolis (evidently in Epirus). In 2 Timothy, however, he mentioned that Onesiphorus had sought him out while he was at Rome (1:17) and referred to having left his cloak behind at Troas, apparently rather recently (4:13), and to having left the ill Trophimus at Miletus. Moreover, by the time he wrote 2 Timothy the apostle had become a prisoner, although there is no evidence of this in 1 Timothy and Titus. In fact, in 1 Timothy Paul was looking forward to visiting Timothy at Ephesus soon (3:14).

All these details suggest considerable movement by Paul and his companions. The question naturally arises of how these movements fit the framework of Acts. In spite of a variety of ingenious attempts, it must be recognized that the existing accounts of Paul's journeys do not allow all the data mentioned above to be fitted in with any credible sequence. The main problem is that 2 Timothy must be assigned to a Roman imprisonment but 1 Timothy and Titus to a period when Paul was still engaged in his Asiatic ministry, which according to Acts must have been several years earlier. But if 2 Timothy dates from the close of Paul's Roman imprisonment, it is odd that Paul requested his cloak to be brought from Troas or mentioned leaving Trophimus at Miletus, cities that he would have last visited several years before. Furthermore, Acts never refers to Paul's visiting Crete or Nicopolis, and it is difficult to suggest any occasion within the framework of Acts when these visits could have been made.

What then are the alternatives? If these Epistles are genuinely Pauline there is only one solution possible — that all three were written after Paul's Roman imprisonment recorded in Acts. This solution, however, involves a theory that Paul was released from this imprisonment, enjoyed a further period of freedom, and was then arrested a second time and taken back to Rome, where he suffered execution.

Such a solution, which does not conflict with the known facts, has been challenged on various accounts. The silence of Acts is considered a major objection. The same might be said, however, of the theory that Paul was executed immediately after the house arrest mentioned in that book. Moreover, if Paul's imprisonment had not terminated when Acts was written, its silence on further activity is self-explained. A further criticism of this traditional solution is the character of patristic references to Paul's further activity. Eusebius (*HE* ii.22.1f.) reported it in a way that might suggest disbelief, although he appeared to be commenting on what he had received from others. Much earlier is Clement of Rome's obscure allusion to the apostle Paul's preaching as far as the boundary of the West (1 Clem. 5:7). Whether Clement meant that Paul went to Spain or whether he simply regarded Rome as the boundary, the fact remains that his words do not exclude a period of Paul's further activity in the East, even if they do not testify to it. The release hypothesis, in short, does not depend upon the veracity of the Spanish visit.

Furthermore, it must be investigated whether the apostle's release would have been probable. The evidence from Acts on the charges against Paul suggests that under the normal course of Roman justice the apostle would have been released. But many have assumed that an appeal to so infamous an emperor as NERO may not have resulted in a favorable verdict. Indeed, Nero's persecution of the Christians in Rome beginning in 64 suggests that he would have been poorly disposed toward Paul. Lack of data leaves the whole matter inconclusive, but the release theory is not impossible or improbable.

2. Ecclesiastical Situation. Since all these Epistles refer to church officials and to ecclesiastical procedure and discipline, the question arises whether the situation suggested by this evidence could have sufficiently developed during Paul's lifetime. Some scholars have believed that the Epistles reflect a later period, so that Pauline authorship is impossible. To assess the position rightly the character of the internal evidence must first be noted. Three offices are mentioned, bishops, elders, and deacons, but Tit. 1:5-7 shows clearly that the bishops were not altogether distinct from the elders. In fact, the most obvious interpretation of this evidence is that bishops exercised a special function within the elder system and that there were actually two groups of officials, elders and deacons. But such an arrangement does not reveal a particularly developed state of affairs. In the church at Philippi bishops

and deacons held office, as the salutation of Paul's letter to that church makes clear. Moreover, the Acts accounts of Paul's appointment of elders, as at Galatia (14:23), and of his direct dealings with elders, as at Ephesus (20:17ff.), suggest that the appointment of elders was part of the procedure within the primitive Church. B. S. Easton (p. 226) has maintained that the ecclesiastical situation is 2nd cent. and has regarded the Acts references as anachronistic, but this is a most unsatisfactory method of disposing of unfavorable data.

But the question arises whether Paul was at all interested in church organization. If he was not, Pauline authorship of the Pastorals would be difficult to maintain. Those, like Easton, who find the ecclesiastical references in these Epistles too highly organized for Paul proceed from certain presuppositions that are themselves open to challenge. It is assumed that Paul's own data must be examined independently of Acts, with the result that the Acts testimony is discounted, as mentioned above, and the testimony of the Pauline Epistles becomes the sole source of information. On such a basis Paul's lack of interest in church order can of course be maintained. But the evidence of Acts cannot be so summarily dismissed, and although the Pauline Epistles certainly do not support uniformity of government in all Pauline churches, they do not necessarily demand the theory of Paul's disinterestedness in church order. The apostle evidently did not believe in rigidity in ecclesiastical matters, but this does not mean that he was not interested in ecclesiastical organization. Evidently both Ephesus and Crete already had an elder system, and Paul was most anxious to ensure that suitable candidates would continue to be appointed. Moreover, he wanted the Christian traditions to be adequately handed down and conceived that a well-chosen elder system was the best means of achieving this. It can hardly be imagined that Paul was so shortsighted that he never envisaged the necessity of such officials.

Another imagined difficulty is the reference to novices being excluded from the candidates eligible for the bishop's office at Ephesus (1 Tim. 3:6). This seems to be an indication of a long-established church and thus seems to require a date well after the apostolic age (cf. E. F. Scott, p. 32). But such an approach fails to account for the circumstances of primitive communities. A large community would have been much more able than a small one to decline the appointment of a novice, and it is significant that this injunction is omitted from the instructions to Titus at Crete (1:7-9), where the church was in all probability more recently founded than the church at Ephesus.

The suggestion that Timothy and Titus are a pseudonymous disguise for bishops of a monarchial type is quite improbable (contra *IB*, XI, 344f.). Such monarchial episcopacy did not develop until the time of Ignatius and was evidently not widespread even then. Moreover, the general indications of the ecclesiastical situation in the Pastorals, e.g., the elementary requirements for candidates for office, suggest a much more primitive period than that reflected in Ignatius's epistles. In any case, there is no explanation why Timothy and Titus should have been chosen as typical representatives of monarchial bishops. It is much more reasonable to regard the letters as actually addressed to the persons named.

3. Mention of Heresies. There are many scattered indications in these letters that false teachers were then causing trouble at Ephesus and Crete. Paul had little time for their teaching and urged both Timothy and Titus to deal with them summarily. But does this fact reveal a non-Pauline approach, in view of the apostle's method of refuting heresy actively by presenting the Christian answer? If Paul's treatment of the Colossian heresy was a norm and if his approach to any heresy could not deviate from this norm, then there would be some justification for concluding that the Pastorals do not reflect Pauline practice. But these two assumptions may certainly be challenged. An examination of the heresy referred to in the Pastorals is sufficient to show that Paul is not likely to have combatted a heresy with so little positive content.

The heresy's major feature seems to have been its pointless teaching, which is variously described as myths, endless genealogies (1 Tim. 1:3-7), wordy wrangles, evil surmisings, perverse disputations (6:3-5), and godless chatter (v. 20). These characteristics would not have impressed Paul as being worthy of refutation.

The Pastorals give very little hint of any doctrinal error in the heresy. In fact, the only definite reference is to the denial of the resurrection, and even this seems to have been restricted to two people, Hymenaeus and Philetus (2 Tim. 2:17ff.). Paul further alluded to Hymenaeus and Alexander making shipwreck of their faith (1 Tim. 1:19f.), but he offered no information about the nature of their error. No doubt this was unnecessary, since Timothy would have been well acquainted with these people.

According to Tit. 1:14 the myths were Jewish, which suggests that the false teachers were probably Judaizers. The false teachers desired to teach the law although they lacked understanding of it (1 Tim. 1:7). Paul's exhortation that Titus himself avoid arguments about the law (3:9) may indicate the practice of the false teachers. The practical outworking of this heresy was mainly ascetic, according to 1 Tim. 4:1-5, which predicts abstinence from both marriage and food. Although the future tense is used, traces of this tendency could already have been in evidence.

Nothing in the evidence so far adduced requires a post-Pauline date, although some scholars (e.g., E. J. Goodspeed, *Intro. to the NT* [1937], p. 338) have supposed that second-century Gnosticism was in mind. They have appealed to the reference in 1 Tim. 6:20 to "antitheses," which is known to have been the title of a book by Marcion. But if the supposedly second-century author had Marcionism in mind, he dealt with it most ineffectively. It is more probable that "antitheses" was a current technical term and that Marcion's use of it is no proof of any close connection. It may be concluded that the heresy alluded to in the Pastorals gives no evidence of being postapostolic.

A comparison of this heresy with that at Colossae makes Paul's different approach in the Pastorals unsurprising (*see* COLOSSIANS, EPISTLE TO THE II). Moreover, it is natural that when he addressed his own close companions he did not enter into a detailed refutation. The different character of the heresy and the different recipients of the Pastoral Epistles sufficiently account for Paul's changing the method that he used in Colossians. There is nothing improbable in the apostle's handling of the situation.

4. Doctrinal Considerations. Even the most enthusiastic opponents (e.g., P. N. Harrison, pp. 87ff.) of Pauline authorship generally have admitted that the theology of the Pastorals has a Pauline flavor, though these scholars maintain that mixed with the Pauline emphases is much that is non-Pauline. The Pastorals' omission of theological elements important in the other Pauline Epistles illustrate this point. The Pastorals' conception of God is said to differ from the other Epistles. There are some finely expressed descriptions of God, notably 1 Tim. 1:17; 6:15f., which call Him King of the ages, King of kings, and the only Sovereign and characterize Him as invisible and immortal. These descriptions mix Jewish and Hellenistic ideas and are not Paul's usual conception. The well-loved title Father occurs only in the opening salutation of 1 Timothy. Scholars have doubted that Paul could so radically modify his conception of God by the time that he wrote the Pastorals.

On the other hand, any modifications are of emphasis rather than of content; no ascriptions to God definitely contradict Pauline theology. But this is a kind of negative argument that cannot assist one in estimating the Pastorals' theology. From the positive side it can be said that there is much in these letters that portrays the fatherly acts of God even if the title itself is lacking (cf. 1 Tim. 1:1; 2:3; 4:10; Tit. 1:3; 2:10; 3:4, which mention God's redemptive acts). These allusions alone sufficiently show that the God of the Pastorals is certainly not as remote as has been alleged.

Similarly it has been maintained by J. Moffatt (*Intro. to the Literature of the NT* [1915], p. 412) that the Pauline concept of mystic union with Christ is lacking, for although the phrase "in Christ" occurs it describes qualities rather than persons. This objection is not a serious ground for disputing the Pauline authorship of these Epistles, since qualities "in Christ" are unintelligible apart from some mystic union "in Christ" (cf. 2 Tim. 1:1; 3:12; Rom. 6:11, 23; 8:2).

These illustrations suffice to show that basing any argument on characteristic omissions is precarious. It may be surprising that the great doctrine of justification is omitted (although Tit. 3:7 hints at the idea), but Paul must not be expected to have reflected all the facets of his Christian beliefs in letters written to personal friends who would presumably have been thoroughly acquainted with his doctrinal expositions.

Another line of attack is that doctrine in the Pastorals is stereotyped. It had been formulated into creeds that could be passed on by suitably qualified and authorized people. This formulation is described as "the faith," "the deposit," and "sound teaching." It had fixed limits and allowed no creative thinking within its concepts. With such arguments an objector to Pauline authorship like Easton (p. 203) supports his contention that the terms mentioned above conflict with the dynamic approach of Paul.

This challenge appears to be a real difficulty at first sight but is offset by two important considerations. Sometimes in other Epistles Paul referred to a body of doctrine, notably in Rom. 6:17, which mentions a form of doctrine that had been delivered to the readers. Phil. 1:27 refers to "the faith of the gospel," Col. 2:7 to "the faith" in which believers are rooted, and Eph. 4:5 to "one faith," clearly used objectively. The other important consideration is the presumption that Paul would have recognized the necessity for accurately transmitting the body of Christian doctrine. It is surely not strange to suppose that Paul would have had a relatively fixed idea of what he meant by "the deposit" or "the faith," and Timothy and Titus would no doubt have been acquainted with that idea.

But why should Paul suddenly have used the adjective "sound," since he did not use it elsewhere? It would certainly be most appropriate when contrasting the truth with error, which may well be conceived of as a disease (cf. 2 Tim. 2:17, which calls the teaching of Hymenaeus and Philetus "gangrenous").

Some scholars have found a difficulty in the introduction of five passages as "FAITHFUL SAYINGS" (1 Tim. 1:15; 3:1; 4:9; 2 Tim. 2:11; Tit. 3:8) because this phrase may reflect a time when doctrine had been reduced to acceptable sayings (M. Dibelius and H. Conzelmann, p. 9). But it is uncertain when the Christian Church first saw the need for such approved statements, and it is possible that doctrines were formulated in Paul's lifetime. Similarly, the Christian hymn of 1 Tim. 3:16 can be an early formulation, since citations from hymns may occur in the other Pauline Epistles (e.g., Phil. 2:5ff.; Col. 1:15ff.; Eph. 5:14). If the first two of these references are not accepted by all, the third can hardly be disputed as a hymnic fragment in view of its introductory formula and rhythmic form. It is reasonable to suppose that Paul recognized the value of Christian doctrine in set form that could be repeated or sung at gatherings for Christian worship. (*See also* HYMNS IN THE NT.)

5. Linguistic Considerations. Opponents of Pauline authorship have always paid considerable attention to linguistic criteria in analyzing literature and especially in comparing two or more works to ascertain common authorship. The major weakness of much of this criticism is that as yet it has no agreed canons of linguistic criticism, which would be a valuable restraint on inaccurate inferences.

The linguistic problem of the Pastorals involves two main branches of study: that of words occurring only in these Epistles among Pauline writings, and that of common prepositions, pronouns, and particles, which are thought to indicate an author's style. A subsidiary consideration is the Pastorals' lack of many characteristic Pauline expressions.

The Pastorals contain 175 words occurring only once in the NT (hapax legomena). Whereas some hapax legomena occur in each Pauline Epistle, the number is much higher in proportion to the letter's length in the Pastorals than in any other Epistle. P. N. Harrison examined this difficulty in detail. He concluded that the Pastorals were quite distinct from the other Epistles attributed to Paul and thus had a different author. The Pastorals contain in addition to hapax legomena 130 words used elsewhere in the NT but not by Paul. This fact is also supposed to support non-Pauline authorship.

Harrison (pp. 36f.) placed even more emphasis on the prepositions, pronouns, and particles (numbering 112) which he considered characteristic of Paul's letters but which are absent from the Pastorals. He pointed out that many of these occur with some frequency and that their absence from the Pastorals should therefore be regarded as significant. Harrison also maintained that since the language of the Pastorals shows kinship with the vocabulary of the Apostolic Fathers and the Apologists, the author belongs to this period and could not have been Paul.

Many have thought that the cumulative evidence denies Pauline authorship of these Epistles. But there are considerations that must be set over against this evidence. Statistical computations of the number of hapax legomena used in the Pastorals and in the other Pauline Epistles undoubtedly demonstrate a difference of vocabulary, but statistics cannot conclusively explain the differences. When the subject matter, purpose, or persons addressed change, new words may be expected. The limited amount of Pauline literature precludes certainty about what kind of language might be expected from Paul in various circumstances. Moreover, Paul's own vocabulary might have enlarged as a result of changing circumstances. Much more Pauline literature would be needed for a satisfactory basis for statistical comparisons. The vocabulary of a person of Paul's intellectual stature must have considerably exceeded the approximately 2400 words used in the existing Epistles.

The problem of the 112 omitted prepositions, pronouns, and particles is lessened when it is realized that other recognized Pauline letters contain very few of them (e.g., Colossians and 2 Thessalonians). Thus the apostle could have written Epistles using very few of what are deemed to be his characteristic words. When the prepositions, pronouns, and particles that do occur in the Pastorals are included in the list, the comparison with the other Epistles is much more favorable (see D. Guthrie, *The Pastoral Epistles and the Mind of Paul*; *Pastoral Epistles*, pp. 212ff., for a fuller discussion of Harrison's linguistic theories).

The attempt to show that the language of the Pastorals is similar to that of the Apostolic Fathers and Apologists is no more successful. Many of the Pastoral hapax legomena

that Harrison claimed to find also in these second-century works occur there only once and cannot therefore be cited as representative second-century vocabulary. Moreover, many of them also occur in the LXX, to which Harrison paid little attention. To support his arguments he brought in many second-century secular writers, but it can be shown that most of the words under review also occur in the secular vocabulary of the 1st century. In fact, very few cannot be paralleled in any writings prior to the mid-1st century. Thus the evidence does not demonstrate that the Pastorals' language is 2nd century. There is as much evidence, in fact, for a first-century date.

C. Alternative Theories. Those who dispute that Paul wrote the Pastorals have proposed two main theories of authorship. The first theory supposes that some genuine material was incorporated, while the second regards all the material as fiction. For convenience these will be called, respectively, the fragment and fiction theories. The following comments will show that many considerations render these alternative theories far less probable than Pauline authorship.

In addition to these major alternatives, there are modifications of Pauline authorship that maintain authenticity of the original Epistles but not of the extant form. In other words, the Pastorals were edited by one of Paul's associates. F. F. Bruce has suggested that Timothy and Titus themselves edited Pauline material in their possession (*see* PAUL THE APOSTLE II.D). It would be better to suppose that another of Paul's companions had done the editing or perhaps that Paul used an amanuensis. An amanuensis would account for linguistic differences, although it is impossible to know what degree of license the apostle would have allowed his secretary. It is easier to suppose an amanuensis theory for official church epistles than for semipersonal letters. Nevertheless, knowledge of Paul's literary habits is not sufficient to exclude the possibility that many of the peculiarities of these Epistles are due to his secretary.

1. Fragment Theory. The fragment theory was evolved to avoid a dilemma. Some parts of the Pastorals sound too genuinely Pauline to be dismissed as unauthentic; consequently their authenticity has been admitted by many who do not regard the Epistles as a whole as Pauline. There have been many different identifications of the so-called genuine fragments. The most widely followed is that of P. N. Harrison (*Expos.T.*, 67 [1955], 80), who isolated Tit. 3:12-15; 2 Tim. 4:9-15, 20, 21a, 22b; and 2 Tim. 1:16-18; 3:10f.; 4:1, 2a, 5b-8, 16-19, 21b-22a on the ground that they lack the linguistic peculiarities of the rest of the Epistles. A careful scrutiny of these "genuine notes" will show, however, that they consist largely of salutations and offer far less opportunity for any observable deviation from the style of the other Epistles than do the didactic portions. Another motive for Harrison's theory is the desire to fit the personal allusions into the context of Acts, which can be done only if they are treated piecemeal.

There are some serious objections to this kind of theory. Extraction of these "genuine notes" tends to be so subjective that a wide variety of theories results. Moreover, a theory like Harrison's creates real difficulties when the methods of compilation are considered. It cannot adequately explain, e.g., the editor's rearrangement of the genuine notes in 2 Tim. 4, or his omission of all genuine fragments from 1 Timothy. The uneven distribution of fragments also lacks satisfactory explanation.

Another problem, clearly more acute for the fragment theory than for any other, is the order in which the three Epistles were written. It is important to analyze the motives for using different quantities of genuine material. Did the writer produce 1 Timothy before 2 Timothy and then decide that some genuine notes would add verisimilitude to his next pseudonymous productions? Or was 2 Timothy with its quantity of genuine notes first published and then the other Epistles issued with decreasing concern for verisimilitude? Either way presents difficulties if not impossibilities.

Since not all personal allusions in these Epistles are included in the "genuine notes," the writer must have invented some. Once admit this, however, and the basis of the fragment theory is much less secure, for suspicion is at once aroused as to why the author could not have invented them all. Such doubts lead to the fiction theory (see C.2 below). Yet another problem for Harrison's theory is accounting for the preservation of the fragments, which appear to have been rather scrappy and not easy to preserve in the form in which they were used. The problem is most acute if the writer gained possession of them in loose pieces, although, if one presupposes that the writer received them in a body, it is also hard to explain how they became so jumbled up in composition.

The fragment theory contains many psychological problems that make it far less credible than is often supposed. For example, the writer must have been a curious mixture of devotedness to Paul and inability to appreciate his theology. He is supposed to have incorporated many echoes of Paul's Epistles and yet to have omitted his most characteristic doctrines. It is surely more credible that Paul himself wrote these letters, in which case the echoes of former Epistles are not surprising.

Another unavoidable problem for the theory of genuine fragments is its need of an adequate motive for their incorporation into letters purporting to be entirely from Paul. It is not enough to appeal to the widespread practice of producing pseudepigrapha and then to assume that such a procedure would have been regarded as almost axiomatic within the Christian Church. No pseudepigraphic parallel is close enough to establish even the probability that the Christian Church would have regarded the publication of letters under the assumed authorship of the apostle Paul as a legitimate procedure. There are only two examples of known epistolary pseudepigrapha in Christian history with any obvious parallels to NT Epistles: the so-called 3 Corinthians incorporated in the Acts of Paul, and the much later Epistle to the Laodiceans. In both cases external evidence is quite sufficient to establish their spurious character, and it is clear that the authors' aims, however well intentioned, were not acceptable to the Church at large. There are certainly no parallels at all to the practice of incorporating genuine notes in pseudepigrapha. If the theory is correct it marks a new religious literary practice, which requires justification. Works with the stamp of orthodoxy would not have needed such a questionable device to establish them. Why then did the author resort to such a practice? Is it credible to suggest that he attributed his letters to Paul out of modesty, because he had drawn his inspiration from Paul's genuine letters and had incorporated genuine Pauline fragments? This modesty explanation of pseudepigraphy has been enthusiastically embraced in recent times (e.g., by B. S. Easton and P. N. Harrison). It has even been suggested that the writer's use of pseudonymity was virtuous, since he would have been dishonest to publish the letters in his own name. But the Christian attitude toward pseudepigraphy assumed in this type of theory is only a hypothesis demanded by the presuppositions of the theories themselves.

2. Fiction Theory. The fiction theory, as advocated, e.g., by J. Holtzmann (*Die Pastoralbriefe* [1880]), presents much the same problems, although it may be slightly easier to

conceive of a wholehearted literary invention unaided by genuine material. If an author invented whole Epistles, he should have been capable of inventing the so-called genuine fragments. Yet the difficulty that many have found with a fiction theory is that the result in some parts (e.g., 2 Tim. 4) is so realistic as to be improbable. Such a conviction about certain passages implies authenticity of the whole Epistle. Indeed, the strength of support for the fragment theory is a sufficient indication of the difficulties of a fiction theory.

D. Conclusion. In spite of the peculiarities of the Pastorals, the maintenance of Pauline authorship presents far fewer difficulties than any of the alternative theories. It must be conceded that the early Church's unquestioned acceptance of these letters as genuinely Pauline is a more certain indication of authorship than modern speculation about what Paul could or could not have written.

See also PAUL THE APOSTLE II.D.

IV. Date.–If the genuineness of these Epistles is assumed, they need to be dated in the last year or two of the apostle's life, i.e., after his release from his first Roman imprisonment. 1 Timothy and Titus probably belong close together and must be placed within the period of Paul's further activity in the East, while 2 Timothy clearly dates from Paul's final imprisonment, when death appears to have been imminent.

On the other hand, any denial of Pauline authorship leaves few indications for precise dating. Alternative theories date these Epistles from the latter part of the 1st cent. to the middle of the 2nd. The main basis for a second-century date is the claim that the heresies reflected in the Epistles are Gnostic, but if this theory is rejected there is no reason to deny a first-century date. The strength of the arguments for Pauline authorship mentioned above makes A.D. 63-64 the most probable date.

V. Purpose.–In 1 Timothy the apostle's exhortations to his faithful helper cover aspects of church order and practice and contain much personal advice, not only about Timothy's own life and behavior but also about the handling of the different groups within the church. In 3:14f. Paul stated clearly why he had written. The letter was to be regarded as a prelude to his proposed visit to Ephesus; in case that visit was delayed the letter would guide Timothy's behavior in the church. Probably Paul had already given much of the material in this letter to Timothy orally, but its written form would have strengthened his position. Paul's urging Timothy to bold action more than once suggests that the latter was either timid by nature or intimidated by reason of his youth.

In writing to Titus Paul had as one of his aims urging Titus to join him at Nicopolis, where he had decided to spend the winter. He gave Titus instructions very similar to Timothy's, although modified to suit the different situation in Crete. An indication that Titus's assignment was tougher than Timothy's is the description of the Cretans in Tit. 1:10-16.

2 Timothy is in effect Paul's farewell letter. It is obvious that he expected his end very soon. He thought of his course as already finished and longed to see Timothy again, although he was apparently uncertain that he could. Even in this final letter he found it necessary to exhort Timothy to exercise courage in the work to which he had been called. The apostle added several personal reminiscences and testimonies that he clearly intended as a spur to the younger man. The many personal allusions in this letter reveal much of the apostle's character; ch. 4 particularly shows his frame of mind as he faced martyrdom.

VI. Important Topics.–Because the Pastorals are generally practical in character, many have overlooked their theological content. It may not be as evident as in Paul's other Epistles, but it is nevertheless present.

A. Christology. The Pastorals mention both the humanity (1 Tim. 2:5) and the lordship of Christ, although the latter is more dominant. Our Lord's descent from David (2 Tim. 2:8) and His trial before Pilate (1 Tim. 6:13) are referred to, but the interest does not center in the earthly life of Jesus. More than one passage has an exalted conception of lordship, particularly the doxology of 1 Tim. 6:15f. This passage probably applies to the Father, but others clearly ascribe lordship to Christ.

All these Epistles stress Christ's mission as Savior, although it is worth noting that saving is also frequently attributed to God. The divine action in sending Christ to be Savior is most clearly brought out in Tit. 2:11, where salvation is the result of the grace of God and where Paul's reference to its appearing must mean the Incarnation. In 2 Tim. 1:9 salvation and thus Christ's coming are the result of God's mercy initiated according to His own purpose.

The more precise teaching about Christ's saving activity is somewhat more limited. 1 Tim. 2:5 mentions His office as mediator and conceives of His sacrifice as a ransom. This passage is closely linked with the idea of the redemptive activity of Christ that comes into focus in Tit. 2:14. His incarnation brought about the abolition of death (2 Tim. 1:10) through His resurrection (2 Tim. 2:8, 11). Salvation is seen as all-embracing.

Another aspect of Christ in these Epistles is His position as judge. Distinguishing the judgment activity of God from that of Christ is not always easy. This difficulty is seen particularly in 2 Tim. 4:1, which attributes the act of judging to both. Christ alone judges in v. 8, at a time described as "that day."

Allusions in the Pastorals imply the preexistence of Christ. He intentionally came into the world to save sinners (1 Tim. 1:15). He was manifest in the flesh (3:16). Even more clearly does the thought occur in 2 Tim. 1:9, which says that grace was given in Christ before the world began.

The glorification of Christ clearly appears in the christological hymn in 1 Tim. 3:16. His present kingly activity is brought out in the faithful saying in 2 Tim. 2:12 ("if we endure, we shall also reign with him"). Believers will share this glory of Christ, as is evident from Paul's statement in 4:8 that the crown of righteousness is reserved for those who love His appearing. The heavenly kingdom is the apostle's ultimate goal (v. 18).

B. Man and His Need. 1 Timothy 4:4 makes evident that man was placed in a good world made by a good Creator, but a number of passages show that man is nevertheless sinful. Paul called himself the chief of sinners (1:15). Christ's having the mission to save (2:4) implies man's need of salvation. 2:14 hints that the origin of this condition is Eve's sin, but the doctrine of original sin is not developed. The three Epistles' numerous references to moral decadence sufficiently prove what kind of creature man becomes in his natural state. Most of the sins specifically mentioned are clearly recognizable as moral perversions.

The powers behind the world of sin are demonic, and Paul saw by the Spirit an increase in such activity (1 Tim. 4:1). In fact, the "last days" are described as perilous times of moral laxity and materialism (2 Tim. 3:1ff.).

VII. Contents.

1 Timothy

A. Greeting (1:1f.)
B. Reminiscences (1:3-20)
   1. Timothy is reminded of his task at Ephesus, with special reference to false teachers (1:3-11).
   2. He is reminded of Paul's experience of the gospel in order to reassure him (1:12-17).

3. He is reminded of past prophecies about his vocation and exhorted to carry on spiritual warfare (1:18-20).

C. Regulations for Church Life (2:1–6:2)
1. Public prayer is to be universal in scope because of God's desire for the salvation of all (2:1-8).
2. Women must be modest and silent in worship. This instruction appeals to the story of Adam and Eve (2:9-15).
3. Timothy is instructed how to select qualified bishops and deacons; care is necessary because the Church is God's special concern (3:1-13). Paul introduces a hymn to Christ (3:14-16).
4. Timothy is told how to combat false teaching and other threats to the Church. Paul offers his personal example (4:1-16).
5. Timothy is told how to discipline and deal with different groups within the Ephesus church, especially widows (5:1-16). Elders are to be honored according to their work and protected from indiscriminate charges (5:17-20). Timothy must discipline himself as well as others (5:21-25). He is told how to treat slaves of Christian and of non-Christian masters (6:1f.).

D. Concluding Instructions (6:3-21)
1. Timothy is again told to avoid false teachers (6:3-5).
2. He is warned about the perils of wealth, since the false teachers are covetous (6:6-10).
3. He is exhorted to develop spiritual qualities that befit his high calling as a man of God (6:11-16).
4. He is to charge the rich not to trust in their possessions (6:17-19).
5. He is again told to guard the deposit of truth and to avoid error and teachers of it (6:20f.).

2 Timothy

A. Greeting (1:1f.)

B. Paul's Thanksgiving for Timothy's Faith and Desire to See Him (1:3-5).

C. Exhortations Based on Experience (1:6-14)
1. Timothy must kindle his gift into a flame and remember the nature of the Spirit that he received (1:6f.).
2. Accordingly he must be unashamed in witnessing (1:8).
3. He has access to God's power and grace (1:8f.).
4. To encourage him, Timothy is reminded of the shame that Paul has suffered for the sake of his own calling and of Paul's confidence in God (1:10-12).
5. Timothy should hold fast to the truth by the Spirit's power (1:13f.).

D. Example of Others (1:15–2:1)
1. The Asiatics, who had deserted Paul, are a warning to Timothy against disloyalty (1:15).
2. Onesiphorus, an example of Christian affection and help, is a reminder to Timothy to be strong in grace (1:16–2:1).

E. Timothy's Task (2:2-13)
1. Timothy is to commit the true teaching to those with proven ability to pass it on (2:2).
2. He is to resolve to endure trials as do the soldier, athlete, and farmer (2:3-6).
3. He is to draw encouragement from the Gospel and from Paul's own sufferings for it (2:7-10). A faithful saying tells of the recompense for suffering for Christ's sake (2:11-13).

F. Exhortations about False Teachers (2:14–3:9)
1. Timothy must warn Christians about false teaching and must become an efficient expositor of the truth (2:14f.).
2. Paul advises the shunning of irrelevant discussions that lead only to disaster, as the case of Hymenaeus and Philetus shows (2:16-19). Timothy should pursue Christian virtues, avoid foolish questions, and deal courteously with opponents to win them for Christ (2:20-26).
3. Paul warns about the perils to come. He vividly describes those who will arise in the last days and claim to be devout but lack the power of a godly life. Timothy is told to avoid such people if they arise in his lifetime (3:1-9).

G. Further Exhortations Based on Experience (3:10–4:5)
1. Timothy is reminded of Paul's teaching, his life, and particularly his sufferings (3:10f.).
2. He is reminded that suffering is the lot of all Christians and that seducers and deceivers will increase rather than decrease (3:12f.).
3. He is reminded of the value of Scripture in his early training and its continued profitability for his work for God (3:14-16).
4. He is therefore to fulfil his calling as a preacher of the Word. This will require diligent application at all times, since people will not welcome sound doctrine (4:1-5).

H. Paul's Farewell (4:6-22)
1. In sacrificial language Paul expresses his readiness to depart (4:6).
2. He makes a personal confession that his race is run and that the crown of righteousness is already reserved for him and for all who love Christ's appearing (4:7f.).
3. Paul gives some personal messages (4:9-22).

Titus

A. Lengthy Greeting and Statement of Paul and Titus's Common Faith (1:1-4)

B. Appointment of Officials (1:5-16)
1. Titus has already been commissioned to appoint elders in Crete (1:5).
2. He is reminded of the moral and spiritual qualifications required (1:6-9).
3. He is warned about the opponents whom the elders must refute and about the Cretans' reputation for lying and material gluttony (1:10-16).

C. Christian Behavior (2:1-10)
1. Titus is to encourage aged people to be sober-minded and sound in faith (2:1-3).
2. Younger people are to be taught self-control, and wives are to concentrate on domestic happiness (2:4-6).
3. Titus himself is to provide an example in speech and doctrine (2:7f.).
4. Slaves are to be obedient to masters and dependable in order to further Christian doctrine (2:9f.).

D. Doctrine as a Basis for Behavior (2:11-15)
1. God's grace is the teacher for Christian living (2:11f.).
2. Hope for the second advent should give a further impetus (2:13).
3. The mainspring of purity is the redemptive activity of God (2:14).
4. These are the things that Titus is called to speak (2:15).

E. Social Responsibilities (3:1-7)
1. Loyal citizenship, sober behavior, and humility are to be enjoined on all Christians (3:1f.).
2. There is nevertheless a contrast between Chris-

tianity and its environment. Paul points to what Christians were (3:3) and then to what they have become—heirs of an eternal inheritance—through God's mercy and the renewing of the Holy Spirit (3:4-7).

F. Final Exhortations to Titus (3:8-15)
   1. The value of good works is pressed on him (3:8).
   2. He is to avoid empty arguments with those devoted to vain speculations after at least two attempts to reclaim them have failed (3:9-11).
   3. He is exhorted to join Paul for the winter at Nicopolis when Artemas or Tychicus has arrived to relieve him (3:12).
   4. He is to assist Zenas and Apollos on their journeys (3:13).
   5. He is to see that the Cretans maintain good works (3:14).
   6. Greetings are exchanged and the benediction is pronounced (3:15).

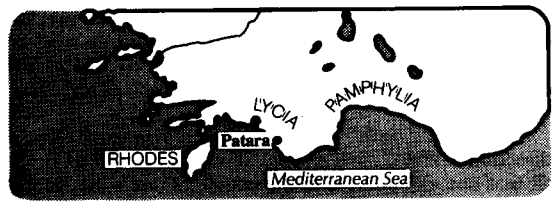
D. GUTHRIE

PASTURE; PASTURING [Heb. *rā'â, mir'eh, mar'îṯ, migrāš, nāwâ, nāweh, dōḇer* (Mic. 2:12), *kar* (Ps. 37:20; 65:12; Isa. 30:23), *nahᵃlōl* (Isa. 7:19); Gk. *nomḗ* (Jn. 10:9)]; AV also FOLD, HABITATION, HOUSE, etc.; NEB also FLOCK, GRAZING GROUND, HERBAGE, etc.



The RSV calls the portions of common land surrounding the Palestinian villages and towns (Heb. *migraš*) "pasture lands" in the records of their allocation to the Israelite tribes (Nu. 35:2ff.; Josh. 14:4; 21:2ff.; etc.) and elsewhere "common land," "open land (space, country)." Such areas were used freely as common grazing ground by the shepherds and herdsmen of the community.

The Heb. *nahᵃlōl* occurs only in Isa. 7:19; it probably means "watering hole" (cf. Arab. *manhal*, "watering place" < *nahila*, "drink"). It would doubtless be marked by the presence of a few bushes (see AV) or low brambles, upon which the invading insects would settle in large numbers.

In Ezekiel's instructions for the allocation of land in connection with his ideal temple, a specific portion of pastureland was to be set aside for the sanctuary (Ezk. 45:4). The devastation of the pastures (cf. Lam. 1:6; Ezk. 25:5) was symbolic of the utter desolation of the land. By contrast, the spiritual prosperity of the saved is indicated in Jn. 10:9 under the figure of rich pasturage.

R. K. H.

PATARA pat'ə-rə [Gk. *Patara*] (Acts 21:1). One of the main cities of Lycia, which is the mountainous outcrop of southern Asia Minor between Rhodes and Cyprus, SW of Pamphylia. Strabo described Lycia as "exceedingly well supplied with harbors and inhabited by decent people." The latter point is his way of distinguishing it from its eastern counterpart, Cilicia Tracheia, notorious for piracy. The Lycians always stood in high regard in antiquity because Homer listed them as Trojan allies (*Iliad* ii.876f.). Yet they were not Greek, and the Lycian language long resisted the hellenization that took place during a century of Ptolemaic control. After brief periods of Seleucid and Rhodian administration the cities of Lycia were recognized as independent by Rome and became one of the best known and most unusual examples of republican federalism. As many as twenty-three cities had seats in a representative assembly, one, two, or three, according to their size. Since there were thirty-six cities in Pliny's day and many more are known from their inscriptions, it is assumed that the smaller cities were grouped together for purposes of representation. The system was preserved when Lycia in A.D. 43 was joined with Pamphylia to make a new Roman province.

Patara, on the southwest coast facing Rhodes, possessed one of Lycia's best harbors, E of the Xanthus River mouth and protected by a headland with a lighthouse. Paul's party changed ships here, after leaving Rhodes, for the voyage to Tyre. Patara was one of the six members of the confederacy big enough to have three representatives in the assembly, but there is no record of a church in the NT period.

E. A. JUDGE

PATE [Heb. *qoḏqōḏ*] (Ps. 7:16 [MT 17]); NEB HEAD. The top of the head. "Pate" has been used here by the RSV, AV, and most of the early English versions since Coverdale probably for poetic effect, since it parallels "head" (*rō'š*). *See* CROWN OF THE HEAD.

PATH [Heb. *'ōraḥ, nᵉṯîḇâ, nāṯîḇ, ma'gāl, miš'ôl* ("narrow path," Nu. 22:24), *šᵉḇîl* (Ps. 77:19 [MT 20]), *mᵉsillâ* (Joel 2:8), *ḥᵃlaqlaq* ("slippery path," Jer. 23:12), *dereḵ* (Jer. 31:9), *tāmaḵ* ("follow the path," Prov. 5:5); Gk. *hodós, tríbos, trochía*]; AV also WAY, LAND (following MT *'ereṣ* in Ps. 143:10), GOINGS, RANKS (Joel 2:7); NEB also COURSE, WAYSIDE, ROAD, LINE, FOOTPATH, etc. A route of travel; frequently a metaphor for the direction, pattern, or experiences of a person's life.

"Path" occurs in only one OT narrative passage to describe a literal beaten track (Nu. 22:24). Elsewhere it is used only in poetic passages (apart from Gen. 49:17, only in WISDOM literature [Job, Psalms, and Proverbs] and in the Prophets) with various figurative meanings. The most common term, Heb. *'ōraḥ*, is rendered "path" about thirty times. It can refer figuratively to a land route upon which people can walk (cf. Isa. 41:3; Hos. 2:6 [MT 8]), to the route that fish follow through the sea (Ps. 8:8 [MT 9]), or to the sun's "course" (RSV) through the sky (Ps.

19:5 [MT 6]). Most often, however, it is a metaphor for the course of a person's life. In this sense it often occurs in synonymous parallelism with *derek*, which is usually rendered "way" (e.g., Gen. 49:17; Ps. 27:11; Isa. 30:11; *see* WAY). The two terms are not, however, totally synonymous. That *derek* usually occurs in the singular while *'ōraḥ* appears more often in the plural (cf. Prov. 2:8, 20) suggests that a *derek* may be made up of several *'ōrāḥôt* (cf. Isa. 3:12, where the RSV renders *derek 'ōrᵉḥōteykā* "the course of your paths"; see *TDOT*, III, 281).

In seventeen passages "path" represents the feminine noun *nᵉtîḇâ* and in four the masculine *nāṯîḇ*. These terms can refer figuratively to a track on the ground (e.g., Job 18:10; 28:7; cf. "bypath," Jer. 18:15) or even to a "wake" produced on the surface of the water (Job 41:32 [MT 24]; Isa. 43:16; cf. *šᵉḇîl*, Ps. 77:19 [MT 20]); but most often, like *'ōraḥ*, they are metaphors for the course that one chooses for one's life, occurring frequently in synonymous parallelism with *derek* (e.g., Job 24:13; Prov. 1:15; 3:17; Isa. 42:16). In ten instances "path" translates *maʿgāl* (possibly < *ʿᵃgālâ*, "chariot, cart"; cf. RSV "tracks of thy chariot," Ps. 65:11 [MT 12]). This term also occurs frequently in parallel with *derek* (e.g., Prov. 4:11; cf. v. 26; 5:21; Isa. 59:8) and usually refers to a pattern of behavior that determines a person's destiny (cf. Prov. 2:9, 15, 18; etc.). *Mᵉsillâ*, which generally denotes a built-up road or "highway" (cf. Isa. 40:3), is used figuratively in Joel 2:8 of the course followed by an "army" of locusts (cf. *'ōraḥ* in v. 7).

A person's "path" can variously represent (1) one's direction in life, (2) one's behavior or manner of life, or (3) all that one experiences in the course of one's life. In the first sense, wisdom literature saw only two paths between which every person must choose: the path of obedience to God and the path of disobedience. The wise/righteous seek to conform their lives to the pattern revealed by God in His commandments. Thus the psalmist prays, "Make me to know thy ways, O Lord; teach me thy paths [*'ōrᵉḥōṯ*]" (Ps. 25:4; cf. 17:5; 119:35; Isa. 2:3 par. Mic. 4:2; Isa. 26:8). The paths of such persons are level (Ps. 27:11; 143:10; Prov. 15:19; Isa. 26:7; 42:16) and straight (Prov. 3:6; Jer. 31:9; cf. Wisd. 10:10) and light (Ps. 119:105; Prov. 4:18; Isa. 42:16; cf. Sir. 50:29), whereas the paths of the foolish/wicked — those who forget God (Job 8:13) and turn aside from His revealed will (Isa. 30:11; cf. 3:12; Wisd. 5:7f.; 12:24; Bar. 4:13) — are crooked (Prov. 2:15; Isa. 59:8) and slippery and dark (Jer. 23:12; Prov. 2:13), so that "they do not know over what they stumble" (Prov. 4:19; cf. Job 18:10). Moreover, obedience to God's commandments leads to righteousness (Ps. 23:3; Prov. 2:9; 4:11), justice (Prov. 2:8f.; 8:20), and peace (3:17; Isa. 59:8). Ps. 25:10 confesses, "All the paths of the Lord are steadfast love and faithfulness. . . ." The direction or pattern of life that one chooses will determine one's destiny. The path of wisdom/righteousness leads to life, while the path of error/wickedness leads to death (cf. Ps. 16:11; Prov. 2:18f.; 5:5f.; 7:25; 10:17; 12:28; 15:24). Thus the wisdom teachers warned, "Take heed to the path of your feet, then all your ways will be sure" (4:26).

The OT writers confessed that a person's "paths," in the sense of one's deeds or manner of life, are all known by God (e.g., Ps. 139:3; Prov. 5:21; cf. Job 13:27; 33:11). In some passages "path" seems to refer simply to what one experiences in the course of one's individual life; thus calamity can be depicted as one's path being made impassable (Job 30:13; cf. Hos. 2:6) or being enveloped in darkness (Job 19:8). The psalmist complained of his enemies: "In the path where I walk they have hidden a trap for me" (Ps. 142:3 [MT 4]).

In the RSV NT "path" occurs only in the parable of the sower and in several quotations from the LXX. In Jesus' parable (Mt. 13:4, 19 par. Mk. 4:4, 15; Lk. 8:5, 12) Gk. *hodós* (the usual LXX translation of Heb. *derek*) refers to a footpath along the edge or through the middle of a field. In Palestine sowing preceded plowing; thus the farmer sowed seed on the path that he intended to plow up later (see J. Jeremias, *Parables of Jesus* [Eng. tr., 2nd rev. ed. 1972], pp. 11f.).

"Path" (*hodós*) has a figurative sense in Acts 13:10, which combines the words of the LXX of Prov. 10:9 and Hos. 14:9, and in Rom. 3:16, which quotes from the LXX of Isa. 59:7. He. 12:13 applies the exhortation of Prov. 4:26 to the entire Christian community, urging that "paths" (*trochiaí*) be made straight so that all may finish the race (cf. v. 1). All the Synoptics quote from the LXX of Isa. 40:3 (with a slight change in wording): "Prepare the way [*hodós*] of the Lord, make his paths [*tríboi*] straight" (Mt. 3:3 par. Mk. 1:3; Lk. 3:4). Whereas Isa. 40:3 had poetically depicted the construction of a "highway" (Heb. *mᵉsillâ*) across the desert in preparation for the exiles' exodus from Babylon, the Gospel writers applied this imagery figuratively to John's ministry of preparation for the coming of the Messiah — the true fulfillment of the promised deliverance.

PATHROS path'ros [Heb. *paṯrôs* < Egyp. *p3-t3-rs[y]*–'the southland'; Gk. *gḗ Pathourēs*]. **PATHRUSIM** path'rōō-sēm [Heb. *paṯrusîm*]. A designation of Upper (i.e., southern) Egypt, the Nile Valley area between Memphis (cf. Jer. 44:1), near modern Cairo, and Syene (modern Aswân). It is invariably mentioned together with Egypt in the OT (Jer. 44:15; Ezk. 29:14; 30:14); its plural gentilic, Pathrusim, occurs in the Table of Nations in Gen. 10:14 (= 1 Ch. 1:12). Especially significant is Isa. 11:11, which refers to *miṣrayim* (Lower or northern Egypt), *paṯrôs*, and *kûš* (Nubia) in the same N-S geographical order as the *muṣru-pāturîsu-kûsu* of the somewhat later Assyrian inscriptions of Esarhaddon.

PATHRUSIM. *See* PATHROS.

PATIENCE; PATIENT; PATIENTLY. In the RSV "patience" is almost always a human disposition. It is tempting to consider patience simply as a virtue to be cultivated, but it is first of all a divine disposition. Indeed, the patience of God frequently serves as the source and pattern for human patience.

1. **Makrothymía** *of God.*–The patience of God is included in the catalog of His attributes that runs through the OT like a refrain, "a God merciful and gracious, slow to anger [Heb. *'erek 'appayim*], and abounding in steadfast love and faithfulness" (Ex. 34:6; cf. Nu. 14:18; Neh. 9:17; Ps. 86:15; 103:8; 145:8; Jer. 15:15; Joel 2:13; Jonah 4:2; Nah. 1:3). The LXX translates Heb. *'erek 'appayim* quite literally as Gk. *makrothymía, makrothyméō*, and *makrothýmōs*. Thus a word with little significance in nonbiblical Greek was given a good deal of importance and a new depth in biblical Greek.

God's patience, or slowness to anger, does not dismiss His wrath or give up the claims that are legitimately His (see Nu. 14:18; Nah. 1:3). But His patience delays His wrath, so people ought not to misuse it. His patience

allows and calls for repentance (cf. Joel 2:13). The traditional OT confession of God's patience is radically interpreted by Jonah (4:2) to include the whole world, the Ninevites as well as the Israelites.

The NT materials are quite consistent with that pattern of patience. 2 Pet. 3:9 explains the delay of the Day of the Lord as due to God's patience: He "is patient [Gk. *makrothyméō*; RSV "forbearing"] toward you, not wishing that any should perish." Neither God nor the author dismisses the day of wrath and glory; it is delayed so that all might repent.

The parable of the unforgiving servant in Mt. 18:23-35 presupposes this pattern of patience. The lord forbears with his servant (18:26f.) but his entitlement to a "reckoning" (v. 24) is not given up (vv. 32-34). The reference to "anger" (v. 34) shows the influence of the Hebrew expression translated "slow to anger." In this parable the servant misuses his master's patience by refusing to live in the kind of repentance that would cause his relations with others to reflect the Lord's patience (v. 29).

Paul presupposed the same pattern of patience and the same relation between the patience of God and the patience of people in Rom. 2:4, which contrasts the behavior of the judgmental Christians in Rome with the patience of God. Their refusal to be slow to judge and slow to anger presumed upon God's patience. God's wrath against the gentile unrighteousness is not dismissed (1:18-32). But the "judges" neither reflected God's patience nor used it to be led to repentance themselves. Rather, they abused it by judging the gentile Christians harshly and by boasting about their own righteousness. Therefore they presumed "upon the riches of his kindness and forbearance and patience" (2:4) and by their "impenitent heart" stored up wrath for themselves (v. 5).

The pattern of Rom. 9:22 may look different initially. (J. Horst, *TDNT*, IV, 382, denied that God's patience here allows for and intends repentance and conversion.) But the elements of the pattern — the delay (but not the dismissal) of wrath, the possibility of misusing the patience by pretending to have some special claims on God's favor, the possibility of repentance, and the intention of the final conversion of all (11:32) — all are present in the extended argument of chs. 9–11. The implication that Jewish and gentile Christians in Rome should imitate God's patience is always just below the surface.

The Pastoral Epistles contain a quite remarkable sequence of patience. Christ as the agent of God displayed His "perfect patience" (1 Tim. 1:16) in Paul by delaying wrath against the blasphemer and persecutor for the sake of calling him to repentance and missionary service. This patience is an "example," presumably for the communities' dealings with other persecutors who act ignorantly in unbelief. Paul in turn as an agent of Christ became an example of patience (2 Tim. 3:10; cf. 2 Cor. 6:6), and, finally, Timothy was instructed to be "unfailing in patience and in teaching" (2 Tim. 4:2). The chain extended from Christ as God's agent to Paul as Christ's agent and to the young pastor Timothy. Nowhere along the chain are the claims either of God's righteousness or of the unrighteous abandoned. Nowhere is patience reduced to a kind of apathetic tolerance; everywhere anger, wrath, and any final judgment are delayed for the sake of repentance. God's patience, which is also in those whom He engages in His disposition, refuses to dismiss either His righteousness or the unrighteous. It is God's determination to bless a people in and with His righteousness.

II. **Makrothymía** *of Mankind.*–God's patience stands behind human patience as its pattern and the first link in a chain. Human patience is not first of all a virtue achieved but a gift received. It is listed among the fruits of the Spirit (Gal. 5:22). It comes when one is strengthened with the power of God (Col. 1:11). But that gift, that empowerment, is also an obligation (Gal. 5:25); thus patience is also listed among those virtues that the Christian is to "put on" (Col. 3:12) and among those that describe "a life worthy of the calling to which you have been called" (Eph. 4:1f.). Christians are exhorted to be patient (1 Thess. 5:14; Jas. 5:7).

In each of these contexts Gk. *makrothymía* is patterned after God's patience, but different aspects of that pattern are emphasized. 1 Cor. 13:4 associates patience with love; it is love that is patient (Gk. *makrothyméō*). (It is worth observing that the predicate adjectives of the English translations of vv. 4f. translate Greek verbs; the works of love rather than the attributes of love are enumerated.) Indeed, "love is patient" is the first thing said about love and one of the most important things that one can say about patience. Patience is also associated with love in Gal. 5:22, the list of the fruit of the Spirit, and in 2 Tim. 3:10, the description of Paul's ministry. In 1 Cor. 13:4; 2 Cor. 6:6 (RSV "forbearance"); Gal. 5:22, Gk. *makrothymía* appears alongside "kindness" (Gk. *chrēstótēs, chrēsteúomai* [1 Cor. 13:4]). It is associated with "lowliness," "meekness," "forbearing one another" (Gk. *tapeinophrosýnē, praÿtēs, anechómenoi allḗlōn* [Eph. 4:2; Col. 3:12]). In 1 Thess. 5:14 it stands alongside "admonish the idle, encourage the fainthearted, help the weak." A person whose patience reflects God's patience refuses to dismiss either the righteousness of God or the unrighteous, the idle, the fainthearted, and the weak. Patience delays judgment and anger; it does not repay "evil for evil" (1 Thess. 5:15).

Sometimes because of its associations Gk. *makrothymía* comes very close to the meaning of Gk. *hypomonḗ*. It is linked with "faith" in He. 6:12-15, where Abraham exemplifies one who waits in the confident expectation of the fulfillment of God's promises. In Jas. 5:7-11, a section devoted to the exhortation "be patient," it is associated with Gk. *kakopatheía* and *hypomonḗ*, perseverance and endurance (RSV "suffering" and "steadfastness"). In these places the emphasis falls, as with *hypomonḗ*, on courageous endurance rather than on restraint of anger and retaliation. In James, however, the pattern of divine patience is still operative, for the exhortations about patience include, "Do not grumble, brethren, against one another, that you may not be judged" (Jas. 5:9). The patience of God must not be misused but should rather be an occasion for repentance, which involves being patient with each other.

III. **Hypomonḗ.**–Greek *hypomonḗ* is also translated "patience." J. B. Lightfoot (comm. on Colossians and Philemon [rev. ed. 1904], p. 138) suggested that in general the distinction between *hypomonḗ* and *makrothymía* can best be seen in their opposites — respectively, cowardice or despondency, and wrath or revenge. Exceptions are the use of *makrothymía* in Hebrews and James. Unlike *makrothymía, hypomonḗ* was already a firmly established word in nonbiblical Greek. Plato contrasted *hypomeínai*, having courage (to hear out an argument), to *phygeín*, running away (*Theaetetus* 177b). NT use is consistent with such a classical emphasis on courage and is influenced by the sense of *makrothymía* as well as by the model of the afflicted OT saints who put their trust in God. Ps. 37:7, e.g., calls for the saints to "wait patiently" (following Aq. *apokarodokéō*, which suggests Heb. *yāḥal* rather than *ḥûl*) for the action of God against the evil and for the humble poor. (The OT already aligned this disposition with patience in the sense of Gk. *makrothymía*, for Ps. 37:8 instructs, "Refrain from anger and forsake wrath.") In Ps. 40:1 (MT 2) the emphatic Hebrew construction of

infinitive absolute and finite verb, Heb. *qawwōh qiwwîṯî*, is translated by the Vulg. *expectans expectavi*; an approximate translation is "I waited waitingly [for someone to help] or the NEB "I waited, waited. . . ." The RSV translation, "I waited patiently," seems best if one remembers that such patience is courageous endurance in expectation of God's action, not apathy or despondency.

Patient endurance of unjust suffering has God's favor (1 Pet. 2:20). In v. 21 *hypomonḗ* comes close to *makrothymía*, for the example of such patient endurance is Christ, who "did not revile in return" and "did not threaten" (v. 23). The book of Revelation reminds communities in the midst of persecution of the gift and responsibility of courageous endurance with expectation (Rev. 1:9; 2:2f., 19; 3:10).

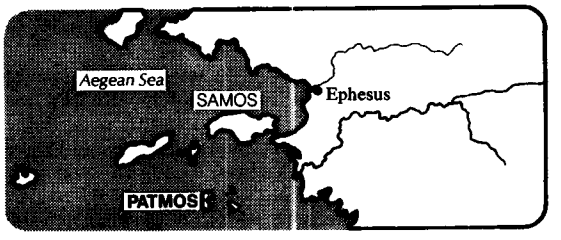
As *makrothymía* is especially related to love, so *hypomonḗ* is especially related to hope. In the context of the cosmic hope of Rom. 8:18-25, Paul declared, "The sufferings of this present time are not worth comparing with the glory that is to be revealed to us" (v. 18). For that glory the creation and the Christian community wait with "eager longing" and "patience" that is courageous endurance with expectation, not apathy or fatalism (vv. 19, 25). *Hypomonḗ* is also associated with hope in 12:12, "Rejoice in your hope, be patient in tribulation." (Cf. 1 Thess. 1:3 the patience [*hypomonḗ*; RSV "steadfastness"] of hope.)

Such patience is, finally, no merely passive waiting. Its expectation bears fruit. It is a courageous persistence in well-doing (Rom. 2:7; Lk. 8:15; and in the apostolic activity of Paul himself, 2 Cor. 12:12).

IV. Patience in the Wisdom Literature.–"Patience" has a quite secular sense in the wisdom literature, being advocated because it is prudent, not because one ought to be patient like God. Prov. 25:15 teaches that being patient (*'ōreḵ 'appayim*, lit. "long of nose" or "long to anger") helps one be persuasive. Eccl. 7:8b contrasts the patient (*'ereḵ rû[a]ḥ*, lit. "long of spirit/breath") and the proud. The preceding context (v. 8a) demands that this contrast be relevant to the long and sometimes tedious wait between the beginning of a thing and its end. The end is better than the beginning, and patiently waiting for that end is better than haughtily seizing it prematurely, perhaps by violent means. The prudent person is patient, exercises self-control, and is "not quick to anger" (v. 9).

In Prov. 14:17 the RSV prefers the LXX to the MT. The MT reading, Heb. *yiśśānē'*, contrasts the quick-tempered person who is not hated for his shortness of temper with the devious person who plans and executes revenge coldly and dispassionately and who is hated. The RSV and LXX, like v. 29, compare the short-tempered and the patient person. (The LXX seems to presuppose a text reading *yiśśā'*, a change of one consonant; cf. W. McKane, *Proverbs* [*OTL*, 1970], p. 468.)

In Job 6:11 a quite literal translation would have Job ask, "Why should I prolong [hiphil of *'āraḵ*] my life [*nepeš*]?" (so AV). The RSV quite legitimately takes *nepeš* as the seat of the emotions or passions (cf. H. W. Wolff, *Anthropology of the OT* [Eng. tr. 1974], pp. 15-18) and so translates "Why should I be patient?" The sense of the question in either case is, "What's the point of enduring, of calmly waiting for the end?" The patience called for is courageous endurance with expectation, but Job has lost his spirit and wants only to die (v. 13).



"Patiently" [Gk. *makrothýmōs*] has a quite secular sense of dispassionately holding one's emotive reactions in check in Acts 26:3, where Paul appears before Agrippa.

A. D. VERHEY

PATMOS pat'məs [Gk. *Patmos*]. A small Greek island of the group Dodecanese, about 45 km. (28 mi.) SSW of Samos in the Aegean Sea, mentioned once in the Bible: "I, John . . . was on the island called Patmos on account of the word of God and the testimony of Jesus" (Rev. 1:9). Revelation is the only NT book whose author stated its place of writing.

The island is 16 km. (10 mi.) long from north to south and about 10 km. (6 mi.) broad along the northern coast. It is volcanic, rocky, and mostly treeless. The highest point is Mt. Elias, which rises over 250 m. (800 ft.). *See* Plate 61.

In antiquity Thucydides (iii.33) and Strabo (*Geog.* x.5) mention Patmos. It was one of the many places to which Rome banished exiles. According to a tradition preserved by Irenaeus (*Adv. haer.* v.30), Eusebius (*HE* iii.18-20), Jerome (*De vir. ill.* 9), and others, John was exiled there in the 14th year of the reign of Domitian (A.D. 95) and returned to Ephesus on the accession of Nerva (A.D. 96). Traditions concerning John's exploits on Patmos have survived in *Acts of John by Prochorus*, a work attributed to John's scribe but actually composed in the 5th century. The grotto that legend identifies as the site of John's visions is the most venerated of the island's score of shrines and chapels.

The famous monastery of St. John the Theologian was founded by St. Christodoulos in 1088. Nearby is the Patmian Theological School, founded in 1713 and still attended by students from all parts of Greece. Although only part of the once-valuable library in the monastery is left, it contains about three hundred parchment and six hundred paper MSS, chiefly biblical and patristic, and is one of the major collections of Byzantine MSS in Greece.

I. A. SPARKS

PATRIARCHS. The forefathers of the people of Israel. The term can be used in a broad sense, referring, e.g., to David (Acts 2:29), to the list of eleven revered ancestors from Abraham to Daniel (1 Macc. 2:51-60), or even to the ANTEDILUVIAN PATRIARCHS. However, the patriarchs par excellence are Abraham, Isaac, Jacob, and Joseph and his brothers. This article concerns these patriarchs, whose story is presented in Genesis.

I. Structure of the Patriarchal Narratives.–The story of the patriarchs of Israel is set forth in Gen. 12–50. This corpus is structured by the second series of five occurrences of the formula, "These are the generations [descendants or stories] of . . ." (the first five occurrences structure Gen. 1–11), as follows:

Division		Introducing Narrative	Introducing Genealogy
The Terah Cycle (Abraham)	11:27	11:27 Terah and his story (Abraham)	
	25:18		25:12 Ishmael and his descendants
The Isaac Cycle (Jacob and Esau)	25:19	25:19 Isaac and his story (Esau and Jacob)	
	37:1		36:1, 9 Esau and his descendants
The Jacob Story (Joseph)	37:2	37:2 Jacob and his story (Joseph)	
	50:26		

Note how the major divisions that can be discerned on the basis of content are set off by this recurring formula: each of the cycles of patriarchal narratives is introduced as the story of the father of the principal character of that section, viz., the Abraham cycle is introduced as the story of Terah (11:27), the Jacob cycle as the story of Isaac (25:19), and the long narrative about Joseph as the story of Jacob (37:2). This is probably to be explained (at least in the last two cases) by the highly patriarchal nature of Israelite society. Even though the major content of the narrative concerns the sons, it is properly the story of the patriarch becuse he is still alive and functioning as the head of the family; it is *his* story because it is *his* family. It should also be noted how each of the two cycles of stories, the Abraham cycle and the Jacob cycle, closes with a genealogical section (introduced by this formula) that brings to a conclusion the role of the secondary character of that section: Ishmael at the end of the Abraham cycle (25:12-18) and Esau at the end of the Jacob cycle (36:1-43). Finally, this structure reveals the secondary importance of the role of Isaac in the patriarchal traditions, for no separate cycle of stories deals with him. (The division entitled "The Isaac Cycle" deals with Jacob and Esau.)

II. Theme and Theology of the Patriarchal Narratives.–*A. Promise.* After a transitional passage consisting of an expanded or annotated genealogy, which gives a very few (but nonetheless important) familial facts (11:27-32), the major theme of the patriarchal narratives is given at the very beginning in the call and election of Abraham. Gen. 12:1-3 sets forth the basic elements of the promise to the patriarchs and is of programmatic significance for the nature and purpose of the stories of the patriarchs that follow. Their theme throughout is the progress, the vicissitudes, and the partial fulfillment of those promises that here stand like a rubric at their beginning.

Although numerous elements have been isolated from the various formulations of the promise (see, e.g., Westermann, pp. 132-160), three are prominent in 12:1-3: the promise of blessing (vv. 2f.), the promise of posterity ("a great nation," v. 2), and the promise of land (v. 1).

1. Blessing. The theme of God's blessing reverberates through the following narratives. It is sometimes stated independently (e.g., 35:9; 48:3), but most often it is connected with the promises of posterity (17:16, 20f.; 22:17; 26:24; 28:3) and of land (26:3; 28:4). An important corollary of this blessing of God is that through the patriarchal line blessing will come upon humankind in general (12:3; 26:4; 28:14). It is at this point that the patriarchal theme is most closely tied to the universal prehistory of Gen. 1–11, for in the creation ordinances (1:28) and in their restatement after the Flood (9:1) God blesses humankind and commands them to be fruitful and fill the earth.

2. Posterity and Land. When the significance of these two great promises in the call of Abraham has been perceived, the point of the narrative flow becomes transparent. Abraham is to become a great nation (12:2), but Sarah is barren (11:30); the land of Canaan belongs to his descendants (12:1, 7), but the Canaanites occupy it (12:6b). Right at the beginning the narrator consciously juxtaposes God's promise and Abraham's circumstances. The whole great promise of innumerable descendants is reduced to the single but staggering question: will Sarah bear Abraham a son? This question is the overarching, all-consuming interest of chs. 12–21. The promise is stated in the most extravagant way: Abraham's descendants are to be as the dust of the earth (13:16), as numerous as the stars in heaven (15:5). Abraham and Sarah, childless, attempt stratagems to fulfill the promise: he adopts a slave born in his own house (15:2f.); Sarah, to protect her position as his wife, provides her maid Hagar as a secondary wife, through which union Ishmael is born (ch. 16). But each of these attempts meets with God's promise of a son through Sarah (15:4; 17:18f.). Finally, when old age makes the promise seem impossible in human terms, "the Lord visited Sarah as he had said" (21:1) and Isaac is born. Even the haunting narrative of the sacrifice of Isaac (ch. 22) relates to the same theme: Abraham is called to an obedience that jeopardizes the promise should he fail, but that, by demanding Isaac's life, also jeopardizes the promise should he carry out his awful instructions.

The Isaac cycle (relating mainly the story of Jacob and Esau), 25:19–37:1, resonates with the same theme. It begins with the account of the birth of Jacob and Esau (25:21-26). Their destiny and story are foreshadowed in two ways; first, by the oracle to Rebekah (v. 23), which reveals that it is two *nations* that struggle in her womb and that the younger shall supplant the elder; second, by the following brief but pregnant account of Esau's sale of his birthright to Jacob (vv. 27-34). Immediately thereafter the specific promises given to Abraham in 12:1-3 are repeated to Isaac in 26:2-5. The long story that follows — the endangering of the ancestress (26:6-11), Jacob's theft of Esau's blessing (ch. 27), the resulting fraternal rivalry that endangers the life of the heir of the promise (27:41-45), the barrenness of Rachel and the rivalry between her and Leah to produce sons for Jacob (29:31–30:24), and especially the specific reaffirmation of the Abrahamic promises to Jacob at Bethel on his way out of the land of promise (28:13-15) and again at the same place on his return (35:9-12) — all these events reveal that the central theme here also is the fulfillment or nonfulfillment of the promises of land and of posterity.

The Jacob story, whose main content is the extended

and carefully constructed narrative of Joseph, is different in form from the Abraham and Jacob cycles of stories but relates to the same theme. It begins immediately with Joseph's dreams (37:5-11), which once again foreshadow the ascendancy of the younger over his elder brothers. The long story that follows relates how these dreams do indeed come true, as Jacob seems to have suspected they would (37:11b). Whatever other lessons it teaches, however, its present meaning expressly relates to the preservation of the expanding people of the promise: it is Joseph himself who knows that God sent him ahead to preserve for his family "a remnant on earth" and "many survivors" (45:5-8), and that, though his brothers intended evil, God meant it for good, to preserve alive many people (50:20).

Thus the patriarchal period is supremely the time of the promise. But it is a promise that is strangely, almost perversely, postponed. The vision may be that of descendants like the dust of the ground (13:16), the stars of the heaven (15:5), or the sand of the sea (22:17), but the reality is Abraham's long vigil for one son, Jacob's long exile for fear of his life, and at the end but seventy people (46:27). The land is to belong to them and their descendants, but they wander like resident aliens (Heb. *gērîm*) through the "land of their sojourning" (Heb. *māgûr*; 17:8; 28:4; 37:1; 47:9), which is owned by the Canaanites (12:6b; 13:7b). The only land they ever possessed was one field for a burial plot (23:17-20) and another for an altar (33:19f.). As Clines observed (p. 46), the experience of Abraham presages the whole patriarchal story, for he arrives in the land (12:5) only to walk straight through it, out the other side, and down into Egypt (12:10). And so, at the end of the patriarchal period, through the beautifully told story of Joseph, the patriarchal family are no longer even sojourners in the land. They have removed to Egypt. Indeed, it is in this way that these narratives are closely tied to what follows, for the promise has not been realized and the goal has not been reached. The fulfillment of the promises of land and of posterity will be realized only by the dramatic events of the Exodus and Conquest that follow, as the text itself frequently sets forth (e.g., Ex. 6:4-8).

B. Covenant. The chief means by which God set up and normalized a relationship betwen Himself and the patriarchs was His COVENANT. A covenant is the establishment of a particular relationship or the commitment to a particular course of action, not naturally existing, which is given sanction by an oath normally sworn in a solemn ceremony of ratification.

God's covenant with the patriarchs is established with Abraham in two passages, Gen. 15:7-21 and 17:1-21. In Gen. 15 the covenant is sealed and ratified by God in a solemn and mysterious ceremony in which God places Himself under oath by passing between the halves of sacrificed animals in the awe-inspiring form of a flaming torch and a smoking furnace, ominous symbols also used in magical ritual (see E. Speiser, *Genesis* [*AB*, 1964], pp. 113f.). Here God condescends to place Himself symbolically under a curse (for the demonstration of which see Jer. 34:19-22) in order to affirm to Abraham the certainty of the promises He has made. Although using somewhat different vocabulary and ideas, ch. 17 also sets forth the covenant with Abraham, but it stresses primarily the promise of posterity (17:4-6, while ch. 15 centered on the promise of land), and it adds the requirement of circumcision, the sign of the covenant. It is important to stress that in this covenant it is God who takes the oath. Nothing is required of Abraham (circumcision is the *sign* of the covenant, 17:11). It is in this way that the Abrahamic covenant differs from that with Moses in Ex. 20. In the covenant with Abraham it is *God* who lays Himself under obligation; whereas in the Mosaic covenant it is *Israel*, the recipient of the covenant, which takes the oath and is thereby placed under stringent stipulations.

C. Faith and Righteousness. In the stories of Abraham, as we have noted, the promise of innumerable descendants is reduced to the single, absorbing question of one son, the fulfillment of which is singularly postponed while the promise is stated in ever more extravagant terms. Clearly a major point of these stories is Abraham's faith and obedience. This can be seen in the account of his call. The summons to Abraham is radical: he is to abandon all his roots — land, kindred, and immediate family (12:1) — and that for a most uncertain destination, "a land that I will show you" (v. 1). Modern westerners, who live in a mobile society where the bonds of family and family residence are so easily broken, need to recall here that it was very difficult for ancient people, rooted in patriarchal and patrilocal culture, to relocate. So when, after the call, the narrator presents Abrahams's response in terse and utter simplicity ("So Abram went as the Lord told him," v. 4), it is clear that Abraham is presented to us as a model, a paradigm of faith and obedience.

That the text intends to teach about the relationship between faith and righteousness can most clearly be seen in 15:6: "And he [Abraham] put his faith in the Lord and he reckoned it to him as righteousness." The importance of this verse is signalled by the fact that it is not part of the narrative of what happened between God and Abraham (vv. 1-5), but is the narrator's summarizing word that Abraham's righteousness consisted in the fact of his faith in God's promise. If righteousness is conceived, as in modern western society, as conformity to an abstract moral code, this equation is indeed hard to understand. In the Bible, however, righteousness is not a norm prescribing ethics, but faithfulness to a relationship. The righteous person is faithful to the claims of all his or her relationships. Therefore, according to this passage, God judges that a person's righteousness in relation to Him is fullfilled when that relationship is characterized by faith (see Rom. 1:16f.; 4:1-25; Gal. 3:6-9).

III. Background and Historical Nature of the Patriarchal Narratives.–A. Religion. The narratives of Gen. 12–50 do not provide a complete picture of the religious beliefs and practices of the patriarchs; the purposes of the narratives are theological, dwelling on the divine call and promises and their fulfillment (and nonfulfillment). We can gather enough, however, to give a general description and to set the religion of the patriarchs in its cultural context which archeological discoveries have illuminated. The Bible clearly indicates that Abraham received a polytheistic heritage from his immediate ancestors (Josh. 24:2f.; cf. 24:14; Gen. 31:19-35; 35:2). We cannot in any way trace Abraham's religious experience, for the Bible tells almost nothing about what he once was. But it stresses in a remarkable way the new intervention in human affairs that God's call of Abraham in Gen. 12:1-3 represents. Although he still moved in the religious milieu of his day, as we shall observe, his departure for Canaan at the bidding of God was also a departure from the polytheism of his past into a single-minded devotion to the one God who revealed Himself to him.

1. God of the Father. The most important feature of patriarchal religion is revealed by the characteristic identification of the Patriarchal God as the "God of my/your/his father(s)" (31:5, 29; 43:23; 46:23; 50:17; and esp. Ex. 3:6, 13, 15). With this must be connected the frequent formulas that use a proper name, e.g., "the God of Abraham" (Gen. 31:53; cf. 26:24; 28:13; 32:9 [MT 10]), "the God of Isaac" (28:13; cf. 32:9; 46:1), "the God of Nahor" (31:53), and the later and more developed "the God of Abraham,

the God of Isaac, and the God of Jacob" (Ex. 3:6, 15). These titles show that the patriarchal God was conceived as the clan's patron deity, to which each patriarch referred by a special name, indicating a close personal tie between the patriarch and his God. This can clearly be seen in Gen. 31:36-54, where Jacob swears by the "Fear of his father, Isaac" (*see* FEAR II.C), and Laban by the "God of Nahor" (31:53f.). Besides the "Fear of Isaac," God is also known as the "the Mighty One of Jacob" (49:24). This "God of the father" terminology has close parallels in the Cappadocian, Mari, and Amarna texts (all 2nd millennium B. C.) as well as less exact parallels in texts from Arabic and Aramean peoples from the later intertestamental and early Christian periods. The early parallels demonstrate that such terminology is appropriate to patriarchal times. A further illustration of the personal and clan relationship between the patriarch and the deity is the appearance of a group of personal names using as divine epithets the terms *'aḇ*, "father," *'aḥ*, "brother," and *'am*, "family, kinsman (on father's side)," e.g., *Abiram/Aḥiram* means "my (divine) father/brother is exalted." These names are abundant also among Israel's Northwest Semitic neighbors, and they become rare both there and in the Bible after the 10th cent. B.C. As J. Bright observed (p. 99), these names illustrate splendidly the patriarchs' keen sense of kinship between clan and deity.

2. God as 'El and Yahweh. Another important feature of the patriarchal knowledge of God is revealed by the fact that they worshiped God under a variety of 'El names, i.e., 'El Shaddai (17:1; 27:3; 35:11; 43:14; etc.), 'El 'Elyon (14:18-22), 'El 'Olam (21:33), 'El Ro'i (16:13), and 'El Bethel (31:13; 35:7). *See* GOD, NAMES OF II.B. The great majority of the patriarchal narratives use either the generic term *'Elohim*, "God," or the personal name *Yahweh* (usually translated "Lord"). But the usual translation of Ex. 6:3 ("I appeared to Abraham, to Isaac, and to Jacob, as God Almighty ['El Shaddai], but by my name the Lord [Yahweh] I did not make myself known to them") seems to teach that the patriarchs knew God as 'El Shaddai, not Yahweh, a name that was revealed only to Moses (Ex. 3:13-15). The frequent use of "Yahweh" in the Genesis narratives has been explained by understanding "name" in the sense of "character" or translating Ex. 6:3 in such a way that it asserts that the patriarchs knew the name of Yahweh.

G. J. Wenham ("The Religion of the Patriarchs," in Millard and Wiseman, pp. 161-195) studied the use of Yahweh in Genesis and observed that in the Joseph story the name Yahweh is restricted to narrative framework, while the dialogues use 'Elohim or 'El Shaddai. Thus the editor held that the patriarchs did not know the name Yahweh though he believed that Yahweh was their God. The Abraham and Jacob cycles, while presenting more ambiguous evidence, can also be interpreted in this manner. In these texts the name Yahweh does occur in the dialogues (although more frequently in the narrative framework), but Wenham showed that it is unnecessary to conclude that the patriarchs knew God as Yahweh, especially given the strong evidence cited above that the patriarchs did not know the name Yahweh. Rather, Wenham posited that the editor of Genesis was so convinced of the identity of Yahweh and the God who revealed Himself to the patriarchs that he not only used "Yahweh" in the narrative but also more sparingly in reporting human and angelic speech, and used great reserve in modifying divine utterances. Sometimes the evidence is quite clear. Thus Hagar is told to name her son "'Ishma*el;* because the Lord [*Yahweh*] has given heed to your affliction. . . .' So she called the name of the Lord [*Yahweh*] who spoke to her, 'Thou art a God of seeing ['*El* Ro'i] . . . '" (16:11, 13). Very suggestive evidence in the same direction are several names of the patriarchs and of tribal leaders from the patriarchal period (Nu. 1–2) compounded with 'El and Shaddai, e.g., Ishmael, Israel, Elizur, Zurishaddai, but none with Yahweh.

Thus the evidence seems very strong that the patriarchs worshiped and knew God as *'El*, which is the generic word for "god" in all the Semitic languages except Ethiopic. Among the Semitic peoples of Syria and Canaan in the patriarchal period, 'El was the preeminent god, head of the pantheon, who presided as king over the divine assembly in the farthest north. He was called "creator of the earth" and "creator of creatures" in Canaanite literature of the period, being represented as wise and kind, the ideal king. It seems very likely that this Canaanite tradition represents the cultural background against which the patriarchs identified as *'El* the God who called them and gave them His promises and His covenant. If so (as R. de Vaux noted, *Early History*, p. 282), it must be stressed that, as the patriarchal narratives and the rest of Israel's religious history reveal, none of 'El's mythological aspects or other characteristics was adopted apart from his identity as the supreme power of the universe. It is also important to note that the name Baal is not mentioned in the patriarchal narratives — not even one name is compounded with that title as the epithet. In the extrabiblical texts Baal rose to prominence late in the patriarchal period and became, as the Bible presents as well, the major figure in the debased fertility religion of Canaan from the period of the Judges onward (see de Vaux, *Early History*, pp. 9f.). It would appear that Baal was so incompatible with the God who revealed Himself to the patriarchs that they totally eschewed the name.

3. Religious Practices. The texts give little information about the religious practices of the patriarchs. They built altars (Gen. 12:7f.; 13:18; 26:25; etc.) and offered sacrifice (31:54; 46:1; cf. ch. 22), often at places that already functioned as sacred places among the Canaanites (e.g., 12:7) and that later functioned as important sanctuaries for Israel, such as Shechem, Bethel, Mamre (Hebron), and Beer-sheba. Associated with these sites were sacred stones (*maṣṣēḇôṯ*) (28:18, 22; 31:45; 35:20) and sacred trees (12:6; 13:18; 21:33), cultic objects that later became so identified with the Canaanite fertility religion that they were proscribed (Ex. 34:13; Dt. 7:5; 12:2; Hos. 4:13, etc.). We know very little about the method and cultic nature of patriarchal sacrifice, but it is important to note that, contrary to later Israelite practice, patriarchal sacrifice required no priesthood and was limited to no special place. An important aspect of their religious practice was circumcision, a rite that marked their covenant identity (Gen. 17). They also offered libations (28:18) and engaged in prayer (25:21), often prostrating themselves in the common ancient Near Eastern manner (17:3, 17; 24:52).

Thus, for the patriarchs, God associated Himself with persons, not with places as in Canaanite religious conceptions. The patriarchs clearly conceived God as *one*. Isaac worshiped the God of his father (26:23ff.), as did Jacob (31:5, 42, 53). Thus the same conception was transmitted from generation to generation. This God is unique, without colleagues or consort, and the family of Jacob must put away the strange gods they brought with them from Aram-Naharaim (35:2). Whether we can call this belief monotheism is a debate that is foreign to the OT conception. The patriarchal belief is much more explicit about what it affirms than what it denies, and we should perhaps with H. H. Rowley (*Worship in Ancient Israel* [1967], p. 21) call this a *practical* monotheism.

B. Life-style. Another area that has led to considerable discussion and diverse interpretations has been the patriarchal way of life. Since, as has been stressed above, the

narratives were written for other than sociological purposes, the information given is limited and incomplete. Briefly summarized the basic data are as follows. The patriarchs were primarily herdsmen, possessing sheep and goats (13:5-7; 30:32ff.; etc.), and cattle as well (15:9; 18:7; 46:32), although cattle figure only in stories from Canaan itself. Whenever animals are mentioned in connection with journeys to or presence in Mesopotamia, only sheep and goats are spoken of (chs. 29–31). The patriarchs moved freely from Canaan to Mesopotamia and back and from encampment to encampment within Canaan (13:3-6; 33:18; 35:6, 16-27). The sons of Jacob traveled with their flocks to Shechem (37:12) and on to the plain of Dothan (v. 17), while their father dwelled at Hebron (35:27). They lived in tents (12:8; 18:1ff.; 31:24-34), and to provide water they dug wells (21:30; 26:15-22). Yet they also cultivated the soil (26:12; 37:6f.), and they regularly settled near towns (20:1ff.; 23:1-20; 33:18). They were very wealthy, possessing flocks and herds, silver and gold, male and female slaves (12:16; 26:13f.), and Abraham could muster 318 trained men to rescue Lot (14:14).

Given these factors, and others more incidental, scholars have interpreted the patriarchal way of life very diversely. Some have proposed that the patriarchs were merchants or caravanners (see, e.g., W. F. Albright, *BASOR*, 163 [Oct. 1961], 36-54). But the most prevalent interpretation has been that the patriarchs were nomads or seminomads. Formerly, the nomadic life-style was generally understood by adopting as a model the sociological patterns of the camel-mounted Arab bedouin of the modern era. Since the 1970's, however, new theories of NOMADISM have been developed by social and cultural anthropologists that seem to provide a hopeful new line of research for patriarchal backgrounds (see Luke; Matthews). Points of contact between the biblical tradition and Mari appear to be numerous and significant (see Dever, pp. 114-17, and esp. de Vaux, pp. 229-233), including: (1) the "dimorphic" society of the villager-pastoralist type (*see* NOMADISM V.A); (2) tribal organization, consisting of interrelated extended families and a patriarchal social structure; (3) cognate technical vocabulary (e.g., Mari *ummatum* = Heb. *'ummâ*, "tribe"; Mari *nawûm* = Heb. *nāwēh*, "pasture"); (4) social and religious customs (e.g., covenant).

Although detailed studies of both the Mari texts and the patriarchal narratives against the background of this new understanding of nomadism in the ancient world wait to be done, these preliminary comparisons strongly suggest that both texts reflect very similar life-styles and that the Mari texts may supply a historical context into which the patriarchal narratives fit very well. Certainly past attempts to dismiss the patriarchal picture as unhistorical on the basis of comparisons with the traditional understanding of nomadism will have to be radically revised.

C. Date and Historicity. With the triumph of the Wellhausenian views of literary criticism at the close of the 19th cent., the evaluation of the historical worth of the patriarchal narratives was negative in the extreme; their religious content was viewed as reflecting the beliefs of the period in which they were written, either the early monarchy in the 9th-8th cent. B.C. (J, E) or the postexilic period in the 6th-5th cent. B.C. (P). The patriarchs themselves were regarded as figures of astral mythology, Canaanite deities, heroes drawn from pre-Israelite folklore, or personifications of tribes whose history is reflected in their movements and relationships. Thus they were often accorded no real historical existence. When these views were developed, the history and culture of the 3rd and 2nd millennia B.C. were virtually unknown. Since that time an extraordinary amount of material has thrown light on the period. Dozens of sites have been excavated in Palestine, Syria, and Mesopotamia, while literally thousands of texts from the period have been unearthed (see J. J. Bimson, "Archaeological Data and the Dating of the Patriarchs," in Millard and Wiseman, pp. 53-89). This wealth of material has given us a great deal of knowledge of the history of 2nd millennium B.C., far more than our predecessors could have dreamed possible. The main periods can now be delineated with considerable clarity, particularly in the areas of Mesopotamia and Egypt, where the nature of the writing methods and the climate have enabled numerous texts to survive. Thus we are moving in the area of history (written records), not prehistory. Nonetheless, even in these areas, gaps and uncertainties are numerous.

When we turn to the area of Palestine, we are on much less certain ground. Part of the reason for this is the "accidents" of discovery, of course, but much of it is due to the inherent nature of the physical culture of Palestine itself (see Dever, pp. 74f.). Canaan was always culturally far behind the great centers of civilization, and its position as the land bridge between them meant that it regularly suffered from the depredations of invasion, war, and pillage, which left only sparse and very poorly preserved materials. Also the damp climate has normally prevented the preservation of the usual writing materials of papyrus, parchment, and broken pottery. Thus for the whole period prior to 1000 B.C. we are really dealing with prehistory rather than history. Since almost all of the events of the patriarchal narratives take place within Palestine proper, the above facts make it antecedently very difficult to locate the patriarchs in the stream of contemporary history. Nevertheless, the discoveries mentioned above produced a much more positive assessment of the historical value of the patriarchal narratives (see esp. the treatments by Albright, Bright, Rowley, and de Vaux).

In Germany, however, Albrecht Alt and Martin Noth, among others, espoused a much less positive assessment of the historical worth of Gen 12–50. While not ignoring the results of archeology, Alt and Noth were primarily interested in the study of the preliterary history of the narratives, and of the oral traditions from which they supposedly emerged; thus they made extensive use of form and redaction criticism. Accordingly, the patriarchs appear as shadowy historical figures who had received divine promises of land and posterity and established cults at sacred altars *outside* Palestine commemorating these events; Noth could find no evidence "for making any definite historical assertions about the time and place, presuppositions and circumstances of the lives of the patriarchs as human beings" (*NHI*, p. 123).

These emphatically different approaches came into open conflict in a series of articles (for a summary see de Vaux, "Hebrew Patriarchs"), resulting in some modification of the two positions. Hence Noth later wrote that "the origins of Israel are rooted in historical conditions that are proved by archeological discoveries to be located in the middle of the 2nd millennium" (*SVT*, 7 [1960], 269). Thus scholars reached a considerable consensus regarding this issue, even though they differed in details about the extent of the historical assertions that could be made and the date of the patriarchs in the general period of the first half of the 2nd millennium B.C.

In the mid-1970's this consensus came under sharp attack. The works of T. L. Thompson and J. Van Seters attempted to show on a number of grounds, both from the literary nature of the material (Van Seters) and from the extrabiblical evidence (Thompson), that the text of Genesis is in no way a historical document (see also De-

ver, pp. 94f.). Now there is no question that a number of the lines of evidence used by a generation of scholars in support of the consensus noted above have been overstated and on occasion are invalid, and the works just mentioned have performed a valuable service in demonstrating this fact (particularly that of Thompson). But it is a gross overreaction to deny to these narratives any historical value (see J. Goldingay, "The Patriarchs in Scripture and History," in Millard and Wiseman, pp. 1-34). The Bible and extrabiblical texts offer more than sufficient evidence that the narratives' historicity is a warrantable conclusion.

First, both a surface reading and a literary study of the patriarchal narratives reveal their historiographical nature and intent, which are determined by literary and theological motives rooted in the past experience of the community, in historically based traditions. Further, a comparison with other ancient Near Eastern narrative works shows that the patriarchal narratives stand closest in literary type to historically based narratives.

Second, and significant in the light of its correlation with the biblically derived chronology that places the patriachs about 400 years before the Exodus (Gen. 15:13; Ex. 12:40), some evidence suggests that the patriarchal narratives reflect authentically the conditions pertaining in the ancient Near East in the first half of the 2nd millennium. This evidence includes the similarities between patriarchal names and Amorite names, patriarchal life-style and the life-style reflected in the Mari texts (see III.B above), and patriarchal religion and second-millennium Semitic religion (see III.A above). For a more detailed discussion of these points, see LaSor, *et al.*, pp. 98-109; M. J. Selman, "Comparative Customs and the Patriarchal Age," in Millard and Wiseman, pp. 91-139.

Therefore we may conclude that the patriarchs were indeed historical figures. This does not imply that a single person or event in the patriarchal stories has been found in extrabiblical sources — nor is it likely that one of them will be, simply because the patriarchal narratives are family history. The patriarchs themselves were chiefs of pastoral-nomadic clans, whose lives affected the political events of their era not at all.

But if their political impact in their own day was negligible, their religious impact on the world has been momentous. First, Gen. 12–50 says much about the style of life that must characterize the people of God: it is to be a life of trust and faith in and obedience to Him who calls. Second, these chapters present the basic facts of the beginning of redemptive history: God has freely chosen one man and his descendants through whom "all the families of the earth shall be blessed" (12:3), and He solemnly promises them land and posterity. The significance of this redemptive history is set forth in part by its explicit presentation as the answer to the universal problem of human alienation from God and one another through sin set forth in Gen. 1–11. But the fulfillment of these promises and the salvation-history here begun waits for its partial realization in the dramatic events of the deliverance from slavery in the Exodus story and for its final consummation in the Son of Abraham (Mt. 1:1) who draws all men to Him (Jn. 12:32), thus providing the blessing for all the families of the earth promised at the beginning of the patriarchal story.

PATRIARCHS, TESTAMENTS OF THE TWELVE. *See* APOCALYPTIC LITERATURE III.C.

PATROBAS pat'rə-bəs [Gk. *Patrobas*; an abbreviated form of *Patrobios*]. An otherwise unknown member of a household church that included Asyncritus, Phlegon, Hermes, and Hermas (Rom. 16:14). It is also the name of a well-known, influential, and unpopular freedman of Nero who was put to death by Galba (Tacitus *Hist.* i.49; ii.95; Dio Cassius *Hist. Epit.* xliv.3f.; Suetonius *Galba* 20). The Patrobas of Romans may have been a dependent of this person (see F. F. Bruce, *Paul: Apostle of the Heart Set Free* [1977], p. 387). J. J. HUGHES

PATROCLUS pə-trō'kləs [Gk. *Patroklos*]. Father of Nicanor, one of the Syrian generals sent to fight against Judas Maccabeus (2 Macc. 8:9).

PATROL [Heb. hithpael of *hālaḵ*] (Zec. 1:10f.; 6:7); AV WALK, "walk to and fro through"; NEB "range through," "range over." The figure is that of a military patrol traversing the earth and reporting to an angel; cf. the similar use of the hithpael of *hālaḵ* in Josh. 18:4, 8 (of Joshua's surveyors); Job 1:7 and 2:2 (of Satan's patrolling the earth [cf. NAB]); Gen. 3:8 and Job 22:14 (of God's "walking").

PATTERN [Heb. *taḇnîṯ, mar'eh*; Gk. *týpos, hypotýpōsis, hypódeigma*]; AV also EXAMPLE (He. 8:5), FASHION (Acts 7:44), FORM (2 Tim. 1:13); NEB also COPY (He. 9:23), DESIGN (Ex. 25:9, 40), DETAILED PLAN (2 K. 16:10, OUTLINE (2 Tim. 1:13).

Exodus 25:9, 40 use Heb. *taḇnîṯ*, referring to shape or form, for the pattern that God gave Moses at Sinai for building the tabernacle in the wilderness (cf. the similar use of *taḇnîṯ* for a pattern of a pagan altar in 2 K. 16:10). Nu. 8:4 uses *mar'eh* (a sight, or the appearance of something) for this pattern, which Aaron followed in building the golden lampstand. The NT uses *týpos* ("type," "pattern," "model") in He. 8:5 (quoting Ex. 25:40, LXX); Moses saw a representation of the true tabernacle in heaven (He. 8:2) after which the one on earth was to be modeled. It was made clear that although people would make the tabernacle, God determined its shape and form. Since God would be approached through the tabernacle and its services, the pattern had to be followed in every detail. Any deviation would result in the people's loss of the spiritual truths that a right approach to God would provide. He. 9:23 uses *hypodeígmata* for the "copies" (AV "patterns") of heavenly things in the wilderness tabernacle that as representations of heavenly realities foreshadowed the work of Jesus as the great high priest.

Titus was admonished not only to teach sound doctrine

but also to show himself in every way a "model" (*týpos*; AV "pattern") of good works (Tit. 2:7). The Christians of Crete had the right to expect that their pastor would set them and their pagan neighbors an example by his self-restraint and disciplined Christian living. The probability that Titus himself came from a pagan background enabled him to provide a "flesh-and-blood" example for Christians and pagans alike.

1 Timothy 1:16 sets forth Paul as "foremost of sinners" not only because he had persecuted God and His church but also because he was an "example" (*hypotýpōsis*; AV "pattern") of what God can do with any convert regardless of his past. If God had enough patience and love to forgive a blasphemer and persecutor such as Paul, He can do the same for all those who place no confidence in themselves but submit their will to His desires from day to day. Paul's experience is not the only example of God's perfect patience; rather, in every converted person God displays afresh the pattern that He follows when He reveals His love and patience to sinners. I. Sources.–The sources of information on the life and teaching of Paul are the Acts of the Apostles and the Pauline Epistles. These provide contemporary views of the apostle from the outside and from the inside, respectively.

A. Acts of the Apostles. For the date, authorship, and historical character of this book *see* ACTS OF THE APOSTLES. If the author of Acts was Luke the physician of Syrian Antioch, the portrait of Paul in Acts was drawn by one of his close friends and companions. Paul's complicity in the condemnation and execution of Stephen is mentioned in Acts 7:58 and 8:1a, and his persecution of the Jerusalem church in 8:3. 9:1-30 records his conversion and its immediate aftermath. Then, after an indefinite period of time, 11:25-30 tells of his association with Barnabas as a teacher in the new gentile church of Antioch and of the famine-relief mission to Jerusalem with which the Antiochene church entrusted him and Barnabas. 12:25 relates their return after the accomplishment of that mission. From there to the end of Acts Luke gives little more than a record of Paul's apostolic ministry in Cyprus, Galatia, and the provinces bordering on the Aegean Sea until at last, after two years' imprisonment in Judea, the apostle reached Rome. He spent two more years under house arrest there, still "preaching the kingdom of God and teaching about the Lord Jesus Christ" to all who visited him, without pause or hindrance (28:30f.).

One of Luke's motives in describing Paul's apostolic career up to his arrival in Rome was apologetic; he was concerned to defend Paul (and the Christianity that Paul proclaimed) against charges of disaffection. Thus Acts shows that in Paul's travels throughout the Roman world he usually established good relations with the gentile authorities. At Ephesus he was on friendly terms with the Asiarchs, and the town clerk declared his innocence. In Philippi the magistrates had to eat humble pie for beating and imprisoning him. His Jewish opponents tried to prejudice the minds of the authorities against him but were usually unsuccessful. At Corinth Gallio refused to listen to them. In Palestine Felix and Festus found no basis for their accusations, and Herod Agrippa II was convinced of Paul's innocence. The closing verses of ch. 26 show complete agreement on that point among Festus, Agrippa, Bernice, and their assessors. So marked is this apologetic tendency that some have inferred that Acts (or even Luke-Acts as a whole) was written to supply the information required for Paul's defense before the imperial tribunal in Rome (cf., e.g., M. Aberle, *Theologische Quartalschrift*, 37 [1855], pp. 173ff.; 45[1863], pp. 84ff.); D. Plooij, *Expos.*, 8th series, 8 [1914], 511ff.; 13 [1917], 108ff.; J. I. Still, *St. Paul on Trial* [1923], pp. 84ff.; Duncan, p. 97). A defense, however, can hardly have been the main purpose of the book; the theological motifs, e.g., would then have been irrelevant. The apologetic purpose of Acts was probably wider. There was an intelligent reading public, or rather listening public, at Rome; Luke may have availed himself of the opportunity to rebut in the imperial city itself the popular charges brought against Christianity by insisting on its complete and acknowledged innocence before the law of the empire.

It is plain that throughout Acts Paul is Luke's hero; indeed, the main object of some passages is apparently to show how Paul stands head and shoulders above other men. For example, in the voyage and shipwreck story of ch. 27, Paul stands out as master of the situation at the most critical juncture. But Acts not only reveals the greatness of Paul's character; it also establishes the validity of his apostleship. This tendency of Acts is the more important when one considers how Paul's apostleship was compared disadvantageously with that of the Twelve in several quarters, as the Galatian and Corinthian correspondence testifies. Luke seems therefore to have selected incidents that show how Paul's apostleship was confirmed by the same signs as was Peter's. Peter healed a lame man (3:2ff.), but so did Paul (14:8ff.). Peter's shadow had healing power (5:15), but so had Paul's kerchiefs (19:12). Peter exorcized (5:16), but so did Paul (16:18). Peter had a victorious encounter with a sorcerer (8:18ff.), but so had

Paul (13:6ff.). Peter raised the dead (9:36ff.), but so did Paul (20:9ff.). An objection to Paul's apostolic claim was that it was founded on visions, whereas the Twelve had been personal companions of Jesus "in the days of His flesh." This objection is explicit later in the *Clementine Homilies* (xvii.13), but it is reflected in some passages in the Epistles where Paul vindicated his apostleship (cf. 1 Cor. 9:1; 2 Cor. 12:1). Luke, however, showed that although Paul was commissioned in a vision to go as an apostle to the Gentiles (Acts 22:17-21), it was also in a vision that Peter received his commission to preach to the Gentile Cornelius and his household (10:9ff.).

But Luke's confirmation of Paul's apostleship does not rest on this parallelism between the "Acts of Paul" and the "Acts of Peter." It depends rather on his straightforward account of Paul's apostolic labors and journeys. No one could accept Luke's testimony and doubt the reality of Paul's apostleship.

The measure of Luke's success in his vindication of Paul's apostolic claims was early recognized. Tertullian, e.g., pointed out to the heretics who rejected Acts while accepting the Pauline Epistles that the former is the only independent evidence for the apostolic authority of the latter: "Here let me say to those who reject the *Acts of the Apostles*: 'It is first necessary that you show us who this Paul was, both what he was before he was an apostle, and how he became an apostle' — so very great is the use which they make of him in respect of other questions also" (*De praescr. haer.* 23).

B. Pauline Epistles. 1. Paul As a Letter Writer. Of the twenty-seven documents that make up the NT, thirteen are Epistles or letters that name Paul as their author. The majority of these Epistles were written probably before any other NT document; the earliest of them may go back to A.D. 48.

The circumstances of letter writing in the 1st cent. A.D. may illuminate certain aspects of Pauline study — particularly the style and language of his Epistles and their textual history. Even if a form of shorthand was used (such as the *notae Tironianae* of Cicero's secretary), writing was a slow business compared with writing in modern times — although not so slow as O. Roller argued in *Das Formular der paulinischen Briefe* (1933). (On this point see E. Percy's critique of Roller in *Probleme der Kolosser- und Epheserbriefe* [1946], p. 10 n.) J. Jeremias, e.g., surely exaggerated when he said (following Roller), "The composition of a letter of the length of 2 Timothy demanded of the ancient art of writing not hours but days of laborious work" (*Die Pastoralbriefe* [*NTD*, 1953], p. 5).

According to Roller the roughness of the writing material (especially papyrus) and the inadequacy of the reed pens and of the ink all contributed to the difficulty of the procedure. When a letter or even a longer document was dictated, the scribe often took down the gist of it on wax tablets and then composed the fair copy at leisure in his own handwriting and style. The sender sometimes checked it to make sure that it conveyed the sense of what he wished to say and added a few words of greeting in his own hand to certify the authenticity of the document (cf. 1 Cor. 16:21; Gal. 6:11; Col. 4:18; 2 Thess. 3:17).

Paul, it is clear, regularly used amanuenses in his letter writing. Yet for the most part he did not give them the general sense of his communication and leave them free to write it up in the conventional epistolary style. The individual style of most of his Epistles tells its own tale. Paul dictated, and the scribe copied his words verbatim as best he could. The work of copying would not have been so difficult when Paul developed a careful argument in a relatively calm mood; at other times the impetuous torrent of his thought carried him swiftly on, and one can only imagine how the amanuensis fared. Paul's mind ran ahead of his utterance, and the words sometimes seem to have overleaped a gap in order to catch up with his thought.

Usually, one may suppose, one of Paul's friends rather than a professional letter writer acted as his amanuensis. The only amanuensis whose name is given is Tertius, who sent his greetings in the first person in Rom. 16:22. Tertius may have been a professional amanuensis, since Romans is rather more formal than most of Paul's letters; even so, he was evidently a Christian, since he sent his greetings "in the Lord." From the frequency with which Timothy's name is joined with Paul's in the superscription of letters (2 Corinthians; Philippians; Colossians; 1 and 2 Thessalonians; Philemon) it has been conjectured that he commonly acted as the apostle's amanuensis. Indeed, it is a matter of considerable interest that most of the letters in which Timothy's name is thus conjoined with Paul's (Philippians; Colossians; 1 and 2 Thessalonians) are marked off from the other Pauline letters as a distinct group exhibiting one particular sentence-length pattern (W. C. Wake, *HibJ*, 47 [1948-49], 50ff.). It is in features like sentence-length and the use of connective particles that the individuality of the amanuensis is especially likely to appear.

An author writing letters with a view to publication is naturally more careful about their finished style than one whose letters are simply intended to inform, instruct, or greet the recipients. Paul's letters were primarily composed for the people to whom they were addressed, although there is evidence that he intended some to be read by others as well. In either case, Paul's Epistles do not come into the literary category of the epistles of Cicero or Pliny; and yet in Paul's letters the author's personality comes through as clearly as in the classical epistles. Here was a man with something to say, and what he had to say was so much part of himself that there could be nothing artificial or merely conventional about the way that it was expressed.

If a certain letter bearing Paul's name differs stylistically from other letters, the possibility that the amanuensis occasionally exercised a greater measure of stylistic freedom should dictate caution in using this criterion alone to determine the genuineness of such a letter.

2. Dating the Epistles. Paul's letters have not come down to modern readers in chronological order. Their present order — beginning with Romans and ending with Philemon — is based on a twofold principle. First, Paul's letters to churches precede those to individuals; second, within these two groups, the letters are arranged in descending order of length, from Romans to 2 Thessalonians in the first group and from 1 Timothy to Philemon in the second. (The main exception to this rule is that Galatians precedes Ephesians, although Ephesians is slightly longer; this exception may be due to an incident in the early history of the Pauline corpus.)

Two kinds of criteria guide scholars in arranging the letters chronologically. One kind is the personal references in some letters that indicate quite clearly to which point in Paul's career they belong. Thus he evidently wrote 1 Thessalonians soon after leaving Thessalonica, either during his stay in Athens or (more probably) shortly after he had settled in Corinth (cf. 1 Thess. 3:1-6 with Acts 17:1–18:5). He clearly wrote 1 Corinthians during his Ephesian ministry (1 Cor. 16:8) and 2 Corinthians shortly after the close of that ministry (2 Cor. 1:8ff.; 2:12f.). Romans was written when Paul was about to set out for his last visit to Jerusalem (Rom. 15:25).

But such definite time indications are not always available. Sometimes, as in Gal. 1:18–2:14, Paul's autobio-

PAUL THE APOSTLE

graphical references relate to the past, and it is not clear whether this is the immediate past or the more remote past. At other times his personal notes relate to the present but are not explicit enough to be set unambiguously in the available outline of his life. Thus Paul when writing Philippians, Colossians, Philemon, and Ephesians (the Captivity Epistles) was evidently a prisoner, but it is not immediately obvious to which of his frequent imprisonments (2 Cor. 11:23) these letters may belong.

Where the time indication is an insufficient criterion, scholars must fall back on the more uncertain one of the development of Paul's thought. Here one must be careful not to argue in a circle, determining the development of Paul's thought from the order of his Epistles and determining the order of his Epistles from the development of his thought. But if a definite progression of thought can be established from the Epistles datable by more objective criteria, it can sometimes be used to suggest the probable dates of the other Epistles. Even so, one must beware of assuming anything so simple as "linear progression" when one tries to trace the advancing thought of such a man as Paul.

With this and every other proper proviso, the history of Paul's thought may be considered in relation to two quite different subjects: his eschatological expectation and his conception of the Church as the body of Christ.

a. Eschatological Expectation. Along with the other elements in the primitive kerygma, Paul had "received" the belief that Jesus, whose messianic office had been confirmed by His resurrection, would return in due course as divinely appointed judge of the living and the dead (cf. Acts 10:42; 17:31). A favorable verdict in that judgment, Paul held, was assured for those who were justified in the present world by faith in Jesus. At Thessalonica Paul taught his converts to wait for Jesus' return from heaven but used terms that some misunderstood to mean that this event would take place while they were all still alive. Perhaps because of his hasty departure before he had completed the instruction he hoped to give them (Acts 17:10), they did not realize that the resurrection of the just (which would coincide with the Parousia) would include not only the faithful of OT times but also believers in Jesus like themselves if they died before He returned. When Paul wrote to reassure them about those of their number who had died already, he appeared to associate himself with those who would survive until the Parousia: "We who are alive, who are left until the coming of the Lord, shall not precede those who have fallen asleep" (1 Thess. 4:15).

His language in this connection is markedly apocalyptic: the Lord is to be attended at His appearing by all His holy ones (1 Thess. 3:13); He "will descend from heaven with a cry of command, with the archangel's call, and with the sound of the trumpet of God" (4:16); "the dead in Christ will rise first," and living believers will then "be caught up together with them in the clouds to meet the Lord in the air" (v. 17). The apocalyptic note is even more pronounced in the second Epistle: in addition to the apocalyptic pericope in 2 Thess. 2:3ff., which foretells the Lord Jesus' destroying the man of lawlessness "by his appearing and his coming," there is the statement in 1:7ff. that He will be "revealed from heaven with his mighty angels in flaming fire" to execute vengeance on the ungodly and "to be glorified in his saints."

But in all the eschatological content of these two Epistles the dominant note is ethical. Even if the Parousia is near at hand, it must not be used as an excuse for slacking and failing to earn an honest living; still less must it be used for failing to maintain the highest standard of Christian morality. Paul presented the Parousia preeminently as a grand incentive to holiness and sobriety of life.

1 Corinthians, written about four years later than the Thessalonian correspondence, has substantially the same eschatological teaching as 1 Thessalonians, but apocalyptic terminology is not so prominent. It pays more attention to the resurrection of the dead as the harvest of which Christ's resurrection was the firstfruits; Paul's treatment of this topic arose out of the tendency of some members of the Corinthian church to drop the doctrine of resurrection from their creed. On the day of resurrection, he said, a "spiritual body" will be raised, and simultaneously "we shall be changed" — i.e., "we" who have not passed through death shall receive immortal bodies "in a moment, in the twinkling of an eye, at the last trumpet" (1 Cor. 15:52). Here the conception of a "spiritual body" marks a notable advance on current Jewish ideas. Although in this passage Paul still seems to have associated himself with those who will be alive on earth at the Parousia, elsewhere in the same Epistle he associated himself with those who will be raised from the dead then (6:14). Yet, he said, the time would not be long delayed, and this had implications for present family and secular relationships (7:29ff.). When the time comes, Christ will exercise His judicial authority and apportion praise and blame (4:4f.; 5:5), and His people will share His judicial and royal dignity (6:2f.).

Similarly, in Philippians Paul could say "The Lord is at hand" (4:5, which, however, may intend His personal and continual nearness rather than the imminence of His parousia), or, in greater detail, that from heaven "we await a Savior, the Lord Jesus Christ, who will change our lowly body to be like his glorious body, by the power which enables him even to subject all things to himself" (3:20f.). Here certainly too much emphasis should not be placed on his use of "we," for it is plain from other parts of this Epistle that he viewed with equanimity either continued life or early death. While he thought that his prolonged life would be better for his friends and converts, his personal preference was "to depart and be with Christ, for that is far better" (1:23). He did not think of the interval between death and resurrection as a hiatus in his fellowship with Christ.

2 Corinthians 1–9 reveals a further advance. As in 1 Cor. 6:14, Paul associated himself with those who will be raised from the dead (2 Cor. 4:14). But the resurrection principle is already at work in the servants of God; the spiritual body is even now being formed, as the inner man undergoes daily renewal (v. 16), and death will mean (one gathers) the immediate receiving of "our heavenly dwelling, so that by putting it on we may not be found naked" (5:2f.). Possibly the deadly peril in which Paul found himself shortly before the writing of these words (1:8ff.) had led him to consider more urgently than before what the believer's prospects at death would be. To be "away from the body" would mean being "at home with the Lord" (5:8). But it remains true that "we must all appear before the judgment seat of Christ, so that each one may receive good or evil, according to what he has done in the body" (v. 10).

In Romans Paul stressed the inward participation in Christ's risen life that His people experience in the present world, having been baptized into His death and raised with Him to "walk in newness of life" (Rom. 6:3f.). This experience is communicated through the Spirit, whose indwelling presence is the pledge and "first instalment" of full and final resurrection — "the redemption of our bodies" (8:11, 23). Paul still saw the Parousia as the day of judgment and review (2:16; 14:10ff.), of salvation and glory (8:17; 13:11). But he also saw it as the day for which all

creation eagerly waits — the day when the universe will be liberated from its bondage to frustration and futility to share "the glorious liberty of the children of God" (8:19ff.).

This cosmic vision prepares one for the teaching of Colossians and Ephesians that Christ is the one in whom God proposes to reconcile the universe to Himself (Col. 1:20) and to consummate its unity (Eph. 1:9f.). Yet at the end of Paul's great period of letter writing, as at its beginning, his main purpose in presenting the Parousia was to let it have its sanctifying effect on the earthly lives of Christians: since they will be manifested in glory with Christ, their true life, when He appears (Col. 3:4), they must in the present world reject what is unworthy of that prospect and pursue what befits it (cf. Eph. 4:1).

Along with this progression in Paul's thought about the last things, some scholars have recognized in Colossians and Ephesians a growing appreciation of the positive worth of family relationships. This is specially obvious in Paul's treatment of marriage. Having made all due allowances for varying conditions of context and life-setting, one finds an unmistakable difference in tone between 1 Cor. 7:1-8, 26-38 and Col. 3:18f.; moreover, Eph. 5:22ff. treats the married state as a divinely designed analogy of the relation between Christ and the Church.

Paul's eschatological thinking, then, gives some reason for dating Philippians — or at least Phil. 3:2–4:9 — along with the Corinthian correspondence, but Colossians and Ephesians appreciably later.

b. The Body of Christ. An even stronger argument for dating Colossians and Ephesians some time after the Corinthian and Roman Epistles is the apparent progression in Paul's conception of the Church as the body of Christ.

The common life of Christians is first likened to the interdependent functioning of the various parts of a body in 1 Cor. 12:12ff., where the head is one member among others, and an individual member of the Church is compared to the head or to a part of the head — an ear or an eye. Rom. 12:4f. similarly compares the mutual and cooperative responsibilities of church members to the diverse functions performed by the different parts of the body as they work together for the health and efficiency of the whole. But in Col. 1:18; 2:19; Eph. 1:23; 4:12ff.; etc. Paul thought rather of the relationship that the Church as the body of Christ bears to Him as the head. Here comparing an ordinary member of the Church to the head or to part of the head is impossible; here, too, the body ceases to be a mere simile and becomes the most effective term that the apostle can find to express the vital bond uniting the life of the people of Christ with His own risen life. It is uncertain whether this was a spontaneous and inevitable advance in Paul's thinking about the relation between Christ and His people, or the datum of a further revelation, or the result of some special stimulus. The form of his teaching on the subject in Colossians likely reflects his vigorous reaction to the Colossian heresy. But it is very difficult to think of Paul writing in these terms to Colossae about the same time that he wrote his successive letters to the Corinthians and before he wrote to the Romans.

It has, indeed, been suggested that Romans in substance is earlier than the date implied by its personal references, and that its composition may have been spread out over a considerable time (cf. G. S. Duncan, *Expos.T.*, 67 [1955-56], 164). No doubt the main argument of Romans is the product of long experience and reflection, but its actual form belongs to the beginning of A.D. 57, and it appears to have had special relevance to the situation in the Roman Church at that time.

The cosmic significance of Christ and the Church is not absent from other Epistles (e.g., 1 Cor. 8:6; Rom. 8:19ff.), but Colossians and Ephesians present a more developed exposition of it. Paul's thinking in this realm may again have been stimulated by the necessity of giving the Christian answer to the cosmic speculations of the Colossian heresy. In any case, it is difficult to suppose that Paul's fuller statement in these two Epistles of the cosmic implications of the gospel belongs to the same period as the more inchoate adumbrations in 1 Corinthians and Romans. While these two aspects of Paul's thought have limited value for dating his Epistles, since they leave a number of chronological questions unanswered, they do suggest that the following grouping of the Epistles be adopted as a working arrangement.

Group One	
Galatians	Written from Syrian Antioch, A.D. 48 (?)
1 Thessalonians	Written from Corinth, A.D. 50
2 Thessalonians	Written from Corinth, A.D. 50
Group Two	
1 Corinthians	Written from Ephesus, A.D. 55
Philippians 3:2–4:9	Written from Ephesus, A.D. 55 (?)
2 Corinthians	Written from Macedonia, A.D. 56
Romans	Written from Corinth, A.D. 57
Group Three	
Philippians 1:1–3:1; 4:10-23	Written from Rome, A.D. 60/61
Colossians	Written from Rome, A.D. 60/61 (?)
Philemon	Written from Rome, A.D. 60/61 (?)
Ephesians	Written from Rome, A.D. 60/61 (?)
Group Four	
Titus	Written from Ephesus, after A.D. 62 (?)
1 Timothy	Written from Macedonia, after A.D. 62 (?)
2 Timothy	Written from Rome, A.D. 65 (?)

C. Acts and the Epistles Compared. 1. In Reference to Paul Himself. The nineteenth-century Tübingen School of NT historical criticism (represented by F. C. Baur, A. Schwegler, and E. Zeller) found the presentation of Paul in Acts to be radically inconsistent with that in the four Pauline letters whose authenticity they acknowledged (Romans, Galatians, 1 and 2 Corinthians). Reading these four letters in the light of the Hegelian dialectic interpretation of history, with its pattern of thesis, antithesis, and synthesis, these scholars recognized in Acts the synthesis, the latest stage, that belonged to the latter half of the 2nd century. The thesis and antithesis were represented by Peter and Paul, who violently opposed one another, Paul advocating complete liberty from the Jewish law, Peter insisting on its continued observance by gentile believers as well as by Jews. Obviously, if this interpretation of history is true, then Acts must be unhistorical; but the picture of events in these four Pauline Epistles must then be equally unhistorical. While in Galatians Paul insisted that he had received the gospel and his commission to preach it directly from God, through no human mediation, in 1 Cor. 15:11 he equally insisted that the gospel he preached was essentially the same as that preached by the original apostles. This is implied even in Galatians, the Epistle that seemed to lend most color to the Tübingen thesis. When Peter, John, and James gave Paul and Bar-

PAUL THE APOSTLE

nabas the right hand of fellowship (Gal. 2:9), there was no hint of any difference in the substance of the preaching; the only difference related to the constituencies each group was to serve. Paul pronounced a solemn and repeated anathema on any who preached a different gospel from that which he preached (Gal. 1:8f.), but he never implied that the Jerusalem apostles were liable to his anathema.

The picture of Peter in Galatians accords well with that in Acts, and both differ from the fictitious Peter of Tübingen imagination. According to Gal. 2:11ff. Peter's personal conviction, like Paul's, was that no distinction should be made, even socially, between Jewish and gentile believers. In Antioch, "before certain people came from James, he ate with the Gentiles; but when they came, he withdrew and separated himself" — not because he had changed his convictions, but "fearing those of the circumcision." What had previously convinced Peter the orthodox Jew that there was nothing wrong in eating with Gentiles? The explanation is in Acts 10, which relates how he had learned not to call common what God had cleansed. Peter's action at Antioch was a lapse from his better judgment and practice.

Besides maintaining that the writer of Acts had made Peter too Pauline, the Tübingen critics also insisted that he had made Paul too Petrine in his attempt to reconcile the irreconcilable. They found in Acts the Paul who accepted the decisions of the Apostolic Council, circumcised Timothy, and undertook to perform a rite in the temple to calm those who were alarmed at rumors of his rejection of all ritual obligations. This Paul was, to them, far removed from the uncompromising controversialist of Galatians. Is the Paul of Acts really the Paul of the Epistles? In Galatians one must remember that Paul was dealing in white-hot urgency with a situation threatening the very foundations of the gospel. For the Paul of the Epistles outward acts in themselves are neither good nor bad; only the intention makes them so. The truly emancipated person is not in bondage to his liberty. If he wishes for certain proper purposes to perform a ritual act not sinful in itself he will do so, not as under an obligation, but freely. If meat offered to idols is set before him, and there is no risk of causing offense to others by eating it, he will eat it and give God thanks; to him an idol is nothing. If expediency demanded that a half-Jew be circumcised for his greater usefulness in the gospel, Paul would circumcise him; in such a case circumcision was simply a minor surgical operation performed for a practical purpose. But narrower minds will never grasp the difference between doing such things freely and doing them as religious obligations with a view to securing divine favor. To them Paul's behavior appears as rank inconsistency. So it appeared to his Judaizing and other opponents in his own day; so it has appeared to many biblical critics in more recent times, and they have therefore dubbed Acts unhistorical. An apostle must not be inconsistent! But the consistency that some expect from Paul is the "foolish consistency" that Emerson in his *Essay on Self-Reliance* called "the hobgoblin of little minds, adored by little statesmen and philosophers and divines." "This charge of lack of consistency is a delight to men of limited intelligence, who desire someone whom they can understand, and will always say exactly what they expect of him. As they cannot find such a man in Paul, his utterances often appear to them to be illogical. But this is not because he is really inconsistent, for no one held to great principles more consistently, but because of his exceptional breadth of view, and his power of seeing that there is more than one side to every question" (Foakes Jackson, p. 15).

On the foundation principles of Christianity Paul was uncompromising; where these were not affected he was the most adaptable of persons. He circumcised Timothy but solemnly warned the Galatian Christians against the practice because they were being taught to regard it as necessary to complete their salvation. Such an attitude would bind them to the rites and ceremonies from which Christ had made them free. But even in Galatians Paul insisted that circumcision in itself is unimportant (5:6); only when performed as a religious act does it carry with it the obligation to do the whole law. Cf. 1 Cor. 7:18f., where he evidently meant that converted Jews like himself need not cease to observe ancestral customs (cf. Acts 21:21, 24).

Similarly, one who ate meat offered to idols and was aware of the idol might violate his conscience in so doing; Paul said that he should therefore refrain. But one to whom the meat was just a piece of meat like any other and to whom the idol meant nothing at all might eat freely, although the grace of Christ would lead him to refrain if another's conscience might be injured by his action (1 Cor. 8). Paul himself endeavored to be in Jerusalem for various festivals and associated himself with purificatory rites; yet he challenged the Galatians: "You observe days and months and seasons and years" (Gal. 4:10). The difference lay in the intention; their action would lose them the very liberty of which Paul availed himself. Paul's attitude to such matters is given in Rom. 14:5f.: "One man regards one day above another; another judges every day alike. Let every man be fully persuaded in his own mind. He who regards the day, regards it unto the Lord; and he who eats, eats unto the Lord, for he thanks God; and he who does not eat, unto the Lord he does not eat, and thanks God."

In his attitude to the Jews the Paul of Acts is also the Paul of the Epistles. The Paul who repeated in Rom. 1:16; 2:9f., "To the Jew first, and also the Greek," is the Paul who in Acts visited the synagogues first, in city after city, and who in Pisidian Antioch declared to the hostile Jews: "It was necessary that the word of God should be spoken to you first." The Paul who suffered so much from Jewish hostility in Acts is the Paul who spoke so severely of the Jews in 1 Thess. 2:15ff. But at the same time the Paul who in Acts persisted to the end of the narrative in pressing the claims of Christ upon his brethren according to the flesh despite their opposition is the Paul who in Rom. 9:2f. told of his great sorrow and unceasing anguish of heart at their refusal to receive the gospel and was willing himself to be accursed, if only his heart's desire and prayer to God for their salvation might be accomplished.

It may be surprising at first that the apostle to the Gentiles preached to Jews at all, in view of the demarcation agreement of Gal. 2:9. But in his evangelization of the gentile lands Paul could have scarcely made a point of excluding Jews from his gospel preaching. Since in so many cities the gentile "God-fearers" who attended the Jewish synagogue provided Paul with his point of contact with the gentile population and formed the nucleus of the local church that he formed, he inevitably preached to Jews as well as to Gentiles. The demarcation of Gal. 2:9 may have been intended geographically and not in a strict racial sense; the Jerusalem apostles were not forbidden to evangelize Gentiles residing in Judea.

The Paul who in Acts 9:15 was the Lord's "chosen vessel" to bear His name before the Gentiles in the Epistles claimed to have been divinely set apart, even from birth, for this very purpose (Rom. 1:1ff.; Gal. 1:15f.). The Paul who in Acts labored with his hands in Corinth and Ephesus and bade the Ephesian elders learn a lesson from him in this respect (Acts 18:3; 20:34) in the Epistles showed

House on a wall in Damascus. From such a place Paul was lowered in a basket (Acts 9:25) (W. S. LaSor)

the same example and taught the same lesson to the Thessalonians and Corinthians (1 Thess. 2:9; 2 Thess. 3:8; 1 Cor. 9:18; 2 Cor. 11:7). The Paul who in Acts adapted so readily to Jew and Gentile, learned and unlearned, Areopagus and Sanhedrin, synagogue audience and city mob, Roman governor and King Agrippa, is the Paul who said in 1 Cor. 9:19ff., "Though I am free from all, I have made myself the slave of all, that I might win the more. To the Jews I was as a Jew, that I might win the Jews; to those under the law, as under the law (not being myself under the law), that I might win those under law; to those without law, as without law (not being without law toward God, but under the law of Christ), that I might win those without law; to the weak I was weak, that I might win the weak; I have become all things to all men, that by all means I might save some."

Luke in narrating Paul's apostolic ministry summarized several of the apostle's speeches. Of these the most important are his synagogue address in Pisidian Antioch (Acts 13:16-41), his speech before the Athenian Areopagus (17:22-31), his farewell exhortation to the elders of the Ephesian church (20:18-35), his defense before the unruly crowd in the outer court of the Jerusalem temple (22:1-21), and his later defense before the younger Agrippa at Caesarea (26:2-29). These speeches provide a little more material for comparing the Paul of Acts with the Paul of the Epistles. The first two are sample addresses to Jewish and gentile audiences, respectively (on the latter see VII.E below); the last two are apologetic, addressed also to non-Christian audiences. The only Pauline speech in Acts addressed to Christians — the farewell speech to the Ephesian elders — might be expected to have closer affinities to his Epistles than the other speeches have, and this is what one finds. So abundant, indeed, are the parallels between this speech and the whole range of Pauline Epistles, that the speech might be explained as a cento compiled from the Epistles, were it not that the author of Acts elsewhere shows no sign of dependence on the Epistles and almost certainly did not know them.

2. In Reference to Paul's Career. Since the Pauline Epistles do not appear to have served as source material for the narrative of Acts, they provide independent information on a number of crucial issues that arise in Luke's account of Paul's career. Conversely, some Epistles can be read with greater understanding against the background that Luke supplies; e.g., his narratives of Paul's evangelization of Thessalonica (Acts 17:1-9) and Corinth (18:1-18) supply helpful introductions to the Thessalonian and Corinthian Epistles.

Here and there in his Epistles Paul made an autobiographical digression that illuminates something left obscure in Acts. Thus the Epistles tell even more clearly than Acts that the central element in his conversion experience was the risen Christ's actual *appearance* to him (1 Cor. 15:8; 9:1). The account of his persecuting zeal in Gal. 1:13ff. tallies well with Acts. In the Epistles and Acts alike his conversion and earliest Christian activity are associated with Damascus, although Galatians includes reference to a stay in Arabia (1:17). In 2 Cor. 11:32f. his escape from Damascus in a basket is told as in Acts 9:24f., but while Acts says that the Damascene Jews watched the city gates to catch him, Paul said that the ethnarch of the Nabatean King Aretas did so (cf. VII.C below). Whereas Acts says that his first postconversion visit to Jerusalem took place "when many days had passed" (9:23), Paul said more precisely that it was "after three years" (Gal.

1:18). Whereas Acts says that Barnabas "brought him to the apostles" (9:27), Paul said (Gal. 1:18f.) that the only apostles whom he met on that occasion were Peter and James the brother of Jesus; he added that his visit lasted fifteen days, which he spent with Peter. His statement "I was still not known by sight to the churches of Christ in Judea" (Gal. 1:21) is less easy to square with Acts 9:28f. Paul's statement that he went from Jerusalem "into the regions of Syria and Cilicia" (Gal. 1:21) agrees with the evidence of Acts 9:30 that he was shipped home to Tarsus (the information that he was a native of Tarsus comes from Acts). The autobiographical narrative of Galatians suggests further that Paul was engaged in missionary activity among Gentiles even before he joined Barnabas at Antioch. The latter episode is recorded only in Acts (11:25ff.) but is supported by the appearance in the Epistles of Paul and Barnabas as colleagues (cf. Gal. 2:1; 1 Cor. 9:6).

The next incident to which Paul made autobiographical reference is his Jerusalem visit of Gal. 2:1ff. However this visit should be dated (see VII.D below), Galatians gives valuable information about a conference not recorded in Acts, at which the Jerusalem "pillars" agreed that Paul and Barnabas should continue their gentile ministry while they would concentrate on apostolic witness to the Jews.

The account of the controversy during Peter's visit to Antioch (Gal. 2:11ff.) has no parallel in Acts, although it may be linked with the arrival of Judaizers from Judea (Acts 15:1). Acts, moreover, never relates that Paul had to face a situation like that with which he dealt in Galatians. The silence of Acts on such matters is no doubt bound up with Luke's purpose and plan; but despite all his information on the rise and progress of early Christianity, scholars' knowledge of the field covered by Acts would have serious gaps were it not for the firsthand information in Paul's Epistles.

Similarly, Acts does not detail the tensions to which the Corinthian correspondence bears witness. One might well wish that this correspondence had been preserved entirely — not only all Paul's letters to the Corinthians but also their letter to him (cf. 1 Cor. 7:1). As it is, the surviving correspondence gives a vivid impression of the war that Paul had to conduct against legalists and libertines simultaneously (see VII.E below).

Paul's references to Apollos in 1 Corinthians are illuminated by the short account of him in Acts 18:24-28.

Paul's Ephesian ministry of nearly three years is sketched briefly in Acts 19; only a few outstanding incidents are detailed (principally the riot in the theater). The Epistles written in that period throw further light on Paul's words to the elders of Ephesus in Acts 20:19, where he reminded them of his tears and the trials that befell him "through the plots of the Jews"; these letters also ease one's sense of surprise at his forecast in 20:29f. that after his departure his converts would be exposed to invasion by "fierce wolves" and to seduction by false teachers within. On the problem of Paul's special perils during his Ephesian ministry (cf. 1 Cor. 15:30-32; 2 Cor. 1:8-11; 11:23-29) see VII.F below. Paul's summary of hazards in 2 Cor. 11:23ff. shows how incomplete is extant information about his apostolic ministry.

The Epistles also make evident that Paul was greatly concerned at this time about the collection that he was organizing in his gentile churches as a gift and token of fellowship for the Jerusalem church. 1 Cor. 16:1ff. first mentions it, in terms suggesting that the Corinthians had already been informed about it. Paul had also instructed the churches of Galatia about it (1 Cor. 16:1), probably when he had returned that way from his flying visit to Palestine in A.D. 52 (Acts 18:23). He reverted to the subject in 2 Cor. 8:1ff., where (writing in Macedonia) he stimulated his Corinthian readers by telling them of his boast to his Macedonian friends that "Achaia has been ready since last year" (9:2) and by describing how zealously the Macedonian Christians despite their poverty had begged for the favor of sharing in this good work. By the time that he wrote Romans the collection of the money was almost complete, and he revealed something of its importance for him (Rom. 15:25ff.). He was not sure if it would achieve its purpose and be "acceptable to the saints" in Jerusalem; he asked the Roman Christians to pray that this might be so and that he might be "delivered from the unbelievers in Judea" (15:31). The necessity of this last prayer is clear from Acts 21–26.

But Acts says hardly anything about the collection, although the references to it in the Epistles explain a few points in Luke's narrative. (1) Why did Paul resolve, after passing through Macedonia and Achaia, to visit Jerusalem before Rome (Acts 19:21)? He wished to see the collection safely delivered. (2) Why did so many gentile Christians accompany Paul on his last journey to Jerusalem (Acts 20:4)? They were delegates from the contributing churches (cf. 1 Cor. 16:3f.). (3) What were the "alms and offerings" that Paul told Felix he had brought to his nation (Acts 24:17)? They were the contributions of the gentile churches. Luke's reticence about the collection may have an apologetic motive; perhaps the collection itself was an item in the indictment of Paul, being represented by his prosecutors as a diversion of money that ought to have been paid into the temple fund at Jerusalem.

Many interesting points about "undesigned coincidences" between Acts and the Pauline Epistles were made by W. Paley in *Horae Paulinae* (1st ed. 1790).

II. Problems in Paul's Epistles.–The tentative chronological grouping of Paul's Epistles suggested above (I.B.2) raises a number of problems that call for brief ventilation; they are dealt with more fully in the articles on the individual Epistles.

A. Group One. 1. Galatians. Placing Galatians in Group One as the earliest of Paul's extant letters has the obvious disadvantage of detaching it from the Pauline letter to which it has the closest affinity — Romans. Yet the main outline of Paul's understanding of the gospel as expressed in both these Epistles may well have taken definite shape within a short time from his conversion. Galatians even on the earlier dating did not precede Romans by more than nine years.

The early dating of Galatians, to a time shortly after Paul's return to Syrian Antioch (Acts 14:27), is bound up with the following theses. (1) Gal. 1:2 addresses the churches of Pisidian Antioch, Iconium, Lystra, and Derbe, which Paul and Barnabas planted on their first missionary journey in Asia Minor; (2) Paul's statement in Gal. 4:13 that he had preached the gospel to them "at first" (i.e., the first time or the former time) alluded to his journey from Pisidian Antioch to Derbe via Iconium and Lystra (Acts 13:14–14:21a). The implied second visit had immediately followed the first, for Paul and Barnabas, having reached the frontier between Roman Galatia and the kingdom of Antiochus, retraced their steps and revisited the churches that they had so lately founded (Acts 14:21b-23). (3) The Council of Jerusalem (Acts 15) had not yet met; otherwise Paul could scarcely have failed to mention its decision in confirmation of his argument in Galatians. (4) Paul's Jerusalem visits of Gal. 1:18; 2:1 correspond respectively to those of Acts 9:26; 11:30.

All these theses can be contested, but the arguments against them are no more conclusive than the arguments in their support. A more serious argument against the

early dating of Galatians is that of C. H. Buck, Jr. (*JBL*, 70 [1951], 113ff.). Buck maintained that Galatians, which uses both the "flesh/spirit" antithesis and the "works/faith" antithesis, must be later than 2 Cor. 1–9, which uses only the former antithesis. If Paul had formulated the "works/faith" antithesis before he wrote 2 Cor. 1–9, Buck continued, he could scarcely have avoided using it at least once in these chapters, since they have a "vehement anti-legal position." The situation of 2 Cor. 1–9, however, is not on the same footing as that of Galatians and does not call for the "works/faith" antithesis. Another anti-legal antithesis found in 2 Cor. 1–9 is letter/Spirit (3:6f.), which reappears in Romans (2:9; 7:6), but is absent from Galatians despite that letter's "vehement anti-legal position."

2. Thessalonians. On the Thessalonian correspondence, see the discussion above. Despite all the difficulty of relating the second Epistle satisfactorily to the first, alternative suggestions to the Pauline authorship of 2 Thessalonians raise more problems than they solve. The same is probably true of the hypothesis that 1 Thessalonians was written after 2 Thessalonians (cf. T. W. Manson, *Studies in the Gospels and Epistles* [1962], pp. 259ff.).

B. Group Two. 1. Corinthians. The problems presented by Paul's Corinthian correspondence illustrate the difficulties under which the collection of his letters was first undertaken.

The first Epistle appears to be intact. But it was not the first letter that Paul sent to the Corinthian church; another, mentioned in 1 Cor. 5:9, apparently preceded it. It is unlikely that Paul was using the "epistolary aorist" in this verse; he was probably referring to an earlier letter dealing particularly with sexual morality. This earlier letter may be designated A; it must be regarded as lost. The view that a fragment of it is embedded in 2 Cor. 6:14–7:1 is not only bibliographically improbable but open to the objection that these verses do not deal with the specific subject of A.

The extant 1 Corinthians may be designated B. It was sent to Corinth from Ephesus (1 Cor. 16:8), possibly by the hand of Timothy (4:17; cf. 16:10f.).

2 Corinthians again refers to a previous letter — a severe one from Paul to the Corinthian Christians that cost him much pain as he wrote it and that, once it had left his hands, he regretted having sent, lest his readers suffer too much pain when they received it. In it he presented them with something in the nature of an ultimatum, testing their obedience by demanding disciplinary action against a certain member of their church. The letter's effect, however, was so unexpectedly good that it brought about a complete reconciliation between Paul and the whole Corinthian church, in which a strong opposition to his leadership had been growing (cf. 2 Cor. 2:3-11; 7:8ff.).

1 Corinthians lacks the features ascribed to the severe letter and can hardly be identified with it. The person against whom the severe letter demanded disciplinary action is probably not the incestuous man whose excommunication is enjoined in 1 Cor. 5:13. The severe letter was more probably a distinct document, written between 1 Corinthians and 2 Corinthians, and may be designated C, in which case 2 Corinthians may be designated D.

But, according to some scholars, C may not be totally lost. There is a marked break in argument and temperament between 2 Cor. 9 and 10; the note of gladness and reconciliation apparent up to the end of ch. 9 suddenly gives way to sharp remonstrance and almost violent defense of Paul's apostleship. Several features of 2 Cor. 10–13 correspond to what can be gathered about the severe letter from references to it in chs. 1–9. It is not surprising that many commentators have concluded that chs. 10–13 represent the end of C, while chs. 1–9 (with the possible exception of 6:14–7:1, sometimes, though improbably, identified with A) contain the bulk of D (whose ending has somehow been lost). (Cf. the exposition of this view in J. H. Kennedy, *Second and Third Epistles to the Corinthians* [1900]; for the unity of 2 Corinthians cf. comms. by J. Denney [*Expos.B.*, 1894]; A. Menzies [1912]; P. E. Hughes [*NICNT*, 1962].)

Even if 2 Cor. 10–13 represents C, it can represent only part of it, for these chapters say nothing about the strong disciplinary action that the severe letter demanded (2:5ff.; 7:12). It can be argued more convincingly that chs. 10–13, far from being part of a letter antedating chs. 1–9, is part of an even later letter; this is an unavoidable conclusion if (as is probable) 12:18 refers back to the mission of Titus announced in 8:6ff. This later letter would have to be designated E, and C regarded as completely lost.

However that may be, why should 2 Corinthians have come down to us in this disorganized state? One suggestion is that the church of Corinth, *ca.* A.D. 96, had its interest revived in the letters that Paul had written to it forty years before by receiving a letter from Clement of Rome. Seeing how a leader in the church of Rome valued one of Paul's letters to Corinth (Clement invoked the authority of 1 Corinthians in his expostulation with the Corinthians), the leaders of the Corinthian church may have set themselves to retrieve all they could of the remains of Paul's correspondence with their predecessors. These remains were mutilated by that time, but they pieced the fragments together to the best of their ability, putting what was obviously the opening salutation of a letter at the beginning and what was obviously the concluding greeting at the end. Thus they produced 2 Corinthians, which is actually a combination of D and at least one other letter. But all this is highly speculative.

2. Philippians. Philippians (or part of it) is placed in Group Two along with 1 and 2 Corinthians on the ground that it most probably dates from Paul's Ephesian ministry. Some scholars (e.g., G. S. Duncan) have assigned all the Captivity Epistles to the Ephesian period, and others (e.g., C. H. Dodd) to Paul's Roman captivity — not to mention those (e.g., E. Lohmeyer) who have assigned them to his two years' custody in Caesarea. Still others have separated Philippians in date and place from Ephesians, Colossians, and Philemon. Of this last group, some (e.g., P. N. Harrison) have preferred a Roman dating for Philippians while admitting an Ephesian setting for the others; some (e.g., C. J. Cadoux) have dated Philippians in the Ephesian period but Ephesians, Colossians, and Philemon in the Roman period.

That Philippians is a Captivity Epistle is clear: "It has become known," said Paul, "throughout the whole praetorium that my imprisonment is for Christ" (Phil. 1:13). It seems certain that he was imprisoned at the place from which he wrote. If (with RV and RSV) one takes "praetorium" to mean the "praetorian guard," one must think of Rome (cf. AV "in all the palace"); but elsewhere in the NT the word denotes the headquarters of a Roman governor appointed by the emperor, with military forces under his command. No instance can be adduced of the use of "praetorium" for the headquarters of a senatorial province like Asia, as opposed to an imperial province. (Advocates of a Caesarean provenience can, of course, point to Acts 23:35, which expressly says that Paul was kept under guard "in Herod's praetorium" at Caesarea, the seat of government of the imperial province of Judea.) The Christians "of Caesar's household" (Phil. 4:22) were not necessarily attached to the imperial palace in Rome; the civil service of the empire was staffed by freedmen of the emperor, and such *Caesariani* were to be found in many provinces. Timothy's planned visit to Philippi (Phil.

PAUL THE APOSTLE

2:19) could have been associated with Paul's sending him and Erastus from Ephesus to Macedonia (Acts 19:22). The "true yokefellow" of Phil. 4:3 could have been Luke, who appears to have been in Philippi during Paul's Corinthian and Ephesian ministries — if this is a sound inference from the closing of the first "we" section of Acts in Philippi (Acts 16:17) and the opening of the second one there (20:5f.).

On the other hand, the description of Paul's environment in Phil. 1:12-18 (quite apart from the mention of the "praetorium") suits Rome better than any rival location. In favor of a Roman provenience, moreover, certain similarities in language between Philippians and 2 Timothy are adduced, as though the possibility of Paul's life being poured out as a libation (Phil. 2:17) had become a certainty by 2 Tim. 4:6a, and his desire to be released (Phil. 1:23) was on the point of being fulfilled by 2 Tim. 4:6b. Those who have denied that this section of 2 Timothy might itself be of Ephesian provenience have urged that in Ephesus Paul must have had a chance of appealing to Caesar, whereas 2 Timothy suggests no such loophole of hope. But if Paul was somehow involved in the troubles accompanying the assassination of M. Junius Silanus proconsul of Asia in A.D. 54 (cf. VII.F below), an appeal to Caesar would have increased his danger.

Although there is no explicit evidence for Paul's imprisonment in Ephesus, his claim at the end of his Ephesian ministry to have endured "far more imprisonments" than his traducers (2 Cor. 11:23) shows that he must have been imprisoned on many more occasions than the one recorded in Acts 16:23ff.

The terms in which he acknowledged the gift from the Philippians (Phil. 4:10ff.) suggest that the interval since their last gift to him was long. But Paul makes it plain that no negligence is attributed to them: "you had no opportunity," he says (4:10). Perhaps it was Paul himself who deprived them of any opportunity. More than once, immediately after his first leaving Philippi, the church there sent him gifts (4:15). But Paul soon learned that, if he accepted material aid for himself from his converts, this was taken by others as evidence of a mercenary spirit. Hence he requested his converts not to send money for his personal use, and this request was reinforced when he began to organize the relief fund for Jerusalem. He was anxious that all available gifts from his churches should be channeled into that fund. But by the time of his Roman imprisonment the fund had been closed and the money taken to Jerusalem. Paul's changed circumstances may have moved the Philippians to judge that "now at length" it would be opportune to send him a gift. Even so, its delivery was delayed because of the illness of their messenger, Epaphroditus (cf. C. O. Buchanan, *EQ*, 36 [1964], 157ff.)

The eschatological criterion, which has been considered in I.B.2.a above, indicates that the perspective of Phil. 3:2–4:9 is rather close to that of 1 Corinthians.

Most of Philippians is devoted to friendly encouragement. Little in the Philippian church required correction, apart from some personal friction among its members. Hence ch. 2 contains a general exhortation to likemindedness that is reinforced by the example of Christ's self-denial (vv. 6-11 may be an early Christian hymn on the humiliation and exaltation of the Servant of the Lord), and 4:2 specifically exhorts Euodia and Syntyche to "agree in the Lord." But 3:2-21 introduces a note so unlike the rest of the Epistle that these verses have sometimes been regarded as part of a separate letter. Indeed, if the bibliographical improbability involved in such a hypothesis can be surmounted, there is much to be said for regarding 3:2–4:9 as part of a separate letter dating from Paul's Ephesian period, and for setting the rest of Philippians in the context of the Roman imprisonment.

The people against whom he put the church on guard in Phil. 3:2ff. were not necessarily at Philippi then, but a warning was in order because their visits to other churches of his had resulted in trouble and controversy. They evidently included Judaizers of the class dealt with in Galatians but also, at the opposite extreme, exponents of "Christian" libertinism (v. 19). The vigor of Paul's language in v. 2 (cf. Gal. 5:12) might suggest that if one accepts C. H. Dodd's theory of a psychological watershed in Paul's Christian life (dated in the latter part of his Ephesian ministry), Philippians comes before rather than after it. Certainly his tone is milder toward those who "preach Christ from envy and rivalry" in 1:15ff.; it is not necessary to identify these rival preachers with the "dogs," "evil-workers," and "mutilators of the flesh" of 3:2. The group of 1:15ff. may be compared to those who fostered party spirit at Corinth (1 Cor. 1:12), but Paul would probably not have admitted that the people of Phil. 3:2 were preaching the gospel at all. That "those who mutilate the flesh" (3:2) were not his straightforward Jewish opponents but rather Judaizing Christians trying to undermine his apostolic authority seems plain (1) from the consideration that the Philippian Christians would have required little warning against Jewish opponents of Christianity, and (2) from his following caution about "confidence in the flesh." The parallel with his self-vindication in 2 Cor. 11:16ff. is obvious, and the language of Phil. 3:2ff. may very well reflect the apostle's state of mind at that time.

3. Romans. Romans can be dated rather easily; it was sent to Rome in anticipation of Paul's projected visit there (cf. Acts 19:21), on the eve of his setting out for Judea with the gentile churches' contributions for the Jerusalem church. It is thus an "occasional" letter in that it was written to prepare the Christians of Rome for his visit; on the other hand, it is less of an occasional letter than most of his other Epistles, for its main argument — an exposition of the gospel as Paul understood and proclaimed it — is not directed to a particular situation in the church addressed. Because of its general character, the letter was apparently judged suitable for circulation among other churches, with the omission of the personal greetings of ch. 16 (which the closing doxology's position at the end of ch. 15 in p^{46} suggests; an even shorter recension of the Epistle, which omits chs. 15–16, is probably Marcionite in origin).

C. Group Three. This group comprises the later Captivity Epistles — Philemon, Colossians, and Ephesians. It has been suggested already (see I.B.2.b above) that the development in Colossians and Ephesians of the conception that the Church is the body of Christ accords better with a later (Roman) dating than with an earlier dating.

1. Philemon. Philemon manifestly has the same date as Colossians (cf. Col. 4:9). The argument that Onesimus, running away from his master in the Lycus Valley, would have more likely hidden in the nearest big city, Ephesus, than in distant Rome can be countered by the equally probable argument that he may well have thought distant Rome a safer hiding place than Ephesus. Paul's request to Philemon to prepare a guest room for him (Philem. 22) because he hoped to be released and to pay him a visit is also intelligible on either hypothesis.

It is unclear how Onesimus communicated with Paul. But Paul's delicately insinuated hope in writing to Onesimus's master Philemon was that Onesimus would be sent back to continue the personal service that Paul valued so highly. The very survival of the letter is strong evidence that Paul

PAUL THE APOSTLE

had his way. Moreover, its inclusion in the Pauline corpus has been taken, especially by J. Knox (*Philemon among the Letters of Paul* [1935]), as evidence that Onesimus himself had a hand in the compilation of the corpus.

2. Colossians and Ephesians. Paul wrote Colossians after learning from Epaphras that the church of Colossae was in danger of accepting a Jewish-Hellenistic syncretistic teaching that was willing to accommodate some Christian elements. In his reaction to this "specious make-believe" (as he called it) Paul developed beyond its previous point his presentation of the cosmic role of Christ and the gospel. The "principalities and powers," which played a decisive part in the "Colossian heresy," were inferior to Christ (1) because they owed their existence to Him, the agent in creation, and (2) because they were vanquished by Him when they tried to overwhelm Him on the cross.

The doctrine of the cosmic Christ was not new to Paul. He and his fellow Christians believed in "one Lord Jesus Christ, through whom are all things and through whom we exist" (1 Cor. 8:6); this Christ was "the power of God and the wisdom of God" (1:24). God through the Spirit had imparted to His people that hidden wisdom, "decreed before the ages for our glorification," through ignorance of which the superhuman world rulers had "crucified the Lord of glory" and thus compassed their own doom (2:6-10). The liberation that Christ procured by His death was not restricted to mankind but would ultimately be displayed in its cosmic outreaching (Rom. 8:19-22). But what these and other Epistles hint at is expounded more fully and systematically in Colossians and Ephesians.

Justification by faith, although fundamental to Paul's thinking, does not exhaust his message. The Reformation inevitably paid special attention to the principle by which the individual soul is accepted as righteous in God's sight. But it is regrettable that a tendency developed among Protestant theologians to equate Paulinism so absolutely with the emphasis of Galatians and Romans that the corporate and cosmic insights of Colossians and Ephesians were considered non-Pauline. There is room in true Paulinism — and in true Christianity — for both these emphases.

The difference in vocabulary that has been detected between these two Epistles and their predecessors may be due in part to Paul's employing the technical terms of a controverted system of thought to confute it. An apologist to the Gentiles, Paul was a pioneer in meeting opponents on their own ground and adapting their language to Christian use in order to show that the problems to which an answer was vainly sought elsewhere found their satisfying solution in the gospel.

It has been suggested above (I.B.2.b) that in replying to the Colossian heresy Paul developed his earlier metaphor of a Christian fellowship as interdependent parts of a body to the view in Colossians and Ephesians of the Church as the body whose head is Christ. With this view he brought out not only the living communion among the members but also the dependence of all the members on Christ for their common life and power. He vindicated the supremacy of Christ against a theosophy that set Him on a lower plane than other celestial powers. In consequence these two Epistles use "body" in correlation with "head" rather than (as in the earlier Epistles) in correlation with "spirit"; this is no argument, however, against their Pauline authorship.

While Colossians and Ephesians stand together over against the earlier Epistles, they significantly differ from each other. Yet these differences should not be overstressed. That the technical terms of Colossians have new senses in Ephesians does not prove diversity of authorship; one need only think of the variety of senses in which Paul used Gk. *nómos,* "law," in Romans. It is a well-attested feature of less formal literature that "a single word or phrase persists in the writer's mind by its own force, independently of any sense-recurrence" (E. Laughton, *Classical Philology,* 45 [1950], 75).

From the theme of the cosmic Christ Paul went on to consider the cosmic role of the Church as the body of Christ. After showing Christ as the reconciler of mankind to God, he thought about Christ's role as the reconciler of human beings to one another and especially of Jews to Gentiles. In Colossians he unfolded the "mystery" that Christ dwells in gentile (as well as Jewish) Christians as their hope of glory; in Ephesians he further unfolded the "mystery" of the union in one body of those who are thus indwelt by Christ — Jews and Gentiles alike. To Paul with his Jewish parentage, this could never cease to be the crowning wonder of God's grace.

If the author of Ephesians was not Paul, he was the greatest Paulinist of all time. That such a genius left no further trace in early Christian history is scarcely credible, for Ephesians is a distinctive work with its own unity of theme. An atomistic study may make it look like a compilation from Paul's other letters, but when viewed as a whole it has a unity no such compilation could attain. It may justifiably be described as an exposition of "the quintessence of Paulinism," but it is more than that: it brings the teaching of Paul's earlier Epistles to a further state of revelation and application, saying what Paul would have said had he advanced from his portrayal of the cosmic Christ in Colossians to treat the cosmic role of the Church. Some of its stylistic features would be explained by an amanuensis with a more classical style than the transcriber of Colossians (who was probably Timothy).

The significant differences between Colossians and Ephesians are not inconsistent with the view that Paul, having completed his reply to the Colossian heresy, allowed his thoughts to run on in a less controversial vein until he was gripped by the vision that finds expression in Ephesians and began to dictate its contents in an exalted mood of inspired meditation, thanksgiving, and prayer. The resultant document was then carried as a general letter — one might even say as Paul's testament — to the churches of Asia by the messengers entrusted with the Epistle to Colossae.

D. Group Four: Pastoral Epistles. The problem of the authorship of the Pastoral Epistles (1 and 2 Timothy, Titus) remains unsolved. Although most scholars have not considered the extant Epistles Pauline, others have ably restated the case for their authenticity.

The main points urged against their Pauline authorship are (1) their polemic against heresies that have a second-century gnostic (and even Marcionite) hue; (2) their more stereotyped theological outlook, presuming a fixed body of orthodox doctrine called "the faith"; (3) the developed state of church organization that they reflect; (4) the difficulty of finding a suitable setting for them in Paul's lifetime; (5) the fact that early external evidence is not so strong for them as for the other Epistles attributed to Paul; (6) indications of borrowing from the other Epistles; (7) their divergence in style and vocabulary from the other Epistles and affinity to second-century Christian writings.

The heresies envisaged in these Epistles, however, do not have the fully developed character found in the 2nd century. The reference, e.g., in 1 Tim. 6:20 to the "contradictions [Gk. *antítheses*] of what is falsely called knowledge [*gnósis*]" appears unrelated to Marcion's *Antitheses.* The emergence of a recognized body of belief by A.D. 60-70 is not surprising; generally undisputed Epistles of Paul have traces of credal and catechetic summaries. The ecclesiastical organization in the Pastoral Epistles had not reached the stage of development represented in the Ignatian epis-

tles (*ca.* A.D. 115). The threefold ministry had not yet been established: the government of the churches by bishops (or elders) and deacons found in the Pastorals is attested as early as Phil. 1:1. A second-century date for these Epistles (whether in general terms or specific, such as their recent ascription to Polycarp of Smyrna) is too late.

It is admittedly difficult to find a setting for the Pastorals in Paul's lifetime as known from Acts and the Pauline Epistles. But since they are in any case later than the other Epistles attributed to Paul, they must (if Pauline) belong to the closing years of his life, about which scholars are poorly informed. To place them in Paul's closing years may involve a "flight into *terra incognita*" (M. Dibelius), but that does not constitute an adequate argument against this dating.

The strongest argument against a Pauline date and authorship is that from style and vocabulary, presented in its most cogent form by P. N. Harrison in *Problem of the Pastoral Epistles* (1921). Harrison's thesis has contributed more than anything else toward widespread disbelief in their authenticity. Yet the statistical presentation of the linguistic evidence from such a restricted field as the Pauline corpus is of limited validity; other conclusions than Harrison's may account not only for the Pastorals' linguistic peculiarities but also for other distinctive features (*see* PASTORAL EPISTLES III.B.5).

If it is difficult to accept all three in their present form as letters written or dictated directly by Paul, they may be held to represent the posthumous recension of a number of *disiecta membra* (scattered parts) of Paul's correspondence (esp. with Timothy and Titus), and other fragments, possibly together with some notes of his oral instruction on church order. (Such a situation will best be appreciated by those who have actually collected, edited, and published someone else's literary remains.) Timothy or Luke may have been especially active in this regard. Timothy was associated with Paul in the writing of other Epistles, and Luke was Paul's only companion and evidently his amanuensis when 2 Tim. 4:11 was written. (See C. F. D. Moule, *Birth of the NT* [3rd ed. 1981], pp. 281f.)

III. Pauline Corpus.–The earliest collection of Paul's Epistles for which explicit information is available is that drawn up by Marcion at Rome *ca.* A.D. 144 as the second part of his canon. Part I was "The Gospel" (a specially edited form of Luke). Part II, "The Apostle," consisted of ten Pauline Epistles (all except the three Pastorals) edited in accordance with Marcion's hypothesis that Paul was the only true apostle of Jesus, since the Jerusalem apostles had adulterated His teaching with OT and Jewish elements, from which it was originally entirely free. It is implied in Tertullian's critique of Marcion (and generally confirmed by the express testimony of Epiphanius) that in Marcion's canon the Epistles appeared in this order: Galatians, 1 and 2 Corinthians, Romans, 1 and 2 Thessalonians, Ephesians (called by Marcion "the Epistle to the Laodiceans"), Colossians, Philippians, Philemon. If the Corinthian correspondence is reckoned as one composite letter, and the Thessalonian correspondence similarly, then (apart from Galatians) the Epistles are arranged in descending order of length. (It is interesting to observe how largely this principle has continued to control the traditional order of the Pauline Epistles.) A. Harnack supposed that Galatians was placed first because its argument was so particularly congenial to Marcion's interpretation of the gospel. J. Knox suggested that Marcion found the Pauline corpus of ten letters already arranged with Ephesians at the head and Galatians immediately before Colossians and that he transposed Galatians and Ephesians (*Marcion and the NT* [1942]). This suggestion has to be appreciated in the light of the view of E. J. Goodspeed and his school that Ephesians was composed as a statement of Paulinism to stand as an introduction to the Pauline corpus when it was first collected and published (cf. E. J. Goodspeed, *Key to Ephesians* [1956]).

The catholic leaders reacted to Marcion's teaching by defining their own canon, in which the NT did not supersede but stood alongside the OT. This canon also had not just Luke but a fourfold Gospel, not only the Gospel narrative but its sequel in Acts, not only Pauline Epistles but Epistles of apostles, and not merely ten but thirteen Epistles of Paul. Since the end of the 2nd cent. the thirteen Epistles bearing Paul's name have invariably formed part of the NT canon.

But efforts to envisage the formation and history of the Pauline corpus before Marcion's time have little success. The corpus of ten Epistles was probably something that he inherited; p^{46} (late 2nd cent.) has apparently the same ten Epistles and Hebrews but lacks the three Pastorals.

It seems clear that the collection of Paul's Epistles had begun by A.D. 96, when the Epistle of Clement of Rome to the Corinthians was written, for Clement quoted 1 Corinthians as readily as Romans and appeared to know Ephesians and Philippians as well. There is some reason to think that he did not have access to 2 Corinthians, since it contains passages so in harmony with his argument that he would almost certainly have quoted them had he known them. The suggestion that his evident knowledge and appreciation of 1 Corinthians stimulated the Christians of Corinth to gather the surviving fragments of Paul's correspondence in their church archives has been mentioned above (see II.B.1). But it certainly looks as though some of Paul's letters were interchanged and circulated before the ten-letter corpus was published. Whatever the date of 2 Peter may be, it presupposes a considerable collection of Paul's Epistles (3:15f.). On the other hand, scholars must reckon with the practical certainty that Paul's Epistles were not used as a source by the author of Acts. Perhaps, as Goodspeed suggested, the publication of Acts *ca.* A.D. 90 led to a revival of interest in Paul, in consequence of which his literary relics were collected. Whether, in addition, they were collected at Ephesus (so Goodspeed, *Intro. to the NT* [1937], pp. 217ff.; C. L. Mitton, *Formation of the Pauline Corpus of Letters* [1955], pp. 44ff.) or at Alexandria (so G. Zuntz, *Text of the Epistles* [1954], p. 278), and whether the publication of the first Pauline corpus led to the formation of other Christian epistolary corpora (so A. E. Barnett, *Paul Becomes a Literary Influence* [1944]) are hypotheses that cannot be verified with the available evidence.

Possibly the second and enlarged edition of the Pauline corpus (thirteen letters) circulated for a considerable time alongside the shorter ten-letter corpus; it may even have been published before the time of Marcion. Ignatius, for instance, appears to have been acquainted with the Pastoral Epistles. Tertullian's statement (*De praescr. haer.* 38) that the Gnostic Valentinus "appears to have used the entire canon" (unlike his contemporary Marcion) possibly implies a certain recognition of the second-century catholic canon of the NT, including the thirteen Pauline Epistles, even before the publication of Marcion's canon.

At any rate, the letters of Paul were in circulation throughout the Christian world early in the 2nd cent. and the publication of the Pauline corpus, together with the fourfold Gospel and Acts as the "pivot" book, formed an initial and essential stage in the shaping of the completed NT canon.

Even before the last decade of the 1st cent., churches had probably begun to exchange Paul's letters to them.

Indeed, Paul himself had encouraged such an interchange. However the "letter from Laodicea" of Col. 4:16 is identified, it is evident that the Colossian and Laodicean churches were called upon to exchange their letters from Paul. It is probable, too, that Ephesians from the start and Romans in one of its recensions had the character of general epistles, not confined to one community only. Galatians was addressed to "the churches of Galatia," not to one church. The reference in Gal. 6:11 to Paul's distinctive handwriting makes it probable that one copy was sent to be passed on from one church to another.

The various witnesses for the text of the Pauline Epistles must be reexamined to discover whether they all represent a textual tradition stemming from the publication of the first Pauline corpus or whether some textual evidence of at least some Epistles that antedated their publication in the corpus may not have survived. The conclusion cannot be certain. F. G. Kenyon's measurements of agreement and disagreement between p^{46} and other principal MSS, however, reveal significant variations from one Epistle to another; Romans, in particular, stands apart (*Chester Beatty Biblical Papyri*, Fasciculus III Supplement [1936], pp. xv ff.). This state of affairs can best be explained if the textual tradition of Romans at least goes back to a time when the individual Epistles circulated separately. There is some evidence, too, that the "Macedonian" Epistles (1 and 2 Thessalonians and Philippians) formed a small collection on their own before the publication of the larger corpus.

IV. Paul and Early Christian Preaching and Teaching.– The Epistles of Paul are the earliest written source of information on the apostolic preaching in the first days of Christianity. Since they were written for people who had already heard and believed this preaching, they refer to it only occasionally, when Paul wished to remind his readers of something. Even so, the main outline of the preaching could be reconstructed if necessary from these Epistles alone.

In his early preaching Paul emphasized Christ's crucifixion (1 Cor. 2:2; Gal. 3:1), His resurrection, and His role at the Parousia (1 Thess. 1:9f.). The most notable kerygmatic passage in his Epistles is 1 Cor. 15:3ff., where (to introduce an argument for the truth of resurrection) he reminded his readers of three essential elements in the message that they had received from him (as he himself had received it earlier) — Christ's death for their sins, His burial, and His resurrection on the third day. His death and resurrection are said to have taken place "in accordance with the scriptures"; several eyewitnesses of His resurrection are listed, among whom Peter and James are mentioned by name. Paul's added reference to his own belated vision of the risen Christ is probably his personal contribution to the message that all the apostles proclaimed. He insisted that on the basic facts his preaching did not differ from that of the other apostles (1 Cor. 15:11).

Further references in this and other Epistles help to fill out the summary of the preaching. 1 Cor. 11:23ff. is Paul's account of the institution of the Eucharist — again, something that he had "received" himself before he "delivered" it to his converts. (This is the earliest extant account of the institution, antedating Mk. 14:22-25 by several years.) The rest of Paul's message may be summarized thus: "God in the fulness of time and in accordance with prophetic Scripture has sent His Son Jesus as the Christ, who was born of the seed of David, lived under the law, taught the truth of God, was betrayed and crucified, dying the death that incurred the divine curse in order to redeem others from the curse incurred by sin. He was buried, was raised again the third day, appeared to many witnesses, and was exalted to God's right hand, where He intercedes for His people. He will reappear in glory to judge the world, to raise the faithful departed, to consummate for His people the salvation that He won for them, and to bring enduring bliss to all creation."

The outline of the early preaching that can be reconstructed from Paul's Epistles is generally the same as the one traceable in other NT Epistles, in the apostolic speeches reported in the first half of Acts, and in the Gospels — notably in the framework of Mark (see C. H. Dodd, *NT Studies* [1953], pp. 1ff.; *Apostolic Preaching and Its Developments* [1936]).

If Paul's Epistles show that he was at one with the other apostles on the basic facts of the gospel, even if he interpreted and applied them in a way distinctively his own, they also show that his Christology was essentially the same as theirs. Such a significant feature as the application to Jesus of OT passages that speak of Yahweh (e.g., Isa. 45:23 in Phil. 2:10f.) is not peculiar to Paul; cf. the application of Isa. 8:12f. in 1 Pet. 3:14b-15a, and of Ps. 102:25-27 in He. 1:10-12. The "wisdom" Christology of Col. 1:15ff. is paralleled in the prologue of John and in He. 1:2f. Paul introduced it in a confessional context (Col. 1:13ff.; cf. Eph. 1:7f.) that appears to represent a wider Christian usage than his own — e.g., it mentions the "remission (Gk. *áphesis*) of sins," whereas Paul's own preference was for more positive terms that speak of God's justifying grace. The "wisdom" Christology may reasonably be taken as another thing that Paul "received" before handing it on to others.

The portrayal of Christ's humiliation and exaltation in Phil. 2:5-11 reflects a "Servant of the Lord" Christology (cf. II.B.2 above). E. Lohmeyer detected in this christological passage a pre-Pauline hymn and emphasized its appropriateness to the context. What is important is that in his Christology (as in his soteriology) Paul was not the complete innovator that some have imagined; he shared with other Christians fundamental beliefs that he and they ultimately "received from the Lord."

Paul's Epistles are also the earliest written source (though some would except James) for Christian ethical teaching. That this teaching goes back to the teaching of Jesus seems clear.

One cannot fail to observe the close logical connection brought out by Paul between the ethical teaching and the facts of the preaching. Because his converts had accepted the truth of the gospel story, it was incumbent on them to live in conformity with the mind of Christ. The Pauline "therefore" implies this in, e.g., Rom. 12:1; Eph. 4:1; Phil. 2:12; Col. 3:5.

But these Epistles bear witness, too, that at an early date Christian ethical teaching received a catechetical form for the more effective instruction of converts — the "form of teaching" of Rom. 6:17 (RV). The catechetical teaching of Col. 3:5–4:6, e.g., falls into four paragraphs that may be collected under the captions "put off" (3:5-11), "put on" (3:12-17), "be subject" (3:18–4:1), and "watch and pray" (4:2-6). That is to say, converts to Christianity must "put off" old vices and "put on" new virtues, they must display a spirit of yieldingness and mutual consideration in their relations with one another (not least within the domestic circle), and their general behavior must be characterized by vigilance and prayerfulness. The recurrence of such "forms," under these or similar catchwords, in non-Pauline as well as in Pauline Epistles is best explained by a common body of catechetical instruction rather than by literary dependence of certain Epistles on others. Even so, Paul revealed his distinctive lines of thought in his treatment of such common Christian property — e.g., in

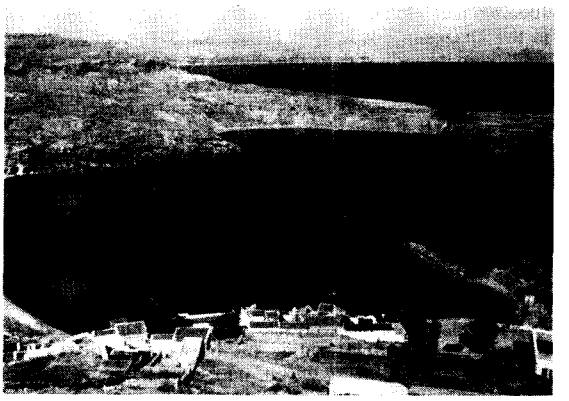
his use of the terms "put to death" or "reckon as dead" as alternatives to "put off" (cf. Rom. 6:11; 8:13; Col. 3:5).

V. Paul and Jesus.–Paul's letters were written neither to record the facts of Jesus' life and ministry nor to give a detailed account of his kerygma. They were addressed to people who already knew the gospel story; their acquaintance with the details of the kerygma is presupposed. Paul's lack of interest in the life and teaching of Jesus before His passion has often been exaggerated, especially when this exaggeration is linked with a false interpretation of 2 Cor. 5:16. When Paul said there, "Even though we once regarded Christ from a human point of view, we regard him thus no longer," he was contrasting his present knowledge of the exalted Lord with his estimate of Him before his conversion. He was not comparing his present knowledge of the exalted Lord with the knowledge of Him possessed by the Jerusalem apostles and others who had been His companions during His ministry, or implying that this companionship conferred no advantage on them. Paul, the other apostles, and all their fellow believers, whether or not they had known Jesus "in the days of his flesh," knew Him now as the exalted Lord, who communicated His presence and power to His followers by the Spirit. They looked at all the events before the Crucifixion from the standpoint of Easter and Pentecost. This perspective did not mean that they represented the works and words of Jesus less accurately, but that they understood them more adequately. Paul was no doubt indebted to Peter and others for much of his information about the earthly life of Jesus, and the vivid depiction of the crucifixion story implied in Gal. 3:1 was probably based on the testimony of eyewitnesses.

Although Paul insisted on the divine preexistence of Jesus (Phil. 2:6; Col. 1:15ff.), he viewed Him nonetheless as a real man born of woman (Gal. 4:4), and as a descendant of Abraham (Rom. 9:5) and David (1:3). He was a poor man (2 Cor. 8:9); He lived under the Jewish law (Gal. 4:4). The time came when He was betrayed, and on that night He instituted a meal of bread and wine to be taken as a memorial (1 Cor. 11:23ff.). He endured the Roman penalty of death by crucifixion (1 Cor. 1:23; Gal. 3:1; etc.) — 1 Tim. 6:13 gives His judge's name as Pontius Pilate, before whom He is said to have "made the good confession" — yet Jewish representatives had some responsibility for His death (1 Thess. 2:15). He was buried, rose the third day, and was thereafter seen alive by many eyewitnesses on various occasions, including one occasion on which He was so seen by over five hundred, most of whom were alive nearly twenty-five years later (1 Cor. 15:4ff.). In this summary of the evidence for the reality of Christ's resurrection Paul showed a sound instinct for the necessity of marshaling personal testimony to support what might well appear an incredible assertion.

Paul knew the Lord's original apostles (Gal. 1:17ff.; etc.), of whom Peter and John are mentioned by name as "pillars" of the Jerusalem community (2:9), and His brothers, of whom James is similarly mentioned. He knew that the Lord's brothers and apostles, including Peter, were married (1 Cor. 9:5) — an incidental agreement with the Gospel story of the healing of Peter's mother-in-law (Mk. 1:30). He quoted sayings of Jesus on occasion, e.g., His teachings on marriage and divorce (1 Cor. 7:10f.) and on the right of gospel preachers to have their material needs supplied (1 Cor. 9:14; 1 Tim. 5:18; cf. Lk. 10:7), and Christ's words at the institution of the Lord's Supper (1 Cor. 11:24f.).

Paul moreover carefully distinguished situations in which he could quote a direct and authoritative ruling of Jesus, which put an end to all disputing, from those in which, in default of such a ruling, he expressed his own judgment, which he recommended but would not impose. Contrast "not I but the Lord" in the prohibition of divorce (1 Cor. 7:10f.) with "I . . . , not the Lord" and "I have no command of the Lord" in statements on related problems (vv. 12, 25). This careful distinction suggests that the early Church was not so ready to devise sayings of Jesus bearing upon situations that arose as some form critics have suggested.



Although Paul did not always quote the actual sayings of Jesus, he showed throughout his works how well acquainted he was with them. A comparison of the ethical section of Romans (12:1–15:7), where Paul summarized the practical implications of the gospel for the lives of believers, with the Sermon on the Mount particularly shows how thoroughly imbued the apostle was with the teaching of his Master. Besides, Paul's chief argument in his ethical instruction there and elsewhere is the example of Christ Himself, and Paul's understanding of Christ is in perfect agreement with His character as portrayed in the Gospels. Paul's mention of "the meekness and gentleness of Christ" (2 Cor. 10:1) echoes Our Lord's own words, "I am meek and lowly in heart" (Mt. 11:29). The self-denying Christ of the Gospels is the one of whom Paul said, "Even Christ pleased not himself" (Rom. 15:3). Just as the Christ of the Gospels called on His followers to deny themselves (Mk. 8:34), so the apostle insisted that, after the example of Christ Himself, "We who are strong ought to bear with the infirmities of the weak, and not to please ourselves" (Rom. 15:1). He who said, "I am among you as the servant" (Lk. 22:27), and performed the menial task of washing His disciples' feet (Jn. 13:4ff.) is He who according to Paul "took the form of a slave" (Phil. 2:7). When Paul wished to commend to his readers all those graces that adorn the Christ of the Gospels he did so in language like this: "Put on the Lord Jesus Christ" (Rom. 13:14).

VI. Chronology of Paul's Career.–Chronological notes are rare in Paul's letters — outstanding are the "three years" of Gal. 1:18, the "fourteen years" of 2:1, and the other "fourteen years" of 2 Cor. 12:2. Other incidental notes are "I will stay in Ephesus until Pentecost" (1 Cor. 16:8) and "Achaia has been ready since last year" (2 Cor. 9:2; cf. 8:10).

In Acts chronological references are less rare but are more plentiful for the later part of Paul's ministry than for the earlier part. After Barnabas brought Paul to Antioch, they met with the church there "for a whole year" before they were sent on their famine-relief mission to Jerusalem (Acts 11:25). Luke as an Antiochene would remember this, but for most of the narrative that he could not control by personal knowledge his sources gave him little chronological help, and he marked an interval of time by transitional formulas like "after some days" (15:36). His chronological details are most precise when he described his voyages with Paul; then his diary reads like a logbook (cf. 16:11; 20:6-16; 21:1-8; 27:1-39; 28:11-17). For the rest, he said that Paul spent eighteen months in Corinth (18:11), between two and three years in Ephesus (19:8-10; 20:31), and three months in Greece immediately before his last journey to Palestine (20:2f.). Later he mentioned the two years that elapsed between Paul's arrest and Felix's recall from the procuratorship of Judea (24:27; this, and not the duration of Felix's procuratorship, is certainly what is meant), the three months' wintering in Malta (28:11), and Paul's two-year house arrest in Rome (v. 30). Between these specified periods, however, are periods of unspecified duration.

The whole of Paul's Christian career as related in Acts clearly must fall between A.D. 33 (or whatever alternative

PAUL THE APOSTLE

St. Paul's Bay at Lindos on Rhodes (Acts 21:1) (W. S. LaSor)

year may be regarded as the year of his conversion) and 64, when the Neronian persecution began. The Judean famine of Acts 11:28 is dated in the reign of Claudius (41-54) — more particularly, as the position of ch. 12 suggests, near the death of Herod Agrippa I in 44. To the reign of Claudius also must be dated Paul's Corinthian ministry. When he arrived in Corinth Paul met Aquila and Priscilla, who had recently left Italy because of Claudius's edict expelling Jews from Rome (18:2) — an edict for which Orosius's date of 49, based on other grounds, is probable. More precise information is provided by the statement that Gallio's proconsulship of Achaia coincided with or at least overlapped Paul's stay in Corinth (v. 12). Gallio's proconsulship probably lasted no longer than a year, being terminated by an attack of malaria (Seneca *Ep. mor.* 104.1); it is dated rather closely by a reference to him as proconsul of Achaia (either currently or very recently) in a rescript of Claudius to the citizens of Delphi dated to Claudius's twenty-sixth acclamation as *imperator* (W. Dittenberger, *Sylloge Inscriptionum Graecarum*, II [4th ed. 1960], no. 801). Other inscriptional evidence (*CIL*, III, 476; VI, 1256) points to the first seven months of 52 as the period of this acclamation. Since proconsuls normally entered their office on July 1, Gallio probably became proconsul of Achaia on July 1, 51. Paul's Corinthian ministry may thus have run from the autumn of 50 to the spring of 52, and his Ephesian ministry (which was separated from his Corinthian ministry by a hasty visit to Palestine) from the autumn of 52 to the summer of 55.

Festus's supersession of Felix as procurator of Judea may be dated to 59 by a change in provincial coinage in Nero's fifth year (cf. F. W. Madden, *History of Jewish Coinage* [1864], p. 153). Since Paul was sent by sea to Rome shortly after Festus's arrival in Judea, another, more tenuous argument in support of that year is that in A.D. 59 the Day of Atonement appears to have fallen rather late (Oct. 5), as Acts 27:9 suggests: "even the fast [the Day of Atonement] had already gone by."

With these few aids to fixed dating, the following tentative chronological outline of Paul's career may be drawn up.

Conversion	A.D. 33
First Postconversion Visit to Jerusalem	35
Joins Barnabas at Antioch	45
Famine-Relief Visit to Jerusalem	46
Accompanies Barnabas to Cyprus and Asia Minor	47-48
At the Council of Jerusalem	49
Journey with Silas and Others to Philippi, Thessalonica, and Corinth	49-50
In Corinth	50-52
In Ephesus	52-55
At Troas (2 Cor. 2:12)	autumn 55
In Macedonia and Illyricum	55-56
In Corinth	winter 56-57
Arrival and Arrest in Jerusalem	May 57
Detention in Caesarea	57-59
Voyage to Rome	59-60
Under House Arrest in Rome	60-62
Outbreak of Neronian Persecution	64
Last Imprisonment, Trial, and Execution	65(?)

VII. Life and Ministry of Paul. *–A. Paul the Roman Citizen.* "Saul, who is also called Paul" (Acts 13:9), was born about the beginning of the Christian era in Tarsus, the principal city of Cilicia in southeast Asia Minor (9:11; 22:3). His description of himself as a "Hebrew" (2 Cor. 11:22), "a Hebrew born of Hebrews" (Phil. 3:5), shows that his parents though living in the Diaspora among the Greeks were far from being assimilationist Jews, but remained faithful to the language and customs of Palestinian Jewry. An incidental confirmation of this is Paul's statement in Acts 26:14 that the voice on the Damascus road addressed him "in the Hebrew [probably Aramaic] language" — probably because Hebrew was *Paul's* mother tongue rather than because it was *Jesus'* habitual speech. According to Jerome (*De vir. ill.* 5) Paul's ancestors belonged to Gischala in Galilee and migrated to Tarsus at the time of the Roman conquest of Palestine (63 B.C.); the accuracy of this tradition is uncertain. Although born into an orthodox Jewish family Paul was born a Roman citizen (22:28); thus his father must have been a Roman citizen before him.

How the citizenship came into Paul's family is not known. Paul's native Cilicia fell within the *provincia* of more than one Roman general in the 1st cent. B.C. — e.g., Pompey and Antony — and the grant of citizenship to approved individuals was included in the *imperium* conferred on these generals by law. But whether one of these generals or someone else granted Roman citizenship to Paul's family and why it was so granted are unknown. In a letter dated February 18, 1953, Sir William Calder said of Paul: "Had not his father (or possibly grandfather) been made a citizen by Antony or Pompey? Were they not a firm of *skēnopoioi* [tentmakers], able to be very useful to a fighting proconsul?" This suggestion is as reasonable as any that could be made on this point, but the evidence is uncertain.

As a Roman citizen Paul had three names — *praenomen* (first name), *nomen gentile* (family name), and *cognomen* (additional name) — but only his *cognomen*, Paullus, is known. His *nomen gentile* if known might give some clue to the circumstances of his family's acquisition of the citizenship (for new citizens commonly assumed their patron's *nomen gentile*). His *cognomen* may have been chosen because of its assonance with his Jewish name Saul — Heb. *Šā'ûl*, in the NT sometimes spelled *Saoul* and more often *Saulos*, the latter form rhyming with Gk. *Paulos*. Since he belonged to the tribe of Benjamin (Phil. 3:5) his parents may have named him Saul after the most illustrious member of that tribe in their nation's history, Israel's first king.

On more than one occasion Paul appealed to his rights as a Roman citizen — at Philippi (Acts 16:37), to protest his having been beaten with rods by the lictors attendant on the chief magistrates of the colony before he had received a proper trial; some years later, at Jerusalem (22:25), to avoid being scourged (much more murderous than a beating with rods) by authorities who wanted to know how he had enraged the Jews in the temple court. He later availed himself of his citizen rights when he appealed to Caesar (25:11); see VII.G below. The rights of Roman

citizens were laid down in a long succession of laws (most recently the *lex Julia de vi publica*), going back traditionally to the *lex Valeria* of 509 B.C. They included exemption from certain ignominious forms of punishment, protection against summary execution, and the right of appeal to the sovereign authority.

When a man claimed his citizen rights — when he said *civis Romanus sum* ("I am a Roman citizen") or its equivalent in Greek — how did he prove his claim? Certainly it was a capital offense to claim falsely to be a Roman citizen, but how did an official know whether the claim was true? A new citizen might have a duly witnessed copy of his certificate of citizenship; auxiliary soldiers received such a document when they were enfranchised, and civilians may have been given something similar. But Paul was not a new citizen. He might, however, have produced a diptych containing a certified copy of his birth registration. Each legitimate child of a Roman citizen had to be registered within (it appears) thirty days of birth (cf. F. Schulz, *Journal of Roman Studies*, 32 [1942], 78ff.; 33 [1943], 55ff.). If he lived in the provinces, his father or some duly appointed agent made a declaration in the appropriate record office that the child was a Roman citizen (*civem Romanum esse professus est*); the declaration was recorded in the official register, and the father or agent received a copy in diptych form, properly certified by witnesses.

It is doubtful that an itinerant Roman citizen customarily carried this diptych around with him. F. Schulz was sure that Paul did so and produced it for corroboration when he claimed civic privileges (*Journal of Roman Studies*, 33 [1943], 63f.). A. N. Sherwin-White, however, thought it more likely that such certificates were normally kept in the family archives (*Roman Society and Roman Law in the NT* [1963], p. 149; cf. *Roman Citizenship* [1939]).

A further point to consider is that registration of Roman citizens at birth was apparently enacted by the *lex Aelia Sentia* of A.D. 4 and the *lex Papia Poppaea* of 9; if Paul was born even a year or two before the earlier enactment, he might not have been registered in this way.

B. Paul the Pharisee. Although Tarsus was an outstanding center of Greek culture, ranking next to Athens and Alexandria, and "no mean city" in other respects (Acts 21:39), it was not to its schools of philosophy or rhetoric that Paul was sent for his education. Instead, he went to Jerusalem and became a pupil of the elder Gamaliel, leader of the school of sacred learning founded in the previous generation by Hillel. Since Paul's parents were themselves adherents of the party of the Pharisees (23:6), their son was naturally entrusted to the tuition of the most illustrious Pharisee of his day.

At what age Paul came to Jerusalem from Tarsus is difficult to decide. The most relevant reference, Acts 22:3, may be variously interpreted according to the alternative punctuations. Earlier interpreters tended to assume that he lived at Tarsus long enough to be deeply influenced by its Hellenistic way of life and modes of thought and moreover by Mithraism as practiced in Cilicia. W. C. van Unnik later argued that the words "born indeed at Tarsus in Cilicia, but brought up in this city [Jerusalem]" mean that Jerusalem was the city of Paul's boyhood. He could certainly have acquired an elementary knowledge of Greek culture from Gamaliel, who probably gave his disciples prophylactic courses in this subject (cf. W. L. Knox, *Some Hellenistic Elements in Primitive Christianity*, p. 33).

The question of Paul's indebtedness to Hellenistic or Jewish influences has been unnecessarily complicated by a failure to recognize that Hellenism and Judaism were not sealed off from each other in watertight compartments. Hellenism was influenced by Judaism, and for centuries Judaism had been deeply influenced by Hellenism not only in the Diaspora but also in Judea and Jerusalem. Practically from its earliest days the church of Jerusalem included Hellenists as well as Hebrews (Acts 6:1), and Paul, "Hebrew" as he declared himself to be, must have imbibed many of the Hellenistic elements in the cultural atmosphere of his day. The main features of Stoic belief were commonplace among thinking people; some technical terms of the mystery cults had become part of everyday language. Quotations from the great Greek poets came as naturally to the lips of Greek speakers as snatches of Shakespeare come to English speakers', often without the realization that they are Shakespearean. Some current ideas, as Paul's letters to Corinth and Colossae show, contained inchoate forms of what later became full-blown Gnosticism. To Paul this kind of *gnōsis* was of no account in comparison with *agápē* — "'knowledge' puffs up," he said, "but love builds up" (1 Cor. 8:1) — but he was perfectly willing to use its vocabulary in a "disinfected" sense if he could thereby establish the truth of the gospel more effectively (cf. H. Chadwick, *NTS*, 1 [1954/55], 261ff., esp. 272).

The day has gone by, however, when Paul could be regarded as the man who hellenized the gospel of Jesus and in so doing transformed it almost beyond recognition. Far and away the most powerful influence on his thinking up to the moment of his conversion was Judaism, and rabbinic Judaism at that. The truth of this can scarcely be contested since the publication in 1948 of W. D. Davies's *Paul and Rabbinic Judaism*; the evidence there is ample and conclusive. Other streams of Judaism no doubt exercised some influence on him; Colossians and Ephesians in particular show affinities of language with Jewish "nonconformity," whose significance must be a subject for further study (cf. K. G. Kuhn, *NTS*, 7 [1960/61], 334ff.). But what was destined to become the "main stream" was determinant for his outlook, as might be expected in Gamaliel's pupil.

Paul's main concern in the school of Gamaliel was to become as proficient as possible in the ancestral traditions of his people. He claimed indeed to have outstripped his contemporaries in the knowledge and practice of the Jewish religion (Gal. 1:14). The way of acceptance with God was obedience to the law — not only the written law with its 613 precepts but the oral tradition, transmitted by generations of rabbis and preserved by the School of Hillel, which interpreted those precepts and applied them in detail to every department of contemporary life. "As to righteousness under the law," according to his later, Christian assessment of this earlier stage of his life, he was "blameless" (Phil. 3:6), living "before God in all good conscience" (Acts 23:1). But for his conversion he might well have made his name as the greatest Pharisee of all time.

Almost certainly Paul was in Jerusalem during the last phase of Jesus' Palestinian ministry. Whether he ever set eyes on Jesus is impossible to know, but his attitude toward Him appears plainly enough in his violent opposition to the infant church of Jerusalem. He mentioned his persecution of the Church as the high-water mark of his zeal for the law (Phil. 3:6; cf. Gal. 1:13). To his mind this new movement threatened everything that he held dear. In particular, he found blasphemous the disciples' claim that the crucified Jesus — who, in the light of Dt. 21:23, had died under the curse of God — was Israel's Messiah.

Acts makes Paul's persecuting activity begin with the trial and execution of Stephen. When the men who had testified against Stephen laid aside their outer garments to take the initiative in stoning him, as the law required (Dt. 17:7), Paul guarded their clothes and thus gave practical proof of his approval of their action (Acts 7:58; 8:1).

PAUL THE APOSTLE

(Luke's narrative does not necessarily imply that Paul was a member of the Sanhedrin.) Since Stephen had been active in the Jerusalem synagogue, which Jews from Cilicia, among others, attended (6:9), it was probably Stephen's arguments that brought home to Paul the necessity of destroying this new movement, if his ancestral traditions were to survive. The temporizing course favored by his master Gamaliel (5:34ff.) was not what the situation demanded.

The Hellenists in the Jerusalem church were evidently the principal target of the persecution. They were forced to flee from Jerusalem or Judea across the provincial frontiers, and even there Paul endeavored to round them up. While he was on his way to the synagogues of Damascus with letters of extradition signed by the high priest, bent on arresting the disciples who had sought refuge in that city and bringing them back to Jerusalem for trial and punishment, he encountered the risen Jesus and was turned into the zealous champion of the faith that he had been trying to obliterate.

Nowhere is it suggested that while Paul was in full career as a persecutor he entertained any misgivings about the rightness of his course. The goads against which his kicking was useless (so the risen Christ warned him) were the stimuli that henceforth drove him in a direction exactly contrary to his previous one. Up to that moment he knew, or believed he knew, what the law required, and he fulfilled its requirements to the best of his understanding and ability. Once he became a believer in Christ, indeed, his former persecuting zeal appeared to him as the sin of sins in his life. "I am the least of the apostles, unfit to be called an apostle, because I persecuted the church of God. But by the grace of God I am what I am . . ." (1 Cor. 15:9f.). What he says of his fellow Jews in Rom. 10:2f. had been equally true of himself: "I bear them witness that they have a zeal for God, but it is not enlightened. For, being ignorant of the righteousness that comes from God, and seeking to establish their own, they did not submit to God's righteousness." But as long as he sought to establish his righteousness before God on the basis of the law, his conscience was clear, even — or rather, especially — amid his persecuting activity (see K. Stendahl, *HTR*, 56 [1963], 199ff.).

What is the relevance in this connection of the debated passage in Rom. 7:7-25? The autobiographical interpretation of the passage has become unfashionable, largely in consequence of W. G. Kümmel's study *Römer 7 und die Bekehrung des Paulus* (1929), to a point where it is described as "now relegated to the museum of exegetical absurdities" (P. Démann, cited in F. J. Leenhardt, comm. on Romans [Eng. tr. 1961], p. 181; cf. Munck, pp. 11f.).

The passage falls into two parts: vv. 7-13, which are in the past tense, and vv. 14-25, which are in the present. In the former part, which is more relevant here, Paul retold the story of the fall; but in doing so he told his own story: "here Paul's autobiography is the biography of Everyman" (T. W. Manson, in *Peake's Comm. on the Bible* [rev. ed. 1962], p. 945). He would not have used the first-person singular had he not recognized the fall as an authentic description of his own history as well as of the history of mankind. In this sense at least he knew himself to be "the Adam of his own soul" (2 Bar. 54:19), beguiled into covetousness by sin, which used as its weapon of assault the very commandment that forbids covetousness. But one must remember that this is Paul's *Christian* diagnosis of an early crisis in his life, which did not appear to him in the same light at the time that he experienced it. Whatever that time may have been — possibly his bar mitzvah initiation — the youthful Paul had learned to come to terms with the law and kept it without blame and with a conscience void of offense. "The true meaning of sin was not discovered at the feet of Gamaliel but at the foot of the cross" (E. K. Lee, *A Study in Romans* [1962], p. 27).

C. Paul Begins to Be a Christian. Paul's conversion was followed almost immediately by his call to be Christ's apostle to the Gentiles. Although this call may have been communicated to him in part by Ananias of Damascus, a private believer like Ananias could have been no more than the mouthpiece of the risen Lord. Paul knew and maintained thenceforth that his apostolic commission came from the risen Lord whom he had seen on the Damascus road, without the mediation of the Jerusalem apostles.

Paul's own account of the matter suggests that he lost no time in beginning to discharge his commission. Some time, however, must be allowed for him to have come to terms with his new situation. When the law was suddenly dislodged from its central position in his thought and life, all the elements in his thinking that had taken their appropriate place in relation to the law were shaken apart, but they quickly came together in a new pattern around the new center of Paul's thought and life, Christ. The arguments that Paul had formerly regarded as conclusive against the truth of the disciples' claims had to be related to the fact, no longer to be doubted, that these claims were true. Jesus' dying the death on which the divine curse rested no longer meant that He could not be the Messiah but instead had to be related to His *being* the Messiah. The solution stated in Gal. 3:13, "Christ redeemed us from the curse of the law, having become a curse for us," must have commended itself to Paul early in his inward readjustment to the revelation that he had received.

What precise form of eschatological expectation Paul had been brought up to hold must be a matter for inference; most probably he had been taught that the present age would be separated from the age to come (the resurrection age) by the "days of the Messiah." If so, this expectation required to be modified in one most material particular, for the Messiah, as he realized, had already come. The death and resurrection of Jesus had inaugurated the "days of the Messiah," for He was now enthroned in glory, exercising His messianic reign until all His enemies were subdued. He would annihilate the last enemy of all, death, at the final resurrection (1 Cor. 15:26). The people of the Messiah would then be introduced into the heritage of glory that lay in store for them. This glory would be a sharing in His glory, and as His glory was the sequel to His sufferings, so for them — and not least for Paul himself (Col. 1:24) — sharing in His sufferings on earth was the indispensable prelude to sharing His glory hereafter (Rom. 8:17).

For the present, on earth, Christians live in hope, but this hope is a living hope because the presence of Christ is made real to them by His indwelling Spirit. The Spirit keeps the hope of glory alive within them; He is the pledge of resurrection; He aids their prayer life; He cooperates in all things for good with those who love God; He imparts to them the power to live as befits the people of Christ, liberating them from the law of sin and death that dominates the children of the present age (Rom. 8:1-28). Moreover, He unites them to Christ; in this one Spirit they have all been baptized into one body, so that Christ's eternal life lives in them and they live in Him (Rom. 6:4; 1 Cor. 12:13; Gal. 3:27).

Over and above all that, those who are "in Christ Jesus" face the prospect of the judgment day with confidence, because they have already been justified by faith in Him. "If the days of the Messiah have commenced, those of the Torah came to their close. On the other hand, if the

PAUL THE APOSTLE

Law, the Torah, still retained its validity, it was proclaimed thereby that the Messiah still had not appeared" (L. Baeck, *JJS*, 3 [1952], 93ff., esp. 106). Therefore "Christ is the end of the law, that every one who has faith may be justified" (Rom. 10:4), and a return to the principle of justification by the works of the law, such as provoked the Epistle to the Galatians, is tantamount to a denial that Jesus is the Messiah (hence the "anathema" of Gal. 1:8f.).

Paul probably had to continue readjusting his thinking to the implications of the Messiah's having come in Jesus during his sojourn in "Arabia," to which he departed soon after his conversion (Gal. 1:17). But his own implication is that he went to Arabia to proclaim Christ. The Arabia to which one would go from Damascus was the Nabatean kingdom, stretching along the eastern frontier of the Roman sphere of influence from Damascus S to the Gulf of Aqabah. A suggestion that Paul's visit to that territory was not devoted entirely to quiet contemplation is the hostile interest that the Nabatean king Aretas IV (9 B.C.–A.D. 40), or at least his representative in Damascus, took in him when he returned to that city (2 Cor. 11:32f.).

Not until the third year after his conversion did Paul revisit Jerusalem. He went there, he said, "to visit Cephas [Peter]," and spent a fortnight with him. The only other "apostle" whom he met then was James the Just, the Lord's brother (Gal. 1:18f.). The verb that Paul used of his visiting Peter is interesting: "I went up," he said, "*historēsai Kēphan*" — "to get to know Cephas" (NEB), and not only to get to know the man himself, but to get to know things that Peter was specially competent to impart. For all Paul's insistence on his independence of the Jerusalem apostles, he recognized Peter as a prime informant on matters about which it was important that he become well informed — the facts about Jesus, the *parádosis* or deposit of teaching that derived its authority from Him, the "tradition" about which Paul could later say to his converts: "I received from the Lord what I also delivered to you" (1 Cor. 11:23). Peter could obviously impart to Paul much information — more than James could, since James had not been a disciple of Jesus during His ministry — but one thing, Paul insisted, Peter did not and could not impart to him, and that was apostolic authority.

Paul must have distinguished in his mind between the sense in which the gospel came to him "through a revelation of Jesus Christ" — the sense in which, he said, "I did not receive it from man, nor was I taught it" (Gal. 1:12) — and the sense in which it was something that he had "received" (1 Cor. 15:3). His gospel was indeed both "revealed" and "received" (cf. O. Cullmann, *Early Church* [Eng. tr. 1956], pp. 59ff.), but sometimes the apologetic or polemic requirements of the moment made him emphasize one aspect to the practical exclusion of the other.

Paul himself, if asked to elucidate the distinction between the two aspects, would probably have said that the core of the gospel, "Jesus Christ the risen Lord," was imparted to him directly on the Damascus road, when God, as he said, "was pleased to reveal his Son in me" (Gal. 1:16). Although he knew others who were in Christ before him (Rom. 16:7), including some who were apostles before him (Gal. 1:17), he did not learn the gospel from them. But the historical details of the teaching of Jesus, the incidents of Holy Week, the resurrection appearances, and the like were related to him by those with experience of them.

The summary of resurrection appearances in 1 Cor. 15:5ff. (excluding that to Paul himself) falls into two series: (1) to Peter, to the Twelve, and to over five hundred at one time; (2) to James, to all the apostles. Each series goes back in all probability to the testimony of the man whose name introduces it; i.e., Paul received this information from Peter and James, almost certainly during his fortnight in Jerusalem in the third year after his conversion, when he met them both.

But if he preached the gospel before he received this information from Peter and James, what did he preach? On the basis of his knowledge of the OT interpreted in the light of his Damascus-road experience, he was able to proclaim Jesus Christ the risen Lord without any delay. This explanation agrees with Luke's account that Paul "for several days" after his conversion "was with the disciples at Damascus; and in the synagogues immediately he proclaimed Jesus, saying, 'He is the Son of God'" (Acts 9:19f.). After his interview with Peter and James, however, he was able to fill in further details, delivering to others what he himself had received.

D. Paul and Barnabas. After visiting Jerusalem Paul returned to his native Cilicia, and there he disappeared from NT records for some years. They were not idle years, for the news kept reaching the ears of the disciples in Judea that their former persecutor was propagating the faith that he had once attempted to destroy (Gal. 1:23). To this period (*ca.* A.D. 42) belong the ecstatic experience described in 2 Cor. 12:2ff., which left its mark on Paul forever afterward, and at least some of the five beatings inflicted on him by synagogue authorities (11:24).

The most acute phase of the inward struggle so vividly portrayed in the present tense in Rom. 7:14-25 likely occurred in this period, too. The autobiographical reference of this passage, as of the seven verses that precede it, has been questioned; however, the poignant description of someone who loves the law of God and longs to do it but is forced by a stronger power than his own to do things that he detests is surely no "abstract argument but the echo of the personal experience of an anguished soul" (M. Goguel, *Birth of Christianity* [Eng. tr. 1953], pp. 213f.). This description is a more vivid version of Gal. 5:17, "The desires of the flesh are against the Spirit, and the desires of the Spirit are against the flesh; for these are opposed to each other, to prevent you from doing what you would." The man who disciplined his body lest he be disqualified himself after acting as herald to others (1 Cor. 9:27) had no undue confidence in himself. One can well believe that a man of Paul's imperious zeal found it no easy matter to "crucify the flesh" and to win the victory over a hasty tongue, a premature judgment, a feeling of resentment at any encroachment by others on the sphere of his own apostolic service. In later years he could entreat his friends "by the meekness and gentleness of Christ" (2 Cor. 10:1), but this meekness and gentleness did not come to him naturally. The man who pressed on to the goal of God's upward calling in Christ Jesus (Phil. 3:14) knew that the run for the immortal garland was "not without dust and heat." Paul was too fond of portraying the way of holiness as a race to be run, a battle to be fought, for one to suppose that victory came to him suddenly. The tension could never be completely resolved while he lived simultaneously in the present age and in the age to come (as every Christian must do in this overlapping interval "between the times"), but he learned that victory was his when he ceased to fight the battle in his own strength and relied upon the liberating "law of the Spirit of life in Christ Jesus" (Rom. 8:2).

This obscure phase of Paul's Christian career ended *ca.* A.D. 45 when Barnabas fetched him from Tarsus to join him in the care of the young church of Syrian Antioch, where a group of Hellenistic believers had some time previously embarked on an extensive program of gentile evangelization (Acts 11:19-26). Such an evangelistic and teaching

PAUL THE APOSTLE

ministry among Gentiles was the very kind of work to which Paul knew himself called, and he took his place with Barnabas and other colleagues in this congenial task.

About 46 the Antiochene Christians charged him and Barnabas to convey a gift to their Jerusalem brethren at a time when Judea was hard hit by famine (Acts 11:27-30). Probably on this occasion the two of them had the meeting with the leaders of the Jerusalem church recorded in Gal. 2:1-10. (This meeting has often been identified with the Council of Jerusalem described in Acts 15, but the two narratives have very little in common, apart from the identity of the protagonists on both occasions. *See* APOSTOLIC COUNCIL.) Paul dated this meeting "after fourteen years" (Gal. 2:1), which might mean the fourteenth year after his Jerusalem visit of 1:18 but more probably the fourteenth year after his conversion. The interview with the Jerusalem leaders — James, Peter, and John (and it is noteworthy that now James heads the list) — was held in private, and, said Paul, "I laid before them . . . the gospel which I preach among the Gentiles, lest somehow I should be running or had run in vain" (2:2).

This is an extraordinary admission, on the face of it; Paul seemed to agree that without the recognition or at least the fellowship of the Jerusalem leaders his apostolic service would be fruitless. Evidently, while his commission was not derived from Jerusalem, it could not be discharged effectively except in fellowship with Jerusalem.

One reason for this attitude was surely Paul's horror of schism. If a complete cleavage took place between the Jerusalem church and the gentile mission Christ would be divided, and His cause, divided against itself, would come to grief. All the energy that Paul had devoted, and hoped to devote, to gentile evangelization would be in vain if the apostolate to the circumcision and that to the uncircumcision did not recognize each other.

All went well at this interview, however. The Jerusalem "pillars" acknowledged that Barnabas and Paul had been called by God to evangelize Gentiles as truly as they themselves had been called to the Jewish apostolate, and the two sides shook hands in joint recognition of their respective spheres of labor.

Nothing was said about circumcision on this occasion, Paul declared, although the opportunity to raise that question was present: Barnabas and he were accompanied by Titus, a young gentile Christian from Antioch. Circumcision became a live issue only later, at the Council of Jerusalem.

All that the Jerusalem leaders asked Barnabas and Paul to do was to continue to remember "the poor" of the mother church. Paul, who had already been active in this regard, treated this as a serious moral obligation throughout his ministry.

Shortly after their return to Antioch Barnabas and Paul were sent by its church, in response to a prophetic utterance, to evangelize the areas to the west and northwest — more particularly, the island of Cyprus and the southern part of the Roman province of Galatia in central Asia Minor. There they preached the gospel and planted churches, among which those of Pisidian Antioch, Iconium, Lystra, and Derbe are mentioned by name (Acts 13:14–14:23). This work was an extension of their mission in Syrian Antioch, which remained their home base at this stage, and they reported to the church of Syrian Antioch the progress of their mission when they returned.

It was probably this unforeseen extension of the gentile mission that caused some of the more conservative believers in Judea to insist that gentile converts be circumcised and accept the attendant obligation to keep the Jewish law. The prospect of a decisive gentile majority in the church filled them with serious and not unnatural misgivings. Accordingly some of them visited Syrian Antioch and her newly founded daughter churches to press their views.

When a deputation of these people first visited Antioch, Peter was temporarily living there. Paul described what happened in Gal. 2:11-14. One of them, an envoy from James, appears to have told Peter that his practice of eating at the same table as gentile Christians in Antioch was an embarrassment to his colleagues in Jerusalem; Peter, probably from motives of conciliation, desisted from this practice, at least for a time. Paul reacted sharply because he saw that Peter's action would be interpreted to mean that uncircumcised gentile believers were at best second-class Christians, even if it did not compromise the gospel principle of salvation by grace. This principle was certainly in danger of being compromised in the churches of south Galatia, where Paul's converts were disposed to listen to those who insisted on circumcision (in addition to faith in Christ) as necessary for membership in the saved community. In Paul's eyes any such addition to the gospel message deprived it of its gospel character.

The dispute had to be settled "at the highest level," and Barnabas and Paul led a deputation from the church of Antioch to discuss the matter with the apostles and elders at Jerusalem. James, who summed up the debate, gave his judgment that no conditions were to be imposed on Gentiles as necessary for salvation beyond the condition of faith in Christ, with which God had clearly shown Himself to be satisfied. But when this question of principle had been settled, there remained the practical problem of making the day-to-day fellowship between Jewish and gentile converts in mixed communities as unencumbered as possible. At James's insistence, the letter sent from the Council to the church of Antioch and her daughter churches included a ruling that gentile Christians should abstain from certain kinds of food that their Jewish brethren would find offensive, and conform to the Jewish marriage laws.

These requirements contained nothing per se to which Paul would have objected, for where basic principles were not compromised he was the most conciliatory of persons, and he repeatedly inculcated the Christian duty of respecting the scruples of others in such matters (cf. Rom. 14:1ff.; 1 Cor. 8:1ff.). Admittedly he never appealed to the Jerusalem decrees when dealing with such subjects in his letters. For one reason, the letter from Jerusalem was addressed "to brethren who are of the Gentiles in Antioch and Syria and Cilicia" (Acts 15:23), and even if these terms could be stretched to include the south Galatian daughter churches of Antioch, Paul's letter to those churches may have been written before the Council of Jerusalem. For another reason, Paul was not disposed to support his injunctions to his gentile churches by appealing to the authority of a document issued by Jerusalem, especially since Christians from Jerusalem and Judea constantly and, indeed, increasingly invaded his gentile mission field and attempted to undermine his apostolic authority in the eyes of his converts. This put it out of the question for Paul even to appear to be subject to the authority of Jerusalem.

E. Paul in Macedonia and Greece. Shortly after the Council of Jerusalem Paul parted company with Barnabas and no longer made Syrian Antioch his missionary base. According to Luke, the parting between him and Barnabas was due to their failure to agree whether to take Mark, Barnabas's cousin, with them on a further visit to the recently founded churches of Asia Minor. Mark had set out with them on their previous journey to Cyprus and Asia Minor but had left them in the course of the journey and had returned to Jerusalem. It could also be suggested that Barnabas's following of Peter's example when the

PAUL THE APOSTLE

latter withdrew from table fellowship with gentile Christians at Antioch (Gal. 2:13) was partly responsible for this decision to part company; but Paul's subsequent references to Barnabas (cf. 1 Cor. 9:6) do not suggest any permanent breach of friendship, although there was no further collaboration between the two.

With Silas (Silvanus), a like-minded member of the Jerusalem church who appears to have been a Roman citizen like Paul himself, Paul revisited the churches of south Galatia. The westward way to Ephesus, which apparently they had hoped to take, was barred to them, so, turning north and northwest, they reached the Aegean coast at Troas and crossed the sea to Neapolis in Macedonia. By this time they had two further companions — Timothy, a young convert of Lystra, who was henceforth Paul's faithful lieutenant, and Luke, the gentile physician of Antioch, who modestly indicates his presence with Paul and the others at this stage by using the pronoun "we" instead of "they" in his narrative (Acts 16:10-17).

After landing in Macedonia they made short stays in Philippi and in Thessalonica, the capital of the province. Churches were quickly planted in both cities, and these continued to thrive, although the missionaries, and particularly Paul, were compelled to leave sooner than they wished. In Philippi he and Silas were accused before the Roman magistrates (Philippi being a Roman colony) of interference with citizens' property rights; this was one of the occasions on which Paul (as well as Silas) appealed to his Roman citizenship. In Thessalonica the charge against him and his companions was more serious. The Thessalonian citizens who had given hospitality to Paul were brought before the politarchs and charged with harboring the men who had "turned the world upside down," flouted Caesar's decrees, and proclaimed a rival emperor, one Jesus (Acts 17:6f.). The wording of the accusation, as Luke recorded it, suggests that subversive characters had been active elsewhere among the Jewish communities of the empire, and Paul and his companions were represented as being of their number. Paul's friends took him out of Thessalonica quickly for his own safety — and theirs. The accusation was a most serious one, and the politarchs could not afford to treat it lightly. Apart from its special mention of Jesus, the language of the accusation fits very well into the general picture of movements within the Judaism of the day, more or less "messianic" in character, that constituted a threat to public order in places with Jewish communities, and that were deplored and denounced by those responsible Jews who knew the importance of maintaining acceptable relations with Rome. Paul the Roman citizen was certainly as appreciative of the *pax Romana* as any of those Jews, but it could not be denied that his apostolic progress from city to city was usually attended by public disturbances, which could easily be turned to his detriment.

Paul's two letters to the Thessalonian church, which were written only a few weeks or at most months after his departure from their city, bear witness to an intense eschatological excitement among the Christians there, and perhaps among the Jews also. In both Epistles Paul found it necessary to insist on a more sober outlook on the last things and pointed out that certain events precede the day of the Lord: "That day will not come, unless the rebellion comes first, and the man of lawlessness is revealed, the son of perdition, who opposes and exalts himself against every so-called god or object of worship, so that he takes his seat in the temple of God, proclaiming himself to be God. Do you not remember that when I was still with you I told you this? And you know what is restraining him now so that he may be revealed in his time. For the mystery of lawlessness is already at work; only he who now restrains it will do so until he is out of the way" (2 Thess. 2:3-7).

The life-setting and meaning of these words can be quite reasonably stated thus. The personal "abomination of desolation, standing where he ought not," foretold by Jesus in Mk. 13:14, must have appeared to many to be on the point of emerging ten years before Paul wrote, when the emperor Gaius in A.D. 40 ordered the erection of his image in the Jerusalem temple. This order was canceled just in time, but the terror and anxiety of those days left an abiding impression on Jews and Christians alike and colored their views of what would happen when the antichrist did in fact arise. When Paul visited Thessalonica *ca.* 50 he told his converts there about the coming day when lawlessness would manifest itself in all its evil, incarnated in "the man of lawlessness" who would go so far as to enthrone himself in the temple of God and claim divine honors beyond those paid to anyone or anything else. The quoted passage repeats this teaching and adds that the day of the Lord will not come until the antichrist appears to lead the great eschatological rebellion against God. At present the forces of lawlessness and anarchy are already active beneath the surface, but a restraining power prevents them from breaking forth. One day, however, this restraining power will be removed, and those evil forces will riot unchecked.

Paul told his readers that they knew what this restraining power actually is; perhaps he had already told them by word of mouth. The context suggests that at that time imperial law and order were a check on the turbulent forces always threatening to break loose. This identification is further suggested by the fact that the restraining power is referred to both by the neuter article and participle *tó katéchon*, "what is restraining [him]" (2 Thess. 2:6), and by the masculine article and participle *ho katéchōn*, "he who [now] restrains [it]" (v. 7). The imperial power was embodied in the emperor and could thus be described in personal as well as in impersonal terms. This too could explain the very guarded hints at the restrainer's identity. To speak openly in a letter about the coming removal of the imperial power or of the emperor himself would have been impolitic; in view of the charges of seditious activity recently pressed against Paul and his friends in Thessalonica, the consequences for the Thessalonian Christians would have been serious if a letter that seemed to support these charges fell into the wrong hands. But if another interpretation is adopted — e.g., O. Cullmann's and J. Munck's suggestion that Paul was referring to himself and his own apostolic ministry as the restraining agency — there is no obvious reason why Paul should not have stated his meaning plainly.

From Thessalonica Paul went to Beroea in Thessaly, and when similar trouble threatened to break out there, he was sent by sea to Athens. There he waited for his companions Silas and Timothy to rejoin him. (Luke apparently remained in Philippi.) The apologia before the Athenian Areopagus that Luke ascribed to him (Acts 17:22-31) has frequently been adjudged to be un-Pauline because it teaches a "God-mysticism" instead of the Pauline "Christ-mysticism" (A. Schweitzer, *Mysticism of Paul the Apostle*, pp. 6ff.; cf. M. Dibelius, *Studies in the Acts of the Apostles*, pp. 26ff.). But the address was delivered to pagans, not to Christians, and Paul knew well enough that in building a bridge between his hearers and himself he must start building at their end, not at his own. The *Areopagitica*'s appeal to the revelation of God in creation and providence and its criticism of idolatry are essentially the same as those in the early part of Romans, when the different audiences are borne in mind; in both echoes of the book

PAUL THE APOSTLE

of Wisdom may be detected. As expounded in the speech, the creative power of God, His care for His creatures, and His independence of them but their entire dependence on Him are firmly rooted in the OT. Paul's mind was too comprehensive and versatile for one to suppose that he must continually harp on one string; he is greater than all the Paulinisms.

But Athens was only a temporary halting-place; after a few days Paul moved on to Corinth, a busy seaport and chief city of the province of Achaia. There for the first time since leaving Antioch he found a base where he could stay for a considerable time and both plant and consolidate a center of Christian witness. Some months after his arrival in Corinth an attempt was made to restrain him; the leaders of the Jewish community of Corinth accused him before Gallio proconsul of Achaia of "persuading men to worship God contrary to the law" (Acts 18:13). The charge, as reported by Luke, is ambiguous; which law — Jewish or Roman — was Paul accused of breaking? It is more likely that he was accused of breaking Roman law. Gallio on dismissing the case told the prosecutors that he did not want to be a judge in questions of Jewish law, but they would have known that already. Their hope lay in convincing him that Paul's activity constituted a contravention of Roman law, which it was Gallio's business to maintain. They charged Paul with propagating an illegal religion — the implication being that what he was preaching was certainly not Judaism, which enjoyed the recognition and protection of imperial law except when its practice or propagation endangered public order.

Gallio, however, summed up the situation quickly; to him Paul was a Jew like his accusers and spoke the same sort of language as they did. Any differences between Paul and them concerned interpretations of Jewish law and religion, and it was no part of Gallio's responsibility to pronounce judgment on such questions. If public order had been endangered, if crime or misdemeanor had been involved, he would certainly have taken the matter up, he said. He had the prosecutors ejected from the court and turned a blind eye when bystanders mobbed the ruler of the synagogue.

Gallio's ruling, which in effect extended to Christianity the freedom that Judaism enjoyed under Roman law, probably created a precedent for other magistrates and allowed Paul to prosecute his apostolic mission with the assurance of the benevolent neutrality of the imperial authorities for several years to come. Certainly if Gallio had ruled against Paul, this verdict would have been invoked by Paul's opponents for the rest of his life; a precedent established by so exalted and influential a magistrate would have carried great weight. Gallio's ruling may also have confirmed Paul's good opinion of Roman justice and influenced Paul's very positive attitude in Rom. 13:1-7 toward "the powers that be" as "ministers of God" — not to speak of its influencing his later decision to appeal to Caesar.

Gallio's ruling encouraged Paul to continue in Corinth; in all he spent eighteen months there, until the spring of A.D. 52. By that time there was a large and gifted, if volatile, church in Corinth, consisting mostly of converts from paganism whose earlier life had accorded with the moral laxity for which their city was notorious in that day. Paul was faced with the practical problem of deciding on the best means of teaching such people the Christian way of life.

Many of his fellow Christians and critics in Jerusalem would have assured him that his only wise course was to impose the Jewish law on these converts as a fundamental condition of their acknowledgment as Christians. But Paul had learned in his own experience that all the law-keeping in the world could never bring assurance of salvation and peace with God — and he knew more about law-keeping than most of his critics did. But the moment that he surrendered his life to Christ, he knew that he had found the true way of salvation and peace. And he contended that when persons yielded themselves to the living Christ and the power of His Spirit, their inward beings were so changed that from that time forth they would spontaneously fulfil "the just requirement of the law" (Rom. 8:4) and produce "the fruit of the Spirit" (Gal. 5:22f.).

Many Christians thought that Paul was being impossibly optimistic. This conception, they said, might work all right with people who already had a stable moral foundation, but how could it work with a crowd of immoral pagans such as had been swept into church fellowship in Corinth and similar places? Paul maintained that it could work, even among people whose background and environment were so unpromising; in the long run Paul's way was vindicated. But at the time many of his friends (not to speak of his opponents) seriously thought that his course of action was weakening the ethical standards of the gospel. In justification of their criticism they could point to moral lapses among Paul's converts.

Paul deplored these lapses more than anyone else, for he knew that his apostolic reputation was bound up with his converts' behavior — his apostolic reputation not so much in the eyes of men as in the sight of God. Repeatedly he told his converts that he could look forward with confidence to the day when he must give an account of his stewardship before the tribunal of Christ only if they stood firm in their faith and proved the genuineness of their Christianity by the quality of their lives. But he treated them as mature children of God; instead of imposing a code of rules on them he set before them the perfect standard of Christ — Christ being not merely an external example but being reproduced within them by the power of the Spirit. This standard, which Paul called "the law of Christ" (1 Cor. 9:21; Gal. 6:2), is a law written in human hearts and not on stone or parchment. It is a law that forbids Christians to live irregular lives, to quarrel with one another, to interfere in other people's business, to live at other people's expense when they are perfectly able to earn their own living. But it is not in essence a negative law; it is the positive law of Christian love. Jesus had not only summed up the OT law in the two great commandments of love to God and love to one's neighbor; His whole life had embodied this law of love and had provided His followers with a standard for their own emulation. If then the power of the indwelling Spirit of God reproduces the character of Christ in the lives of His people, they will spontaneously follow the law of love. This was Paul's ambition for his converts.

It was no easy way that he chose, but it was the noblest way, and he never doubted that it was the only right way for men and women who had come of age spiritually through faith in Christ. It was a way that brought him repeated disappointment, as his converts failed to respond to "the upward call of God in Christ Jesus" (Phil. 3:14), but it never brought him disillusionment. His many disappointments were more than matched by the readiness with which the majority of his converts — even those newly liberated from idolatry — embraced his teaching and exhibited the law of Christ in their lives, which shone like bright lights in the surrounding darkness.

Paul's task was rendered the more difficult because he had to wage war on two fronts: against those who thought that the gospel emancipated them from all ethical conventions, and against those who (partly, no doubt, by way of reaction to the former) went to the opposite extreme

PAUL THE APOSTLE

and tried in the name of Christianity to set up taboos against marriage, against animal food, and so forth. Thus while Paul was doing all he could to restrain those who misinterpreted Christian liberty to mean license to do anything they chose, he was obliged to deal firmly with those who wanted to introduce a new set of prohibitions that would have banished Christian liberty altogether. This double struggle must be borne in mind if one is to understand the arguments he employed now on this side and now on that. He went as far as he could with both sides, until the point came where he had to stand fast and vindicate the principles of the gospel. He agreed with much that the libertarians said about Christian freedom but reminded them of its attendant responsibilities. He agreed with much that the ascetic party said about self-denial — he himself practiced self-denial far beyond what they did — but he insisted that self-denial must be a voluntary discipline, not to be imposed on others against their will, and not to be imposed on oneself in a spirit of legalism or with the idea of acquiring special merit in God's sight. To the one group he said, "Liberty, not license"; to the other he said, "Liberty, not bondage." Christians living in a non-Christian environment were to remember that the public reputation of Christianity, and indeed of Christ Himself, depended on their behavior. But there was an even higher incentive; they were to remember above all that they were called to please Christ. To win Christ's approval mattered supremely for Paul in his own life, and he was eager that it should matter supremely in theirs. To this end, then, he gave them every encouragement.

For the rest, Paul's policy was to preach the gospel and plant churches in important centers like Corinth and along the main lines of imperial communication in the provinces that he evangelized. He had no time to do more if he was to accomplish his task, which was at this stage in his ministry the evangelization of the Aegean lands and after that the evangelization of the rest of the Mediterranean world, insofar as others had not already preached the gospel there. He knew that "the gospel must first be preached to all nations" (Mk. 13:10) before the Parousia could be expected. This was sufficient reason for magnifying his office as apostle to the Gentiles, but his gentile apostleship had this further importance in his eyes, that it would pave the way for the turning of his fellow Israelites to Christ — a consummation (perhaps, as he thought, coincident with the Parousia) for which he longed and prayed unceasingly (Rom. 9:1ff.; 10:1; 11:13ff.).

F. Paul Completes His Aegean Ministry. Leaving Corinth in the spring of A.D. 52, Paul paid a brief visit to Palestine and then traveled overland to Ephesus, chief city of the province of Asia, which he made his base for the next phase of his activity, lasting nearly three years (Acts 20:31). There with a number of helpers he preached and taught so assiduously that "all the residents of Asia heard the word of the Lord, both Jews and Greeks" (19:10). The church in the province of Asia, in fact, endured without a break from those years until the disruptive exchange of populations between Turkey and Greece in A.D. 1923.

Some disciples of Jesus had indeed settled in Ephesus before Paul's arrival there — representatives of another stream of Christian advance than those whose progress is recorded in Acts. But it was with Paul's arrival that the Christianization of the province began in earnest.

For all the success of his work, he had many obstacles to overcome. The riot in the Ephesian theater (Acts 19:23ff.; *see* Plate 60) illustrates how commercial interests were liable to be affected by new religious movements; there was opposition from the local Jewish community (20:19). In short, as Paul himself put it, the city presented "a wide door for effective work" together with "many adversaries" (1 Cor. 16:9). Some of those adversaries offered more serious threats to Paul's liberty, and even to his life, than might be gathered from a cursory reading of Acts and the Epistles. Of the many imprisonments to which he alluded in 2 Cor. 11:23 (written toward the end of his Ephesian ministry) one at least was probably endured in Ephesus. The cryptic reference in 1 Cor. 15:32 to his having "fought with wild beasts at Ephesus" suggests some deadly peril; he mentioned another deadly peril in 2 Cor. 1:8ff.

What these deadly perils were cannot be known with certainty. One attractive suggestion is that Paul may have somehow been jeopardized by the events attendant on the assassination of Marcus Junius Silanus proconsul of Asia. Nero's mother Agrippina had plotted this death shortly after Nero's accession to the imperial throne in October, 54 (cf. Duncan, *St. Paul's Ephesian Ministry,* pp. 102ff.). Certainly the language of 2 Cor. 1:8ff. implies more than a nearly fatal illness. Quite possibly, as C. H. Dodd argued (*NT Studies,* pp. 80ff.), this experience marked a spiritual watershed in Paul's Christian experience, but it cannot safely be made a criterion for dating his Epistles on one or the other side of the watershed.

In addition to such external troubles, Paul bore as a daily weight his "anxiety for all the churches" (2 Cor. 11:28). His Corinthian correspondence, which belongs to this period, provides sufficient commentary on these words. After Paul had left Corinth there was a deliberate campaign there to subvert his authority by belittling his apostolic status. Paul, it was well known, had not been one of Jesus' companions during His Palestinian ministry but claimed to have been commissioned later, in a vision. Some belittlers of Paul's apostleship compared his status unfavorably with other apostles', particularly Peter's. Whether Peter himself ever visited Corinth or even knew that some church members there had formed a party claiming his leadership cannot be inferred with certainty from Paul's references to those Corinthian Christians who said, "I belong to Peter" (1 Cor. 1:12). But if Peter did know or approve of their party in any measure, Paul could regard it as a breach of the agreement that he and Barnabas had reached with Peter and the other "pillars" at Jerusalem. Those who claimed to act in Peter's name at Corinth represented themselves as building on the foundation that Paul had laid (3:10ff.). There was a way of doing this that Paul did not resent; he seems to have been quite happy about Apollos's activity at Corinth after his own departure, although he deprecated the tendency to make Apollos a party leader, just as he refused to be regarded as a party leader himself. But the Petrine party, in claiming to build on Paul's foundation, did so in a manner that disparaged Paul's work. Although they did not follow the cruder methods used by the Judaizers earlier in the churches of Galatia, immediately pressing on gentile Christians the necessity of circumcision and the other requirements of the Jewish law, Paul perhaps regarded their activity as accordingly all the more dangerous. How careful Paul himself was not to "build on another man's foundation" (Rom. 15:20) may be seen from the delicacy of his approach in Romans, where he wrote to a Christian community he had no part in forming.

After his departure from Ephesus in the summer of 55 Paul spent some time revisiting the churches of Macedonia and Achaia. This stage of his activity is not narrated in detail; an indication that it was more extensive than Acts 20:1-3 might lead one to suppose is his statement in Rom. 15:19 that he had preached the gospel as far west as Illyricum — the Roman province bordering the eastern shore of the Adriatic Sea, NW of Macedonia. The interval

following his Ephesian ministry is the only one into which a visit to Illyricum can be fitted. Besides, the context in which Paul mentioned the visit implies that it was the latest episode in his missionary activity at the time of writing — *ca.* early 57.

One reason that Paul wrote to the Roman Christians then was to prepare them for a visit that he hoped shortly to pay them. But he told them that before he could set out for Rome he had to discharge a commission in Jerusalem — the delivery to the Christians there of a monetary contribution that he had been organizing in the churches of his gentile mission field for three or four years (Rom. 15:25ff.; cf. 1 Cor. 16:1ff.; 2 Cor. 8:1ff.).

This "ministry" to Jerusalem was part of Paul's overall apostolic program; in addition, some ten years earlier the Jerusalem leaders had requested Barnabas and Paul, as they ministered to the Gentiles, not to forget "the poor" (Gal. 2:10) — a term that became practically synonymous with the believing community in Jerusalem (cf. the later Jewish-Christian community of Ebionites, from the Heb. *'ebyôn*, "poor").

This contribution was a means of bringing home to the gentile Christians their indebtedness to Jerusalem. Since the gospel had come to them from there, it was a small return on their part to contribute to the material needs of the mother church of Christendom. Moreover, Paul regarded the gift as a means of strengthening the fellowship that ought to be maintained between Jerusalem and the gentile churches. He knew that many members of the Jerusalem church looked with suspicion on his gentile mission, while some went so far as to try to win his converts over to a conception of Christian faith and life more in keeping with that held by the rank and file of the Jerusalem disciples. What Paul thought and felt about the activities of such people is evident from his onslaught against them in 2 Cor. 11:13 as workers of deceit who masqueraded as apostles of Christ. But he could not tolerate the idea of a permanent cleavage between Jerusalem and the gentile churches. Anything of this kind would be a disaster for the cause of Christ in the world, and he set himself to overcome it by a generous gesture of brotherly love.

One may wonder, indeed, if Paul and the Jerusalem leaders understood the contribution in the same light. For Paul it was a spontaneous gesture of brotherly love, a token of grateful response by his converts to the divine grace which had brought them salvation. But in the eyes of the elders of the Jerusalem church it might have been a form of tribute, a duty owed by the daughter churches to their mother, comparable to the half-shekel that Jews throughout the world paid annually to maintain the Jerusalem temple.

In Paul's eyes, however, it was something more even than a grateful gesture by the gentile churches or a means of strengthening the fellowship between them and Jerusalem. It was the climax of his own ministry in the eastern Mediterranean and an act of worship and dedication to God before he set out for the western Mediterranean. It was the outward and visible sign of the "offering up of the Gentiles" that crowned his priestly service as Christ's apostle among them (Rom. 15:16). For this reason he attached great importance to his accompanying the delegates who were to carry their churches' gifts to Jerusalem and there to present this offering to God, perhaps by an act of worship at the very place in the temple where once Christ had appeared to him and sent him "far away to the Gentiles" (Acts 22:21). Then, and not till then, would he be ready to set out for Rome.

G. Paul Comes to Rome. According to Luke, Paul's plan to visit Rome was formulated toward the end of his Ephesian ministry: "Paul resolved in the Spirit to pass through Macedonia and Achaia, saying, 'After I have been there, I must also see Rome'" (Acts 19:21). The reason for Paul's plan appears clearly enough from his letter to the Romans, where he told the Roman Christians that he had completed his apostolic task in the Aegean lands and hoped to repeat in Spain what he had done in Macedonia and Achaia, Galatia and Asia. His settled policy of preaching Christ where the gospel had not previously been heard, his unwillingness to "build on another man's foundation," ruled out most of the other Mediterranean lands as areas for his further apostolic activity. But evidently no one had carried the Christian message to Spain. To Spain, then, Paul would go. And on his way to Spain he would have an opportunity to realize a long-cherished desire to see Rome, and not only to see it, but, by the goodwill of the Christians there, to make it his base for his Spanish mission (Rom. 1:11-15; 15:14-32).

Luke had nothing to say of Paul's plan to evangelize Spain. Rome is the terminus of Luke's history; he reached his goal when he brought Paul there, and there he left him still preaching the gospel. The purpose of Luke-Acts as a whole is bound up with the note on which the narrative comes to an end. For Luke, Paul's words "I must also see Rome" anticipate the goal of Luke's own narrative, whereas for the apostle Rome was but a temporary halting-place on his way farther west.

The circumstances in which Paul reached Rome were different from any that he could have foreseen. When he wrote to the Roman Christians he evidently had some misgivings about the reception he would have in Jerusalem: pray, he said, "that I may be delivered from the unbelievers in Judea, and that my service for Jerusalem may be acceptable to the saints" (Rom. 15:31). While he and the delegates from the gentile churches received a friendly welcome from James and his fellow elders, he was set upon in the temple by some Jews from the province of Asia and charged with violating its sanctity. He was taken into custody by members of the Roman garrison in the adjoining Antonia fortress, and when their commander discovered that Paul was a Roman citizen he sent him under armed escort to Felix procurator of Judea at Caesarea. The Jewish authorities sent a deputation to Caesarea to press two charges against Paul — the particular charge of sacrilege, which could not be substantiated because the witnesses failed to appear, and the more general charge of being a subverter of public order throughout the whole Diaspora. To both charges Paul returned a firm plea of Not Guilty, but Felix deferred sentence until his recall from office in 59. His successor Festus reopened the case with every intention of acting in accordance with the highest standards of Roman justice. When, however, he spoke of holding the trial at Jerusalem and not at Caesarea, Paul was afraid that through the new governor's inexperience he might be put into the power of his enemies. Accordingly he availed himself of a Roman citizen's privilege and appealed to Caesar (Acts 25:11).

The right of appeal (*provocatio*) to the emperor appears to have grown out of the earlier right of appeal to the sovereign people. According to Dio Cassius (*Hist.* li.19), Augustus in 30 B.C. was granted the right to judge on appeal. In this period, too, was enacted the *lex Julia de vi publica* (see VII.A above), which forbade any magistrate vested with *imperium* or *potestas* to kill, scourge, chain, or torture a Roman citizen, or to sentence him if he had appealed to the emperor, or to prevent him from going to Rome to lodge his appeal within a fixed time. It appears that, from the date of this enactment, a Roman citizen anywhere in the empire was protected against arbitrary

PAUL THE APOSTLE

magisterial coercion, although the provincial magistrate might deal with cases involving a plain breach of established statute law, which Paul's case manifestly did not (cf. A. H. M. Jones, *Studies in Roman Government and Law* [1960], p. 96). (The picture given in Acts of Paul's appeal is true to the dramatic date of the book, accords with what is known of conditions in the late 50's of the 1st cent. A.D., and is worthy indeed to be treated as a substantial addition to the available evidence.)

The provincial judge had to send an explanatory statement (*litterae dimissoriae*, "letter of dismissal") along with the accused man, and the inexperienced Festus was certainly glad to have the aid in drafting this document of the younger Agrippa, king of the areas NE of the Roman province of Judea that had formerly constituted the tetrarchies of Philip and Lysanias. Agrippa had come to Caesarea to pay his respects to the new procurator on the morrow of Paul's appeal to Caesar (Acts 25:13ff.). (From 48 to 66 the Jewish high-priesthood was in Agrippa's gift, and he was reputed to be well versed in Jewish religious practice.) This king had an opportunity of hearing Paul for himself and agreed that he could not reasonably be convicted on any of the serious charges brought against him; indeed, he might have been discharged there and then had he not appealed to Caesar, but for Festus to prejudge the issue now by discharging him would have been impolitic, if not *ultra vires* (beyond his authority) (Acts 26:32). To Rome, then, Paul was sent, under the custody of the centurion Julius (27:1ff.).

Why did Paul appeal to Caesar? He did not do so while Felix was in office, presumably because Felix had virtually decided on his innocence and was simply postponing his formal acquittal and release. One day (Paul might have hoped), Felix's procrastination would come to an end, and he would be discharged and be able to carry out his long-cherished plan of traveling to Rome and the West. But with the recall of Felix and his supersession by Festus a new and dangerous situation was developing for Paul; hence he made his momentous decision.

One may be sure that the uppermost consideration in Paul's appeal to Caesar was not his own safety, but the interests of the gospel. Seven or eight years previously he had experienced the benevolent neutrality of Roman law in the decision of Gallio proconsul of Achaia that there was nothing illegal in his preaching since (so far as Roman law was concerned) it was a variety of Judaism. He might reasonably have expected a similarly favorable verdict from the supreme court in Rome. But even a man of smaller intelligence than Paul must have realized that the consideration that moved Gallio would not be valid much longer. Thanks in a large measure to Paul's own activity, it would soon be impossible to regard Christianity as a variety of Judaism, since it was now manifestly more gentile than Jewish. A favorable hearing from the emperor in Rome might win recognition for Christianity, if not as the true fulfillment of Israel's ancestral religion (which Paul believed it to be), at least as a *religio licita* (a lawful religion) in its own right. Besides, if Nero in person heard Paul's defense, what might the outcome not be? The younger Agrippa had politely declined to admit the logic of Paul's argument, but Gentiles had regularly shown themselves more amenable to the gospel than Jews, and a Roman emperor might be more easily won than a Jewish client-king. It would be precarious to set limits to Paul's high hopes, however impracticable they may appear to us in retrospect.

Although Paul had appealed to Nero, the emperor would not inevitably have heard the case in person. According to Tacitus (*Ann.* xiii.4.2) Nero announced at the beginning of his principate that he would not judge cases *in propria persona* (personally), as his predecessor Claudius had done; indeed, during his first eight years he generally delegated them to others (cf. *Ann.* xiv.50.2). Thus Paul's case, especially if it came up before 62, was probably heard by someone other than Nero, perhaps the prefect of the praetorian guard, "representing the Emperor in his capacity as the fountain of justice, together with the assessors and high officers of the court" (Ramsay, *SPT*, p. 357). If the hearer was the prefect, it would have made a great difference whether he was the honest Afranius Burrus or his infamous successor Tigellinus. But one cannot be sure to whom Paul's case was delegated, if it was delegated at all.

Luke recorded in considerable detail Paul's voyage to Rome, shipwreck on the way, and a three-month winter stay in Malta (Acts 27:1–28:10); his narrative is interesting for many reasons (not least as an important documentary source for knowledge of ancient seamanship), among them especially its portrayal of Paul in trying circumstances of a kind that displays a person for what he really is. Paul kept his head and faith high amid the mounting despair and imparted some of his own indomitable courage to his fellow passengers.

When at last he and the other prisoners on board reached Rome, they were handed over by the centurion who had charge of them to the "stratopedarch," according to the Western text of Acts 28:16. This official may have been the camp commandant of the praetorian guard. All forms of the text agree that Paul "was permitted to stay by himself with the soldier who guarded him."

Paul lived in Rome for two full years at his own expense (or on his own earnings). Whether or not the AV "in his own hired house" can be accepted as a translation of *en idíō misthṓmati* (Acts 28:30), he probably did remain under house arrest, i.e., he was not kept in custody in the headquarters of the praetorian guard but "outside the camp," as many Western authorities add. He was thus free to receive visitors, although he could not move about freely himself. Luke mentioned among Paul's earliest visitors a deputation of Roman Jews, whose debate with the apostle forms the last scene of Luke's history — plainly with programmatic intent. The pattern of Jewish refusal of the gospel and gentile acceptance of it, which recurred earlier in Luke's history, is recorded definitively in Rome, with Paul's conclusive last word (after his quotation of Isa. 6:10): "Take knowledge, then, that this salvation of God has been sent to the Gentiles; *they* will listen to it" (Acts 28:28).

But what of the "two full years" of Paul's detention? What happened at the end of this period? Some have assumed quite confidently that it ended with Paul's trial, conviction, and execution (cf. J. V. Bartlet, *Expos.*, 8th ser.,

St. Paul's Bay, Crete, where Paul was shipwrecked en route to Rome (W. S. LaSor)

PAUL THE APOSTLE

5 [1913], 464ff.). Others have thought that it ended with his release, either because he was tried and acquitted or because the case went against his accusers by default (cf. K. Lake, *Interpreter*, 5 [1908/09], 147ff.; W. M. Ramsay, *Teaching of Paul in Terms of the Present Day*, pp. 346ff.; H. J. Cadbury, *BC*, V, 297ff., esp. 326ff.).

On the one hand, if Paul's two-year detention was followed immediately by his condemnation and death, Luke's failure to say anything about these events is inexplicable. On the other hand, there does not appear to be first-century evidence for any procedure permitting a case to lapse automatically by default. The available evidence suggests that everything was done to compel the appearance of prosecutors and defendants and to prevent the abandonment of charges. A prosecutor who did not appear in court within a reasonable time would probably be penalized, but that would not imply the automatic discharge of the defendant.

The prolongation of Paul's stay in Rome over two full years could have been due to congestion of court business as much as anything else; if indeed he was discharged without being tried, this act could have resulted from Caesar's exercising his *imperium*. "Perhaps Paul benefited from the clemency of Nero, and secured a merely casual release. But there is no necessity to construe Acts to mean that he was released at all" (A. N. Sherwin-White, *Roman Society and Roman Law in the NT* [1963], p. 119). Paul's Epistles must be examined to discover if they throw any more light on the question than Acts does.

If Paul *was* released after his two years of captivity in Rome, where did he go next? His letter to Philemon (if it belongs to his Roman captivity) indicates that he expected soon to be discharged and to revisit his friends in the province of Asia. "Prepare a guest room for me," he said, "for I am hoping through your prayers to be granted to you" (Philem. 22). The Pastoral Epistles provide unmistakable references to some activity by Paul in the eastern Mediterranean, which cannot well be dated anywhere before his arrest in Jerusalem and voyage to Rome. In addition to the province of Asia, he appears to have visited Macedonia (1 Tim. 1:3), Crete (Tit. 1:5), and Epirus (Tit. 3:12). It is true that according to Luke he told the elders of the Ephesian church when he took his leave of them at Miletus that they would never see him again (Acts 20:25, 38), but at that time he was planning to set out for Spain as soon as he had completed his business in Jerusalem and did not foresee the disruption in his plans that his arrest in Jerusalem would cause.

Was he ever able to fulfil his hope of preaching the gospel in Spain? To this question no certain answer can be returned. Two Roman documents suggest that he did go there. Clement of Rome in his epistle to the Corinthians (*ca.* 96) reminded them how Paul "went to the limit of the West" and bore his testimony before rulers before he departed from the world (1 Clem. 5:7). Whether Clement meant "the limit of the West" or was speaking simply of Paul's reaching "his goal in the West," as a Roman writer he likely was referring to a place farther west than Rome. The Muratorian Canon (*ca.* 190) also seems to say that Luke omitted both Peter's martyrdom and Paul's departure from the capital for Spain (lines 37-39). This apparent assumption that Paul did set out for Spain could, however, be nothing more than an inference from Rom. 15:24, 28; indeed, the same might be said, though with less probability, of Clement's mention of his going to "the limit of the West." The question must remain open.

On the final scene of Paul's life there is more certainty. The Roman Christian writer and presbyter Gaius (late 2nd cent.) said that he could point out on the Vatican hill and by the road to Ostia the "trophies" (funeral monuments) of

Statue of Paul in St. Peter's Square, Rome (W. S. LaSor)

the apostles (i.e., Peter and Paul, respectively). Eusebius, who quoted Gaius to this effect (*HE* ii.25.7), also mentioned how Dionysius bishop of Corinth (*ca.* 170) in a letter to the Roman church recalled the martyrdom of Peter and Paul in Italy around the same time — presumably, as tradition asserts, in the persecution under Nero that broke out in 64. 2 Tim. 4:6-18 may well refer to a second imprisonment and trial of Paul at Rome which issued in his condemnation and execution. As a Roman citizen, Paul would have been beheaded with the sword. But that would have been a small matter in the eyes of one who had long recognized that "to die is gain" (Phil. 1:21); what filled him with joy was that his appearance in court gave him one more opportunity to bear witness to the gospel: "the Lord stood by me and gave me strength to proclaim the word fully, that all the Gentiles might hear it" (2 Tim. 4:17).

IX. Summary

PAULINE THEOLOGY

Paul is the most influential theologian of all time. Although his theology does not adulterate the content or even the expression of the theology presented in the Gospels, it is clearly more systematic. He may not have established his missions on any other person's foundations, but his theology rests squarely on the teaching of the OT and of his Lord Jesus Christ. Nevertheless he went beyond both; Christ's promise of the Spirit—"He will guide you into all truth" (Jn. 16:13) — was fulfilled uniquely in Paul. So here we shall follow somewhat systematically this guidance, considering consecutively Paul's doctrines of natural theology, special revelation, the trinity, Jesus Christ, man and sin, redemption, the Church, and the future.

I. Natural Theology.–A. The Case Against Pauline Natural Theology. Many scholars have denied that Paul had a natural theology, i.e., a doctrine of God constructed from nature, including human nature, independent of special revelation. Among them are B. Gärtner, G. Bornkamm, N. B. Stonehouse, O. Cullmann, K. Barth (e.g., *CD*, I/2, 167), D. Bonhoeffer, G. Berkouwer, R. Reitzenstein, and J. de Zwaan.

First, in making their case some, including Bornkamm (*NTS*, 4 [1957/58], p. 94), have denied the authenticity of the Areopagus (Mars' Hill) address. But their denial is due mainly to its "natural theology," which is the question under discussion. Furthermore, the unquestionably authentic Rom. 1–2 even more clearly appears to teach natural theology.

Second, it has also been observed (cf., e.g., M. E. Andrews, "Paul, Philo, and the Intellectuals," in J. S. Kepler, ed., *Contemporary Thinking about Paul* [1950], pp. 400f.) that Paul was not really among the *literati*, did not display the "philosophic calm" of the typical natural theologians, the Stoics, and was more mystically oriented, though in a different way, than Philo. These interesting points may be quite true without militating against Paul as a natural theologian. All Stoics may be philosophers but not all philosophers are Stoics.

Third, R. Reitzenstein (*Poimandres* [1904], p. 118) argued that Gk. *gnōsis theoú* in Paul is not knowledge (*Wissen*) but insight or feeling (*Schauen, Fühlen*). While this is an interesting and significant observation, it scarcely proves Paul to be anti-intellectual. Feeling and intuition imply knowledge. An emphasis on feeling does not preclude intellection and apparently assumes it. Furthermore, as Bornkamm observed, "Our investigations have shown that Paul is much more concerned with man's rationality... than is usually recognized" (p. 100).

Fourth, some have pointed out that Paul's teachings concerning the means of salvation, spiritual community, the resurrection body, and final judgment are not found in the Stoic enchiridion. This does not prove, however, that all Pauline doctrines (e.g., natural theology) are absent from the Stoic enchiridion.

Fifth, de Zwaan observed (543f.) that Pauline revelation is not concerned with the *stoicheía* but with righteousness, election, and the like themes; if the word "merely" is inserted before "concerned" no objection can be taken, but then neither can any argument against natural theology be made. In any case, the meaning of *stoicheía* is too uncertain to allow the word's use in argument. (*See* ELEMENT.)

Sixth, more serious is the constant contention that the God of the Greek philosophers and Stoics is impersonal. The assumption is that if Paul were an amateur natural philosopher, his God too would be impersonal; since his God was not, he did not philosophize or attempt to prove God. But this contention falsely assumes that all Greek philosophizing led only to an impersonal deity and that all philosophizing could lead only to a Greek conclusion.

Seventh, it is contended that when Paul argued from the visible things (Gk. *toís poiēmasin*) to the invisible God (*tá aórata*) in Rom. 1:20 he was a Christian believing in the personal God and Father of Our Lord Jesus Christ. Certainly Paul was a Christian believer when he wrote this text. But, (1) it does not follow that he was here assuming the God he sought to prove; (2) there is no evidence in the context that he was assuming God; (3) just the opposite, there is every evidence that he did not assume Him; for (4) he appealed only to natural revelation, not to special revelation, as manifesting the invisible God; so that (5) people in general "know God."

Eighth, the exegesis that Gk. *phanerón* ("manifest," Rom. 1:19; RSV "plain") points not to human speculation but to divine revelation is both true and false. It is true that revelation is what makes manifest, but it is false that revelation is not made manifest to human speculation or insight. Revelation's "transparent" character is shown in people's "knowing" God and being "inexcusable" for not worshiping Him.

Ninth, if Paul had a natural theology he would have had to teach that salvation was identical with right thinking (Gärtner, p. 143). It is clear that people's wrong thinking was traceable to their sinful condition. They were given up to a "reprobate mind" because they "would not" have God in their thinking; they would not worship Him. The implication is clear that if their hearts were right their minds could easily see the revelation. Indeed, they did see it in spite of themselves and immediately proceeded to suppress it. Obviously, if this wilful blindness were taken away, they would think rightly; salvation of the mind *is* part of total salvation.

Tenth and finally, many have noted that Paul as a student of and believer in the OT, which assumes rather than argues the existence of God from Gen. 1:1 on and disdains Greek rationalizing of God, could not turn apologist in his own writings. We will not press the point that the anti-intellectualism of the OT may be overdone but will note, first, that the Jews developed an apologetic, as seen, e.g., in the wisdom literature of Job, Psalms, Proverbs, and Ecclesiastes; second, that the man who became all things to all people that he might win some would not likely have used an irrelevant Jewish approach to Gentiles; and third, that he would not have charged them with being "inexcusable" for not knowing a God whom they could not have known.

See STOICS.

B. The Case for Pauline Natural Theology. In favor of a Pauline natural theology have been a host of scholars, including M. Dibelius, G. Lüdemann, E. J. Price, A. Fridrichsen, H. Lietzmann, T. Wilson, H. Daniel-Rops, and K. F. W. Prior. The positions of R. Bultmann and M. Pohlenz are somewhat ambiguous or ambivalent. Whitely (p. 56) simply notes that mankind had sufficient natural knowledge to be blameworthy.

Among the arguments favoring this position are first, that Paul's *Sitz im Leben* (life-setting) predisposes one to admit the possibility, if not to anticipate the actuality, of a Pauline natural theology. Both his Jewish and his pagan backgrounds are relevant. A natural theology, as shown above, was to be expected of a Diaspora Jew whose kinsmen had lived in Tarsus for a century and a half (T. Wilson, p. 41). If the Hebrew OT could be translated into Greek, if the wisdom literature could argue as Plato's *Timaeus* did, if the Alexandrian contemporary Philo could synthesize Moses and Plato, then an evangelist of Paul's intensity would have left no intellectual stones unturned to capture the gentile mind for Christ.

Second, not only Paul's good, Hellenistic Greek but his actual arguments were congenial to, if not produced by, paganism. The Gentiles in Platonism, Orphism, and Stoicism has already arrived at a rational monotheism. The confluence of Paul in this stream has led E. J. Price, B. Weiss, M. Dibelius, and others to express judgments similar to Wilson's: Paul had "the same doctrine of natural revelation" (p. 54). The apostle was able to subdue the Lystrian idolaters by an appeal to natural theology (Acts 14:12ff.); he did not break up the gospel meeting before the Areopagus with his natural theology, in which he used proof texts from Aratus and Epimenides, but only with his speaking of a resurrection and judgment, items of revealed theology.

Those who have supposed that his later resolution to know only Christ and Him crucified (1 Cor. 2:2) implies an abandoning of natural theology fail to explain why Paul would reject an approach that had served him well. Moreover, as Bornkamm has commented (p. 94), in 1 Cor. 1:18f. Paul disparages human wisdom in the context of proofs (p. 94), and 1 Cor. 1–3 is against worldly wisdom and not against true wisdom or reason. When Paul argues that the "foolishness" of God is wiser than men, can one suppose that Paul is charging the all-wise God with real folly? The "wisdom of men" is folly (cf. "claiming to be wise, they became fools," Rom. 1:22) in its refusal to submit to the special revelation of God. Plato, who longed for the revelation that the apostle received, would presumably have put the same estimate on his own speculation when in the presence of revealed wisdom. In other words, those listening to Paul before the Areopagus erred not in having a natural theology but in a non sequitur of which no natural theologian should ever be guilty: because natural revelation disclosed no bodily resurrection or specific final judgment, it was therefore opposed to these doctrines. That is, there is nothing in natural *theology* against *the possibility* of a bodily resurrection. On the contrary, if there is a God, which natural theology proves, the possibility of a miracle is proved along with Him. Thus not Paul, the advocate of special revelation, but his auditors, who gloried in general revelation, broke with natural theology at the end of the Mars' Hill sermon. The "wisdom of men" is foolishness and the "foolishness of God" wisdom.

Third, in general the independent theistic arguments of Paul resemble closely those of the Stoic Sextes (Gärtner, p. 110). Sextes reasoned from common consent, which does not differ from the general character of Rom. 1; Acts 14 and 17. Mankind knows God (Gk. *gnóntes tón theón*, Rom. 1:21) by nature and by nature knows the decree (Gk. *dikaíōma*) of God (Rom. 1:32). The Stoic used the order of nature as a cue to its designer, which Paul closely approximates in Acts 17:24f. Sextes stressed the consequences of denying God as an argument for His existence. Paul likewise closely related ungodliness (Gk. *asébeia*) and wickedness (*adikía*, Rom. 1:18). Paul showed the Athenians the fatuity of supposing that the Maker of all things could be made with hands and seemed to think that proving that unbelievers worship the creature rather than the Creator proves that their worship is patently absurd. He did not generally take the "rational" grounds of unbelief very seriously but on the contrary insisted that people's minds become reprobate because they are not willing (Rom. 1:21) to have God in their thinking.

Fourth, perhaps the most fundamental argument that Paul assumed natural theology is that no one can intelligibly deny that he did. All students of Rom. 1–2 find Paul teaching natural revelation. On that there is no divergence, nor could there be. Natural theology, however, in distinction from natural revelation, is affirmed by some, denied by others. But can it be denied? For if all grant that Paul's man *stifles* this natural revelation of God so

that it never becomes natural theology, must not all also grant that man stifles this *knowledge* of natural revelation? Nor can this knowledge be eradicated, for as even Gärtner noticed (p. 79) God is continuously revealing it.

Thus, according to Paul, mankind has a will to blot out while God has a will to reveal. The result must be a reluctant natural theology—a grudging admission and a continuous effort to obliterate this admitted knowledge. So against those who think that mankind is led to God by natural revelation Paul points out the stubborn, wicked, inexcusable refusal of mankind; against those who think that mankind is not even dragged to natural theology Paul points out the inescapable, persistent, kind, and forbearing manifestation of God within and among people.

II. Special Revelation.—If it is reasonably clear that Paul taught a natural revelation constraining hostile mankind to a natural theology distorted almost, but not quite, beyond recognition, it is virtually undisputed that he taught and stressed a special, written supernatural revelation. The nature, extent, necessity, and evidence of this revelation will be noted.

A. Its Nature. B. B. Warfield (*DCG*, II, 585) showed that the characteristic expression for this revelation is *graphē*, which occurs fifty times in the NT and throughout indicates "something which the Holy Ghost has spoken through the mouth of its human authors [Acts 1:16]." Paul employed the expression in Rom. 1:2; 4:3; 9:17; 10:11; 11:2; 15:4; 16:26; 1 Cor. 15:3; Gal. 3:8; 3:22; 4:30; 1 Tim. 5:18; 2 Tim. 3:16. Ellis (p. 21) noted that *theópneustos*, "God-breathed," in 2 Tim. 3:16 also accords with the usage of contemporary Judaism and the early Church. Thus the invisible God, who is manifested by the things He made, now "opens his own sacred mouth" (Calvin).

B. Its Extent. The *graphē* extended to the Bible, the whole Bible, and nothing but the Bible. G. Schrenck (*TDNT*, I, *s.v.* γράφω κτλ.), after noting that a number of NT references apply to particular verses, concluded that such instances may mean "the Scripture (taken as a whole) says at this particular place," as indeed Warfield demonstrated (*DCG*, II, 585f.). For extracanonical references cf. Ellis (pp. 74f., 83), who refuted A. Schweitzer's statement that Paul appealed similarly to Jewish Haggadah (*Paul and His Interpreters* [Eng. tr. 1948], p. 46).

The Pauline Scripture is not restricted to the OT; 1 Tim. 5:18b cites Mt. 10:10; Lk. 10:7. That Paul was as conscious as 2 Pet. 3:15f. that Paul was delivering "Scripture" may be seen from 2 Thess. 3:14f., where he regarded obedience to his writing as a prerequisite of continued church fellowship, and from 1 Cor. 4:16, where his preached and "delivered" word is connected with the Corinthians' salvation (cf. N. B. Stonehouse, pp. 83f.). Although the inspiration applies extensively to the entire Bible, the question remains how intensively it applies. The *pása graphē* ("all scripture," 2 Tim. 3:16) admits of no exception, and even if it did no Pauline canon for distinguishing is offered. Thus by explication and implication *theopneustía* (divine inspiration) is attributed to every word of Scripture with the same precision taught by Paul's Lord (Mt. 5:18; Jn. 10:35). Paul's relatively "free" citing of the LXX (for tabular listing see F. Prat, I, 411-14, and Ellis, pp. 150-188) may appear to militate against such an interpretation; but, first, it is virtually impossible to distinguish between an allusion and a quotation; second, most changes in the OT text are to suit the new context; third, punctuation, quotation marks, and such modern devices for reproducing exact wording did not exist in antiquity (cf. R. Nicole, "NT use of the OT," in Henry, ed., *Revelation and the Bible*, pp. 144f.); and, finally, Paul himself claimed (as noted above) the authority of an inspired messenger of the God whose Sovereign right to cite and modify His Word as he chose was as indisputable as that Word's infallibility, in whatever precise form it took. In addition to the numerous citations and allusions to the Scripture in the apostle's writings, there is "not a paragraph," as A. D. Nock observed, "which does not include subconscious recollections of the Greek OT just as every paragraph of *Pilgrim's Progress* echoes the King James Bible" (*Saint Paul* [1938], p. 183). Again, Paul's distinguishing between the *epitagē* of the Lord and his own *gnōmē* (1 Cor. 7:25), in the light of his claim to being an agent of Christ and revealer of His Word, must be a distinction of source and not of authority, i.e., a distinction between the word of Christ that issued from Christ's own lips and the word of Christ that was transmitted through the apostle's mind and pen.

C. Its Necessity. Even though God has revealed Himself since the foundation of the world by the things He has made, further revelation is still needed because natural revelation does not have the "power of God for salvation" that is associated with the gospel (Rom. 1:16). The world learned from created things the "power and divinity" of God (v. 20); this knowledge, although not salvific, made mankind "without excuse" (v. 21). Thus the world could gain wisdom (v. 22; 1 Cor. 1:21). But by wisdom the world "did not know God" (1 Cor. 1:21; cf. Acts 17:23); on the contrary, "they [the people of the world] have turned into fools" (Rom. 1:22, Goodspeed, *Student's NT*). They knew God (v. 21), yet they knew not God; they knew about God but did not know the "thoughts of God" (1 Cor. 2:11). They could discover from nature what God by His power had done but could not know what by His evangel He would do. How could they, for who knows even "a man's thoughts except the spirit of the man which is in him? So also no one comprehends the thoughts of God except the Spirit of God" (v. 11).

D. Evidence. What evidence is there that God has revealed "the things of God"? Apparently Paul and his readers assumed the inspiration of the *graphē*. He rested his argument on inspiration rather than resting inspiration on argument. There seems to be nothing comparable in his treatment of *graphē* with his close reasoning in Acts 14:15f.; 17:24f.; Rom. 1:18f. for the reality of the natural revelation of God. One may not infer, however, that he proceeded the same way in winning gentile converts and establishing Christian congregations as he did when addressing the "household of faith." The *theopneustía* of Scripture, apparently unchallenged by Jewish and pagan converts, required no defense. But may one not infer that Paul as well as Peter stood ready to defend, "to any one who calls you to account for the hope that is in you" (1 Pet. 3:15), the *theopneustia* no less than the bodily resurrection (1 Cor. 15:1ff.), justification by faith alone (Rom. 4:5ff.), and, more to the present point, his own apostleship (2 Cor. 12:1ff.)?

Paul's apostleship began with Jesus Christ's appearance to him on the way to Damascus (Acts 9:1ff.; 22:5ff.; 26:12ff.). As Rengstorf observed (*TDNT*, I, 438), for Paul this was "an act of God, an objective event, not a visionary experience" (Gal. 1:15; Rom. 1:1); it made him conscious of a calling such as the OT prophets, particularly Jeremiah, received. Paul, however, did not rest his authority entirely on the supernatural Damascus appearance that began his apostolate. When necessary he also appealed to the continuing evidence of Christ powerfully at work through him. He reminded the Corinthians of his "signs and wonders and mighty works" (2 Cor. 12:12) on his earlier visits and promised on his return a similar display of the power of Christ if they demanded proof that Christ

was speaking in him (13:3f.). While we agree again with Rengstorf that Paul used 2 Cor. 12:12 "only to demonstrate the justice of his cause and not the significance of his person" (p. 440), we do insist that Paul is not above providing external proof of his divine commission. His argument is that the proved supernatural accreditation of his person evinces the supernaturalness of his message. "Am I not an apostle? Have I not seen our Lord Jesus Christ?" Although he admitted that others also displayed supernatural powers (1 Cor. 12:27-30), these miracle workers claimed no Damascus road experience nor appointment to the apostolate.

In sum, Paul fully endorsed the OT as infallible Scripture and indicated the same of some representative NT materials. He meanwhile certified his own sanctioning and supplying of Scripture by his supernatural endowment with the apostolate.

III. The Trinity.–There is one God exhibiting many attributes and existing in three persons. True to the OT doctrine in Dt. 6:4, Paul insisted on the unity of the Godhead (1 Cor. 8:4, 6; 1 Tim. 1:17), usually calling God "Father." "There is not one single letter that he ever wrote in which Paul does not call God *Father* (1 Thess. 1:1; 2 Thess. 1:2; Gal. 1:3; 1 Cor. 1:3; 2 Cor. 1:2; Rom. 5:7; Eph. 1:2; Col. 1:2; Philem. 3)," wrote W. Barclay (*Mind of St. Paul* [1958], pp. 32f.; cf. F. Amoit, *L'Enseignement de St. Paul* [1946], I, 59). God is all in all (1 Cor. 15:24-28), the living source of all (1 Cor. 8:6; 1 Thess. 1:9; Rom. 11:36. Rengstorf (*TDNT*, I, 439f.) observed that Paul was the first apostle to recognize the call of Christ as from God, omnipotent and sovereign (Eph. 1:11; Rom. 9:18), omniscient (Rom. 11:33-36; 1 Cor. 1:21; Eph. 3:10), righteous (Rom. 3:5, 25; Acts 17:31), eternal (Rom. 1:20; 1 Tim. 1:17), invisible but manifest in Christ, the Christlike God (2 Cor. 5:19; Col. 1:15; 3:6; 1 Tim. 1:17), wrathful (Rom. 1:18; Eph. 2:3; 5:6; 1 Thess. 1:10; 5:9), merciful and peaceful (Rom. 2:9; 2 Cor. 5:19f.; 13:11; 2 Thess. 3:16).

Paul's monotheism is explicit, his trinitarianism implicit. No less emphatic than his insistence on the unity of God (Amoit, I, 59) is his ascription of personality to three divine persons—the Father, the Son, and the Holy Spirit. (See preceding paragraph for discussion of the Father's personality; see IV below for discussion of the Son's.)

The NT contains 379 references to the Spirit and His distinct divine personhood; 146 references are Paul's (R. B. Hoyle, *Holy Spirit in St. Paul* [1928], p. 25). His personality and divinity are assumed rather than proved. Ascribed to Him are knowledge (1 Cor. 2:10f.), will (1 Cor. 12:11), purpose or thoughts (Gk. *phrónēma*, Rom. 8:27), feeling (Rom. 15:30; Eph. 4:30). He leads, teaches, intercedes, cries out; with reference to what mere energy or influence could such language fitly be used? Equally evident is Paul's belief in the divinity of the Spirit. In Acts 28:25-27 he ascribes to the Spirit language that Isa. 6:8-10 ascribes to "the King, the Lord of hosts." Many of the passages imply the Spirit's possession of divine attributes such as omnipresence (Rom. 8:11; 1 Cor. 12:13; Tit. 3:5).

This exposition seems sufficient answer to W. Beyschlag (*NT Theologie* [1896], II, 204) and others who have seen in such passages merely another instance of Paul's personalizing of the impersonal, and to A. Sabatier (p. 338), who recognized the tripersonal but reduced its significance to an expression of the sequence of redemption: the love of the Father manifested in the grace of the Son and wrought in the soul by the Spirit. Paul's identification of the Spirit and Christ (2 Cor. 3:17) must refer to essence or substance, not to person as assumed by modalism, an error that E. F. Scott thoroughly refuted (*The Spirit in the NT* [1923], pp. 180-83; unfortunately N. Q. Hamilton, *Holy Spirit and Eschatology in Paul* [1957], p. 83, appears to have seen only a "dynamic" unity). The Westminster Larger Catechism (Answer 9) may be resting too much on 2 Cor. 13:14 but not on Pauline theology as a whole when it says: "There be three persons in the Godhead, the Father, the Son, and the Holy Ghost; and these three are one true, eternal God, the same in substance, equal in power and glory; although distinguished by their personal properties."

IV. Jesus Christ.–Jesus Christ was Paul's very life. It was not the apostle but Christ who lived in him (Gal. 2:20). For Paul to live was Christ (Phil. 1:21). To gain at any cost "the surpassing worth of knowing Christ Jesus my Lord" was his one goal (3:7f.), and to know Christ and Him crucified was his total method (1 Cor. 2:2). His favorite self-designation was "slave" (Gk. *doúlos*) of Christ. It was Jesus who had appeared to him while he was planning to exterminate Christians. This episode received more attention from Paul than any other in his life (Acts 9:1-19; 22:4-16; 26:9-18) and actually occupies more space in the NT than any other narrative except the passion of Jesus Christ itself. Describing this Christ utterly overwhelmed the apostle, and about thirteen times he gave up, using the expression "the unsearchable riches of Christ."

A. His Deity. Although unsearchable and inexhaustible, Christ is not unknowable, and Paul says much about Him. Most important, Jesus Christ is divine. We note briefly five lines of evidence together with challenges and attempted refutations. First, the most characteristic designation of Jesus, namely, *kýrios*, "Lord," not to mention combinations, was employed 144-146 times (B. B. Warfield, *Lord of Glory*, p. 223). Since *kýrios* is the LXX word for *YHWH*, Jesus for Paul was the covenant God of Israel (J. G. Machen, p. 307). This mere fact is answer enough to Sabatier's erroneous deduction from 1 Cor. 15:28 that Christ is Lord only during the period of redemption, (p. 334) and to W. Foerster's suggestion that in Phil. 2 the confession of Jesus as *kýrios* is limited by its being "to the glory of God" (*TDNT*, III, 1089). "Son of God" is used less often but tellingly enough to justify W. Morgan (*Religion and Theology of Paul* [1917], p. 56), Warfield, and others in insisting that the title is metaphysical. The contention of H. Weinel (*St. Paul, The Man and His Work* [Eng. tr. 1906], p. 324) and others that it is messianic is a further explication, not a contradiction; i.e., the Son of God's essential divinity does not prevent His graciously assuming a messianic role.

Closely related to *kýrios* is the designation "first-born," Gk. *protótokos*, not *protókistos* (Col. 1:15). "First born" is manifestly a correlative of the term "Father" (which is virtually always applied to the first person of the Godhead) inasmuch as the two terms are mutually dependent, as Athanasius observed against the Arians of the early Church and B. M. Metzger urged against the Arians of today, the Jehovah's Witnesses (*Theology Today*, 10 [1953], 76f.). "First-born" indicates not a beginning in time but priority in rank.

That Christians are called "sons of God" is an infinitely different matter. Even Sabatier is constrained to confess: "Christ, in short, is God's own Son, essentially His. We are, and shall always be so by adoption only" (pp. 334f.). Christ is the image (*eikṓn*), the form (*morphḗ*) and glory (*dóxa*) of God (1 Cor. 2:7; 2 Cor. 4:6; Phil. 2:6; Col. 1:15). These terms of themselves could mean no more than the image of God in mankind, but in Paul's context they indicate the unique and identical character of God. For example, in Phil. 2:6 the "form of God" in which Christ eternally exists is utterly different from the "form of a

servant" which He took or the "likeness of a man" which He became.

At first glance it appears striking and disappointing that the apostle did not designate Christ principally by the term God (Gk. *theós*), since His deity is infinitely the more important aspect of His being. However, first, God by any other name is still God, as shown above. Second, since there are three persons in the trinity the distinctiveness of each is not deity. Third, the name *theós* is characteristically the designation, virtually a proper name, for the first person, who at the same time is distinguished as "Father." Fourth, "Lord" is the characteristic name, "trinitarian name," which affirms deity in common with the other persons of the Godhead and is also the Son's personal distinction. Fifth, Paul does apply the designation *theós* to Christ sufficiently to leave no doubt of his doctrine if one judged from that term alone. Rom. 9:5, whatever its syntactical ambiguity, by its context indicates the reference of *theós* to *Christós* so clearly that modern scholarship is returning to the orthodox view of the early fathers (Sanday-Headlam [comm. on Romans (*ICC*, 5th ed. 1902)], Prat, E. Stauffer, *et al.* [*TDNT*, III, *s.v.* θεός κτλ.]). The ambiguous text of Tit. 2:13, which the AV translates "... the glorious appearing of the great God, and our Saviour Jesus Christ..." has been translated, since 1798 when Granville Sharp detected and formulated a certain rule of Greek syntax, "...the appearing of the glory of our great God and Savior Jesus Christ" (RSV; cf. B. M. Metzger, p. 79). Thus the same person, Jesus Christ, is called God and Savior. Again, if God was in Christ reconciling the world (2 Cor. 5:19) Christ must be identical with God, for who else could reconcile the world? Thus E. Andrews (p. 125) and A. C. McGiffert, whom he cited, were saying more than they seemed to realize when they used this text to explain the sense in which Christ is divine. Moreover, Gk. *morphḗ toú theoú* in Phil. 2:6 is tantamount to "very God of very God" and as such virtually an appropriation of *theós* as a name of Christ. Likewise, "the church of God which he got at the cost of his own life" (Acts 20:28, Goodspeed), referring as it indisputably does to Jesus Christ, inferentially calls Him *theós*.

In addition to such direct references to the deity of Christ are the oblique assumptions of the same, clues (in their own way even more impressive, because more casual) to the thinking of Paul. To Christ Paul prayed (2 Thess. 3:5; 2 Cor. 12:8f.), to Christ he ascribed the glorious manifestation of God (2 Cor. 5:19), to Christ he assigned the role of Creator (Col. 1:16f.), and to Christ belongs the "day of the Lord," which according to OT usage is the day of Yahweh, God (1 Thess. 5:2; 2 Thess. 1:10; 2:2; 1 Cor. 1:8b).

Worthy of separate notice is the oft-observed agreement of the apostolic Church with Pauline Christology (R. J. Knowling, *Testimony of St. Paul to Christ* [1905; 3rd ed., 1911] p. 44; Machen, pp. 25ff.; H. N. Ridderbos, *Paul and Jesus* [Eng. tr. 1958], p. 53). Modern form criticism has remarkably confirmed the high doctrine of Christ found in the Church from the beginning (Wrede, "Mark is as bad as John"; cf. F. F. Bruce, *The NT Documents: Are They Reliable?* [1943], pp. 32f.; J. Jeremias [*Der Schlüssel zur Theologie des Apostels Paulus* (1971)], O. Michel [*Paulus und seine Bibel* (1929)], O. Cullmann [*Christology of the NT* (Eng. tr., rev. ed. 1959)], and many others find many already crystallized creeds reiterated by Paul). The presence of such a view and the absence of controversy with Paul argue that his christology was the same as the Church's.

Two objections are frequently offered to the interpretation of Paul as a high Christologist. It is irrelevant that the apostle did not deal in "speculation" and "abstractions" (E. Andrews, p. 14; D. Somerville, *St. Paul's Conception of Christ* [1897], p. 183), since a person can communicate precise truth without resorting to a technical scholastic methodology, and Paul did not shun to make deductions (cf. Romans and Galatians *passim*). The first objection is that although allegations of adoptionist Christology are generally to be given up, one still can find subordinationism in Paul (E. Andrews, pp. 131f.). Warfield has definitively refuted this objection (*Lord of Glory*, pp. 213-18, which Andrews cites without answering it).

The second objection is that the KENOSIS of Phil. 2:7 shows that Paul's Christ emptied Himself in some way or degree of His deity. The text, however, says nothing of the sort. Christ's *morphḗ toú theoú* ("form of God") is permanent (*hypárchōn*), and the "emptying" is taking the *morphḗ doúlou* ("form of a servant"). The emptying, in other words, is not Christ's divesting of deity but His investing Himself with the infinitely inferior humanity. Christ's humanity is even further humiliated (to the death of the cross) and again later exalted (vv. 9f.), while the *morphḗ toú theoú* continues unchanged through all the human vicissitudes (cf. J. J. Müller, comm. on Philippians and Philemon [NICNT, 1955], pp. 80-85; A. Oepke, *TDNT*, *III*, *s.v.* κενός; J. H. Gerstner, *BDTh*, *s.v.* "kenosis"). In any case, the LXX usage suggests that "emptied himself" simply means "poured out himself," i.e., in death.

B. His Humanity. Arguments that Paul's Christ was not truly human have been broached by a number of scholars, including H. von Soden, *Theologische Abhandlungen* (1892), p. 115; M. Kähler, *Der sogennante historische Jesus* (2nd ed. 1956); R. Bultmann, *Theology of the NT*, I (Eng. tr. 1955), 238f. Some of the arguments are ostensibly drawn from Paul himself, and some from his background, Rom. 8:3, "sending his own Son in the likeness of sinful flesh," is sometimes cited as a hint of Pauline docetism. The rare use of the name "Jesus" without the modifiers "Christ" or "our Lord" (e.g., Rom. 3:26; 2 Cor. 4:10f.; Eph. 4:21; 1 Thess. 4:14) is considered suspicious; but 2 Cor. 5:16 ("though we once regarded Christ from a human point of view [*katá sárka*] we regard him thus no longer") is the *locus classicus* used against Paul's acceptance of the true humanity of Christ. Paul is thought to have had the Philonic *lógos* (Word) or the Hellenistic primal man in view when he spoke of the man Christ Jesus, the Last Adam, or the Heavenly Man.

The statements of Paul that seem to reveal an indifference to the human Christ will be considered first. Goodspeed translated Rom. 8:3 *homoiṓmati sarkós* as our "physical form." A. Schlatter (comm. on Romans [2nd ed. 1952], *in loc.*) remarked that *sárx* indicates "concrete" form and that "docetic concepts should not be intruded." The rare use of the name "Jesus," if it could not be explained, would not count against the human Christ. Paul probably was assuming the Gospel narrative with which all were familiar and was giving an interpretative development that presented "Jesus" as the "Lord," which was the all-important point of view. "Christ" in Paul had become a proper name, and to call Christ "Lord" was the work of the Spirit (1 Cor. 12:3). That Paul called Christ "Lord," of course, implied not that the Lord Christ was not the man Jesus but rather that the Lord Christ was more than merely the man Jesus. The latter implication seems to be the key to 2 Cor. 5:16. Even Bultmann granted that *katá sárka* modifies *egnṓkamen* rather than *Christón* ("we know according to the [our] flesh Christ" rather than "we know Christ according to the [His] flesh"). However, he finds *katá sárka* knowledge about Christ not essentially different from knowledge about Christ *katá sárka*. P. Althaus (*Fact and Faith in the Kerygma of*

Today [1959], p. 35) rightly insisted on a difference between knowledge of Christ *in carne* and *secundum carnem*. Goodspeed made this point very plain, although his translation as a whole may be questioned: "So from that time on, I have estimated nobody at what he seemed to be outwardly; even though I once estimated Christ in that way, I no longer do so." The parallelism here between once knowing and no longer knowing people *katá sárka* and once knowing and no longer knowing Christ clearly indicates that a historical Christ is in view just as historical people are. This is no "other-than" but a "more-than" human view, and in the case of Christ it is strongly reminiscent of Mt. 16:17.

As for the primal man derivation of a Pauline non-historical or existential Christ, the objections are insurmountable to all but the hardiest Bultmannians. First, no one has established the existence of such a concept prior to Paul. Mr. Black said, "There is no unequivocal evidence pointing to the existence of such a conception in Pre-Christian sources, particularly within Judaism" (*SJT*, 7 [1954], 177). Second, if such evidence was discovered, its influence on Paul would still need to be shown. Third, proof would be required that more than Paul's terminology was influenced. Fourth, if even that substantial influence was shown, a mere coincidence between an idea of such a being and the historically existing being of Paul's writings would need to be disproved. Such considerations have led most modern scholars to abandon the chase.

Having suggested the futility of pinning docetism on the apostle, we briefly will indicate the impressive amount of help Paul affords the quest for the historical Jesus. E. Renan said that one could construct a small Life of Jesus from Pauline sources. First, it is possible that Paul met Jesus and that the "we once knew" of 2 Cor. 5:16 intends this meeting, especially since it is compared with the knowledge he had of other people. Second, the narratives of the Damascus road conversion indicate that Paul actually saw and heard Jesus (Acts 9:1-19; 22:4-16; 26:9-18). Third, there may be a hint of the Virgin Birth in Rom. 1:3 compared with the Luke account, as G. A. Danell suggested (*Studia Biblica*, IV [1951-52], 94ff.); at any rate, Christ took flesh (Rom. 8:3). Fourth, He was born of a woman. Fifth, He was made under the law (Gal. 4:4). Sixth, He was a teacher (1 Tim. 5:18). Seventh, He preached the kingdom (Rom. 14:7). Eighth, He was the embodiment of love, for as Jonathan Edwards has said (*Charity and its Fruits*), 1 Cor. 13 is a brief biography of Jesus. Ninth, He died (Acts 20:28). Tenth, He was raised bodily from the dead (1 Cor. 15). Eleventh, He was exalted above all (Phil. 2:11).

In fact, Paul was interested in the humanity of Christ because he was especially interested in His divinity. The mind of Christ Jesus was His willingness, although divine, to condescend to become man. The emphasis in such a passage as Phil. 2:5ff. is that Christ's condescension was so very great precisely because, as God, He is so very great, and as man, obedient to death, He became so very low. Had He been merely like God the stoop would not have been so enormous; had He been merely like man there would have been no condescension at all.

V. Man and Sin.–A. Man as Creature. "God created man in his own image" (Gen. 1:27). Paul teaches this, e.g., in 1 Cor. 11:7: "[Man] is the image and glory of God; but woman is the glory of man." S. V. McCasland (*JBL*, 69 [1950], 85f.) inferred that the apostle denied the account in Gen. 1:26f. that woman, too, was created in the divine likeness in favor of the Gen. 2:4–3:24 account. The two Genesis accounts, however, do not contradict but rather explicate one another. Moreover, in 1 Cor. 11:7 woman is the glory (*dóxa*) of the man, who is the glory of God. The resemblance of man and woman to God is the same here as in Gen. 2:4–3:24, which shows that Eve, no less than Adam, was created by God, of the very substance of her husband (which, if we wish to quibble, is a much higher stuff than the dust of the earth from which he was made, Gen. 2:7). Furthermore, one could infer from Eph. 4:24 that *ánthrōpos* (man in general, not man as male) was created in the image of God.

Did mankind lose the image of God by the fall? While Rom. 5:12-21 does not explicitly declare that through Adam's disobedience the divine image was lost, still, if condemnation, death, and judgment do not involve this image, what do they involve? As will be shown below, mankind's present state of *sárx* cannot be the state of a person created in the image of Paul's God. In Eph. 4:24 the work of grace consists of the creation of the new man *katá theón* ("put on the new nature, created after the likeness of God in true righteousness and holiness"; cf. Col. 3:10). As shown above, Paul received the OT as the *graphḗ* of God. Since it teaches that God created mankind in His own image, the statement in Ephesians appears to be merely a definition of the contents of that image.

What is the nature of man? Paul's man has (or is) a vast set of characteristics, qualities, faculties, such as: *thélēma* (will, 1 Cor. 7:34; Eph. 2:3); *kardía* (heart, 1 Thess. 2:4; Rom. 8:27; 1 Cor. 14:25); *noús* (mind, Rom. 1:28; 1 Cor. 14:15; Phil. 4:7); *pneúma* (spirit, Rom. 8:4; Gal. 5:16; 1 Thess. 5:23); *sárx* (flesh, Rom. 7:18; 1 Cor. 1:26; Gal. 2:16; Eph. 2:3; Col. 1:24); *syneídēsis* (conscience, Rom. 2:15; 2 Cor. 4:2; 5:11); *sôma* (body, Rom. 12:1; 1 Cor. 6:13; Gal. 6:17); *psychḗ* (soul, Rom. 2:9; 1 Cor. 15:45; 1 Thess. 2:8).

B. Man as Sarx. Probably the most important and certainly a unique Pauline description of mankind is *sárx*. *TDNT* (VII, *s.v.* σάρξ κτλ. [Schweizer, Baumgärtel, Meyer]) devotes no less than fifty-four pages to this word, of which fourteen deal expressly with Paul's doctrine (including Colossians, Ephesians, and the Pastorals). E. Schweizer found seven (a couple more, but not so important, in the Epistles particularly mentioned) Pauline uses of this one word: first, body; second, earthly sphere; third, "flesh and blood" or humanity; fourth, object of human confidence; fifth, *katá sárka* with the verb; sixth, subject of sin; seventh, the overcome or subdued flesh. W. D. Stacey (*Pauline View of Man* [1956], pp. 183ff.) listed characteristics corresponding to the first, third, and sixth above. W. P. Dickson tended in the same direction with an emphasis on what the word does not mean (*St. Paul's Use of the Terms Flesh and Spirit* [1883], pp. 310ff.). A. Ritschl stressed the whole man in opposition to the divine *pneúma*, (pp. 69ff.; cf. Dodd, p. 57). E. Schweizer and others have seen that emphasis as especially Colossian ("the essence of God-alienated man"). J. A. T. Robinson neatly distinguished between *sárx* as "in the world" and as "for the world" (which is the creature's sinful "distance from God," p. 25). Despite the many texts and the equally numerous minute scholarly studies of them, it is still difficult to improve upon Calvin's comment on Rom. 7:18: "Under the term *flesh* Paul always includes all the endowments of human nature, and everything that is in man, except the sanctification of the Spirit.... Both terms, therefore, *flesh* and *spirit*, are applicable to the soul. The one relates to that part which has been regenerated and the other to that which still retains its natural affection." Man as *sárx* is man-as-man, or man-as-sinner, but never in the vast array of texts referring to a mere human does *sárx* mean man-as-saint.

Here a postponed point in Paul's doctrine of Christ's

humanity must be faced. Christ took *sárx* (Rom. 8:3), was manifested in the *sárx* (1 Tim. 3:16), and in *sárx* was crucified (Col. 1:22). Because *sárx*, whenever it is viewed morally by Paul, comes under condemnation, the question arises whether even Christ, as *sárx*, is a sinner. It cannot be doubted that Paul's own reply to such an insinuation from his teachings would be a vehement "God forbid!" But we must be more academic. First, Paul nowhere said that Christ is a sinner. Second, on the contrary, Christ "knew no sin" (2 Cor. 5:21). Third, He is specifically contrasted with Adam—who did sin, was disobedient, and brought death into the world—as the one who did not sin, was obedient, and brought justification (Rom. 5:12-14). Fourth, Rom. 3:25f.—Christ Jesus, "whom God put forward as an expiation by his blood, to be received by faith. This was to show God's righteousness, because in his divine forbearance he had passed over former sins; it was to prove at this present time that he himself is righteous and that he justifies him who has faith in Jesus"—defies interpretation if Jesus Himself were unrighteous. Fifth, it has been shown that *sárx* is sometimes used of man-as-man without the necessary connotation of man-as-sinner. Sixth, the assumption, therefore, that man-as-man (*sárx*) must be man-as-sinner (*sárx*) is gratuitous.

Other important terms in Pauline psychology are *sōma*, *psychḗ*, and *pneúma*. *Sṓma*, while sharing much of the same territory with *sárx*, is never intrinsically evil, just as *psychḗ* is never intrinsically good (cf. Rom. 12:1 and 2:9); their mixed characters show that Paul's theology is biblical, in contrast to Greek psychology-morality (E. J. Price tended to select only those Pauline passages that superficially served his purpose of establishing a parallel between Paul and Plato). J. A. T. Robinson's statement, "One could say without exaggeration that the concept of the body forms the keystone of Paul's theology" (p. 9), is based on the confusion of a figure of speech with a figure (cf., e.g., Rom. 12:1, where *sōma* is patently a synecdoche for the total personality). The trichotomy suggested by 1 Thess. 5:23 ("spirit [*pneúma*] and soul [*psychḗ*] and body [*sṓma*]") is precluded by the interchangeability of *pneúma* and *psychḗ* in other texts (cf. 1 Cor. 14:14, "my spirit [*pneúma*] prays"; Eph. 6:6, "doing the will of God from the heart [*psychḗ*]"; Phil. 1:27, "stand firm in one spirit [*pneúma*]"; Col. 3:23, "work heartily [*psychḗ*], as serving the Lord"). The denial of dichotomy by many moderns who would read an existentialist-*gestalt* pattern into Paul is precluded by 2 Cor. 5:1ff.

C. Man as Sinner. The discussion of *sárx* above serves incidentally as an introduction to the Pauline doctrine of sin. That the same word could be used for man-as-man and for man-as-sinner is a sure cue. The linguistic use of *sárx* suggests that man could become something other than he was created (man-as-*sinner*) but yet not altogether other (*man*-as-sinner). But the persistent use of *sárx* for man-as-sinner suggests that, at least for the present, this is his normal state. The apostle by no means leaves readers to inference and conjecture. The man-as-sinner meaning of *sárx* is abundantly exhibited (Rom. 7:18, 25; 8:13; 13:14; Gal. 5:16, 19f.; cf. *TDNT*, VII, 131-34 [Schweizer]).

If sin is man's present state, how did he fall into it? Through Adam, is Paul's plain answer (Rom. 5:12ff.; 1 Cor. 15:22). As C. Hodge neatly summarized: "One thing is clear—Adam was the cause of sin in a sense analogous to that in which Christ is the cause of righteousness" (comm. on Romans [rev. ed. 1886; repr. 1976], p. 146).

Paul's most exhaustive post mortem on fallen mankind is Eph. 2:1-10. Man is dead in the sphere of outward transgressions and inner principles; accordingly he goes on and on in the course of an evil world (v. 1) under the dominion of Satan (v. 2). Not only were the gentiles thus depraved; the people of God, the Jews, also served the flesh, even in the area of the mind, with the result that all people were, not by circumstances but by nature, not in relation to mankind but in relation to God, "children of wrath" (v. 3). Verses 4-7 show that nothing less than the resurrecting power of Christ was used to make such spiritual corpses live. Many modern scholars question Paul's authorship of Ephesians. M. Barth, however, said of the differences of Ephesians from the rest of the Pauline corpus, which cause many to doubt its authenticity: "Only the master himself was free...not to follow what may look like a party's platform. An imitator would have wished to give the impression of being a true Paulinist" (*Interp.*, 17 [1963], 3; cf. *Ephesians* [*AB*, 1974], 36-50). Thus it is necessary to indicate that Paul renders the same negative verdict against fallen man elsewhere, especially in Rom. 3:10-20.

VI. Redemption. *—A. Righteousness of God.* The righteousness of God (Gk. *dikaiosýnē theoú*) is the key concept for Paul's doctrine of redemption. Since in the gospel the righteousness of God is revealed (Rom. 1:17), defining the *dikaiosýnē theoú* is of crucial importance. Some scholars construe this expression as meaning the righteousness that God bestows on the believer, whom He approves accordingly. Against this view, to which no grammatical objection may be urged, is its logical incoherency. If this righteousness is something wrought in the believer it must possess an objective character that is inherent in the term. Thus the righteousness in the believer is the righteousness that is in God initially. Righteousness is communicable to the believer, but it is *God's* righteousness that is communicated.

More particularly, the *dikaiosýnē theoú* is communicated to persons through the work of Christ. For God to bestow righteousness on unworthy persons is, on the face of it, the unrighteousness of God. The Judge of all the earth would appear to do wrong. What was a stumbling block to the Jews in Paul's time (1 Cor. 1:23) had constituted something of an obscurity from the time that sinful persons were first saved. To this the apostle speaks directly in Rom. 3:24f.: "Christ Jesus, whom God put forward as an expiation [Gk. *hilastḗrion*] by his blood, to be received by faith. This was to show God's righteousness, because in his divine forbearance he had passed over former sins." Here Paul's reasoning seems clear. God is just, not unjust, in passing over (or forgiving, Gk. *páresis*) sins done in ancient times, because Christ is now set forth as the propitiation, i.e., Christ is the divine basis (retroactive, in this instance) for the forgiveness of sins. If this action "was to show God's righteousness," then the righteousness of God must have been transmitted from the *hilastḗrion* to the sinner. If the sinner did not thus become righteous (by definition, he could not have made himself such), he would have been unrighteous still, and for God to regard him otherwise would have made Him unrighteous.

Thus the context, showing forth God's righteousness, appears to have much more bearing on the meaning of *hilastḗrion* than some commentators have noticed. Christ's blood is seen as a sacrifice that satisfies divine justice; it propitiates God, who thereby may accept the sinner without compromising His righteousness, and in fact it forms a display of His righteousness. If the *hilastḗrion* is not construed in such a manner, its relevance to its context is difficult to see.

Paul speaks less fully but even more pointedly to this matter in 2 Cor. 5:21, "For our sake he made him to be

sin who knew no sin, so that in him we might become the righteousness of God." This statement is unclear unless one assumes, as one may, that Paul has in mind here what he spells out in Rom. 3:25. Denying Paul the analogy-of-faith principle may lead to an absurd interpretation well illustrated by Sabatier: "...God sees in Christ that which is in us,—namely, sin; and in us that which is in Christ—namely, righteousness. No doubt this is a logical contradiction" (p. 330). Again, what reason is there for referring to the "blood of God" in Acts 20:28 except to make clear the righteousness of God in the "purchase" of the Church?

Other Pauline terms also indicate or are congenial to the idea that Christ is the "satisfaction" that makes God righteous in "reckoning" sinful believers in Christ as righteous. On the use of Gk. *katallásein* see D. Whiteley (*JTS*, 8 [1957], 241), who admitted at least the possibility of the substitutionary meaning. On Gk. *lýtron* and cognate forms see Morris, *APC*, pp. 26ff.; on *hypér* see A. T. Robertson, *Grammar of the Greek NT* (5th ed. 1931), pp. 573f.; and E. Mayser, *Grammatik der Griechischen Papyri aus der Ptolemäerzeit*, II, 2 (1934), 460, cited by Morris, p. 62.

B. Justification by Faith. God's righteousness received in Christ is man's justification (Gk. *dikaíōsis*). Just as this doctrine was the *articulus stantis aut cadentis ecclesiae* (doctrine by which the Church stands or falls) of Luther, so for Paul it constituted the gospel, "for in it the righteousness of God is revealed through faith for faith" (Rom. 1:17). Actually, however, the term *dikaiosýnē theoú* is used only eight times and exclusively in Romans, Galatians, and Philippians (ch. 3). Many have noticed that these passages are concerned with Judaizers (A. B. Bruce, *St. Paul's Conception of Christianity* [1894], pp. 46f.; J. Jeremias, *Expos.T.*, 66 [Oct. 1954–Sept. 1955], 368). We conclude that Paul stresses this doctrine among Judaizers because of their legalistic tendencies and leaves the theme less developed elsewhere not because the doctrine is unimportant but because its further exposition is unnecessary. At any rate, for Paul the *en christō* relationship to justification is so close as to be almost identical. To be in Christ is to be in righteousness; Christ is our righteousness (1 Cor. 1:30; cf. Rom. 8:31f.). Paul's steps to salvation seem to be: first, man as *sárx* is against the *dikaiosýnē theoú* and therefore under *orgḗ theoú*; second, Christ, who is God and of course the righteousness of God, took humanity and became a "propitiation" ("became sin") for sinners; third, sinners coming to Christ (*en christō*) come into Christ's (God's) imputed righteousness and out of their own expiated sinfulness.

Paul calls this coming to Christ *pístis* (faith). The frequent occurrence of this term in Pauline letters emphasizes the "trust" (fiducial) aspect of faith. So clear is this stress that A. Deissmann saw the term as equivalent to union with Christ: "of Jesus Christ" is the "mystical genitive" (*Paul* [Eng. tr., 2nd ed. 1926], p. 163). Five different metaphors are used to express this central truth (pp. 167f.). Calvin used the analogy of marriage, which unites one person with another (*Inst.* iii.13). Jonathan Edwards used the same simile of marriage (*Works* [Dwight], V, 261). F. Neugebauer, rightly rejecting Bultmann's all-too-externalistic notion that faith is obedience (*In Christus* [1958], p. 158), insisted that it is faith alone and perceptively noted that Paul almost never speaks of faith in Christ, probably because it is so obviously understood as to be a tautology (p. 173; "for *en christō* defines what *pístis* means!" [p. 174]).

C. Law and Grace. The relation of the law to justification, both before and after, is a prime concern of Paul's. The keeping of the *nómos* (law) is at once a preparation for the *dikaiosýnē theoú* and a consequence of it. The law was a preparation for the gospel, the custodian of believers until the heir came (Gal. 3:24) because, Paul says, "I through the law died to the law, that I might live to God" (2:19). Thus the propaedeutic use of the law is to convict of sin, to kill to the law, to demonstrate that salvation cannot come from the law. "By the works of the law shall no one be justified" (2:16). "All who rely on works of the law are under a curse....No man is justified before God by the law (3:10f.). "If a law had been given which could make alive, then righteousness would indeed be by the law. But the scripture consigned all things to sin, that what was promised to faith in Jesus Christ might be given to those who believe" (vv. 21f.; cf. Rom. 3:19f.). Paul's own poignant experience with the law seems to be set forth in similar terms in Rom. 7:9-11: "I was once alive apart from the law, but when the commandment came, sin revived and I died; the very commandment which promised life proved to be death to me. For sin, finding opportunity in the commandment, deceived me and by it killed me."

The keeping of the law is the consequence of, no less than the preparation for, the righteousness of God. Now endowed with the righteousness of God, adopted into the family of God (Gal. 4:6f.), having the Spirit of God (Rom. 5:5), the Christian begins to fulfil the law. The antinomian accusation, "Do we then overthrow the law by this faith?" is answered by Paul with an expostulation, "By no means! On the contrary, we uphold the law" (Rom. 3:31). A fuller explanation is given in Rom. 6:1-4 ("How can we who died to sin still live in it?").

Although justified Christians are for the first time fulfilling the law (Rom. 8:3f.), they are not doing so perfectly. Even Paul himself, in whom the grace of God abounded most abundantly and who could command the Philippians to "join in imitating me" (3:17), regarded himself not as having attained but merely as pressing on (Phil. 3:12, 14). When he examines this imperfection more minutely and autobiographically, he reveals it as an intensely agonizing struggle. One can wish that a host of scholars such as A. Ritschl (pp. 69ff.), W. G. Kümmel (*Man in the NT* [Eng. tr. 1963], pp. 49ff.), and P. Althaus (*Paulus und Luther über den Menschen* [1938], p. 41), who viewed Rom. 7:14f. as an experience of the burdened sinner rather than of the redeemed saint, as Augustine once did, would see, as Augustine later did, that this passage cannot describe anyone but a true believer (cf. A. F. N. Lekkerkerker, *Römer 7 und Römer 9 bei Augustin* [1942]).

We submit several reasons for the apparent necessity of this interpretation. First, the description of Rom. 7:13f. is not basically different from the indisputably Christian experience of Phil. 3:12, 14, where Paul does not consider himself as having attained but agonizes on, or from 1 Cor. 9:27, where he must continue savagely to beat his body lest while he preach to others he himself be a castaway. Second, as noted previously, fallen man is hostile to God, dead in the realm of trespasses and sins, seared in conscience. Such a person does not strive after holiness as is depicted in Rom. 7:13f. Third, Paul specifically states in 3:11 that no natural, unconverted person seeks after God. Fourth, 7:25 shows that the agonizing person of v. 24 is delivered through Jesus Christ his Lord. If v. 25 was to refer to some other state of the person, it would be difficult to explain why it immediately follows the agonized query: "Who will deliver me from the body of this death?"

Rom. 8:1 simply continues the consolation of 7:25, assuring Paul and all saints who are in Christ Jesus that there is "now no condemnation." In other words, 7:13f. poignantly states in terms of Paul's own experience the imperfection of sanctification in this present world and at

the same time reveals this imperfection to be consistent with the assurance of future (perfect) deliverance and present justification. The passage may be seen as an expanded autobiographical commentary on Phil. 2:12f., "Work out your own salvation with fear and trembling, for God is at work in you."

While thoroughly repudiating legalism, and intransigently inculcating evangelical doctrines of justification and sanctification, Paul not only insists that the law as a standard will be kept by those who are dead to the law as a way of salvation (cf. Rom. 3:21 and 6:14), but also spells out the details. That is, a Christian informed with the Spirit of Christ has moral, legal righteousness exceeding that of the scribes and Pharisees (cf. Mt. 5:20). At this point Paul's moral codes in Gal. 5:19-24; 1 Cor. 6:9f.; Phil. 4:8f.; Eph. 6:10-20; etc. should be consulted.

Thus Paul sets forth Christianity as a religion of pure grace with an unbending perfectionist moral ideal. While the most strenuous efforts must constantly be made, serenity fills the believer's soul with the knowledge that there is now no condemnation. One is utterly free of the bondage of the law as a system while one strives after full conformity to its most rigorous demands. While the law as a master is killed, it is established in its rightful place as the servant of the grace of God. Sailing successfully between the Scylla of legalism and the Charybdis of antinomianism, Paul's Christianity is on the high seas of lawful (the element of truth in legalism), free (the element of truth in antinomianism) evangelicalism (the gospel lacking in both legalism and antinomianism).

VII. The Church.—We have noted above that justification comes about *ek písteōs*, which is another way of saying *en christṓ*. These terms describe the justification of the individual. If one considers that many individuals have this experience, one has Paul's doctrine of the Church, i.e., the "body" of Christ, the body of believers.

A. Its Nature. The nature of this body or Church consists of Christ and believers vitally and inseparably but not indistinguishably united together. P. Benoit (*RB*, 63 [1956], 30) showed that this doctrine is taught in Paul's earlier Epistles but reaches full development only in Colossians and Ephesians. L. Cerfaux's statement that this Church "is neither Jewish or non-Jewish, but a *tertia gens*" (*Christ in the Theology of St. Paul*, [Eng. tr. 1959]; cf. N. Flanagan, *CBQ*, 19 [1957], 479; M. Barth, "Das Volk Gottes," in M. Barth, *et al.*, *Paulus — Apostat oder Apostel?* [1977], pp. 45-134) requires modification. While Paul's Church is not exclusively Jewish or non-Jewish, it is continuous with the OT Jewish church (Rom. 11:17ff.), which was not itself strictly "Jewish." The notion of a *tertia gens* would give an erroneous idea indeed, for the apostle knew of only one people of God in all ages, not even two, much less three. O. Cullmann (*Christ and Time*, pp. 186f.) and O. Perels (*TLZ*, 76 [1951], 396) rightly observed, further, that the Church of Ephesians and Colossians is no different from Paul's Church elsewhere, but it is viewed from the standpoint of union with Christ rather than that of its struggle with the world.

One comes to be in the body of Christ internally, by believing, and externally, by baptism and the Lord's Supper. The discussion above showed that faith or trust was tantamount to union with Christ. The apostle, however, speaks somewhat similarly of baptism and the eucharist. In Gal. 3:27 he writes: "For as many of you as were baptized into Christ have put on Christ" (cf. also Rom. 6:3; 4:11; Col. 2:12; 3:4; 1 Cor. 10:7). These and other such strong sacramental teachings understandably led Flanagan (p. 483) to write: "It is union with Christ's physical body that makes us Christ's mystical body." This idea of union, however, is manifestly not Paul's intention, for then there would be an identification of all Israel as true Israelites, which he positively repudiates by saying: "For not all who are descended from Israel belong to Israel, and not all are children of Israel because they are his descendants....This means that it is not the children of the flesh who are the children of God, but the children of the promise are reckoned as descendants..." (Rom. 9:6-8). If Flanagan were correct, the apostle's clear differentiation between circumcision of the flesh and of the heart would be impossible (Rom. 2:28f.). Likewise, if communing in the body and blood of the Lord were identical with receiving the eucharist, Paul could not warn the Corinthians against eating and drinking damnation to themselves (1 Cor. 11:29).

B. Visible and Invisible. Does Paul allow that a person may have the internal experience without the external sacrament or the sacrament without the experience? That is, does Paul conceive of an "invisible" as well as a "visible" Church? In Ephesians, the principal Epistle for his doctrine of the Church, Paul apparently distinguishes those who are truly Christians, i.e., who are in the mystical body of Christ, from those who merely profess Christianity and are in the visible Church only. Paul addresses the Epistle to "saints" (1:1) but writes in 4:21: "assuming that you have heard about him [Christ] and were taught in him, as the truth is in Jesus." The RV has essentially the same translation, and Goodspeed reads: "if you have really become acquainted with him and have been instructed in him." It is clear that Ephesians is referring to hearing not in the ordinary sense but in a mystical sense, which Goodspeed renders as "become acquainted with." Thus not all in the Church have necessarily "heard" Christ, have become His sheep (cf. Jn. 10:4), are necessarily Christians, or are in the mystical body of Christ. Paul conveys the same idea in Eph. 6:24: "Grace be with all who love our Lord Jesus Christ with love undying"; not all in the Church necessarily love the Lord Jesus Christ in sincerity, i.e., as true Christians; see also Rom. 9:7; 2 Tim. 2:20.

Christ, whom Paul recognized as the authoritative Son of God, also taught this mixed character of the visible church. Not all the fish in the gospel net are good (Mt. 13:47f.); not all on the gospel threshing floor is true wheat (Mt. 3:12). Not all in the field are wheat, some are tares (Mt. 13:24ff.); Not all who profess to be waiting for the Son of man are wise virgins, some are foolish and will be rejected (Mt. 25:1ff.); "Not every one who says to me, 'Lord, Lord,' shall enter the kingdom of heaven" (Mt. 7:21). Thus it seems clear that not all who are in the visible church are of it, not all who have heard of Christ have "heard" Christ, not all who are outwardly baptized are buried with Christ, and not all who partake of the eucharist discern the Lord's body (1 Cor. 11:29).

Paul's prison Epistles, especially Ephesians, reveal other characteristics of the Church as well as develop the above ideas of it. Note, for example, how full is the discussion of the Church in Eph. 2:11–4:16: the Church's unity of Jews and Gentiles, of Christ and believers is expounded in 2:11-22, its mystery in 3:1-13, and its unified, diversified, edified membership in 4:1-16.

VIII. Eschatology.—A. Parousia. Parousia, although it is concerned primarily with the end time, was Paul's emphasis in his earliest ministry. Thus the Thessalonian letters contain the fullest treatment of this doctrine; this doctrine, unlike others, did not change or even undergo basic development during the apostle's ministry (J. A. Beet, *Expos.*, 4th ser., 10 [1894], 110). Gk. *parousía* appears to derive from *páresti*, "be present." Although Christ's pre-

sence or appearing is the central conception (1 Thess. 1:10; 2:19; 3:13; 4:15; 5:23; 2 Thess. 2:1, 8f.; 1 Cor. 15:23), it is visible and audible and associated with the judgment of the "Son of Destruction" as well as with the resurrection and salvation of believers.

B. Resurrection. Paul teaches in 1 Cor. 15:44 that the resurrection of Christ was corporeal and implies that man's resurrection will also be. Gk. *sōma* here may mean more than mere body but never less than that. The resurrection produces a "spiritual body." J. P. Lange (comm., *in loc.*) correctly explained Paul's thinking in this passage: "The phrase natural body indicates the body with its vital principle or *psuche* that relates it to the present material or terrestrial order. On the other hand, the spiritual body is the body with its vital principle (*pneuma*) that relates it to the new or celestial order." Paul's statement in v. 50, "Flesh and blood cannot inherit the kingdom of God," underlines his doctrine that the *sōma* will not be as now but will change into a spiritual body in which it will inherit the kingdom of God. R. Bultmann (H. W. Bartsch, ed., *Kerygma und Mythos,* I [3rd ed. 1954], 144) and K. Barth agreed on Paul's teaching about the resurrection of Christ; Barth wrote, "To be exegetically accurate we must understand corporeally risen; and thus, if we are not to make so bold as to substitute for the apostolic witness another one altogether, there cannot be any talk of striking out the empty grave." Again, "The tomb is doubtless empty, under every conceivable circumstance empty!" (*Resurrection of the Dead* [Eng. tr. 1933], p. 138). Even a radical thinker like S. J. Case (*Origins of Christian Supernaturalism* [1946], pp. 192f.) concurred on this interpretation of Paul.

Paul's Damascus road experience cited above also implies a bodily resurrection of Christ. First, the appearance was visible, being brighter than the noonday sun and blinding Paul. Second, Jesus' voice was heard by all, though understood only by Paul. Third, Paul was qualified to become an apostle, a prerequisite for which was that a person had "seen the Lord." Finally, in an important passage (Rom. 8:23) Paul teaches the "redemption of our bodies."

C. Judgment. Paul provides no general descriptive picture of the final judgment (H. B. Carré, *Paul's Doctrine of Redemption* [1914], p. 156) like Our Lord's teaching, especially in Mt. 25:31ff., probably just because Christ did provide one. But Paul often refers to that climactic event (1 Thess. 5:3; Rom. 2:9; 6:23; 1 Cor. 3:17; 5:5; 6:9; 15:50; Phil. 1:28; 3:19) at which Christ Himself will be the judge (Rom. 2:16; 1 Cor. 4:5; 2 Cor. 5:10; Acts 17:31).

How is the judgment related to the wrath of God (Gk. *orgē toú theoú*)? E. Stählin (*TDNT,* V, 423) stated, "Wrath is an essential and inalienable trait in the biblical and NT view of God"; he added that in most instances *orgē* refers to judgment, at which point it is concentrated. God's actual wrath can no more be denied than his *agápē* (love) and *éleos* (mercy). In support of this view Stählin cited Rom. 1:18; 9:22 and then proceeded, without warrant, to suggest that wrath and love are not mutually exclusive. On the contrary, these must be mutually exclusive not merely in the basic meaning of terms but in the Pauline and biblical doctrine of the diverse destinies of people determined by the judgment. These diverse destinies have been shown above. Now we must draw the inference that wrath and love are not opposite sides of the same coin, for then they would lead to the same rather than diverse destinies. If wrath were a function of love, it would produce the same ultimate felicity which Paul, so far from envisaging, categorically denies.

Thus we have seen that the Resurrection will follow the Parousia and that at the final judgment the wrath of God will be revealed (Rom. 1:18) and will begin to burn to the uttermost against all who are not in Christ. For those in Christ—e.g., Paul himself—death will be gain (Phil. 1:21) and the future judgment will be the great acquittal and introduction to the perfect state.

IX. Summary.–Paul's theology logically begins with a natural knowledge of God, who infallibly reveals Himself in sacred Scripture as a divine trinity. Human sin and judgment are such that redemption is possible only through the incarnation of the second person of the trinity, the Lord Jesus Christ, who identified Himself with the guilt of His people, who, in turn, are justified only by faith in Him. But when by faith they are united with Christ they not only begin to produce the ethical fruits of this union but constitute the true body of Christ, the Church. As such they live in the Church and in the world until the great separation and judgment, occurring after the Parousia of the Son of God, the Savior and Judge of the end times.

J. H. WEBSTER J. H. GERSTNER

PAULUS pol'əs, **SERGIUS** sûr'ji-əs [Gk. *Sergios Paulos*] (Acts 13:7). Proconsul of Cyprus (A.D. 47/48). Paul, Barnabas, and Mark met him in Paphos where he summoned them to tell him "the word of God." He was the first Roman official mentioned in Acts to hear the gospel. Elymas, known also as BAR-JESUS, sought to turn the proconsul from the faith. After seeing Elymas blinded in accordance with Paul's curse (Acts 13:9-11), Sergius Paulus "believed . . . , for he was astonished at the teaching of the Lord" (v. 12). The nature of his belief (i.e., whether he became a Christian) is disputed (cf. "believed" in Acts 8:13 — Simon Magus).

The *nomen* Sergius and the *cognomen* Paulus (more correctly Paullus) were not uncommon. Luke failed to give his *praenomen.* This has led to much speculation regarding his identity. Three different inscriptions must be considered. (1) *Inscriptiones Graecae ad res Romanas pertinentes,* III, 930, found at Soli on the north coast of

Cyprus, gives a dateline "in the proconsulship of Paulus." The earliest this Greek inscription can be dated is A.D. 50, making this consulship too late to fit into Pauline chronology. (2) A Latin inscription (*CIL*, VI, 31545) refers to a Lucius Sergius Paullus, one of the curators of the Banks of the Tiber during the reign of Claudius. Many scholars surmise he later became proconsul of Cyprus and is to be identified with the Sergius Paulus of Acts 13:7. Ramsay argued for this identification and maintained that L. Sergius Paullus became a well-known Christian. But this is speculation; no evidence has been found to prove (or disprove) that this Lucius Sergius Paullus ever went to or was proconsul of Cyprus. If he was his term would have begun in A.D. 48, a date that seems incompatible with Pauline chronology. (3) In its restored form a fragmentary Greek inscription from Kythraia in north Cyprus mentions a Quintus Sergius Paulus as proconsul, probably during the reign of Claudius (*Inscriptiones Graecae ad res Romanas pertinentes*, III, 935). It is possible that the Sergius Paulus of Acts 13:7 is this man (see Van Elderen).

Bibliography.—W. M. Ramsay, *Bearing of Recent Discovery on the Trustworthiness of the NT* (1915), pp. 150-172; B. Van Elderen, "Some Archaeological Observations on Paul's First Missionary Journey," in W. W. Gasque and R. P. Martin, eds., *Apostolic History and the Gospel* (*Festschrift* for F. F. Bruce, 1970), pp. 151-56. J. J. HUGHES

PAVEMENT [Heb. *riṣᵉpâ, maʿᵃsēh, malbēn*]. A surface made firm and level to facilitate movement, or the materials used for this purpose. The most common of the Hebrew words is *riṣᵉpâ* (2 Ch. 7:3; Ezk. 40:17f.; 42:3), which originally referred to the fitting together of stones and could include the "mosaic pavement" of Est. 1:6.

In Ex. 24:10 the Hebrew term is *maʿᵃsēh*, lit. "work," so that the whole expression *maʿᵃsēh liḇnaṯ hassappîr* means literally "a work of flagstone of sapphire."

In Jer. 43:9 RSV "pavement" appears in a passage so difficult that the LXX left it untranslated. Both the word translated "mortar" (Heb. *meleṭ*) and the word translated "pavement" (Heb. *malbēn*) are problems. The first is a hapax legomenon of uncertain meaning. It could refer to the clay used in making bricks as well as to the same material used between bricks (*see* MORTAR). Heb. *malbēn*, which otherwise means "brick kiln," "brick mold," or "brick making," here seems to mean "terrace of bricks" (KoB, p. 527). Some commentators think that the two words may be variants, so that J. Bright translates "in the clay flooring [?], in the pavement [?]" (comm. on Jeremiah [*AB*, 1965], pp. 259, 263; cf. also J. A. Thompson, comm. on Jeremiah [*NICOT*, 1980], p. 670).

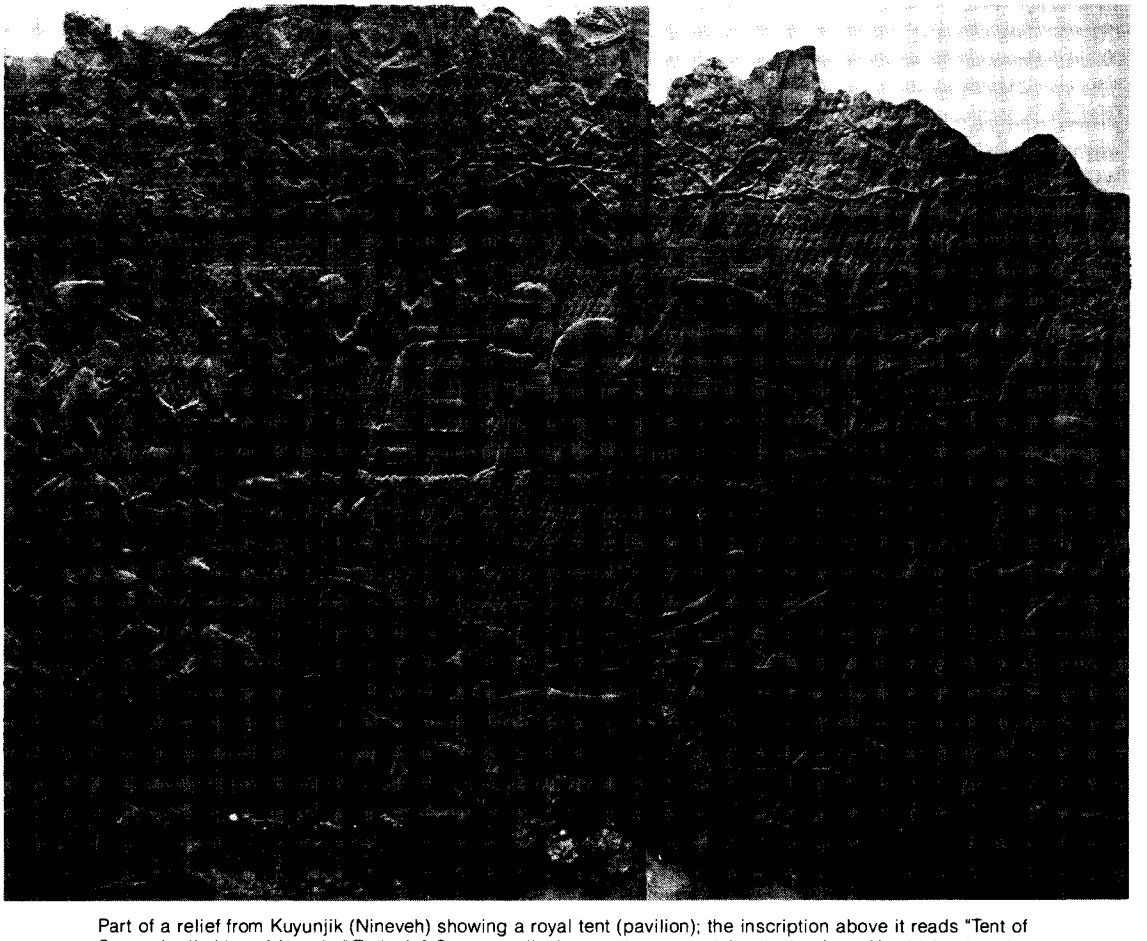
For Jn. 19:13 *see* PAVEMENT, THE. E. W. S.

PAVEMENT, THE [Gk. *lithóstrōton*[(Jn. 19:13). The part of the praetorium in which Pilate judged Jesus, also called GABBATHA (Gk *Gabbatha* perhaps for Aram. *gabbaṯā'*).

The Greek word is an adjective meaning "paved with stoneblock," "made of tesserae," hence, of a mosaic or tessellated pavement. As a noun designating an area of the praetorium the term obviously refers to a pavement, either of large stones or tesserae. Albright interpreted Aram. *gabbaṯā'*, apparently reflecting some feature of the floor or area, as "ridge," "elevated terrain" (*AP*, p. 245). R. E. Brown (*Gospel According to John*, II [*AB*, 1970], 882), noting that John did not intend the Greek and Aramaic words to be equivalents (cf. Jn. 5:2), favored this meaning for the Aramaic and cited a parallel from Josephus (*BJ* v.2.1 [51]).

The public trial of Jesus could not be conducted in the palace proper lest the Jews defile themselves before the feast. Hence Pilate located his JUDGMENT SEAT outside in the courtyard where this pavement was (Jn. 19:13).

In the excavations of the Fortress Antonia located NW of the temple area an impressive pavement of large stone blocks was uncovered (Aline de Sion, *La Forteresse Antonia* [1956], pp. 107-118). This discovery is one of the factors favoring the identification of the PRAETORIUM with the Fortress Antonia. This large central courtyard measures about 32 m. (104 ft.) E-W and 48 m. (156 ft.) N-S. The limestone blocks of the floor range in thickness from 25 to 51 cm. (10 to 20 in.); some are about 1 m. (3 ft.) square, and others are rectangles about 1 by 2 m. (3 by 6 ft.). The stones along the south side of the courtyard are grooved — apparently a roadway striated to prevent animals from slipping. Other stone blocks have inscribed outlines, possibly of games played by the soldiers stationed there (*ibid.*, pp. 119-142). Underneath the courtyard is a large double cistern about 14 by 51 m. (45 by 170 ft.) and about 9 m. (30 ft.) deep; channels in the pavement drained water from it into the cistern. The vaulted ceiling of the cistern supported the pavement above.



This well-constructed and large pavement found in what appears to be the Fortress Antonia seems to locate with some certainty the pavement of Jn. 19:13 and likewise the praetorium. *See also* JERUSALEM III.H.10.

B. VANELDEREN

PAVILION. Used several times by the AV and RSV to render Heb. *sukkâ* ("covert," "booth," or "tent"). In Job 36:29, RSV, it refers to the thick thunderclouds that screen God from human view (AV "tabernacle"; cf. AV 2 S. 22:12 par. Ps. 18:11 [MT 12]; *see* CANOPY). In Isa. 4:5, RSV (MT, AV, 4:6), it is a protective covering that will shield the restored city of Jerusalem from the sun and rain (AV "tabernacle"; NEB "shelter"). In the AV of Ps. 27:5 (RSV "shelter"; NEB "roof"); 31:20 (MT 21) (RSV "covert"; NEB "cover") "pavilion" is used figuratively of the security found in Yahweh's presence; some commentators see it as a specific reference to the tabernacle or temple as a place of refuge (see comms.). N. J. O.

PAW [Heb. *kap*] (Lev. 11:27); NEB FLAT PAW; [*yāḏ*] (1 S. 17:37); NEB omits; [*ḥāpar*] (Job 39:21). In Lev. 11:27 animals with soft paws (*kappîm*, lit. "palms") are distinguished from those with hooves. *Yāḏ*, the usual term for HAND, appears three times in 1 S. 17:37 in a common figurative expression ("from the hand of") denoting deliverance. The verb *ḥāpar*, used of the horse in Job 39:21, usually means to "dig" (e.g., Gen. 21:30; Dt. 23:13 [MT 14]) or "search out" (e.g., Josh. 2:2f.).

PAY; PAYMENT [Heb. *šālam*] (Ex. 21:36; 22:1, 4, 7, 9 [MT 22:37; 23:3, 6, 8]; Dt. 23:21 [MT 22]; 2 S. 15:7; 2 K. 4:7; Job 22:27; Ps. 22:25 [MT 26]; etc.); AV also RESTORE (Ex. 22:1, 4), PERFORM (Ps. 61:8 [MT 9]); NEB also "make good," REPAY, RESTORE, FULFILMENT, etc.; [*nāṯan*] (Ex. 21:19, 22; Nu. 20:19; 1 K. 5:6 [MT 20]; 2 K. 12:15 [MT 16]); AV also GIVE, BESTOW; [*šûḇ*] ("pay back," Gen. 50:15; Lev. 25:27; Prov. 24:29); AV REQUITE, RESTORE, RENDER, etc.; NEB also REQUITE; [*šāqal*] (Ex. 22:17 [MT 16]; 1 K. 20:39; Est. 3:9; 4:7); [*nāśā' ʿōneš*] ("pay the penalty," Prov. 19:19); AV "suffer punishment"; NEB "brings punishment"; [*ʾāśar*] (Dt. 26:12); AV TITHE; NEB "take (a tithe)"; [*gāmal*] ("pay back," Joel 3:4 [MT 4:4]); AV RECOMPENSE; [*kesep*] (Ex. 21:11; Job 31:39; Lam. 5:4); AV MONEY; NEB BUY; [*ʾeškār*] (Ezk. 27:15); AV PRESENT; [*qorbān*] (Lev. 22:18); AV OBLATION; NEB FULFILMENT; [Aram. *nᵉṯan*] (Ezr. 4:13); [Gk. *dídōmi*] (Mt. 22:17; Mk. 12:14f.); AV GIVE; [*apodídōmi*] (Mt. 18:25ff.; 20:8; Lk. 7:42; Rom. 13:7); AV also GIVE, RENDER; [*dapanáō*] ("pay [their] expenses," Acts 21:24); AV "be at (their) charges"; [*teléō*]

Part of a relief from Kuyunjik (Nineveh) showing a royal tent (pavilion); the inscription above it reads "Tent of Sennacherib, king of Assyria." To the left Sennacherib sits on a throne receiving the leaders of Lachish, whom he had just captured (Trustees of the British Museum)

(Mt. 17:24; Rom. 13:6); [*dōreán*] ("without pay," Mt. 10:8; 2 Th. 3:8); AV FREELY, FOR NOUGHT; NEB also WITHOUT COST, WITHOUT CHARGE; [*apéchō pánta*] ("I have received full payment," Phil. 4:8); AV "I have all"; NEB "I give you my receipt for everything."

Šālam, often used in the expression "pay (my) vows" (e.g., Dt. 23:21; 2 S. 15:7; Job 22:27; Ps. 22:25; 50:14; 61:8; 66:13), occurs in the piel with the meanings "make good (a vow)," "restore" (e.g., Ex. 22:1ff.), "reward." The RSV of Isa. 65:6 renders it "repay"; this idea is also implicit in the Hebrew of v. 7.

Šûḇ conveys the idea of returning or restoring something. The AV literally translates Lev. 27:8, "If he be poorer than thy estimation," but the RSV correctly interprets this as "If a man is too poor to pay your valuation"; i.e., if a man could not raise the amount set by Moses to redeem himself, he could have the priest set a value on him. This regulation made it possible for a poor man to make a special vow.

Greek *apéchō* is a technical term used in commercial transactions that means to receive a payment and to give a receipt for it. Only the church at Philippi had entered into such a "partnership" with Paul (cf. v. 15).

N. J. O.

PÊ pā [פ]. The seventeenth letter of the Hebrew alphabet, transliterated in *ISBE* as *p* with daghesh and as *p* without daghesh. It also came to be used for the number eighty. *See* WRITING.

PEACE [Heb. *šālôm*]; AV also FAVOUR, PROSPEROUS; NEB also SAFETY, FAREWELL, WELFARE, WELCOME, PROSPER(ITY), UNHARMED, GREETINGS, GOOD NEWS, SOUND, HARMONY, etc.; [*bᵉrāḵâ*] (2 K. 18:31; Isa. 36:16); AV "agreement . . . by a present"; [*mᵉnûḥâ*] (1 Ch. 22:9); AV REST; [*regaʿ*] (Job 21:13); AV MOMENT; [*mêšārîm*] (Dnl. 11:6); AV AGREEMENT; NEB MARRIAGE; [Aram. *šᵉlām*] (Ezr. 5:7; Dnl. 4:1 [MT 3:31]; 6:25 [MT 26]); NEB GREETINGS, PROSPERITY; [Gk. *eirḗnē*]; AV also REST, QUIETNESS; NEB also SAFE, TERMS, GOOD WISHES, BLESSINGS, HAPPILY, GOOD LUCK; [*siōpáō*] (Mk. 4:39); NEB HUSH; **HOLD ONE'S PEACE** [Heb. qal and hiphil of *ḥāraš*]; AV also HOLD ONE'S TONGUE (Est. 7:4); NEB also SAY NOTHING, MONTH (1 S. 10:27; emending to *ḥōḏeš*, following LXX), KEEP TO ONESELF, KEEP SILENCE, BE SILENT; [*dāmam*] (Lev. 10:3); NEB BE DUMBFOUNDED; [hiphil of *ḥāšâ*]; NEB also SAY NO MORE; **MAKE PEACE; BE AT PEACE; LIVE IN PEACE** [Heb. qal, hiphil, and hophal of *šālēm*]; NEB also COME TO TERMS, PROSPER; [*šālâ*] (Job 12:6); AV PROSPER; NEB BE LEFT UNDISTURBED; [Gk. *eirēneúō*] (Mk. 9:50; 2 Cor. 13:11; 1 Thess. 5:13); [*eirēnopoiéō*] (Col. 1:20); **GIVE PEACE** [Heb. hiphil of *nû(a)ḥ*] (1 Ch. 22:9, 18; 23:25;

2 Ch. 14:6f. [MT 5f.]); AV GIVE REST; NEB also SECURITY; **PEACEABLE; PEACEFUL** [Heb. *šālēm*] (2 S. 20:19); [*šālôm*]; AV also COUNSEL OF PEACE; NEB also TRANQUIL, CONCORD; [*šālēw*] (1 Ch. 4:40); [Gk. *eirēnikós*] (He. 12:11; Jas. 3:17); NEB also PEACE-LOVING; [*hēsýchios*] (1 Tim. 2:2); NEB QUIET; **PEACEABLY** [Heb. *šālôm*]; AV also IN PEACE; NEB KIND WORD, IN PEACE, WELL, AS A FRIEND, AMICABLY; **LIVE PEACEABLY** [Gk. *eirēneúō*] (Rom. 12:18).

I. In the OT.–The concept of peace in the OT is most often represented by the Hebrew root *šlm* and its derivatives. The noun *šālôm*, one of the most significant theological terms in Scripture, has a wide semantic range stressing various nuances of its basic meaning: totality or completeness. These nuances include fulfillment, completion, maturity, soundness, wholeness (both individual and communal), community, harmony, tranquillity, security, well-being, welfare, friendship, agreement, success, and prosperity.

Peace is often understood as the opposite of war (Eccl. 3:8; Ps. 120:7) or linked with the absence of war (Jgs. 11:13; 21:13; 2 S. 20:19; 1 K. 2:5; 4:24 [MT 5:4]; 2 Ch. 15:5; Ps. 35:20; Prov. 16:7; Jer. 12:12; 14:13; 28:9). In this sense, peace is desirable for nations (Jgs. 4:17; 1 K. 4:24 [MT 5:4]; 5:12 [MT 26]; 22:44 [MT 45]; Ezr. 9:12; Isa. 33:7), tribes or clans (Josh. 9:15; Jgs. 21:13; 1 S. 7:14; 29:7; see also 1 Ch. 12:18, in which the willingness to negotiate is implicit), or cities (Dt. 20:10-12; Jgs. 8:9; 1 K. 20:18).

Such peace can result from military victory, as in Jgs. 8:9; 1 Ch. 22:18; Isa. 9:6f. (MT 5f.); Jer. 43:12; Mic. 5:5 (MT 4); Zec. 9:10. In 1 K. 22:27f. the king's coming "in peace" means his coming "in victory," "with his purpose accomplished." Surrender is often concomitant with the end of military hostilities and is therefore an element in the resulting peace (2 S. 10:19; 1 K. 20:18; 1 Ch. 19:19; Isa. 27:5; Dnl. 11:17, LXX). But peace can also result from diplomacy (e.g., Est. 9:30; 10:3; cf. Jer. 6:14; 8:11), and this demonstrates its intimate connection with the biblical concern for the total well-being of the individual as well as of the community (1 S. 25:6; in Dt. 23:6 [MT 7] *šᵉlômām wᵉṭôḇāṭām*, "their peace [and] their prosperity," corresponds to Akk. *sulummû u ṭūbtu* in similar contexts). The ratification of treaties was intended to produce peace (Gen. 26:28-31; Josh. 9:15; 1 S. 16:4f.). Formal and informal agreements of nonbelligerence and/or nonviolence were frequently made in ancient times (Dt. 2:26-29; 20:10-12; Josh. 10:1-4; 11:19; Jgs. 4:17; 1 S. 7:14; 1 K. 5:12 [MT 26]; 2 K. 9:17-22, 31; 18:31 par. Isa. 36:16; Dnl. 11:6), and the phrase "covenant of peace" was employed in a variety of situations (Nu. 25:12; Isa. 54:10; Ezk. 34:25; 37:26; Mal. 2:5; cf. Sir. 45:24). Such covenants of *šālôm* ("completeness" or "fulfillment") served to unite the wills of the opposing parties, creating a common will that was expected to be maintained by scrupulous adherence to the covenant stipulations.

Psalm 119:165 stresses the sense of serenity and contentment possessed by all who love (i.e., obey; cf. vv. 166-168) the divine law. Prominent in the OT is the teaching that God is the giver of peace in all its fullness (Lev. 26:6; 1 Ch. 12:18; 22:9 [note the pun on the name Solomon, "peaceful one"]; 23:25; 2 Ch. 14:6f. [MT 5f.]; Job 22:21; 25:2; Ps. 4:8 [MT 9]; 29:11; 37:37; 122:6-8; 147:14; Prov. 3:17). The prophets declare emphatically that God Himself is the source of true peace (Isa. 26:12; 52:7 [cf. Nah. 1:15 (MT 2:1)]; Ezk. 34:25; 37:26; Zec. 6:13; 8:12; Mal. 2:5f.). Without a righteous life, made possible by God's help, no one is able to find peace (Isa. 48:22; 57:1f., 21; 59:8); therefore peace and righteousness are frequently linked together (Ps. 72:7; 85:8, 10 [MT 9, 11]; Isa. 9:7 [MT 6]; 32:17f.; 48:18; 60:17); cf. also the association of peace with justice in Isa. 59:8; Zec. 8:16.

The sense of well-being and fulfillment that comes from God is dependent on His gracious presence (Gen. 28:20f.; Jgs. 6:23f.; 18:6; 1 K. 2:33). It is in this light that "peace" is sometimes invoked as a spiritual blessing upon another (e.g., Ex. 4:18; 1 S. 1:17; 20:42; 2 S. 15:9, 27; Zec. 8:19; cf. 1 K. 2:6). The key passage associating peace with the divine presence is the conclusion of the Aaronic benediction: "The Lord lift up his countenance upon you, and give you peace" (Nu. 6:26; cf. 1 Ch. 23:25; Ps. 122:6-8); this has formed the basis of such prayers as the well-known synagogue benediction: "May the Lord God bless his children and all mankind with peace."

Harmony between God and His creatures (Isa. 27:5) and among His creatures themselves (1 S. 16:4f.; Job 5:23; Zec. 6:13) is at the heart of the OT emphasis on peace as community. Such community results when people treat one another with goodwill and love, but no peace is possible where there is malice (cf. Gen. 37:4; 2 S. 3:21-23; 17:3; 1 K. 2:13; 2 K. 9:17-22, 31; Ps. 120:6f.; Cant. 8:10; Jer. 9:8 [MT 7]). When a community is at peace its members can experience safety and prosperity (Isa. 26:3 [RSV translates *šālôm šālôm* as "perfect peace"; *see* PERFECT I]), although a superficial peace can lead to a false sense of security and contentment (2 K. 20:19 par. Isa. 39:8; 1 Ch. 4:40; Job 12:6; 21:13). Whereas peace is found by doing good (Ps. 34:14 [MT 15]), its absence can be equated with judgment (Jer. 12:12; 14:19; 16:5; 25:37; Lam. 3:17; Ezk. 7:25). In contrast to the false prophets who announced peace when there was none, the true prophets proclaimed a peace that brought healing (Isa. 57:19; Jer. 6:14; 8:11, 15; 14:13; 28:9; Ezk. 13:10, 16; Mic. 3:5).

The use of "peace" as a word of greeting implies a desire for the addressee's well-being in the widest sense. Such usage was common in ancient Semitic culture. Cognates of Heb. *šālôm* (Jgs. 19:20; 1 S. 25:6; 1 Ch. 12:18; Dnl. 10:19) include Aram. *šᵉlām* (Ezr. 5:7; Dnl. 4:1 [MT 3:31]; 6:25 [MT 26]), Ugar. *šlm*, Akk. *šulmu*, and Arab. *salâm* (which is still used today; also derived from the same root are the part. *muslim* and the infinitive *islâm*, both denoting "submission [to God]"). Heb. *šālôm* could also be used as an expression of farewell or as a description of someone's departure, often including the idea of contentedness or serenity (Gen. 26:29, 31; Ex. 18:23; 1 S. 25:35; 29:7; 2 S. 15:9; 1 K. 22:17 par. 2 Ch. 18:16; 2 K. 5:19; Isa. 55:12). To die "in peace" connotes that one has completed a full and satisfying life (Gen. 15:15; 2 K. 22:20 par. 2 Ch. 34:28; Jer. 34:5). To achieve this completeness, having fulfilled the divine purpose for one's life, is virtually equivalent to salvation; thus *šālôm* was often written on Jewish gravestones, and Gk. *en eirḗnē* was similarly used in early Christian cemetery inscriptions.

II. In the NT.–Corresponding to Heb. *šālôm* in the OT, Gk. *eirḗnē* and its derivatives form the dominant NT word-group expressing the ideas of peace, well-being, rest, reconciliation with God, and salvation in the fullest sense. In classical Greek *eirḗnē* primarily signified the absence of conflict (especially in a political or military sense), the antithesis to war; it could also connote the conditions resulting from the cessation of war, or the condition of law and order that results in the blessings of prosperity for land and people (exemplified by the *pax Romana* during the reign of Caesar Augustus). In NT references to the political and military spheres, *eirḗnē* is used in the classical sense to denote the opposite of war (Mt. 10:34 par. Lk. 12:51; 14:32; Acts 12:20; 24:2; Rev. 6:4). In Lk. 19:42 Jesus

may be reflecting on the perennial yearning for peace in Jerusalem expressed in passages such as Ps. 122:6-8. In general, however, the NT's use of *eirēnē* is influenced much more by that of the LXX, where the term is used almost invariably to translate Heb. *šālôm*. Thus *eirēnē* in the NT has taken on the broader connotations of well-being, completeness, inner satisfaction, the contentment and serenity that derive from having lived a full life, etc. The peace that Jesus gives is qualitatively different from that which the world can give (Jn. 14:27).

As the source of all peace, God is frequently referred to in the Epistles as the "God of peace" (Rom. 15:33; 16:20; Phil. 4:9; 1 Thess. 5:23; He. 13:20; cf. also 1 Cor. 14:33; 2 Cor. 13:11; 2 Thess. 3:16). Peace is included among the gifts of the Holy Spirit to believers (Rom. 8:6; 14:17; 15:13; Gal. 5:22). The NT expects peace to be the normal state of affairs among Christians (Mk. 9:50; Rom. 14:17, 19; 1 Cor. 14:33; 16:11; 2 Cor. 13:11; 1 Thess. 5:13; 2 Tim. 2:22; 1 Pet. 3:11; 2 Pet. 3:14), and especially between husband and wife (1 Cor. 7:15). Peace with God (Rom. 5:1) is essential to unity within the Church (Eph. 2:14-17; 4:3; 6:23) and among all persons (Rom. 12:18; Col. 1:20; He. 12:14; Jas. 3:17f.).

Peace is associated with various other gifts, virtues, and states of being: with receptiveness to God's salvation (Mt. 10:13 par. Lk. 10:5f.), with freedom from distress and fear (Jn. 14:27; 16:33; cf. also 1 Tim. 2:2), with healing, both spiritual and physical (Mk. 5:34; Lk. 7:50; 8:48; cf. 11:21), with love (2 Cor. 13:11), with heavenly wisdom (Jas. 3:17), and with security (1 Thess. 5:3). Inner peace is a vital aspect of Christian experience (Phil. 4:7; Col. 3:15); it is closely related to and issues from a life of righteousness (He. 12:11; also 7:2; cf. Rom. 3:10, 17).

Jesus Christ is the mediator of peace (Col. 1:20). Peace with God is the result of being justified through faith in Christ (Rom. 5:1). The good news of salvation, which is called "the gospel of peace" (Eph. 6:15) because it reconciles believers to God and to one another (cf. 2:12-18), forms part of the "whole armor of God" (6:11, 13) that enables the Christian to withstand the attacks of the spiritual forces of evil. This "good news of peace by Jesus Christ" (Acts 10:36) is an important element in the evangelistic motivation and message of the Church (cf. 9:31); it is intimately related to Christ's commission of His disciples as ambassadors to a lost world (Jn. 20:19-21, 26). The song of Zechariah (Lk. 1:68-79), the Gloria in Excelsis Deo (2:14), and the Nunc Dimittis (2:29-32) all demonstrate that peace in its full dimensions is the fulfillment of the messianic expectations of God's people (e.g., 1:79; 2:14, 29; cf. 19:38; Isa. 9:6f. [MT 5f.]). Peace is likewise an essential part of the eschatological hope of Christians (Rom. 2:9f.; cf. 14:17; 16:20; 1 Thess. 5:23).

Like Heb. *šālôm* in the OT, *eirēnē* is used both in greetings (Lk. 10:5f. par. Mt. 10:13; Jn. 20:19, 21, 26) and in valedictory formulas (Mk. 5:34; Lk. 7:50; 8:48; Acts 16:36; cf. Lk. 2:29; Acts 15:33; 1 Cor. 16:11; Jas. 2:16). The hendiadys "grace and peace" (sometimes also including "mercy") forms a part of the opening greeting in all the Pauline Epistles (Rom. 1:7; 1 Cor. 1:3; 2 Cor. 1:2; Gal. 1:3; Eph. 1:2; Phil. 1:2; Col. 1:2; 1 Thess. 1:1; 2 Thess. 1:2; 1 Tim. 1:2; 2 Tim. 1:2; Tit. 1:4; Philem. 3) and also in 1 Peter (1:2), 2 Peter (1:2), 2 John (v. 3), Jude (v. 2), and Revelation (1:4). "Peace" also appears in closing greetings and benedictions (Rom. 15:33; 2 Cor. 13:11; Eph. 6:23; 2 Thess. 3:16; 1 Pet. 5:14; 3 Jn. 15; cf. Gal. 6:16; 1 Thess. 5:23; He. 13:20). Such usage is clearly in line with Judeo-Christian tradition and practice down through the ages, as exemplified in the Eighteen Benedictions, which forms the daily prayer pattern of observant Jews: "Blessed art Thou, O Lord, the One who blesses His people Israel with peace."

PEACE OFFERING. *See* SACRIFICES AND OFFERINGS IN THE OT.

PEACEMAKER [Gk. *eirēnopoiós*] (Mt. 5:9). One who seeks to end strife and establish harmony, particularly between oneself and one's neighbors. The noun is rare in classical Greek, but it is sometimes used of rulers who have established peace in the empire (e.g., Xenophon *Hellenica* vi.3.4; Plutarch *Moralia* 279b; cf. its application to God in Philo *De specialibus legibus* ii.192; cf. also the application of the verb *eirēnopoiéō* to Christ's work of cosmic reconciliation in Col. 1:20).

The background for *eirēnopoiós* in Mt. 5:9 (its only NT occurrence), however, is to be found in Hebrew rather than classical Greek tradition (*see* PEACE). Although *eirēnopoiós* does not appear in the LXX, the verb *eirēnopoiéō* does, in Prov. 10:10, LXX (cf. also Isa. 27:5, Aq., Symm., Th.; the LXX has *poiéō eirēnēn*). Rabbinic literature refers frequently to the virtue of "making peace" (Heb. *ʿāśá šālôm*) in the sense of ending strife. There is a famous saying of Hillel: "Be of the sons of Aaron, loving peace and pursuing peace, loving mankind and bringing them nigh to the Law" (*Aboth* 1.12; see SB, I, 217; *TDNT*, II, 409). Closely related to the teaching of Mt. 5:9 is that of Jas. 3:18, which uses Gk. *hoi poioúsin eirēnēn* for those who promote unity and reconciliation within the Christian community. The Beatitude makes clear that those who strive for an end to discord and the establishment of harmony (Heb. *šālôm*) within the human community are doing the will of God and are therefore worthy to be called God's children.

R. F. YOUNGBLOOD N. J. O.

PEACOCK [Heb. *tukkîyîm*] (1 K. 10:22 par. 2 Ch. 9:21); NEB MONKEYS.

Two species of peafowl are to be found in southeastern Asia, *Pavo muticus* and the more beautiful *Pavo cristatus*. The latter occurs in the jungles of India and Ceylon. The Hebrew term is sometimes believed to have originated in that area, being derived from the Tamil *tokei*. 1 K. 10:22 par. 2 Ch. 9:21 lists peacocks as part of the cargo brought to Solomon by his merchant vessels. The birds were also brought to Egypt, Assyria, and Greece in ancient times. Their inclusion among the imports to Israel is therefore not impossible.

But W. F. Albright (*ARI*, pp. 212f. n. 16) derived the Hebrew rather from the Egyp. *ky*. In the Story of the Shipwrecked Sailor from the Middle Kingdom (translation in W. K. Simpson, ed., *Literature of Ancient Egypt* [1973], pp. 50-56), the king of Punt gives the sailor a variety of presents. At the end of the list of these luxuries occur *qf* and *ky*, apes and baboons, the Egyptian equivalents of

the last two items in Solomon's cargo, *qōpîm* and *tukkîyîm*. In the early 15th cent. two species of monkeys were recorded as being imported to Egypt from Punt.

G. WYPER

PEARL [Heb. *pᵉnînîm* (pl.)] (Job 28:18b); AV RUBY; NEB RED CORAL; [Gk. *margarítēs*]. (For AV "pearl" in Job 28:18a *see* STONES, PRECIOUS.) A hard, shiny concretion of shell material formed as an abnormal growth in some mollusks.

Pearls have long been highly valued because of their beauty and rarity. Thus they appear with jewels and other luxurious materials in several biblical lists (1 Tim. 2:9; Rev. 17:4; 18:12, 16; 21:21). Their great value gives meaning to the comparison with wisdom in Job 28:18 and to the parable in Mt. 13:45f.

PEASANTRY [Heb. *pᵉrāzôn*] (Jgs. 5:7, 11); AV VILLAGES; NEB CHAMPIONS. The meaning of Heb. *pᵉrāzôn* is uncertain. KoB (p. 777) understands *pᵉrāzôn* as "dwellers of open country." The AV, following a few MSS, emends *pᵉrāzôn* to *pᵉrāzôṯ*, "open, rural country" (cf. the use of *pᵉrāzôṯ* in Est. 9:19; Ezk. 38:11; Zec. 2:4 [MT 8]), but this sense is hardly satisfactory. G. Garbini (*JSS*, 23 [1978], 23f.) attempted to relate Heb. *przn* to Epigraphic (Old) South Arabian *frzn*, "iron" (thus v. 7, "iron ceased in Israel" [cf. v. 8; 1 S. 13:19-22]; and figuratively, v. 11, God's acts of justice made Israel as strong as iron, "the triumphs of his [God's] iron"), but this seems forced. More plausibly, J. Gray (*Joshua, Judges and Ruth* [*NCBC*, 1977], p. 217) suggested two other possibilities. He noted that the LXX *dynatoí* suggests an original Heb. *rôzᵉnîm*, "rulers" (cf. the LXX's use of *dynástou* for *rāzôn* in Prov. 14:28), a reading that makes much better sense in the context. He also noted a possible cognate to *przn* in Arab. *barrāz*, "champion in single combat" (cf. NEB). If valid, the latter possibility would also explain the LXX's use of *dynatoí* in Hab. 3:14, where MT *pāraz* has been problematic.

G. A. L.

PECULIAR. A term used by the AV only in its original sense of "belonging exclusively to one person or group" (from Lat. *pecūlium*, "private property"). Thus Qoheleth says that acquiring the "peculiar treasures" (Heb. *sᵉgullâ*, lit. "personal property"; RSV, NEB, "treasure") of kings and provinces is vanity (Eccl. 2:8; cf. v. 11). The AV also renders *sᵉgullâ* by "peculiar" or "peculiar treasure" in four passages referring to Israel as God's chosen people: Ex. 19:5; Dt. 14:2; 26:18; Ps. 135:4 (RSV "own possession"; NEB "special possession," "special treasure"). Tit. 2:14 quotes from the LXX of these passages (Gk. *perioúsios*, lit. "rich," "special," "chosen"; AV "peculiar"; RSV "of his own"; NEB "marked out for his own"). But in 1 Pet. 2:9, AV, "peculiar" (cf. RSV "own," mg. "own possession"; NEB "claimed . . . for his own") represents Gk. *peripoíēsis* (lit. "possessing, possession"), the LXX rendering of *sᵉgullâ* in Mal. 3:17 (AV mg. "peculiar treasure"; cf. AV "jewels"; RSV "special possession"; NEB "own possession"), which speaks of the righteous as God's special people. The AV also uses the term in Wisd. 19:6, where it renders Gk. *taís saís epitagaís* by "the peculiar commandments that were given unto them" (cf. RSV, NEB, "thy commands").

See also POSSESS.

N. J. O.

PEDAHEL ped'ə-hel [Heb. *pᵉḏahʾēl*–'God has redeemed']. Son of Ammihud; a leader of Naphtali chosen to assist Joshua and Eleazer in dividing up the land W of the Jordan (Nu. 34:28).

PEDAHZUR pə-dä'zər [Heb. *pᵉḏâṣûr*–'(the) rock has redeemed']. Father of Gamaliel, who was the leader of Manasseh in the wilderness of Sinai (Nu. 1:10; 2:20; 7:54, 59; 10:23).

PEDAIAH pə-dā'yə, pə-dī'ə [*pᵉḏayāhû*, *pᵉḏāyâ*–'Yahweh has redeemed'].

1. Father of Joel, who was the officer in charge of the half of Manasseh W of the Jordan during King David's reign (1 Ch. 27:20).

2. A native of Rumah; father of Zebudah mother of Jehoiakim (2 K. 23:36).

3. Descendant of David and son of Jeconiah (1 Ch. 3:18). According to v. 19 he was the father of Zerubbabel (cf. LXX, which substitutes Shealtiel here); but Pedaiah's brother Shealtiel is called the father of Zerubbabel in Ezr. 3:2, 8; 5:2; Neh. 12:1; Hag. 1:1, 12, 14; 2:2, 23. A common explanation of this discrepancy is that Shealtiel died childless, and in levirate marriage Pedaiah fathered Zerubbabel by Shealtiel's widow (see KD).

4. Son of Parosh; one who helped to rebuild the wall of Jerusalem after the Exile (Neh. 3:25).

5. [Gk. Apoc. A *Phaldaios*, Lucian *Phadaias*]; AV PHALDAIUS; NEB PHALDAEUS. One of those who stood at Ezra's left hand when the law was read to the people (Neh. 8:4; 1 Esd. 9:44).

6. A Levite appointed by Nehemiah as a treasurer over the storehouses of food to be distributed to the Levites (Neh. 13:13).

7. A Benjaminite; son of Kolaiah, father of Joed, and ancestor of Sallu, who was among those who lived in Jerusalem after the Exile (Neh. 11:7).

PEDDLER [Gk. part. of *kapēleúō*–'trade in, peddle'] (2 Cor. 2:17); AV "corrupt"; NEB HAWKING. This pejorative term describes two abuses, with either or both of which Paul's opponents at Corinth may have charged him: (1) selling the word of God for profit, as some itinerant Greek philosophers disreputably sold their ideas for monetary gain (*TDNT*, III, 603f.; Barrett, p. 103; Hughes, p. 83 n. 22; Plummer, pp. 73f.); and (2) adulterating the word of God, as wine traders watered down their product (see Isa. 1:22, LXX), or as some Jewish missionaries compromised their religion by spreading their doctrines while selling merchandise (cf. W. D. Davies, *Paul and Rabbinic Judaism* [4th ed. 1980], p. 133 n. 1). Both abuses appear together in Lucian's description of philosophers who sell their teaching (*Hermotimus* 59).

Paul had not received financial support from the Corinthians for his ministry there (1 Cor. 9:12b, 15; cf. Mt. 10:8f.), though he believed he had a right to it (1 Cor. 9:3-14; cf. Mt. 10:10; 1 Tim. 5:18; *see also* TENTMAKER). So, unlike peddlers, Paul preached the gospel "free of charge" (1 Cor. 9:18). But the point he makes may be the broader one that he, with Silvanus and Timothy (2 Cor. 1:19), had preached the gospel not with dishonest practices or mixed motives but "as men of sincerity, commissioned by God" (2:17b).

Bibliography.–Comms. on 2 Corinthians C. K. Barrett (*HNTC*, 1973); P. E. Hughes (*NICNT*, 1962); A. Plummer (*ICC*, repr. 1966); also *TDNT*, III, *s.v.* καπηλεύω (H. Windisch).

W. J. MOULDER

PEDESTAL [Heb. *kēn*]; AV BASE; NEB LEVEL EDGE. Heb. *kēn* is usually rendered "base" by the RSV (cf. Ex. 30:18, 28; 31:9; etc.). It represents the BASE (4) of each LAVER (II) in the temple of Solomon (1 K. 7:31).

PEDIGREE. The AV translates the hithpael of Heb. *yālaḏ* (lit. "show one's birth") "declared their pedigrees" in

Nu. 1:18 (RSV "registered themselves"; NEB "registered their descent"). The keeping of pedigrees (i.e., genealogical records) was very important in Hebrew tradition. *See* GENEALOGY III.

PEDIMENT [Heb. *marṣepeṭ*] (2 K. 16:17); AV PAVEMENT; NEB BASE. The term refers to the stone base supporting the temple "sea" that Ahaz substituted for the bronze oxen, which he used to pay his tribute to the king of Assyria.

PEEL; PILL. Two verbs that originally had different meanings: (1) "peel" (cf. Lat. *pellis*, "skin") meant to strip off the skin, while (2) "pill" (cf. Lat. *pilus*, "hair") meant to remove the hair. But in Elizabethan English the two were confused. Thus the AV uses "pill" in Gen. 30:37f. (Heb. piel of *pāṣal*, lit. "peel [bark]"; so RSV, NEB) and Tob. 11:13 (Gk. *lepízō*, lit. "strip off [skin, flakes, etc.]"; RSV "scale off"; NEB "peel off"), where "peel" is clearly meant. The second meaning may be implied, however, in Isa. 18:2, 7, where the Ethiopians are described by the AV as "peeled" (cf. NEB "smooth-skinned"; RSV "smooth"; Heb. pual part. of *māraṭ*; cf. also *māraṭ* in Ezr. 9:3; Neh. 13:25; Isa. 50:6, where it means "pull out hair"). In Ezk. 29:18 the qal pass. part. of *māraṭ* is used to describe the shoulders of the Babylonian soldiers (AV "peeled"; RSV "rubbed bare"; NEB "chafed").

B. S. EASTON N. J. O.

PEEP. The AV translation of Heb. *ṣāpaṣ* in Isa. 8:19; 10:14 (RSV "chirp"; NEB "squeak," "chirp"). On 8:19, *see* DIVINATION III.G.

PEKAH pē'kə [Heb. *peqaḥ*–'opening,' i.e., release from bondage and subjection; Gk. *Phakee*] (2 K. 15:25-31). The son of Remaliah, an ex-court official, and eighteenth king of Israel (*ca.* 737-732). He seized the throne after murdering his predecessor Pekahiah (*ca.* 742-740 B.C.) in Samaria while acting as Pekahiah's "captain," a title denoting high military rank. Pekah was then credited with a twenty-year reign over Israel (2 K. 15:27), which if reckoned from his succession to Pekahiah in *ca.* 740 B.C. would have taken him well beyond the fall of Samaria to Assyria in 722 B.C., as well as excluding the reign of Hoshea of Israel (*ca.* 732-722 B.C.) completely.

Some understanding of this apparent discrepancy may be gained by endeavoring to trace Pekah's prominence back to the short-lived reigns of Zachariah and Shallum (*ca.* 753/752 B.C.). At that time he was probably already a military officer in control of some Israelite forces in Gilead (cf. 2 K. 15:25), and may well have formed an unofficial alliance with Rezin of Syria, since both faced the threat of a resurgent Assyria under Tiglath-pileser III (*ca.* 745-727 B.C.).

Certainly when Pekah succeeded Pekahiah he lost no time in implementing a formal military relationship with Rezin, the Philistine states, and some of the Transjordanian kingdoms in an attempt to contain the Assyrian advance and restore prosperity to Israel. Pekah could therefore have spent over a decade building up the military resources of Israel in Gileadite territory, and still have been serving in an important military capacity in the time of Pekahiah.

It is possible that part of the reason for Menahem's quick submission to Tiglath-pileser III (2 K. 15:9) was to forestall Pekah's rise to the position of commander of Israel's entire forces and thereby to prevent him from making any attempt to usurp the throne with Syrian help. In the end Pekah did achieve this goal, but with very little force and in the absence of external assistance, the deed being done in the short reign of Pekahiah, Menahem's son and successor.

If, therefore, by speaking of the length of Pekah's "reign" as twenty years the source in Kings is actually describing his period of military power in Israel, the apparent historical difficulty is removed. From the time of Zachariah and Shallum (*ca.* 753 B.C.) to the accession of Hoshea in *ca.* 732 B.C. (cf. 2 K. 15:30) is a period of just over twenty years, while Pekah's actual rule as king of Israel would extend from the time of Pekahiah's assassination (*ca.* 740 B.C.) to Hoshea's accession, an interval of about eight years (*ca.* 740-732 B.C.). This would imply that the author of 2 Kings understood Pekah to have been a military commander in the Transjordan area for some twelve years. A wine-jar handle (8th cent. B.C.) recovered from the mound at Hazor bore Pekah's name, and thus attested to his rule in Israel.

Pekah was a fiery anti-Assyrian; his predecessors' policy of truckling to Assyria was to him and his Gileadite patriots a betrayal of Israel's national interests, a threat to its independence, and thus a policy to be reversed at all costs. This he attempted to do by creating an anti-Assyrian confederacy, of which he and Rezin king of Damascus were the principal leaders. The armies of this confederacy attacked Ahaz king of Judah, who refused to join them and appealed to Tiglath-pileser.

The Israelites struck Judah from the north, inflicting a heavy blow and carrying off many prisoners, who, however, were later sent back home after prophetic intervention (2 Ch. 28:8-15). Reaching Jerusalem, the confederates began a siege (2 K. 16:5; Isa. 7). Their plan was to take Judah, annex parts of it, and make their lackey ben Tabeel king of Judah. In addition to the attacks from the north Judah was subjected to two other onslaughts; the Philistines swarmed over the Shephelah and Negeb and seized a number of cities, and the Edomites captured Elath (2 Ch. 28:17f.).

Tiglath-pileser, who had conquered Hamath some years before, set out to crush the members of the confederacy one by one. It appears that he struck at Israel twice — a preliminary assault and then an all-out attack. Isa. 9:1 refers to the battles, which are summarized in 2 K. 15:29, as two campaigns. Tiglath-pileser first came down, as one of the inscriptions states, by the coast of the "upper sea" and, driving inland, fell upon Zebulun and Naphtali. In the south he subjugated the Philistine state of Gaza and imposed tribute. If this campaign was to isolate Israel from Egypt and the southern states, then the second was to isolate Damascus. Tiglath-pileser came down the seacoast this time and, advancing inland, occupied Gilead and Galilee, leaving Israel a mere skeleton of a kingdom, consisting of Mt. Ephraim and the royal capital. The cities taken were Ijon, Abel-beth-maacah, Janoah, Kedesh, and Hazor. These territories were incorporated into newly created Assyrian provinces; their Israelite inhabitants were carried off into exile and slavery in Babylon.

Pekah was not allowed to survive the national disaster for which he was responsible. He was assassinated by Hoshea son of Elah, a pro-Assyrian conspirator and the last occupant of the throne of Israel.

PEKAHIAH pē-kə-hī'ə [Heb. *pᵉqaḥyâ*–'Yahweh has opened,' i.e., God has brought relief or release; Gk. *Phakeias*] (2 K. 15:22-26). The son of Menahem and king of Israel for two years (*ca.* 740 B.C.), whose short rule was correlated in 2 K. 15:23 with the fiftieth year of

Azariah (Uzziah) of Judah. This man had evidently begun his rule *ca.* 791 B.C. as co-regent with Amaziah (*ca.* 796-767 B.C.), and accordingly his fiftieth year would be *ca.* 741 B.C., which establishes an approximate date for Pekahiah.

Political instability marked his brief tenure of office. Pekahiah continued his father's pro-Assyrian policy, which was to maintain the throne at the price of tribute-paying vassalage. This policy ran counter to patriotic sentiment, however, and a ruler who exhibited any sign of weakness, on the field of battle or otherwise, was liable to be murdered by Israelite patriots. Pekahiah was the sixth king to be thus dispatched. He was attacked in his palace at Samaria by Pekah son of Remaliah, a court officer, who was assisted by fifty fellow conspirators from Gilead (Dt. 3:13f.). Pekahiah, like the other kings of Israel, is censured for clinging to the perversions introduced by Jeroboam. He was one of the Israelite kings who was not mentioned in Chronicles, and this might indicate an adverse opinion by the Chronicler regarding his religious outlook.

The presence of Argob and Arieh (Jair), which are place-names, in the MT of 2 K. 15:25, should not be regarded as a dislocation from v. 29 (so RSV mg.), even though the MT reads a little awkwardly. If the two names are placed after the MT "sons of" (RSV "men of"), the difficulty is removed and the verse then reads, "and Pekah the son of Remaliah, his captain, conspired against him, and smote him in Samaria in the citadel of the king's house, and with him were fifty men of Argob and Jair, Gileadites." The prophetic strictures of Hosea (6:8) against Gilead as a "city . . . tracked with blood" were thus entirely appropriate. M. S. SEALE R. K. H.

PEKOD pē'kod [Heb. *pᵉqôḏ*; Akk. *puqūdu*]. One of the larger Aramean tribes that had settled in southeastern Babylonia between the lower Tigris and Elam by the 8th cent. B.C. The economy of the Puqudu was based on agriculture and animal husbandry. The Assyrian royal inscriptions record that Tiglath-pileser III (745-727 B.C.), Sargon II (721-705 B.C.), and Sennacherib (704-681 B.C.) subdued the Puqudu (Akk. ^{lú}*puqūdu*). Nebuchadrezzar (605-562 B.C.) claimed to control the land of Puqudu (Akk. *māt puqūdu*). Tiglath-pileser III may have deported them to Kar-Ashur, a newly built city, which was probably situated E of the Tigris and N of the Diyālā rivers.

In an oracle against Babylon, Jeremiah refers to an attack on "the inhabitants of Pekod" (Jer. 50:21), in which Pekod is a geographic territory in Babylonia (cf. Nebuchadrezzar's reference to *māt puqūdu*). Ezekiel prophesies that Pekod will be one of the peoples (cf. Tiglath-pileser's, Sargon's, and Sennacherib's references to ^{lú}*puqūdu*) of Mesopotamia who will turn against Jerusalem (Ezk. 23:23).

The Puqudu gave their name to both a city and a canal, which are referred to in Neo-Assyrian documents and in T.B. *Betzah* 29a, *Ketuboth* 27b, *Hullin* 127a.

M. J. HORSNELL

PELAIAH pə-lā'yə, pə-lī'ə [Heb. *pᵉlā'yâ*—'Yahweh is marvelous'].

1. Son of Elioenai, a descendant of David (1 Ch. 3:24).

2. [Gk. Apoc. A *Phiathas*]; AV BIATAS; NEB PHIATHAS. A Levite who was present at Ezra's public reading of the law and assisted him by expounding the law to the people (Neh. 8:7; 1 Esd. 9:48). He also took part in sealing the covenant with Nehemiah (Neh. 10:10 [MT 11]).

PELALIAH pel-ə-lī'ə [Heb. *pᵉlalyâ*—'Yahweh has judged']. A priest whose grandson Adaiah lived in Jerusalem after the Exile (Neh. 11:12).

PELATIAH pel-ə-tī'ə [Heb. *pᵉlaṭyâ, pᵉlaṭyāhû*—'Yahweh delivers'].

1. A "chief of the people" who witnessed the sealing of the covenant (Neh. 10:22 [MT 23]).

2. Grandson of Zerubbabel and descendant of David (1 Ch. 3:21).

3. One of the sons of Ishi who led a band of Simeonites into the hill country of Seir, drove out the Amalekites, and settled there themselves (1 Ch. 4:42f.).

4. Son of Benaiah; one of two Judean princes among twenty-five men against whom Ezekiel prophesied (Ezk. 11:1-13). These men, who apparently formed some sort of council, were condemned for giving "wicked counsel" (v. 2; possibly counsel to revolt against Babylon) and shedding innocent blood (v. 6). When he heard Ezekiel's prophecy of judgment (vv. 7-12), Pelatiah fell dead (v. 13).

PELEG pel'eg [Heb. *peleg*—'watercourse,' 'division'(?); Gk. *Phalek*]; AV also PHALEC (Lk. 3:35). The son of Eber and the father of Reu (Gen. 10:25; 11:16-19; 1 Ch. 1:19, 25), thus an ancestor of Abraham and Jesus (Lk. 3:35). The meaning of the statement "in his days the earth was divided [Heb. *niplᵉgâ*]" (Gen. 10:25) is disputed. It could refer to the division of humanity into linguistic and/or geographical groupings after the tower of Babel incident (Gen. 11:9; so KD), to the use of irrigation techniques by Peleg and his descendants (cf. Akk. *palgu*, "irrigation canal"), or to the division of the countryside into districts (cf. Akk. *puluggu, pulungu*, "district") during his days. Several attempts have been made to relate the personal name to the following geographical names: Phalga, located in Mesopotamia at the junction of the Euphrates and Habor rivers (see W. F. Albright, *JBL*, 43 [1924], 387f.); el-Falj, a district in northeast Arabia; el-Aflāj, S of Jebel Tuwaiq in central Arabia (see J. Skinner, *ICC* on Genesis [1910], p. 220). C. G. RASMUSSEN

PELET pe'let [Heb. *peleṭ*—'escape, deliverance'].

1. A Calebite, son of Jahdai (1 Ch. 2:47).

2. Son of Azmaveth (cf. NEB "men of Beth-azmoth"); one of the warriors who joined David at Ziklag when he was in hiding from King Saul (1 Ch. 12:3).

PELETH pe'leth [Heb. *peleṯ*—'swiftness'].

1. A Reubenite; father of On, who joined Korah, Dathan, and Abiram in revolting against Moses and Aaron (Nu. 16:1); probably the same as PALLU son of Reuben, who was the grandfather of Dathan and Abiram (cf. 26:5, 8-10). Some commentators have suggested that "On" is a textual corruption and should be deleted, since the name does not reappear (see comms.).

2. Son of Jonathan, a Jerahmeelite (1 Ch. 2:33).

PELETHITES pel'ə-thīts [Heb. *pᵉlēṯî*]. Certain armed men who along with the Cherethites served as David's bodyguard (2 S. 8:18; 20:23; 1 Ch. 18:17). This name may be a variant form of *pᵉlištî*, "Philistine," with the *š* assimilating to the *t* (so J. Montgomery, comm. on Kings [*ICC*, 1951],

pp. 85f.; he thought that the LXX *Pheleththei* reflected the original pronunciation). Thus the origin of these people seems to be from the same background as the Philistines or sea-peoples.

The Pelethites were faithful to David during his later years when Absalom and Sheba rebelled. They played a decisive role in the war against Absalom's forces in which Absalom lost his life (2 S. 15:16-22). They also participated along with David's regular troops under Joab's command in successfully suppressing the insurrection of Sheba (2 S. 20:6f.). When their leader Benaiah, along with Zadok the priest and Nathan the prophet, supported Solomon's claim to the throne, the Pelethites followed him and no doubt ensured the victory of Solomon over Adonijah (1 K. 1:38, 44).

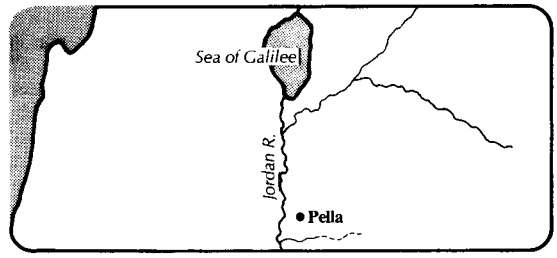
G. KROEZE

PELIAS pə-lī'əs. The AV's misspelling of Gk. *Pedias* (1 Esd. 9:34), rendered BEDEIAH by the RSV because of the parallel in Ezr. 10:35.

PELICAN [Heb. *qā'āṯ*; Gk. *pelekán*] (Lev. 11:18; Dt. 14:17); NEB HORNED OWL. Any member of the genus *Pelecanus* — large, web-footed birds possessing a membranous pouch hung from the lower beak and used for scooping fish from swamps, lakes, and rivers.

The pelican (mainly *Pelecanus onocrotalus*) was certainly known from early times as an inhabitant of ancient Near Eastern waterways, but its identification in the OT is uncertain. Heb. *qā'āṯ*, usually taken to mean "the vomiter," could well designate the pelican since the mother feeds her young on fish regurgitated from her crop. In the lists of birds of abomination (Lev. 11:18; Dt. 14:17) most translations have read the word as "pelican," as does the LXX. All birds that feed on carrion or fish are included in these lists as unclean.

Three other references are less clear. In Ps. 102:6 (MT 7) the AV reads "pelican of the wilderness" and the RSV "vulture of the wilderness." The AV reads the same term as "cormorant" in Isa. 34:11 and Zeph. 2:14; the RSV reads "hawk" and "vulture," respectively. All these passages picture a bird perched alone in the wilderness or among the ruins of Edom or Nineveh as a symbol of desolation. Many have thought that this wilderness setting rules out the pelican, which lives near water. Pelicans, however, are often found perched in isolation, seemingly far from water, when in actuality, being large and powerful birds, they are within easy flight of a lake or stream. Another intriguing possibility (Holmgren) is that the "pelican of the wilderness" is the marabou (Arab. *murabit*, "hermit") a wilderness bird whose throat pouch may have caused the pelican's name (*qā'āṯ*) to be applied to it. It might then also be this wilderness bird that is referred to in Isa. 34:11 and Zeph. 2:14.



G. R. Driver in an article on the "birds of abomination" identified *qā'āṯ* with the Scops Owl. Although there is but slender evidence for this reading, it seems to have influenced the NEB, which reads "horned owl" for *qā'āṯ* in all passages. *See* ABOMINATION, BIRDS OF.

In the earliest Christian centuries the pelican became widely used as a symbol of Christ's sacrifice for His Church. This symbolism has its origin in an ancient belief that the bird punctured her breast to feed the young on her own blood. Some species of pelican have a red-tipped upper beak that is pressed against the crop in regurgitating food for the young; this practice gave rise to the tradition. The pelican appears regularly in Christian art and heraldry. The artist who designed the title page for the AV in 1611 included a depiction of a pelican feeding its young.

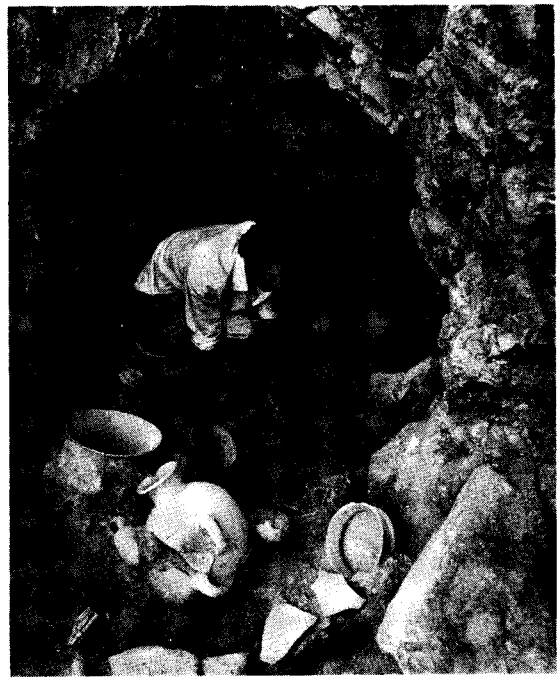
B. C. BIRCH



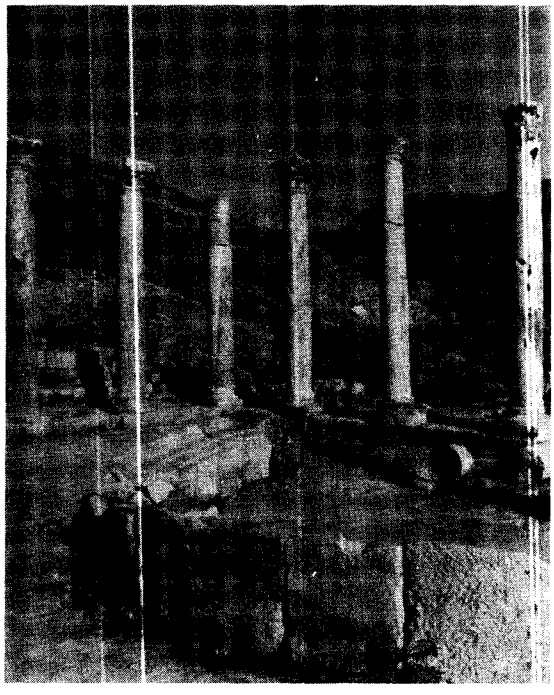
PELLA pel'ə. The impressive site of Pella, locally known as Tabaqat Faḥl, is situated in the foothills of the northern Jordan Valley, about 3 km. (2 mi.) E of the Jordan River. Its central feature is an oval tell (mound) 30 m. (100 ft.) high, at the southern base of which a powerful spring flows into a small valley known today as the Wâdī Jurm. Immediately to the south a large dome-shaped natural hill called Tell el-Ḥuṣn rises more than 60 m. (200 ft.) above the Wâdī Jurm.

It is not yet known when the first settlement was made beside the spring, but sherds and stone implements indicate that the site was occupied in the Neolithic, Chalcolithic, and Early Bronze Ages. The city of Pahila, or Pihil(um), is mentioned in Egyptian texts as early as the 19th cent. B.C. Tombs found in the hills that surround the city have shown that during most of the 2nd millennium B.C. Pella's culture was essentially Canaanite.

There is archeological evidence of occupation during the Iron Age (1200-600 B.C.), a period during which the Israelites controlled Palestine. Although little is yet known of Pella's government, religion, and culture during that

Tomb of the Canaanite period (17th cent. B.C.) at Pella (courtesy of The College of Wooster; picture D. Kuylenstierna)

time, it would seem that the Israelites never exercised strong control over the city. From 600 to 200 B.C. Pella may have been only a village, for few remains of those centuries have been found.



In the 2nd cent. B.C., perhaps after a refounding under the Seleucid monarchy of Syria, the city underwent explosive growth. Earlier cultural affinities largely gave way, at least superficially, to Hellenistic culture. The old Semitic name of the city was replaced in Greek by Pella, the name of the city in which Alexander the Great was born. The invasion and looting of the city in 83/82 B.C. by soldiers of Alexander Janneus, the Hasmonean ruler of Palestine, left the city in ruins. It was not until the 1st cent. A.D. that Pella began a new spurt of growth, this time under the cultural influence of Rome.

Although not mentioned in the Bible, the city was a refuge for Jewish Christians fleeing Jerusalem *ca.* A.D. 67 during the First Jewish Revolt. These Christians later returned to Jerusalem, but Christianity remained established at Pella. Toward the end of the 1st cent. the city began to issue its own coinage, and constructed a small theater (probably an odeon) near the spring. A number of tombs of the 3rd and 4th cents. have been found, many of them rich in glass vessels.

Pella reached its greatest expansion during the Byzantine period (A.D. 325-635), when residential areas crept into the valleys and up the slopes that surrounded the city. Christianity rapidly became virtually the only religion that was tolerated. Several churches were built, including not only the large West Church and Civic Complex Church but a small church high on the eastern hill overlooking the city. The theater was closed and its stone slab seats were reused for a monumental stepped approach to the Civic Complex Church from the west.

The ecclesiastical institutions of the city underwent rapid decline after the Islamic Conquest of A.D. 635, which followed the "Battle of Fiḥl" (Pella) between Byzantine and Arab armies. A massive earthquake devastated the city on January 18, 746/47, burying many persons and animals in the collapsing buildings. The survivors, lacking the resources to rebuild their city, wandered away forever.

Courtyard of the Civic Complex Church at Pella, constructed about the 5th cent. A.D. (courtesy of The College of Wooster; picture D. Kuylenstierna)

Much of what is known about ancient Pella has come through excavations conducted since 1967, initially by The College of Wooster in Ohio and subsequently in cooperation with Sydney University, with the assistance of the Department of Antiquities of Jordan.

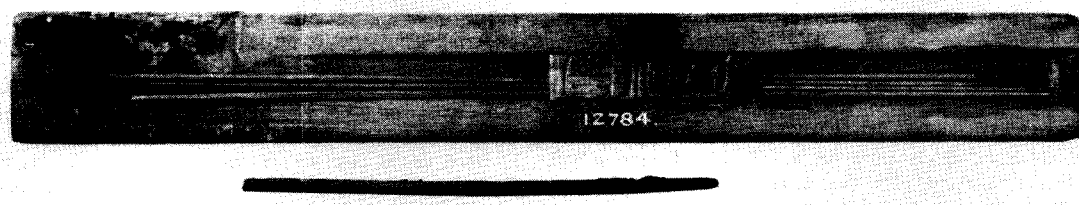
PELONITE pel'ō-nīt [Heb. *p'lônî, p'lōnî*] (1 Ch. 11:27, 36; 27:10). A title applied to Helez and Ahijah, two of David's heroes who fought with him against the Philistines. In the parallel list (2 S. 23:26) Helez is called a Paltite, i.e., a native of Beth-pelet, which is in the Negeb. In 1 Ch. 27:10, however, Helez is said to be an Ephraimite. A comparison of the two lists suggests that Ahijah is identical with Eliam, who is called a Gilonite in 2 S. 23:34. Many scholars have attempted to solve this confusion by concluding that the Chronicles text is in error. See KD on 2 S. 23:26.

G. KROEZE

PELUSIUM pə-lōōs'i-əm [Heb. *sîn*–'clay'?; Egyp. *sîn*; Gk. *Pēlousios*]; AV SIN; NEB SIN, SYENE. Roman name for the Egyptian stronghold which in ancient times guarded the northeast frontier of Egypt. Pelusium lay on the strategic coastal route known later as the "Way to the Land of the Philistines." It was situated approximately 1.5 km. (1 mi.) inland from the sea and about 32 km. (20 mi.) E of modern Port Said. Ramses II (*ca.* 1287-1220 B.C.) is said to have constructed a wall from Pelusium to Heliopolis to defend against Asiatic invasions.



The Heb. *sîn* (Ezk. 30:15f.) is thought to be an exact rendering of the original Egyp. *sîn*. Pelusium, however, is derived from the Gk. *Pēlousios* (<*pēlós*, "clay"), which may be based on a mistaken translation of the Hebrew (cf. Aram. *ʿeyān*, "clay"). Others relate the Greek to an Egyptian religious term (*peremūn*, "house of Amun") connected with the site, which might also explain the origin of the modern designation, Tell Faramâ.

Actual identification of the city mentioned in Ezekiel (30:15f.) is complicated by the LXX's use of two separate names: *Sain* (30:15 = *sîn* = Pelusium; see AV) and *Syēnē* (30:16 = Syene, Aswân; see NEB). The city is mentioned in Egyptian texts of the Old Kingdom and noted as well in such foreign sources as Herodotus (ii.15, 141).

Bibliography.–W. Spiegelberg, *Zeitschrift für Ägyptische Sprache und Altertumskunde*, 49 (1911), 81-84; A. H. Gardiner, *JEA*, 5 (1918), 253f.; *GTTOT*, § 1434. G. H. WILSON

PEN [Heb. *ʿēṭ*] (Job 19:24; Ps. 45:1 [MT 2]; Jer. 8:8; 17:1); NEB also "tool"; [Gk. *kálamos*] (3 Jn. 13); **PENKNIFE** [Heb. *taʿar hassōpēr*–'razor of the scribe'] (Jer. 36:23).

Hebrew *ʿēṭ* is applied to any writing instrument, whether an iron chisel for cutting letters in stone (Job 19:24), a stylus with a point of hard stone or metal for engraving deeply (Jer. 17:1), or a brush which could be used on ostraca, leather, or papyrus (cf. Jer. 36:18; cf. also the ostraca from Arad, Lachish, and Samaria). Any hard point would be used for scratching names on pots or other objects. Most documents, however, were written with pen and ink on leather, papyrus, or potsherds.

Scribe's palette with sharpened reeds (pens). The circular hollow (left) held ink or paint. The inscription reads "Ahmose I" (18th Dynasty, 1550-1350 B.C.) (Trustees of the British Museum)

The pen was made from a selected reed, cut and dried. One end was cut diagonally and the point was carefully shaved thin and then split, as in the modern fountain pen. Finally the very point was clipped off squarely with a sharp penknife (cf. Jehoiakim's rather different use of the penknife, Jer. 36:23).

The AV has "pen" for Heb. *ḥereṭ* in Isa. 8:1 (Heb. *ḥereṭ ʾenôš*, AV lit. "with a man's pen"), but the RSV prefers to translate "in common characters" and the NEB "in common writing" (mg. "with an ordinary stylus"). In Jgs. 5:14 the AV mistakenly translates Heb. *šēḇeṭ* as "pen" (no doubt due to *sōp̄ēr*, "scribe," which follows); the NEB "musterer's staff" is perhaps preferable to the RSV's "marshal's staff" (*sōp̄ēr*, usually translated "scribe," sometimes refers to a military official in charge of mustering; cf. 2 K. 25:19).

The common Greek word for a pen was simply *kálamos*, "reed" (3 Jn. 13).

See G. R. Driver, *Semitic Writing* (3rd ed. 1976), pp. 17-33, 85f. A. R. MILLARD

PENANCE. *See* REPENT.

PENCE. The plural of "penny." *See* MONEY.

PENCIL [Heb. *śereḏ* (Isa. 44:13)]; AV "line"; NEB SCRIBER. Hebrew *śereḏ* is a hapax legomenon and occurs in a difficult context, so its meaning is uncertain. Most scholars agree that it is some kind of marker (NASB, *CHAL*, p. 354, "red chalk"; NAB, BDB, p. 975, "stylus"; cf. modern Heb. *śereḏ*, "marking tool, stylus").

PENDANT [Heb. *nᵉṭîp̄â*] (Jgs. 8:26; Isa. 3:19); AV COLLAR, CHAIN; [*ʿănāq*] (Prov. 1:9); AV CHAIN; NEB CHAIN OF HONOUR. An ornament suspended from the ears or the neck. Heb. *nᵉṭîp̄â* is derived from *nāṭap* ("drip") and probably denotes a drop-shaped EARRING (*see also* GARMENTS IX). Prov. 1:9 compares parental

Canaanite-style, gold pendant earrings from an anthropoid sarcophagus at Deir el-Balach (13th cent. B.C.) (Israel Museum, Jerusalem)

instruction to *ʿănāqîm*, some sort of ornamentation worn about the neck of a young man (cf. Cant. 4:9, where the sing. *ʿănāq* [RSV "jewel"] refers to a part of a woman's NECKLACE, and Jgs. 8:26, where the fem. pl. *ʿănāqôṯ* [RSV "collars"] denotes ornamentation placed by Midianites about the necks of their camels [cf. v. 21]). A similar metaphor is used by the book of Sirach, which describes wisdom and education as a "golden ornament" (6:30; 21:21; Gk. *kósmos chryseós*). Archeological excavations in biblical lands have uncovered pendants made of various materials, including bone, iron, bronze, gold, and semiprecious stones.

I. Introduction.–The term Pentateuch comes to us from the ancient Greek translation of the Scriptures called the Septuagint (LXX) through the Latin Vulgate (*ca.* A.D. 400). The Jewish custom of referring to the five-fifths of the Torah probably lies behind the choice of this term. The actual existence of five distinct literary works (Genesis–Deuteronomy) may have been necessary because of the need to limit the length of a scroll. The Jews called this literature the Torah (*hattôrâ* < the verb *yārâ*, "teach, instruct," "shoot"), which means instruction, a most appropriate designation since the Torah contains the authoritative teaching or instruction given to the Israelites that constitutes them as the people of God. The Torah comprises not only ancient legislation given through God's spokesman Moses, but also an equally impressive amount of historical narrative that forms the context for the legal material. Thus the Torah is the most important section of the Jewish canon.

The English names of the individual books also come to us from the LXX via the Latin Vulgate. The Hebrew method of designating these books follows ancient Near Eastern usage and simply calls each book by its first significant word(s). Hence Genesis is *bᵉrēʾšîṯ*, "in the beginning"; Exodus is *wᵉʾēlleh šᵉmôṯ*, "these are the names"; Leviticus is *wayyiqrāʾ*, "and he [the Lord] called (unto Moses)"; Numbers is *bᵉmiḏbar*, "in the wilderness"; and Deuteronomy is *ʾēlleh haddᵉbārîm*, "these are the words."

This body of literature appears to be of great antiquity. The fivefold division of its contents is secondary and subordinate to the larger literary whole. The Samaritan Pentateuch, however, attests to both the antiquity of the fivefold division and the ancient nature of the whole work (*see* PENTATEUCH, SAMARITAN). On various grounds modern scholars (beginning *ca.* A.D. 1800) have sometimes tried to substitute a Hexateuch (Genesis–Joshua) or Tetrateuch (Genesis–Numbers) for the Pentateuch. These approaches tend to challenge the integrity of the Pentateuch as the constitutive basis for the rest of the OT, as well as for the existence and purpose of the nation of Israel and mankind. Some discussion of these issues is presented below.

II. Contents.–A. Theological Message. The Pentateuch relates God's teleology for the world and humankind as He works with them in the flow of history, at first on a universal scale and then on a more particular level with Israel, through whom He aims to redeem all peoples (Gen. 12:1-3).

The biblical writer reports God's creation in two magnificent chapters that logically precede the later revelation of God as Redeemer to Israel. In highly charged theological-historical language reflecting the ancient world of the author, these unparalleled chapters profoundly delineate God's goals and purposes in creation. God brings all things into existence, even primal matter from which He fashions all things. The primary purpose of creation is to create human beings in God's image, in a right relationship to Him, so that He might be with them and be their God. Of great importance is the perfect environment in which Adam and Eve are placed. Their subsequent fall and frustration from this state of innocent perfection, with all the attendant ramifications, are traced through Gen. 3–11. God's judgment of mankind's corrupt and rebellious ways is highlighted twice, in the Noachian Flood (Gen. 6–8) and in the story of mankind's attempted self-exaltation and autonomous religious achievement (Gen. 11). Mankind's corrupt moral and religious condition is clearly painted (6:5; 8:21-24), but the continued potential for relationship with God is affirmed (5:1-3; 9:6).

The dismal swamp of hopelessness in which mankind finds itself in Gen. 3–11 is lighted with hope because of God's gracious preservation of humanity (chs. 6–9) and His ultimate gracious condescension to act to save mankind through a designated program (12:1-3; cf. 11:1-9). With the

call of Abram (12:1-3) God begins His special salvific program for the reclamation of the human race through Abram and his desendants. Gen. 12–50 relates how God provides for and preserves His chosen people and the specific covenants which He made with them (e.g., chs. 15, 17) so that He could do through Abram all that He had promised (12:1-3).

Thus one soon realizes that various themes run through the Pentateuch and form its basic groundwork (*Grundstrucktur*): creation, judgment, deliverance, promise, election, covenant, law, land, people. All these motifs are realities grounded in history. They testify to the close-knit unity of this multifaceted work and are united in the broader scheme of God's main purpose of making a people as His word effects the promise-fulfillment scheme reflected in His own faithfulness to His goals and purposes.

As noted, the providential care of the chosen people is related in Gen. 12–50, and in Egypt God continues to fulfil His promises in the midst of adversity as He multiplies the few souls who went down to Egypt into a mighty throng of people (Ex. 1:1-7). The book of Exodus recounts the historical and theological birth of the people of Israel from a "people that was no people" — the salvation event par excellence in the OT. The Exodus group is constituted at Sinai (Ex. 19–23) as the people with whom God will dwell; they will be His people (6:6f.; 19:5f.). Here at last God renews a people who will reflect His image and show His character. The logical, if not chronological, priority of Israel's doctrine of creation to the salvific event of the Exodus is evident in that at Sinai this people is lifted toward the very possibility of being the image of their Creator, a religious-moral people in relationship to Him once again. This people is to be God's unique possession among the nations of the earth and be to Him a "kingdom of priests and a holy nation" on the basis of all of the Mosaic covenant.

The remainder of Exodus and Leviticus describes how God makes Ex. 6:7-9; 19:5f. a historical religious-moral reality. Ex. 20–31 record various laws for Israel's instruction and the information needed to build the tabernacle where God will dwell, as well as the ordination of Aaron and his sons as a holy priesthood to span the gap between God and mankind. Ex. 35–40 record the construction of the tabernacle and God's gracious appearance among His people to dwell with them (40:16-38). Leviticus takes up the continuing theme of God's creation of Israel as His unique priestly people among mankind. The priesthood makes communication with God possible and sets up Israel as the unique religious-moral nation on earth, through whom all other nations can find blessing from Israel's God; all this in fulfillment of God's promise to Abraham, Isaac, and Jacob. A major purpose of all of the law, the call of Israel, etc., is to cause the Israelites to love their God supremely and their neighbor and the alien among them as they love themselves (Dt. 6:4-6; Lev. 19:18-34); thus will they be His people.

Further legislation in the vicinity of Sinai is related in the book of Numbers. But Numbers also relates two other important points. One has to do with Israel's disobedience and rebellion in the wilderness, especially in failing to enter the land because of unbelief. The second is concerned with Israel's preparation to enter and take the Promised Land after forty years of judgment and discipline because of disobedience.

Deuteronomy follows as a logical consequence and is an integrated literary unit with the first four books, for it shows that Israel is in essence God's religious-moral people even without the land. On the other hand, Deuteronomy emphasizes obedience to the Mosaic covenant as the only way that Israel can inherit the land of Canaan (a clear parallel to Eden). By the end of Deuteronomy Israel has experienced the amazing faithfulness of God, who fulfilled every promise and covenantal obligation. The giving of the land, based upon Israel's obedience to the Torah, is the story of Joshua–Judges. Hence the Pentateuch gives Israel its *raison d'être*: Israel exists for God's glory, to reflect His image before mankind — ultimately to achieve the salvation of the world.

B. Historical Dimension. It is clear from the doctrine of creation that history is basically the interaction that takes place between God's working to create a people by His word and that people's reaction to His gracious advances within a created framework of reality. This interaction of God, mankind, and the world is the essence of biblical historical reality. Mankind, in its *imago dei* capabilities as religious-moral being, determines to a significant extent the flow of the linear development of history, for the path of history depends upon religious and moral issues. Reality for mankind, the issues of life and death, lies in the arena of God's creation where mankind meets God — in history. Though human beings bear the *imago dei,* they bear it in earthen vessels of creation; they meet their Creator, even as *imago dei,* as created entities in history and subject to finitude and the vicissitudes of historical reality.

The nine basic pentateuchal themes mentioned above are tied to movement and involvement in God's created world, to history. They are not timeless abstract ideas but deal with particular theological or historical realities that exist when God relates to His image-bearing creatures. So the religious-moral message of the Pentateuch cannot be divorced from the fact that God has given His message through events in history to mankind, which is encased in history and meets God in history. Mankind is part of creation; the speaking of God to mankind through the created orders in an ongoing way is historical revelation. Thus if the historical bedrock of God's dealings with mankind is dissolved, then the message of God evaporates into thin air (or at best into abstract religious concepts). It is, in short, not possible to hold to the religious-moral message of the Pentateuch without holding to its basic historicity, which constitutes a necessary but not a sufficient condition for its truth. Hence, in the Pentateuch we understand that, because of the nature of God, mankind, and the world, we are not dealing with myth, fable, mere astrological tales, or literary creations, but with the truth communicated by God to mankind through history in concrete word and concrete event. But as the preceding section has shown, the biblical writers and compilers wrote history from a theological or religious-moral point of view to bring out, as part of God's communication to mankind, the meaning of His mighty acts in the events of history.

C. Literary Character. The Pentateuch is a literary document similar to many other literary documents, except, of course, that God has spoken through the form(s) that it has taken during its compositional history. It is complex, containing scores of literary genres. It is made up of law and narrative, poetry and prose, drama and story; it is in form ancient, not modern; it is complex linguistically, and full of sources of various kinds, yet a unified work. It is literarily sophisticated at times and literarily simple at other times. It is the word of God in human words that numerous hands have worked on to record, preserve, and pass on. Some signs of compilation and growth are evident, as are clear signs of literary arrangement. Its order is at times clear, at times confusing; no cogent reasons can be given for all its literary structures. Some of its language is still not understood, and the method by which it was compiled is far from sure. It speaks in the

language of its day, but the generic humaneness of its message and God's constant purposes and goals for mankind make it relevant to any and all ages and cultures. The profound religious-moral message of the document, its ancient historical nature, and its complexity, both as to its final literary form and the compositional process by which it reached its final form, have combined to make this part of Holy Scripture one of the most discussed portions of the OT.

III. Significance.–The significance of the Pentateuch for understanding the Bible can hardly be stressed too much. It sustains a vital relationship to the rest of the OT and to the NT. Its canonical function is of major importance.

Within the Pentateuch itself, God constitutes Israel as His people by giving them the law without the land. As Deuteronomy emphasizes, acquisition of the land of Canaan is dependent upon Israel's faithfulness to the covenant of Sinai. This conditional relationship of Israel to the land is clearly reminiscent of the relationship between mankind in the beginning and his inheritance of and dominion over the created order. That is, if human beings had been the religious-moral beings God desired, the creation would have been theirs to inherit as a gift of the Creator. This key insight into the nature of the relationship between God and mankind — on the religious-moral level — is determinative for the rest of the OT and the NT as well. The historical books of the OT delineate a history of Israel written from a theological perspective, which is furnished by the Mosaic covenant (God's religious-moral principles for His people). The words of God as recorded in the Torah provide the plumb line by which the historical writer evaluates the vicissitudes of Israel's history before God (esp. 2 K. 17–23). The key to Israel's success lay in the people's obedience to the stipulations of the Sinai covenant. The wisdom and poetical books share much with the surrounding cultures of the ancient Near East, but the basis of success before God and mankind is ultimately found to be the law of Moses, the Torah, which is able to make one successful in daily living, as well as wise and pleasing to God (Prov. 1:7; Ps. 119; etc.). The inspired prophets themselves call the people back to the law of God as revealed in the Torah. And, although they despair of real success in their venture and paint pictures of a new covenant (Jer. 31:31-34), a new creation and new people (Isa. 40–66), and a new heart (Ezk. 34), they still conceive of the new future in terms reminiscent of the old covenant at Sinai; for this picture, in effect, is a final realization of the goals and purposes of God in creation and in the covenant of Moses with Israel. In short, the rest of the OT is simply incomprehensible without the presupposition of the great events of God's revelation and the relationship of God to mankind and Israel as depicted in the Pentateuch. The universal problems of mankind in Gen. 1–11 find a universal solution, not outlined in detail in the prophets, but certainly clearly adumbrated in God's eschatological dealings with the whole earth.

The relationship of the Pentateuch to the NT is just as vital as its relationship to the rest of the OT. As Bush has noted (LaSor, Hubbard, Bush, pp. 3f.), the absolute importance of the Pentateuch is seen in that the NT often refers to events in it (e.g., creation, the call of Abraham) as some of the most significant events that provide the type for the antitypical new creation of the Word of God in the NT. No other OT analogy to what God has done and is doing in Christ is sufficient except the creation itself. The nature of God's creation is indeed the necessary and sufficient logical presupposition for God's new creation in Christ. God's redemptive activity in and through Abraham finds its fulfillment in the NT.

IV. Origin, Composition, Authorship, and Nature.–A. Precritical Positions. Views about the Pentateuch have been many and varied. A relatively brief historical survey of the views past and present is offered below. (For a fuller treatment of this part of pentateuchal studies see the standard intros. to the OT.)

1. OT. A canonical view of the Pentateuch took shape within the OT itself, but it is difficult to determine whether expressions like "the law of Moses," "God's law," etc. refer to a part or the whole of the present Pentateuch. In the historical books (Joshua–2 Kings) the references to the Pentateuch may be to an early form of the legal sections of the Pentateuch, to an early form of the Pentateuch, or mainly to Deuteronomy. It is possible, however, that these references are to the Pentateuch in essentially its present form. The texts are offered here for examination: "the book of the law," Josh. 1:8; 8:34; 2 K. 22:8; "the book of the law of God," Josh. 24:26; "the law of Moses," 1 K. 2:3; "the law that Moses commanded them," 2 K. 21:8; "the commandments which the Lord commanded Moses," 2 K. 18:6; "the law of Moses," 2 K. 23:25. A point to consider in studying these references is that it seems highly unlikely that we should think of the "laws of Moses" without also thinking of at least some basic surrounding narrative accompanying those laws, especially since Israel's understanding of God's revelation always entailed placing it in a historical-cultural setting which could not be divorced from the giving of the revelation. Moses' name is so closely connected with these laws that he is in some way considered as the one through whom they were given to Israel.

The many references to the Pentateuch in the Chronicler's history (Ezra–2 Chronicles) are more clearly to what seems to be a law of Moses reflecting essentially the present form and content of our Pentateuch. Again, essential Mosaic authorship is clearly implied, whatever that may have meant in the ancient Near Eastern world. These references are: "the law," Ezr. 10:3; Neh. 8:2, 7, 14; 10:34 (MT 35); 12:44; 13:3; 2 Ch. 14:4; 31:21; 33:8; "the book of the law," Neh. 8:3; "the book of the law of Moses," Neh. 8:1; "the book of Moses," Neh. 13:1; 2 Ch. 25:4; 35:12; "the law of the Lord," Ezr. 7:10; 1 Ch. 16:40; 2 Ch. 31:3; 35:26; "the law of God," Neh. 10:28f. (MT 29f.); "the book of the law of God," Neh. 8:18; "the book of the law of the Lord," 2 Ch. 17:9; 34:14; "the book of the Lord their God," Neh. 9:3; cf. also "the law of Moses the servant of God," Dnl. 9:11, 13; "the law of Moses," Mal. 4:4 (MT 3:22). Whether these references support a clear developmental view of the Pentateuch in which first only some laws, then Deuteronomy, and finally the whole Pentateuch were attributed to Moses is possible, but far from certain. And again it is difficult to imagine the laws without a basic narrative context surrounding them. The canonical claim of the OT is clear in its assertion that Moses is the essential author of the Pentateuch. This biblical fact cannot be set aside *a priori*.

2. NT. NT references to the Pentateuch continue along the lines already established in the OT but include specific references to Moses' writing activity (e.g., Jn. 1:45; 5:46): Mt. 12:5; Mk. 12:26; Lk. 2:22-24; 10:26; 16:16; Jn. 7:19, 23; Gal. 3:10; etc. These references constitute an internal canonical tradition that points to the divine and human authorship of the Pentateuch, but also just as strongly affirm that the human dimension of its origin and composition cannot be thought of apart from Moses. The internal evidence of the Pentateuch itself as it bears upon its origin and composition will be discussed below.

3. Church Fathers (A.D. 100-*ca.* 600). The first few centuries of the Christian Era were precritical, as far as

biblical studies are concerned. The church fathers accepted the divine origin of the Pentateuch and believed that it was written ultimately by Moses. Some church fathers after the third century, however, seemed to accept the legend of Ezra's miraculous reproduction of the law and other ancient Jewish books recorded in 2 Esd. 14:19-48. It is interesting that in this legend Ezra *dictates* the books as the Holy Spirit moves him and as God enlightens his mind. The inscripturation is effected by five chosen scribes trained to write rapidly. Nevertheless, in this process Ezra is considered the one who authors the books originally recorded by Moses (this seems to be the implication of the text for the church fathers). An interesting concept of authorship, authority, and compositional method is evident here that reflects ancient Near Eastern and biblical thinking. However, the unreliability of 2 Esdras as a historical document and the failure of the church fathers to be critical or accurate in numerous historical and scientific matters are well known, as is their tendency to fanciful interpretation of Scripture and unquestioning acceptance of legendary traditions.

Most early negative concepts of the Pentateuch came from religious or philosophical groups that were considered apostate by both Jews and Christians. E. J. Young, who made a careful study of these early centuries, noted the Nazirites and Ebionites who questioned the Mosaic authority of the Pentateuch in whole or in part. Certain writers, however, indicate that questions were arising about the Pentateuch, especially by the end of the 7th century. Some pentateuchal "problems" were appearing. Already the great church father Jerome (*ca.* 400) had asserted the ultimate Mosaic authorship of the Pentateuch, but did allow for its final form to come from Ezra's time (i.e., 4th cent. B.C.); he did so on the basis of internal criticism of the text of the Pentateuch (e.g., Gen. 35:4; Dt. 34:5-12). He felt that Deuteronomy was the book found in the temple during Josiah's reform (see de Wette below), but did not date the book to Josiah's time.

4. Pre-Reformation Era. During the pre-Reformation era no serious critical approaches were taken toward the Pentateuch, although a few scholars continued to suggest that some material in the Pentateuch came later than the time of Moses. And the unlikely fact that Moses wrote of his own death (Dt. 34) continued to be pointed out (e.g., Ibn Ezra, 1092-1167, and Ibn Ḥazm of Cordova, 994-1064). The scholars of those centuries were still unequipped to deal with the rigorous demands of scientific criticism. However, the beginning of the Renaissance and the resulting study of ancient documents in several languages (Greek, Hebrew, Latin, Arabic) set the stage for the more emphatic concerns of the Enlightenment, a more critical examination of the biblical texts.

5. Reformation. Even the Reformation era did not see the flowering of a serious critical stance toward the biblical materials, although some interesting and strange observations were made by A. Bodenstein, a Catholic (Carlstadt, 1480-1541). He was sure that since Moses could not have written of his death in Dt. 34:1-12, and since the rest of the Pentateuch reflected the literary style of these Deuteronomic verses, then the rest of the Pentateuch was not from the hand of Moses. B. Pereira (1589) suggested that scribal additions had been made in Genesis, and that the Pentateuch had undergone revision and interpretation. Some again suggested that the Pentateuch as a whole was the work of Ezra, who probably used scribal notes. That certain portions of the Pentateuch (at least interpolations) were written by a later hand was generally accepted.

B. Early Critical Observations: Enlightenment (17th-18th Cents.). The deepest roots of much of nineteenth-century criticism lie in the 17th-18th cents., when the "sciences of man" were beginning to be developed. Modern philosophy began with Descartes in France and the rise of Empiricism in Britain (Hobbes, Locke, *et al.*). The Enlightenment was the human attempt to understand this world from several nontheistic points of view. This aspect of the Enlightenment placed the human being at the center of all things and tried to understand him from a humanistic point of view; but a parallel attempt to understand the world, indeed the cosmos, also developed and was a precursor to nineteenth-century positivism. The supernatural and revealed religion were challenged, while a religion of reason was supported (cf. Deism), textual criticism had its beginnings, a concern for history and history writing was engendered, and a general feeling of the gradual growth, development, and progress of mankind was held by many. The people of the Enlightenment tended to see the past barbarous eras of mankind superseded by the present era, in which mankind was finally coming of age. All other past histories and peoples were considered inferior to the present age.

This attitude became inimical in various degrees and various ways to a revelatory and, hence, supernatural book like the OT. Johann Semler (*Abhandlung von freier Untersuchung des Canon* [1771-75]) advocated an approach to the Bible that treated it as any other book, but not as a book of revealed religion. The ancient writings of the Hebrews were even considered inferior and devalued. Not all people during the Enlightenment accepted this devaluation of all past history, however, nor did everyone raise reason above all else (e.g., Rousseau, Jacobi). J. G. Herder (1744-1803) was an intellectual giant who wrote a philosophy of history (*Ideen zur Philosophie der Geschichte der Menschheit* [1784-1791]) to prove the falsity of such a position (cf. also J. G. Hamann, F. H. Jacobi).

Several names are of interest here because of their pronouncements concerning the Pentateuch. In keeping with the tendency of the *Zeitgeist* Thomas Hobbes in *Leviathan* (1651) attempted to study the Pentateuch objectively and from his philosophical point of view. He did not disavow Mosaic authorship to those parts of the Pentateuch attributed to Moses, but he did believe that others were reporting about Moses. Baruch Spinoza (1632-1677), who drew out Descartes' idealism to its logical end, denied the Mosaic authorship of the Pentateuch in *Tractatus Theologicopoliticus*. He developed a systematic approach to the investigation of the Pentateuch and concluded that Ezra compiled the Pentateuch using older material, some of which came from Moses. Deuteronomy was the legal code promulgated by Ezra. Like Hobbes he ascribed to Moses only those portions which the Pentateuch ascribes to him. He also noted the presence of doublets in the Pentateuch. R. Simon, an Oratorian, noted stylistic variations, and both logical and chronological discontinuity in the Pentateuch (*Critical History of the OT* [Eng. tr. 1682]). His solution to the complexity of these puzzling issues was to date the Pentateuch relatively late, although the writer used various sources. A Protestant theologian, Le Clerc, placed the composition of the Pentateuch before the Samaritan schism (4th cent. B.C.). By this time, the *Zeitgeist* of the 17th-18th cents. and the continuing puzzlement of many of the investigators of the Pentateuch clearly indicated that someone would soon attempt a more complete and satisfying solution to the origin, authorship, and composition of the Pentateuch.

C. Development of Critical Theories. 1. Antecedents of Graf-Wellhausen. In 1753 Jean Astruc attempted to solve the enigma of these pentateuchal issues by an inductive approach (*Conjectures sur les mémoires originaux dont il*

paroit que Moyse s'est servi pour composer le livre de la Genèse). Astruc picked up on an earlier suggestion by C. Vitringa (1689) that Moses had probably used sources in compiling the Pentateuch. The sources were likely very ancient; some may have come originally from Abraham, who brought them from Mesopotamia.

Thus, according to Astruc, Moses wrote Genesis using ancient memoirs or sources. The basic criterion that Astruc used to separate out these sources was the divine names 'Elohim and Yahweh, 'Elohim appearing in what Astruc called his A source and Yahweh in a B source. Astruc developed further criteria in order to divide the rest of the Pentateuch into sources. Moreover, he found it necessary to postulate several other sources (e.g., Gen. 14) and an interpolator in order to divide Genesis fully into sources. He speculated that Moses had arranged his material in orderly columns, but that these columns had been confused and the present difficult text had resulted. In all this he did not question the authority of the Pentateuch or its Mosaic authorship. His main fault lay in his presuppositions. His investigations were carried on without an understanding of the nature of ancient Near Eastern literature, and he wrongly assumed that he had the tools to discern the various sources of an ancient document. Finally, his treatment of the Pentateuch as an eighteenth-century piece of Western European literature doomed his investigations to failure from the start. Nevertheless, his analysis of Genesis into sources marks a major development from the confused surmising of the preceding centuries and pointed the way that critical pentateuchal studies would proceed in the future.

Johann G. Eichhorn pursued Astruc's speculations and wrote a three-volume introduction (1781-83) in which he used documentary approaches through Leviticus similar to Astruc's, including the admission that in addition to the J and E sources other sources were also evident that did not conform to a J-E documentary approach. He eventually rejected Mosaic editorship or a Mosaic literary production. Eichhorn's position is often termed the *early documentary* hypothesis.

Another German scholar, K. D. Ilgen, continued this approach to pentateuchal studies by claiming to have delineated up to seventeen different sources in Genesis alone (*Die Urkunden des Jerusalemischen Tempelarchivs*, I [1798]). He divided these "documents" among three different authors: E^1, E^2, and J, and was the first to find two sources within the E document. He did argue with Astruc's division of the various sources between J or E, even assigning Astruc's J in Gen. 1–11 to his E^2. He continued to expand the criteria used in describing the various source documents, for he felt that the use of the divine names was not a sufficient criterion.

Several scholars near the end of the 18th cent. and the first half of the 19th cent. developed similar approaches to the origin, authorship, and composition of the Pentateuch. Some advocated a "fragmentary" approach, which described the Pentateuch as the combination of a number of fragments rather than documents. Alexander Geddes, W. M. L. de Wette, and J. S. Vater developed the fragment hypotheses, and several scholars defended it (e.g., A. Th. Hartmann, *Historisch-kritische Forschungen über die Bildung, das Zeitalter und den Plan der fünf Bücher Mosis* [1831], who questioned whether writing was developed in the time of Moses; Peter von Bohlen, *Intro. to the Book of Genesis* [Eng. tr., 2 vols., 1855]). Astruc had noted the "fragmentary" nature of his sources and had postulated that this phenomenon was the result of an unfortunate mixing of originally distinct sources. Geddes (*Holy Bible* [*ca.* 1792]; *Critical Remarks* [1800]) discerned in the memoirs what he felt were the original fragments, which a redactor had put together to form the Pentateuch. These fragments reflected two different series which could be separated by various criteria, of which the use of Yahweh or 'Elohim was the main one. Moses had nothing to do with authorship of the Pentateuch. These fragments came from various times, some before Moses' time, some after. The final product was placed in the time of Solomon. Geddes also advocated a Hexateuch (Genesis–Joshua) rather than a Pentateuch, since Joshua is of necessity an appendix to Genesis–Deuteronomy. Geddes was strongly influenced by the rationalism which tended to dominate biblical studies for the next fifty years.

J. S. Vater found thirty-eight or more fragments in the Pentateuch and dated it in the Exile (*Comm. über den Pentateuch* [4 vols., 1802-1805]). Deuteronomy was earlier, from the time of David or Solomon.

De Wette was highly influenced by Kantian thought and Kant had little use for the OT. Like Geddes, a philosophical (Kantian) approach characterized his work. He stressed the historical nature of the Bible, and he saw language largely as symbols through which true religious ideas could be expressed. At first de Wette supported the fragmentary approach (*Beiträge zur Einl. in das AT* [2 vols., 1806-1807]), but by 1840 he had switched his support to the supplementary hypothesis (*Lehrbuch der historisch-kritischen Einl. in die Kanonischen und apokryphischen Bücher des AT* [6th ed. 1845]). Of particular importance was de Wette's theory that Deuteronomy was the book found in the temple when Josiah's reform was in progress (cf. Geddes, Jerome).

Heinrich Ewald, both a great biblical theologian and a great critic of the 19th cent., criticized de Wette's early position (*Die Komposition der Genesis kritisch untersucht* [1823]). Ewald saw the Achilles' heel of a fragmentary approach to the Pentateuch to be the amazing unity of a book like Genesis, and this principle extends to the allusions of one part of the Pentateuch to another part. For a time Ewald advocated a supplementary hypothesis, which posited an E or Elohist document as the basic source into which parts of a parallel J source had been inserted. This combined source constituted the later basic E document. Ewald changed his mind (as shown in *Geschichte de Volkes Israel* [1843]) when he moved to a crystallization hypothesis, which was highly complex but whose basic principle was that various parts of the first six books of the OT served as centers around which other parts clustered for the final Hexateuch (*ca.* 600-500 B.C.). Many narrators and editors took part in this process. Ewald's change of view was prompted by his isolation of various materials which did not belong to the Yahwist, Elohist, or even the Deuteronomist. Ewald's work effectively stopped the early appearance of a fragmentary approach to the Pentateuch. He did not advocate Mosaic authorship of Genesis, but thought a unity of authorship alone explained its character and ancient features. Thus, although he held to the supplementary position, his stress on the unity of the Pentateuch separated him from scholars like Geddes, de Wette, and Vatke.

Although de Wette had already used Kantian philosophy as a framework for his biblical theology and for doing some of his critical work, with Wilhelm Vatke the Hegelian system of philosophy became dominant, and the OT materials were made to fit into the Hegelian scheme of developmental historiography. Wellhausen later would say that he learned "the most and the best" from Vatke. Vatke forced the religious history of the biblical materials into Hegel's famous scheme of the development of religion. Three stages are thereby discernible in the history of Israel's religion: (1) a religion of nature in which God is

nature in some way or, at least, less than spirit, (2) a religion in which God is a personal spirit, (3) and a religion in which God is an infinite spirit (Christianity) who is both immanent and transcendent. Vatke's rearrangement of the biblical materials to fit this scheme was as follows: (1) judges and early monarchy = primitive and naturalistic stages (thesis), (2) prophets and later monarchy = personal spiritual stage (antithesis), and (3) the postexilic period = the institutionalization and legalization of the legislation and religion of Israel (synthesis). With the faulty views of religious development in Vatke's day, along with the absence of sufficient ancient Near Eastern archeological evidence to curtail speculative theories and a *Zeitgeist* largely determined by Hegelianism (less so by Fichte, Schelling, Schleiermacher, Mach) and early evolutionary thought, Vatke's move to interpret Scripture the way he did is understandable, but unfortunate.

Vatke dated the biblical documents late with abandon since Mosaic monotheism and priestly religion were, according to him, necessarily late whatever the documents implied. The Mosaic theocracy was not actual history. The law was produced by a political-religious state already in existence. Much of the basic literary material of the Pentateuch according to his scheme should be dated much later than it was usually dated (cf. de Wette). Vatke was more radical than many, and his basic work (*Die biblische Theologie wissenschaftlich dargestellt* [1835]) was neglected for nearly a generation, but he set the pace that would be picked up later.

Two main documents had supposedly been isolated by this time, E and J, J being delineated in various ways. Two men projected this documentary approach further to reach the immediate forerunner of the modern view of the documentary theory. Herman W. Hupfeld (*Die Quellen der Genesis und die Art ihrer Zusammensetzung von neuem untersucht* [1853]), found three documents which he called E^1, E^2, and J. Basic to the discovery was his conviction that J was a continuous source intertwined with a source that he called E^2. E^1 was the original *Grundschrift* and provided the basic framework for the Pentateuch. So the sources became E^1, E^2, and J in that order. E. Riehm isolated Deuteronomy (*Die Gesetzgebung Mosis im Lande Moab* [1854]) as an independent source. This preliminary documentary theory was E^1, E^2, J, D. Eventually it would become J E D P (E^2 = E, E^1 = P), indicating a new nomenclature and sequence of sources. Hupfeld's E^1, E^2, J, P were compiled by a final redactor, and thus some literary problems remained in the text. He also agreed with de Wette that Deuteronomy came from the time of Josiah. Many scholars supported Hupfeld's solution, but several adjustments were made to this basic documentary hypothesis before it was finally accepted by a great mass of biblical scholars.

2. Graf, Kuenen, Wellhausen. Three men, K. H. Graf, A. Kuenen, and J. Wellhausen, refined the documentary hypothesis into its modern form. Graf originally maintained that E^1 (E^1 E^2 J D) was the *Grundschrift* of the Pentateuch that J had supplemented. When he proceeded to use D (621 B.C.) as a fulcrum around which to date other legislative and priestly materials (e.g., he dated the Book of the Covenant before Deuteronomy since the latter presupposed the former's laws), he assigned detailed Levitical laws in E^1 to the time of Ezra, although he ascribed the so-called Holiness Code (H) to Ezekiel. E^1, mostly narrative now, still came first, but through criticism from Riehm and Nöldeke and correspondence with Kuenen he became convinced that all of E^1 should be dated late since the narrative could hardly be separated from the laws imbedded in it. Hence he came to favor a sequence of sources reflecting E^2 J D E^1 and asserted that J was a document in its own right and that E^2 J or J E^2 were the oldest documents of the Pentateuch. E^2 and J were combined by a redactor with D. The Priestly Code (including Lev. 17–26) was compiled by Ezra in exile and later combined with E^2 J D to form E^2 J D E^1. Aside from the unlikely literary expertise and acumen which these men professed to share and by which they divided up the Pentateuch, it is most important to observe the extrabiblical Hegelian philosophy and evolutionary presuppositions used to remold, rewrite, and conform the ancient Scriptures to nineteenth-century thought. The bounds of sound literary criticism were exceeded and historical theory and criticism came into play. A. Kuenen (*De Godsdienst van Israël* [1869-70]; Eng. tr. *Religion of Israel*) settled the dispute as to whether E^2 J or J E^2 was the correct chronological sequence by supporting and effectively establishing the J E^2 D E^1 sequence.

Julius Wellhausen presented with great cogency (for those who accepted his presuppositions) the J E D P documentary developmental hypothesis and brought it to dominance and clarity. He was able to present the culmination of the work of decades by many scholars in an effective *magnum opus* (*Komposition des Hexateuchs*). Wellhausen maintained that J and E documents made up the earliest part of the Pentateuch, J being mainly a well-written narrative. He dated J *ca.* 850 B.C. and held that it originated in the southern kingdom. E was dated to 750 B.C. and came from the northern kingdom. A redactor R^{JE} put these two documents together near 650 B.C. after the fall of the northern kingdom. D(euteronomy) came from Judah during the reform of Josiah (621 B.C.). The R^D redactor put D together with J E *ca.* 550 B.C., and finally the priestly document (E^1 = P) was composed well after the Exile and combined with J E D by another redactor to form J E D P. Minor modifications and editorial material were incorporated so that it was not until 200 B.C. that our final Pentateuch was completed. As has been noted, a definite scheme of Israel's historical development lay at the bottom of this reconstruction, and the documentary hypothesis and the developmental hypothesis were wedded by Wellhausen, Hegelian and evolutionary teachings being reciprocal reinforcing influences.

The reader is directed to the basic OT intros. for an adequate presentation of the detailed criteria used to separate J E D P, etc., and a more detailed description of the presuppositions underlying the Graf-Wellhausen hypothesis (e.g., S. R. Driver, *PIOT*, R. K. Harrison, G. Ch. Aalders, A. Robert and A. Feuillet). An attempt to present these criteria here in so short a space would oversimplify the issue. *See also* CRITICISM.

According to Wellhausen the Pentateuch had no actual historicity and nearly all the priestly legislation was merely a retrojection of the cultus that existed in the postexilic community during and after the time of Ezra. Mosaic authorship was out of the question — the man Moses was practically turned into a handy cipher that the real biblical writers had created and used. The claims of Mosaicity in some parts of the Pentateuch were neglected and the canonical and extracanonical tradition of Mosaic authorship was considered totally inaccurate. The progressive revelatory development of Israel's religion and history presented by the biblical literature was rejected almost in toto. The enigma of the origin, authorship, and composition of the Pentateuch *as it stands in Scripture* was not solved. An ancient Near Eastern book was merely made to conform to nineteenth-century literary, philosophical, religious, historical, speculative hypotheses that rejected Scripture's witness to itself and that were uninformed, or

refused to be informed, by knowledge from the ancient Near Eastern world that was accumulating. A clear naturalism dominated Wellhausen's hypothesis; supernaturalism was disallowed as an explanation for any parts of the Pentateuch. The principle that institutions described in a document were basically no older than the time of the composition of the document was accepted, or if "ancient" events were described therein, no historical worth was likely to be preserved in the record because of the great distance of time separating the event and its inscripturation. Scholars had undue faith in their ability to analyze and separate out sources and certainly undue faith in the critics' claim to understand how the writer(s) "should have written" their book.

The Wellhausen hypothesis triumphed in nearly all scholarly circles by the end of the 19th century (e.g., see the intros. by C. Cornhill [7th ed. 1913] and C. Steuernagel [1912] in Germany; the works of W. R. Smith and S. R. Driver in England and America). It seemed that the main problem of the Pentateuch had been solved and only details and a few uncertain matters remained. The younger generation of Bible scholars everywhere was overwhelmed by this new solution.

Several scholars attempted to challenge some conclusions of the Graf-Wellhausen explanation, however. The various divergences of opinion among scholars before Vater, Vatke, de Wette, Graf, Kuenen, and Wellhausen were almost insignificant compared to the chasm that was created between older views of the Pentateuch and those of the Graf-Wellhausen persuasion. The work of Graf and Wellhausen resulted in a revolution in OT theology and history. It is interesting to note, however, that the results of Assyriology and Egyptology were already challenging the new hypothesis in its infancy. The ancient nature of the material in P was being supported by E. Schrader (*Cuneiform Inscriptions and the OT* [2 vols., 1885-88]) and, hence, the late dating of P was questioned. Although some would say that the new Graf-Wellhausen position wiped out the Mosaic period, F. Hommel (*Ancient Hebrew Tradition as Illustrated by the Monuments* [Eng. tr. 1897]), an adherent to the school of Wellhausen and scholar of ancient cultures, could say that Abraham and the stories surrounding him were "historic facts."

D. Responses to Graf-Wellhausen (19th Cent.). 1. Critical School. From 1880 to 1925 scholars who shared many positions with the Graf-Wellhausen school questioned various aspects of the solution. Some argued for an earlier date for P (Riehm, Dillmann, Kittel, Delitzsch, Nöldeke, Klostermann), others argued for an earlier date for Deuteronomy (J. B. Griffiths, *Problems of Deuteronomy* [1911]; Klostermann, *et al.*), and Dillmann and Baudissin argued for an earlier date for H, the so-called Holiness Code (Lev. 17–26). Delitzsch placed the formation of much of the legal material in the time of Joshua–Judges, Klostermann argued for an earlier rescension of JE, and Klostermann, Eerdmans, and Möller attacked the general scheme and presuppositions of the developmental theory of Wellhausen.

Several followers of Wellhausen suggested adjustments of the literary analysis. R. Smend supported an earlier suggestion by K. Budde (*Urgeschichte* [1883]) that J^1 and J^2 are parallel authors discernible in Gen. 1–11. Smend also argued for greater unity of E. His suggestions are referred to sometimes as the *new documentary hypothesis*.

2. Conservative School. Conservative scholars had begun to respond at the beginning of the 19th century. E. W. Hengstenberg, an avowed supernaturalist, wrote a comprehensive rebuttal to the antisupernatural approaches of Vatke, de Wette, and Vater that is still valuable today. Hengstenberg effectively showed how the present arrangement of the biblical material implies and presupposes the authenticity of the Bible's own presentation of God's dealing with mankind and the world (e.g., monotheism is early, the law is implied and alluded to in Joshua-Judges, the law is already in existence as shown by an examination of the prophets, revelation is a vital part of the warp and woof of OT history, etc.). M. Drechsler developed the unity and genuineness of the book of Genesis (*Die Einheit und Echtheit der Genesis* [1838]) and thus argued strongly for an author who created this literary architecture. C. F. Keil (*Manual of Historico-Critical Intro. to the Canonical Scriptures of the OT* [Eng. tr. 1869]) also met the critical school head-on. He did use some historical and archeological facts to buttress his case, but he was writing before Wellhausen's work. H. Ewald also helped stem the total victory of the movement of Wellhausen and his predecessors. He was not in the same school as the others that we have mentioned, but his more respectful approach to the Scriptures and his supplementary and subsequent crystallization theory of the composition of the Pentateuch, along with his nonantagonistic approach to supernaturalism, show how his presuppositions enabled him still to date Genesis materials very early. He refused to surrender totally the internal and traditional integrity of the text.

The reactions of conservatives continued, although their voices were largely unheeded by the majority of OT scholars. The basic foundations of the Graf-Wellhausen hypothesis were attacked by E. Bissell (*Pentateuch. Its Origin and Structure* [1885]), and Geerhardus Vos (*Mosaic Origin of the Pentateuchal Codes* [1886]) claimed essential Mosaicity for the Pentateuch and rejected the literary analysis. Möller picked up on the unity of the Pentateuch and stressed it further.

The general impact of archeology among conservative scholars was to confirm the basic historicity of the biblical accounts, and people like A. H. Sayce, a former adherent to "higher criticism," wrote as impartial archeologists. The facts of the monuments seemed to him to confirm biblical historicity (*Higher Critics and the Verdict of the Monuments* [1894]; *Monuments, Facts, and Higher Critical Fancies* [5th ed. 1927]).

The criteria used to analyze the documents were seriously questioned by J. Dahse, *Archiv fur Religionswissenschaft*, VI [1908] 305-319). He also used the growing archeological evidence to challenge the late dating of the priestly material and to point out the advanced nature of other ancient Near Eastern cultures. In several works H. Wiener (*Essays in Pentateuchal Criticism* [1910]; *Origin of the Pentateuch* [1910]), pointed out differences between the MT and the LXX in the use of the divine names. J. Skinner answered many of these charges by Wiener and Dahse in *Divine Names in Genesis* (1914).

James Orr, a noted conservative polymath, dealt with the critical scheme severely. He used keen reasoning and some archeology and put forth his own hypothesis about the authorship, origin, and composition of the Pentateuch. While admitting the complexity of the Pentateuch, he affirmed full confidence in its unity and historical credibility. He saw evidence of different writers, different styles and stages of compilation, but no need to separate J and E, most of which he said went back to Moses or immediate post-Mosaic times. Deuteronomy is ancient, historical, and the discourses genuine. It was probably an independent work originally, but clearly reflects knowledge of the Mosaic Book of the Covenant (Ex. 21–23), the J E material, and presupposes part of the Levitical legislation. P contains laws from the Mosaic age and is basically Mosaic in origin. The early laws of P date the history early. P was not likely a continuous document, but was rather a framework for

J E that also included independent comment at places. Genesis is probably all pre-Mosaic. When the Israelites came from Egypt they were not a backward, primitive people but were relatively advanced. The patriarchs even knew of books and writing, and "at an early period, in Egypt under Joseph, if not before, attempts were made to set down things in writing." In the beginning, *at an early date* of the formation of the Pentateuch, Orr saw collaboration and cooperation of the original composers, *not much later* in the process (p. 369). Ezra (or some other figure) gave the Pentateuch its final revision.

Orr's work was meticulous and well done. He grasped the essence of historical criticism, and his attempted solution to the problem of the Pentateuch is still echoed in some conservative works. The repeated charge that *no* conservative scholar has tried to present an alternate working hypothesis is plainly false. Orr's attempt is admirable, but no critical scholar ever replied to his suggestions. Most fundamentalists rejected his solution as liberalism, even though he retained the basic historicity and Mosaicity of the Pentateuch and its picture of Israel's history and religion.

A more conservative and well-reasoned defense of the traditional idea of the Pentateuch was presented by W. H. Green, but conservative scholars, as well as critical speculators, were simply not able to put forth a compositional hypothesis of the Pentateuch because the knowledge of how books were made in the ancient Near East was not yet clear. The work of Schrader, Orr, Sayce, Kyle (others could be listed), shows that ancient Near Eastern archeology and philology were beginning to have an impact on biblical studies.

E. Development of Pentateuchal Studies (20th Cent.). Several new types of biblical criticism have developed during the 20th cent., and although the Graf-Wellhausen hypothesis still dominates pentateuchal studies, it does so in many cases — both as to documents and presuppositions — in a modified form. A great number of its adherents reject the original developmental aspect of the critical position and also its nineteenth-century Hegelian garb. Many adherents emphasize the trustworthiness of the historical framework of the Pentateuch (see, e.g., the essays in *BANE*). Although documents are still dated late, the traditions in the documents are considered ancient and quite trustworthy. Some scholars prefer to use certain aspects of the Graf-Wellhausen hypothesis (e.g., J) and feel that even the evidence of ancient Near Eastern studies supports it rather than a greatly modified view (cf. T. L. Thompson). Others, however, criticize and reject the documentary hypothesis and suggest a supplementary hypothesis in its place (Van Seters, Rendtorff). Moreover, among critical scholars a renewed stress on the thematic unity is evident. Conservative scholars are gradually developing the expertise to suggest viable alternatives to the modified Graf-Wellhausen hypothesis rather than merely criticizing it.

1. Ancient Near Eastern Studies. The development of archeology had seriously challenged the assumption of the Graf-Wellhausen hypothesis that the biblical writers of the Pentateuch were often simply calling forth a world that did not exist. By 1930 it was clear that the Pentateuch was not a mere literary construct, but that it called to remembrance a world that had actually existed and had provided the framework within which the ancestors of Israel's faith truly lived and moved and died. At last an external check was being developed by which the gratuitous speculation of many higher critics could be judged. The ancient Near Eastern world was opened up by archeological developments (begun in the 18th cent.) in Egypt, Babylon, Assyria, Syria, Palestine, and Asia Minor. *See* articles on the archeology of various areas for full reviews of this fascinating development.

A few observations about this topic will give the reader some idea of the importance of this field for pentateuchal studies. Although a sound scientific approach to archeology was developed only around the turn of the 20th cent., it is clear that archeological materials were available to nineteenth-century scholars and should have created at least a greater respect for the authenticity of ancient sources and traditions. Schrader's work along with Sayce's work was mentioned earlier (cf. also H. Hilprecht, *Recent Research in Bible Lands* [1897]). George Smith had published Babylonian texts in 1876 (*Chaldean Account of Genesis*), such as the Babylonian Genesis, and part of a Sumerian flood and creation story was found at Nippur (1893-1896). More material from the Sumerians, Assyrians, and others that deals with creation and a great flood has been unearthed from the 19th cent. till the present. The ancient cuneiform script had been deciphered by 1857. Numerous archeological finds confirming the factuality of the historical books of the Bible were known in the 19th cent., but the mass of ancient Near Eastern discoveries began in the 20th century.

In 1901 V. Sheil found a stele at Susa, a former capital of Elam, that had the ancient law code of Hammurabi inscribed on it. The code dates *ca.* 1750 B.C., thus antedating the laws of Moses by several centuries but reflecting the even more ancient laws of Eshnunna (2000 B.C.) and Lipit-Ishtar (*ca.* 1850 B.C.), a Sumerian.

The ancient city of Ur had been excavated as early as 1854, but it was C. L. Woolley who brought the splendor of this ancient wonder to light (1922-1939). He found that education was highly developed and that the Ur III period (2070-1960 B.C.) was possibly the time during which Abraham resided in this great civilization. Writing was already over a thousand years old by the time of Ur III. Ur-Nammu, the founder, was responsible for a law code from this era. It appeared that not only Moses but Abraham also would possibly have been able to write. At the site of Nuzi, SE of Nineveh, the American Schools of Oriental Research found many clay tablets from private homes that paralleled some of the social customs and traditions reflected in the patriarchal narratives of the Bible (sale of birthright, oral blessing, treatment of concubines, adoption, etc.). The date of these tablets was *ca.* 1500 B.C. Old Babylonian texts (*ca.* 2000-1600 B.C.) also furnish good parallels to patriarchal customs. Equally significant finds were unearthed at Tell el-Ḥarîrî (Mari) on the Euphrates (1933-1939). Names were found in these texts that reflect those found in Gen. 11:16, 23f., e.g., Peleg, Serug, Nahor. Other finds at Mari are relevant to pentateuchal studies: texts reflecting the ancient character of priestly practices, the building materials in some structures (reflecting Gen. 11:3), the mention of Ḫabiru and Benjaminites (both may reflect some relation with the Hebrews of the OT) as well as the Arramu (= OT Arameans, e.g., Gen. 24:29; 29:5; Dt. 26:5).

This early tendency to find parallels between the Bible and the ancient Near East in order to confirm the historicity and authenticity of the Scriptures is seen now as somewhat simplistic by some scholars. More will be said on this issue below. Of course, most of the archeological finds do not bear directly or even indirectly upon biblical writings, but they do provide some general context for the Bible.

Finds from Syrio-Palestinian archeological endeavors did not begin until *ca.* 1910. The Alalakh Tablets from northern Syria (15th cent. B.C.), though they do not bear directly on the OT, do contribute to our understanding

of what culture, religion, language, etc. were like at that time. For example, covenant making and covenant contracts, narrative style, Ḫabiru, kingship, marriage contracts, scribal activity, and various other matters are elucidated.

Perhaps the most helpful find so far has been the materials unearthed at the ancient site of Ugarit (Râs Shamrah) in 1929ff. and 1948ff. The polytheistic world of the ancient Near East is clearly delineated, especially in a number of mythological texts. But just as significant is the bearing that the Ugaritic language, which is an alphabetical cuneiform, is having on the understanding of the Hebrew language and the biblical text. Much of this Ugaritic literature coming from the 15th cent. B.C. parallels the writing style and form of the Hebrew Bible (cf. P. C. Craigie, *Ugarit and the OT* [1983]).

The finds at ancient Ebla (Tell Mardikh) in Syria (beginning esp. in the mid-1970's) may continue to increase our understanding of the ancient Hebrew language and script and will certainly increase our understanding of the ancient Near East. Despite the early claims made about the verification of certain OT facts, the full and exact bearing that these materials from Ebla may have on biblical studies is far from certain at the time of writing (*see* TELL MARDIKH).

Egyptian archeological finds began at a very early date. Egyptian hieroglyphic writing, a mixture of phonetic, ideographic, and alphabetic symbols, was deciphered over a period of fourteen years (1808-1822) of intensive study by J. F. Champollion. Egyptian studies have provided indirect confirmation of the authentic Egyptian flavor of the Joseph stories in Genesis and to many features of the material in the book of Exodus. The Amarna Tablets, first discovered in 1887, reflect social and political conditions in Palestine and Egypt possibly during the time of the late patriarchal period and the sojourn in Egypt (some would date the conquest of Canaan during the Amarna period). Excavations at Tanis and Qanṭîr suggest that the biblical record reflects a date for the Exodus during the 19th Dynasty under Rameses II (1304-1290 B.C.). The "Israel Stele" of Merneptah (*ca.* 1220) mentions a people in Canaan bearing the name Israel.

Hittite materials have opened up a new world of the ancient Near East that offers some excellent possibilities for OT studies. When Hilprecht edited his book in 1896 Hittite had not been deciphered, although a fair amount was known about the presence of Hittites in various areas of the ancient Near East. B. Hrozný deciphered the language in 1915, and now the Hittite civilization is recognized as one of the great ancient powers of its time. Hittite treaties from the 2nd millennium may offer a key to the "treaty" nature of Ex. 20, Josh. 24, or even the whole book of Deuteronomy (see Craigie, Clines). Hittite prayers, their idea of sin, and a "deuteronomic" view of national disasters are especially important for OT studies (cf. *AOTS*, pp. 105-114).

Several generations of ancient Near Eastern and OT scholars have worked indefatigably to show the way ancient Near Eastern studies illuminate, illustrate, and confirm (most always indirectly) the biblical materials (Bright, Wright, Albright, Speiser, Livingston, Wiseman, Millard, *et al.*). The result of twentieth-century archeological activity is that many scholars (both liberal and conservative) feel that the data agree with and largely support the OT view of its own history rather than speculative systems that challenge the Bible's own understanding of the history and message that it bears.

However, not everyone has accepted the general consensus that the patriarchal history should be placed in the 1st half of the 2nd millennium. Since the late 1960's some scholars have seriously challenged this almost universal conclusion. Moreover, archeological finds sometimes have raised problems rather than solved them, and it must be remembered that we are talking about indirect confirmation of biblical materials most of the time. Hence, there is room for some divergence of opinion about the implications of the archeological evidence. Evidence can be interpreted in various ways. It is actually surprising, since only a very small fraction of possible archeological work has been done, that the material relevant to OT studies is as abundant as it is. See further below.

2. Form Criticism. Form Criticism (*Formgeschichte*) arose after a sufficient amount of knowledge and interest had accumulated dealing with the ancient Near East and other ancient cultures. H. Gunkel is considered the pioneer of this study in the biblical areas, along with H. Gressmann. Some refinement of the method has occurred since Gunkel wrote *Schöpfung und Chaos in Urzeit und Endzeit* (1895), in which he applied his form-critical method. Although Gunkel accepted the J E D P documents proposed by Wellhausen, he made a revolutionary move in his evaluation of the content contained in the documents. He maintained, e.g., that although P in Gen. 1 as a document is late, many of the traditions (oral and written) used by the composer of the document are very ancient. The possible implications of this approach for the historical value of biblical traditions is evident, and of course, this was simply a little different way of saying what the ancient Near Eastern archeological finds seemed to be saying. Themes such as creation were traced by Gunkel from their first appearance through their final presentation, the changes in message and structure being carefully noted. The method attempted to allow the text "to live again" to some extent. The use of form criticism, however, did not always necessarily buttress the historicity of biblical texts. In fact, as employed by many scholars, it challenges any essential historicity of the events reported in the biblical text (cf. Van Seters, T. L. Thompson).

The OT itself was considered to be largely compositions made up of smaller literary units. The form-critical method tried to show how the smaller units originated and how the larger books (documents) were built up from the smaller literary units. The delineation of the oral traditions behind the literary forms was vital to this approach. The agenda of discerning the various literary types and forms was good, but the attempt to discern the original *Sitz im Leben* (life-setting) behind the beginnings of certain literary forms was questionable, given the speculative principles necessarily used. The *Sitz im Leben* of the biblical text was often ignored. The unity of the final canonical biblical composition tended to be disregarded and the text atomized into disjunctive units. The composer was thought to reveal not his own isolated mind, but much more the social, religious, cultural, and historical dimensions of his time.

Some unfortunate methodological problems arose, however, because of the failure to utilize ancient Near Eastern literary models sufficiently. The actual parallels used were too often taken from much later literature. Some scholars made uncritical assertions of the biblical writers' "borrowings" from other surrounding cultures, but Gunkel himself tried to show the unique religious thought of Israel as well. The tendency of form criticism to see biblical units as products of fertile human minds and cultures, rather than reflections of historical events and people, was inherent to the usual form-critical approach. Controls needed to be found. The revelational and inspirational element of the biblical writings could hardly be discerned at times in the mass of legends, sagas, forms, etc. that were encountered by this method. This is not necessarily the fault of the method, but may reflect operational presuppositions

and a lack of control over the method. Undue attention is often given to the text or situation behind the text, and the evident meaning of the final text is missed or relegated to unimportance or changed by the esoteric factors gained by the investigation behind the text. The "historical kernel" of the various developed themes and genres uncovered often played no necessary or sufficient part in the theological content or form of the final text. The evolutionary scheme of the literary units, from small primitive units to larger complex units, is open to question and not evident at all in much ancient Near Eastern literature. And it is clear that a final form can be used in more than one religious, social, or general cultural setting (hence *Sitz im Leben* is to be used cautiously) and could even originate in various settings.

Many scholars have contributed to the development and use of this method of doing OT studies (see H. F. Hahn, pp. 119-156; K. Koch, *Growth of the Biblical Tradition* [Eng. tr. 1969]; J. Hayes, ed., *OT Form Criticism* [1974]). M. Noth and A. Alt used this approach to study OT law and the tribal beginnings and history of Israel. Although their speculative reconstructions of the patriarchal period have been challenged, they affirmed the ancient nature of some of the material itself. J. Hempel (*Die althebräische Literatur* [1930]), A. Lods (*Histoire de la littérature hébräique et juive* [1950]), and G. von Rad have developed form-critical studies. Von Rad identified the "ancient credos" hinted at in Dt. 6:20-24; 26:5f. with the primitive stage of the development of the Pentateuch. Working with J E D P he said that the Yahwist (J) put more fully developed traditions together and hence was the one who gave the Pentateuch its essential form.

Numerous challenges have been leveled against the studies of Alt, Noth, and von Rad. According to Van Seters any extensive preliterary stage of the pentateuchal material is unfounded. The form-critical method tends to challenge the unity and historicity of the materials if not used along with archeological controls and an awareness of the unitary themes of the Pentateuch. Some form-critical scholars have given the theological nature of biblical writing a more proper emphasis. Alt, von Rad, and Noth affirmed a basic historicity of the pentateuchal material, but both Van Seters and T. L. Thompson, who also used form criticism, denied the basic historicity of the ancient patriarchal traditions. Nevertheless, when used along with the necessary controls of ancient Near Eastern literary and historical materials, a respect for biblical traditions, and an appreciation for larger literary forms and themes, the form-critical method tends to show the historicity, authenticity, unity, and uniqueness of the biblical materials at substantive levels, and to delineate the clear ancient Near Eastern character and ambience of the OT.

3. Tradition Criticism. Gunkel himself had emphasized the oral stages of the traditions that were eventually written down. The study of these preliterary traditions came as a natural step within form criticism. This discipline is termed the history of tradition (*Traditionsgeschichte*). The oral formation and transmission of the various traditions of the OT are studied, but oral tradition is given priority and writing is seen as a late phenomenon in the ancient Near East. Hence, the pentateuchal traditions would have existed for centuries in gradually evolving oral form until they were written down quite late (*ca.* 400 B.C.), according to tradition criticism. M. Noth postulated an early period of oral tradition for the pentateuchal materials before they were recorded in writing, but this has been denied strongly by Van Seters, who has little sympathy for any stress on oral tradition.

Several Scandinavian scholars (H. S. Nyberg, H. Birkeland, S. Mowinckel, I. Engnell) have been largely responsible for the growth and development of this approach to OT studies. However, G. Widengren (*Literary and Psychological Aspects of the Hebrew Prophets* [1948]), himself a Scandinavian, has argued for the parallel use of written and oral tradition, even giving written tradition pride of place. The best introduction is still Eduard Nielsen, *Oral Tradition* (see also J. Lindblom, *Prophecy in Ancient Israel* [Eng. tr. 1962], pp. 220-291). Other writers dealing with traditions outside the OT (e.g., in NT studies, H. Riesenfeld, *Jésus transfiguré* [1947]; B. Gerhardsson, *Memory and Manuscript* [Eng. tr. 1961]) have tended to support a view opposed to the tradition-history school; namely, that it is most likely that important events, traditions, etc. were written down at the beginning (cf. Albright), not the end, of the ancient transmission process. This conclusion seems confirmed by various ancient Near Eastern materials.

Several criticisms have rightly been leveled at this whole enterprise. It sometimes sounds as if those who use the method are absolutely sure of their results; this cannot be the case. The method itself is highly subjective; it is an art and not a science at this stage. A greater use of ancient Near Eastern materials as a control over theory is needed. And more often than not, examples do not come from the ancient Near East. The term tradition history is ambiguous and, as many have noted, the dissemination (2 Ch. 17:9f.) of a work must be differentiated from the oral transmission of a work. This approach sometimes subordinates historicity to faith. The scholar begins to write the record of Israel's faith as it was passed down, not Israel's "event-word" background. But this methodological approach is not able to postulate historicity or nonhistoricity by itself. Some check upon the probable historical truth of pentateuchal traditions *and* the presuppositions of the reader of those traditions must still be furnished by ancient Near Eastern archeological material. Finally, the extant cuneiform documents in the hundreds of thousands surely attest to the great importance of writing at an extremely early period in the ancient Near East. This method, if followed in its critical application, would seem to date the *recording in writing* of the biblical materials much too late. Nevertheless, it has provided valuable insights into the probable oral preservation of some biblical materials before being written down and has emphasized the need to understand how the ancients composed books. This approach helps us gain a great appreciation and understanding of some of the pentateuchal traditions.

4. Canonical Criticism. Brevard Childs's works have put forth a concern to regain the OT Scriptures for the Church while maintaining a proper stance of critical biblical scholarship toward the Bible itself. Canonical criticism presupposes and makes use of all of the types of biblical criticism enumerated above, but tries to avoid the excesses found in each one, e.g., minute analyses of texts, detailed identification of J, E, D, etc., undue concern about the text behind the text. It works seriously with inner-biblical categories in defining authorship, historicity of texts, etc. Authorship and authority, e.g., are to be understood in relation to tradition received, developed, and molded by a community of faith. The received *form* of the canonical corpus is of great importance and hence the problem of Pentateuch, Tetrateuch, or Hexateuch becomes crucial. A positive feature of this method of doing biblical criticism is that it does not pontificate upon historicity or nonhistoricity of the biblical texts, but tries to discern what is of concern and significance to the biblical writer — the theological message of the text is of paramount importance. Childs himself sides neither with those who demand ab-

solute historical accuracy of the biblical events nor with those who require no historical event to lie behind the biblical materials. Rather, his concern is to let the canonical text determine the degree to which we are concerned with this issue when doing exegesis for the Christian community. Canonical criticism draws attention to the fact that it is the final form of the text that has canonical authority for the religious community. A further advantage of this approach is that the overall literary work being studied, be it a chapter, book, or group of books, must be seen in a reciprocal way. For the Pentateuch the method allows great fluidity in interpreting the various literary genres found in this body of literature. Cf. Childs, *Intro.*; *Myth.*

5. Graf-Wellhausen Hypothesis. It is clear that much has happened in the field of biblical studies since 1900 to change and challenge the Graf-Wellhausen hypothesis, but much has happened also to challenge any fundamentalist approach to the highly complex pentateuchal puzzlements. Except for a few cases, a general consensus prevails that archeological evidence implies and helps establish the basic historicity of pentateuchal traditions. Form criticism and its offshoots also argue for much ancient material in the Pentateuch. Linguistic evidence argues for the ancient nature of various parts of the Pentateuch: Nu. 23–24, the Balaam Oracles; Dt. 33, Moses' Blessing; Ex. 15, the Song of Miriam; Gen. 49, the Blessing of Jacob; Jgs. 5, the Song of Deborah and Barak. Various legal and covenantal forms are seen to reflect ancient documents (Book of the Covenant, Decalogue, Deuteronomic laws, etc.). It must be remembered, however, that this has taken seventy years to establish. Many still accept some modified form of the Graf-Wellhausen hypothesis. The various forms of OT criticism have sometimes influenced and even dictated the changes in this method. The *reductio ad absurdum* of the documentary analysis was reached when B. Baentsch (*Exodus-Leviticus-Numeri* [*Handkommentar zum AT*, 1903]) found about seventeen documents or authors in Leviticus (seven different P sigla were used by him!). More moderate adjustments were to come, however, and each document was analyzed and often redated accordingly. The history of each document alone became as complicated and involved as the composition of the whole Pentateuch had been thought to be earlier.

G. Hölscher and R. H. Kennett (*Deuteronomy and the Decalogue* [1920]) dated D later than Josiah. T. Östreicher (*Das Deuteronomische Grundgesetz* [1923]) and A. Welch (*Code of Deuteronomy* [1924]) dated D earlier than Josiah and noted the ancient nature of the traditions contained in the book. Östreicher understood Deuteronomy (*locus classicus*, Dt. 12) to be pursuing cultic purity, not cultic unity as the Wellhausen theory argued. E. Robertson (*OT Problem* [1950]) dated Deuteronomy to the time of Samuel. Some had noted basic differences in J so that J^1 and J^2 were suggested. O. Eissfeldt (*ZAW*, 48 [1930], 66-73; *Hexateuch-Synopse*) separated out L (a Lay source), and felt that it reflected nomadic ideals and dated it to the time of Elijah. J. Morgenstern (*HUCA*, 4 [1927], 1-138) discerned what he called a K document and dated it *ca.* 900 B.C. R. Pfeiffer (*ZAW*, 48 [1930], 66-73) found an S (Seir or South) source with additions (S2). Von Rad (*Priesterschrift*) separated P into P^a P^b, and M. Noth, while using J E D P, felt that a G (*Grundschrift*) source lay at the base of the Pentateuch. Yehezkel Kaufmann (*Religion*) argued vehemently for the recognition of P as more ancient than D and even E or J. Moreover, the existence of some of the traditional sources (J E D P) was challenged, and the supplementary theory was nearly resurrected again. P. Volz and W. Rudolph (*Der Elohist als Erzähler: Ein Irrweg der Pentateuchkritik?* [*BZAW*, 63, 1933]) argued against the existence of E as a narrative source. Volz also denied that P was a narrative source, and thus asserted J as the basic source, while Rudolph accepted P (see also Rudolph, *Der 'Elohist' von Exodus bis Josua* [*BZAW*, 68, 1938]).

In varying degrees these scholars used form criticism, tradition criticism, and archeological materials from the ancient Near East. And some not only tried to modify the documentary hypothesis but even rejected it; especially important were J. Pedersen (*ZAW*, 49 [1931], 161-181) and the Uppsala scholars who were noted above. Pedersen affirmed that the various strands in the Pentateuch were parallel and contained exilic, but also preexilic, material, some of it very ancient. He saw the central core of the Pentateuch as Ex. 1–15, a cult legend that is not an "exposition of ordinary events." It is embellished material, and the original events and *Sitz im Leben* behind it are not accessible to documentary and form criticism. The Uppsala scholars challenged the Graf-Wellhausen construction and called it a modern creation that did not take into account the true nature of the material with which it was dealing. I. Engnell, the leading spokesman for this group, concluded that the Pentateuch is made up of a "P-work" and Deuteronomy, the first part of "the Deuteronomic history work"; both works in their written from may date from the time of Ezra-Nehemiah.

Both von Rad and Noth were highly influenced by form criticism and tradition criticism while still using the standard sigla in their work. Von Rad worked with a Hexateuch, while Noth favored a Tetrateuch (Genesis–Numbers). Both men allowed for a period of oral tradition behind the written materials of each document (J E D P, plus G (?) for Noth). Noth's *Überlieferungsgeschichte des Pentateuchs* is largely concerned with the oral tradition that lies behind the current documents of the Pentateuch, especially the G source (behind J and E), which may have been oral, not written (cf. J. Bright, "Modern Study of OT Literature," in *BANE*, pp. 13-31; C. R. North, "Pentateuchal Criticism," in *OTMS*, pp. 48-83).

However, three scholars have challenged many basics of this whole enterprise as it has moved gradually to assert a "basic historicity" of the biblical traditions. And even more serious criticisms of the various aspects of the original Graf-Wellhausen hypothesis have been forthcoming. J. Van Seters used literary and form-critical analysis to date the traditions of Abraham (Gen. 12–25). He gave priority to this evidence over archeological evidence but used first-millennium B.C. archeological evidence to firm up his form-critical and structural studies of the patriarchal stories. He viewed archeological evidence as analogical and not capable of proving the date of anything. The oral forms associated with Abraham could have first been attached to him when written down. He accepted J and dated it to the exilic period; P is a post-exilic literary supplement to J; J gives frequent clues to his own time. He saw tradition criticism as helpful but needing control by form criticism. He concluded that the usual criteria of source criticism are not adequate to separate out sources, and the existence of the traditional E source in the Pentateuch is highly questionable. Van Seters in effect asserted a supplementary hypothesis centering on J.

T. L. Thompson suggested that the nature of the stories as literature should be the focus of discussion, not the historicity of the events. According to him the patriarchal traditions were taken up into J at the end of the 10th or during the 9th cent. B.C. The traditions do not reflect any "basic historicity." They are based on a late scheme of theology that projects a very unhistorical world view. The question is "whether we are prepared to see literary

forms which are foreign to us . . . as media of truth" (*Historicity*, p. 328). For Thompson archeology has not proven a single patriarchal event to be historical.

R. Rendtorff has suggested a different way of doing source analysis as well as different terminology. He preferred to work with primeval history (Gen. 2–11), Exodus history (Ex. 1–15), Sinai material (Ex. 19–24), and cycles of material centering on Abraham, Isaac, Jacob, and Joseph. These strands of material are parallel in the Pentateuch and joined end to end. Much of the formative work was done during the time of Solomon. The various blocks of traditional material have a level of genuine historicity lying behind them (he respected and approved the use of archeological control data), but have been retold again and again and so altered as to stress the important features fundamental to Israel's faith (*God's History* [Eng. tr. 1962]). These combined sources probably underwent a P and a final D redaction. This approach helps explain the unity of the pentateuchal materials and also militates against the older source analysis of J E D P that often split unified and coherent wholes in an irrational way. Rendtorff's helpful approach, along with Van Seters's and Thompson's new attempts to deal with pentateuchal issues, shows the correctness of his observation that "We possess hardly any reliable criteria for dating pentateuchal literature. Every dating of the pentateuchal sources rests on purely hypothetical assumptions, which only have standing through the consensus of scholars" (*Problem*, p. 169).

Various scholars who accept J E D P in a twentieth-century modified form and who have great respect for the historicity of the ancient traditions contained in the late documents have criticized Thompson and Van Seters severely (e.g., *BHI* [3rd ed. 1981], pp. 67-103; N. Sarna, *Biblical Archeology Review*, 3/4 [1977], 5-9). And leading archeologists (e.g., Y. Yadin) have continued to affirm a very positive relationship between the Bible and archeological data.

F. Conservative Scholarship. Conservative scholars have traditionally been quick to argue against excessive biblical criticism, but slow to develop viable alternative hypotheses. Happily this situation has begun to be remedied, especially since the 1960's. A strong conservative position is developing that neither merely affirms a precritical position on pentateuchal issues nor merely criticizes the other side. Emphasis here will be given to some positive work toward a conservative synthesis of pentateuchal issues. These conservative positions allow for diversity of views, but they share some important basic points: they affirm the basic Mosaicity, historicity, and authenticity of the Pentateuch, and strive to define pentateuchal authority, authorship, and composition according to true inner-biblical categories and ancient Near Eastern models coming from the milieu, ambience, and time of the Scriptures. Important aspects of this position are shared by scholars across the lines of the traditional conservative-liberal dichotomies; the position is arising by force of the evidence. Scholars are seeking to control their syntheses by basing them on solid evidence from the enormous amount of ancient Near Eastern studies that has accumulated during the 20th century. Competent solutions are being offered without recourse to hypotheses which undermine the historical truth of Scripture (the necessary condition for the truth of the scriptural message) or the theological truth and dimension of Scripture (the sufficient condition for the authenticity and truth of Scripture). The supernatural is given its proper place. No full-scale pentateuchal conservative synthesis has yet occurred, but, for all that, neither has a new twentieth-century full-scale synthesis of the pentateuchal issues from any posture been achieved. Especially helpful from the conservative side are the new commentary series published and in process at this time (e.g., *Tyndale OT Comms.*; *NICOT*; *Word Biblical Comms.*). Some sampling of various conservative approaches are noted below. These works have steered away by and large from the extremes on pentateuchal issues and are breaking new ground, and giving younger conservative scholars some solid hypotheses to build on, develop, change, and improve.

It is now recognized that the relationship that existed between biblical compositions and their author(s) is a highly complex issue, and its solution (if possible at all) involves literary form, literary sources, growth and development, oral tradition, ancient Near Eastern concepts, etc. Authorship is to be defined carefully by inner-biblical categories (Childs) and by ancient Near Eastern categories that help illumine the biblical categories. The final evaluation of these issues must be such that the Pentateuch retains its canonical significance for the rest of the OT documents, for the faith of ancient Israel, and for the Church. The Pentateuch must be seen as constitutive of Israel's faith and life (historical books, wisdom books, prophets).

1. Ancient Near Eastern Studies. All scholars are agreed that ancient Near Eastern studies are required for one to answer the questions regarding pentateuchal authorship, origin, composition, and genre. It should be made clear, however, that these studies are not sufficient for us to understand or believe the religious-moral (theological) message of the Pentateuch. Ancient Near Eastern studies are used to control theories about some pentateuchal issues and to help us think in categories appropriate to this ancient piece of literature (Kitchen, Livingston, Segal, Harrison, Millard, Wiseman, Craigie, Wenham, Goldingay, Kidner). Any approach using modern critical methods must respect the theological and historical integrity of the text (unless there is adequate reason for doing otherwise) and be controlled as much as possible by information coming from ancient Near Eastern studies. These studies themselves are not to be used to destroy the uniqueness of the biblical materials. Some form-critical studies have given results that cut across traditional documentary theories and stress the unity of the literature of the Pentateuch (Livingston, Wenham, Craigie).

2. Affirmation of Unity. In general the unity of the Pentatuech is being affirmed with new vigor (e.g., B. W. Anderson, *JBL*, 100 [1981], 5-21; D. W. Baker, "Diversity and Unity in the Literary Structure of Genesis," in Millard and Wiseman; Clines). Various types of sources are indeed recognized (Wenham, Kidner, Harrison), and that many inspired hands have worked to bring us the Pentateuch is admitted. Even within one book (e.g., Genesis) numerous literary genres are present (Gen. 1:1–3:4; 4–11; 12–50, etc.). Of paramount importance, however, is not the individual books of the Pentateuch, but the final product — the Pentateuch as a whole (see II.C above).

3. Historicity. This issue has already been covered sufficiently but again it should be noted that the historicity of the Pentateuch is a necessary condition for the acceptance of the truth content of the Pentateuch, but not a sufficient cause. Conservative scholars recognize clearly that the Pentateuch is a theological-historical document (Goldingay, Kidner), so while the historicity of the biblical story is a necessary condition for its authority, an inspired theological dimension is the only sufficient basis for its authority in all matters of faith and practice.

4. Basic Mosaicity. Very few, if any, modern conservative scholars see the Pentateuch as a composition whose every word, oral and written, came from Moses. Such a position is hardly viable based upon the inner-biblical

witnesses (e.g., Genesis, post-Mosaica) or upon ancient Near Eastern concepts of authorship (Bush, Harrison, etc.). The pentateuchal issues to a great extent do center upon Moses, but his "authorship" or activity must be correctly defined. Both growth and development (e.g., Josh. 24:26; Nu. 26:28-36; 27:1-11; 36:1-9) are probable, and the use of sources by Moses is certain. But the unique religious and moral profundity of the pentateuchal materials was given by revelation and inspiration through Moses in conjunction with tradition(s) available in that day and is not to be leveled to ancient Near Eastern concepts, nor seen as an outgrowth of ancient Near Eastern culture. The constitutive nature of the message of God through Moses to Israel means that the Pentateuch in its essential content (perhaps not final form) is early as a whole, not late. According to what we know about ancient Near Eastern literary composition, Moses could have written much of the material himself, but just as likely he could have dictated much of it to scribes or he could have supervised the compositional process as numerous hands utilized various materials (see below).

The inner-biblical tradition asserts that Moses wrote (e.g., Ex. 17:14; 20:21-23; 24:4-8; Nu. 33:1f.; Dt. 1:6–4:40; 5–26), that he spoke extensively, and that sometimes he orally disseminated what he wrote (Dt. 31:9-11, 19, 30, 32). It is clear that he composed various types of material: law, poetry, and prose narrative. According to ancient biblical tradition he was a highly gifted and well-trained man (Ex. 1–12; cf. *NBD, s.v.* "Moses"). Significant literary activity is predicated of Moses; however, the Pentateuch as a whole is anonymous. Any theories about the origin and subsequent composition and development of the Pentateuch must remain theories open to future adjustment and change. Indeed, only since the early 1960's has real progress been made in understanding authorship in the ancient Near East and how books were put together.

While these materials have been listed it must be noted that Moses' exact relationship to the material in its *final form* is difficult to determine, and conservative scholars differ, and rightly so, on such a hard issue. It is indeed necessary that Moses be the one in whom and through whom God worked as Scripture attests, but it is sufficient to affirm that an inspired writer and *possibly* not Moses was privileged to write down the Mosaic traditions along with many other ancient traditions. The unit of revelation in the OT is indeed the divinely inspired interpreted event (H. W. Robinson, *Inspiration and Revelation in the OT* [1946]). Inner-biblical tradition sufficiently attributes to Moses writing and other activity such that without him there would be no Pentateuch. Several possible relations between the total Pentateuch have been affirmed by conservative scholars, and some are noted below. Demonstrably the integrity and authority of the Pentateuch are maintained and unimpaired.

5. Representative Positions. Several conservative positions on the date of the individual books of the Pentateuch and the Pentateuch as a whole have been offered recently, and each synthesis should receive a hearing. Although the possibilities for the final date of the Pentateuch range rather widely, nearly all agree that the final date of the whole work is not nearly so important as the date, origin, and historicity of its contents. Its authoritative theological canonical function is not contested.

Certain general positions about the final form of the Pentateuch are discernible: (1) Those who give the Pentateuch a date in the Mosaic era, but allow for varying degrees of post-Mosaica. Extensive reference is made to the use of ancient Near Eastern control material and the presence of material already ancient to Moses is allowed in varying degrees. R. K. Harrison, K. A. Kitchen, and others represent this position. Harrison's approach views the Pentateuch holistically as an intimately integrated body of material subject to growth and development during the Mosaic era. He avoids extremes (e.g., Moses did not exist; Moses wrote every syllable of the Pentateuch). He notes that men capable of producing a literary work such as the Pentateuch were present in Egypt. He credits Moses with the bulk of the materials specifically attributed to him, noting that Moses may have dictated some of this material. It is an open question as to how many laws of the Pentateuch are original with Moses and how many are a product of Israel's pre-Settlement history. Priests helped preserve parts of the text and these materials were put together later. The laws must be seen as dynamic, not static (cf. Nu. 26:28-36; 27:1-11; 36:1-9). Josh. 24:26 shows that later additions were made to the text. Final unity was achieved by Moses or a compiler. Alteration and addition could occur later, a common ancient Near Eastern literary procedure. Editorial activities resulted in explanatory glosses, linguistic changes, etc. in accordance again with recognized ancient Near Eastern practices. The whole in virtually its final form was complete by Samuel's day. K. A. Kitchen suggested that the consonantal text of the Pentateuch existed almost in its present form soon after the death of Moses (notes on "Lectures on Pentateuchal Studies" [n.d.], p. 49). Minor revisions were made later (Gen. 36:31b; Dt. 34:10-12). Orthographical changes took place also. Hence from *ca.* 1200 B.C. the books constituting the Pentateuch existed. Many conservative scholars follow this approach to pentateuchal issues.

(2) Those who hold that most of the material in the Pentateuch is Mosaic and goes back to Moses as "author" defined in ancient Near Eastern terms, but believe that the final form of the Pentateuch is later than Moses and includes substantial amounts of post-Mosaica. *Terminus ad quem* dates range from the time of Joshua to generally the time of Solomon. Ancient pre-Mosaica, post-Mosaica, and later editorial activity are allowed.

M. H. Segal, a Jewish scholar, holds that it is clear that a critical examination of the Pentateuch will conclude that Mosaic authorship is not a viable position for the whole Pentateuch. Considerable parts explain, supplement, and even develop older material. He believes, however, that "the traditional claim of the Mosaic authorship should become the basis of a new study of the problem" (p. 25). These materials are not mere literary inventions, but coming from the Oral Torah they are Mosaic traditions recorded by inspired authors.

G. C. Aalders allows for the material specifically attributed to Moses, but also notes that probably most of the legal material of Exodus, Leviticus, Numbers, and Deuteronomy goes back to Moses as author (p. 151). The present form of these books indicate both post-Mosaica and a-Mosaica. The third-person portions probably were organized by a later hand (cf. Harrison and Kitchen). He allows a "greater freedom in the part of the compiler in dealing with the Mosaic material" (p. 152). Ex. 15 may or may not be Mosaic. The pre-Mosaic material in Genesis does not claim Mosaic authorship, and various sources were used to compose Genesis (cf. Wright, Wiseman, Naville, Kidner). Gen. 14 appears to be a non-Israelite source. The entire antediluvian history (Gen. 1–6) was probably written during the sojourn in Egypt or earlier. Several post-Mosaic documents are noted by Aalders (Book of the Wars of the Lord, Nu. 21:14f., 17f., 27-30; Balaam oracles, Nu. 23–24). The final revision of the Pentateuch was in the early years of David's reign. The

final statement to be made about the Pentateuch is that God is its ultimate and true author.

(3) Those who date the final form fairly late (9th-7th cents.), but recognize genuine ancient traditions in the composition of the Pentateuch. Pre-Mosaica, post-Mosaica, editorial comment, and additions are suggested, but the original constitutive dimension of the Pentateuch for Israel's faith at an early stage is not lost. J. A. Thompson (*Deuteronomy*), while holding that a substantial part of Deuteronomy stems from long before the 7th cent., brought out the important point that it was probably necessary for a "representation" of the words of Moses at important key moments in Israel's history. The final form, therefore, of Deuteronomy and of the Pentateuch could stem from as late as the 7th cent. B.C., although its essential form came from a time during the united monarchy (pp. 67f.).

F. Bush finds several formative periods for the Pentateuch (LaSor, Hubbard, Bush, pp. 54-67). He mentions the period of slavery in Egypt as a likely time when the patriarchal stories were preserved orally. They were later written down during the Mosaic period. The events of the Exodus and the wilderness wanderings were recorded in writing during the early monarchy. The final form of the Pentateuch stems from the time of Ezra in the 5th cent. B.C. Ultimately, however, it is not the date of the Pentateuch as we have it that is of most significance, but the final product, which, early or late, embodies God's inspired word and ancient traditions from pre-Mosaic to post-Mosaic times.

More scholars representative of these three basic stances could be discussed (Wiseman, Kidner, Wright, Goldingay, Wenham, Cole, Livingston, Hamilton, *et al.*), but enough has been said to indicate some of the vital agreements among conservative scholars about pentateuchal issues and also to note some important disagreements. Although no new synthesis or a conservative consensus on all pentateuchal issues has arisen, it appears that conservative beginnings in this area are promising. The alternative positions being proffered — critical attempts to achieve a cogent replacement for the outdated and inaccurate twentieth-century modification of the Graf-Wellhausen hypothesis — are weak. Some rapprochement between conservative and liberal scholars is discernible. Generally speaking, conservative work has been even more fruitful in the study of the individual books of the Pentateuch (see bibliography below; *see also* GENESIS; EXODUS, BOOK OF; LEVITICUS; NUMBERS, BOOK OF; DEUTERONOMY; MOSES; TEXT AND MSS OF THE OT; CRITICISM). When these various excellent positions concerning the individual books of the Pentateuch can be synthesized, a more worthy conservative working hypothesis for pentateuchal studies will be achieved.

PENTATEUCH, SAMARITAN. The Scripture of the Samaritan sect.

I. Outline of Samaritan History
II. Origins of the Samaritan Pentateuch
III. Knowledge of the Samaritan Pentateuch
IV. The Nâblus Scroll

V. Character of the Samaritan Pentateuch
VI. Qumrân and the Samaritan Pentateuch
VII. Conclusion

I. Outline of Samaritan History.–The Samaritan community that has existed in Nâblus for many centuries seems to have originated after the conquest of Samaria by Sargon II in 722 B.C. That Assyrian monarch made the area around Samaria into the province of Samerena and repopulated it by replacing the Israelites taken captive to Babylonia with people from Cuthah, Avva, Babylon, Hamath, and Sepharvaim who were loyal to the Assyrian regime (2 K. 17:24). These and later deportees (Ezr. 4:2,10) intermarried with the surviving Israelites and adopted their faith syncretistically (2 K. 17:32f.), being instructed by a Hebrew priest sent back to Bethel by Esarhaddon for that purpose.

These descendants of the Mesopotamian expatriates became known as Samaritans, after the territory that they occupied. These people claimed kinship with the Jews, but the Jews repudiated the relationship as coincidental, regarding the Samaritans as little better than Gentiles. Yet the Jews could not dismiss conclusively the principal thing that they shared: the Torah with the cultic enactments based upon its prescriptions. And when the successors of ancient Judah ultimately succumbed to the Romans in A.D. 70, the Samaritans, whose own existence had been turbulent, survived as a community and to this day celebrate the Passover in Nâblus according to the rites laid down in the Pentateuch. Their most precious cultic possession is a Torah scroll, written in Paleo-Hebrew characters, for which they claim great antiquity.

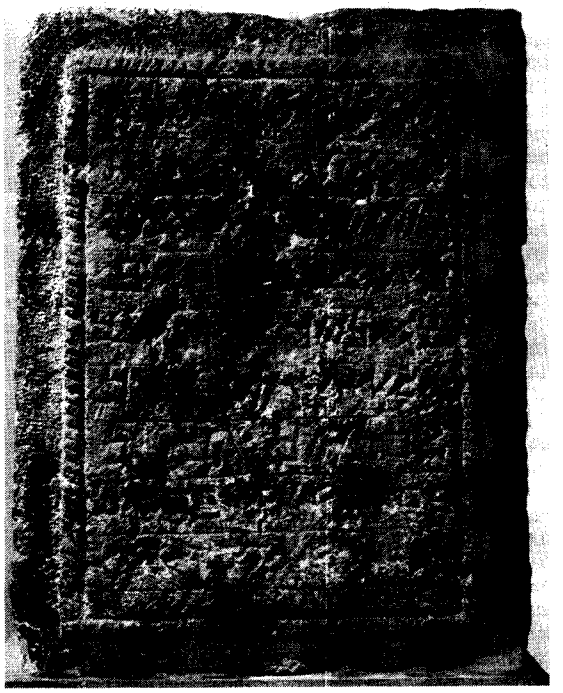
II. Origins of the Samaritan Pentateuch.–On purely historical grounds, the Samaritans and their copy of the Torah (presumably brought from Babylonia at the time of Esarhaddon) could not have existed as a cultic unit before *ca.* 720 B.C. Samaritan traditions deny this late date, however, claiming instead that they originated from those Israelites who had remained loyal to the location prescribed by Moses, Mt. Ebal (cf. Dt. 27:4), when the rest of the nation had adopted the rival site at Shiloh where the ark had been deposited (Jgs. 18:1). The Samaritans gained some archeological support in 1983 when A. Zartel unearthed a large stone altar in a compound on Mt. Ebal that was filled with ashes and sheep bones dated to the 12th cent. B.C. Whether this is the altar of Josh. 8:30 cannot be determined with certainty, but Zartel assigned it to the period of Joshua with great probability, since no other sites dating to the biblical period have been found on Mt. Ebal. Without question the location was a ritual site of great importance and unique in character.

In this connection it is noteworthy that the shrine on Mt. Ebal was the only one built according to Moses' instructions and that the great Hebrew lawgiver clearly did intend that the nation's worship be centered on the Ebal/Gerizim area (cf. Dt. 27:4; Josh. 8:30-35) and not on Jerusalem, which was a Jebusite stronghold until David's time (cf. C. H. Gordon, *Intro. to OT Times* [1953], pp. 132f. [=*World of the OT* (1958), p. 146]; J. Macdonald, *Theology of the Samaritans* [1964], p. 17).

The Samaritans claim similar antiquity for their Pentateuch, regarding it as having originated with Abishua, the great-grandson of Aaron (1 Ch. 6:3f.). While this claim is obviously exaggerated, the canon of the Samaritan Pentateuch was indeed in existence long before the schism promoted by Nehemiah (444 B.C.), since it constituted the sole scriptural material of the community both before and after that time (Roberts, p. 188). The highly conservative nature of the Samaritans guaranteed the transmission of their scriptural text in a form only slightly different from the original and governed by procedures that will be mentioned below. Thus the Samaritan Pentateuch is an important witness to one of the very ancient text-forms of the Hebrew Pentateuch that was current at least as early as the 5th cent. B.C. and that could even reach back to the period of the Hebrew monarchy.

III. Knowledge of the Samaritan Pentateuch.–Of the Greek fathers, Origen knew of it and noted two insertions that do not appear in the MT, Nu. 13:1 and 21:12, drawn from Dt. 1:2 and 2:18. Eusebius of Caesarea in his *Chronicon* (J. Karst, ed., *Die griechischen Christlichen Schriftsteller, Eusebius Werke*, V [1911], 40) compared the ages of the patriarchs before Abraham given in the LXX with those given in the Samaritan Pentateuch and the MT. Epiphanius was aware that the Samaritans acknowledged the Pentateuch alone as canonical. Cyril of Jerusalem noted agreement of the LXX and the Samaritan Pentateuch in Gen. 4:8. These are the principal evidences of knowledge of the Samaritan Pentateuch among the Greek fathers. Jerome noted some omissions in the MT and supplied them from the Samaritan Pentateuch. The Talmud shows that the Jews retained a knowledge of the Samaritan Pentateuch longer than Christians, and speaks contemptuously of the points in which it differs from the MT. Since the differences observed by the fathers and the Talmudists are to be seen in the present form of the Samaritan Pentateuch, they afford evidence of authenticity of that form.

After nearly a millennium of oblivion the Samaritan Pentateuch was restored to the knowledge of Christendom by Pietro de la Valle, who in 1616 purchased a copy from the Samaritan community that then existed in Damascus. This copy was presented in 1623 to the Paris Oratory and shortly after published in the *Paris Polyglot* under the editorship of Morinus, a priest of the Oratory who had been a Protestant. He emphasized the difference between the MT and the Samaritan Pentateuch in order to prove the need for the Church to decide which texts are Scripture. A fierce controversy resulted, in which various Protestant and Catholic clergymen took part.



Now many copies of the Samaritan Pentateuch can be found in Europe and America. All of them may be regarded as copies ultimately of some Nâblus prototype, though not necessarily of the Abisha scroll. These copies are in the form not of rolls but of codices or bound volumes. They are usually written in two columns to the page, one column being the Targum or interpretation, which is sometimes in Aramaic and sometimes in Arabic. Some codices show three columns with both Targums. Probably nearly 100 of these codices are in various libraries of Europe and America. They are all written in the Samaritan script and differ only by scribal blunders.

IV. The Nâblus Scroll.–This ornate (Abisha) scroll has been described as being made "of parchment, written in columns, 13 in. deep, and 7½ in. wide. The writing is in a fair hand, rather small; each column contains from 70 to 72 lines, and the whole roll contains 110 columns. The name of the scribe is written in a kind of acrostic, running through these columns, and is found in the Book of Dt. The roll has the appearance of very great antiquity, but is wonderfully well preserved, considering its venerable age. It is worn out and torn in many places and patched with re-written parchment; in many other places, where not torn, the writing is unreadable. The skins of which the roll is composed are of equal length and measure each 25 in. long by 15 in. wide " (J. Mills, *Three Months' Residence at Nablus, and an Account of the Modern Samaritans*

[1864], p. 382). The parchment has been written only on the hair side, and the roll is preserved in an elaborately decorated silk case. The genuineness of the Abisha scroll was questioned from the time of G. Genenius's study (*De Pentateuchi Samaritani origine, indole et auctoritate* [1815]), which demonstrated the superiority of the MT in a rather sweeping manner that has necessitated a subsequent modifying of some of the original conclusions. P. Kahle regarded the manuscript as mixed in character, combining ancient elements with fourteenth-century ones. A Samaritan Pentateuch manuscript from the 7th cent. formed part of the *Paris Polyglot* (1632) and Walton's *London Polyglot* (1675), whereas A. F. Von Gall's five-volume edition (*Der hebräische Pentateuch der Samaritaner* [1914-1918]) drew largely on medieval manuscripts. Studies of photographs of the Abisha scroll have supported the great antiquity of the text (R. E. Moody, *Boston University Graduate Journal*, 10 [1957], 158-160).

V. Character of the Samaritan Pentateuch.–The script is different from the square "Aramaic" characters of a modern Hebrew Bible, being instead a primitive type of rounded script formerly described as Phoenician. This divergence from the early *'iḇri* letters enabled hostile Jews of a later period to recognize the uncultured origins of the Samaritans for what they really were (T. B. *Sanhedrin* 21b). Political and religious considerations apart, however, the style of the Samaritan Pentateuch's lettering is a form of Paleo-Hebrew, and the various extant manuscripts make it clear that this ancient version had its own developed vocalization and an unusual type of paragraph division (cf. E. Robertson, *Catalogue of the Samaritan Manuscripts in the John Rylands Library at Manchester* [1938], cols. xxi-xxii; *Notes and Extracts from the Semitic Manuscripts in the John Rylands Library, III, Samaritan Pentateuch Manuscripts* [1937]).

Extracts from Dt. 6:4; 23:15; 28:6 in Samaritan script. From a limestone block that perhaps stood in a doorway (like a mezuzah). From Nâblus, 13th cent. A.D. (Trustees of the British Museum)

The way in which the Samaritan Pentateuch differs textually from the MT suggests that the Samaritans did not have a body of professional scribes such as the *sōperîm* of the Hebrews. The Samaritan Pentateuch has an estimated 6000 textual variants from the MT, and in 1900 instances it agrees with the LXX (P. Kahle, *Theologische Studien und Kritiken*, 88 [1915], 399-439; cf. A. Sperber, *HUCA*, 14 [1939], 161-249.) While some Samaritan Pentateuch readings appear to be genuine variants, perhaps representing an early divergent tradition of the MT, others reflect Samaritan doctrinaire tendencies, e.g., the stress on the sanctity of Mt. Gerizim. Thus a slightly modified form of Dt. 27:4, in which that mountain was substituted for Mt. Ebal, is inserted in the text of Gen. 20. In Nu. 25:4f. the Samaritan Pentateuch harmonizes the command of the Lord with the actions of Moses, so as to remove any possible conflict. Probably in the interests of propriety, the Samaritan Pentateuch changed the text of Gen. 50:23 from *'al-birkê yôsēp* ("born upon Joseph's knees" [RSV]) to *bîmê yôsēp* ("born in the days of Joseph"). Again, in Dt. 25:11, the Samaritan Pentateuch read a euphemism (*bᵉśārô*, "his flesh") instead of the more explicit MT *mᵉḇušāyw* ("his genitals"). Many changes are orthographic, with the style of the Samaritan Pentateuch exhibiting a fuller spelling than the MT, as is characteristic of the Chronicler as well as of the later Hasmonean period. Early Hebrew used the letter *he* for a final long *ô* of the third masculine singular pronominal suffix as in Gen. 9:21, where the MT has *'hlh* but the Samaritan Pentateuch reads *'hlw*. The use of *scriptio plene* ("full spelling") writing occurred more consistently in the Samaritan Pentateuch than in the MT. In morphology, the short form of the imperfect verb with *waw*-consecutive was replaced in the Samaritan Pentateuch with the long form of the imperfect. Occasionally the *waw*-consecutive-and-the-perfect of the MT was replaced in the Samaritan Pentateuch by the *waw*-conjunctive and the normal verb form. Another morphological procedure was to replace the infinitive absolute of the verb with an imperative or a finite verb form, thus reversing a grammatical trend familiar in the Amarna Age. At various points in the tradition the scribes glossed the text to obtain greater clarity by such devices as inserting subjects, appositives, prepositions, and particles, and at the same time removed discrepancies in syntax. In common with the scribes of other ancient Near Eastern nations, the Samaritans modernized their Scriptures by replacing archaic Hebrew forms with constructions and terminology of a later period. Accordingly, it must be remembered that a "Hasmonean" form in the Samaritan Pentateuch need not be regarded as original, and thus an argument for a late date of the version, but merely as an item of scribal revision, and therefore only an indication of the date of the particular recension in which it occurs. As in other ancient manuscripts, there are some variants that appear to be the result of a scribe confusing letters that look alike in the Samaritan and Hebrew scripts used in more recent times. But in Ex. 1:11, where the Samaritan Pentateuch reads *piṯōn* for MT *piṯōm*, the confusion may well have arisen if the scribe of the Samaritan Pentateuch was copying from a Torah scroll written in the ancient angular script of the Siloam inscription (*ca.* 701 B.C.), in which *m* and *n* are very similar in form.

Some scholars have adopted a date as late as the 1st cent. B.C. (W. F. Albright, *FSAC*, pp. 345f.; F. M. Cross, *Ancient Library of Qumran and Modern Biblical Studies* [2nd ed. 1961], p. 172) for the origin of the Samaritan recension and its archaizing script, but M. Greenberg (*JAOS*, 76 [1956], pp. 161-63) and others have opted for a

date in the 4th cent. B.C. The late date for the Samaritan Pentateuch as a sectarian recension is based partly on paleographic evidence that suggests that in the Hasmonean period there began a separation of the paleo-Hebrew script into branches, one of which was the archetype of the Samaritan script (F. M. Cross, "Development of the Jewish Scripts," in *BANE*, pp. 133-202, esp. 189 n. 4). Additional support is thought to be found in the argument that the Samaritan Pentateuch, like the Hasmonean-era Dead Sea Scrolls, exhibited such orthographic features as the full use of the *matres lectionis*, but as has been observed above, this was also a feature of the Chronicler's orthography. Such Samaritan Pentateuchal peculiarities as the use of *aleph* as an additional *mater lectionis* for *ā*, the abbreviated spelling of certain suffixes and pronouns, the general omission of the *he locale*, and the use of the so-called "pseudo-cohortative" form are more consistent with a scribal modernizing of the text in Hasmonean times than the creation of a new sectarian document at that late date.

In fact, there is a sense in which the Samaritan Pentateuch was sectarian in nature from its inception. Scholars should consider its origins rather than late recensions. Thus, to compare the oldest extant examples of Samaritan lapidary inscriptions with what appears on the surface of coins of the Hasmonean period, as Albright did in an attempt to establish the "lateness" of the Samaritan sectarian recension (*FSAC*, pp. 345f., n. 12), is surely misguided. Inscriptions engraved on durable material, whether stone or the surface of a die, demand by the very nature of that material a different approach to the reproduction of the inscribed symbols than would be the case for a record of events made on a papyrus or leather surface, where a much more flexible scribal technique is possible. A better approach would be to abandon evidence that is patently late and concentrate instead upon comparing the Samaritan script with that of the 5th cent. B.C. Aramaic papyri from Elephantine, the Siloam Inscription, or even the Lachish Letters (*ca.* 590 B.C.), rather than with the more stylized Hasmonean lapidary materials. In view of the suggestion that the Samaritan recension was written in an archaized script, a practice also employed at Qumrân, it should be remembered that the Samaritan scribes did not need to "archaize" the script used because their tradition knew of no other form, unlike the MT, which moved from Paleo-Hebrew to the square "Aramaic" characters.

The simplest explanation of the provenance of the Samaritan Pentateuch is that the Samaritans took over a text that was already in existence and put their own distinctive imprint upon it, as indicated by the sectarian and other readings. That text seems to have been Palestinian in origin rather than Egyptian (as was the case with the LXX), but it was closely related to both the MT and the LXX. It is quite possible that it was dependent upon or influenced by one of the textual types that underlay the LXX. In any event, the circumstances that marked the history of the Samaritan sect point to an early rather than a late period for the characteristic alterations in the Samaritan Pentateuch.

Contrary to the view of some scholars, there is no evidence that the Samaritans first acquired a copy of the Torah as a consequence of the altercation between Nehemiah and one of the sons of Joiada (Neh. 13:28). By 300 B.C. Ben Sira was making sarcastic comments about the Shechemites (Sir. 50:26), and in the Hasmonean period relations between Samaritans and Jews had become so embittered, especially after John Hyrcanus destroyed the Samaritan temple on Mt. Gerizim (Josephus *Ant.* xiii.9.1 [256]; *BJ* 1.2.6 [63]) in 128 B.C., that contact between the two peoples at a religious level for the purpose of making a "Samaritan sectarian recension" would have been unthinkable. It is equally difficult to imagine the Samaritans preserving the entire Torah in oral form until a late period of their history, and the attempt to date their recension toward the beginning of the 1st cent. B.C. appears to be an accommodation to the more extreme form of the Graf-Wellhausen hypothesis, which would have the Pentateuch appearing in its final redaction about 200 B.C. But if the Torah was in substantially its present state by the early monarchy, as conservative scholars frequently maintain, there is no reason why a copy of the Law could not have been circulating among the expatriates at Samaria in the days of Esarhaddon, particularly if a priest from the captivity instructed the Samaritans in the ancient Hebrew law from such a scroll. Orthographic considerations also suggest an earlier rather than a later time of origin for the Samaritan recension, if only because some scribal variations seem best explained by the copying into Samaritan script of a Hebrew Torah already extant in a script similar to that of the Siloam Inscription. Indeed, the Samaritan alphabet seems to be only a slightly more developed form of the Hebrew script current in the days of Hezekiah (716-686 B.C.), which would be sufficiently archaic for all normal scribal purposes. Thus the view that the Samaritan sectarian recension was made in an archaized script resurgent about 110 B.C., as J. D. Purvis (*Samaritan Pentateuch and the Origin of the Samaritan Sect* [1968], pp. 16-87) and others have suggested, is beset by great difficulties.

VI. Qumrân and the Samaritan Pentateuch.–From the fourth cave came many fragments of an early recension of Exodus, designated 4QEx^{a}. P. W. Skehan (*JBL*, 74, [1955], 182-87) stated that they bore a clear relationship to the Samaritan Pentateuch, being written in a form of script antecedent to that found in the Abisha Scroll and other copies of the Samaritan Pentateuch. In addition, the Qumrân fragments of Exodus exhibited the same peculiarities as the corresponding Samaritan Pentateuchal text. Skehan indicated that 4QEx^{a} attested to the antiquity of the Samaritan textual tradition and its constancy of transmission, but did not assert the priority of the Samaritan Pentateuchal text over its Hebrew counterpart. It has therefore been conjectured that the fragments probably formed part of a first-century B.C. private collection that was incorporated into the Qumrân library. Were this the case, it would indicate that the Samaritan Pentateuch enjoyed with the MT a correspondingly long period of textual transmission, and that if copies of the Samaritan Pentateuch were extant in the 1st cent. B.C. the autograph must of necessity have originated very much earlier, as is also the case with the book of Isaiah (*see* ISAIAH VIII.F). Again the fragments raise the question about why any scribe would desire to "archaize" deliberately a recension of the Samaritan Pentateuch when there was already at least one in circulation in 110 B.C., which was extant in an even older type of script.

VII. Conclusion.–The Samaritan Pentateuch embodies an ancient text that has been updated periodically in accordance with the generally accepted canons of scribal practice in the ancient Near East. When the Samaritan Pentateuch agrees with the LXX against the MT, both testify to the existence of a pentateuchal recension going back at the very least to the 5th cent. B.C. Even this source had undergone scribal revisions in process of transmission, making for a very venerable archetype. While the Samaritan Pentateuch, when used in conjunction with the LXX, can furnish useful information in an attempt to restore an "original text," the readings of the Samaritan Pentateuch

must be evaluated with great care if improvements upon the MT are being sought, since it tends in any case to demonstrate the purity of the MT. Most of all, the value of the Samaritan Pentateuch to the scholar is the manner in which it attests to the antiquity and textual integrity of the Torah.

PENTECOST pent'ə-kost. Greek *pentekoste* means "fiftieth" and came to designate the fiftieth day after Passover. The OT does not use the term, but instead refers to the festival as the "feast of weeks" (Ex. 34:22). On this day the Church was born.

I. OT Roots.–According to the Jewish calendar all males were obligated to appear before the Lord three times each year (Dt. 16:16). Pentecost was the second of these national festivals and took place fifty days or seven full weeks after Passover (vv. 9f.). It was designated the "feast of weeks" since it concluded the interval that began with the presentation of the first harvest sheaves, thereby marking the end of the grain harvest. It was celebrated with much joy, the cessation of hard work, and the ritual presentation of a "cereal offering of new grain" in the form of two loaves of leavened, salted bread (Lev. 23:16f.; Nu. 28:26) along with freewill offerings. It was also inevitably an occasion for covenant renewal. Year by year as the Israelites participated in this agrarian festival they gave thanks to Yahweh for showing His faithfulness by providing another harvest to sustain them through the coming year, and they thereby reaffirmed their covenant bond to Him. *See also* FEASTS.

II. NT Witness.–A. Actual Event? Was the outpouring of the Holy Spirit at Pentecost a historical event or merely a theological construction by Luke? Some have argued (e.g., Haenchen, pp. 172f.) that inasmuch as no uniform tradition existed about the coming of the Spirit (see Jn. 20:22), Luke contrived an implied correspondence between God's breathing life into man at Creation and His Spirit's creating the new man in Christ at Jerusalem. But the evidence is overwhelming that the Church began in Jerusalem shortly after Jesus' resurrection, and that the "pillar apostles" (Peter, James, and John), although Galileans (Acts 1:11; 2:7), assumed leadership of the Church in Jerusalem, not Galilee. The apostle Paul did not challenge this situation. Luke drew from a uniform tradition: something tremendous happened in Jerusalem that transformed the apostles into men of conviction and courage and provided them with a spiritual impetus that enabled the Christian movement to expand rapidly, so that in a few decades vital congregations were in all the major cities of the Roman Empire (Dunn, *Jesus*, pp. 138f.). The reality of Pentecost could not have been contrived: "This was not done in a corner" (Acts 26:26).

B. Divine Visitation? Critical scholars make much of the more striking features of Luke's account — wind, fire, and speaking in tongues — and regard them as theological constructions more than realities. Emotional tension and prolonged expectation have often precipitated communal visions. But there is no evidence that Luke was influenced by the burning bush or the Sinai traditions (Ex. 3:2; 19:18). What the disciples were looking for was "the Son of man coming in clouds of glory." Fire, wind, and speaking in tongues were totally unexpected; the event cannot be explained in psychological terms. As for the last phenomenon, the number of people who claim to have spoken in foreign languages and the testimony of those who have recognized their words must be considered. Although the contemporary phenomenon of glossolalia should not be equated with the unique miracle of Pentecost, there is sufficient overlap to establish the possibility, if not actuality, of the pentecostal event (Dunn, *Jesus*, p. 151).

C. Components. This pilgrimage feast of Israel gained new significance for Christians because it coincided with the birthday of the Church. On that day the Holy Spirit baptized 120 disciples of Jesus as they awaited His coming, doubtless in an upper room in the temple (Lk. 24:53). This event marked the climax of Jesus' ministry, for the sending forth of the Holy Spirit followed His ascension and thus fulfilled John the Baptist's ultimate prediction that the Messiah would baptize "with the Holy Spirit and with fire" (Mt. 3:11 par. Lk. 3:16) after He had become "the Lamb of God, who takes away the sin of the world" (Jn. 1:29). Although only 120 saw the vision and received this initial empowering, before that day ended 3000 were added to their number.

This gift of the Spirit to the people of God is not unlike divine visitations in the OT, with their signs of wind and fire (1 K. 18:38; 19:11-13; Ezk. 37:9-14). But it is distinctive in that its recipients both worshiped God and bore witness to Him in tongues (Acts 2:3f.), and there is the added miracle that many pilgrims in Jerusalem heard their witness "each . . . in his own language" (v. 6).

III. NT Exposition.–The day of Pentecost (Acts 2) marks the shifting of God's redemptive purpose from a particular people (the descendants of Abraham via Isaac and Jacob) to all peoples. On that day the Church was formed and empowered for its worldwide mission; the event thus marks the resumption of universal history, with which the Bible begins (Gen. 1–11). Accordingly, Pentecost has primary importance to all who are concerned with the nature and purpose of the Church, particularly its mandate to preach the gospel of the kingdom throughout the world as a witness to all nations; "and then the end will come" (Mt. 24:14).

A. Peter's Exposition. Fortunately, Peter's sermon on that day (Acts 2:14-36) has preserved the apostolic understanding of the event. Most significant is his stress not on the Holy Spirit but on Jesus Christ, not so much on His earthly ministry and crucifixion as on His resurrection and exaltation as Lord and Christ. Peter began with a refutation of the charge that the Spirit-filled apostolic community was acting in a disorderly fashion (vv. 15f.). He then quoted Joel 2:28-32 (MT 3:1-5) to indicate that Pentecost marks the beginning of the messianic age, the Day of the Lord, that is sure to come to glorious consummation in God's time (vv. 16-21). Peter's main concern was to focus attention on Jesus Christ: His humanity (v. 22), His death (v. 23), and His attestation as deity by

"mighty works and wonders and signs" (v. 22), particularly His resurrection (vv. 24-36). Peter unabashedly used Ps. 16 (cf. Lk. 24:44) to establish David's prediction of the Resurrection. When his hearers came under conviction because of his charge that they had consciously participated in Jesus' condemnation, Peter called for repentance and, using the "keys of the kingdom" (Mt. 16:19), extended the promise of forgiveness and the gift of the Holy Spirit (Acts 2:37-40).

B. Salvation. Pentecost marks the completion of Christ's redemptive work. Following His resurrection He ascended into heaven and presented Himself as the first fruits of a coming harvest. On that occasion He took "into the Holy Place . . . his own blood, thus securing an eternal redemption" for His people (He. 9:12). In this sense Pentecost both consummates Easter and represents its fulness. When the Father accepted this sacrifice "for the sins of the whole world" (1 Jn. 2:2) and exalted Him on high, the Father and the Son together sent forth the Spirit — the gift of the new covenant. Pentecost thereby marks "a watershed in salvation history," the beginning of a new age under a new covenant. An analogy can be drawn between Jesus' baptism and anointing at the Jordan River and what the disciples experienced on that memorable day (Dunn, *Baptism*, p. 40).

C. New Community. At Pentecost the people of the new covenant were consolidated into a new body, which is the body of Christ, a messianic eschatological community, the Church. But a new religious institution was not extracted from the larger social order to become a self-sustaining, separated-unto-God community of faith. Rather, Pentecost marks the initial fulfilling of the prophetic vision of the uplifted temple in Zion, and the Torah's going forth from its innermost sanctuary as the message of God's mighty, redemptive act in reconciling the world to Himself (cf. Isa. 2:2f.; Mic. 4:1f. with Jn. 2:19f.; 12:32; 2 Cor. 5:19). In response the nations began to turn to Yahweh in repentance and faith. A new people of God was formed: the Church, consisting of Jews, proselytes, and "all that are far off, every one whom the Lord our God calls to him" (Acts 2:39).

The very essence and vitality of this new community were "integral and essential to its witness" (Kraus, p. 27). Their loving acceptance of one another and their selfless sharing (*koinōnía*) were nothing less than the universalization of Jesus' ministry by the Spirit in and through each member. All sensed His call to participate in the new social reality that He was sending forth into the world. All expressed their spiritual oneness by "devot[ing] themselves to the apostles' teaching and fellowship, to the breaking of bread [the eucharist] and the prayers" (Acts 2:42). Their love for one another enabled them to affirm their communal relationship "in Christ" by loving service "to all, as any had need" (v. 45).

D. Mission. After the Resurrection and before the coming of the Holy Spirit the apostles had been instructed about the kingdom of God (Acts 1:3). This instruction involved missionary obligation (v. 8) and included the promise that, being energized by the Spirit, they would become witnesses to the resurrected Christ. They would begin this witness in Jerusalem but would not stop until they reached "the end of the earth." Samaria was specifically identified as a reminder that all the fragmented human race must be reached, even those easily overlooked because of reputed cultural or religious inferiority (v. 8). The proclamation of Peter, "standing with the eleven," was the first expression of Christian obedience to this missionary task (2:14). "The first cry of life from the newborn Church was the proclamation that Jesus is the Lord of heaven and earth, as well as the Messiah of the Jews" (v. 36; Kraus, p. 26).

When Peter inaugurated the giving of a new Torah and a new day of salvation, in which men and women, young and old, could become new creatures in Christ (cf. Jer. 31:33; Ezk. 36:27; 2 Cor. 5:17), his intention was that they too might participate in the worldwide mission of the Church. Indeed, the manifestation of tongues in the presence of "devout men from every nation under heaven" (Acts 2:5) was an expression of God's universal redemptive purpose; Peter's appeal (vv. 38-40) marks the beginning of the Spirit's new work: "to gather into one the children of God who are scattered abroad" (Jn. 11:52). Inasmuch as the majority of those in Jerusalem could probably understand Aramaic or Greek, scholars have wondered about the need for this phenomenon. Can it be that God was thereby giving His Church a linguistic mandate: that each separate people should hear the gospel in its primary language — the one closest to the individual heart?

This phenomenon of tongues that were intelligible to people of diverse languages also underscores the Church's essential obligation to bear witness "by word and deed" (deeds need words of explanation, and words need deeds of confirmation; see, e.g., Jn. 5:36; Rom. 15:19). The subsequent coming of the Spirit upon the Roman centurion Cornelius and his household (Acts 10:44f.) and upon some remnants of John the Baptist's revival movement (19:1f.) is additional evidence of glossolalia.

It should be noted that the Spirit was not given just to enable the people of God to pursue personal holiness and enjoy corporate worship and fellowship. Indeed, those concerned with such dimensions of sanctification will not automatically serve their own generation according to the will of God unless they recognize that the Spirit was also given to energize corporate waiting on God for missionary outreach. Acts is replete with references to the Spirit's centrality in the evangelistic activity of the Church (4:8; 13:2; 15:28; 16:6; etc.). Thus the initial pentecostal event is to be distinguished from the subsequent infillings of the Holy Spirit when He came upon those who were missionary minded and empowered them to extend the knowledge of Jesus Christ beyond the frontiers of faith (e.g., 13:52–14:1).

All this adumbrates the worldwide missionary movement, which in turn reminds the Church of its eschatological hope in the coming of the kingdom and the final triumph of God in human history. Missionary outreach provides the divine reversal of the scattering and hostility of the nations that followed the judgment at Babel (Gen. 11:1-9). Once men and women of diverse backgrounds are "in Christ," they become "of one heart and soul" (Acts 4:32) — one family — the household of faith.

There has been considerable debate among scholars over the source of the apostles' missionary motivation: was it Jesus' resurrection appearances, the Great Commission, or their pentecostal experience? Actually, all three contributed. The impulse to witness arises from one's understanding of the nature of the Church and from the constraint of the risen Christ's love upon one's heart and life (2 Cor. 5:14f.). As Boer stated: "The descent of the Spirit at Pentecost made the disciples apostles, i.e., missionaries. One might say it branded them as apostles. The world-embracing missionary vision is expressed in prophetic reality in the speaking with tongues. At Pentecost the whole of God's redemptive purpose for the world was for a moment set off in bold relief" (p. 62).

E. Spiritual Gifts. Pentecost marks the beginning of the bestowal of spiritual gifts on all the redeemed so that each may participate in the life of Christ in the midst of the

Church and in the Church's witness to the nations. In this sense it represents God's answer to Moses' prayer: "Would that all the Lord's people were prophets, that the Lord would put His spirit upon them!" (Nu. 11:29). From Pentecost onward all Christians are to regard themselves as called to the full-time task of making Jesus Christ known, loved, and served throughout the world. All have been given spiritual gifts to make this service possible (1 Cor. 12:4f.). Each local congregation should covet the "higher gifts" that will enable it to become what God intends — a community of the Spirit in the midst of the nations, "a new social embodiment of the Spirit of Christ where everyday patterns of life together enhance the new order of the Spirit" (vv. 27f.; Kraus, p. 62). This mission will continue until the gospel has been preached to all nations. It uniquely represents "the sign of [Christ's] coming and of the close of the age" (Mt. 24:3).

IV. Contemporary Judaism.–In the years that followed the birth of the Church, particularly after the destruction of the second temple in A.D. 70, the Jewish community gradually transformed its understanding of the simple harvest festival of Pentecost into a commemoration of the giving of the law at Sinai, which is said to have occurred fifty days after the Passover that marked the Exodus from Egypt (Ex. 19:1). This change in emphasis was possibly a reaction to the Christian celebration of Pentecost, although there is some evidence that the association with the Sinaitic covenant is pre-Christian (Harrison, p. 53). In the English-speaking churches Pentecost is often called Whitsunday because it was a chief day for baptisms and the baptized were clothed in white.

A. F. GLASSER

PENUEL pen-yo͞o′əl [Heb. *pᵉnû'ēl, pᵉnî'ēl* (*K*, 1 Ch. 8:25)].

1. The cognomen of a clan chief of Judah (1 Ch. 4:4) who was the father of Gedor.

2. The name of a Benjaminite who was one of the eleven sons of Shashak (1 Ch. 8:25). On the *K-Q* problem, see GKC, § 90K.

PENUEL pen-yo͞o′əl, **PENIEL** pə-nī′əl [Heb. *pᵉnû'ēl, pᵉnî'ēl*–'face of God' (Gen. 32:30); Gk. *eídos (toú) theoú*–'appearance of God' (Gen. 32:30f.), elsewhere *Phanouēl*]. The name that Jacob gave to a place in Transjordan where he wrestled with "a man" (Gen. 32:24-31), located on the Jabbok (Nahr ez-Zerqā) E of Succoth, near Mahanaim. When Gideon was pursuing the Midianites, he asked the men of Penuel for food, and they "answered him as the men of Succoth had answered." On his return, he destroyed the city (Jgs. 8:8f., 17). Possibly it lay in ruins until Jeroboam I "built" it (1 K. 12:25). The expression, however, may mean that Jeroboam strengthened its fortifications to make it an outer line of defense for his capital Shechem.

The name has been identified as #53 in Shishak's list (Aharoni, *LBHG*, p. 285), and may also be the Panili of Late Assyrian texts. Scholars have placed the site E of the twin mounds Tulûl edh-Dhahab, 6.8 km. (4.25 mi.) above Tell Deir 'Allā (= Succoth?). Cf. *AASOR*, 18 (1939), 232-35.

W. S. L. S.

PENURY. *See* POVERTY.

PEOPLE [Heb. *'am, lᵉ'ōm* (e.g., Prov. 11:26; 14:28); Gk. *laós, óchlos*–'crowd,' *ánthrōpos*–'man,' *dḗmos, génos*–'race,' 'descendants,' *plḗthos*–'multitude' (Lk. 8:37; Acts 5:16; 14:4; 25:24)].

I. OT.–The term *'am* was common Semitic, being related to a root meaning "paternal uncle." In its broadest sense *'am* referred to the human population of the earth (Isa. 24:4f.), then the inhabitants of a given area (e.g., "the people who are [live] in the city," Josh. 8:16; Jer. 29:16; 36:9). The plural form, *'ammîm*, "peoples," usually refers to foreign national and ethnic groups, being frequently interchanged with *gôyîm*. *See* NATIONS.

Of special interest is the expression "people of the land" (*'am hā'āreṣ*). Some have interpreted this as a technical expression for a special class of people, the owners of property and those with political influence, as opposed to the masses (e.g., E. Würthwein, *Der 'amm ha'arez im AT* [1936]; M. H. Pope, *IDB*, I, 106f.). In most contexts, however, the general sense, "the population of the land," is preferable (Gen. 23:12f., Hittites; 42:6, Egyptians; Ex. 5:5, Israelites in Goshen; Lev. 20:2, 4, Israel; Nu. 14:9, Canaanites; 2 K. 11:14, *et passim* in 2 Kings, Judah). In Jeremiah "people of the land" is often juxtaposed with references to kings, princes, and priests (1:18; 34:19; 37:2; 44:21; 52:6, 25; cf. also Ezk. 7:27; etc.). Ezr. 4:4 applies it to the non-Jewish population of Jerusalem and its environs, in contrast to the returned exiles. The plural form, "peoples of the land," occurring in several late texts (Est. 8:17; Ezr. 3:3; 10:2, 11; Neh. 9:24; 10:31f.; 1 Ch. 5:25; cf. "nations of the land," Ezr. 6:21), usually refers to the same groups. The "peoples of the lands" are specifically named in Ezr. 9:1f., 11. For defenses of this broader interpretation see E. W. Nicholson, *JSS*, 10 (1965), 59-66; G. Buccellati, *Cities and Nations of Ancient Syria* (1967), pp. 168ff.

The term *'am* was also applied to smaller groups: the emissaries sent by Israel to Eglon (Jgs. 3:18), Philistine banqueters (Jgs. 16:30), Saul's acquaintances (1 S. 10:11), Solomon's alien labor force (1 K. 5:16 [MT 30]), the returnees from exile with Ezra (Ezr. 8:15), party factions gravitating around specific leaders (e.g., 2 S. 13:34; 15:12; 1 K. 1:39; etc.). In fact, it appears that any time two or more individuals were united in any way, they could legitimately be identified as an *'am*, "people."

Occasionally *'am*, "people," serves as a military term, having reference to any army or group of warriors (e.g., Jgs. 8:5; cf. *ṣābā'*, "army," in v. 6). The most explicit expression is "people of war" (*'am hammilḥāmâ*) in Josh. 10:7; 11:7; etc. In 2 K. 13:7 the *'am* ("army") is broken down into units of cavalry, chariotry, and infantry. Foreign armies are usually described as belonging to a person, or accompanying him (e.g., Pharaoh's people, Ex. 14:6; Sihon's people, Nu. 21:23; etc.). Armies attached to city-states are identified as "the people of the king of a geographic locality," rather than "the people of the geographic locality" (Josh. 8:14; "army," 1 Ch. 19:7).

Several other special uses of *'am* should be noted. In Gen. 19:4 and Josh. 5:4f. the term refers exclusively to men. Isa. 24:2; Hos. 4:9; and Ezr. 9:1 use *'am* for laymen in contrast to the priests. The expression *bᵉnê hā'ām*, lit. "sons of the people," refers to the "common people" or "lay people" (2 Ch. 35:5, 7). Jer. 17:19 identifies the gate used by the common folk as "the gate of the sons of the people" (so JB; cf. AV, NIV, NASB; RSV, NEB, "Benjamin Gate," requires a slight emendation).

The original kinship significance of the root is also remembered in some contexts. Members of a household, including family and servants, were sometimes designated just as "people" (Gen. 14:16; 1 K. 19:21) or as the "people

who were with [the head of the house]" (Gen. 32:7 [MT 8]; 33:15). When a suffix is added *'am* may bear the sense "relative" (2 K. 4:13; Ps. 45:10 [MT 11]). One's countrymen are called "sons of my/your people" (Gen. 23:11; Lev. 19:17f.; cf. Jgs. 14:16). This kinship sense is reflected also in two stereotyped idioms found in the Pentateuch. "To be gathered to one's people," which occurs ten times (e.g., Gen. 25:8), should be interpreted this way because: (1) the translation "peoples" for *'ammîm* is inappropriate; (2) biforms of the expression replace *'ammîm* with *'ābôṯ*, "fathers" (e.g., Jgs. 2:10); (3) death was commonly viewed as a reunion with one's predeceased ancestors. (*See also* GATHER.) "To be cut off from one's people(s)" appears twenty-two times. The phrase signifies not only excommunication from the cultic community (Ex. 12:15, 19; Nu. 19:13, 20), but also execution (Ex. 31:14; Lev. 20:3). In distinguishing between the direct descendants of Abraham and other members of the household, the context of Gen. 17:14 confirms the kinship overtones of the expression.

II. NT.–The RSV translates five Greek terms with "people." *Ánthrōpos* is treated generically in Jn. 4:28; 6:10, 14; Rev. 11:13. *Dḗmos*, which generally translates *mišpāḥâ*, "race, family," in the LXX, occurs only four times in the NT. In each instance the reference is to the population of a city: Jerusalem (Acts 12:22), Thessalonica (Acts 17:5), Ephesus (Acts 19:30, 33). This use of *dḗmos* reflects Heb. *'am* more than *mišpāḥâ*, a development that surfaces as early as Dnl. 8:24; 9:16 (LXX), and the intertestamental writings. In 2 Cor. 11:26 and Gal. 1:14 *génos* is rendered "my people," i.e., countrymen (cf. also Phil. 3:5).

The most important term for "people" in the NT is *laós*. Apart from the kinship overtones of the latter, the semantic range of *laós* parallels roughly that of *'am* in the OT. The national significance, common in the LXX, is reflected in the eight plural occurrences (Lk. 2:31; Acts 4:25, 27[?]; Rev. 7:9; 10:11; 11:9; 17:15). Elsewhere, however, the popular sense, "crowd, population, people," predominates. In Mt. 27:25 *laós* is used interchangeably with *óchlos*, "mob."

In the LXX *óchlos* and *plḗthos* translate a variety of Hebrew terms (*hāmôn, ḥayil, 'am, qāhāl, rabbîm*) and most often refer to "a crowd, host, mob of people," or "an army." In the NT *óchlos* is restricted to the Gospels, Acts, and Rev. 7:9; 19:1, 6, while *plḗthos* is used especially in Luke-Acts. In general, *óchlos* signifies the throngs, the masses, sometimes in contrast to the authorities (e.g., Mt. 14:5; Mk. 15:11; etc.). In John the term acquires a special sense, recalling *'am hā'āreṣ*, "people of the land," in many OT contexts. See esp. Jn. 7:31-49. The plural form *óchloi* in Rev. 17:15 bears a more national meaning, "peoples," opposite *laoí, éthnē* "nations," and *glôssai*, "tongues." D. I. BLOCK

PEOPLE OF EDEN [Heb. *bᵉnê 'eḏen*–'sons of Eden' (so NASB)]; AV CHILDREN OF EDEN. The expression occurs only on the lips of the Assyrian emissary, Rabshakeh, in 2 K. 19:12 par. Isa. 37:12. In his own language the expression would have been rendered *mārū Adini*. In Akkadian texts this phrase is reserved for the members of the Bīt-Adini branch of the Aramean Bīt-Dakkūri tribe in Babylonia (J. A. Brinkman, *Political History of Post-Kassite Babylonia* [1968], pp. 244, 264ff.). This appears to support an identification of the "people of Eden" with these southern Arameans (so M. C. Astour, *IDBSupp.*, p. 251). It seems preferable, however, to identify this Eden with another Bīt-Adini, a northern Aramean state on the upper Euphrates, W of the Balîkh tributary, for several reasons. (1) In 2 K. 19:12 it is associated with Gozan, Haran, and Rezeph. (2) Telassar (Akk. *Til Aššuri*) need not be tied too closely to Eden; it merely identifies the place to which the "people of Eden" were exiled. (3) The expression *bᵉnê 'eḏen* may refer to the members of the dynasty of Adini, after whom the state was named, rather than to the citizens of the nation. (The practice of naming Aramean states after the founder of a dynasty is paralleled in Bīt-Agusi [Arpad]; so J. A. Fitzmyer, *Aramaic Inscriptions of Sefire* [1967], pp. 40f. Here the members of the ruling family are called the *bny*-Gush, "sons of Gush." Cf. *KAI*, no. 222, A:15ff.; B:1ff. Note also Hadadezer, who is identified as "the son of Rehob, king of Zobah" [2 S. 8:3, 12]. In 2 S. 10:6 Zobah is identified with Beth-rehob.) This interpretation concurs with the reference to the disappearance of a series of kings from the same general area in 2 K. 19:13. One known king of Bīt-Adini, Aḫuni, is identified as a "son of Adini" (*Ḫa-ḫu-ni mār 'a-di-ni, Welt des Orients*, 4 [1967], 36). Significantly, the dynastic name, BETH-EDEN, is preserved in Am. 1:5. (For a defense of the identification of this Beth-eden with Bīt-Adini, cf. Malamat, contra Astour.) The shortened form of the name, Eden, occurs in Ezk. 27:23, where this state is depicted as a trading partner with Tyre, alongside Haran, from the same general region.

Much of the history of Bīt-Adini is unknown. Ashurnasirpal II (885-859 B.C.) identifies Aḫi-yababa, of Bīt-Adini, as the new king, installed by rebels, over Bīt-Halupi (A. K. Grayson, *Assyrian Royal Inscriptions*, II, no. 547). Bīt-Adini itself appears to have arisen about a century prior to the attack by Ashurnasirpal on Kaprabu, the fortified city of Aḫuni the king (*Assyrian Royal Inscriptions*, II, nos. 582ff.). In 856 B.C. the royal city, Til-Barsip, fell to Shalmaneser III, and the state was incorporated into the empire. Til-Barsip was renamed Kar-Shalmaneser and was destined to play an important role in the administration of the western part of the Assyrian empire. Malamat suggests that Shamshi-ilu was the governor over this region at the time of Amos's prophecy.

Bibliography.–E. Honigmann, *Realllexikon der Assyriologie*, II (1938), 33f.; Y. Ikeda, *Iraq*, 41 (1979) 77-79; A. Malamat, *BASOR*, 129 (Feb. 1953), 25f.; *The Aramaeans in Aram Naharaim and the Rise of their States* (1952), pp. 39-47; D. Ussishkin, *Orientalia*, 40 (1971), 431-37. D. I. BLOCK

PEOPLE OF GOD [Heb. *'am (hā)'ᵉlōhîm* (Jgs. 20:2; 2 S. 14:13; etc.); Gk. *laós toú theoú* (He. 4:9; 11:25; cf. 1 Pet. 2:9f.)]. Although the phrase "people of God" does not occur often in the Bible (cf. also *'am YHWH*, Jgs. 5:11; 2 S. 1:12; etc.), the concept is presupposed in the phrases "my people," "his people," or "thy people" (depending on the speaker), which are found roughly two hundred times each in Scripture. In the OT Israel is called out from the nations to be God's people, holy as He is holy, separated to the Lord, and ultimately commissioned to communicate His offer of salvation to the world. In the NT this role passes on to the Christian Church. Throughout the development of the concept in Scripture, the people of God is seen as a corporate, holy, interacting, sharing, worshiping community in the world, God's continuous method of communicating His mind to mankind through mankind.

In Exodus God chooses Israel as His people over against those of Pharaoh (3:7–11:10, esp. chs. 8–9) The theme is "Let my people go!" and the declaration is that the Egyptians "shall know that I am the Lord." Subsequently, in the wilderness after Israel's failure, Moses pleads for the people in terms of God's relationship with them, which gives them their national distinctiveness (Ex. 33:16).

In Deuteronomy the concept develops ethical dimensions.

The "people of God" are to be "holy unto the Lord," a covenant people with a special mission, and committed to observe His commandments (Dt. 7:6-11; 14:2; 27:9f.; 28:9; 29:12f.).

The concept is found throughout the historical books in passages that tell of Israel's conquest of the land (e.g., Jgs. 5:11), salvation from oppressors (e.g., 1 S. 9:16f.; 2 S. 3:18; 5:2; 7:7-11; 1 K. 6:13; 8:16; 14:7; 16:2; 1 Ch. 17:6-10; 2 Ch. 6:5-7; 7:13f.), or the establishment of the house of David (2 S. 7:23f.; 1 Ch. 17:21f.).

The notion of a specific people of God is clear in the eighth-century prophetic oracles and allegories. Israel is continually reminded that it is a covenant people and the cardinal sin is unfaithfulness, by which "My people" becomes "Not my people" (Hos. 1:9f. [MT 1:9–2:1]; 2:23 [MT 25]). The strongest prophetic analogy is the broken marriage relationship (cf. Am. 7:8, 15; 8:2; 9:10, 14; Mic. 1:9; 2:4-9; 3:5; 6:3, 5; Hos. 4:6-12; 6:11; 11:7; Isa. 3:12, 15; 5:13; 32:13, 18).

In the 6th cent. Jeremiah and Ezekiel strongly articulated the figure about fifty times in passages that deal with Israel's turning to foreign idols and forgetting the covenant relationship as the people of God. But even in judgment the prophets retained the phrase. Two other elements are found in this corpus of material about God's people: the moral requirement of holiness (Ezk. 11:20; 38:16; 39:7; 44:23) and the promise of the continuing character of the people of God in spite of captivity — "a remnant shall be saved" (Jer. 24:7; 30:3; 31:31-34; Ezk. 37:11-14). The concept of the people of God occurs in the Psalms, also, as God personally admonishes His people (e.g., Ps. 78:1; 81:8f. [MT 9f.]).

The prophetic use of the concept develops in the second part of Isaiah, which uses the term with endearment and encouragement, e.g., "Comfort my people." The motivation for God's election of Israel is revealed in the series of "His actions" — creating Israel, redeeming Israel, calling Israel, and commissioning Israel as His witness to the nations (43:1-13; cf. 40:1; 43:20; 47:6; 51:4, 16; 52:4-6; 53:8; 57:14; 58:1; 65:10).

Christ reinterpreted the concept in the light of His own ministry and mission to the world, and the CHURCH became heir to the promises of Israel. Directly and indirectly the NT claims the transfer of the role of "people of God," with its responsibilities and promises, to the Church.

The transfer is implied in several NT passages. One is the angelic annunciation to Zachariah (Lk. 1:17) that John the Baptist is "to make ready for the Lord a people prepared." Lk. 24 implies that Jesus understood the words of the prophets to apply to His own work and mission. At the Jerusalem Council Peter testified that God had visited the Gentiles "to take out of them a people for his name" (Acts 15:14).

The transfer is also implied by Paul's apparent use of "Israel of God" for Christians in Galatia (Gal. 6:16). That Christians are newly taken into the people of God is indicated by use of both the imagery of God's temple and the theology of adoption in the same passage (2 Cor. 6:16-18). In Rom. 11, when Paul asks rhetorically if God has rejected His people (v. 1), he answers by speaking of the remnant, chosen by grace (v. 5) from the Gentiles (v. 12). Paul also speaks of the glory of Christ's salvation, His self-giving for redemptive purposes "to purify unto Himself a people of his own" (Tit. 2:14).

The whole typology of the Letter to the Hebrews shows how the institution of the old Israel and their spiritual functions are to pass on in a better form through Christ to the Christian community and how the God-and-people relationship continues (8:10). The gift of the Holy Spirit is another new element that makes Christian believers a corporate, sharing, worshiping community, which Peter describes as "a chosen race, a royal priesthood, a holy nation, God's own people," specifying their roles of praise and witness as "God's people" (1 Pet. 2:9f.).

The Church is thus the "people of God," called as the community of the risen Lord to live the holy life, to minister to the needy world, and to offer salvation to mankind in the name of Christ.

On the level of practical theology, the phrase "people of God" serves as a useful corrective against excessive western individualism. The Church is a community, not of isolated individuals but of participating, interacting partners (Gk. *koinōnoí*), sharing each others' burdens and building up each others' faith. The Church's witness — in the ministries of service, human liberation, and mission — must be a corporate witness.

The phrase may be used of the Church at large in the world or of any operating *koinōnía* when a group sees itself as part of the "body of Christ," performing His ministry and witness in a particular place.

It is quite wrong to use the term "people of God" in a superior, exclusivistic, or isolationist sense ("holier than thou"), as has happened. This is to misuse the "of God" part of the phrase, which makes the goal an outreaching, corporate ministry in the execution of God's purpose in the world — something that calls for humble obedience, not superior isolation. Moral holiness is demanded because God Himself is holy. The people of God must strive for this holiness, although their hope lies not in their own works but in the merits of Christ, through whom alone they may claim the status of people of God (Tit. 2:11-14; 2 Cor. 6:16-18).

Finally, the concept of the people of God extends beyond time and place, for the promise of the fellowship of this company is eternal. All who know Him on earth may participate in this fellowship as a pledge and foretaste of more to come (Rev. 21:1-3; cf. He. 4:9-11a; Eph. 1:13f.).

A. R. TIPPETT

PEOR pē'ōr or pē'ər [Heb. *pᵉʿôr*; Gk. *Phogōr*].

1. A mountain in Moab, the third and last place to which Balaam was taken by Balak in order to curse Israel (Nu. 23:28). Eusebius (*Onom.*) located it on the way from Livius to Heshbon, 7 Roman mi. (10 km., 6.4 mi.) from the latter. Since the camp of Israel in the plains of Moab was visible (Nu. 24:2), it must have been located near Mt. Nebo. Peor was also the site of the Israelites' idolatrous worship of the local Baal (Nu. 25:3, 5, 18; Dt. 4:3; Josh. 22:17; Ps. 106:28). *See* BAAL IV.

2. A town in Judah added to the MT's list of towns in Josh. 15:58 by the LXX (included by NEB). It has been identified with Khirbet Faghur SSW of Bethlehem.

3. The LXX reading for MT *paw* in Gen. 36:39; *see* PAU.

W. S. L. S.

PERAZIM pə-rā'zim [Heb. *pᵉrāṣîm*–'bursting forth' (BDB, p. 829)]. A mountain mentioned only in Isaiah's prophecy of judgment upon the rulers of Jerusalem (28:21). It may be identified with BAAL-PERAZIM (1 Ch. 14:11), where after defeating the Philistines David said, "the Lord has broken through [*pāraṣ*] my enemies before me, like a bursting [*pereṣ*] flood" (2 S. 5:20). Isaiah may thus be referring to the meaning of the mountain's name when he says that just as God's judgment burst upon the Philistines, so now He will "rise up as on Mount Perazim" and His judgment will burst forth on the rulers of Jerusalem.

See E. J. Young, *Book of Isaiah,* II (1969), 292.

W. D. MOUNCE

PERDITION [Heb. *bᵉlîya'al*] (2 S. 22:5 par. Ps. 18:4 [MT 5]); AV UNGODLY MEN; NEB DESTRUCTION; [Gk. *apóleia*] (Jn. 17:12; 2 Thess. 2:3; Rev. 17:8, 11); NEB also "who must be lost" (Jn. 17:12). A term generally used to denote a state or place of utter and eternal destruction.

Various etymological explanations for *bᵉlîya'al* have been proposed (see *TDOT*, II, 132f.), but none has proved totally satisfactory. In 2 S. 22:5 par. Ps. 18:4 the phrase "torrents of *bᵉlîya'al*" occurs in parallelism with "cords of Sheol [*šᵉ'ôl*]" and "snares of death [*māweṯ*]," both of which are personified figures associated with the realm of the dead (*see* DEATH III; SHEOL). Since the underworld is often depicted as a watery, chaotic abyss (*see* DEEP), "torrents of *bᵉlîya'al*" appears to be a poetic figure personifying the powers of CHAOS, i.e., all the evil forces that undermine the divine order for human life (see *TDOT*, II, 134f.; *ILC*, I-II [repr. 1964], 431f., 463f.). This would also help to explain why lawless persons can be called *bᵉnê-bᵉlîya'al* (lit. "sons of Belial" [cf. AV]; e.g., Dt. 13:13 [MT 14]; Jgs. 19:22; 20:13; 1 K. 21:10, 13; RSV "base fellows"; NEB usually "scoundrels"; *see* BELIAL). (Heb. *ben-* is often used to describe a person's character or fate; *see* BEN-.)

Occurring eighteen times in the NT, Gk. *apóleia* is most frequently translated "destruction" by the RSV (e.g., Rom. 9:22; *see* DESTRUCTION II, III). In the LXX it is sometimes used in a personified sense to translate Heb. *ʾᵃḇaddôn* (e.g., Job 26:6; 28:22; Ps. 88:11 [MT 12; LXX 87:12]; *see* ABADDON). Of the four times the RSV renders it "perdition," two are in the expression "son of perdition." In 2 Thess. 2:3 it refers to the "man of lawlessness," God's apocalyptic enemy (*see* ESCHATOLOGY V; LAWLESS). In Jn. 17:12 Jesus tells His Father that He has lost no one except the "son of perdition," i.e., Judas Iscariot, who as the tool of Satan is about to betray Jesus. The phrase here denotes both a person's character and his fate: it refers to "one who belongs to the realm of damnation and is destined to final destruction" (Brown, p. 760). In Rev. 17:8, 11, like 2 Thess. 2:3, "perdition" is used with reference to a creature fulfilling an apocalyptic role of opposition to God. The "beast" is said to "go to perdition" (Gk. *hypágō eis apóleian*; cf. *eimí eis apóleian*, Acts 8:20 [RSV, AV, "perish"; NEB "go . . . to damnation"]; cf. also Phil. 3:19; Mt. 7:13 [NEB "perdition"]; AV "perdition" in Phil. 1:28; 1 Tim. 6:9; He. 10:39; 2 Pet. 3:7). This seems to be synonymous with his being cast alive into the LAKE OF FIRE (Rev. 9:20) along with the devil, the false prophet, and all whose names are not found in the book of life; there he will "be tormented day and night for ever and ever" (20:10, 14f.). Thus, those who oppose God and reject His salvation face the terrible destiny of eternal punishment.

C. PINCHES N. J. O.

PEREA pə-rē'-ə [Gk. *Peraia*, unused in the NT except var. Lk. 6:17 ℵ* W]. A portion of Transjordan included in the kingdom of Herod the Great, and included with Galilee in the tetrarchy of Herod Antipas.

I. Name.–The Gk. *Peraia* appears to have been derived from the more common name *péran toú 'Iordanou*, "across the Jordan" (Dt. 1:5; Mt. 4:25), a translation of Heb. *ʿēḇer hayyardēn* and Aram. *ʿaḇrēh dᵉyardᵉnā'*, both meaning "beyond the Jordan" or "Transjordan." The Greek expression came to be treated as an indeclinable substantive, as in the phrase *en tṓ péran toú 'Iordanou* ("in [the] Transjordan," Dt. 3:20, LXX) and *eis tḗn péran toú 'Iordanou* ("to [the] Transjordan," Josephus *Ant.* xii.4.9 [222]). Josephus frequently used *Peraia* (e.g., *BJ* ii.4.2 [57]); more specifically *hē hypér 'Iordanēn Peraia*, "the beyond-Jordan Perea" (*BJ* ii.3.1 [43]).

II. Location.–Josephus defines the region thus: "Perea extends in length from Machaerus to Pella, in breadth from Philadelphia to the Jordan" (*BJ* iii.3.3 [46]), and states that it is bounded on the east by Arabia, Heshbonitis, Philadelphia, and Gerasa (§47). Since Pella belonged to the Decapolis, Josephus's statement, "the northern frontier is Pella" (§47), must mean that Perea extended northward to, but did not include, Pella; the Wâdī el-Yâbis (on which Jabesh-Gilead is located) formed a northern boundary, and the Arnon a southern boundary (*see* Vol. I, Maps XVII, XXII). In his explorations in Transjordan N. Glueck concluded that the eastern boundary was W of Medeba and he would correct Josephus's statement about the breadth of the region to read "from Jordan to about one half the way to Philadelphia" (*Explorations in Eastern Palestine*, III [*AASOR*, 18-19, 1939], 140, 143). Josephus describes Perea as "for the most part desert and rugged and too wild to bring tender fruits to maturity," but he added that there were tracts of finer soil and the country was watered by torrents descending from the mountains and by springs which never dry up (*BJ* iii.3.3 [45]).

The capital of Perea, according to Josephus, was Gadara (*BJ* iv.7.3 [413]). Some have identified this with Umm Qeis (Muqeis), which was in the Decapolis and too far north to be Perea (*see* GADARA). A more probable location is Gadora (Tell 'Ain Jedûr) near eṣ-Ṣalṭ (*LBHG*, rev., p. 370 n. 129; cf. H. Thackeray, *Josephus*, III [*LCL*], 120f. note b). Other places in Perea that are mentioned are: Amatha (one of the most important fortresses in Transjordan; *BJ* i.4.2 [186]), Zia (15 Roman mi. W of Philadelphia; *Ant.* xx.1.1 [2]), Bethennabris (opposite Jericho [could this be "Bethany beyond Jordan," called "Bethabara" in a variant reading of Jn. 1:28?]; *BJ* iv.7.4 [420]), Abila (Abel-shittim, 8 km. [5 mi.] S of Bethennabris; *BJ* iv.7.6 [438]), Betharamtha (or Bethramphtha, Betharam [Josh. 13:27], which later became Livia and then Julia; *BJ* ii.4.2 [59]; *Ant.* xviii.2.1 [27]), Esbus (Essebos, Essebonitis, Heshbon; *Ant.* xii.4.11 [233]), Medeba (Medaba; *BJ* i.2.6 [63]), Calirrhoe (*BJ* i.33.5 [657]), and Machaerus (*BJ* i.16.6 [317-320]). Medeba and Heshbon were at times outside the districts of Perea.

III. History.–Transjordan is prominent in the OT, and it is subdivided into regions (Gilead, Ammon, Moab, etc.),

but there is no indication of a region corresponding to Perea. Judas Maccabeus and his brother Jonathan crossed the Jordan to aid the Jews whom the Gentiles were attempting to destroy (1 Macc. 5:9-13, 24, 40-44; cf. Aharoni and M. Avi-Yonah, *Macmillan Bible Atlas* [rev. ed. 1977], Map 189). By *ca.* 152 B.C., as a result of Jonathan's conquests, Judea controlled a region in Transjordan that has come to be known as Perea (1 Macc. 11:33, 57-74; *Macmillan Bible Atlas,* Map 199). Demetrius II granted independence to Judea in 142 B.C. In 129 Antiochus VII was killed in battle, and John Hyrcanus seized the opportunity to take over as much territory as possible. His first conquests were in Perea, where the Jews had maintained a foothold since the time of Jonathan, and he extended this region by taking a portion of the Nabatean holdings (*Ant.* xiii.9.1 [254f.]; *Macmillan Bible Atlas,* Map 208).

Pompey liberated gentile cities that had been occupied by Jews since the time of John Hyrcanus, and Gabinius, proconsul of Syria 57-55 B.C., attempted to split the Jewish state into five districts: Galilee, Jericho, Jerusalem, Adora (Eastern Idumea), and Perea. Perea's capital was at Ammathus (*Ant.* xiv.4.4 [75f.]; xiv.5.4 [91]; identified with Tell 'Ammatā, a few miles NE of the junction of the Jabbok and the Jordan, in R. Marcus, *Josephus,* VII [*LCL*], 405 note d). The Roman effort failed in its purpose of dividing the Jewish people, and the concept of five districts soon disappeared.

In 31 B.C. Herod the Great was confirmed by Octavian (Augustus) in his kingdom and added many other regions, so that by 20 B.C. his domain was at its greatest extent. At Herod's death Augustus divided the kingdom among Herod's three surviving sons, and Herod Antipas received Galilee and Perea (*BJ* ii.6.3 [93-95]). Agrippa I, grandson of Herod the Great, received the tetrarchy of Philip in A.D. 37, that of Antipas in 39, and the rest of Herod's kingdom in 41 (*Ant.* xviii.6.10 [237]; xviii.7.2 [252]; *BJ* ii.9.6 [181-83]; ii.11.5 [214f.]). When Agrippa died in A.D. 44 the rule of Judea was turned over to the Roman procurators, but in 53 the tetrarchy of Philip was granted to Agrippa II (*BJ* ii.12.8 [247]), and under Nero he also received portions of Galilee and Perea (*BJ* ii.13.2 [252]). When Agrippa II died (*ca.* 95) Perea became part of the Roman province of Syria.

IV. Jewish and NT Perea.–This section is so titled because the Perea of the NT (*péran toú 'Iordanou*) was part of the kingdom of Herod and, as described above, of certain of his successors. According to the Mishnah (*Baba Bathra* iii.2) Perea was one of three Jewish provinces, the others being Galilee and Judea (cf. Mt. 4:25). It was therefore possible — and indeed customary — for Jews to travel from Galilee to Judea by the way of Perea, without passing through Samaria (Josephus *Ant.* xx.6.1 [118]). Jn. 4:4 is a remarkable exception, the significance of which should not be lost when commenting on the passage.

In Mt. 19:1 we read: "Jesus . . . went away from Galilee and he entered the region of Judea beyond the Jordan [*péran toú 'Iordanou*]." Some have suggested that this be emended to conform with some MSS of Mk. 10:1 that insert another "and" (Gk. *kaí*) to read "the region of Judea *and* Across-Jordan." While this reading has the support of the great uncial MSS, ℵ and B, the route would make no sense, for Jesus would hardly have gone from Galilee to Judea and then to Perea. It is the *kaí* in Mk. 10:1 that is suspect (note that the *United Bible Societies' Greek NT* has put it in brackets and given the reading a value of "C", meaning "a considerable degree of doubt"). "Judea beyond and Jordan" or "Transjordan" is an NT name for Perea and probably was the common term among the Jews of the time.

John was baptizing in "Bethany beyond Jordan" (Jn. 1:28), which might be translated "Perean Bethany" or "Bethany of Perea." According to Josephus, John was put into the dungeon at the fortress of Machaerus, and later put to death there (*Ant.* xviii.5.2 [116-19]). Details of the imprisonment and death of John given in the NT, however, have raised questions about Josephus's accuracy on this point.

The long Lukan insertion (Lk. 9:51–18:34) has sometimes been called "the Perean Ministry." More recent scholars doubt that this records a continuous sequence of teachings that occurred during the last journey from Galilee to Jerusalem. Some of the events, however, did take place in Perea. The refusal of the Samaritans to receive Jesus and His disciples (9:53) does not suggest that He continued on through Samaria to Judea, but rather that the route was then shifted to avoid Samaria, hence through Perea. Lk. 17:11, "he was passing along between Samaria and Galilee," suggests a route through the Cisjordan Decapolis (Scythopolis, Beth-shean), in order to enter Perea by the ford of the Jordan near Scythopolis. Lk. 18:31 suggests that Jesus and His disciples had arrived in the Jordan Valley opposite Jericho (cf. 18:35; 19:1).

Jesus and His disciples were in Perea when Lazarus was taken ill (Jn. 10:40; 11:7), and they made the trip from there to Bethany. The Ephraim to which Jesus retired after raising Lazarus (Jn. 11:54) was "near the wilderness," possibly indicating a location in Perea (cf. Mk. 1:4 [lit. "John was baptizing in the wilderness"]). The common identification of Ephraim with Aphairema on the southern edge of Samaria raises the question of whether under the circumstances Jesus and His disciples could be secure in a location in Judea. The suggestion that the teachings of Mt. 19; Mk. 10:1-31; Lk. 18:15-30 belong to this interlude faces two objections: the interval, according to John, appears to have been quite brief; and Jesus and His disciples seem to have been alone (Jn. 11:54) and not engaged openly in teaching. W. S. LASOR

PERES per'ēz [Aram. *pᵉrēs*] (Dnl. 5:28, AV). *See* MENE, MENE, TEKEL, AND PARSIN.

PERESH per'esh [Heb. *pereš*]. Son of Machir and his wife Maacah; grandson of Manasseh (1 Ch. 7:16).

PEREZ per'ez [Heb. *pereṣ*–'a bursting forth, breach'; Gk. *Phares*]; AV OT also PHAREZ, AV NT PHARES; **PHARES** [Gk. *Phares*] (1 Esd. 5:5); **PEREZITES** per'ə-zīts [Heb. *parṣî*] (Nu. 26:20); AV PHARZITES. Twin son (with Zerah) born of the incestuous relationship between Tamar and her father-in-law Judah (Gen. 38). Perez was the father of Hezron and Hamul (Gen. 46:12; Nu. 26:21; 1 Ch. 2:4f.) and the ancestor of the Perezites (Nu. 26:20).

Perez received his name because of the unusually violent nature of his birth. As Tamar was about to give birth to her twins, one son presented his hand. The midwives placed a scarlet thread on this hand to mark the firstborn. The hand was then withdrawn, and the brother "burst forth"; hence the name Perez (Gen. 38:28-30). Critical scholars such as G. von Rad (*Genesis* [Eng. tr., rev. ed., *OTL,* 1972], p. 356) regard the birth narrative of Perez as an etiology, an explanation developed in later times for the prominence of the line of Perez over that of Zerah. Prominent families in Jerusalem traced their ancestry from Perez in postexilic times (1 Ch. 9:4; 27:3; Neh. 11:4, 6).

The village women of Bethlehem invoked the name Perez in their blessing of Ruth when she married Boaz (Ruth 4:12), a blessing doubly appropriate because of the

levirate marriage and the non-Israelite origins of both Ruth and Tamar.

The line of David (Ruth 4:18-22; cf. 1 Esd. 5:5: Phares = Perez) and of Jesus is traced through Perez (Mt. 1:3 par. Lk. 3:33). R. B. ALLEN

PEREZ-UZZA per'ez o͝oz'ə [Heb. *pereṣ ʿuzzā'*–'breach of Uzzah'] (1 Ch. 13:11); **PEREZ-UZZAH** [Heb. *pereṣ ʿuzzâ*] (2 S. 6:8). An unknown site located somewhere W of Jerusalem on the road to Kiriath-jearim. It received its name to commemorate the occasion when Uzzah steadied the ark of the covenant as David was endeavoring to move it to Jerusalem. For this breach of priestly propriety Uzzah was struck dead. Even though his action was most probably inadvertent, the shock of contact with Israel's most sacred cultic object could have been sufficient to provoke a terminal circulatory accident. R. K. H.

PERFECT; MAKE PERFECT; PERFECTION [Heb. *tāmîm* (Lev. 22:21; Dt. 32:4; 2 S. 22:31; Job 36:4; etc.), also *tām* (Cant. 5:2; 6:9), *šālôm* (Isa. 26:3), *kālîl* (Lam. 2:15; Ezk. 16:14; 27:3; 28:12), *kālal* (Ezk. 27:4, 11), *miḵlāl* (Ps. 50:2), *tiḵlâ* (Ps. 119:96), *taḵlîṯ* (Ps. 139:22); Gk. often *téleios, teleióō*, also *teleiótēs* (Phil. 3:12), *teleíōsis* (He. 7:11), *katartízō*–'prepare, make complete' (Mt. 21:16), *holoklēría* ("perfect health," Acts 3:16), *epiteléō*–'finish, complete' (2 Cor. 7:1), *pás*–'all, whole' (2 Cor. 7:16; Tit. 3:2), *teléō*–'finish' (2 Cor. 12:9), *hápas*–'all' (1 Tim. 1:16), perfect pass. part. of *plēróō*–'fill full, complete' (Rev. 3:2)]; AV also CONSECRATED (He. 7:28), UNDEFILED (Cant. 5:2; 6:9), ALL (e.g., 2 Cor. 7:16); NEB also COMPLETE, SOUND, CONSUMMATE, UNDYING, PEACE, WHOLENESS, FULL STRENGTH, GOODNESS, ALL, CONSISTENTLY, "go the whole way" (Mt. 19:21), "complete the whole" (Col. 3:14), "a balanced character" (Jas. 1:4).

The RSV uses "perfect" far less often than the AV, especially in passages referring to human beings. This is probably because in Modern English the term is often used in an ideal, absolute sense (i.e., total sinlessness) that is usually not present in the Hebrew or Greek terms it represents.

I. In the OT.–The Hebrew term most often rendered by "perfect" is *tāmîm* (lit. "complete," "without defect"), derived from the root *tmm* ("be complete, finished"). In over half of its occurrences *tāmîm* refers to animals that are physically sound or "without blemish" (the usual RSV translation; *see* BLEMISH) and therefore acceptable for sacrifices (cf. Lev. 22:21).

The RSV OT uses "perfect" to desribe a human being only in Job 36:4, where Elihu claims that he is "perfect [*tāmîm*] in knowledge" because he is divinely inspired (cf. 32:8; 33:3f.; 37:16). The OT (esp. Psalms and Proverbs) frequently employs *tāmîm* to describe human conduct that is completely obedient to God's will. Although the AV sometimes translates it "perfect" in such passages, the RSV always employs a term such as "blameless" (e.g., Gen. 17:1; Dt. 18:13; Ps. 101:2, 6; Prov. 2:21 [RSV "men of integrity"]; 11:5; Ezk. 28:15).

Apart from Lev. 22:21 and Job 36:4, the RSV translates *tāmîm* by "perfect" only in references to God: to His work (Dt. 32:4), His way (2 S. 22:31 par. Ps. 18:30 [MT 31]), His knowledge (Job 37:16), and His law (Ps. 19:7 [MT 8]).

Another derivative of *tmm*, *tām* (lit. "complete," "sound," "pure"), is similar in meaning to *tāmîm*. It is rendered "perfect" by the RSV only in Cant. 5:2; 6:9; here it probably refers to the flawless beauty of the Shulammite, although other interpretations have been suggested (cf. AV "undefiled"; KD "wholly devoted"). The AV translates *tām* "perfect" in nine passages referring to human character or conduct (Job 1:1, 8; 2:3; 8:20; 9:20-22; Ps. 37:37; 64:4). The fact that *tām* is used to describe Job, and *tāmîm* to describe Noah (Gen. 6:9), neither of whom was totally without sin (cf. Gen. 9:21; Job 42:1-6), shows clearly that these terms do not denote perfection in in the absolute sense. Rather, they point to a person's integrity of character; they describe a person who is singlemindedly obedient to God's will as expressed in His commandments.

Another term sometimes rendered "perfect" by the AV, Heb. *šālēm* (lit. "complete, whole, full"), expresses a similar idea. Frequently it is used with *lēḇ* ("heart") to describe a person whose heart is "wholly true" to Yahweh, i.e., one whose loyalty to Yahweh is undivided (cf. RSV 1 K. 8:61; 11:4; 15:3, 14; 2 K. 20:3; 1 Ch. 28:9; 29:9, 19; Isa. 38:3, etc.). The cognate noun *šālôm* describes the wholeness, fulfillment, and peace experienced by one who enjoys this kind of unimpaired relationship with God. According to Isa. 26:3, the Lord keeps "in perfect peace" (AV, RSV; Heb. *šālôm šālôm*) the nation that has fixed its trust in Him.

Eight times the RSV uses "perfect" or "perfection" to render terms derived from the root *kll* ("be complete, perfect, whole"). In each case the reference is to unblemished beauty: that of Jerusalem (Ezk. 16:14; Lam. 2:15), of Tyre (Ezk. 27:3f., 11; 28:12), of Zion (Ps. 50:2). "Perfect" and "perfection" are each used once by the RSV to render a derivative of *klh* ("accomplish, finish, end"); both *taḵlîṯ* and *tiḵlâ* express the idea of totality or completeness. Ps. 139:22 speaks of "perfect" (i.e., "total") hatred, while 119:96 contrasts the limitless breadth of God's law with the limited nature of all other things, however complete.

II. In Intertestamental Judaism.–Hebrew *tāmîm* is a prominent term in the writings of the Qumrân community. In the Manual of Discipline (1QS) alone, *tāmîm* occurs eighteen times, especially in the expression "(walking) in perfection of way," which denotes a "full observance" of God's will as revealed in the statutes of the community (see, e.g., 1QS 8:10, 18, 21; cf. 2:2; 3:9f.; 9:19; etc.). Sometimes *tāmîm* denotes members of the community (e.g., 1QS 3:3; 4:22; 1QM 14:7; 1QH 1:36). The expression *lēḇ šālēm* ("undivided heart") occurs in 1QH 16:7, 17 (cf. T. Jud. 23:5).

In the RSV Apocrypha "perfect," "perfectly," and "perfection" usually represent Gk. *téleios* or one of its cognates (e.g., Wisd. 4:13, 16; 6:15; 9:6; Sir. 24:28; 31:10; 34:8; 44:17; etc.; for the meaning of *téleios*, see III below). Exceptions are *akmḗ kállous* (lit. "acme of beauty") in Ad. Est. 15:5 (LXX 5:1b) and *hygíeia iáseos* (lit. "health of healing") in Sir. 1:18.

III. In the NT.–The most common terms for "(make) perfect" and "perfection" in the RSV NT are Gk. *teleióō* ("finish," "complete," "make perfect") and its cognates *téleios* ("complete," "mature," "perfect"), *teleiótēs* ("completeness," "perfection," "maturity"), and *teleíōsis* ("fulfillment," "perfection"). In the NT as in the OT, the AV uses "perfection" and "perfect" more often than the RSV; e.g., cf. the AV and RSV translations of *akribôs* (lit. "accurately," "carefully") in Lk. 1:3; Acts 18:26; 23:15, 20; 24:22; 1 Thess. 5:2; of *katartízō* ("restore," "make complete," "create," "prepare") in Lk. 6:40; 1 Cor. 1:10; 2 Cor. 13:11; 1 Thess. 3:10; He. 13:21; 1 Pet. 5:10; of *katartismós* ("equipping," "training") in Eph. 4:12; of *katártisis* ("completion, being made complete") in 2 Cor. 13:9; and of *ártios* ("complete," "proficient") in 2 Tim. 3:17. Whereas the AV consistently

translates *téleios* by "perfect," the RSV often uses "mature" (see below).

Téleios (a cognate of *télos*, "end," "goal," and *teléō*, "bring to an end, complete") is one of the terms used by the LXX to render Heb. *tāmîm* and *šālēm;* thus it is not surprising that the NT sometimes uses *téleios* in the LXX sense of "undivided commitment to God" and "complete obedience to His will." *Téleios* is used in this sense in Matthew. In 19:21 Jesus challenges a rich young man, "If you would be perfect, go, sell what you possess and give to the poor . . . ." The young man was obviously not undivided in his commitment to God: his riches were a stumbling block to singleminded discipleship. In 5:48 Jesus instructs His disciples, "You, therefore, must be perfect, as your heavenly Father is perfect" (cf. Dt. 18:13, where the RSV renders Heb. *tāmîm* "blameless"). The context in Mt. 5 indicates that by "perfect" Jesus means completeness of love: His disciples are to display the kind of undifferentiated love toward both friends and foes that God shows toward all mankind (cf. Lk. 6:36, which has *oiktírmōm*, "merciful," instead of *téleios*). (See comms., e.g., D. Hill, *Gospel of Matthew* [*NCBC*, repr. 1981], p. 131).

In the Epistle of James *téleios* also means "whole" or "complete," sometimes in the specific sense of "mature." In 1:4 it appears twice: "And let steadfastness have its full effect [*érgon téleion*], that you may be perfect [*téleios*] and complete [*holóklēros*], lacking in nothing [*en mēdení leipómenoi*]." In other words, believers have not reached "completeness" or "maturity" until their faith, through testing, has produced steadfastness, and steadfastness has shown itself in a "complete work" (*érgon téleion*), i. e., "total obedience." Such obedience involves not only hearing but also doing the "perfect [*téleios*] law, the law of liberty" (v. 25). The "perfect" law may mean the "whole" law as summarized in the love commandment (cf. 2:8; see *TDNT*, VIII, 74f.), or it may mean the OT law as "completed" by Christ's reinterpretation (see Davids, pp. 99f.). Another sign of "wholeness" is self-control, especially in speech (3:2). Jas. 1:17 states that "every perfect gift is from above," i.e., God's gifts (perhaps referring especially to the gift of wisdom; cf. vv. 2-8, 12-14) are "wholly" good and intended to enable believers to persevere in trials; hence God cannot be accused of sending the evil that tempts people to fall (cf. v. 13).

1 John uses *teleióō* (perfect pass.) four times with reference to a Christian's love being "perfected" (2:5; 4:12, 17f.). John's idea seems to be that God's love (2:5 [not RSV "love for God"]; 4:12), which He demonstrated by sending His Son to be an expiation for sins (4:9f.), is "brought to completion" in Christians who obey Jesus' command to love one another (cf. 2:3-11; 3:10-18; 4:7-12, etc.; see also *teleióō* [RSV "perfectly"], Jn. 17:23). Such "perfected" love results in confidence on the day of judgment (4:17; *téleios*, v. 18).

The Pauline epistles use *téleios* several times in the specific sense of "mature" (cf. RSV 1 Cor. 2:6; 14:20; Eph. 4:13; Phil. 3:15; Col. 1:28; 4:12). In other passages it basically means "whole" or "complete." In Rom. 12:2 Paul exhorts his readers to be transformed by the renewal of their minds so that they may know the "perfect" (i.e., "whole") will of God. In 1 Cor. 13:9-12 Paul contrasts the "partial" (*ek mérous*, vv. 9f., 12; RSV "imperfect," "in part") knowledge that Christians have in the present with the "full" or "complete" (*téleios*, v.10, RSV "perfect") revelation that awaits them at the Parousia. In Phil. 3:12, the only passage in which Paul uses *teleióō*, he appears to be using the language of opponents who claimed that they had already reached the goal of perfect bliss. Col. 3:14 describes *agápē* as *sýndesmos tḗs teleiótētos* (RSV "[which] binds everything together in perfect harmony"; AV "the bond of perfectness"), apparently meaning that love is what binds the community together into the unity of the body of Christ, producing the complete wholeness and maturity that is the goal of Christ's body (cf. Eph. 4:13-16).

The *teleióō* word group appears most frequently in the Epistle to the Hebrews. The author often uses *teleióō* in a way not found in the other NT writings: in the specialized LXX sense of "qualify (a priest) for cultic service" or, more generally, "qualify (anyone) to stand before God" (see *TDNT*, VIII, 82f.). "Perfection" thus denotes "unimpeded access to God and unbroken communion with Him" (Bruce, p. 44). The author shows how Jesus, through His suffering (2:10; 5:8f.; cf. 2:17f.) and His offering of Himself as an unblemished sacrifice for sin (7:26-28; cf. 9:14), has been qualified to be the eternal High Priest for His people. By entering the "more perfect" tabernacle (the heavenly sanctuary, i.e., the very presence of God; 9:11) and by offering Himself as a once-for-all sacrifice (cf. vv. 25f.), Jesus has accomplished the "perfection" that was unattainable through the law (7:19; 10:1) or the Levitical priesthood (7:11; 9:9) and was therefore unavailable to the OT saints except through Christ (11:40; 12:23): He has cleansed His people from sin and qualified them to come into God's presence with confidence (10:14, 19-22). In the cultic terminology of Hebrews, then, "perfection" applies both to Jesus' qualification as the eternal High Priest and to Christians who can now stand before God cleansed of sin. (*See also* PERFECTER.)

It is apparent, therefore, that among the NT authors the concept of "perfection" (as reflected in the use of the *teleióō* word group) has a variety of nuances. For none of these writers do these terms mean "total sinlessness." Nonetheless, it is clear that these writers view "perfection" (whether conceived of as undivided loyalty to God, an unimpeded relationship with God, wholehearted obedience to God's will, fully developed love, or an advanced level of maturity in Christ) as a goal toward which the Christian strives with the utmost seriousness.

On the idea of perfection in Christian theology, see J. Wesley, *Plain Account of Christian Perfection* (1766); B. B. Warfield, *Studies in Perfectionism* (1931); R. N. Flew, *Idea of Perfection in Christian Theology* (1934).

PERFECTER. A term used by the RSV in He. 12:2 to translate Gk. *teleiōtḗs* (AV "finisher"; NEB "finish"), which is derived from the verb *teleióō*, "bring to completion, make perfect" (*see also* PERFECT). The author exhorts readers to run the race of faith with their full attention on Jesus, "the pioneer and perfecter of our faith" (since "our" does not occur in the Greek, NASB "perfecter of faith" is probably a better translation). In Jesus the faith illustrated by the OT saints mentioned in ch. 11 has been "perfected" or "brought to completion," for throughout His earthly life He exhibited complete trust in God and devotion to God's will (cf. 2:13; 10:7-10). He is therefore the supreme example of persevering faith and a source of strength to those who are presently "running the race."

repr. 1981), P. E. Hughes (1977), and J. Moffatt (*ICC*, repr. 1948); *TDNT*, VIII, *s.v.* τέλος κτλ.; τελειωτής (G. Delling). N. J. O.

PERFORM [Heb. *ʿāśâ* (Ex. 18:18; etc.), piel, pual, and hiphil of *šālam* (Isa. 19:21; etc.), hiphil of *qûm* (1 S. 15:11, 13; etc.), *pāʿal* (Ps. 44:1 [MT 2]; Isa. 41:4), *šāmar* (Lev. 8:35; Nu. 3:7; Neh. 12:45), *ṣābāʾ* (Nu. 8:24), *ʿābad* (Josh. 22:27; Ezk. 29:18), etc.; Gk. *poiéō* (Lk. 1:72; etc.), *gínomai* (Acts 4:16, 22, 30; 8:13), *teléō* (Lk. 2:39), *apoteléō* (Lk. 13:32), *epiteléō* (He. 9:6), *prássō* (Acts 26:20), *ergázomai* (Jn. 6:30), *katergázomai* (2 Cor. 12:12), *apodídōmi* (Mt. 5:33)]; AV also DO, KEEP, SHOW, PAY, PRACTICE, WORK, etc.; NEB also DO, CARRY OUT, OBSERVE, OBEY, PAY, DISCHARGE, WORK, etc.

English "perform" is derived from Old French *perfournir* (*per-*"thoroughly" + *fournir*-"to complete"), and thus its original meaning is "bring to completion, finish entirely." Sometimes the AV uses "perform" in this sense, e.g., for Heb. *gāmar* (Ps. 57:2 [MT 3]; RSV, NEB, "fulfil"), for the piel of *bāṣaʿ* (Isa. 10:12; RSV, NEB, "finish"), and for Gk. *epiteléō* (Rom. 15:28; 2 Cor. 8:11; RSV "complete"; NEB "finish"); cf. the AV "performance" for Gk. *teleíōsis* (Lk. 1:45; RSV, NEB, "fulfil[ment]").

In some instances the RSV continues this use of "perform." The various forms of Heb. *šālam*, which carry the idea "bring to completion," are several times rendered "perform" in connection with vows (piel in Ps. 76:11 [MT 12]; Isa. 19:21; pual in Ps. 65:1 [MT 2]) and counsel (hiphil in Isa. 44:26). The idea seems to be that a vow (or advice) is not complete until it has been entirely carried out or acted upon. Cf. also (see heading above) RSV "perform" for Gk. *teléō* ("complete"), *apoteléō* ("complete, finish") and *epiteléō* ("complete," "accomplish").

In modern English, however, "perform" has lost this narrower focus on completing an act and can simply indicate doing an act. Thus the English versions (including AV) frequently use "perform" for Heb. *ʿāśâ* (lit. "do," "make"; cf. RSV Lev. 25:18; Dt. 4:13; etc.) and its Greek equivalent *poiéō* (e.g., RSV Jn. 11:47; Acts 7:36; Rev. 16:14); for Heb. *pāʿal* ("make" [see heading above]); for the hiphil of *qûm* ("carry out"; cf. RSV 2 K. 23:3; Neh. 5:13; Jer. 11:5; etc.), and for Gk. *gínomai* ("be made, be done, take place"), *prássō* ("do, accomplish"), *ergázomai* ("do, work, accomplish, carry out"), and *katergázomai* ("accomplish, do, produce").

In Dt. 25:5, 7 (cf. also Gen. 38:8) "perform the duty of a husband's brother" translates the piel of Heb. *yābam* and refers to the levirate law, which expected a man to marry his deceased brother's widow. *See* HUSBAND'S BROTHER; RELATIONSHIPS, FAMILY. N. J. O.

PERFUME; PERFUMER [Heb. *rôqē(a)ḥ* (Ex. 30:25, 35; 37:29; Eccl. 10:1), *raqqāḥ* (1 S. 8:13; Neh. 3:8), *mirqaḥaṯ* (2 Ch. 16:14), *riqqû(a)ḥ* (Isa. 57:9), *rî(a)ḥ* (Ex. 30:38), *nûp* (Prov. 7:17), *qᵉṭōreṯ* (Prov. 27:9), *mᵉquṭṭereṯ* (Cant. 3:6), *bāṭê hannepeš* ("perfume boxes," Isa. 3:20), *bōśem* (Isa. 3:24)]; AV also APOTHECARY, CONFECTIONARY, SMELL, SWEET SMELL, TABLETS; NEB also "for pleasure," "sprinkled," "from burning," "lockets."

The value and universal appeal of perfume can be seen in almost all the ancient literatures. Prov. 27:9 declares that "oil and perfume make the heart glad." The Talmud states that "happy is he whose craft is that of a perfumer" (T.B. *Kiddushim* 82b). Perfumes are commonly used in figures of speech to make favorable comparisons (e.g., Cant. 1:13; 4:10-14; 2 Cor. 2:14-16; Eph. 5:2; Phil. 4:18; cf. Sir. 24:15; 49:1). Perfumes were used in three general areas: medicine, cosmetics, and religion.

The dry, scorching heat of Egypt and Palestine made the use of aromatic oils and ointments a virtual necessity of life. Egyptian texts show widespread use in all levels of society, and claim that "oil is the remedy for the body" (Forbes, p. 2). Both men and women anointed the hair and body with oils after bathing to protect the scalp and skin (Ruth 3:3; 2 S. 12:20; Ezk. 16:9; cf. Jth. 10:3). The pharmacist-perfumer (*myrepsós*; cf. Sir. 49:1) is mentioned alongside the physician in Sir. 38:8.

The line between hygienic and cosmetic uses of perfumes is sometimes rather indistinct; the latter assumed greater importance over time as the fragrances became more desirable in and of themselves. They were important in love-making (Est. 2:12; Cant. 1:3, 13; 5:5; 7:12f.) and were often applied to clothes and bedroom furniture (Ps. 45:8 [MT 9]; Prov. 7:17; Cant. 3:6; 4:11). Even scented breath was valued (Cant. 7:8), perhaps produced by spiced wine (Cant. 8:2; cf. Mk. 15:23), among other things.

Perfume containers mentioned in the Bible include a bag of myrrh "that lies between my breasts" (Cant. 1:13), "perfume boxes" (Isa. 3:20), and alabaster flasks (Mt. 26:7; Mk. 14:7; Lk. 7:37). Many glass, alabaster, stone, and lead jars are mentioned in Egyptian, Mesopotamian, and classical texts, and many survive today, especially from Egypt, a few sealed ones with traces of perfume still present.

In the religious sphere, fragrant oils and spices were used in burying the dead, e.g., Jacob and Joseph (Gen. 50:2f., 26), Asa (2 Ch. 16:14), and Jesus (Jn. 19:39f.; cf. Mk. 26:1; Lk. 23:56; 24:1). Cf. also Herod's elaborate funeral (Josephus *Ant.* xvii.8.3 [199]). Jesus states that even the anointing of His head and feet by the women (but cf. Lk. 7:36-50) anticipates His burial (Mt. 26:6-13

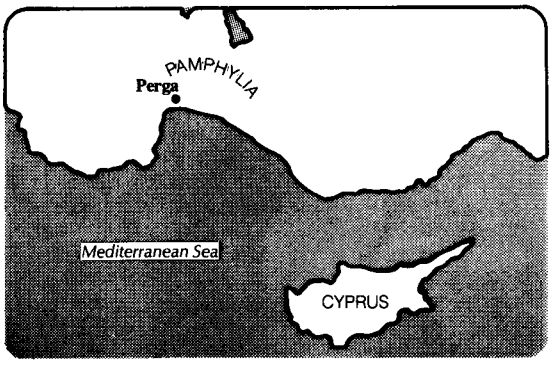
Two eastern Greek terra-cotta statuettes representing Aphrodite. The one with the spoutlike opening (left) is a perfume bottle (*ca.* 550 B.C.) (Trustees of the British Museum)

par. Mk. 14:3-9; Jn. 12:1-8). Mourners, on the other hand, would refrain from using perfumes (2 S. 12:20; Dnl. 10:3; cf. Ad. Est. 14:2; Jth. 10:3).

Aromatic oils were also important in religious ritual in all biblical cultures. The Egyptians, for example, called their perfumes the "fragrance of the gods" (Forbes, p. 8). The sacred anointing oil and holy incense in Israel were made of the finest spices, "blended as by the perfumer" (Ex. 30:23-25, 34f.). Neither was to be made or used for other than the prescribed purposes (30:32f., 37f.).

The art of perfumery was practiced by a professional class of craftsmen: the perfumer is known from the texts of Ebla, Mesopotamia, Egypt, and Ugarit, as well as Greece and Rome, and even from Egyptian reliefs. Biblical references to the process include the recipes in Ex. 30:22-38; 37:29 (where Bezalel is the first-mentioned perfumer); Neh. 3:8; 1 Ch. 9:30; and 1 S. 8:13 (where Israel's daughters would be put to work as perfumers, among other things).

The manufacturing process, detailed in numerous Egyptian and classical recipe texts, used various oils and fats as bases to carry the fragrances. These oils and fats were extracted from flowers, seeds, gum-resins, fragrant woods, etc., by one of several means: (1) balls or cones of animal fat were covered with layers of flower petals until saturated with the scent (enfleurage); (2) the herbs were heated in oil and the mixture strained while hot, or else boiled in water and oil poured over them (maceration); and (3) oil presses were used to extract liquid fragrances (expressing). Note also the dried forms of Cant. 1:3 and 3:6.



Most perfumes come from tropical countries. Of the biblical ones, balsam (BALM), CAMEL'S THORN, HENNA, labdanum (RSV "myrrh," Gen. 37:25; 43:11), STACTE, and GUM (tragacanth) were native to Palestine. Others originated elsewhere: ALOES in East Africa and India; BDELLIUM in India or North Africa; CALAMUS in India; CASSIA in Ceylon and the East Indies; CINNAMON in Ceylon; FRANKINCENSE in Arabia and East Africa; GALBANUM in India; MYRRH in Arabia and East Africa; spikenard (NARD) in Nepal and the Himalayas; SAFFRON in India and the East Indies. ONYCHA, the only animal fragrance mentioned in the Bible, came from mollusks in the Red Sea. The Bible also shows knowledge of the ubiquitous "spice-routes" over which these passed (Gen. 37:25; Ezk. 27:19, 22; cf. 1 K. 10:2, 10, 25).

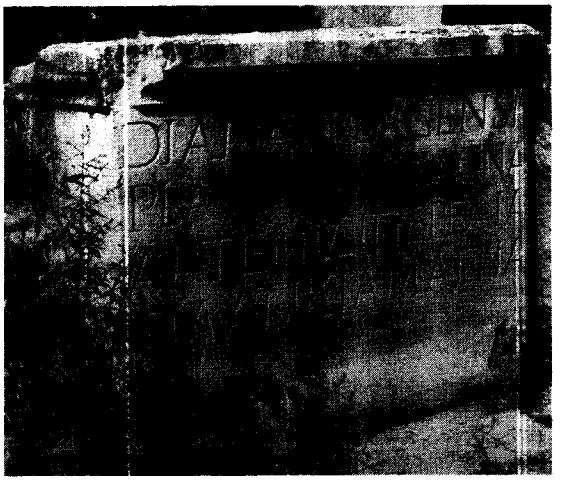
PERGA pûr'gə [Gk. *Pergē*]. A major Greek city of Pamphylia in southern Asia Minor, located a few kilometers upstream from the mouth of the Cestrus and about 8 km. (5 mi.) W of the river itself, an advantageous location in an era of piracy (2nd and 1st cents. B.C.). That shipping had direct access to Perga, in spite of the changed circumstances of the river today, is confirmed by Paul and Barnabas's traveling there by sea from Cyprus (Acts 13:13);



however, their departure from Attalia (14:25f.), the more recent coastal foundation to the southwest, perhaps already represented the normal route (*see* picture in ASIA MINOR). Perga occupied a central position in the chain of Pamphylian cities; from there ran the most direct route north up the Cestrus Valley into Pisidia and the great plateau of Anatolia. According to Ramsay, the modern name of ancient Adada, Kara Bavlo, may preserve a tradition that Paul and Barnabas took this route to Pisidian Antioch (13:14). It was a perilous hinterland and the likely scene of some of Paul's journeying ordeals (2 Cor. 11:26f.).

The city itself was, however, both long established and prosperous. The substantial ruins at Murtana justify its reputation for splendor. At least three aqueducts served the city, and its theater, seating at least twelve thousand people, was one of the largest known from the ancient world. According to tradition Greeks from the Argolid and Lacedaemon settled the city, but its coins show the persistence of an ancient dialect into the 2nd cent. B.C. Subsequently came extensive Italian settlement; one-third of the names on inscriptions from Perga are Roman. The

Ruins of the theater at Perga (B. K. Condit)

Inscription in Latin and Greek mentioning Diana (Artemis) and Plancia Magna, the Roman benefactress of Perga (2nd cent. A.D.) (B. K. Condit)

main national cult was that of the Queen of Perga, no doubt a pre-Hellenic nature-goddess, who was identified with Artemis as at Ephesus and honored as the patroness of the city, her temple having asylum rights.

What happened on the two visits of Paul and Barnabas to Perga is obscure. Acts 13:13 mentions only the breach with Mark, who returned to Jerusalem. Ramsay suggested that Paul contracted malaria (his "thorn in the flesh"?) in the sultry climate and for this reason abandoned a plan to work there in favor of the healthier Galatian cities of Lycaonia (Gal. 4:13). Perga presumably had a synagogue (Pamphylia was a well-attested home of Jews), which initially would have attracted the apostles to Perga and in which they would have preached on their second visit (Acts 14:25). The silence of Acts and later tradition imply, however, that no church was formed.

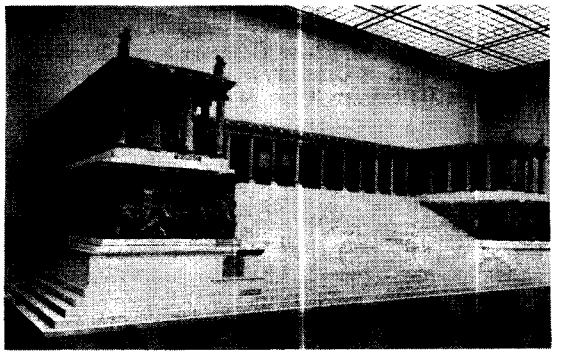
PERGAMUM pûr'gə-məm [Gk. *tó Pergamon* or sometimes *hē Pergamos*; also *ho Pergamos* in Polybius xxi.8.10; xxii.3.10]. One of the seven cities of Asia Minor whose "angel" is addressed as the opening device of Revelation (1:11; 2:12). The city is praised for the spirit symbolized in its martyr Antipas but blamed for a few members who approve food sacrificed to idols and other so-called NICOLAITAN deviations (2:13-17). The designation of Pergamum as the place where "Satan's throne" is (v. 13) probably refers to Pergamum's being the official Asian center for the imperial cult (see comms. on Revelation, esp. R. H. Charles, I [*ICC*, 1920], 61; R. Mounce [*NICNT*, 1977], pp. 96f.; H. B. Swete [3rd ed. repr. 1968], pp. 34f.; cf. G. Beasley-Murray [*NCBC*, rev. ed. repr. 1981], p. 84).

Pergamum (modern Bergama) was 24 km. (15 mi.) inland from the northeast Aegean shore and 110 km. (70 mi.) N of Smyrna. On a 300-m. (1000-ft.) height, it commanded a magnificent view of the bay of Lesbos. It lay between the Selinus (to the west) and Cetius tributaries of the navigable Caicus/Bakir 3 km. (2 mi.) south, which formed the border between seacoast Mysia and inland Lydia. Archeological finds in the neighborhood date from the epoch of nearby Troy, 1200 B.C.; from Vergil *Aen.* ii.555f. exegete C. à Lapide thought Troy and Pergamum were the same.

Founded by Greek colonists, the town had a local coinage



before 420 B.C. and is mentioned in Xenophon (*Anabasis* vii.8.8). During Alexander's conquest Antigonus seized Pergamum, and at the latter's death in 301 Lysimachus of Thrace gained control of Asia Minor. In 283 Lysimachus entrusted this strategic *pérgamon* or "fortress" to Phileterus, who bequeathed it as an independent Seleucid vassal state to his nephew Eumenes I in 263.

Eumenes paid taxes to the warlike Galatians, but after 241 his nephew Attalus I overthrew their domination. This event is commemorated by monuments both here and in Athens, including the famous "Dying Gaul" statue of which a Roman copy is in the Ludovisi collection of Rome's Thermae Museum. Attalus strengthened his position and that of his city-state by supporting Rome against Macedon. He enriched his capital with splendid buildings and extended his rule toward Ankara and Antalya-Perga, 480 km. (300 mi.) ESE (cf. E. Hansen, *Attalids of Pergamon* [1947]; R. Wenning, *Galateranatheme* [1976]).

Eumenes II (197-159 B.C.) attained such great power that he could dictate the succession to the Seleucid throne in 175. He brought his dynasty to its peak, and his capital became a center of artistic and literary culture. His LIBRARY of 200,000 scrolls rivaled Alexandria's and in place of Egyptian papyrus it popularized as writing material the goatskin sheets that thus came to be known as *pergamēnē*, corrupted into English as "parchment." The frequent and even ancient assertions that parchment was invented here (Pliny *Nat. hist.* xiii.21 [70]) do not constitute proof, since earlier Assyrians sometimes used skins instead of clay.

A very large theater was erected at the top of the Acropolis, near the library and beside temples of Dionysus, Athena, and Demeter. The most splendid monument of Pergamum was the "altar of Zeus," 12 m. (40 ft.) high, that once crowned its acropolis and was later reconstructed in East Berlin as a result of the archeological enterprises

Reconstruction of the temple of Zeus at Pergamum (Staatliche Museen zu Berlin, DDR)

Theater at Pergamum (B. K. Condit)

of K. Humann in 1873, continued by W. Dörpfeld (*Altertümer von Pergamon* [1895-1923]; M. Pfanner, *Archäologischer Anzeiger* [1979], pp. 46-57). This lofty pagan shrine could have been the "Satan's throne" of Rev. 2:13, either because it was of imposing height (see Beasley-Murray) or because it symbolized Rome's power administered at Pergamum from 190 until transferred to Ephesus by Hadrian A.D. 129 (R. North, *Verbum Domini*, 28 [1950], 65). Although Attalus I had adorned the Zeus-altar pedestal with statuary, it is debated whether Eumenes II or his successor had the pedestals constructed. *See* Plate 65.

Attalus II (159-138) founded under his own name the momentous south Turkey seaport of Attalia (now Antalya; *see* picture in ASIA MINOR) but saw his power decline. Prusias II of Bithynia took his city, and he died poisoned. The last monarch, Attalus III (138-133), completed liquidation of the long-proud state. Weak and cruel, and seeing Rome's will about to emerge in the agrarian reform of Tiberius Gracchus, he perhaps cynically "bequeathed" his domain to Rome at his death (R. Boulanger, *Guide Bleu: Turquie* [1958], p. 283). Under Rome Pergamum became the capital of an administrative unit called in a somewhat special sense just Asia, the "fat and fertile" of Cicero's Pompey oration (cf. *RRAM*).

From the Roman period on, the city's building activity moved down the hillside to the plain where modern Bergama sprawls. At the south end of this plain grew up the Asclepium or healing center, famous throughout the world since 350 B.C. Its attendants, though fostering superstitious beliefs, also showed genuine sympathy for the sufferers and sometimes could help them with a surprisingly adequate stock of medical lore acquired through years of observation. Galen, a native of Pergamum who received his early training there (*ca.* 160 B.C.), along with his rival Hippocrates founded scientific medicine.

The German excavations, continued in 1900-1913 and 1927-1939 under T. Wiegand (O. Deubner, *Das Asklepieion* [1938]), were resumed in 1958 at the healing sanctuary (E. Boehringer, *Neue deutsche Ausgrabungen* [1959], pp. 121-171; O. Ziegenauer, *Das Asklepieion 2* [1975]). A theater was a small adjunct of the Asclepius sanctuary. Another adjunct was the library built by Flavia Melitena *ca.* 190 B.C.

Pergamum, drained of its treasury by the Roman takeover, supported Mithridates against Rome in 88 B.C. and saw its library handed over to its hated rival Alexandria by Cleopatra's friend Antony. Josephus (*Ant.* xiv.10.22 [247-255]) told of a Roman letter in 139 and a Pergamum senate decree in 130 defending the Jewish community already installed in Pergamum as in many neighboring cities of Asia Minor (see, e.g., *LSC*, pp. 142-157). The several years of Paul's ministry in Ephesus *ca.* A.D. 53 may have enabled him to bring Christianity to the Jews in Pergamum, 160 km. (100 mi.) north. The Pergamum monuments bring to mind events in the ministries of Paul or John: the theaters, for which the admission ticket was sometimes "a white stone" (Rev. 2:17); the extensive triple gymnasium, where youths trained not only in sport (1 Cor. 9:24) but also in philosophy, while walking ("peripatetic") among the colonnades (*stoá*).

Recorded martyrs besides Antipas are Carpus, Papylus, and Agathonike under Decius (*LTK*, VIII, 273). A ruin called Red Basilica in the plain beneath the lower agora of the Pergamum Acropolis, excavated in 1934-38, may have been a temple built to Egyptian Serapis before 200 B.C. but transformed into a Byzantine church of St. Paul (Boulanger, p. 289). Hadrian visited Pergamum in A.D. 123 (Pauly-Wissowa, I/1, 505). Three temples to Roman emperors explain Pergamum's title of "thrice temple-warden" (Pauly-Wissowa, XIX/1, 1235-63).

Zenobia's rise to power at Palmyra in A.D. 269 weakened Asia Minor's resistance. Archeologists have retrieved four churches built at Pergamum before 717. Leo the Isaurian and his son *ca.* 740 rebuilt the city after Moslem invasions; the Crusaders occupied it in 1212 and Timur in 1402. The Ottomans installed since 1330 enriched the town with fifteen mosques, one allegedly an earlier Sancta Sophia church. Today Bergama has also a small museum amid its unequaled magnificence of standing ruins.

PERICOPE pə-ri'kō-pē [Gk. *perikopḗ*–'cutting around']. A term used by Greek church fathers and later scholastics for an excerpted Scripture passage or a shorter classical text. Based on synagogue and early Church use of shorter readings in worship services, later Christian lectionary collections became known as pericopae.

In modern biblical studies, chiefly through the development of form criticism, "pericope" became a technical term for a Scripture unit said to have originally circulated independently. Such units were supposed to have been gathered by the Synoptic writers and implanted in a historical-biographical framework of the Evangelists' own invention. In current exegesis the term is used for any passage of one to three paragraphs studied as a unit (e.g., Mk. 1:40-44).

PERIDA pə-rī'də [Heb. *pᵉrîḏā'*] (Neh. 7:57); **PERUDA** pə-rōō'də [Heb. *pᵉrûḏā'*; Gk. *Pherida, Phadoura,* Apoc. *Pharida*] (Ezr. 2:55; 1 Esd. 5:33); AV Apoc. PHARIRA; NEB Apoc. PHARIDA. Head of a family of Solomon's servants that returned from the Exile with Zerubbabel (Ezr. 2:55 par. Neh. 7:57; 1 Esd. 5:33).

PERISH [Heb. *'ābaḏ* (e.g., Lev. 26:38), niphal of *kārat*–'cut' (Gen. 41:36), *nāpal*–'fall' (Ex. 19:21), *tāmam* + inf. of *gāwa'* (Nu. 17:13 [MT 28]), niphal of *šāmaḏ* (e.g., Dt. 28:51), niphal of *sāpâ* (e.g., 1 S. 26:10), *'ābar*–'pass (over)' (Job 36:12), *kālâ* (Isa. 31:3; Ezk. 13:14; etc.), niphal of *dāmâ* (Ps. 49:12, 20 [MT 13, 21]; Hos. 10:7), qal and hiphil of *dāmam* (Jer. 8:14), niphal of *šāmam* (Lam. 4:5); Gk. *apóllymi* (Mt. 18:14; etc.), *eínai eis apṓleian* (Acts 8:20), pass. of *apḗanízō* (Acts 13:14); *apothnḗskō* (Mt. 8:32), *phthorá* (Col. 2:22); *phthartós* (1 Cor. 9:25)]; AV also "be consumed with dying" (Nu. 17:13), DESTROY, FAIL, BE SILENT, BE CONSUMED, BE DESOLATE, BE CUT OFF; NEB also MEET ONE'S END, VANISH, WIPE OUT, BE ANNIHILATED, PAY WITH ONE'S LIFE, BE DOOMED, BECOME EXTINCT, BE LOST (Mt. 18:14), GO TO DAMNATION (Acts 8:20), etc.

I. In the OT.–The main Hebrew verb translated by "perish," *'ābaḏ,* in the qal has two dominant meanings: "wander off, be lost," and "perish, be destroyed." Sometimes the first meaning is used literally in reference to animals that have wandered away from the herd and are likely to be killed (e.g., 1 S. 9:3, 20; RSV "be lost"). Occasionally this use occurs in a figurative sense: Israel is like sheep whose shepherds have left them and who wander about aimlessly (RSV "lost," Jer. 50:6; Ezk. 34:4, 16; *see* LOSE). This use of *'ābaḏ* corresponds closely to one English meaning of "perish": "go destructively" (< Lat. *per-ire*).

More frequently *'ābaḏ* means "perish, be destroyed," or, in the piel or hiphil, "cause to perish, destroy" (e.g., Dt. 7:24; Ezk. 25:7). The transitive forms of the verb (usually rendered "destroy" by the RSV) occur most often in a military context, very frequently with God Himself as the author of destruction. Behind many of the intransitive (qal) uses of the verb also lies the idea that divine judgment brings about the destruction of nations (e.g., Lev. 26:38; Dt. 4:26f.; 11:17; 30:18; Josh. 23:13, 16; Job 4:9; Ps. 2:12; 10:16; 73:27; Isa. 41:11). Used in this sense, as in the sense of "wander off, be lost," *'ābaḏ* always implies an element of personal responsibility for one's own destruction (see *TDNT*, I, 394f.). The reason for the divinely willed ruin is neglect of or opposition to God's law (cf. Dt. 8:19f.; 28:20). *See also* DESTRUCTION III.

In certain prophetic texts *'ābaḏ* describes the disappearance during evil times of the good qualities of life, e.g., truth (Jer. 7:28), wisdom (Isa. 29:14; Jer. 49:7), and godliness (Mic. 7:2).

A striking derivative of *'ābaḏ* is the noun *'ᵃḇaddôn* (ABADDON), the place of destruction in the afterlife (Job 26:6; etc.). In this connection the question arises whether *'ābaḏ* and its derivatives ever refer to eternal destruction or always simply to the ruinous end of this life. Esther's statement, ". . . I will go to the king, though it is against the law; and if I perish, I perish" (4:16), plainly has in view only her self-sacrificing death. But certain passages, especially in the Psalms, suggest horizons beyond the grave (cf. Ps. 73:27 in the light of v. 24; 83:17; etc.; see M. Dahood, *Psalms,* III [*AB,* 1970], xli-lii; G. C. Berkouwer, *Return of Christ* [Eng. tr. 1972], pp. 171-79). In any case it is God — not the grave — who finally decides a person's destiny (cf. Ps. 49:14f.).

II. In the NT.–The key NT term rendered by "perish" is Gk. *apóllymi* (the usual LXX translation of Heb. *'ābaḏ*). Like Heb. *'ābaḏ, apóllymi* can be used intransitively with the sense either of "lose" or "be destroyed." When read in the light of its LXX usage, *apóllymi* evokes the image of a sheep that separates itself from the flock, gets entangled in the shrubbery, and starves to death or is eaten by wild animals. It implies an element of initial wilfulness and later helplessness. Thus the loss of one's life can be attributed at least in part to one's own will (cf. "lose," Mt. 10:39 par.). But whereas *'ābaḏ* usually connotes only physical death, *apóllymi* frequently refers to a definitive and unending destruction that is contrasted with everlasting life (see *TDNT*, I, 394-96). This contrast is clearly observable in Jn. 3:16: in a world that God loves and in which the gospel is preached, the alternatives are either to perish or to have eternal life (cf. 10:28; see R. E. Brown, *Gospel According to John,* I [*AB,* 1966], 134).

Greek *phthorá* ("corruption, destruction") and *phthartós* ("corruptible") refer to subjection to death as an ongoing process. Corruption characterizes existence controlled by flesh (cf. Isa. 40:6: "All flesh is grass"; *see* FLESH I.G). By contrast God is immortal (*áphthartos,* 1 Tim. 1:17), and the Christian inheritance is imperishable (*áphthartos,* 1 Pet. 1:4).

The extended passage on resurrection in 1 Cor. 15:42-55 is governed by the contrast between the perishable and the imperishable. What is sown (human life from conception onward) is "perishable" (v. 42), i.e., subject to corruption in its process and end-result; what is raised (the human body which bears "the image of the man of heaven" [v. 49]) is "imperishable" (*aphtharsía*), i.e., outside the sphere of death and corruption (cf. vv. 53f.).

In 1 Peter the same contrast is at work, but in widely differing contexts. Here the seed of regeneration is the imperishable Word (1:23); the saving blood of Christ is contrasted with perishable silver and gold (1:18f.); a gentle and quiet spirit is called an "imperishable jewel" (3:4); and the promised salvation is an imperishable inheritance (1:4).

PERIZZITE per'ə-zīt [Heb. *p^erizzî*; Gk. *Pherezaios* (except in Ezr. 9:1, LXX A *Pherezi*, B *Pheresthei*)]; AV Apoc. PHERESITE, PHEREZITE. One of the peoples occupying Canaan from patriarchal times (Gen. 13:7; 15:20; 34:30). Because of the sin of these various peoples (15:16) God commissioned Israel in the period of the Conquest to execute His temporal judgment against them (e.g., Dt. 7:1ff.). Israel's fidelity to this charge was erratic (cf. Josh. 9; 13:13; Jgs. 1; 3:5); thus many Perizzites and other non-Israelites survived till Solomon's time, when he conscripted them for his slave labor force (1 K. 9:20f. par. 2 Ch. 8:7f.).

The vagueness of the biblical references has led to scholarly disagreement about the precise geographical distribution and identity of the Perizzites. The Perizzites are merely listed with other Canaanite groups, typically the Canaanites, Hittites, Amorites, Hivites, and Jebusites (see Ishida for discussion of the various lists). The lack of convincing extrabiblical references to this population adds to the problem (cf. Wiseman, pp. xv-xvi).

Joshua 11:3 groups the Perizzites with the Amorites, Hittites, and Jebusites, and locates them in the hill country of northern Canaan (cf. also Gen. 13:7; 34:30). Other passages suggest the Perizzites also inhabited the highlands further south (Josh. 16:10, LXX; Jgs. 1:4f.). Finally, some infer from Josh. 17:15 that the Perizzites inhabited the forested region of Carmel (so A. H. Sayce, *ISBE*, IV, *s.v.*) or of the Transjordan (so Soggin, p. 183). But other studies defend a location in Israel's central highlands (so Woudstra, p. 268; Miller, p. 244).

A plausible etymology relates "Perizzite" to the Heb. *p^erāzôṯ*, *p^erāzî*, "rural country" (the LXX renders two of the three occurrences of this term as "Perizzites"). Thus many scholars consider "Perizzite" simply as an appellative — hence, "villagers." The pairing of "Canaanites and Perizzites" (Gen. 13:7; 34:30; Josh. 16:10, LXX; Jgs. 1:4f.) may support this view (cf. Boling, *Judges*, p. 54). While not necessarily excluding an appellative use or derivation (cf. M. Liverani in Wiseman, pp. 101ff.), the general biblical use of Perizzite seems to be ethnic.

Of the two common scholarly proposals, the first identifies the Perizzites as a Hurrian subgroup. Favoring this approach is the possible identification of a few names of Hurrian background: *pire/izzi*, an envoy of the Hurri-Mitanni King Tušratta to Pharaoh Amenhotep IV (Am.Tab. 27-29). Since Am.Tab. 27 includes a hieratic Egyptian note *pirasi* for this name, the related names of various slaves (e.g., *pirisim, pirisija*) may also be relevant. Finally the Hurrian personal name *pirzu* is found at Nuzi (cf. *Encyclopedia Judaica, s.v.*).

The second proposal identifies the Perizzites as a subgroup of Amorites (in some contexts, a term which is broad enough to include Hurrians and other non-Semitic groups). Favoring the Amorite proposal is the recognition that the invading population of Canaan at the dawn of the M.B. Age was generally Amorite (see esp. Dever, *HTR*, *contra* Lapp, p. 115, that the Perizzites were originally Central Asians). Dever and others argue that this earlier Amorite wave was made up of seminomadic groups from the fringes of Syria (hence "Perizzite" = "rustic") as opposed to the later Amorite wave which brought the distinctive urban culture of M.B.II.A. Some such distinction, or perhaps a distinction of geographical distribution, would explain the separate listing of Perizzites and Amorites in Scripture.

Woudstra, *Joshua* (*NICOT*, 1981).

G. P. HUGENBERGER

PERJURER [Gk. *epíorkos*] (1 Tim. 1:10). One who swears falsely. In 1 Tim. 1:10 the term is found in a list of vices, as is "perjury" (*epiorkía*) in Wisd. 14:25. It is related to the verb *epiorkéō*, "swear falsely," in Mt. 5:33. *See also* OATH; SWEAR.

PERPETUAL [Heb. *ʿôlām*] (Ex. 28:43; Lev. 3:17; Nu. 10:8; etc.); AV often FOR EVER, also EVERLASTING (Ex. 40:15; Nu. 25:13); NEB usually FOR ALL TIME, also FOR EVER, IN PERPETUITY, UNENDING (Jer. 51:39, 57), IMMEMORIAL (Ezk. 35:5), etc.; [*tāmîḏ*] (Ex. 30:8); NEB REGULAR; [*neṣaḥ*] (Ps. 74:3); NEB "beyond repair"; [niphal part. of *nāṣaḥ*] (Jer. 8:5); NEB "incurable"; **PERPETUALLY** [*ʿaḏ*] (Am. 1:11); NEB UNCEASING; **PERPETUATE** [hiphil of *qûm*–'establish'] (Dt. 25:7; Ruth 4:10); AV RAISE UP; [niphal of *qārāʾ*–'be called, named'] (Gen. 48:16); AV "name"; NEB "called by (my name)"; [niphal of *zāraʿ*–'be sown, impregnated'] (Nah. 1:14); AV SOW; NEB "scatter"; **PERPETUITY** [*ṣ^emîṯuṯ*, *ṣ^emiṯuṯ*–'forfeiture of right to repurchase'] (Lev. 25:23, 30); AV FOR EVER; NEB also "outright."

"Perpetual" usually translates *ʿôlām*, a term that is more frequently translated "for ever" or "everlasting." In the OT *ʿôlām* does not, however, represent an abstract, philosophical concept of eternity. Rather, its primary meaning seems to be "the whole duration of a life span." When referring to God or anything grounded in God's nature, it denotes an unending duration (*see* AGE 1; ETERNAL I; ETERNITY II). But elsewhere it can denote the entire life span of a person (e.g., a slave [Ex. 21:6]; Samuel [1 S. 1:22]; David [27:12]), a nation (cf. Ex. 31:16; Josh. 4:7), a relationship (cf. Ezk. 35:5), an institution (e.g., the Aaronic priesthood), etc. The translation "perpetual" highlights the temporality of institutions such as the priesthood (e.g., Ex. 28:43; 29:9, 28; 40:15; etc.), the sacrificial system (e.g., Lev. 3:17), and the sabbath (e.g., Ex. 31:16). Heb. *ʿaḏ* and *neṣaḥ* are basically synonyms of *ʿôlām*, while *tāmîḏ* is an adjective or adverb that is usually translated "continual" or "continually."

N. J. O.

PERSECUTE; PERSECUTION [Heb. *rāḏap*–'pursue,' *śāṭam*–'bear a grudge against' (Job 30:21); Gk. *diṓkō*–'pursue,' *diōgmós*–'pursuit,' *diṓktēs*–'pursuer' (1 Tim. 1:13), *thlípsis*–'affliction' (Acts 11:19)]; AV also OPPOSE, FOLLOW; NEB also PURSUE, HUNT, HOUND. In Ps. 49:5 (MT 6) the RSV ("persecutors") and NEB ("treacherous foes") read *ʿōqᵉḇay* for MT *ʿᵃqēḇay* (lit. "my heels," so AV; see comms.). Persecution is the suffering or pressure, mental, moral, or physical, which authorities, individuals, or crowds inflict on others, especially for opinions or beliefs, with a view to their subjection by recantation, silencing, or, as a last resort, execution. The importance of this subject is indicated by the frequent use of the terms in both the OT and the NT.

I. OT
II. Intertestamental Period
III. NT
  A. Christ
  B. The Church
IV. Gentile Persecutions
V. Results of Persecution

I. OT.–Persecution was common in OT times, although in view of the close ties between people and religion it is often hard, especially before the Exile, to distinguish between ethnic and religious oppression. During and after the Exile plain examples occur in Daniel, which reports the attempts of alien rulers to force the three young men, and then Daniel himself, to betray their religious beliefs or abandon their religious practices (Dnl. 3). Apart from external pressures, the righteous in Israel suffered persecution by their own people, as testified by Jesus (Mt. 23:35) and Stephen (Acts 7:52). The prophets in particular suffered persecution of this kind, e.g., Elijah and other prophets of God under Ahab (1 K. 18) and Uriah and Jeremiah under Zedekiah (Jer. 26:20-24). The Psalms, too, are full of pleas to God made by those who suffer persecution because of their faithfulness to God and His commandments (e.g., Ps. 119:84-87, 150, 157, 161).

II. Interiestamental Period.–In the period between the Testaments the Jews often suffered severely because of their refusal to accept idolatry and their loyalty to God and the law. The attempt of Antiochus Epiphanes of Syria to replace Israel's religion by pagan worship led to wholesale martyrdom (1 Macc. 1:44ff.) until the successful revolt of the Maccabees remedied the situation. Jews of the Dispersion, too, were always open to attacks because of what seemed to be their strange beliefs and customs and their refusal to comply with the prevailing religious syncretism. The afflictions of those who maintained fidelity in spite of vicious pressures are aptly summed up in He. 11:33-38.

III. NT.–*A. Christ.* Christ Himself suffered persecution as many efforts were made to silence Him by force (Lk. 4:29) or cunning (Mt. 22:15ff.). From one standpoint His arrest, trial, and crucifixion might be regarded as a supreme instance of persecution. Christ also warned His disciples that they would suffer persecution as He did (Mt. 5:11; 10:16ff.; Jn. 15:20). Persecution would serve as a test. Thus in Mk. 4:17, in the parable of the Sower, those who have no root in themselves fall away when persecution comes because of the Word. At the same time, persecution carries the possibility of blessing for those who endure. One of the Beatitudes refers to those that are persecuted for righteousness' sake. Their special blessing is that the Kingdom is theirs (Mt. 5:10).

The forms that persecution may take in the NT are varied, whether in relation to Christ Himself or to His disciples. Prominent are false accusation (Mt. 5:11), disparagement (Jn. 8:48), excommunication (Lk. 6:22), contemptuous treatment (Mk. 15:16ff.), and, of course, arrest and flogging (Mt. 10:17) and, in the last resort, execution (Jn. 21:18f.).

B. The Church. The first persecutions of the Church were at the hands of Jewish authorities. They began shortly after Pentecost, partly because of some general hostility to the message and mission of the apostles, but chiefly because of Sadducean opposition to the proclamation of the resurrection of Jesus (Acts 4:2; 5:17). The Pharisees at first adopted a more tolerant attitude (5:34-39), and the addition of many priests to the Church shows that the people as such did not instigate early attempts to suppress the gospel (6:7). Indeed, the NT itself specifically states that the people held the apostles in high honor (5:13), and it leaves the impression of a popular movement that only the religious leaders were trying to quell (5:14; 6:7). The first arrests proved unsuccessful, and serious persecution began only with the stoning of Stephen, whose exposition of OT history incensed synagogue opponents, was misinterpreted to the people, and infuriated the members of the high council (6:9ff.; 7:54ff.). The ensuing attack on the Jerusalem church scattered its members, and Paul came into prominence for the persecuting zeal that he then regarded as service of God but would later see as his great sin (cf. Acts 8:1ff.; 9:1ff.; 22:4; 1 Cor. 15:9). The execution of James, the first apostolic martyr, came shortly afterward under Herod Agrippa (Acts 12:1f.), and Peter, imprisoned when James was killed, escaped a similar fate only through the intervention of the angel (12:3-11).

After these first years the NT has little evidence of continued persecution in Palestine, but Paul on his missionary journeys frequently met with opposition from Jews who rejected the Christian message. Active hostility drove him out of Thessalonica (Acts 17:5ff.), and at Corinth charges were preferred against him before the proconsul Gallio (Acts 18:12ff.), although without success. On some unspecified occasions the Jews flogged Paul (2 Cor. 11:24), and finally in Jerusalem he was subjected to rough treatment (Acts 21:30ff.), a plot was made to assassinate him (23:12ff.), and the accusations of the council led to his imprisonment, his appeal to the emperor, his transfer to Rome, and perhaps to his ultimate execution at gentile hands.

Shortly afterward James the Lord's brother met his death in Jerusalem (probably by stoning), and during the Jewish War Christians in the capital escaped more serious repression only by their flight to Pella. After A.D. 70, however, the Jews lost any active power of persecution except briefly during the turbulent years of the Bar Cochba revolt (A.D. 132-135).

IV. Gentile Persecutions.–During the first years of missionary expansion the Church enjoyed comparative peace from the Roman authorities, partly due to the general imperial policy of religious toleration, and partly due to the supposed privileged position of Christianity as a sect of Judaism. Sporadic hostility arose when vested interests were thought to be threatened, as at Philippi and Ephesus (Acts 16–19), but Paul's Roman citizenship proved a potent deterrent in the one case, and fear of government action served as a useful brake in the other. Paul was certainly kept under arrest by Felix, who wished to maintain good relations with the Jewish leaders, but when the hearing took place before Festus and Agrippa, the two judges could not see that Paul had done any wrong. Rome at first seems to have repeated the verdict, for according to the witness of the Pastorals Paul was able to resume his missionary work for a limited period.

A drastic change came in July of A.D. 64, when Nero, accused of setting a disastrous fire in Rome and unable to clear himself by gifts or sacrifices, decided to make the Christians his scapegoats, and started a persecution which for its cruelty would evoke censure even from those who regarded Christianity as a debased superstition (Tacitus *Ann.* xv.44). References to this persecution may perhaps be found in 1 Peter, and also in 2 Timothy, in which Paul mentions his trial and impending death. 1 Clem. 1:1 also refers to the martyrdom of Peter and Paul at this time, and Eusebius (*HE* ii.25.5ff.) adds that Peter suffered death by crucifixion and Paul by beheading. If Revelation belongs to the age of Nero, the persecution extended to Asia Minor, for the opening letters mention pressures and martyrdoms (2:2, 10, 13, 19; 3:8), and the author himself suffered exile for the word of God and the witness of Christ (1:9). It is possible, of course, that this persecution took place some years later under Domitian, but in Revelation Rome had certainly assumed the persecutor's role (16:6; 17:6; 18:24; 19:21; 20:4). The state that should be the minister of divine justice (Rom. 13:1ff.) had

become the beast from the abyss (Rev. 13), the new Babylon whose fall would be an occasion for rejoicing (ch. 18).

Under Trajan at the beginning of the 2nd cent. the question of Christianity arose in a letter sent to the emperor by Pliny the Younger, proconsul of Bithynia. Faced with a great increase of the Church that had caused the temples to be deserted and the trade in offerings to fall off, Pliny had followed up anonymous accusations, called upon accused persons to renounce their faith and worship the imperial statue, and either managed to enforce compliance or imposed severe punishment. He wished to know whether he had taken the right course. Trajan in his reply recognized that punishing known believers was the correct thing to do, but he insisted that any who recanted should be released, and he provided some protection for Christians by stating that they should not be tracked down and that anonymous accusations should be disregarded (Pliny [the Younger] *Ep.* x.96f.). In general, persecution seems not to have been either common or severe in Trajan's time, although Ignatius of Antioch, who wrote his famous letters on the way to execution at Rome, was a notable victim.

The more relaxed attitude of Trajan persisted under his great successors Hadrian and Antoninus Pius. Hadrian in a rescript to the proconsul of Asia (*ca.* A.D. 125) added the further protection that any who falsely accused others of being Christians should suffer even more stringent punishment than those they accused (Eusebius *HE* iv.9). The more favorable climate of the period encouraged the Apologists to offer their arguments for Christianity and its recognition, although it is doubtful how far those in power paid attention to the various pleas. Undoubtedly the Church enjoyed peace in many areas at this time. Isolated martyrdoms still occurred, of course, e.g., that of Polycarp in Smyrna (A.D. 156) and that of Justin in Rome (A.D. 165). In the records, the issue was not the illegality of Christianity as such but the refusal of Christians to give proof of loyalty, as all others would do apart from the Jews who were specifically exempt, by making some offering to a statue of the divine emperor. Popular rumors, e.g., that the Christians were atheists, cannibals, and incestuous persons, helped to inflame ordinary citizens against the Church, especially in times of emergency through earthquake, famine, fire, or flood, and the steadfast rejection of idolatrous offerings gave some substance to at least the first of these charges.

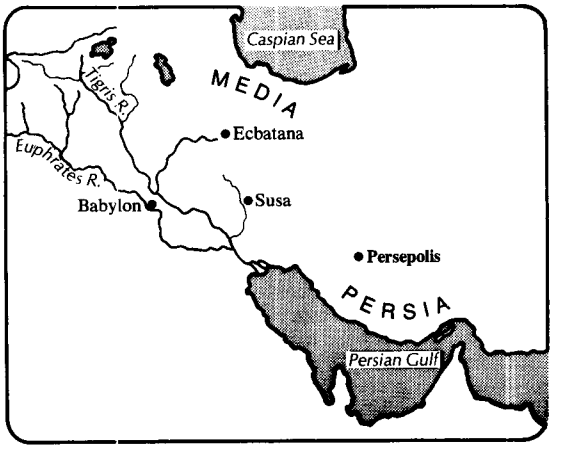
Toward the end of the Antonine period, Marcus Aurelius, although a great emperor in other respects, took a more hostile attitude to the faith. The terrible outbreak of mob violence in South Gaul in A.D. 177 (Eusebius *HE* v.1, 3ff.), which produced some of the heroic martyrs of the early Church, marred the reputation of an otherwise sagacious and conscientious ruler.

The 3rd cent. brought an intensification of persecution broken by long periods of virtual toleration. As Tertullian claimed in his *Apologeticum*, the Church enjoyed rapid expansion as the 2nd cent. progressed. More systematic policies were developed, first to check its growth, and then, if possible, to secure its eradication. The edict against conversion under Septimius Severus in A.D. 202 caused temporary disruption, e.g., in Alexandria, from which Clement fled, and where Origen suffered the loss of his father. More seriously, Decian in A.D. 250 decreed that all persons should make offerings on penalty of torture or death, the aim being to execute the more forceful leaders and to force the rest into apostasy. Those who obeyed the edict received certificates of compliance as a check. The policy proved surprisingly successful, for while many Christians stood out against the imperial demand, large numbers of nominal believers either obeyed it or secured certificates by bribery, and divisions arose within the Church over what to do with apostates who desired to renew their membership on the death of Decius in 251. In 257 Valerian renewed the persecution with particular attacks on the clergy and believers of higher social rank, and also with the confiscation of church property. Several leading Christians, including Cyprian of Carthage, suffered martyrdom as a result. Valerian, however, reigned only briefly, and in 261 Gallienus, who had been co-emperor but now reigned alone, not only granted toleration but gave the Church official recognition by restoring its property.

The final struggle came with Diocletian in A.D. 303 when the policies of Decian were reactivated, churches were destroyed, and Christians were also ordered to hand over their sacred books and vessels for destruction. This last great Roman persecution, which continued intermittently for many years, took a serious toll, especially in the more heavily populated eastern part of the empire where Galerius pressed it more severely. It also led to renewed controversies over the status of clergy who handed over the sacred books (the so-called *traditores*) or who were ordained by those who did so. Yet this persecution proved in the event to be the darkest hour before the dawn, for eventually even Galerius, the most savage of the persecutors, was forced of his "most mild clemency" (as he put it) "to offer his speediest indulgence, that Christians may exist again, and may establish their meeting houses" (A.D. 311). More secure peace came in A.D. 313 when Constantine and Licinius, the emperors in West and East, issued the famous Edict of Milan, which granted liberty of opinion and practice to all religious persuasions. Licinius, it is true, commenced a new persecution in 319, but he was overthrown in 324 by Constantine, who as sole emperor proceeded to reaffirm his policy of toleration for all beliefs, although now with some measure of scorn for those who preferred their "temples of falsehood" to "the glorious edifice" of God's truth.

V. Results of Persecution.–For all the misery it caused, persecution served some valuable purposes. It discouraged people from joining the Church except out of sincere conviction. It raised up witnesses whose faith commended itself because of their obvious sincerity of commitment. It purged the Church when in more peaceful periods nominal adherents increased and Christianity became more fashionable. It proved the power of the gospel against the worst that a great imperial power like Rome could do. It provided leaders who could withstand heresies like Arianism as they had withstood oppression. It proved to those who suffered under it the truth of Christ's promise to be present with His people and of His assurance that they could be of good courage in affliction in virtue of His own overcoming of the world.

Naturally there were problems and failures. Persecution not only brought havoc to individual lives but devastated churches, led to apostasy, and brought divisions that were potentially more disruptive than persecution itself. Even more seriously and sadly, perhaps, Christians failed to learn from persecution that they themselves had no right to become persecutors when they came into a position to be so, as happened when they secured the favor of Constantine, and the attempted suppression of the schismatic Donatists formed the first of a shameful series of similar acts both within the Church and outside it. Nevertheless, the survival of the Church under persecution, which seemed almost a miracle of resurrection to those who went through the Diocletian era, showed that God could indeed overrule human wrath to His own glory and



the well-being of His Church and its ministry. As Christians have still had to suffer persecution in later centuries and across different continents, they can thus take heart from the experiences of their predecessors in the NT communities and the early Church.

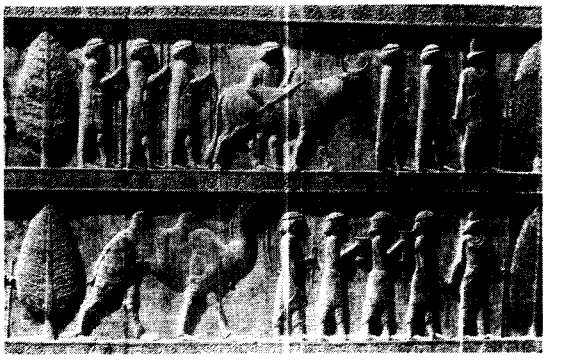
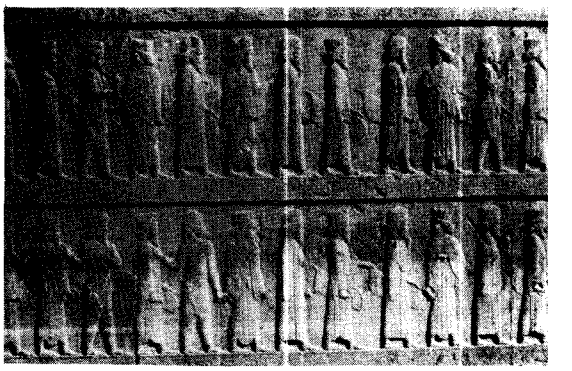
G. W. BROMILEY

PERSEPOLIS pûr-sep'ə-lis [Gk. *Persepolis, Persaipolis, Persopolis*–'city of Parsa']. A city in ancient Persia.



Persepolis, Susa, Ecbatana, and Babylon were the four capitals of the Achaemenian empire (550-330 B.C.). Situated in the province of Fars, the place of origin of the dynasty, about 50 km. (31 mi.) N of Shiraz, Persepolis stretched out over the vast plain of Marvdasht crossed by the Polvar River.

The royal part of the capital, conceived and in part realized by Darius (522-486 B.C.), was an artificial terrace resting against Kouh-è Rahman, the "mountain of pardon." This gigantic platform, 452 by 352 m. (1485 by 1155 ft.), rising 12 m. (40 ft.) above the plain, was formed by joining the spurs of the mountain by a mass of polygonal blocks dovetailed with iron and lead pins.



The principal access to the terrace was made from the west side by a majestic double stairway with very low steps, which permitted a horseman to ascend. The terrace supported great official buildings in the north part and residential buildings in the south part. The buildings had walls of coarse, sunbaked bricks, but the doors, windows, recesses, and columns were carved in stone brought from nearby quarries.

In the north part of the terrace the approaches of two great halls, the Apadana and the "hundred columns," were controlled by the propylaeum of Xerxes. The Apadana, where the king received nobles of the two master peoples, the Persians and Medes, was a great square hall surrounded by three porticos. Seventy-two columns, each 8 m. (27 ft.) high, supported its roof, made of cedar beams from Lebanon. Two stairways on the northern and eastern sides leading to this hall were decorated in relief: on one side a deployment of the royal court, with guards, army, horses, and chariots (*see* second picture in ARCHEOLOGY OF IRAN; *see also* Vol. I, Plate 1), and on the opposite side a procession of twenty-three delegations of nations that constituted the first world empire, from the Ethiopians

Relief from the Apadana at Persepolis showing some of the delegations from twenty-three nations bringing tribute to Xerxes (L. A. Willis)

Relief from the Apadana at Persepolis showing Median (with high rounded hats) and Persian (with high fluted hats) dignitaries alternating in procession to Darius (L. A. Willis)

to the Scythians of Central Asia and from the inhabitants of Asia Minor to those of India. All were bringing to the Great King the products of their lands, the most precious of which were laid at the foot of the throne of the vast hall of "the hundred columns."

This decoration, like a grandiose poster, announced the spectacle that was to take place below in the plain at the foot of the terrace, under the eyes of the Great King. The king was seated on the edge of the Apadana, where stood the (equestrian?) statue of Xerxes that was later overturned and broken by the soldiers of Alexander the Great in their capture of Persepolis.

The north part of the terrace was joined to the south part by a building with three doors (the Tripylon), which also served as a propylaeum. Darius had built the Tripylon when the edifices of the north part were still far from completed. At the south were the palaces of Darius, of Xerxes, and of Artaxerxes III(?), the harem of Xerxes, and in the eastern angle the Treasury. *See* third picture in ARCHEOLOGY OF IRAN.

The name of Persepolis in Old Persian, mentioned in Xerxes' inscription on his propylaeum, was Parsa; "Persepolis" comes from the Greeks, whose writings, however, do not mention the city before Alexander the Great.

Aeschylus (*The Persians*) ignored this capital and spoke only of Susa (16, "the Old Kissian Ramparts," or 120, "the Citadel of the Kissians") and Ecbatana. Ctesias, the personal physician of Artaxerxes II, who resided at the court several years, also did not mention Persepolis. The foreign ambassadors were received especially at Susa and also at Ecbatana but apparently never at Persepolis. The character

of this capital, which differed from that of modern capitals, explains these facts.

The court of the Great King left Susa and came to Persepolis for the festival of New Year's Day (March 21). At that time delegations from all countries of the Persian empire brought as offerings their most famous products. By this gesture these nations assured the Great King of their loyalty to the crown. Parsa was therefore a sacred dynastic place where the union of the peoples who formed the empire was sealed with its rulers.

Darius conceived and in part carried out the general plan of Persepolis. His palace, the Tripylon, the foundations of the Apadana, and at least two-thirds of the Treasury date from his reign. Xerxes (486-465 B.C.) completed the Apadana, as well as his propylaeum and palace. The hall of the hundred columns dates from the reign of Artaxerxes I (465-424 B.C.), and an unfinished palace is attributed to Artaxerxes III (359-338 B.C.). To the extent projected, Persepolis was never finished.

Several thousand tablets found in the surrounding wall and in the Treasury were written in Elamite (except some rare tablets in Aramaic and in Greek) and traced the long period of building activity on the terrace under the three kings — Darius, Xerxes, and Artaxerxes I. The specialists of the various crafts at any one time numbered over thirteen hundred, and included many nationalities. The tablets revealed an unexpected aspect of the economic life of the country and an important reform of Darius; he introduced into Persia the use of money, which gradually replaced payment of the workers in kind.

The royal terrace, which was neither the acropolis nor the citadel, was no more Parsa than the Louvre is Paris. This city, one of the greatest in ancient Persia, stretched far toward the west and certainly also toward the north, probably as far as Naqsh-i-Rustam. There, carved in the high rock, are the tombs of Darius and his three successors. The tomb of Darius III is unfinished. *See* second picture in DARIUS.

In February, 330 B.C., Persepolis fell into the hands of Alexander the Great. He had its treasure transported to Ecbatana by "10,000 pairs of mules, and 5,000 camels" (Plutarch *Alexander* 68). The Macedonian lived there for four months while leading several operations against mountain tribes. At the end of their sojourn the Macedonians set fire to the tapestries during a drinking bout. The fire completely destroyed the palaces, which were thereafter totally abandoned.

The first attempt to excavate the terrace was made in 1878 by F. Mirza, Governor General of Fars, in the hall of the hundred columns. Modern scientific research began in 1931 with the mission of the Oriental Institute of Chicago under the direction of E. Herzfeld, who was followed by E. Schmidt. The Iranian mission has pursued this work since 1939.

Near Eastern studies are indebted to the work of the Achaemenian kings at Persepolis. Each royal builder left several inscriptions carved on the stone of the monuments in cuneiform signs and in three languages, Old Persian, Elamite, and Babylonian (*see* Vol. I, Plate 5). These inscriptions, which western travelers noticed in the 17th cent. and copied in the 18th cent., enabled scholars of several countries, who worked independently of one another, to decipher cuneiform writing in the first half of the 19th century. This remarkable achievement has made it possible to lift the veil that had hidden thousands of years of history of many Middle East civilizations.

According to 2 Macc. 9:1f. Antiochus Epiphanes entered Persepolis and tried to rob the temples there and control the city, but he was repulsed by the inhabitants. Since Persepolis was destroyed and abandoned in 330, this account is probably in error (2 Maccabees is not always reliable). Perhaps the event in 2 Macc. 9:1f. is the same as that described in 1 Macc. 6:1-4 and Polybius xxxi.11; i.e., the reference then should be to ELYMAIS, not Persepolis.

PERSEUS pûr'sē-əs [Gk. *Perseus*].

Perseus, the last king of the Macedonians, is mentioned along with his father Philip (V) at 1 Macc. 8:5 as an example of the foreign powers vanquished by the expanding Roman armies prior to the middle of the 2nd cent. B.C. (cf. Josephus *Ant.* xii.10.6 [414]).

Our primary sources on Perseus are Polybius xxvii-xxix, Livy xlii-xliv, and Plutarch *Aemilius Paullus*. Perseus was born *ca.* 212 B.C. to Philip and Polycrateia of Argos. As the heir to the throne Perseus became apprehensive of the designs of his younger half-brother Demetrius, who as a hostage at Rome had made some influential Roman friends. When Perseus accused his brother of attempting to assassinate him, Philip reluctantly had Demetrius executed.

Upon Philip's death in 179, Perseus acceded to the throne. In the following year he married Laodice, daughter of Seleucus IV. His foes, e.g., Eumenes of Pergamum, called Rome's attention to what they perceived as Perseus's aggressive expansionism. Alarmed by these accusations, in 171 Rome declared the Third Macedonian War against Perseus.

After three years of indecisive fighting, the war came to a swift close at the famous battle of Pydna in Thessaly on June 22, 168. The actual site of the battle was probably SW of the modern town of Katerini some 16 km. (10 mi.) S of Pydna, the city to which the king fled. As in the battle of Cynoscephelae fought nearby in 197 by Philip, the Roman legions under Aemilius Paullus once again proved more flexible than the Macedonian phalanxes. With only a few losses on their side, the Romans killed twenty thousand men and captured nearly ten thousand.

The consequences of the battle at Pydna were far-reaching. Perseus was displayed in Paullus's triumph at Rome in 167, and died in captivity five years later. The monarchy in Macedonia was replaced by four separate republics. On his way home Paullus ravaged Epirus (Albania), which had sided with Perseus, and brought home 150,000 Epirote prisoners to be sold as slaves. The Macedonian booty was so bountiful that Rome was able to cancel its land taxes. "After the battle of Pydna, there can have been few who seriously doubted that Rome had risen to world power" (Errington, p. 226).

Immediately after the Roman victory at Pydna the consul Popilius Laenus was emboldened to order Antiochus IV peremptorily out of Egypt. When the Seleucid king hesitated, the Roman legate drew a circle about him and ordered him to make up his mind before he left the circle.

Knowledge of the Roman victories over Philip and

Perseus influenced Judas Maccabeus to send envoys to seek a treaty of friendship with Rome. Though the exact contents of the letter recorded in 1 Macc. 8:23-32 have been disputed, most scholars no longer doubt the fact of such a treaty negotiated in 161 between the Jews and the Romans.

PERSEVERANCE [Gk. *proskartérēsis*] (Eph. 6:18); [*hypomonḗ*] (He. 12:1); AV PATIENCE; NEB RESOLUTION; **PERSEVERE** [Gk. *paraménō*] (Jas. 1:25); AV CONTINUE; NEB "lives in its [the perfect law's] company." Persistence in the face of discouragement or opposition.

Rare in Hellenistic Greek, *proskartérēsis* occurs in the NT only at Eph. 6:18, where it refers to persistent, persevering prayer as part of the Christian's spiritual armor. The related verb, *proskarteréō*, underscores the element of steadfastness in the Christian life (cf. "devote oneself," Acts 2:42; 6:4), and especially in prayer (cf. Acts 1:14; "be constant," Rom. 12:12; "continue steadfastly," Col. 4:2). Throughout the NT Christians are exhorted to persist in prayer (e.g., Lk. 18:1-8; Phil. 4:6; 1 Thess. 5:17).

The author of Hebrews uses the image of a race (cf. 1 Cor. 9:24; Phil. 3:12) to summon Christians facing persecution to "perseverance" (*hypomonḗ*, "patience, endurance, steadfastness") in their faith so that they, like Christ, might attain the prize (He. 12:1f.). (*See also* ENDURE; STEADFASTNESS.)

In Jas. 1:25 *paraménō* has the sense of "continuing" (cf. Phil. 1:25; He. 7:23) to allow the "perfect law, the law of liberty," to rule one's life, i.e., to do it as well as to hear it.

In theology "perseverance" appears in the phrase "perseverance of the saints," which is sometimes equated with "the security of believers" or "eternal security." Citing passages such as Jn. 6:37; 10:28; 17:6-11; Rom. 8:31-39, some interpreters hold that once one has been saved, one cannot subsequently forfeit salvation. Others maintain that only those who persevere to the end are saints. They cite passages such as Lk. 8:9-15; Gal. 5:4; He. 2:1-4; 3:7–4:13; 6:4-6 as evidence that one can renounce faith in Christ Jesus and hence forfeit one's salvation.

Whereas the Calvinists, with their theory of predestination, find it inconceivable that a saint (i.e., one of the "elect") would not persevere, the Arminians, with their doctrine of the freedom of the human will, maintain the possibility that salvation might be lost. According to I. H. Marshall (p. 207), the NT "knows neither the rigid logic of Calvinism nor the 'casualness' of Arminianism." Rather, the NT writings must not be pressed to give a logically rigid answer. "The NT is content to hold together the facts of perseverance and apostasy in paradox, and to rest the confidence of the believer not on a logical argument but on the faithfulness of God in whom he must continually trust" (*ibid.*).

I. Biblical References.–The term Persia is used in the Bible mainly in the phrase "king of Persia" (Ezr. 1:1f., 8; 3:7; 4:3, 5, 7, 24; 6:14; 7:1; 9:9; Dnl. 10:1, 13). Frequently it appears in combination with "Media" or "Medes" (Est. 1:14, 18f.; 10:2; Dnl. 5:28; 6:8, 12, 15 [MT 9, 13, 16]; 8:20). It is used as an adjective only in Neh. 12:22 and Dnl. 6:28 (MT 29). It denotes properly the modern province of Fārs, not the whole Persian empire. This is supported also by Ezk. 27:10 and 38:5, where Persia is listed along with Put, Lydia, and Cush. Daniel possibly used "Persia" to denote the whole empire in 10:13, 20; 11:2. The empire itself was called Airyana, the present Iran, from a term in the *Avesta* based on the Sanskrit word *arya*, "noble." The province of Parsa (Persis to the Greeks, now known to Arabs as Fārs), lay E of Elam (modern Khuzistan).

II. The Land.–Persia and Iran have been used interchangeably to designate the same geographical area. Modern Iran covers 1,647,000 sq. km. (636,000 sq. mi.) of varied climatic and geographical extremes, stretching across deserts and mountains from Iraq to Afghanistan and from the Caspian Sea to the Persian Gulf.

A. Central Plateau. The greater part (about 777,000 sq. km., 300,000 sq. mi.) is a vast plateau consisting of a series of high valleys and arid basins which lie at an altitude of 900-2500 m. (3000-8000 ft.) above sea level. The plateau is hemmed in on the west by a great spine of the Zagros Mountains which stretches more than 1600 km. (1000 mi.) southeastward from Azerbaijan and separates the inner basin from the Tigris-Euphrates lowlands. The Elburz range rims the southern shores of the Caspian Sea and walls in the plateau on the north. These mountains

The Zagros Mountains (L. A. Willis)

rise precipitously from below sea level (Caspian Sea is 28 m. [92 ft.] below sea level) to a maximum height of 5771 m. (18,934 ft.) at Mt. Damavand. To the northeast of Tehran are the "Caspian Gates," which link the plateau with the Caspian Sea. On the east the Elburz range merges into the Kopet Dagh range, which continues southward and separates Iran from Afghanistan. On the south the circuit is completed by the Makran, Sistan, and Baluchistan ranges. The central plateau, though fertile in spots, is extremely dry. The two large salt-caked deserts, the Dasht-i-Kavir to the north and Dasht-i-Lut to the south, are considered to be the most arid regions in the world. These deserts have always acted as a barrier to east-west communication. To the southwest of the Zagros is the plain of Khuzistan (ancient Susiana) through which the Karūn River flows to the Persian Gulf. This area, an extension of Mesopotamia, is the largest stretch of lowland in modern Iran.

B. Climate. The landscape and climate offer general resemblances to those of the American Southwest. The extremes of geography also make for extremes of climate. Except for the northern coast, rainfall is meager, averaging annually 20 cm. (8 in.) or less on the eastern plateau and 38 cm. (15 in.) on the western. Rainfall does not exceed 5 cm. (2 in.) in the Lut. Temperature varies from −18° C. (0° F.), on occasion, to an average of 20-32° C. (70-90° F.) in summer on the plateau, and to a blistering 50° C. (120° F.) or more along the Persian Gulf. On the north, along the Caspian, the climate is subtropical, and, with heavy rainfall, luxuriant forests grow. These forests are called *jangal* in Persian, a word from which English "jungle" is derived.

III. History.–The history of Persia before 1000 B.C., when the MEDES and Persians arrived, is limited almost exclusively to the history of ELAM, the southwest portion of Iran. Only from this area have come documents worthy of mention from the pre-Persian period. Few other documents are found before Zoroaster appeared in the 7th century. Enmebaragesi of the First Dynasty of Kish records a successful campaign against the land of Elam (before 2600 B.C.).

A. Prehistory. Archeological evidence takes us back much further. The Zagros region was ideally suited for the so-called Neolithic Revolution (*ca.* 9000 B.C.), for here were prototypes of the earliest domesticated plants and animals. Sites such as Ganj Dareh and Tepe Guran (in Iranian Khuzistan and Luristan) give evidence of the increasing cultivation of barley and wheat and the raising of sheep and goats. This led to an increase in human population and the development of village communities which began to use irrigation. Evidence has also been found of similar development in Fārs, southern Turkestan, northeast Iran, and at Sialk, S of Tehran.

Tepe Sialk has yielded some of the earliest traces of human presence on the Iranian plateau. This community grew up around a spring, and two adjacent mounds (tells, tepes) were formed. The earliest houses (on the northern hill) were made of reeds or branches covered with mud. A few teeth of cattle and sheep, together with sickles formed of bone and flint, suggest some kind of agriculture and stock breeding. Painted pottery can be linked with the Hassuna IB ware in Mesopotamia. Metal came in towards the end of the period. Sialk II shows marked progress as crude bricks replaced puddled clay for building, trade with areas hundreds of kilometers away is attested, and pottery shows greater refinement. Sialk III is represented on the southern hill where a new village grew up after the northern hill was abandoned. It is a continuation of Sialk II, and is almost identical with the lower levels of Tepe Hissar I.A. Pottery was still made by hand, but the kiln made its appearance in the later periods. The pottery was decorated in a greater variety of ways than before, and metal occurred more frequently. By Sialk III.4, copper began to be forged (until then it was hammered), and the potter's wheel appeared — a technological breakthrough because it allowed greater regularity of form and greater production. Stone seals, used for indicating ownership, also appeared in Sialk III.4. The question remains as to whether these were invented in the Iranian mountains.

It is evident that the material progress of early agricultural settlements in Iran can be compared favorably with those of Mesopotamia, but the geographic restrictions of the country were not conducive to the emergence of larger political units. The most likely area for this type of development was the low-lying region between the Zagros foothills and the Euphrates (modern Khuzistan).

See also ARCHEOLOGY OF IRAN; *see* Plate 67.

B. Kingdom of Elam. In this plain the kingdom of Elam was formed, a country rich in raw materials. It supplied early Sumer with metals (silver, copper, tin, and lead), stone (obsidian, alabaster, diorite, and steatite), precious gems, horses, and timber.

Very few documents are available from the pre-Persian era. Partly in Akkadian and partly in Elamite, most have come from Susa, the capital of Elam. The Elamites recorded the name of their country in cuneiform as *Ḫaltamti* or *Ḫatamti,* which may mean "God's land." The Sumerians and Akkadians referred to Elam as "highland" because the country included not only the low plain of Susiana but the mountains and plateaus to the north and east. This linkage of plains and mountains is a chief characteristic of Elamite history that endured for thousands of years until the Medes and Persians conquered all the mountain territory *ca.* 600 B.C.

C. Rise of Medes and Persians. Early waves of Indo-European tribal groups brought the Achaians to Greece, formed the Hittite kingdom in Asia Minor and the Mitannian kingdom in northern Mesopotamia, and contributed to the Hyksos chiefs in Syria and Egypt. Toward the end of the 2nd millennium B.C. tribes from Transoxiana — the steppes of southern Russia E and S of the Caspian Sea — migrated in large numbers and began to settle in Iran and S of the Black Sea. These are known by the term Aryan ("noble"). This new wave, associated with the Cimmerians and Scythians, included the Medes and Persians, who by the 9th cent. had established themselves in northwest Iran between Lake Urmia and the plain of Ecbatana (Hamadân). Further immediate expansion was stifled by the existing powers of Urartu to the northeast, Assyria to the west, Babylonia to the south, and Elam at the head of the Persian Gulf.

The first references to the Medes and Persians occur in an inscription of Shalmaneser III. He referred to them all

as Medes and deported thousands of them in 837 B.C. The Medes and Persians also paid tribute to Tiglath-pileser III and Sargon II.

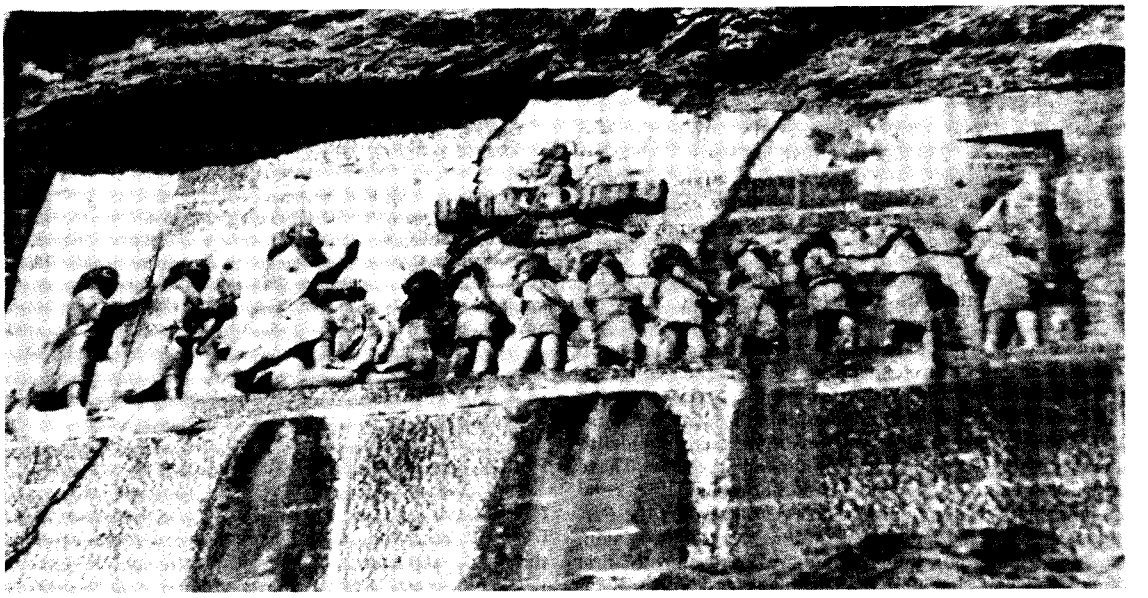
D. Median Kingdom. The Medes gradually consolidated their position, changing from tribal to village administration. Repeated attacks by Assyrians, Urartians, and Mannians forced them to unite in the 7th cent. B.C. The Median capital was ECBATANA (Hamadân), founded by Deioces or Dayakku according to Herodotus (i.98). Deioces had been taken to Assyria in 715 by Sargon II, and was subsequently exiled to Hamath in Syria. Phraortes or Khshathrita (675-653 B.C.), his successor, extended his control over the Persians to the southwest, but either in an attack on Nineveh against Ashurbanipal or in conflict with the Scythians, he lost his life. The SCYTHIANS dominated Media for twenty-eight years until they were defeated by the successor of Phraortes, Cyaxares or Uvakhshtra (653-585), who was a master of military strategy. In alliance with Nabopolassar of Babylon, and with the aid of Scythian mercenaries, he sacked Nineveh after a siege of several months. Babylon and Media shared equally in the spoils. A treaty was concluded, and Amytis, the granddaughter of Cyaxares, was married to Nebuchadrezzar II, son of Nabopolassar. It was for her that the "Hanging Gardens" of Babylon were built.

E. Achaemenians. The Persians moved from the area W and SW of Lake Urmia to Luristan, E of Elam, and finally to Parsa, where they settled. Their dynasty was founded by Achaemenes or Hakhamanish *ca.* 700 B.C. His successor, Teispes, was able to add Anshan to his kingdom. On his death his two sons were each given a share: Ariaramnes or Ariyaramna (*ca.* 640-590) received Parsa, and Cyrus or Kurash I (*ca.* 640-600) the western part, including Anshan. The first inscription of the Achaemenian family is attributed to Ariaramnes. On a gold tablet written in Old Persian cuneiform he calls himself king of Parsa, and describes Parsa as "a land of fine horses and good men." The son and heir of Cyrus I, Cambyses or Kanbujiya I (*ca.* 600-559), though still subordinate to the Medes, proclaimed himself "king of Anshan." Mandane, daughter of Astyages, was married to Cambyses, and to this union was born Cyrus II.

1. Cyrus. CYRUS became the vassal king of Anshan and ruled from Pasargadae. With the support of the Persian tribes and Nabonidus, Cyrus revolted against Astyages, his grandfather and Median overlord (549 B.C.). The Median army under Harpagus defected to Cyrus, and the army commanded by Astyages mutinied and handed him over to Cyrus. Media ceased to be an independent kingdom. Cyrus now was heir to Assyria, Syria, Armenia, and Cappadocia. He showed rare ability in blending diplomacy with military skill, tolerance, and wisdom. The Persians called him "father"; the Greeks respected him; the Jews saw him as "shepherd" and God's "anointed" (Isa. 44:28; 45:1). By all measurements he is one of the outstanding figures of the Achaemenian dynasty.

The demise of Media meant that Persia was in direct conflict with Babylonia. Nabonidus, however, concentrated on westward expansion. He built a palace at Tema in the Arabian peninsula and left Babylon under the control of his son Belshazzar. Cyrus turned his attention first to the north and west. Assyria and Cilicia yielded, Asshur and Haran were captured, and an indecisive battle was fought with Croesus of Lydia. Although winter was near, Cyrus pushed on to Sardis, which he took after a fourteen-day siege (547 B.C.). The subjugation of the Ionian Greek cities was accomplished by Harpagus in a three-year campaign.

The Persian empire now covered most of Asia Minor. The eastern frontiers were extended to include the Aryan tribes, Parthia, and the Bactrian tribes as far as Samarkand. Cyrus now was strong enough to deal with Babylonia. To protect his capital, Nabonidus had brought the images of most of the gods of Babylonia to Babylon. This alienated the priests, who were already at odds with him. Gobryas or Ugbaru, governor of Gutium and formerly an outstanding general of Nebuchadrezzar, defected to Cyrus. It was he who entered Babylon without battle on October 13, 539 B.C. The gods were returned to their proper temples and the various peoples were sent back to their respective homes, including the Jews to Judea. Cyrus, who ruled the greatest empire the world had known, died nine years later in a battle on the eastern frontier against the Massagetae.



2. Cambyses II. CAMBYSES II (529-522 B.C.), "king of Babylon" and eldest son of Cyrus, had been recognized already as regent. At the news of his father's death, he assumed the full titulary, "king of Babylon, king of lands." Almost immediately he prepared to invade Egypt. With the fall of Pelusium and Memphis, Egyptian resistance was broken, and Cambyses was acknowledged as king and legitimate pharaoh. Attempts to penetrate Nubia to the south and beyond Cyrenaica to the west were unsuccessful. The throne of Persia, in his absence, was seized by Gaumata, who pretended to be Smerdis or Bardiya, the younger brother whom Cambyses had secretly assassinated. Cambyses died under questionable circumstances on his way home (522 B.C.).

3. Darius. DARIUS (Daryavaush) son of Hystaspes (Vishtaspa), the satrap of Parthia, acted swiftly, and within two months Gaumata was taken prisoner and executed. Two years or more were required to deal with revolts throughout the empire. In commemoration of his victory, a huge bas-relief was cut in a high cliff above the old caravan route between Ecbatana and Babylon at the small village of Bisitun (BEHISTUN) on the plain of Kermanshah. Under the protection of Ahura-Mazda, who is depicted arising out of a winged sun-disk, Darius tramples underfoot the false pretender to the throne, while nine rebel leaders, fastened together with a rope around their necks, stand before him. The Behistun inscription, written in Old Persian, Akkadian, and Elamite, identifies Darius as "the great king, king of kings, king of Persia, king of countries, son of Hystaspes, grandson of Arsames, an Achaemenian," who gained his position with help from "Ahura-Mazda and the other gods."

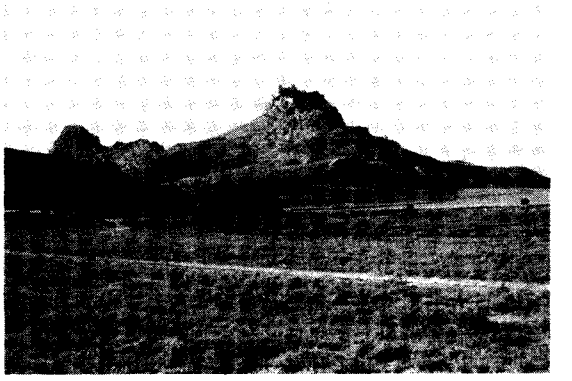
Darius was an excellent administrator, and he spent much of his energy on reorganization of the empire. Twenty satrapies under Persian officials were established. A military commander and a tax official, answerable directly to the king, were placed in each satrapy. Inspectors, called "the ears of the king," made periodic and unannounced visits. A network of roads was created to facilitate travel and communication. A new palace was built at SUSA (521 B.C.), and an entirely new capital was founded at PERSEPOLIS (518 B.C.). The extent of his campaigns in the east is unknown, but he claims to have extended his rule over the Scythians on the other side of the sea. By diplomacy and military action he reestablished control over the Greek cities of Ionia, but in his attempt to conquer the Greek mainland he was defeated at Marathon in 490 B.C.

Darius died in 486 B.C. Under him the Persian empire attained the height of its power and glory. He ruled from the Indus and Jaxartes rivers in the east to Egypt and the Aegean in the west, from the Persian Gulf in the south to the Caspian and Black seas on the north. Throughout the next century and a half (486-538) his successors were concerned with the preservation of the empire he had consolidated and organized.

4. Xerxes. Xerxes (the AHASUERUS of Ezra and Esther),

The Behistun bas-relief (W. S. LaSor)

who had gained experience as viceroy of Babylon, lacked the tolerance of his predecessor and treated harshly both Egypt and Babylon. He would have preferred to direct his energies toward building palaces and monuments, but the Greek problem would not go away. In 480 B.C. a Persian army accompanied by ships manned by Phoenician, Ionian, Egyptian, and Cypriot allies moved against Greece. A canal was dug through the isthmus of Sane to avoid the dangerous promontory of Athos. After a delay at Thermopylae, Thebes and Athens were taken by the Persians, but the Greeks inflicted a disastrous defeat on the Persian fleet at Salamis, then near Miletus, and again at Plataea and Mycale. Xerxes was forced to relinquish everything beyond Asia Minor. He was assassinated in his palace in 465 B.C.



5. Decline of the Empire. The three succeeding kings, ARTAXERXES I Longimanus, Darius II Ōchos, and Artaxerxes II Mnēmōn, managed to hold the empire together, more by the outlay of gold than by those positive qualities expected of kings. Artaxerxes III Ōchos was ambitious, ruthless, and brutal. He put down revolts and restored Egypt to the empire. After reigning for about twenty years (359-338), he was poisoned by Bogoas, who in turn was poisoned by Darius III Codomanus, the last of the Achaemenian kings and a distant cousin of Artaxerxes III. Darius might have restored the empire if he had not overestimated his own strength and underestimated the strength of Alexander, who defeated him in battle at Gaugamela or Arbela (331 B.C.). The Persian empire passed over to the Greeks.

F. Greeks. Alexander the Great quickly occupied the Achaemenian capitals of Ecbatana, Susa, and Babylon. Persepolis was looted and burned, perhaps in retaliation for Persian action against Greek cities. Some would call Alexander the last of the Achaemenians because he married Roxane, daughter of the Satrap of Bactria, a Sogdian chief, and coerced thousands of his troops into marrying Persian women at Susa. After the death of Alexander in 323 B.C., his empire was divided through conflict among his generals. Seleucus I Nicator fell heir to most of the territory of Persia, but the Seleucids held it for only a short time. The attempt to bring unity to the area failed,

Impression of an Achaemenian cylinder seal showing the royal hero (Darius?) standing on sphinxes and holding lions in a triumphant gesture (Cylinder Seal no. 824; The Trustees of the Pierpont Morgan Library)

The plain of Issus in Asia Minor. Here Alexander won a major battle over Darius and set the stage for the final battle at Gaugamela (W. S. LaSor)

and constant wars with other states and internal rivalry led to the weakening of the central authority and to the loss of the eastern satrapies, beginning with Bactria.

G. Parthians. The PARTHIANS probably belonged to the Parni tribe, one of a number of Scythian tribes which roamed the steppe country between the Caspian Sea and the Aral Sea. *Ca.* 250 B.C. they invaded Parthia, slew the local satrap, and set up their own dynasty under Tiridates, a member of the house of Arsacid. His successor, Artabanus I, suffered a defeat at the hands of Antiochus III, but Phriapatius (195 B.C.) capitalized on the Roman defeat of Antiochus and reconquered the provinces south of the Caspian Sea. Mithradates I, the true founder of the Parthian empire, greatly expanded his territorial control between 160 and 140 B.C., until, at the time of his death (*ca.* 137 B.C.), he ruled an empire stretching from the Euphrates to Herat. The Parthians felt themselves to be the restorers of the Achaemenian empire and adopted the title "Great King."

H. Sassanians. A movement even more closely identified with the Achaemenians originated in Parsa. These kings claimed to be descendants of the Achaemenians and rightful heirs to the empire. Their revolt against the Parthians in A.D. 224 led to a new dynasty, the Sassanian, named after Sassan, the grandfather of Ardashir, the first king. Ardashir defeated the Parthians and killed Artabanus V. Zoroastrianism became the state religion, and the Sassanians claimed from Ahura-Mazda the divine right to rule. The empire was strong enough to withstand and defeat the Romans and the Byzantines. They in turn fell to the Arab invasion in A.D. 642.

IV. Language.–Persian, both ancient and modern, is Aryan, a branch of Indo-European. It is closely akin to Vedic Sanskrit and Armenian. There were two main dialects in the ancient language: (1) that of the Persians (known from inscriptions of Achaemenian kings) and (2) that of the Medes (known from the *Avesta* and a few isolated words in Greek writers).

A. Old Persian. This dialect was used between 550 and 330 B.C., and consists of about 5800 words in one thousand lines of texts. With the exception of the inscriptions of Darius on his tomb and at Behistun, these are mainly repetitious statements about kingship and lists of peoples and places, so that fewer than five hundred different words are actually available. Evidence seems to point to the fact that Elamite was written in Elam (several thousand tablets from the archives at Persepolis) and Babylonian in Babylon, but in Persia Persian was written in Aramaic. A probable procedure at Persepolis is described by Ghirshman: "The order came in Persian from a high court official; the scribe translated it into Aramaic and wrote it on papyrus; the text was then passed to a second scribe, who translated it into Elamite and inscribed it upon a tablet" (R. Ghirshman, p. 164). Inscriptions in Persian are carved in a cuneiform script which consists of forty-four characters, of which seven are ideographs or contractions. The remaining signs are syllabic, consisting of a consonant and a vowel, except for the separate vowels. The text was written from left to right as are other cuneiform syllabaries. Cyrus the Great has left one sentence in Persian: *Adam Karush Khshayathiya Hakhamanishiya,* "I am Cyrus the King, the Achaemenian." There are several long inscriptions of Darius I (including one at Suez), a few of Xerxes at Persepolis, and some short ones of Artaxerxes I, Artaxerxes Mnēmōn, and Artaxerxes Ōchus. Modern Persian has developed from Achaemenian or Old Persian through Pahlavi and Dari.

B. Medic. This dialect is represented by the Avesta, the sacred books of the Zoroastrians. None of the original manuscripts has survived, and what is extant comes from a much later period. The Avesta is composed of three parts: (1) *Yasna,* which contains the hymns (*Gathas*) attributed to Zoroaster himself; (2) *Yashts,* which are hymns to various deities; and (3) *Videvdat* (law against demons), which contains moral precepts.

PERSIAN RELIGION. *See* RELIGIONS OF THE BIBLICAL WORLD: PERSIA.

PERSIANS (Ezr. 4:9, RSV). *See* APHARSITES.

PERSIS pûr'sis [Gk. *Persis*–'Persian woman']. A name used of freedwomen and especially of female slaves throughout the Roman empire but mentioned only once in the Bible (Rom. 16:12). She is greeted with two other female "workers in the Lord," Tryphaena and Tryphosa (perhaps twin sisters), but is accorded an eminence greater than theirs as "the beloved." The past tense (aorist indicative) *ekopiasen,* "who has worked hard," suggests an older lady who had done a considerable amount of Christian work. J. J. HUGHES

PERSON. In the RSV OT "person" most often represents Heb. *nepeš,* which occurs 755 times and has a broad range of meanings (including "throat," "breath," "soul," "living being," "[an individual's] life," etc.; see KoB, pp. 626-28; *see also* SOUL). The RSV renders it "person" about sixty-five times, most frequently in contexts of casuistic law (e.g., Ex. 12:15, 19; Lev. 7:20f., 27; 17:10, 12, 15; 18:29; Nu. 5:6; 9:13) and in enumerations of people (e.g., Gen. 46:18, 22, 25-27; Ex. 1:5; 12:4; 16:16; Nu. 31:40). (See Johnson, pp. 1-22; *TDNT,* IX, 620; *TWOT,* II, 589f.; H. W. Wolff, pp. 21f.)

In several instances "person" represents Heb. *'āḏām* ("mankind," "human being"), e.g., in passages where human beings are distinguished from animals of various sorts (Nu. 31: 28, 30, 47; Jonah 4:11; etc.). The expression *nepeš 'āḏām* is rendered "persons" in Nu. 31:35, 40, 46 and "persons of men" (referring to slaves) in Ezk. 27:13. Unlike *'āḏām,* Heb. *'îš* specifically denotes a man as opposed to a woman or child (Nu. 19:18; 1 S. 9:22; 22:18; 2 K. 10:6f., 14; Job 32:21). Because the face identifies a person and reflects that individual's disposition, Heb. *pānîm* (lit. "face") is often used to represent a person. The expression *nāśā' panîm* (lit. "lift up the face") means to show someone respect or favor (Dt. 28:50), and *pāneyḵā hōlᵉḵîm baqᵉrāḇ* (lit. "your face going into battle") means to go to battle "in person" (2 S. 17:11).

In some OT passages the RSV supplies "person" for a smooth translation where a corresponding Hebrew term is lacking (e.g., Lev. 27:4-8). In other cases it supplies "person" in rendering various Hebrew nouns (e.g., *negaʿ,* "disease," Lev. 13:4, 12, 17; *neṯeq,* "skin disease," 13:33; *negaʿ hanneṯeq,* v. 31) and adjectives (e.g., *ṭāhōr,* "clean," Nu. 19:19; *ṭāmē',* "unclean," v. 22).

In several NT passages the RSV uses "person" to translate Gk. *ánthrōpos* (Rom. 7:1; 1 Cor. 2:11; 7:26; Jas. 1:7; 1 Pet. 3:4). The term denotes "mankind" or "human being" as a species distinct from the animals and from God; fre-

quently it emphasizes the transitoriness of human life and the limited nature of human knowledge (*TDNT*, I, 364). In three passages "person" represents Gk. *psychē* (the usual LXX translation of Heb. *nepeš*; frequently rendered "life" or "soul" by the RSV): Acts 27:37 and 1 Pet. 3:20 use it in enumerations of people, and in Rom. 13:1 it simply refers to an individual person.

Most uses of "person" in the RSV NT, however, are supplied by the translators for smooth renderings of Greek pronouns (e.g., *tis*, "some," "a certain"; *toioútos*, "such"; *hékastos*, "each") and adjectives (e.g., *polloí*, "many"; *sebómenoi*, "devout"; *asebeís*, "ungoldly"). Two other terms are each translated "person" once: Gk. *ónoma* (usually "name") in Acts 1:15 (see Bauer, rev., p. 573) and Gk. *prósōpon* (lit. "face"; cf. Heb. *pānîm*) in 1 Thess. 2:17, where Paul contrasts his absence from his Thessalonian friends "in person" (*prosōpō*; cf. "face to face," v. 17b) to his presence with them "in heart" (i.e., in thought and concern). For the biblical concepts of personality, *see* ANTHROPOLOGY; PSYCHOLOGY.

For a survey of christological controversies from the patristic age to the present, *see* CHRISTOLOGY; CREEDS AND CONFESSIONS. For fuller discussion of the life and ministry of Jesus, *see* JESUS CHRIST. The aim of the present article is to discuss the identity of Jesus Christ on the basis of the NT writings and in the light of the controversies that this question has provoked.

I. History of Interpretation.–A. Creeds and Orthodoxy. Orthodox Christian beliefs concerning the person of Christ were defined by the creedal statements of the ecumenical councils of the 4th and 5th centuries. Leading up to these definitions were a series of involved controversies that variously interpreted Jesus in the light of the religious syncretism known as Gnosticism, ideas drawn from Jewish monotheism, and Greek philosophy. The formulations of the creeds must therefore be understood in terms of the questions that they were addressing and the language used in the debates of the times.

The Gnostics thought of Christ as the emissary of the supreme spiritual being, sent to bring redemption from the material, evil world. The Gnostic redeemer brought knowledge of the world of light. Gnosticism took numerous forms. (For the Gnostic texts and the views of the church fathers, see W. Foerster, *Gnosis* [Eng. tr., 2 vols., 1972-1974].) Jesus was sometimes seen as a righteous man who received power from above in order to elude the wicked creator of the material world and enable others to do the same. Others claimed that the Christ descended upon Jesus at His baptism, enabling Him to preach "the unknown Father." In Gnostic thought the Christ either temporarily inhabited a human body but left it before the crucifixion or merely assumed human appearance. Christian anti-Gnostic writers, like Irenaeus, Tertullian, and Hippolytus, replied by stressing the identity of the supreme God with the Creator, the goodness of creation, and the reality of the earthly life of Jesus, especially His crucifixion and resurrection.

One expression of the effort to safeguard monotheism is seen in the EBIONITES, a sect of Jewish Christians who believed that Jesus was the male offspring of Joseph and Mary on whom the Holy Spirit descended at His baptism. Also since the time of Novatian (*ca.* 250) the term Monarchianism has been used to describe two separate ways of stressing the unity of God ("monarchy") while maintaining the divinity of Christ (*On the Trinity*, 30). Dynamic Monarchianism or Adoptionism taught that Jesus was a man on whom descended the power (Gk. *dýnamis*) of God at His baptism. This power enabled Jesus to perform miracles. The resurrection and ascension of Jesus completed His elevation to divine status. Modalism or Sabellianism (so called after Sabellius) viewed God as a single reality who manifested Himself under different modes. Just as the light and heat of the sun were ultimately identical, so the Son and the Spirit were but different manifestations of the Father.

Philosophical ideas affected the teaching of the fathers in different ways. The Logos doctrine of the Apologists combined an appeal to the teaching of Jn. 1:1-18 concerning the Word (*lógos*) with the Stoic idea of the dissemination of Reason (*lógos*) in all things, particularly in human beings. Christ was thus the particular incarnation of "the true light that enlightens every man" (Jn. 1:9). The Logos that enabled Socrates to condemn demons "took form and became man and was called Jesus Christ" (Justin Martyr *Apol.* i.5). The Apologists saw a further analogy between the utterance of words and the Incarnation (cf. Justin *Dial.* 61; Tertullian *Adv. Prax.* 5). The spoken word was the expression of the speaker's mind. In a sense it was distinct from the speaker; yet at the same time it was the expression of the speaker himself. In making this point the fathers stressed that the uttered word was not a creature. They thought of it as the offspring of the one who spoke.

The Trinitarianism of Origen (*ca.* 185-254) was a reinterpretation of the Church's traditional faith in terms of the Middle Platonism that flourished in Alexandria (see esp. *De prin.* i and ii). The Father was God in a unique sense, but the generation of the Son was eternal and comparable with the brilliancy of the sun (*De prin.* i.2.4). But there were also hints of a subordination of the Son to the Father and the Spirit to the Son. Origen used the Platonic idea of the preexistence of the soul in order to explain the Incarnation. Whereas other souls fell in a premundane fall, the one soul adhered to the divine Logos with a perfect love, and as a reward became the soul of Christ (*De prin.* ii.6.3f.).

Subordinationism was carried to its logical conclusion by Arius, a presbyter of Alexandria, who accused his bishop, Alexander, of Sabellianism. Arius argued that since the Son was begotten by the Father, He must have been a distinct being and that there must have been (a time) when the Son was not. In other words, He was a

creature. The council of Nicea (325) was convened to settle the controversy, which threatened to split the Church and destroy the peace of the Roman empire. The council ultimately condemned Arius. Its creed stressed that Jesus Christ, the Son of God, was "begotten, not made, of one substance [Gk. *homooúsios*] with the Father." It also asserted the humanity of Christ, drawing attention to His birth, suffering, resurrection, and ascension.

The next half century saw numerous attempts to change and modify the Nicene Creed and with it the teaching of the Church. The Nicene position was stoutly defended by Athanasius and the Cappadocian Fathers from the standpoint of soteriology. Jesus had to be God in order to save and restore humankind. But He also had to be truly human, for what had not been assumed by Him could not be saved. Hence, He had to be fully God and fully man. Nicene orthodoxy finally triumphed at the Council of Constantinople (381). The creed known today as the Nicene Creed is actually the modified and strengthened form of the Creed believed to have been ratified by the Council of Constantinople.

In the 4th cent. the question of the divinity of Christ began to be overshadowed by that of the precise relationship of His divinity to His humanity. Two major schools of thought emerged. The School of Antioch stressed what has been called a Word-man Christology, which emphasized the reality of the two natures but left aside questions about the reality of their union. The Alexandrian School taught a Word-flesh Christology, which stressed the reality of their union but appeared to compromise the integrity of Christ's humanity. The Nestorians, who belonged to the Antiochene School, were accused by their Alexandrian opponents of teaching that there were two separate beings in the person of Christ. Nestorius's rejection of the term *theotókos*, "God bearing" or "Mother of God," which was applied to the Virgin Mary, was seen by the Alexandrians as an attempt to revive Adoptionism.

The Alexandrian School, on the other hand, gave rise to the heresies of Apollinarianism and Eutychianism. Apollinaris sought to explain the Incarnation by suggesting that, in the case of Jesus, the rational soul was replaced by the divine Logos. This helped to explain the single nature of Christ, His Virgin Birth, sinlessness, and supernatural powers. The orthodox pointed out, however, that such a Christ was not fully human since He lacked a human, rational soul. He could not therefore be the agent of salvation. "What has not been assumed cannot be restored; it is what is united with God that is saved" (Gregory of Nazianzus *Epistula* 101.7). Apollinaris was condemned at Constantinople (381). Eutyches taught an extreme version of the Alexandrian doctrine that Christ had one incarnate nature (*phýsis*). This echoed the teaching of Cyril of Alexandria, whose one-nature doctrine appeared to suggest a synthesis of the divine and human natures, but was intended to mean that Christ had one single, concrete existence. In the hands of Eutyches, it verged on a docetic Christology in which the human nature of Jesus was absorbed into the divine.

The *Tome* of Pope Leo (449) endorsed the condemnation of Eutyches and gave classical expression to the Christology of the Western Church. The *Tome* was accepted by the Council of Chalcedon (451) together with Cyril's letters to Nestorius and to the Easterns. The council reaffirmed the creeds of Nicea and Constantinople and also issued its own definition, which precluded the heresies of the rival schools and asserted that Jesus Christ was "of one substance with the Father as touching the Godhead, the same of one substance with us as touching the manhood, like us in all things apart from sin." While rejecting the confusion of the two natures, the council insisted that their distinction was in no way abolished because of the union, "but rather the characteristic property of each nature being preserved, and concurring into one Person and one subsistence [*hypóstasis*], not as if Christ were parted or divided into two persons, but one and the same Son and only-begotten God, Word, Lord, Jesus Christ." The council did not resolve the problem of Christology, but gave it more precise definition and stated the parameters of orthodox thought in terms of the questions that were being asked.

Throughout this period and afterward, orthodox theologians were concerned to stress the immutability and impassibility of God. This is reflected in the careful phraseology of Chalcedon that rejected the thought of change in the divine nature. Underlying this concern was the conviction that change implied imperfection, and therefore God could not be thought of as changing. Somewhat earlier the impassibility of God found vigorous defense in Tertullian's *Adversus Praxeam*, which accused Praxeas of teaching Patripassianism. The logical implication of Praxeas's Modalism is seen in the thought that the Father suffered on the cross. But Tertullian repudiated this. He allowed that Christ suffered only as a man; in His divine nature He did not suffer (*Adv. Prax.* 29).

The teaching of Chalcedon found general acceptance in the Western Church but its equation of "nature" with "substance" failed to satisfy not only the followers of Eutyches but also many followers of Cyril. Monophysitism, the doctrine that Christ had one nature, continued to flourish in the East, where many theologians equated "nature" with hypostasis rather than "substance." In the 6th cent. the anti-Monophysite theologian Leontius of Byzantium sought to interpret Chalcedon in the tradition of Cyril's Christology. His doctrine of Enhypostasia taught that the humanity of Christ did not have an independent *hypóstasis* or person. The one hypostasis is that of the divine Logos. The idea was further developed by John of Damascus (*ca.* 675-759).

Much of the terminology of the Western Church derives from Tertullian, whose use of Lat. *persona* helped to establish "person" as a term for a member of the "trinity" (a term that he also helped to establish). In early usage "person" did not carry with it the thought of personality and the overtones of self-awareness, rationality, will, and freedom. Rather it denoted an individual, i.e., that which individuates or gives concrete reality to a substance. Thus God has one substance which exists concretely in three persons. When applied to Christ, "person" concretizes the divine and human substances. In Greek theology the term that ultimately gained acceptance was *hypóstasis*. It denoted a mode of being (*trópos hyparxéōs*), not in the Modalistic sense of a temporary appearance but in the sense of a mode in which God was God.

Although Boethius (*ca.* 480-*ca.* 524) defined "person" as "the individual substance of a rational nature" (*Liber contra Eutychen et Nestorium* 3), the great theologians of the Western Church did not read into the term modern notions of personhood. It was a manner of speech that was not to be pressed. To Augustine, the formula of three divine persons had been coined not to give an explanation but to avoid remaining altogether silent (*De trin.* v.9). It served to show that the Father was not the Son, and the Spirit was neither the Father nor the Son (*De trin.* vii.4). To Anselm, God was "an ineffable plurality" and "an ineffable unity" (*Monologion* 38; 79). The three "persons" must on no account be thought of as three separate beings. To Aquinas, "divine person" signified "relation as something subsisting" (*Summa Theol.* i.29.4). Similarly,

PERSON OF CHRIST

Calvin defined "person" as "a 'subsistence' in God's essence, which, while related to the others, is distinguished by an incommunicable quality" (*Inst.* i.13.6). In other words, the great theologians of the Western Church repudiated tritheism. When they spoke of the trinity and the person of Christ, they did not have in mind a picture of three divine beings. When they spoke of the Incarnation, they did not picture one of the divine beings temporarily changing into a man or perhaps appearing in the guise of a man. Rather, there was an external threefoldness in God, and it was in His eternal and inseparable threefoldness that God was in Christ reconciling the world to Himself.

To the great theologians of the Western Church the discussion of these questions was not a matter of abstract speculation. It was bound up with a concern to worship God in truth and to understand the meaning of Scripture and the faith of the Church. It was further linked with a concern to approach the person of Christ from the standpoint of redemption and salvation. Anselm's *Cur deus homo* presented a classic account of the Incarnation on the grounds that God had actually to become a human being in order to save humanity. The Reformation preserved this emphasis. On the one hand, the ecumenical creeds of the Church were endorsed on the grounds that they could be proved by warrant of Scripture. On the other hand, the necessity of the Incarnation was defended in terms of mankind's need of God to become human in order to redeem humanity. The thought was further developed in terms of the three offices of Christ as prophet, priest, and king (*see* CHRIST, OFFICES OF).

B. Quest of the Historical Jesus. Already in the 16th cent. some cast doubt on Christian orthodoxy. In his writings on the trinity, M. Servetus (1511-1553) urged that biblical language concerning God, His Word, and His Spirit had been misunderstood. The Socinians denied the eternity of Christ and insisted that "God is but one person" (*Racovian Catechism* 3.1). Although OT prophecy applied to Christ, "it would not hence follow that he possessed a divine nature" (4.1). Such criticisms sought to undermine the orthodox understanding of the person of Christ, but it was not until the 18th cent. that the quest of the historical Jesus began in earnest.

It is customary to date the beginning of the quest from the publication by G. E. Lessing of some posthumous *Fragments of an Unknown Author.* The final Fragment was entitled "On the Intentions of Jesus and his Disciples" (1778). The piece was actually an extract from an unpublished manuscript by H. S. Reimarus (1694-1768), entitled *Apology or Defence of the Rational Worshipers of God.* In it Reimarus launched a full-scale attack on the Bible. He viewed Jesus as a Jewish reformer who had no desire to found a new religion. His preaching of the Kingdom of God embroiled Him in politics and led Him to an untimely death. Afterward the disciples invented the story that He had risen from the dead and that He would return in judgment. Thus the entire fabric of Christian beliefs is based on the fraudulent scheme of the disciples to perpetuate their situation. The work provoked great outcry, but it was not as original as has been often supposed. Reimarus himself was deeply indebted to English Deism, which he had come to know first hand in England a half century earlier. In the 1720's, Anthony Collins had attacked Christian claims that Jesus fulfilled OT prophecy, insisting that justification for those claims could be found only if prophecy were interpreted allegorically. Shortly afterwards Thomas Woolston ridiculed the Gospel miracles, especially the resurrection of Jesus, which he accounted for by the claim that the disciples stole the body of Jesus. D. Hume's celebrated essay, "Of Miracles" (*Enquiry Concerning Human Understanding* [1748], § 10), was an oblique attack on Christian truth-claims based on miracles. Since miracles were by definition violations of the laws of nature, they were self-refuting and no amount of historical testimony would suffice to establish them. By the time that Lessing published the *Fragments,* these ideas were well known in Britain and in Germany.

The Age of Enlightenment in the 18th cent. and the emergence of philosophical Idealism in the 19th cent. produced a climate of opinion that favored radical reappraisal of the person of Christ. The views of the Deists and Reimarus were themselves expressions of Enlightenment thought. The Age of Enlightenment found its culmination in the teaching of I. Kant (1724-1804), who maintained that metaphysical and theological questions must remain outside the scope of human reason. Kant effectively placed an embargo on theology except as a way of teaching practical morality. Kant's *Religion within the Limits of Reason Alone* (1793) presented Jesus (though without mentioning His name) as "the personified idea of the good principle" and a "wise teacher" of rational religion. Idealism, on the other hand, rejected the Christian theistic view of God's existence over and above the world. Hegel's *Phenomenology of Spirit* (1807) represented the world as the process of the self-determination of the Spirit. In Hegel's reinterpretation of Christianity, the death of Christ meant the death of the abstraction of the divine Being. The Incarnation was the embodiment of the Idea of the union of the absolute Spirit of humankind.

The theology of F. Schleiermacher (1768-1834) was in part an attempt to circumvent the embargo that Kant had placed on metaphysical knowledge. It was also a restatement of orthodoxy that avoided having to treat the Bible as propositional revelation. For Schleiermacher the essence of religion lay in the human awareness of being dependent. God was posited as the correlate of the sense of utter dependence, and sin was presented as man's attempt to be independent when he should be dependent. In place of the God-man of the Creeds, Schleiermacher depicted Jesus as a man who was like all others in His human nature "but distinguished from them all by the constant potency of His God-consciousness, which was a veritable existence of God in Him" (*Christian Faith* [2nd ed. 1830-1831; Eng. tr. 1928], no. 94, p. 385). As such Jesus was the sinless mediator of the consciousness of God. At the close of his work Schleiermacher called for a reappraisal of the traditional doctrines of the trinity and the person of Christ, which would avoid the problems that he felt were presented by terms like "person" and "nature" (no. 96, pp. 391-98). Schleiermaher was the first German theologian to lecture on "The Life of Jesus." His lectures were published posthumously in 1864 (Eng. tr. 1975). In the meantime, a steady stream of lives of Jesus had been published, ranging from the devotional and pious to the fictional accounts of K. F. Bahrdt and K. H. Venturini, which involved elaborate Essene plots to take over Jewish society. In 1828 H. E. G. Paulus had published his *Life of Jesus,* which was perhaps the most important rationalistic treatment. Paulus accepted the main outlines of the Gospel narratives but sought rationalist explanations for the miracles of Jesus. He explained the resurrection by suggesting that Jesus was not really dead and had revived in the tomb.

Such explanations were ridiculed by D. F. Strauss (1808-1874) in his *Life of Jesus Critically Examined* (1835-1836; Eng. tr. repr. 1972), which attributed the supernatural miracle working to the myth-making tendency in religion. In some ways Strauss anticipated the History of Religions school and the approach of form criticism. He

argued that the figure of Christ presented in the NT was the product of myth-making tendencies that viewed Jesus in terms of concepts taken from the OT and represented Him as the fulfillment of OT expectations. Although Strauss allowed for psychosomatic factors in the healings attributed to Jesus, he rejected the supernatural. Drawing on Hegelianism, he saw the beliefs of the early Church as the symbolic representation of the idea of the Absolute Spirit in history. But in his *New Life of Jesus* (1864), which was written on a more popular level, the Hegelianism was dropped and Jesus was presented as one of the great improvers of humankind.

Strauss's earlier work provoked considerable controversy, and ended his academic career. Even his former teacher at Tübingen, F. C. Baur (1792-1860), dissociated himself from Strauss, complaining that Strauss wanted to be critical without engaging in the critical inquiry that the NT writings demand. Baur's own approach was deeply influenced by his *Tendenz* Criticism, which appraised writings in the light of the tendencies that they displayed. He saw a fundamental conflict between Hellenistic Christianity led by Paul and Judaic Christianity led by Peter. Writings showing evidence of this conflict were dated earlier and those that did not were given a late date. Baur dated all four Gospels late. His understanding of the person of Jesus bore marked resemblance to that of Schleiermacher.

The mid-19th cent. saw numerous attempts to desupernaturalize Jesus and present Him as a strong religious personality or moral teacher. In France, E. Renan's *Life of Jesus* (1863) created the same kind of sensation that Strauss's work had done a generation earlier. Perhaps the nearest British counterpart was J. R. Seeley's *Ecce Homo* (1865). The theology of A. Ritschl (1822-1889) stressed the moral character of the Kingdom of God and the role of Christ in establishing it. In a similar vein, the great liberal church historian A. von Harnack maintained that Jesus' message was not concerned with Himself but with the kingdom of God and its coming, God the Father and the infinite value of the human soul, and the higher righteousness and commandment of love (*What is Christianity?* [Eng. tr. 1901], p. 51). In *Messianic Secret in the Gospels* (1901; Eng. tr. 1971), W. Wrede argued that the Gospels, especially Mark, present Jesus as deliberately concealing His messiahship and power until the close of His ministry. Wrede maintained that this was the work of the Evangelist and not of Jesus Himself, who did not claim to be the Messiah at all. The Gospels were thus a reading back into the life of Jesus of later beliefs about His person (cf. C. M. Tuckett, ed., *Messianic Secret* [1983]).

The History of Religions school, which flourished between 1880 and 1920, sought to interpret the Bible against the background of contemporary religions, which, they maintained, deeply influenced the ideas found in Scripture. In *Kyrios Christos* (1913, Eng. tr. 1970) W. Bousset (1865-1920) argued that the eschatological ideas underlying terms like "Messiah" and "Kingdom of God" came largely from other religions. He traced the title "Lord" to Hellenistic religion and saw the ascription of divinity to Jesus as the result of alien influences. Somewhat earlier, A. Schweitzer (1875-1965) wrote *The Quest of the Historical Jesus* (1906, Eng. tr. 1912), tracing the story from Reimarus to Wrede. He concluded that most of the scholars engaged in the quest to recover Jesus were guilty of turning Him into someone who corresponded to their own religious and moral ideas. The reason for this was that they had neglected eschatology. Schweitzer pictured Jesus as someone who preached the imminent coming of the Kingdom of God on earth and who saw Himself as God's messianic agent in bringing it about. Jesus' teaching was not to be spiritualized. It was, however, conditioned by an obsolete world view and mistaken in its expectations. Schweitzer ended his work on a mystical, existential note. Although we can find no designation that expresses what Jesus is to us today, those who obey His call will learn "as an ineffable mystery" who He is (p. 403).

In Britain H. P. Liddon's *Divinity of Christ* (1867) represented a major defense of orthodoxy. In contrast with the growing trend to stress Jesus' character as an individual man, the Catholic theologian John Henry Newman (1801-1890) urged in the manner of the early Alexandrian School that Christ should be thought of as man, rather than as *a* man. Christ's human nature had no personality belonging to it; His humanity was not substantive or independent. Rather, it was something possessed by the second person of the trinity, like an attribute or organ (cf. R. Strange, *Newman and the Gospel of Christ* [1981], pp. 43-67).

In response to the new ideas in philosophy and criticism, several attempts were made to modify and restate orthodoxy. The school of Mediating Theology followed Schleiermacher. Many of its members stressed the sinlessness of Jesus, but the movement also gave rise to a more speculative approach in the teaching of Richard Rothe (1799-1867) and I. A. Dorner (1809-1884). Dorner concluded his massive *History of the Development of the Doctrine of the Person of Christ* (1845-1846; Eng. tr., 5 vols., 1861-1863) with a statement of his own approach, which drew on philosophical ideas. He combined a dynamic view of God with the idea of Christ as the head and representative of mankind. The Incarnation was necessitated not by sin but by the loving self-communication of the trinity. Dorner, like other members of the school, was concerned with the true humanity of Christ and its growth and development. But it was his speculative system that gave his view a theological necessity.

The doctrine of KENOSIS proved to be one of the major battlegrounds of nineteenth-century theology. The term means "emptying" and alludes to the self-emptying of Christ referred to in Phil. 2:7 ("[He] emptied himself [*heautón ekénōsen*], taking the form of a servant, being born in the likeness of men"). The idea figured in post-Reformation and early evangelical piety in connection with Christ's state of humiliation during the period of His earthly life, as contrasted with the state of exaltation that began with His resurrection and ascension. Kenotic Christology gained increasing popularity in the 19th century. In *Christ's Person and Work* (3 vols., 1853-1861), G. Thomasius used kenosis to defend orthodoxy against the charges of critics like D. F. Strauss, who claimed that it was inconceivable that an omnipotent, omnipresent, and omniscient God could become incarnate in an individual human being. Thomasius's answer was that Christ emptied himself of these divine attributes during the period of the Incarnation, though He was divine in other respects. German kenotic Christology was popularized in the English-speaking world by A. B. Bruce in *Humiliation of Christ* (1876). Charles Gore used it to help explain why Jesus' views on the OT were different from those of modern scholars ("Holy Spirit and Inspiration," in C. Gore, ed., *Lux Mundi* [1889], pp. 230-266). In becoming man the second person of the trinity accepted the limitations of a genuinely human life. This meant that Jesus had to learn in the same way that others do, and that the scope of His knowledge was affected by the prevailing general state of knowledge. Thus Jesus could not be expected to have the same critical understanding of the OT that modern scholars have. In later writings Gore saw kenosis as a key to

understanding God's ways with human beings in general. God deals with them not in His omnipotence but with the same self-restraint that is exemplified in the Incarnation. The doctrine was further developed by P. T. Forsyth in *Person and Place of Jesus Christ* (1909) and H. R. Mackintosh in *Doctrine of the Person of Jesus Christ* (1912), both of which stressed a complementary growth and self-fulfillment alongside the self-limitation of Christ.

The advocates of kenosis saw themselves as moderate defenders of orthodoxy. Their aim was to defend the reality of the Incarnation against the criticism of those who saw Jesus as no more than a religious personality. But to more conservative theologians kenosis posed a threat to the very foundations of faith. If Jesus' knowledge was limited, could He not have been mistaken in other aspects of His teaching? If He was wrong about the authorship of certain books and believed in the historicity of people and events that modern critics deem unhistorical, could He not have been wrong in His teaching about the Kingdom, judgment, salvation, and the Father? If Jesus was limited in His intellectual knowledge, could He not also have been limited in other respects? Could the same argument be applied to the question of whether He was sinless?

Advocates of kenosis drew attention to the obvious facts concerning Jesus' humanity as depicted in the Gospels. He ate, drank, slept, wept. He "increased in wisdom and in stature, and in favor with God and man" (Lk. 2:52). He was repeatedly tempted but did not succumb. He confessed that not even the Son knew the hour of Parousia (Mk. 13:32). He was clearly not omnipresent. Nor did he avail Himself of divine omnipotence either in the temptations recorded in Mt. 4 and Lk. 4 or in meeting His opponents.

Nevertheless, kenosis is open to serious objections. It has been criticized for treating the divine attributes of omnipotence, omnipresence, and omniscience as if they were optional extras that God could readily dispense with. But since these attributes constitute the being of God, without them God would not be God. As E. L. Mascall has pointed out, kenoticism is a kind of inverted Monophysitism (*Christ, the Christian and the Church* [1946], p. 12): in ancient Monophysitism the divine nature of Christ absorbed the human; in kenoticism, the human nature of Christ absorbs the divine. Moreover, kenoticism raises the question of what became of the cosmic functions of the second person of the trinity during the period of the Incarnation. Scripture identifies Him not only as the Creator but as the sustainer of the universe (Jn. 1:1-5; He. 1:1-3). If He emptied Himself of the divine attributes, how was the world sustained during the Incarnation? In reply to this question, the advocates of kenosis questioned the feasibility of the idea that Christ retained these cosmic functions during His earthly life, especially during His infancy and childhood.

The conflicting alternatives seem to present an insoluble dilemma. But the dilemma rests on certain misconceptions. As William Temple observed, "All these difficulties are avoided if we suppose that God the Son did indeed most truly live the life recorded in the Gospel, but added this to the other work of God" (*Christus Veritas* [1924], p. 143). Kenosis mistakenly assumes that the humanity of Jesus functioned like a receptacle in which the second person of the trinity had to be contained, so that what could not be thus contained must somehow be abandoned. Temple's reply is consistent with the teaching of Athanasius, Augustine, and classical theologians down the ages. In Reformed theology this position came to be known as the *Extra Calvinisticum*, which insisted upon the activity of the Word outside the Incarnation as well as within it. As Calvin pointed out, "Even if the Word in his immeasurable essence united with the nature of man into one person, we do not imagine that he was confined therein" (*Inst.* ii.13.4, *LCC*).

It may well be that the debate about kenotic Christology presupposed an essentially tritheistic view of God that treated the three divine persons as separate individual beings. It thus gave rise to the problem of how God could function as God if one of the three divine beings virtually ceased to function as such for a period of time. The problem suggests the need for a more adequate model for understanding the trinity. Related to this is the question of how far Jesus was conscious of His divine person and powers. W. Sanday suggested an approach using the psychological concept of the unconscious mind (*Christologies Ancient and Modern* [1910]; *Christology and Personality* [1911]). He suggested that the seat or locus of all divine indwelling and divine action upon the human soul is the subliminal consciousness. Thus, Jesus as a man was consciously aware only of what the Father chose to bring into His conscious mind.

The question of kenosis and the interpretation of Phil. 2:5-11 continues to be keenly discussed (see R. P. Martin, *Carmen Christi* [2nd ed. 1983]). The passage is widely thought to be a hymn cited by Paul, and perhaps composed by him, to which he appeals as a model for Christian behavior. It may be, however, that v. 7 is not a description of the Incarnation but an allusion to the death of Christ using the language of Isa. 53:12, where the Servant is said to have "poured out his soul to death." The passage may also reflect the temptations of Jesus (Mt. 4:1-10; Lk. 4:1-12), which turn on His being addressed as the Son of God. Jesus renounced the misuse of divine power and chose the role of the obedient servant that led to the cross. If this is so, the passage would have nothing to do with the metaphysical speculation of kenotic Christology.

One of the most important nineteenth-century contributions to Christology came from the Danish philosopher Søren Kierkegaard (1813-1855), whose thought became more widely known only through twentieth-century translations of his writings. Kierkegaard is frequently represented as a pioneer existentialist who had a minimal belief in the historicity of Jesus and who was more concerned with existential response than with historical truth. But close study of works like *Philosophical Fragments* (1844), *Concluding Unscientific Postscript* (1846), and *Training in Christianity* (1850) show that this is a misconception. Kierkegaard did not question the historicity of the NT, but his main concern lay in grasping the implications of the transcendence of God for philosophy, theology, and daily life. God's transcendence means that God is wholly other: He is not an object in time and space or a being alongside other beings. But this means that, even in revelation, God remains transcendent and therefore hidden, for divinity cannot be transformed into an object that can be perceived by the senses. When people saw and heard Jesus, they saw a man. In the Incarnation God appears *incognito*. There is an absolute paradox, because the very act of divine self-revelation involves an act of self-veiling. In order to unveil Himself to mankind, God has to veil Himself in human form. Since our human language is the language of time and space, the relationship between our language and God can be only an indirect one. Basically Kierkegaard was maintaining an orthodox view of Christ without using the vocabulary of orthodoxy. He was wrestling, on a level much deeper than that of his contemporaries and successors, with the implications of divine transcendence for the Incarnation and Christian living.

C. Contemporary Debate. The 20th cent. has witnessed widely divergent interpretations of the person of Christ.

PERSON OF CHRIST

Karl Barth (1886-1968), notably in his multi-volume *Church Dogmatics,* attempted a monumental reinterpretation of theology in terms of Christology. In response to theological liberalism, Barth presented Christ as the sole mediator of revelation (cf. Mt. 11:27; Jn. 1:1-18; 14:1-11; He. 1:1-5). As the Word incarnate, Christ is God's word to man. In order to be God's Word, He had to be divine. This led Barth to a doctrine of the trinity, grounded in revelation, in which the Word was the objective reality and the Spirit the subjective reality of the Father's self-revelation. In the later volumes of the *Church Dogmatics* Barth came to view the Incarnation as the key to God's own person, the creation, and reconciliation. On the basis of the union of God and man in the person of Jesus Christ, Barth posited a covenant between God and all mankind. For the sake of this union the creation had come into being. This idea led Barth to a doctrine of double predestination in which Christ was the elect for all and the reprobate for all. Although Barth did not acknowledge that universalism was the logical outcome of his position, many of his readers saw no other alternative.

Barth's contemporary, Rudolph Bultmann (1884-1975), adopted a radically different view. Using the tools of form criticism and the History of Religions school, Bultmann came to the conclusion that it was impossible to know what Jesus was like. One could know only that He had existed. In his programmatic essay, "NT and Mythology" (1941; Eng. tr. in H. W. Bartsch, ed., *Kerygma and Myth* [1953], pp. 1-44), Bultmann argued that the entire thought world of the NT was mythological, the sources of the myths being Jewish apocalyptic and Gnosticism. This thought world was obsolete and unacceptable to modern minds, and thus to make way for the true offense of the gospel the NT needed to be demythologized. The preaching of the cross and resurrection of Christ (which could not be demythologized) presented men and women with the possibility of understanding themselves and entering into an authentic existence in which they were liberated from the quest for tangible security.

Paul Tillich (1886-1965) drew on the critical work of Schweitzer and Bultmann, but made his own restatement of nineteenth-century Idealism. He rejected a theistic view of God in favor of an immanent Ground of Being. Tillich's *Systematic Theology* (3 vols., 1951-1963) viewed humanity as alienated from the Ground of its Being. The Christ was the symbolic figure who had overcome this alienation and was thus, as the Bearer of the New Being, able to mediate reconciliation to others.

At present there is considerable dissatisfaction with the conclusions of Barth, Bultmann, and Tillich. Barth's dogmatic thought made much of the Incarnation but showed less interest in the purely historical Jesus. Tillich's views were bound up with his existential ontology, which now appears equally remote from the concerns of contemporary philosophy and of the Christian Church at large. Subsequent scholarship has reversed Bultmann's view that the NT idea of Christ as a heavenly redeemer was drawn from Gnosticism. Bultmann's sources were all considerably later than the NT, and it is now apparent that the Gnostic idea was derived from Christianity. Several of Bultmann's students came to think that their teacher was much too skeptical with regard to the historical Jesus. Their own work has given rise to what has been called a new quest of the historical Jesus (see James M. Robinson, *A New Quest for the Historical Jesus and Other Essays* [1983]). The philosophical questions raised concerning myth and the interpretation of language have given fresh impetus to the discipline of hermeneutics (see A. C. Thiselton, *Two Horizons* [1980]).

Ever since the English Deists, repeated attempts have been made to compare Jesus with the so-called "divine men" of the ancient world in order to show that Jesus was really a figure like Apollonius of Tyana or other holy men (cf. L. Bieler, THEIOΣ ANHP [2 vols., 1935-1936; 1 vol. repr. 1967]). Some have detected different Christologies in the NT and have represented the Gospel of Mark, with its emphasis on the suffering Son of man, as an attempt to combat the wonder-working "divine man" Christology attributed to the disciples (cf. T. J. Weeden, *Mark—Traditions in Conflict* [1971]). In the 1979 reprint of his work, however, Weeden himself acknowledged the inadequacy of the "divine man" concept. Recent research has shown that the term "divine man" (*theîos anêr*) did not necessarily imply the divinization of a holy man and was not associated with miracle-working (D. L. Tiede, *Charismatic Figure as Miracle Worker* [1972]; C. R. Holladay, Theios Aner *in Hellenistic-Judaism* [1977]). The figure of Apollonius continues to be the subject of research. He is thought to have lived in the 1st. cent. A.D. Philostratus's *Life of Apollonius* iv.45 tells of an event that invites comparison with Lk. 7:11-17. Although many have suggested that the *Life of Apollonius* affords evidence for widespread belief in the wonder-working powers of holy men in the ancient world, the work itself is evidently a piece of anti-Christian polemic, commissioned by the Empress Julia Domna in order to foster the cult of Apollonius as a rival to Christianity (cf. J. Ferguson, *Religions of the Roman Empire* [1960], pp. 181-183). Thus the historical value of the work is open to serious doubt.

In *Jesus the Magician* (1978) Morton Smith revived the ancient accusation that Jesus was really a magician, maintaining that the "official portrait" of Jesus in the Gospels was really propaganda designed to cover up the truth. Smith's case bears a marked resemblance to that of the Jewish leaders who accused Jesus of casting out demons by Beelzebul (Mk. 3:22; Mt. 12:24; Lk. 11:15). Contemporary Jewish scholarship, however, is inclined to take a more positive view of Jesus. G. Vermes depicted Jesus as a Galilean charismatic who clashed with the more formal religion of the Pharisees (*Jesus the Jew* [1973]). Other Jewish writers have sought to give recognition to Jesus while denying the Christian ascription of divinity to Him (cf. Hagner, *Jewish Reclamation of Jesus*).

Various writers have attempted to interpret Jesus as a political revolutionary. In *Jesus and the Zealots* (1967) S. G. F. Brandon saw connections between Jesus and the Zealot movement in its struggle for liberation from Roman rule. Liberation theology has called for a thorough reappraisal of Christology with the aim of stressing Christ's role as a social and political reformer who called into question the oppressive structures of society (cf. Sobrino, *Christology at the Crossroads;* L. Boff, *Jesus Christ Liberator* [1978]; J. Andrew Kirk, *Liberation Theology* [1979]). In *The Crucified God* (1974) J. Moltmann stressed God's identification with suffering in and through Christ and the importance of this for the Church's understanding of God and of its role in the world. The attempts to turn Jesus into a political revolutionary have been refuted by A. Richardson (*Political Christ* [1973]) and M. Hengel (*Was Jesus a Revolutionist?* [Eng. tr. 1971]; *Victory over Violence* [Eng. tr. 1973]; *Christ and Power* [Eng. tr. 1977]; *Charismatic Leader and His Followers* [Eng. tr. 1981]). Nevertheless, the social and ecclesial implications of Christology remain a vital concern.

An attempt to reinterpret the person of Christ in terms of Process Theology has been made by D. R. Griffin in *A Process Christology* (1973). From the Roman Catholic standpoint, E. Schillebeeckx has attempted contemporary

restatements in *Jesus: An Experiment in Christology* (1979) and *Christ: The Christian Experiment in the Modern World* (1980). In *Jesus the Christ* W. Kasper provided a Catholic statement along more traditional lines. The most radical British Protestant account of the person of Christ appeared in *Myth of God Incarnate*, ed. J. Hick (for replies, cf. E. M. B. Green, ed., *Truth of God Incarnate* [1977]; Goulder, ed., *Incarnation and Myth: The Debate Continued*). Hick and his colleagues questioned whether the whole idea of Incarnation was not obsolete and irrelevant. They asked whether belief in Christ's divinity was not the product of the mythical thinking of later Christians, and they suggested parallels with the deification of the Buddha. When stripped of the alleged myths, Jesus emerged as a great humanitarian.

A significant alternative to such skepticism was provided a generation earlier by D. M. Baillie in *God Was in Christ* (1948). Baillie emphasized the need to think of Jesus as a man in the fullest sense of the word. He was also deeply impressed with the emphasis that Barth, Brunner, and Bultmann placed on revelation. But he refused to divorce revelation from God's actions in the earthly life of Jesus, which he believed to be the revelation of God to mankind. The works of Jesus were the works of the Father (cf. Jn. 5:19, 30; 14:10; cf. 2 Cor. 5:19). As a model for understanding the Incarnation, Baillie put forward the Christian's experience of the paradox of grace, in which the believer is aware of being both human and responsible and, at the same time, the recipient of God's free grace. Jesus remained fully human but was also aware of the Father's presence in His life. Baillie drew attention to NT passages that stressed the kinship of Jesus with believers (Jn. 17:20-26; 20:17; Rom. 8:29; Col. 1:18; He. 2:11), but he repudiated any suggestion that anyone could be a Christ if he or she were so minded. The Incarnation depended solely on divine initiative. At the same time, Baillie's account of the Incarnation leaves the impression of a veiled unitarianism. Although he alludes to the trinity, he appears to see this simply as the Church's way of speaking of its experiences of God. In the end it is the Father Himself who is Incarnate in Christ. Baillie's Christology was ultimately a restatement of Schleiermacher's basic position.

A most significant statement of Christology appeared in Pannenberg's *Jesus — God and Man*. Pannenberg described the traditional approach as Christology "from above" because of its attempt to view Christ from God's perspective. Christology "from above" tends to be docetic and lacking in interest in the human person of Jesus and His historical background. But since we are earthly, historical beings, we need to discover reasons in history for our christological confession. Pannenberg proposed a Christology "from below" that would avoid presuppositions of divinity and begin with the historical activity of Jesus. He saw Jesus as standing in the apocalyptic tradition and as one for whom the kingdom of God was the single pulsating reality.

Pannenberg accepted the views of German NT scholars who denied that Jesus applied to Himself such christological titles as Son of man, Son of God, Christ, and Lord. Only in retrospect were these titles seen to apply truly to Him. Jesus was concerned with actualizing the kingdom of God, which became a present reality in Him. He was put to death for blasphemy, but the real blasphemy was that of His opponents. In a real sense, Jesus died in their place. The resurrection is God's vindication of Jesus. As such it establishes God's essential unity with Jesus from the beginning. In retrospect it can thus be seen that Jesus was God and Man. Pannenberg disliked the traditional language of the two natures of Christ and preferred to say that He was truly God and truly man. Pannenberg's approach, like that of D. M. Baillie, raises questions about the reality of the trinity, and it may be asked whether, after all, his approach is not essentially a restatement of Schleiermacher's basic approach to Christology.

Moreover, it may be doubted whether a Christology "from below" is truly viable. Pannenberg's Christology was not consistently "from below." With the resurrection of Jesus he invoked divine validation of Jesus "from above." Although he discounted the transcendent implications of concepts such as Son of God and Christ, he gave a central place to the kingdom of God — another concept "from above." The "blasphemy" for which Jesus was condemned clearly has a divine reference and thus expresses a value judgment "from above." In short, Pannenberg did not expunge all transcendent concepts from his account of Jesus' life before the Resurrection. He appears to have been arbitrary in those that he accepted and those that he rejected. Moreover, it must be conceded that even after the Resurrection the Church remains as much "below" as before. The problem of the transcendent in history cannot be solved in the simplistic way that Pannenberg suggested. Jesus' earthly ministry, no less than the Resurrection itself, raises transcendent, theological questions, and it is arbitrary to impose on this period a historical frame of reference that precludes from recognition the very features that indicate the action and presence of God in Christ.

Whereas Baillie and Pannenberg pose the question of whether it is ultimately the Father who became incarnated, "Spirit Christology" raises the question of whether it is the Spirit who became incarnate in Jesus. In Lampe's *God as Spirit*, "Spirit" appears to be a synonym for God, thus giving his Christology a unitarian stamp. The question is more open in the work of Dunn, *Jesus and the Spirit* and *Christology in the Making*. In His earthly ministry, Jesus is the recipient of the Spirit; thereafter He is the bestower of the Spirit. Dunn stressed the role of the Spirit in Jesus' baptism and subsequent ministry. After the Resurrection and Ascension the Spirit is the Spirit of Christ and, as such, the medium of God's presence in the Church.

II. Method in Interpretation.—It is apparent from the above survey that one's views about the person of Christ are vitally affected by one's presuppositions and method of approach. Much depends upon whether the Gospels are treated as history or are regarded as relatively late, culturally conditioned expressions of the faith of the early Church. Many NT scholars whose views of the historical value of the Gospels are not so pessimistic as Bultmann's are nevertheless influenced by his criteria in their redaction criticism. Thus, R. H. Fuller observes, "As regards the sayings of Jesus, traditio-historical criticism eliminates from the authentic sayings of Jesus those which are paralleled in the Jewish tradition on the one hand (apocalyptic and Rabbinic) and those which reflect the faith, practice and situations of the post-Easter church as we know them from outside the gospels" (*Foundations of NT Christology*, p. 18; cf. N. Perrin, *Rediscovering the Teaching of Jesus* [1967], pp. 42f.; R. Bultmann, *History of the Synoptic Tradition* [Eng. tr. 1963], p. 205). To these two criteria a third is frequently added. Authentic sayings of Jesus should be "conceivable as developments within Palestinian Judaism" and "use its categories, and if possible reflect the language and style of Aramaic" (Fuller, p. 18). But to many scholars, such criteria now seem to be virtually valueless (cf. R. T. France, "Authenticity of the Sayings of Jesus," in C. Brown, ed., *History, Criticism,*

and Faith, pp. 101-142). The first criterion presupposes that Jesus could have had nothing in common with Jewish tradition; the second presupposes that His teaching and practice could have had nothing in common with that of the post-Easter Church; the third not only appears to contradict the first but also rules out sayings and words that have been translated into idiomatic Greek.The use of such criteria in the historical investigation of the person of Christ inevitably calls into question the results of the research.

Many scholars who have used such methods have professed to discover an evolution of Christology within the NT. Thus, the later writings are said to contain a deified Christ who is worshiped as divine, whereas the historical Jesus is presumed to have been a prophetic figure with an apocalyptic message of the Kingdom. Jesus' titles — e.g., Son of Man, Son of God, Christ, and Lord — are thought by some scholars to have been applied to Him retroactively by the post-Easter Church (cf. H. E. Tödt, *Son of Man in the Synoptic Tradition* [Eng. tr. 1965]; F. Hahn, *Titles of Jesus in Christology*). On the other hand, scholars like O. Cullmann (*Christology of the NT*) and C. F. D. Moule (*Origin of Christology*) have seen a development (implying an essential continuity) rather than an evolution (implying a change from one species into another) within the NT. Despite his espousal of the above-mentioned criteria, R. H. Fuller also recognizes a direct line of continuity between Jesus' self-understanding and the Church's christological interpretation of Him. A similar approach may be noted in M. Hengel, *Son of God*.

Many questions pertinent to understanding the person of Christ lie outside the scope of this article. Among them are the date and composition of the NT writings. One's view of these matters clearly affects how one interprets what these writings say about Christ. The account that follows must eschew such questions, however, and confine itself to an analytic description of the person of Christ as found in various NT writings. The synoptic Gospels are treated first, not because they were necessarily written before the other NT writings, but because they give an account of Jesus' life and ministry.

A detailed examination of the titles of Jesus likewise falls outside the scope of this article. But because one's interpretation of the titles significantly affects one's view of the person of Christ, some account of them must be given here. In the past it has frequently been assumed that "Son of Man" refers to Jesus' humanity and that "Son of God" implies His divinity. Thus, to prove Christ's divinity it was necessary to show that the title Son of God fitted Him and that Jesus Himself used the title as a claim to divinity. But this procedure is an anachronistic oversimplification. Even within the NT, SON OF GOD is not necessarily a divine title. Adam is called "the son of God" in Luke's genealogy of Jesus (Lk. 3:38). Hos. 11:1 (cited in Mt. 2:15) alludes to the nation of Israel as God's son. Nathan's prophecy to David contains God's promise to David's successor: "I will be his father, and he shall be my son" (2 S. 7:14). The passage occurs in a collection of testimonies at Qumrân (4QFlor 10f.). In Ps. 2:7 the king is addressed: "You are my son, today I have begotten you" (cited in Acts 13:33; He. 1:5; 5:5; cf. 2 Pet. 1:17). This passage is the source of the identification of Jesus with God's Son by the Bath Kol (voice from heaven) after Jesus' baptism (Mk. 1:11; Mt. 3:17; Lk. 3:22; cf. Jn. 1:34). The Bath Kol also identifies Jesus with the chosen servant in whom God delights (Isa. 42:1; cf. also Mt. 12:18-21). In the light of these contexts the title Son of God is not first of all an expression of personal divinity but a designation of messianic kingship.

The title SON OF MAN has provoked considerable discussion in recent years (in addition to the works of Tödt, Hahn, Cullmann, and Moule already noted, see F. H. Borsch, *Son of Man in Myth and History* [1967]; *Christian and Gnostic Son of Man* [*SBT*, 2/14, 1970]; R. N. Longenecker, *Christology of Early Jewish Christianity* [*SBT*, 2/17, 1970]; F. J. Moloney, *Johannine Son of Man* [1976]; A. J. B. Higgins, *Jesus and the Son of Man* [1964]; *Son of Man in the Teaching of Jesus* [1980]; M. Casey, *Son of Man: The Interpretation and Influence of Daniel 7* [1979]; M. D. Hooker, *Son of Man in Mark* [1967]; F. F. Bruce, "Background to the Son of Man Sayings," in Rowdon, ed., *Christ the Lord*, pp. 50-70; Moule, *Essays in NT Interpretation*, pp. 75-90; Kim, *"The 'Son of Man'" as the Son of God*; Lindars, *Jesus Son of Man*). Interpretations range from claiming that Son of Man is nothing more than a circumlocution for "I," or that it is deliberately vague, to suggesting that it denotes a supernatural, apocalyptic figure (thought to be found, e.g., in 1 En. 37–71). Many, including the present writer, find in Dnl. 7 an essential clue to the meaning of the term in the Gospels. In Dnl. 7 the figure of the Son of Man represents either the saints of the Most High (e.g., the people of Israel) or the angelic guardian of the saints. The figure is vindicated and given an everlasting dominion after withstanding the attacks of the enemies of the Ancient of Days. The figure of the Son of Man in 1 Enoch is clearly an elaboration of the picture in Daniel.

A characteristic feature of the Son of Man sayings in the Gospels is the word "the." Jesus speaks of Himself as "the" Son of Man. C. F. D. Moule makes the fruitful suggestion that for Jesus the title describes His vocation. Jesus saw Himself as the one called to be the Son of Man as described by Daniel. If this is so, He may have been assuming the role of the saints who were summoned to remain faithful to Yahweh and who would ultimately be vindicated; alternatively, He may have been saying that it was He Himself, not an angelic being, who was the guardian of Israel. This latter point might explain why the writer to the Hebrews was at pains to distinguish between Jesus and the angels, pointing out the superiority of the Son (He. 1–2).

The title may well have further overtones. In Ezekiel the prophet is frequently addressed as "son of man." He too was summoned to be Yahweh's loyal representative in a time of trial and upheaval (Ezk. 2:3; 3:4-11). He was called to consume the Word of God and then declare it (3:1-11). He was filled and led by the Spirit of God in his vocation (2:2; 3:12, 14, 24, etc.). Moreover, the punishment of the house of Israel is laid upon him (4:4). Both Ezekiel and Daniel are set in the exilic period from which they both ultimately derive.

Finally, the title Son of Man points back to Adam. In biblical Hebrew *'ādām* denotes Adam and is the ordinary word for "man." Originally Adam, or mankind as the image of God, was given dominion over the earth (Gen. 1:26-30; cf. Ps. 8). The Israelites traced their descent to Adam, who figured a great deal in intertestamental literature (on this and Adam in the NT, see Dunn, *Christology in the Making*, pp. 98-128). There may well be in the title Son of Man a hint that the Son of Man is the true descendant of Adam (cf. Lk. 3:38), to whom therefore dominion is given. If this is so, there is a convergence of meaning in the titles Son of God and Son of Man. Both indicate Yahweh's appointed righteous servant to whom is given authority to reign over the earth. Two further titles applied to Jesus may point in the same direction. The title "image of God" is best interpreted as meaning God's representative to whom is given stewardship and authority over the

earth (cf. D. J. A. Clines, *Tyndale Bulletin*, 19 [1968], 53-103). The title "Christ" (Gk. *christos*) or "Messiah" (Heb. *māšî[a]ḥ*) means "the anointed one." Prophets (Ps. 105:15; 1 K. 19:16; 1QM 11:7f.; CD 2:12; 6:1; etc.) and priests (Ex. 40:13; Lev. 4:3, 5, 16; 6:22; Zec. 4:14; possibly Dnl. 9:25f.; 1QS 9:11; etc.) were anointed. But anointing was also associated with kingship, the anointed son of David, and in turn kingship figured in political messianism (1 S. 10:1; 15:1; 16:13; Isa. 9:6f.; 11:1-10; 45:1; Jer. 23:5f.; Ezk. 34:23f.; Ps. Sol. 17–18; Eighteen Benedictions; cf. G. Vermes, *Jesus the Jew* [1981], pp. 129-159). In the Testaments of the Twelve Patriarchs, the Messiah was seen as prophet, priest, and king (T. Reub. 6:7-12; T. Levi 8:14; T. Jud. 24:1-3; T. Dan 5:10f.; T. Jos. 19:8-12). If the messianic concept was fairly open in Jewish thought generally, kingly motifs predominated in the expectation of Palestinian Judaism. The title Son of David may well have been only a more specific synonym for the messianic Son of God.

In and of itself the title MESSIAH or Christ does not necessarily imply divinity. It means "the anointed one." But this raises the question: By what and by whom is the Christ anointed? As we shall see below, the NT writers leave no doubt that they believe it was God Himself who anointed Jesus in such a way that God was personally identified with Jesus. The title LORD is also ambiguous. It could be used as a polite form of address without any divine connotations (e.g., Mt. 21:30 [RSV "sir"]; Mk. 7:28). But it was also a title for God. The LXX uses *kýrios* ("Lord"), following the Hebrew avoidance of speaking the divine name (Heb. *yhwh*). The use of Aram. *marána thá* ("Our Lord, come") in 1 Cor. 16:22 (cf. Rev. 22:20) suggests that this was a prayer used from the early times in the Aramaic-speaking churches. The title was not generally applied to Jesus during His earthly ministry, though Mt. 7:21f.; 22:34-46; Mk. 12:35-37 (cf. Ps. 110:1) allude to His Lordship. The Lordship of Jesus was asserted by the early Church in view of His resurrection (Acts 2:36; Rom. 1:4; 14:9; Phil. 2:10f.), which demonstrated His cosmic Lordship (1 Cor. 8:6; Col. 1:15-20). Probably the earliest Christian confession was the formula "Jesus is Lord" (Rom. 10:9; 1 Cor. 12:3; Phil. 2:11).

III. Synoptic Gospels.–A. Mark. The theme of Jesus' messianic sonship is central to Mark's Gospel. It figures in the opening title (Mk. 1:1). Peter's confession of Jesus as the Christ (8:29) forms a climax to Jesus' public ministry. It is followed by the transfiguration and God's acknowledgment of Jesus as "my beloved Son" (9:7). At Jesus' trial the high priest asks Him, "Are you the Christ, the Son of the Blessed?" (14:61). The question clearly links the concept of the Christ with that of the Son of God ("the Blessed" is evidently a circumlocution for the divine name). Jesus not only answers affirmatively but also identifies the Christ and Son of the Blessed with the Son of Man, using the imagery of Dnl. 7:13: "I am; and you will see the Son of man sitting at the right hand of Power, and coming with the clouds of heaven" (Mk. 14:62). After Jesus' death the centurion confesses, "Truly this man was a son of God" (15:39).

The theme of messianic sonship is linked with other themes. Peter's confession is followed by Jesus' prediction of His suffering, death, and resurrection (8:31-33). The Transfiguration is followed by similar sayings (9:9-13). Jesus responds to James's and John's desire to sit at His right and left hands in glory by speaking about His baptism and reminding them that "the Son of man also came not to be served but to serve, and to give his life as a ransom for many" (10:45). This saying identifies Jesus with the suffering servant of Isa. 53:12, as does the Last Supper (14:22-25; cf. O.Cullmann, *Christology of the NT*, pp. 64f.). Moreover, the voice from heaven had already identified Jesus with God's Son after the Spirit descended upon Jesus following His baptism (Mk. 1:11; cf. Ps. 2:7; Isa. 42:1).

A neglected but important feature of Mark's Christology is the prophecy of John the Baptist: "I have baptized you with water; but he will baptize you with the Holy Spirit" (Mk. 1:8). A widely held view assumes that John is talking about Pentecost and the bestowal of the Spirit upon the Church, and that this prophecy is the same as that in Acts 1:5; 11:16. But in Acts Jesus gives the promise to His disciples, while in Mark it is John who speaks of what Jesus will do to His hearers. The focus in Mark is not Pentecost (which is not mentioned in the Gospels) but the ministry of Jesus. In fact, a major theme of Mark's Gospel is to show how Jesus, as the messianic Son of God, fulfilled this prophecy. The prophecy is followed by an account of Jesus' baptism, the descent of the Spirit, Jesus' identification by the voice from heaven, and Jesus' being led by the Spirit into the wilderness to be tempted (Mk. 1:9-13). Baptism signifies cleansing, death, and renewal. The subsequent events recorded by Mark show how Jesus baptizes His hearers with the Spirit through His exorcisms, healings, cleansings from sin, and teaching (on this theme in all four Gospels, see C. Brown, *Miracles and the Critical Mind*, pp. 300-325). Jesus' first act of public ministry involves exorcizing a man with an unclean spirit (1:21-28). The account contains an implicit contrast between the Holy Spirit and the unclean spirit who recognizes Jesus as "the Holy One of God" but is rebuked and driven out of the man. Further healings and cleansings are reported in the remainder of Mk. 1. In 2:2-12 Jesus claims authority as Son of Man to forgive sins, an act that the scribes see as blasphemous. Conflicts with the Pharisees center on the issue of Jesus' relationship with sinners (2:15-17), fasting (2:18-22), and the sabbath (2:23-28). After Jesus heals a man with a withered hand on the sabbath, the Pharisees plan with the Herodians to destroy Him (3:1-6).

The Pharisees' motive for planning Jesus' death is not simply petty jealousy. The Law laid down strict precepts for dealing with prophets who performed signs and wonders in order to lead people astray. Such a prophet was to be put to death "because he has taught rebellion against the Lord your God" (Dt. 13:5; cf. Mish. San. 7, 10). (On the importance of this and other passages from Deuteronomy in the trial and condemnation of Jesus, see A. Strobel, *Die Stunde der Wahrheit* [1980].) Because of His different interpretation of the Law, Jesus was perceived as a self-styled messianic prophet who was leading the people astray. This prompted the charge that Jesus was "possessed by Beelzebul, and by the prince of demons he casts out the demons" (Mk. 3:22). Jesus responded to this accusation by pointing to its patent falsity and self-contradictory character and also by warning against the unforgivable sin of blaspheming against the Holy Spirit. Mark adds the comment, "for they had said, 'he has an unclean Spirit'" (3:30). This comment indicates that blasphemy against the Holy Spirit is attributing to Satan what is patently the work of the Holy Spirit; the comment also identifies the works of Jesus with the works of the Holy Spirit.

By presenting Christ in these terms Mark has been developing a Spirit Christology. But at the same time he has developed a Word Christology. Jesus preached "the gospel of God" (Mk. 1:14). He taught and commanded with divine authority (1:17, 25, 27, 41; 2:5, 10; 3:14f.). Following the discussion of the charge that Jesus is possessed by Satan, Mark relates Jesus' parable of the sower as a summary of His ministry thus far (4:2-9). Lest there be any

doubt about what Jesus is doing, the explanation is given: "The sower sows the word" (4:14). It is the enemies of Jesus, who snatch away the word that He has sown, that are the agents of Satan (v.15).

R. P. Meye has made a strong case for understanding the miracle stories in the middle section of Mark in terms of Ps. 107 ("Psalm 107 as 'Horizon' for Interpreting the Miracle Stories of Mark 4:35–8:26," in R. A. Guelich, ed., *Unity and Diversity in NT Theology* [*Festschrift* G. Ladd; 1978], pp. 1-13). The Psalm depicts Yahweh as deliverer in various life-threatening situations. Through the miracle stories Mark shows how Jesus fulfills the role of Yahweh in His own person.

The stories lead up to Peter's confession of Jesus as the Christ (Mk. 8:29). The disciples report that Jesus has been identified with John the Baptist (perhaps suggesting the practice of necromancy), Elijah (reflecting the expectation of Elijah's return before the Day of the Lord; cf. Mal. 4:5f. [MT 3:23f.]; Mk. 9:12f.), or one of the prophets. All three possibilities indicate that Jesus is thought of as a prophet. But Peter rejects these suggestions and confesses Jesus as the Christ. This raises the question noted earlier: By what or by whom is Jesus anointed as the Christ? The answer has already been given: Jesus was anointed by the Spirit at His baptism and identified as the messianic Son of God. In other words, the title Christ carries with it an implicit reference to the Holy Spirit. Thus each use of the title Christ contains an allusion to the Spirit's unique manifestation in the life of Jesus. The confession of Jesus as the Christ stands in direct contradiction to the religious leaders' claim that Jesus is possessed by Satan.

The so-called messianic secret, Jesus' command to His disciples to tell no one about Him (Mk. 8:30; 9:9), was doubtless bound up with several considerations. Jesus did not want people to misunderstand the nature of His messiahship by identifying it with political aspirations. He wished to avoid a premature confrontation with His adversaries. He refused the testimony of demonic spirits (1:25, 34), for such spirits were not competent witnesses, and to ally Himself with their testimony would have given credence to the charge that He was possessed by, and working in league with, Satan. Jesus wished to let His deeds speak for themselves. His injunction to silence is of a piece with His teaching in parables: the message was plain to all who had ears to hear. Jesus' reticence to claim messiahship publicly may also have been related to the ancient Jewish belief that no man could claim to be the Messiah until he had accomplished the task of the anointed one. Nevertheless Jesus implicitly asserted His messianic kingship by His entry into Jerusalem and the temple (11:1-11). He raised the question of the identity of the Christ but answered it only indirectly (Mk. 12:35-37; cf. Ps. 110:1). He also warned about false Christs and prophets in terms that recall Dt. 13 (Mk. 13:22), and He encouraged the disciples by promising that the Son of Man would come to gather up the elect (Mk. 13:26f.; cf. Dnl. 7:13). But Jesus did not publicly acknowledge His messiahship until the high priest confronted Him at His trial with the direct question, "Are you the Christ, the son of the Blessed?" (for literature and discussion, see *DNTT*, III, 506-511; C. M. Tuckett, ed., *Messianic Secret* [1983]).

The question of defilement and the true nature of cleansing comes to the fore in Mk. 7:1-23. Here again Jesus and the Pharisees stand diametrically opposed. The latter are concerned with the ritual purification and washings (*baptismoí*, 7:4); Jesus is concerned with the heart (vv.19-23). The theme of baptism becomes explicit once more in Jesus' cleansing of the temple (11:15-33), which comes at the climax of His public ministry. Like many of Jesus' actions (e.g., His entry into Jerusalem), it is an enacted sign. When the chief priests, scribes, and elders demand to know His authority for doing this, Jesus replies by asking whether John's baptism was from heaven (i.e., from God) or from men. The question is not simply a device to confuse His questioners. The authorities are reluctant to deny that John's baptism was from God, for they know that the people believe John to have been a real prophet. But acknowledging that John's baptism was from God would implicitly give them the answer to their own question, and they know that Jesus will ask, "Why then did you not believe him?" For John had said, "I have baptized you with water; but he will baptize you with the Holy Spirit" (1:8). Therefore, acknowledging that John's baptism was from God would mean recognizing that Jesus' actions are the fulfillment of John's prophecy, and thus that He is indeed baptizing or cleansing as the Spirit-anointed Christ. Hence Jesus' cleansing of the temple is a baptism of the temple in the power and authority of the Spirit; moreover, it carries with it His claim to be the Spirit-anointed Christ.

The religious leaders condemn Jesus for what they deem to be blasphemy, i.e., His claim to be the messianic Son of God and the Danielic Son of Man to whom ultimate authority has been given (Mk. 14:61f.; cf. Dnl. 7:13). They evidently associated these claims with prophecy (Mk. 14:65) and kingship (Mk. 15:2-20, 26-32). Their attitude toward Jesus is clearly derisive, yet there is irony in their calling Him "King of Israel," a title also applied to Yahweh (e.g., Isa. 44:6; cf. Ps. 47:6 [MT 7]). Although Mark does not explicitly state this, the circumstances and mode of Jesus' death can only mean that in the Jewish context He is a false pretender who is accursed by God and rightly put to death to avoid defiling the land (cf. Dt. 21:23). The verdict might seem to be supported by Jesus' cry of desolation (Mk. 15:34), though the entire context of Ps. 22 shows that this cry is ultimately a confession of faith in God. The negative verdict on Jesus is reversed by the rending of the curtain of the temple (Mk. 15:38), the centurion's confession ("Truly this man was a son of God," v.39), and Jesus' resurrection (16:1-8; appearances of the risen Christ are described only in the variant endings of Mark).

Mark's account of the person of Christ is paradoxical. Jesus is clearly a human figure. He knows human emotions (Mk. 3:5; 6:6, 34; 8:2f., 12; 9:19; 10:14). He requests information (6:38; 8:27; 9:21) and professes His ignorance about the time of the Son of Man's coming (13:32). But Jesus' human emotions may also be seen as embodying God's own compassion and wrath, and His actions and words as embodying God's actions and words. Mark presents Jesus as the messianic Son of God. As the Son of Man He is also the servant who came "not to be served but to serve, and to give his life as a ransom for many" (10:45). Jesus' messiahship involves rejection, suffering, death, and resurrection (8:31; 9:12, 31; 10:33f.; 12:7f.). Implicitly, Mark presents the way of Jesus as the way of Yahweh, so that rejecting Jesus means rejecting Yahweh. Mark does not attempt a theoretical explanation of the Incarnation; rather, he treats Jesus' origin enigmatically by recording the question, "Is not this the carpenter, the son of Mary . . . ?" (6:3). He allows Jesus' actions, words, and fate to speak for themselves and to define the nature of His sonship.

B. Matthew. Matthew's account of the person of Christ is widely regarded as having made use of Mark. Jesus' humanity clearly stands out, but Matthew is particularly concerned to draw out the divine, supernatural aspects of Jesus' story. Occasionally this means passing over some

of the human traits noted by Mark; e.g., both Matthew and Luke omit the anger and surprise mentioned in Mk. 3:5 and 6:6. Matthew stresses Jesus' healings and miracles (Mt. 8:16f.; 9:35; 12:15; 14:21; 15:38; 21:19). He gives special attention to Jesus' fulfillment of OT prophecy and typology (Mt. 1:22f. [cf. Isa. 7:14]; 2:15 [cf. Hos. 11:1]; 2:17f. [cf. Jer. 31:15]; 2:23 [cf. Isa. 11:1]; 4:14f. [cf. Isa. 9:1f.]; 8:17 [cf. Isa. 53:4]; 12:17-21 [cf. Isa. 42:1-4]; 13:35 [cf. Ps. 78:2]; 21:4f. [cf. Isa. 62:11; Zec. 9:9]; 26:54, 56; 27:9f. [cf. Zec. 11:12f.; Jer. 32:6-15; 18:2f.]). In addition to explicit references to fulfillment, Matthew gives numerous allusions to the OT. Thus, Jesus' response to John the Baptist's disciples, who ask whether Jesus is the one who is to come, draws attention to His own works (Mt. 11:5f.), which indeed are the works prophesied of the Lord's anointed (Isa. 35:5f.; 61:1; cf. Lk. 4:18f.). Matthew identifies John the Baptist himself as the messenger who prepares the way of the Lord (Mt. 11:10; cf. Mal. 3:1; Mk. 1:2) and as the "Elijah who is to come" (Mt. 11:14; cf. Mal. 4:5; Mt. 17:10-13; Jn. 1:21; Lk. 1:17).

Matthew's Christology is directed toward Jewish or former Jewish readers who are thoroughly conversant with the OT. It aims to show how Jesus fulfills Jewish expectation. Matthew traces Jesus' genealogy back to Abraham (Mt. 1:2) and concludes it by naming "Joseph the husband of Mary, of whom Jesus was born, who is called Christ" (1:16). Here "Christ" appears to be in transition to becoming not only a title but a personal name. Matthew's use of titles of Jesus suggests that he understands them to have a significance that transcends Jewish national interests. He explains the name "Jesus" by adding "for he will save his people from their sins" (1:21). Matthew clearly stresses Jesus' messiahship. The title "Son of David" occurs more frequently in Matthew than in the other Gospels (1:20; 9:27; 12:23; 15:22; 20:30; 21:9, 15)."Son of God" may be simply a synonym for "Christ." Peter's confession, "You are the Christ, the Son of the living God" (16:16), is best understood as a Jewish parallelism in which both clauses make the same point but in different words.

Matthew's use of "Son of God" in the temptations (Mt. 4:3, 6) is also best understood as messianic. This narrative follows the account of Jesus' baptism, the descent of the Spirit, and the declaration "This is my beloved Son, with whom I am well pleased" (Mt. 3:13-17; cf. Ps. 2:7; Isa. 42:1). Jesus' temptations reduplicate Israel's temptations as God's son in the wilderness wanderings (cf. B. Gerhardsson, *Testing of God's Son* [1966]; *DNTT*, III, 798-808). As such, they are not temptations to misuse His personal divinity but are rather tests of His messianic sonship. Whereas Israel as God's son had failed, Jesus, as the messianic Son, lives by every word that proceeds out of the mouth of God, refuses to tempt the Lord His God, and worships and serves God alone.

"Son of God" does not express pure divinity but rather focuses on a true humanity that is rightly related to God. In this sense Jesus alone is the true Son of God. As noted above (II), this title converges with "Son of Man" in both the Adamic and Danielic senses. Therefore, the Son of God has dominion (cf. His dominion over the waters, Mt. 14:33). It is to this dominion that Satan's temptations are directed. But Jesus shows Himself to be the true Son of God by refusing to misuse His dominion for selfish ends. In His passion, Jesus is again challenged to save Himself by virtue of being Son of God (27:40, 42). But again He refuses to use His divine authority to save himself. Matthew's account of the trial and passion juxtaposes the titles Christ, Son of God, Son of Man, and King (26:63–27:54). Jesus is condemned for what appear to His adversaries to be blasphemous pretensions to messianic kingship. But (as was noted in III.A above) there is implicit irony in the mocking application to Jesus of the title "King of Israel" (27:42), which properly belongs to Yahweh: in rejecting Jesus, His enemies are rejecting Yahweh Himself.

Matthew's account of Jesus gives even greater prominence to the Spirit than does Mark's. Like Mark, Matthew records the descent of the Spirit, the prophecy of John the Baptist, the voice from heaven, and the Spirit leading Jesus into the wilderness to be tempted (Mt. 3:11–4:1). Likewise, the cleansing of the temple figures at the climax of Jesus' ministry (21:12-27), with the implication that Jesus is acting in the power and authority of the Spirit. But Matthew repudiates any suggestion of adoptionism in his account of Jesus' conception by the Holy Spirit (1:20). Furthermore, he gives a fuller account of the Beelzebul controversy (12:15-32; cf. also 9:33f.) and of Jesus' pronouncement on blasphemy against the Holy Spirit. He presents Jesus' healings and exorcisms as the fulfillment of Yahweh's promise to put His Spirit upon His servant, who will bring justice to the Gentiles (Isa. 42:1-4; Mt. 12:18-21; cf. 3:17). In Matthew's account Jesus Himself attributes His casting out of demons to the Spirit of God and states that this work proves that "the kingdom of God has come upon you" (12:28; cf. 4:17). Thus, Jesus' work is presented not only as a sign that the eschaton has dawned, but also as a transition to the gentile mission that begins when the risen messianic Son of Man, declaring that all authority in heaven and on earth have been given to Him, commands His disciples to go and "make disciples of all nations . . ." (28:19f.).

This commission, which links the Son with the Father and the Spirit (Mt. 28:19), takes up the theme of Jesus' unique relation with the Father and consequent unique mediatorship of the knowledge of the Father (cf. 11:25-30). Another prominent theme in Matthew is that of wisdom (cf. F. Christ, *Jesus Sophia* [1970]; M. Jack Suggs, *Wisdom, Christology and Law in Matthew's Gospel* [1970]; R. G. Hamerton-Kelly, *Pre-Existence, Wisdom and Son of Man* [1973]; J. M. Robinson, "Jesus as Sophos and Sophia: Wisdom Tradition and the Gospels," in R. L. Wilken, ed., *Aspects of Wisdom in Judaism and Early Christianity* [1975], pp. 1-16). This emphasis is shared by Luke, and thus some scholars attribute it to the Q source, which, like wisdom literature generally, may have been a collection of sayings containing the wisdom of the teacher. Jesus is depicted as not only a teacher of wisdom but the personal manifestation of God's wisdom in action (Mt. 11:18f. par. Lk. 7:33-35; Mt. 11:25f. par. Lk. 10:21; Mt. 11:27 par. Lk. 10:22; Mt. 12:41f. par. Lk. 11:31f.; Mt. 23:34-37 par. Lk. 11:49-51; 13:34f.). Because Jesus is the wisdom of God incarnate, He can issue the invitation to come to Him and take His yoke (Mt. 11:28-30; cf. the striking parallel in Sir. 51:23-27). In wisdom literature wisdom plays a role comparable to that of the word of God elsewhere in Scripture. Wisdom functions both in creation and in the enlightenment of humankind (cf. Prov. 8). It is associated with the human spirit and God's Spirit (Job 32:8; Prov. 1:23; 20:27; Wisd. 1:1-15; 7:22–8:1; cf. G. T. Montague, *Holy Spirit* [1976], pp. 91-110). It is also associated with salvation history (Wisd. 10:1–11:1). In the light of this Jewish background, the NT references to wisdom have profound significance for understanding the person of Christ. Jesus is not simply a wise man; He is the incarnate wisdom of God.

C. Luke. Luke's Christology also gives prominence to the Holy Spirit and to wisdom. Like Matthew, though drawing on entirely different stories, Luke draws atten-

tion to the Holy Spirit's role in the conception of Jesus (Lk. 1:35). He mentions the Spirit in connection with the ministry prophesied for John the Baptist (1:15, 17) and also with the prophetic utterances of Elizabeth (1:41), Zechariah (1:67), and Simeon (2:25-27). Luke is concerned to correct any impression that the Spirit first comes upon Jesus after His baptism. His account thus precludes adoptionism or the possibility that Jesus might simply be a prophet or a charismatically gifted figure. Luke's emphasis on wisdom has already been noted (for references, see III.B above). Just as Luke stresses that the Spirit is present prior to Jesus' baptism, so also he stresses that Jesus is filled with wisdom from childhood (2:40, 52). Like the other evangelists, Luke records John the Baptist's prophecy concerning Jesus' baptism with the Holy Spirit (3:16), the descent of the Spirit, and Jesus' identification by the voice from heaven (3:21f.). Not only is Jesus "full of the Holy Spirit" and led by the Spirit into the wilderness to be tempted by the devil (4:1f.), but subsequently He returns "in the power of the Spirit into Galilee," where He begins His ministry (4:14). Between the account of the Spirit's descent and Jesus' subsequent identification as the Son of God, and the account of the temptation, Luke inserts his genealogy, which traces Jesus back to Adam, "the son of God" (3:38). This sequence portrays Jesus as the eschatological Son of God who, in contrast to Adam, triumphs over temptation and exercises true dominion.

In his account of Jesus' visit to Nazareth (Lk. 4:16-30), Luke further identifies Jesus with the servant of the Lord who is anointed by the Spirit (4:18f.; Isa. 61:1f.). The passage indicates that Jesus' messiahship is to be thought of in terms of His anointing by the Spirit after His baptism, and that this is constitutive for His ministry.

Luke's Gospel is characterized by his consistent attempt to balance Jesus' teaching and miracles (cf. P. J. Achtemeier, "Lukan Perspective on the Miracles of Jesus: A Preliminary Sketch," in C. H. Talbert, ed., *Perspectives on Luke-Acts* [1978], pp. 153-167). He frequently eliminates detail in order to focus on Jesus. In Jesus' response to John the Baptist's question whether Jesus is "he who is to come," Luke emphasizes Jesus' current miracles (Lk. 7:18-23 par. Mt. 11:2-6; cf. Lk. 7:1-17). Jesus' mighty works, whether performed by Him or by the disciples under His authority, show that the kingdom of God is present and demand a positive response (Lk. 10:9, 11-13-20; 11:14-23; 17:20f.). The works performed by the seventy are indicative of Satan's downfall (10:17-20) and are an occasion for Jesus' rejoicing in the Holy Spirit (10:21). Luke detaches the saying on blasphemy against the Spirit from the Beelzebul controversy (12:10), but he nevertheless gives the controversy a central place (11:14-26). He stresses that it is by the Spirit that Jesus works and by the Spirit that Jesus' disciples are to live and work (11:13, 20; 12:12; 24:49). (The expressions "finger of God" [11:20] and "promise of my father" [24:49] are ways of speaking about the Spirit.) His disciples will also be given God's wisdom (21:15).

Alongside this emphasis on Jesus being the Spirit-anointed Messiah, Luke draws attention to Jesus' humanity. Jesus knows the pain of rejection and grief (Lk. 22:15, 39-46). He is tempted (4:13; 22:28) and divinely strengthened (22:43). He communes with God in prayer (6:12; 11:1; 22:32, 41, 44) and commends His spirit into the Father's hands (23:46). He is compassionate to outcasts (7:36-50; 19:1-10), Samaritans (9:51-56; 10:29-37; 17:11-19), and sinners (5:29f.; 18:9-14). At the same time, He makes the most stringent demands on His followers — demands that transcend family ties (9:23-26, 57-62; 14:25-35).

Luke's selection of stories and use of the titles of Jesus indicate that he sees in them a universal significance. At the Annunciation the angel tells Mary, "The Holy Spirit will come upon you, and the power of the Most High will overshadow you; therefore the child to be born will be called holy, the Son of God" (Lk. 1:35). To the shepherds the angel declares, "Be not afraid; for behold, I bring you good news of a great joy which will come to all the people; for to you is born this day in the city of David a Savior, who is Christ the Lord" (2:10f.). In general, Luke uses the title Christ more frequently than Mark, though he rarely introduces it into the sayings of Jesus. In 24:26, 46 "Christ" is connected with suffering and death. "Son of Man" also occurs more frequently than in Mark, partly due to the sayings used by Luke but not by Mark. On occasion Luke interprets sayings for his gentile readers (e.g., cf. Lk. 22:69 par. Mk. 14:62; Lk. 23:47 par. Mt. 27:54; Mk. 15:39). Nevertheless he uses "Lord" more frequently than the other Evangelists. He not only records the enigmatic reply, "The Lord has need of it" (Lk. 19:31; cf. Mt. 21:3; Mk. 11:3), but finds it natural to refer to Jesus as "the Lord" (Lk. 7:19; 10:1; 11:39; 12:42; 17:5f.). Luke's usage suggests that he sees a deeper retrospective significance in the incidents that he relates in the light of the Resurrection and the Church's reception of the Spirit from the Father at Jesus' behest (24:49). Thus the stories that he recounts, whose truth he has researched (1:1-4), take on a new meaning and receive a higher ratification in the light of Jesus' exalted status.

IV. Apostolic Preaching and Teaching.—*A. Peter and the Jerusalem Church.* The preaching in Acts has been the subject of considerable discussion (for review, see *DNTT*, III, 57-58). A number of scholars have argued that the sermons in Acts represent Christian teaching that is considerably earlier than any of the NT writings themselves. Based on his analysis of passages in Acts (e.g., 2:14-39; 3:13-26) and the Pauline Epistles (e.g., Gal. 1:3f.; 3:1; 4:6), C. H. Dodd sought to establish a basic pattern of apostolic preaching (*Apostolic Preaching and Its Developments* [1936]; *see* PREACH II.B.1.b.). He noted certain differences between Paul's preaching and the preaching associated with Peter and the Jerusalem Church (the "Jerusalem kerygma"). The Jerusalem apostles do not appear to have used the title Son of God. In Acts (9:20) Paul is the first to use the title, though it seems likely that the Pauline phrase "Son of God in power" (Rom. 1:4) means substantially the same as "Lord and Christ" in the Jerusalem kerygma. The Jerusalem preaching relates the forgiveness of sins to Christ's death and resurrection but does not say explicitly that Christ died "for our sins." Nor does it develop the thought of the continued intercession of the exalted Christ. But many elements are common to the peaching of Peter in Acts and the teaching of Paul in his Epistles, including the Davidic descent of Jesus, establishing His human qualification for messiahship; His death and resurrection according to the Scriptures; His consequent exaltation to the right hand of God as Lord and Christ; His deliverance from sin and judgment into new life; the call to repentance; and warning of judgment (see Dodd, pp. 25f.).

Although critics have challenged Dodd's contention that Peter's speeches in Acts represent the earliest apostolic preaching, many of their objections are not substantial. Nevertheless, the record of Stephen's preaching (Acts 7), Philip's testimony (8:26-40), Paul's preaching at Athens (ch. 17), his address to the elders of Ephesus (20:17-35), and his defenses before Felix (ch. 24) and Agrippa (ch. 26) indicate that other forms of preaching existed alongside the Jerusalem kerygma. What Dodd identified as the apostolic kerygma is not an all-purpose

presentation of the Christian message but is preaching directed specifically to the Jewish situation. Its aim therefore is to establish Jesus' messiahship. Despite Jesus' rejection by the Jewish leaders, His resurrection shows that He is indeed the Christ and Lord of all (10:36; cf. 2:34-36). In His lifetime Jesus was anointed by the Spirit and empowered to perform wonders (2:22; 10:38), and it is Jesus who, in exalted state, bestows the Spirit upon His disciples (2:33, 38; cf. 10:44-48).

The theme of the Spirit's role in Jesus' earthly ministry and exaltation also figures in Stephen's preaching (7:51-56). Both Peter and Stephen identify Jesus with the prophet foretold by Moses (3:22; 7:37; cf. Dt. 18:18). This identification repudiates the implicit charge that Jesus was a false prophet and blasphemous messianic pretender who was rightfully put to death. The whole book of Acts displays a strong interest in proving that Jesus is the Christ in the sense of the Spirit-anointed Messiah. Jesus is God's Christ (Acts 2:31; 3:18; 5:42; etc.) who "must suffer" (17:3; 26:23). He is "the Righteous One" (3:14; 7:52; 22:14), the stone rejected by the builders which has been made the head of the corner (4:11; cf. Ps. 118:22; Rom. 9:32f.; 1 Pet. 2:5-8). In view of the Resurrection and the outpouring of the Spirit there is no more question of a messianic secret. Peter boldly declares, "Let all the house of Israel therefore know assuredly that God has made him both Lord and Christ, this Jesus whom you crucified" (Acts 2:36).

Acts proclaims that, instead of being the evildoer whom the authorities put to death for His blasphemies, Jesus is the holy, anointed, suffering servant of prophetic expectation (3:13, 26; 4:27, 30; 8:30-35; 17:3; 26:23; cf. Isa. 53). Above all, Jesus is Lord. Acts speaks of Him as "the Lord Jesus," "the Lord Jesus Christ," "our Lord Jesus Christ," and simply "the Lord." The Resurrection and outpouring of the Spirit have vindicated His lordship (2:36). Stephen addresses Him as Lord over life and death when he prays, "Lord Jesus, receive my spirit (7:59). Christians are characterized as those who call upon His name (9:14; cf. 2:21; 22:16). Believers are baptized in the name of Jesus Christ and through Him receive the Spirit (2:38; 8:12, 17; 10:44-48; 19:5f.; etc.). Healing (3:6; 4:7, 10) and exorcism (16:18; 19:13) are performed in His name. He is the Author of life (3:15), the Leader and Savior whom God has exalted to His right hand "to give repentance to Israel and forgiveness of sins" (5:31). "There is salvation in no one else, for there is no other name under heaven given among men by which we must be saved" (4:12).

B. 1 and 2 Peter, James, and Jude. E. G. Selwyn drew attention to many parallels in thought and phrase between 1 Peter and Peter's preaching in Acts (*First Epistle of St. Peter* [2nd ed. 1947], pp. 33-36). He saw the connection not as literary but as historical, going back to the teaching of Peter himself. A common feature is the emphasis on Jesus' resurrection, which is related to His vindication and baptism (1 Pet. 1:3, 21; 3:18-22). In contradistinction to the view of the Jewish hierarchy, Jesus' death is seen as the redemptive death of the righteous for the unrighteous (1:18f.; 2:21, 24; 3:18). Jesus is the cornerstone, the stone that causes unbelievers to stumble and that was rejected by the builders (2:4-8; cf. Ps. 118:22; Isa. 8:14; 28:16; Mt. 21:42 par.; Acts 4:11; Rom. 9:33). But this stone is in fact the foundation of the new temple into which believers are built, so that they become a holy priesthood offering spiritual sacrifices to God through Jesus Christ (1 Pet. 2:5).

Although 1 Peter does not use the term "servant" of Jesus, 2:22-25 clearly draws on the portrait of the suffering servant in Isa. 53:5f., 9, 12 (cf. Acts 3:13, 26; 4:27, 30). Jesus suffers as the righteous one who provides the example for His followers (1 Pet. 1:11; 2:21; 4:1, 13; 5:1).

In 1 Peter "Jesus Christ" and "Christ" have become personal designations. "The Son," "His Son," and "Son of God" do not occur, but "Lord" is applied to Jesus four times (1:3; 2:3, 13; 3:15). The dominion of Christ, which figures elsewhere in connection with His sonship and lordship, is expressed in 1:8 (where He is the object of unqualified worship); 3:22; 4:11; 5:11. God calls human beings "to his eternal glory in Christ" (1 Pet. 5:10).

The Christologies of 2 Peter, James, and Jude focus attention on Jesus as Lord and Savior. In 2 Pet. 2:9, 11; 3:8f. "the Lord" means God, but in 3:2, 10, 15 it denotes Christ (cf. "our Lord" in 1:2, 8, 11, etc.). In these Epistles "Son" appears only in 2 Pet. 1:17 in a reference to the Transfiguration. In the light of the previous discussion concerning sonship as a designation of kingship (see II above) and the teachings of 2 Peter in general, it seems likely that this passage is meant to attest to what has already been said about "the eternal kingdom of our Lord and Savior Jesus Christ" (1:11).

In James every reference to Christ includes the title "Lord." Jesus is called "the Lord Jesus Christ" in 1:1 and "our Lord Jesus Christ" in 2:1; otherwise He is not mentioned by name. James sometimes uses "Lord" as a synonym for God (1:7; 3:9; 4:10, 15; 5:4, 10f.), but he uses it to denote Christ in 1:1; 2:1; 5:7f., 14f.

The usage in Jude is similar. "Lord" denotes God in vv. 9 and 14; it refers to Christ in vv. 4, 17, 21, and 25. The letter concludes with the doxology: "to the only God, our Savior through Jesus Christ our Lord, be glory, majesty, dominion, and authority, before all time and now and for ever. Amen" (v. 25).

The use of "Savior" to describe Jesus is comparatively rare in the NT. The majority of instances occur in 2 Peter (1:1, 11; 2:20; 3:2, 18) and the Pastoral Epistles (2 Tim. 1:10; Tit. 1:4; 2:13; 3:6). Otherwise it occurs in Lk. 2:11; Jn. 4:42; Acts 5:31; 13:23; Eph. 5:23; Phil. 3:20; 1 Jn. 4:14. V. Taylor ascribes its restricted and delayed currency to its use in Greek religion and Caesar-worship (*Names of Jesus*, p. 109). The same could not be said, however, of the title "Lord." Its currency and controversiality may depend not on its meaning in Hellenistic circles but its meaning in Judaism. It may also be noted that the idea of "Savior" is present in the name Jesus itself, which is a form of the name of Joshua ("Yahweh is salvation," "Yahweh saves," or "Yahweh will save").

C. Paul. It is an open question whether Paul ever saw or met Jesus during His earthly life (see F. F. Bruce, *Paul: Apostle of the Heart Set Free* [1977], pp. 95-112). If Paul was educated in Jerusalem, he may well have encountered Jesus, though at that time he sided with Jesus' opponents and became an active persecutor of the Church (Acts 7:58; 8:1; 9:1-5, 13f.; 22:3-5; 26:9-11). But Paul's attitude was completely transformed by his encounter with the risen Christ on the Damascus road, an encounter that led to his apostleship (cf. S. Kim, *Origin of Paul's Gospel* [1981]). Paul was clearly not an apostle in the same sense that the Twelve were; for eleven of them had been disciples chosen by Jesus, while Matthias had been a follower from the beginning of Jesus's ministry (Acts 1:21f.). Paul also lacked the qualification of having witnessed to Jesus' resurrection before His ascension. But he insisted that Christ had appeared to him "as one untimely born" (1 Cor. 15:8) and had given him a special apostleship to the Gentiles (1 Cor. 15:9; Gal. 1:12; 2:8; cf. Acts 9:15; 22:14f.; cf. also the opening greetings of Paul's letters).

Moreover, Paul insisted that his teaching was not his own invention but was based on what he had "received" (1 Cor. 15:3). Some passages in the Epistles read like

fragments of creeds or catechisms, suggesting a pre-Pauline body of teaching concerning Christ that Paul helped to shape (cf. O. Cullmann, *Earliest Christian Confessions* [Eng. tr. 1949]; J. N. D. Kelly, *Early Christian Creeds* [3rd ed. 1972], pp. 6-29; V. F. Neufeld, *Earliest Christian Confessions* [1963]). The Pauline Epistles stress the Resurrection, which vindicates Jesus and completes His saving work (1 Cor. 15:3-8; Rom. 1:3f.; 8:34; Phil. 2:6-11; 1 Tim. 3:16; 2 Tim. 2:8; cf. 1 Pet. 3:18-22). Other formulations are bipartite, linking God and Jesus Christ, sometimes alluding to Christ's reconciling work (Rom. 4:24; 1 Cor. 8:6; 1 Tim. 2:5f.; cf. 1 Pet. 1:21) and sometimes alluding to Christ as the judge of all (1 Tim. 6:13f.; 2 Tim. 4:1). The greetings of the Epistles frequently link God the Father and the Lord Jesus Christ as the source of grace (Rom. 1:7; 1 Cor. 1:3; 2 Cor. 1:2; Gal. 1:3; Eph. 1:2; etc.). The phrase "the God and Father of our Lord Jesus Christ" has the character of a formula of Christian confession (Rom. 15:6; 2 Cor. 1:3; 11:31; Eph. 1:3; cf. 1 Thess. 3:11; 2 Thess. 2:16; etc.). Occasionally the Spirit is also mentioned alongside God the Father and the Lord Jesus Christ (1 Cor. 12:3-5; 2 Cor. 1:21f.; 13:14; Eph. 2:18; 4:4-6; etc.).

Some scholars have argued that Paul had no interest at all in the historical Jesus (cf. R. Bultmann, *Faith and Understanding* [Eng. tr. 1969], pp. 220-246). According to Bultmann, Christ is to be found only in the kerygma of the cross and Resurrection. Paul appears to take only slight interest in Jesus' life and teaching, although he does refer to Jesus' Davidic descent (Rom. 1:3), His birth (Gal. 4:4), His gentleness (2 Cor. 10:1), His humiliation and self-denial (Rom. 8:3; 15:3; 2 Cor. 8:9; Phil. 2:6-11), His teaching (Rom. 12:19-21 [cf. Mt. 5:43-48]; Rom. 13:9f. [cf. Mt. 19:16-21; 22:39f.]; 1 Cor. 7:10f. [cf. Mt. 19:3-9 par. Mk. 10:2-12]), the Last Supper (1 Cor. 11:23-25), His concern for the support of His followers (1 Cor. 9:14; cf. Lk. 10:7), and an otherwise unknown saying (Acts 20:35).

Some have appealed to 2 Cor. 5:16 in support of the claim that Paul was not interested in the historical Jesus: "... even though we once regarded Christ from a human point of view, we regard him thus no longer." But this passage must be seen in the light of Paul's former attitude to Jesus and of his train of thought elsewhere. "Christ crucified" is "a stumbling-block to the Jews and folly to the Gentiles" (1 Cor. 1:23). The slogan "Jesus be cursed!" (12:3) represents the official attitude of the Jerusalem hierarchy — an attitude that had clearly spread in the diaspora. The form of Jesus' death was a self-evident sign to the Torah-respecting Jew that Jesus was cursed (Gal. 3:13; cf. Dt. 21:23). But Paul had come to see that this was a human judgment. Instead of being the definitive proof that Jesus was under the divine curse, the cross became the means of redemption, reconciliation, and salvation (2 Cor. 5:21; cf. Rom. 3:24-26). To curse Jesus is *ipso facto* proof that one does not possess the Spirit; conversely, one can acknowledge Him only in the power of the Spirit (1 Cor. 12:3). The gift of this knowledge is comparable to the creation of light (2 Cor. 4:6). It brings about the kind of radical transformation that Paul himself had experienced (cf. 5:17).

This new experience of Christ in the Spirit shows that Jesus is indeed the Spirit-anointed Christ and that the interpretation of Jesus' enemies (including, formerly, Paul) is wrong. Thus 2 Cor. 5:16 indicates not a lack of interest in the earthly Jesus but rather the reverse. It is a condemnation of judgments about Jesus that are not prompted by the Spirit (cf. 1 Cor. 2:1-16; 2 Cor. 3:12–4:15). Likewise, Paul's decision to "know nothing among you except Jesus Christ and him crucified" (1 Cor. 2:2) reflects a determination to know the Jesus who was crucified for His claims to be the Spirit-anointed Messiah. Paul's apostolic ministry focused on the proclamation of Jesus' significance in the light of His death, resurrection, and bestowal of the Spirit. But he took with him on his missionary journeys persons such as Mark (e.g., Acts 12:12, 25) and Luke (e.g., 2 Tim. 4:11; Philem. 24), who either knew at first hand of the events surrounding Jesus or were involved in compiling accounts of them.

To Paul, therefore, Jesus is the vindicated Messiah. He was qualified for this by His human Jewish descent (Rom. 1:3; 9:5); but His messiahship depends ultimately on God's personal presence in Him (2 Cor. 5:19). His identity as the messianic Son of God is established beyond doubt by the Spirit: Jesus is "designated Son of God in power according to the Spirit of holiness by his resurrection from the dead, Jesus Christ our Lord" (Rom. 1:4; cf. 8:11).

Paul refers to Christ as the "Son of God" only four times (Rom. 1:4; 2 Cor. 1:19; Gal. 2:20; Eph. 4:13). He also calls Him "the Son" once (1 Cor. 15:28) and "his Son" twelve times (Rom. 1:3, 9; 5:10; 8:3, 29, 32; 1 Cor. 1:9; Gal. 1:16; 4:4, 6; Col. 1:13; 1 Thess. 1:10). In addition, he makes implicit references to sonship in passages that speak of the Father of Jesus Christ (e.g., 2 Cor. 1:3). Even so, references to Christ's sonship are few compared with references to Him as "Lord" (a title applied to Jesus approximately 222 times in the Pauline corpus). The reason for this great discrepancy may be that "Son of God" said less than "Lord" did. To Jewish ears "Son of God" had messianic overtones, but at the same time it set the Messiah over against God. To Paul, Jesus was indeed the Messiah; hence Paul could freely use the term "Christ." But God was in Christ in a way that justified Christ being called "Lord," a title that properly belonged to Yahweh. This title was already applied to Jesus by Peter and the Jerusalem church (see IV.A above). "Jesus is Lord" was evidently the basic Christian confession (Rom. 10:9; 1 Cor. 12:3; Phil. 2:11) and was the essence of Paul's preaching (2 Cor. 4:5; cf. 1 Cor. 8:6; Rom. 11:36; Col. 1:16). Christ's status, therefore, is the status of God Himself. The judgment that belongs to God alone is committed to Christ (Rom. 14:9f.; 2 Cor. 5 10; cf. Acts 17:31; 1 Cor. 15:24-28). All human beings will bow and confess Jesus Christ as Lord, thereby giving glory to the Father (Phil. 2:11). Christ is in fact "the Lord of glory" (1 Cor. 2:8); "for in him all the fullness of God was pleased to dwell" (Col. 1:19).

It is a matter of debate whether Paul ever explicitly calls Christ "God." The RSV translates Rom. 9:5 "to them belong the patriarchs, and of their race, according to the flesh, is the Christ. God who is over all be blessed for ever. Amen." But the RSV mg. renders the last part "Christ, who is God over all, blessed for ever...." The passage might be a doxology (as in the RSV text), but the description of Christ as God would be in harmony with Paul's teaching elsewhere (cf. B. M. Metzger, "Punctuation of Rom. 9:5," in Lindars and Smalley, eds., *Christ and Spirit in the NT*, pp. 95-112). For Paul applies to Christ various metaphors and phrases that properly apply to God. In Acts 17:28 Paul identifies God in terms of a quotation thought to be drawn from Epimenides: "In him we live and move and have our being." The same could be said of Christ. Elsewhere, however, Paul says, "For me to live is Christ" (Phil. 1:21), and "I have been crucified with Christ; it is no longer I who live, but Christ who lives in me" (Gal. 2:20). This is true of all believers: "For you have died, and your life is hid with Christ in God..." (Col. 3:3; cf. references to Christ "in you," e.g., Rom. 8:10; 2 Cor. 13:3, 5; Gal. 4:19; Col. 1:27). This language

presents a striking parallel to the promise of God that constitutes the essence of OT religion: "I will live in them and move among them, and I will be their God and they shall be my people" (2 Cor. 6:16; cf. Ex. 29:45; Lev. 26:12; Jer. 31:1, 33; Ezk. 37:27).

This thought, that the divine indwelling is now realized through Christ and the Spirit of Christ, underlies Paul's use of the metaphor of the temple. Believers have taken the place of the Jerusalem temple as the dwelling place of God (2 Cor. 6:16; cf. 1 Cor. 3:16f.; see R. J. McKelvey, *The New Temple* [1969]). In Eph. 2:11-22 Paul takes the thought of the temple even further. The Gentiles are brought into the temple through Christ's death, which reconciles Jew and Gentile to God and to each other. The "household of God" is "built upon the foundation of the apostles and prophets, Christ Jesus himself being the chief cornerstone, in whom the whole structure is joined together and grows into a holy temple in the Lord" (2:19-21).

Another OT metaphor depicts Israel as the bride of Yahweh (Jer. 2:2; cf. Isa. 49:18; 62:5). To Paul the Church is the bride of Christ (2 Cor. 11:2; Eph. 5:22-32). These allusions may well be traced back to Jesus' references to the bridegroom and the wedding feasts (Mk. 2:19f. par.; Mt. 22:1-10 par.; 25:1-13; cf. Jn. 3:29).

Even more prominent than the idea of Christ indwelling the believer is that of the believer being "in Christ" (e.g., Rom. 8:1; 1 Cor. 15:22; 2 Cor. 5:17; Gal. 3:26, 28; Eph. 1:4, 7; Phil. 2:5; 4:13; Col. 2:6, 10). The meaning of Gk. *en* ("in") is very broad (cf. Moule, *Origin of Christology*, pp. 54-69; *DNTT*, III, 1192f.), embracing suggestions of incorporation, reference, cause, agency, mode, location, and authority. Common to these varied meanings is the idea that the Christian's identity and relation to God is defined in terms of being "in Christ."

Related to this idea is the metaphor of the body (for literature and discussion, see R. H. Gundry, Sōma *in Biblical Theology with Emphasis on Pauline Anthropology* [1976]). Paul refers to the Church as the body of Christ (e.g., Rom. 12:4f.; 1 Cor. 10:17; 12:12-27; Eph. 3:6; 4:13-16; 5:30; Col. 1:18, 24; 2:19; 3:15). The metaphor includes the ideas of mutual interdependence, growth, and Christ's headship. There are grounds for thinking that Paul did not invent this metaphor. Paul's contemporary, Seneca, addressed the Roman emperor Nero as "the soul of the republic and it is your body" (*De Clementia* i.5.1; cf. ii.2.1; *Epistulae* 92.30). Philo said that the high priest settled disputes and offered sacrifice so that all parts of the nation might be united in one fellowship "as a single body" (*De specialibus legibus* iii.23 [131]; for further examples, see Moule, *Origin of Christology*, pp. 83-85).

It is possible that Paul developed this body metaphor in opposition to ideas of corporate identity that he found in paganism and Judaism. The concept of the "flesh" may have played a part in this development. For the Judaizers the ritual removal of the flesh in circumcision defined membership in the covenant people of God. To Paul this was no more than a mutilation of the flesh (Phil 3:2). God's action in Christ is a "circumcision" that replaces the circumcision of the flesh (3:3; Col. 2:11f.). In place of the Judaizers' concern with the flesh, Paul is concerned to hold fast "to the Head, from whom the whole body, nourished and knit together through its joints and ligaments, grows with a growth that is from God" (Col. 2:19).

Paul's Epistles also contain a wisdom Christology (cf. the discussion of wisdom in Matthew, III.B. above). Although Christ crucified is a stumbling-block to the Jews and folly to the Greeks, He is "the power and the wisdom of God" (1 Cor. 1:24). God "is the source of your life in Christ Jesus, whom God made our wisdom..." (v.30). 1 Cor. 8:6; 10:4; Rom. 10:6-8 may also contain references to wisdom (see Dunn, *Christology in the Making*, pp. 162-196). Paul assigns to Christ the role in the creation and sustenance of the world that pre-Christian Jewish thought assigns to wisdom (1 Cor. 8:6; cf. Prov. 3:19; Wisd. 8:4-6; Philo, *Quod deterius potiori insidiari solet* 16). Perhaps the most striking passage is Col. 1:15-20, which is widely regarded as a pre-Pauline hymn. Whereas wisdom literature describes wisdom as "an image of God's goodness" (Wisd. 7:26; cf. Philo *Legum allegoriae* i.14) and as the first or firstborn in God's creation (Prov. 8:22-31; cf. Sir. 24:9; Philo *Quaestiones et solutiones in Genesin* iv.97; *De ebrietate* 8; cf. also Ps. 104:24), Col. 1:16f. assigns the creative role to Christ. Just as God's "fullness" (*plērōma*) is manifested in His wisdom in creation and providence, so all the fullness of God dwells in Christ "bodily" (Col. 2:9; cf. 1:19). In the sense that the *plērōma* of God was eternal, Christ pre-existed eternally.

The Pauline Epistles do not use the title Son of Man, but the contrasting parallel between Christ and Adam figures prominently at certain crucial points (see Barrett, *From First Adam to Last*; Dunn, *Christology in the Making*, pp. 98-128). In addition to explicit references to Adam in Rom. 5 and 1 Cor. 15, implicit allusions occur in Rom. 1:18-25 and Phil. 2:6-11. The Christ-hymn in Phil. 2, which is not a piece of theological speculation about Jesus' self-divestiture of divine attributes (see the discussion of kenosis in I.B above), appears to be a meditation that draws an implicit contrast between Jesus as the Christ and Adam, who looked to his own interests and sought equality with God. The reference to Jesus' being "in the form of God" (v.6) probably corresponds to the first man's being made in the "image" and "likeness" of God (Gen. 1:26). In Hebrew thought the visible form of God is His glory. Unlike Adam, Jesus did not count equality with God a thing to be grasped (Phil. 2:6; cf. Gen. 3:5); rather, "taking the form of a servant," He "emptied himself" (Phil. 2:7; cf. the prophecy of the Suffering Servant who "poured out his soul to death," Isa. 53:12). Whereas the first man's disobedience brought death into the world and deprived humankind of God's glory, Christ's obedience brings reconciliation, life, and the restoration of glory (Rom. 5:12-21; cf. 1:23; 3:23; 8:17f., 30; 1 Cor. 15:21f., 43, 50-57; Phil. 3:21).

Thus the first man, Adam, is relativized by the person and work of Christ. Human beings were created as God's image, i.e., to be God's representatives with stewardship and dominion over the earth (Gen. 1:26-30; 5:1f.; 9:6; cf. D. J. A. Clines, *Tyndale Bulletin*, 19 [1968], 53-103). But for Paul it is not Adam who is the image and glory of God, but Christ (1 Cor. 15:49; 2 Cor. 4:4, 6; cf. 3:18; 1 Cor. 11:7; Col. 1:15). God's purpose in predestination is that human beings might be "conformed to the image of his Son, in order that he might be the firstborn among many brethren" (Rom. 8:29).

The contrast between Christ and Adam is also seen in the close association of Christ with the Spirit of God. The first man Adam became merely a "living being," but the "last Adam" became a "life-giving Spirit" (1 Cor. 15:45; cf. 2 Cor. 3:17f.). Elsewhere Paul contends that no one can say that Jesus is Lord except by the Holy Spirit (1 Cor. 12:3), that the Spirit's gifts are given for the growth and edification of the body of Christ (12:4–14:40; cf. Rom. 12:4-11; Eph. 4:4-16), and that it is the Spirit who enables people to know the wisdom of God in Christ (1 Cor. 2). In His earthly ministry Jesus was the Christ anointed by the Spirit of God; as Lord it is Jesus who bestows the Spirit.

The identification of Christ with the Spirit appears also

in Paul's description of the Christian life. Christ gives life (1 Cor. 15:45); so does the Spirit (2 Cor. 3:6). Jesus enjoyed a unique sonship in which He familiarly addressed God as "Abba" (Mk. 14:36; cf. Luke's version of the Lord's Prayer [Lk. 11:2], which probably reflects this use). Through the Spirit believers receive adoption as God's children and so are able to address God in the same way (Rom. 8:15f.; Gal. 4:6). Thus the Christian life may be characterized either in terms of one's relationship with Christ (e.g., Rom. 5:11; 6:4; 8:1, 29; 1 Cor. 2:2; 3:11; 4:1; Gal. 2:20) or in terms of being led by and indwelt by the Spirit (Rom. 8:9-17; 14:17; 1 Cor. 3:16; Gal. 3:2). The Church drinks of both Christ and the Spirit (1 Cor. 10:4; 12:13). The Spirit is the agent of the resurrection of Christ and of believers (Rom. 1:4; 8:11). The "spiritual body" (1 Cor. 15:44, 46), i.e., resurrection body, is a body vivified by the Spirit. Believers are justified "in the name of the Lord Jesus and in the Spirit of our God" (1 Cor. 6:11). The Spirit is associated not with the law but with Christ, who sets people free from the law of sin and death (Rom. 8:2; cf. 2 Cor. 3:6, 17f.).

In Paul's writings, therefore, the Spirit of God is irrevocably identified with the Lord Jesus Christ (cf. 2 Cor. 13:14). It is through Christ in the one Spirit that both Jew and Gentile have access to the Father (Eph. 2:18).

Although the Apostle Paul does not formulate the doctrine of the trinity (i.e., he does not use terms such as "trinity," "person," and "substance," and does not say explicitly that the Father, Son, and Spirit are of equal essence), the role that he ascribes to Christ and the Spirit in relation to the Father provides the basis for subsequent Christian trinitarian and incarnational thought.

V. Hebrews.–Whether Hebrews is actually a letter is a matter of debate. It is evidently a public document, designed to set out the significance of Jesus against a background of Jewish beliefs about angels, sacrifice (especially the Day of Atonement ritual), and the covenant. The author's typology, contrasting the historical institutions of Israel with the final reality of Christ, has prompted the suggestion that the writer was a converted Christian Platonist, working in the traditions of Philo's exegesis. The book's dire warnings against lapsing from the faith, especially in the light of possible persecution, indicate the threat of hostility to the Church.

The author begins by showing the superiority of Jesus over the prophets and the angels (He. 1:1-4). This suggests that some were ready to grant that Jesus was a prophet. It also indicates a veneration of angels in the Jewish community. The author's stress on Jesus' humanity as the Son of God would have added significance if the work was written against the background of belief that the apocalyptic "one like a son of man" was an angelic being.

The author's high Christology is announced in the opening thesis, which asserts Christ's divinity in terms that echo wisdom and *lógos* theology (see VI.A below). As the Son, Christ is "the heir of all things" (v. 2). God not only created the world through Him; Christ continues to uphold the universe "by the word of his power" (v.3). F. F. Bruce has stated: "Just as the image and superscription on a coin exactly correspond to the device on the die, so the Son of God 'bears the very stamp of his nature' (RSV). The Greek word *charaktēr,* occurring here only in the New Testament, expresses this truth even more emphatically than *eikōn*, which is used elsewhere to denote Christ as the 'image' of God (II Cor. 4:4; Col. 1:15). Just as the glory is really in the effulgence, so the substance (Gk. *hypostasis*) of God is really in Christ, who is its impress, its exact representation and embodiment. What God essentially is, is made manifest in Christ. To see Christ is to see what the Father is like" (*Epistle to the Hebrews* [*NICNT*, 1964], p. 6).

Elsewhere in the NT sonship has strong overtones of kingship and "Christ" connotes the Messiah. But in some places "Christ" has become virtually a name as well as a title. This may be the case in Hebrews, where it is a designation of Jesus (3:6, 14; 5:5; 6:1; 9:11, 14, 24; etc.). The use of Ps. 45:6f. [MT 7f.] in He. 1:8f., however, suggests that the sense of "Christ" as "the Anointed One" is fundamental to the author's argument (cf. L. C. Allen, "Psalm 45:7-8 (6-7) in Old and New Testament Setting," in Rowdon, ed., *Christ the Lord,* [1981], pp. 220-242). The title Lord is also rare (He. 2:3; 7:14; 12:14; 13:20). Perhaps this relative lack of emphasis on the messianic kingship and lordship of Jesus results from the writer's concern to emphasize Jesus' high priesthood. More precisely, the author sees Jesus as a high priest after the order of Melchizedek, "king of Salem, priest of the Most High God" (He. 7:1; cf. 5:6, 10; 7:11, 15-17). This priesthood includes within it the notion of kingship. Moreover, in Jewish thought high priesthood is superior to kingship, in that the high priest has an access to God that is denied to kings and a power that transcends the political sphere.

Hebrews links Christ's sonship with His high priesthood, and it is on account of His high priesthood that He reigns. The author quotes Ps. 2:7 twice in connection with Jesus' sonship: in He. 1:5 to demonstrate the Son's superiority over the angels (here 2 S. 7:14 is also cited), and in He. 5:5 with regard to His high priesthood. The author also demonstrates the Son's superiority over the angels by applying to Him the psalmist's address to the king, "Thy throne, O God, is for ever and ever . . ." (He. 1:8f.; cf. Ps. 45:6f. [MT 7f.]). But as the argument develops, Christ's sonship is associated with His high priesthood (He. 4:14; cf. 6:6; 7:3; 10:12). Jesus has become a priest after the order of Melchizedek, "not according to a legal requirement concerning bodily descent but by the power of an indestructible life" (7:16). Christ has made atonement once and for all by His own self-offering, thus making obsolete the rituals of the old covenant (8:13–9:28; 10:19-22; cf. Lev. 16). His death and resurrection as the kingly high priest establish the new and eternal covenant (7:22; 8:8-13; 9:15; 10:16-18; 13:20; cf. Jer. 31:31-34). As the kingly high priest He is "seated at the right hand of the throne of the Majesty in heaven" (8:1; cf. Ps. 110:1; He. 1:3, 13; 10:12f.; 12:2).

Hebrews emphasizes not only Christ's divine being, but also His true humanity. In this sense, also, Christ is distinguished from the angels. For the world to come was subjected not to the angels but to humankind (He. 2:5-8; cf. Ps. 8:4-6 [MT 5-7]). Though for a while Jesus was made "lower than the angels," He was later enthroned "because of the suffering of death, so that by the grace of God he might taste death for every one" (He. 2:9). Jesus partook of human nature "that through death he might destroy him who has the power of death, that is, the devil" (2:14). Christ's full humanity is thus as necessary for salvation as His divinity. His humanity also enables Him to sympathize with human weaknesses, for He is a high priest "who in every respect has been tempted as we are, yet without sinning" (4:15). He also knows human agony and fear (5:7). "Although he was a Son, he learned obedience through what he suffered; and being made perfect he became the source of eternal salvation to all who obey him" (5:8f.). Having endured the cross and the hostility of sinners, He has become "the pioneer and perfecter of our faith" (12:2f.). He suffered "outside the gate in order to sanctify the people through his own blood" (13:12).

VI. Johannine Writings.–The questions of the relation-

ship among the various writings associated with John lie outside the scope of this article (*see* JOHANNINE THEOLOGY; JOHN, EPISTLES OF; JOHN, GOSPEL ACCORDING TO; JOHN THE APOSTLE; REVELATION, BOOK OF). The following discussion does not prejudge such questions but merely seeks to note the treatment of the person of Christ in these writings.

A. Gospel of John. The discussion of the Synoptic Gospels (see III above) noted that Matthew, Mark, and Luke begin with what might be called an explicit Spirit Christology. They all stress the role of the Spirit in connection with Jesus' messiahship. But they also develop an implicit Word Christology. Jesus speaks the Word of God, not simply as a prophet but with the authority of God Himself. The Fourth Gospel reverses the emphasis. It begins with an explicit Word Christology and develops an implicit Spirit Christology.

John begins with the declaration, "In the beginning was the Word [*lógos*], and the Word was with God, and the Word was God. He was in the beginning with God; all things were made through him, and without him was not made anything that was made" (Jn. 1:1-3). John goes on to explain Jesus's sonship in terms of the Word become flesh (1:14). The opening words of the Fourth Gospel thus clearly recall the opening words of Genesis, which attribute the creation of all things to the Word of God that brings them into being. As the Gospel develops, it presents Jesus as the Son who does the work of the Father who sent Him (Jn. 5:17-27; 7:28f.; 9:3f.; 17:3f.; cf. 15:24; 20:30f.). Jesus' works show that He is in the Father and that the Father is in Him (10:37f.; 14:10f.; 17:21). His words are not spoken on human authority but are the words that the Father has taught Him (8:28; 12:49f.; 14:10; cf. 7:17; 8:38).

The meaning of "word" (*lógos*) in John has been much debated (cf., e.g., C. H. Dodd, *Interpretation of the Fourth Gospel* [1955], pp. 263-289; J. D. G. Dunn, *Christology in the Making*, pp. 213-250). John's identification of the *lógos* with the creative and revealing Word of God in the OT is unmistakable. But there may well be further overtones. In wisdom literature Wisdom is the medium of creation and revelation; it does what the Word does in other OT writings. Wisdom literature presents numerous striking parallels to what is said of the Word in Jn. 1:1-14 (e.g., cf. Prov. 3:19; 8:22, 30, 35; Wisd. 7:22, 25-30; 8:1; Sir. 24:6; see Dodd, pp. 274f.).

Whether John was also aware of Philo's teaching concerning the *lógos* is debatable. *Lógos* occurs over 1400 times in Philo's works. Drawing on Greek philosophy to interpret the OT, Philo understood the *lógos* as the thought of God coming to expression. As such it plays a prominent part in his teaching on creation (*De opificio mundi* 16-44). John, however, does not speculate about the *lógos* in the same way that Philo did. The most that can be said is that *lógos*, representing Word or Wisdom, was a term that had deep meaning in the Jewish world of the 1st century.

To presuppose a Gnostic background for John's thought (as did R. Bultmann, *Gospel of John* [Eng. tr. 1971]) is unnecessary and anachronistic. The sources on which Bultmann built his case are considerably later than the NT (cf. E. M. Yamauchi, *Pre-Christian Gnosticism: A Survey of the Proposed Evidences* [1973]). It now appears that developed Gnosticism itself drew on Christian teaching and was not in the first instance a contributory factor to the composition of the NT.

Another suggested background for John's *lógos* teaching is Stoicism. In Stoic thought the *lógos* was the principle of rationality and order in the world. It was the immanent divine reason in a philosophical scheme that was basically pantheistic. If John was aware of Stoic thinking, his own presentation of Jesus as the preexistent *lógos*-become-flesh is as much a corrective to Stoicism as it is an endorsement.

John's declaration "and the Word was God" (*kaí theós ên ho lógos*, Jn. 1:1) has provoked much debate. In common Greek usage nouns are regularly given the definite article, and it has sometimes been suggested that the absence of the definite article before *theós* implies that the Word was in some sense divine without actually being God. Others see this as John's attempt to avoid modalism. The passage conforms, however, to a recognized grammatical pattern in the NT, in which definite nouns that precede the verb regularly lack the definite article (E. C. Colwell, *JBL*, 52 [1933], 12-21; C. F. D. Moule, *Idiom Book of NT Greek* [2nd ed. 1959, repr. 1968], pp. 115f.; for other literature, see *DNTT*, II, 81). Thus the grammatical construction does not in itself imply that the Word was anything less than God, and the argument of the Gospel as a whole shows that the author presents Jesus as God incarnate.

Jesus' identification as God incarnate is evident when Thomas greets the risen Jesus, "My Lord and my God!" (Jn. 20:28). Somewhat earlier Jesus says to Philip, "He who has seen me has seen the Father" (14:9). The divine title "Lord" (*kýrios*; cf. Jn. 1:23; 12:13, 38) is also given to Jesus, not only in the post-Resurrection narratives (20:2, 13, 18, 20, 28; 21:7; etc.), but also in narratives of Jesus' ministry (where it is sometimes rendered "master"; cf. 4:1; 6:23, 68; 9:38; 11:2; 13:13-16; 15:15, 20; cf. 12:21 [RSV "Sir"; here it may be simply a polite form of address]). In some of the latter passages John's use of "Lord" reflects his post-Resurrection understanding; nonetheless, Jesus' lordship is clearly present in His actions and teaching.

The Greek formula *egṓ eimi* (lit. "I am"; RSV "It is I" or "I am he") echoes a divine self-affirmation found in Deutero-Isaiah (Jn. 4:26; 6:20; 8:24, 28, 58; 13:19; cf. Mk. 6:50; 13:6; 14:62; Isa. 43:10; 48:12). It also echoes the revelation of the divine name to Moses (Ex. 3:14). The great "I am" discourses in the Fourth Gospel identify Jesus with God's salvation. Jesus is the bread of life (Jn. 6:35, 41, 48, 51); the light of the world (8:12); the door (10:7, 9); the good shepherd (10:11, 14); the resurrection and the life (11:25); the way, the truth, and the life (14:6); and the true vine (15:1, 5). These images take up OT themes and transcend them. It is not manna but Jesus who is the true bread from heaven (6:32f., 49-51; cf. Ex. 16:4; Ps. 78:24; 105:40). The vine is a symbol of Israel (Ps. 80:8-16 [MT 9-17]; Isa. 5:1-7; Jer. 2:21; Ezk. 15; 19:10-14; Hos. 10:1); thus, in identifying Himself as the true vine Jesus is claiming to be the true Israel. In calling Himself the good shepherd, Jesus is assuming a role that properly belongs to Yahweh (cf. Ps. 23:1-4; Isa. 40:10f.). Those to whom Yahweh had previously delegated this role had proved to be unfaithful (Isa. 56:9-12; Ezk. 34), but Yahweh promised to set up over His people "one shepherd, my servant David," who would provide for His people's needs (34:23).

The signs that Jesus performs likewise reveal Him as Creator and Savior, the Son of God, and in so doing they bring life (Jn. 20:30f.; cf. 2:1-11; 4:46-54; 5:1-18; 6:1-14, 16-21; 9:1-14; 11:1-44). His works manifest the preexistent divine glory and thereby bring glory to God (1:14; 2:11; 5:41, 44; 7:18; 8:50, 54; 11:4, 40; 17:4f., 22, 24). Jesus supersedes the tabernacle as the dwelling place of God's glory (1:14; cf. vv. 17f.; Ex. 33:7, 9-11, 18-23; 40:34f.; *see also* SHEKINAH). He also transcends the Torah (Jn. 1:17;

PERSON OF CHRIST

5:39-47; 7:19-23) and the temple (2:18-22). In John, as in the Synoptic Gospels, Jesus' works are an enactment of His teaching on the sabbath (Jn. 5:9-18; 7:22f.; 9:14-16). They force the question of whether Jesus is the Christ, as He revealed Himself to the Samaritan woman (4:25f.; cf. 7:31), or whether He is performing signs and wonders in order to lead the people astray, as Caiaphas argues (11:47-53). Whereas in the Synoptics Jesus is accused of casting out demons by Beelzebul, in John He is accused of being a Samaritan and having a demon (8:48; cf. 7:20; 10:20). Like the Synoptics, John shows that the suggestion that Jesus' works are demonic is self-refuting (10:21; cf. 3:2; 7:31). But whereas in Matthew and Luke Jesus refers His works to the Spirit of God, in John He relates them to the Word of God (7:16f.; 8:51-58; 14:10). In the Synoptics the attribution of Jesus' works to Satan is seen as blasphemy against the Holy Spirit; in John false accusation of Jesus is attributed to the devil (8:44).

It was noted above that John, in contrast to the Synoptic Gospels, begins with an explicit Word Christology. Nevertheless, he develops alongside it an implicit Spirit Christology. As in the Synoptics, Jesus' ministry is understood as a ministry of the baptism with the Holy Spirit (Jn. 1:32f.). For thematic reasons John describes the cleansing of the temple at the outset of Jesus' ministry (2:13-22). John's comment about the Spirit's not having been given because Jesus had not yet been glorified (7:39) does not imply that the Spirit was inactive in Jesus' ministry. It refers rather to the inner experience of the Spirit by believers (cf. v. 38). As the Gospel proceeds, a theology of the Spirit in relation to Jesus unfolds. To see the Kingdom one must be born of the Spirit (3:5-8). True believers (whether Jews or Samaritans) worship God in Spirit and in truth (4:24). The picture of drinking the Spirit through Jesus (7:37f.) is already implicit in 4:10-14 (cf. 1 Cor. 10:4; 12:13).

At the end of the Gospel, Jesus performs an act of prophetic symbolism when He breathes on the disciples and says, "Receive the Holy Spirit" (Jn. 20:22). Underlying the symbolism is the fact that Spirit in Greek (*pneúma*) and Hebrew (*rû[a|ḥ]*) means "wind" or "breath." In breathing on the disciples, Jesus bestows on them the divine breath, that is, His own life and energy. As human words are articulated by human breath, God's Word is articulated by the divine breath, which as such communicates life (6:63; cf. Ps. 104:29f.).

The Paraclete sayings of Jn. 14:16f., 25f. and 16:7-15 constitute a bridge between Jesus' unique possession of the Spirit and His bestowal of the Spirit on the Church. The meaning of PARACLETE (*paráklētos*) has been much discussed. Common to its various occurrences is the sense of "helper." That the Spirit is "another Paraclete" implies that Jesus Himself is the first Paraclete. The Spirit's activity is an extension of Jesus' own activity. The Spirit will abide with the disciples after Jesus' departure to teach them, to remind them of Jesus' words, and to guide them into truth. The Spirit will bear witness to Jesus through the disciples and will convict the world of sin, righteousness, and judgment. The translation of *paráklētos* by "Advocate" is justified by John's forensic structure (cf. G. B. Caird, *Language and Imagery of the Bible* [1980], p. 159). The author takes up the OT theme of God's lawsuit. The first witness to be called is John the Baptist (Jn. 1:6-8). He is followed by Jesus (3:31f.). But since no one can expect to be believed on his own testimony alone, Jesus' testimony is corroborated by the works that the Father has given Him (5:31-36) and by the evidence of the Scriptures (5:39-45). Applying the law of evidence, Jesus invokes the testimony of the Father (8:17f.). The climax of the case comes with Jesus' death. Satan, representing the world of which he is prince, loses his case because he has no hold over Jesus and those for whom He died (12:31f.; 14:30). It is not Jesus who is in Satan's grip but Satan's agents. Although Satan has lost, his agents still try to vindicate their cause and defend their actions. But the disciples will not be on their own in their witness to Jesus. They will have as their Advocate the Spirit of Truth whom the world (i.e., Jesus' opponents) cannot receive (14:17). The Spirit will be in the disciples, bearing witness with them to Jesus (15:26f.) and convicting the world of sin because it does not believe in Jesus (16:9), of righteousness "because I go to the Father" (v.10), and of judgment "because the ruler of this world is judged" (v.11).

The question of Jesus' sonship in John has been much debated (for a survey, *see* JOHANNINE THEOLOGY, IV.A-C; more fully, C. H. Dodd, *Interpretation of the Fourth Gospel*, pp. 228-262; F. J. Moloney, *Johannine Son of Man* [1976]). It is frequently suggested that the titles Son of Man and Son of God have acquired a somewhat different sense in the Fourth Gospel. Nevertheless, it should be noted that John gives prominence to Jesus' messiahship, which is a thoroughly Jewish concept. At crucial points Christhood and Sonship are juxtaposed in a way that suggests that they mutually define each other (Jn. 1:17f.; 20:31). John also stresses Christ's messianic kingship over Israel (1:49; 12:13; 18:33-38; 19:3, 14-22). He is king, not in the sense of having an earthly kingdom (18:36; cf. 6:15; 19:12, 21), but in the sense of being the agent of God's dominion over the world. As such He is also the Son. Jesus' sonship is the result of the Word having become flesh (1:14). Although judged and condemned by men, He is in the bosom of the Father (v.18).

John stresses Jesus' messiahship. Prior to his account of Jesus' ministry, John records a dialogue between John the Baptist and representatives of the Pharisees in which John the Baptist emphasizes that he is not the Christ (Jn. 1:20, 25-27; cf. 3:28). Jesus does not trust Himself to people at large (2:24f.), but He does to inquiring individuals like Nicodemus (3:1-21) and the Samaritan woman (4:7-26). The Samaritan woman is expecting the Messiah (which John translates "Christ" for his non-Jewish readers, 4:25; cf. 1:41). She knows that the Messiah is not simply a political ruler for she defines Him as the one who "will show us all things." The Samaritans who hear her testimony and go on to believe Jesus' word confess, "... we have heard for ourselves, and we know that this is indeed the Savior of the world" (4:42). This confession points to the apolitical, universal character of Jesus' messiahship. The big question for the Jews is whether Jesus is in fact the Messiah (7:26f., 31, 41f.; 9:22; 10:24; 12:34; cf. 4:29). The purpose of the Fourth Gospel is to show that "Jesus is the Christ, the Son of God, and that believing you may have life in his name" (20:31). This is the confession of the godly throughout Jesus' ministry, from the very first disciples (1:41) to Martha at the death of Lazarus (11:27), whose raising forms the climax of Jesus' ministry, revealing Him as the Lord and Savior of life.

The themes of Jesus as the Christ, Son of Man, and Son of God are closely interwoven. As Son of Man, Jesus is the primal, archetypal man, but John does not indulge in metaphysical speculation on this point. His allusions echo OT themes that find their fulfillment in Jesus. The reference to "the angels of God ascending and descending upon the Son of man" recalls Jacob's ladder (Jn. 1:51; cf. Gen. 28:12). The special intimate relationship with God that was promised to Israel finds its focus in Jesus as the Son of Man. The titles Son of Man and Son of God occur

in the dialogue with Nicodemus in Jn. 3. Nicodemus evidently does not share the skepticism of his fellow Pharisees, but his confession (3:2) falls short of attributing messiahship to Jesus. Although the title Christ is not mentioned, the themes of the Spirit and the Kingdom figure prominently in Jesus' reply (vv.5-8). The reference to the Son of Man descending from heaven (v.13) does not necessarily imply His preexistence. It is rather an assertion that He has come from God (cf. v.2; 6:62). This leads to the theme that the Son of Man must be "lifted up" for the salvation of those who believe in Him, as Moses lifted up the serpent in the wilderness (3:14f.; cf. Nu. 21:9). As this theme is developed, the Son of Man is identified with the unique Son of God (Jn. 3:16-18).

Underlying these references to the Son of Man is the thought of Dnl. 7 (see II above). As the Son of Man Jesus is also the judge (Jn. 5:27; cf. 3:16-21) and the giver of life (6:27, 54, 63). As in the Synoptics, the Son of Man will be vindicated (8:28). Jesus' use of the title in connection with His healing of the man born blind (9:35-39) shows that Jesus is more than a prophet and brings into focus the issue between Him and the Jews. The cross is not simply the means by which Jesus is executed; it is the means by which the Son of Man is glorified (12:23, 28; 13:31f.; cf. 17:1-5; 19:5). It is the act upon which salvation depends; thus it manifests God's glory and vindicates both the Father and Jesus.

Son of God is a title expressing messianic kingship (see II above), and the juxtaposition in John of "Christ" with "Son of God" indicates that this identification remains. The context of these designations is not to be defined in the abstract, however, but by what the Gospel says about Jesus and His relationship with the Father. Whereas other human beings may be called "children" (*tékna*) of God through Jesus (Jn. 1:12; 11:52; cf. 8:37-44), Jesus alone is the "Son" (*huiós*). In fact, He is the "only" Son (1:14, 18; 3:16, 18; cf. 1 Jn. 4:9; on *monogenḗs* as "only" and not "only begotten," cf. ONLY BEGOTTEN; D. Moody, *JBL*, 72 [1953], 213-19; *DNTT*, II, 725). The Son comes from the Father (Jn. 3:17; 11:27). As the Son, Jesus does only the works of the Father, and to honor the Son is to honor the Father (5:19-23). Their relationship is one of mutual love (3:35; 5:20). Contrary to what the Jews think, Jesus' works are acts of loving obedience (5:19; cf. 4:34; 5:30; 6:38; 7:16-18; 8:28; 10:36f.). The Father dwells in the Son and the Son in the Father (10:38; 14:10f.; 17:23). To see Jesus the Son is to see the Father (12:45; 14:9).

Jesus' unique relationship with the Father is expressed in His consciousness as the Son. But this does not imply a docetic Christology. The prayers of Jesus express both an intimacy with the Father and also a separateness (Jn. 11:41; 12:27f.; 17:1). Although John omits much of the historical realism in Mark (e.g., the accounts of the baptism, temptation, agony, exorcisms, and the limitations implied in Mk. 6:5 and 13:32), he draws attention to Jesus' weariness and thirst (Jn. 4:6f.). He mentions that Jesus bore His own cross (19:17) and that blood and water came from His side (19:34). It would therefore be incorrect to say that John has no interest in Jesus' humanity. On the other hand, his interest in Jesus' person from first to last is theological and soteriological (1:14; 20:30f.).

B. Johannine Letters. Many scholars have maintained that the letters of John were written against a background of Gnosticism or incipient Gnosticism. This view is based on an interpretation of 1 John in the light of later Gnostic teaching. Support is drawn from Irenaeus's statement that John was an opponent of Cerinthus, whose teaching displayed Gnostic adoptionist tendencies (*Adv. haer.* i.26.1; iii.3.4, 11.1). Comparison of Cerinthus's teaching with the ideas refuted in 1 John indicates wide divergencies between the two. Moreover, the letters themselves do not mention Cerinthus. It has therefore been suggested that the false teachers described in 1 John are some kind of proto-Gnostics who stress the spirit and perfection, and that John counters them by stressing the reality of the Incarnation and the Atonement, together with the need to love and to avoid sin.

A more attractive interpretation, however, sees as the background to 1 John the fundamental conflict between the Church and Judaism. On this view, John's opponents are charging the Church with lawlessness: having abandoned the Torah, Christians are *ipso facto* sinners who walk in darkness, living reckless lives. These opponents deny that Jesus is the Christ and regard His death as proof that He was a heinous lawbreaker who deserved His fate. They furthermore claim that it is they who possess the Spirit.

In response to these charges 1 John emphasizes Jesus' messianic sonship and the principles of conduct that characterize Christian faith. One cannot have fellowship with the Father apart from fellowship with "his Son Jesus Christ" (1 Jn. 1:3). By implication, this fellowship supersedes the law and the covenant community of Israel. Christians do not pretend to be sinless; rather they walk in fellowship with God and with one another, confessing their sins and receiving forgiveness and cleansing from Jesus His Son (1:6-9). Moreover, they have "an advocate" (*paráklētos*) with the Father, "Jesus Christ the righteous" (2:1), whose death is the propitiation (*hilasmós*) for the sins of the whole world (2:2; cf. 4:10). Those who deny Jesus' messiahship (described as antichrists, 2:18, 22) deny both the Son and the Father (2:22f.). Believers, on the other hand, have an anointing (*chrísma*) from "the Holy One" (2:20; cf. the application of this title to Yahweh Himself in Isa. 1:4; etc.). This assertion alludes to Christ's anointing by the Spirit and His gift of the Spirit to believers (cf. 1 Jn. 2:27; 3:24; 4:13).

1 John asserts that believers are not lawbreakers because they are Christians. Everyone who commits sin is guilty of lawlessness (1 Jn. 3:4), but Jesus "appeared to take away sins, and in him there is no sin" (v.5). Moreover, "no one who abides in him sins" (v.6). Mindful of the charges that Jesus was in league with the devil (cf. Jn. 7:20; 8:48, 52; 10:20; Mt. 9:34; 10:25; 12:24; Mk. 3:22; Lk. 11:15), John points out that the very opposite is true. The Son of God came to destroy the works of the devil (1 Jn. 3:8). "No one born of God commits sins; for God's nature abides in him, and he cannot sin because he is born of God" (3:9; cf. 5:18). The statement is not an assurance of the believer's sinless perfection, though it is true of Jesus as the Son of God. The statement contains an assurance that what matters is to be born of God, regardless of whether one is in the community of Israel or not. But this is not a license to sin. Actions attest whether one is a child of God or of the evil one (3:9f.). Obedience to God's commandments is the sign that one knows God (2:3-17) and abides in Him (3:11-24). God's love in sending His Son requires the response of love for God and one's neighbors (4:7-21; cf. 3:16-18).

1 John stresses the importance of recognizing and believing the Spirit's testimony that Jesus is the messianic Son of God. The test of whether a spirit is of God is the confession, "Jesus Christ has come in the flesh" (1 Jn. 4:2). The Spirit of God abides in all who confess that Jesus is the messianic Son of God (4:15). Such believers are God's children (5:1) and share in Christ's victory over the world (5:4). God Himself has given three witnesses that Jesus is the Christ, the Son of God: the water, the blood,

and the Spirit (5:6-8; the meaning of these "witnesses" has been much debated; see the comms.). Indeed, to reject this testimony is to make God a liar (v.10). But those who do believe in Jesus as the Son of God know the true God and have eternal life (vv.11-13, 20).

2 John, like 1 John, warns against false teachers who reject Jesus' messianic sonship (cf. 2 Jn. 3). One who "will not acknowledge the coming of Jesus Christ in the flesh" is called an "antichrist" (v.7). "Any one who ... does not abide in the doctrine of Christ does not have God; he who abides in the doctrine of Christ has both the Father and the Son" (v.9).

C. Revelation. The book of Revelation is unique in genre in the NT. It describes itself as an "apocalypse" (*apokálypsis*) or "revelation" of Jesus Christ (Rev. 1:1), but it also calls itself "prophecy" (1:3; cf. 10:11; 19:10; 22:6-19). It shares with Jewish apocalyptic literature the features of visions, symbolism, and interpretation of the course of history from a divine perspective. But there are also important differences. The medium of the revelation is not a remote figure like Enoch, but John, who is known to his readers as a fellow Christian and sufferer for Jesus (1:1, 4, 9). The work embodies a letter form (1:3; 2:1–3:22; 22:6-21). It is a message of visionary consolation, interpreting Jesus Christ in the light of OT symbolism and history in the light of Jesus Christ. Its theology appears to be related in some way to that of the Fourth Gospel and the Johannine letters, but the precise relationship is the subject of much discussion.

The book of Revelation interprets history in the light of the exalted Christ. It identifies Him as "one like a son of man" (Rev. 1:13; 14:14; cf. Dnl. 7:13; 10:5; 1 En. 46:1-4). He is thus the righteous one to whom dominion is given. Whether or not the figure in Daniel was originally an angelic being. Revelation makes it clear that the figure finds fulfillment in Jesus, to whom the angels are themselves subject (Rev. 1:1, 20; 2:1, 8, 12, 18; 3:1, 7, 14; 7:1–10:7; etc.). Jesus Christ fulfills the vision of Dnl. 7 in that he is "the faithful witness, the firstborn of the dead, and the ruler of kings on earth" (Rev. 1:5). He is "alive for evermore," having "the keys of Death and Hades"(1:18). He is the Son-King who rules the nations (2:27; 12:5; 19:15; cf. Ps. 2:8f.). Whereas other NT writings quote Ps. 2:7 to identify Jesus as the messianic Son of God (Mt. 3:17; Acts 13:33; He. 1:5; 5:5; 2 Pet. 1:17), Revelation uses the psalm in its prophetic vision of Jesus Christ as the judge and ruler of the world (cf. Rev. 1:7; 14:14, 18-20; 19:11-16; 22:12).

The title Son of God occurs only once (Rev. 2:18), in a context that suggests judgment and kingship and culminates in an echo of Ps. 2. It suggests that Christ's sonship is to be understood in terms of Jesus' exalted messianic kingship. Likewise, other passages that focus on Christ's dominion refer to God as Jesus' Father (Rev. 1:6; 2:27; 3:5, 21; 14:1). At the same time the one who rules is called the Lamb of God. In the Fourth Gospel John the Baptist calls Jesus "the Lamb [*amnós*] of God, who takes away the sin of the world" (Jn. 1:29; cf. v.36). Similarly, Revelation describes Jesus' death as the slaying of the Lamb (*arnion*) of God. Indeed, the title becomes a major category for understanding Jesus' messiahship (Rev. 5:6-13; 6:1, 16; 7:9f., 14, 17; 12:11; 13:8; 14:1, 4, 10; 15:3; 17:14; 19:7, 9; 21:9, 14, 22f., 27; 22:1, 3). As the Lamb, Jesus is both the sacrificial victim and the shepherd-king (5:6-14; 7:17; 14:1, 4).

The book of Revelation closely associates the Spirit with Christ. John receives his visions of Christ "in the Spirit" (1:10; 4:2; 21:10; cf. 14:13; 19:10; 22:6, 17). The words of the exalted Christ are also identified as the words of the Spirit (2:7, 11, 17, 29; 3:6, 13, 22).

At first sight, Revelation's use of the title "Word [*lógos*] of God" (19:13) to describe the warrior Messiah seems somewhat remote from the Fourth Gospel's use of *lógos* (cf. Jn. 1:1). The usage here is more closely related to that in Wisd. 18:15f. (cf. Philo *De somniis* i.157-59). Nevertheless, in the development of the Gospel of John the Word incarnate is also He who is King, Judge, and Lord.

Revelation preserves both Christ's identity with and His separateness from God. Christ is described as "the Amen, the faithful and true witness, the beginning of God's creation" (Rev. 3:14; cf. Col. 1:15, 18). But it is God who is worshiped as Creator (Rev. 4:11; 14:7). Nevertheless, it is granted to Christ to sit with the Father on His throne (3:21; 7:15-17; 22:1, 3). He receives worship like that addressed to God (cf. 4:11; 5:12f.). The book opens with a distinction between Jesus and God (1:1). But this does not mean that the author is implicitly denying the divinity of Christ. Rather, the author appears to use "God" where other NT writers use "Father." The reason for this seems to lie in the author's stress on the sovereign majesty of God, who is the ruler and judge of all beings. As we have noted, "Father" occurs in passages that focus on the kingdom and dominion of the Son — passages that have as their background the filial relationship of the king as the Son of God. Thus the distinction between Christ and God reflects the fact that the Father is not identical with the Son; it also recognizes that Christ in His humiliation and His exaltation is human as well as divine.

In other passages Christ is described in terms that properly apply to God. The description of the "one like a son of man" (Rev. 1:13-15) corresponds to that of the "ancient of days" in Dnl. 7:9. His voice is like the voice of God (Rev. 1:15; cf. Ezk. 1:24). God Himself is the Alpha and Omega, the first and the last (Isa. 44:6; 48:12; Rev. 1:8; 21:6; cf. Ex. 3:14), but so is Jesus Christ (Rev. 1:17; 22:13). The final visions depicting the new Jerusalem as the bride of the Lamb (Rev. 21–22) make clear that God's covenant promise to dwell with His people is realized only in and through the Lamb (e.g., 21:22f.; 22:12f.). Grace and peace come from God and from the Lord Jesus Christ (1:4f.; 22:21). Appropriately, the book opens and closes with this theme.

VII. Conclusion.—Radical scholars see in the NT an evolution of Christology. Such theology presupposes that Jesus was originally no more than a devoutly religious figure who was transformed by Christian faith into a divine being. The present writer, however, sees not an evolution (which suggests a change of one species into another) but a development or series of developments (for this view, see C. F. D. Moule, *Origin of Christology*, pp. 1-10), e.g., a progressive understanding of a reality that was present to begin with. The reality to which the NT testifies is that God Himself was personally present in Jesus of Nazareth. He who made and sustains the universe was present in this human life in a unique way, inviting all human beings to share the fullness of life in Him through the gracious reconciliation brought about by His life, death, resurrection, and ascension. This presence of God in Christ has to be understood through Jesus' words and actions and in terms of the NT thought-forms, which need to be interpreted in the context of their meaning in the NT text. In other words, one's understanding of the person of Christ should be read out of the NT rather than read into it.

This review of NT Christology has at various points drawn attention to Spirit Christology and Word Christology. Spirit Christology draws attention to the Holy Spirit's anointing of Jesus as the Christ and the Spirit's activity in and through Christ. Word Christology focuses on Jesus as the one who not only speaks the Word of God

but *is* the Word of God incarnate. Similarly, Wisdom Christology presents Jesus as the incarnation of the Wisdom of God. These approaches to Christology are ultimately complementary. In the OT Yahweh did not deal with His people directly, for no one could see God's face and live. He spoke to them in His Word or wisdom and was present in His life-giving Spirit (Heb. *rû[a]h* or Gk. *pneúma*, both meaning "wind" or "breath"). The Word of God is uttered by the breath of God. Thus Word and Spirit are not identical but they are inseparable. They represent the mind of God and the life of God. In Jesus Christ, the Son of God, the Word of God was made incarnate by the Spirit of God.

Later Christian thinkers spoke of the trinity and the Incarnation. These terms are not found in the NT itself. Rightly understood, however, they express the witness of the NT. The NT witness refuses to separate the trinity from the Incarnation and the Incarnation from the trinity. It invites us, rather, to find the Father through the Son in the power of the Spirit.

PERSUADE [Heb. piel of *šāsaʿ*] (1 S. 24:7 [MT 8]); AV STAY; NEB REPROVE SEVERELY; [hiphil of *bārâ*–'give food for comfort'] ("persuade to eat," 2 S. 3:35); AV "cause to eat"; [hiphil of *nāṭâ*–'turn aside'] (Prov. 7:21); AV "cause to yield"; NEB "lead [one] on"; [Gk. *peíthō*] (Mt. 27:20; Acts 12:20; 14:19; 18:4; 19:26; 2 Cor. 5:11); AV also "make [one's] friend"; NEB also WIN OVER, TRY TO CONVINCE, "with propaganda," "address [one's] appeal"; [*anapeíthō*] (Acts 18:13); NEB INDUCE; **BE PERSUADED** [Heb. pual of *pāṭâ*–'be corruptible'] (Prov. 25:15); [Gk. mid. or pass. of *peíthō*] (Acts 17:4; 21:14; 26:26; Rom. 14:14); AV also BELIEVE; NEB also BE CONVINCED, BELIEVE; **PERSUASION** [Gk. *peismonḗ*] (Gal. 5:8); **PERSUASIVENESS** [Heb. *leqaḥ*–'teaching,' 'gift of persuasion'] (Prov. 16:21, 23); AV LEARNING; NEB KNOWLEDGE, LEARNING.

"Persuade" can be used in either the positive sense of "convince" or the negative sense of "mislead" or "seduce." The AV OT uses "persuade" in the negative sense for the Heb. piel of *pāṭâ* in 1 K. 22:20-22 (RSV, NEB, "entice") and the hiphil of *sûṭ* in 2 K. 18:32; 2 Ch. 18:2; 32:11, 15; Isa. 36:18 (RSV "mislead," "induce"; NEB "mislead," "incite").

The MT of 1 S. 24:7 (MT 8) is difficult, because most commentators have agreed that *yᵉšassaʿ* (lit. "tore to pieces") is too strong for the context, even if it is taken figuratively (but cf. NEB; KoB [p. 999] suggests "disperse"). Various emendations have been suggested (see comms.); the RSV follows the LXX (*peíthō*).

Greek *peíthō* occurs with a variety of nuances in the NT. It can have the negative sense of "mislead" or "seduce" (e.g., Mt. 27:20; Acts 12:20; 14:19; 19:26; cf. *anapeíthō* in 18:13; *peismonḗ* in Gal. 5:8). Positively it can mean "convince" or "be led to a firm conviction" (cf. Acts 17:4; 18:4; Rom. 14:14; 2 Cor. 5:11). The AV also renders *peíthō* "persuade" in Mt. 28:14 (RSV "satisfy"; NEB "put matters right"); Acts 13:43 (RSV, NEB, "urge"); 19:8 (RSV "plead"); 28:23 (RSV "try to convince"; NEB "seek to convince"); Gal. 1:10 (RSV "seek the favor of"; NEB "canvas for support"). The AV often has "be persuaded" for the middle or passive of *peíthō* (e.g., Lk. 16:31; 20:6; Rom. 8:38; 15:14; He. 6:9; etc.).

Agrippa's answer to Paul in Acts 26:28 has received many translations and interpretations. The text with the strongest MS support has Gk. *en olígǭ me peítheis Christianón poiḗsai*. The AV, reading *genésthai* ("to be") in place of *poiḗsai* ("to make"), renders, "Almost thou persuadest me to be a Christian." The RSV, reading *peíthē* ("you think") in place of *peítheis* ("you persuade" or "you try to persuade"), offers, "In a short time you think to make me a Christian!" Perhaps the best translation is Haenchen's: "Soon you will convince me to play the

Christian" (*Acts of the Apostles* [Eng. tr. 1971], p. 689; see also other comms.). N. J. O.

PERUDA pə-rōō'də. *See* PERIDA.

PERVERSE; PERVERSELY; PERVERSENESS [Heb. *yārat* (Nu. 22:32), hiphil and niphal of *'āqaš*–'be, make, or prove crooked' (Job 9:20; Prov. 28:18), *'iqqēš*–'crooked' (Dt. 32:5; 2 S. 22:27; etc.), niphal part. of *hāpaḵ*–'turn' (Prov. 17:20), *tahpuḵôṯ*–'perverse things' (Dt. 32:20; Prov. 2:14; etc.), niphal part. of *'āwâ*–'do wrong, distort, disturb' (1 S. 20:30; Prov. 12:8), hiphil of *'āwâ* (1 K. 8:47; 2 Ch. 6:37), niphal part. of *lûz*–'go the wrong way' (Prov. 3:32; Isa. 3:12), *sûg*–'deviate' (Prov. 14:14), piel of *'āwal*–'act wrongfully' (Isa. 26:10), *selep*–'deceit' (Prov. 15:4); Gk. perfect pass. part. of *diastréphō*–'twist about' (Mt. 17:17 par. Lk. 9:41; Acts 20:30; Phil. 2:15)]; AV also FROWARD-(NESS), BACKSLIDER, DO AMISS, etc.; NEB also MUTINOUS, CROOKED, WARPED, CORRUPT, etc. Turned away from what is morally right or good.

The predominant context of "perverse" in the RSV OT is wisdom literature, especially Proverbs. It is particularly related to the concept of the WAY or PATH, which is a metaphor for the course or direction of one's life. Most broadly, two alternatives are open to humanity: the way of the Lord (Ps. 18:21; etc.), which is good and right (1 S. 12:23); or the way of evil (Prov. 2:12; 8:13; etc.), which is the way of sinners and the unrighteous (Ps. 1:1). *See also* WISDOM.

The various Hebrew terms rendered "perverse" describe the evil way and those who follow it. The way of the perverse is full of thorns and snares (Prov. 22:5) and will lead them into the pit (28:18). On the other hand, those who walk in integrity will be delivered (28:18) and are "better," though poor, than the rich who are perverse (v. 6). An interplay between outward, physical direction and inward, spiritual condition may be intended in the story of Balaam, where the "angel of the Lord said to him . . . 'Behold, I have come forth to withstand you, because your way is perverse before me'" (Nu. 22:32). Here Heb. *yārat* means literally "precipitate" or "steep." Thus the meaning may be either that Balaam was proceeding recklessly without heed to divine warnings, or that the sides of the road were steep and the walls prevented a turning aside — or it could mean both of these (see N. H. Snaith, *Leviticus and Numbers* [*NCBC*, repr. 1977], p. 290).

The perverse person "spreads strife" (Prov. 16:28) and is "filled with the fruit of his ways" (14:14). Such a person is plainly "an abomination to the Lord" (3:32). Job in his extremity complained bitterly of God's apparent injustice: "Though I am innocent, my own mouth would condemn me; though I am blameless, he would prove me perverse" (Job 9:20); but David confessed, "with the pure thou dost show thyself pure; and with the crooked thou dost show thyself perverse" (2 S. 22:27; Ps. 18:26 [MT 27]). Perverseness is associated with the heart (Ps. 101:4), the eyes (Prov. 16:30), the mind (11:20; 12:8; 23:33), and speech (19:1; cf. Acts 20:30) — particularly the mouth (Prov. 10:32) and tongue (v. 31; 15:4; 17:20). A perverse heart results in perverse actions (cf. 1 K. 8:47 par. 2 Ch. 6:37; Prov. 2:14; Isa. 26:10; 30:12). Saul in a fit of anger hurled the epithet at Jonathan: "You son of a perverse [niphal part. of *'āwâ*, lit. "bewildered, distressed, agitated"], rebellious woman" (1 S. 20:30).

The term CROOKED is sometimes used in conjuction with "perverse" (e.g., Prov. 17:20), most notably in the phrase "crooked and perverse generation," which indicates conduct that is twisted or corrupted from the way of God's righteousness and favor. The phrase is used by Moses to describe apostate Israel (Dt. 32:5; cf. v. 20) and by Paul (alluding to Dt. 32:5) to describe the pagan world in which the Philippian Christians lived (Phil. 2:15). Jesus may also have been alluding to Moses' words when He exclaimed, "O faithless and perverse generation, how long am I to be with you?" (Mt. 17:17 par. Lk. 9:4). Scholars disagree as to whether Jesus was primarily addressing the father of the epileptic boy, the disciples, the crowd, or all those who were present (see comms., esp. J. A. Fitzmyer, *Gospel According to Luke*, I [*AB*, 2nd ed. 1983], 809). While this judgment is specifically applied to those present, Matthew and Luke are "perhaps seeking to extend it to the unbelieving, non-Christian world" in general (*TDNT*, VII, *s.v.* στρέφω: διαστρέφω [G. Bertram]).

D. K. MCKIM

PESHITTA. *See* VERSIONS.

PESTILENCE [Heb. *deḇer*; Gk. *loimós*; also Heb. *māweṯ* (Job 27:15; Jer. 43:11); Gk. *thánatos* (Rev. 6:8; 18:8)]; AV also DEATH (Job 27:15; Jer. 43:11; Rev. 6:8; 18:8). A sudden fatal epidemic, generally regarded as a divine visitation. The reference to pestilence in Ps. 91:6, "walking in darkness," alludes to its obscure etiology. In the wilderness wanderings the rebellious Israelites were frequently threatened with pestilence (cf. Nu. 14:12; Dt. 28:21), which appears to have materialized on certain occasions (Nu. 11:33; 16:46; 25:8). Solomon's prayer of dedication (1 K. 8:7) sought the removal of pestilence when national repentance was apparent. Am. 4:10 compares pestilence with the Egyptian plagues; in Hab. 3:5 it heralds divine judgment (cf. Ex. 5:3; 9:15; Lev. 26:25; etc.). The apocalyptic discourse of Lk. 21:11 (Mt. 24:7, AV) couples pestilence (Gk. *loimoí*) with famine.

The Latin term *pestilentia* is connected with *pestis* ("plague"), but the ancients appear to have distinguished plague from pestilence. Of the infectious diseases such as typhoid, cholera, dysentery, bubonic plague, and smallpox that scourged the ancient Near East, the one most frequently described as "plague" was bubonic infection. "Pestilence," sometimes described as "noisome," was often associated with besieged cities, suggesting such diseases as enteric fever (typhoid) or cholera resulting from contaminated water supplies.

See also PLAGUE. R. K. H.

PESTLE [Heb. *ʿēlî*] (Prov. 27:22). Usually a cylinder or rounded cone to be held in the hand for pounding in a MORTAR.

The term pestle is used only once in the Bible, and there the normal function of the pestle is clear. Pestles are frequent finds on archeological excavations. They are usually made of magmatic stone or of hard limestone, though metal pestles were probably used with metal mortars.

L. G. HERR

PETER [Gk. *Petros*, for *Kēphas* < Aram. *kêpā'*]. A disciple of Jesus and apostle of the early Church.

The NT literature gives prominent place to Peter, whose life and ministry fall conveniently into the three categories indicated by O. Cullmann's comprehensive study, *Peter: Disciple-Apostle-Martyr.*

I. Disciple
  A. Early Days
  B. Call to Discipleship
  C. Role in Jesus' Ministry
II. Apostle
III. Martyr

I. Disciple.–A. Early Days. Occasional references to

Peter' original name Symeon (Gk. *Symeōn*; see Acts 15:14; 2 Pet. 1:1 in one MS tradition) show that he belonged to the Jewish community. His home was in Galilee, at Bethsaida (Jn. 1:44). While this locality was Jewish, it was also cosmopolitan (so O. Cullmann, *The NT* [Eng. tr. 1968], p. 107). Both Andrew, Peter's brother, and Philip, who also came from Bethsaida, bear Greek names; and the bilingual setting arising from Greek culture explains why Simon became his adopted name, grecized from Symeon.

His father's name was Jonah = John (Mt. 16:17; Jn. 1:42). (The notion that Bar-Jona means "anarchist, zealot" is an unfortunate eccentricity.) At some unspecified point in his life he had married (Mk. 1:30) a wife who in later days accompanied him on his missionary tours, evidently to Corinth, where she was known (1 Cor. 9:5).

His trade, both at Bethsaida on the east bank of the Jordan River and at Capernaum, a port on Lake Gennesaret, was fishing (Mk. 1:16-21). Lk. 5:1-11 indicates something of this trade, which he resumed for a while in the later part of the gospel story (Jn. 21:1-3).

Concerning his cultural attainments, Acts 4:13 should not be pressed unduly. Probably, if C. H. Dodd is correct (*Interpretation of the Fourth Gospel* [1953], p. 82), the description of Peter and John as "uneducated, common men" means no more than that they were ignorant of the finer points of the rabbinical interpretation of the Jewish Torah. Exposure to Hellenistic culture in Bethsaida is a counterbalancing argument in favor of Peter's general education. He spoke his native language with a special, recognizable accent (Mk. 14:70; Mt. 26:73).

Both Peter and his brother Andrew were followers of John the Baptist (Jn. 1:40-42), as indeed were a considerable number of the original disciples (Acts 1:22) before their call to service by Jesus.

B. Call to Discipleship. The Fourth Gospel preserves an authentic tradition of Jesus' Judean ministry, part of which included the summons of Jn. 1:40-42. This context has the first replacement of the name "Simon" by "Peter." The middle term is Aram. *kēpā'* (Gk. *Kēphas*), meaning "stone" or "rock." This was to be his new name, symbolizing a change of character. Hereafter he would be a new man, consolidated by his relationship to Christ his Lord. The name is probably proleptic, anticipating the time when Peter would take his place as a pillar apostle (Gal. 2:9) and a foundation stone, which he and the other apostles were to be as original witnesses to the gospel (Eph. 2:20; Rev. 21:14). "Kephas" (Cephas) is Paul's normal appellation of him, except in Gal. 2:7f.

The reference to Cephas in 1 Cor. 15:5 is important in this context. There is general agreement that Paul here quotes from a Jewish-Christian (or less likely a Hellenistic-Christian) creed that he received from his predecessors, probably Jewish-Christian believers. If so, the use of the Semitic name Cephas in the post-Resurrection appearance to Peter bears witness to the time when the name-changing took place, suggesting that it was as the risen Lord showed Himself to "Simon" (cf. Lk. 24:34: "The Lord has risen indeed, and has appeared to Simon") that Simon became Cephas (or Peter, as the name became rendered into Greek). This suggestion is taken up in Mt. 16 and explains the importance of Peter's confession.

Traditional site of Peter's house in Capernaum (W. S. LaSor)

The first introduction to Jesus in Judea makes more intelligible the subsequent response Peter made when Jesus called him to abandon his trade and become His full-time disciple (Mk. 1:16f.; 10:28; an expanded version of this call is in Lk. 5:1-11). A further invitation to belong to the inner group of the Twelve is given in Mk. 3:13ff., and the new name is mentioned at that time. Mark calls him Simon up to 3:16; thereafter Mark refers to him as Peter.

C. Role in Jesus' Ministry. Still another honor was his as Jesus permitted a group of three disciples to accompany Him on special occasions. Peter is included in the trio along with James and John (see Mk. 5:37; 9:2; 13:3; 14:33). In the lists of the Twelve, Peter stands at the head (Mk. 3:16, etc.; cf. Acts 1:13).

Mark's Gospel has a distinctive role for Peter. Although he is ranked as the first of the disciples and is regarded as the chief spokesperson of the Twelve, Mark singles him out for blame at critical points in the narrative. At Mk. 1:35-37 Peter leads the way to find Jesus and tries to press on Him the role of a popular teacher. At Caesarea Philippi (8:27-33) Jesus receives Peter's confession of messiahship with a certain reserve, and announces that Peter's subsequent remonstrance is the work of Satan. The following incident of the Transfiguration (Mk. 9:2-10) contains at least one puzzling verse (6): in response to Peter's suggestion to erect three booths, the parenthetic note says, "For he did not know what he should answer." Strictly taken, this statement suggests that there was an implied rebuke, and Peter is dumbfounded and unable to respond. A reason for a rebuke, that Peter's suggestion of the booths — associated with nationalistic triumph — has offered Jesus a painless way to His messianic glory, is given by some interpreters of Mark (see R. P. Martin, *Mark: Evangelist and Theologian* [1972], p. 130), endorsing B. W. Bacon's startling observation that Mark "never introduces the Apostle to the circumcision for any individual part without making him the target for severe reproof and condemnation" (*Is Mark a Roman Gospel?* [1919; repr. 1969], p. 76).

Other examples of Peter's role being less than flattering are his being singled out for reproach in Gethsemane (Mk. 14:37) and his denials (Mk. 14:66-72), which are recounted in such a way as to include the suspicion that he may have "cursed" his Lord (v. 71) — a cardinal offense in the early Church (1 Cor. 12:3; M. Polyc. 9:3). There is a brighter side in the promise of Mk. 16:7 — unique to this Gospel — when the risen Lord sends a message to Peter.

At face value, Mark was being painfully honest in portraying Peter's humanity and weakness, and eventual recovery. But perhaps this passage shows an early stage of the story of Peter, one in which his subsequent glory as martyr and apostolic hero has not yet thrown its light on this first phase of his relationship with his master.

Matthew's Gospel offers a picture of Peter modified by ecclesiastical developments. We can see this trend in the way Peter is made more prominent as inspired leader and the disciple credited with a role of intermediary between

Jesus and the other members of the Twelve (see Mt. 15:15; 17:24-27; 18:21f.). In two special incidents Peter plays a unique role, both in action (14:23-33) and in word (16:17-19).

The first, the "walking on the water" incident, which in Matthew's account includes Peter's request to accompany Jesus and his subsequent lapse of faith, is part of this Evangelist's intention to show both the dignity and the frailty of Peter. Because his weakness is only too apparent, it cannot be that Matthew wishes to exalt him as the uniquely preeminent apostle (so P. Benoit, *L'évangile selon St. Matthieu* [*Sainte Bible*; 3rd ed. 1961], and other Roman Catholic commentators), even if Matthew does give Peter a distinctive status. More likely is Cullmann's view that Peter here is a typical disciple who achieves greatness only in dependence on the Lord. His role is exactly that of "spokesman for the Twelve," not more nor less (*Peter*, pp. 23-27). Yet it cannot be denied that the enlarged pericope is introduced for hortatory purposes, with Peter playing the role of the model disciple who looks to his Lord in time of danger.

H. J. Held sees a deeper meaning in the part given to Peter here. He maintains that not only is Christ portrayed as deliverer from need and danger, he also "gives his disciple a share in his power to walk on the water," and so Matthew enhances Peter's role as leader of the Twelve (G. Bornkamm, G. Barth, and H. J. Held, *Tradition and Interpretation in Matthew* [Eng. tr. 1963], p. 272).

The confession at Caesarea Philippi (16:17-19) is more problematical. The authenticity of the pericope has been challenged on textual grounds. A. von Harnack ("Der Spruch über Petrus als der Felsen der Kirche," *Sitzungsbericht der Berliner Akademie der Wissenschaft* [1918], pp. 637ff.) tried to show that the passage is an interpolation into the original text, made at Rome in the time of Hadrian (A.D. 117-138). But this is a vain plea, without any external support. Moreover, the Semitic coloring of the passage testifies to its primitive character.

A second argument objects that linguistically the term for "church" (Gk. *ekklēsía*) is an anachronism. Linguistic researches show, however, that the true equivalent of *ekklēsía* is the Heb. *ʿēḏâ* ("assembly") or Aram. *kᵉnîštâ* ("gathering"). Thus it is more appropriate to translate the Greek word by "people of God" than "church" (so J. Jeremias, *NT Theology* [Eng. tr. 1971], p. 168), in this way meeting the argument that Jesus could not have envisioned an institutional body when using the words recorded in Mt. 16:18 and 18:17. No such concept is required, since He more reasonably had in view the eschatological people of God that He had come to gather in His ministry and beyond.

A third objection raises the issue of the subsequent history of the Church. It is said that Peter did not occupy the authoritative position that this logion of Jesus in v. 19 would inevitably have secured for him. The argument hinges on the meaning of the "power of the keys" (*see* KEYS, POWER OF THE). For the Jewish background, the comms. on Lk. 11:52 par. Mt. 23:13 should be consulted. Evidently what is meant here is "the spiritual insight which will enable Peter to lead others in through the door of revelation through which he has passed himself" (R. N. Flew, *Jesus and His Church* [2nd ed. 1943], p. 95); and this "key" was not the exclusive possession of Peter — even if Mt. 16:19 contains a promise directed particularly to him — though on the day of Pentecost by common consent he was the first to use it. And in Acts 10 he opened the door of faith to Cornelius as the firstfruits of the Gentile mission (see Acts 11:18). On the Jewish setting of the terms "binding" and "loosing," see *TDNT*, II, *s.v.* δέω (Büchsel).

Peter's confession was the turning point in Jesus' ministry. To him was accorded by divine revelation the insight into the mystery of Jesus' person, whom he acknowledged as Israel's Messiah and the divine Son. The subsequent rebuke (Mt. 16:21-23) is directly related to Peter's misunderstanding of what messiahship involved and his attempt to dissuade Jesus from the path to the cross. Mark preserves the vivid narration (Mk. 8:32f.) that exposes Peter's frail humanity, which was open to Satanic influence and resulted in his becoming the mouthpiece of Jesus' enemy, once defeated in the wilderness temptation (Mt. 4:1-11).

On the other hand, Matthew's account of the incident at Caesarea Philippi, by its inclusion of Peter's faith in Jesus as Son of God and the encomium he received as the rock, does give the apostle a special place in the divine economy. This description has suggested to some scholars that the locus of the revelation (Mt. 16:17) and the conferring of the honor as "rock"-man is better placed in the time of the Resurrection appearances. Such a dislocation of the Gospel narrative cannot be supported from the text itself, which, however, may hold some hints that Peter's attestation of faith looks forward to the situation as it developed in the later Church, especially Matthew's church, where Peter was evidently a revered teacher. There is a fairly strong consensus that Matthew's community regarded itself as a "school" (K. Stendahl, *School of St. Matthew* [1954]) or a "study-group" (C. F. D. Moule, *Birth of the NT* [1962], p. 88), patterned on the Jewish idea of the synagogue as *bêṯ hammiḏrāš*, "house of learning." Matthew may well have been regarded as an honored teacher in that situation (cf. 13:52), so it is not surprising that he would wish to exalt Peter's role and so claim apostolic sanction for those elements in his Gospel that set out answers to pressing issues in his day, namely, the opposition of Pharisaic Judaism in the post-Jamnia period (W. D. Davies, *Setting of the Sermon on the Mount* [1963], p. 315) and the inroads of antinomian — and maybe charismatic — leaders (G. Barth, in G. Bornkamm, G. Barth, and H. J. Held, *Tradition and Interpretation in Matthew* [Eng. tr. 1963], pp. 159-164) who were challenging Matthew's authority as a church teacher. The appeal to Peter's office (at Antioch?) would therefore be important in the shaping of the Gospel tradition in the church of Matthew's constituency. M. Hengel (*Acts and the History of Earliest Christianity* [Eng. tr. 1979], p. 98) has argued that the church at Antioch came increasingly under Petrine influence after Paul had declared his position regarding gentile freedom from the Jewish kosher laws and suffered a sense of isolation from his Syrian base. Hengel thus accounts for the special role played by Peter in Matthew (14:28f.; 16:16-19; 17:24; 18:21) and suggests that Antioch was the home of both that Gospel and its teaching on Peter's status.

An integral part of the confession at Caesarea Philippi is the subsequent experience of the Transfiguration (note the date-connection, so rare in the Gospels, Mk. 9:2 par.). Peter is again spokesperson for the three, and again misguided and fallible (Mk. 9:5). Later reflection showed the reality of this vision, and Peter benefited from hindsight (1 Pet. 5:1; 2 Pet. 1:16-18). His proud claims to loyalty are shown up as hollow mockery by the events in Gethsemane, and his threefold denial (Mk. 14:66-72) is painfully told. The end is not without hope, for the promise of *au revoir* (Mk. 14:28) is confirmed by a personal message to Peter (Mk. 16:7) and is followed by a personal appearance of the living Christ (Lk. 24:34; 1 Cor. 15:5).

II. Apostle.–After Pentecost Peter became the leading figure in the apostolic Church. Here we are in touch with the role of Peter in Lukan Christianity. The Gospel of

Luke portrays Peter in a more favorable light than Mark's account. There is no rebuke of Peter for his false messianic presuppositions (Lk. 9:20-22), and Luke has Peter's confession in a limpid, verbless form as though to make it a proto-creed of the Church (see R. P. Martin, "Salvation and Discipleship in Luke's Gospel," in J. L. Mays, ed., *Interpreting the Gospels* [1981], pp. 214-230).

Peter's eventual restoration is given more shape in the garden scene (Lk. 22:31f.), and Peter's role as leader is clearly to the fore, as part of Luke's interest in what has been termed the first exercise in "pastoral theology" (J. C. O'Neill; details in Martin, "Salvation and Discipleship in Luke's Gospel," pp. 227-230). The Lukan depiction of Peter emphasizes the parenetic elements in his character (esp. in 5:1-11) as a prelude to Luke's fuller description of him in Acts as church leader and Jewish-Christian missionary.

Acts 1–12 shows that Peter was clearly the dominant influence, both in decision making and public preaching (see 1:15-22; 2:14-40; 3:12-26; on his Pentecostal address see R. F. Zehnle, *Peter's Pentecost Discourse* [1971]).

Before the Jewish authorities (Acts 4:5ff.) Peter is spokesperson; and his many-sided role included that of forceful leader (5:1-11) and miracle worker (5:15). The evidence, however, should not be exaggerated, and H. Conzelmann's attempt (comm. on Acts [*HNT*, 1963], p. 39) to find in 5:3 traces of a characterization of Peter as a "divine man" who knows all human secrets is to be refused. The Holy Spirit's endowment of the apostle is a better explanation, and it is this factor that accounts for the dramatic change between Peter's character in Gethsemane and in the courtyard and his new boldness (4:13) as a Christian witness.

Peter is presented as a church leader in his handling of the situation at Samaria and his encounter with Simon (Acts 8:14-24; on the exegetical problems involved see J. D. G. Dunn, *Baptism in the Holy Spirit* [*SBT*, 2/15, 1970], ch. 5). The historian evidently decided to give prominence to the conversion of Cornelius by the way the narrative is set down, with great fulness of detail and repetition for emphasis (Acts 10–11). Peter's Jewish susceptibilities were overcome and his convictions redirected as he came to learn that "God shows no partiality" (10:34) and that Gentiles such as Cornelius were suitable recipients of the gospel message, offered and received on the basis of trust in Christ, without any ceremonial requirement. Peter's sermon, dramatically cut short (cf. 11:15) by the gracious interposition of God (10:44-47), announced the good news, which was accepted gratefully and movingly. Peter's association with the embryonic gentile mission is clear. Luke evidently wanted to depict him as a link between Jewish Christianity (which in Luke's day was part of past history, yet still important as demonstrating the Jewish origins of the Church in the salvation-historical process) and the now dominant gentile Christianity. Peter serves, for Luke, as the model of a "bridge-man" (J. D. G. Dunn, *Unity and Diversity in the NT* [1977], p. 385; cf. Bruce, pp. 42f.; this description is already noted in Brown, *et al.*, p. 162).

But Peter's sympathies lay more with a mission to his Jewish compatriots, if we place the concordat with Paul (Gal. 2:7-10) in the period before the Jerusalem Council. His native weakness peeps through in the vacillations he practiced at Antioch, and he needed the stern reproof of Paul (Gal. 2:14-21). If Galatians is a pre-Council letter, written A.D. 48-49, subsequent events at Jerusalem show that Peter profited from this rebuke, as is demonstrated by his gentile interest in 1 Peter (see F. F. Bruce, *Epistle to the Galatians* [*NIGTC*, 1982], pp. 55f.).

Peter's arrest in Jerusalem at an earlier date (Acts 12:1-17) led to imprisonment and marvelous release. The apparent hopelessness of his plight as a prisoner of Herod is described to highlight the need for him to leave Jerusalem. This he did, and "departed and went to another place" (v. 17).

The role of Peter at the Jerusalem Council is a matter of continuing debate. One likely view is that we should separate the discussion in Acts 15:1-19 from what is reported in the later verses that describe the formulation and propagating of the so-called decree. The mutual agreements in the first part of the narrative that united Peter and Paul, who had already sealed an agreement in the meeting of Gal. 2:4, 7, were ratified by James on the basis of his appeal to Am. 9:11f. (LXX). This proposal by James was a *modus vivendi* in the interests of gentile freedom and access to the gospel without Jewish restrictions. The details of the decree spelled out in the subsequent verses, however, relate to the single item of table fellowship. Paul and Peter may not have been present when the decree was announced, since Paul never alludes to it in his letters and James's reference to it in Acts 21:18-25 carries the impression that it is announced as something new to Paul.

This reconstruction, which has some problems, notably the presence of the apostles' names in Acts 15:22, 25f. (though it should be observed that the decree is committed to Judas and Silas to transmit), explains one feature regarding Peter's behavior at Antioch. It was the Jewish Christians who, armed with the decree, attacked Peter's lax table fellowship and occasioned Peter's vacillation (Gal. 2:13f.). The issue was whether Jewish laws were binding on gentile believers. Under pressure, Peter and Barnabas gave in when faced with the explicit terms of the decree and they in turn tried to enforce it on the Antioch congregation. Paul regarded this action as a betrayal of the gospel and a move away from the concordat of Gal. 2:1-10 made earlier. Paul's position hardened at this juncture; it set him in opposition to the "pillar" apostles, whose emissaries we may see in 2 Cor. 10–13, and isolated him from Antioch, where Peter's influence continued and became canonized in the publication of Matthew's Gospel some decades later. (For an illuminating discussion of these issues see D. R. Catchpole, *NTS*, 23 [1976/77], 428-444.)

Aside from a brief reappearance at the Jerusalem Council (Acts 15:7-11), Peter now vanishes from the NT story of the Church. Attempts have been made to argue that he left Jerusalem for Rome, there to become the first bishop. But these are countered by the fact that, when Paul wrote his letter to the Romans, he had no knowledge of Peter's presence in the imperial city; and Roman Catholic writers have become more flexible in leaving this identification of "another place" with Rome as an open question (see O'Connor, pp. 10f.; Brown, *et al.*, ch. 4). No certain answer is possible; the text may mean no more than that Peter temporarily left the Christian meeting place. The rise of James in his absence, however, requires that Peter soon moved away from the Holy City and engaged in missionary work elsewhere (Gal. 2:9), possibly Corinth (1 Cor. 1:12) and the regions of Pontus-Bithynia (1 Pet. 1:1). If the historical reconstruction made earlier has some cogency to it, Peter made his home in Antioch and acted as an intermediary between two factions, the Jewish Christianity led by James and the gentile congregation established by the apostle Paul. Peter's subsequent arrival in Rome is clearly attested, and the bond between Rome and communities of Asia Minor (seen in 1 Peter) is equally well established by the essay of J. H. Elliott, "Peter, Silvanus and Mark in 1 Peter and Acts," in W. Haubeck and M. Bachmann, eds., *Wort in der Zeit: Festschrift für K. H. Rengstorf* (1980), pp. 250-267.

PETER

Statue of Peter in St. Peter's Square, Rome (W. S. LaSor)

III. Martyr.–The apostolic authorship of 1 Peter requires that Peter wrote his Epistle from Rome, if (as is very likely) "Babylon" in 1 Pet. 5:13, conceals the name of the imperial city (*see* PETER, FIRST EPISTLE OF II). The link between Peter and Rome is firmly made in 1 Peter, even if we see that document as a deposit or testament of Petrine teaching collected by a member of his school, either in his later life (Silvanus is usually the name associated with the activity of an amanuensis) or after his lifetime. Contemporary study of 2 Peter views it as a later record of that Petrine school in the final decades of the 1st cent. (see the arguments for this in R. J. Bauckham, *Jude, 2 Peter* [*Word*, 1983], pp. 151-163, who goes further and suggests as author either Linus, mentioned in 2 Tim. 4:21 and regarded in the early Roman bishop succession lists [deriving from Hegesippus] as bishop of Rome after Peter, or Anencletus [Cletus], Linus's successor and Clement's predecessor). Dating 2 Peter is problematical, and suggesting both a *Sitz im Leben* and an author is risky, but it does seem clear that all the data — literary, tradition-historical, and theological — point to Rome as the setting and place of publication of "Peter's testament," which is enshrined, if considerably modified, in that letter.

Christian tradition speaks with a divided voice about Peter's stay in Rome. Irenaeus (*Adv. haer.* iii.1.1) makes the two apostles Peter and Paul the founders of the church there, but this cannot be so, in view of Paul's letter in A.D. 55 or 58 to the Roman church, which he had not then visited (Rom. 1:13). More reliably, Eusebius (*HE* ii.25.8, citing Dionysius) witnesses to the cooperative work of the two men in Italy when Paul was a prisoner there, presumably the period described at the close of Acts.

The Neronian persecution in A.D. 65 marks the turning point, though our sources of information about the apostles are not clear. 1 Clem. 5–6 speaks of Christian martyrs at Rome in such a way as to fit the description of Tacitus (*Ann.* xv.44) that it was during Nero's pogrom that Paul and Peter perished. This would preclude any release of Paul and further ministry after Acts 28, unless the date of the two-year confinement in "free custody" is brought forward to make possible a release and further missionary work in the West (so Eusebius *HE* ii.22.2). Many scholars accept the direct evidence of 1 Clem. 5–6 and insist that the two apostles were martyred in Nero's outburst: so Harnack, (*Geschichte der altchristlichen Literatur bis Eusebius* [1897-1904], II/1, 242), Lietzmann (*Petrus und Paulus in Rom* [2nd ed. 1927], p. 238), Cullmann (*Peter*, pp. 91-110), and G. Ogg (*Odyssey of Paul* [1968], pp. 194-200). But there is a way to steer a middle course through these conflicting church traditions. J. J. Gunther (*Paul: Messenger and Exile* [1972], ch. 6) argues that Paul was tried and sentenced to *relegatio*, or exile, at the close of his detention in Rome (Acts 28). When he heard of the fire at Rome in A.D. 64 he returned to the city and was rearrested and executed in the following year along with Peter. For more detail see R. P. Martin, *NT Foundations*, II [1978], 298-300.

The tradition that Peter was crucified head downward (found in the apocryphal Acts of Peter) appears to be an embroidered version of Jn. 21:18f.

Evidently the burial sites of the apostles were well known, according to Eusebius *HE* ii.25.7, who quotes Gaius, at the time of Bishop Zephyrinus, A.D. 198-217: "You will find the trophies [Gk. *trópaia*] of those who founded this church." See the discussion by J. Lowe, *St. Peter* (1956), pp. 33-45, for the archeological evidence, to be supplemented by O'Connor. The maximum conclusion to be drawn from these Vatican excavations is that Peter's memorial was cherished near the spot where he

Relief depicting Peter's crucifixion head downward (Rome) (W. S. LaSor)

died. His body was never recovered — therefore all talk of Peter's bones is chimerical (in spite of the announcement by Pope Paul VI on June 26, 1968, that such a discovery and identification had been made; see G. F. Snyder, *BA*, 32 [1969], 2-24) — but with the later concern for relics Christians piously believed, for apologetical reasons, that his exact grave could be located (O'Connor, p. 209).

PETER, FIRST EPISTLE OF.

I. Title and Attestation
II. Author, Date, and Provenance
III. Theological Themes
IV. Ethical Admonitions
Special Appendix: The Composition of 1 Peter

I. Title and Attestation.–Since the 18th cent. the letters of James, Jude, 1 and 2 Peter, and 1, 2, and 3 John have been designated "Catholic Epistles." The term "catholic" (Gk. *katholikē*), a term used by Eusebius for at least some of these Epistles (*HE* ii.23.25; v.18.5; vii.25.7), means "universal" and carries the sense that these letters were directed in the first place to the Christian Church as a whole and not to specific congregations or to certain individuals. In the case of 1 Peter, however, "catholic" is less appropriate, since 1:1 gives a definite geographical area for the original addressees. These first readers, who lived at the northeast end of the Roman world of NT times, are later known to us from the correspondence between the emperor Trajan and the governor Pliny (A.D. 111/12). They are referred to throughout the letter as a group of Christian congregations who face a set of specific circumstances and are marked off from the rest of "Christendom" scattered throughout the ancient world (5:9).

Some valuable attestation of the letter comes in 1 Clement and Polycarp, especially the latter, who quotes from the Epistle several times in his letter to the Philippians. Eusebius (*HE* iii.25.1-3) placed the letter among the accepted parts of the NT canon of his day (*ca.* A.D. 300), and there is no suggestion that its authenticity was ever challenged in the early Church.

The first witness to its authorship comes in 2 Pet. 3:1. This identification is open to doubt because the addressees of the two Epistles are not the same (T. Zahn, *Intro. to the NT* [Eng. tr. 1909], II, 202). R. J. Bauckham, however, agreed with the majority of commentators that 2 Pet. 3:1 refers to 1 Peter, suggesting that the author of 2 Peter had two reasons for the reference: (1) he was a member of the same Petrine circle in Rome that produced 1 Peter; (2) after a long section (2:10b-22) in which he condemned the false teachers in his day, he needed to reestablish the link with the apostle Peter and claim his authority for so writing (*Jude, 2 Peter* [*Word*, 1983], pp. 285f.). But no explicit ascription of the document to the apostle Peter is made until Irenaeus, *ca.* A.D. 185 (*Adv. haer.* iv.9.2; 16.5; v.7.2).

II. Author, Date, and Provenance.–The letter itself offers evidence of apostolic authorship (1:1), with a claim duly registered to eyewitness testimony of the Lord's passion and possibly His resurrection and/or transfiguration, seen as a forestate of the glory of His parousia (5:1).

According to Selwyn, "This impression of eyewitness runs through the Epistle, and gives it a distinctive character" (comm., p. 28). Of the items of common interest that unite the Peter of the Gospels and the author of this letter, the following are the most noteworthy. (1) The allusion to the "testing of faith" (1 Pet. 1:7) naturally suggests a reference to the apostle's own experience (Lk. 22:31). (2) Peter's own recovery and recommissioning (implied in the fourfold Gospel tradition, e.g., Mk. 16:7) may well be read in his poignant words of 1 Pet. 5:10. (3) The shepherd-sheep imagery (2:25; 5:2f.) recalls a similar feature in both the Synoptics (e.g., Mk. 14:27f.) and John (Jn. 21:15-17), with special application to Peter. (4) The common praise of humility as necessary in Christian living is inculcated in both explicit teaching (1 Pet. 5:5) and dramatic action-parable (Jn. 13:1-10). In the latter episode Peter is the interlocutor with the Lord, and it cannot be coincidental that the Greek verb *enkomboústhai*, "clothe," in 1 Pet. 5:5 calls to mind the picture of a person attiring himself in a garment tied onto his body, as in Jn. 13:4, where Jesus wrapped a towel used by slaves around Himself as a prelude to His washing the disciples' feet. An incidental detail like this suggests that Peter is consciously reminiscing in his later writing.

F. W. Beare, however, argued against the inferences drawn by Selwyn on the ground that the author of 1 Peter had read the Fourth Gospel, including Jn. 21, and stood consciously under its influence (2nd and 3rd eds. of his comm., p. 191). Thus the relationship behind the common expressions and motifs is literary and not personal. For example, on 1 Pet. 2:21-25 Beare denied any evidence of a personal reminiscence and saw rather the case of a writer "whose knowledge of the Passion is literary and theological... since it is framed wholly in phrases of the Second Isaiah and the Apostle Paul; there is not a shred of personal reminiscence" (*loc. cit.*). This explanation drawing on the OT prophecy is rather weak, since we may ask what impulse prompted the author to cite the servant passage (which is only rarely attested in the NT) if it was not a conscious recall of Jesus' bearing as a harmless lamb led to the slaughter. Also, Paul's meager use of the Servant of God prophecy in Isa. 53 suggests that the author of 1 Peter is not indebted to Paul at this point.

There is also close correspondence between the language of Peter as reported in Acts and the language of this Epistle. (1) The character of God as the impartial judge is designated in 1 Pet. 1:17 by the word "not-respecting-persons" (Gk. *aprosōpolēmptos*), which is found in Acts 10:34 in slightly different form (*ouk éstin prosōpolēmptēs*). (2) What has been called "the stoneship of Christ" — an allusion to Cyprian's collection of biblical references in his *Testimonies* (Treatise 12) ii.16 — is attested by such verses as Acts 4:10f. and 1 Pet. 2:7f., both of which draw upon Ps. 118:22. To be sure, the Pauline literature (Rom. 9:32f.; Eph. 2:20) also appeals to this Scripture proof text on Christ as the rejected and exalted stone but not so explicitly to Ps. 118 as do these two passages in Acts and 1 Peter. (3) The way in which the Lord's "name" is made central in both documents cannot be accidental. It occurs in Acts 3:6, 16; 4:10, 12; 5:41; 10:43 — all of which have Peter playing a distinct role — and in 1 Pet. 4:14, 16. (4) Peter's speech in Acts 3:18, 24 places great emphasis on the way God has fulfilled the OT prophetic Scripture in sending the Messiah; an identical position in regard to messianic prophecy is taken in 1 Pet. 1:10-12.

Why, then, has Petrine authorship been denied? (1) There are similarities of language between this Epistle and literature ascribed to Paul, especially Ephesians. C. L. Mitton's investigation (*Epistle to the Ephesians* [1951]) sought to date Ephesians later than 1 Peter because

of alleged dependence of the former on the latter. This was countered by more recent study (seen in J. H. Elliott, *JBL*, 95 [1976], 243-254, esp. 247f.), which noted that the common matter relates mainly to liturgical interest (e.g., 1 Pet. 1:3ff.; Eph. 1:3ff.) and suggested that it is best to account for the parallels by crediting both writers with access to a common fund of liturgical and catechetical material, perhaps located at Rome (so E. Best, comm., pp. 32-36). This would also account for the links between 1 Peter and 1 Clement, also a document emanating from the church in Rome. (See Special Appendix below for the liturgical origin of 1 Peter.)

(2) The literary style of 1 Peter raises doubt, for some of the vocabulary is undeniably classical (see A. H. McNeile and C. S. C. Williams, *Intro. to the Study of the NT* [2nd ed. 1953], p. 220 n. 1 for a list of words in this tradition), and the OT is cited in the LXX version. The issue is whether a Galilean fisherman, known to be an "uneducated, common man' (Acts 4:13), could have written in the style and manner of these chapters.

Two replies may be made to this doubt. First, Acts 4:13 probably means only that Peter and John were not versed in rabbinic lore. According to C. H. Dodd (*Interpretation of the Fourth Gospel* [1953], p. 82 n. 1) the Greek terms in Acts 4:13 represent the rabbinic *bôr wᵉhedᵉyôṭ* and mean that the apostles were ignorant of the Torah in the eyes of official Judaism. These terms say nothing, however, about the apostles' cultural background or linguistic expertise. Second, O. Cullmann (*The NT* [1968], p. 99) argued that Peter's village of Bethsaida (Jn. 1:44) was cosmopolitan, open to cultural influences that may well have equipped him for the task of composing letters.

As an alternative to the second reply, and not necessarily to its exclusion, some have proposed that the polished literary format and style of 1 Peter is the work of an amanuensis (secretary). This seems to be implied in 5:12: "By Silvanus, a faithful brother as I regard him, I have written briefly to you." Selwyn (pp. 9-17, 369-384) extracted the maximum from this text in defense of the idea that Silvanus (the Silas referred to in Acts) was the real author of the letter, writing out Peter's teaching in his own style and language. This alternative would relieve the need to attribute to Peter a literary competence beyond that of a Galilean fisherman. The argument that appeals to Silvanus is not clear-cut, however, since its proponents find a connection between 1 Peter and 1 Thessalonians, which is also attributed to Silvanus, at least in part (1 Thess. 1:1). This last factor really embarrasses more than aids the case for an amanuensis, as W. L. Knox was quick to point out in response to Selwyn (*Theology*, 49 [Nov. 1946], 342-44). Also, B. Rigaux, in his commentary on 1 Thessalonians (*EtB* [1956], p. 107), noted that "the appeal to Silvanus is in vain ... since words, grammar, phrases, and ideas are Paul's." Beare, too, agreed (pp. 189f.), and his criticism moved on to one further point: "The fatal objection to this hypothesis . . . lies in the character of the teaching, most conspicuously in the meagreness of the references to the doctrine of the Spirit" (p. 28). But this last objection is by no means realistic, for one of the leading theological ideas in 1 Peter is precisely the teaching on the Holy Spirit!

(3) Scanty references to Jesus' earthly life do not comport with the reminiscences that some expect of the chief of the apostles. But this objection overlooks such allusions as are there (see above) and assumes that Peter intended to give his memoirs in letter form, which is not the case. His purpose in writing is expressed in 5:12: "exhorting and declaring that this is the true grace of God; stand fast in it."

(4) Some claim that the nature of the persecutions reflects a time after the apostolic age. F. W. Beare built much of his positive contribution on this claim, arguing that 4:12-16 can mean only that Christians were being accused of a political charge and were suffering *propter nomen* ("on account of the name" of Christ) as sedition-mongers and enemies of the state. (B. Reicke's similar view of 1 Peter as directed against a Christian "zealot" movement involved in overthrowing the Roman government (comm., pp. 95-100) was effectively challenged by C. F. Sleeper, *Nov.Test.*, 10 [1968], 270-286.) This implies a situation when Christians were openly branded as a political group, subversive of the Roman state. Emperors who did show hostility to the Church were Nero (A.D. 64), Vespasian (d. 79), Domitian (81-96), and Trajan (111/12). Beare maintained that, of this list, the only possible persecutor whose enmity matches the evidence in 1 Peter is Trajan. Pliny's correspondence in A.D. 111/12 shows that Christians in Pontus-Bithynia were being accused simply of being Christians, a situation that appears to match precisely the charge implied in 1 Pet. 4:16. This is a neat link, and Beare exploited it fully.

But Beare's hypothesis has some serious weaknesses. (a) Nothing in 1 Peter indicates an official state persecution as a settled policy. After reviewing the evidence of the letter itself, Kelly concluded that because "there is no evidence for any very extensive persecution initiated by the government in the 1st or early 2nd cents.," there is no reason to quarrel with "the impression which the letter as a whole conveys [which] is not of juridical prosecutions by the government (these seem ruled out by the references themselves, by the statement that the ill-treatment is world-wide [see (c) below], and by the respect shown to the emperor), but of an atmosphere of suspicion, hostility and brutality on the part of the local population which may easily land Christians in trouble with the police" (comm., pp. 10, 29).

(b) 1 Peter has no explicit reference to official inquisition or torture, such as was practiced in Pontus-Bithynia in Pliny's time (*Ep.* x.96f.). The descriptions of the trials the readers were suffering (1:6) and the ill treatment meted out to them (3:13-17), along with the "fiery ordeal" (4:12-19), suggest that the hardships were private and confined to the area, "originating in the hostility of the surrounding population. The technical terms for official persecution (*diōgmos*,etc.) are noticeably absent, nor is there any unambiguous mention of formal accusation (*katēgoria*), much less of imprisonment or execution" (Kelly, p. 10).

(c) The sufferings of Christians are part of the general attitude taken to them in other places, if we take seriously the remark in 5:9. This is rightly regarded as of "crucial significance," thus endorsing the notion that "the troubles referred to in iv. 12ff. are in no way exceptional but have their counterpart in a great many places" (Kelly, p. 10). Local outbursts of mob violence may well explain the cause and nature of these pinpricks (suggested by 4:1-4). See further C. F. D. Moule's discussion in *Essays*, pp. 142f.

As we attempt to reach a conclusion about the Epistle's authorship and provenance it is important to take note of the letter's composition (see Special Appendix below), which embodies much liturgical matter drawn from the common literary materials of the early Church (e.g., 2:4-8 is related literarily to Rom. 9:33; cf. Selwyn, comm., pp. 268-277). Also there is specific evidence in 5:12 of the use of a scribe and (possibly) an editor.

With regard to date, the unspecific nature of the persecutions is in keeping with a setting in the decade of the 60's, before the outbreak of the Neronian persecution at Rome in which Peter and Paul perished (A.D. 64). If 1 Peter was published with Peter's personal authorization

and as representing his own apostolic teaching, as seems very probable, a date in the 60's is required.

The place of publication is almost certainly to be identified as Rome, especially in view of the most plausible explanation of the cryptogram in 5:13, where "Babylon" means the imperial city, as in Rev. 14:8; 17; 2 Esd. 3:1f., 28, 31 (see Cullmann, pp. 83-86).

Alternative locations have been proposed, however. (1) A literal Babylon was championed by R. G. Heard (*Intro. to the NT* [1950], p. 171), who called attention to Josephus's remarks on the large number of Jewish communities there (*Ant.* xv.2.2 [14]). But Josephus's evidence is doubtful, and there is no positive confirmation that Babylon did not fall into disrepair and ruin (see D. J. Wiseman, *NBD*, p. 118).

(2) A symbolic value was attached to the name "Babylon" by Moule (*Essays*, p. 142), who argued that the place name was selected to draw a simple parallel with ancient Babylon as the place to which God's people had been exiled.

(3) The most ambitious attempt to find a definite locale for 1 Peter was made by M.-E. Boismard (*RB*, 64 [1957], 181), who opted for Antioch in Syria on the grounds that the teaching of the "descent into Hades" was established early in the churches of Syria; that the title "Christian" is found in the NT only in those places that speak of the Church in Syria (Acts 11:26; 26:28) and in 1 Pet. 4:16; and that the *Apostolic Tradition* of Hippolytus both has a Syrian background and reflects the language of 1 Peter.

The last point is countered by the finding that the *Apostolic Tradition* clearly emanated from Rome (G. J. Cuming, *Hippolytus: A Text for Students* [1976]). Moreover, 1 Peter has closer literary affinities with 1 Clement (see Kelly, p. 12), which is indubitably associated with Rome. Finally, the absence of the Epistle's influence on Ignatius of Antioch is a telling counterobjection.

More recent study of 1 Peter has opened up new lines of investigation regarding the provenance and authorship of 1 Peter. The traditional view sees 1 Peter as a genuine hortatory letter, possibly using baptismal language (Moule, *Essays*, p. 137) and even parts of a baptismal catechism (Selwyn), intended to address and encourage persecuted believers in Asia Minor. Selwyn championed the apostolic authorship, though allowing the role of Silvanus as scribe; he thought the Epistle emanated from Rome in A.D. 63. In dependence on P. Carrington's study on *The Primitive Christian Catechism* (1940), Selwyn believed that Peter drew on a deposit of ethical teachings common to Colossians, Ephesians, and James, in turn based on the Levitical code (Lev. 17–19, the so-called Holiness Code). F. W. Beare, as noted above, took exception both to this setting of the letter and the case for an apostolic authorship.

E. Lohse (*ZNW*, 45 [1954], 86-89; cf. also *Formation of the NT* [Eng. tr. 1981], pp. 212f.) led the opposition to the view of 1 Peter as a baptismal liturgy developed by H. Windisch and H. Preisker (see Special Appendix below). In its place Lohse, for whom neither baptism nor catechism was the leading theme, put the general subject of persecution. The letter, he maintained, was intended to offer encouragement to a beleaguered church in the throes of persecution. The author adapted traditional teaching to meet his readers' need. The letter was written from Rome. This understanding is shared by D. Hill (*Nov.Test.*, 18 [1976], pp. 181-89), for whom the ruling motif of the letter is exhortation to stand firm in the face of actual physical and emotional suffering caused by loss of civil rights and threat of punishment, including death. The genre of the letter is strictly parenetic; its catechetical overtone is incidental.

Goppelt's 1978 commentary began a new approach. Goppelt remarked that 1 Peter is the only NT writing that addresses systematically and thematically the matter of Christian alien residence within the structure of contemporary society (comm., p. 41). Writing at Rome anywhere between A.D. 65 and 80, the author offered exhortation in the light of growing persecution, the origin of which is not the police (Kelly) or the state (Beare) but popular slander (1 Pet. 2:12; 3:16; 4:4, 14) caused by Christians not conforming to the world's standards because of their loyalty to Christ. The letter's response to this situation is (a) to show the difference between the Church and the pagan society around it (1:1–2:10); then (b) to develop the paradox that, although Christians are "strangers" and "aliens" in their society, they will share in its social responsibility and not become either revolutionaries or ascetics (2:11–4:11); yet (c) to acknowledge realistically that the Christians are bound to collide with the prevailing ethos, and receive the reward of suffering, thus participating in Christ's sufferings (4:12–5:14).

Goppelt's contribution was his identification of the social dimension of the reader's needs as a major item, not as a side-issue subordinate to the theological or ethical concerns of their community. In this he was followed by J. H. Elliott, *A Home for the Homeless* (subtitled *A Sociological Exegesis of 1 Peter, Its Situation and Strategy*, and containing a bibliography of pertinent studies), and D. L. Balch. These writers agreed in basic position, though they differed over details. The thesis is that "the *oikos* or household constituted for the Christian movement as well as for its environment a chief basis, paradigm and reference point for religious and moral as well as social, political, and economic organization, interaction, and ideology" (Elliott, *Home*, p. 213). Applied to the understanding of 1 Peter, this approach suggests that the aim of the document is apologetic. It was written when Roman Christians of the Petrine circle were expressing concern for their brethren in Asia (Elliott) or when Christian slaves and wives became converted to Christianity and were provoking the state authorities on the charge of being "seditious" (Balch, p. 95). The author(s) of 1 Peter, whom Elliott linked with Mark and Silvanus, former colleagues of the now martyred Peter (see his essay, "Peter, Silvanus and Mark in 1 Peter and Acts," in W. Haubeck and M. Bachmann, eds., *Wort in der Zeit: Festschrift für K. H. Rengstorf* [1980], pp. 250-267), dealt with the problems by appealing to the Church as God's house or family to accommodate the needs of a socially deprived and ostracized social group in Asia (Elliott), or more particularly the needs of Christian women living in partially Christian households whose ethos was prescribed by Roman insistence on submission, order, and harmony (Balch).

One result has emerged from this latest phase of Petrine studies: 1 Peter owes little to Pauline Christianity, and represents a separate and distinct entity within the pluriform and socially diverse examples of what we tend to run together as social groups forming the Church in NT times.

III. Theological Themes.–Probably no document in the NT is so theological as 1 Peter, if "theological" is taken in the strict sense of teaching about God. The author's mind "begins from and returns constantly to the thought of God as Creator, Father and Judge, as the One whose will determines all that comes to pass, who shapes the destiny and determines the actions of those whom He has chosen for His own, who sustains them through the sufferings which He sends to test them, and who at the last will vindicate them and reward them eternally" (Beare, p. 33). This is a noble statement and is amply justified.

While 1 Peter has more than a little to say about the other cardinal Christian doctrines, its emphasis does fall on the character and action of God, who is the Holy One (1:15), the Father (1:17), the Creator (4:19), and Judge

(4:5). Faith is directed to Him (1:21; 3:18) through the mediation of Christ His Son.

Jesus Christ is pictured on an OT background as the true paschal lamb (1:19) and servant of Yahweh (2:22-24). The twin poles of His existence are His sufferings and death (2:23f.) and His exaltation (1:3, 21). Peter accentuates the sufferings of the Lord as a prelude to His death on the cross, partly to show that His death was real and partly to make the exemplary point that He is thereby kin to the Epistle's readers, who were in the throes of suffering on account of their faith in Christ (see F. V. Filson, *Interp.*, 9 [1955], 400-412). In 3:18-22 he provides a succint statement of the theme of Christ's exaltation (see the thorough treatment by W. J. Dalton, *Christ's Proclamation to the Spirits* [1965]).

The value of His death is stated in terms of access to God. Also, by that sacrifice on our behalf Christians are supplied a power to follow in his steps and be dedicated to God. His ascension is reported after a reference to that mysterious period of three days of death, in which the events of 3:19 and 4:6 are set. Most likely this refers to Christ's role as the new Enoch (so Kelly), in which He visited the underworld and announced the fate of wicked superbeings, thereby assuring the Church that their regime was ended and their dominion broken. The chief point in favor of this interpretation is that it gives an immediate moral application to the persecuted Christian community to whom Peter is writing. (*See also* PRISON, SPIRITS IN.)

At present Christ is Lord (3:15), whose parousia is awaited (1:7, 13; 4:13; 5:1). An imminent end time motivates the author (4:7) and gives his ethical teachings a distinctive color. This seems clearly to reflect a life-situation in the apostolic age.

More debatable is the issue whether 1 Peter is removed from the apostolic era on account of a singular absence of the doctrine of the Holy Spirit. For F. W. Beare (p. 36) this is a decisive factor. He comments, "The Spirit has fallen into eclipse... in First Peter." But the case is not so cogent, since there are four references to the Spirit, 1:2, 11, 12; 4:14, all of which seem to betray an early date and refer to a primitive statement of the Spirit's power.

On another test case, the use made in 1 Pet. 2:22-24 (and 1:19?) of the *'ebeḏ YHWH* figure in Isa. 53 anchors this teaching in a sector of primitive Christianity (see Cullmann, *Peter*, pp. 66-68), for there is evidence that this title for Jesus was short-lived in the early Church.

We may conclude that much of the above teaching belongs to a time of consolidation and suggests a statement of the Christian faith for new believers of gentile origin. This is confirmed by their geographical address (1:1). The readers are unknown to Peter, who at 1:12 marks himself off from the preachers in the area. The readers have only recently been evangelized (2:2) and baptized (3:21) — unless these texts fit into a baptismal service on which 1 Peter is the running commentary (F. L. Cross's view, which is open to criticism [see Special Appendix below]). That they were Gentiles seems clear from 1:14; 2:10-12; 4:3. It is doubtful, however, that Peter's readers had been adherents of a Hellenistic mystery cult who were familiar with the taurobolium (bath in a bull's blood) or the cult of Cybele or Isis, as Perdelwitz infers from 1:3f. (This entire reconstruction of initiation rites in the mystery religions has been critically scrutinized by G. Wagner, *Pauline Baptism and the Pagan Mysteries* [Eng. tr. 1967].)

IV. Ethical Admonitions.–To get to the root of Peter's moral instruction given to his readers, we need to come to some firm conclusions concerning the setting of the letter and its format.

(1) Modern study has veered in the direction of regarding the references to "persecutions" in the letter (seen to be a truly epistolary composition, even if it incorporates catechesis, hymns, and creeds of the primitive Church and finds its natural setting in baptism as a baptismal homily; see Special Appendix below) as relating to some local outburst of opposition more than to an official state policy. (For a useful summary of the possibilities see E. G. Selwyn, *Studiorum Novi Testamenti Societas Bulletin*, nos. 1-3 [repr. 1963], 35-50.) Therefore we shall more properly regard Peter's call to steadfastness and a good conscience under provocation as part of his general counsel for the Christian life, spoken of as a "tribulation" (as in Acts 14:22), rather than as part of an "interim ethic" addressed to a Church caught in the grip of a tyrannous government. See Kelly, pp. 25f., who noted how the author's purpose is seen as one of "sustaining and encouraging the Asian Christians" whose "troubles are the ever-felt background of every paragraph [he writes]." Kelly proceeded to identify two aspects of his moral theology as significant: first the strongly eschatological perspective in which he places the experiences of his readers; then the emphasis on exemplary behavior that characterizes the Epistle.

(2) The literary question turns on the possibility that there is a break at 4:11. Moule (*Essays*, pp. 134-145) uses this possibility to support the view that in 2:11–4:11 the sufferings are in prospect but in 4:12–5:11 they are actual. In this way he accounts for the change in tense of the verbs, and the change in tone from a more placid to a more fearful mood between the earlier and later sections, which represent two originally distinct versions of the letter (pp. 140-45). Kelly criticized this line of reasoning on linguistic and contextual grounds and argued that the entire letter is shot through with the persecution motif, to be understood as the type of hostile treatment to be expected by minority groups living in a pagan environment. It is this element pervading the letter that gives it the character of a persecution tract, offering encouragement and guidance to Christians in the slave group who were undergoing the threat of serious reprisals on account of their faith (pp. 5-11). We may add to this the evidence that they seem to be newly won converts, and on that account persecution and deprivation would come all the harder to understand and to bear.

Peter's advice may be treated under five headings. (1) The Christian life is centered in hope (1:3) and sustained by faith in a God whose purposes are known in Christ (1:2). This is Peter's starting point and cardinal principle of theology, both doctrinal and practical.

(2) The call to self-control (1:13) is meant to issue in a display of the qualities of Christian living that will make it attractive to others in the pagan society around the believers (2:11, 16). Even when they are unjustly provoked and harassed, let Christians be courteous and patient (3:8-17); slaves who are maltreated without cause will be especially open to the temptation to fight back (2:18-25).

(3) The Christian attitude to the ruling authorities is set down in 2:13-17, with a warning in 4:15-19 directed against those who would commit antisocial acts.

(4) Humility is a Christian grace (3:8; 5:5f.) that is to characterize God's people both in the outside world and in the Church. In the Church this summons to lowliness especially fits those who aspire to ecclesiastical office (see J. H. Elliott, *CBQ*, 32 [1970], 367-391), reminding leaders that their office is one of service, not dictatorship.

(5) The summons to endurance (4:7, 19; 5:8-11) fastens on a typical NT grace applicable specifically in a time of testing (cf. Mk. 13 par.). If the terminology is somewhat different, clearly the admonitions to patience, persistence,

and prayerful vigilance are common to this stratum of NT ethical teaching. By strange irony, it was just this "determination" (Gk. *hypomonē*) and refusal to give in to trial and unfaithfulness that later was misunderstood by the Roman magistrates when Christians were arraigned on charges of sedition. It was regarded as inflexible obstinancy (Lat. *pertinacia*). What was to be the Christian's right attitude in these circumstances in the mid-first century is classically expressed in 3:15.

SPECIAL APPENDIX: THE COMPOSITION OF 1 PETER

Modern study of 1 Peter has concentrated on the literary structure of the document as part of the more general interest in form criticism of the Epistles. The intention in this discipline is to investigate the literary deposits (e.g., blessings, hymns, admonitions) assumed to be embedded in the NT letters in order to discover the religious and theological situations out of which these preepistolary traditions emerged. (This corresponds to identifying the *Sitz im Leben* in the canonical Gospels.) Such situations are mainly cultic, sacramental, and parenetic (i.e., relating to the Church's instruction of Christians and giving warnings and encouragements in the believers' personal and social lives). The composition of 1 Peter has been viewed in three chief ways. The following is a summary of a fuller discussion (with bibliography) in R. P. Martin, *VE*, 1 (1962), 29-42.

A. Epistle that Embodies Hymnic Material. The traditional view of the literary form of 1 Peter, that it is a genuine Epistle, written by a single person, and addressed to various Christian communities in Asia, does not preclude the possibility that fragments of hymns, creeds, and confessions, or even pieces of sermonic material could have been inserted into such an Epistle. Should 1 Peter prove to contain such material it would not be unique, for it seems fairly clear that Paul incorporated previously existing fragments into his letters.

An illustration of this sort of thing in 1 Peter is 2:4-8, which Selwyn examined in detail in one of the celebrated Notes appended to his commentary (pp. 268-277). The conclusion of this study is that underlying these verses is an early Christian hymn or rhythmical prayer, common to both Peter and Paul (in Rom. 9:33). Selwyn's analysis produced a hymn of seven lines, covering vv. 6-8. This analysis differed from Windisch's arrangement, which produced from vv. 1-10 "a hymn on the holy destiny of Christendom, in four strophes, 1-3, 4f., 6-8, 9f." Selwyn justly criticized this view on the ground that it used the term "hymn" too widely, "for there is nothing hymnodic in structure in verses 4, 5" (p. 276 n. 2).

A strong reason for believing that a Christian adaptation of certain OT passages produced a cultic psalm is the presence in v. 6 of the phrase *periéchei en graphḗ*, which Selwyn took to mean "it stands in writing," comparing Sir. 44:5 (comm., pp. 163, 273). This could very well mean "as it is contained in the hymn." Then the introductory formula would be equivalent to that in Eph. 5:14, and possibly that in Phil. 2:5, if E. Lohmeyer's interpretation of "which was also in Christ Jesus" as "a sort of formula of citation" has any plausibility (see R. P. Martin, *Carmen Christi, Phil. 2:5-11* [rev. 1983], pp. 63-84).

Windisch proposed several other hymns in 1 Peter. He described 1:3-12 as an *Eingangshymnus* (entrance-hymn) made up of five seven- or five-line strophes joined together by relative pronouns. The likelihood that the letter opens with a long prayer introduced by the solemn blessing—after the manner of the Jewish *bᵉraḵôṯ* — of v. 3 is becoming increasingly acceptable in view of researches that show that the letters of the apostles were intended to be read in public worship.

Windisch also wrote or implied that three parts of the letter may be isolated as *Christuslieder* ("Christ-hymns"): 1:18-21; 2:21-25; and 3:18-22. He designated 2:21-25 "the second Christ-hymn," making a parenthetical reference to 1:18-21 that implies that it is the first hymn addressed to Christ. There is little to support this suggestion if we interpret strictly the term "hymn." The language admittedly is cultic and exalted, and the setting of 1:20 as a "two-member Christ-text" is just possible, but it would be precarious to say that it owed its origin to a separate hymn, of which it is a postulated fragment.

Windisch regarded 3:18-22 as a baptismal hymn to Christ in four strophes (the exhortation in 3:13-17, interrupted by 3:18-22, is continued in 4:1); although perhaps not all of 3:18 belongs to the hymn. He gave no formal analysis and it is not certain whether he meant that Peter in 3:18-22 was quoting from a hymn familiar to the Church or that Peter was led by certain associations to break spontaneously into verse form himself.

In his 1947 essay, "Confessional and hymnic fragments in 1 Peter," Bultmann built on the foundation laid by Windisch. Bultmann held that, in the passages under consideration, the author had before him an actual quotation, but that not all of 3:18-22 is a quotation. The author added comments on an existing text, whether a hymn or a creed. The contribution of Bultmann's essay is that he not only identified certain parts of the letter as hymnic or confessional, he also held that the author of the document known as 1 Peter had before him a series of credal or hymn-like forms on which he commented by means of certain glosses. The role of the author, in certain passages of this letter, is that of glossator.

The reconstructed whole of the original version of 1:20; 2:21-24; 3:18-22, before the glossator "spoiled" the simple symmetry, would have looked like this:

(? I believe in the Lord Jesus Christ,)
Foreknown before the world's foundation,
But manifested at the end of the times;

Who suffered once for sins,
To bring us to God;

Put to death in the flesh,
But made alive in the spirit,
in which He also preached to the imprisoned spirits;
(But) having gone into heaven He sat at the right hand of God,
Angels and authorities and powers under His control.

In comment on Bultmann's reconstruction, R. Leivestad (*Christ the Conqueror* [1954], p. 177) regarded it as "quite plausible," and E. Schweizer (*Erniedrigung und Erhöhung* [1955], p. 105) also accepted it. The main writers who spoke against Bultmann were J. Jeremias (*ZNW*, 42 [1949], 194-201, esp. 195f.) and Lohse, both accusing him of the same thing. The price he paid for his attempt to secure a completely balanced arrangement of the text was too high. His alterations were too unrestrained and unwarranted, especially when he tore asunder vv. 19 and 20ff. Even this recasting of the material failed to produce the desired result of a completely symmetrical arrangement, as may be seen by noting the inordinate length of v. 22. His use of the gnostic redemption myth to explain vv. 20ff. was unrequired. The summary judgment is "not convincing" (Lohse), and his joining together of 1:20 and 3:18-22 was pronounced by Jeremias "most improbable"; Cranfield said exactly the same (*Expos.T.*, 69 [1958], 369).

Later writers dealt more critically with Bultmann's proposal to find in 1 Peter a unified hymn in three parts. In spite of the efforts of M.-E. Boismard (*Quatre hymnes*) to trace in these verses (1:20; 3:18, 22; 4:6) a connected seven-line Christ-hymn, parallel in structure to 1 Tim. 3:16, the

main verdict on Bultmann's enterprise has been negative. The most that R. Deichgräber conceded (*Gotteshymnus und Christushymnus in der frühen Christenheit* [1967], pp. 140-43) was that in 2:21-24 there are four short sections, joined by the relative pronoun ("who") but lacking reference both to Christ's preexistence (1:20) and to His exaltation (a theme picked up in 3:18-22). These hymnic fragments (identified mainly because v. 25 looks beyond its immediate context) are unique in describing the earthly life of Jesus and drawing upon Isa. 53. Deichgräber placed the section in a Hellenistic setting, since the LXX is quoted. He also cautiously suggested a eucharistic background for the use of the passage in the church's worship, rejecting Boismard's idea of a baptismal setting on the ground that v. 24b, "dying to sin, living to righteousness," is secondary and not part of the hymnlike structure.

K. Wengst (*Christologische Formeln und Lieder des Urchristentums* [1972], pp. 83-86) was less impressed by Bultmann's proposal to regard 2:21-25 as a hymn-form and thought that since the death of Christ leads to an ethical admonition (esp. in vv. 21, 24), we should regard the pericope as a "catechetical instruction" based on Christ as a model (Gk. *hypogrammós*; cf. Polyc. Phil. 8:1f., which cites 1 Pet. 2:24 and then applies it: "Let us then be imitators [*mimētaí*] of His endurance [*hypomonḗ*] . . . for this is the example [*hypogrammós*] He gave us in Himself, and this is what we have believed"). The link between Christ's suffering and endurance and the parenetic call to follow Him in the same attitude is clear from 1 Pet. 2:20, and formed a theme in later ethical exhortation (Barn. 5:1, 5; 2 Clem. 1:2). The application to Peter's readers would be apparent, and Wengst made a good case for the use of Isa. 53 in a hortatory — rather than hymnic or liturgical — context.

The response to Bultmann is more emphatic with regard to 1 Pet. 3:18-22. Deichgräber (pp. 169-173) doubted that we should label these verses a confession of faith or a hymn. He was especially critical of Boismard's proposal (*Quatre hymnes*, pp. 103-109) to extend the hymn to include 4:6 and regard 3:18–4:6 as a baptismal creed. The chief objection arises from Deichgräber's recognition that there are "mixed" styles of writing — both prose and poetry — in 3:18-22, and there is little warrant for Bultmann's method of recasting the text to form a symmetrical whole. Deichgräber allowed that there are hymnic fragments in vv. 18b and 22, both verses rich in participial verb forms, but the two examples do not necessarily belong to the same earlier composition (as Wengst, *Christologische Formeln*, pp. 163f., was to argue). His strong point, taken up by J. T. Sanders (*NT Christological Hymns* [1971], pp. 17f.), was to observe the parallel of v. 18b with 1 Tim. 3:16. Sanders helped to endorse the literary contacts by paralleling v. 22 with 1 Tim. 3:16, whose last line runs, "[He] was taken up into glory." Thus 1 Pet. 3:18f., 22 turns out to be a preformed early version of a hymnic formula of which 1 Tim. 3:16 is a more complete or refined version. Certainly there are more rhetorical traits in 1 Tim. 3:16 than in the Petrine text, even if both texts share the same feature of *parallelismus membrorum* (or couplet) at their center, that is, "incarnate/put to death in the flesh," "vindicated/made alive in the spirit."

Wengst (p. 163) attempted to trace a "way of Christ" in six steps from preexistence through epiphany and death to resurrection, exaltation, and lordship over the cosmic powers as in other NT hymnic specimens (e.g., Phil. 2:6-11). While data for this proposal may be here (messianic canticles would have grown to full-blown Christ-hymns as a response to a gnostic threat; cf. R. P. Martin, *Expos. T.*, 94 [1983], 132-36), it is difficult to find persuasive Bultmann's and Wengst's argument that these credal-hymnic elements are scattered throughout 1 Peter.

Somewhat more convincing is the proposal of S. E. Johnson (*JBL*, 69 [1960], 48-51) to regard 3:18-22 as organically connected with the opening verses of ch. 4. The text is a good example of chiasmus on a large scale, for the argument proceeds from the example of Christ's passion and resurrection in 3:18f. to a statement of what happened in the early days of human history as a type of present salvation. Then the author returns at 3:20b to proceed point by point through the antitype of Christian baptism, and concludes with a statement in 4:6 of what Christ has accomplished by His death and resurrection. In the pattern that Johnson sets out, all this appears very neat and tidy — perhaps too much so — but at least it has a merit that Bultmann's schema lacked, that it leaves the text unmanipulated in the interests of the theory. The interrelation of kerygma and ethical appeal (in 3:18-22 and 4:1f.) is certainly an interesting point, and the parallel with Phil. 2:5-11 and 2:14-16 should be noticed.

B. Baptismal Document. A second theory of the composition of 1 Peter sees it as a baptismal document. A clear statement of this view is given by Windisch: "The main part of the letter 1:3–4:11 represents a baptismal address" (comm. [1930], p. 82). The connection of the letter with the rite of baptism is universally accepted, especially in light of the section 3:18-22, which has just been examined. Kelly spoke for many NT and liturgical scholars when he said that this text "reads like a part-paraphrase and part-quotation of an instruction preparatory to baptism. The insertion in verses 20ff. of a short account of the meaning of the sacrament bears this out" (*Early Christian Creeds* [1950], p. 18).

For some writers, such as Selwyn, Lohse, Moule, Goppelt, and D. Hill (*Nov. Test.*, 18 [1976], 181-89), however, the references to baptism are incidental, as in many other places in the NT, especially in the Pauline corpus. The document is then essentially a message of encouragement, written to harassed or persecuted believers, as 4:12 makes plain. The allusions to baptism are more or less extraneous to the main concern of the document, which is correctly designated an Epistle.

Both the references to baptism and the messages of encouragement are included in a novel hypothesis first proposed by Perdelwitz in 1911. His argument needs close inspection, especially since it was accepted with enthusiasm by B. H. Streeter (*The Primitive Church* [1929], p. 122), who added some speculation of his own.

The linchpin of this theory is the supposition that the letter has a clear break at 4:11. Perdelwitz gave four arguments for this idea. (1) The sufferings of Christians are described in 4:12 as present, whereas in the earlier part of the letter (1:6; 3:13f., 17) they are hypothetical. Verses 3:17 and 4:19 show the contrast. (2) In 1:6, 8 the joy is offered as a present reality, but in 4:12f. it lies in the future. (3) The "Amen" in 4:11 is not unexpected when we note that the connection between 4:11 and 4:12 is weak; and there is a complete change of situation between what is future and what is present. (4) The assumption that 1 Peter contains two separate parts can explain the "briefly" in 5:12, which could hardly be used of the whole document, some 1675 words.

Perdelwitz concluded that 1 Peter was originally in two parts. In support of this hypothesis, later scholars have noted that 1:3–4:11 has no genuinely epistolary characteristics. It lacks reference to places and people. The style is polished and balanced, with long measured sentences; the impressive opening in 1:3-9 is matched by an equally

impressive conclusion, with doxology and Amen. On the other hand, the section 4:12 to the end "breathes an entirely different atmosphere. The style is direct and simple. There are no carefully constructed periods or nicely balanced rhythms and antitheses . . . it has the quick language of a letter written in haste and under tension" (Beare, p. 7).

The most plausible *Sitz im Leben* of the earlier homiletical document would have been a baptism. Many signs, as Perdelwitz observed, point to the address as having been given to a group of recently baptized neophytes. The converts in mind are living in the first flush of their Christian experience. Thus their joy is still undaunted and exuberant (1:8); 2:1ff. is a clear description of the first stages of their faith and incorporation into Christ and His people. "As a scarlet thread the particle 'now' runs through all the statements of the author," says Perdelwitz (p. 18). And this is an important factor in interpreting 3:21: "Baptism . . . *now* saves you." One of the most impressive arguments for the origin of 1 Peter as a baptismal sermon is the evidence of the use of catechetical forms in the earlier part of the Epistle.

It seems that this is as far as we can go in placing the document in the worshiping life of the early communities of believers. But two closely allied views try to take the description of the *Sitz im Leben* considerably farther.

C. Baptismal Liturgy. The views of Preisker and Cross are treated together because of the way in which the second has sprung out of the first, although they might be mutually exclusive.

In his revision of the commentary by Windisch, Preisker understood 1 Peter as not simply the report of a baptismal service or the incorporating of baptismal material into a genuinely epistolary form but as the transcript of an actual baptismal service, in progress at the time of writing. It is an eyewitness account of the rite in its several stages and embodies the various contributions made by those who take part. Thus Preisker called 1 Peter "the oldest document of a primitive Christian divine service." The first question that comes to mind in reading this startling description is, "How did such a service report come to get mixed up, without explanation, with a document that purports to be a letter sent to churches in Asia and written in the name of a single individual?" This question is still unanswered when we have read all that Preisker and his supporters have told us in defense of their theory. This surely is the gaping hole in the side of this hypothesis, as Moule observed (*Essays,* p. 137). Best asked pertinently what interest Christians in Asia Minor would have in the baptismal liturgy of the church at Rome. "It is impossible to envisage the situation in Asia Minor which would have called out the need for the liturgy, nor the circumstances in Rome which would have led to its communication" (comm., p. 22).

Preisker's analysis has been summarized in the writings of Beare, Best, Cross, Cranfield, Moule, and Walls. This discussion will treat only those points on which criticism has fastened. One of the main supporting beams for this thesis is the distinction in verb tenses. In 1:3-21 the sanctification is future, but at 1:22f. it is taken as something fully achieved. Therefore, Preisker boldly concluded that the baptism took place between 1:21 and 1:22 but is not reported openly because it belongs to the secret training (*disciplina arcani*) of the Church. This looks suspiciously like an excuse to avoid an obvious criticism of the theory! The text hardly supports the theory anyway. The present participles must be taken as anticipating the future privileges of those being baptized, but, as Beare says, "it seems quite arbitrary to neglect the aorist *anagennēsas* (1:3) and to treat the present participle (in 1:5) as a future." The rigid division of ch. 1 into the two tenses of future (looking forward to baptismal act) and past (in recognition of what it has accomplished) will not hold. The tense in 1:3 is past, and there are ethical exhortations in 1:22.

Another supporting beam in Preisker's reconstruction is the presence of "stylistic peculiarities." He writes that the document contains "separate, self-contained sections, laid side by side, without transitions, each with its own stylistic peculiarities" (p. 157). In this way he is able to report, as though he himself had been present at the baptism, who spoke each part of the service. Characters flit across the stage in a bewildering array. When the neophytes have been baptized they take a brief vow (1:22-25), but the three-strophe hymn of 2:1-10 is sung by a Spirit-possessed individual. A "new preacher stands up in the community" at 2:11 and delivers a piece of exhortation that culminates in a hymn to Christ (2:21-24). Here Preisker accepts without demur Bultmann's conclusion that the author of this hymn took over a previously existing hymn. But this raises a difficulty: Are we to think of the hymn as coming spontaneously to the lips of the congregation (as is presumably the case in the record of 1 Cor. 14) or as their reciting, with adaptation, of something traditionally known in the Church? At 3:13 the style changes and another figure, an apocalyptist, comes forward to give an eschatological word as his contribution. This extends to 4:7a. The remaining verses to 4:11 are the final prayer of the baptism service. To account for the rest of the document Preisker held that the whole congregation is brought in at that point for a concluding service, which includes an eschatological address (4:12-19), an exhortation to the elders and young people, and finally a piece of "didactic instruction" from the presbyter, rounded off by a concluding blessing from another presbyter, who, said Beare rather drily, has evidently been sitting in the corner all the time.

The argument from linguistic style is notoriously uncertain (cf. C. F. D. Moule, *Epistles to the Colossians and Philemon* [1957], pp. 61f.); and the one place in his discussion where Preisker brought forward some objective criteria (in his attempt, on stylistic grounds, to posit a "common authorship" of 2:11–3:12 and the *paraklēsis* of vv. 1-9) is far from persuasive.

That there are differences of style in the entire letter is one thing, and this we may freely grant; but it is quite another thing to assign the various strands of the document to putative speakers (with Preisker) or to allocate them to different provenances (as Lohse proposes). With Beare it is better to say that the author of 1 Peter is a writer who evinces "the variations of a good prose stylist," at the same time giving due weight to the possibility that he has incorporated into his treatise fragments of hymns and confessions that may have been part of the common property of the early churches. But anything resembling the patchwork that Preisker or Lohse suggests seems to be imposing a theory on the evidence. Beare's conclusion best explains the literary phenomena of 1 Peter: "Rather than the direct use of fragments of a liturgy, the evidence seems to me to indicate a sermon developed along lines suggested by the structure of the liturgy, perhaps with an occasional outright quotation of familiar credal formulas, but as a rule freely expressed in the writer's own words and style" (p. 226).

Citation of this conclusion tends to prejudge the issue of Cross's modification of Preisker's arrangement. Cross built upon the hypothesis of his predecessor and sought ostensibly to improve it in one important respect. Accepting 1:3–4:11 as a baptismal liturgy reporting an actual baptism

in progress, Cross believed that we can more precisely identify the document as the celebrant's part in the Easter baptismal service.

Cross found his chief support in the notion that the key to much of the imagery of the document is the Easter celebration of the primitive Church. He traced many Easter (or paschal) motifs in the language of the letter. The typology of the Exodus pervades much of the text: e.g., in 1:18f. (as indeed in many of the allusions in 1:3-21) the background is clearly that of the Passover. Similarly, in 2:9f. the language is borrowed directly from Ex. 19:5f., which describes the giving of the Torah by which the Exodus deliverance was completed. The "Paschal theology," as Cross called it, is summarized in the exordium of vv. 3-12, which embodies the whole meaning of the Easter message. This assumption is obviously fundamental to Cross's hypothesis. This basic supposition of the paschal background of the letter has been assailed by T. C. G. Thornton in *JTS*, 12 (1961), 14-26; but see A. R. C. Leaney, *NTS*, 10 (1963/64), 238-251, for a contrary view.

By a skillful blending of the conclusions that he either reached or adopted, Cross went on to state his final verdict on 1 Peter. It is a liturgical document, as far as 1:3–4:11 is concerned. He confessed to an embarrassment when faced with the remainder of the letter. He felt that Preisker's suggestion that it contains an address to the whole company then assembled is lacking in conviction, but he had nothing to offer to take its place. But any literary theory that is left with 4:12–5:14 on its hands as a kind of inconvenient surd is under a cloud of suspicion.

As far as the structure of the formula is concerned, Cross's revision and new setting require alterations in Preisker's analysis. In the main, these modifications are in the form of attributing an author to the principal sections of the document, and it is the role of the celebrant that dominates the scene in Cross's reconstruction. Thus Cross has virtually fathered a new hypothesis altogether. He placed all the addresses in one mouth and ignored many of the hymns that earlier scholars had confidently classified. The result is that the "baptismal liturgy" theory is gone — if by that is meant the record of a service in progress. Instead we have, as J. W. C. Wand put it, "not so much the liturgy itself as the Bishop's running commentary on the liturgy" (*Interp.*, 9 [1955], 388). It is a serious weakness in the baptismal liturgy theory that its advocates are thus divided in the way in which the text is apportioned to the different participants in the rite. This divergence diminishes confidence in the theory as a whole; and both Preisker's and Cross's arrangement must meet Moule's objection that it is difficult to imagine "how a liturgy-homily, shorn of its 'rubrics' . . . but with its changing tenses and broken sequences all retained, could have been hastily dressed up as a letter and sent off (without a word of explanation) to Christians who had not witnessed its original setting" (*Essays*, p. 137). This point is made in the course of Moule's thorough examination of the Preisker-Cross hypothesis. The result of this examination is that alternative explanations can be provided for all the evidence that they bring forward in support. This lends extra weight to the observation made above. The final judgment, therefore, on this stimulating proposal must be "not proved."

This verdict is shared by Best (comm., pp. 22f.), who argued that 1:3–4:11 is more like a baptismal sermon than a liturgical sequence. He noted the cluster of baptismal ideas in 1:3, 23; 2:2, with 2:1 a possible allusion to a person's putting off clothing before the baptism (p. 24). Credal forms may be embodied in the baptismal hymns of 1:3-5; 3:18-22. In this assessment Best was joined by a number of scholars, e.g., Kelly (pp. 17-20) and Blevins. Blevins accepted Moule's earlier theory that 1:3–4:11 represents a baptismal sermon preached to new converts, whereas 4:12–5:11 may well be a sermon to the larger congregation already involved in a later persecution. But Best was soundly critical of so dividing the letter, and Goppelt offered an analysis of the letter that requires no such partitioning (comm., p. 42).

D. Some Conclusions. (1) The epistolary form of 1 Peter must be our fixed starting point, and only the strongest reasons will compel us to regard it as other than what it purports to be: an apostolic letter.

(2) There is ample precedent in the Pauline corpus for the belief that a genuine letter may embody sections of catechetical and cultic material. The researches of Seeberg, Carrington, and Selwyn in regard to the catechetical material, and Hunter, Cullmann, and Lohmeyer in respect of the cultic material, have amply demonstrated that the NT writers took over and incorporated into their literature pieces of parenesis, psalms and hymns of Christian worship, and rudimentary confession of faith and catechetical material. The rite of initiation in baptism was exactly the occasion when much of this material was used and transmitted to the convert. The presence of liturgical terms, the exalted, hieratic language, and the lyrical turns of expression in 1 Peter may be accounted for in this way.

The data of catechetical material in 1 Peter drawn from a wide variety of sources have been shown in some notable studies. Lohse investigated the pre-Christian elements in the parenetic tradition. The main interest, however, has centered on the relation of the teaching in 1 Peter to the Gospel tradition, both Synoptic and Johannine. E. Best has an important discussion, concluding that some evidence, though not much, points to an intimate connection between 1 Peter and the apostle Peter's teaching reported in Acts and in Mark's Gospel (*NTS*, 16 [1969/70], 95-113; summarized in his comm., pp. 52-54). R. H. Gundry, however, in two essays examined echoes of the words of Christ in 1 Peter and concluded that the letter was dictated by Peter in Rome (*NTS*, 13 [1966/67], 336-350; *Biblica*, 55 [1974], 211-232). Best's denial of 1 Peter's close dependence on the Synoptic tradition and Goppelt's remark (comm., p. 53, endorsed by Blevins, p. 408) that the Fourth Gospel has no visible contact with 1 Peter are both challenged by G. Maier, "Jesustradition in 1. Petrusbrief," to be published in R. T. France and D. Wenham, eds., *Gospel Perspectives*. The debate evidently continues.

The use of catechetical material paralleled in the Pauline corpus and other NT hortatory literature has also been scrutinized. The closest agreements are between 1 Peter and Romans (data in Best, comm., pp. 32-34; Best traces the affinity to a tradition common in the church at Rome, though conceding that Peter got to know Paul's theology before he came to Rome, where he was martyred; 1 Peter, however, seems unaffected by the most distinctive influences traceable to the Pauline theology) and between 1 Peter and Ephesians (see C. L. Mitton, *Epistle to the Ephesians* [1951]; *Ephesians* [*NCBC*, 1976], pp. 17f., arguing that the author of 1 Peter used Ephesians; also J. Coutts, *NTS*, 3 [1956/57], 115-127, who sees behind 1 Pet. 1:3-12 and Eph. 1:3-14 a common liturgical tradition comprising a baptismal prayer; similarly M. -E. Boismard, *Quatre Hymnes*, pp. 15-56). Best (comm., pp. 35f.), moreover, supported this dependence and argued that the author of 1 Peter knew both Romans and Ephesians; or, as the present consensus dictates, the Petrine circle, which cherished Peter's memory and sought to apply his teach-

ing to their situation, drew upon shared catechetical instruction found in the church at Rome.

One discordant note to make this chorus (joined by J. H. Elliott, *Home*) less than universal is the observation that there are parallels between 1 Peter and the Epistle of James in their respective parenetic emphases, so 1 Peter "gives testimony to sources available to the early church emerging from the Palestinian background and breaking into the Greek world" (Blevins, p. 408).

While the origin of catechetical traditions may be in dispute, there is a strong body of opinion that sees 1 Peter as containing identifiable baptismal teaching, whether liturgical or sermonic. This position has been challenged by those who find their chief clue to 1 Peter's composition in its function as an apologetic tract addressed to a community undergoing social ostracism, not as a liturgical document (see II above). Nevertheless, we aver that the connection with the baptismal rite is evident and we explain much of the liturgical data as the borrowing of material from such a service, although the borrowing may be unconscious and indirect and may have passed through the author's mind, making it thereby his very own.

(3) On this basis it may be possible to avoid giving too prominent a place to those verses that seem to require the letter's partitioning. If liturgical forms are incorporated, some of the cogency of the view that there is a break at 4:11 is destroyed, especially if W. Nauck has proved his point that there is no need to think of a change in the type of distress that had come upon the Church in the two parts of the Epistle. The case for the letter's unity is still arguable (see W. Nauck, *ZNW*, 46 [1955], 80; and W. J. Dalton, *Christ's Proclamation to the Spirits* [1956], who also vindicates the Epistle's unity).

(4) In conclusion, the issue of the literary origins of 1 Peter is stated in G. W. H. Lampe's words: "That 1 Peter makes use of baptismal material and is concerned with baptism is generally agreed. It remains an open question whether it is a genuine epistle, or whether it is indeed a liturgy embodied in a kind of letter" (*Expos.T.*, 71/12 [1960], 361). The evidence offered is such that the second alternative is not imperatively required; and the peculiarities of the letter may be attributed to the use of a special source. 1 Peter stands as a genuine letter but as including two baptismal homilies, one delivered before the other after the rite (see O. S. Brooks, *Nov.Test.*, 16 [1974], 290-305).

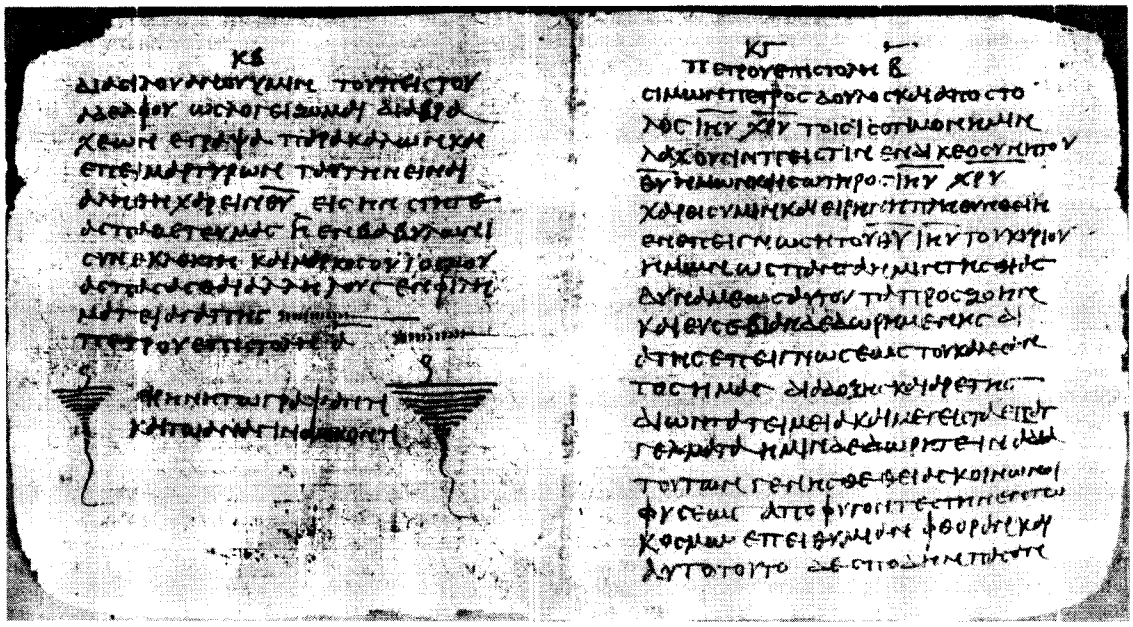
PETER, GOSPEL OF. *See* APOCRYPHAL GOSPELS III.A.

PETER, SECOND EPISTLE OF.

I. Contents
II. Attestation
III. Form
IV. Theological Themes
V. Historical Setting

I. Contents.–*A. Words of Greeting (1:1f.).* The author writes as an apostle to those who have come to share the faith of the apostles. The use of the word "knowledge" (*epignósis*, 1:2) serves as the transition to the body of the letter.

B. The Things Necessary for Life and Godliness (1:3-11). The things of which Peter speaks are the eight virtues listed in 1:5-7. These virtues begin with "divine power" (1:3) and end with participation in the "divine nature" (1:4) and entrance into God's eternal kingdom (1:12). God's "precious and very great promises" (1:4) are fulfilled in Christians' ability to escape the world's corruption and blindness (1:4, 9) and by the virtues to be confirmed in the knowledge of God (1:3, 8).



C. Guarantees of the Promises (1:12-21). Both the exhortations and the promises are solemn reminders of what the readers already know. They come with the unique authority of one about to die (1:12-15). Beyond this, they come from an eyewitness of the transfigured Christ (1:16-18). Finally, they are prophetic words like the inspired utterances of the OT prophets (1:19-21).

D. Warnings Against False Teachers (2:1-22). The mention of prophecy leads Peter to speak of false prophets and teachers, soon to infect the Church (2:1-3). He insists first on the certainty that they will be punished (2:3), citing as examples the evil angels, the generation that perished in the flood, and the cities of Sodom and Gomorrah (2:4-8), and concluding with a general principle (2:9). Then he describes the false teachers: they are mindless defiers of authority (2:10-12), bent on pleasure and greed (2:13-16), promising freedom but bringing only slavery and corruption (2:17-22).

E. Vindication of God's Promise (3:1-18). The readers are to hold fast to the tradition they have received (3:1f.) in the face of a specific threat: the heretics will scoff at the hope of Christ's coming (3:3f.), forgetting the lesson of the flood (3:5-7) and the difference between God's timetable and mankind's (3:3-10). Christians, knowing how the world will end, must faithfully await the sure fulfillment of God's promise (3:11-18).

II. Attestation.–In spite of the famous name it bears, 2 Peter has occupied a modest and at times tenuous place in the canon. In the ancient Church it was the least known of all the NT books and among the last to be accepted into the canon.

The first mention of 2 Peter by name is found in Origen, who already knew of problems surrounding it: "Peter . . . left behind one acknowledged Epistle, and, it may be, a second one; for it is doubted" (*Comm. on John* v.3). Other references by Origen (e.g., *Hom. on Joshua* vii.1) indicate that he himself accepted it as genuine, but these occur only in the later and not always reliable Latin translation by Rufinus. In the 4th cent. Eusebius (*HE* iii.25.3) listed 2 Peter among the "disputed books" (*antilegómena*). He also furnished the information that before Origen, Clement of Alexandria may have known 2 Peter. In his

Bodmer Papyrus VII (*ca.* A.D. 300) showing 1 Pet. 5:12-14; 2 Pet. 1:1-5 (Foto Biblioteca Vaticana)

brief commentaries (*Hypotypōseis*) Clement did not pass over "even the disputed writings [*antilegómena*], I mean the Epistle of Jude and the remaining Catholic Epistles, and the Epistle of Barnabas and the Apocalypse known as Peter's" (*HE* vi.14.1). But caution must be used in drawing conclusions from Eusebius's witness, for only fragments of Clement's *Hypotypōseis* have been preserved, and none of these deals with any part of 2 Peter. Moreover, Eusebius's inclusion of Barnabas and the Apocalypse of Peter among the "disputed" books suggests that he was not here referring to the categories with any exactness, for in *HE* iii.25.3 he listed these works as "rejected" (*nóthoi*).

The evidence for the early use of 2 Peter is somewhat increased by the publication in 1959 of the Bodmer papyri VII-IX (p^{72}). This third- or fourth-century codex from Egypt contains 1 and 2 Peter and Jude (all copied by the same scribal hand) along with Pss. 33 and 34 and a seemingly miscellaneous collection of noncanonical works. Such a grouping makes it difficult to use p^{72} as evidence of 2 Peter's canonicity, but does suggest its association in the Egyptian Church with 1 Peter and with the Epistle of Jude. This helps to explain (a) how the Alexandrian theologians Clement and Origen could have known 2 Peter, and (b) why Jude and both the Petrine Epistles were included when the NT was translated into Coptic (the language of Egypt) in the 3rd century.

Efforts have been made to find allusions to passages from 2 Peter in the literature of the 2nd cent., but none of the suggested parallels has met with general agreement. Perhaps the closest similarities are those found in the Apocalypse of Peter, dating from the mid-2nd cent. (e.g., in the Akhmim Fragment of that work: v. 1, "Many of them shall be false prophets and shall teach ways and diverse doctrines of perdition" [cf. 2 Pet. 2:1]; v. 21, "another place . . . very gloomy" [cf. 2 Pet. 1:19]; vv. 22, 28, "blaspheming the way of righteousness" [cf. 2 Pet. 2:2, 21]). Knowledge of 2 Peter would of course be expected in those circles where the apostle Peter was honored and where legends grew up around him. What is remarkable is not that a few parallels exist, but that they are not closer or more numerous than they are. Essentially the Church up to A.D. 200 is silent about 2 Peter. The Epistle was not attacked; it was simply ignored and seems to have remained virtually unknown until the time of Origen.

III. Form.–Second Peter presents itself unmistakably as the work of the apostle Peter (1:1). The author claims to have been an eyewitness of Jesus' glory on the mount of transfiguration (1:16-18), and he can speak of the apostle Paul as "our beloved brother" (3:15). But more specifically, 2 Peter presents itself as Peter's *testament*. A testament is a well-known and easily identifiable literary form. It is a farewell discourse of one who is about to die. Biblical examples include the farewell of Jacob (Gen. 49), of Moses (Dt. 31–33), of Jesus (Mt. 24–25; Jn. 14–16), and of Paul (Acts 20:17-38; 2 Timothy). Apocryphal testaments were assigned in Jewish and/or Christian tradition to Adam, Abraham, Job, Isaac, Solomon, and the twelve sons of Jacob.

The most common elements in this literary form are: (1) a prediction of one's death; (2) reminiscences of the past; (3) predictions of what is to come, often with special emphasis on "hard times" (e.g., tribulation and apostasy); (4) exhortations to the hearers (i.e., the readers) to be faithful through all these things; (5) some kind of positive disclosure of final victory or vindication. These elements are present in 2 Peter. The Apostle cites as his reason for writing the fact that he is soon to die, just as Jesus had told him (1:12-14; cf. Jn. 21:18f.). He warns against false teachers who will come to destroy the Church with their heresies (ch. 2; 3:3-7). He exhorts his readers to guard themselves against this threat and to build lives of faithfulness and virtue (e.g., 1:1-12; 3:11-18), knowing that in the end God will triumph (1:4, 11; 3:8-13). Although 2 Peter bears all the marks of a real letter (address, salutation, closing doxology), it could also have been appropriately named the Testament of Peter.

The classification of 2 Peter as a testament says nothing regarding its authenticity. A testament can be a mere literary device by which an author clothes his message in words falsely attributed to some great man of the past. This is what has happened in the apocryphal testaments of late Judaism. Or a testament can be the genuine product

of a man's last days or years summing up the most vital concerns of his life (cf. perhaps D. Bonhoeffer's *Letters and Papers from Prison* [Eng. tr., 3rd ed. 1967]).

Several factors have combined to convince the overwhelming majority of modern scholars that the apostle Peter is *not* the author of 2 Peter in a literary sense:

(1) 2 Peter lacks any wide attestation in the ancient Church.

(2) The language and style of 2 Peter not only differ markedly from 1 Peter, so that it is unlikely that the same man could have written both Epistles, but also include a number of Greek religious and philosophic terms that seem unlikely to have come from a Galilean fisherman like Peter. Moreover, the Epistle exhibits in places an exaggerated rhetorical style more characteristic of Hellenistic Asia Minor than of primitive Christianity.

(3) The situation that is presupposed is indicated by a number of details in 2 Peter that point to a date later than the apostle Peter's death (believed to have been in the 60's): e.g., at least some of Paul's letters have been collected and seem to be regarded as Scripture (3:15f.); the author looks back on the apostles as if they belong to an earlier generation (3:2); he knows of the existence of 1 Peter ("this *second* epistle," 3:1) and, it is urged, capitalizes upon it to gain acceptance for his own writing; most important, perhaps, the first generation of Christians has passed away and the second coming of Christ has been long delayed (3:3ff.).

(4) 2 Peter shows dependence on Jude. A close comparison of these two Epistles suggests (a) a literary relation between them and (b) the priority of Jude. If Jude dates from the 70's or 80's, 2 Peter cannot be much earlier than A.D. 100 and is perhaps considerably later.

On the basis of such arguments, 2 Peter is frequently regarded as the latest of all the NT writings (according to some critics as late as 140 or 150). Denial of traditional views of authorship of particular biblical books is not necessarily accompanied by denial of their authority or religious value. But in the case of 2 Peter, linguistic and historical arguments are sometimes joined with certain negative theological judgments, so that to some extent it is appropriate to speak of a critical "attack." Many scholars of an earlier generation who denied Petrine authorship were careful and sober in their criticism, and very thorough in building their case (e.g., F. H. Chase and J. B. Mayor), but this has not always been true of their successors. The Epistle is often said to move on a distinctly lower ethical plane than most of the rest of the NT (esp. with regard to charity toward one's opponents), and to neglect the central features of the Christian message (the cross and the resurrection of Jesus Christ).

Before such criticisms are accepted, several moderating factors must be kept in mind.

(1) As a testament, 2 Peter speaks clearly of the apostle's approaching death. Early tradition states almost unanimously that Peter died as a martyr in the persecution of the Church by the Emperor Nero *ca.* A.D. 64. Yet the Epistle contains no development of the theme of martyrdom. This is surprising if it is indeed a second-century document, for Christian literature of this period tended more and more to glorify the martyrs. Their heroism and faithfulness to Christ in the face of threats and torture served as an example to Christians everywhere. Before A.D. 100 Clement of Rome could write specifically of Peter's martyrdom: "Let us set before our eyes the good apostles: Peter, who because of unrighteous jealousy suffered not one or two but many trials, and having thus borne witness as a martyr went to the glorious place which was his due . . ." (1 Clem. 5:3f.). It is remarkable that a second-century tract pretending to be Peter's testament would omit any reference to his glorious martyrdom. Such reticence is more what we would expect if Peter were himself the author.

(2) It can be argued that the theme of martyrdom is not developed because 2 Peter is not written (as was 1 Peter) to strengthen the readers against persecution. Rather, it is a polemical tract against certain heresies that confront the Church. But when we think of Peter combating heresy, we cannot but think of the traditional archheretic Simon Magus. Simon comes into contact with the apostle only briefly in the NT (Acts 8:9-24), but a wealth of legend surrounds him in later tradition. In the second- and third-century narrative cycles found in the Acts of Peter and the Pseudo-Clementine Recognitions and Homilies he becomes Peter's constant foe in philosophical debate and in contests of miraculous power. It seems strange that an antiheretical tract in Peter's name from the 2nd cent. would have missed an opportunity to make reference to Simon Magus. But there are none of these legendary features in 2 Peter.

(3) In general 2 Peter is free of the legendary and apocalyptic details that characterize the apocryphal Petrine literature (i.e., the Gospel, the Apocalypse, and the Acts of Peter). In this respect at least, 2 Peter is more like 1 Peter than like any other writing that bears the Apostle's name.

(4) It is doubtful that the mention in 2 Pet. 3:1 of itself as a "second" Epistle implies a reference back to 1 Peter. The author clearly indicates that *both* Epistles in view are reminders of apostolic tradition (perhaps with emphasis on warning about heresy, cf. Jude 17). But this description does not fit 1 Peter, which never refers back to the apostles.

(5) Though the author of 2 Peter claims to be an apostle, he does not model his claim upon that of 1 Peter. His use of the Jewish designation "Symeon (instead of Simon) Peter" is hard to explain as a later fiction. It is a rare form of the name, occurring elsewhere in the NT only on the lips of James (Acts 15:14). By itself, however, it is no proof that 2 Peter is early. The Pseudo-Clementine writings are evidence that primitive Jewish-Christian terms and thought forms survived even in the 2nd and 3rd centuries.

(6) It is by no means certain that 2 Peter is dependent on Jude. It is clear that a literary relation of some sort exists, but the matter of priority is difficult to settle. Is priority to be assigned to the more elaborate and wordy 2 Peter or to the more coherent and compactly written Epistle of Jude? Would a reviser be more likely to expand his source or to abridge it? Examples of both can be cited (e.g., Matthew has expanded Mark's Gospel with material of his own, yet in many individual pericopes he has abridged the earlier Gospel for the sake of conciseness and emphasis on one main point). Sometimes obscure verses in 2 Peter are clarified by their parallels in Jude (e.g., 2:11; cf. Jude 9), while in other cases the reverse is true (e.g., Jude 11; cf. 2 Pet. 2:15f.). It has been argued that 2 Peter is later because it has suppressed Jude's two references to noncanonical literature: 1 Enoch in Jude 14, and (according to Clement and Origen) the Assumption of Moses in Jude 9. But the reasoning is precarious, (a) because in avoiding apocryphal material, 2 Peter stands squarely with most of the rest of the NT, and (b) because later works of the 2nd and 3rd cents. do on occasion make extensive use of noncanonical Jewish literature, often reediting and circulating it for the edification of Christians. Thus the matter of priority remains unresolved. The references to apostolic tradition in Jude 17f. and 2 Pet. 3:2 suggest the possibility that the two Epistles may have used as their common source some antiheresy tract (or tracts) attributed to the apostles. But if there was such a source the parallels are

unfortunately not close enough to permit its reconstruction.

All these considerations indicate that the question of 2 Peter's authenticity is by no means as simple as is sometimes thought. Both the traditional view of Petrine authorship and the modern critical conclusion that this is a second-century tract falsely claiming apostolic origin face serious difficulties. Beyond these two alternatives, only conjectures can be offered. It is possible that 2 Peter may represent a compendium or anthology of traditional Petrine material put together in the form of a testament by one or more of the apostle's followers after his death. Posthumous publication in Peter's name does not necessarily imply any intent to deceive. If the tradition behind 2 Peter was genuinely Petrine (or even if it was thought to be), then the only kind of compiler of the material who might be guilty of fraud would be one who presumptuously signed *his own* name to the apostle's teaching.

There are clues in the Epistle itself that this compendium theory may have some merits. For example, the very passage that stamps this work as a testament hints at a double time perspective. Speaking as Peter, the author makes two distinct statements:

(a) "I think it right, *as long as I am in this body,* to arouse you by way of reminder . . ." (1:13).

(b) "And I will see to it that *after my departure* you may be able *at any time* to recall these things" (1:15). The contrast between Peter's lifetime and the period after his death is striking. The second statement could refer to some other document, unknown to us, which Peter intended to write but never did. If so, it is most plausibly understood as coming from Peter himself. (Who would bolster a false apostolic claim by a vague reference to a nonexistent document?) But it is also possible that 2 Peter embodies within itself *both* stages of the work of bringing to remembrance — "as long as I am in this body," and "after my departure . . . at any time." This might explain why the heretics are predicted as yet to come (2:1) but described as if already present (2:12-19). Moreover, in 3:1ff. it is remarkable that the writer would present himself as Peter by referring to "this second epistle" while in the very same sentence looking back at "your apostles" as figures of the past. Perhaps the term "second" or "secondary epistle" is used in relation not to 1 Peter, but to the traditional Petrine teachings out of which 2 Peter has been built. If so, then the writer has not slipped here by inadvertently speaking of the apostles as past; instead he is consciously and openly speaking from within the framework of his own time. In accordance with Peter's wishes as expressed in the tradition recorded in 2 Pet. 1:15, he attempts to bring Peter's teaching and personality to bear on increasingly complex problems that arose after the apostle's death. The relation of 2 Peter to the historical Peter would then be somewhat analogous to the relation of the Gospel writers to Jesus as they preserved His teaching while adapting it to their own needs. Though the compendium theory explains a number of things, including the stylistic problems of 2 Peter, the slowness with which it became known and accepted, and especially the double time perspective which shows through at times, it falls short of proof and must remain a hypothesis.

IV. Theological Themes.–Despite its brevity, 2 Peter has a number of features that give its theology a distinctive stamp. An element in ch. 2 that distinguishes 2 Peter from Jude is that he appeals to the OT for illustrations of God's deliverance of the righteous as well as of His judgment of the wicked (2:9). In accord with a principle grounded in the words of Jesus, the last days will parallel the days of Noah and of Lot (2:5-9; cf. Mt. 24:37ff.; Lk. 17:26-28). Like these ancient figures, Christians live in a world ripe for judgment. Negatively they are those who have escaped the world's corruption (1:4; 2:18, 20), while positively they await a "new heaven and a new earth" (3:13).

History, for 2 Peter, falls into three ages: "the ancient world" (2:5; 3:6), "the present heavens and earth" (3:7), and the world to come (3:10, 13). The dividing points are Noah's flood, and the expected "coming of the day of God" (3:12). As Noah was a "herald of righteousness" in his day, so Christians are heralds of a new world "in which righteousness dwells" (3:13). They look for a day parallel in its import to the flood, but parallel in kind to the judgment on Lot's city of Sodom, a day when "the heavens will pass away with a loud noise and the elements will be dissolved with fire" (3:10). History is thus divided by means of outward physical events that change the course of nature rather than by invisible realities such as redemption or the Spirit. When the author speaks of Jesus, he fastens upon the Transfiguration, with its visible display of Jesus' glory, as a sign of divine power and of Christ's future coming (1:16-18). He claims to have seen Jesus enthroned as king on the "holy mountain" (cf. Ps. 2:6) before his very eyes. This, together with the swift certainty of God's judgment in the past, assures him that the divine promise will be fulfilled. Yet he never revels in the spectacular for its own sake; he appeals to it in the face of a specific threat, but his positive counsel is to grow in the knowledge of God by erecting upon faith a whole ladder of virtues culminating in love (1:5-7). This, as much as the grim warnings that follow, belongs to the substance of his testament.

V. Historical Setting.–To say that in some respects the historical setting of 2 Peter looks beyond the lifetime of the apostle does not solve the problem of determining what that setting was. The earliest attestation of the Epistle suggests that it may have come from Egypt, and it is natural to connect the warnings about false teachers with the Gnosticism that flourished in Egypt in the 2nd century. But the author attacks the heretics more for immorality than for false doctrine: they are bent on lust and pleasure (2:2, 13f.), and are greedy for gain (2:14f.); they make extravagant claims for themselves (2:18) while blaspheming angelic beings (2:10ff.); for all this they are doomed to destruction (2:3, 9). These features agree remarkably with certain traditions surrounding the earliest attested form of Gnosticism. This was Simonian Gnosticism, which claimed Simon Magus as its founder. Simon too was charged with immorality and blasphemy of angels (Irenaeus *Adv. haer.* i.23.3f.) and was remembered for his extravagant claims, his greed for money, and his certain destruction (Acts 8:9-24). But since many of these same features became standard elements in the ancient Church's description of heretics, no precise identification of the opponents is possible.

At any rate, no connection can be established between Simon and the scoffers who denied Christ's coming (Irenaeus, par. 3, in fact attributes to Simon a view, shared by 2 Peter, that the world was to be dissolved). Their objections were based mainly on disappointment of eschatological hopes. This problem may have had its origin in Jewish attacks on primitive Christianity. Christians claimed that in Christ the messianic age had dawned, yet it was clear that the world had not been visibly transformed. This made the Church vulnerable to Jewish charges that nothing had really changed since the days of "the fathers" and that therefore the Christian claim was false. Elsewhere, in the NT, "the fathers" uniformly refers to OT figures. It is possible that by the time 2 Peter was written the charge had been taken up even by some within the Church, for whom "the fathers" might have included the first generation of Christians, but this passage should not

be pressed too far as evidence for a late date. Its basic idea is ancient enough to be expressed in an anonymous source (Jewish or Christian) cited as "the scripture" by Clement of Rome before A.D. 100, and therefore traceable back almost to the time of Peter (1 Clem. 23:3f.; cf. also 2 Clem. 11:2f.).

Unfortunately 2 Peter is too brief to allow a fuller reconstruction of its historical setting. Unanswered questions remain, particularly regarding the precise relation between chs. 2 and 3. Clearly the same group is in view in both places, but whether the denial of the eschatological hope is the root of all the false teaching, or simply one deviation among many, is not easily determined.

PETHAHIAH peth-ə-hī'ə [Heb. *pᵉṯaḥyâ*–'Yahweh opens'].

1. The head of a priestly family, assigned in David's time to the nineteenth division of temple service (1 Ch. 24:16).

2. [Gk. Apoc. *Pathaios, A Phathaios*]; AV PATHEUS; NEB PHATHAEUS. A Levite who had married a foreign woman and was required to divorce her (Ezr. 10:23 par. 1 Esd. 9:23); probably the same Levite who assisted Ezra in leading a public service of confession after the Israelites had "separated themselves from all foreigners" (Neh. 9:5; cf. vv. 1-3).

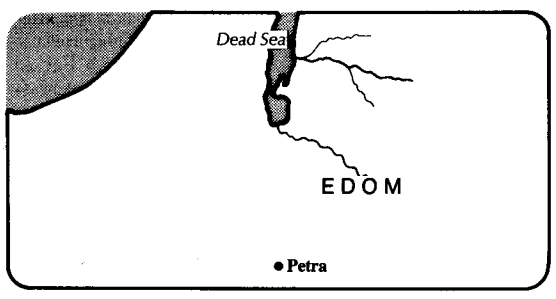
3. Son of Meshezabel, descendant of Judah; adviser to Zerubbabel in postexilic Jerusalem (Neh. 11:24).

PETHOR pē'thōr [Heb. *pᵉṯôr*; Gk. *Phathoura*]. Home of Balaam son of Beor, near the Euphrates (Nu. 22:5). In Dt. 23:4 it is further described as being in Aram-naharaim (Mesopotamia), and Nu. 23:7 speaks of Aram and the eastern mountains. Pethor is identified with the Pedru found in geographical lists of Thutmose III (15th cent. B.C.) and with Pitru, the Hittite name for the Assyrian Ana-Aššurutîr-aṣbat (meaning "I founded [it] anew for Aššur"), a city which Shalmaneser III captured in his third year (857 B.C.) and where he received tribute from the kings of Carchemish, Commegene, Melitene, and other districts. Shalmaneser places Pitru "on the other side of the Euphrates, on the river Sagur" (*ANET*, p. 278). The modern Sājūr flows into the Euphrates from the northwest about 90 km. (60 mi.) NE of Aleppo. Pethor would thus be on the west bank of the Euphrates, probably at the site of Tell el-Aḥmar, 19 km. (12 mi.) S of Carchemish.

R. E. HAYDEN

PETHUEL pe-thōō'əl [Heb. *pᵉṯû'ēl*]. Father of Joel the prophet (Joel 1:1).

PETITION [Heb. *šᵉ'ēlâ, šēlâ*]; NEB PRAYER, PRAY, REQUEST, ASK; [*miš'ālâ*] (Ps. 20:5 [MT 6]); NEB ASK; [*nāśā' pānîm*–'lift (someone's) face'] (1 S. 25:35); AV "accept thy person"; NEB "grant your request"; [Aram. *bᵉ'â, bᵉ'ā'*–'request, ask, pray' (Dnl. 6:7, 11-13 [MT 8, 12-14]), *bā'ū*–'petition, prayer' (6:7, 13 [MT 8, 14])]; AV also PRAY; NEB also PRAYER; [Gk. *entynchánō*] (Acts 25:24); AV DEAL; NEB APPEAL. A request or appeal made to a powerful ruler or to God.



"Petition" is the language of the court. Queen Esther approaches King Ahasuerus on behalf of her people using a Persian ceremonial formula of making a petition (*šᵉ'ēlâ*; cf. *šā'al*, "ask") and a request (*baqqāšâ*; Est. 5:6-8; 7:2f.; 9:12). In 1 S. 25:23-31 Abigail prostrates herself before David and intercedes with him for the life of her husband Nabal. David responds with kingly FAVOR, "I have hearkened to your voice, and I have granted your petition [lit. "raised your face"]" (v. 35; *see also* PARTIALITY). The concept of appealing to a ruler is present also in Acts 25:24, where Festus tells King Agrippa that "the whole Jewish people petitioned me" concerning the apostle Paul (see *TDNT*, VIII, *s.v.* τυγχάνω κτλ.: ἐντυγχάνω [O. Bauernfeind]).

Elsewhere "petition" occurs in the sense of PRAYER. King Darius issued a decree prohibiting anyone from making "petition to any god or man for thirty days," except to Darius himself (Dnl. 6:7). Thus, for one month the king alone was to be the god to whom all religious petitions were directed (see comms., e.g., *IB*, VI, 440f.). Because Daniel rejected this idolatry and was found "making petition and supplication before his God" (v. 11 [MT 12]) three times daily (vv. 12f. [MT 13f.]), he was thrown into the den of lions as the interdict prescribed (v. 16 [MT 17]). In 1 S. 1:10f. Hannah, old and barren, prayed that God would give her a child. Eli the priest blessed her, "Go in peace, and the God of Israel grant your petition [Heb. *šēlâ*] which you have made to him" (v. 17). When Hannah brought the young Samuel to Eli, she proclaimed God's faithfulness, "For this child I prayed; and the Lord has granted me my petition [*šᵉ'ālâ*]" (v. 27). In the same spirit the community intercedes on behalf of the king, "May the Lord fulfil all your petitions!" (Ps. 20:5 [MT 6]). Interestingly, the only other passage that uses *miš'ālâ* (Ps. 37:4; RSV "desire") also speaks of the Lord fulfilling the prayerful desires of one who trusts in Him during times of trouble (see *TWOT*, II, 892). D. K. MCKIM

W. R. HARRIS

PETRA pe'trə. Capital city of the Nabateans, commonly identified with biblical SELA. Petra ("the rock") is located in a semi-landlocked valley some 80 km. (50 mi.) S of the Dead Sea. The valley owes its modern name, Wâdī Mûsā ("the valley of Moses"), to local folklore identifications with the Mosaic tradition. The nearest modern village, and the starting point for tourist visits today, is el-Ji (the Gaia of Eusebius *Onom.*). Access to the site is generally through the eastern ridge (el-Kubtha) via the Siq ("cleft"), a narrow, winding geologic fissure.

If we assume its identity with Sela, the city is first mentioned in historical times in connection with Amaziah's defeat of "the men of Seir" (2 K. 14:7; 2 Ch. 25:11f.). At

PETRA

that time it was an Edomite stronghold near the King's Highway, the major communication route in Transjordan. How much earlier the Edomites had taken over the site has not yet been determined, but it appears to have coincided with the early Iron Age in Syro-Palestine. The presence of Upper Paleolithic and Neolithic remains in the vicinity of the site, and especially at nearby Beidha, indicates a considerable early occupation.

Nothing more is known of the site, however, until 312 B.C., when the Greeks raided the area, according to Diodorus Siculus (*see* NABATEANS). By that point Petra had already become a Nabatean center; it would rise in the next few centuries to become the capital of one of the greatest commercial kingdoms known in the ancient Near East. The next report of the city and its people comes from the early 2nd cent. B.C. (2 Macc. 5:8). By then the Nabatean kingdom had begun to press on Jewish-held territory to the north, and the Nabateans had begun to be involved in the intrigues of the Hasmonean court. Here the influence of Antipater, whose wife was a Nabatean, figures greatly.

After Petra fell to the forces of Trajan in A.D. 106, it was honored by the title of *colonia* and beautified with a few public buildings but was actually in its final stages of decline. The capital of Provincia Arabia eventually shifted elsewhere, and in strategic commercial importance Petra was superseded by other cities.

During the Byzantine period some slight Christian occupation of Petra took place, as inscriptions and architectural remains suggest. Yet this was negligible, and no real resurgence of urban power developed. The episcopal see that bore the name of Petra did not even refer to Petra at all but to nearby Kerak. Enough Christian influence remained, in the form of monasticism, however, for the "monks of St Aaron" to be found in the area as late as the Crusades.

During the early period of the Crusades Petra regained strategic value and was refortified. The ancient name of the site had been lost, however; the fortress, at el-Wu'eira just outside the Sîq, was known as the fortress of the "valley of Moses." Petra's resurgence was based upon the same factor that had made it a major commercial center under the Nabateans — the convergence of the land caravan routes from the south that led west to Gaza and the sea and north to Damascus. The Latin kingdom was in dire need of financial sustenance. Hence minor installations were established inside the ancient city area to police the caravan routes, and the caravans were taxed as a source of revenue from time of Baldwin I (A.D. 1100-1118) onward. The disastrous defeat of the Crusader forces at the Horns of Hattin in A.D. 1187 was felt at Petra as well; once more its position was no longer strategic, as Islamic control returned over the whole area.

Rediscovered in 1812 by J. L. Burckhardt, Petra — "the rose-red city half as old as time" — was visited by a number of learned travelers and scholars until it became a major tourist attraction in modern times. It is primarily known today for its fantastic natural beauty and the hundreds of rock-carved facades left by the Nabateans. Among the best known of these are the Khazneh Far'un (the "treasury of the pharaoh"), ed-Deir ("the monastery"), and the "royal tombs." Dozens of others exist, mostly off the usual tourist trails, as well as scores of rock-hewn stairways, cultic places, and religious carvings. Among the cultic places, the "great high place," discovered by Robinson early in the present century, is one of the finest examples of open-air cultic centers in the Near East. *See* picture in HIGH PLACE.

In addition to these structures, a monumental theater

The enormous Roman temple, ed-Deir, about 50 m. (175 ft.) high, was carved by the Roman conquerors of this Nabatean stronghold in the 3rd cent. A.D. (Jordan Information Bureau)

Roman-style amphitheater at Petra carved out of red sandstone (B. VanElderen)

near the Sîq entrance to the city has been excavated by an American expedition in cooperation with the Department of Antiquities of Jordan. The theater's seating area was rock-carved, with stage and scenery of built masonry, and it could hold seven thousand spectators. Only since the excavations under the direction of P. C. Hammond has the

Nabatean origin of this Roman-style structure been proved. Later Roman restyling had obscured its original builders' identity.

The Roman remains of Petra have become more apparent only in the last few years, as the Jordan Department of Antiquities uncovered, restored, and preserved some of them. The paved Roman street, with colonnade and shop fronts, the massive triple-arched gate, and the temple called Qasr Bint Far'un have been given attention. Likewise, various clearings of rubble, tourist trails, and other features have been undertaken, including the restoration of the ancient barrage at the mouth of the Sîq. The latter work was both a restoration and a safety measure, since the barrage diverts flood waters from the Sîq through an original tunnel and around the city.

The hydraulic engineering skill of the Nabateans at Petra and elsewhere has also come under scientific study. At Petra the remains of vast cisterns, old runnels, catchment basins, and a vast system of pressure pipes may still be seen.

Excavations at Petra have been undertaken by G. Horsfield, W. F. Albright, M. Murray, P. Parr, D. Kirkbride, P. C. Hammond, and others. Much completely new material on the life, culture, language, numismatics, and historical connections of the Nabateans and their capital city has been brought to light. As a consequence, the extraordinary commercial and cultural role of Petra among the great caravan cities of the ancient Near East has become more recognized and appreciated.

PHALTIEL fal'ti-əl.

1. [Lat. *Phalthihel, Salathiel*]; AV SALATHIEL. A "chief of the people" who came to Ezra between his first and second visions (2 Esd. 5:16).

2. (2 S. 3:15, AV). *See* PALTIEL **2.**

PHANTOMS [Heb. *ṣelem*–'image'] (Ps. 73:20); AV IMAGE; NEB IMAGES IN SLEEP. This difficult verse reads literally, "As a dream when one awakes, O Lord, in the city their image you shall despise." Heb. *ṣelem* often refers to an idol ("image," 1 S. 6:5, 11; 2 K. 11:18), although it is also used in a less concrete sense ("shadow," Ps. 39:6 [MT 7]). Thus D. J. A. Clines (*Tyndale Bulletin*, 19 [1968], 74f.) states that *ṣelem* here means "an insubstantial non-physical object, a dream-object; yet it is recognizably the shape or configuration of something." See the comms. for other interpretations of this verse. G. A. L.

PHANUEL fan'yo͞o-əl, fə-no͞o'əl [Gk. *Phanouēl* (= Heb. *pᵉnû'ēl*)–'face of God'; *see* PENUEL]. Parent (probably father) of Anna the prophetess (Lk. 2:36).

PHARAKIM fâr'ə-kim [Gk. B *Pharakem*, A *Pharakeim*]; AV PHARACIM. Head of a family of temple servants who returned from the Exile with Zerubbabel (1 Esd. 5:31). The name is omitted in par. Ezr. 2:51; Neh. 7:53.

PHARAOH fā'rō, fā'rā-ō [Heb. *parʿōh*; Gk. *Pharaō*; Egyp. *pr-ʿ3*–'great house']. The common OT title for the kings of ancient Egypt. It derives from a phrase used for the royal palace and court until the New Kingdom when, in the mid-18th Dynasty, it came to be used of the king himself. It first so occurs under Thutmose III and IV (15th cent. B.C.), then with Ikhnaton (*ca.* 1360), and thereafter frequently. (See W. C. Hayes, *JEA*, 46 [1960], 41f.; A. H. Gardiner, *Egyptian Grammar* [3rd ed. 1957], p. 75 and n. 10; J. Vergote, *Joseph en Égypte* [1959], pp. 45-48.)

The biblical and Egyptian uses of "pharaoh" correspond closely. Thus in the Pentateuch "Pharaoh" is used without a proper name precisely as in Egypt in the later 14th to 10th cents. B.C. (thus including Moses' time). From the 10th cent. B.C. onward "Pharaoh" plus a proper name became common usage; cf. Pharaoh Hophra and Pharaoh Neco. The phrase "Pharaoh king of Egypt" is a purely Hebrew phrase (parallelistic) and so not datable by reference to Egyptian sources.

Since pharaohs before the time of Solomon are not mentioned by their own names in the OT, their identities can only be approximated on general chronological grounds. Thus Abraham's pharaoh (Gen. 12) probably belonged to the 12th Dynasty, and Joseph's to the Hyksos (15th Dynasty) or their immediate predecessors. The pharaoh(s) of the oppression preceded and terminated in the pharaoh of the Exodus; these rulers were most likely Ramses II and his predecessors (esp. Seti I and perhaps Harmhab; *see* EXODUS, DATE OF THE). The date of Bithiah and her father (1 Ch. 4:18) is unknown. The pharaoh that took Gezer and gave it with his daughter's hand to Solomon (1 K. 3:1; 9:16) belonged to the 21st Dynasty and was perhaps Siamun; *see* EGYPT II; PHARAOH'S DAUGHTER. To that line would also belong the Edomite Hadad's host (1 K. 11). For kings SHISHAK, SO, TIRHAKAH, NECO, and HOPHRA, *see* separate articles; Zerah was not a king but a general.

Isaiah 19:11 well reflects Egyptian pride in the continuity of pharaonic tradition, for every pharaoh was the successor to the whole line of earlier kings and joined their august company at death (cf. H. W. Fairman, "Kingship Rituals of Egypt," in S. H. Hooke, ed., *Myth, Ritual, and Kingship* [1958], pp. 99f., 103f.).

Pharaoh was a god by office yet himself human (cf. G. Posener, *De la divinité du Pharaon* [1960]; J. G. Griffiths, *JEA*, 49 [1963], 189-192); he was considered responsible for the welfare of Egypt, even including the Nile (cf. Ezk. 29:3; sources quoted by S. Morenz, *Die Heraufkunft des Transzendenten Gottes in Aegypten* [1964], p. 48 and n. 2). K. A. KITCHEN

PHARAOH HOPHRA. *See* HOPHRA.

PHARAOH NECO. *See* NECO.

PHARAOH'S DAUGHTER [Heb. *baṯ-par'ōh*].

1. The woman who rescued and adopted Moses (Ex. 2). She was probably one of many members of a harem at a delta pleasure palace. She would be a daughter (not necessarily the sole one) of a predecessor of Ramses II, the most probable pharaoh of the Exodus.

2. A wife of Solomon (1 K. 3:1; 7:8; 9:16, 24; 11:1). Since Shishak ruled Egypt twenty years before raiding Palestine in Rehoboam's fifth year, he acceded about year 25 of Solomon's reign. Shishak's predecessor Psusennes II ruled about fourteen years (acceding about year 11 of Solomon). Hence in his first few years Solomon probably married a daughter of the preceding king, Siamun. Her name is unknown because no contemporary records of Siamun's family have been recovered. Marriage with a pharaoh's daughter was a special honor.

Bibliography.–A. Malamat, *JNES*, 22 (1963), 9-17; *BA*, 21 (1958), 96-102 (repr. in *Biblical Archaeologist Reader*, II [1964], 89-94).

3. Bithiah, who married Mered (1 Ch. 4:18). Her date and identity are unknown. K. A. KITCHEN

PHARATHON făr'ə-thon [LXX Gk. *Pharathōn*]; AV PHARATHONI. The LXX reads *kaí tēn Thamnatha Pharathōni* (see NEB) but Josephus (*Ant.* xiii.1.3 [14-16], which spells the name *Pharanthō*) and the Syriac insert an "and" between the two names, thus listing two separate cities. (The LXX may have omitted the *kaí tēn* before *Pharathōni*; so Rahlfs, *Septuaginta*.)

Pharathon is a city in Judea which was fortified by Bacchides (1 Macc. 9:50), and housed a garrison which harassed Jonathan (v. 51). Some would identify it with PIRATHON, a city in the hill country of Ephraim (Jgs. 12:15), the home of a minor judge named Abdon (Jgs. 12:13) and of Benaiah, one of David's thirty men (2 S. 23:30; 1 Ch. 11:31; 27:14; not Benaiah of Kabzeel described in 2 S. 23:20-23). The problem with identifying these two names with the same city is that Pharathon was in Judea (1 Macc. 9:50) but Pirathon was in Ephraim (Jgs. 12:15; 1 Ch. 27:14). W. D. MOUNCE

PHARES fâr'ēz [Gk. *Phares*]. The Greek form of PEREZ son of Judah. "Phares" is used by the AV, RSV, and NEB in 1 Esd. 5:5, but by only the AV in Mt. 1:3; Lk. 3:33 (RSV, NEB, "Perez").

PHAREZ fâr'ēz.

1. An AV OT form of PEREZ.
2. (1 Esd. 8:30, AV). *See* PAROSH 1.

PHARIDA fə-rī'də (1 Esd. 5:33, NEB); **PHARIRA** fə-rī'rə (AV). *See* PERIDA.

PHARISEES fâr'ə-sēz [Gk. *pharisaíoi*]. A prominent religious party in Judaism during the late Second Temple period (*ca.* 100 B.C. - A.D. 70), the party most frequently mentioned in the NT.

  A. Jesus and the Pharisees in the Gospel Tradition
  B. Pharisees in Acts and Paul

I. Name.–"Pharisees" is an anglicized transliteration of Gk. *pharisaíoi*, which in turn derives from Heb. *pᵉrûšîm* or *pᵉrûšîn* or Aram. *pᵉrišayya'*. Two suggestions for the meaning of this name have not received much support. One, by T. W. Manson (*BJRL*, 22 [1938], 153-59), is that the word *pᵉrûšîm* may be construed to mean "Persianizers," a taunt or epithet devised by their opponents to stigmatize them for believing in demonic spirits, angels, and the resurrection of the body, all of which are paralleled in Persian religion. Another remote possibility is that, since *prš* can also mean "expound" (Jastrow, pp. 1241-44), there would be a connection between "Pharisees" and biblical exegesis. This view could be supported by Josephus's statement that the Pharisees were "the most accurate exegetes of the law" (*BJ* ii.8.14 [162]; cf. W. O. E. Oesterley, *The Jews and Judaism during the Greek Period* [1941], p. 246).

Usually, however, the root *prš* means "separate," "detach." Thus the Pharisees were probably the "separated ones," but "separated from what or whom is an unresolved question" (Martin, I, 85). Two answers to the question have been suggested, one in terms of a religio-political schism that occurred earlier in the Second Temple period, another in terms of more purely religious concerns — the withdrawal from, or customary avoidance of, the unclean. Support for the first answer is found in the reign of John Hyrcanus (134-104 B.C.), when the Pharisees withdrew support from him and thus from the Hasmonean dynasty. Thus the name would have denoted "separatists."

But the most common view is that *pᵉrûšîm* refers in some way to religious practices of the group that involved separation from ritual uncleanness. This outlook may be illustrated by the statement of *Siphra* to Lev. 11:44 (39a), "'Be holy ones (*qedošim*) for I am holy' (*qadoš*), that is: 'As I am holy (*qadoš*) so should you be holy ones (*qedošim*); as I am a separated one (*paruš*) so should you be separated ones (*perušim*).'" The *Mekilta* on Ex. 19:6 is similar: "'You should be to me a kingdom of priests, a holy nation:' 'Holy' — holy, hallowed, separated from the peoples of the world and their detestable things." Although this exegesis is not attributed specifically to the Pharisees, "it is easy to see how those who made it their end to fulfill this ideal might take its name *Pĕrūshīm* as a less presuming title than *Ḳĕdōshīm*" (Moore, *Judaism*, I, 61).

II. Description.–A. "Traditional" View. The "traditional" view of the Pharisees has been that they were a Jewish sect or party whose members voluntarily took upon themselves a strict regimen of laws pertaining to purity, sabbath observance, prayer, and tithing. They joined together in *ḥᵃḇûrôṯ*, Pharisaic communities, to which initiates were admitted after a probationary period (Tosefta *Demai* ii.12, 48). Those who belonged to the *ḥᵃḇûrôṯ* were *ḥᵃḇerîm*, "Pharisaic brothers." The Pharisees or *ḥᵃḇerîm* restricted their dealings with the *'am hā'āreṣ*, "people of the land," whom the Pharisees considered lax in observance of the law. A large number of Pharisees may have been members of the school of Hillel or later followers of the traditions associated with him (cf. Neusner, *Politics to Piety*, pp. 13-44). Many of the Pharisees were scribes also, though most were not (Jeremias, pp. 246-251). This accounts for the NT reference to two groups, scribes and Pharisees, along with oc-

casional mention of "scribes of the Pharisees" (Mk. 2:16; Acts 23:9). A Pharisee was usually a layman without scribal education, whereas a scribe was trained in rabbinic law and had official status. The Pharisees and scribes observed and perpetuated an oral tradition of laws handed down from the former teachers and wise men of Israel (cf. Mish. *Aboth* i-ii). This oral law, or Halakah, was highly venerated by the Pharisees and scribes. They taught that it had been handed down from Moses and was to be given the same respect as the written laws of the Pentateuch. By gathering into *ḥ*ª*ḇûrôṯ*, by strict observance of scribal Halakah pertaining to purity, fasting, tithing, prayer, and by separating from the unclean, the Pharisees sought to fulfill the injunction of Lev. 11:44 and Ex. 19:6: to be a holy nation and a kingdom of priests. Their goal was to replicate the laws of temple purity in the home (Neusner, *Politics to Piety*, p. 89).

This picture of the Pharisees, ably and comprehensively documented by Jeremias, has been challenged. Neusner has shown that the study of the Pharisees has often suffered from academic deficiencies, scholarly biases, and a party spirit (*Rabbinic Traditions*, III, 320-366). Also, more recent studies of the Pharisees, especially those of Bowker, Rivkin, and Neusner, have shown that the presentations of the Pharisees in the three major sources — Josephus, the NT, and the rabbinic literature — are not entirely consistent. Josephus presents the Pharisees in a generally positive manner but says little about their beliefs and practices. The NT gives more information about them but often, though not always, presents them negatively, often characterizing them as "hypocrites." The rabbinic literature must be used with caution, for it stands farthest in time from the events it reports about the Pharisees; most of its material was written much later than the NT. These studies have demonstrated that an accurate description of the Pharisees can be attained only by a comparison of the three major sources.

B. Pharisees in Josephus. The first-century Hellenistic-Jewish historian JOSEPHUS mentioned the Pharisees forty-two times in three of his writings. In *Vita* 2 (10-12) he claimed to have subjected himself to the religious training of the Essenes, the Sadducees, the Pharisees, and a certain Bannus (apparently a desert ascetic of some sort) between the ages of sixteen and nineteen. After spending most of this period with Bannus, he returned to the Pharisees. (The chronology here is not quite clear and the events seem somewhat compressed [Neusner, pp. 46f.].)

Josephus characterized the Pharisees in several passages that deal with the "philosophical schools" of the Jews. They were the "leading sect" (*BJ* ii.8.14 [162]), whose views were so influential that all forms of prayer and religious service were performed in conformity with them (*Ant.* xviii.1.3 [15]). Even the Sadducees conformed in certain respects to pharisaic practice, for "otherwise the masses would not tolerate them" (xviii.1.4 [17]). The Pharisees were considered "the most accurate interpreters of the law" (*BJ* ii.8.14 [162]) and "experts in their country's laws" (*Vita* 38 [191]). They excelled the rest of the nation in observing religious customs (*BJ* i.5.2 [110]).

The Pharisees believed that God controls events, though men also choose their course of action (*BJ* ii.8.14 [163]; cf. *Ant.* xiii.5.9 [171-73]), and that human souls live on after death, good ones in another body and bad ones in eternal punishment (*BJ* ii.8.14 [163]). Pharisees lived simply and did not pursue luxury (*Ant.* xviii.1.3 [12]). They were agreeable and hospitable to each other (*BJ* ii.8.14 [166]). In certain situations they sent out deputations to deal with various problems (*Vita* 39 [196]).

It could be inferred from *Vita* that there were ranks among the Pharisees, for there is mention of those who were leaders (*hoi prôtoi tôn pharisaíōn* [5 (21)]). In addition, some of them were priests (39 [198]).

Of particular interest are passages that mention political activities of the Pharisees. In *Ant.* xiii.10.5f. (288-298) Josephus reported the schism between John Hyrcanus, Jewish ruler and high priest, and the Pharisees. Hyrcanus quit the Pharisees and joined the Sadducees after a certain Pharisee named Eleazar told Hyrcanus that he should give up the high priesthood and be content as king. The basis for Eleazar's statement was that "we have heard from our elders" that Hyrcanus's mother had been a prisoner (and presumably raped) during the reign of Antiochus Epiphanes. (Hyrcanus would therefore be ineligible for the high priesthood; cf. Lev. 21:14.) Hyrcanus, outraged at the allegation and influenced by a Sadducean friend, quit the Pharisees and joined the Sadducees. He also abolished the pharisaic practices that had been enacted as laws and began to punish those who observed them (*Ant.* xiii.10.6 [296]). The passage also states that "even when they [the Pharisees] speak against the king or high priest, they immediately gain credence" (xiii.10.5 [288]). In addition, Josephus stated here that the Pharisees had passed on (Gk. *parédosan*) regulations to the people "handed down by the fathers" (Gk. *ek patérōn diadochḗs*) that are not written in the laws of Moses. The Sadducees rejected this pharisaic oral law and accepted only that which was written. For this reason the Pharisees and Sadducees had serious differences (xiii.10.6 [297f.]).

The accounts of the death of Alexander Janneus (*Ant.* xiii.15.5-16.2 [398-415]; *BJ* i.5.2 [110]) are similar in some respects to that of the death of Hyrcanus. The great influence of the Pharisees over the people is emphasized (*Ant.* xiii.15.5 [401-404]) as are the pharisaic regulations "introduced . . . in accordance with the tradition of their fathers" (Gk. *katá tḗn patr*o*̱an parádosin*, xiii.16.2 [408]). After the transition of power from Alexander Janneus to his wife, Alexandra Salome (76 B.C.), the Pharisees came to hold sway over her and "became at length the real administrators of the state, at liberty to banish and to recall, to loose and to bind, whom they would" (*BJ* i.5.2 [111]). In a position to avenge earlier persecution and criticism from the pro-Sadducean faction, "they proceeded to kill whomsoever they would" (i.5.3 [113]). In *BJ* they appear as a group already in existence that came to exercise political power, but their doctrines and practices are not described.

During the reign of Herod the Great the Pharisees refused to take an oath of loyalty to Herod and the Roman government. Josephus described the Pharisees as "a group of Jews priding itself on its adherence to ancestral custom and claiming to observe the laws of which the Deity approves" (*Ant.* xvii.2.4 [41]). Herod unsuccessfully attempted to fine them for their refusal to take the oath and then had several of them executed for bribing members of his court (44).

The beginning of *Antiquities* xviii has important information about events leading up to the rebellion against Rome (A.D. 66-70). It reports that the revolt of Judas the Galilean was aided by a certain Pharisee named Saddok (xviii.1.1 [3]). Judas established what Josephus called a "fourth philosophy" that "agrees in all other respects with the opinions of the Pharisees, except that they have a passion for liberty that is almost unconquerable, since they are convinced that God alone is their leader and master" (xviii.1.6 [23]). Though Josephus passed on this information, which clearly relates a faction of pharisaism to the beginnings of the revolutionary Zealot party, he felt that this was not a true pharisaism. This revolutionary

development of pharisaism was "a lesson that an innovation and reform in ancestral traditions [lit. "the things of the fathers," Gk. *hoi pátrioi*] weighs heavily in the scale in leading to the destruction of the congregation of the people" (xviii.1.1 [9]).

C. Pharisees in the NT. The word "Pharisee" occurs about a hundred times in the NT (depending on how one understands the variant readings). The vast majority of these occurrences are found in the Gospels, especially the Synoptics.

Scholars sometimes (e.g., Weiss, *TDNT*, IX, 36; Rivkin, pp. 79-83) begin their discussion of the Pharisees in the NT by noting the polemical tone with which they are condemned in certain passages, especially by Jesus. Thus Rivkin grades Mark, Matthew, and Luke, respectively, as "least hostile," "most hostile," and "midway" according to how much data each relates about the Pharisees. A more accurate approach, however, would take into account not only the polemical passages but also those that describe pharisaic interest in Jesus and those in which many Pharisees are depicted as having joined the movement started by Jesus (cf. Jn. 3:1; Acts 15:5). One must also point out that harsh criticism of the Pharisees is not at all unique to the NT (see IV below). The Pharisees were also criticized both by their own successors, the rabbis of the post-70 era, and by the group at Qumrân. In many instances the disagreements between Jesus and the Pharisees are comparable to those between various rabbis and their schools and have some of the characteristics of rabbinic debate. Therefore a kind of intra-Jewish criticism may account for the strident tone of certain passages in the NT, rather than a Christian bias or anti-semitism.

Several stories dealing with the Pharisees are grouped together near the beginning of Mark (2:15–3:6), probably with the intention of showing the original readers the differences between Jesus' teaching and pharisaic regulation. In 2:15-17 the issue is table fellowship; in vv. 18-22 it is fasting; in 2:23–3:6 it is the legality of certain activities done on the sabbath. All of these would have been regulated by pharisaic and scribal Halakah. Mk. 2:16 is noteworthy because the best MSS read "scribes of the Pharisees," indicating that the terms "scribes" and "Pharisees," though mentioned together often, are not completely synonymous, as Rivkin would have it (pp. 104-111).

Mark 7:1-13 (par. Mt. 15:1-9) is very important in describing the Pharisees. Here the Pharisees and "some of the scribes who had come from Jerusalem" (again, two different groups) objected that Jesus and the disciples ate with unwashed hands. They "did not walk according to the tradition of the elders" (Gk. *ou peripatoúsin . . . katá tḗn parádosin tôn presbytérōn*). The word "tradition" (Gk. *parádosis*) occurs five times in this passage. It was a tradition of "the elders," i.e., it had been handed down from previous teachers and was considered binding by the scribes and Pharisees. Another important word here is "walk." The Semitic term here would be *hālaḵ*, "(to) walk," from which is derived Halakah, the oral law, the "walk" of pharisaic practice. Thus the question is why Jesus and His disciples do not observe the Halakah, the handed-down tradition that in this case pertains to the washing of hands before meals.

In Matthew "hypocrite" is virtually synonymous with "Pharisee" (*TDNT*, VIII, 566-68). The passage that contributes most to the NT description of the Pharisees is ch. 23, a series of criticisms in which "hyprocrite" is ascribed to both scribes and Pharisees. In spite of the polemical tone, the passage gives some valid information about pharisaic and scribal practice. In vv. 2f. Jesus acknowledges that the scribes and Pharisees sit in Moses' seat. This must surely indicate that Jesus is ascribing to them a great deal of influence, if not the primary place of religious authority, in His day. This chapter also indicates that the scribes, most of whom were Pharisees (Jeremias, p. 243), attended banquets (v. 6), made proselytes (v. 15), gave legal rulings about oath-taking (v. 16), tithed herbs (v. 23), and (as Mk. 7:1-13 has already shown) were concerned about the cleansing of eating utensils (vv. 25f.).

Since Mt. 23 consistently condemns the scribes and Pharisees together, Rivkin concluded that they are synonymous. Jeremias, however, had already shown that Mt. 23, interpreted in the light of Lk. 11:37-53, "falls into two parts: the first (vv. 1-22, 29-36) is levelled at the scribes, and the second (vv. 23-28) at the Pharisees." Matthew seems to blend the two groups slightly but does make a clear distinction in 23:25-26 with the words "'Woe unto you, scribes and Pharisees,' then continuing (v. 26) with the single phrase: 'thou blind Pharisee'" (p. 254).

In the parallel passage in Luke (11:37-53), Jeremias noted that the condemnations heaped on the scribes and Pharisees are also of two different kinds. In vv. 46-52 the scribes are condemned for imposing upon the people strict laws that they themselves do not follow, for building the tombs of the prophets while being ready to condemn to death contemporary men sent by God, for taking away "the key of knowledge" and not making use of it themselves, and for a prideful religiosity (taking the best seats at the synagogues, etc.). The condemnations of the Pharisees in Lk. 11:39-42, 44 are not identical. They are accused of hypocrisy in practicing the laws of purity, since they are impure inwardly, and of hypocrisy in the laws of tithing. They tithed herbs, not required by the written law, and neglected the moral obligations that were in the written law. As Jeremias put it, "We can see that these reproaches have absolutely nothing to do with a theological education; they are levelled at men who lead their lives according to the demands of the religious laws of Pharisaic scribes" (pp. 253f.).

Luke has other material dealing with the Pharisees that is not in the other Gospels. In 7:36-50, the story of Simon the Pharisee who invited Jesus to dinner, the pharisaic concern about contact with the *ʿam hāʾāreṣ* is illustrated in 7:39 (cf. Mk. 2:16; Mish. *Demai* ii.2f.). The parable of the Pharisee and the publican (18:9-14) shows that fasting and tithing were important to the Pharisee. The going up to the temple to pray may indicate observance of certain times of prayer, an important pharisaic regulation (cf. Jeremias, p. 249).

Luke's second volume has further references to the Pharisees. Acts 5:34 describes Gamaliel, a Pharisee, as "a teacher of the law, held in honor by all the people." Such a description indicates that he was a pharisaic scribe, a leader among the Pharisees. Acts 15:5 mentions Pharisees as members of the early Church who accepted Jesus as the Messiah but who felt it necessary to circumcise gentile converts and have them keep the law of Moses. In 23:6-10 Paul, a Christian Pharisee, raises the issue of the resurrection of the body in a mixed group of Pharisees and Sadducees. Luke adds, "for the Sadducees say that there is no resurrection, nor angel, nor spirit, but the Pharisees acknowledge them all" (v. 8). It is also important to note that v. 9 clearly demarcates "the scribes of the Pharisees' party," indicating that some Pharisees, but not all, were scribes.

The Gospel of John adds little to this picture, but several points may be made. The Pharisees appear first in Jn. 1:19-28 as senders of a deputation from Jerusalem to evaluate John the Baptist. The sending of a deputation is

paralleled in Josephus *Vita* 39 (196). The Pharisees of the Fourth Gospel are often associated with the "chief priests" (7:32; 18:3). This is not surprising, for many of the Pharisees in Jerusalem would either have been priests themselves or would have recourse to those who were responsible for the legal aspects of temple worship. Thus the Pharisees of John would have been leading pharisaic scribes, like Nicodemus (Jn. 3:1; cf. Josephus *BJ* ii.17.3 [411]), and in addition may also have been priests (*Vita* 39 [197f.]).

Finally, Paul's self-designation in Phil. 3:5, "As to the law, a Pharisee," is related to his former observance of the Halakah mentioned in Gal. 1:14.

D. Pharisees in Rabbinic Literature. Multiple problems are involved in searching through this body of literature for a description of the Pharisees. As Bowker stated, "even a brief acquaintance with the rabbinic sources makes it clear that the sense in which the Pharisees were the predecessors of the rabbis is by no means simple or direct" (p. 1). No clear historical picture shows either where pharisaism ends and rabbinic Judaism begins or what changes and alterations of tradition this transition brought. Unlike Josephus and the NT, the rabbinic literature is much later than the events it narrates about the Pharisees. Its problems of historical development and literary interdependence are still largely unresolved. A more specific problem is that the rabbinic literature does not simply use Gk. *pharisaioi*, as do Josephus and the NT, but *p*^{e}*rûšîm*, "separated ones," *sôp*^{e}*rîm*, "scribes," and *ḥ*^{a}*ḵāmîm*, "sages," or "wise men." And it is uncertain what these three terms mean and whether they denote one, two, or three groups. In fact, *p*^{e}*rûšîm* itself may denote more than one group.

As Bowker (pp. 12-15) and Rivkin (pp. 131-143) have demonstrated, a reliable point of departure is that group of texts in which *ṣ*^{e}*ḏûqîm* or Sadducees are opposed to *p*^{e}*rûšîm* or Pharisees. As noted, both Josephus (*Ant.* xiii.10.6 [297f.]) and the NT (Acts 23:6f.) show the Sadducees and the Pharisees in a number of serious disagreements. Some passages in the rabbinic literature do the same. For this reason Rivkin referred to them as the "unambiguous texts" (p. 133). The dialogue often begins with the stereotyped formula, "we complain against you *p*^{e}*rûšîm* because," followed by, "we complain against you *ṣ*^{e}*ḏûqîm* because." In Mish. *Yadaim* iv.6, for example, the debate is whether the handling of holy Scripture causes the hands to become ceremonially unclean (so Pharisees). Continuing in *Yadaim* iv.7, the Sadducees complain against the pharisaic ruling that makes an unbroken stream of liquid clean. The Pharisees then complain against the Sadducees for ruling that a stream emanating from a cemetery is clean. Another debate follows, with the two parties arguing whether the owners of slaves are free from responsibility for damage done by their slaves (Pharisees) or whether the owners are accountable (Sadducees). Two similar texts without the stereotyped formula are T.B. *Yoma* 19b and Tosefta *Hagigah* iii.35. Both passages mention differences between the *p*^{e}*rûšîm* and the *ṣ*^{e}*ḏûqîm* about the performance of certain temple rituals. T.B. *Yoma* 19b tells of a Sadducean high priest who prepared incense outside the Holy of Holies and then entered, contrary to pharisaic interpretation. After a few days he was struck dead (by God) for this deviation. His father had warned him, saying, "Although we are Sadducees, we fear the *p*^{e}*rûšîm*," but he defied pharisaic practice anyway and suffered for it.

These texts, in which the *p*^{e}*rûšîm* are contrasted with the *ṣ*^{e}*ḏûqîm*, are indeed "unambiguous," and, as Rivkin claimed, "the term *Perushim* must be translated 'Pharisees' since the meaning of *Perushim* is guaranteed by the proper noun *Zedukim*, 'Sadducees'" (p. 131). Problems arise, however, when Rivkin goes on to claim that *p*^{e}*rûšîm* is completely synonymous with *ḥ*^{a}*ḵāmîm* and *sôp*^{e}*rîm* in other passages. For example, T.B. *Niddah* 33b, a passage dealing with purity regulations for women, reads, "[She] assured him that although they were wives of Sadducees they paid homage to the Pharisees [*p*^{e}*rûšîm*] and showed their blood to the Sages [*ḥ*^{a}*ḵāmîm*]... There was only one exception, a woman who lived in our neighbourhood... but she died" (tr. Slotki, Soncino ed.). Rivkin apparently believed it self-evident that *ḥ*^{a}*ḵāmîm* as used here denotes the same group as the *p*^{e}*rûšîm*, but this is not at all obvious. In fact, the text can be easily read, retaining coherency, if one defines the *ḥ*^{a}*ḵāmîm* as "the majority of scholars as opposed to another group or a single authority" (so L. Ginzberg, "Hakam," *Jew.Enc.*, VI [1904], 160f.). I. W. Slotki, editor of the Soncino edition of *Niddah*, likewise assumed that the text referred to two different groups (p. 234 n. 1).

Rivkin's position is weakened by another passage that clearly distinguishes *ḥ*^{a}*ḵāmîm* from *sôp*^{e}*rîm*: "Whosoever according to the words of the Scribes [*sôp*^{e}*rîm*] requires immersion, conveys uncleanness to Hallowed Things and renders Heave-offerings invalid . . . .So R. Meir. But the Sages [*ḥ*^{a}*ḵāmîm*] say . . ." (Mish. *Parah* xi.5f., ed. Danby). Here it is clear that Rabbi Meir accepts a ruling of the *sôp*^{e}*rîm* (scribes) in opposition to that of the *ḥ*^{a}*ḵāmîm* (sages).

Rivkin claimed that the synonymity of *p*^{e}*rûšîm* and *ḥ*^{a}*ḵāmîm* is demonstrated by a comparison of Mish. *Yadaim* iii.2, in which Rabbi Joshua differs with the *ḥ*^{a}*ḵāmîm* about the Scriptures causing uncleanness of hands, and iv.6, where the same Halakah is found in a dialogue concerning Pharisees vs. Sadducees. It is true, as Rivkin claimed, that the same Halakah is the basis of discussion. This fact, however, falls far short of proving that the *ḥ*^{a}*ḵāmîm* in iii.2 are synonymous with the *p*^{e}*rûšîm* of iv.6. The two passages, aside from use of the same Halakah, are very different. In iv.6 Rabbi Johanan ben Zakkai is depicted debating with the Sadducees by taking the side of the Pharisees. His question, "Have we nothing against the Pharisees except this?" certainly implies both that he probably did not consider himself a Pharisee and that others did in fact "have something against the Pharisees." In contrast, iii.2 closes with the *ḥ*^{a}*ḵāmîm* admonishing Rabbi Joshua: "Ye may infer nothing about the words of the Law from the words of the Scribes [*sôp*^{e}*rîm*] . . . and nothing about the words of the Scribes from [other] words of the Scribes" (Danby). This statement appears to put Rabbi Joshua and the *sôp*^{e}*rîm* in opposition to the *ḥ*^{a}*ḵāmîm*, further supporting a distinction between the two groups.

In addition, Rivkin claimed that the Boethusians and the Sadducees were also synonymous. A quick comparison of T.B. *Yoma* 19b and Tosefta *Yoma* i.8 supports this contention. The Boethusians and Sadducees, however, were probably completely different groups with some common features, the Boethusians synonymous not with the Sadducees but with the Herodians of Mk. 3:6; 12:13. The Herodians and Boethusians were both temple-oriented, had a hereditary high priesthood, and were non-pharisaic, among other things.

The many parallel passages constitute a fundamental problem in establishing a description of the Pharisees from the rabbinic texts. Some of these passages are identical and others are not. Rivkin attempted to solve this problem by identifying the different terms: the *p*^{e}*rûšîm* are synonymous with the *ḥ*^{a}*ḵāmîm* and the *sôp*^{e}*rîm*; the Boethusians and Sadducees are identical also. Much of

the evidence, however, does not support this solution. The passages examined above often show a distinction between the *pᵉrûšîm*, *ḥᵃkāmîm*, and *sôpᵉrîm*. Such a multiplicity of terms resists being reduced to two groups, Pharisees-Scribes-Sages vs. Boethusians-Sadducees. Rather, the various terms point to a more complicated history of development and rivalry of various parties that originated during the Second Temple period. After the fall of Jerusalem and during the codification of the rabbinic literature, the distinctions between the groups became blurred.

E. A Comparison of the Sources. What can be learned of the Pharisees from a comparison of the three major sources? First, the Pharisees were the rivals of the Sadducees. At the time of the ministry of Jesus, the Pharisees were the leading party and held so much influence over the common people that the Sadducees were often forced to conform to pharisaic practice (Mt. 23:2; Josephus *Ant.* xviii.1.4 [17]; T.B. *Yoma* 19b). Second, the Pharisees in the NT are definitely a group distinct from the scribes, though some Pharisees were scribes. This lack of complete synonymity is also reflected in the rabbinic literature, where the *pᵉrûšîm*, *sôpᵉrîm*, and *ḥᵃkāmîm* are often found as separate groups (T.B. *Niddah* 33b; Mish. *Parah* xi.5f.). Third, the Pharisees followed and perpetuated an oral law, the "tradition of the elders," which, they believed, had also come from Moses (Mish. *Aboth* i.1-12; ii.8). For example, they believed in the resurrection of the body, a concept, among others, that the Sadducees rejected (Acts 23:6-9). In addition, the Pharisees followed a strict system of religious practices (Josephus *BJ* i.5.2 [110]). They fasted (Mt. 6:16; Lk. 18:12), made proselytes (Mt. 23:15; Josephus *Vita* 2 [11f.]; Mish. *Demai* ii.12), prayed (Mt. 6:5; Lk. 18:12; Baraitha to T.B. *Berakoth* 47b), and tithed their goods (Lk. 11:42; 18:12; Mish. *Demai* ii.12). There were ranks among their members, including those who were initiates and others who were leaders (*Vita* 5 [21]; Jn. 3:1-10), scribes (Mk. 2:16; Acts 23:9), and priests (*Vita* 39 [198]). They sent out deputations to examine individuals who did not conform to their policies or doctrines (*Vita* 39 [196]; Jn. 1:19-24). They were very zealous for their vision of Judaism (Gal. 1:14) and, on occasion, ruthlessly opposed their enemies, real or imagined, by means of bribery, incarcerations, and executions (cf. Josephus *BJ* i.5.3 [113f.]; Jn. 18:3; Acts 8:1; 9:1f.).

This summary coheres largely with the view of the Pharisees presented by Jeremias. The pharisaic communities (*ḥᵃḇûrôṯ*), however, of which Jeremias made so much (pp. 247-250), find no mention in the NT or Josephus.

III. Historical Development.—A. Antecedents. Although solid historical data can lead to differing conclusions, the origins of pharisaism can probably be traced to the early postexilic period. The reforms of Ezra and Nehemiah set in motion a Judaism concerned, in intent at least, with a strict observance and study of the Scriptures (cf. Mal. 3:16). Evidence within the OT itself indicates a growing trend toward biblical exposition by qualified teachers and an emphasis on correct interpretation and application of the law (Ezr. 7:11; 8:16; Neh. 8:7-9; 1 Ch. 25:8; 27:32). Prominent teachers and their disciples began to meet together regularly for Scripture study and to argue various points of interpretation. Sir. 51:23 gives evidence of such a "teaching house," which was probably the equivalent of the "midrash house" (Heb. *bêṯ hammiḏrāš*) of later rabbinic times. The pharisaic schools of Hillel, Shammai, and others were a later part of this trend.

The reforms of Ezra and Nehemiah provided what Thoma (pp. 255f.) called the "primary spiritual-religious impulse" of the HASIDEANS, who were probably the direct antecedents of the Pharisees. Such a link is not entirely certain but is supported by 1 Macc. 2:42, which states that the Hasideans joined in the Maccabean revolt "willingly for the law." They definitely wanted to maintain religious devotion and obedience to the Torah, which was being threatened by an encroaching Hellenism.

The alliance of the Hasideans and the Maccabees was short-lived. Although the temple was purified in 164 B.C. (cf. 1 Macc. 4:36-58), Judas Maccabeus was not content with the greater religious freedoms he had obtained but continued to press for political autonomy. The Hasideans, however, were content with what the revolt had obtained — restoration of Jewish religious practices, including temple worship. When the Syrians installed a certain Alcimus as high priest the Hasideans were willing to accept him, being persuaded that he was of the Aaronic line. Alcimus, however, turned against the Hasideans and killed sixty of them (1 Macc. 7:12-18). The Hasideans again threw their support behind Judas Maccabeus. 2 Macc. 14:6 indicates that the Hasideans continued in the Maccabean revolt and even mentions Judas Maccabeus as their leader, but this may be a garbled Syrian account of the situation.

B. Sadducean-Pharisaic Rivalry. Although evidence is scant, it is probable that, as part of the aftermath of the Maccabean revolt, the party of the Sadducees developed around the hereditary high priesthood established by Judas Maccabeus. When the Pharisees first appear in Josephus's narrative, in the account of the charge against John Hyrcanus by Eleazar (see II.B above), they are the opponents of the Sadducees. Although the account mentions personal reasons for this schism between the Pharisees and the Hasmonean dynasty, the earlier uneasiness of the Hasideans over Hasmonean political power and the pharisaic opposition to a hereditary high priesthood may be part of the historical background of this incident (M. Black, *IDB*, III, 779).

At the time of Hyrcanus's death (104 B.C.) pharisaic fortunes were at a low point and did not improve during the reign of his successor Alexander Janneus (103-76 B.C.). Janneus, too, was opposed in his administration of high-priestly duties, as Josephus made clear (*Ant.* xiii.13.5 [372f.]). Janneus retaliated in anger and killed several thousand of his enemies. An insurrection developed later, and Janneus nearly lost control of his kingdom (xiii.14.2 [379]). He managed to salvage the situation, however, and again took revenge on those Jews who had opposed him, crucifying eight hundred of them and slaying their wives and children while they looked on (xiii.13.2 [380f.]). Although Josephus did not specifically identify them, Janneus's enemies must have included Pharisees, as may be inferred from his death-bed advice to his wife Alexandra, that she give power to the Pharisees again, since no one could rule peaceably without their support (xiii.15.5 [400-402]). In addition, T.B. *Kiddushin* 66a states that it was the result of Eleazar's scandalous remarks (made against Janneus according to this passage) that "all the hakamim were massacred," and these *ḥᵃkāmîm* would certainly have included some who were Pharisees.

Alexandra took her husband's advice, giving the Pharisees greater power and influence than ever before. The "tradition of their fathers" (Gk. *hē patroq parádosis*), abolished by her father-in-law Hyrcanus, was reintroduced, and the people were commanded to follow it (Josephus *Ant.* xiii.16.2 [408]). Alexandra's reign, 76-67 B.C., was a kind of "golden age" of pharisaism. Firmly in control, the Pharisees proceeded to destroy their Sadducean enemies, executing so many that a pro-Sadducean

faction, led by Janneus's son Aristobulus, appealed to Alexandra for help.

C. Roman Period. When Alexandra died (67 B.C.) civil war broke out between her sons Aristobulus II and Hyrcanus II. Rome, in an expansionist phase, settled the dispute by annexing Palestine and the adjoining areas. The Roman general Pompey entered Jerusalem in 63 B.C. and set up Roman rule. The Pharisees and Sadducees never again enjoyed the political power they had previously attained. Jewish subservience to Rome probably had the effect of making their differences "less and less political and more distinctively religious" (M. Black, *IDB*, III, 780).

Josephus mentions the Pharisees several times during the reign of Herod the Great (37-4 B.C.). They refused to take an oath of loyalty to Herod and the Romans, but on account of their influence over the people he merely attempted to fine them rather than resort to more drastic punishments (*Ant.* xvii.2.4 [42]). Yet he did execute some leading Pharisees suspected of bribing key officials (*Ant.* xvii.2.4 [43-45]). After Herod's death (4 B.C.) his son Archelaus ruled for ten years (4 B.C.-A.D. 6). Abuse of power led his subjects, Jews and Samaritans alike, to complain to Augustus. In A.D. 6 Judea became a province of Rome administered by a prefect. This had the effect of making Roman rule more direct. Although major issues were decided by the Roman authorities, the SANHEDRIN retained control over some internal affairs. The Sadducees were probably in control of the Sanhedrin, but Josephus wrote that they had to submit "to the formulas of the Pharisees since otherwise the masses would not tolerate them" (*Ant.* xviii.1.4 [17]).

The Pharisees maintained considerable influence during this period. Jesus described them as "sitting in Moses' seat" (Mt. 23:2), that is, occupying the place of supreme religious authority. Though most of the Pharisees were probably opposed to Jesus and His teaching, some were at least willing to have table fellowship with Him and discuss His teaching (Lk. 7:36; 14:1). After some of the leading Pharisees, in collusion with other authorities, succeeded in having Jesus executed (cf. Jn. 18:3), a number of them were won over to the movement started by Jesus (Acts 15:5). Even Saul of Tarsus, a Pharisee particularly zealous for the preservation of the oral law (Gal. 1:14) and a student of Rabbi Gamaliel (Acts 22:3), joined the movement and became one of its ablest spokesmen.

According to Josephus, the outbreak of the Jewish war (A.D. 66-70) originated in a revolutionary "fourth philosophy" (see II.B above), which was opposed by Pharisees of a more moderate outlook who attempted to dissuade the others from rebellion (*BJ* ii.17.3 [410]). The revolutionary faction gained support, however, and war with Rome ensued, ending in disaster for the Jewish nation.

Although pharisaism is often seen as continuing after the revolts of A.D. 66-70 and 135, such a conclusion is questionable. T. B. *Baba Bathra* 60b does indeed mention some *p*^{e}*rûšîm* who fasted after the temple was destroyed (A.D. 70). In Mish. *Yadaim* iv.6-8, however, Rabbi Johanan ben Zakkai, the leader of the rabbinical school at Yavne (Jamnia) and an important figure in maintaining the legacy of pre-70 Judaism, seems to distinguish himself from the Pharisees, though he defends one of their views against Sadducean criticism. If one of the most prominent leaders of post-70 Judaism did not consider himself a Pharisee, it is questionable that the pharisaism of the Second Temple period survived the revolt. The Pharisees as a definite group probably came to an end, along with the Sadducees and Essenes. What some assume to be a post-70 pharisaism may be an altered form of it, a newer rabbinical scribal movement that inherited the best that the *p*^{e}*rûšîm* had to offer and attempted to preserve it (cf. Neusner, *Politics to Piety*, pp. 97-100), but which avoided any direct association with Pharisees because of pharisaic involvement in the disastrous revolt and other excesses that had stigmatized them as hypocrites (Mt. 23:23f.; T.B. *Sotah* 22b).

IV. Anti-Pharisaic Criticism.—Even while the Pharisees had dominant status, they came under increasing criticism. Anti-pharisaic sentiment is associated with various passages in the Gospels, especially Mt. 23. Thus Rivkin claims that Matthew has an all-consuming hatred for the Pharisees (p. 83). Severe criticism, however, is also found in some of the documents from Qumrân and in the rabbinic literature.

The Qumrân community rejected pharisaism because it frequently nullified the law while trying to protect it from transgression. If the Damascus Document (CD) is an Essene product (so Meyer, *TDNT*, IX, 29f.; Jeremias, 3rd ed.), then those described in CD 1:18–2:1 who "presented false expositions" may well be the Pharisees and pharisaic scribes of Jerusalem. Similarly, 1QH 4:10 speaks of those who seek to exchange the teaching of God for "smooth words." Meyer suggested with some plausibility that the "babbler," the "windbag," and the "false prophet" of CD 4:19 (7:1); 8:12ff. (9:21ff.); 29:15ff. might imply a pharisaic leader such as Shimeon ben Shatach or Hillel. Hillel established a legal formula (*prozbul*) that, in effect, annulled the law of remission in Dt. 15:2. Such an exegesis, aimed more at circumventing the text than expounding it, "represents precisely what the anti-Pharisaic criticism of the Zadokites calls a 'deceitful exposition of the Torah'" (Meyer, p. 31).

The NT criticism of the Pharisees is in some ways similar to that from Qumrân. Jesus accused the Pharisees of being "blind guides" (Mt. 23:16). He also rebuked them for nullifying the word of God by means of their tradition, closing His remarks with, "and many such things you do" (Mk. 7:6-13). Apparently He could have given examples other than the Corban issue, in which pharisaic Halakah contradicted the intended meaning of Scripture. Another similarity is in the criticism on the subject of divorce. CD 4:20f. rebukes those who take two wives in their lifetimes and Jesus (Mk. 10:2-9) condemns divorce "for any cause." Both passages cite Gen. 1:27 to prove that God's original intent was that marriage should be with one partner only. In addition, Jesus frequently referred to the Pharisees as "hypocrites," implying not that Jesus saw their teaching as always wrong but that they failed to follow it themselves.

The criticism of the Pharisees in the rabbinic literature is neither as sharply focused nor as plentiful as that found in the Dead Sea Scrolls or in the NT. Since, however, the rabbis who rebuilt Judaism after the fall of Jerusalem seem to have avoided associating themselves with the name "Pharisee," embarrassment on the part of these direct heirs of the spiritual legacy of pharisaism calls for an explanation.

A rather obscure reference is Mish. *Sotah* iii.4, which states, "a foolish saint, a wicked man with cunning, a woman who is *perushah*, and the wounds of the Pharisees [Heb. *makkôṯ p*^{e}*rûšîm*], these wear out the world." While it is not clear what the *makkôṯ p*^{e}*rûšîm* are, they are certainly uncommendable in the eyes of Rabbi Joshua. Another example is T.B. *Sotah* 22b, in which Alexander Janneus exhorts his wife, "Fear not the Pharisees and the non-Pharisees but the hypocrites who ape the Pharisees; because their deeds are the deeds of Zimri but they expect

a reward like Phineas" (tr. A. Cohen, Soncino ed.). Seven kinds of Pharisee, most of them insincere, appear in T.P. *Berakoth* ix.5. Two who are sincere are the *pārûš* who loves like Job and the *pārûš* who loves like Abraham. The others are interested in fulfilling their obligation to the law only if they have the time or if in doing so their sin and guilt may be counterbalanced. The *makkôṯ pᵉrûšîm* are more clearly described in T.P. *Sotah* iii.4, where they designate the practices of those who use casuistry to take advantage of someone. Two examples are given. In one, a group of children uses pharisaic legal advice in attempting to wrest financial control of the estate from their widowed mother. This parallels Jesus' accusation in Mk. 12:40 that the Pharisees "devour widows' houses."

It is certainly possible, judging from these examples, that the later rabbis felt that some of the earlier Pharisees had engaged in hypocrisy and casuistry. Another possible reason for the avoidance of direct association with pharisaism may have been the proximity of zealotism to pharisaism (see II.B above). Thus, after the fall of Jerusalem, "Pharisee" may have connoted either a hypocrite or a hothead committed to a hopeless revolutionary idealism that had ruined the nation by the ill-fated revolt against Rome. Pharisaism had often presented a contrived biblical exegesis that avoided, or even worse contradicted, the intended meaning of the law and the prophets. Righteousness became equated with a mechanistic repetition of certain religious functions such as fasting, the keeping of set times of prayer, and tithing. Such a state of affairs did not totally permeate pharisaism, but it was prevalent enough to give rise to the kind of criticism found in CD, the NT, and the rabbinic literature.

V. Pharisees in the NT.–A. Jesus and the Pharisees in the Gospel Tradition. The presentation of the Pharisees in the Gospels is generally negative. Jesus is seen to be disputing with them continually, which suggests that His teaching was the antithesis of pharisaism. Closer investigation, however, does not support this suggestion. The NT evidence shows Jesus in agreement with beliefs and practices vitally important to the Pharisees. He taught and defended the concept of the resurrection of the body, thus differing from the Sadducees (Mk. 12:18-27). He accepted the temple cult in Jerusalem as the proper place of worship for national Judaism. In this He differed from the Samaritans (Jn. 4:23). He and His disciples attended the synagogue and participated in the Jewish feasts regularly (Mk. 1:21; Lk. 4:16-30; Jn. 5:1; 7:10; Lk. 22:8-23; etc.). Unlike those who belonged to the community at Qumrân, He worked within the existing institutions of Judaism (cf. Wilcox, p. 174). Furthermore, He did not support revolutionary zealotism with its fierce anti-Roman sentiment. On the contrary, He once pronounced a Roman centurion full of faith and worthy of the kingdom of God (Mt. 8:5-13; cf. Lk. 22:51; Mt. 26:52).

While these similarities to pharisaic distinctions from other groups do not make Jesus a Pharisee, some evidence points in that direction, though it is not conclusive. First, He was addressed as Rabbi and had a group of disciples who were His "school," similar to the rabbinic schools of Hillel and Shammai. There is disagreement about how similar Jesus' "school" was to those of the other rabbis, but, as Wilcox pointed out, "individual differences at any time and between any two Rabbis and their students would vary widely," so some differences do not necessarily rule out any comparison (p. 175). Second, the overriding of the Sabbath, allowed by Jesus in certain circumstances (cf. Mk. 3:1-6; Lk. 13:10-17; Jn. 5:1-18; 7:19-24), is paralleled in the Talmud (T.B. *Yoma* 85b) and Tosefta (*Shabbath* xv.16; see Wilcox, pp. 176f. n. 247). Third, the Golden Rule, a summary statement of the essence of the OT law, is found both in the teaching of Jesus and in that of Hillel, where it is similar but stated in a negative form (T.B. *Shabbath* 31a). Fourth, Neusner pointed out a similarity between the teaching of Jesus in Mt. 9:13; 12:7 and that of Rabbi Johanan ben Zakkai in *Aboth de Rabbi Nathan* 4. In both of the Gospel passages Jesus cites Hos. 6:6 in disputes with the Pharisees, the first over table fellowship with "sinners" and the second over the abrogation of the sabbath. Jesus said, in effect, that God is more interested in a merciful heart than in an outward religiosity. The use of Hos. 6:6 by Rabbi Johanan is similar. Fifth, Jesus' teaching on divorce in Mt. 19:3-9 is similar to that attributed to the school of Shammai. Wilcox noted how the Gospel account presupposes the debate on this matter within Judaism (p. 177 n. 251).

In spite of NT evidence that Jesus and the Pharisees shared many of the traditions of Judaism of their day, there were two major differences between Jesus and the majority of the Pharisees. First, Jesus held to a more conservative approach to OT interpretation. His teaching, judging from the examples given in the Gospels, was often more directly derived from the intended meaning of the OT than that of His opponents. His teaching on divorce (Mt. 19:3-9) restricts divorce to the one cause of immorality rather than allowing a multiplicity of grounds, some of them rather flimsy, such as the school of Hillel allowed (cf. T.B. *Gittin* 90a; Mish. *Gittin* ix.10). In Mk. 7:1-13 Jesus attacks the misuse of Corban whereby some Pharisees evaded the responsibility of caring for aged parents by claiming to have given their money to serve God, a tradition that led to a violation of Ex. 20:12. Mk. 7:1-13 puts into sharp focus Jesus' opposition to transgression of Scripture by means of an oral tradition supposedly derived from Scripture. Furthermore, Jesus taught that His practice of healing on the sabbath, though it violated pharisaic prohibitions, was not in conflict with the OT Scripture. On the contrary, it was compatible with the intent of the sabbath: to give a day in which to rest from fatigue and to be revived (Mk. 2:27). Second, Jesus had, as Wilcox put it, "a heightened sense of personal piety" (p. 181). He emphasized that defilement is an inner condition of the heart (Mk. 7:14-23). The attempt to attain righteousness by means of an elaborate oral tradition that specified explicitly how to wash, tithe, pray, and maintain "cleanness," as taught by the Pharisees, was therefore useless, since it did not address the real problem.

Of these two basic departures from the pharisaic outlook, the first, Jesus' reliance on a more direct appeal to the OT text, proved to be the more serious. If it had been merely a question of Jesus having a few differences of opinion with the Pharisees over various points of Halakah, He still would have been part of the variegated stream of pharisaic tradition, in which the various teachers often disagreed on particular points of practice and exegesis. Opposition to Jesus arose, however, when He began to make statements about Himself that had definite messianic implications (Mk. 12:36), even to the point of claiming to have a special relationship with the Father (cf. Mt. 11:27; Jn. 10:14-23). Jesus supported His claims by a direct appeal to various OT texts. An important example is Jn. 10:34-36, in which Jesus claimed to be the Son of God by appealing to Ps. 82:6. In a manner similar to that of Mt. 5:17, Jesus claimed that "scripture cannot be broken" (10:35). He used a literalist (*pᵉšaṭ*) form of interpretation common to the rabbis by not allowing the passage in question to be diluted by substituting "angels" or "judges" for "sons of God," a practice attested by the ancient versions (Targums, Syriac) and by

the rabbinic literature (*Midrash on Psalms* 82:1; *Numbers Rabba* 16:24; etc.). By avoiding the customary, evasive exegesis associated with this passage, Jesus followed the most conservative use of the text, and the obvious implication of His argument — that He is entitled to be the son of God in a special, messianic sense (cf. 10:24) — angered the authorities. These direct appeals to Scripture (cf. Mk. 12:35-37), combined with His ability to work numerous miracles, brought Jesus into an irreconcilable conflict with the authorities (Jn. 10:33, 39; 11:47). A plan was devised to eliminate Jesus, and some of the Pharisees, probably those who were connected with priestly functions in Jerusalem, were clearly involved in it (Jn. 11:47-53; 18:3).

B. Pharisees in Acts and Paul. Although the majority of the Pharisees had probably been opposed to Jesus and His teaching, many of them did become part of the Church at an early date. Acts 15:5 tells of believing Pharisees who, not surprisingly, advocated circumcision of Gentiles and the keeping of the law of Moses. Christian Pharisees may also have been included in the group mentioned in 21:20: "... the Jews of those who have believed; they are zealous for the law." Gamaliel, a leading Pharisee of the council who was probably also an ordained scribe (Jeremias, pp. 253-56), is mentioned twice in Acts. He first appears in 5:34-39, urging restraint in dealing with the apostles. Gamaliel appears again in 22:3-21, Paul's account of his conversion, as Paul tells of his education in Jerusalem "at the feet of Gamaliel, educated according to the strictest manner of the law of our fathers" (v. 3).

Though Paul was probably a leading Pharisee, judging by his own accounts of his credentials (Phil. 3:5f.) and by his persecution of the Church (Gal. 1:13f.), it is difficult to determine with certainty the extent to which his background influenced the formulation and expression of his faith in Jesus of Nazareth as the Messiah. Jeremias made a case for the influence of Hillel on Paul by observing that Paul often used seven hermeneutical rules attributed to Hillel ("Paulus als Hillelit," in E. E. Ellis and M. Wilcox, eds., *Neotestamentica et Semitica [Festschrift* for M. Black; 1969], pp. 88-94, esp. 92-94; cf. Longenecker, pp. 33-35; 117f.). For example, Hillel's first rule, "light to heavy," is illustrated in Rom. 5:12-21: if death reigned through Adam, how much more shall God's grace result in life through Christ. Hillel's second rule is illustrated in Rom. 4:1-12, where Paul joins Gen. 15:6 and Ps. 32:1f. on the basis of the common word "reckoned."

Although Paul articulated his new faith under the influence of a pharisaic background, he did not consistently apply pharisaic practices in his ministry. For example, he rebuked Peter for withdrawing from table fellowship with gentile Christians (Gal. 2:11-14). He did not insist on circumcision of Gentiles, but advocated only a faith in Jesus Christ that brought about righteousness. Furthermore, he advocated tolerance on the keeping of certain days of worship, eating of various foods (Rom. 14:2-6), and he did not advocate a definite system of tithing (2 Cor. 9:6-10). Thus, in his ministry to the gentile churches, Paul dispensed with the outward distinctives of pharisaism: tithing, sabbath regulations, and various forms of ritual purity. He did, however, maintain some of these practices while in Jerusalem (Acts 21:26; 1 Cor. 10:20).

PHAROSH fâr'osh (Ezr. 8:3, AV). *See* PAROSH 1.

PHARPAR fär'pär [Heb. *parpar*]. One of the two rivers of Damascus mentioned by Naaman (2 K. 5:12). It is difficult to determine the exact location of this river. Two possibilities have been suggested. Some believe ABANA and Pharpar are two tributaries of the Nahr Baradā, which flows through Damascus. It is more common, however, to identify these two rivers as those which flow through the Damascus plain approximately 16 km. (10 mi.) S of Damascus. In this case "Damascus" would refer to the whole plain. The Nahr Baradā is usually identified with the Abana and the Nahr el-Aʿwaj is identified with the Pharpar. The Nahr el-Aʿwaj originates in the foothills of Mt. Hermon and flows eastward in a very crooked path through the plain of Damascus until it finally enters the salt lake, Baḥret el-Hijāneh. The fresh waters of this river coming from the melting snow off the mountains would be understandably more attractive to Naaman than the frequently muddy waters of the lower Jordan.

PHASEAH fə-sē'ə (Neh. 7:51, AV). *See* PASEAH 2.

PHASELIS fa-sē'lis [Gk. *Phasēlis*] (1 Macc. 15:23). A city of Lycia on the south coast of Asia Minor. It was located on the extreme end of a promontory with high mountains isolating it politically, ethnically, and geographically from the rest of Lycia. In 1 Macc. 15:23, a letter of a Roman consul refers to Phaselis in a list of cities in the Lycian League in 130 B.C., although it was independent of this league.

Because of its three small harbors, Greek colonists from Rhodes established Phaselis as a trading city in the 7th cent. B.C. Shortly thereafter it was inhabited by settlers from Naucratus in Egypt; it shared in Greco-Egyptian trade from 570 to 526 B.C. Under the Persian standard it struck its own coins, which had the prow and stern of a war galley as an emblem, until 466 B.C., when it joined the Athenian League. From 276 to 190 B.C. it fell under partial rule of the Ptolemies and Seleucids. It finally lost all independence and commercial importance in history when the Roman proconsul Servilius subjected it for harboring Cilician pirates. It was occupied into Byzantine times and was the seat of a bishop before it died completely. In its prime Phaselis was famous for its attar of roses and temple of Athene which was said to have contained the sword of Achilles.

The modern hamlet of Tekrova adjoins the site, which is marked by the ruins of a few Greek tombs, a flattened acropolis, a temple built by Trajan, a crumbling Roman aqueduct, and a hidden Greek temple.

PHICOL fī'kōl [Heb. *pîḳōl*–'mouth of all'(?); Gk. *Phikol*]; AV PHICHOL. Commander of the Philistine army in the time of Abraham (Gen. 21:22, 32) and Isaac (26:26). The mention of both the Philistine king, Abimelech, and the Philistine commander, Phicol, in similar events involving Abraham and Isaac is one factor that has led some to view the two accounts as "a single incident which was differently reported in two independent sources [i.e., E and J]" (E. A. Speiser, *Genesis* [*AB*, 1964], pp. 203f.). Other explanations are possible, however. One, although improbable, is that the same Philistines were involved with both patriarchs, for long lives were not uncommon in patriarchal times, according to biblical records (e.g., Abraham lived to 175 [Gen. 25:7] and Isaac to 180 [35:28]). Another is that Abimelech and Phicol were Philistine titles rather than personal names (*see* ABIMELECH). G. A. L.

PHILADELPHIA [Gk. *Philadelph(e)ia*]. The Hellenistic name of two localities.

1. The NT Decapolis city previously called Rabbah or Rabbah of the Ammonites (*see* RABBAH 1); the modern Amman, capital of Jordan. Its name meant not "brotherly love" but "in honor of Philadelphus," i.e., PTOLEMY II, who married his sister (Arsinoe II, "lover [*phílos*] of her brother [*adelphós*]") according to Egyptian royal custom.

2. (Rev. 1:11; 3:17). A city in Anatolia; the modern Alaşehir, "red city" or perhaps "city of Allah." It was named for the founders' sponsor, King Attalus of Pergamum (159-138 B.C.), whose surname Philadelphus meant "loyal to his brother [Eumenes]." It is 32 km. (20 mi.) E of Sardis and 97 km. (60 mi.) E of Smyrna, on a 210-m. (700-ft.) plateau extending from the north slopes of the Tmolus/Boz Mountains toward the Hermus River, today called Gediz but along this stretch Cogamıs. A settlement named Callatebus seems to have existed here from *ca.* 900 B.C. and was invaded by Cyrus on his march to Sardis in 546.

Though Sardis was so near, Attalus thought that a new center of population was needed in this fertile heartland of Lydia. He imported Macedonian veterans to settle there, as the shields on its coinage before 100 B.C. imply. Like Sardis Philadelphia was helped by Tiberius after the earthquake of A.D. 17 (Strabo *Geog.* xiii.4.10) and showed its gratitude by adding Neocaesarea to its name. The city became Philadelphia Flavia under Vespasian Flavius and in 214 added the title *Neokoros*, "(emperor-cult-)temple-keeper" (Pauly-Wissowa, XIX/2, 2091).

Philadelphia's temples merited it a prosperous stream of pilgrims, so that by A.D. 400 it was known as "little Athens." Like Smyrna it had a synagogue regarded by the Christians as notably uncooperative (Rev. 3:9). Yet the warm invitation held out to Philadelphia involves unusually Hebraic imagery: the key of David (v. 7); the name of Jerusalem (v. 12).

Ignatius of Antioch wrote to Philadelphia from Smyrna. Philadelphia's own first bishop may have been Demetrios of 3 Jn. 12 (Apos.Const. vii.46.9; *LTK*, VIII, 441). On the "prophetess Ammia," see Eusebius *HE* v.17.2; on "Philadelphia and Montanism," W. Calder, *BJRL*, 7 (1922), 309-354.

About 8 km. (5 mi.) E of Alaşehir in Badınca, Roman remains were found and partly removed to the museum in Manisa (*CBQ*, 18 [1956], 35). The Byzantine rampart inside Alaşehir is still visible; from 1109 to 1379 the Byzantine rulers resisted efforts of the Seljuk Moslems to incorporate the town into their surrounding domains. The town, with a population of 20,000-25,000 remains partly Greek. R. NORTH

PHILARCHES fil-är'kēz. The AV transliteration of Gk. *phylárchēs* (lit. "ruler of a *phylḗ* ['tribe' or 'tribal military contingent']") in 2 Macc. 8:32. The AV takes it as a proper name. The RSV ("commander [of forces]") and the NEB ("officer commanding [the forces]") more correctly interpret it as the title of a military officer. Cf. 1 Esd. 7:8, where it designates a "tribal leader" (RSV; AV "chief of the tribes"; NEB "patriarch").

PHILEMON fī-lē'mən [Gk. *Philēmōn*]. A "fellow worker" of Paul, to whom he addressed an Epistle (Philem. 1). Our only knowledge of the man is by inference from this letter, taken in conjunction with the closely related Epistle to the Colossians.

We infer that Philemon was a resident in the small city of Colossae in the upper Lycus Valley, some 16 km. (10 mi.) upstream from Laodicea, and that the Colossian church or some part of it met in his house. He was a man of standing whose hospitality is warmly commended in the Epistle (Philem. 7). He had evidently been converted through Paul (v. 19), but the circumstances of their previous acquaintance are unknown. He was ostensibly the owner of the runaway slave Onesimus, who occasioned the letter. The persons mentioned in v. 2 were presumably members of his family. Apphia was perhaps his wife. Her name is uncommon, although cognate forms were characteristic of this part of Phrygia; yet it is actually attested among the few known inscriptions of Colossae (R. Cagnat, *et al., Inscriptiones Graecae ad res Romanas pertinentes*, IV, 868). Archippus, mentioned also in Col. 4:17, may have been his son. The juxtaposition of this name with the injunctions concerning the Laodicean church in Col. 4:16 lends force to the suggestion that Archippus held some special responsibility at Laodicea (J. B. Lightfoot, *Colossians and Philemon* [1879], p. 307). Unless, however, we

follow J. Knox in identifying the letter of Col. 4:16 with Philemon, it is natural to conclude from Col. 4:9 that Onesimus, and therefore the household of Philemon, belonged to Colossae, not Laodicea.

The relation between the apostle and Philemon was so close that Paul may press him to forgive Onesimus the wrongs he had done to the extent of receiving his repentant slave in a new relationship of brotherhood in Christ that transcended the relationship of master and slave.

The traditional reconstruction of the family and circumstances of Philemon has been challenged at several points by E. J. Goodspeed and especially by J. Knox (*see* PHILEMON, EPISTLE TO).

The traditions about Philemon and his family contained in the Apostolic Constitutions (vii.46) and in the Martyrologies are without merit (see Lightfoot, comm., p. 304; *Ignatius* [2nd ed. 1889], II, 535). C. J. HEMER

PHILEMON, EPISTLE TO.

I. Contents
II. Authenticity
III. Occasion and Date
IV. Views of Knox
V. Value and Significance

I. Contents.–(a) Paul and Timothy salute Philemon and his family, and the church that meets in his house (vv. 1-3). (b) Paul offers thanksgiving and prayer for Philemon, whose love and fellowship have been a blessing to others (vv. 4-7). (c) He tactfully requests that Philemon receive Onesimus, who formerly, despite a name meaning "profitable," was an unprofitable servant, but now, converted through an apostle in bonds, is true to his name (vv. 8-13). Paul will not, however, retain Onesimus as a helper without his master's consent. It may be that his temporary departure will result in Philemon's having him back forever in a new relationship (vv. 14-16). (d) If Onesimus has wronged his master, let the latter reckon the account against Paul, though on the score of debt Philemon owes his own spiritual life to Paul (vv. 17-19). (e) Paul has confidence in Philemon's compliance, and requests a lodging for himself (vv. 20-22). (f) Greetings from Paul's companions, and conclusion (vv. 23-25).

II. Authenticity.–The standing of this Epistle is inseparable from that of Colossians. These two letters, with Philippians and Ephesians, make up the four "imprisonment Epistles." Philippians was written apparently on a different occasion, but the other three ostensibly reflect the same circumstances. Colossians and Philemon were evidently sent together by the same messengers to the same destination. The genuineness of this beautiful personal appeal has rarely been doubted: it stands rather as Paul's signature to the authenticity of Colossians. Its place in the canon has only twice been seriously questioned: in the 4th and 5th cents. some thought it too slight to be Pauline, or if Pauline too lacking in edification to be considered worthy of canonicity; in the 19th cent. it was rejected by F. C. Baur and the Tübingen School, for whom its inauthenticity was a corollary of their rejection of Colossians.

External attestation is fairly strong. The earliest reference may be in Ign. Eph. 2, where a similar wordplay is made on the name Onesimus, and where Knox found other significant echoes (pp. 51ff.; see below). Tertullian knew Philemon and testified that Marcion accepted it without tampering with its text (*Adv. Marc.* v.21). The epistle is listed in the Muratorian Fragment, and Origen quoted v. 14 as Pauline (*Hom. in Jer.* 20).

The earlier attack on the letter was decisively answered by Jerome and by Chrysostom. Baur's rejection of it rested on the very different ground that it was a Christian fictional romance, the vehicle for a moral homily of reconciliation. Some of his followers found other objections. Pfleiderer and Weizsäcker treated it as allegorical; Holtzmann and others adopted interpolation theories. Steck claimed that an unknown writer used the younger Pliny's correspondence with Sabinianus, where he pleaded his friend's forgiveness for an erring freedman (Pliny *Ep.* ix.21, 24, written *ca.* A.D. 108). This idea was developed by van Manen (*EB*). He rejected all the Pauline Epistles, arguing here that the form showed an unnatural confusion between a personal letter and one addressed to a household church.

These excesses of skepticism have not found acceptance. The transparent genuineness of Philemon is seen rather as corroboration at least of Colossians. There are unsolved problems in the short note, but these are rooted in our imperfect inferential knowledge of the real-life situation that called forth this vivid appeal.

III. Occasion and Date.–Three different views have been held about the time and place of the Pauline imprisonment from which Colossians and Philemon were written: (a) a hypothetical imprisonment in Ephesus, *ca.* A.D. 54-55; (b) Caesarea, *ca.* A.D. 57-59 (Acts 24:26f.); (c) Rome, *ca.* A.D. 60-62 (Acts 28:16, 30).

Traditionally all the imprisonment Epistles (or Captivity Epistles) have been assigned to Rome, but the difficulties of this assumption, especially in the case of Philemon, have led many to look elsewhere. The Caesarean view has been supported for over a century, e.g., by Lohmeyer, and more recently by B. Reicke ("Caesarea, Rome and the Captivity Epistles," in W. W. Gasque and R. P. Martin, eds., *Apostolic History and the Gospel* [1970], pp. 277-286). It has difficulties of its own: it is understandable that a runaway should seek anonymity in Ephesus, the nearest great city, or in Rome, the distant capital, but why should he have gone to Caesarea? Reicke argued that he went to seek Paul's protection; but it seems more likely that he would rather have taken pains to avoid his master's associates, and that his conversion was, as traditionally supposed, a change of heart consequent upon an unintended meeting with Paul.

The claims of Ephesus have had a greater recent vogue, and were ably pressed a generation ago by G. S. Duncan (e.g., *St. Paul's Ephesian Ministry* [1929]). They hinge upon the actuality of the supposed Ephesian imprisonment. Such passages as 1 Cor. 15:32 and 2 Cor. 1:8 point to Paul's having undergone some special extremity of danger in Ephesus. There is no evidence that this involved imprisonment, and if it did such imprisonment is likely to have been a brief but rigorous condition pending trial or execution of sentence. The circumstances of prolonged custody or house arrest as at Caesarea or Rome were unusual and cannot be too easily assumed here.

The traditional Roman view has been championed by C. H. Dodd, and still remains the most satisfactory. We know that Luke and Aristarchus (Acts 27:2) sailed with Paul for Rome, and both sent greetings in these Epistles. Luke, however, was apparently absent from the Ephesian ministry, to judge from the incidence of the "we passages." Some have urged against Rome its great distance and the improbability of Paul's arranging lodging from there, but such arguments are not decisive. For the runaway Onesimus the distance may have seemed an advantage. Both C. F. D. Moule and F. F. Bruce inclined to a Roman origin. Bruce, acknowledging the difficulty of arguing from Philemon in isolation, favored Rome on the basis of the development in Paul's concept of the Church as reflected in Colossians.

The date is essentially determined by the view taken of the place of writing. In the case of Rome a further detail

merits attention. A great earthquake devastated the Lycus Valley during Nero's reign. Tacitus (*Ann.* xiv.27), our earliest authority, dated it A.D. 60. Eusebius (*Chron.*) and Orosius (vii.7, 12) placed a similar disaster after the fire of Rome in 64 but were probably influenced by a later Christian tradition that made it a judgment on the pagan world for the Neronian persecution. Colossians and Philemon betray no knowledge of the disaster. Arguments from silence are always suspect, but we can scarcely doubt that Paul's loving concern would have been expressed here if bad news had recently arrived. There are many uncertainties in the case, but his silence may perhaps point to a setting early in the Roman imprisonment. Subsequent news of the earthquake, coupled with the unanticipated prolongation of his own case, may have radically altered the situation. We cannot tell if he ever fulfilled his plan to visit Colossae.

IV. Views of Knox.–Interest in Philemon has been stimulated by J. Knox, *Philemon among the Letters of Paul,* in which he developed ingeniously some of the ideas of E. J. Goodspeed. Knox (a) reconstructed differently the background of the letter, and (b) argued for a wholly new conception of its importance in the NT canon.

(a) The owner of the slave was not Philemon at all, but Archippus, who is made the main addressee of the letter, Philemon being the overseer of all the Lycus churches and probably resident in Laodicea. The "letter from Laodicea" of Col. 4:16 is asserted to be Philemon, which had first been delivered there to Philemon, the first though not the primary addressee, whose prior intercession with Archippus was being enlisted. The "ministry" Archippus is admonished to fulfil (Col. 4:17) was that of acceding to Paul's request, which was to restore Onesimus to him as a helper. (b) Arguing from the possible reminiscences of Philemon in Ignatius, where the Ephesian bishop is named Onesimus, Knox maintained that this was the same slave in later life (*ca.* A.D. 110), that he was responsible for collecting the corpus of the Pauline letters at Ephesus, and that he selected for inclusion the brief note Philemon which so closely concerned himself.

This series of plausible conjectures is hard to reconcile with a straightforward reading of the texts, from which we must suppose that Philemon is the main recipient and the slave owner. Archippus's ministry is surely to be understood of some active responsibility in the church. And Col. 4:16 evidently contemplates an exchange of letters addressed respectively to the churches of Colossae and Laodicea. The identity of the "letter from Laodicea" is an open question: possibly it was our Ephesians, treated as an encyclical; it could hardly have been Philemon (see further Moule, pp. 14-18).

The application of this reconstruction to support Goodspeed's theory of the Pauline corpus is yet more speculative. It is an interesting observation that Ignatius's address to his Ephesian Onesimus is so reminiscent of Philemon, but Onesimus was a common slave name, and it is precarious, if attractive, to argue that the two men were the same. For criticism of Goodspeed's views of the canon, which postulate that Onesimus himself wrote Ephesians as an introductory exposition of Paulinism, see D. Guthrie, *NT Intro.* (1970), pp. 647-653.

V. Value and Significance.–The views so far discussed seem influenced by the desire to justify the existence of Philemon by finding some hidden significance in it. But this letter about a slave is a precious document of Christian freedom in its own right.

Masters had an absolute power over their slaves, even if in practice Roman law and custom were becoming more humane. The generous provision for the fugitive enjoined in Dt. 23:15f. found no echo in pagan society: action could be taken even against any who harbored him (Oxy. P. 1422, 1643). These are closer parallels than the letter of Pliny, which concerns an emancipated dependent over whom his patron had renounced such absolute claims.

Paul did not question the institution of slavery. Elsewhere he laid down principles for the conduct of Christian masters and slaves (1 Cor. 7:20-24; Eph. 6:5-9; Col. 3:22-25) and made the themes of servitude and manumission the vehicle of rich spiritual teaching (cf. also Rom. 8:15-17; Gal. 4:5-7). But here, in a case where he could himself have been liable for harboring a fugitive, he pleaded for an abolition of human categories and penalties between a master and slave who had been brought into a new basis of relationship in Christ, for "there is neither slave nor free, . . . for you are all one in Christ Jesus" (Gal. 3:28). This view was not disruptive of existing society, but it introduced a spirit in which the institution of slavery could only wither.

A careful reading of Paul's request suggests that he was making a twofold plea, first for a reconciliation of master and slave, then perhaps that Philemon might be willing to release Onesimus to assist Paul in the overriding priority of the work of the gospel. He did not press the latter point, nor would he force Philemon's hand. Knox argued (p. 5) that in Philem. 10 the expression *parakalō perí* means "ask for" rather than "ask on behalf of" in late Greek idiom, but his parallels are not conclusive. Paul's second request is not so explicit.

The preservation of the letter testifies to the recognition of its value in the early Church, and probably also to Philemon's compliance.

PHILETUS fī-lē'təs [Gk. *Philētos*] (2 Tim. 2:17). An early heretic, probably from the province of Asia. Along with HYMENAEUS (cf. 1 Tim. 1:20) he was accused of deviating from the truth and upsetting the faith of some by maintaining an over-realized eschatology, saying (as some of the Corinthians had before; cf. 1 Cor. 4:8; 15:12) that the resurrection had already occurred (2 Tim. 2:18). In spiritualizing the resurrection, Philetus and Hymenaeus may have taught that it occurred at baptism (based on a misunderstanding of Rom. 6:1-11; Col. 3:1; cf. Jn. 17:3) or during the instruction given at baptism.

J. J. HUGHES

PHILIP fil'ip [Gk. *Philippos*].

1. Philip II, king of Macedonia (359-336 B.C.) and father of ALEXANDER THE GREAT (1 Macc. 1:1; 6:2). Shortly after he became king, Philip transformed Macedonia into a powerful kingdom, and all of Greece fell under his control after his victory at Chaeronea in 338 B.C. He expanded his kingdom eastward by gaining control of the Straits of the Hellespont and the Bosphorus, thereby gaining control of the maritime route from the Aegean Sea to the Black Sea. Such expansion at the western border of Persia's empire signaled an imminent war with Persia. Philip was assassinated by one of his own officers while preparing

for this war. He was succeeded on the throne by his twenty-year-old son, Alexander.

2. Philip V, king of Macedonia (220-179 B.C.). After the Syrian defeat of the Ptolemaic kingdom in 198 B.C., Philip received control over part of the former Ptolemaic kingdom in Thrace and Asia Minor. Rome, concerned about the rise of powerful Hellenistic states such as Macedonia and the Seleucid kingdom, defeated Philip in 197 at Cynoscephalae. After his death in 179, his son Perseus became king and was in turn defeated by the Romans in 168 (1 Macc. 8:5).

3. Philip, a Phrygian appointed governor of Jerusalem by Antiochus Epiphanes (*ca.* 170 B.C.), after the latter ravaged Jerusalem and the temple and returned to Antioch (cf. 1 Macc. 1:20-42; Dnl. 11:28; 2 Macc. 5:1-23). Philip was charged with implementing the king's policy concerning the Jews. According to 2 Macc. 5:22, he was "in character more barbarous" than Antiochus Epiphanes. He had pious Jews burned who had hidden in caves in order "to observe the seventh day secretly" (6:11). When Philip perceived the growing military success of Judas Maccabeus, he enlisted the aid of Ptolemy, governor of Coelesyria and Phoenicia (8:8).

4. Philip, trusted courtier of Antiochus Epiphanes and perhaps his foster brother. The word *sýntrophos* used in 2 Macc. 9:29 may mean "foster brother," but may also mean "intimate friend" (cf. Abel, p. 406; Bauer, rev., p. 793). Prior to his death, Antiochus Epiphanes appointed Philip, who was with the king in Persia, as regent and guardian of the king's young son, Antiochus V (1 Macc. 6:14-17), apparently deposing Lysias from all the offices earlier conferred on him (cf. 1 Macc. 3:32-36). When Lysias learned that Philip had returned from Persia and Media with the intention of seizing control of the government, he abandoned his siege of Jerusalem, restored religious rights to the Jews, and quickly returned to Antioch to protect his own position (6:55-63; 2 Macc. 13:23).

Goldstein (p. 324) thinks that the Philip of 1 Macc. 6:14-17 is not the same Philip who was opposed by Lysias. According to Josephus (*Ant.* xii.9.7 [386]), Philip was killed in Antioch by Lysias and Antiochus V Eupator, but according to 2 Macc. 9:29 he fled to Egypt, the enemy of Syria, for protection.

5. Philip the tetrarch (Lk. 3:1), son of Herod the Great and Cleopatra of Jerusalem. *See* HEROD VI.

6. Herod Philip, the brother of Herod Antipas, and the first husband of Herodias (Mt. 14:3 par. Mk. 6:17). *See* HEROD V.B.2.

7. One of the Twelve. *See* PHILIP THE APOSTLE.

8. One of the Seven. *See* PHILIP THE EVANGELIST.

R. L. OMANSON

PHILIP, GOSPEL OF. *See* APOCRYPHAL GOSPELS V.J.2.

PHILIP THE APOSTLE [Gk. *Philippos*]. One of the original twelve apostles. He appears fifth in every listing of the apostles (Mt. 10:3; Mk. 3:18; Lk. 6:14; Acts 1:13).

Philip appears as a distinct personality only in the Gospel of John. He was the first disciple directly called by Jesus (Jn. 1:43). It cannot be determined whether Jesus found Philip before leaving for Galilee or after He had arrived there. If Jesus found him before going to Galilee, Philip may have been one of the disciples of John the Baptist (Jn. 1:35). Philip's home was Bethsaida ("Fishertown"), a small fishing village on the north shore of the Sea of Galilee. John's note that this was also the hometown of Andrew and Peter may explain why Philip is usually mentioned in close conjunction with Andrew (Jn. 6:8; 12:22).

After Jesus had found him and he had responded to the call, Philip quickly found Nathaniel (Jn. 1:45). Philip was apparently well versed in the Scriptures and saw the fulfillment of the OT promises concerning the Messiah in Jesus of Nazareth. When Nathaniel hesitated, questioning if anything good could come from Nazareth, Philip invited him to come and see (v. 46). In Jn. 6:4-7 Philip demonstrated that he himself did not fully see. Jesus tested the extent of his faith by asking him how they were to buy bread for the multitude that had been following Him. Philip, still immersed in the workaday world, responded in terms of expenses. He could accurately appraise the value of the bread required for each person to receive something to eat, but he badly underestimated the miraculous power of Jesus.

In Jn. 12:21 some unnamed Greeks approached Philip to serve as an intermediary in their request for an audience with Jesus. Philip then consulted with Andrew and they both informed Jesus (v. 22). Philip may have been singled out by the Greeks because he spoke Greek. He and Andrew were the only disciples who had Greek names; they were also the only disciples reported to have brought another to see Jesus. Whether their entreaty was granted is not recorded.

At the Last Supper Jesus shared His reflections on the Father and the meaning of His ministry with His disciples. Through Him they had known the Father (14:7). Philip at this point expressed his own wish to see the Father (v. 8). Philip's misunderstanding reflected an earthly-mindedness that desired a sign from heaven, a tangible vision of the true God akin to an OT theophany (cf. Ex. 24:9-11; 33:12-23). His request was similar to Moses' petition, "Show me thy glory" (Ex. 33:18). Philip's spiritual dullness provoked Jesus to respond with some exasperation (vv. 9-11). Philip had been privy to far more than a shadowy theophany; he had witnessed the very incarnation of God. The one who had seen Jesus had seen the Father. Although Philip had been with Jesus from the start, this truth had quite escaped his notice.

Later tradition tended to confuse Philip the evangelist with Philip the apostle. For example, Tertullian referred to the Philip who witnessed to the Ethiopian eunuch in Acts 8 as an apostle (*De bapt.* 18). In his epistle to Victor of Rome, Polycrates the bishop of Ephesus referred to Philip as one of the luminaries of Asia who lived there with his two daughters and was buried in Hierapolis. Another daughter was said to have been buried in Ephesus (Eusebius *HE* iii.31.3). (It is possible that the interest in Philip reflected in the Fourth Gospel is due to its Ephesian provenance.) Eusebius reported that the daughters of Philip had related to Papias an account of the miracles of a resurrection of a dead body and of a man who drank a deadly poison with no ill effects (*HE* iii.39.9). Philip was also identified as the disciple whom Jesus commanded to follow Him instead of burying his father (Clement of Alexandria *Misc.* iii.4, 25).

Philip plays a prominent role in the Pistis Sophia, a late third-century Gnostic work (*see* APOCRYPHAL GOSPELS V.G). Reportedly, he wrote down all "the discourses which Jesus spoke" and "all that he did." This may be an allusion to the Gospel of Philip, which was forged in his name (*see* APOCRYPHAL GOSPELS V.J.2). According to Epiphanius *Haer.* 26.13.2f. this Gospel was used by Egyptian Gnostics. In the Acts of Philip (a fourth- or fifth-century romance), Philip is completely confused with Philip the evangelist and even described as a son of thunder, quick tempered and vindictive. He is also reported in this work to have been martyred by crucifixion head downward in Hierapolis.

D. E. GARLAND

PHILIP THE EVANGELIST [Gk. *Philippos*]. One of the seven men chosen to minister to the neglected Greek-speaking widows in the church at Jerusalem (Acts 6:1-6). Though the name "Philip" is Greek and he was selected to act in the interest of the widows of the Hellenists, it is difficult to ascertain whether he himself was a Hellenist. His selection to a function of service does not necessarily constitute what later became known as the "diaconate" despite the fact that "deacon" and "serve" (Acts 6:2) derive from the same root.

The next mention of Philip is in Acts 8:4. The persecution directed against the church in Jerusalem led to its dispersion and the spread of the gospel. Philip himself went to the territory of Samaria. Due to textual difficulties it is uncertain whether his endeavor led him to Sebaste (formerly the ancient city of Samaria), or to another city of Samaria, perhaps Gitta, the birthplace of Simon Magus according to Justin Martyr (*Apol.* i.26; cf. F. F. Bruce, *Book of the Acts* [*NICNT*, 1954], p. 177; B. Metzger, *Textual Comm. on the Greek NT* [1971], pp. 355f.).

In response to the preaching of Philip in Samaria many were healed and freed from unclean spirits (Acts 8:7). The significance of Philip's ministry in Samaria is that it highlighted the universal application of the gospel (cf. 1:8) even to the extent of healing the ancient schism between the Jews and Samaritans (cf. Jn. 4:9). Further, the signs and miracles performed by Jesus, the apostles (e.g., Acts 3:1-7; 5:12f.), and Philip announced the coming of the kingdom of God (8:6, 12).

While in Samaria Philip also encountered Simon, a pretentious practitioner of magic who had gained a large group of adherents; however, Philip's preaching of the gospel resulted in the conversion and baptism of numerous men and women, and even Simon himself, though his repentance may be questioned (8:9-13, 18-24; on legends regarding Simon see *BC*, V, 151-163). In response to Philip's ministry among the Samaritans, the apostles in Jerusalem sent Peter and John so that the new believers might receive the Spirit and be assured that they were truly incorporated into the new community (8:14-17).

A heavenly messenger then directed Philip southward to the Gaza-Jerusalem road where he met the Ethiopian eunuch, a court official to the queen of Ethiopia, also called by the hereditary title Candace. As a eunuch he could not achieve the status of a full proselyte (cf. Dt. 23:1; but also Isa. 56:3-5), but he may have been a "God-fearer" (cf. Acts 2:10; 10:2; *see* ETHIOPIAN EUNUCH). The eunuch's query on Isa. 53 provided Philip with an opportunity to identify the Suffering Servant and to speak "the good news of Jesus." The eunuch was converted and baptized (8:26-39). Then the Spirit "caught up" Philip (cf. the similar experience of Elijah, 1 K. 18:12, and Ezekiel, e.g., Ezk. 3:12), and he "was found" at Azotus (ancient Philistine Ashdod) heading north to Caesarea while preaching the gospel in the towns.

Some twenty years later Philip is mentioned again, now as a resident of Caesarea and father of four unmarried daughters who are prophetesses (Acts 21:8f.). Here Philip provided lodging for Paul and his companions who were on their way to Jerusalem. In this "we" section of Acts Luke relates the events at Caesarea, and it is likely that he received information for earlier portions of Acts from the accounts supplied by Philip and his daughters (cf. *SPT*, p. 379).

Later traditions often confused Philip the evangelist with PHILIP THE APOSTLE, but in Acts 21:8 Luke makes a special attempt to distinguish this Philip as "the evangelist, who was one of the seven" (cf. esp. J. B. Lightfoot, comm. on Colossians and Philemon [repr. 1979], p. 45). One tradition states he died at Hierapolis (Eusebius *HE* iii.31), while another asserts he became bishop of Tralles where he eventually died (*PL*, CXVII, 103).

G. L. KNAPP

PHILIPPI fil'ə-pī, fi-lip'ī [Gk. *Philippoi*]. A city of Macedonia, today in ruins.

I. Geographical Setting
II. History
III. Archeology
IV. Philippi and the NT
V. Later History

I. Geographical Setting.–Philippi was situated near the eastern end of the Egnatian Road (Via Egnatia), the major overland route traversing the Balkan peninsula. To the south, 15 km. (9 mi.) away but separated by a coastal mountain range (Symbolon), lay Philippi's port city of NEAPOLIS (known today as Kavalla and in medieval times as Christopolis). To the north are the foothills of the Balkan highlands, to the east rises Mt. Orbelos, and to the west Mt. Pangaeum (Pangaion).

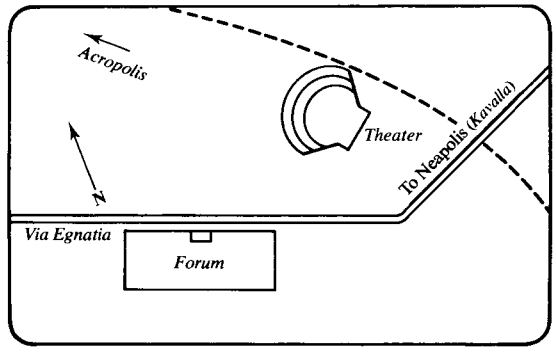
The broad flat plain in which Philippi is located extends generally to the northwest. In antiquity this plain was rather marshy, but today much of the area has been reclaimed, and former swamps yield both fruit and grain. Surrounded by mountains on almost every side, close to the sea, and near the borders of Thrace, Philippi naturally became a strategic city in the Greek empire. This inland valley is sheltered from the brisk sea winds, yet the climate of the plain is typical of the North Aegean area, being moderately hot in summer but raw and cold in winter.

II. History.–Gold was discovered at Mt. Pangaeum, and settlers from the island of Thasos (S of Neapolis) seized the area, which had previously been under Greek or Thracian control, and founded their city near the site of Philippi. They called it Krenides (from Gk. *krēnēde*, "spring"), undoubtedly because of the spring-fed river and marshlands (cf. Strabo *Geog.* vii, fragments 34, 41f.; Diodorus xvi.3.7f.). Diodorus said that the exiled Athenian statesman Callistratus was the leader of the original Thasian settlers. Although Appian (*Bell. civ.* iv.105) linked Krenides with Daton, it is more likely that Daton included the larger surrounding area, since Philippi is about 15 km. (9 mi.) inland and according to Strabo Daton encompassed an "admirably fertile territory, a lake, rivers, dockyards and productive gold mines."

Following his ascension to the throne Philip II of Macedon, the father of Alexander the Great, realized the strategic importance of Krenides and captured and rebuilt the city, renaming it Philippi. The Thasian settlers were driven

out or assimilated into the large influx of Macedonian inhabitants. The city was walled even to the Acropolis (the ruins are still visible) and strongly fortified. A Greek theater was constructed that probably was used during Paul's time. (The ruins visible today are from the Aurelian reconstruction and probably seated about 50,000 people.) The gold mines were worked with vigor and produced over a thousand talents a year (Diodorus xvi.8), supplying the means by which Philip outfitted his army.

After the battle of Pydna (168 B.C.), Macedonia passed into Roman hands. L. Aemilius Paullus, the Roman consul, divided Macedonia into four major regions or districts (Livy xlv.29). Philippi was situated in the first district, whose capital became Amphipolis. Much discussion has centered upon the problematic description in Acts 16:12 (cf. ℵ, A, C, etc., followed roughly by most English versions) of Philippi as "the first (or leading) city of the district of Macedonia," since Amphipolis continued to be the capital of this district. Blass and others have suggested that the Gk. *prōtē* ("first") be emended to the genitive *prōtēs* and thus read "a city of the first district of Macedonia," which would accord more with the Roman structure. Such a solution has its own problems. The suggestion of W. M. Ramsay (*SPT*, pp. 206f.), however, probably best represents Luke's thinking: whether or not the capital of the first district was established at Amphipolis, the citizens of Philippi had good reason to claim that their large *colonial* city was in reality the leading city of the district.



After the Roman conquest, the gold being exhausted, Philippi declined "to a small settlement" (Strabo vii.331 fr. 41) by the time of Caesar, but in a strange twist of history Philippi again became important because on its plains the future of the Roman republic was decided. In 42 B.C. Brutus and Cassius, assassinators of Caesar, met Octavian (later Augustus) and Antony. Antony defeated Cassius, while Brutus won the first battle with Octavian but was later defeated at Philippi. In honor of this victory Philippi was made a Roman colony (Colonia Victrix Philippensium), and many veterans settled there. After Octavian defeated Antony at the battle of Actium (31 B.C.), Philippi received an influx of Antony's followers, who had been dispossessed of their Italian property (Dio Cassius li.4). The colony was then renamed Colonia Iulia Philippensis to honor the cause of Julius Caesar, and later (27 B.C.), when Octavian was designated Augustus, the colony's name was changed again to Colonia Augusta Iulia (Victrix) Philippensium, equating the cause of Augustus with that of Caesar. Philippi was at that time given the right to the Law of Italy (*ius Italicum*) together with many privileges and immunities — especially the immunity from taxation. As might be expected, the residents of Philippi became very conscious of their Roman heritage (cf. Acts 16:20f.).

III. Archeology.–The major archeological work at Philippi was done between 1914 and 1918 by the French (École Française d'Athènes). The work has since been continued by the Greeks, who have established at Kavalla (Neapolis) a fine museum of artifacts recovered from Philippi and the surrounding area.

In the general plan of Philippi the Egnatian Road running E-W bisected the city, which was built on a spur of Mt. Orbelos. In the north sector, the highest part of the city, is located the theater and the Acropolis, on the west side of which are several pagan shrines. In the south sector, paralleling the Egnatian Road, is the forum, which has been excavated. It is about 100 m. (300 ft.) long and 50 m. (150 ft.) wide. Although it dates from the period of Marcus Aurelius, 2nd cent. A.D., it was undoubtedly built on the site of a previous forum known to Paul and his companions. In the middle of the north side of the forum are preserved four steps, which must have led to the speaker's platform or judgment seat (Gk. *bēma*). If Paul and Silas were sentenced from a tribunal platform, these steps may have been part of it (Davies, p. 96), since the forum complex does not seem to have been radically altered in rebuilding (McDonald, p. 21). At the northwest and northeast corners of the forum are the ruins of the temples of Antonia and Faustina. Other civic buildings such as grain shops and a library, together with fountains and a Roman stoa, surrounded the forum. Probably the city prison where Paul and Silas spent an eventful night (Acts 16:23ff.) was in this area.

Part of the Egnatian Road at Philippi (E. LaSor)

About a kilometer NW of the city on the Egnatian Road the ruins of a colonial arch were discovered. Such arches were often erected to indicate the privileged status of Roman colonies.

IV. Philippi and the NT.–Following his vision and the Macedonian call (Acts 16:9ff.) Paul, together with Silas (also called Silvanus), Timothy, and Luke, set sail from Troas in Asia Minor and arrived the following day at Neapolis. Paul's strategy seemingly was to concentrate on the large cities of the Egnatian Road. Setting out almost immediately, he crossed the Symbolon ridge, which rises sharply to a pass of 500 m. (1600 ft.) and then descends to the plain. The graphic account of Paul's first visit to Philippi is recorded in Acts 16:12-40.

On the sabbath, according to his custom, Paul sought out the worshiping Jews and god-fearers. The Egnatian Road crossed the Gangites (Gangas) River not far beyond

the arch. Thus the riverside where the Jews and godfearers gathered for prayer and where the gospel was first preached in Europe (Acts 16:13) can be identified with fair certainty, although a branch of the Krenides is a possible alternative. The Jews' place of worship may have been determined by the Roman practice of tolerating, but sometimes excluding from colonial limits, religious practices that were inconsistent with their state. The colonial limits of Philippi, including the space outside the walls enclosed by the pomerium (the outer line of the colony), apparently extended to the arch. Thus the worshipers would have been practically by the Gangites before they were outside the city. The river may also have been important for Jewish lustration rites, and in this vicinity Paul probably baptized his first converts in Europe (v. 15).

The absence of any reference to men among the worshipers seems to indicate that the Jewish community was weak numerically. Although Luke legitimately could use the term "prayer" (Acts 16:13) as a figurative description for a synagogue (Cadbury, p. 87), the absence of men from the sabbath service of prayer greatly weakens this idea since at least ten men were necessary for a synagogue to function. The RSV is probably correct in rendering the uncertain Greek as "where we supposed there was a place of prayer" (*see also* PRAYER, PLACE OF), for at this time there was probably no synagogue in Philippi. Apparently the women who were meeting for prayer were led by one Lydia (whose name means "the Lydian woman"; cf. F. F. Bruce, *in loc.*). This woman marketed purple dyed products for which her native city in Lydia, THYATIRA, was famous. Probably a woman of means, perhaps a widow, she and her household were the first to accept the apostolic message, and she prevailed upon the missionaries to stay with her while they were at Philippi. How long Paul remained is not clear, but his stay was suddenly shortened.

On the way to prayer the Christians encountered a woman possessed of a strange spirit. F. F. Bruce (*in loc.*) suggests that Gk. *pýthōna,* translated "divination," may indicate that the Philippians considered her inspired by Apollo, the Python god. Her cries that the Christians were "servants of the most high God" were countered by Paul with a command in the name of Jesus for the spirit to leave her (cf. exorcisms by Jesus, Lk. 8:28ff.). The men who profited from this woman's possessed state seized Paul and Silas and dragged them to the forum (Gk. *agorá,* "marketplace") and accused them before the magistrates of advocating illegal practices in the Roman colony (Acts 16:21). Although the two magistrates of a Roman colony normally were designated as *duumvir,* Cicero indicated (*De lege agraria* ii.93) that they were often dignified with the title *praetor,* which Luke employed. Paul and Silas were mobbed, stripped, beaten with rods (fasces, carried by the lictors or sergeants), cast into prison, and placed in stocks. That night an earthquake jarred loose both stocks and prison doors. Paul saved the jailer from suicide, and the members of his household received the apostolic message and were baptized.

The next day the magistrates ordered the prisoners released, but Paul refused to accept such a dismissal since as a Roman citizen he was exempt from scourging and was entitled to a proper trial. Roman citizenship was undoubtedly pleaded during the disorderly trial but went unheeded. It is difficult to know with certainty whether Paul carried a portable certificate or diptych in order to prove his citizenship (cf. Cadbury. pp. 71f.; F. Schulz, *Journal of Roman Studies,* 33 [1943], 58-64; but *see* PAUL THE APOSTLE VII.A). The lictors reported the fact of citizenship to the magistrates, who made appropriate apologies but begged Paul to leave their city.

The missionaries set out for Thessalonica, but they seem to have left Luke behind, because the "we" section of Acts ends in ch. 16 and is not resumed until 20:5, when Paul again leaves Philippi for Jerusalem. The presence of Luke during the five-year interval may explain the growth and strength (in affliction) of the church at Philippi (2 Cor. 8:1f.; Phil. 1:29f.). Although not specifically stated, Paul probably visited Philippi on his way to Greece during his third journey, waiting for the coming of Titus (2 Cor. 7:5f.) and probably writing 2 Corinthians there (8:1ff.; 9:2-4). On his return from Greece to Syria he was forced to go by way of Philippi because of a plot on his life. At that time Luke rejoined him. From Phil. 2:24 and 1 Tim. 1:3 one may surmise that he intended to visit Philippi again, and he possibly did so in connection with a visit to Troas (2 Tim. 4:13). The communication between Paul and Philippi was not limited to visits, however; the Philippians sent gifts of money at least on two occasions (Phil. 4:16; 2 Cor. 11:9; Phil. 2:25). Paul's limiting his correspondence with this church to one letter therefore is unlikely (cf. Polyc. Phil. 3:2 and J. B. Lightfoot's note on Phil. 3:1).

V. Later History.–After Paul's death little is heard of Philippi, except that Polycarp bishop of Smyrna addressed an encouraging letter to the church after Ignatius stopped there on his way to martyrdom in Rome. The ruins of five ancient churches have been identified in the vicinity of Philippi, including one from the 4th cent. near the river site traditionally associated with the "place of prayer." The prosperity of later Christianity in this area is attested by the two large basilicas that were erected in the 5th-6th centuries. The first was evidently destroyed by earthquake, and the second collapsed because of faulty construction (Davies, pp. 97-100). The small crypt of the first church has been erroneously linked to the prison where Paul and Silas spent their eventful night. Of the destruction of Philippi no account is available, and the site is now uninhabited.

PHILIPPIANS, EPISTLE TO THE.

I. Paul and the Church of Philippi
II. Origin of the Epistle
III. Structure
IV. Impact

I. Paul and the Church of Philippi.–According to Acts, Paul founded the church of Philippi during his second journey, shortly after his first arrival in Europe *ca.* A.D. 50.

He came with Timothy and Silas to Troas, and had a vision of a Macedonian man who asked him to preach the gospel in Macedonia (Acts 16:8-10). Paul and his friends immediately sailed to Samothrace and to Neapolis, the seaport of eastern Macedonia; then, following the Roman Egnatian Road (which connected Epirus with Byzantium), they went some 16 km. (10 mi.) northwest and reached Philippi, where they decided to stay (vv. 11f.).

PHILIPPI had the form of a rectangle. Its northeastern quarters were on the slope of the acropolis, under which the Egnatian Road ran diagonally between the eastern and the western city gates; its southwestern quarters were on the plain where Antony had defeated the murderers of Caesar in 42 B.C. The inhabitants were proud of their

Traditional site of Paul's prison in Philippi (W. S. LaSor)

Roman citizenship, which they had received after the battle of Actium in 31 B.C. when Augustus made Philippi a colony of Roman veterans (Acts 16:12, 21). Paul alluded to this by contrasting political and religious citizenship (Phil. 1:27; 3:20).

There were also Jews and God-fearing women in Philippi but, evidently because of the strong Roman consciousness of the citizens, the Jews were not allowed to have a synagogue within the city walls, so they had only a place of prayer outside the west gate at a river (Acts 16:13). This river was either the Gangites, 2.4 km. (1.5 mi.) W of the city (Collart), or a streamlet of the Krenides just outside the gate (Lemerle).

Paul spoke to some of the God-fearing women assembled here, and the first to become a Christian was a female wholesaler by the name of Lydia who imported purple textiles of Thyatira. She was baptized, and became the hostess of Paul and the other Christians (Acts 16:13-15). Lydia and her friends are the first evidence of a Christian church in Europe, besides some Jewish Christians of Rome, who may have included Aquila and Priscilla before this couple had to leave for Corinth in A.D. 50 (Acts 18:2; cf. Suetonius *Claudius* 25.5).

Paul's great success in Philippi caused the Romans there to react against the influence of what they supposed to be Judaism, and the duumviri of the city arrested Paul and Silas (Acts 16:16-24). Seeing that Claudius had driven out the Jews of Rome in A.D. 50 (as mentioned above), the Greeks of Alexandria were inspired in A.D. 52 to accuse the Jews of stirring up society. It was in this connection that Paul and Silas were accused in Philippi of introducing Jewish customs unworthy of Romans (16:20f.). They were flagellated and imprisoned, but the jailer was converted, and the magistrates had to apologize and then asked Paul to leave their city (16:25-40). Paul followed the Egnatian Road to Thessalonica (17:1; 1 Thess. 2:2), where he received material support more than once from Philippi, perhaps especially from Lydia (Phil. 4:15f.). The Philippians also supported him in Corinth (2 Cor. 11:9).

During his third journey Paul was attacked in a similar way by the Gentiles in Ephesus (Acts 19:23-40). He visited Macedonia again in A.D. 57 (Acts 20:1; 1 Tim. 1:3). If he wrote 2 Corinthians at Philippi, it was mainly in that city that he was occupied with his great collection for Jerusalem (2 Cor. 8:1; 9:2; Rom. 15:26). A third visit to Philippi occurred at Easter, A.D. 58, on Paul's return from his collection activity in Greece (Acts 20:3, 6). Those scholars who assign the custody mentioned in Philippians (Phil. 1:7, 12-17) to Ephesus make the new journey to Philippi, which the apostle mentioned as a possibility (Phil. 1:27; 2:24), coincide with the first of these collection visits. The combination is dubious, however (see II below). There is no indication of any captivity in Ephesus, but merely of a tumult (Acts 19:23-40; cf. 1 Cor. 15:32, Gk. *ethēriomáchēsa*). On that occasion Timothy was already in Macedonia (Acts 19:22), not with Paul (Phil. 1:1). Paul must therefore have been looking forward to visiting the Philippians on a later occasion. It is uncertain, though, whether he did go to Philippi a fourth time, as he desired. No text mentions such a visit (1 Tim. 1:3 refers to that earlier occasion mentioned above). If the apostle was able to visit Spain after A.D. 62 (the plan to do so is mentioned in Rom. 15:24, 28, and the journey is probably referred to in 1 Clem. 5:6f.), there was not much time left for a new visit to Philippi before his martyrdom in 64 or 65 (1 Clem. 5:6f.).

II. Origin of the Epistle.–As is true of all Pauline Epis-

tles, Philippians has given rise to a great variety of theories regarding the circumstances under which it was composed. Yet it seems possible to answer some fundamental questions with a considerable degree of probability.

(1) Modern scholars no longer attempt to deny the Pauline authorship of the Epistle. The greeting names Paul and Timothy as its senders; and there is no reasonable ground to discredit the notice about the writer and his assistant since the diction and ideas are very much in harmony with other Pauline Epistles, in particular with 1 Corinthians and Romans, but also with Ephesians and Colossians (C. L. Mitton, comm. on Ephesians [1951], pp. 107-110, 322-332). Paul had received fresh information about the situation of the Philippians from Epaphroditus, their fellow Christian, and sent him back with the Epistle (2:25-30; 4:18). In spite of the linguistic identity of their names, Epaphroditus and Epaphras (Col. 1:7; 4:12; Philem. 23) were two different persons, as is evident from their special connections with different congregations.

(2) In accordance with German and French traditions of literary criticism, several attempts have been made to attack the literary integrity of the Epistle (references in W. G. Kümmel, *Intro. to the NT* [Eng. tr., 2nd ed. 1975], pp. 322f.). They are intended to remove what theologians with a high regard for Paul as a theologian consider contradictions and unevennesses. These attempts give rise to many new difficulties and enigmas, partly because quite different and subjective explanations have been suggested, and partly because the literary procedure becomes less understandable by involving a series of secondary factors.

In some cases Paul is supposed to have made a revision himself. The question here is why Paul would have made rearrangements or additions in his MS when he knew that his time was short. Paul always wrote to a local church and in this case was eager to send Epaphroditus with the letter, so that it must be supposed to have been rather soon in the hands of its readers. Had he wanted to improve his message, he would have done so under the impression of fresh prophetic inspiration, and then he would have sent another letter but never would have dreamed of calling back his MS for revision, as if he were a modern scholar.

Should instead some disciple be accused of having changed the wording of the original? Those who think so have spoken not of textual variants, which may have been caused by later scribes, but of a deliberate revision. In this connection many different suggestions to restore an original sequence have been made (e.g., 4:10-23; 1:1–3:1; 4:4-7; 3:2-4, 8f.; or 4:10-20; 1:1-26; 2:17f.; 1:27–2:16; 4:1-3; 2:19-30; 3:1a; 4:4-7; 4:21-23; 3:2-21; 4:8f.). The great variety of theories makes the picture confusing, and because of the circumstances any solution of this kind seems improbable. What interest would have directed this inventive redactor? It cannot have been to make the letter more complicated than it was. Once the letter was read and circulated by its recipients, that activity of the supposed redactor would have been rejected as falsification. Some think, however, that various local letters of Paul were combined by somebody who desired to make them of interest to the whole Church. One must ask why this man left out original prescripts and inserted secondary transitions but was so careless that he did not give the result of his work a really catholic, ecumenical character, letting all those local and personal details remain.

The many attempts to destroy the integrity of Philippians are too divergent and subjective to be convincing. A personal letter written in a short time and under special conditions should not be expected to be consistent like a theological treatise. The literary manipulations now in vogue again raise difficulties greater than those their originators were trying to solve.

(3) Paul wrote his letter to Philippi in custody ("fetters," Phil. 1:7, 13f., 17). Modern scholars consider Philippians, together with the Captivity Epistles written to Christians in Asia Minor (Ephesians, Colossians, and Philemon), to have been written from either Ephesus, Caesarea, or Rome. This problem has to be discussed without any prejudicial opinion that Philippians and the other Captivity Epistles must relate to the same prison.

(a) Ephesus is often said to be the place of captivity behind Philippians, Ephesians, Colossians, and Philemon. This is arbitrary, for the NT indicates several arrests (2 Cor. 6:5; 11:23; Rom. 16:7) and yet does not contain the slightest allusion to any imprisonment in Ephesus. On the contrary, Luke said that the city tumult raised there by the artisans (Acts 19:23f.) *ca.* A.D. 56 was stopped by the magistrates (19:35-40; 20:1), and Paul looked back on this desperate struggle but not on any imprisonment (1 Cor. 15:32). There is also the difficulty that Timothy is said to have left for Macedonia before this disturbance happened (Acts 19:22), but is mentioned in Phil. 1:1 as being with the apostle.

(b) Paul's imprisonment in Caesarea *ca.* A.D. 58-60 (Acts 23:33; 24–26) may very well be regarded as the background of the three Captivity Epistles sent to Asia Minor with Epaphras, Tychicus, and Onesimus: Ephesians, Colossians, and Philemon. The chronological reason for this view is that Paul represented his imprisonment as involving a new factor in his life ("now also a prisoner," Philem. 9), and his only long-lasting imprisonment began in Jerusalem and Caesarea *ca.* A.D. 58. This view is also supported by the geographical circumstances. The situation is most easily conceivable if the slave Onesimus escaped from Colossae to Caesarea and was urged by Paul to return there with Tychicus (Philem. 11, 15, 17; Col. 4:7-9). In this way they would simply have passed from Colossae to Caesarea and back again in a short time and on foot, which would not have been possible if Paul had been in Rome. Furthermore, in Caesarea the apostle may very well have been hoping to be freed rather soon and to pass Colossae (Philem. 22) on his way to Rome and Spain (Rom. 15:23f., 28). The projected visit to Colossae would contradict his Spanish plans if the apostle had written the three Epistles from Rome.

(c) In all these respects Philippians is evidently based on a different situation. Hence its background seems to be Rome and the years 60-62 (Acts 28:16, 30).

With regard to chronology, the apostle's trial is not a new factor but a long story now approaching its end (Phil. 1:7, 12, 26; 2:24; 4:10). Paul did not call himself a prisoner who had to suffer in chains (Eph. 3:1; 4:1; 6:20; Col. 1:24; 4:18; Philem. 1, 9) together with some fellow prisoners (Col. 4:10; Philem. 1, 9), but only spoke of "bonds," implying that he was arrested or in custody (Phil. 1:7, 13f., 17). No other prisoner is mentioned; Paul on the contrary indicated that he could receive and send out collaborators at his discretion (2:19, 25, 28; 4:18). This was his situation in Rome A.D. 60-62 when he lived in a private house guarded by a soldier (Acts 28:16, 23, 28).

Geographical details also point toward Rome. The distance between Rome and Philippi is not greater than that between Caesarea and Philippi. The good roads would have allowed the Philippians to send Epaphroditus with money to Rome and to be informed about his illness within six or eight months (Phil. 2:25-30; 4:18), and Paul spent two years in the Roman custody. Also indicative of a Roman provenance is Paul's statement that his case had "become known among the whole praetorium and all the others" (Phil. 1:13). The expression "praetorium" cannot refer to a building (as in the Gospels), but must indicate some people, comparable with "the others." Several

Greek inscriptions use the word praetorium in a personal sense to designate the praetorian guard of the emperor in Rome (L. Heuzey and H. Daumet, *Mission archéologique* [1876], nos. 130f.; *Inscriptiones Graecae,* XIV [1890], no. 911; W. Dittenberger, *Orientis graeci inscriptiones,* II [1905], no. 707). This corresponds to a normal Latin literary usage (Pliny *Nat. hist.* xxv.6 [17]; Suetonius *Nero* 9; Tacitus *Hist.* i.20; etc.). During the first Christian centuries the praetorian guard was always garrisoned in Rome, although part of it would have provisionally accompanied the emperor abroad. Inscriptions found at other places (as also those quoted above) have to do only with individuals who had earlier been members of the Roman bodyguard. *See also* PRAETORIUM; PRAETORIAN GUARD.

Representatives of the Ephesus theory believe that inscriptions found on a road near this city prove that a praetorian detachment was garrisoned in Ephesus. This is wrong, for the documents in question (*CIL* 6085 = 7135 and 7136) were made for a veteran who had been a member of the guard and now served at this road as a rural policeman (*stationarius*). The praetorian guard itself had to be where the emperor was, and for the days of Paul this implies nothing but Rome.

It is also most natural that Paul should use the Latin loanword *praetorium* while in Rome and while addressing Christians of a Roman veteran colony familiar with military conditions in Rome. Because of some details given by Josephus in his report on the arrest of Agrippa in Rome (Josephus *Ant.* xviii.6.6f. [179-204]), the soldier who guarded Paul in Rome (Acts 28:16) must be supposed to have served in the praetorian regiment and to have fulfilled his function of a policeman by order of the prefect (commander in chief) of the praetorians, who was personally responsible for the arrest of state prisoners. During the Roman custody of Paul and until A.D. 62 the prudent equestran politician Burrus held this office. Tacitus referred to occasions when Burrus used praetorian soldiers as policemen in Rome, sometimes in opposition to the cruel tendencies of Nero (*Ann.* xiii.48; xiv.7-10; etc.). According to a popular biography, the prefect Aelianus is said to have felt sympathy for the imprisoned oriental philosopher Apollonius, who had been accused of spreading foreign doctrines (Philostratus *Apoll.* vii.16-28). The personal conversation of this prefect with the prisoner sheds light on the circumstances under which Paul may have become convinced that "the whole praetorium" was aware of his being under trial for the sake of Christ.

Another indication of Rome and Nero's court is the greeting at the end of the Epistle from "those of the house of Caesar" (Phil. 4:22). While clients and servants of the emperor and his family did live in other places, such people were mainly found in Rome, which also had a Jewish synagogue of Augustenses (J. Frey, *Corpus inscriptionum Judaicarum,* I [1936], pp. LXXIIIf.). The point is lost if one does not see that Paul is happy to confer a greeting from such a group directly connected with the imperial court to readers in a Roman colony where the leading elements were proud of their connections with the capital.

As stated above, the apostle may very well have expected in A.D. 59 that his captivity in Caesarea would soon be over so that he would be able to visit Colossae (Philem. 22), then sail from Ephesus to Rome and later to Spain (Rom. 15:23f., 28). This natural project would have been more complicated if Philippians had been written from Caesarea, for a visit to Philippi (Phil. 1:27; 2:24) would be a detour. If the Epistle was written from Rome, the situation is simplified. Without assuming that Paul gave up his Spanish plans while being on trial, one may observe that Rome would have been the most natural place for his contemplating both projects: first a journey to Spain, then a new visit to the East.

III. Structure.–Philippians is both a genuine personal letter containing intimate information, and an Epistle offering theological instruction and ethical admonition.

Except for the letter to Philemon, it may be called the most personal writing in the NT, for it both emphasizes the friendly connections of Paul and the Philippians and brings several reports of what the apostle, his disciples, and the readers had recently done or were going to do. This does not prevent Philippians from being a theological writing, a rich source of Christian doctrine and an excellent instrument of apostolic teaching, especially with regard to Christ and the Church. These two aspects of Philippians — personal letter and theological Epistle — are represented in turn in the document. Accordingly, the contents of Philippians may be divided into the following sections, alternating between information and admonition.

1:1-26: *Information.* Paul is grateful because the Philippians have given him material support (1:1-11). He is also hopeful because the praetorium and other people know that he has been arrested for the sake of Christ and the gospel, and because he is convinced that his trial is making progress (1:12-26).

1:27–2:16: *Admonition.* There must be spiritual unity and mutual service among the members of the church (1:27–2:4). Christ is the model in this regard because of His voluntary humiliation or "kenosis," which found expression when He laid aside His divine glory, took on a human shape, and obediently appeared in the function of a servant, even permitting Himself to be crucified (2:5-11, often regarded as a hymn based upon some formula of confession; cf. V. Neufeld, *Earliest Christian Confessions* [1963]). Thus every Christian must show obedience in this world until the day of Christ (2:12-16).

2:17-30: *Information.* Paul is full of joy though he knows that he might be sacrificed because of his ministry (2:17f.). Timothy will soon be sent to Philippi to look after the readers, but Epaphroditus will come first (2:19-24). He brought some gifts (perhaps money and clothes) from the readers to Paul, and then fell ill, as the readers know, but now he is returning with the present Epistle.

3:1–4:9: *Admonition.* The readers should rejoice in the Lord, with regard to His coming glory (3:1). They are warned against inclinations to legalistic Judaism (3:2-6), which implies looking backward instead of forward (3:7-17). Another aspect of this false propaganda is that its representatives cultivate materialistic and even political ambitions instead of looking upward to Christ in His glory (3:18–4:1). In opposition to all sorts of self-assertion and provocation Paul implores two women and the whole congregation to let themselves be dominated by peace and other virtues (4:2-9).

4:10-23: *Information.* Paul thanks his readers for the support they have given him recently through Epaphroditus (4:10-20). He is happy to confer greetings especially from some clients or servants of Nero and his family (4:21-23).

IV. Impact.–Both the personal and the theological interests of Philippians are valuable for devotion.

(1) Philippians is a personal document illustrating the relations between the apostle of the Gentiles at the summit of his life and the congregation that he regarded as nearly ideal. The Epistle is characterized by repeated expressions of joy and exhortations to rejoicing (Phil. 1:4, 18, 25; 2:2, 17f., 29; 3:1; 4:1, 4). These are partly due to Paul's satisfaction with the readers and gratitude for their help. But there is more than a personal interest behind this emotion of happiness. Paul is dealing with the joy of faith that has an eschatological accent: he is conscious that Christ has come and will come again to bring consummation. This is

the cause and the object of Christian joy so much emphasized in this Epistle.

(2) Philippians is also a theological document offering essential contributions to the study of NT Christology, ecclesiology, and eschatology.

Christ is first of all mentioned as the subject of apostolic preaching (1:13-17). Paul was arrested for the sake of the gospel; but this has encouraged many to preach the kerygma of Christ in an often hostile environment, and what is important is only that Christ is made known everywhere. Suffering brings the believer closer and closer to his Redeemer (1:20-23). Against the background of his exhortations to a behavior worthy of the gospel (1:27–2:4) the apostle quotes the "kenosis" hymn (2:5-11), which is the most essential christological passage found in all the Pauline Epistles. Here the humiliation and exaltation of Christ are not meant to be a topic of dogmatics and are referred to not for any doctrinal reasons, but with a pronounced ethical interest. Paul has just spoken of mutual Christian *diakonía* (2:1-4). Christ's incarnation is then represented as the model of such unselfish service. Though He existed in the state of God, He did not regard being equal with God as something "to be grasped" (2:5f.). Since the Greek word used here (*harpagmós*, "robbery") is normally active, whereas passive meanings (something [being] stolen) are found only in later contexts and secondary expositions, the meaning is that Christ did not use His majestic position to commit robbery in the sense of enforcing His authority upon other beings. An old Greek catena has indicated the correct translation of the phrase by quoting the expression "the ministry is not an opportunity for robbery" (Gk. *ouk harpagmós hē timḗ*; P. Poussines, *Catenae graecorum patrum* [1673], p. 233).

Christ renounced the divine fulness and omnipotence that belonged to Him as the Son of God and instead dispossessed Himself (2:7a). This is called His kenosis ("emptying"), i.e., Christ's laying off of His divine fulness, dignity, and power so that He "emptied" Himself at His incarnation. It is meaningless to ask whether this is a pre-Pauline or a Pauline topic. The apostle may possibly have adopted some formula or hymn familiar to the readers, but in this case he quotes the words in a free way and gives every detail a meaning in the present exposition. Attempts to reduce the kenosis passage to pre-Pauline and non-Pauline traditions are popular, but the result is another kenosis, insofar as the words of Paul are deprived of their meaning.

With a special reference to Christian *diakonía* Paul then reminded the readers that Christ took on the form of a servant (2:7b). The point is that a completely unselfish service is most glorious in the eyes of God, as shown in Isaiah's Servant prophecies that Jesus fulfilled. The readers were certainly familiar with these classical prophecies, so that Paul did not have to insert any literary quotation. It is dubious whether he used the LXX text, but even if this was the case, the slight difference of the words for "servant" does not imply any real difficulty. Paul deliberately used the Gk. *doúlos* (like the LXX in Isa. 49:3f. and corresponding with *douleúōn* in 53:11). He could not possibly have said *país* (like Isa. 42:1; 49:6; 50:10; 52:13), for in the phrase "the form of a servant" this expression would have been understood as "child," whereas Paul wanted to clarify that Christ is the model of Christian service. This is also why he pointed out the humiliation and sacrifice of the incarnate Son of God (2:7c-8): in complete obedience Christ took on human nature, humbled Himself, and permitted Himself to be killed in a miserable way on a cross. Here is the basis of His subsequent exaltation to universal sovereignty (2:9-11). Thus Christians have to be His successors in obedience and blamelessness (2:12-16). Paul himself endeavors to be united with Christ in His suffering in order to participate in His resurrection (3:10-12) and in this context wants to be a pioneer for the believers (3:17; 4:9).

The church of Philippi was administered by functionaries called bishops and deacons (1:1, Gk. *episkopoi, diákonoi*). In earlier Pauline Epistles these categories are not mentioned together; there are only indications of specialists in *diakonía* (Rom. 12:7; 16:1). A few years before writing Philippians, the apostle is reported to have called the presbyters of Ephesus "bishops" (Acts 20:28). Since he addressed the bishops of Philippi similarly in the plural, it seems they were not monarchic officers but rather honorary authorities like presbyters who collaborated in the administration of community life. The deacons of Philippi were probably functionaries responsible for social work, like the deacons mentioned in other contexts. Paul appears to have addressed them, along with the bishops, especially with regard to their help when he arranged the collection in Macedonia. The combination of bishops and deacons represented by Philippians is also found in 1 Tim. 3:2, 8 and not long afterward it became a normal system (1 Clem. 42:2; Did. 15:1).

Paul is extraordinarily satisfied with the Christians of Philippi because of their *diakonía*, and the Epistle is characterized by expressions of his gratitude and happiness (1:3-7; 2:2, 12; 4:10, 15-18). The Philippians do not have the same perfection and harmony on the level of doctrine, but a certain inclination to individualism and even heresy. For this reason Paul emphasizes his desire that the Christian love so well represented by the readers may help them more and more to acquire Christian knowledge and righteousness (1:9-11). His heartfelt concern is their behavior in society (Gk. *politeúesthe*, 1:27), which should be worthy of the gospel and without any disharmony in spite of all external difficulties (1:27–30).

As usual Paul sees the remedy in his ecumenical program: the purity of Christian love and the unity of the Holy Spirit (2:1-4). The necessary predisposition is not any special confession, philosophy, or hermeneutics, but the perfection of Christian *diakonía* that will bring about the spontaneous improvement of Christian doctrine. Christ is the prototype of *diakonía* (2:5-11), and if the believers follow Him they will have spiritual unity and doctrinal harmony, each respecting the attitude of the other (2:3).

But no tolerance of heretics who destroy Christian peace is permitted. Paul had been irritated by Christian troublemakers in Rome (cf. Rom. 16:17f.) who used the gospel for intrigues and provocation (Phil. 1:15-17). Clement further illustrates this by saying that jealousy and envy in the environment caused the martyrdom of Peter and Paul (1 Clem. 5:1-7), as later also the fall of Jerusalem (6:4). He evidently thinks of zealotic propagandists and intriguers within Christianity who had relations with Judaism. It is very probable that Jewish zealotism, which was quite powerful *ca.* A.D. 60, had influenced Christians who preached against the Gentiles and the authorities. At any rate, Paul had similar fanatics in mind when he complained that envy and intrigues characterize the preaching of provocative elements who cause him difficulties in his trial (Phil. 1:15a, 17). He also warned the Philippians against rapacious propagandists, whom he called "dogs" and "evil workers" (3:2a). Since the apostle had just had difficulties in Rome with such Christian troublemakers, whom Clement describes as zealots, there is reason to assume that Paul thought of similar troublemakers in Philippi, i.e., provocative fanatics or zealots. There is also reason to understand them as Christian Judaizers, because Paul says they

represent fleshly mutilation in opposition to spiritual circumcision (3:2b-3). They may also be compared with those Christian zealots for the Jewish law whom Paul had found in Galatia and in Jerusalem (Gal. 1:7; Acts 21:20).

Against such nomists Paul remarks that his Jewish background is an asset that he counts as "refuse," and that a Christian must forget what is behind him and pursue only what lies before him (3:13). It is not difficult to recognize that Paul speaks of the same Judaizers when, a few verses later, he summarizes his criticism by warning the readers against many who are the enemies of Christ's cross and have only material interests (3:18f.). For natural reasons, Christians dominated by Jewish ideals endeavored to suppress the actual passion of Christ, to emphasize dietary observances ("whose god is their belly," as in Rom. 16:15), and to achieve the earthly triumph of the Church. Paul expressly criticizes such a materialization of eschatology (they are "concerned with earthly things") by pointing out that the object of Christian hope is no political community on earth, but the eschatological kingdom of Christ (3:20f.).

Hope is thus a topic of special importance for Paul in Philippians. It is connected with his repeated expressions of joy (1:4, etc.). The starting-point is what God has already done for the believers: this is a warrant for their approaching perfection when Christ comes (1:6, 10f., 20). Paul is happy to live for Christ but even more is yearning to die in Him (1:21-23). The progress of the readers (1:25) also means approaching eternal salvation sent by God (1:28). Working for this salvation is necessary because it is God who does the work (2:12b-13). Paul hopes the readers will be an honor for him on the day of Christ (2:16). By rejoicing in Christ (3:1), i.e., with His coming in mind, they will avoid the dangers of Judaistic heresy (3:2). Of sole importance is the progression and perfection of the unity with Christ (3:8-17). The readers must look forward to their glorification, which comes from heaven and from the future (3:2-21). As the Lord is quite near (4:5), they will have the peace of God in the present (4:7) and be able to give all honor to Him (4:20).

B. REICKE

PHILISTIA fə-lis'tē-yə [Heb. *p^{e}lešeṯ*] (Ex. 15:14; Ps. 60:8 [MT 10]; 83:7 [MT 8]; 87:4; 108:9 [MT 10]; Isa. 14:29, 31; Joel 3:4 [MT 4:4]); [*p^{e}lištîm*] (Zec. 9:6); AV also PALESTINA, PHILISTINES, PALESTINE; NEB also PHILISTINE(S). The region later known as Palestine, whose people were the PHILISTINES. During the reign of Ramses III, a group of Aegeo-Cretan tribes attempted an invasion of Egypt and were repulsed. Some of them landed on the coastal region of Palestine, among them the *prst*. Egyptian orthography had no separate character to indicate the phoneme /l/, using either the character for *n* or that for *r*. Later evidence from Coptic indicates that the *l*-sound was present in Egyptian; hence the Heb. *p^{e}lešeṯ* suggests that the Egyptian word was pronounced something like **pilist* or **peleset*. The Peoples of the Sea, as these invaders have come to be known, were part of a migration of Indo-European peoples that occurred in the late 13th and early 12th cents. that greatly affected the history of the Near East. The tradition that CRETE (Caphtor) was one of their places of origin is preserved in the Bible in Am. 9:7 and Jer. 47:4 (cf. also Dt. 2:23). Cf. W. S. LaSor, D. A. Hubbard, and F. W. Bush, *OT Survey* (1982), pp. 119-122; *CAH* II/2 (3rd ed. 1975), 359-378, esp. 371-78. W. S. L. S.

PHILISTIM fil-is'tim, fil'ə-stim (Gen. 10:14, AV). *See* PHILISTINES.

PHILISTINES fə-lis'tinz, fil'ə-stēnz [Heb. *p^{e}lištî*, pl. *p^{e}lištîm*]; **PHILISTIA** fə-lis'tē-ə [Heb. *p^{e}lešeṯ*]. The people of the coastal plain of southern Palestine, generally from Joppa to Gaza, and portions of the adjacent foothills, from whom the name "Palestine" is derived.

  B. Patriarchal "Philistines"
  C. Conquest of Canaan and the Philistines

I. In the Bible.–*A. Names.* The Hebrew name *p^{e}lešeṯ*, "Philistia, Palestine," occurs only eight times in the OT. In the AV the word is sometimes translated "Palestine" (Joel 3:4 [MT 4:4]) or "Palestina" (Ex. 15:14; Isa. 14:29, 31), although the term "Palestine" did not come into common use until Herodotus (i.105; mid-fifth cent. B.C.). *See* PALESTINE. A preferable translation is "Philistia," which the AV uses in Ps. 60:8; 87:4; 108:9, and which is regularly used in the RSV. The gentilic, sing. *p^{e}lištî*, "Philistine" (used only of Goliath [1 S. 17:8, etc.] and of the one slain by Abishai [2 S. 21:17]), pl. *p^{e}lištîm*, "Philistines," occurs frequently (255 times, according to KoB, p. 764), referring to the people of that region. As a general rule the plural does not take the definite article, which may account for the translation into Greek as *allóphyloi*, "foreigners." The LXX sometimes translates with various forms, such as *Phylistieim*, "Philistia" (Ex. 15:14), and *Philistiaios*, "Philistines" (1 K. 17:23 A), or uses other names, such as *Gerara* (Gen. 26:8) or *Goliad* (1 K. 17:42 B). (Other versions [Aq., Symm., Th.] seem to prefer spellings with *upsilon* rather than *iota* [but not exclusively].) But in the great majority of cases, the LXX translates with forms of *allóphylos*, "foreign, foreigner, Gentile." The English use of the word "Philistine" to mean "one who lacks culture or esthetic refinement" and other pejorative ideas is supported neither by biblical nor extrabiblical data and should be abandoned.

In passages constructed with parallelism the Cherethites are mentioned with the Philistines (cf. Ezk. 25:16; Zeph. 2:5). In the prophetic messages the Philistines are connected with Caphtor (cf. Jer. 47:4; Am. 9:7). Both Hebrew words, *kᵉrēṯî* and *kaptôrîm*, are identified with Crete by modern scholars (see II.A below). David had a guard that included Cherethites and Pelethites (and also 600 Gittites, or men from Gath, 2 S. 15:18); since "Cherethites" seems to mean "Philistines," and Gath was the site of one of the Philistine rulers, it seems reasonable to assume the Pelethites were also in some way related to the Philistines. It would follow that David had come to know these men and had drawn them to him during the time that he was associated with Achish king of Gath (1 S. 27:3).

B. Territory Defined. In Josh. 13:3 the Lord tells Joshua of the land remaining to be conquered: "all the regions of the Philistines, and those of the Geshurites (from the Shihor, which is east of Egypt, northward to the boundary of Ekron, it is reckoned as Canaanite; there are five rulers of the Philistines, those of Gaza, Ashdod, Ashkelon, Gath, and Ekron), and those of the Avvim, in the south, all the land of the Canaanites." This passage has some difficulties, but the general meaning is clear. The Shihor has been identified with Pelusiac (i.e., the easternmost branch of the Nile. According to Dt. 2:23 the Avvim were the occupants of the southern part of the region (including Gaza), whose villages had been destroyed by "the Caphtorim, who came from Caphtor," who then settled in the same area. The Geshurites were probably a tribe in the south, which had been there "from of old" in the region "as far as Shur, to the land of Egypt"; at any rate, David conducted raids on them, as well as on the Girzites and the Amalekites, when he was located in the country of the Philistines (1 S. 27:8). The five cities mentioned are often called "the Philistine pentapolis"; Gaza was the southernmost, and Ekron (if the identification with Khirbet el-Muqenna' is accepted) the northermost. Ashkelon alone was on the Mediterranean coast; Gaza and Ashdod were on the Via Maris, which, because of the sand dunes, was located from 4 to 6 km. (2.4 to 3.6 mi.) inland from the sea. The locations of Gath and Ekron have long been disputed; current scholarship tends to identify them with Tell eṣ-Ṣâfî and Tell el-Muqenna', respectively, at the eastern edge of the coastal plain where it joins the foothills (the Shephelah).

There were many other Philistine locations, some of which will be discussed below (II.B), and the OT mentions a number of "wars" or military campaigns in various places, suggesting that the Philistines at various times extended their control as far north as Beth-shean and Mt. Gilboa (1 S. 31:1) and into the Shephelah to Michmash and Aijalon (14:31), and indeed even to the vicinity of Jebus (Jerusalem) (2 S. 5:17). The portion of Palestine that is commonly called "the Philistine plain" (*see* PALESTINE IV.A.1) is a satisfactory identification of the region occupied by the Philistines.

C. In the Patriarchal Period. Genesis 21 gives an account of a dispute over water rights between Abraham and Abimelech. The location was on the edge of the Negeb at a place thereafter known as Beer-sheba (v. 31). When the dispute was settled, Abimelech and Phicol the commander of his army "returned to the land of the Philistines" (v. 32). It is also recorded that "Abraham sojourned many days in the land of the Philistines" (v. 34). Clearly, Abimelech was a man of authority, probably the king of a city-state, and "the land of the Philistines" included the region around Beer-sheba. The problems of reconciling the date of this dispute with the earliest known presence of Philistines in the area will be discussed below (III.B).

According to Gen. 26:1 "Isaac went to Gerar, to Abimelech king of the Philistines," because there was famine in the land. This famine is distinguished from that which occurred in the days of Abraham (26:1), and in the sequence of events as presented in chs. 21–25 it is unlikely that it is the same Abimelech (however, the commander of his army was also called "Phicol"). We note that Abimelech is called "king" (Heb. *melek*), which is not the title used of the "rulers" (*sᵉrānîm*) of the Philistine cities. Gerar is on the eastern edge of the coastal plain between Gaza and Beer-sheba. Isaac dwelt at Gerar and prospered, although the wells which Abraham had dug had been stopped up by the Philistines (26:15). Finally, Abimelech said to Isaac, "Go away from us; for you are much mightier than we" (26:16). In the ensuing events Abimelech followed Isaac even to Beer-sheba, which thus may have been part of the Philistine region.

These are the only two texts that mention the Philistines in the patriarchal period. In both accounts the "Hittities" also are mentioned (23:3-20; 26:34), further complicating the chronological problem.

D. At the Time of Occupying the Land. Exodus 23:31 makes a passing reference to "the sea of the Philistines," but the next time the Philistines come into the biblical story is in connection with the occupation of the land of Canaan. "The regions of the Philistines" were named as part of the land that remained to be possessed (Josh. 13:2). A similar statement is found in Jgs. 3:1-3, where the Philistines, among others, are for "a testing of Israel, to know whether they would obey the commandments of the Lord" (Jgs. 3:4; cf. 10:6-11). Again we note that the Hittites are also mentioned (3:5).

The five Philistine cities are named and the five "rulers" are mentioned in such a way as to suggest that they were the only Philistine rulers. The Hebrew word is *sᵉrānîm* (used only in the plural), translated "rulers" in Josh. 13:3, but "lords" in Jgs. 3:3, RSV; it is used only of Philistine rulers (cf. Jgs. 16:5; 1 S. 6:16-18; a total of 21 times in the MT). It is generally thought to be a loanword, related somehow to Gk. *týrannos*, but the chain of relationship is not clear.

E. During the Monarchy. Intermittent warfare with the Philistines continued from the time of the occupation of Canaan until David was able to subdue this enemy, although the only references prior to the time of King Saul are, as we have seen, in Josh. 13 and Jgs. 3 and 10. The tribal allotment of Dan was originally in the Shephelah and the plain, including the cities occupied by the Philistines (Josh. 19:40-46), but the Danites were forced out by the Amorites (Jgs. 1:34), who were probably pushed from their former territory by the Philistines, and Dan subsequently located in the extreme north (Josh. 19:47f.).

The Philistines are introduced again in 1 S. 4: "Now Israel went out to battle against the Philistines; they encamped at Ebenezer, and the Philistines encamped at Aphek" (v. 1). The Israelites were defeated, and someone suggested that they take the ark of the covenant into battle (v. 3). But the Philistines were again victorious and even captured the ark (v. 11), which was taken to Ashdod and placed in the temple of their god Dagon (5:2). On the following day the figure of Dagon was found face downward on the floor (v. 3). After a series of terrifying events the people of Ashdod sent the ark to Gath (v. 8). Again, the results caused the people to send the ark to Ekron (v. 10), then to Beth-shemesh (6:12, 14), where there were Israelites. From there it was transferred to Kiriath-jearim where it remained for some twenty years (7:1f.). The Philistines were subdued, and the Israelites recaptured cities which had been taken "from Ekron to Gath" (v. 14). If we accept the suggestion of B. Mazar, this Gath was in the northern Shephelah, possibly the Gittaim of 2 S. 4:3 (Ras Abū Ḥumeid, near Gezer) or the Gath-padalla in the Sharon plain inland from Caesarea (cf. Ch. 7:21; *see* GATH III; but see also Aharoni, *LBHG,* rev., p. 382 n. 68, who suggested the possibility that it was Philistine Gath), hence the recovered cities lay in the region north of the Philistine pentapolis (*GTTOT,* § 659, p. 309).

Samuel called for a national repentance, that the Lord might "save us from the hand of the Philistines" (1 S. 7:8). But the people wanted a king (8:66). Samuel received a revelation from the Lord that "a man from the land of Benjamin" would save Israel from the hand of the Philistines (9:15f.). Saul became king, but he was unable to subdue the enemy; rather, his reign was marked by many small wars with the Philistines: at Geba (13:3); with three raiding parties from Michmash (13:17); "beyond" Beth-aven and "from Michmash to Aijalon" (14:31); between Soco and Azekah (17:1), a battle which was climaxed by the single-combat encounter of David and Goliath (17:8f.) and the Israelites' pursuit of the Philistines "as far as Gath" and Ekron (17:52); at Keilah (23:8); and finally at Shunem and Gilboa (28:4), where Saul and his three sons lost their lives (31:8). Although the biblical account records repeated victories over the Philistines, it is clear that these were local skirmishes, for the Philistine menace continued throughout Saul's reign.

David's first encounter with the Philistines took place during Saul's reign, in the valley of Elah, where he killed Goliath (17:50). Following this stirring victory, he led Israelite forces against the Philistines with such success that Saul became jealous (18:7-9). As a result David became a political refugee who finally took asylum in Gath along with "the six hundred men who were with him" (27:2f.). It is reasonable to assume that his time with the Philistines, together with his raids on Israel's enemies to the south (27:8f.), prepared him to deal effectively with the Philistines when he became king of Israel.

David was at first king of "Judah," probably meaning the enlarged tribe that had absorbed Simeon, and located his capital at Hebron (2 S. 2:1-4). Since that region was controlled by the Philistines (or so the records seem to imply), it is possible that this step was taken with the consent of the Philistine rulers. But, when the Philistines received the news that David had been made king of Israel and had located his capital in Jerusalem, they moved against him (5:17). David's first victory (v. 20) was apparently inconclusive, and the Philistines again came to the valley of Rephaim (v. 22). This time David's forces routed them, and smote them "from Geba to Gezer" (v. 25). During the following months (and years?) a number of Philistines gathered around David: the Cherethites and Pelethites, as well as the six hundred men from Gath (15:18). We note again that the "Hittites" come into the story (1 S. 26:6; 2 S. 11:6; 24:6). If the Philistines had been subdued, they were not yet completely beaten, for there were wars with them at an unnamed location (2 S. 21:15), at Gezer (1 Ch. 20:4; 2 S. 21:18 reads "Gob"), at Gob (2 S. 21:19, where Elhanan the Bethlehemite slew Goliath the Gittite), and at Gath (21:20), where there was a hexadactylic giant who was slain by Jonathan the son of Shimei (21:21). The account in 2 S. 21 presents a number of difficulties, as a study of the commentaries on this passage will show. There are also accounts of skirmishes with the Philistines at Lehi (2 S. 23:11) and at Bethlehem (24:14).

F. After the Division of the Monarchy. Since there is no record of conflict between the Philistines and the Israelites under Solomon, it is often asserted that David brought an end to the Philistine power. Some would date this to the victory recorded in 2 S. 5. If they were not a serious threat, however, the Philistines were still a hostile force.

Gath was apparently a vassal state. The term *seren,* "tyrant, ruler," is no longer used, but instead Achish is called *melek,* "king" (1 K. 2:39). Gezer had been taken by an Egyptian pharaoh and given as dowry to his daughter, Solomon's wife (9:16f.). Among the cities which Rehoboam (931-913 B.C.) fortified, Gath is named (2 Ch. 11:8; but *see* GATH II. B. 2, where A. F. Rainey holds that this should be read as Moresheth-gath), but these were later (*ca.* 928) captured by Shishak of Egypt (2 Ch. 12:2-4). Baasha assassinated Nadab of Israel (*ca.* 909) at Gibbethon, "which belonged to the Philistines"; Nadab had been besieging the city (1 K. 15:27), hence it must have been an enemy enclave. Israelite troops were encamped at Gibbethon at the time of Omri's coup (*ca.* 880; 1 K. 16:15), and again it is recorded that Gibbethon "belonged to the Philistines," possibly implying that the Israelite troops were there to keep peace. Some Philistines paid tribute to Jehoshaphat king of Judah (*ca.* 873–848; 2 Ch. 17:11), and in the days of Jehoram (*ca.* 853-841) a coalition of Philistines and Arabs invaded Judah and carried off the king's possessions, sons, and wives (2 Ch. 21:16f.). This coalition continued to be powerful until the days of Uzziah (*ca.* 767-740), who made war on the Philistines, broke down the walls of Gath, Jabneh, and Ashdod, built cities in Philistine territory, and subdued the Philistines and the Arabs (2 Ch. 26:6f.).

The Philistines are included in prophetic messages. Amos (*ca.* 753) proclaimed a word of the Lord against the cities of the Philistines: Gaza, Ashdod, Ashkelon, and Ekron, "because they carried into exile a whole people to deliver them up to Edom" (Am. 1:6-8). In the fourth year of Jehoiakim (*ca.* 605) Jeremiah uttered a prophecy that included "all the kings of the lands of the Philistines," naming Ashkelon, Gaza, Ekron, "and the remnant of Ashdod" (Jer. 25:20). Zephaniah (7th cent.) prophesied against the Philistine cities of Gaza, Ashkelon, Ashdod, and Ekron (Zeph. 2:4), and declared woes against the "inhabitants of the seacoast," the "nation of the Cherethites," "Canaan, land of the Philistines," and mentioned again Ashkelon (Zeph. 2:5-7). Zechariah (6th cent.) delivered an oracle that included "the pride of Philistia," naming Ashkelon (twice), Gaza (twice), Ekron (twice), and Ashdod (Zec. 9:5-7). It is noteworthy that Gath is not mentioned in these prophecies, from which it may be inferred that Gath ceased to be of any major significance after the time of Uzziah (cf. Am. 6:2, where Gath is included among places that have been ruined). In Assyrian records, likewise, Ashdod, Ashkelon, Ekron, and Gaza are named, but Gath does not appear; thus Sennacherib (705-681): "Ashdod, Ashkelon, Ekron, and Gaza"

(ARAB, II, § 312); Esarhaddon (681-669): Gaza, Ashkelon, Ekron, and Ashdod (*ARAB*, II, § 690); and Ashurbanipal (669-627): Gaza, Ashkelon, Ekron, and Ashdod (*ARAB*, II, § 876). Within the next few centuries the location of Gath had become unknown.

II. In Extrabiblical Sources.–Because the biblical accounts of the Philistines do not everywhere agree with data from extrabiblical sources, it seemed wise to separate the two in this article and thus avoid a constant interplay of the two sources or interruptive attempts at harmonization.

A. Documentary Evidence. In the Table of Nations (Gen. 10) Mizraim (Egypt) is named as the father of (among others) Casluhim (whence came the Philistines) and Caphtorim (v. 14). Some scholars perceive a textual dislocation here, and assert that the parenthetical statement about the Philistines should follow "Caphtorim" (cf. *BHS*). This would bring the statement into agreement with Am. 9:7, "Did I not bring . . . the Philistines from Caphtor . . . ?" The Caphtorim are mentioned as those who displaced the Avvim in Dt. 2:23, and the Philistines are called "the remnant from the coastland of Caphtor" in Jer. 47:4. The location of Caphtor, however, for many years was not certainly known.

Some have tried to identify the Philistines with the Pelasgians who were originally from the region of the Hellespont and then invaded Greece (Herodotus i.57; ii.51). This suggestion gave way to others: the Philistines originally came from Crete, or Cyprus, or a coastal region of Asia Minor (in articles published from 1913 to 1956 G. A. Wainwright maintained that Crete/Keftiu was in Anatolia; cf. *CAH*³, II/2, 969, IV.19-23.) The question seems to have been settled by a topographical list of Amenhotep III *ca.* 1400 (cf. J. Vercoutter, *L'Égypte et le Monde Égéen Préhellénique* [1956], pp. 40ff., 407, 417), and many scholars now accept the identification with Crete. Egyptian "Keftiu ships" carried on commerce with Cyprus, Cilicia, Crete, Ionia, Aegean islands, and perhaps mainland Greece as early as the days of Thutmose III (1482-1450) (*CAH*³, II/1, 387).

In an Ugaritic text concerning the abode of Kotharwa-Ḫasis, the god of artisans, the word *kptr* occurs: *kptr ksu ṯbth ḥkpt arṣ nḥlth*, "Caphtor is the throne of his sitting, *Ḥkpt* the land of his inheritance" (*UT*, 'nt VI:14-16). The passage seems to preserve a memory of a connection with Crete as the home of their crafts; *Ḥkpt* may be another name for Crete or one of its regions. Economic texts from Mari speak of *Kaptara*, and an Akkadian text from Ugarit refers to ships arriving from *Kapturi*. C. H. Gordon had raised the question whether the words *kpt-r* and *ḥ-kpt* may include some morphological elements, a preformative *ḥ-* and a sufformative *-r*, leaving *kpt* as the basic word (*Ugaritic Literature* [1949], p. 23 n. 1), and relating this to Egyptian *kft-yw*. But the persistence of *r* in Hebrew, Akkadian, and Ugaritic forms, plus the fact that final *-r* could become *-yw* by phonetic decay (*see* CAPHTOR II), rather support *kptr/kftr* as the original word. This would be further supported by the parallelism of Cherethites (Heb. *kᵉrēṯî*, "Cretan") and Philistines in Zeph. 2:5, and by the inclusion of Cherethites along with the men of Gath among David's guard (2 S. 15:18).

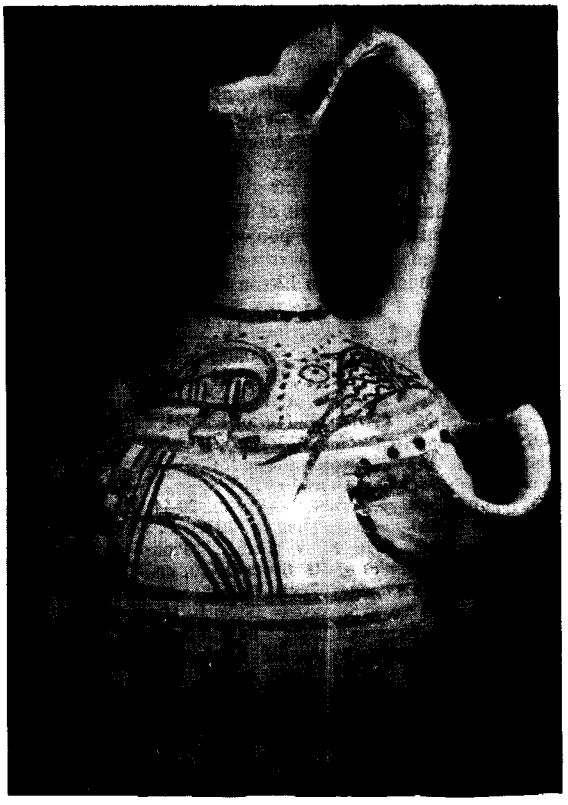
Merneptah (*ca.* 1224-1214) recorded an attempt of Libyans and the sea-peoples to invade Egypt from Libya in his fifth regnal year. He mentioned the Sherden, Sheklesh, Tursha, and Akawasha, but does not name either the Philistines or the Tjekker.

In the Great Harris Papyrus, Ramses III (*ca.* 1182-1151) boasts of extending the frontiers of Egypt and overthrowing them that had attacked: "I slew the Denyen in their islands, while the Tjeker and the Philistines were made ashes. The Sherden and the Weshesh of the Sea were made nonexistent" (*ANET*, p. 262; J. Breasted, *Ancient Records of Egypt, IV* [1907], §§ 403f.). History gives the lie to the gross exaggerations of this claim. A relief on the mortuary temple of Ramses II at Medinet Habu has an account of the attempt of the sea-peoples to invade Egypt (cf. A. Gardiner, *Egypt of the Pharaohs* [1961], pp. 282-87, fig. 11). They were repulsed, and some of them landed on the shore of Djahi (which included Phoenicia and Palestine). Among these sea-peoples were the *prst* (Philistines), *ṯkr* (Tjekker), *škrš* (Shekelesh), *dnyn* (Denyen), and *wšš* (Weshesh). It is well-known that Egyptian, lacking an orthographic representation of *l*, used either *n* or *r* to represent the sound (*see* EGYPT V.E), hence *prst* would be used for **plst*. The different peoples are distinguishable by their headdresses: a Philistine warrior is represented wearing a "feathered" headdress, consisting of a leather cap and a headband with curving strips standing upright, variously identified as feathers, reeds, leather strips, or "some bizarre hairdo" (see *ANEP*, no. 7; cf. Dothan, *Biblical Archaeology Review*, p. 26).

The Onomasticon of Amenemope, dated to the end of the reign of Ramses IX (1134-1117), names Ashkelon, Ashdod, and Gaza, and then mentions three sea-peoples, Shardana, Tjekker, and Philistines (cf. *CAH*³, II/2, 378 n. 1; A. Gardiner, *Ancient Egyptian Onomastica* [1947], p. 1). The Tale of Wen-Amon (*ca.* 1050) locates the Tjekker at Dor, on the coast S of Mt. Carmel, where excavations have been conducted. The Sherden may have been located at Akko (Dothan, *Biblical Archaeology Review*, p. 44).

In an inscription Adadnirari III (810-783) claims he imposed tribute upon many peoples, including Israel (the land of Omri), Edom, and "Palestine (*Pa-la-as-tu*), as far as the shore of the Great Sea of the Setting Sun" (*ANET*, p. 281). In addition to references in the records of Sennacherib, Esarhaddon, and Ashurbanipal mentioned above (I. F), Philistine cities are named in the inscriptions of Tiglath-pileser III (747-727; cf. *ANET*, pp. 283f.), Sargon II (721-705; *ANET*, p. 286; Gath is mentioned, if *Gi-im-tu* is properly interpreted), and Nebuchadrezzar (605-562; *ANET*, p. 308). In an Aramaic papyrus found at Saqqârah a Philistine ruler pleads for help against Nebuchadrezzar (*CCK*, p. 28 and n. 5).

B. Other Archeological Evidence. Earlier scholars' statements that Philistine remains were rare now have to be corrected. Philistine remains from very many sites have been recovered. (See map of principal sites in Dothan, *Biblical Archaeology Review*, p. 27, marking some 44 locations.) But the most important of all archeological discoveries, namely, texts with which to interpret the finds, have not yet been found. A stamp seal with characters similar to Cypro-Minoan script was recovered at Ashdod, and a number of clay tablets were found at Tell Deir ʿallā (Succoth?) in the Jordan Ghor, about 36 km. (22 mi.) SSW of Beth-shean, written in a similar script. Some scholars have tentatively called this "Philistine." On the reliefs on the mortuary temple of Ramses III at Medinet Habu the Philistines can be distinguished not only by their headdress but also by their dress, consisting of a corselet of leather or metal over a shirt and a short panelled kilt with hem and tassels (cf. *CAH*³, II/2, 373). Military chariots were manned by a driver and two warriors, had six-spoked wheels, and were drawn by two horses. The infantry fought in phalanxes of four men each, three of them armed with a long, straight sword and a pair of spears, and the fourth with only a sword. All carried round shields. The Philistine camp included not only the chariotry and infantry, but also civilians, men, women, and children, who traveled in two-wheeled carts drawn by four oxen. Philistine ships are



PHILISTINES

also portrayed, single-masted and with only steering-oars. Both the chariots and the ships are similar to those of the Egyptians (cf. A. Gardiner, *Egypt of the Pharaohs* [1961], pp. 282-87; Dothan, *Biblical Archaeology Review*, pp. 24-26).

Of the Philistine pentapolis only Ashdod has been thoroughly excavated, although Gaza and Ashkelon are definitely identified, and Ashkelon has undergone considerable excavation. At Ashdod the Egyptian-Canaanite fortress of level XIV was destroyed and replaced by a Philistine community (level XIII) which included a potter's workshop and locally made Mycenaean III C1 pottery. This type of pottery is found at a number of Philistine sites, as well as at sites in the Aegean and the Mediterranean, and is clearly indicative of a marked cultural change between Mycenaean II (LH [Late Helladic] II) and Mycenaean or LH III. It also marks the end of the Bronze Age. Levels XII and XI present a Philistine city with two building complexes divided by a street. A gold disk of Aegean style and seals in a type of orthography resembling Cypro-Minoan were found, and a figurine which is the earliest known Philistine cult goddess, now called "Ashdoda," with similarities to figurines of the "Great Mother" of Mycenaean sites. The latest level at Ashdod (level X) is dated *ca.* 1050 B.C. (shortly before the beginning of Saul's reign) and is the largest and most prosperous, with a lower city outside the acropolis, and pottery that shows assimilation into the local types.

At Tell el-Qasîleh on the Yarkon (Nahr el-ʿAujā), just N. of Tel Aviv, a Philistine city was founded in the early part of the 12th century. Three temples were superimposed in levels XII-X, the first clearly Philistine temples to be discovered. These temples are unlike any discovered in Canaan and show similarities to temples found at Kition (Cyprus) and at Mycenaean sites on mainland Greece and on the island of Melos. A buried cache of cult vessels was found in a pit in the level XI temple.

Philistine painted jug with a strainer spout. From a tomb at Tell el-Fârʿah (Sharuhen) (12th cent. B.C.) (Israel Department of Antiquities and Museums)

Philistine pottery: painted jug and stirrup cup with geometric designs (University Museum, University of Pennsylvania)

It has been commonly believed that the Philistines brought iron metallurgy to Canaan and maintained a strict monopoly (cf. *CAH*^{3}, II/2, 516). This was based largely (if not entirely) on 1 S. 13:19-21, although iron is not mentioned in that passage. There are, however, statements concerning iron tools at earlier periods, and in Josh. 17:16 the "Canaanites of the plain" appear to be Philistines with iron chariots (cf. Jgs. 1:19). Archeological discoveries include tools and weapons made of iron dating back to mid-third millennium (*see* IRON). Excavations of Philistine sites in Palestine have uncovered no evidence of iron metallurgy, nor even any substantial amount of iron (*LBHG*, rev., p. 274). The metallurgy of iron was an Anatolian (Hittite or pre-Hittite) craft, and the Philistines were probably more closely related to the Aegean than to Anatolia.

Anthropoid coffins that had been identified as "Philistine" are now known to have been introduced by an Egyptian for the burial of an Egyptian officer. The method was taken over by Philistines and adaptations were made.

Philistine pottery, like other cultural items, shows a gradual assimilation to local customs. The earliest was Mycenaean IIIC, although tests on the clay from which it was made indicate that it was of local origin. But later pottery has elements of Egyptian and Canaanite pottery.

Similarly, the Philistine cult gives evidence of a goddess like the mother-goddess of the Aegean region, but there are also evidences of the worship of several male and female deities of the Canaanite region, including Dagon, Ashtaroth, and Beelzebub.

III. Synthesis.–A. Overall View. It is premature to attempt to write a history of the lands of the eastern Mediterranean in the latter half of the 2nd millennium. What is clear, however, is that there was widespread migration, whether willing or forced, whether caused by military or socioeconomic events, or perhaps a combination of several factors. There are even attempts to link the collapse of the Late Bronze Age in Greece and Anatolia with a major climatic change or the volcanic eruption of Santorini (Thera) and a resulting tidal wave (cf. R. Carpenter, *Discontinuity in Greek Civilization* [1966]; L. Pomerance, *Final Collapse of Santorini [Thera]* [1970]).

The Hyksos had invaded the eastern delta of Egypt, and after a century or more their dominance had come to an end and the 18th Dynasty was established. At approximately the same time, there was a transition from Middle Bronze, Middle Minoan, and Middle Helladic to Late Bronze/Minoan/Helladic, pottery and other remains indicating a notable cultural difference in the relative regions. LH I was contemporary with the coming of the Achaeans (i.e., the Greeks or Mycenaeans) to the Greek Peloponnesus from Asia Minor; LM I was marked by the destruction of Phaestos and Hagia Triada on Crete. Shortly thereafter Knossos was destroyed, and the use of Linear A writing came to an end. The Hittites were on friendly terms with the Aḫḫiyawa, considered by many to be the Achaeans (a name the Greeks often used for themselves; cf. ACHAIA). But the Mycenaeans (or Greeks or Achaeans) were in a process of conquest or relocation. Troy (level VIIA) was destroyed (the Trojan War of Homer's *Iliad*), Crete and Cyprus were invaded, there was a Mycenaean settlement at Ugarit, and similar settlements elsewhere are known. Just how much the Dorian invasion of Greece (probably from the north) was responsible for the sudden movements of population cannot yet be measured. Mycenae was destroyed, and the Mycenaeans fled. Hattusas (Boghazköy) was destroyed and the Hittite empire came to an end. Hittites fled eastward and subsequently reestablished the Syro-Hittite kingdom. Other places that fell included Miletus, Mersin, Tarsus, Carchemish, Ugarit, Açana, Sidon, and places on Cyprus. In several of these sites the discovery of Mycenaean IIIC pottery indicates a connection with the sea-peoples. It is clear that Mycenaeans, Hittites, Cretans, Cypriots, and peoples of other regions in Anatolia and the islands of the Mediterranean were all on the move. The cultural level is marked as LM[inoan] IIIC in Crete and LH[elladic] IIIC (or Mycenaean IIIC) in Mycenaean areas.

Merneptah records a victory in Libya in his fifth year (*ca.* 1223), in which there were sea forces from many places. Among those named are Lukka (Lycians) and Achawasha (Achaeans?), as well as others that may be identified with peoples in Anatolia or the islands (*CAH*³, II/2, 366-371). As noted above, Ramses II lists a number of peoples who tried to invade the eastern Delta. Evidence from places that had been conquered indicates that the invasion by sea was part of a larger movement that included an invasion by land — rather a migration, for the invaders were bringing with them their families and household belongings. When this population shift was complete, the Bronze Age would come to end and the Iron Age would be ushered in.

B. Patriarchal "Philistines." How do we fit the biblical references to the Philistines into this larger story? It is clear that the "Philistines" of the days of Abraham and Issac were not part of the great migration of the 13th and 12th centuries. But this appears to be the climax of population movements that had begun at least several centuries earlier, including the Amorites, the kingdom of the Mitanni, and the Asiatics who are known best as Hyksos. Two explanations are readily available (to dismiss the biblical accounts as anachronistic is to sidestep the problem).

(1) The Philistines of the patriarchal age may have been a people with a similar name — at least in translation. After all, the earliest reference to the Philistines of the 12th cent. is the Egyp. *prst*. It is an assumption that this was pronounced "pelest." Now, it is not impossible that an earlier people called "Palishti" lived in southern Canaan, and that the name was later transferred to the *prst*. Moreover, there seems to be an identification of the patriarchal Philistines with the Canaanites (note the interchange of "Philistines" and "Canaanites" in Josh. 13:2-4 and Jgs. 3:3; note also the expression "the Canaanites who dwell in the plain" [Josh. 17:16], almost certainly a reference to the Philistines, since they had chariots of iron). A similar statement could be made for the Hittites of the same period with even greater plausibility, for the name Ḥatti/Hittite properly belonged to the people who were displaced by the Indo-European "Hittites" (cf. HITTITES I.).

(2) The name may have been proleptic, i.e., a later author or editor simply used that name for the people who lived in the region later occupied by the Philistines.

C. Conquest of Canaan and the Philistines. It is also evident that the occupation of Canaan by the Israelites — whether we date it in the 15th or the 13th cent. — occurred at a time when the lands of the eastern Mediterranean were in turmoil. It would be misleading, however, to attempt to identify the Israelite migration with any one of the others (as, e.g., has frequently been done with Abraham's migration and that of the Amorites). The biblical accounts nowhere indicate that the Israelites moved from Egypt to Canaan as part of a larger population shift. On the other hand, it is likely that the general unrest provided a favorable time for the occupation of Canaan, since Egypt was not in a position to exercise any considerable authority over that region.

If we assume a fifteenth-century date for the "conquest of Canaan" (*see* EXODUS, DATE OF THE), this would allow the Israelites about two centuries in Canaan before the Philistine occupation. On the other hand, if we assume a thirteenth-century date, the Israelites would hardly have gotten settled in the land and have completed their tribal apportionments when the Philistines appeared on the scene. This seems to fit better with the descriptions in Josh. 13:1-7; 19:40-48; Jgs. 2:6-3:6.

But regardless of the date for the Exodus, the biblical account of the continuing conflicts between the Israelites and the Philistines fits well with what we know of the Philistines. The locations of Gaza, Ashkelon, and Ashdod are beyond dispute. Gath disappeared early from the scene, possibly in the days of Uzziah, and has not been positively identified at the time of writing this article. Ekron had revolted against Assyria in the days of Hezekiah and Sennacherib invaded the region (*ARAB*, II, § 240), obtained the release of Padi king of Ekron (who had been deposed by the people), restored him to his throne, and enlarged the territory. The identification of Khirbet el-Muqenna' with Ekron appears to satisfy both the location as described in the Bible (Josh. 15:10f.) and the size of the city as described by Sennacherib (*ARAB*, II, § 312), although some scholars still would identify Ekron with 'Aqir (cf. *CAH*³, II/2, 509 n. 3).

PHILO JUDAEUS fī'lō jo͞o-dā'əs. A Hellenistic Jewish philosopher in Alexandria.

I. Introduction
II. Life and Work
III. Some Leading Themes
IV. Significance

I. Introduction.–Philo of Alexandria, a contemporary of Jesus and the apostles, is the one Jewish author belonging to the Dispersion whose works have been preserved in any considerable quantity. Quite apart from the influence exercised by his writings on later Christian thought and exegesis, his works are a primary source of information for the Judaism of the Dispersion, for the ideas current in NT times, for the ways in which Jews of the period could react to the thought and culture of a predominantly gentile environment, and for the extent to which it was possible to harmonize the OT with Greek philosophy. At the same time, our lack of material for comparison makes it hard to say how far he is truly representative, how widely these ideas were shared. Even in Alexandria not every Jew would have had Philo's particular background and interests, and what was typical of Alexandria was not necessarily typical of the Dispersion as a whole. There is always a danger of making him more representative than he really was. On the other hand, it would be a mistake to regard him as an isolated figure. His references to his predecessors show that he stood in a tradition, while the appearance of some of his ideas in other writers, who probably would not have been influenced by his works, indicates that these ideas at least were widespread.

II. Life and Work.–The one fixed point for the chronology of Philo's life is the embassy sent by the Alexandrian Jews to Caligula in the winter of A.D. 39-40. Josephus wrote (*Ant.* xviii.8.1 [259f.]) that Philo was the leader of the delegation. Philo himself, in his account of the mission, implied that he was then fairly well advanced in years. Since he wrote at least two treatises after his return, however, he cannot have been a very aged man at this time. Accordingly, his birth is generally dated *ca.* 20-25 B.C., and his death *ca.* A.D. 45-50.

Philo belonged to a prominent and wealthy family in the Jewish community of Alexandria, of which his brother Alexander was a leading figure. Philo's nephew Tiberius Alexander was to carve out for himself a career in the Roman imperial service, including terms of office as procurator in Palestine and as prefect of Egypt. Little is known of Philo's own career, apart from the inferences that may be drawn from occasional hints in his writings.

It may be presumed that he received the normal training of a Jewish boy, but there is no indication that his knowledge of Hebrew, if he had any, was at all profound. He discussed the meanings of Hebrew proper names, but he both wrote and thought in Greek, using as his text the Greek version of the Jewish Scriptures. He could even speak of Greek as "our language." Certainly he had enjoyed a Greek education, in itself an indication of the standing of his family, since admission to the *gymnasium* appears to have been a privilege jealously guarded (see Tcherikover-Fuks, *Corpus papyrorum Judaicarum*, I [1957], 37ff., 60ff.). He was versed in Greek history and literature and familiar with the philosophers, although here it is open to question whether his knowledge was really profound or based on the epitomes of the doxographers. For the rest, he appears as a man of scholarly tastes and reflective turn of mind, drawn almost against his will into the world of practical affairs; yet he was no recluse. Although he expressed his distaste for political activity, his writings reveal his keen and observant interest in and appreciation of the varied aspects of the busy life of the city.

Alexandria at this period was the intellectual capital of the ancient world and also the home of one of the largest Jewish communities in the Dispersion. The relations between the Alexandrian Jews and their gentile neighbors were not, however, the best, as may be seen from Philo's own writings (cf. *In Flaccum*, ed. Box [1939]; *De legatione ad Gaium*, ed. Smallwood [1961]), and Alexandria was also one of the centers of anti-Jewish propaganda. This has an important bearing on the character of his work. Living as they did in a predominantly gentile environment, exposed daily to the attractions of Hellenistic culture, the Jews of Alexandria were constantly tempted to abandon their ancestral faith and conform to the customs of their neighbors. The case of Tiberius Alexander is significant, since he could not have held the offices he did without relaxing his observance of the Jewish faith. There were presumably others who, whether for the material advantages to be gained or because of the attractions of an apparently superior culture and philosophy, turned away from Judaism and became completely assimilated to their gentile neighbors.

From this point of view, Philo's writings can be seen as a defense of Judaism, designed to assure such Jews of the superiority of their own tradition and restrain them from apostasy. Whether the attraction was that of a mystery cult or that of Greek philosophy, Philo set himself to meet and overcome it by presenting Judaism as the true mystery, the true philosophy. The allegorical method of interpretation, itself taken over from the Stoics, enabled him to read his philosophy into the Scriptures. Passages that on the surface appear absurd or meaningless are shown to be the vehicles of a deeper truth. The philosophy of Plato, the numerical speculations of the Pythagoreans, and the ethics of the Stoics all are to be found in the inspired teachings of Moses; indeed, the Greeks borrowed all they knew from Moses. At the same time, this defense could also appeal to the Gentile, answering the slanders of anti-Semitism and seeking to convince him of the validity of the Jewish faith. Unfortunately it is not possible to say how effective Philo's work was from a missionary point of view. The preservation of his writings was due to the interest of Christian, not of Jewish, successors. There is no indication that his works exercised any lasting influence on Jewish thought, although this may be due to the deficiency of our sources; the material assembled by Goodenough (*Jewish Symbols*) seems to show that Philo's type of Judaism might have been more widespread and survived much longer than once was thought.

Philo was not, however, merely a propagandist. His works are on a different level from the fragments of Jewish literary propaganda preserved by Eusebius. He was also a deeply religious thinker with a strong vein of mystical piety running through his work. From this point of view the fundamental element in his writings is his firm and steadfast loyalty to Judaism, and this not only in theory but in observance. Although his allegorical method allowed him to present the characters and events of the Pentateuch as symbols of philosophical truths, he could also roundly condemn those who spiritualized the law at the expense of the observance of the letter (*De migratione Abrahami* 89f.). Pagan religion with its polytheism and idolatry he rejected, although he was well aware of the contemporary trends toward monotheism in pagan thought.

The mystery religions and their rites Philo mentioned only rarely, and always with contempt. It is therefore the more remarkable that some modern scholars have suggested that he transformed Judaism into a mystery

religion; but here attention must be paid to definition of the terms. That Philo should have transformed Judaism into one of the cults he so despised, even to present it as the true mystery, seems quite incredible; yet he used mystery terminology, spoke of initiation, regarded Moses as the hierophant who led men to the hidden meaning of the sacred utterances. The truth is that the term "mystery" and related words had long been used by philosophers, more or less figuratively, to describe their own teachings, the "mysteries" of philosophy. It is in this sense that Philo used the term, as he could also speak of Judaism as the ancestral philosophy of his people.

This means, however, that he was reading his Jewish Scriptures through Greek eyes. It is indeed not the least interesting and significant aspect of his writings that he was so completely hellenized and yet remained fundamentally loyal to Judaism. Athens and Jerusalem are often thought to be irreconcilable. It is suggested that all Jews were either hellenizing apostates or fanatical Zealots who would have no dealings with the gentile world, but Philo shows this rigid alternative to be wrong. As Goodenough put it, the two traditions were so blended in Philo's mind that debate as to whether he was more Jew or Greek has little meaning; "Philo's group was 'neither Jew nor Greek,' but a new creature in being both" (*Intro.*, pp. 10, 122). What marks him off from other "hellenizing" Jews is that for all his Hellenism he remained loyal to the faith of his fathers. Unfortunately we have no means of determining how many thought as he did, in Alexandria or in the Dispersion at large. So far as Judaism is concerned, the tradition he represents went into eclipse after the fall of Jerusalem in A.D. 70.

In philosophy Philo was not an original thinker, and Wolfson's description of him as "no mere dabbler in philosophy, but a philosopher in the grand manner" errs on the side of enthusiasm. Philo's thought is eclectic, drawing now upon one school, now upon another. The dominant philosophy of the time was the Platonizing Stoicism, or Stoicizing Platonism, commonly associated with the name of Posidonius of Apamea; and this philosophy Philo read between the lines of the OT. As Colson has said, if the ingenuity of his deductions is undeniable, so also is their fancifulness and even perversity, by the standards of sound exegesis. Within certain limits, however, there is justice in Wolfson's estimate: Philo's real contribution to the history of thought is his combination of Greek philosophy with biblical revelation, which prepared the way for the Christian Platonists of Alexandria, and through them for a whole tradition reaching down to the Middle Ages.

Philosopher, apologist, religious thinker, mystic, versed in Greek learning yet loyal to the Jewish tradition, Philo was clearly a man of many aspects. To single out any one of them as the norm would do him less than justice. When we recall the period in which he lived, a period that saw the dawn of the Roman empire and the birth of the Christian mission; when we consider the trends and currents of thought of the time, the meeting of East and West, the interplay of Greek philosophy and oriental religion, the maelstrom of contemporary syncretism, then we begin to appreciate his significance. Philo's writings provide important insights into these different aspects of the world into which the gospel came.

III. Some Leading Themes.—Philo was not a systematic writer. Nowhere did he present a detailed and comprehensive statement of his theories; nowhere did he develop a system of philosophy or of theology. Exegete rather than philosopher, expositor rather than systematic theologian, he was concerned to explain the Scriptures, and his ideas on any given subject have to be pieced together from isolated references scattered throughout his works. As might be expected, there are inconsistencies, even contradictions, in his statements, and it is sometimes difficult to say what he really believed. Thus summary accounts of his opinions are often subject to qualification. Some modern systematizations have owed almost more to their authors than to Philo himself.

On a number of points, however, the material is sufficiently abundant, and sufficiently consistent, to allow the formation of a fairly clear conception of his views. One notable feature is the almost complete neglect of the messianic hope, possibly in part the result of prudence in one who lived in a gentile city where anti-Jewish feeling was strong, but also the result of a spiritualizing of the expectation; the Messiah has become the philosopher-king, and the materialistic aspects of the hope have been transformed into symbols of moral progress. Israel's destiny lies not in conquest but in priesthood: the Jews are to the world at large what priests are to the state. It should be noted that Philo's primary concern was with the Pentateuch, not with the prophets or with apocalyptic. It is Moses, law giver, philosopher, priest, and king, who is the central human figure.

Philo's theology may be conveniently summarized under the traditional heads of God, the world, and man. Contemporary pagan thought, as already noted, was moving toward monotheism, and here we can see a certain convergence of gentile and Jewish belief. The Greeks, however, tended to think of God as immanent and impersonal, an abstract philosophic deity; and this introduced a certain duality into Philo's thought: he could speak not only of "Him who is" but also of "that which is"; or, like the Stoics, he could speak of "nature" when we should expect a reference to God. Greek influence thus introduced a tendency toward an impersonal conception of God, but here we must beware of forcing Philo into the categories of later thought. As Goodenough observed (*Intro.*, p. 87), the question of "personality" in God had not yet been raised, and Philo apparently saw no incompatibility between the abstract Supreme Being of philosophy and the personal God of Judaism. Both have their place in his thinking.

Another tension is that of immanence and transcendence. The Stoics thought of God as immanent in the world, and Philo had no doubt of God's care and concern for the world; yet as abstract Being God must be beyond and above the world. This tension Philo tried to resolve by his doctrine of the Logos and the powers: God's nature forbade contact with matter, so He made use of His powers instead. Though transcendent, God has filled the universe with Himself, by causing His powers to extend themselves throughout.

Alone, unique, and all-sufficient, God has no needs and is wholly exempt from passion of any kind; He alone enjoys perfect happiness and bliss. Plato in the famous passage *Timaeus* 28c had spoken of the difficulty of attaining to a knowledge of God, and in this Philo followed him. God is not apprehensible to the mind, save in that He exists; yet this is no reason for abandoning the search. Although God Himself needs no name, He has nonetheless vouchsafed it to the human race, and made it possible for the race to ascend toward Him. The search for God is itself felicity; to see that God is incapable of being seen is itself a boon. Here Philo's thought of course has OT links as well, but even this brief summary may serve to show the interaction of Greek and Jewish thought in his mind.

The world we know owes its creation to the goodness of God, and Philo roundly denounced the impious false-

hood of those who admired the cosmos rather than its Creator. In point of fact, a gulf is fixed between the world, which is material, and the transcendent God; only the immaterial is truly real. Again, God is the author of good only, and is not directly the cause of evil. To account for the origin of evil Philo had recourse to the theory of subordinate powers. The plural "Let us make" in Gen. 1:26 allowed him to infer that man was not made by God alone, but in part by lesser beings. The effect is to reserve to God the credit for what is good and perfect, but at the same time to remove from Him the responsibility for imperfection. Of these powers the chief is the Logos, the mediator between creature and Creator, at once the reason of God and the image of God and also the archetype of the human mind and the source and spring of noble conduct.

The first stage in the creation of the world is the formation of an intelligible universe. To describe this formation Philo used the analogy of an architect forming the plan of a city in his mind, before he ever sets it down on paper, much less begins to build. This intelligible universe is no other than the Logos of God when God was already in the act of creating; through the agency of the Logos the visible world came into being. The two stories of the creation of mankind in Genesis enabled Philo to go further: the man of Gen. 1, the image of God, is the Logos; the man of Gen. 2, who was molded from the dust, is a stage further removed, created "after the likeness," and an inferior copy. Philo's doctrine of man, however, is by no means uniform; Goodenough could speak of "what even in Philo is a surprising jumble of contradictions." Mortal with respect to his body, man is immortal with respect to his mind. He has in his mind the closest copy on earth of the eternal archetype. Yet even the perfect man, insofar as he is a created being, never escapes from sinning; and mind, the highest part of man, may be misled by pleasure into unhallowed union with sense. One clue here lies in earlier Greek philosophy: as Philo put it, there are two kinds of soul, one that is the intelligent and reasonable, and another that operates through the senses. When he spoke of "mind," he sometimes had one of these in view, sometimes the other. Elsewhere he used the Platonic figure of the charioteer and his horses. In short, he could use various Greek philosophical systems, as best suited his purpose.

The body is the tomb of the soul, and it is not possible for one whose abode is in the body to attain to being with God. The business of wisdom is to become estranged from the body and its cravings, for the body is wicked and a plotter against the soul, a composition of clay, a molded statue, carried as a corpse from birth to death. This disparagement of the body has obvious links with later Gnostic thought, but it would probably be wrong to reckon Philo a Gnostic, although he marks a stage in that direction.

Space does not permit discussion of other interesting aspects of Philo's works: his portrayal of the patriarchs as incarnations of the laws, his use of the symbolism of the high priest's robes, his mystical aspirations, the conception (apparently his own invention) of that "sober intoxication" which is divine inspiration. Nevertheless, the summary above may convey some idea both of his thought and of the influences that lie behind it. The rest is best learned from direct study of his writings. His works fill twelve volumes in the Loeb edition and are too numerous to mention individually. (For a survey cf. Goodenough, *Intro.*, pp. 30-51.) Most are devoted to exposition of an allegorical commentary on the Pentateuch, but there are also the two "political" works mentioned above and a treatise "On the Contemplative Life," which is interesting for its assessment of an ascetic group, the Therapeutae, who were in some ways akin to the Essenes.

IV. Significance.–When such early fathers as Clement of Alexandria and Origen sought to reconcile their Christian faith and Greek philosophy, they found in Philo one who had already prepared the way. Through the works of these and later fathers the Philonic tradition was to be continued for centuries. This in itself is enough to make Philo a significant figure in the history of thought. In addition he gives us glimpses into the mental climate of the NT period, shows us the ideas that were current, at least in certain circles, and the influences that were at work in the world to which the gospel came. He is thus important for the general background of NT times, although the very bulk of his writings, and the comparative absence of other material, exposes us to the danger of making him too much the mirror of his times. In particular he provides evidence, now confirmed by the Dead Sea Scrolls, that Judaism in the NT period was by no means so rigidly uniform as once was thought. Reconstructions based solely upon rabbinic sources may present a distorted picture, even though these sources may contain material very much older than the time of their own writing. Philo helps toward a balanced judgment.

Philo's influence on the Alexandrian Christian tradition is unquestioned; it can be documented by direct quotations in Clement and in Origen. The question of his influence on earlier Christian writers is, however, much more delicate. How early did the conditions become operative that prompted the Alexandrian synthesis of Christianity and philosophy? Justin, for example, had a Logos doctrine, but did he derive it from Philo? On at least one occasion he maintained a view that Philo had explicitly rejected, which suggests not a relationship of dependence but a common background of tradition.

In the NT itself the obvious links are with the Fourth Gospel, but here again the same holds good. There are numerous parallels, not merely in relation to the Logos (cf., e.g., C. H. Dodd, *Interpretation of the Fourth Gospel* [1953], pp. 54ff.); but do they reflect the influence of Philo's writings? At any rate, Philo could never have written "The Logos became flesh." Parallels are also to be found in Paul, but again a common background appears to be a more natural explanation than literary dependence. With Hebrews, however, the question is more open: not only are there parallels, but the style, the patterns of thought, the methods of exegesis all recall the Philonic. This would be the more interesting if Apollos, "born at Alexandria, an eloquent man and mighty in the scriptures," was in fact the author.

Philo's thought has points of contact with the second-century Gnostics, but it would probably be a mistake either to consider him a Gnostic or to ascribe Gnosticism purely to Philonic influence. Once again it is rather a matter of common background. Philo shows the mental climate in which Gnosticism could arise but was himself rather pre-Gnostic than Gnostic in the strict sense. In general, his works provide valuable insights into a range of aspects of ancient thought about which we should otherwise know nothing.

PHILOLOGUS fi-lol'ə-gəs [Gk. *Philologos*–'lover of learning']. A Roman Christian greeted by Paul (Rom. 16:15). He was possibly the husband of Julia and the father of Nereus, his sister, and Olympas. If so, this family may have formed the nucleus of a house church (cf. vv. 15b-16). Philologus was a common slave name, found frequently in Greek and Latin inscriptions, including those of the imperial household.

PHILOMETOR fil-ə-mē'tôr [Gk. *Philométōr*] (2 Macc. 4:21). *See* PTOLEMY VI.

PHILOSOPHY; PHILOSOPHER [Gk. *philosophía, philósophos*].

I. Background
A. Greek
B. Judaic
II. In the Bible
A. OT
B. NT
III. In Church History
A. Early Church
B. Middle Ages
C. Reformation
D. Modern Era
IV. Conclusion

I. Background.–A. Greek. Composed of the two words *phílos*, "love," and *sophía*, "wisdom," the noun *philosophía* and its cognates (*philósophos*, "lover of wisdom," and the verb *philosophéō*, "love wisdom") seem to have come into use in the 5th cent. B.C. Although the meaning "love of wisdom" remained the same, the understanding of what it entailed varied with the different schools of Greek thought. For the Sophists it meant the study of things with a view to practical insight. Plato saw in it a profound desire for truth, yet not without relation to educational and political action. Aristotle equated it with a methodical attempt to explain sensory reality. The Epicureans perceived true philosophy in culture fulfilled in detachment. The Stoics regarded it as a mastery of reality culminating in progress in right conduct. For Middle Platonism it was a developing likeness to God, sometimes achieved by the practicing of death. In the wisdom speculation of Hellenism, philosophy could also incorporate mythological elements. Thus salvation could be closely linked to knowledge, mediated in some cases by revelation, so that the goal of investigation was not scientific information but the grateful adoration of deity.

B. Judaic. Along lines similar to those of Hellenism in general, Hellenistic Judaism (e.g., in 4 Maccabees) could claim that Jewish faith and worship represented true philosophy. Philo developed this insight with his philosophical interpretation of the OT, though he stressed the superiority of biblical teaching to that of the philosophical schools. He certainly saw an integral relation between *philosophía* and *sophía*, but he also saw a distinction, for the former was simply the royal way to the latter, which could not be attained in any case without divine revelation. Josephus adopted a similar standpoint, but with a greater emphasis on the institutional aspect. Rabbinic Judaism found the rabbis engaged in many dialogues with Hellenistic philosophers. By and large, however, they made it their main concern to state the superiority of Jewish teaching, though they did not hesitate to incorporate appropriate insights from philosophy into their writings.

II. In The Bible.–A. OT. Four brief points may be made in relation to the OT. First, a great deal is said about wisdom, and it is obviously an object of earnest and affectionate search. Second, wisdom in the OT is plainly to be differentiated from the wisdom of Greek philosophy, for, while it has a similar if even more emphatic practical orientation, it has a theological root in the fear of God. Third, in the Greek translation of the OT (the LXX) the *philosophía* word-group plays no significant role. Fourth, in the LXX, terms and concepts from Greek thought are almost necessarily chosen to render certain Hebrew words in areas where the themes of Greek philosophy and OT teaching converge, but in general these terms and concepts derive their significance from the Hebrew originals rather than from Hellenic usage.

B. NT. 1. General. Written in Greek, and using the LXX as Scripture, the NT also unavoidably uses words and concepts with a Greek or Hellenistic background, although how far the authors were conscious of this is debatable. Forms of thought from the world of physics may thus be found in statements about God, Christ, and creation, as in Jn. 1:1-18; Col. 1:15-20; He. 1:3. Similarly, anthropological and ethical expressions occur in missionary preaching, as in Rom. 1:20; 2:15, in exhortation, as in 1 Cor. 9:24; 2 Pet. 1:5-7. Adoption of these terms, however, does not imply commitment to their philosophical content. The terms are vehicles for the presentation, elucidation, and application of a message which is independent of philosophy, in some sense antithetical to philosophy's principles, methods, and ideas, and incompatible with many of its systems, e.g., materialism or dualism (whether of soul and body or of opposing cosmic forces).

2. Specific. A detached, if not critical, attitude toward philosophy dominates the only NT use of the noun *philosophía*, in Col. 2:8: "See to it that no one makes a prey of you by philosophy or empty deceit, according to the elemental spirits of the universe, and not according to Christ" (cf. 1 Tim. 6:20; "what is falsely called knowledge"). Here, of course, the author was plainly not condemning all philosophy. He was specifically warning against the Colossian heresy with its apparent appeal to special insights and its imposition of special rules. Apparently the group under attack was trying to advance its cause either by claiming to be philosophy or by using philosophical concepts or methods. For this reason an element of "empty deceit" marked the enterprise, with which philosophy could be linked in this context. Resisting these techniques, however, the apostle implicitly differentiated the gospel from philosophy even if he did not repudiate philosophy as such. Christianity was certainly a form of *sophía* but it made no claim whatever to be *philosophía*. As the gospel of Christ, whom "God made our wisdom" (1 Cor. 1:30) and in whom "are hid all the treasures of wisdom and knowledge" (Col. 2:3), Christianity could often use similar words, but it built a totally different structure on a totally different foundation.

The use of *philósophos* in Acts 17:18 follows similar lines. The reference in "some of the Epicurean and Stoic philosophers" was obviously neutral as such. A distinction might also be discerned, perhaps, in the reaction to Paul's initial comments, for while one group (possibly the Epicureans) dismissed him as a "babbler," another (possibly the Stoics) saw in him "a preacher of foreign divinities." In the ensuing Areopagus address Paul made no attack on philosophy as such. Indeed, he proclaimed the general nearness of God and quoted a pagan author to the effect that all of us live and move and have our being in Him (17:28). Nevertheless, there was obviously an implied criticism of the philosophers when it came to the

knowledge and service of God. With all their intellectual searching they had neither found the true God nor prevented the idolatrous worship that characterized even such a cultural center as Athens. At the climax of his speech, therefore, Paul issued a call for repentance oriented to the risen and returning Christ, about whom the philosophers had nothing to tell, and for whom some of them at least could find no place (17:32).

III. In Church History.–A. Early Church. As educated people, especially those trained in philosophy, became Christians, they naturally tried to fuse their faith and philosophy, incompatible though these might have been in Scripture. Interestingly enough, the *philosophía* word-group played little part in Gnostic writings, except when Acts of Thomas 139 called philosophia, defined as love of God's wisdom, a cardinal Christian virtue. Tertullian was close to the mark, however, when he attributed the Gnostic perversion of the gospel, e.g., its dualism to a philosophical source (*De praescr. haer. 7*). More soberly, and with a claim to be true philosophers, the second-century Apologists adopted the method of philosophical discussion and made some equation of Christian and philosophical concepts, e.g., the Logos (Justin *Apol.* i.46; ii.13). Even Tertullian, although he rhetorically opposed Jerusalem to Athens, was prepared to use philosophical terms to belabor opponents with philosophical arguments and apparently to espouse a philosophical notion like the materiality of the soul.

Meanwhile Clement of Alexandria, himself a philosopher whose search had finally led him to Christ, took the bolder course of intentionally putting the gospel in philosophical rather than biblical terms and concepts in order to facilitate the work of evangelism and Christian education in cultured circles (*Misc.* vii.1.1). For philosophy, he believed, had been raised up by God as a schoolmaster to bring us to Christ (i.5.28.1-3). Clement recognized, of course, that Scripture is the first principle of Christian truth, that simple people may use a short cut to this truth, and that philosophy itself cannot lead to truth and salvation apart from the ministry of the Word and Spirit (vii.16.95ff.).

In the centuries that followed, as Christians trained in Greek and Hellenistic thought assumed theological leadership, philosophy continued to have an ambivalent status and to play an ambivalent role. On the one hand, it undoubtedly underlay the Trinitarian and christological heresies and infused some dubious elements even into the thinking of such orthodox masters as Augustine. On the other hand, it provided the terms and concepts, e.g., substance, person, and nature, which went into the formulation of biblically based orthodoxy, not only in theological treatises, but also in such credal affirmations as the Nicene Creed and the Chalcedonian Definition. The accuracy and appropriateness of such language, of course, are still subjects of theological debate.

B. Middle Ages. The outburst of theological activity usually designated Scholasticism brought perhaps the most ambitious of all Christian attempts to apply philosophy to the gospel. Anselm, adopting the principle of faith seeking understanding and inheriting some of the Platonism of Augustine, set out to demonstrate the rationality of such basic beliefs as the existence and nature of God (*Proslogion*) and the atonement (*Cur deus homo*). The rediscovery of Aristotle then produced a brilliant restatement of Christianity by Thomas Aquinas, who found a place for philosophical argument (the Five Ways) in his preambles, and then proceeded to discuss and present the historical dogmas with the aid of philosophical methods, terms, and concepts. Thomas, of course, recognized the limits of philosophy. Its proof of God is by no means indispensable, for it can lead only a few, with considerable difficulty, to the belief in God's existence that simple people may know by revelation alone. Furthermore, it cannot lead past this belief to a knowledge of God's nature and work. In all the great doctrines, it can supply the tools of interpretation or support, but the content must be taken from the authoritative tradition found primarily in Scripture and secondarily in the fathers and councils. Thus for Thomas, as for all the Schoolmen, exposition of Scripture formed the crown of theological endeavor. The later Nominalists (e.g., William of Occam) were, if anything, even more skeptical about the contribution of philosophy than Anselm and Aquinas. They used and sharpened its tools in the form of logical analysis, argument, and presentation, but they had little confidence in its ability to supply reliable content.

C. Reformation. Influenced by the revival of biblical studies which came with the Renaissance (cf. Erasmus and Reuchlin), the Reformers had an acute sense of the discrepancy between the language and methods, as well as the content, of Scripture on the one side, and those of philosophy and philosophical theology on the other. This led to a wariness toward philosophy which could even become pronounced hostility in Martin Luther, who spoke scathingly about Aristotle, had little but contempt for scholastic theologians, advised a quick study of philosophy (as a worthless skill) simply to achieve the ability to destroy it, and contrasted the philosophical view of creation and its mechanics with Paul's theology of a groaning but expectant creation in Romans 8 (*Luther's Works*[1972], XXV, 360ff.). Cranmer, too, consistently made it his aim in England to establish a biblically based doctrine and church life as distinct from the "sophistries" in which he had been "nozzled" and the resultant corruptions. His ally Ridley, while not unskilled in the use of logical forms, complained bitterly of the empty wranglings which passed for theology at the Sorbonne, devoting himself instead to an assiduous study of the NT in Greek. Calvin, with his humanist background, perceived some elements of truth in the writings of the great philosophers, but he could see no possibility of any knowledge even of God the Creator unless our weak or blinded eyes are assisted by the spectacles of Holy Scripture. When it came to a full knowledge of God and the self, he stated no less categorically than Luther that without God's Word and Spirit the greatest geniuses are as blind as moles. (*Inst.*1.1ff.; 2.2.12ff.). Zwingli, for all his high estimation of philosophers and his use of philosophical preambles, shared the same fundamental conviction, as may be seen from his harsh condemnation of medieval philosophizing in *The Clarity and Certainty of the Word of God* and his appeal to Scripture alone in *The Sixty-Seven Articles*. In general, the Reformers made two decisive changes in the relation between theology and philosophy. They established the primacy of Scripture with a new rigor and consistency and they evolved a new theological style which drew more directly on the content of Scripture.

D. Modern Era. Even in the later Reformation period, however, a revival of philosophical interest may be discerned, e.g., in the curriculum of the Geneva Academy under Beza, or the influence exerted by Petrus Ramus, who substituted his own logical system for that of Aristotle. During the 17th cent. Protestant theologians, both Lutheran and Reformed, developed a scholasticism of their own, in which they preserved the essential content of Reformation teaching but readopted philosophical styles of presentation and made a modest use of Aristotle and Descartes by way of preamble or basis. Once started, this trend proved difficult to check. It led on the one side to

the increasing rationalization of theology, as in the comprehensive system that Christian Wolff in Germany erected on a Leibnizian foundation, or in the attempted balancing of reason and revelation that Butler in England sought in his *Analogy*. It led on the other side either to an absorbing of revelation into natural religion, as in the English Deists or the German Neologists, or to an open break with revealed religion, as in the French Encylopedists. In the 19th and 20th cents., then, theology made it a primary concern to adapt Christianity to such varying philosophical movements as Romanticism (Schleiermacher), Idealism (Biedermann, the Cairds), Existentialism (Bultmann), and Evolutionism (Drummond, Teilhard de Chardin, and Whitehead). The two problems with all such reinterpretations, as perceived, e.g., by Karl Barth, are (1) that the biblical content does not fit naturally into these alien schemes, and (2) that by its very nature the biblical revelation resists the claim of philosophy to offer a comprehensive system of truth. Barth himself, of course, was willing to make use of philosophical terms and concepts from various sources, as the fathers and the biblical authors had done. He was also prepared to grant full recognition to philosophy as one of the humanities. But he would not commit himself as a theologian to any single philosophical system. Nor would he allow the equation or confusion of philosophy with divinity. Divinity, he believed, is possible only as God makes Himself known in His saving work and enlightens and restores darkened and fallen reason so that it will perceive and accept this revelation.

IV. Conclusion.—As the biblical data suggest, and the historical experience of the Church confirms, philosophy is to be approached and handled with a certain ambivalence. On the one hand, Scripture does not categorically invalidate philosophy, reject the philosophical quest as a way to faith, exclude philosophical terms and thought-forms, or rule out the possibility of putting the content of revelation in the vocabulary of other times and cultures as the task of proclamation demands. On the other hand, Scripture teaches plainly that full and true knowledge of God, self, and the world comes only by way of God's self-revelation, that the higher rationality of this self-revelation can be perceived only as reason is illumined by the Holy Spirit, that the restatement of this self-relevation must be firmly and finally controlled by the terms and concepts divinely selected for it in the written Word, and that the content of it must not be attenuated or altered by adjustment to human systems of thought with their various monistic or dualistic principles.

In the last analysis, of course, the biblical message involves a reinterpretation of its own. Judaism grasped this already with its insight into the true nature of wisdom. The NT took a further step with its equation of the divine wisdom and Christ. Christians may still find a place for classical or modern philosophy as an academic discipline. Even as they do so, however, they realize that for them philosophy itself has an added or new dimension. Love of Christ is the true philosophy which is indeed coterminous with Christianity itself. G. W. BROMILEY

1. The distinguished priest who was the son of Eleazar, the son of Aaron, the brother of Moses (Ex. 6:25; 1 Ch. 6:4, 50 [MT 5:30; 6:35]). Phinehas rose to prominence because of his righteous response to the apostasy of Israel at Shittim (Nu. 25). There at the last encampment before crossing the Jordan, Israel was seduced by Moabite and Midianite women to engage in cultic prostitution and to offer idolatrous sacrifices to the Baal of Peor. In His well-deserved wrath, the Lord sent a plague among His people in which 24,000 ultimately died. To avert His wrath, the Lord directed Moses to execute any of Israel's leaders who had been responsible for this sin and expose their corpses. But apparently before this purge could be implemented, atonement was made and the plague brought to a sudden end: Phinehas followed Zimri, the son of a tribal leader of Simeon, and Cozbi, the daughter of a prominent Midianite leader, into the tabernacle (Heb. *qubbâ*, RSV "inner room"; see F. M. Cross, "Priestly Tabernacle," in G. E. Wright and D. N. Freedman, eds., *Biblical Archaeologist Reader*, I [1961], 218f.) and put them to death. This he accomplished with a single spear thrust through Zimri and into Cozbi's belly with the obvious implication that they were caught in the very act of their ritual prostitution.

God rewarded Phinehas for his "cleansing" of the tabernacle by extending to him a "covenant of peace" that promised a lasting priesthood to his progeny (cf. the similar occasion of the promotion of the Levites in Ex. 32:25-29; later interpreted in terms of a covenant in Jer. 33:21; Mal. 2:4ff.). That the text does not explicitly record any conditions need not imply that this promise to Phinehas and his descendants was entirely unconditional (e.g., cf. the various accounts of the covenant with David in 2 S. 7; 1 Ch. 22:12; 28:7; also cf. the general principle of Jer. 18:7-10 and Ezk. 33:13-16). Furthermore, it is not clear from its wording that the original promise intended to restrict the legitimate succession of high priests solely to the house of Phinehas.

Nevertheless, from the biblical record, supplemented with the available extrabiblical evidence, it appears that Phinehas's progeny did enjoy a lasting priestly ministry and that, in particular, they also provided the succession of high priests from his own day down to the time of Eli (of the family of Ithamar according to 1 Ch. 24:3). This succession of high priests resumed with Zadok in the days of David (so 1 Ch. 6:1ff., 50ff.; see Olyan's discussion of Zadok's debated ancestry). And it continued down through Ezra (Ezr. 7:5) at least until 171 B.C. when Antiochus IV transferred the priesthood to Menelaus (2 Macc. 4:23; cf. Bruce, pp. 58f.).

Cross has offered a stimulating but still problematic challenge to the older documentary hypothesis, which assigned Nu. 25:1-5 to JE and vv. 6-18 to P (or some other late priestly source). He reinterprets Nu. 25 as a reflex of a later polemic defending the legitimacy of an Aaronic priestly family (though not exclusively descendants of Phinehas) against the presumed counterclaims of a Mushite priestly family (Cross, *Myth*, pp. 195-215). *See* PRIESTS AND LEVITES for further discussion.

In Nu. 31:6 Phinehas brings the articles of the tabernacle and signaling trumpets to aid in the battle against the Midianites that God declared to avenge the Baal-peor incident. Still later Phinehas led a diplomatic mission to the eastern tribes of Reuben, Gad, and the half-tribe of Manasseh (Josh. 22). Finally, in Jgs. 20:28 Phinehas ministered before the ark at Bethel.

The Abrahamic ascription (Gen. 15:6) in Ps. 106:30f. commemorates the zeal of Phinehas that brought an end to the plague: "This was credited to him as righteousness

for endless generations to come" (NIV; cf. also 1 Macc. 2:26, 54; 4 Macc. 18:12). Likewise, Phinehas is honored, at least indirectly, in Josh. 24:33, which states that his father Eleazar was buried on a hill (or town; so RSV) named after the son, "Gibeah of Phinehas in the hill country of Ephraim."

The striking commendation in the canonical tradition becomes extravagant praise in the intertestamental literature. Sir. 45:23-25 includes Phinehas in the list of famous men, extolling him as "third in glory" after Moses and Aaron. And the praise in the intertestamental literature becomes pure legend in the rabbinical period, where, for example, the Pseudo-Jonathan Targum asserts that twelve miracles accompanied Phinehas's act of zeal.

2. The younger son of Eli and brother of Hophni (1 S. 1:3). Phinehas and Hophni outraged the public conscience in their contempt for the sacrificial laws, which prescribe the priest's portion and insist that fat first be burned as the Lord's own portion (1 S. 2:12-17), and also for their seeming practice of cultic prostitution (1 S. 2:22). Scripture records Eli's feeble attempt to rebuke his sons, who totally ignored him (1 S. 2:22-25). The point is often missed, however, that Eli stands condemned not because he failed to use, say, the stronger measure of "the rod." (His sons were themselves fully grown and married!) Rather, Eli failed (perverting justice much as David would later do out of favoritism toward children) to exercise his proper judicial office as priest and execute his sons for their capitally punishable offenses. An unnamed prophet brought God's message of judgment, later confirmed by Samuel.

Sometime later, Hophni and Phinehas in their presumption took the ark into a doomed battle against the Philistines at Aphek and subsequently lost the ark and their lives to the enemy (1 S. 4:11). When this news was brought back to Eli, he too died, and the wife of Phinehas immediately went into labor and died after naming their son Ichabod, meaning "where is the glory?" (1 S. 4:21).

See also HOPHNI AND PHINEHAS.

3. The father of a priest named Eleazar (Ezr. 8:33; 1 Esd. 8:63). He, Meremoth, and others evaluated the silver and gold and other sacred articles that were returned to the temple under Ezra's leadership in their attempt to be sure that these all arrived safely. Some have taken this as a reference not to Eleazar's immediate father but to his remote ancestor, the great Phinehas mentioned in **1.**

PHLEGON fleg'on [Gk. *Phlegōn*–'burning']. A Roman Christian to whom Paul sent greetings (Rom. 16:14). His was a common name among slaves and freedmen.

PHOEBE fē'bē [Gk. *Phoibē*–'pure, bright, radiant'] (Rom. 16:1); AV PHEBE. A Christian woman who had a ministry at the church in Cenchraea (a port city 11 km. [7 mi.] E of Corinth on the Saronic Gulf), known only from Rom. 16:1f. Paul calls her an *adelphḗ* ("sister," indicating that she is a Christian) and a *diákonos* (RSV "deaconess"; AV "servant"; NEB "who holds office"). *Diákonos* may be a technical term referring to a fixed office (cf. RSV "deacon," Phil. 1:1; 1 Tim. 3:8, 12), or it may simply refer to services on behalf of the church community (cf. RSV "minister," Eph. 3:7; Col. 1:7; etc.; "servant," 1 Cor. 3:5; 1 Thess. 3:2; etc.). That an order of deaconesses existed by the early 2nd cent. is clear, but the NT nowhere else refers to such an order, except possibly in 1 Tim. 3:11. Nevertheless, one should not rule out the possibility that an ecclesiastical office is intended here.

Paul requested that the Christians in Rome (although some interpreters regard Rom. 16 as a separate letter sent to Ephesus, not to Rome) "help [*parastḗte*] her in whatever she may require from you," perhaps implying that she had a specific task to perform. Part of the motive for helping her is that she has been a *prostátis* (RSV "helper"; AV "succourer"; NEB "good friend") for Paul and many other Christians. The masc. *prostátēs* is often a technical term for a legal representative of a foreigner, which would suggest a person of wealth and status. But no evidence indicates that women could perform this legal function, and it is probably best to understand *prostátis* as "helper," corresponding to the "help" the congregation is enjoined to give her.

Phoebe probably carried the letter to Rome (if we assume that ch. 16 was originally part of this letter). She was likely a Gentile, as her name carries strong associations with the mythology of Apollos (Phoebus) and Artemis. The specific ways in which she helped Paul and many others remain a matter for speculation.

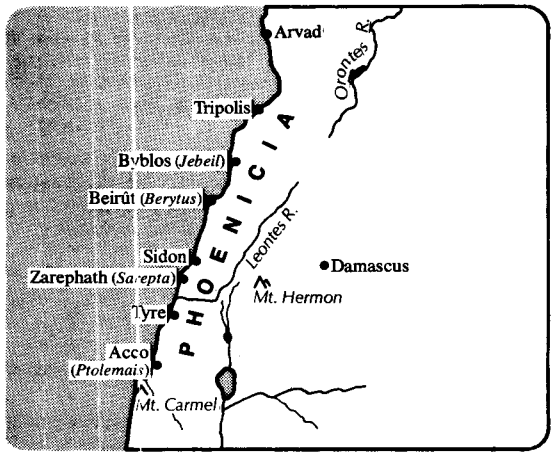
PHOENICIA; PHOENICIANS fə-nish'ə, -enz [Gk. *Phoinikē, Phoinikēs*–'purple-red']. A country at the eastern end of the Mediterranean, approximately where modern Lebanon is located, and the people of that country.



I. Name
II. Region
III. Language and People
IV. Demography and Economy
V. Commerce and Colonization
VI. Political History
VII. Religion

I. Name.–In modern historical use, Phoenicia designates the Syrian coast, and Phoenicians the Northwest Semitic inhabitants of that region in the period from 1200 B.C. to about the end of the Roman era. The words "Phoenicia" and "Phoenician" are Greek, attested certainly as early as Homer (J. Muhly, *Berytus*, 19 [1970], 19-66), therefore from the 8th cent., and still used in Acts 11:19; 15:3; 21:2. The terms are presumed to be connected with the word *phoínix*, which means "red-purple" (also "date palm") and is attested already in Mycenean documents of the 13th cent. (*po-ni-ki-ya* as determinative of a "purple" cart). The Greek word seems to be etymologically grounded in the Indo-European sphere (cf. *phónos*, "murder," and similar terms tied to the concept of "blood" or "red"). The terms "Phoenicia" and "Phoenicians" have not been traced to the languages of the ancient Near East, for the assonance of the Egyptian toponym *fnḫw*, which refers to an indefinable region in Syro-Palestine and is attested only in the Old Kingdom, is probably not phonetically correct.

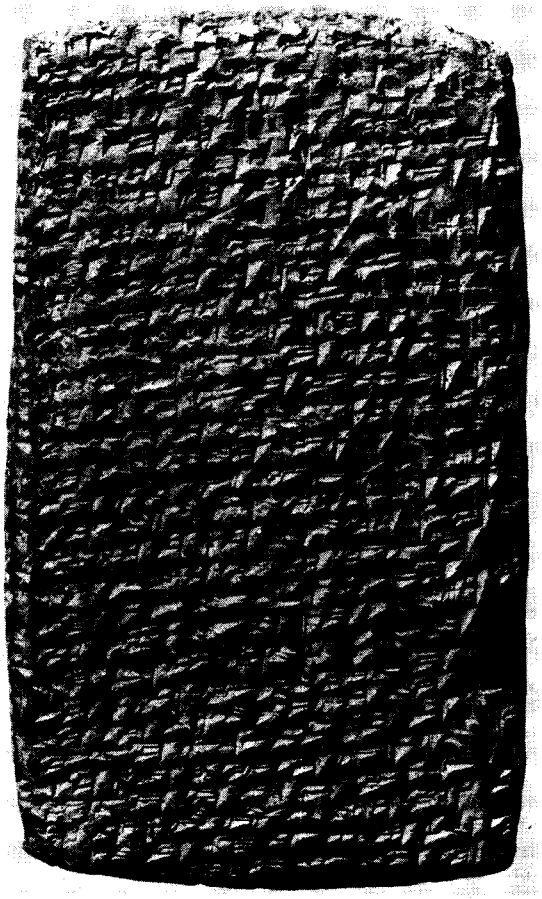
The inhabitants of the region called themselves and were called by their immediate neighbors either "Sidonians" (cf. Josh. 13:6; Jgs. 3:3), the designation that properly belonged to the inhabitants of the principal city of the area, or "Canaanites" (Akk. *kinaḫnu* or *kinaḫḫu* for the region; Egyp. *p3 kn'n* for the region; Ugar. *kn'ny* for the people; Phoen. *kn'n* for the region; Heb. *k'na'an* for the region and *k'na'aní* for the people). "Canaanite" does not

exactly correspond to "Phoenician"; the former applies to the larger entity, whether from a chronological viewpoint, since it is attested from the 15th cent., or from a geographical viewpoint, since it is applicable to a zone of the interior, especially in Palestine (on the latter cf. R. de Vaux, *JAOS*, 88 [1968], 23-30). It is nevertheless interesting that in the Akkadian of Nuzi (15th cent.) the term *kinaḫḫu* designates "red-purple" (possibly by Hurrianization of the Akkadian term for "purple," *uqnu* > **uk-niaḫḫu* > *kinaḫḫu*); there would then be a connection between the name of the color and the name of the region (and its inhabitants), exactly as in the case of the name the Greeks gave to Phoenicia (cf. E. Speiser, *Language*, 12 [1936], 121-26).

The usage of either the more generic term (Canaanite) or the more specific term (Sidonians), and the absence of a local name to indicate this people, corresponds to the actual historical situation. For the Phoenicians were always subdivided politically into city-states (hence the political entities "Tyre" and "Sidon," but no political entity "Phoenicia"), and not clearly distinguishable on the cultural or ethno-linguistic level from the population of the hinterland, but rather characterized clearly by their thrust toward the sea and the West. The Greeks, however, saw this people as unitary and characterizable Phoenician.

II. Region.–Phoenicia is a strip of land between the Mediterranean and the mountains (the Lebanon, altitude 3088 m. [10,130 ft.]; Jebel Anṣarīya, altitude 1583 m. [5,193 ft.]) that extends from Mt. Cassius (Jebel el-ʿAqraʿ) on the north to Mt. Carmel on the south, for a length of about 300 km. (185 mi.). The width is variable, depending on the distance of the mountains from the coast, but always rather narrow, becoming nonexistent where a mountain spur meets the sea in the form of a promontory (on physical geography, cf. E. de Vaumas, *Le Liban*, I-II [1954], with bibliography). Actually, an alternation of coastal plains and mountain spurs produces a territorial fragmentation of the region that makes land communication difficult; the fragmentation is especially marked when each coastal plain is used as the agricultural hinterland of a port city that is neither an economic nor a political center. From north to south we can distinguish the following zones:

(1) South of Mt. Cassius, woody and adjacent to the sea, is a broader zone, with coastal plains, and hilly regions with valleys (notably that of Nahr el-Kebîr, which debouches near the present Latakia). In the 2nd millennium this region saw the flourishing of the kingdom of UGARIT, but in the Phoenician period (properly speaking) this area had no historic importance.



(2) The aformentioned zone is closed at the southern end by a mountain spur that comes to the sea (near Qalʿat er-Russ); soon after, a broad coastal plain opens up with its modern centers at Jebeil and Bâniyâs and its chief centers in the Phoenician age at Siannu (Tell Siano) and Usnu, the successors of the kingdom of Siyannu-Usnatu of the 2nd millennium. The best-known archeological site is Tell Suqas (on this region cf. P. I. Riis, *Tell Sūkās*, I-VI [1970-1979]). The plain is closed toward the southern end by a branch of Jebel Anṣarīya that descends and interrupts the coastal plain near Qalʿat Marqab.

(3) From Marqab to the promontory of Mantar there is no plain; a confusion of hills results in rather meagre agricultural resources for the region. The modern center is Tartūs, but the ancient center was Arvad (Erwâd), located on a small island 2.5 km. (1.5 mi.) from the coast (H. Frost, *Annales Archéologiques de Syrie* [hereafter *AAS*] 14 [1964], 67-74; 16 [1966], 13-28), mentioned in Gen. 10:18 and Ezk. 27:8, 11. A series of centers on the mainland, such as Antarados (Tartūs) and Marathus (Amrît; cf. M. Dunand, *Bulletin de Musée de Beyrouth* [hereafter *BMB*], 7 [1944-45], 99-107; 8 [1945-48], 81-107; *AAS*, 4-5 [1954-55], 189-204; 6 [1956], 3-8), are attested only later. The difficulty of communication with the hinterland and the sparseness of agricultural resources determined a maritime vocation for Arvad.

(4) South of Mantar a vast coastal plain opens up, the plain of ʿAkkar, well irrigated by several watercourses. The principal centers were Ṣimirra (Tell Kazel; cf. *AAS*, 7 [1957], 3-16; 14 [1964], 3-14) and Arqa/Irqata (Tell ʿArqah; cf. *Syria*, 54 [1977], 25-30; 55 [1978], 136-139; *BMB*, 30 [1978], 61-75), both of which had already flourished in the 2nd millennium and again in the Phoenician era, and are named in Gen. 10:17-18 (Arkites and Zemarites). Other centers flouishing before 1200 (particularly Ullaza = Tell Kastina) had no role in the Phoenician age. The region, basically agricultural and with good communications with the interior (the depression between Jebel Anṣarīya and the Lebanon that leads to the Orontes valley), is not projected toward the sea: Ṣimirra and Arqa are not on the coast, but more toward the interior.

(5) Next, a stretch of rather jagged coast, corresponding to the adjoining slopes of the Lebanon, is a region between the two promontories that are the locations of the modern cities of Tripolis and Beirût. Tripolis is of relatively recent founding (5th cent. B.C.), and is suspected of covering the Phoenician Maḥallata (H. Salamé-Sarkis, *Mélanges de l'université Saint-Joseph* [hereafter *MUSJ*], 49 [1975/76], 549-563). Beirût is already attested in the 2nd millennium, but was of secondary importance until the Hellenistic age (N. Jidejian, *Beirut Through the Ages* [1973]). In the Phoenician period the center of this zone was rather Byblos (modern Jebeil; Gebal in Ezk. 27:9; Josh. 13:5; cf. R. Dussaud, *Syria*, 4 [1923], 300-315), the best-known Phoenician city archeologically, although the remains belong primarily to the Bronze Age and the Roman period (P. Montet, *Byblos et l'Égypte* [1928]; M. Dunand, *Fouilles de Byblos* [1939-1954]; *BMB*, 17 [1964], 21-36; 19 [1966], 95-101; 20 [1967], 21-26). A series of lesser centers gravitated toward Byblos, attested chiefly in the Amarna Letters: Batrūna (Batrūn), Šigata (Šaqqa), ʿAmmiya (ʿEnfe), etc. *See also* Plate 63.

(6) South of Râs Beirût the coastal plain opens once more and then a hilly region ending at Ṣarafand (OT Zarephath, NT Sarepta). The chief center is Sidon (modern Ṣaidā; cf. N. Jidejian, *Sidon Through the Ages* [1972]; M. Dunand, *BMB*, 26 [1973], 7-25), "firstborn" of Canaan

Amarna Letter from Rib-addi, prince of Byblos, to Pharaoh (Louvre; picture M. Chuzeville)

(Gen. 10:15). The entire region from Beirût to Sidon is sprinkled with minor centers, cited in Assyrian texts and known archeologically: Khalde (R. Saida, *BMB*, 19 [1966], 51-90; 20 [1967], 165-69; *Berytus*, 20 [1971], 130-34), Kherayeb (M. Chehab, *BMB*, 10 [1951-52]; 11 [1953-54]; B. Kaukabani, *BMB*, 26 [1973], 41-58), etc. Noteworthy in the south is Sarepta (modern Ṣarafand; cf. J. B. Pritchard, *Sarepta* [1975]; *Recovering Sarepta, A Phoenician City* [1978]), attested in the 2nd millennium (Papyrus Anastasi I) and ending in the classical age (called Zarephath in 1 K. 17:9).

(7) In the mountainous region beginning at Ṣarafand and ending at the promontories of Râs el-ʿAbyadh and Râs en-Nakûrah ("Ladders of Tyre"), where coastal communications are practically broken, lies a beautiful coastal plain into which the Litani (classical Leontes) empties and in which are the centers of Maḥalēb (Mahalab, Josh. 19:29; cf. Ahlab, Jgs. 1:31), Ushu (classical Palaetyrus, modern Tell Rašîdîya; cf. K. Galling, *ZDPV*, 69 [1953], 91-93, perhaps biblical Hosah of Josh. 19:29). The chief center is Tyre (Ṣûr), on a small island facing the coast and joined to the mainland in the Hellenistic age (H. J. Katzenstein, *History of Tyre* [1973]). Toward Râs en-Nakûrah is the Hellenistic center of Umm el-ʿAwāmîd, of archeological note (M. Dunand and R. Duru, *Oumm el-ʿAmed* [1962]).

(8) A final broad coastal plain stretches between Râs en-Nakûrah and the Carmel, well watered with various watercourses (among them the Kishon). The center of the region is ʿAkkā (OT Accho; modern Tell el-Fukhkhâr) a port already attested in the 2nd millennium and flourishing in Phoenician (cf. Jgs. 1:31), Roman (NT Ptolemais), and medieval times (St. John of Acre). Other centers are: Achzib (modern ez-Zîb; on excavations cf. M. Prausnitz, *IEJ*, 15 [1965], 256-58) and Tell Abū Hawâm (cf. R. Hamilton, *Quarterly of the Department of Antiquities in Palestine*, 3 [1934], 74-80; 4 [1935], 1-69; B. Maisler [Mazar], *BASOR*, 124 [Dec. 1950], 21-25), near modern Haifa. This region, because of easy communications with the interior and the overhanging Galilee hills, was the most exposed to penetration by the Israelite tribes (cf. the "blessings of Jacob," Gen. 49, relevant to Zebulun, Issachar, and Asher; cf. also Josh. 19:29; Jgs. 1:31f.).

III. Language and People.–The language spoken in the region is included in the Northwest Semitic group, and is closely related to Hebrew (less so to Aramaic). It can be traced essentially from a local dialectical development of Amorite (also called the Northwest Semitic of the first half of the 2nd millennium), characterized in part by elements that developed indigenously and in part by elements common to Hebrew. Some principal phonetic elements are: reduction of the parent consonants with the shift of $\underline{h} > h$, $\acute{g} > ʿ$, $\underline{t} > š$, $\underline{d} > z$ (as in Hebrew); alterations in the syllabic structure (but less than in Hebrew, maintaining the patterns *qatl, qitl, qutl* without segholization), especially as a consequence of the loss of the final vowel; vocalic changes with the shift of accented long $\bar{a} >$ long $\bar{o}$ (more active than in Hebrew: **yatōn* and **malōk* instead of **nātān* and **mālāk*) and with the reduction of diphthongs (**bayt > bêt*, Heb. *bayiṯ; *mawt > môt*, Heb. *māweṯ*). On the morphological level: the end of noun declension and the introduction of the article *h-*, used, however, less regularly than in Hebrew; the end of the system of verbal moods and alteration of the system of "tenses"; the causative *yiqtil* (contrasted with Hebrew *hiqtil*). On the lexical plane: peculiarities in the demonstrative (*ʾz*), relative (*ʾš*), and pronominal elements (*-y* 3rd sing., *-m* and *-nm* 3rd pl., vis-à-vis Heb. *-h* and *-hm*); preference for words that differ from those usually used in Hebrew ("to be," *kn* instead of *hyh;* "to make," *pʿl* instead of *ʿśh;* "gold," *ḥrṣ* instead of *zhb;* "no," *bl* instead of *lʾ*; etc. — in a number of instances, the word used in Phoenician is the same as, or similar to, the word used in Hebrew poetry or parallelism).

One may explain the racial and linguistic elements by assuming that the Phoenicians were the descendants of the population formerly in the region (if not always, at least for the historically documented period). The continuity of the indigenous peoples (Byblos, Tyre, Sidon, and in general all the Phoenician cities existed already in the pre-Phoenician age) and the complete cultural homogeneity of the Phoenician period with respect to the preceding, such as in the rather pure language and in other parts of the culture (religion, political and social structure, figurative traditions, etc.), suggest a substantial continuity with obvious innovations the result of internal development and not of outside introductions.

In the period between 1200 and the Roman age Phoenicia was inhabited by a population that by physical traits (which naturally have nothing to do with its ethnic and cultural characteristics) is included in the "Mediterranean" type common to a large part of the Near East (cf. W. Shanklin and M. Ghantus, *BMB*, 19 [1966], 91-94). Naturally the ancient authors (from Herodotus i.1 and vii.89 on) fantasized on the provenience of the Phoenicians (from the Persian Gulf), because the historiographic theories of antiquity were based on the simplistic concept of "origins" and "provenience" and took into account

only population shifts that had already developed their own characteristics. Today, since the complexity of the constitutive process of ethnic entity is differently presented, and the cultural data are distinguished from the political and racial, the perpetuation of such theories (unfortunately related in some authorative works) is unacceptable (cf. S. Moscati, *Rendiconti dell'Accademia Nazionale de Lincei,* 18 [1963], 483-506; *Problematica della civiltà fenicia* [1974]). On the contrary it is necessary to demonstrate through the historical process that the people of Phoenicia were constituted in (relative) ethnic autonomy toward 1200, emerging from a more undifferentiated relationship to the wandering "Canaanite" that in the Late Bronze embraced all Syria-Palestine. It was a process of identification that began from the comparison of and in opposition to the identification of other neighboring ethnic entities: that formed by Israelites, Arameans, Moabites, etc., with their own political formation and with their own linguistic and cultural characteristics, helped also to single out the Phoenician ethnos. Among these, the Phoenicians are the most direct heirs of the preceding "Canaanite" world, since the other peoples were affected by the phenomenon of nomadic sedentarization that carried even more substantial mutants in the social and political body.

In this process of differentiation, obviously long and progressive, a decisive turning point was the invasion of the peoples of the sea (*ca.* 1190; cf. R. deVaux, *MUSJ,* 45 [1969], 481-498), for such invasions with all the political and economic consequences (destruction of cities, interruption of trade, fall of the Egyptian and Hittite empires, etc.) not only signaled a profound fracture in Syrian history but was also the occasion for a more decisive concretization of the innovative factors formerly latent (e.g., diffusion of the alphabet, metallurgy of iron, etc.). It is therefore reasonable to put the beginning of Phoenician history *ca.* 1200; and it is obviously easy to see the end in the Roman era, when the use of the local language gave way to Greek and Aramaic, and every element of cultural autonomy ceased, the culture having been progressively eroded during the centuries of dependence first on the oriental empires and afterward on the Hellenistic.

Between these two chronological limits one may single out a Phoenician people with its own history and its own culture that, though in the process of coming into being, nevertheless manifested characteristic traits. If the lack of political unity rendered difficult the emergence of a firm national conscience, nevertheless those with whom the Phoenicians came into contact recognized them as a unity (whether "Phoenicians," "Sidonians," or "Canaanites") and distinguished them from their neighbors (by language, by economic activity, by cultural elements, by religious faith), the Neo-Hittites and Arameans, the Israelites and Philistines. Especially in the west the Phoenicians were presented as active navigators, merchants, artisans, assuming a sort of national image, recurring from Homer to Poenulus of Plautus and to the stories of the Punic wars with an evaluation that passed from admiration to ill will and to scorn. Similarly, the attitude of Israel toward the Phoenicians passed from admiration of their technical ability and the desirability of economic collaboration at the time of Solomon, later to hatred and scorn, expressed particularly by Ezekiel (Ezk. 26–28; cf. also Joel 3:4-8 [MT 4:4-8]; Am. 1:9f.). This change may be attributed on the one hand to economic pressures exercised by the Phoenician merchants on the poorer interior of Palestine, and on the other to the opinions of the ambient Yahwists, to whom the Phoenician cult was impious and immoral (cf. 1 K. 16:31-33; 2 K. 23:13; cf. already 1 K. 11:5-8; 11:13).

IV. Demography and Economy.–With drastic simplification one can imagine that in the 1st millennium the mountains of Lebanon and Jebel Anṣarīya were for the most part still covered with woods and trees of great height (the celebrated cedars) or at least with Mediterranean maquis, while the coastal plains were completely free for agricultural use (M. B. Rowton, "The Topological Factor in the *Ḫapiru* Problem," in H. G. Güterbock and T. Jacobsen, eds., *Studies in Honor of Benno Landsberger* [1965], pp. 375-387). From this to the basic cereal culture were added in notable measure the typical Mediterranean arboreal cultures of the vine and the olive, which provided wine and oil. Likewise the wooded areas were exploited to provide timber for construction (of ships, of roofs, and for reinforcing brick walls, etc.) and for smaller objects (furniture, handles) as well as for resins (H. Klengel, *Das Altertum,* 13 [1967], 67-76; J. Brown, *Lebanon and Phoenicia, I: The Physical Setting and the Forest* [1969]). Oil, wine, and especially timber were exported at the time of the great kings of Egypt and Mesopotamia, which for obvious climatic and historical reasons were lacking in forest resources. Since very ancient times (3rd millennium) the interest of the great empires in wood and other products of the region is attested, and such interest was continually present in the Phoenician era proper, with obvious economic advantages but also with grave danger to political independence.

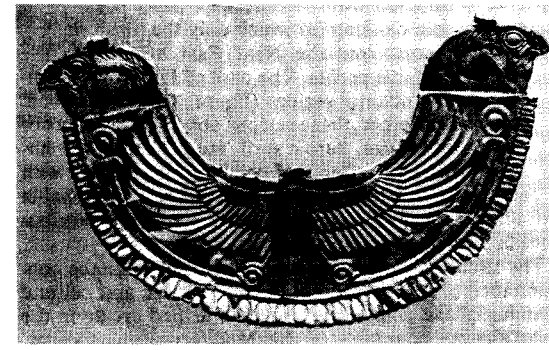
The distribution of the population was clearly distinguished between the small coastal plains, which were densely populated, and the mountainous zones at some distance from the coast, almost uninhabited. The forms of settlement tell nothing about the villages that housed the basic farmer population. The cities on the other hand reveal some proper urban characteristics, partly reconstructible from the topographical and archeological data (cf. B. Isserlin, *Rivista di studi fenici,* 1 [1973], 135-152). With few exceptions (Ṣimirra, Irqata, Sianu) the cities were on the coast, and by preference made use of the rocky promontories (Tell Suqas, Byblos, Sidon, Acco, etc), sometimes islands (Tyre, Arvad), always with the aim of providing anchorage secure against winds and currents, sheltered by the aforementioned promontories or by the lines of cliffs that in places fronted the coast. The Phoenicians sought to reproduce this type of settlement also in the zones of their commerical expansion, choosing promontories and small islands facing the coast, anchorages sheltered by the capes or between lagoons. The Phoenician cities were obviously surrounded by walls (imposing remains from the Persian era at Byblos and Arvad); unfortunately all of the internal makeup of the cities is not known — the location of the temples among the more noteworthy edifices, together with the public buildings, markets, etc., and the royal palace. Extraurban sanctuaries were characteristic (as that of Amrît and like the temple of Eshmun at Sidon), connected with springs or with woods, or situated on the hills (the numerous Roman sanctuaries of Lebanon go back certainly to the Phoenician era). Likewise the necropoleis were outside the cities, mostly dug in areas of rock outcroppings.

The population, as in general in the preclassical Near East, was subdivided in two segments: (1) a peasant segment, united by the community life of the village, dedicated to the activity of the direct production of food (agriculture and arboriculture, and in Phoenicia probably also fishing but not pastoralism); and (2) an urban segment, centralized within the royal palace and dedicated to specialized economic activities, especially in the sectors of transformation and distribution (artisans, merchants) and in the service of the organizations of the state (admin-

PHOENICIA

Phoenician ivory formerly decorated with lapis lazuli, gold, and carnelian. From Nimrûd, 721-705 B.C. (Trustees of the British Museum)

Phoenician ivory plaques from Nimrûd (British Museum; picture W. S. LaSor)



istration, cultus, etc.). From the community of the village the produce flows to the city, as the center of political power, the surplus of the products being necessary for the maintenance of the persons not involved in the direct production of food. In the particular case of Phoenicia, however, it seems that the activity of transformation and exchange of the products was of particular importance, not being sustained only by the surplus of the immediate interior, and not destined only for the sphere of the local royal palace; but being sustained also by the influx of raw materials from great distances, and being sent also to distant royal palaces and to foreign "markets"; i.e., Phoenicia produced also for export. Typical in this sense was the working of ivory: the raw material came from afar (the Syrian elephant was already extinct in the 1st millennium), was worked in Phoenicia by the specializing workshops, and reexported as objects of value either to the east (Samaria, Arslan Tash, Nimrûd; cf. esp. R. D. Barnett, *Catalogue of the Nimrud Ivories* [1957]; I. Winter, *Iraq*, 38 [1976], 1-22) or to the west (Cyprus: V. Karageorghis, *Salamis in Cyprus* [1969]; Greece; and as far as Spain: J. Bonsor, *Early Engraved Ivories* [1928]). The same applied to artistic working of bronze (cf., e.g., O. Negbi, *Tel Aviv*, 1 [1975], 159-172): items of armament, daggers, cauldrons, and especially plates, discovered on the one hand in Assyria, and on the other at Cyprus (cf. esp. E. Gjerstad, *Swedish Cyprus Expedition*, IV/2 [1948]) and as far as Greece and Italy; cf. also 1 K. 7:13-47. The same can be said for the working of glass, a product of value that had in Phoenicia, if not its origin (which dates from the Syrian Late Bronze), certainly a center of development and diffusion. The same applies above all to wool stuff dyed purple, which in antiquity was considered the typical product of Phoenicia and, in spite of the almost total lack (due to the obvious deterioration of the material) of direct archeological attestation, has been confirmed by texts. The wool certainly came from the surrounding Syro-Palestinian interior; the purple dye (in various shades from red to violet as indicated by different terminology; see B. Landsberger, *JCS*, 21 [1967], 155-173) was extracted from a mollusk (*murex brandaris* and *trunculus*; cf. L. B. Jensen, *JNES*, 22 [1963], 104-118); indeed, little hills of conch shells of the murex, residue of the work, still attest to the intensity of such activity.

This inclusion of Phoenician artisanship in a complex commercial system is generally considered to be the reason for a presumed lack of artistic "originality." In fact, the symbolic representations used are of diverse and often external origin (esp. Egyptian), but in general their entrance into the Syro-Palestinian artistic repertory goes back to the 2nd millennium and therefore was an element of local tradition for the Phoenicians. More than a commercial fact, Phoenician iconographic eclecticism was a well-rooted cultural fact. The prestige of Phoenician artisanship is proved not only by the export of objects but also by the presence of craftsmen in the building of the temple at Jerusalem (9th cent.) and the palace of Ashurnasirpal (8th cent.); and in the west since Homeric times the Phoenicians were famous not only as merchants and pirates but also as most clever artisans.

V. Commerce and Colonization.—Already in the period between 1500 and 1200 the coastal cities of Syria-Palestine had developed a notable commercial activity by maritime routes (J. M. Sasson, *JAOS*, 86 [1966], 126-138) besides ass-caravans to the Syrian, Anatolian, and Mesopotamian hinterlands. But their trade was rather circumscribed, developing on one side toward the great Egyptian market to the south, on the other toward Cyprus, the Cilician coast, and then to the Aegean on the west. They were therefore

Gold pectoral from Byblos showing Egyptian influence (19th cent. B.C.) (Louvre; picture M. Chuzeville)

technically constricted by a navigation exclusively coastal and one-directional, and were economically characterized in the same way by an exchange of products of luxury between centers endowed with an analogous palatine structure, besides the transportation of some raw materials (Cypriote copper, Lebanese timber) always within the same system. The routes to more distant lands, a preurban structure, and the access to other more costly and exotic raw materials were in the hands of other commercial organizations: on one side Egypt had monopolized (if not made of it a notable economic force) access through the Red Sea to southern Arabia and to east Africa (Punt), and therefore the influx of gold and of products such as ebony, incense, etc. On the other hand Mycenean commerce, accustomed by geographical necessity to more complex routes in the open sea, had controlled the nascent Mediterranean traffic, the volume of which and interest in which increased with the addition of side products (amber, obsidian, etc.) of metal research (tin, silver, etc.) in the Sardinian and Spanish west.

The turbulence produced by the invasion of the peoples of the sea, and in particular the collapse of the Mycenean commercial organization and the retreat of Egypt from the international scene, contrary to what one might expect, left substantially intact the commercial potential of Phoenicia, which knew how to take advantage of the occasion, succeeding on the one hand the Egyptians in the Red Sea routes to the lands of gold and incense, and on the other hand the Myceneans in routes toward countries of silver, tin, and iron ore. The methods of this phase of Phoenician commerce are shown especially in biblical passages about the joint enterprises of Hiram of Tyre and Solomon (*ca.* 950; cf. G. Bunnens, *Journal of Economic and Social History of the Orient,* 19 [1976], 1-31): the ships came and went on a triennial cycle, without the need of establishing along the way any point of fixed support (1 K. 9:26-28; 10:22; cf. 2 Ch. 8:17f.). It was therefore a commerce without colonization, and the reports of classical authors on the early foundations of Utica and Cadiz *ca.* 1100, if they have any value (all the reports that Greek chronological tradition has linked to the Trojan War are suspect), must be related to frequent visits to intermediate landing places (Utica) or to points of contact with the natives (Cadiz) to effect the exchange (cf. K. Galling, *ZDPV,* 88 [1972], 1-18, 140-181).

This traffic with countries so distant and poorly known from semilegends, in the extreme south (Ophir) and the extreme west (Tarshish), resulted in the flow of raw materials or essentials for the technology of the era (metal) or valuables on the plane of personal prestige (exotic products) or of the cultus (incense). The Phoenicians were therefore economically attuned to the difference of value that the countries of origin and those of the destination attributed to such products: the "native" Somalis or Iberians were satisfied with necklaces of glass paste or at most with some clothing (of which only the pins remain), while the imports into the Near East brought to the Phoenicians notable profits. The case of Phoenician commerce in highly cultural regions (Egypt, Assyria, Greece, Cyprus) was different; these regions absorbed products of luxury (ivory, bronze, purple stuff, etc.). Not least in importance among the effects of commercial contacts with Greece was the introduction of the Phoenician alphabet (9th-8th cents.), an introduction connected with contributions in the fields of myth and art.

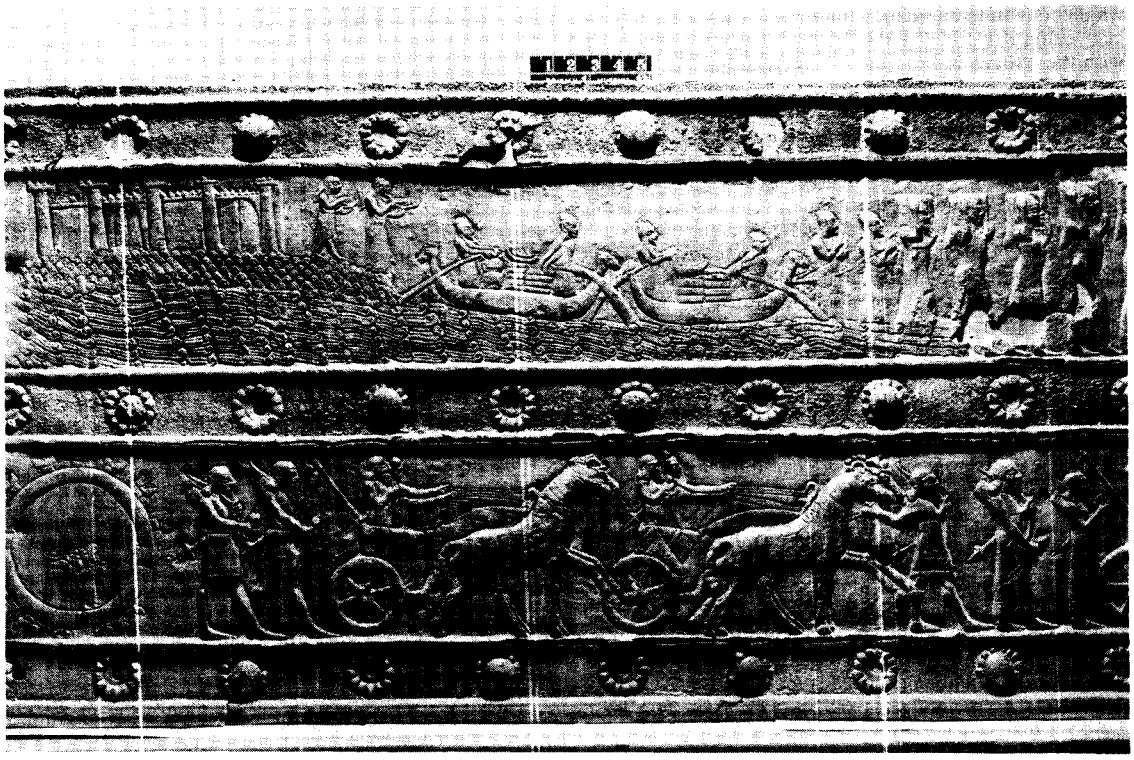
The situation changed in the 8th cent. through the concomitance of diverse factors. The economic and cultural stimulus of the commerce of metals helped create in the metalliferous countries of the Mediterranean (Cyprus, Sardinia, Etruria, south Spain) the major concentrations of wealth and therefore the major outlet of the market, with local aristocracies already exiting from the Bronze Age (Tartessic Spain, Noragic Sardinia, Etruria), in which, however, other areas remained (all northern Africa and W of Egypt). Contemporaneously Greece alongside Phoenicia was making use of maritime routes, in the search for and distribution of metals, with access to the great markets of Egypt and the Orient. Finally, in Phoenicia motives perhaps analogous to those of a socio-economic nature known by Greece as well as political motives (Assyrian imperialistic pressures) stimulated emigration (G. Kestemont, *Oriens antiguus,* 11 [1972], 137-144; S. Frankenstein, in M. T. Larsen, *Power and Propaganda* [1979], 263-294). The combination of these various factors changed the Mediterranean commercial system (the route of Ophir was temporarily abandoned, its place taken by the continuous going and coming of caravans between south Arabia and Transjordan); it passed from a navigation that was based on a point of support perhaps habitual but certainly urbanistically inconsistent to the foundation of true colonies; from searches for raw materials that took on the aspect of raids *(razzia)* harmful of the natives to a commerce of markets, with export to a local public more economically qualified and with organizations of the culture according to the needs of the motherland; from a free though adventuous navigation to a concurrence and contraposition of Phoenician and Greek routes, especially of the markets reserved for the Phoenicians and of the markets reserved for the Greeks.

The chronology of Phoenician colonization has long been a problem. The critical tendency formerly refuted the dates of the classical authors and on archeological grounds assigned the colonization to the 8th cent. (from the classic studies of J. Beloch, *Rheinisches Museum,* 49 [1894], 111-132, to R. Carpenter, *American Journal of Archeology,* 62 [1958], 35-53; *et al.*). But W. F. Albright's arguments for the earlier date (*BASOR,* 83 [Oct. 1941], 14-22; cf. also "Role," pp. 341-49) have prevailed (summarized by: W. Culican, *Abr Nahrain,* 1 [1960], 16-55; G. Garbini, *Cultura e Scuola,* 7 [1963], 92-97). Yet clearly the situation in the 11th cent. was profoundly diffferent from that of the 8th cent., and the adoption of a chronology cannot disregard the historic situation. In the historico-economic picture presently delineated the true and proper Phoenician colonization cannot be conceived if it was not substantially coeval with that of the Greeks, and crowded into areas that were diverse and competitive. The Phoenician colonies (prevalently of Tyre, according to the reports of the classical authors) were localized on the southeast coast of Cyprus (Kition), in northern Africa and W of Sirta (Utica, Carthage, Hadrumetum, Hippo, and many others extending to Lixus on the Atlantic), at Malta, in western Sicily (Motya, Palermo, Solunto), in southeast Sardinia (Nora, Sulcis, Tharros, Cagliari, etc.), in the Balearic Islands (Ibiza), in southern Spain (Cadiz and others). What little is known of the political structure of the colonies seems to concern only magistracies of the collegial type (the "judges," *špṭm,* Lat. *sufetes;* the popular assembly, *'m;* cf. M. Sznycer, *Semitica,* 25 [1975], 47-68), which are characteristic of local, nonautonomous communities, while there is nowhere a trace of a true "king" (unless at Carthage by secondary phenomenon). It is therefore probable that the colonies were initially constituted as politically dependent directly on the motherland, even if it is obvious that quite soon they were detached in self-government, conferring political authority on their communal magistrature.

The vigorous emergence of Carthage (in the 6th cent.),

which constituted a political unity and a western Phoenician cultural world ("Punic"), including its relationship with the natives in both the commercial and the cultural sector, its means of demographic and military penetration toward the interior, and its rapport with the Greeks and then with the Romans, constitute such important problems that the history can no longer be considered as properly Phoenician. From the diverse expressions of these factors in the various regions and various periods a Punic world resulted that was well diversified, both internally and especially with respect to the eastern motherland, but from which are perpetuated language and writing, political and religious elements, economic and artistic elements, leading to an era somewhat advanced, when it came to be progressively absorbed in the provincial Roman world.

Hence after the detachment of the colonial world Phoenicia remained a commercial center of primary importance. An oracle of Ezekiel on Tyre (Ezk. 27; cf. H. van Dijk, *Ezekiel's Prophecy on Tyre* [1968]) gave a picture of the commercial network of the Phoenician city *ca.* 580-570 that included the Mediterranean (from Spain to Ionia and Cyprus), Egypt and the Libyan coast, the Syro-Palestinian interior, Assyria, central and eastern Anatolia and Armenia, Arabia stretching to Yemen. The ties with Egypt were based on the constant pharaonic support of the struggles of the Phoenicians to maintain their independence in the face of Assyro-Babylonian pressures. Assyro-Babylonian documents prove the commercial presence of Phoenicia in Mesopotamia (cf. A. L. Oppenheim, *City Invincible* [1960], p. 174; *JCS*, 21 [1967], 236-254) that was certainly the basis of the Achemenian interest in commercial development of Phoenicia, in opposition to the Greeks. Neither was the more properly explorative aspect of Phoenician navigation stopped: a natural continuation of the ancient route to Ophir was the circumnavigation of Africa accomplished in three years (*ca.* 600); on behalf of Pharaoh Neco Phoenician ships departed from the Red Sea and returned by the Mediterranean (Herodotus iv.42). And in the reverse direction the Carthaginian Himilco (*ca.* 450) continued the ancient route from Tarshish with expeditions that went through the Pillars of Hercules, turned north and finally reached the English coast (Avieno *Ora maritima*); and Hanno (*ca.* 425) sailed along the coast of western Africa as far as the Gulf of Guinea (C. Muller, *Geographi Graeci Minores* [1855], I, 1-14; J. Ramin, *Le périple d'Hannou* [1976]; J. Blomquist, *Date and Origin of the Greek Version of Hanno's Periplus* [1979]).



VI. Political History.–After the invasion of the peoples of the sea and the rapid constitution of a Phoenician ethnic entity (in the sense indicated above), the historic documentation began in a heterogeneous manner. An Egyptian source in the 11th cent. (the account of Wen-Amon, who was taken to Phoenicia to procure timber; W. F. Albright, "The Eastern Mediterranean about 1060 B.C.," in G. E. Molynas, ed., *Studies Presented to D. M. Robinson* [1951], pp. 223-231; G. Bunnens, *Rivista di studi fenici*, 6 [1978], 1-16; H. Goedicke, *The Report of Wenamun* [1975]), and local inscriptions in the 10th cent. (of kings Ahiram, Abibaal, Elibaal, Yehawmilk, Šiptiba'al; cf. W. F. Albright, *JAOS*, 67 [1947], 153-160) refer to Byblos. The Assyrian king Tiglath-pileser I (*ca.* 1100) made an expedition to Arvad to procure timber (E. Weidner, *AfO*, 18 [1957-58], 341-360; cf. *ARAB*, I, § 360). Of Sidon we have only a glimpse of an ancient predominance that passed to Tyre *ca.* 1000. The chief notices about Tyre come from the OT, with reference to the participation of Hiram king of Tyre in the construction of the temple at Jerusalem and to the commercial expeditions to Ophir (2 S. 5:11; 1 K. 5:15–7:51; 9:10-14, 26-28; 10:11, 22; cf. 2 Ch. 2:2-15; 9:10, 21). This was the period of greatest prestige for Tyre, which dealt favorably with the cities of the interior of Syro-Palestine and with the Egyptian and Assyrian empires, which could threaten Tyre militarily. It was also the period of the first commercial enterprises in distant lands.

Succeeding phases (9th-7th cents.) have more precise reports about Tyre, among which the extracts of the "Annals" of small city-states that Josephus cited from Menander of Ephesus (F. Jacoby, *Die Fragmente der griechischen Historiker*, III, C [1958], no. 783; cf. Josephus *CAp* i.18 [116-120]) could be considered reliable (though the coincidence with the accounts of the OT known to Josephus, but not with the Assyrian texts unknown to him, is reason to be suspicious). Meander gives the list of the kings with the years of reign and some notices; the OT provides some detail, obviously on the connections with Israel (1 K. 16:29-32; 2 K. 23:13).

But the most significant reports are from the Assyrian texts. The purely commercial relationships in the time of Tiglath-pileser I passed to a weightier and unbalanced presence with Ashurnasirpal II and Shalmaneser III (9th cent.): the Assyrian kings sought to procure needed raw materials by means of military pressure and the payment of tribute. The Phoenician cities, with rare exceptions, preferred to pay tribute rather than undertaking an armed resistance of dubious outcome and perhaps greater expense.

The final aggravation of the situation came in the 8th cent., with Assyria's progressive establishment of a provincial system that put an end to all local autonomy and placed the region under the direct control of Assyrian functionaries and garrisons. In 743 Tiglath-pileser III made northern Phoenicia (as far as, but excluding, Byblos) into a province with its center as Ṣimirra; only Arvad remained autonomous because of its island nature (cf. B. Oded, *ZDPV*, 90 [1976], 38-49). In 700 Sennacherib took Sidon from King Luli of Tyre (cf. *ARAB*, II, §239) and enthroned an Assyrian vassal at Sidon; when Sidon rebelled in 677, Esarhaddon destroyed it and made the area an Assyrian province, while imposing on Tyre a treaty of vassalage (cf. *ARAB*, II, §§511, 527; G. Pettinato, *Rivista di studi fenici*, 3 [1975], 145-160). In 671 Tyre rebelled, and Assyrian intervention resulted in the formation of a third province in southern Phoenicia, with its center at Ushu. The final encounter of Assyria with Arvad and Tyre was indecisive. At the end of the Assyrian empire the situation was as follows: three Assyrian provinces (Ṣimirra, Sidon, Ushu) comprising almost the whole territory, only the two small islands of Arvad and Tyre and the small city-state of Byblos remaining autonomous.

The Neo-Babylonian kingdom inherited these situations and succeeded then to have final autonomy with Nebuchadrezzar's conquest of Tyre in 573. In the 6th cent. the culmination of the process of political subjugation, of economic exploitation, and of the demographic climax that characterized the entire Syro-Palestinian area under the Mesopotamian empires seemed to take place. With the rise of the Persian empire (538), however, the Phoenician cities revived (cf. J. Elayi, *Baghdader Mitteilungen*, 9 [1978], 25-38), through the Achemenian kings' political awareness of the military and commercial opposition of the Phoenician fleet to that of the Greeks (e.g., the battle of Salamis, 480). The Achemenian policy seemed to have reevaluated especially Arvad, Sidon, Tyre, and Kition. Arvad had control of all northern Phoenicia from the mouth of the Orontes to the plain of 'Akkar, through its dependencies (Marathus, Antaradus, Ṣimirra,

Shalmaneser III exacted tribute from the fortified (island) city of Tyre (upper left). Bronze overlay from gates at Tell Balawat (just N of Nimrûd), 9th cent. B.C. (Trustees of the British Museum)

etc.); the colossal wall of Arvad and the monumental tombs of Amrît document the prosperity of the area in the 5th-4th cents. B.C. Sidon controlled the coast from Byblos (autonomous with kings Šipti-ba'al III, Yehawmilk, and Bat-no'am, all of whom have left inscriptions) to Sarepta, had dependencies in Palestine (Dor, Jaffa), and was the seat of a provincial Persian palace. The remains of the great temple of Eshmun and some inscriptions of the local kings (Eshmun'azar, Tabnit, Bod-'Astarte) belong to this time (cf. M. Dunand, *MUSJ*, 69 [1975/76], 489-499). Southern Phoenicia, from Sarpeta to Carmel, was in the hands of Tyre, which also controlled Ashkelon in Palestine (H. J. Katzenstein, *BA*, 42 [1979], 23-74). The predominance of Arvad, Sidon, and Tyre is also confirmed by the fact that these three cities joined in the founding of Tripolis (N of Byblos). A fourth large Phoenician center under Persian dominion was Kition on the island of Cyprus: an ancient Tyrian colony, Kition in the 5th-4th cents. extended its control to the mineral areas of the interior, annexing Idalion and Tamassos, as the titulary usage of kings Ba'al-milk, 'Oz-ba'al, Milkyaton, Pummayyaton shows in their inscriptions.

In the middle of the 4th cent. the continuous struggles sustained by Egypt and Cyprus with the help of the Athenians against the Achemenians involved also the Phoenicians: the Persians harshly repressed two revolts of the kings of Sidon, Straton "Philhellene" (362) and Tennes (346). The Greek commercial penetration (witnessed by the importing of Attic ceramic), the presence of Greek mercenaries, and the opposition to the Persian empire found their culmination and their outlet with the expedition of Alexander, who met with favor from all the Phoenician cities save Tyre, which was besieged and conquered (333). With the introduction of the Hellenistic kingdoms (Ptolemaic for Phoenicia S of Tripolis, Seleucid for the more northern region, with some fluctuations) Phoenicia was exposed to the Greek demographic penetration (which was concentrated in the more vacant northern region: the founding of Laodicea and Antiochia), and even more by the commercial and cultural penetration, with the introduction into a world more vast that spoke Greek and used Greek money. The political history ceased to have an autonomous character: the replacement of the monarchies with collegial governments (the "people," *'am*), the beginning of the local "eras" (Arvad 259, Beirût 197, Tyre 126, Sidon 110) in connection with the recovery of certain autonomies and the affirmation of the Roman dominion are all events that the Phoenician cities endured together with the neighboring Hellenistic world.

VII. Religion.–Phoenician religion was the direct continuation of "Canaanite" religion of the Late Bronze Age (known esp. from the Ugaritic texts) having been left in the safety of the contributions of the seminomadic populations, which took the upper hand in the rest of the interior of the country in 1200, introducing at the official level elements of the pastoral religiosity. The Phoenician religion therefore remained typical of the surrounding agricultural environment, centered on the problem of the punctual and correct repetition of the seasonal vegetation cycle and of the reproductive cycle of the animate creatures. The essential nucleus of the pantheon was constituted by a pair of dieties: one feminine, in the figure of a mother-goddess, represented the element of the earth; and the other a male, in the figure of a young god, represented the element of vegetation. The relationship between these two

Phoenician inscription of King Bod-'Astarte in the temple of Eshmun at Sidon (Beirut Museum; picture W. S. LaSor)

deities secured the correct repetition of the vegetative cycle. The alternation of a dry season with a rainy, with the consequent death and reflorescence of the vegetation, was symbolized by the death and resurrection of the young god. The figure of a father-god of cosmological character (the creator of the world) was less "active" in the cult and in the myth. The stabilization of these three elements in a fixed "triad" was a late and artificial achievement, but the three elements were much older, even pre-Phoenician.

In various cities these divine figures were called by different names, which in general were rather epithets, and therefore susceptible of variation and of application to the same entity. Thus the young god at Tyre had the name of Melqart (*ml[k] qrt*, "king of the city"), at Sidon he was Eshmun (*'šmn*), at Byblos Adonis ("lord" in Grecized form); the mother-goddess was Astarte (*'štrt*) at Tyre, Baalat (*b'lt*, "lady") at Byblos; the father-god was El (*'l*) at Byblos, Baal Shamaym (*b'l šmym*, "lord of heaven") at Sidon, etc. The fluidity of the epithets entailed some diachronic variation: thus Melqart and Eshmun are not attested early in the Phoenician era, Adonis only in the Hellenistic and Roman periods. Other deities attested in Phoenicia (and also in the rest of the Syro-Palestinian world, already in the 2nd millennium), such as Resheph (*ršp*), Dagon (*dgn*), and Elyon (*'lyn*), were within certain limits amenable to the fundamental elements of the triad. It is particularly noteworthy that the epithet of the young god Baal (*b'l*, "lord") was often qualified more specifically, assuming local forms such as *Baal Qarnaym* ("lord of the two horns"), *Baal Marqōd* ("lord of the dance"), *Baal Ṣūr* ("lord of Tyre"), etc.

The scant notices preserved by inscriptions (and related almost exclusively to the pantheon) can be integrated with the references in the OT (on the penetration of the cult of Baal and Ashtoreth at Jerusalem and Samaria: Jgs. 10:6; 1 K. 11:4-8, 33; 16:31f.; 2 K. 23:13), and especially with the references in the classical authors, which although late (and subject to some misunderstandings) have their interest. In particular the theogony that Philo of Byblos records (*ca.* A.D. 100; text in F. Jocoby, *Die Fragmente der griechischen Historiker*, III, C. [1958], no. 790), attributing it to a certain Sanchuniathon, priest of Beirût at the time of the Trojan War, has been reevaluated as to its reliability in the light of some agreement with the Ugaritic texts (O. Eissfeldt, *Ras Schamra und Sanchujaton* [1939]; *Sanchujaton von Berut und Ilumiku von Ugarit* [1952]; cf. R. Oden, *PEQ*, [1976], 115-126; J. Barr, *BJRL*, 57 [1976], 17-68; L. Troiani, *L'opere storiografice di Filone da Byblos* [1976]; A. I. Baumgarten, *Phoenician History of Philo of Byblos* [1983]). Also, available classical texts (from Theocritus to Lucian) refer to the festivals for the death and resurrection of Adonis that must have formed the fulcrum of the religious life of Phoenicia. On the cultus we have archeological data (such as the remains of the great sanctuaries at Sidon and Amrît) to be integrated with the literary notices: the divine presence was generally localized in springs, woods, tops of mountains, and the sanctuaries are often "open" apertures, inserted in natural passages.

In the colonies there are later innovations, especially through the influence of the local populations, and then through the stronger exposure to Hellenistic and Roman culture: at Cyprus Resheph was preeminent, through assimilation with a local god (Apollo in Greek clothing); at Malta the temple of Astarte succeeded one of the prehistoric mother-goddess and then was replaced by one of Hera-Juno; in Sicily Astarte Erycine was the Punic transposition of a divine figure of the Elymi; in Sardinia the Phoenician god Sid assumed an unusual role by assimilation to the local Sardus Pater; at Carthage in the 5th and 4th cents. Astarte was succeeded by Tanit (of Libyan etymology and origin; cf. F. Hridberg-Hansen, *La Déesse TNT* [1979]). Tanit and her companion Baal Hammon (perhaps "lord of the burning-incense"; identified with Kronos-Saturn and as such still venerated in the late Roman period) are especially known through the worship paid to them in the proper sanctuary called Tophet where live sacrifices of children were brought. Such sacrifices were typical at Carthage (and amply described by Diodorus xx.14.6), but were already attested in the East (the name appears in 2 K. 23:10). Archeological remains of such sanctuaries have been excavated in Sicily (Motya), Sardinia (Sulcis, Tharros, etc.), and Africa (Carthage, Hadrumetum, etc.). True human sacrifice (*mlk 'dm*) progressively gave way to the sacrifice of a substitute (*mlk 'mr*, "sacrifice of a lamb"); the term *mlk*, "sacrifice" (*yiqtil* participle of *hlk*), has nothing to do either with "king" or with a presumed god Moloch, which in reality never existed (O. Eissfeldt, *Molk als Opferbegriff im Punischen und Hebräischen und das Ende des Gottes Moloch* [1964]; R. de Vaux, *Studies in OT Sacrifice* [Eng. tr. 1964], pp. 73-90).

PHOENIX fē'niks [Gk. *Phoinix*]; AV PHENICE. The harbor of Crete where, it was hoped, Paul's ship could winter on the trip to Rome (Acts 27:12).

Acts 27 tells how the ship set sail from Caesarea and went along the southern coast of Asia Minor and down the southern coast of Crete to a harbor called Fair Havens, near the town Lasea. Since this port was not adequately sheltered from the winds, the ship set sail for a harbor called Phoenix in order to winter there. But Paul never reached Phoenix because the northeastern winds blew the ship off course, and it eventually ran aground on Malta.

The general location of Phoenix is quite certain. It is on the southern coast of Crete, further west than Lasea. But possibly the northeastern wind that blew them off course came down off Mt. Ida (near ancient Troy) and across the open Bay of Messaria; thus Phoenix would have been further west than the bay. In his discussion of ancient writers J. Smith (pp. 93f.) said that Hierocles located Phoenix near the island Clauda in the vicinity of the towns Aradena and Anopolis; Strabo (*Geog.* x.4.3) placed it "on the south side of the narrow part of Crete, . . . on the north side of which is Amphimalla"; and Ptolemy (*Geog.* iii.17.3) placed it 55 km. (34 mi.) E of Cape St. John, which is on the west end of Crete, and 170 km. (106 mi.) W of Cape Salmone (i.e., 55 km., 34 mi., W of Cape Matala; see Smith; cf. *HDB*, III, *s.v.* [Ramsay]; Ogilvie, pp. 308-310). Beyond this, the exact location of Phoenix is debatable, the two most likely candidates being the modern towns of Lutros (also Loutro[s]) and Phineka.

Cape Mouros is a narrow peninsula, 53 km. (33 mi.) from the west end of Crete, which extends about 1.5 km. (1 mi.) south into the sea and widens at its southern end. The east side of the peninsula forms the bay of Lutros, and the town is on the northeast side of the peninsula. On the strength of Smith's arguments, Lutros has been the preferred location for ancient Phoenix. It is within the general location described above, being due N of Clauda and near the towns of Aradena and Anopolis (p. 94; cf. E. Haenchen, *Acts of the Apostles* [Eng. tr. 1971], p. 700 n. 7). On the basis of statements by Spratt ("It is the only bay to the westward of Fair Havens in which a vessel of any size could find shelter during the winter months") and Brown ("It is the only secure harbour in all winds on the south coast of Crete"), which he confirmed by personal observation, Smith argued that Lutros is the only possible harbor in the area (p. 92n.). The high mainland N of the harbor and the island in the harbor's mouth prevent the easterly winds from disturbing its waters. Spratt added that an inscription in Lutros (cited in Ogilvie, p. 311) confirms that Egyptian grain ships used to winter there.

The major problem with identifying Phoenix with Lutros is Luke's description that the harbor faces "both south-west and northwest" (NIV; *katá líba kaí katá chŏron*). Greek *líps* is the wind coming up from the southwest, and *chŏros* is the wind coming down from the northwest (cf. Goodspeed). Lutros faces east, and therefore its entrances to the sea open up toward the northeast and southeast. Smith argued that the Greek means that the harbor is open "to the point *towards* which it [i.e., the wind] blows — that is, it is not open to the south-west but to the north-east" (p. 88). This is, however, a very unnatural reading of the Greek; *katá* means "down," so that the harbor faces down the direction from which the wind is coming, i.e., "down the south-west wind and down the north-west wind" (Bruce, p. 457; cf. Bauer, rev., pp. 475, 891).

On the west side of the peninsula that forms Cape Mouros is the harbor called Phineka, which most scholars now identify with Phoenix. This harbor not only satisfies all the general requirements, since it is close to Lutros, but also accords with Luke's description, since it faces west. Its name preserves the ancient form of Phoenix. Ptolemy also said that the harbor Phoenix is W of the town, whereas the harbor Lutros is E of the town Lutros.

The problem with the identification of Phoenix with Phineka is that today the west harbor is too shallow for large ships. Bruce said that possibly the two rivers entering the harbor have silted it up (p. 457), although Ogilvie claimed that there is no evidence of silting (p. 312). Ramsay left open the possibility that the shoreline has altered since Paul's time (*HDB*, III, *s.v.*). Spratt argued that the seismic disturbances in the 6th cent. A.D. tilted the island of Crete and raised the area of Lutros 4.11 m. (13.5 ft.). Ogilvie, followed by Haenchen (p. 700 n. 7), continued this reasoning and argued, on the basis of shell and rock formations, for a raise of 4.2 m. (14 ft.). Paul's ship probably drew about 2 to 3 m. (7 to 9 ft.) and a depth 4.2 m. (14 ft.) lower would therefore have been sufficient for the ship to enter the harbor (pp. 312f.).

Ogilvie also pointed out that the west harbor originally had two inlets, which faced northwest (not visible today) and southwest, and it would have been sufficiently deep. Also, the jetty protecting the bay originally extended 45 to 90 m. (150 to 300 ft.) further west and would have more completely protected the bay.

PHOROS fôr'əs (AV, NEB 1 Esd. 5:9; 9:26; NEB 8:30). *See* PAROSH 1.

PHRYGIA frij'i-ə [Gk. *Phrygia*]. A large ancient country of central Asia Minor. It is mountainous and has tablelands reaching 1200 m. (4000 ft.) in height. Its name is derived from the Phryges, a Thracian tribe that in early times invaded the country and drove out or absorbed the earlier Asiatic inhabitants. The Phrygians established a powerful kingdom traditionally associated with the royal names Gordius and Midas. It was overthrown *ca.* 700 B.C. by Cimmerian raids and the ascendancy of Lydia. Phrygia

passed successively under the empires of Persia, Alexander, and the Seleucids. After 190 B.C. it formed part of the Attalid kingdom of Pergamum, and most of it was included in the Roman province of Asia in 116 B.C.

Josephus (*Ant.* i.6.1 [126]) related Togarmah (Gen. 10:3; etc.) to the Phrygians, but this name is now more usually referred to Armenia or to Tilgarimmu, modern Gürün, in eastern Cappadocia. The boundaries of Phrygia varied greatly at different periods. The name Hellespontine Phrygia was long applied to a region adjoining the Dardanelles. In NT times, however, Phrygia proper comprised the western part of the Anatolian plateau and the mountains and valleys to its immediate west, but it was administratively divided between the provinces of Asia and Galatia. The Lycus Valley cities of Laodicea, Hierapolis, and Colossae were at the southwest extremity of Asian Phrygia, which extended N to the borders of Bithynia beyond Dorylaeum (Eskişehir). Galatian Phrygia, a smaller area S of the Sultan Dağ range, included Pisidian Antioch and Iconium and adjoined Pisidia and Lycaonia.

The presence of influential Jewish communities in a pagan environment in Phrygia helps to explain its early evangelization and rapid Christian development. Josephus (*Ant.* xii.3.4 [147-153]) said that Antiochus III (223-187 B.C.) settled two thousand loyal Jewish families in Phrygia and Lydia, and Cicero (*Pro Flacco* 28) alluded to the vast sums confiscated from the Jews in Apamea and Laodicea in 62 B.C.

The NT mentions Phrygia without qualification only in Acts 2:10. Jews from Phrygia were in Jerusalem at Pentecost. In Acts 16:6 and perhaps 18:23 the Gk. *Phrygian* is to be understood adjectivally. The phrase *tēn Phrygian kaí Galatikēn chṓran* in 16:6 has long been a focus of controversy. J. B. Lightfoot (comm. on Galatians [10th ed. 1890], p. 22) and W. M. Ramsay (*Expos.*, 4th ser., 9 [1894], 48ff.) agreed in taking *Phrygian* adjectivally. Two adjectives were then bracketed under a common article to refer to a single compound entity, "the Phrygian and Galatian country," not "Phrygia and the Galatian country." Lightfoot, who wrote before the definitive statement of Ramsay's "South Galatian" view, was unable to attach convincing geographical value to this understanding of the phrase. Ramsay argued that it denotes "Galatian Phrygia." This term, describing the district of Pisidian Antioch and Iconium where Phrygia overlapped the Roman province of Galatia, is not recorded in that form, but is precisely paralleled by "Asian Phrygia" and "Galatian Pontus," both well attested. This interpretation is a cardinal point in the geography of the South Galatian view.

J. Moffatt (*Intro. to the Literature of the NT* [3rd ed. 1918], p. 93) and K. Lake (*BC*, V, 231), followed by E. Haenchen (*Acts of the Apostles* [Eng. tr. 1971], p. 483) and others, have denied that *Phrygian* could be an adjective here, Lake on the ground, that the adjective was two-terminational in later Greek, so that this separate feminine form did not exist. This denial is erroneous, however; there are numerous attestations of the feminine adjective, and the natural construing of the phrase with the common article favors the rendering on which Lightfoot and Ramsay agreed (cf. C. J. Hemer, *JTS*, N.S. 27 [1976], 122-26; *JTS*, N.S. 28 [1977], 99-101).

The interpretation of Acts 18:23 is more difficult, and less crucial. *Phrygian* there could be adjective or noun, and the phrase may denote the same or a different complex of territories. But even if rendered there "the Galatian country and Phrygia," both elements are likely to refer to parts in the south. Acts 16:6, in particular, is important as referring to the area first visited as reported in ch. 13. Paul's first coming to Pisidian Antioch in Galatian Phrygia (13:14) corresponds with his first preaching in Galatia (Gal. 4:13). This fits a synthesis with a dating of Galatians before the events of Acts 15 and the direct identifications of the Jerusalem visit of Acts 9 with Gal. 1 and that of Acts 11 with Gal. 2. Acceptance of this reconstruction counters a persistent attack on the historical value of Acts that sometimes builds extensively on Lake's error noted above. Although the problems of the Jerusalem visits are complex, and a total solution is not to be offered simplistically or glibly, the linguistic and geographical assumptions on which North Galatian views are often joined with historical skepticism to exclude alternatives can be shown to be misconceived.

Paul's coming to Pisidian Antioch with Barnabas marked his first entry both into Phrygia and into the province of Galatia (cf. Gal. 4:13). His first address there is reported at some length (Acts 13:16-41), perhaps as marking the beginning of his systematic mission to the Gentiles. He revisited Galatian Phrygia with Silas and Timothy on his second journey (16:6); he was forbidden to preach in Asia but must have crossed Asian Phrygia toward Bithynia before being prevented from entering that land (v. 7). His route may have been NW from Pisidian Antioch to Dorylaeum and thence W across the province of Asia to Troas. After working again in Galatian Phrygia on his third journey he traveled to Ephesus "through the upper country" (19:1), perhaps by the direct upland road. This route may account for his being unknown by sight to the Colossians and Laodiceans of the great trade route (Col. 2:1). Asian Phrygia, especially the Lycus Valley, was probably evangelized by associates of Paul during his residence at Ephesus.

Christianity spread rapidly in the larger cities but sometimes assumed strange forms influenced by the heterogeneous and enthusiastic nature of the population. Remarkable early epigraphic evidence attests its presence. Phrygia was the center of the Montanists, to whom the uniquely defiant public Christian profession of the third-century epitaphs from the Tembris Valley in northwest Phrygia has been ascribed. Many other inscriptions exist whose Christianity is carefully veiled. Eusebius recorded the massacre of a whole Christian city, probably Eumenea, in the persecution by Diocletian (*HE* viii.11.1).

PHYGELUS fī'jə-ləs [Gk. *Phygelos*–'fugitive'] (2 Tim. 1:15); AV PHYGELLUS. Phygelus was a Christian in the province of Asia who, along with HERMOGENES and others, turned away from Paul (2 Tim. 1:15). Whether the desertion was due to theological differences, fear of having to share his lot, or failure to support Paul during his trial is unknown.

B. R. and P. C. PATTEN

PHYLACTERY fə-lak'tə-rē [Gk. *phylactérion*]. A small box containing Scripture verses. One was bound on the forehead and another on the arm during prayer.

The word "phylacteries" occurs in the Bible only in Mt. 23:5. The Greek word means "safeguard," "means of protection," "amulet," and as used in Mt. 23:5 is generally identified as the *tefillin* (lit. "prayers"), small boxes containing Scripture verses and worn during prayer, although a less common view identifies the phylacteries of Mt. 23:5 as magical charms or amulets (e.g., Bowman, pp. 523-538; cf. Goodspeed's translation, "They wear wide Scripture texts as charms . . .").

Tefillin were worn by every adult male at the daily morning prayers in either the home or synagogue except on the Sabbath and high festivals, though originally they were probably worn all day. Women, slaves, and minors, as well as those persons whose dead lay unburied, were exempt from wearing *tefillin* (for other exceptions, see *Jew.Enc.*, X, 25). In the 1st cent. A.D. they were probably worn by a minority of the people.

The hand-*tefillah* was put on first. This cube-shaped leather case contained one piece of parchment on which were written these four texts: Ex. 13:1-10, 11-16; Dt. 6:4-9; 11:13-21. This *tefillah* was fastened on the inside of the bare left arm just above the elbow so as to be near the heart. The long leather straps that passed through flaps on the box were twisted three times to form the letter *shin* (ש), and the following prayer was said: "Blessed art thou, O Lord our God, King of the universe, who hast sanctified us with the commandments and enjoined us to put on *tefillin*." Then the straps were twisted seven times around the arm, forming two *shins*, one with three prongs and one with four.

Modern Jew with prayer shawl and phylactery (W. Braun)

Next the head-*tefillah* was put on in the center of the forehead and this prayer was recited: "Blessed are thou, O Lord our God, King of the Universe, who hast sanctified us with thy commandments and enjoined upon us the command about *tefillin*." The head-*tefillah* was divided equally into four compartments with one of the four passages (Ex. 13:1-10, 11-16; Dt 6:4-9; 11:13-21) placed in each compartment. The box was sewn to the strap with twelve stitches, one for each tribe of Israel. On the right side was the letter *shin*, an abbreviation of *Shaddai* (the Almighty). On the left side was a four-pronged *shin*, a reminder of the four Scripture texts. The head strap was knotted in back in the form of the letter *daleth*; and the arm strap was in the shape of the letter *yodh*. Together with the *shin*, these three letters formed the consonants of the name *Shaddai*.

Discoveries of *tefillin* capsules and fragments at Qumrân and Murabba'ât suggest that prior to A.D. 135 the common content of the *tefillin* was five sections of Scripture: Dt. 5:1–6:3 (the Decalogue); 6:4-9; 10:12–11:21; Ex. 13:1-10, 11-16 (cf. also Mish. *Sanhedrin* xi.3). Mishnaic reform sometime prior to A.D. 135 led to exclusion of the Decalogue. According to both the Palestinian and Babylonian Talmuds (T.P. *Berakoth* 3c and T.B. *Berakoth* 12a), the Decalogue was omitted from the daily morning prayer before the end of the 2nd cent. in order to counter the attacks of the heretics (*Minim*) against the divine origin of the whole Torah, "So that they may not say, 'only these words [the Ten Commandments] were given by God to Moses on Sinai.'" The Midrash *Sifre* on Deuteronomy required the Decalogue to be omitted both from the morning prayer preceding the Shema and from the phylacteries.

These *tefillin* from Qumrân and Murabba'ât also shed light on the phrase "they make their phylacteries broad" (Mt. 23:5). Previously this phrase had generally been understood to mean that the straps were made broad, and such in fact is the translation of this verse in two Syriac MSS from the 4th and 5th centuries. But these *tefillin* from the 1st cent. A.D. show that the head *tefillin* were not cubical, but rectangular, with the breadth across the forehead varying much more than the length.

The custom of wearing *tefillin* has its origin in the injunctions of Dt. 6:8; 11:18; Ex. 13:9, 16. The "frontlets" (Heb. *ṭôṭāpōṯ*) are usually considered as the forerunners of the *tefillin* (note that the Tg. translates *ṭôṭāpōṯ* by *ṭ^epillîn*), though the precise meaning of *ṭôṭāpōṯ* is debated. Some connect it to Akk. *ṭaṭāpu*, "surround, encircle," and Arab. *ṭafa*, "go about," "circle" (so BDB, p. 377; cf. E. A. Speiser, *JQR*, 48 [157/58], 208-217), hence something wrapped around the head or arm. It served as a symbol (cf. *'ôṯ*, "sign") or reminder (cf. *zikkārôn*, "memorial") of God's deliverance.

Opinions vary as to whether these verses were intended to be obeyed in a literal sense. If "these words" (Dt. 11:18) refer to all of Dt. 5–11, then a literal fulfillment is not intended. It is also unclear whether "these words" in Ex. 6:8 refer only to vv. 4f. or to the whole subsequent sermon. On the other hand, the injunctions in Ex. 13 are primarily matters of ritual practice and are meant to be obeyed literally.

It is not known when the custom began. It was unknown among the Samaritans; hence one view concludes that the custom must have developed after the Samaritan-Jewish schism (3rd cent. B.C.?). Yet the Letter of Aristeas (*ca.* 130 B.C.) refers to the practice as already old (v. 159). Rabbinic literature indicates that the *tefillin* were equiva-

lent to amulets or charms for some wearers, yet for many others they were a memorial of God's commandments and a witness to pagans that the Jews "are called by the name of the Lord" (T.B. *Menahoth* 35b). Jesus did not criticize the practice, only the excesses which led to larger phylacteries for pious show.

Bibliography.–*Jew.Enc.*, X, *s.v.* (J. H. Greenstone, L. Blau, and E. G. Hirsch), is still valuable for its references to relevant passages in the rabbinic literature. See esp. T. B. *Menahoth* 34a-44a. See also J. Bowman, "Phylacteries," *SE* (1959 = *TU*, 73), pp. 523-538; J. H. Tigay, *HTR*, 72 (1979), 45-53; G. Vermes, *VT*, 9 (1959), 65-72. R. L. OMANSON

PHYSICAL [Gk. *psychikós* (1 Cor. 15:44, 46), *sárx*–'flesh' (Rom. 2:28)]; **PHYSICALLY** [Gk. *phýsis*–'nature'] (Rom. 2:27); AV NATURAL (1 Cor. 15:44, 46), FLESH (Rom. 2:28), BY NATURE (Rom. 2:27); NEB ANIMAL (1 Cor. 15:44, 46), FLESH (Rom. 2:28), NATURAL STATE (Rom. 2:27). Each of the texts contrasts the physical or earthly with the spiritual. In Rom. 2:27-29 Paul points out that the circumcision of the flesh (*sárx*, v. 27) is only physical (*phýseōs*, v. 28), and what is needed, "true circumcision," is a spiritual matter (v. 29). In 1 Cor. 15:42-50 Paul discusses the resurrection of the dead and clearly differentiates the earthly, physical (*psychikós*) body from the spiritual (*pneumatikós*) body (cf. H. Clavier, "Brèves remarques sur la notion de σῶμα πνευματικόν," in W. D. Davies and D. Daube, eds., *Background of the NT and Its Eschatology* [*Festschrift* for C. H. Dodd, 1964], pp. 342-362). G. A. L.

PHYSICIAN [Heb. part. of *rāpā'*–'heal'; Gk. *iatrós*]; NEB also "stitching" (Job 13:4), DOCTOR. The earliest practitioners of the healing arts appear to have been priest-physicians. The Sumerian priest-physicians employed largely empirical methods and frequently utilized psychological suggestion in their treatment of diseases. An extant Sumerian pharmacopoeia (*ca.* 2000 B.C.) contains some recognizable substances of a carminative, astringent, and emollient nature. This range of medicinal substances was extended later by the Babylonian priest-physicians, who also set fractures, reduced dislocations, and removed cataracts from eyes in the so-called prescientific period of medicine. Some sections of the Code of Hammurabi (§§ 215-221) deal with contemporary therapeutics (*see* HAMMURABI V.C). Egyptian priest-physicians also used herbs, splinted fractures, extracted teeth, and attended to wounds. In the ancient Near East sickness was uniformly ascribed to the activity of evil spirits working in the body; this made necessary the use of magical incantations, potions, and spells in the treatment of disease. (*See* DISEASE I; HEAL I.)

The Hebrews were forbidden to use magic; instead they were instructed to regard God as the giver of health and disease alike (Dt. 32:39; cf. Job 5:18). They were unique in that they had no tradition of physicians until many centuries after Moses. (The Egyptian "physicians" who attended Jacob and Joseph [Gen. 50:2, 26] were in fact embalmers.) Based on the belief that Yahweh alone is the Healer (Ex. 15:26), Mosaic legislation assigned to the priest the task of inspecting diseases (e.g., Lev. 13f.). Folk remedies were doubtless used by the Hebrews. Isaiah (38:21), e.g., employed a type of poultice that was also used at Ugarit (C. H. Gordon, *Ugaritic Literature* [1949], p. 129; cf. also 2 K. 20:7). The BALM OF GILEAD (cf. Jer. 8:22) was celebrated in antiquity for its healing properties and was undoubtedly prescribed by herbalists. The healing that Joram of Israel sought in Jezreel (2 K. 8:29) evidently involved normal recovery from battle wounds without the services of a physician; it is possible, however, that his wounds were dressed with astringent and emollient substances to promote healing. Asa king of Judah is reported to have sought help from physicians (2 Ch. 16:12); but the Chronicler clearly disapproves of Asa's trust in physicians rather than in God. The general Hebrew estimate of physicians appears to be reflected by the remark of Job 13:4.

In the intertestamental period magic and superstition increased significantly among the Jews. This coincided with the greater prominence of physicians, who, however, seem to have been little more than herbalists. Even Ben Sira (2nd cent. B.C.), who acknowledges the physician's abilities and usefulness, recognizes that both the medicines and the skill to prescribe them were created in the first place by God (Sir. 38:1-8). Thus God is the true source of healing, and the appropriate response to sickness is prayer by both the sick person and the physician, whose skills are at best very limited (vv. 9-15; cf. 10:10). (See also G. von Rad, *OT Theology*, I [Eng. tr.1962], pp. 274f.)

The talmudic tradition records the presence on the temple staff of a physician who cared for the priests (Mish. *Shekalim* v. 1). Physicians were also present in the cities (T.B. *Gittin* 12*b*) and were licensed by the local authorities (T.B. *Baba Bathra* 21*a*). Despite such measures, physicians were not always helpful (Tob. 2:10; Mk. 5:26 par. Lk. 8:43), and Christ may well have quoted a criticism of local physicians in His Galilee ministry (Mt. 9:12 par. Mk. 2:17; Lk. 5:31; cf. 4:23: "Physician, heal yourself"). In Col. 4:14 LUKE is identified as the "beloved physician," but very little is known about his background.

PIBESETH pī-bē'seth [Heb. *pî-beṣeṯ*; Gk. *Boubastos*; Egyp. *Pr-B3st*–'house of Bastet,' the cat-goddess]; AV, NEB, PI-BESETH. An ancient city in northeast Egypt, identified with Tell Baṣṭa, about 1.5 km. (1 mi.) SE of Zagazig. The Bubastic branch of the Nile was named for this city on its banks.

In his oracle against Egypt, Ezekiel predicted that the "young men" (soldiers) of Pi-beseth would die in battle (30:17). Egyptian records indicate that the military commander who dealt with lands to the northeast lived in this city, which occupied a strategic position at the beginning of Wâdī Ṭumilât, a valley leading from the Nile Valley through the desert to the eastern border of Egypt. Pi-beseth was a capital of Egypt during the Bubastite dynasties, the 22nd and 23rd (*ca.* 950-750 B.C.). After Bubastis fell before the army of Artaxerxes III of Persia the other cities of Egypt surrendered (Diodorus xvi.49-51).

Another reason that Ezekiel marked Pi-beseth for judgment may be that it, like On, which is mentioned in the same verse, was a pagan religious center. Herodotus referred to the festival celebrated annually with great revelry in the city (ii.59f.), to the mummification and burial of cats there (ii.67), and to its beautiful temple of Bubastis (Bastet) and a smaller temple (ii.137f.). Excavations have disclosed the bones of many cats buried in pits and the ruins of the temples described by Herodotus.

PICKS [Heb. *ḥ^{a}rîṣîm*; *ḥ^{a}rîṣîm*] (2 S. 12:31; 1 Ch. 20:3); AV HARROWS; NEB SHARP IRON TOOLS. Sharp instruments of iron, mentioned only here. The related adjective (*ḥārûṣ*, "sharp") is used in Isa. 28:27; 41:15; Am. 1:3 of the sharpness of threshing sledges. These picks are listed with saws and iron axes as tools with

which David made his defeated Ammonite enemies work at making bricks. (Note the Akkadian parallel in *CAD*, IX, 9.) Older versions (e.g., AV) and commentators have David torturing them with these implements, in line with their own savagery (1 S. 11:2; 2 S. 10; Am. 1:3) and sacrificial practices (2 K. 23:10; Jer. 32:35). The text is difficult at several points, however. Very few versions (older or modern) note that *malbēn* (*Q*), usually read as "brickkilns," is sing. and more properly refers to a brick-mold (so *CHAL*, p. 197; cf. Akk. *nalbanu, nalbattu*); this would support the recent readings. See S. R. Driver, *Notes on the . . . Books of Samuel* (2nd ed. 1913), pp. 294-97.

PICTURE. The term occurs twice in the RSV. Ezk. 23:14f. describes the kind of wall paintings and engravings probably viewed by ambassadors of Judah on visits to Assyria and Babylon: depictions of (RSV "a picture of"; Heb. *dᵉmût*, lit. "image, likeness" [cf. Isa. 40:18]; AV "after the manner of"; NEB "looked like") war scenes and triumphal processions of Babylonian rulers and soldiers. Such displays of imperial splendor so impressed Judah that she sought an alliance with Babylon (Ezk. 23:16; see comms., esp. KD). On 8:12, *see* PICTURES, ROOM OF.

"Pictures" occurs three times in the AV. In Nu. 33:52 (*see* FIGURED STONE) and Prov. 25:11 (RSV "setting [of silver]"; NEB "[silver] filigree") it represents Heb. *maśkît*, which denotes some kind of carved work. In Isa. 2:16, AV, "pictures" represents *śᵉkîyôt*, a hapax legomenon interpreted by the AV and some commentators (e.g., KD) as a cognate of *maśkît*. Others, following the LXX, obtain a closer parallel with v. 16a by reading it as a type of ship (cf. RSV "craft"; NEB "dhow"), either by deriving the term from Egyp. *śk.tj* ("ship"; KoB, p. 921) or by emending the MT (see comms.). N. J. O.

PICTURES, ROOM OF [Heb. *ḥaḏrê maśkît*–'rooms of an image'; Gk. *koitōn kryptós*] (Ezk. 8:12); AV CHAMBERS OF IMAGERY; NEB SHRINE OF (ONE'S OWN) CARVED IMAGE. The meaning of this phrase is uncertain in the absence of biblical or other contemporary parallels. It may mean secret rooms (MT; "room" in LXX, Syr., Vulg., Tg.) containing collections of images of gods or perhaps pictures on the walls (cf. Ezk. 8:10; 23:14). Heb. *maśkît* (< *śāḵâ*, "look") points to an image or figure, probably related to pagan religion (cf. Lev. 26:1; Nu. 33:52); but conceivably it could be used for wall carvings, in which case the "creeping things, and loathsome beasts, and all the idols of the house of Israel" (Ezk. 8:10) are perhaps the objects portrayed.

The seventy elders of the house of Israel are envisioned in one large room in the previous verses, so if v. 12 refers directly to that scene, the versions with singular "room" must be followed (so *BH*). Heb. *'îš* and the singular suffix, however, seem to indicate separate rooms for each man, and the previous context is then no longer a certain guide as to the contents of the rooms (cf. AV, NEB; see comms.). J. W. D. H.

PIECE. In the OT, the translation of a large number of Hebrew terms, many of which have approximately the same significance, e.g., *gezer* (Gen. 15:17), *nēṯaḥ* (Ex. 29:17; Lev. 1:6; etc.), *paṯ* (Lev. 2:6; 1 S. 2:36; etc.), *pelaḥ* (1 S. 30:12; etc.). It is used frequently in paraphrastic renderings, especially with verbs such as BREAK and DASH. The RSV and NEB sometimes use "of one piece with" to render *min-* ("out of, from"; e.g., Ex. 25:19, 31, 35f.). In the NT "broken pieces" translates the plural of Gk. *klásma*, "fragment (of bread)"; *see* FRAGMENTS.

PIECE OF MONEY. *See* MONEY.

PIECE OF SILVER. *See* MONEY.

PIERCE [Heb. *nāqaḇ* (2 K. 18:21; Job 40:24; 41:2 [MT 40:26]; Isa. 36:6; Hab. 3:14), *dāqar* (Nu. 25:8; Zec. 12:10; 13:3), polel of *ḥālal* (Job 26:13; Isa. 51:9), *ḥālaṣ*–'pass through' (Jgs. 5:26), pual of *ṭā'an* (Isa. 14:19), *yāṣā'*–'go,' 'come out' (2 K. 9:24), *māḥaṣ*–'smite through, wound severely' (Nu. 24:8), piel of *pālaḥ*–'cleave' (Prov. 7:23)]; AV also BORE, STRIKE THROUGH, THRUST, FORM, WOUND, etc.; NEB also PUT A HOOK, TRANSFIX, BREAK, RUN THROUGH, etc.; [Gk. *ekkentéō* (Jn. 19:37; Rev. 1:7), *diérchomai*–'go through' (Lk. 2:35), *diiknéomai*–'pierce, penetrate' (He. 4:12), *nýssō*–'prick, stab, pierce' (Jn. 19:34; Mt. 27:49 var.), *peripeírō*–'pierce through,' 'impale' (1 Tim. 6:10)]; AV also PIERCE THROUGH; NEB also STABBED, SPIKED; Heb. *kā'ᵃrî* in Ps. 22:16 [MT 17] is problematic and variously emended (cf. P. C. Craigie, *Psalms*, I [*World Biblical Comm.*, 1983], 196 n. 17.b).

The majority of OT passages refer to the killing of human beings with weapons that include the spear (Nu. 25:8), sword (Isa. 14:19; cf. Jgs. 9:54; 1 S. 31:4 par. 1 Ch. 10:4), arrow (Nu. 24:8; 2 K. 9:24; cf. Job 20:24), and, possibly, tent stake (Jgs. 5:26; cf. 4:21). Hab. 3:14 presents a graphic description of the destruction of enemies by arrow-like weapons ("shafts" for Heb. *maṭṭeh*; cf. Hab. 3:9). The original meaning of the "pierced one" in Zec. 12:10 is lost and remains a matter of scholarly speculation. In the NT (Jn. 19:37; Rev. 1:7) it is understood as a messianic reference (cf. F. F. Bruce, *NT Development of OT Themes* [1969], pp. 110-13). "Pierce" in Zec. 13:3 refers to the purging of prophets from Jerusalem by execution (cf. Dt. 13:1-5).

Other OT passages refer to animals that are "pierced," i.e., either taken captive or killed. The futile attempts of men to capture either the Behemoth (Job 40:24; cf. v. 15) or Leviathan (41:2) illustrate the contrast between human finite abilities and God's limitless power. Elsewhere, Job describes God's omnipotence over creation and His defeat of the "fleeing serpent" (26:13; cf. Isa. 27:1). Similarly, Isaiah recounts God's defeat of "Rahab" and the "dragon," which are either symbolic representations of Egypt or mythological creatures (Isa. 51:9; on the Ugaritic parallels *see* DRAGON; LEVIATHAN; cf. *ANET*, pp. 67, 130f.).

"Pierce" also occurs in several figurative expressions. In Isa. 36:6 Assyria warns Israel that reliance on Egypt, which is called a broken reed, will only "pierce" the hand of those who "lean on" Egypt (cf. 2 K. 18:21). Also, Prov. 7:23 compares a man who is seduced by an adulteress to an animal whose internal organs are penetrated by an arrow.

In the NT the literal and figurative uses of "pierce" are similar to those in the OT. In Jn. 19:37 the author quotes Zec. 12:10 (see above) as being fulfilled in the thrusting of the spear into Jesus' side (Jn. 19:34; cf. Josephus *BJ* iii.7.35 [335]; Sib. Or. 8:296; Irenaeus *Adv. haer.* iii.22.2). Perhaps John intended to highlight the efficacy of Jesus' atoning work by including this detail (cf. C. K. Barrett, *Gospel According to John* [2nd ed. 1978], pp. 556f.). While in Jn. 19:37 "pierce" emphasizes the lance thrust, in Rev. 1:7 it underlines the entire act of crucifixion. The assimilation of Jn. 19:34 best accounts for the textual variant in Mt. 27:49.

Figurative uses of "pierce" occur in Lk. 2:35; 1 Tim. 6:10; and He. 4:12. Lk. 2:35 expresses the effect of Jesus' rejection and passion on His mother Mary, namely, pain and anguish in her soul (but cf. J. A. Fitzmyer, *Luke*, I [*AB*, 1981], 429f.). According to 1 Tim. 6:10, while in the pursuit of money some believers defected from their faith; consequently they "pierced their hearts," i.e., they inflicted a pained conscience on themselves. The NT hapax legomenon Gk. *diiknéomai* in He. 4:12 describes the efficacious action of "the penetration of God's word to the innermost depths of man's personality" (P. E. Hughes, *Hebrews* [1977], p. 165). H. WOLF G. L. K.

PIETY [Gk. *dikaiosýnē, eusébeia*]; AV ALMS, HOLINESS; NEB RELIGION, GODLINESS; **IMPIOUS** [Heb. *nāḇāl*; Gk. *asebḗs*]; AV FOOLISH, UNGODLY; NEB also SAVAGE, BRUTAL; **IMPIOUSLY** [Heb. *ḥānēp*]; AV HYPOCRITICAL; NEB BRUTES.

"Piety" generally denotes "devoutness" or "reverence for God" (cf. *eusébeia*, Acts 3:12); but it can also signify "conspicuous religiosity," as in Mt. 6:1 (Gk. *dikaiosýnē*, lit. "righteousness"; cf. RSV 5:20; 6:33; etc.), where Jesus warns against ostentatiousness in the three main areas of Jewish piety: almsgiving (vv. 2-4), prayer (vv. 5-15), and fasting (vv. 16-18).

For the Greeks "piety" (*eusébeia* and cognates) consisted of reverence for the gods (also for one's country, ancestors, etc.) and careful observance of cultic duties. But in the OT (and subsequently the NT) true piety is the "fear of the Lord" (Heb. *yir'aṯ yhwh*; rendered by Gk. *eusébeia* in the LXX of Prov. 1:7; 13:11; Isa. 11:2; 33:6), which always involves active obedience to a personal God. Thus the "impious" are those who are contemptuous of God and His commandments. Ps. 35:16 cries out against those who "impiously" (Heb. *ḥānēp*; *see* GODLESS [MEN]) persecute the righteous. Ps. 74:18, 22 describes those who scoff at God as *nāḇāl* (lit. "foolish" in a moral and spiritual sense; *see* FOOL I). 1 Pet. 4:18 quotes the LXX of Prov. 11:31, applying it eschatologically to the suffering that awaits the "impious" (Gk. *asebḗs*, LXX for Heb. *rāšāʿ*, "wicked") at the final judgment.

PIGEON [Heb. *gôzāl*] ("young pigeon," Gen. 15:9); NEB FLEDGLING; [*yônâ*] (Lev. 1:14; 5:7, 11; 12:6, 8; 14:22, 30; 15:14, 29; Nu. 6:10); [Gk. *peristerá*] (Mt. 21:12; Mk. 11:15; Lk. 2:24; Jn. 2:14, 16); AV also DOVE.

The distinction between pigeons and doves is not easy to make. Usually species with blond or brownish coloring are designated "doves" while those of darker hues are called "pigeons." The difficulty in distinguishing these birds is also to be seen in Scripture in that, of the several varieties found in Palestine, only the turtledove (*Streptopelia turtur*) is given a separate name (Heb. *tôr*).

In Israelite sacrifices turtledoves and pigeons could be offered instead of animals from the herd or flock. This was a provision for the poorer members of the nation (Lev. 5:7). In certain cases of sacrifices for purification, i.e., at childbirth (12:6, 8), from a skin disease (14:22, 30), from a bodily discharge (15:14, 29), and after a necessary violation of the Nazirite vow (Nu. 6:10), turtledoves and pigeons were the required victims, not optional ones. The exclusive use of these birds by Mary and Joseph at the presentation of Jesus in the temple (Lk. 2:22-24), however, highlights their relative poverty.

The use of pigeons and doves in sacrifices meant that they were domesticated in Israel (Isa. 60:8). The sacrificial victim had to be owned by the offerer. He could not offer a wild animal or bird. The need arose, therefore, for the sale of doves and pigeons to prospective offerers. It is to vendors of such that Jesus said, "You shall not make my Father's house a house of trade" (Jn. 2:16).

PI-HAHIROTH pī-ha-hī'roth [Heb. *pî-haḥîrôṯ*] (Ex. 14:2, 9; Nu. 33:7); **HAHIROTH** [Heb. *haḥîrôṯ*] (Nu. 33:8, RSV, but some Heb. MSS, ancient versions, the AV, and the NEB read Pi-hahiroth in this verse also). A town in the east delta of Egypt. The LXX in Ex. 14:2, 9 translates this name by Gk. *apénante tḗs epaúleōs*, "opposite the encampment," in Nu. 33:7 by *stóma Eirōth*, "mouth of Eiroth," and in Nu. 33:8 by *Eirōth*. Some of the many suggestions for the Egyptian source of this name are: *ḥnt-ta-ḥrt* (Daressy), *pr-Ḥthrt*, "house of the goddess Hathor" (Clédat), *pa- ḥwyr* (Cazelles), and two hypothetical names, *pr-ḥrty*, "house of the god Ḥrty" (Spiegelberg), and *pr-Ḥrt*, "house of the goddess Ḥrt" (Albright).

During the Exodus the Israelites after leaving Etham encamped near Pi-hahiroth (Ex. 14:2), where the pursuing Egyptians overtook them (v. 9). From this place the Israelites set out to pass through the sea (Nu. 33:9).

The biblical texts locate Pi-hahiroth "between Migdol and the sea" (Ex. 14:2) and "in front" (vv. 2, 9) or "east" (Nu. 33:7) of Baal-zaphon. Most scholars place Pi-hahiroth on the Isthmus of Suez, but proposals for the exact site vary: a marsh between Maghfar and Lake Timsâḥ (Daressy); Jebel Abu Haṣa, which has ruins of a temple of Hathor (Clédat); the area of al-Qantarah (Albright); and lakes in the eastern part of Wâdī Ṭumilât (Cazelles).

PILATE, ACTS OF. *See* APOCRYPHAL GOSPELS III.B.

PILATE, PONTIUS pī'lət, pon'shəs. Roman governor of Judea A.D. 26/27-36, who presided at the trial of Jesus.

I. Information.—The history of Pontius Pilate is known chiefly from the account of his governorship of Judea in Josephus (*Ant.* xviii.2.2 [35]; 3.1f. [55-62]; 4.1f. [85-89]; *BJ* ii.9.2-4 [169-177]), from an incident related by Philo (*De legatione ad Gaium* 299-305), and from the record of the trial of Jesus in the four Gospels. These documents are supplemented by an inscription from Caesarea that gives the correct form of his title, *praefectus Iudaeae* (*Année epigraphique* [1964], n. 39; *see* picture in CAESAREA; *see also* PROCURATOR). The inscription, which is incomplete, records his two known names but does not give his first name (*praenomen*). The family name of Pontius was fairly common throughout central and northern Italy at all social levels and was the name of one consul of A.D. 17 and of another of A.D. 37. But the cognomen Pilatus (meaning either "armed with a javelin," or "bald," or by another derivation, "shaggy") is extremely rare; hence the family connections of Pilate remain uncertain. Pilate's role in the trial of Jesus is mentioned also by the independent Latin historian Tacitus in his brief reference to the "execution of Christus, author of that sect, by the procurator Pontius Pilate in the reign of Tiberius" (*Ann.* xv.44.4).

II. Governorship of Judea.—Philo implied that Pilate had a political connection with the *éminence grise* Sejanus (*De*

legatione ad Gaium 159), commander of the praetorian guard. Pilate might have been a protégé of the consul of A.D. 17. As an equestrian official, he must previously have served as a military tribune or staff officer in a Roman legion and possibly in other units before proceeding directly from the army to the governorship of Judea in A.D. 26/27. As governor he had five infantry cohorts and a cavalry regiment under his command (perhaps some five thousand men in all) for the maintenance of order, an unusually large force for a province that had no serious external commitments and was bordered by dependent kingdoms, the Herodian tetrarchies and the Nabatean kingdom. He was subordinate to the general authority of the legate of Syria, the supreme military commander in the East. But he had absolute authority in managing his own province, of which Caesarea, not Jerusalem, was the administrative center. *See* PROVINCES, ROMAN.

Josephus narrated three incidents of Pilate's governorship that illustrate the difficulties faced by the Roman rulers in Judea. When Pilate sent a military unit to garrison duty in Jerusalem, the population took offense because within the Holy City the army used standards that displayed images of the emperor, contrary to previous Roman practice in Judea as well as to Jewish law. According to Josephus this was a deliberate offense. At first Pilate refused to withdraw these symbols of the imperial majesty — which late sources exaggerated to include an imperial statue placed in the temple (see comms. on Matthew by Origen [17:25] and Jerome [24:15]. After a display of force, however, he yielded to the pressure of a popular demonstration (*Ant.* xviii.3.1 [55-59]; *BJ* ii.9.2f. [169-174]).

Pilate later tried to placate Jewish hostility by organizing a water supply for Jerusalem. His attempt to finance his project from temple funds caused a violent demonstration, which Pilate suppressed by police action, instructing his soldiers to use their batons instead of swords. Disregard of his orders caused several deaths. This affair may be the mysterious massacre of Galileans, "whose blood Pilate had mingled with their sacrifices" (Lk. 13:1).

In his tenth year of office Pilate found it necessary to suppress an armed concourse of fanatics who gathered in the territory of Samaria to excavate the holy vessels of Moses that were supposedly buried on Mt. Gerizim. The mob was ambushed, many died, and many of the survivors were executed. The city council of Samaria protested the action to the governor of Syria, who sent Pilate back to face an investigation by the emperor at Rome (*Ant.* xviii.4.1f. [85-89]).

Philo, who regarded Pilate as the agent of the anti-Jewish policy of Sejanus, recorded an earlier and less serious incident (*De legatione ad Gaium* 299-305). Pilate set shields bearing an innocuous dedication to the emperor on the walls of his residence at Jerusalem. The infuriated Jewish leaders sent a mission of protest to Tiberius in Italy, and Tiberius ordered the removal of the shields to the temple of Augustus in pagan Caesarea.

It was Tiberius's policy, seldom followed by other emperors, to retain successful officials in the same post for many years, instead of the usual three or four. He must have been satisfied with Pilate's management of a difficult province because he kept Pilate, like his predecessor as prefect, in charge for ten years. Josephus's attitude toward Pilate was unfavorable, but unlike Philo, who accused Pilate of every vice, Josephus was not violently hostile. He found only a single disastrous action to impute to Pilate in ten years. Modern scholars (e.g., Schürer and Smallwood) have tended to echo the attitudes of either of the Jewish sources. But it was Pilate's duty to maintain order over a surly subject people, who were even more unruly because their land had been annexed rather than conquered — Pompey in 63 B.C. had besieged and captured only the temple precinct at Jerusalem; there had been no general resistance later, but only local and dynastic rebellions.

III. Trial of Christ.–Christ's trial before Pilate had nearly all the features of a normal provincial trial by the *cognitio* (investigation) of the governor. The prosecution was initiated and conducted by independent prosecutors (*delatores*) — the high priest and his colleagues (Mt. 27:26; Mk. 15:3; Lk. 23:1, 4). The governor sat on his judgment seat (Mt. 27:19; Jn. 19:12) and gave direct sentence of punishment (Mt. 27:26; Mk. 15:15; Jn. 19:16). The charge was formulated not as the infringement of a particular law but as an indictment of actions that the governor was required to evaluate (Mt. 27:11; Mk. 15:2-5; Lk. 23:2). Only a mention of the governor's assessors (*consilium*) is lacking. Pilate's repeated questioning of Jesus about His alleged kingship was in a form regularly employed to determine the guilt of a prisoner who refused to plead; Christian martyrs were questioned in this way in the earliest recorded trials (Pliny *Ep.* x.96.2f.; Eusebius *HE* v.1.202).
