VI. Intended Readers and Purpose.—What has been said above indicates the high probability that Matthew was written to a Jewish-Christian community. It is not impossible that Matthew was written to a mixed community or even to a gentile community, but the data of the Gospel are again and again explained most satisfactorily on the hypothesis that the first readers were Jewish-Christians. Among the key items to be mentioned here are: the stress throughout the Gospel on fulfillment, especially the formula quotations pointing to Jesus as Messiah and the dawning of the messianic age; the importance of Jesus' fidelity to the law; and the limiting of Jesus' ministry to Israel. Also to be noted is the apologetic motif of the Infancy narrative (against Jewish claims of the illegitimacy

of Jesus' birth) and the Resurrection narrative (against the Jewish claim that the body was stolen, 28:12-15), as well as Matthew's omission of Mark's explanation of Jewish customs (cf. esp. Mk. 7:3f. with Mt. 15:2).

A further probability is that the readers were Hellenistic Jews. This is implied by the fact that Matthew was written in Greek. Thus the readers were probably Diaspora rather than Palestinian Jews. The Gospel seems to presuppose the proximity of both unbelieving Jews and Christian Gentiles. This required context, together with the fact that the earliest clear knowledge of Matthew comes probably from Ignatius (*ca.* A.D. 110), bishop of Antioch, has led many scholars to favor Antioch of Syria as the location of the readers. This remains, however, only one possibility among many, and it is worth emphasizing that the nature of the data allows us only to speculate where Matthew's community was located.

From the content of the Gospel and the probable identity of the readers, it is possible to draw the following conclusions about the author's purpose. The Gospel was written to confirm Jewish believers in the truth of Christianity as the fulfillment of the promises to Israel, hence the argument that Jesus is the Messiah, that He was loyal to the law, and that He came to the Jews. The argumentation is designed, on the one hand, to enable the readers to become conscious of and to maintain their identity over against the gentile church with whom they are undeniably in relationship, but, on the other hand, and more importantly, to provide a defense against the charges made by the readers' unbelieving brethren in the synagogue. Matthew's community was thus in need of an account of the story of Jesus that would enable them to relate both to gentile Christians and to unbelieving Jews. The increasing success of the gentile mission and the failure of the mission to Israel raised questions not only in the readers' minds, but also among their Jewish opponents.

The author wrote primarily to strengthen the faith and spiritual life of his congregation. This he did through the teaching and exhortation in the Gospel as well as through the polemic against the Pharisees. What he produced, however, could also have been particularly useful in the mission to unbelieving Jews, which, though increasingly difficult, had not ceased.

VII. Date and Provenance.–Two key questions that pertain to the dating of Matthew are whether the Gospel reflects a knowledge of the fall of Jerusalem (A.D. 70) and whether the relationship between church and synagogue indicates that the final break, usually dated to 85 or 90, had already occurred when the Gospel was written. Both questions are difficult to answer. Matthew does allude to the destruction of Jerusalem in 24:2 (cf. 24:15-28), but this can be naturally explained as a record of the prophecy of Jesus, unless the possibility of foretelling the future is ruled out *a priori*. The reference in 22:7 to the king who, being angry because those invited to the marriage feast did not come, "sent his troops and destroyed those murderers and burned their city" is more problematic. The reference to "troops" who "burned the city," unnecessary and alien to the context, seems to point to the destruction of Jerusalem. Even if it does, however, the possibility remains that Jesus prophesied the event through the parable or that the words were added to the Gospel after the event had occurred. Thus 22:7 cannot itself be proof that Matthew as a whole is to be dated after A.D. 70.

It is often thought that a crucial turning point in the relationship of church and synagogue was reached at Jamnia toward the end of the 80's, when liturgical alterations were enacted that forced covert Christians out of the synagogues. But this was in reality only the final development in a hostility and estrangement that had long characterized relations between Christian and non-Christian Jews. From the data in Matthew alone it is impossible to conclude whether the Gospel was written before or after the decisions made at Jamnia. Alienation, competition, and hostility, were not unusual before the break, and the mission to the Jews did not cease after the break.

One further important point in dating Matthew is the probable dependence upon Mark. If Mark was written in the 60's, then Matthew may have been written in the 70's. Some have found encouragement for accepting a later date (80-100) in the developed ecclesiology (16:18f.; 18:15-20) and doctrine of the Gospel (e.g., 28:19). Yet the letters of Paul have similar perspectives several years before the destruction of Jerusalem. It may further be asked why, if Matthew was written after 70, no attempt is made (as in Lk. 21) to disentangle the references to the fall of Jerusalem and the end of the age in Jesus' apocalyptic discourse (ch. 24).

Although the majority of scholars date Matthew after 70 (the 80's appearing most popular), it must be admitted that the evidence is short of compelling, and a pre-70 date remains a possibility. (See the arguments of Gundry, comm., pp. 599-609, in favor of an early date — which, however, also fall short of demonstration.)

With no evidence to the contrary, either from the Gospel or tradition, it is fair to conclude that the author of Matthew wrote as a member, and in the locale, of the community for which he composed the Gospel (see discussion of intended readers, above).

VIII. Authorship.–Matthew, like the other three Gospels, is an anonymous document. The title *katá Matthaion* ("according to Matthew") was affixed to the Gospel sometime in the 2nd century. From early in the 2nd. cent. the unanimous tradition of the Church supports Matthew as the author (e.g., Papias, who received the tradition from the Elder [Apostle?] John, Pantaenus, Irenaeus, Origen, Eusebius, Jerome). The only clues within the text of the Gospel itself are the substitution of the name Matthew (9:9) for Levi in the calling of the tax-collector to be a disciple (Mk. 2:13; cf. Lk. 5:27), and the addition of the words "the tax collector" to the name Matthew in the listing of the Twelve in Mt. 10:3 (cf. Mk. 3:18; Lk. 6:15). For some reason the Evangelist wants to show that Levi is the Matthew listed among the Twelve. Is this because he believes that Levi was or should have been one of the Twelve, or is it perhaps because in writing of himself he preferred the name Matthew to his own preconversion name, Levi?

The real question is the reliability of the tradition about the authorship of the Gospel. It is possible, although uncertain, that the whole tradition derives from, and is thus dependent upon, the testimony of only one man, Papias (as recorded in Eusebius *HE* iii.39.16). In any event, the tradition appears to have been unchallenged. It is difficult to believe that the Gospel would have been attributed to Matthew without good reason, since, so far as we can tell from the available data, Matthew was not otherwise a leading figure among the apostles or in the early Church (his name is mentioned only once outside the Gospels, Acts 1:13). A key objection, it should be noted, has often been set against the traditional ascription of the Gospel to Matthew. Can one of the Twelve, an eyewitness of the events, have depended so much upon the account of Mark, a nonparticipant in the events narrated? According to the tradition handed on by Papias (Eusebius *HE* iii.39.15), however, Mark is essentially the preaching of Peter, and it is not at all inconceivable that Matthew might depend upon the Petrine account.

But can Matthew the apostle have written the Greek document that goes by his name, a document apparently addressed to Hellenistic Jews of the Diaspora, a document that contains such developed and "late" perspectives? Here it is more difficult to be confident. The tradition about Matthaean authorship may be compatible with a conclusion that the Gospel contains traditions stemming from the apostle (who as a former tax-collector may well have kept records of Jesus' ministry), perhaps now recognizable particularly in the Gospel's special material, e.g., in the formula quotations or the five discourses. A disciple (or disciples) of Matthew may later have translated and adapted these materials, combined them with the Markan and Q traditions, and reworked the whole to produce the present Gospel. Such a hypothesis, speculative though it must be, would account for problems (e.g., putting the Pharisees and Sadducees together; the possible misunderstanding of Zec. 9:9 in 21:1-9 to involve two animals rather than one) that have caused a number of scholars (see J. P. Meier, *The Vision of Matthew*, pp. 17-25) to go so far as to conclude that the author was a Gentile rather than a Jew.

Matthew the apostle is thus probably the source of major portions of the Gospel, in particular the sayings of Jesus. One or more disciples in succession to Matthew may then have put these materials into the form of the Gospel we have today. The final editing probably was done by Hellenistic Jewish Christians, who in transmitting the tradition addressed Jewish brethren who, like themselves, had come to believe in Jesus as Messiah. If all this is so, then in this Gospel the words of Jesus preserved by the apostle, and sometimes regarded as an autobiographical allusion, found their fulfillment: "Therefore every scribe who has been trained for the kingdom of heaven is like householder who brings out of his treasure what is new and what is old" (13:52).

MATTHEW'S BIBLE. *See* ENGLISH VERSIONS III.E.

MATTHIAS ma-thī'əs [Gk. *Matthias* or *Maththias* (a shortened form of *Mattathias*)].

1. The man chosen to take the place of Judas among the Twelve (Acts 1:23, 26). Matthias is the contracted form of the name Mattathias, which derives from Heb. *mattityâ*, "the gift of Yahweh." Eusebius (*HE* i.12.3) believed that Matthias was one of the seventy sent out by Jesus (Lk. 10:1). Clement of Alexandria (*Misc.* iv.6.23) suggested that Zacchaeus was the proper identification. Church tradition says that Matthias's body was sent by Constantine to Trier, where it was lost, miraculously recovered, and reburied (cf. J. Jeremias, *Heiligengräber in Jesu Umwelt* [1958], p. 88). Acts 1:21-26 is the only scriptural information.

When Peter addressed the assembly of Christians regarding the fall of Judas and the need to fill his place, he gave the qualifications for the apostolate, as it was understood by Luke. An apostle was to be a man who had been with Jesus throughout His ministry, from His baptism to His resurrection. Two men were put forward, Joseph Barsabbas and Matthias. Peter led what seems to be the first corporate prayer mentioned in the NT, praying that the choice not be that of men but that of God. Then, following the OT practice for discovering God's choice (Prov. 16:33), lots were cast. Matthias was chosen. Casting lots probably involved writing the name of each man on a stone and putting the stones into a vessel. The vessel was then shaken until one stone came out; the man whose name was on that stone was chosen.

In the patristic era Matthias was identified with Gnosticism. Origen (*Hom. I on Luke*) referred to a Gospel of Matthias known in his time. Clement of Alexandria (*Misc.* ii.9.45; iii.4.26; vii.13.82) possibly referred to the same work as the Traditions of Matthias. Gnostics, chiefly those associated with Basilides, claimed Matthias the apostle as the origin of their teaching in this writing.

2. (1 Esd. 9:33, AV). *See* MATTATTAH.

D. W. WEAD

3. Son of Margalus. He and Judas the son of Saripheus were well-known interpreters and teachers of the law during the last days of Herod the Great. Contrary to Jewish law, Herod had placed a large golden eagle over the gate of the temple. Thinking that Herod was at the point of death, Matthias and Judas instigated their students to dismantle the offending object. Herod rallied, however, and the two teachers and forty of their students were

brought before him and condemned to be burned alive (Josephus *BJ* i.33.2-4 [648-655]; *Ant.* xvii.6.2-4 [149-167]). Josephus records that a lunar eclipse occurred on that night (*Ant.* xvii.6.4 [167]). This is the only reference to a lunar eclipse in Josephus's writings, and this phenomenon (4 B.C.) is of great importance in dating the death of Herod and the birth of Jesus.

4. Son of Theophilus; a native of Jerusalem who was elevated to the high priesthood by Herod the Great during the intrigues that immediately preceded that king's death (*Ant.* xvii.4.2 [78]). Shortly after his appointment Matthias became ceremonially unclean on the Day of Atonement, with the result that Josephus the son of Ellemus became high priest for that day alone. Herod removed Matthias from the high-priestly office during the disruptions that resulted in the death of Matthias son of Margalus (*Ant.* xvii.6.4 [164-67]).

5. Son of Ananus (the Annas of Lk. 3:2; Jn. 18:13, 24; Acts 4:6); high priest from A.D. 42-43. After deposing Simon Cantheras from office, Agrippa I had determined to reappoint Jonathan high priest, but Agrippa complied with Jonathan's request that the honor be given instead to his brother Matthias (*Ant.* xix.6.4 [313-16]).

6. Son of Theophilus (*Ant.* xx.9.7 [223]; but called the son of Boethus in *BJ* v.13.1 [527]); appointed high priest by Agrippa II shortly after the completion of the temple (*ca.* A.D. 65). Matthias was high priest at the start of the war with the Romans (*Ant.* xx.9.7 [223]). He opened Jerusalem to Simon the son of Giora (*BJ* iv.9.11 [574]); but later Simon accused him of complicity with the Romans and executed him and three of his sons (*BJ* v.13.1 [527-531]).

7. Son of Simon Psellus; ancestor of Josephus. He married a daughter of Jonathan the Hasmonean (Josephus *Vita* 1 [4]).

8. Son of Matthias (7); great-grandfather of Josephus (*Vita* 1 [5]).

9. Father of Josephus; described by his son as a man of eminence because of his noble birth and personal righteousness (*Vita* 1f. [5, 7]).

10. Brother of Josephus (*Vita* 1 [8]).

J. J. SCOTT, JR.

MATTITHIAH mat-ə-thī'ə [Heb. *mattiṯyâ, mattiṯyāhû*–'gift of Yahweh'].

1. Son of Jeduthun (1 Ch. 25:3); a Levitical temple musician appointed in David's time to play the lyre before the ark (15:18, 21; 16:5; 25:21).

2. First son of Shallum; a Korahite Levite in charge of making flat cakes for the temple service after the return from the Babylonian Exile (1 Ch. 9:31).

3. [Gk. Apoc. *Mazitias*]; AV, NEB, RSV mg., MAZITIAS. Son of Nebo; a layman who had married a foreign woman (Ezr. 10:43; 1 Esd. 9:35).

4. One of those who stood at Ezra's right hand during the public reading of the law (Neh. 8:4); called Mattathiah in 1 Esd. 9:43.

MATTOCK [Heb. *'ēṯ*] (1 S. 13:20f.); AV COULTER. An agricultural tool with a pick or narrow blade at one end and a broader blade at the other, used for grubbing or digging. The metal blade quickly became worn from constant use in the vineyards on the rocky hillside terraces of Palestine. The RSV renders "plowshare" for *'ēṯ* in Isa. 2:4; Joel 3:10 (MT 4:10); Mic. 4:3 (but cf. NEB "mattock"). The AV renders "mattock" for *maḥᵃrēšâ* in 1 S. 13:20f. (RSV, NEB, "sickle," "plowshare" [v. 21]). Both the mattock and the plowshare were in common use by the time of David.

The various translations of *'ēṯ* by the RSV and AV reflect various scholarly opinions of its meaning. Heb. *'ēṯ* is often related to Akk. *ittu*, but according to B. Landsberger (*JNES*, 17 [1958], 56 n. 4), Akk. *ittu* is the "seed funnel (of seeder plow)," not a plowshare (cf. *CAD*, VII, 312). S. Byington (*JBL*, 68 [1949], 49-54) argued that Heb. *'ēṯ* was a spade or heavy hoe rather than a plowshare, since the former could more appropriately be forged from a sword (Isa. 2:4; Mic. 4:3; vice versa in Joel 3:10).

N. J. O. G. A. L.

MATURE [Gk. *téleios*–'complete, perfect'] (1 Cor. 2:6; 14:20; Eph. 4:13; Phil. 3:15; Col. 1:28; 4:12; He. 5:14); AV PERFECT, FULL AGE, MEN, PERFECTION; NEB also RIPE, GROWN UP, GROWN MEN; [*telesphoréō*–'bear fruit to maturity'] (Lk. 8:14); AV PERFECTION; **MATURITY** [*téleios*] (He. 6:1); AV PERFECTION. *See also* PERFECT.

Maturity results from a full knowledge of the apostolic teaching about Christ and salvation and from correct application of this teaching to everyday life. Thus maturity is the Church's goal for its members.

Although the concept of Christian maturity occurs mainly in the Epistles, Luke contains an important illustration — the parable of the Sower (8:14). Here Jesus tells of optimum spiritual growth, from initial reception of the gospel to steadfast discipleship, and warns that those who become overly concerned with their material goods and other affairs of this present age will not bear mature "fruit," i.e., a life of righteous behavior and Christian endeavor.

A child-adult metaphor is the basis of Paul's exhortations to mature conduct in 1 Cor. 2:6; 3:1-3 and in 14:20. These passages must be understood in relation to the various problems in the Corinthian church.

In 2:6, 10-12 Paul speaks of Christian wisdom, i.e., the mystery of salvation, formerly hidden but now revealed to the Christian community by the Spirit of God. This wisdom is from God and is not the worldly rhetoric popular among the Corinthians (1:20; 3:18). The "mature" of 2:6 are those who competently discern the doctrinal and spiritual matters of the Christian life. The "mature" and the "spiritual" person (2:15) are counterparts.

Because some of the church members are divisive, Paul addresses the Corinthians as "people of the flesh" (*sárkinoi*) as opposed to "spiritual people" (*pneumatikoí*) in 3:1. The actions of the Corinthians are typical of "babes" (*nḗpioi*) in Christ. They are no longer "natural" people (RSV mg., 2:14), for they have believed in Christ and have been incorporated into His body. But neither are they "spiritual" people, for they are squabbling about leadership in their church (1:12; 3:1-4). Hence they are immature, and Paul addresses them as such. The implication of his argument is that mature Christians will not glory in various teachers such as Paul and Apollos but instead will discern that church growth ultimately comes from God (3:6) and that the Church is built by Him (v. 9).

The child-adult metaphor in 1 Cor. 14:20 also concerns proper conduct. The Corinthians' preoccupation with unintelligible ecstatic speech had resulted in confusion in church worship. Paul repeatedly points out the value of speech that is understood (14:3-5, 9, 12, 15, etc.), offering several simple analogies to illustrate his reasoning (vv. 7f., 10f., 23). The direct appeal for maturity (v. 20) calls for agreement with these simple truths. The Corinthians are not immature in the sense that they lack Christian knowledge. Rather, their practical application of the knowledge they possess is defective. Behavior that is immature by the standards of apostolic doctrine is the usual target of Paul's argument. This is made clear by his statement, "When I was a child, I spoke like a child, I thought like

a child, I reasoned like a child; when I became a man, I gave up childish ways" (13:11). Similar is his closing exhortation in 16:13 to "be manly" (*andrízesthe*; RSV "be courageous"; NEB "be valiant"; cf. Shep. Herm. Vis. i.4.3).

In similar fashion the author of Hebrews chides his readers for being immature children, still living on milk. In contrast, those who eat "solid food" are the mature, who are described as able "to distinguish good from evil" (He. 5:12-14).

Paul speaks of those who have attained maturity (1 Cor. 2:6; Phil. 3:15) and describes his effort to attain conformity with Christ in his ministry (Phil. 3:11-15). But an absolute state of maturity is not possible in this present evil age, and maturity nowhere in the NT implies sinless perfection (cf. 1 Jn. 1:8-10).

In Colossians Paul makes clear that his objective and that of those who minister with him is to bring every member of the believing community to maturity (1:28). This is to be brought about by the proclamation of Christ, by admonition, and by teaching all that Christian salvation involves. This active, thorough instruction intends to instill in every Christian an "assured understanding" of Christ, God's mystery (2:2). The doctrinal knowledge necessary for maturity is not like the intellectual mastery of esoteric formulas that Gnosticism proclaimed as the way to salvation. Rather, this knowledge is a developing of the believer's understanding of Christian truth and is thoroughly christocentric (2:3, 6, 9f.), because the believer matures "in Christ" (1:28). Christian knowledge is not only intellectual but also experiential and personal. The believer "walks" in Christ and is "rooted" and "built up" in Him (2:6f.). Paul certainly has in mind an ongoing process of growth through daily Christian experience and assimilation of teaching. Maturity will prevent deception by erroneous teachers who promise spiritual maturity and perfection through philosophical and other worldly means (vv. 8-23).

Ephesians, too, presents maturity as an antidote to the popular religious speculation that threatened to undermine the teaching of the apostles. Mature Christians will not be like children, who are easily deceived and swayed by new ideas (4:14). As in Philippians, maturity is a goal desired for the body of Christ and is realized through those who teach and proclaim Him. This cooperative ministering will result in the "perfecting" (*katartismós*) of the saints, the development of yet more ministerial activity, and the building up of the body of Christ (v. 12). The Church will then be unified in faith and mature in "the knowledge of the Son of God" (v. 13). Essential to Paul's concept of growth here is Christian love (*agápē*, vv. 15f.). As in Col. 2:6f., spiritual growth is not exclusively intellectual but also results from the personal experience of being in Christ.

It is significant that in the NT the idea of growth into maturity is in each instance related to obedience to the apostolic teaching. The concept of maturity is communicated in both parabolic and analogic fashion to Christians of the early Church; those who have not moved toward this goal are reproved (He. 5:11–6:1; 1 Cor. 14:20). Christian maturity is a result of acquiring a comprehensive knowledge of Christ and His salvation. Such knowledge prevents deception by erroneous doctrine and enables the believer with discernment and competence to apply the apostolic teaching to everyday life (He. 5:14). Thus the life of the mature Christian, both in thought and in action, is in accordance with NT teaching.

MAUL. The AV translation of Heb. *mappēṣ* in Prov. 25:18 (RSV "war club"). *See* CLUB; WEAPONS OF WAR.

MAW. *See* STOMACH.

MAXIMS [Heb. *zikkārôn*] (Job 13:12); AV REMEMBRANCES; NEB POMPOUS TALK. The Hebrew term is related to the verb *zāḵar*, "mention" or "remember." Thus it may mean "remembrances of the aged," "wise sayings," or simply "the things (you) mention" (cf. E. Dhorme, *Book of Job* [Eng. tr. 1967], pp. 185f.).

MAZITIAS maz-ə-tī'əs (AV, NEB, RSV mg., 1 Esd. 9:35). *See* MATTITHIAH 3.

MAZZAROTH maz'zə-roth [Heb. *mazzārôṯ*] (Job 38:32); NEB SIGNS OF THE ZODIAC. The RSV and AV transliterate the Hebrew term, which occurs only in this list of constellations in Job 38:31f. The NEB rendering equates *mazzārôṯ* with *mazzālôṯ* ("constellations," 2 K. 23:5), a term only slightly less obscure because of its use in rabbinical Hebrew, where it can refer generally to the signs of the zodiac, planets, or constellations (see Jastrow, I, 755; cf. also M. Pope, *Job* [*AB*, 1973], p.301). E. Dhorme (comm. on Job [Eng. tr. 1967], pp. 589f.) rejected the equation with *mazzālôṯ*, claiming instead that it referred to the Corona Borealis (deriving *mazzārôṯ* as a plural of majesty from *nēzer*, "crown"). As R. Gordis stated, the identification remains enigmatic (*Book of Job* [1978], p. 450).

G. A. L.

MEADOW [Heb. *kar*] (Ps. 65:13 [MT 14]; Zeph. 2:6); AV PASTURE, "cottage"; NEB also KERETH. The plural of Heb. *kar* can apparently be either masculine (Heb. *kārîm*, Ps. 65:13) or feminine (Heb. *kārôṯ*, Zeph. 2:6). Cf. GKC, § 87 n–o for other biforms. As M. Dahood (*Psalms*, I [*AB*, 1965], 230) pointed out, both the etymology (< *kārâ*, "dig, hollow out") and the context (note the parallel to *ʿēmeq*, "valley") suggest the translation "hollows" for *kārîm* (cf. J. Kselman, *CBQ*, 32 [1970], 581 n. 13). While this translation is also possible in Zeph. 2:6, the parallelism favors the AV "cottage" or RSV "meadow." The NEB translation points out a textual problem: the LXX apparently renders Heb. *krt* as *Krētē*, "Crete," the supposed home of the Philistines (*see* CAPHTOR; CRETE). This translation does fit the general context (cf. Chereth in v. 5), but the LXX may be corrupt, since it omits some words that are in the MT (the NEB has to reorder the text for its translation). Thus the RSV is perhaps preferable, since its only emendation is to repoint MT *nᵉwôṯ* (pl. construct of *nāwâ*) as *nāwôṯ* (as it stands, the MT reads lit. "pasture of meadows of shepherds").

G. A. L.

MEAH mē'ə (AV Neh. 3:1; 12:39). *See* HUNDRED, TOWER OF THE; JERUSALEM III.F.2.x.

MEAL [Heb. *qemaḥ* (Nu. 5:15; 1 K. 4:22 [MT 5:2]; 17:12 14, 16; 2 K. 4:41; 1 Ch. 12:40 [MT 41]; Isa. 47:2; Hos. 8:7); Gk. *áleuron* (Mt. 13:33 par. Lk. 13:21)]; AV also FLOUR; NEB also FLOUR, GRAIN; **COARSE MEAL** [Heb. *ʿᵃrîsâ* (Nu. 15:20f.; Neh. 10:37 [MT 38]; Ezk. 44:30)]; AV DOUGH; NEB FIRST KNEADING (or LUMP) OF DOUGH; **FINE MEAL** [Heb. *qemaḥ sōleṯ* (Gen. 18:6), *sōleṯ* (2 K. 7:1, 16, 18)]; AV also FINE FLOUR; NEB FLOUR; **MEAL OFFERING** [Heb. *minḥâ*] (Ezk. 46:15); NEB GRAIN-OFFERING.

Meal is the food product that results from the grinding of the whole kernels and the bran of the grains of cereal plants, but it is not the grains themselves (Isa. 47:2; Hos. 8:7; 2 S. 17:28). It was the staple flour of the common folk, e.g., it was used by the widow of Zarephath to make cakes (1 K. 17:12ff.). This common meal (*qemaḥ*) was not normally used for sacrificial purposes as was fine flour (*sōleṯ*;

see below but cf. Nu. 5:15; Jgs. 6:19). Meal was part of the foodstuffs brought to Hebron for the celebration of the kingship of David (1 Ch. 12:40), and it was used in the preparation of food in Solomon's court (1 K. 4:22 [MT 5:2]). Elisha also threw meal into the "poisoned pottage" (2 K. 4:41), probably a prophetic act (so W. S. LaSor, *NBC* [rev. ed. 1970], p. 351) rather than a magical charm (cf. J. Gray, *I & II Kings* [*OTL*, rev. ed. 1970], p. 500).

Meal was normally made from wheat, but on occasion could be made from barley. A coarse barley meal was used in the rite pertaining to the adjudication of the accused wife (Nu. 5:15). Some rabbinic authorities (e.g., T.B. *Sotah* 14a) suggested that this barley meal was food for beasts; it was presented in this ceremony because she was accused of a "beastly thing" (see N. H. Snaith, *Leviticus and Numbers* [*NCBC*, 1969], p. 31). Note the usage of barley by the poorer classes in Ruth 2:17; Jn. 6:9ff.; cf. Jgs. 7:13.

Fine flour (*sōleṯ*; 1 K. 4:22) was a more luxurious food than meal, probably made from the inner kernels of wheat (*TWOT*, II, 628). In one instance *sōleṯ* describes the special type of meal (*qemaḥ*) that was used to prepare cakes for honored guests (Gen. 18:6; cf. J. Skinner, comm. on Genesis [*ICC*, 1910], p. 300, who considers *sōleṯ* a gloss). Fine flour was used in the king's palace (1 K. 4:22) and was also the flour which was normally used for sacrificial purposes. During the period of the divided monarchy it was twice as expensive as barley (2 K. 7:1ff.).

The first portion of coarse meal (Heb. *ʿarîsâ*) was presented to the priests as an act of worship (Nu. 15:20f.; Neh. 10:37; Ezk. 44:30; *see also* SACRIFICES AND OFFERINGS OF THE OT V.E). The LXX *sitos*, "grain," supports the RSV's translation, but certain early Jewish traditions considered it to be some type of pasty substance (see G. B. Gray, comm. on Numbers [*ICC*, 1903], p. 177; L. W. Batten, comm. on Ezra-Nehemiah [*ICC*, 1913], p. 378 for references).

In the NT "meal" occurs only in Jesus' parable of the leaven: He likened the kingdom of God to the little bit of leaven that produces such a dramatic change in measures of meal (of flour, Gk. *áleuron*, Mt. 13:33 par. Lk. 13:21).

C. G. RASMUSSEN

MEALS. A meal (Heb. *ʾōḵel, ʾoḵlâ, ʾaruḥâ*) denoted the portion of food eaten at a given time, whether alone or in company, as well as the occasion of eating, described more fully as *ʿēṯ hāʾōḵel*, "mealtime" (Ruth 2:14).

I. Daily Meals
II. The Royal Commissary
III. Treatment of Guests
IV. Ritual and Symbolic Meals

I. Daily Meals.–Generally speaking, many people in the ancient Near East ate only one light and one substantial meal each day, while the poor were fortunate if they ate modestly once daily. In OT times there was no such formal repast as breakfast, although pangs of hunger experienced on awaking might be satisfied by eating a small piece of bread or some fruit, such as grapes, olives, or figs. Those who worked as fishermen, laborers, or craftsmen might take a small amount of food in a fold of their garments to eat while they walked to their place of work, but that procedure could hardly be dignified by the term breakfast. Nor is it really comparable to the "breaking of fast" mentioned in Jn. 21:12, 15, although the nature of the Greek *áriston* is uncertain in any event. In late Greek it was regarded as the equivalent of the classical *deípnon* or dinner, as described in Mt. 22:24; Lk. 11:38; 14:12, but the incident described in John does not appear to involve a proper meal.

Relief showing a man and a woman eating a ceremonial meal (Zenjirli, 9th-8th cent. B.C.) (University Museum, University of Pennsylvania)

According to an old custom, the laborers worked all morning with little or no food, and then had their first meal of the day about noon (cf. Gen. 43:16; Ruth 2:14), although the time varied according to the occupation and circumstances of the eater. This meal normally consisted of pieces of bread, roasted grain, olives, figs, or other fruit in season, and was generally light in character so as not to interfere with the afternoon's work. Eating a heavy meal in the morning was considered a sign of decadence (cf. Eccl. 10:16), since it was inevitably accompanied by drinking (cf. Acts 2:15). Those who had abstained from the noon meal were considered to be "fasting" (cf. Jgs. 20:26; 1 S. 14:24).

The main meal of the day, equivalent to "dinner" (Gk. *deípnon*), occurred about sunset, when the day's labors were finished (cf. Lk. 17:7; 24:29f.). The entire family was present for the occasion, and it was a time of fellowship and general conversation. The food, which normally consisted of a soup or stew augmented by vegetables or herbs, was served in a common dish. Each person took a small piece of bread and dipped it into the bowl (cf. Mt. 26:23; Mk. 14:20) in order to scoop up a little of the contents.

The poor would have to be satisfied with bread and water, and perhaps some olives or other fruits in season, and would seldom taste meat unless they hunted. A lamb was roasted annually at the Passover, with a single animal sometimes being shared between several poor families. This festival, instituted at the time of the Exodus (Ex. 12:3), was celebrated by rich and poor alike. The flesh of goats was also eaten at mealtime, and fish was plentiful in maritime areas. Tasteless meals, or those of inferior quality, were made more appetizing by being flavored with a range of condiments and spices. Children drank milk, but adults normally partook of wine or some similar alcoholic beverage, which was sometimes diluted.

In a nomadic environment the eaters would sit or squat on the ground, but in urban society chairs, seats, and benches would be grouped around a low table for the

benefit of the diners (cf. 1 S. 20:25; 1 K. 10:5). The luxurious living conditions against which Amos protested saw the use of elaborate couches and cushions (Am. 3:12; 6:4), while Ezekiel described elegant furniture (Ezk. 23:41; cf. Est. 1:6) as though it was in normal use among all except the very poor.

By the NT period the Syrian custom of reclining on couches had been adopted by the Greeks and Romans. While women and children sat upright, the men leaned on the left elbow (Sir. 41:19) and ate with the right hand. In the time of Jesus the sabbath was celebrated by means of elaborate banquets (cf. Lk. 7:36; 11:37; 14:7-14; Jn. 12:2). Jesus made use of such occasions to instruct His hearers in charitable and religious duties, even rebuking His host at times because he was manifesting a disparaging attitude (cf. Lk. 7:39; 11:38, 45f.; cf. Jn. 12:7f.).

II. The Royal Commissary.–In the ancient Near East, kings' households were noted for their lavish banquets. This was due partly to the number of retainers, officials, and soldiers that needed to be supported, but also to the practice of entertaining many relatives and guests (cf. 1 S. 20:29; 2 S. 9:7, 13), sometimes including defeated enemies of the king (2 K. 25:29). Solomon in particular followed the expensive tastes of Near Eastern royalty in setting up his household (cf. 1 K. 10:5), and members of his court feasted daily on oxen, sheep, roebucks, deer, and plump fowl (1 K. 4:22f.). Even if some of these foodstuffs came in the form of tribute from lands outside Palestine, life in the royal court was lived in a culinary fashion that could scarcely be imagined by the poor people of the land.

To all this was added the services of such royal officials as bakers, butlers, and wine-tasters, with their own groups of servants. Musicians and dancers frequently performed during large banquets, which often continued for many days. In the Persian period Ahasuerus gave a banquet for his court and state officials that continued for 180 days (Est. 1:4). To maintain royal courts in their traditional opulence was very costly, and all the more inequitable because the great mass of the population struggled to eke out a bare existence year by year.

III. Treatment of Guests.–Traditional Near Eastern hospitality particularly emphasized the proper treatment of guests, who were accorded positions of honor in the households where they were staying. They were under the protection of the host (cf. Gen. 19:8; Jgs. 19:23f.), and on their arrival they were usually extended such courtesies as water with which to wash their feet (cf. Gen. 19:2; Jgs. 19:21; Mk. 7:2; etc.). By NT times the guest was even welcomed ceremonially by means of a kiss (Lk. 7:45), which differed in its intent from the false friendliness of Joab toward Amasa (2 S. 20:9f.) or Judas toward Jesus (Mt. 26:48; Mk. 14:44; Lk. 22:47f.). If the guests did not already possess a change of clothing (cf. Eccl. 9:8), the host would provide whatever was needed, and occasionally placed ceremonial wreaths on their heads (Isa. 28:1). A special honor was bestowed on a guest when the host, or one of his attendants, anointed him with a sweet-smelling ointment (cf. Am. 6:6; Lk. 7:38; Jn. 12:3; etc.).

To sit at a royal table was a special mark of favor, as was the place of honor beside the host at less important gatherings. Guests were normally seated close to the door through which the servants brought the food, so that those who were being honored could partake of it while it was still reasonably hot. In large households servants washed the guests' hands before the eating actually commenced, but in family gatherings the women and children of the household attended to the needs of guests. By NT times it was customary for a formal grace to be said before eating a meal (cf. Mt. 14:19; Mk. 14:22f.; Acts 27:35; etc.), and this was the responsibility of the host. All guests were treated with the greatest courtesy, and Near Eastern traditions required that only the finest that the host had to offer was to be made available for the guest.

IV. Ritual and Symbolic Meals.–Ancient Near Eastern sacrificial rituals involved the offering of food to gods as part of the worship, in the belief that a meal would appease them in some manner. While the burnt offerings of the Levitical sacrificial system were not construed in terms of presenting food to a hungry deity, they were executed carefully so as to achieve the effect of being "a pleasing odor to the Lord" (Lev. 1:17; cf. R. K. Harrison, *Leviticus* [*Tyndale OT Comms.*, 1980], p. 47). The idea of restoring or maintaining fellowship with God in the context of a meal was further stressed in the peace offerings (*zeḇaḥ šᵉlāmîm*). For these sacrifices to take place, the occasion had to be one of gratitude to God, whether of a private or public nature; these sacrifices indicated a desire for continued fellowship, which was expressed as priests and worshipers joined in eating the sacrificial animal (except for the fat, which was burned as God's portion).

The Feast of Passover assumed a quasi-sacramental character from the very beginning, since it commemorated God's saving acts within the context of a ceremonial meal (Ex. 12:3-20). As early as the time of Isaiah (25:6) the Hebrews began consciously to expect the messianic kingdom to be ushered in with a banquet and feasting, perhaps analagous to the way in which the ceremony of the Sinai covenant had been celebrated (Ex. 24:11). Such a belief was also prevalent at Qumrân, where a Davidic and a priestly Messiah were expected, and was a firm part of the eschatology popular in Christ's time (Lk. 13:29). The ritual meal instituted by Jesus just prior to His death, and known as the Lord's Supper, was based upon the Passover celebration. Jesus prescribed it for His followers as a sacramental ordinance that commemorated His vicarious atonement for sinful humanity (cf. 1 Cor. 11:23-26).

R. K. HARRISON

MEAN; MEANING. *I. Adjective.*–"Mean" is used by the AV, RSV, and NEB as an adjective meaning "obscure, insignificant," in Acts 21:39, where Paul describes Tarsus, the capital of Cilicia, as "no mean city" (Gk. *ásēmos*, lit. "without mark"). The AV also uses "mean" to denote "common" in the phrases "mean men" (Heb. *ḥᵃšukkîm*, Prov. 22:29; RSV "obscure men"; NEB "common men") and "mean man" (*'āḏām*, Isa. 2:9; 5:15; 31:8; RSV "man"). The parallelism in the Isaiah passages suggests that the AV's treatment of *'āḏām* here may be incorrect (contra E. J. Young, *Book of Isaiah*, I [*NICOT*, 1965], 120; cf. RSV, NEB).

II. Verb and Noun.–In the RSV the verb "mean" is used in two different senses: "intend" and "signify." It also appears in idiomatic expressions in which one sense is not clearly present to the exclusion of the other. The noun "meaning" in the RSV generally denotes "signification," i.e., the idea that is conveyed by a particular word, action, symbol, etc.

A. OT. The RSV OT uses "mean" in the sense of "intend" to translate several Hebrew verbs: *ḥāšaḇ* (lit. "plan"; Gen. 50:20), *'āmar* (lit. "say"; Ex. 2:14), *zāmam* (lit. "think, plan"; Dt. 19:19), *ḥāpēṣ* (lit. "desire, wish to"; Jgs. 13:32), and the piel of *dāmâ* (lit. "think, plan, intend"; Jgs. 20:5).

Where "mean" is used in the sense of "signify," it does

not represent a verb. Sometimes it is simply supplied by the translators (e.g., Gen. 41:32; Dt. 30:20). In 1 K. 1:41 the question "What does this mean?" represents Heb. *maddû(a)ʿ* (lit. "wherefore?"; so AV). Elsewhere "mean" is used in idiomatic translations of the interrogative pronoun *mâ* (lit. "what?"; e.g., Dt. 29:24; Josh. 4:21; 1 S. 4:6; cf. also "meaning," Gen. 21:29; Dt. 6:20), usually in phrases such as *mah-lᵉḵâ* (lit. "what [is it] to you?"; RSV "What do you mean?" Ex. 12:26; Josh. 4:6; cf. *mîlᵉḵā*, Gen. 33:8), *mah-zō'ṯ* (lit. "what is this?"; Ex. 13:14) or *mah-'ēlleh* (lit. "what are these?"; Ezk. 17:12; 24:29; 37:18). Frequently these questions (usually translated "What do you mean [by or that]...?)" are used not to seek an answer but to express amazement or outrage (cf. *mallāḵem*, Isa. 3:15; *mah-lᵉḵā*, Isa. 22:1; Ezk. 18:2; Jonah 1:6; *mah-taʿᵃśî* [lit. "what are you doing?"], Jer. 4:30; *mah-'ēlleh*, Ezk. 17:12).

"Meaning" occurs twice in the narratives of Joseph's interpretations of dreams in Egypt (Gen. 40:5; 41:11). In both instances it translates Heb. *piṯrôn* (lit. "interpretations [of a dream]"; cf. RSV "interpretation," 40:8, 12, 18), a noun derived from the verb *pāṯar* (RSV "interpret," 40:8, 16, 22, 41:8, etc.). On the interpretation of dreams, *see* DIVINATION III.A; DREAM III.

B. NT. The RSV NT uses "mean" in the sense of "intend" in only three passages: in Mk. 6:48 "mean" represents Gk. *thélō* (lit. "wish"); in Rom. 2:4 and 1 Cor. 6:13 (twice) it is supplied by the translators.

Elsewhere in the NT "mean" is used in the sense of "signify." Gk. *légō* (lit. "say") can sometimes be used and translated in this sense (e.g., Mt. 26:70 par. Mk. 14:68; Jn. 16:18a [in v. 18b "mean" represents *laléō*, and in v. 19 the RSV supplies "mean" in a rather free translation]; 1 Cor. 10:29; Gal. 4:1). In Jn. 11:13 "mean" represents *légō perí* (lit. "tell about"); similar expressions using *toúto* ("this") occur in 1 Cor. 1:12; 7:29 (which uses *phēmi* instead of *légō*); and Gal. 3:17. The cognate noun *lógos* (lit. "word," "speech," "message") is rendered "mean" by the RSV in a paraphrase of Jn. 7:36 (Gk. *tís estin ho lógos hoútos hón eípen*, lit. "What is this word that he is saying?"; RSV "What does he mean by saying?").

The phrase "which means" is used to translate a variety of formulas employed by the Greek NT to introduce Greek translations of Aramaic and Hebrew names and expressions. These formulas include Gk. *hó estin ... legómenos* (mid. part. of *légō;* Mt. 27:33), *hó légetai* (Jn. 20:16), *hó hermēneúetai* (pass. of *hermēneúō*, "interpret, translate"; Jn. 1:42; 9:7), *hó estin methermēneuómenon* (pass. part. of *methermēneúō*, "translate"; Mt. 1:23; Mk. 5:41; 15:22, 34; Jn. 1:41; Acts 4:36), *hó légetai methermēneuómenon* (Jn. 1:38), and *hḗ diermēneuoménē légetai* (pass. of *diermēneúō*, "translate"; Acts 9:36). In Acts 13:8 the RSV uses "be the meaning of" to render the passive of *methermēneúō*.

In contexts dealing with the interpretation of sayings (esp. of Jesus) and events, the RSV often uses "mean" to translate Gk. *eimí* (lit. "be," thus "be a representation of"; see Bauer, rev., pp. 223f.), e.g., Mt. 9:13; 12:7; 13:38; Mk. 9:10; Rom. 9:8; Eph. 4:9. The optative form (lit. "would be") appears in the Lukan writings at Lk. 8:9; 15:26; 18:36; Acts 10:17. Similar in meaning is the expression *thélō eínai* (lit. "wish to be") in Acts 2:12; 17:20. Following acceptable Greek practice, a form of *eimí* is sometimes assumed; thus the translators supply "mean" in Rom. 11:12, 15; Phil. 1:22. "Mean" is also supplied in 1 Cor. 5:10; 2 Cor. 8:13.

In 1 Cor. 15:29 "mean" represents Gk. *poiéō* (lit. "do"). The RSV paraphrases the Gk. *tí poiḗsousin hoi baptizómenoi hypér tôn nekrôn* (lit. "what will they do who are baptized on behalf of the dead?"; cf. AV) with "what do people mean who are baptized on behalf of the dead?" The interpretation of this verse is difficult and has been the focus of much scholarly dispute (see comms.).

The noun "meaning" occurs twice in Paul's discussion of problems that arise in public worship when worshipers exercise the gift of tongue-speaking without the concomitant gift of interpreting tongues (1 Cor. 14:10f). In v. 10b "without meaning" represents Gk. *áphōnos* (lit. "silent," "void of language"), playing on *phōnḗ* (lit. "sound," "voice," "language") in v.10a (RSV "language"). In v. 11 "meaning" represents *dýnamis* (lit. "power" [of the *phōnḗ*, "language"]). *See* SPIRITUAL GIFTS.

MEANI mə-ā'nī (1 Esd. 5:31, AV). *See* MEUNIM.

MEANS. A plural noun used by the RSV to translate a variety of terms and expressions. Often it is used to denote "resources": e.g., "[he] who devises means" (Heb. *maḥᵃšeḇeṯ*, "invention," 2 S. 14:14); "finds sufficient means" (*day*, "sufficiency," Lev. 25:26; cf. v. 28); "provided for them out of their means" (Gk. *hypárchonta*, Lk. 8:3; AV "substance"; NEB "resources"); "gave according to their means" (Gk. *dýnamis*, "ability," 2 Cor. 8:3; AV "power"; NEB "limit of their resources").

The RSV also uses "means" in various phrases to express agency. For example, "by means of" translates the Greek prepositions *ek* (Lk. 16:9), *diá* (Jn. 11:4; 2 Pet. 3:5), and *en* (Rev. 9:19), and "by what means (?)" renders Heb. *bammeh* (Jgs. 16:5; 1 K. 22:22 [MT 21] par. 2 Ch. 18:20) and Gk. *en tíni* (Acts 4:9). The RSV sometimes employs the phrases "by any means," "by all means," and "by no means" to show the emphasis conveyed by the common Hebrew construction of an infinitive absolute with a finite verb from the same root; e.g., "if by any means he be missing" (Heb. *'im-hippāqēḏ yippāqēḏ*, 1 K. 20:39), "by all means return" (*hāšēḇ tāšîḇû*, 1 S. 6:3), "by all means pass over" (*gam ʿāḇôr taʿᵃḇôr*, 2 S. 17:16), "by no means slay" (*hāmēṯ 'al-tᵉmîṯûhû*, 1 K. 3:26f.), "by no means clear" or "by no means leave ... unpunished" (*naqqēh lō' yᵉnaqqeh*, Ex. 34:7; Nu. 14:18; Jer. 30:11; 46:28; Nah. 1:3).

The phrase "By no means!" occurs ten times in the RSV of Romans (3:4, 6, 31; 6:2, 15; 7:7, 13; 9:14; 11:1, 11) as a translation of Gk. *mḗ génoito* (lit. "May it not be"; cf. AV "God forbid"; NEB "Certainly not!" etc.). Paul uses this phrase as a strong negation following a rhetorical question, indicating his abhorrence of such a suggestion. *See* FORBID.

"By their means" is the AV rendering of Heb. *bᵉyāḏām* (lit. "by their hand") in 1 K. 10:29 par. 2 Ch. 1:17 (cf. AV use of "means" for *yāḏ* also in Jer. 5:31; Mal. 1:9); the RSV and NEB offer paraphrases. In the NT the AV frequently renders "if by any means" for Gk. *eí pōs* (lit. "if somehow," Acts 27:12; Rom. 1:10; 11:14; 1 Cor. 8:9; 9:27; etc.; RSV "on the chance that," "somehow," "in order to," etc.). N. J. O.

MEARAH mē-âr'ə [*mᵉʿārâ*]. A Sidonian city or region that is named among the numerous territories remaining for Israel to possess (Josh. 13:4). Because of the difficulties of the text, the identification and location have been much disputed. The LXX reads *enantíon* (or *apó*) *Gazēs*, "before (from) Gaza," which suggests the reading *mēʿāzâ* (with *mêm* representing the preposition, and *zayin* replacing *rêš*). But Gaza can hardly be described as belonging to the Sidonians. Other interpreters have identified

the Aphek of v. 4 with Râs el-ʿAin, which is not far from Lod (*see* APHEK; ANTIPATRIS). If so, then the Hebrew word might be emended to *mēʿārâ*, "from ʿAra," and ʿAra could be located along the Wâdī ʿAra, which leads from the Sharon plain to the plain of Jezreel alongside Megiddo. Simons (*GTTOT*, §§ 239, 295) accepted this location in general, arguing that "Sidonians" is equivalent to "Phoenicians," which in turn equals "Canaanites"; however, he emended *mᵉʿārâ* to *mēʿārîm*, "from the cities." Simons thought that the structure of the clause, which ends with "to Aphek," requires "from [place-name]" at its beginning (*GTTOT*, p. 110). But his main argument seems somewhat forced, and even if his identification of "Sidonians" with "Canaanites" is accepted, the suggested emendation is not entirely necessary, for *ʿÊn ʿIrôn*, a site NE of Hadera on Nahal ʿIrôn (Wâdī ʿAra), would be the equivalent of *Mê ʿAra*, "the spring (waters) of ʿAra" (cf. *GAB*, Map 12; "Israel Touring Map" [Survey of Israel], 1:250,000, Northern Sheet, G-10).

Scholars who would locate the land of the Sidonians farther north (near Sidon) have suggested that Mearah is Mughar Jezzin, E of Sidon (*IDB*, III, 318), or the *Moġeiryié* of Conder (cf. *GP*, II, 381), 9 km. (6 mi.) NE of Sidon. Following this suggestion, Abel (*GP*, II, 247) identified the Aphek of Josh. 13:4 with Afqā, located at the source of Nahr Ibrahim, which courses SE of Byblos near the southern limit of the land of the Amurru (Amorites, also mentioned in v. 4).

Aharoni, who also believed that the sentence structure requires a *terminus a quo* and that this is hidden in the word *mᵉʿārâ*, regarded attempts to identify the name as "purely conjectural" (*LBHG* [2nd ed.], p. 237).

W. S. LASOR

MEASURE. The RSV translation of a variety of Hebrew and Greek verbs, nouns, and expressions.

I. The Verb.–As a verb "measure" means to ascertain or set a length or quantity. In the OT it usually represents the Hebrew verb *māḏaḏ*. Most often *māḏaḏ* is used for measuring length, e.g., the boundaries of pasture lands (Nu. 35:5), distances to cities (Dt. 21:2), the dimensions of Jerusalem (Zec. 2:2 [MT 6]) or of the heavens (niphal, Jer. 31:37); it occurs frequently in Ezekiel's description of the dimensions of the new temple that is to be built in the time of restoration (Ezk. 40–42). In several passages *māḏaḏ* refers to measuring a quantity, e.g., of manna (Ex. 16:18; AV "mete") or barley (Ruth 3:15). Yahweh's greatness is displayed in His ability to measure what no human can measure: He "has measured the waters in the hollow of his hand . . . enclosed the dust of the earth in a measure" (Isa. 40:12; cf. Job 28:25). Moreover, He will create a people who are as measureless as the sand of the sea (Jer. 33:22; Hos. 1:10 [MT 2:1]). On the other hand, the figure of measuring out payment into the fold of one's garment (used as a pocket by the Jews; cf. Ps. 79:12; Lk. 6:38) can depict God's justice (Isa. 65:7). Other OT terms for measuring are *sāpar* (lit. "count, number"; cf. AV), which in Gen. 41:49 describes Joseph's inability to keep records of the vast quantities of grain stored during the seven plenteous years, and *sāḇaḇ* (lit. "go round about"; cf. AV, NEB), which the RSV renders "measure its circumference" in 1 K. 7:15, 23; 2 Ch. 4:2.

In the NT the verb always represents Gk. *metréō*. In a vision that recalls Ezk. 40–42, John is commanded to measure the temple as a symbolic promise of its preservation (Rev. 11:1f.); later he observes an angel measuring the vast and perfectly symmetrical dimensions of the new Jerusalem (21:15-17; see comms.). In 2 Cor. 10:12 Paul criticizes the false apostles who measure their success by one another instead of by God's standard.

II. The Noun.–As a noun "measure" denotes the spatial dimensions, quantity, or capacity of something. The terms thus rendered by the RSV include Heb. *middâ* (Ex. 26:2, 8; Job 28:25), *mᵉśûrâ* (1 Ch. 23:29), *tōḵēn* and *maṭkōneṯ* (Ezk. 45:11); Gk. *métron* (Mt. 7:2 par.; 23:32; Jn. 3:34; Rom. 12:3; Eph. 4:7, 13; Rev. 21:17) and *tosoútos* (lit. "so much"; RSV "a like measure," Rev. 18:7). In some instances the RSV translates a specific unit of volume by "measure": Heb. *ʾêpâ* ("ephah," Dt. 25:14f.; Mic. 6:10; *ʾêpâ wᵉʾêpâ*, RSV "diverse measures," Prov. 20:10), *sᵉʾâ* ("seah," Gen. 18:6; 1 S. 25:18; 1 K. 18:32; 2 K. 7:1, 16, 18), *kōr* ("cor," 1 K. 4:22); Aram. *kōr* (Ezr. 7:22); Gk. *bátos* ("bath," Lk. 16:6), *kóros* ("cor," v. 7), *sáton* ("seah," Mt. 13:33 par. Lk. 13:21). Elsewhere "measure" is supplied where the Hebrew text gives only the numerical unit: Heb. *šēš* ("six," Ruth 3:15, 17; the Tgs. interpreted these to be six seahs — a very heavy load), *ʿeśrîm* ("twenty") and *ḥᵃmiššîm* ("fifty," Hag. 2:16), *ʿiššārôn* ("tenth," possibly a tenth of an ephah; Ex. 29:40), and *šālîš* ("third," probably a third of an ephah, which would be equivalent to a seah; Isa. 40:12; "full measure," Ps. 80:5 [MT 6]). *See* WEIGHTS AND MEASURES.

One of the most common forms of injustice in biblical times was the use of unjust measures. The OT continually reminds God's people that their use of measures must reflect God's standard of justice (e.g., Lev. 19:35f.; Ezk. 45:10f.). "Diverse measures" (NEB "a double standard in . . . measures") are "an abomination to the Lord" (Prov. 20:10), and the "scant measure" is "accursed" (Mic. 6:10).

Several figurative uses occur in the NT. The concern for just measures provides background for Lk. 6:38 (cf. par. Mt. 7:2; Mk. 4:24), where Jesus depicts God's generosity as "good measure, pressed down, shaken together, running over," and assures His followers that "the measure you give will be the measure you get back" — i.e., human generosity will be rewarded by divine generosity. In Jn. 3:34; Rom. 12:3; Eph. 4:7, 13 "measure" is used in connection with gifts of the Spirit. Jn. 3:34 describes God's gift of the Spirit to Christ as being without limit: "for it is not by measure that he gives the Spirit" (cf. vv. 31-35; for differing interpretations of this verse, see comms.). On the other hand, each Christian is assigned by God a (limited) "measure of faith" (Rom. 12:3; cf. v. 6) or "measure of Christ's gift" (Eph. 4:7). All members are enjoined to use their own spiritual gift to build up the body of Christ; in this way the whole body will attain to the (full) "measure of the stature of the fulness of Christ" (v. 13; cf. vv. 15f.).

III. Special Expressions.–Several Hebrew and Greek terms or phrases are translated by English expressions using "measure."

(1) "Beyond measure" is used to describe realities that go beyond the norm — e.g., Solomon's wisdom (1 K. 4:29 [MT 5:9]; Heb. *harbēh mᵉʾôḏ*, lit. "exceedingly greatly"), the blind optimism of Israel's leaders (Isa. 56:12; *yeṯer mᵉʾôḏ*, lit. "exceedingly abundantly"), astonishment at Jesus' healings (Mk. 7:37; Gk. *hyperperissṓs*), and human sinfulness (Rom. 7:13; *kath' hyperbolḗn*, "to excess") — or that are limitless: God's understanding (Ps. 147:5; Heb. *ʾên mispār*, "without number") and the appetite of Sheol (Isa. 5:14; *liḇlî ḥōq*, "without limit"). (Cf. Gk. *ámetros* [RSV "beyond limit"] in 2 Cor. 10:13, 15; *see* LIMIT.)

(2) "Full measure" emphasizes completeness, as in references to total misery (Ps. 80:5 [MT 6]; Heb. *šālîš*), judgment (Isa. 47:9; *tōm*, "completeness"), and manifestation of evil (Dnl. 8:23; hiphil of *tāmam*, "complete"; cf. "fill up the measure," 1 Thess. 2:16; Gk. *anaplēróō*, "fill up").

(3) "Just measure" represents Heb. *mišpāṭ*, "justice," in Jer. 10:24; 30:11; 46:28, where corrective punishment

is contrasted with the judgment that destroys completely. A "just measure" of divine chastisement shows restraint because of human weakness but does not leave sin unpunished.

IV. Difficult Usages.–The meaning of Heb. *sa'sse'â* (or *sasse'â*) in Isa. 27:8 is uncertain. The AV ("in measure") and RSV ("measure by measure") understand it as a reduplication of *se'â* (see KD); but other scholars have interpreted it as denoting "shouts to stir sheep and goats" (KoB, p. 646), thus "scaring" or "driving out."

In Acts 27:17 Gk. *boētheía* (AV, lit., "helps"; RSV "measures"; NEB "tackle") denotes some form of nautical equipment, the precise nature of which is not known. For a brief summary of the four main conjectures, see E. Haenchen, *Acts of the Apostles* (Eng. tr. 1971), p. 703 n. 1.

K. H. MAAHS N. J. O.

MEASURING LINE [Heb. *qāw, qāweh* (2 K. 21:13; Zec. 1:16), *qewēh hammiddâ* (Jer. 31:39), *ḥebel hammiddâ* (Zec. 2:1 [MT 5])]; AV also LINE; NEB also PLUMB-LINE; **MEASURING REED** [Heb. *qenēh hammiddâ*] (Ezk. 40:3, 5; 42:1619); NEB (MEASURING-) ROD; **MEASURING ROD** [Gk. *kálamos* (Rev. 11:1), *métron kálamos* (21:15)]; AV REED; **PLUMB LINE** [Heb. *'anāḵ*] (Am. 7:7f.); **PLUMMET** [Heb. *mišqōleṭ* (2 K. 21:13), *mišqeleṭ* (Isa. 28:17), pl. *'eḇen*–'stones' (Isa. 34:11), *'eḇen habdîl*–'stone of tin'(?) (Zec. 4:10)]; AV, NEB, also STONE(S); *see also* LINE. Implements used in taking measurements.

The measuring line (usually *qāw* or *ḥeḇel; see* LINE) was an important tool used by builders and carpenters (e.g., 1 K. 7:23; Isa. 44:13); but most often it is mentioned as a tool of surveyors (e.g., Jer. 31:39; Zec. 1:16; 2:1f. [MT 5f.]), frequently in connection with the apportionment of land (e.g., Ps. 16:6; Am. 7:17; Mic. 2:4f.). Such lines were often used in conjunction with plummets (cf. 2 K. 21:13; Isa. 28:17) and measuring reeds (Ezk. 40:3). They were probably made of various materials, FLAX being one of the more durable varieties (Ezk. 40:3). Sometimes the exact length of the line is given, e.g., twelve cubits (1 K. 7:15), thirty cubits (v. 23 par. 2 Ch. 4:2).

The measuring reed is mentioned primarily in Ezk. 40–42, where it is used to describe the dimensions of the eschatological temple. These measuring sticks were derived from tall, stalky grasses that grow in marshy areas (Heb. *qāneh*). The reeds referred to are most likely the *Arundo donax* and the *Phragmites communis*. The latter, very common along the rivers of Palestine, grows from 1¼ to 3 m. (4 to 10 ft.) in height, with a bamboo-like stalk 1¼ to 2½ cm. (½ to 1 in.) in diameter. In time, no doubt, reed measures came to be made of many materials. The *kálamos* of Rev. 21:15 (RSV "rod," but usually "reed" in NT; cf. Mt. 11:7; 12:20; Mk. 15:19, 36), e.g., is made of gold. It is apparent, therefore, that the terms for "reed" came to designate a standardized measurement. Thus, Ezekiel's reed was six long cubits or about 3 m. (10 ft.) in length (40:5; 41:8). *See also* REED.

A plummet is a weight made of stone (cf. AV, NEB, Isa. 34:11) or metal which, when suspended by a cord, produces a plumb line. The plumb line is used to measure a straight vertical plane.

These tools are used figuratively in several passages to describe God's judgment upon His people. In Lam. 2:8 God stretches out a plumb line to discover defects in Zion (see *IB*, VI, 18). Similarly, in Am. 7:7f. God tests the vertical dimension of Israel, here symbolized by a wall. Israel had originally been built with vertical rectitude but had failed to maintain this standard. Such a wall is unstable and fit only to be toppled (cf. v. 9). (The "plummet" of Zec. 4:10, however, is quite possibly a mistranslation; for a defense of the NEB ["stone called Separation"], see Baldwin, pp. 122f.) In 2 K. 21:13 God announces that Judah and Jerusalem will be judged by the "line of Samaria, and the plummet . . . of Ahab" — i.e., they will receive the same judgment of total destruction.

Job 38:5 pictures God using these tools to construct the cosmos out of chaos. Conversely, however, with a clear reference to Gen. 1:2 (where the precreational chaos is described as "without form [Heb. *tōhû*] and void [*bōhû*]"), Isaiah prophesies that God will use "the line of confusion [*tōhû*] . . . and the plummet of chaos [*bōhû*]" as instruments of vengeance against a people who oppose His purposes (Isa. 34:11).

Bibliography.–J. Baldwin, *Haggai, Zechariah, Malachi* (*Tyndale OT Comms.*, 1972); *TDOT*, IV, *s.v.* "ḥbl" (H.-J. Fabry).

K. H. MAAHS

MEASURING REED; MEASURING ROD. *See* MEASURING LINE.

MEAT [Heb. *bāśār*] (Nu. 11:4, 13, 18, 21, 33; Jgs. 6:19-21; 1 S. 2:13, 15; 1 K. 17:6; etc.); AV FLESH; NEB also FLESH, FLESHPOTS, etc.; [*ṭiḇḥâ*] (1 S. 25:11); AV FLESH; [*še'ēr*] (Ps. 78:20); AV FLESH; [*'ešpār*] (2 S. 6:19; 1 Ch. 16:3); AV FLESH; [Gk. *kréas*] (Rom. 14:21; 1 Cor. 8:13); AV FLESH. In Mic. 3:3 the RSV has "meat" and the NEB "flesh," both following the *sárx* of the LXX, while the AV has "as," following the MT *'ašer*, which could be emended to read *še'ēr* (see the comms.). On "meat market" (1 Cor. 10:25), *see* MARKET.

In general, Heb. *bāśār, ṭiḇḥâ* (slaughtered meat), *še'ēr*, and Gk. *kréas* designate the meat or flesh of animals, used particularly for food and for sacrifice. Thus these terms describe the quails sent for food for the complaining Israelites (Nu. 11), the young goat offered as a sacrifice by Gideon (Jgs. 6), the offered meat greedily snatched up by Eli's sons (1 S. 2), the food sent to Elijah (1 K. 17:6), etc. Addressing the problem of eating food sacrificed to idols, even if sold in a meat market (1 Cor. 10:25), Paul advised love and care for the sake of the weaker brother: "Therefore, if food is a cause of my brother's falling, I will never eat meat, lest I cause my brother to fall" (8:13).

A precise identification of *'ešpār* is impossible. Conjectures include meat (NAB), date cake (JB, NIV), or wine (KD).

M. W. MEYER

MEAT OFFERING. *See* SACRIFICES AND OFFERINGS IN THE OT.

MEBUNNAI mə-bun'ī [Heb. *mebunnay*]. Listed in 2 S. 23:27 as one of David's thirty mighty men who were renowned for their heroic deeds. In the par. 1 Ch. 11:29 (cf. also 27:11; 20:4 par. 2 S. 21:18) his name is given as SIBBECAI. Scribal error and some similarity of the two forms in Hebrew account for the difference in spelling.

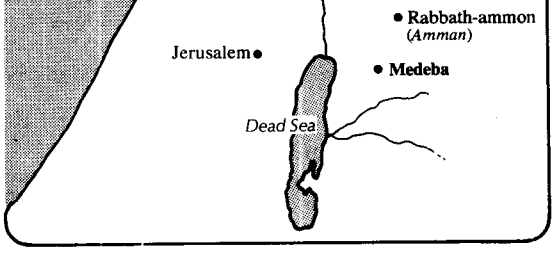
MECHERATHITE mə-ker'ə-thīt [Heb. *mekērāṯî*]; NEB FROM MECHERAH. Patronymic of Hepher, one of the mighty men of David's army (1 Ch. 11:36); but cf. par. 2 S. 23:34, where "of Maacah" is given without the name "Hepher." It is possible that both passages are corrupt and should be read, "Hepher the Maacathite." *See* MAACATHITES.

MECONAH mə-kō'nə [Heb. *mekônâ*–'foundation'; Gk. *Machna*]; AV MEKONAH. A place in the Shephelah settled by Jews who returned from the Exile (Neh. 11:28). From the context it was probably near Ziklag; thus Simons (*GTTOT*, § 317, p. 145) proposed Khirbet umm ed-Deimineh, about 23 km. (14 mi.) NNE of Beer-sheba. He also identi-

fied it with Madmannah (Josh. 15:31) and with Machbenah (1 Ch. 2:49). See *GTTOT*, §§ 322, 1076, pp. 155, 389.

W. S. L. S.

MEDABA med'ə-bə (AV, NEB, 1 Macc. 9:36). *See* MEDEBA.



MEDAD mē'dad [Heb. *mêḏāḏ*–'affectionate'(?)]. One of the seventy elders chosen to share with Moses the burden of leadership. Medad and Eldad were not in the tent of meeting when the Spirit of the Lord descended on the rest of the seventy, equipping them for their office; but they received the same Spirit and prophesied in the camp (Nu. 11:24-30).

MEDAN mē'dan [Heb. *mᵉḏān*]. Third son of Abraham by Keturah (Gen. 25:2; 1 Ch. 1:32), and like the other sons, e.g., Midian, Dedan, etc., probably eponymous head of an Arabian tribe. Since Dedan and Midian settled in north Arabia, probably the tribe of Medan did as well. The suggested connections with the Badana conquered by Tiglath-pileser III (*ca.* 732 B.C.; cf. *ANET*, p. 283) and the Arabian personal name Abd al-Madan are not certain.

The name also appears in the MT of Gen. 37:36 (*hammᵉḏānîm*), but the RSV, NEB, AV, and NASB, following most ancient versions and the context (see v. 28), translate "Midianites." Although *hammᵉḏānîm* does seem to be a corruption of Midian, it is not necessary to consider Medan as a corrupt doublet for Midian in Gen. 25:2 or 1 Ch. 1:32.

C. G. RASMUSSEN

MEDEBA med'ə-bə [Heb. *mêḏᵉḇā'*; Gk. *Maidaba*, Apoc. *Mēdaba*]; AV Apoc., NEB Apoc., MEDABA. A town about 32 km. (20 mi.) S of Rabbath-ammon (modern Amman, Jordan) on the King's Highway between Heshbon and Dibon. The modern town, named Madaba, is located upon the ruins of the earlier cities.

I. History.–At the time of the Exodus Medeba is mentioned as one of the established cities in southern Transjordan that came under control of the Israelites after their victory over Sihon (Nu. 21:21-31). Although the tribal allotments gave the "tableland of Medeba" to the tribe of Reuben (Josh. 13:9, 16), the territory continued to be disputed among the Israelites, Ammonites, and Moabites. During the reign of David, Joab defeated the Ammonites and Syrians encamped before Medeba (1 Ch. 19:7, 14f.). On the MOABITE STONE Mesha claimed that he had recovered Medeba from the Israelites who had occupied it under Omri. Isa. 15:2 foretells its destruction as a Moabite city. During the Maccabean period John the son of Mattathias was killed by the Jambri, a brigand tribe from Medeba (1 Macc. 9:35-42; Josephus *Ant.* xiii.1.2 [10f.]). John Hyrcanus captured Medeba from the Syrians after a six-month siege (*Ant.* xiii.9.1 [254f.]). Much later, to gain the help of the Nabateans, Hyrcanus II offered Medeba and some other towns to their king (*Ant.* xiv.1.4 [18]).

Medeba was a flourishing city during the Nabatean and Roman periods. It is listed in the *Onomasticon* of Eusebius, and its bishop was present at the Council of Chalcedon in A.D. 451. Medeba no doubt suffered under the Persian invasion in the early 7th cent., but the demise of Christianity and subsequent abandonment of the city apparently occurred a few centuries later.

The modern resettlement of Medeba occurred in 1880, when bedouin Christian nomads from Kerak obtained permission to occupy the ruins. The Christian character of the modern town has been qualified by the arrival of Palestinian refugees in the late 1940's. This modern resettlement has restricted archeological work, which has concentrated on the Byzantine period, especially the churches.

II. Mosaics.–Medeba has become famous for its many and beautiful mosaics, some of the Roman period but most in the churches of the Byzantine period.

The "Medeba Map," the best-known mosaic floor, is from the 6th cent., making it the oldest extant map of Palestine. Originally about 23 m. by 6 m. (77 ft. by 20 ft.), this unusual mosaic depicted the eastern Mediterranean coast from Lebanon to the Delta in Egypt and inland as far as Amman, Kerak, and Petra (i.e., Transjordan). Unfortunately, more than two-thirds of it was destroyed by the construction of St. George's Orthodox Church (1896). The remaining portion shows the Delta area, the Sinai desert, and south-central Palestine (including the Dead Sea, Jerusalem, and part of the Jordan River). *See* Plate 42.

Like other mosaics from this period, this floor is made of stone cubes averaging about 1 cm. (½ in.) on a side in a variety of natural colors — black, white, yellow, gray, brown, and several shades of red and blue-green. The cubes (numbering about 2,300,000) were tightly fitted together and laid in a cement bed with no lateral mortar, demonstrating the skilled craftsmanship in this art during the late Roman and Byzantine periods.

This map has been very helpful for the study of topography and the identification of sites in Palestine during the biblical and Byzantine periods. Some sites are not merely named but also given brief descriptions of their significance during a given period. The many churches of the Byzantine period are depicted with red roofs. Of central significance is the plan of Jerusalem, showing its streets, walls, gates, and churches — with the Church of the Holy Sepulchre in direct perspective to give it prominence. Archeological work has sometimes been guided by this map and has sometimes confirmed its details. It will continue to contribute to the study of the art, architecture, liturgy, topography, flora, and fauna of ancient Palestine.

Although not as spectacular as the map, the mosaic floors in the other churches of Medeba reveal the same high level of craftsmanship and contribute significantly to the study of early Christianity. The remains of these sixth- and seventh-century churches allow the following observations.

(1) Medeba was a large Christian community, which had to be affluent to build and maintain these edifices (at least fourteen in the 6th cent.). In this respect, Medeba was typical of many cities in Transjordan and Cisjordan — e.g., Jerash, Umm el-Jimal, Rihab, Amman, Ma'an — reflecting the extent and wealth of Christianity during this period.

(2) The scenes depicted in these floors are taken from everyday experiences and activities — hunting, fishing, harvesting of grapes and wine making, pastoral life, various flora and fauna. In none of these is it possible to identify

positively a biblical scene or theological motif, although such scenes and motifs were prevalent in contemporary church art in other parts of the Byzantine Empire (as in Italy and Greece). At times even pagan motifs were incorporated into the mosaics. In the nave of the Apostles Church (dated A.D. 578/579), a large medallion contains the figure of a woman whose upper torso emerges from a body of water containing various forms of marine life. She is identified as *Thalassa* ("Sea"), a well-known goddess in the pagan pantheon. The Medallion is surrounded by a Greek inscription containing an OT citation. These phenomena suggest that the development of Christian art as a distinct modality was very complex.

(3) The evidence of iconoclasm in some of these sixth-century churches indicates that this negative reaction to pictorial representations of living beings (animals, birds, humans) in the churches arose much earlier than has traditionally been maintained.

(4) The three Greek inscriptions addressed to Mary in the mosaic floor of the Chapel of the Virgin Mary reflect the veneration of Mary in this community. The central inscription is a fine hexameter verse calling the worshiper to sanctification by "looking to the Virgin Mary, the mother of God [Gk. *theométōr*], and Christ. . . ."

(5) The date of another inscription in the Chapel of the Virgin Mary indicates that the chapel was constructed in A.D. 662/663 — about thirty years after the Moslem conquest of this area. This and other evidences from seventh- and eighth-century churches indicate a much more tolerant attitude to Christianity in early Islam than has often been thought.

A picture emerges of early Christianity very much in the world and enjoying its experiences and delights and of a church and community in relationship to and sometimes in conflict with its environment. Clearly, early Christianity was a far more complex, varied, and richer institution than commonly supposed.

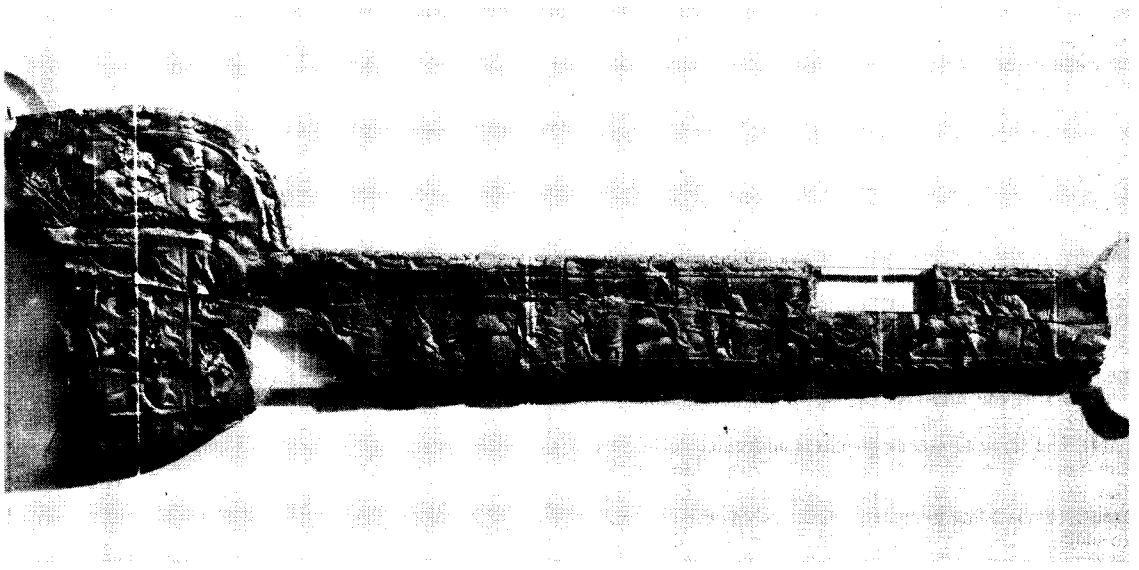
B. VANELDEREN

MEDES mēdz; **MEDIA** mē'dē-ə [Heb. *māḏî, māḏay*; Aram. *māḏay*; Assyr. *Madai*; Old Pers. *Māda*; Gk. *Mēdoi, Mēdia*]; AV also MEDIAN (Dnl. 5:31 [MT 6:1]). An ancient people and land SW of the Caspian Sea, between the Zagros Mountains and the Salt Desert (Dasht-i-Kavir), including Azerbaijan in the north (Media Atropatene). Most of this area is mountainous, with fertile valleys and some broad plains where horses were raised.

I. Culture and Religion.–So little excavation has been done in the Median homeland that there is only scattered material evidence for cultural and religious history. The Medes were Aryans (cf. Gen. 10:2), closely akin to the Persians, and entered Iran as nomads *ca.* 1000 B.C. Their religion may have begun as a form of nature worship with animal sacrifices, the Magi tribe having a privileged role. Before the rise of Cyrus this faith had been altered by assimilation of the teachings of Zoroaster (7th cent.?). Zoroaster conceived of two gods — a good power, Ahuramazda, and an evil power, Ahriman — and propagated a nonsacrificial cult that involved the sacred fire and lacked images. (*See* RELIGIONS OF THE BIBLICAL WORLD: PERSIA.) Details of Median beliefs remain hypothetical in the absence of early documentation.

That the Medes had knowledge of writing is unquestionable, but the nature of their script, if any, is uncertain. It could have been a complicated cuneiform script like



Babylonian, a simple form like Urartian, Old Persian, or Elamite, or a hieroglyphic script. Consequently the Median language can be only incompletely reconstructed from philological research in related tongues and from occasional quotations and loanwords.

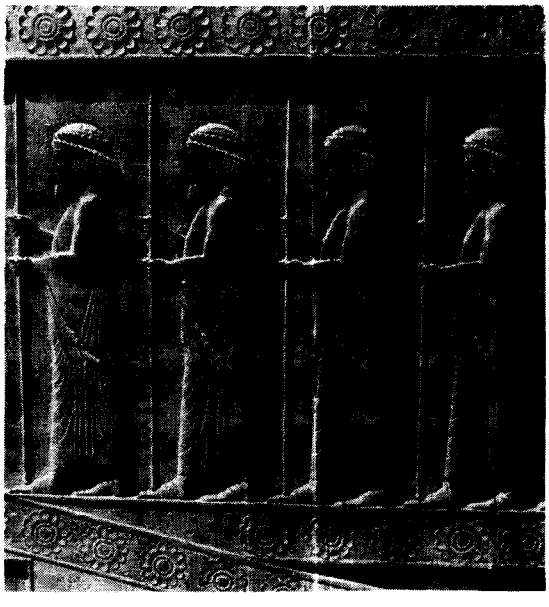
Sculptures of the Persian period give hints of Median appearance, and a few objects unearthed in Persia can be called Median by comparison with these sculptures (e.g., a golden dagger sheath from the Oxus Treasure, now in the British Museum). Some rock-cut tombs in the Zagros Mountains were probably made for Median nobles of the Achaemenian court.

II. History.–From the 9th cent. B.C., Assyrian inscriptions record attacks on Median settlements in northern Iran (*ARAB*, I, § 581, Shalmaneser III; § 739, Adadnirari III). At that time there was no single Median state but instead numerous tribal groups that often fought each other and raided the neighboring states of Mannai and Urartu. Tiglath-pileser III established control over some Median territory, claiming capture of 65,000 men, *ca.* 740 B.C. (*ARAB*, I, §§ 784, 795); Sargon II fought against Medes, Manneans, and Urartians, with numbers of chieftains submitting to him. One leader, Dayaukku, was deported to Syria, and Israelite citizens were settled in Media (*ARAB*, II, § 56; 2 K. 17:6; 18:11).

Apparently Media posed little threat to Assyria for the next two decades. Cimmerian and Scythian invasions, however, ousted Assyria from Mannai and pressed upon Media so hard that three Median chiefs sought Assyrian aid *ca.* 676 B.C. Having lost his supply of valuable horses from Mannai, Esarhaddon of Assyria was ready to take them from more distant Media. His troops penetrated as far as the Salt Desert near Tehran, and various cities were subjugated (R. Borger, *Die Inschriften Asarhaddons* [*AfO*, Beiheft 9, 1956], pp. 34, 54f.). Vassal treaties were imposed upon the principal Median rulers in 672 B.C., binding them to Assyria and its kings. The number of chieftains mentioned shows that Media was still a collection of separate principalities.

Little is known of the course of Median history through the subsequent decades. Ashurbanipal claimed conquest

Golden dagger sheath from the Oxus Treasure (Trustees of the British Museum)



of one chieftain and several Median settlements in the course of his campaign against the Mannai, *ca.* 660 B.C. (*ARAB*, II, § 854). The cuneiform records mention nothing more about Media until 615 B.C. This gap may be partly filled from Herodotus's account of the rise of Media (i.97ff.), although it is open to varying interpretations, only one of which is given here. He named four kings of Media: Deioces, Phraortes, Cyaxares, Astyages. The first may be the Dayaukku whom Sargon exiled or another prince of the same name (a second Cyaxares is attested, in Sargon's time, *ARAB*, II, § 147). Unification of the six Median tribes is credited to Deioces, while his son Phraortes subjected the adjacent Persian tribe, conquered Asia (Armenia and Anatolia), and died in an attack on Assyria. Phraortes is commonly identified with Kashtaritu, a chieftain who troubled Esarhaddon *ca.* 670 B.C., but the tenuous argument for this equation should most probably be discounted (R. Labat, *Journal asiatique*, 249 [1961], 1-12) and his reign dated between 650 and 625 B.C.

With Cyaxares more information becomes available through the combination of Greek and Babylonian sources. His first years were clouded by Scythian dominance, brought about by a continued Median attack on Assyria, who summoned these barbarian allies. By 616 B.C. Cyaxares had regained Median independence, enabling him to launch a new assault on Assyria. After Median troops had sacked the ancient capital of Asshur, Cyaxares made alliance with Babylon, and one of his princesses married the crown prince Nebuchadrezzar (who built the "Hanging Gardens" of Babylon to counter her pining for the Median hills, according to Berossus, *apud* Josephus *CAp* i.19 [141]). Cyaxares destroyed Nineveh, in conjunction with Babylonian forces, in 612 B.C. and the last remnants of Assyrian power at Haran in 610 B.C. While Babylon established its sway over Syria and Palestine, Cyaxares extended Median rule across Anatolia to the kingdom of Lydia. After an inconclusive war, Media and Lydia concluded a peace treaty through the mediation of their respective allies, Babylon and Cilicia (585 B.C.; Herodotus i.74).

Cyaxares died about that time, and the throne passed to his son Astyages, whose daughter Mandane was mother of CYRUS, ruler of the related subject nation of Persia. Cyrus built up his strength, overthrew his grandfather in 549 B.C. with the help of disaffected Median generals, and inaugurated the Persian (Achaemenian) Empire. Only in this period does Media figure in the OT; Jeremiah saw her drinking the cup of wrath (25:25) and soon afterward participating in the fall of Babylon (539 B.C.; Jer. 51:11, 28; Isa. 13:17; 21:2).

Media's loss of power did not involve loss of identity or influence, however. A Mede attempted to assert independence at the beginning of Darius's reign, claiming royal lineage, and was crushed with difficulty. Cyrus made the Median capital Ecbatana (modern Hamadân) his capital, a position it retained beside Persepolis and Susa until Alexander's conquest (cf. Ezr. 6:2). Moreover, he adopted the system of government set up by Median kings and

Median guards from the relief on the eastern stairway of the Apadana in Persepolis (ca. 485 B.C.) (L. A. Willis)

retained Medes in high office. It is significant that the term "satrap" (governor of a province) is Median in origin and that the word for king is written in Median form in Old Persian texts. The predominating Median influence is also shown by the word order in the phrase "Medes and Persians" (cf. Dnl. 5:28; 6:8, 12, 15; 8:20; *see also* DANIEL, BOOK OF VIII.B) during the early decades, and Greek writers spoke of the great Persian War as "the war with the Medes" in some cases (Thucydides i.14). Later the names were reversed (cf. Est. 1:3, 14, 18f.), although an official chronicle kept the old usage (10:2).

1 Maccabees mentions Media under Syrian rule (6:56) and under the Parthians (14:1-3; cf. Josephus *Ant.* xx.3.1-4 [54-74]). Among the Pentecost crowd (Acts 2:9) were Medes, most likely from Media Atropatene, a state allied with Rome against the Parthians.

MEDIAN mēd'ē-ən (Dnl. 5:31, AV). *See* MEDES, MEDIA.

MEDIATE [Heb. *pālal* (1 S. 2:25); Gk. *mesítēs* (He. 8:6)]; AV also JUDGE (1 S. 2:25); NEB also INTERVENE (1 S. 2:25); **MEDIATOR** [Heb. *mēlîṣ* (Job 33:23; Isa. 43:27); Gk. *mesítēs* (1 Tim. 2:5; He. 9:15; 12:24)]; AV also INTERPRETER (Job 33:23), TEACHER (Isa. 43:27); NEB also SPOKESMAN (Isa. 43:27).

Scholars disagree about the meanings of Heb. *pālal* and *mēlîṣ*. KoB (p. 263) and *CHAL* (pp. 292f.) list two roots for *pll*, one meaning "arbitrate," "intercede" (only in the piel), and the other meaning "pray" (only in the hithpael). But BDB (p. 813) is probably correct in seeing here only one root, which perhaps originally meant "break" or "cut off" and developed to mean "divide," "put on one side," "compare with one another," "distinguish," "discriminate," "pass judgment," "mediate" (so D. R. Ap-Thomas, *VT*, 6 [1956], 230-39; cf. E. A. Speiser, *JBL*, 82 [1963], 301-306). The meaning "pray" for the hithpael probably arose from the sense of making oneself a mediator, interposing oneself, between man and God (cf. KD, *Isaiah*, p. 94; *see also* INTERCESSION). Thus 1 S. 2:25 may be translated: "If a man sins against a man, God will mediate [piel of *pālal*] for him; but if a man sins against Yahweh, who will make himself a mediator [hithpael of *pālal*] for him?" Although this question seems to rule out the possibility of a mediator between man and God, it probably only reflects the absence of spiritual leadership at that time (cf. vv. 12-17, 27-36, and esp. 3:1, which implies a lack of prophets, who served a mediatorial function; see R. R. Wilson, *Prophecy and Society in Ancient Israel* [1980]).

The Heb. *mēlîṣ* is a hiphil participle from *lîṣ*, which means "boast" in the qal and "mock," "ridicule" in the hiphil (hence the more common meaning of *mēlîṣ*, "mocker," "scorner"). Although it is at first difficult to see how *mēlîṣ* could mean both "mediator" and "mocker," M. A. Canney (*AJSL*, 40 [1924], 137) suggested that the basic meaning of *lîṣ* was "talk freely," and that this meaning developed in two directions. Negatively, it came to mean "babble," "boast" (i.e., talk freely about oneself) or "ridicule," "mock" (i.e., talk freely [in a negative way] about others). Positively, *lîṣ* may mean "be articulate," hence in the hiphil "cause to be articulate," "interpret," and the participle "interpreter," "spokesman," "intermediary" (cf. R. Gordis, *Book of Job* [1978], p. 377). H. N. Richardson (*VT*, 5 [1955], 167-69, 434-36) preferred to avoid the idea of "interpreter." He translated *mēlîṣ* "intermediary," even in Gen. 42:23, since this meaning fits all the contexts well. Certainly in Isa. 43:27 *mēlîṣ* means "intermediary," "mediator," rather than "interpreter"; it probably refers to the priests (cf. "princes of the sanctuary" in v. 28, a term used of priests in 1 Ch. 24:5), although the prophets may also be in view (R. N. Whybray, *Isaiah 40–66* [*New Century Bible Comm.*, 1975; repr. 1981], p. 93), for both groups served as mediators (*see* MEDIATION).

In Job 33:23 Elihu states that one of the functions of an angelic mediator is "to declare to man what is right" (Heb. *yošrô*, lit. "his uprightness," which E. Dhorme, *Comm. on the Book of Job* [Eng. tr. 1969], p. 501, translated "his duty," i.e., what one must do to be upright). M. Pope (*Job* [*AB*, 3rd ed. 1973], p. 251) related this idea to the "Mesopotamian belief in a personal god who looked after the interest of his mortal client." In intertestamental times the similar notion of guardian angels developed, although in most of the OT angels function as messengers who communicate the divine will to mankind (*see* ANGEL).

Mēlîṣ occurs several times in the Qumrân Thanksgiving Hymns. M. Burrows (*More Light on the Dead Sea Scrolls* [1958; repr. 1978], pp. 286f.) concluded that *mēlîṣ* in these hymns means "one who declares" and may be used in reference to an angel, as it is in Job 33:23. While an angelic spokesman seems to be in view in 1QH 6:13f., a human spokesman is clearly referred to in 1QH 2:13 ("a spokesman of knowledge"); he is contrasted with a "spokesman of lies" in 2:14, 31 (cf. 4:7, 9).

Bauer (rev., pp. 506f.) defined Gk. *mesítēs* as "one who mediates between two parties to remove disagreement or reach a common goal." Thus Christ is the "one mediator between God and men" (1 Tim. 2:5), the only one who can reconcile the world to God (2 Cor. 5:18f.; Eph. 2:12-16; Col. 1:20). In Hebrews Christ's mediatorial role is always linked to the new covenant (M. Dibelius and H. Conzelmann, *Pastoral Epistles* [Eng. tr., *Hermeneia*, 1972], p. 42, saw this same link presupposed, though not stated, in 1 Tim. 2:25). The stated superiority of the new covenant to the old implies a similar superiority of the mediator of the new covenant to the mediator of the old, i.e., Moses, whom Philo (*De vita Mosis* ii.166) and Paul (Gal. 3:19) called the *mesítēs* of the old covenant (see F. F. Bruce, *Epistle to the Hebrews* [*NICNT*, 1964], pp. 167f.; J. N. D. Kelly, *Comm. on the Pastoral Epistles* [*HNTC*, 1963], p. 63; but cf. *TDNT*, IV, 618f.). O. Becker (*DNTT*, I, 374f.) and A. Oepke (*TDNT*, IV, 619f.) stressed that this link with the covenant gives *mesítēs* a legal connotation in Hebrews: one who procures and guarantees "the right instituted by God through Christ for liberation from death and sin." Hence in Hebrews *mesítēs* means "guarantor (of the covenant)." G. A. LEE

F. Christ as Prophet
G. Christ as Servant

I. General Concept.–When God reveals Himself to mankind or brings His authority, power, and love to bear on the life of His people, Scripture describes Him as acting through some intermediate figure. An intermediary was sometimes an angel, sometimes one member of the community responding to a special call from God to act between Him and the people. More often, however, the mediator was an official figure within the life of the people, a prophet, priest, or king, fulfilling a traditional office to which he or she had been called and appointed, sometimes by anointing. Such mediating figures also led and directed the approach of people to God in response to His power and love.

In the NT the mediation, leadership, and inspiration of Jesus Christ dominate the approach of God to mankind and the response of mankind to God. "There is one God, and one mediator between God and men, the man Christ Jesus" (1 Tim. 2:5).

It is true that many passages in Scripture severely criticize official mediation, especially that of the priests in the temple worship (Isa. 1:10-16; Hos. 6:6; cf. Am. 7:10). Such criticism, however, is leveled not at the office of the mediating priesthood but at superstitious trust in the automatic efficacy of the mere paraphernalia of mediation. It is also true that many passages in Scripture seem to record an individual's bypassing a mediator to approach God directly (Gen. 12:1; Ps. 32:5). All such passages, however, should be interpreted as occurring within the context of a life and worship inalienably based on mediation. It is frequently insisted that without some form of mediation, God does not bless or receive mankind (cf. He. 9:22).

Greek *mesítēs,* "mediator," is used six times in the NT (Gal. 3:19f.; 1 Tim. 2:5; He. 8:6; 9:15; 12:24). In Hellenistic Greek it has the sense of umpire, arbitrator, or negotiator for peace. It can also refer to the security or guarantee for an agreement. (See *TDNT,* IV, 599-601.)

II. Mediation and the Covenant.–In the Bible, beginning with creation, all intercourse between God and mankind occurs within the framework of the COVENANT. Mankind is created and elected to express love and obedience always within the definite form of a covenant established by God's grace that calls for a response of love and trust. The covenant is the context of the office of mediator.

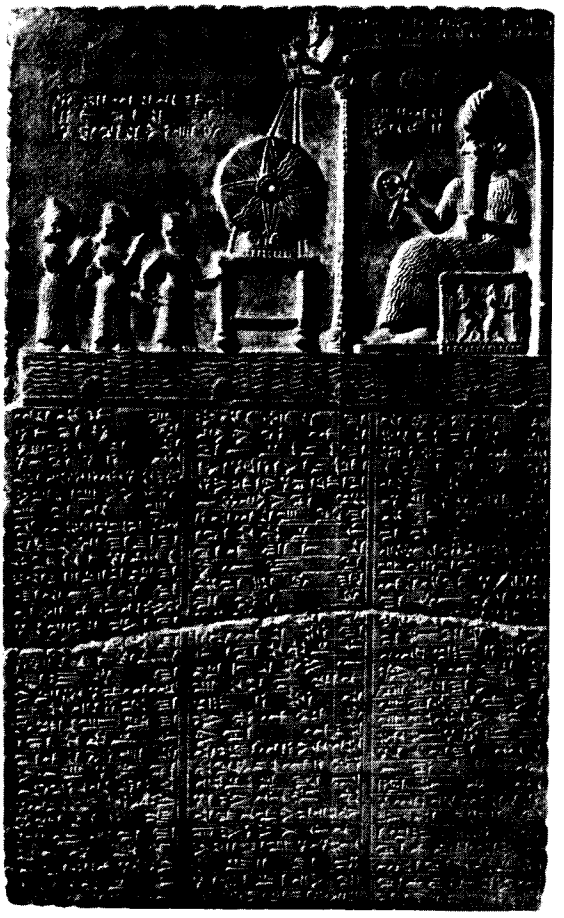
The OT constantly reveals humans as hopelessly unable to fulfil their part in the covenant relationship within which they are meant to find true health and destiny. God never breaks the covenant, but in the history of Israel the people constantly repudiated it and called it into question. Thus God called and authorized mediators to restore the broken covenant in His name and by His grace, so that the people could again enter into relationship with Him, claim the covenant promises, seek afresh to keep the commandments given with the covenant, and fulfil their calling as the chosen people of the covenant.

The task of mediation fell at times on certain outstanding individuals, such as Moses or the "servant" described in Isaiah, who seemed to belong to no distinct office or class. But more often the mediators were the prophets, priests, and kings of Israel, whose role was routinely fulfilling an office rather than personally responding to a crisis. "To conclude this covenant and maintain it, God willed to make use of the ministry of men. Moses was mediator of the covenant of Sinai. But through all the course of Israel's history, men are called, anointed and sent to continue to make known this Covenant, to seal it freshly, and to affirm that in virtue of this Covenant God reigns over the people whom He has chosen and called into communion with Himself" (Bosc, pp. 17f.).

The covenant has a universal goal. Although its history is recounted within the particular sphere of the life of Israel, its framework reveals it as the basis of God's whole creative activity and of His relationship with all nations (Gen. 1–11; 12:1-13; Isa. 2:1-5; 56:1-8). God's people, in fulfilling the covenant, are meant to fulfil a role of mediation so that all mankind will receive the blessings of the one covenant.

The NT places the mediating work of Jesus Christ in the context of fulfilling the covenant. Hebrews especially describes Christ as the mediator of the "new or better covenant" (He. 8:6; 9:15; 12:24). In Christ the universal nature of mediation is brought clearly to light.

III. Mediation in the OT.–A. Prophet. The prophets' task was to "stand in the counsel" of God to cause His people to hear His words (cf. Jer. 23:18, 22). Since the prophets' relationship to God had a directness and closeness that marked them off from those to whom they spoke, they were inevitably mediators. They not only received a message to deliver in the name of God, as if God were speaking through them (cf. Hos. 12:10; Isa. 55:11), but they were given insight into the meaning and direction of historical events, especially as these were affected by the Word of God (Am. 3:7f.; Nu. 24:3). In the eyes of the people the true prophet was the man of God whose word had all the truth and reliability of the Word of God (1 K. 17:24). Köhler observed: "Prophet and seer are not merely media of God's Word, they are also the prototype and foreshadowing of that which really ought to be. Man's remoteness from God is thrown into relief by the directness of their relation to Him" (p. 163).



Prophets witnessed the word of God to the people not only by their speeches but also by their lives, attitudes, and other signs. They were forced to adopt an attitude and behavior that made them noticeable (Isa. 8:11f.). They were involved in outward conflict and intense inward suffering (Jer. 20; Am. 7:10). Like watchmen without relief in the midst of danger, they bore a burden of responsibility and anxiety (Ezk. 3:17ff.; 33), especially in the face of the destruction and judgment that they saw advancing. Their task therefore became praying for those to whom they were called to speak (Jer. 42:2ff.; 27:18; Gen. 20:7). Although the prophets' ministry acquired this Godward aspect, its primary direction was from God toward man.

There were at times schools of the prophets (2 K. 2:3; 6:1-7). The prophet was thus, as much as the priest or the king, an institution in the life of Israel (cf., e.g., Isa. 28:7; Mic. 3:11; Jer. 29:1). Prophets came to have a relationship with the court as well as with the temple (cf., e.g., 1 K. 22). Prophets sometimes criticized the cult and priesthood (cf. Am. 7:10; Isa. 1:10ff.) because their task was "to maintain that standard which must decide the life of the nation, alike in its conduct and in its worship" (A. C. Welch, *Prophet and Priest in Old Israel* [1936], p. 34).

B. Priest. The priest was, generally speaking, appointed to a hereditary office of mediation between the people and God within the cultic activity of Israel. Though the sin of Israel called into question the validity of the covenant and their election to be a holy nation, God provided them a "Law which clearly set forth His Will, and an order of worship and sacrifice in the Cult which supplied His people in their weakness with a covenanted way of response to His Will" (T. F. Torrance, Intro. to Calvin's *Tracts and Treatises* [repr. 1958], p. xxii). The cult was meant constantly to reestablish and purify the covenant relationship, which cannot permanently be broken. The cult not only brought back the people into a true outward relationship to God but also gave them a new inward communion with Him.

Chiefly through sacrificial atonement the priest fulfilled his mediating office within the life of the people of God

MEDIATION

Relief on a stone tablet depicting Nabû-apla-iddina (middle left) being presented to the sun-god Šamaš (right) by a goddess (far left) and a third figure (a priest?). From Abû Habbah, mid-9th cent. B.C. (Trustees of the British Museum)

(Lev. 17:11). "In the atoning sacrifice, and also in the other sacrifices to which the idea of atonement has been transferred, the essential theme is that the gulf between the angry God and the human sinner can only be bridged by the interposition of an act of reparation; and in that it is God himself who establishes the way in which such an atoning substitute can be offered, he shows himself by this very act the covenant God, who is concerned for the maintenance of the covenant despite all the sin of man" (Eichrodt, I, 170).

As in giving the covenant, so in establishing and fulfilling the priests' ritual of the cult, the initiative is entirely with God. The sacrifices and the manner of the offering are minutely prescribed. The priest is called to his office or is the member of a family or tribe set apart by God for this service. The meaning of the ritual must be understood primarily as a gracious approach from God to mankind, a gracious provision by which sinners can find forgiveness and restoration. The people's approach to the altar with their sacrifice is a response to this grace, with confession, fear, confidence, and thankfulness.

The priest represented the congregation before God chiefly in this response within the cult. He was called to "stand before the Lord" (Dt. 10:8) for the people. The worshipers who brought the sacrifices were asked only to lay their hand upon the head of the animal offered. They were asked to lay their hand upon the head of the animal offered and to kill it. They then remained passive while the priest manipulated the blood on their behalf (Lev. 3–4). Although in earlier times individuals built their own altars and offered their own sacrifices (Gen. 12:7), and the heads of families had this responsibility for their own kin (Jgs. 17f.), the tribe of Levi came to be regarded as peculiarly fitted to represent the people in the offering of their sacrifices, being substitutes for the firstborn (Nu. 3:12f., 41; 8:16f.). The representative capacity of the Levitical priesthood was itself a covenant within the covenant (Jer. 33:15ff.; Mal. 2:4).

As the cult developed, however, the central functions of the priesthood became more narrowly specialized, and the Aaronic priesthood (Nu. 4:19ff.; cf. 16:1-11) attained a special status. The representative mediatory function of the priesthood was most vividly embodied and illustrated in the high priest, who when entering the holy of holies wore the breastplate with twelve stones on which the names of the twelve tribes were engraved (Ex. 39:6-14). The ceremony of "filling the hand," performed not simply in the consecration of the Aaronic priesthood but in that of the whole priesthood (Lev. 16:32; Ex. 29:24; Jgs. 17:5, 12), may have signified the endowment with this representative capacity.

In this Godward aspect of his mediatory work the inward attitude of both priest and people was of deep importance, as the warnings of the prophets against trusting in mere outward ritual show (cf. Isa. 1:11ff.; Joel 2:13). The priests were solemnly reminded that their office was to "bear the iniquity" of those whom they represented before God (cf. Lev. 10:17; Nu. 18:1). Intercession is not explicitly stressed as the duty of the priest, though the prophets referred to it as something that priests neglected (Joel 2:17; Mal. 1:9). But the history of Moses shows a close connection between sacrifice and intercession.

In the work of mediation the priests also represented God before the people. They blessed the people (Dt. 10:8; Nu. 6:22ff.) and were custodians of the Urim and Thummim (Ex. 28:30; Dt. 33:8; Lev. 8:8), through which God's will might be known (1 S. 28:6). They manipulated the lot (1 S. 14:36-41). As Moses fulfilled the priestly office, the Lord spoke to him in a way that had obvious relevance for the people who sought his teaching (Ex. 33:7-11). The priests read the law at the feasts and expounded it (Dt. 31:9ff.; Neh. 8), for it was their duty to enable the people to understand the cult so that they could discern between the holy and the profane, the clean and the unclean (Ezk. 22:26; 44:23). But priests were meant to teach the widest and deepest implications of the whole law (Dt. 33:10; Mal. 2:7; cf. Hos. 4–6), in full cooperation with the messages of the prophets (Jer. 18:18; Hag. 2:10f.; Zeph. 3:4). In Dt. 33:8ff. the office of teaching seems to have priority over that of sacrificing.

One must assume that the Israelite community found the ministry of the priests sacramentally efficacious — a "means of grace." Through the services of the temple people attained God's forgiveness and blessing. Thus the Psalms, which stress the cleanness and rightness of the heart, and reality rather than ritual (cf. Pss. 40, 50, 51), were used in temple worship. In performing their sacramental actions, the priests guaranteed communion with God. Köhler said: "The priest is, to those in the midst of whom he lives, a reminder of God's holiness expressed in quite definite habits of life, and demanding a constantly renewed effort to reach that condition in which one may draw near to God. The priest is what all will one day be (Ex. 19:6). The priesthood of the OT is the prototype of the priesthood of all believers" (p. 164; cf. also Isa. 61:6).

C. King. The king, like the priest, stood before God as

the representative of the people (1 K. 8:22-53). He was anointed by the whole people (2 S. 2:4). He approached God for the people with a heart engaged by God for this purpose (Jer. 30:21). God dealt with him on behalf of the whole nation and made with him an "everlasting covenant, ordered in all things and sure" (2 S. 23:5; 7:5-17; cf. Ps. 89:19-37 [MT 20-38]; 132:11f.). God's blessing on the king was a blessing on the whole nation. God's gifts to the king — judgment, righteousness, and mercy — ultimately flowed to the people, bringing aid to the poor, needy, and oppressed (Ps. 72:1-13) and safety and prosperity to the whole commonwealth (cf. Jer. 23:5f.; 33:15f.). The king was the "light of Israel" (2 S. 21:17) because through his rule prosperity could spread throughout the land (2 S. 23:3f.). Without him the nation languished (Lam. 4:20). To him people ascribed the power of healing (2 K. 5:7).

God exalted the king before the people as a sign and symbol of the majesty and rule He desired to exercise within the covenant relationship. God is called King (Ps. 84:3 [MT 4]; 145:1) and is to be regarded as ruler of the nation's life and affairs (Dt. 33:5). The exalted throne of the king points to that of "the Lord high and lifted up" (Isa. 6:5). The court of the king could be a symbol for the court of heaven itself (1 K. 22:19). The presence of the king signified the presence of God in Israel (Nu. 23:21). The king is called "son of God" (2 S. 7:14; Ps. 2:7; cf. Ps. 89:26) and "Lord" (Ps. 110:1; Jer. 22:18; 34:5; cf. Gen. 40:1). Divine attributes are ascribed to kings (Ex. 15:18). As a symbol and sign of God Himself, the king's person was inviolable (1 S. 24:10; 26:9; 2 S. 1:14, 16) and had to be protected (21:17).

Because of his exalted position the king had a heavy responsibility. It was his duty to lead and protect the people in danger and war (1 S. 31:2; 1 K. 22:29; 2 K. 9:15ff.). He was the final court of appeal for justice (2 S. 15:2; 1 K. 3:16-28). He had to plead for his people before God (2 S. 24:17; 1 Ch. 21:17; 2 Ch. 6:21-42; 14:11; 20:5-12; Isa. 37:14-20). But the king also had to be conscious of his limitations. He depended on the prayers of his subjects (Ps. 72:15) and had to study the law (Dt. 17:20) and remember that God alone is King.

D. Servant of God. Mediation in the OT often arose from an urgent human situation. Abigail, for example, mediated between David and her foolish husband (1 S. 25). Esther interceded with the king on behalf of her people (Est. 4).

The activity of Moses at times seems typical of the official prophet or priest. Like a prophet he stood in the presence of God to hear His word (Ex. 19:3, 9) and then went down to speak it (v. 21) to a people who acknowledged that apart from him they could not bear to confront a God who speaks (Ex. 20:19; Dt. 5:24-27). Moses' shining face signified the reality and efficacy of his mediation (Ex. 34:29). Like a priest, he represented the people before God (Ex. 34:2) to receive and give the cultic law (Lev. 1:2a). He established the covenant with the sprinkling of the blood of sacrifice (Ex. 24:8) and made intercession (Nu. 21:7).

But the mediatory task to which Moses was called cannot ultimately be fitted into any official category. Israel's need could be met not by the performance of a traditional role but only by the personal involvement of a lonely leader who bore a permanent and often crushing burden of responsibility and suffering (cf. Dt. 9:25). His prayers have an urgency and a spontaneity that liturgical forms cannot contain or express (Ex. 32:11-14, 30-32). His separateness was due more to the tension he felt as the bearer of the word of God to a people hostile to its claim than to any official consecration (15:24; 17:1-3; 32:1; etc.). His "bearing the sin" of his people (cf. above) took place in heart and life rather than in the sacrificial ritual at the altar and arose out of his intense self-identification with the people he was bound to serve despite their antagonism (32:32; 34:8f.). The denial of his wish to live long enough to lead the people into the Promised Land shows the suffering his role required (Dt. 3:24-27).

Although official forms of mediation should therefore not be despised, merely holding an office and performing a routine task will not restore a true relationship between God and His people. The prophecy that the Lord will raise up another prophet like Moses (Dt. 18:15, 18), whose ministry will also have a unique significance, should be understood in the light of this aspect of Moses' ministry.

Other prophet-priest figures in the OT were deeply involved, like Moses, in a ministry that demanded much more than fulfilling an official role. Jeremiah, too, felt seized by a word that isolated him as it dominated him (Jer. 15:16f.). He was elected to peculiar suffering (12:1f.) and gave a remarkable account of the inward tension and agony of His surrender to this call (8:18; 20:7-18). Ezekiel, too, witnessed that a true prophet is one who must stand "in the breach" in a critical situation (Ezk. 13:5; 22:30).

The "servant" passages in Isa. 40–50 give preliminary intimations of one whose career is to exemplify, more fully than Moses or Jeremiah, such a ministry of mediation. He is described as one who will bring forth judgment and make people know the law (42:4). He is to be a covenant to the peoples and a light to the Gentiles (v. 6), a witness and servant that all nations might believe (43:10). He is to suffer discouragement and scorn but be constrained and upheld by great promises (49:1-12; 50:4-9). Since these passages frequently use an autobiographical way of speaking, it is difficult to decide whether this is the soliloquy of a particular individual or whether the nation Israel is being imagined in its ideal form, in order to embody and express deep and true insights about how it should mediate salvation to all mankind. In 52:13–53:12, however, the autobiographical way of speaking is replaced by the realistic description of an individual undergoing the most intense suffering and shame. He perfectly submits to God's will in fulfilling a work of priestly and sacrificial mediation (53:6f., 10) that is to bring peace and healing to all people before God (v. 5). His death and obedience are an offering to God by which the sin of all people is borne (vv. 4, 11), and he prevails in his unceasing intercession (v. 12).

E. Other Forms of Mediation. In both the OT and NT, God communicates with humans through angelic intermediaries (cf. Nu. 22:35; Josh. 5:13-15; Jgs. 14:3; Zec. 1:9; Dnl. 8:15-18; 9:20-23; Mt. 1:20; 2:13; 28:2-5; Acts 8:26). Angels also helped people understand the significance of visions and signs (Ezk. 40:4; Zec. 4:1-7). When the "angel of the Lord" is identified with the Lord Himself (Gen. 16:7-11; Ex. 13:21; 14:19), one must assume that God was making an angelic form the sign of His presence among mankind. Otherwise, angels seem to be created beings (cf. Zec. 1:9, 12-14) who, belonging to the heavens, serve God's purposes on earth and are guardians and ambassadors to mankind (cf. Ex. 32:12; Nu. 20:16; Ps. 91:11f.; Mt. 4:11; 26:53; He. 1:14). Angels reported to God the doings of mankind (Job 1:6; Zec. 1:11) and presented people's prayers to God (Rev. 8:3f.) but did not have any significant role as mediators.

Some OT passages depict the mediating agent between God and the world as proceeding directly from God. In Prov. 8:22-31, Wisdom is an individual energy, God's companion and master workman in creation, whose chief delight is the children of men. Some think that Wisdom here is simply the personification of a divine attribute. But if this passage is linked with Prov. 1:20ff. and 8:1ff. and

interpreted as the efficient expression of God's thought and the medium of His activity (Isa. 55:11; Ps. 33:6; 107:20), it undoubtedly indicates an important aspect of the mediatory activity of Jesus Christ in the NT.

IV. Mediation in the NT.–A. Jesus Christ as Mediator. 1. In the Mystery of His Person. The NT discusses mediation on the basis of the fulfillment of the covenant in the person and work of Jesus Christ. "The covenant broken by Israel and the whole of humanity, but never repudiated and destroyed by God, is maintained in the life and act of this one man. He does that which is demanded and expected in the covenant as the act of human faithfulness corresponding to the faithfulness of God" (Barth, *CD,* IV/2, 166f.). Gal. 3:16 describes Jesus as the true seed of Abraham, who is the true object of the covenant promises and grace. His fulfillment of the covenant is based on the sheer grace of God to One elected to be God's rightful partner within it. As Augustine said, God "made righteous this man of the seed of David, never to be unrighteous, without any merit of His will preceding" (*De bono perseverantia* xxiv.67, quoted in Calvin *Inst.* ii.17.1). This is the miracle of grace that brings about the possibility of mediation. Thus in Jesus Christ, God pardons man and calls him into communion with Himself, and man also "looks to his Creator, turns towards Him, receives all things from Him, and submits to His will" (Bosc, p. 14).

Jesus Christ the mediator is true God (1 Tim. 3:16; 1 Cor. 8:5f.; 2 Cor. 3:14) and true man (1 Tim. 2:5; Gal. 4:4; Jn. 1:14). The NT stresses the significance of the humanity in which Jesus Christ fulfils the covenant of grace and thus takes upon Himself the mediatorship of the covenant. It acknowledges the individual and Jewish character of His humanity (cf. Rom. 1:3; 9:5), but it also affirms of the same humanity that it has a universal characteristic, which gives its career and destiny a significance for all people. Christ is the Second Adam, the archetype and representative man (Rom. 5:15-21; 1 Cor. 15:22, 45). The title "Son of man" includes the concept of an individual in whose person and glorious destiny His people are also involved (Mk. 14:62; Mt. 19:28; 24:27; Dnl. 7:9-22). The idea of the recapitulation and inherence of "all things" in Christ (Eph. 1:10; Col. 1:17) as the head of the new humanity (Eph. 1:22; 4:13-16; Col. 1:18; 2:19; 3:10f.) also witnesses to the universal significance of His human nature and work.

In Jesus Christ, therefore, God deals with humanity as a whole (cf. Brunner, pp. 502ff.), and the representative of humanity as a whole deals with God. The incarnate Son of God dwelt not simply in a selected and special man but *in us* (cf. Hooker, *Ecclesiastical Polity* [1594-1662], II, 52f.). Moberly rightly insisted that because Jesus' humanity is the humanity of deity, it can stand in this wide, inclusive, consummating relationship to the humanity of all other people (p. 90). The humanity of Jesus is human nature in its full spirit-body essentiality and individuality, whose personal subsistence, however, is found only in the Logos (cf. Heppe, pp. 414ff., 466; cf. also Barth, *CD,* IV/2, 269ff.).

2. In the Fulfillment of His Work. In this discussion of the whole work of mediation, the words of Calvin (*Inst.* iii.1.1) should be remembered: "We must understand that as long as Christ remains outside of us, and we are separated from him, all that he has suffered and done for the salvation of the human race remains useless and of no value for us. Therefore, to share with us what he has received from the Father, he had to become ours and to dwell within us. For this reason, he is called 'our Head' [Eph. 4:15], and 'the first-born among many brethren' [Rom. 8:29]. We also, in turn, are said to be 'engrafted into him' [Rom. 11:7], and to 'put on Christ' [Gal. 3:27]; for, as I have said, all that he possesses is nothing to us until we grow into one body with him. It is true that we obtain this by faith." Christ's mediatory work is therefore made effective and strengthened for people united to Him by faith through the word and sacraments (cf. Jn. 15). To effect this union is the work of the Holy Spirit.

The work of Jesus Christ is simply the manifestation of His person. The covenant maintained and fulfilled in His history is perfectly embodied within the mystery of His personal life (cf. Bosc, pp. 14f.). Precisely because Christ Himself is to some extent "the place where God willed and worked the salvation of men" (A. Wikenhauser, *Pauline Mysticism* [Eng. tr. 1960], p. 25), Paul used the phrase "in Christ" where at times one would expect "by Christ." "In Christ" is the expression in action of the deep inward reality that constitutes the mystery of His person. This expression is consummated in the cross, which seals forever, through His blood, the mediating union between God and man. His resurrection and ascension fully manifest the exaltation of mankind accomplished in His work (Col. 1:18; 1 Cor. 15:20; Rom. 8:29) but already real in Himself even during the days of His humiliation.

B. The Threefold Office of Christ. The NT describes in various terms Christ's place and role in accomplishing the work of mediation (cf. Rev. 1:5; Jn. 14:6; 1 Cor. 1:30). An examination of these terms has led the Church to depict the person and work of Christ as the fulfillment of the mediatory offices of prophet, priest, and king. It is taken as significant that in the OT holders of these offices were anointed (cf. Lev. 8:12; 1 S. 15:17; 16:13; 1 K. 19:16). The reality signified by anointing was finally fulfilled at the baptism of Jesus in the Jordan, when the Spirit descended upon Him, and He entered His active ministry as Messiah, Christ, Anointed One.

The early Church tended to emphasize the royal Priesthood of Christ, although the three offices were not entirely forgotten. Aquinas summarized the work of Christ under the threefold formula (*Summa Theol.* iii.22.1-3). But it was Calvin who first sought systematically to develop the threefold office in dealing with Christ's person and work (*Inst.* ii.15.1). Calvin did not develop the doctrine as fully as he had proposed, but later Reformed theology thoroughly explored the way he had opened (cf. Bosc, pp. 5f.; also J. F. Jansen, *Calvin's Doctrine of the Work of Christ* [1956]). Schleiermacher also followed Calvin's lead, and Karl Barth in his doctrine of reconciliation (as outlined in *CD,* IV/1-3) found that the three offices give "three 'christological' aspects of the being of Jesus Christ — aspects of His active person and personal work, which broaden out into three perspectives for an understanding of the whole event of the atonement" (IV/1, 128; cf. also T. F. Torrance, *School of Faith* [1959], pp. lxxxviii ff.).

Since Christ is always, in everything He does and at the same time, Prophet, Priest, and King, no one aspect of His work can be fully explained under one heading. Even in OT times the functions of prophet, priest, and king overlapped. The prophets were often associated with the cult. The priests taught and gave oracles and took over the ruling function. Kings acted as both prophets and priests. Certain prominent figures in the OT, such as Moses and the Servant of the Lord, do not easily fit into one class.

C. The Two Natures of Christ. The mediating work of Christ must be interpreted in the light of the unity of the divine and human in His person. Mediation in all its aspects is a work common to both natures and shared by both. Although one must regard each nature as accomplishing a work peculiarly its own, one must seek to discern in all the activity of the God-man the divine within the human rather than alongside of and not fully cooperating with

the human. One must deal with God *in, for,* and *as* man. The humanity is a real reflection and utterance of the deity, and the work of the humanity is always a work of God Himself, acting and suffering and triumphing as man (cf. Moberly, pp. 94-97; Torrance, *School of Faith,* p. lxxvii).

D. Christ as Priest. The NT constantly teaches that Christ perfectly embodies and fulfils all the mediatory functions signified in the person and work of the priest in the cultic ritual of Israel. Hebrews especially gives this witness: "Therefore he had to be made like his brethren in every respect, so that he might become a merciful and faithful high priest in the service of God, to make expiation for the sins of the people" (2:17).

Hebrews sketches throughout a pattern characteristic of true priesthood. The priest shares the common frailty of the people but stands apart from them; he is separate but identified with them (He. 5:1-4). His function, especially as high priest, is to offer sacrifices (8:3) in a ritual that climaxes on the Day of Atonement, in the entry of the high priest with his offering, alone, into the inner sanctuary, the holy of holies (9:1-10), cleansing all things with the shedding and sprinkling of blood (v. 22).

As this pattern is unfolded, it is shown that Christ fulfils it. He is a great High Priest who has passed into the heavens (4:14f.). He is identified with sinners, sympathetic with their needs and frailties, but separate from them (2:10, 17f.; 4:15; 5:5-9). He fulfils the role of both priest and victim by offering Himself "through the eternal Spirit" (7:27; 9:11-14, 28; 10:10).

Hebrews dwells on the utter superiority of Christ's ministry. Since He is the Son of God, His mediatorship is bound to rank far above that of Aaron (5:1-10). The unique and majestic priesthood of Melchizedek is used to illustrate this superiority (5:6, 10; 7:1-21; Gen. 14:18-20; Ps. 110:4), which makes Christ the mediator of a new and better covenant (He. 8:6; 9:15-20; 12:24). The mediatorship of the Levitical priests took place only in an earthly tabernacle, patterned after the form of the heavenly reality as seen by Moses (Ex. 25:40; He. 8:5; 9:23; 10:1) but nevertheless always remaining shadowy and waiting to be replaced by the true reality to which it pointed. In the OT cult all the offerings required constant repetition (7:27) and were efficacious only for sins done in ignorance (5:2; cf. Lev. 4:2; 5:15). They were never felt to be fully satisfying (He. 9:9; 10:11), nor were they ever meant to be finally effective (7:11, 19). The effect they had was superficial (9:13). But Christ's mediatory work, accomplished once for all, stands forever (7:27; 9:24–28; 10:10; 13:12). It is effective in the immediate presence of God, of which the inner sanctuary is a sign (8:2; 9:3, 8, 24). It removes all that hinders the approach of sinners into the near presence of the Most High (4:16; 7:19, 25; 8:2; 9:24; 10:19f.). It cleanses the conscience and inspires true and living worship and service (9:14).

Many features in the Synoptic Gospels lead to the same analogy in interpreting the work of Christ. Jesus' identification with sinners at His baptism (Mt. 3:13 par.) found deepening expression throughout His ministry (8:15; Lk. 7:37-39; 15:1-10; 19:1-10) and was finally completed in the cross (Lk. 12:50; 23:39-44; Mt. 27:39-45). But He remained separate from all other people (Mt. 14:23; Lk. 11:1; Mk. 9:1-10; Mt. 17:17), consecrating Himself to the task that He had to fulfil alone (Mt. 26:31, 36-45), conscious that His death would be the focal point and consummation of His life (Mk. 9:12-31; 10:32-34; 12:8; 14:8). In His priestly ministry He acted as one who had a right to bestow forgiveness and gave signs of the reality of its bestowal (Mk. 2:1-12; Lk. 7:47-50).

His teaching about the meaning of His death as a sacrifice confirms this interpretation. Two sayings especially are relevant. (1) Mk. 10:45 reads, "For the Son of man also came not to be served but to serve, and to give his life as a ransom for many." If the word for "ransom," Gk. *lýtron,* denotes the purchase price for the emancipation of a slave, the dominant thought is of Jesus as a kingly deliverer or redeemer, though in the form of a humble servant. But more likely *lýtron* should be understood as a propitiatory gift offered in satisfaction for a life forfeit in the sacrificial ritual. (2) Mk. 14:24 (cf. Mt. 26:28; 1 Cor. 11:25) reads, "This is my blood of the covenant, which is poured out for many." Jesus here linked the new covenant, which offers forgiveness of sins (Jer. 31:34), with the ratification of the covenant of Sinai by sacrificial blood (Ex. 24:8). He thus implied that His sacrificial death on the cross, in establishing the new covenant, would mediate forgiveness to "many." This saying, no doubt, refers to the "righteous servant" (Isa. 53:11) who "justifies many," and the Passover background further stresses that His death was a sacrifice.

In the Gospel of John Jesus is the "Lamb of God" (1:29, 36). The reference is possibly to the ram provided for Abraham in substitution for Isaac (Gen. 22:13), or to the lamb of the Passover feast (Ex. 12:3), or to the lamb of Isa. 53:7. Throughout the Gospel, Jesus is shown as the one who freely "[laid] down His life" (Jn. 10:11, 18) as He faced His sacrificial death. In His high-priestly prayer in ch. 17 He consecrated Himself as and for this offering. His benediction of "peace" as He showed the disciples His hands and side (20:19-21) fits into the same "priestly" pattern and confirms the impression that John was designed to testify to this aspect of Jesus' ministry.

Romans 3:25 is to be understood in the context of Christ's work as priest: "whom God put forward as an expiation [Gk. *hilastḗrion*] by his blood, to be received by faith." *Hilastḗrion* could refer to appeasing the anger of God and thus changing His attitude. But it seems more directly to refer to the removal of sin in an expiation and cleansing that depend primarily on the mercy of God, in the context of the OT cult, where *hilastḗrion* corresponds to the "mercy seat" of the ark or to the place of expiation on the day of atonement (Heb. *kappōreṯ*). In 2 Cor. 5:14-21, the appeal to become "reconciled to God" (v. 20) is possible because in Christ the whole world (v. 19; cf. also v. 14) has already been fully reconciled. This reconciliation seems to involve some objective spontaneous act by which God created through love and costly suffering the conditions that enable people to return to Him. The identification of Christ with the sin of mankind (v. 19), corresponding to the nonimputation of sin to people (v. 21), and the phrase "one died for all" (vv. 14f.) suggest the transfer of the sin of the worshiper to the sacrificed victim in the sacrificial ritual. Paul also used sacrificial language in 1 Cor. 5:7; Eph. 5:2. 1 Pet. 1:18f. and 3:18 may refer to the same idea.

E. Christ as King. The witness of the NT is that Jesus Christ is Lord and King (Rom. 10:9; 14:8f.; Phil. 2:6-11). He is the King of the Jews (Mt. 2:2; 21:5; 27:11; Lk. 23:2; Jn. 12:13; Acts 17:7). The Lord will give Him the throne of David (Lk. 1:32), of whom He is the seed (Jn. 7:42; Rom. 1:3; 2 Tim. 2:8), the root and offspring (Rev. 5:5). He was witnessed to as the Son of David (Mt. 1:1), especially by those who implored His help (Mt. 9:27; 15:22; 20:30f.; Mk. 10:47f.; Lk. 18:38), and He was finally acclaimed as such by the multitude (Mt. 12:23; 21:9, 15).

Signs were given that He is King, e.g., the manner of His entry into Jerusalem (Mk. 11:1ff.) and the superscription upon the cross (15:26). The establishment of His kingdom in the midst of human life was shown by His regal bearing and His facing the cross not as one driven to it by overwhelming circumstances but as the Lord who laid down His life of His own free will (Jn. 10:17f.; Mt. 16:21) and

who took the initiative over all His enemies (cf. Jn. 13:27; Mt. 13:24-30). In His death on the cross He was glorified (Jn. 12:23). As He submitted to its shame and weakness He could majestically decree people's destinies (Lk. 23:43) and utter a final word of triumph (Jn. 19:30). He proclaimed Himself as one who brings "deliverance to the captives" (Lk. 4:18). His miracles were signs that the kingdom of God was at work in the midst of mankind, and that the powers of death, destruction, and decay were being overcome by His Word, which sows, spreads, and nurtures the kingdom in the midst of human life and history (Mt. 13). As people are inevitably drawn to Him, the "prince of this world" is being "cast out" (Jn. 12:31f.).

In the early speeches in Acts, Jesus is "Lord" (Acts 2:36; 3:13-15). In Him the promise of Ps. 110:1 has been fulfilled (2:34f.). Similar and more elaborate confessions punctuate the Epistles (Rom. 14:8f.; Phil. 2:6-11). His liberating power from sin and the law (Rom. 7:23-25) and from the powers of evil and death (Rom. 8:37-39; 2 Tim. 1:10; Rev. 1:18) is stressed. He is King of kings and Lord of lords (Rev. 17:14; 19:16).

In accordance with this witness to His kingship, His mediating work is referred to as "redemption." Texts like Mk. 10:45 and 1 Pet. 1:18f. link the thought of redemption with sacrificial language. But many places in the Epistles more clearly express the thought of redemption (*apolýtrōsis*) as release from bondage, either by overcoming a captor or by paying a ransom or debt (*lýtron*; cf. Rom. 3:24; 1 Cor. 1:30; Eph. 1:7; Col. 1:14; 1 Tim. 2:6). Gal. 3:13; 4:5; 1 Cor. 6:20; 7:23 (cf. 1 Pet. 1:18f.) emphasize the costliness of this liberation. Col. 2:14f. describes the whole work of Christ in redemption as the "spoiling" of principalities and powers.

F. Christ as Prophet. In the synagogue at Nazareth, Jesus claimed to have come to fulfil a unique ministry in which good news is preached and deliverance proclaimed (Lk. 4:18-21; cf. Isa. 61:1-3). He referred to Himself as a prophet (Mt. 13:57; Lk. 13:33), and many characteristics of His bearing and teaching forced people to refer to Him as such (Mt. 21:11; Mk. 6:15; Jn. 4:19; 9:17). This implication sometimes is that He is the Prophet expected in fulfillment of Dt. 18:15-18 (Jn. 1:21; 6:14; 7:40), and to this ministry the voice at the Transfiguration witnessed (Mk. 9:7). But Jesus is greater than the prophets (Mk. 8:27-36; Mt. 12:41; 11:2-11). He contrasted the content of the prophets' teaching with His own (Mt. 5:21-28). Moreover, His word is the Word of God simply because He uttered it as His will and decision, whereas the prophets could derive the Word only from a source and authority other than themselves.

In His teaching Jesus took up the themes that were the burden of the preaching of the prophets, but He fulfilled His prophetic ministry especially in revealing God and proclaiming God's love, righteousness, and lordship. He did this not only in His teaching, but in His personal bearing and activity (Jn. 14:6, 9). "His death preeminently as illuminated by the resurrection mediated the full disclosure of God" (H. R. Mackintosh). But His death can be seen in this light only by the witness and illumination of His own teaching, e.g., in Mk. 10:45; 14:24 (see IV.B above).

The NT elsewhere refers directly to Jesus as *the* prophet (Acts 3:22; 7:37). The prophetic aspect of His mediatory work in His death is brought out in Rom. 3:21-25, which emphasizes the cross as manifesting or declaring the righteousness of God, and in 5:8: "But God shows his love for us in that while we were yet sinners Christ died for us." Paul also referred to Christ in His person and work as the "image of God" (2 Cor. 4:4; Col. 1:15).

G. Christ as Servant. The Gospels do not use "servant" as a title for Jesus, but there are several references to His fulfilling the servant prophecies in certain aspects of His life (cf. Mt. 8:17; 12:17-21; Lk. 22:37; Mk. 10:45; 14:24). The voice that came from heaven at His baptism (Mk. 1:11), when He was "numbered with the transgressors" (Isa. 53:12), likely refers to Isa. 42:1. (Cf. also Lk. 24:26; Mk. 8:31; 9:31; 10:33.)

In the early preaching in Acts, Jesus is frequently called "servant" (Acts 3:13, 26; 4:30; cf. 8:30-35). In 4:26f. Jesus is confessed both as the king of Ps. 2 and as the servant of Isa. 53. 1 Pet. 2:18-25 tells servants to be willing to suffer by reminding them of the example of Jesus, the Suffering Servant who identified Himself with human beings in their sin, punishment, and death so that they might be identified with Him in His exaltation. Thus, through His entry into the human condition, the straying are now found, the dead now live, the wounded are now healed.

MEDICINE [Heb. *gēhâ*] (Prov. 17:22); NEB "countenance"; [Heb. *rᵉpû'â*] (Jer. 30:13; 46:11) NEB REMEDY. Words designating medicines are rather rare in the OT. In addition to those listed above there are more general words for "health," "healing," "remedy," etc. *See* HEAL.

Unless the NEB reading is correct (cf. W. McKane, *Proverbs* [*OTL*, 1970], p. 506), Prov. 17:22 is one of many OT passages that call attention to the importance of emotional states in physical and mental well-being. The lack of "healing medicines" (Jer. 30:13) was held figuratively to have caused Israelite backsliding. Subsequently (46:11) the prophet compared Israel to a dying woman going to Gilead to take balm as a medicine without resultant benefit. In Ezk. 47:12, the leaves of the envisioned tree of life are said (AV) to be for medicine. The RV and RSV read "healing," thus assimilating the language to that of Rev. 22:2. R. K. H.

MEDITATE [Heb. *śî(a)ḥ, śû(a)ḥ*] (Gen. 24:63; Ps. 77:3, 6 [MT 4, 7]; 119:15, 23, 27, 48, 78, 148; 145:5); AV also COMPLAIN, "commune with mine own heart" (Ps. 77:6), TALK OF, SPEAK OF; NEB also "hoping to meet" (Gen. 24:63), "lay thinking" (Ps. 77:3, 6), STUDY, "my theme shall be" (Ps. 145:5); [*hāgâ*] (Josh. 1:8; Ps. 1:2; 38:12 [MT 13]; 63:6 [MT 7]; 77:12 [MT 13]; 143:5); AV also IMAGINE; NEB also "keep in mind" (Josh. 1:8), MUTTER, "think on," MEMORY; [Gk. *promeletáō*] (Lk. 21:14); NEB "prepare beforehand"; **MEDITATION** [Heb. *śî(a)ḥ*] (Ps. 104:34); [*śîḥâ*] (Job 15:4; Ps. 119:97, 99); AV also PRAYER; NEB SPEAK, STUDY; [*higgāyôn*] (Ps. 19:14 [MT 15]); NEB "all that I . . . think"; [*hāgût*] (Ps. 49:3 [MT 4]); NEB "thoughtful."

In the biblical world meditation was not a silent practice. *Hāgâ* means "growl," "utter," or "moan" (cf. BDB, p. 211) as well as "meditate" or "muse." No doubt meditation involved a muttering sound from reading half aloud or conversing with oneself (cf. Ps. 77:6). Consequently, translations can vary: e.g., in Job 15:4 "meditation" (RSV) is rendered "prayer" by the AV and "to speak" by the NEB; in the AV Ps. 5:1 (MT 2) has, "O Lord, consider my meditation", but the RSV has "give heed to my groaning" and the NEB "consider my inmost thought."

Meditation takes place any time of the day or night (Josh. 1:8; Ps. 1:2). It produces inward strength and joy (Ps. 63:5f.). The object of meditation is particularly the law with its precepts (119:15), statutes (v. 48), testimonies (v. 99), and promises (v. 148). The glorious splendor of God's majesty, along with His wondrous works or miracles, is also the content of meditation (143:5; 145:5). Meditation takes place in the heart, the seat of the emotional and rational life. Therefore, the psalmist prays that the meditation of his heart will be acceptable in God's sight (19:14; 104:34), i.e., he wants his inner thoughts to approach the standard God approves. Thus the righteous, when they encounter the plots of the wicked, maintain a pure mind by meditating on God's law (119:23).

Jesus instructed His followers not to waste their time meditating their anticipated defense before their persecutors. Such confrontations are so versatile and unpredictable that undue preoccupation with them only increases one's anxiety and reduces one's effectiveness in the task at hand. To meet such a crisis Jesus promised special wisdom in speech from the Holy Spirit (Lk. 21:14f.). Conversely, as Paul taught Timothy, the mind is to be occupied with spiritual matters to increase spiritual growth (1 Tim. 4:15, using Gk. *meletáō*, RSV "practice," AV "mediate").

See *TDOT*, III, *s.v.* "hāghāh" (Negoită, Ringgren).

MEDITERRANEAN SEA med'ə-tə-rā-nē-ən. The body of water bounded by north Africa on the south, the Levant on the east, Turkey (Asia Minor) and southern Europe on the north, with the western end being constricted by Morocco and Spain. The Mediterranean is connected to the Atlantic Ocean by the Straits of Gibraltar.

The English name derives from a Latin designation ("inland") that appeared in the 7th cent. A.D. In antiquity the names for the Mediterranean varied considerably, usually depending on a nation's geographic relationship to the sea. Geographically, Israel was a maritime nation, but its people were not known as sailors like the Minoans of Crete or the neighboring Phoenicians. When Solomon wanted to establish a Red Sea fleet he used Phoenician sailors sent by Hiram king of Tyre because they "were familiar with the sea" (1 K. 9:26-28; 2 Ch. 8:18). The Hebrews were not mariners like the Phoenicians because of the lack of natural harbors along Israel's coast. Thus they early on became dependent on the Phoenicians to transport trade goods.

Frequently in the OT the Mediterranean is called simply "the sea" (Heb. *hayyām*). When describing the ethnic composition of Canaan at the time of the Conquest, Nu. 13:29 states that "the Canaanites dwell by the sea" (cf. Josh. 5:1). References to Sidon (Isa. 23:2) and Tyre (Ezk. 27:3f., 9, etc.) being situated by "the sea" leave no doubt that *hayyām* may be used for the Mediterranean Sea, although *yām* is also applied to the Re(e)d Sea (Ex. 14:2, 16, 22), the Gulf of Aqabah/Red Sea (1 K. 10:22), the Dead Sea (Josh. 12:3), and the Sea of Galilee (Josh. 13:27). *Hayyām* may be a shortened form for one of several longer expressions for the same body of water. For example, since the Mediterranean was the largest body of water known to the Hebrews, they sometimes called it *hayyām haggāḏôl*, "the great sea" (Nu. 34:6f.; Josh. 1:4; 15:12, 47; 23:4; Ezk. 47:15, 19f.).

Another OT expression for the Mediterranean Sea is *hayyām hā'aḥ^{a}rôn* (lit. "the sea behind"), "the western sea" (RSV) or "the uttermost sea" (AV). Since the Hebrews oriented the cardinal points by facing the rising sun in the east (*qeḏem*, lit. "in front," BDB, p. 869), what is behind would be the west. The name "western sea" is not restricted to the OT (cf. Dt. 11:24; 34:2; Joel 2:20; Zec. 14:8), but is found in Egyptian and Babylonian inscriptions (cf. "Upper sea," "Great Sea," "Western Sea," *ANET*, pp. 267-69, 275-281; note that from the mid-2nd millennium on, Assyrian texts include "west" or Amurru [i.e., Syrian] as part of the name).

The common Egyptian expression for both the Mediterranean and Red seas is *w3ḏ wr*, "great green" (A. Erman and H. Grapow, *Wörterbuch der ägyptischen Sprache*, I [1926], 269); this was questioned by A. Nibbi in *Sea Peoples and Egypt* (1975), but her thesis was amply refuted by K. Kitchen (*JEA*, 64 [1978], 169-171).

As a loanword, *yām* is attested in Egyptian texts as early as the middle of the 15th cent. B.C. (*Wörterbuch der ägyptischen Sprache*, I, 78.11). In the Story of Wenamun (11th cent. B.C.) the Mediterranean is called *P3 y3m '3 n ḫ3rw*, "the Great Sea of Syria" (*ANET*, p. 26).

Ezra 3:7 refers to cedar for the building of the second temple being floated down the Phoenician coast *'el-yām yāpô'*. The LXX, followed by AV, understood this to mean "to the sea of Joppa." The RSV and other more recent translations properly render this "to the sea, to Joppa," because *yām* is in its absolute form and so is not bound to Joppa. Also, the final *aleph*, which is not a part of the normal spelling of the word (cf. Jonah 1:3), appears to function like the directive *-â*, thus meaning "to Joppa." Therefore it is doubtful that the Mediterranean was ever called "sea of Joppa." Similarly the grammatical construction *'aḏ yām p^{e}lištîm* in Ex. 23:31 should be rendered "to the sea, Philistia" (contra LXX, RSV, AV, *et al.*).

Therefore it can be concluded that in the OT there were essentially three expressions for the Mediterranean Sea: the sea, the great sea, and the western sea. All three of these, and the combination "the great western sea," are attested in Near Eastern literature.

The NT has little to say specifically about the Mediterranean. Most references are found in Acts. Simon the tanner, with whom Simon Peter stayed, lived in Joppa in a house "by the seaside" (Gk. *thálassa*, Acts 10:32). In Paul's journeys he travels by sea, which is clearly the Mediterranean (17:14; 27:30, 38; 28:4). Acts 27:5 uses the term *pélagos* for Paul's sailing off the coast of Cilicia. This term usually means "open sea" or "high sea" (LSJ, p. 1356) and therefore is a technical term, not a proper name. Before the shipwreck on Malta, the ship that carried Paul was swept across the Adriatic (Sea) (Gk. *Adria*, 27:27). The name "Adriatic" is known as early as Strabo (1st cent. B.C.) and usually refers to the extension of the Mediterranean along Italy's eastern coast, but in the 1st cent. A.D. this included the area from Crete to Malta (*see* ADRIA).

MEDIUM [Heb. *'ôḇ*] (Lev. 19:31; 20:6, 27; Dt. 18:11; 1 S. 28:3, 7, 9; 2 K. 21:6; 23:24; 1 Ch. 10:13; 2 Ch. 33:6; Isa. 8:19; 19:3); AV "(one who has a) familiar spirit"; NEB "(one who traffics with, calls up, etc.) ghost(s)," "(one who has a) familiar spirit" (1 S. 8:7); **NECROMANCER** [Heb. *dōrēš 'el-hammēṯîm*–'one who consults the dead'] (Dt. 18:11); **WIZARD** [Heb. *yidd^{e}'ōnî*] (Lev. 19:31; 20:6; etc.); NEB "(one who traffics with, etc.) spirit(s)." A human agent who facilitates communication with the dead for the purpose of learning the future. *See* DIVINATION III.G.

Because the terms *'ôḇ* and *yidd^{e}'ōnî* are almost always paired (*yidd^{e}'ōnî* appears only with *'ôḇ*; *'ôḇ* appears alone only in 1 S. 28 and 1 Ch. 10:13), they are best considered together. Most scholars agree that *yidd^{e}'ōnî* (RSV "wizard")

is derived from the verb *yāḏaʿ* ("know") and means "knowing one," referring either to the knowledge possessed by the spirits of the underworld or to the knowledge or skill of the practitioners; thus the two main alternatives for translation are "familiar spirit" and "soothsayer" (KoB, p. 367).

There is much less agreement about the derivation of *ʾôḇ* (RSV "medium"). According to one view it is the same word that means a "bottle made out of skins" ("wineskin," Job 32:19). The term would then refer to the technique of ventriloquism or, more accurately, "belly-talking" (cf. LXX *engastrímythos*), i.e., to the mediums' ability to produce a deep, husky voice, apparently not their own, which represented the spirit of the dead person speaking through, or from within, them. According to a second view *ʾôḇ* is derived from the Arabic root *ʾwb* ("return") and means a "revenant," i.e., the ghost of the deceased who is called back by the medium (e.g., see W. Eichrodt, *Theology of the OT*, II [Eng. tr. 1967], 215). J. Lust has argued for a derivation from *ʾāḇ* ("father, ancestor"). According to this view the *ʾôḇôṯ* were the ghosts of the deceased fathers living in the netherworld (and possibly also images representing them).

Perhaps the most satisfactory explanation of *ʾôḇ* thus far is the one propounded by H. A. Hoffner. According to Hoffner *ʾôḇ* is a "non-Semitic migratory word" that appears in Sumerian (*ab*), Hurro-Hittite (*a-a-bi*), Akkadian (*aptu*, Neo-Assyr. *apu*), and Ugaritic (*ʾēb* < *ʾayb*), always with the meaning "sacrificial pit" (*TDOT*, I, 131), i.e., a ritual pit dug in the ground for the purpose of sacrificing to chthonic deities and calling up the spirits of the deceased. The meaning of *ʾôḇ* shifted from "pit" to "spirit(s) of the pit" to "necromancer who calls forth the spirits through the use of a ritual pit." Prophets apparently mocked the use of such ritual pits; cf. Isa. 29:4: "Then deep from the earth you shall speak, from low in the dust your words shall come; your voice shall come from the ground like the voice of a ghost, and your speech shall whisper [piel of *ṣāpap*] out of the dust." In 8:19 the prophet clearly applies both *ʾôḇôṯ* and *yidd*ᵉ*ʿōnîm* to the practice of necromancy (here the RSV translates Heb. *dāraš ʾel-hammēṯîm* "consult the dead," whereas in Dt. 18:11 it renders the participle form "necromancer") and suggests that the practitioners used unnatural voices: "the mediums and wizards who chirp [pilpel part. of *ṣāpaḏ*; cf. Isa. 29:4; used of birds in 10:14; 38:14] and mutter."

1 Samuel 28 provides a description of the practice of necromancy in ancient Israel. After Saul had exhausted all legitimate means of seeking advice (dreams, Urim, prophets) and the Lord had not answered him (v. 6), he sought out a medium (*baʿᵃlaṯ-ʾôḇ*, lit. "mistress of the pit," v. 7). It is probable, though not specifically stated in the text, that the disguised Saul visited the medium of Endor at her ritual pit and that some kind of sacrifices or offerings preceded the "bringing up" of the deceased Samuel (cf. vv. 11-15; in v. 13 the medium describes Samuel's ghost as an *ʾᵉlōhîm*, "supernatural being" [RSV "god"]). Saul was apparently not able to see Samuel himself (vv. 13f.), and it is probable that the interview between Saul and Samuel was mediated by the woman.

The terms *ʾôḇ* and *yidd*ᵉ*ʿōnî* occur repeatedly in lists of practices that were prohibited or condemned (e.g., Lev. 19:31). In Isa. 19:3 the practice of consulting *ʾōḇôṯ* and *yidd*ᵉ*ʿōnîm* is associated with the consultation of idols and *ʾiṭṭîm* (prob. < Akk. *eṭimmu*, "ghost of a dead person" [KoB, p. 34]; RSV "sorcerers"); cf. the association of necromancy with various forms of idolatry and magic in 2 K. 21:6 par. 2 Ch. 33:6; 2 K. 23:24. While Lev. 20:27 prescribes the death penalty for those who practice necromancy, the normal penalty was apparently banishment (1 S. 28:3, 9; 2 K. 23:24).

N. J. O.

MEEDA mə-ē′də (1 Esd. 5:32, AV); **MEEDDA** mə-ē′də (1 Esd. 5:32, NEB). *See* MEHIDA.

MEEK; MEEKNESS [Heb. *ʿānāw*] (Nu. 12:3; Ps. 10:17; 37:11; Isa. 11:4; 29:19); AV also HUMBLE (Ps. 10:17); NEB "of great humility" (Nu. 12:3), HUMBLE, LOWLY (Isa. 29:19); [Gk. *praÿs*] (Mt. 5:5); NEB "of a gentle spirit"; [*praÿtēs* (var. *praótēs*)] (2 Cor. 10:1; Eph. 4:2; Col. 3:12; Jas. 1:21; 3:13); NEB GENTLE(NESS), QUIETLY (Jas. 1:21), MODESTY (Jas. 3:13).

In each of the five OT occurrences of "meek" the Hebrew term is *ʿānāw*, usually rendered "poor" or "needy" (*see* POOR). Originally *ʿānāw* meant "a person in subjection," but later it referred more often to a person who viewed his own role in relation to God as that of a servant and who thus quietly and gently subjected himself to God's will.

In Isa. 11:4 (paralleling the *dal*, "poor") and 29:19 (paralleling the *ʾeḇyôn*, "needy") the meek are the poor of Israel (i.e., the powerless) oppressed by their rich and powerful compatriots for personal advantage. The context is generally similar in Ps. 10:17 and 37:11 — it is the meek and lowly who, despite appearances, bear the divine promise. Thus *ʿānāw* came rather naturally to characterize the truly pious or faithful person in Israel — one who completely depended on God and was humble and gentle toward others. Moses is characterized as a "meek" man (probably as a result of later piety; see *TDNT*, VI, 647) in Nu. 12:3 because he refused to elevate his own importance over that of God, and his authority was exercised within the perspective of humility.

The OT concept of meekness, then, is rooted in God and the eschatological hope that He will judge in justice and give the land to the lowly (cf. Ps. 37:11; Mt. 5:5). From another point of view meekness is the opposite of PRIDE, for pride is the arrogant reliance on self alone rather than on God (hence pride is the essence of sin). It is significant that the cognate substantive *ʿᵃnāwâ*, "meekness, humility," appears prominently in the Qumrân *Manual of Discipline* (1QS 2:24; 3:8; etc.) as a requisite quality in communal life of the "sons of light."

Meekness also enjoys a high standing among the virtues stressed in the NT (cf. *praÿtēs* in Eph. 4:2; Col. 3:12), particularly in the living example and teachings of Jesus. *Praÿtēs* was considered an essential Christian virtue by the time of the postapostolic fathers, who in exhorting the Church to meekness strangely do not cite the example of Jesus in support.

The NT term's relationship to the OT is best exemplified by the use of *praÿs* (the usual LXX equivalent for *ʿānāw*) in Mt. 5:5 (only Matthew, of the three Synoptists, uses the term). This beatitude, "Blessed are the meek, for they shall inherit the earth" (the only beatitude that is a quotation), is drawn from Ps. 37:11. Mt. 5:5 stresses the future promise. The oppressed and lowly (*praeís*) who can still affirm in their adversity the good and gracious will of God instead of their own will find the tables turned to their advantage in the *eschaton*. The two occurrences of *praÿtēs* in Jas. 1:21 and 3:13 also manifest a carry-over from the OT conception, particularly the latter in its emphasis upon the relationship between meekness and divine wisdom.

The truly righteous are humble and receptive to the Word of God.

In 2 Cor. 10:1 Paul brought the "meekness [*prayÿtēs*] and gentleness [*epieíkeia*] of Christ" to bear against the wilfulness and recalcitrance of the Corinthians. He realized that the meek and gentle approach could easily appear as weakness to those unfamiliar with Jesus' example. (In secular Greek *prayÿtēs* meant "mild and gentle friendliness" and, although valued by classical writers as a social virtue, it was nevertheless suspect because of this tendency for meekness to appear as weakness. See *TDNT*, VI, 646.)

In general the NT distinguishes meekness and gentleness; the former is an internal attitude, and the latter refers to external behavior (cf. "the meekness and gentleness of Christ" in 2 Cor. 10:1). The RSV also makes this distinction in translating *prayÿtēs*: "meekness" describes an internal attitude and "gentleness" a social or interpersonal behavior.

True "meekness" is then ultimately always measured by the meekness of Jesus. His humility, patience, and total submission of His own will to the will of His Father exemplify superlatively "meek" persons, who possess a balanced perspective on themselves, in their relationships both to God and to others.

D. G. BURKE

MEET [Heb. *qārā'* (Gen. 14:17; 18:2; 19:1; etc.), piel of *qāḏam* (e.g. Dt. 23:4 [MT 5]), *pāga'* (Gen. 32:1 [MT 2]; Ex. 5:20; etc.), *māṣā'*–'find' (1 S. 10:3; 1 K. 13:24; etc.), niphal of *yā'aḏ*–'appear,' 'meet by appointment' (Ex. 25:22; 29:42; etc.), *pāgaš* (e.g., Gen. 32:17 [MT 18]; niphal in Ps. 85:10 [MT 11]; Prov. 22:2; 29:13), *lipnê*–'to the face of' (e.g., 1 Ch. 12:17; 2 Ch. 15:2), etc.]; AV also FIND, PREVENT, etc.; NEB also COME UPON, FIND, etc.; [Gk. *hypantáō* (e.g., Lk. 14:31; Jn. 11:20, 30; 12:18; Acts 16:16), *hypántēsis* (Mt. 8:34; 25:1; Jn. 12:13), *apantáō* (Mk. 14:13; Lk. 17:12), *apántēsis* (e.g., Mt. 25:6), *synantáō* (Lk. 9:37; 22:10; Acts 10:25; He. 7:1, 10), *synérchomai*–'come together' (Acts 22:30; 1 Cor. 11:20), pass. of *synágō*–'bring together' (Jn. 18:2; Acts 11:26), *episynagōgḗ*–'gathering together' (2 Thess. 2:1; He. 10:25), *peripíptō*–'fall in with,' 'encounter' (Jas. 1:2), *symbállō*–'converse,' 'fall in with' (Acts 17:18; 20:14), *synkeránnymi*–'mix, blend, unite' (He. 4:2), *adókimos*–'not standing the test,' 'unqualified' ("fail to meet the test," 2 Cor. 13:5), etc.]; AV also COME TOGETHER, ASSEMBLING, etc.; NEB also ASSEMBLE, GATHERING, FACE, etc.

The normal course of human life provides the context for most occurrences of "meet" in the Scriptures. Several main categories of biblical usage can be discerned.

Most often it refers to people encountering one another; e.g., Melchizedek and Abraham (He. 7:1, 10), Esau and Jacob (Gen. 33:4), Aaron and Moses (Ex. 4:27), Saul and David (2 S. 6:20), Ahab and Elijah (1 K. 18:16), Isaiah and Ahaz (Isa. 7:3), Jael and Sisera (Jgs. 4:18), Samson and the Philistines (15:14), Amasa and Joab (2 S. 20:8), Abigail and David (25:20), Ahaziah and Joram (2 Ch. 22:7). Often someone meets an anonymous party, e.g., "runners" and "messengers" (Jer. 51:31), a "fugitive" (Isa. 21:14), an angel (Zec. 2:3 [MT 7]), a man carrying a jar of water (Mk. 14:13). The parties may meet in opposition (king against king, Lk. 14:31), or they may find unity through a shared dependence on one Creator: rich and poor (Prov. 22:2), poor and oppressor (29:13).

God also encounters or meets people in the course of their lives. Thus Moses brings the Israelites out of their camp in the wilderness "to meet God" (Ex. 19:17). On the way to the Promised Land their worship centers on the "tent of meeting" (see Ex. 25:22). There the people of Israel "meet God" and are in His presence (29:42f.; 30:36; Nu. 17:4 [MT 19]). The initiative in these experiences, however, lies with God, who summons His people to meet Him, directs their worship, and through this encounter reveals Himself to them. The prophet Amos warns Israel of coming punishment in words reminiscent of Sinai: "Prepare to meet [*qārā'*] your God" (Am. 4:12; cf. Ex. 19:11, 15).

Similarly, individuals such as Balaam (Nu. 23:15; cf. 23:3), Jacob (Hos. 12:4 [MT 5]), and the psalmist (Ps. 59:10 [MT 11]) "meet God." God meets the person who "joyfully works righteousness" (Isa. 64:5 [MT 4]); He meets with "goodly blessings" the king who rejoices in the strength of the Lord (Ps. 21:1, 3 [MT 2, 4]). Individuals encounter God in His various attributes. Thus God meets His people as a faithful friend "in his steadfast love [Heb. *ḥeseḏ*]," (Ps. 59:10 [MT 11]; by contrast, cf. the Ammonites and Moabites, who shunned the fugitive Israelites, refusing to "meet [them] with bread and with water on the way" [Dt. 23:4 (MT 5); cf. Isa. 21:14]). God meets in His "compassion" (*raḥ^{a}mîm*) those who are brought low (Ps. 79:8). In Ps. 85:10 (MT 11) the divine attributes "steadfast love" and "faithfulness" are personified as God's servants or messengers who "meet" in the fullness of salvation.

In the NT "meet" may indicate a gathering together (e.g., the chief priests and council, Acts 22:30; the church, 1 Cor. 11:20). More often, however, "meet" denotes an act of welcoming someone (e.g., *hypantáō*, Mt. 8:28; 28:9; Mk. 5:2; Lk. 8:27; Jn. 4:51; etc.). As Paul approached Rome, one group of Christians met him at the "Three Taverns" (a stopping place on the Appian Way some 53 km. [33 mi.] from Rome), while another group went out as far as the market town of Appii Forum (10.5 km. [6.5 mi.] farther from the city) in order to escort him into Rome (Acts 28:15). The term used here (*apántēsis*) is "almost a technical term for the official welcome of a visiting dignitary by a deputation which went out from the city to greet him and escort him for the last part of his journey" (Bruce, p. 527 n. 26). The term is also used in Jesus' parable of the bridegroom (Mt. 25:6; in v. 1 the earliest MSS have *hypántēsis*, which the NT uses interchangeably with *apántēsis*) and in 1 Thess. 4:17, which envisions living believers as caught up "to meet the Lord in the air," i.e., to welcome Christ and acclaim Him as Lord (see *TDNT*, I, 380f.).

Greek *episynagōgḗ* refers to both an assembly of believers and the action of meeting together. In the NT it carries strong eschatological coloring (cf. Mk. 13:27, *episynágō*). The Church awaits the day when it will assemble to meet Christ at His parousia (2 Thess. 2:1). In the meantime, believers must not neglect their regular assembly (He. 10:25). The prefix *epi-* points to the definite center to which the gathering is directed, namely, to Jesus Christ (see Westcott, p. 325).

Figuratively, one can speak of "meeting" a challenge or test. In 2 Cor. 13:5 Paul exhorts the Corinthian Christians to examine whether they are holding to their faith, reminding them that Jesus Christ is in them unless they "fail to meet the test" (*adókimos*; Lat. *reprobus*; AV "reprobate"). Similarly, He. 4:2 warns that some do not benefit from hearing the good news because the message "did not meet with faith in the hearers"; this indicates that the gospel in itself does not save until the believer responds with faith. Jas. 1:2 states that believers are tested when they "meet various trials" (*peripíptō*); yet they are to "count it all joy," for this testing (*dokímion*) produces steadfastness and perfection (vv. 3f.).

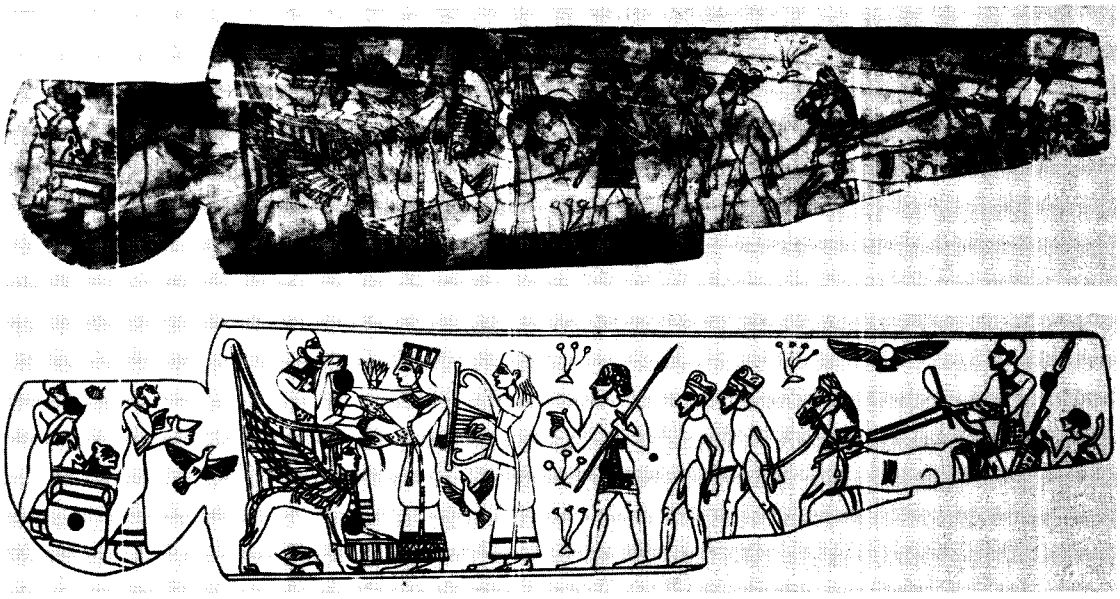
D. K. MCKIM

MEETING PLACES OF GOD [Heb. *môʿᵃḏê ʾēl*] (Ps. 74:8); AV SYNAGOGUES OF GOD; NEB GOD'S HOLY PLACES. The term refers to places of assembly for the worship of the Lord. The AV rendering is unlikely (but cf. Aq. *synagōgás*), since synagogues did not appear until after the Exile (see R. de Vaux, *Ancient Israel* [Eng. tr. 1961], II, 343f.). The plural form has caused much debate (see the comms.), but as A. A. Anderson noted, it may be a plural of extension or amplification (*Psalms*, II [*NCBC*, repr. 1981], 541).

MEGIDDO mə-gid'ō [Heb. *mᵉgiddô, mᵉgiddôn*]; AV also MEGIDDON mə-gid'ən. A royal Canaanite city in north-central Israel overlooking the Valley of Jezreel. It passed into the hands of the Israelites and became a major administrative center. Eshtori Haparhi (14th cent. A.D.) deduced that Megiddo should be located at Khan el-Lejjûn. In late Roman times the town had been called Legio after the Sixth Legion stationed there; its Jewish name was Cephar ʿOtnai. E. Robinson made the same deduction independently. Archeology has shown that the general vicinity was correct, but the actual site of the Bronze and Iron Age town was Tell el-Mutesellim, beside Lejjûn.

I. History.–The site of Tell el-Mutesellim was occupied as early as the Chalcolithic Age (4th millennium B.C.); it was a mighty urban center in the Early Bronze Age (3rd millennium) but was destroyed, like most great cities in the country. For perhaps a century or so prior to 2000 B.C. it must have been only a crude village settlement (M.B. I, the "Intermediate Bronze Age") of which few traces remain.

A. Middle Bronze (M.B. II, *ca.* 2000-1550 B.C.). The new city that rose on the ruins of Megiddo enjoyed close relations with the rulers of the 12th Dynasty of Egypt, as shown by the presence of a statue base of Thuthotep, a high official in Egypt, along with two other stelae. The Execration Texts contain curses on many other towns in



the region, indicating that they were at enmity with the pharaohs, but do not mention Megiddo. The city may have represented the Egyptian interests in the area during this period (M.B. II.A, *ca.* 2000-1800 B.C.). In the so-called Hyksos Age (M.B. II.B, *ca.* 1800-1630 B.C.), a mighty rampart of beaten earth surrounded Megiddo; its settlement was not only on the impressive citadel but also in a "lower city," a "step" on the north side of the mound (where the museum presently stands). No extant inscriptions illuminate the history of Megiddo in this period when the great "Amorite" dynasties were ruling Mesopotamia and the Levant.

B. Late Bronze Age (*ca.* 1550-1200 B.C.). When the West Semitic and Hurrian "rulers of foreign lands" were expelled from Egypt, the new 18th Dynasty began to campaign earnestly in Canaan and sought to spread its hegemony over the entire area. The Levantine rulers under the leadership of Kadesh on the Orontes and Megiddo resisted this effort. They took their stand in the Valley of Jezreel expecting the Egyptians to come from the Sharon

plain via the Valley of Dothan. Two other passes were available, however, one coming out NW of Megiddo (beside Jokneam) and the other, Wâdī ʿÂra (= Nahal ʿIron), by Megiddo itself. The attacking pharaoh, Thutmose III, claimed to have surprised the defenders by advancing through the central pass and taking a stand near Megiddo. The ensuing battle resulted in an Egyptian victory, but the Canaanite allies fled for refuge into Megiddo and capitulated only after a lengthy siege (seven months). Thutmose's annals of the campaign stress the great agricultural wealth of the area (*ANET*, pp. 234-38). Henceforth Megiddo resumed its former role as a base for Egyptian power. A certain Amenhotep, probably the crown prince under Thutmose III, commanded the ruler of Taanach to send a contingent of troops and auxiliaries to Megiddo. This may have been during Amenhotep II's campaign to Takhsi in Lebanon; on his return to Egypt, Amenhotep found that his father had died, leaving him the throne. As pharaoh, Amenhotep encamped at Megiddo after a campaign to quell rebellions at Anaharath to the northeast and Geba-suman to the northwest. Papyrus Leningrad No. 1116a records the presence of an ambassador from Megiddo at the Egyptian court under the 18th Dynasty.

During the mid-14th cent. Megiddo was ruled by Biridiya (or Birdiya), a prince of apparent Indo-Aryan descent whose letters to Pharaoh were found in the Amarna archive. He complained that Egyptian officers were abusing him though he was obedient in all things and had even provided them with thirty head of cattle (Am.Tab. 243). The Egyptian garrison had been removed, and from Biridiya was hard pressed to protect his sheepshearers from ʿApiru raids (Am.Tab. 243). Lab'ayu prince of Shechem had extended his influence northward by force and was threatening Megiddo (Am.Tab. 250). Biridiya begged for one hundred archers to protect the city (Am.Tab. 244). When Pharaoh ordered the troublemaker from Shechem apprehended, Biridiya and his colleagues from the neighboring towns acted in concert to carry out the arrest; however, the culprit apparently bribed the ruler of Acco and thus gained his release while being transported via Hannathon. Biridiya reported that he and a political exile residing with him heard of the escape and rushed to the spot where the prisoner's enemies had recaptured him (apparently in the land of Gina, SE of Megiddo at Jenîn), but he was too late — the suspect had already been put to death (Am.Tab. 250). One result of Shechem's aggression had been the destruction of Shunem, which made the princes in the Jezreel Valley responsible for cultivating the fields of Shunem. Biridiya contended that he alone was faithful to this charge, exerting his influence in the region to bring corvée workers from Japhia on the opposite side of the valley as well as from Megiddo and elsewhere (Am.Tab. 365). Megiddo continued to have its troubles, both with the new rulers of Shechem (Am.Tab. 246) and with the successor at Acco (Am.Tab. 234).

Little is known about the history of Megiddo under the pharaohs of the 19th Dynasty. Megiddo may be mentioned in Seti I's topographical records, but the reading is uncertain. Papyrus Anastasi I, dating from about the reign of Ramses II, stresses Megiddo's strategic position on the highway leading to Beth-shean and illustrates dramatically the dangers to be encountered by a lone charioteer when traversing the Megiddo pass (i.e., Wâdī ʿÂra).

C. Iron Age. The king of Megiddo appears in the list of rulers conquered by Joshua (Josh. 12:21). The Manasseh tribe was to inherit the town and its territory, but they failed to occupy it or the neighboring towns (Josh. 17:11; Jgs. 1:27; cf. also 1 Ch. 7:29). During Barak's victory over Sisera the fighting extended as far as the "waters of Megiddo" near Taanach (Jgs. 5:19), evidently the streams draining the southwest corner of the valley. Excavations at Taanach have shown that its occupation during the transition period between the Late Bronze and Iron Ages was contemporary with that at Megiddo. Thus Albright's suggestion that the two towns were occupied alternately at this time should be rejected. The population of Megiddo was subjected to forced labor, a status they had formerly imposed on others, when the Israelites became strong enough to dominate the cities in the Jezreel Valley (Jgs. 1:28). Since forced labor was possible only under the monarchy, it would seem obvious that Megiddo first came under Israelite control during David's reign (the Philistine

presence had curtailed Saul's power in this region; cf. 1 S. 28:4). In converting the city into an Israelite administrative center, David may have built the two sturdy "palaces," one on the north and the other on the south.

Solomon refortified Megiddo, along with Hazor and Gezer (1 K. 9:15). The contemporary gates at each of these sites have been excavated; they show variations in construction methods, but their basic ground plan is strikingly similar. On the other hand, casemate walls were built at Hazor and Gezer, but a heavy wall of the salient-and-recess type surrounded Megiddo. Large storehouses and related structures served the garrison stationed there.

During the fifth year of King Rehoboam (*ca.* 920 B.C.), Pharaoh Shishak marched victoriously through the northern kingdom of Jeroboam I. He listed Megiddo as one of his conquered towns (no. 27), and a stele of his was actually found in the excavations there.

After Jehu's revolt Ahaziah of Judah fled to Megiddo, where he died from his wounds (2 K. 9:27; cf. 2 Ch. 22:9). Megiddo fell under the Assyrian yoke *ca.* 732 B.C. and evidently became the capital of the Galilee province named for it. During his short-lived period of expansion after the Assyrian collapse, Josiah of Judah also extended his own authority over Megiddo, where he chose to confront Pharaoh Neco. His efforts, however, were no more successful than those of the Canaanites many centuries earlier, and he lost his own life (2 K. 23:29; 2 Ch. 35:23). Sometime during the subsequent period the ritual mourning for Hadadrimmon occurred (Zec. 12:11).

In NT times the settlement had moved to nearby Cephar ʿOtnai, but the ancient mound with its history of wars and tumults was not forgotten. The book of Revelation placed "the battle on the great day of God the Almighty" at ARMAGEDDON (Gk. *Harmagedōn*, Rev. 16:14-16), meaning "the hill of Megiddo" (Heb. **har-mᵉgiddôn*). (But cf. W. S. LaSor, *Truth about Armageddon* [1982], pp. 135-147.)

II. Excavation.–Tell el-Mutesellim was first examined archeologically by G. Schumacher (1903-1905). The Oriental Institute of the University of Chicago resumed work there; their excavation was one of the most important ever carried out in Palestine (1925-1939). Y. Yadin and J. Dunayevski of the Hebrew University of Jerusalem later conducted minor investigations of certain problems.

The important remains still preserved include the entryway and part of the Solomonic gate (*see* picture in FORTIFICATION); gates from the Middle and Late Bronze Ages; parts of the foundation for Solomon's salient-and-recess wall (remains of the Davidic [?] palace appear beneath this wall on the north edge of the tell); a sacred area having three temples and a circular "high place," which, it is now clear, date to the Early Bronze Age (*see* picture in ALTAR); a section of the E.B. city wall; some Iron Age houses; parts of the main storehouse complex; a grain silo; and, most impressive of all, the great shaft and water tunnel.

Two major finds of the Chicago expedition have been debated. The expedition's interpretation of the large public complexes of stratum V as stables was clearly wrong. No artifacts pertaining to horses or chariotry were found. The cobblestone floors would be detrimental to hooves, and the holes supposedly for tethering face the center aisles, not the sides where animals would have stood. Most conclusively, there was only one door through which to lead the fifteen horses in any one hallway. Identical structures found recently at Beer-sheba were full of storage and other vessels. Thus, the Megiddo buildings were storehouses, like similar structures found at numerous other sites in Israel.

Yadin and others later claimed that the salient-and-recess wall associated with these storehouses dates to the reign of Ahab, not to that of Solomon. This wall, however, is the only one attached to the "Solomonic gate" (like those at Hazor and Gezer). Structures found by Yadin under the salient-and-recess wall hardly constitute a casemate wall as he assumed. Some are the outermost rooms of poorly built dwellings; others are the courtyard rooms of an impressive palace. Yadin may have found the palace of David (not Solomon) under the storehouses of Solomon, though exact historical dating of these strata is a precarious undertaking.

A. F. RAINEY

MEGILLOTH mə-gil-lōth', mə-gil'əth [Heb. *mᵉgillôṯ*–'scrolls']. Plural noun (sing. *mᵉgillâ*, "scroll," Jer. 36:28f.; Ezk. 2:9; etc.) derived from the verb *gālal*, "roll," hence meaning that which is rolled up, i.e., a SCROLL. The five Megilloth, grouped in the following order in the MT, are the books of Ruth, Canticles, Ecclesiastes, Lamentations, and Esther, each of which was read at a festival (respectively, Pentecost, Passover, Tabernacles, the ninth of Ab [anniversary of the destruction of Jerusalem], and Purim). The mishnaic tractate *Megillah* deals with the reading of Scripture at these festivals, especially the reading of Esther at Purim.

G. A. L.

MEHETABEL mə-het'ə-bəl [Heb. *mᵉhêṭaḇ'ēl*–'God is doing good']; AV also MEHETABEEL (Neh. 6:10).

1. Daughter of Matred; wife of Hadad (or Hadar), one of the kings of Edom (Gen. 36:39; 1 Ch. 1:50).

2. Grandfather of Shemaiah, the false prophet hired by Tobiah and Sanballat to tempt Nehemiah to commit sacrilege (Neh. 6:10).

MEHIDA mə-hī'də [Heb. *mᵉḥîḏā'*; Gk. *Maouda* (Ezr. 2:52), *Meida* (Neh. 7:54), *Meedda* (1 Esd. 5:32)]; AV Apoc. MEEDA; NEB Apoc. MEEDDA. Ancestor and patronymic of a family of temple servants (Nethinim) who returned from Babylon with Zerubbabel.

MEHIR mē'hər [Heb. *mᵉḥîr*]. Son of Chelub; father of Eshton; descendant of Judah (1 Ch. 4:11).

MEHOLATHITE mə-hō'lə-thīt [Heb. *mᵉḥôlāṯî*]; NEB OF MEHOLAH. A description applied to Adriel, son of Barzillai, who married Saul's daughter Merab (1 S. 18:19; also 2 S. 21:8, where "Michal" is apparently a copyist's error). It indicates that Barzillai and Adriel came from ABEL-MEHOLAH, and suggests that Saul's motive for giving Merab to Adriel rather than David was to form a marriage alliance with a powerful family (cf. 1 S. 18:17f.).

MEHUJAEL mə-hōō'jə-el [Heb. *mᵉḥûyā'ēl, mᵉḥîyā'ēl*]. Descendant of Cain through Enoch and Irad; father of Me-

thushael (Gen. 4:18). The slight difference between the Hebrew words may reflect the common confusion between Heb. *w* and *y*, which (in writing) were almost indistinguishable by the time of the Dead Sea Scrolls. But U. Cassuto (comm. on Genesis, I [Eng. tr. 1961], 232f.) pointed out the improbability of a scribal error in the same word occurring twice in succession. He suggested that the different forms were intentional, reflecting the common ancient Near Eastern practice of preserving variant traditions as "a mark of literary elegance."

According to some scholars (e.g., G. von Rad, *Genesis* [Eng. tr., rev. ed., *OTL*, 1972], p. 71), Mehujael and the other names in the Cainite genealogy of Gen. 4 are variants of the Sethite genealogy in ch. 5. Thus Mahalalel (5:12f., 15-17) is identified with Mehujael (see *IDB*, *s.v.*). Other scholars, however, noting the differences between the lists, have kept the genealogies distinct (*see* ANTEDILUVIAN PATRIARCHS II). G. A. L.

MEHUMAN mə-hōō'mən [Heb. *mᵉhûmān*]. One of seven eunuchs who served as chamberlains for King Ahasuerus (Est. 1:10).

MEHUNIM mə-hōō'nim (AV 2 Ch. 26:7; Ezr. 2:50; Neh. 7:52). *See* MEUNIM.

ME-JARKON mē-jär'kon [Heb. *mê hayyarqôn*–'the waters of the Yarkon']. A place in the northwestern part of the territory of Dan, before Dan relocated in the upper Jordan Valley (Josh. 19:46). There is a textual problem, however. The MT reads *ûmê hayyarqôn wᵉhāraqqôn*, "and the waters of the Yarkon and the Raqqon." Because of a grammatical rule (see GKC, § 128a) "the waters of" cannot modify also Raqqon; hence this is another place. But the LXX has *kaí apó thalássēs Ierakōn*, "and from the sea Hieracon" (i.e., at the western limit, seemingly from a Hebrew text reading something like *yammâ hayyarqôn*). This suggests that the reading *Raqqon* is the result of dittography with some transposition, and thus scholars have been divided on the identification of the site(s). Israelis consider *mê hayyarqôn* to be the Wâdī el-'Aujâ N of Tel Aviv, on "no sufficient grounds," according to Simons (*GTTOT*, § 336, p. 201). Abel, *et al.*, took Me-jarkon to be Tell ej-Jerîsheh just S of the Wâdī el-'Aujā (*GP*, II, 53; see his discussion in I, 472f.). Others have identified Me-jarkon with Tell el-Qasîleh on the north side of the Yarkon almost opposite Tell ej-Jerîsheh. Raqqon (Rakkon) has been identified with Tell er-Reqqeit on the coast N of the Yarkon. W. S. LASOR

MEKONAH mə-kō'nə (Neh. 11:28, AV). *See* MECONAH.

MELATIAH mel-ə-tī'ə [Heb. *mᵉlaṭyâ*–'Yahweh has delivered']. A Gibeonite who assisted in rebuilding the wall of Jerusalem in the time of Nehemiah (Neh. 3:7).

MELCHI mel'kī [Gk. *Melchi, Melchei* < Heb. *malkî*–'my king']. The name of two ancestors of Jesus in Luke's genealogy (Lk. 3:24, 28).

MELCHIAH mel-kī'ə. *See* MALCHIJAH.

MELCHIAS mel-kī'əs. *See* MALCHIJAH.

MELCHIEL mel'ki-əl [Gk. *Melchiēl*]. The father of Charmis, one of the magistrates of Bethulia (Jth. 6:15).

MELCHIOR mel'ki-ôr [Lat. *Melchior;* prob. < Heb. *melek 'ôr*–'king of light']; **MELKON** mel'kon [Lat. *Melchon*]. According to late Western tradition, one of the three Magi who came to Bethlehem to worship the infant Christ. The NT account (Mt. 2:1-12) says nothing about the number, names, or country of origin of the WISE MEN, but these and many other details have been supplied by fanciful legends that have arisen throughout the centuries. Although their number varies in other traditions (in Syria they usually were twelve in number), in the West they came to be represented as three kings. The earliest reference to their names appears in a sixth-century chronicle, the *Excerpta Latina Barbari*, which calls them Bithisarea, Melchior, and Gathaspa. The traditional spellings of their names appear in later artistic and literary works (e.g., *Excerpta et Collectanea*, wrongly attributed to Bede), which also provide details of their origin and appearance. Bede (*ca.* 673-735) interpreted them as representing the three divisions of the human race (Asia, Africa, and Europe) that had descended from the three sons of Noah (*In Matthaei Evangelium Expositio* i.2). The fourteenth-century Armenian Infancy Gospel cites a tradition identifying the Magi as Melkon king of Persia, GASPAR king of India, and BALTHASAR king of Arabia. Another legend depicted them as being found by Thomas in Parthia, receiving baptism from him, and becoming evangelists.

In the Middle Ages the three came to be venerated as saints, their feast day being January 6 in the Western Church. Their relics were supposedly discovered in the East in the 4th cent. and moved first to Constantinople and then, in the 5th cent., to Milan. In 1162 Frederick Barbarossa transferred them to Cologne, where they remain enshrined.

MELCHISHUA mel-kə-shōō'ə (AV 1 S. 14:49; 31:2). *See* MALCHISHUA.

MELCHIZEDEK mel-kiz'ə-dek [Heb. *malkî-ṣeḏeq*] (Gen. 14:18; Ps. 110:4); [Gk. *Melchisedek*] (He. 5:6, 10; 6:20; 7:1, 10f., 15, 17); AV NT MELCHISEDEC. The king of Salem and priest of God Most High who blessed Abram and received tithes from him following the patriarch's victory over Chedorlaomer and his allies.

1. Historical Account (Gen. 14:17-20).–As Abram returned from his victory over the kings who had captured Lot, the priest-king of Salem met him. This Canaanite dignitary manifested his friendship toward Abram by serving him bread and wine and blessing him in the name of God Most High. In recognition of Melchizedek's priesthood, Abram gave him a tithe of the goods taken in the battle against the kings.

"Melchizedek" appears to have been a Canaanite royal name. It is very similar to "Adonizedek" (Josh. 10:1), a later king of Jerusalem who was slain by Joshua. "Melchizedek" is composed of the words *melek*, "king," and *ṣeḏeq*, "righteousness." Although each of these terms was frequently used in West Semitic names (see H. Huffmon, *Amorite Personal Names in the Mari Texts* [1965], pp. 230f., 256f.; *IP*, pp. 114f., 118f., 161f.), only here are they found together. The Amarna Tablets (*ca.* 1400 B.C.) give evidence of the use of the word *ṣeḏeq* in Jerusalem (Johnson, pp. 34f.) and the use of *melek* in the formation of proper names (e.g., *Ilu(-i)-milku* and *Abi-milki*; Johnson, pp. 39f.). The Râs Shamrah literature contains similar personal names.

The author of Hebrews declares the meaning of "Melchizedek" to be "king of righteousness" (7:2). Philo's explanation that it means "the righteous king" confirms that this was the first-century understanding of the term (*Legum allegoriae* iii.79). The Amarna and Râs Shamrah parallels suggest, however, that the original meaning was "my (the) king is righteous," "my (the) king is Zedek" (a deity), or "Milki (a deity) is righteous." See Delcor, pp. 115f.

That "Salem" was a designation for Jerusalem is confirmed by its use in Ps. 76:2 (MT 3) in synonymous parallelism with "Zion." The Genesis Apocryphon and the Targums on Gen. 14 also identify Salem as Jerusalem. The Amarna letters of Abdu-Ḥeba to the king of Egypt reveal that as early as 1400 B.C. *Urusalim* was an important Canaanite city-state.

The historicity of the Melchizedek account is further confirmed by the appearance of the terms 'El ("God") and 'Elyon ("Most High") in Ugaritic and Phoenician literature as names of deities. The two terms also occur together in an Aramaic inscription from Sujin (M. H. Pope, *El in the Ugaritic Texts* [*SVT*, 2; 1955], pp. 55-58).

II. Messianic Application (Ps. 110:4).– Although commentators do not agree about the messianic character of Ps. 110, the NT writers did not doubt this identification. Christ interpreted the Psalm as messianic while debating with the Pharisees (Mt. 22:44 par.), and it may be assumed from the silence of the religious leaders that they also accepted the messianic interpretation. Peter likewise treated the passage as messianic (Acts 2:34), as did the writer of Hebrews (1:13). The psalmist's distinguishing himself from the exalted person described in vv. 1-4 indicates that its application extends beyond David.

The greatness of Melchizedek puzzled Jewish scholars. Abraham's paying tithes to Melchizedek and being blessed by him suggested that his importance exceeded even that of the patriarch. In explanation some Jews identified Melchizedek with Shem, who was thought to have lived until Abraham's time (Targum Neofiti I). Although the psalmist did not adopt this identification of Melchizedek, he did recognize the greatness of the priest-king, viewing him instead as a representation of the Messiah. It may be conjectured that the messianic identification was based on two factors: (1) the greatness of Melchizedek and (2) his unending priesthood (inferred from the silence of the Genesis account about his death).

III. Typological Significance (He. 7).–The author of Hebrews built his argument for the superiority of Christ's priesthood on Ps. 110:4, obviously viewing that Psalm as messianic. He cited the psalmist's declaration three times (He. 5:6, 10; 6:20) to justify the messianic application of Gen. 14:17-20. But his treatment of the Genesis account (He. 7) is not allegorical like Philo's (*Legum allegoriae* iii.79, 82). Instead he saw Melchizedek as a type of Christ. The argument of He. 7 is similar to the rabbinic argument from silence, which assumed that nothing exists unless Scripture mentions it. Since Genesis says nothing of Melchizedek's parents, genealogy, birth, or death, he serves as a type representing the eternal Son of God (v. 3).

"Melchizedek" and "Salem" also are seen as having messianic significance (v. 2). "Melchizedek" is interpreted as meaning "king of righteousness" and "Salem" as "peace," explanations previously advanced by Philo (*Legum allegoriae* iii.79).

Some have thought that Melchizedek was a Christophany rather than a historical character and thus understood vv. 2b-3 literally rather than typologically. A major objection to such an interpretation is the statement that Melchizedek resembled (Gk. *aphōmoiōménos*) the Son of God (v. 3). The verb *aphomoióō* always assumes two distinct and separate identities, one of which is a copy of the other. Thus Melchizedek and the Son of God are represented as two separate persons, the first of which resembled the second.

Having established a relationship between Melchizedek and Christ, the author of Hebrews then showed that Christ is a greater priest than the Levitical priests because in the person of Abraham, Levi paid tithes to Melchizedek and was blessed by him (vv. 4-10). Furthermore, long after the establishment of the Levitical priesthood, David spoke of another priest who was not a descendant of Levi. This statement is taken as proof that the Levitical priesthood was replaced by a priest like Melchizedek, namely Christ (vv. 11-19).

IV. Qumrân Identification of Melchizedek.–In 1956 thirteen fragments of a first-century manuscript were found in Qumrân Cave 11 (11QMelch). The text is an eschatological midrash built on the concept of the Jubilee Year (Lev. 25) and weaving in a number of eschatological passages (Dt. 15:2; Isa. 61:1; Ps. 82:1f.; 7:8f. [MT 9f.]; Isa. 52:7). A. S. van der Woude, the original publisher of 11QMelch, saw Melchizedek as playing a significant role, standing in the assembly of God among the angelic beings. There he is depicted as executing divine judgment, which is somehow related to the Jubilee Year. He also seems to be involved either as the one who atones for the sins of the people or as the priest who mediates atonement to them.

A few students of Qumrân literature identify the Melchizedek of 11QMelch as an earthly person who met Abraham (Gen. 14) and whose likeness will be reproduced in the coming Messiah. Most Qumrân scholars, however, view the Qumrân Melchizedek as a high angelic being who was thought to have appeared to Abraham. This tradition, preserved at Qumrân, may provide the background for the use of the Melchizedek figure in He. 7:1ff. to emphasize the superiority of Christ over the Levitical priesthood.

MELEA mē'lē-ə [Gk. *Melea*]. An ancestor of Jesus in Luke's genealogy (Lk. 3:31).

MELECH mel'ək [Heb. *meleḵ*–'king']. Grandson of Meribaal the grandson of Saul, from the tribe of Benjamin (1 Ch. 8:35; 9:41).

MELICU mel'ə-kōō (Neh. 12:14, AV). *See* MALLUCHI.

MELITA mə-lē'tə (Acts 28:1, AV). *See* MALTA.

MELKON mel'kon. *See* MELCHIOR.

MELODY [Heb. *higgāyôn* (Ps. 92:3 [MT 4]), *zimrâ* (Ps. 98:5; Am. 5:23)]; **MAKE MELODY** [Heb. *zmr* (only in the piel, *zimmēr*; Jgs. 5:3; Ps. 27:6; 33:2; 57:7 [MT 8]; 147:7; 149:3), piel of *nāgan* (Isa. 23:16); Gk. *psállō* (Eph. 5:19)]; AV also SOLEMN SOUND (Ps. 92:3 [MT 4]), PSALM (Ps. 98:5), SING (or GIVE) PRAISE(S), etc.; NEB SOUNDING CHORDS (Ps. 92:3 [MT 4]), PSAL-

TERY (Ps. 98:5), MUSIC (Am. 5:23), TOUCH THE STRINGS (Isa. 23:16), SING (or RAISE) A PSALM, etc.

The most common of these words, *zimmēr,* has cognates in most Semitic languages, ranging in meaning from strictly singing (Akkadian) to singing with instrumental accompaniment (Akkadian, Syriac) to strictly playing of instruments (Aramaic, Arabic). The music could be either secular or religious, depending on context and purpose. In the OT the word refers exclusively to joyful singing of praises to God, often accompanied by stringed instruments of various types (the RSV most commonly renders it as "sing" or "sing praises"). The root *ngn* refers to playing of strings (as a verb), or to music or songs accompanied by strings (as a noun). It can be used in either a secular or religious sense (cf., e.g., the use in 7 Psalm superscriptions with Isa. 23:16, which describes a harlot's sweet melody making, or Lam. 3:14, 63, or Job 30:9, which refer to taunt songs). *Psállō* originally meant to play a stringed instrument; in the LXX it generally translates *zimmēr* and *ngn.* In the NT it refers to singing God's praises (not necessarily accompanied by strings).

See also MUSIC; PSALMS; SONG.

MELONS [pl. of Heb. *ʾabaṭṭî(a)ḥ*; cf. Arab. *baṭîḫ*]; NEB WATERMELON. The melons of Nu. 11:5 probably included two delicious indigenous melons, the common Egyptian *Citrullus vulgaris* (watermelon), and the *Cucumis melo* L. (musk melon). Both have been cultivated in Egypt from early times and grow to a considerable size. Melons formed an inexpensive part of the food eaten by the Israelites during their captivity in Egypt, and were recalled with longing by the parched Hebrews when wandering in the Sinai Peninsula. R. K. H.

MELT [Heb. hiphil of *māsâ* (Dt. 1:28; Josh. 2:9; Mic. 1:4; etc.), *śûś*–'rejoice' (Isa. 8:6), *mûg* (Isa. 14:31; Jer. 49:23; Ezk. 21:15 [MT 20]; etc.), niphal of *māsas*–'dissolve' (Ezk. 21:7 [MT 12]), hiphil of *nāṭaḳ* (Ezk. 22:20); Gk. *lýō* (2 Pet. 3:12)]; AV also "discourage," "faint," "be dissolved," etc.; NEB also "discourage," "dissolve," "be troubled," etc. The various biblical terms express the "dissolving" or "melting" of elements and often metaphorically describe cowardice ("our hearts melt," Dt. 1:28; Josh. 14:8; etc.). The references to mountains melting in God's presence (Ps. 97:5; Mic. 1:4; Nah. 1:5) occur in connection with God avenging Himself upon His enemies. The allusions do not seem to be merely metaphorical, but would encompass the kind of volcanic activity that occurred periodically in Palestine. Cf. 2 Pet. 3:12, which describes apocalyptically the fiery termination of the earth. Ezk. 22:20 uses a metallurgical term for the reduction of ores prior to the manufacture of an alloy. R. K. H.

MELZAR mel'zär. The AV translation of Heb. *hammelṣar* in Dnl. 1:11, 16. The AV follows the LXX, Syr., and Vulg. in regarding the term as a proper name. In the MT, however, it is clearly a title, as the definite article proves (hence RSV "steward"; NEB "guard"). The word is probably derived from Akk. *maṣṣaru,* "guard" (see J. A. Montgomery, comm. on Daniel [*ICC,* 1927], pp. 131, 134). *See* STEWARD.

MEM mem [מ, ם]. The thirteenth letter of the Hebrew alphabet, in *ISBE* transliterated as *m.* It also came to represent the number forty. *See* WRITING.

MEMBER [Heb. *ʾēqer*–'offspring,' *šāpʿḳâ*–'penis,' *nepeš*–'breath,' *bēn*–'son,' *yʿṣurîm, bāśār*–'flesh'; Gk. *mélos, bouleutēs*–'council,' *sýntrophos*–'brought up together with,' *oikeios*–'belonging to the house' (Eph. 2:19), *sýssōmos*–'belonging to the same body' (Eph. 3:6)]; AV also STOCK, PRIVY MEMBER, COUNSELLOR, PERSON, CHILDREN, FLESH, etc.; NEB also ORGANS, LIMBS AND ORGANS, PART(S), BODILY PARTS, etc.

"Member" may refer to parts of the body (Job 17:7), e.g., the tongue (Jas. 3:5f.; cf. 4:1), or the male sexual organ (Dt. 23:1; Ezk. 23:20).

"Member" also denotes one who belongs to a group, e.g., a family (Lev. 25:47), a tribe (1 Ch. 5:23), or a council (Mk. 15:43). In two texts the RSV supplies "member," although the Greek text has no separate word for it (Rom. 11:1; 1 Cor. 6:5; cf. AV, NEB).

The occurrences of the Gk. *mélos* have great theological significance. Paul uses *mélos* in various ways. In Rom. 6 he instructs his readers not to allow their members (bodily parts) to be servants of sin but to use them as instruments of righteousness (v. 13). Christians are under an obligation to serve God in their entire being. In 7:5 Paul asserts that sin can exert its power over the members of a person's body (see the comms. on the issue of whether he is describing a regenerate or unregenerate person).

More specifically, Paul also uses *mélos* to warn that sexual intercourse is not a casual relationship (1 Cor. 6). If a Christian engages in a relation with a prostitute, the Christian has taken his body, which is a member of Christ (belonging and devoted to Christ), and has made it a member of a prostitute.

In Rom. 12:4f. and 1 Cor. 12:12-26 Paul uses the image of a body and its parts or members to describe the character of the Church. Just as a body is a unity and has a variety of members, so a church must recognize that it is a unified body and yet allow for a variety of members. Neither the unity nor the diversity may be overlooked.

In Ephesians Paul uses the metaphors of both the body (3:6; 4:25) and a household (2:19) to describe the Christian's situation (cf. 4:25). Participation in the Church involves a relation to Christ, who is the cornerstone, and to fellow Christians (both Jew and Gentile), since they are members of the same body. P. L. BREMER

MEMMIUS, QUINTUS mem'i-əs, kwin'təs [Gk. *Kointos Memmios*]. A Roman legate sent along with Titus Manius to the Jews after they had defeated the Syrian troops of Lysias at Beth-zur in 165 B.C. (2 Macc. 11:34). In the letter they bore, the Romans offered to negotiate with Antiochus Epiphanes on behalf of the Jews. However, it was not until 161 B.C. and renewed pressure from Demetrius I of Syria that a formal treaty with Rome was concluded (1 Macc. 8:20-32). As no record exists of either legate, many have voiced doubts over the letter's authenticity. Nonetheless, while the date of the letter may be incorrectly stated (it probably should follow that of Lysias, 2 Macc. 11:16-21), there remains little reason to doubt the historical authenticity of the letter.

See V. Tcherikover, *Hellenistic Civilization and the Jews* (1959), pp. 213-220. R. L. OMANSON

MEMORABLE DEEDS, BOOK OF [Heb. *sēper hazziḳrōnôṯ (diḇrê hayyāmîm)*] (Est. 6:1); AV BOOK OF RECORDS; NEB CHRONICLE. Royal archives. Est. 2:20-23 relates that Mordecai saved the life of King Ahasuerus and that this deed was recorded in the official annals of the court (in v. 23 abbreviated to *sēper diḇrê hayyāmîm,* lit. "book of the events of the days," i.e., "chronicles"). Similar expressions occur in Mal. 3:16, "BOOK OF REMEMBRANCE"

(Heb. *sēper zikkārôn*), a book kept in heaven, and Ezr. 4:15, "book of the records" (Aram. *s'par-doḵrānayyā'* [Aram. *dkr* = Heb. *zkr*]), apparently Persian and Babylonian historical documents. G. A. L.

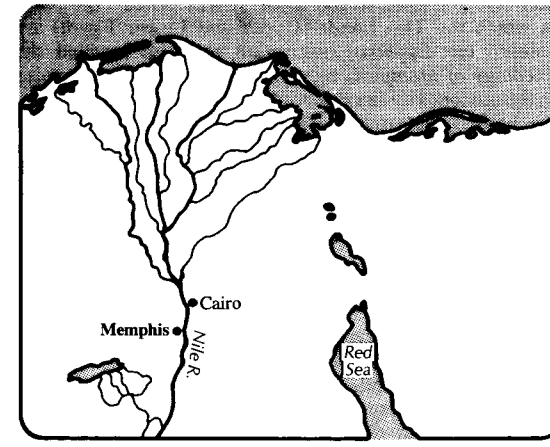
MEMORIAL [Heb. *zikkārôn*] (Ex. 12:14; 13:9; 17:14; Lev. 23:24; Nu. 31:54; Josh. 4:7; Neh. 2:20); NEB REMEMBRANCE, REMINDER, TRADITIONAL RIGHT, etc.; [*'azkārâ*] (Lev. 2:2, 9, 16; 5:12; 6:15; 24:7; Nu. 5:26); NEB TOKEN; [*zēḵer*] (Isa. 26:8); AV REMEMBRANCE; NEB MEMORY; [*šēm*] (Isa. 55:13); AV NAME; NEB GREAT NAME; [*zāḵar*] ("make a memorial offering," Isa. 66:3); AV "burn"; NEB "burn as a token"; [Gk. *mnēmósynon*] (Acts 10:4); NEB "to speak for you"; **MEMORY** [Heb. *zēḵer*] (Job 18:17; Ps. 9:6 [MT 7]; 109:15; Prov. 10:7; Eccl. 9:5); AV also REMEMBRANCE; NEB also NAME, etc.; [Gk. *mnēmósynon*] (Mt. 26:13; Mk. 14:9); NEB MEMORIAL.

Part of the identity of the people of God comes from remembering God's great acts and faithfulness and the origins of His people. Remembrance leads to gratitude and praise for the present and hope and security for the future. Appointed feast days and rites of celebration (Ex. 12:14; 13:9; Lev. 23:24), written records (Ex. 17:14), stored booty (Nu. 31:54), and a stone monument (Josh. 4:7) could all function as "memorials" to remind Israel of what God had done for them. The stone MONUMENT was to be a memorial for Israel for ever, so that when children asked about the meaning, the parents could tell how God brought Israel across the Jordan. Such things as the written records and the stored booty could also function as a memorial for Israel before God, a reminder to God of His great deeds and promises for this people: Nu. 31:54, NEB, tells that Moses and Eleazar brought the booty "to the Tent of the Presence that the Lord might remember Israel." *See also* REMEMBER.

According to Childs (pp. 66-70) *zikkārôn* has two broad categories of meaning. In an active sense *zikkārôn* is a memorial "which calls something else to remembrance," almost always in cultic contexts. In a passive sense *zikkārôn* is a memorandum, "a thing worthy itself of remembrance," usually used in noncultic contexts. Both meanings developed independently from the basic meaning of *zkr*. Cf. *TDOT*, IV, 77-79.

The ceremonial regulations pertaining to certain offerings specify several times the "memorial portion," or *'azkārâ*. The *'azkārâ* may have been an offered portion reminding the worshiper of his God or an appeased God of the worshiper (as the RSV seems to suggest), or it may have been a part functioning and substituting for the whole (as the NEB seems to suggest with "token"; cf. *TDOT*, IV, 79f.). *See also* SACRIFICES AND OFFERINGS IN THE OT.

The LXX uses *mnēmósynon* for *'azkārâ* in Lev. 2:2, 9, 16, etc. In Acts 10:4 the sacrificial significance also seems to be included in "memorial": the angel said to Cornelius, "Your prayers and your alms have ascended as a memorial before God." Similarly, in Tob. 12:12 the angel Raphael offers a "memorial" (*mnēmósynon*) of the prayers before God; the NEB, however, paraphrases this verse and consequently has Raphael say to Tobit, "When you and Sarah prayed, it was I who brought your prayers into the glorious presence of the Lord; and so too whenever you buried the dead." In Mt. 26:13 par. Mk. 14:9 Jesus states that "wherever the gospel is preached in the whole world" the woman's anointing Him with expensive ointment would be told "in memory of her." As W. Lane (*Gospel of Mark* [*NICNT*, 1974], pp. 494f.) points out, the inclusion of this incident in the Gospels "already marks a fulfilment of Jesus' promise." Cf. H. Anderson, *Gospel of Mark* (*New Century Bible Comm.*, repr. 1981), p. 306.



In Isa. 55:13 the RSV translates the Hebrew word for "name" (*šēm*) as "memorial." This translation is quite accurate: as a name remembered and thus living on and on, *šēm* can denote reputation and fame (cf. *TDOT*, IV, 76f.) *See* FAME; NAME. Cutting off the memory of wicked men (Job 18:17; Ps. 9:6 [MT 7]; 109:15) is a curse of death. Prov. 10:7 states (note the poetic parallelism), "The memory [*zēḵer*] of the righteous is a blessing, but the name [*šēm*] of the wicked will rot."

For a thorough discussion of the role of memory and oral tradition in Judaism and early Christianity see Gerhardsson.

M. W. MEYER
G. A. L.

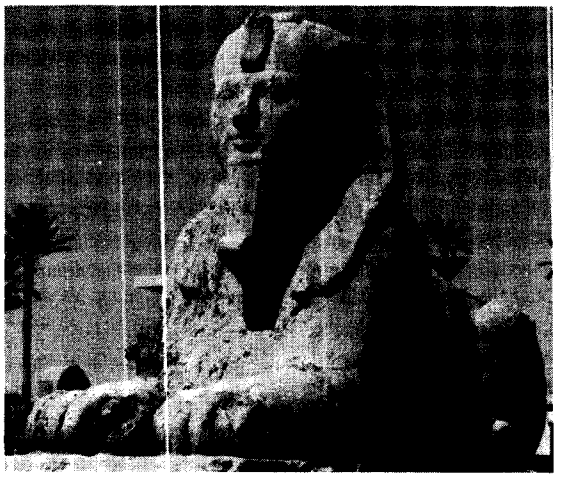
MEMPHIS mem'fis [Heb. *nōp* (Isa. 19:13; Jer. 2:16; 44:1; 46:14, 19; Ezk. 30:13), *mōp* (Hos. 9:6); Gk. *Memphis* (Jth. 1:10)]; AV, NEB, also NOPH. A northern capital of ancient Egypt.

I. Name.–The Greek, Latin, and English name Memphis, Heb. *mōp* and *nōp*, Assyr. *Me-im-pi*, and Arab. *Manf* are all derived from an Egyptian name for the city, *mn-nfr*, probably meaning "the goodness (of Pepi I) endures." The Egyptian religious name of the city was *Ḥt-k3-ptḥ*, "the abode of the spirit of Ptah," which appears in the Akkadian transcription of the Amarna Letters as *Hi-ku-up-taḥ*. From this name for the city came the name for the whole country, Gk. *Aigyptos* and Eng. Egypt.

II. Scripture References.–Hosea 9:6 warns that Memphis will bury exiles from Israel, perhaps an allusion to the extensive cemeteries of this city. Isa. 19:13 denounces the princes of Memphis as deluded. Jer. 2:16 says that the men of Memphis have broken Israel's head, perhaps referring to Pharaoh Neco's conquering and slaying King Josiah. According to 44:1, after the fall of Jerusalem in 587 B.C. some exiles from Judah settled in Memphis, but the LXX lacks this city name. 46:14 includes Memphis among the cities of Egypt to be warned of Nebuchadrezzar's attack, and v. 19 predicts the devastation of Memphis. Ezk. 30:13 foretells the destruction of the idols and images of Memphis. In v. 15 the LXX says that the people of Memphis (instead of No or THEBES, as in the MT) will be cut off, and v. 16 (MT) predicts that Memphis will be attacked by adversaries (AV "Noph shall have

distresses daily"; but cf. RSV "its walls [shall be] broken down," based on an unsupported emendation; NEB "flood-waters shall burst into it," based on the LXX).

The Apocrypha lists Memphis among the chief cities of Egypt in the time of Nebuchadrezzar (Jth. 1:10). The enthronement of Ptolemy VI Philometor mentioned in 2 Macc. 4:21 was doubtless celebrated in both Memphis and Alexandria.



Among the Pseudepigrapha the Sibylline Oracles refer to Memphis several times: as yielding to Augustus (5:16f.), as once the mistress of the earth but to become miserable (vv. 60-72), as to be afflicted so that her very pyramids would groan (vv. 180f.). The Testaments of the Twelve Patriarchs call the wife of Potiphar (here named Pentephris) a woman of Memphis (T. Jos. 3:6) or the Memphian woman (12:1; 14:1, 5 [variant]; 16:1).

Some Moslem traditions localize incidents in the lives of Joseph and of Moses in Memphis (yāqūt *Mu'jam al-buldān, s.v. Manf,* and al-Bayḍāwī on the Koran, 18:13, 15).

III. Topography and Archeology.–The ruins of Memphis are on the western bank of the Nile between the villages of Badrashayn on the east and Mīt Rahīnah on the west, about 19 km. (12 mi.) S of Cairo, the modern capital of Egypt. Memphis thus shared with Cairo a strategic location near the apex of the delta. It was called "the place in which the Two Lands [Upper and Lower Egypt] are united" (an Egyptian inscription sometimes called the *Theology of Memphis,* line 4). Since most of the remains of the ancient city are destroyed or underground, its limits are hard to determine; Diodorus (i.50) said its original circumference was 150 stadia (28 km., 17 mi.).

The heart of the city was evidently near Mīt Rahīnah, where archeological expeditions have found, from north to south: (1) a temple of the goddess Neith(?); (2) a palace of Apries (biblical Hophra, of the 26th Dynasty); E of this (3) a fort and (4) a camp, where doubtless Egyptian and later invading troops, like the Persians and the Greeks, were quartered; (5) the great temple of Ptah, to which many pharaohs added for three thousand years; in the southwest corner of the enclosure of the temple of Ptah (6) the embalming house of the Apis bulls; near the south propylon of the temple of Ptah (7) a colossal limestone statue, now recumbent, of Ramses II of the 19th Dynasty; near which is (8) an alabaster sphinx, perhaps representing Ramses II; also nearby lay until recently (9) a pink granite colossus of Ramses II, now restored and erected in the station square (Bāb al-Ḥadīd) in Cairo; (10) an approach to the east pylon of the temple of Ptah, constructed by Ptolemy IV; on Kōm al-Qal'ah, SE of the temple of Ptah, (11) a temple constructed by Merneptah of the 19th Dynasty; S of the temple of Ptah (12) a temple built by Siamon of the 21st Dynasty and (13) a temple of Apis; and (14) many terra-cotta heads made by Greek artists and representing Egyptians and other nationalities resident in Memphis during the 5th cent. B.C., including Persians, Greeks, and Ethiopians.

Alabaster sphinx at Memphis from the time of Ramses II (W. S. LaSor)

Memphis contained many other temples, according to Egyptian inscriptions and Greek literary sources, especially Herodotus, Diodorus, and Strabo. In addition to the great temple of Ptah, there were two other temples to this god and also temples to Amon, Apis, Aton, Bastet, Imhotep, Isis, Khnum, Osiris, Sekhmet, Sobek, Sokar, Thoth, and the children of Ptah (called Cabeiri by Herodotus [iii.37]). The most important of these structures were dedicated to Ptah and Apis. Ptah, according to the *Theology of Memphis,* created all things, including the other gods, by his word. He is usually represented as a mummy with the head exposed and the hands grasping a scepter. Apis, a god of fertility and of the dead, later associated with Osiris and called Serapis, was worshiped in the form of a bull with special markings. Beginning perhaps in the Hyksos period, temples were built to the Canaanite gods Baal and Baal-zaphon and goddesses Qedesh, Baalat, and Astarte. Astarte may have been the QUEEN OF HEAVEN whose worship by the Jewish exiles in Egypt Jeremiah condemned (Jer. 44:17-19, 25).

Connected with the city of Memphis were cemeteries unrivaled in extent, length of use, and grandeur of their monuments. Immediately W of the heart of the city, on the edge of the desert, was the pyramid field of Saqqârah, containing the mortuary temple and step pyramid of Djoser of the 3rd Dynasty (*see* picture in EGYPT), the Serapeum in which the embalmed Apis bulls were buried, nobles' tombs elaborately decorated with reliefs depicting the life of the Old Kingdom, and the pyramid of Unis of the 5th Dynasty, with its Pyramid Texts, among the most ancient interpretations of the afterlife. The cemetery of Memphis extended 24 km. (15 mi.) N of Saqqârah along the edge of the desert, including the pyramids and mastabas of Abusir, Zawiyat al-'Aryan, Gīzeh (whose pyramid of Khufu, or Cheops, of the 4th Dynasty was a wonder of the ancient world; *see* picture in EGYPT), and Abu Ruwash. Also within the cemetery S of Saqqârah were the pyramids of Dahshur from the Old and Middle Kingdoms.

IV. History.–The priests of Memphis told Herodotus (ii.99) that the city and the great temple of Ptah were founded by Menes (*ca.* 3100 B.C.), the uniter of Upper and Lower Egypt and the first king of the 1st Dynasty. The earliest name for the city, *inb-hd,* "white wall," continued as the name of the nome, or province, and of the military citadel of Memphis (Herodotus iii.91; Thucydides i.104). During the Old Kingdom Memphis remained the capital, and *mn-nfr,* the name of the pyramid of the pharaoh Pepi I (6th Dynasty), was transferred from the cemetery of Saqqârah to the neighboring city of the living.

In the Middle Kingdom the capital was moved to Heracleopolis and then to Thebes, which surpassed Memphis in grandeur under the 18th Dynasty. Memphis, however, remained an important religious and cultural center. The Hyksos captured it in the 18th cent. B.C., and according to Josephus (*CAp* i.14 [75-82]), one of their kings, Salatis, lived there as well as at Avaris. The Nubian Pi-ankhi captured Memphis *ca.* 720 B.C. Esarhaddon the Assyrian conquered the city in 675 B.C. and took as booty crowns, antimony, linen, copper, tin, and utensils of gold, silver,

and ivory; his captives included physicians, diviners, goldsmiths, and cabinetmakers (his Dog River stele). In 525 Cambyses took the city and later shocked the Egyptians by killing the Apis bull (Herodotus iii.13, 28). Alexander the Great entered Memphis without opposition in 332 to be acknowledged as successor to the pharaohs; he offered sacrifices to Apis and other gods (Arrian *Anabasis* iii.1). The Ptolemies continued to be enthroned in Memphis at least till Ptolemy VII Euergetes II Physkon (Diodorus xxxiii.13). By 7 B.C. (Strabo *Geog.* xvii.1.32) Alexandria had replaced Memphis as the largest city in Egypt. The Arab general 'Amr ibn-al-'Ās captured Memphis in A.D. 638 and moved the seat of government to al-Fusṭāṭ. An Arab physician of Baghdad, Abdallatif, visited Memphis *ca.* A.D. 1200 and saw marvelous and extensive ruins covered with reliefs and many statues, most of which have since disappeared.

JOHN ALEXANDER THOMPSON

MEMUCAN mə-mōō'kən [Heb. *mᵉmûḵān*] (Est. 1:14, 16, 21). One of "the seven princes of Persia and Media, who saw the king's face, and sat first in the kingdom." Because of their legal knowledge (v. 13), King Ahasuerus consulted them concerning the proper treatment of the rebellious Queen Vashti. Memucan was the group's spokesman (vv. 16-20), and his advice was adopted by the king (vv. 21f.). *See* PRINCES, THE SEVEN.

MENAHEM men'ə-hem [Heb. *mᵉnaḥēm*–'comforter']. The 17th king (including Tibni) of the northern kingdom of Israel who ruled for ten years (2 K. 15:17). His father's name of Gadi suggests that he probably came from the tribe of Gad. He was not in line for succession to the throne but came to it by assassinating Shallum (v. 14), who in turn had assassinated Zechariah, the son and heir of Jeroboam II (v. 10). Menahem's reason for overthrowing Shallum is unclear. It could have stemmed from a sense of loyalty to the dynasty of Jeroboam, or it could have resulted simply from military adventurism. That Menahem came from Tirzah when he overthrew Shallum has reasonably been taken as indicating that he probably was commander of the troops of the army stationed there.

Not all of the northern kingdom accepted his rule readily. He crushed some of the holdouts at Tipsah (= Khirbet Tafsah?) by executing its population after he conquered it (v. 16). Since there is no other mention of such an Israelite place in the Bible this name is sometimes taken, with the Lucianic version of the LXX, as a reference to Tappuah that became corrupted in the course of textual transmission. The cruelty Menahem exercised here seems to have ended further resistance to his rule.

Having established himself as king, Menahem ruled over a country which had been prosperous and victorious since the days of Jeroboam (2 K. 14:28; Am. 6:4-6, 13). This picture soon changed, however, for the slumbering colossus of Assyria awoke and renewed its expansionistic policies in pursuit of an empire. Through the first half of the 8th cent. B.C. the army had seen little action in foreign fields because Assyria was ruled by a series of weak kings (from Shalmaneser IV to Aššur-nirari V) who were more concerned with internal affairs than external conquests. With the accession of Tiglath-pileser III in 745 this picture changed, for he campaigned against the Medes to the east, against Babylon to the south, and against allies of Urartu to the north and west.

Following up these victories in the west the Assyrians penetrated into Syro-Palestine, where they eventually encountered Israel and Judah. On two different occasions during his reign Tiglath-pileser devoted a series of annual campaigns to the west, from 743 to 738 and again from 734 to 732. These campaigns brought him into contact with two kings of Israel, Menahem and Hoshea, and Ahaz of Judah. His contacts with the king of Judah and Hoshea of Israel occurred during his later campaigns to the west, but those with Menahem came during the first series of these campaigns. This contact is referred to both in the Assyrian king's annals, where Menahem is listed as one of the western kings who paid tribute to him, and in 2 K. 15:19-20, where some of the circumstances surrounding that payment are related.

The amount of tribute that Tiglath-pileser demanded, one thousand talents of silver according to 2 K. 15:19, was a very high price to pay (cf. the 30 talents of gold and 800 [300?] talents of silver Sennacherib of Assyria demanded of Hezekiah of Judah, 2 K. 18:14; *ANET*, p. 288). While Hezekiah paid off his debt by stripping the temple of its precious metals, Menahem paid off his Assyrian oppressor by raising the funds through a tax of fifty shekels of silver levied upon each of the mighty or wealthy men of the realm. That fifty shekels was the price of a slave in Assyria in the 7th cent. B.C. provides an indicator of the relative value of this amount of silver. From the amount of money raised in this way it has been calculated that sixty thousand men were taxed. This large a class of wealthy persons may indicate that a fairly high level of prosperity in Israel continued into the reign of Menahem. The payment of tribute by Menahem was effective in preserving peace in Israel for a time, but this turn of events presaged more dire consequences that were soon to follow. That this is the main event narrated for the reign of Menahem emphasizes how important a turning point it was.

The name of the Assyrian king collecting this tribute is given in the biblical narrative dealing with Menahem only as Pul, not as Tiglath-pileser (2 K. 15:19). The Assyrian king is only named as Tiglath-pileser when the record deals with later events (v. 29; 16:7, 10). The use of the name Pul here reveals an awareness of events that transpired in Mesopotamia when Tiglath-pileser conquered Babylon in 729. After that conquest he installed himself upon the throne of Babylon, taking the name of Pulu as king there according to a Babylonian king list (*ANET*, p. 272). While this historical detail in the biblical record is accurate, this throne-name has been used in a proleptic way, referring to actions of Tiglath-pileser in the past, *ca.* 740, by a title he took up later, in 729. There is no evidence that Pul was his personal name prior to the time he took the Assyrian throne-name of Tiglath-pileser. The correct translation of 1 Ch. 5:26 points out an awareness that these two names referred to the same person by referring to "the spirit of Pul king of Assyria, even the spirit of Tiglath-pilneser king of Assyria" (so NASB; see NIV, NEB; on the variant spelling *see* TIGLATH-PILESER).

The date when Menahem paid this tribute is disputed because the Assyrian royal annals lack precision in dating events of this period. Three positions have been advocated: (1) that Menahem paid tribute in 743, the first year of Tiglath-pileser's western campaigns, (2) that Menahem paid tribute in 740 when other western kings paid tribute at Arpad in Syria, and (3) that Menahem paid tribute in 738, the last year of the first series of western campaigns.

The first alternative seems too early strategically for the Assyrians to have penetrated as far south as Israel. The last alternative rests upon the weak argument of identifying two different tribute lists in the annals as referring to tribute taken on only one occasion. The most likely of these three alternatives, therefore, appears to be that Menahem paid tribute in 740. A stela of Tiglath-pileser discovered in Iran in 1967 lends some support to this view.

It is even more difficult to date the end of Menahem's reign. Through the contact of Hoshea with Tiglath-pileser the death of Pekah can be dated in 732 B.C. (*ANET*, p. 284). It should be a simple task to work backward from that point to Menahem. It is not, however, because of the twenty years assigned to Pekah (2 K. 15:27). Presumably this figure includes his rule in Gilead as a rival to Menahem. Thus there is an overlap here of an inexactly known number of years. The other way to approach the dates for Menahem is to work down to him through the kings of Israel starting with Jehu in 841 B.C. When this is done the best calculations currently available date Menahem's ten-year reign from 747 to 737 B.C.

Aside from this king the name Menahem was well known in the ancient Near East. It was used for an Asiatic in an Egyptian papyrus from the 13th Dynasty (*ca.* 1730 B.C.), it appears on ancient Hebrew seals, and it also is found on an Aramaic ostracon found at Nimrûd in Assyria. There was a king of another western territory, a contemporary of Hoshea of Israel, who was also attacked by Tiglath-pileser of Assyria, but this was not Menahem of Israel (*ANET*, p. 283). It has been advocated that the Samaria Ostraca should be dated in his reign, but more recent information available indicates they should be dated earlier in the 8th cent. B.C.

The reign of Menahem was evaluated as evil from a religious perspective (2 K. 15:18). The evils of this time were those to which the prophets Amos and Hosea addressed themselves. Of the six last kings of Israel it is significant that he appears to have been the only one to have died a natural death (v. 22). This is further testimony to the religious and political difficulties that had developed in the northern kingdom by his time. These difficulties went on to bear their final harvest in the fall of Samaria to the Assyrians less than a quarter of a century after Menahem's death.

W. H. SHEA

MENAN mē'nən (Lk. 3:31, AV). *See* MENNA.

MENE, MENE, TEKEL, AND PARSIN mē'nē, tek'əl, pär'sin [Aram. *mᵉnē' mᵉnē' tᵉqēl ûparsîn*]; AV. RV, UPHARSIN; NEB U-PHARSIN. The words that according to Dnl. 5:25 appeared on the wall during Belshazzar's feast. The *u-* attached to *parsîn*, the Aramaic conjunction "and," softens the following "p"-sound to "ph," pronounced "f." The words can thus be written as in the RSV, "MENE, MENE, TEKEL, and PARSIN."

I. Language of the Handwriting.–Although there can be no certainty here, probably the Aramaic of Dnl. 5 is also the language used for the handwriting. It has come to be called Official Aramaic and is known to have been used from 700-200 B.C. as a lingua franca in the chancelleries of the Near East. Officials of Sennacherib used it in 701 B.C. (2 K. 18:13-37). Since the form of the characters remained relatively stable over a long period, an idea of the appearance of the handwriting can be gained from the sketch below, which the writer has abstracted from a number of Aramaic papyri of the 5th cent. B.C.

II. Wording.–In the interpretation of the inscription (Dnl. 5:26-28), only three words are used, and the last, Peres, is singular rather than plural. Thus many scholars have conjectured that the original form was "Mene, tekel, pares." Support for this view was thought to be found in the ancient versions (see III below).

The confusion of the LXX text in this place and its looseness of translation weaken its testimony. Moreover, Theodotion contradicted its word order. The agreement of Jerome's text with Theodotion may be due to the former's known preference for that Greek text. The supposition that the LXX, Theodotion, and Vulgate represent an attempt at harmonization with vv. 26-28 may account for their divergence from the MT. The support of the MT by the Peshitta cannot be overlooked. The intrinsic probability favors the MT reading. Here J. A. Bengel's critical canon seems to apply: *difficilior lectio potior* ("the more difficult reading is more likely").

III. Meaning.–The following are the various interpretations of this enigmatic phrase: MT: "Mene, God has *numbered* the days of your kingdom and brought it to an end; Tekel, you have been *weighed* in the balances and found wanting; Peres, your kingdom is *divided* and given to the Medes and Persians."

Syriac Peshitta: "Mene, God has *numbered* your kingdom and brought it to an end; Tekel, you are *weighed* in the balances and found wanting; Peres, your kingdom is *divided* and given to the Medes and Persians."

Josephus (*Ant.* x.11.3 [243f.]): "*Manē* . . . would in the Greek tongue signify 'number'; that is to say, God has numbered the time of your life and reign. . . . *Thekel*: this means 'weight'; for God has weighed the time of your kingship and shows that it is already declining. *Phares*: this means 'a break' in the Greek tongue; accordingly He will break up your kingdom and divide it between the Medes and the Persians."

Theodotion: "Mane, God has *measured* your kingdom and fulfilled it; Thekel, *weighed* in the balance and found wanting; Phares, your kingdom is *divided* and given to the Medes and Persians."

Vulgate: "Mane, God has *numbered* your kingdom and He has fulfilled it; Thecal, thou art *weighed* in the balance and found wanting; Phares, your kingdom is *divided* and is given to the Medes and Persians."

LXX summary: "Mane, *Numbered*; Phares, *carried away*; Thekel, *weighed*."

LXX text: "*Numbered; reckoned up; carried away.*"

"The time of your kingdom is *numbered*; your kingdom is *rejected*; your kingdom has been *cut short* and completed and given to the Medes and Persians."

The meaning given by the MT is fully supported by the Peshitta and confirmed by Josephus; the LXX text is farthest from the MT. Although there is no clear reason for not accepting the meaning of the handwriting given in Dnl. 5:26-28 or the words of the inscription given in v. 25, their vocalization is not equally reliable, since the pointing of the text took place many centuries after it was written. The punctuation of the words of the handwriting is presently as obscure as their message was to the wise men of Babylon. The words *TQL* and *PRSYN* are both pointed irregularly, perhaps intentionally.

The interpretation appears to find double meanings in each of the components of the inscription. The primary meaning of the three parts of the handwriting (the dupli-

cation of the first word is probably for emphasis, as elsewhere in the OT) is then *NUMBERED, WEIGHED, DIVIDED*; the secondary meaning is *ENDED, WANTING, PERSIANS*.

All the above meanings are legitimately abstracted from the given Aramaic words on the principle of assonance so common in the OT.

The affinity with commercial symbols, as noted by C. S. Clermont-Ganneau (*Journal Asiatique*, 8 [July/Aug. 1886], 36-67) and T. Nöldeke (*Zeitschrift für Assyriologie*, I [1886], 414-18), was probably intended: Mene = Maneh (cf. Ezk. 45:12); Tekel = Thekel-Shekel of the Aramaic papyri of the 5th cent.; Parsin = half-shekels (O. Eissfeldt, *ZAW*, 63 [1951], 109-114). Thus a second view of the words is reached, "A minah, a shekel, and half-shekels."

Some scholars find in these names of weights a reference to individuals in the Daniel story, e.g., Nebuchadrezzar, Belshazzar, and the Medes and Persians. But the many different combinations favored by commentators leave this interpretation inconclusive and doubtful.

R. J. A. SHERIFFS

MENELAUS mēn'ə-lā'əs [Gk. *Menelaos*]. Brother of Simon, the captain of the temple, from the tribe of Benjamin. He unscrupulously bought the office of high priest from Antiochus Epiphanes, the king of Syria, and through bribes and cunning behavior retained his position for nearly a decade. Josephus probably incorrectly identifies Menelaus as a brother of Jason and Onias III (*Ant.* xii.5.1 [237f.]; xv.3.1 [41]).

According to Josephus (*Ant.* xii.5.1 [237-39]), Antiochus Epiphanes was angry with the high priest Jason and gave the office to Menelaus. According to 2 Macc. 4:23-26, in 171 B.C. Jason sent Menelaus to Antiochus to pay the tributes, and Menelaus used the occasion to purchase the high priesthood for himself by paying three hundred talents of silver more than Jason had paid.

Jason fled into the land of Ammon, and Menelaus returned to Jerusalem "possessing no qualification for the high priesthood, but having the hot temper of a cruel tyrant and the rage of a savage wild beast" (2 Macc. 4:25). When Menelaus failed to make the promised payment to Antiochus, he was summoned to Antioch to apppear before the king. Menelaus left his brother Lysimachus as deputy in the high priesthood (vv. 26-29). Meanwhile, Antiochus had suddenly left Antioch and had appointed Andronicus as his deputy. Menelaus now bribed Andronicus with several gold vessels stolen from the temple and persuaded him to murder the ex-high priest Onias III before this legitimate high priest could undermine Menelaus's position by further exposing his sacrilege. When Antiochus returned to Antioch he executed Andronicus in response to the outcry of both Jews and Greeks, but Menelaus went free (2 Macc. 4:30-38).

Back in Jerusalem the general populace finally rebelled against the plundering of the temple by Lysimachus. In the ensuing battle the troops of Lysimachus were defeated, and he himself was killed. The Jews sent a delegation to Antiochus at Tyre with charges against Menelaus; but once again he bribed his way free, this time paying a substantial sum to Ptolemy son of Dorymenes, who persuaded the king to acquit Menelaus and sentence to death the three men sent as witnesses against Menelaus (2 Macc. 4:39-50).

At this time the false rumor arose that Antiochus had been killed in Egypt, so the deposed Jason led a vigorous attack against Menelaus, forcing him to flee. Antiochus, hearing of the events in Judea, returned from Egypt with his troops, murdered large numbers of citizens, and along with Menelaus, who was restored to power, plundered the temple (2 Macc. 5:1-23).

Menelaus appears once more in 162 B.C. during the reign of Antiochus Eupator. Lysias, the king's chancellor, denounced him to the king as the cause of all the troubles in Judea, whereupon Eupator had him taken to Beroea and killed by being thrown from the top of a high tower into the ashes that filled the tower (2 Macc. 13:3-7). "And this was eminently just; because he had committed many sins against the altar whose fire and ashes were holy" (2 Macc. 13:8).

R. L. OMANSON

MENESTHEUS mə-nes'thē-əs [Gk. *Menestheus*] (2 Macc. 4:4, 21); AV omits in v. 4. Father of Apollonius the governor of Coelesyria and Phoenicia around the time of Antiochus Epiphanes' ascension to the Seleucid throne (175 B.C.). In v. 4 the Greek text is uncertain (cf. AV), and the RSV and NEB follow a Latin version.

MENI mə-nē' [Heb. *mᵉnî*] (Isa. 65:11). A pagan deity, rendered "destiny" by the RSV, "fortune" by the NEB, and "that number" by the AV. *See* DESTINY; FORTUNE.

MENNA men'ə [Gk. *Menna, Mainan*]; AV MENAN. An ancestor of Jesus in Luke's genealogy (Lk. 3:31).

MEN-PLEASERS [Gk. *anthrōpáreskos*] (Eph. 6:6; Col. 3:22); NEB "to curry favor with men."

This word, found within the admonitions to slaves in the NT, evidently functioned also in broader contexts in early Christian literature. In 2 Clem. 13:1 it occurs in the context of an appeal to all the brethren to repent. The letter of Clement tells its readers to be neither men-pleasers nor pleasers of self (Gk. *heautôi aréskein*), but rather to practice what they preach, namely, love for enemies. "Men-pleasers" is thus contrasted to a certain integrity with the Christian confession (cf. Ign. Rom. 2:1).

Twice Paul defended himself from the charge of pleasing men rather than serving God (Gal.1:10; 1 Thess. 2:4, Gk. *anthrōpois aréskein*). He argued that he had not surrendered any principle entailed by the gospel in either his preaching or his practice.

This contrast to integrity with the confession is also important within the context of admonitions to slaves. The parallel passages of Colossians and Ephesians exhort slaves to obey their "according-to-the-flesh masters" (Gk. *toís katá sárka kyríois*), not as men-pleasers but as slaves of Christ the Lord (Gk. *kyríos*), doing the will of God *ek psychḗs* ("from the heart"). Evidently participation in the institution of slavery was not considered a surrender of gospel principles. But it is equally evident, as Théo Preis makes clear, that tension was felt between master-slave relationships and integrity with the confession. The roles of master and slave stood under the criticizing and transforming norm of obedience to the Master of all, in whom there is no partiality (cf. Eph 6:9; Col. 4:1).

See T. Preis, *Life in Christ* (1954), ch. 2.

A. D. VERHEY

MENSTRUATION [Heb. *niddaṯ dāwâ*] (Lev. 12:2); AV "separation for her infirmity"; NEB "impurity through menstruation"; [*niddâ*] (Lev. 12:5); AV "separation"; **MENSTRUAL UNCLEANNESS** [Heb. *niddaṯ ṭum'â*] (Lev. 18:19); AV "put apart for uncleanness"; NEB PERIOD

OF MENSTRUATION. The period of menstruation rendered an Israelite woman ceremonially unclean for seven days and therefore excluded her from worship in the sanctuary and from fellowship with other Israelites (Lev. 15:19-24). The similarity between menstruation and childbirth (i.e., the discharge of blood) no doubt accounts for the comparison in Lev. 12:2, 5.

Leviticus offers what appears to be conflicting legislation regarding intercourse with a menstruating woman. 15:24 states simply that the man, like the woman, "should be unclean for seven days." Thus the result of such intercourse seems to be only temporary uncleanness. In 18:19, however, such intercourse is strictly forbidden, and 20:18 adds a punishment — both man and woman "shall be cut off from any among their people" (*see* CUT, CUT OFF; cf. G. Wenham, *Book of Leviticus* [*NICOT*, 1979], pp. 241-43). Some, e.g., N. Micklem (*IB*, II, 76), have appealed to the documentary hypothesis to explain the discrepancy: 15:24, assigned to the priestly writer, "may represent a later mitigation of an earlier law" (i.e., chs. 17–26, which are usually assigned to the Holiness Code; *see* CRITICISM II.D.5). Others, e.g., Wenham (p. 220), have seen no conflict in these passages; "rather they approach the same topic from different angles," ch. 15 being devoted to rules of impurity, ch. 18 to categorical prohibitions, and ch. 20 to punishments of various sins.

For the rabbinical development of the OT law see Mish. *Niddah*.

See also CLEAN AND UNCLEAN; for the hemorrhaging woman healed by Jesus *see* HEMORRHAGE.

G. A. L.

MENUHAH mə-nōō'hə. The AV mg. translation of Heb. *mᵉnûḥâ* in Jgs. 20:43. Translated literally, the term means "resting-place" (so RSV mg.; cf. AV "with ease"; NEB "without respite"). The RSV and NEB mg. read "from Nohah," following LXX B (*apó Noua*), which reads the Hebrew text as *minnôḥâ*. *See also* NOHAH.

MENUHOTH mə-nōō'hoth [Heb. *mᵉnuḥôṯ*–'resting places']; AV, NEB, MANAHETHITES. A clan that descended from Caleb. Half of the clan were descendants of Shobal (1 Ch. 2:52). Heb. *mānaḥtî* (RSV "Manahathites") in v. 54 comes from the same root as *mᵉnuḥôṯ* and probably refers to another segment of the same clan (cf. AV and NEB, which render "Manahethites" in both passages). *See* MANAHATHITES.

MEONENIM mē-on'ə-nim, **PLAIN OF** (Jgs. 9:37, AV). *See* DIVINER'S OAK.

MEONOTHAI mē-on'ə-thī [Heb. *mᵉʿônōṯay*–'my dwellings']. Son of Othniel and father of Ophrah (1 Ch. 4:13f.). The AV omits "and Meonothai" in v. 13, following the MT. The RSV and NEB reading is probably correct, following the Vulgate and the Lucian recension of the LXX.

MEPHAATH mef'i-ath, mə-fā'əth [Heb. *mēpaʿaṯ*, *mêpaʿaṯ*, also *môpāʿaṯ*]. A city of the Amorites in the territory given to Reuben (Josh. 13:18) and assigned to the Merarites (21:37; 1 Ch. 6:79 [MT 64]). It is later named among the cities of Moab against which Jeremiah pronounced judgment (Jer. 48:21).

Eusebius (*Onom.* 128.22) identified it as the location of a Roman military post, which is the modern Khirbet Nefa'a, NW of Ḥesbân (Heshbon) and 10 km. (6 mi.) S of Amman. Alt located the Amorite city at Tell Jâwah, which is near Khirbet Nefa'a. Cf. *AASOR*, 14 (1934), 4; *GAB*, Maps 11, 17.

W. S. L. S.

MEPHIBOSHETH me-fib'ə-sheth [Heb. *mᵉpîḇōšeṯ*–'utterance of shame,' i.e., of Baal, or 'idol-breaker'; Gk. *Memphibosthe*].

1. Son of Saul by his concubine Rizpah, daughter of Aiah (2 S. 21:8). David gave him, his brother Armoni, and five grandsons of Saul to the Gibeonites to expiate the "bloodguilt" incurred by Saul's house (cf. v. 3) for Saul's violation of the ancient covenant with the Gibeonites (Josh. 9). To alleviate the three-years' famine caused by this "bloodguilt" (2 S. 21:1), David gave these seven relatives of Saul to the Gibeonites, who "hanged them on the mountain before the Lord" (v. 9).

2. Grandson of Saul, son of Jonathan, nephew of Mephibosheth (**1.**) and father of Mica(h), who had numerous progeny (2 S. 4:4; 1 Ch. 8:34ff.).

He was five years old when Saul and Jonathan were slain. The news of these deaths caused his nurse to flee with him from Gibeah; as she hurried, Mephibosheth fell and became permanently lame in both legs (2 S. 4:4). He was carried to Lodebar and put in the charge of Machir, a man of great wealth (9:4; cf. 17:27; Josephus *Ant.* vii.5.5 [113]), and there Mephibosheth married.

When the affairs of the kingdom had settled down David felt compelled to fulfil his oath to Jonathan (1 S. 20:15) by showing favor to a member of his friend's house. Ziba, who was probably managing Saul's estate for David, told him about the crippled prince, and David sent for him. Mephibosheth approached in great fear, for eastern peoples customarily exterminated all the kindred of a previous dynasty. David handed over Saul's estate to Mephibosheth and commanded Ziba to manage it. The king also invited Mephibosheth to eat daily at his table and thus to live according to his royal position (2 S. 9).

Seventeen years later, during Absalom's revolt, David fled from Jerusalem and met Ziba, who provided him with food and wine. David understandably inquired for Mephibosheth. Ziba replied that his master had remained behind in Jerusalem for his own ends, hoping to take the kingdom. Although support still existed for the house of Saul, this was probably a blatant deception; but David was excited enough to believe Ziba and rewarded him by granting him his master's property (2 S. 16:1-4). Later Mephibosheth had the opportunity of giving his version of the story. He approached the king at Gilgal in deep mourning; he had neither washed his clothes nor trimmed his beard since David's departure. He told the king of Ziba's deception and left his fate with David, who spoke, he said, "as an angel of God." Whatever he decided would be right. Most likely David accepted the prince's explanation, although it is strange that he decided to share the property between the two of them; perhaps David suspected both of duplicity. Mephibosheth, anxious to have the king's friendship, declared that he would be willing to forego all (19:24-30).

The last reference to this unfortunate man is the sparing of his life when other members of Saul's household were slain. David was true to his oath to the very end (2 S. 21:7).

In the Chronicler's genealogy (1 Ch. 8:34; 9:40) he is called MERIB-BAAL; no doubt the name *bōšeṯ*, "shame," was a later substitution for the false god.

J. A. BALCHIN

MERAB mē'rab [Heb. *mēraḇ*–'increase']. The eldest daughter of Saul (1 S. 14:49), promised to the man who would kill Goliath (17:25). Although David fulfilled the requirement, no marriage followed. Some time later (18:17) David was again promised her hand if he again defeated the Philistines, though the promise was merely a ruse to have David killed by the Philistines. By this time Saul's jealousy constituted a neurotic condition. Again the prom-

ise was not fulfilled, but Michal's love for David may have been the retarding factor from the first. At the time of betrothal Merab was given to Adriel the Meholathite instead (18:19).

The passage in 2 S. 21:8 probably contains a textual error and "Merab" should be read for "Michal" (following Lucian and Pesh.), although the LXX and Josephus endorse the MT. It is possible that Merab died comparatively young and that her children were left in the care of Michal, who had none. Thus a Targum explanation reads: "The five sons of Merab (which Michal, Saul's daughter brought up) which she bare," etc. The simplest explanation, however, is to assume a scribal error, especially since Heb. *yālaḏ*, "bear (a child)," which is used of Merab in v. 8, cannot mean "bring up." J. A. BALCHIN

MERAIAH mə-rā'yə [Heb. *mᵉrāyâ*]. Head of the priestly house of Seraiah in the time of Joiakim the high priest (Neh. 12:12).

MERAIOTH mə-rī'oth [Heb. *mᵉrāyôṯ*; Gk. *Mariēl, Mariōth, Mareröth* (Ezr. 7:3), etc.; Lat. *Marimoth* (2 Esd. 1:2)]; AV Apoc., NEB Apoc., MARIMOTH.

1. A Levitical descendant of Aaron and ancestor of Ezra; listed in 1 Ch. 6:6f., 52 (MT 5:32f.; 6:37); Ezr. 7:3 as a son of Zerahiah and father of Amariah (Azariah in Ezr. 7:3). 2 Esd. 1:2 probably refers to the same person, but lists him as the son of Arna. The same person may be named in 1 Esd. 8:2, where the RSV omits Gk. *Mareröth* and two other names, following LXX B (cf. AV Meremoth; NEB Mareroth).

2. Another priest in the same family, listed as the son of Ahitub and father of Zadok (1 Ch. 9:11; Neh. 11:11).

3. A priestly family, of which Helkai was the head, in the postexilic period (Neh. 12:15; but cf. v. 3, where the name is given as MEREMOTH).

MERAN mer'an (Bar. 3:23, AV). *See* MERRAN.

MERARI mə-rär'ī [Heb. *mᵉrārî*–'bitterness'? (cf. *mārar*–'be bitter'; cf. also Egyp. *mrr*–'beloved'); Gk. *Merari, Merarei*]; **MERARITES** mə-rä'rīts [Heb. *mᵉrārî* (Nu. 26:57), *bᵉnê mᵉrārî*–'sons of Merari' (Josh. 21:7, 34, 40; 1 Ch. 6:63, 77 [MT 48, 62])].

1. The third son of Levi; younger brother of Gershon and Kohath (Gen. 46:11; Ex. 6:16; Nu. 3:17; 1 Ch. 6:1, 16 [MT 5:27; 6:1]; 23:6). He was among the seventy who went down to Egypt with Jacob (Gen. 46:8, 11). He was head of one of the three chief Levitical families, the Merarites. They were subdivided through Merari's two sons Mahli and Mushi into the Mahlites and Mushites (Ex. 6:19; Nu. 3:20, 33; 26:58; 1 Ch. 6:19 [MT 4]).

At Sinai the Merarites were set apart, with the other Levitical families, to serve at the tabernacle (Nu. 3:33-37; 4:29-33, 42-45; 7:8; 10:17). Their leader was Zuriel son of Abihail (3:35), but together with the Gershonites their service at the tabernacle was under the direction of Aaron's son Ithamar (4:28, 33; 7:8). They were assigned a place of encampment on the north side of the tabernacle (3:35), the Gershonites being on the west, the Kohathites on the south, and Moses and the Aaronites on the east (3:23, 29, 38). Their duties were the care, servicing and transportation of the frames of the tabernacle, with its crossbars, pillars, bases, and accessories, as well as of the pillars of the surrounding courtyard, with their bases, pegs, and cords (3:36f.; 4:31-33).

According to the command of Moses in the plains of Moab, the Merarites were assigned cities to dwell in, along with the surrounding pasture lands for grazing their livestock (Nu. 35:1ff.; Josh. 21:1-3). They received twelve cities in all, four in each of the territories of Zebulun, Reuben, and Gad (Josh. 21:7, 34-40; 1 Ch. 6:63, 77-81 [MT 48, 62-66]), which included Ramoth in Gilead, a city of refuge (Josh. 21:38; 1 Ch. 6:80 [MT 65]).

After the defeat of the Philistines, 120 Merarites under their leader Asaiah (1 Ch. 15:6) participated in carrying the ark from the house of Obed-edom (2 S. 6:10-15; 1 Ch. 15:25) to the tent sanctuary David had prepared for it in Jerusalem (1 Ch. 15:1-15). In his reorganization of the worship of the sanctuary, David divided the Levites into the Gershonites, the Kohathites, and the Merarites (1 Ch. 23:6). The Merarites were charged with "the work for the service of the house of the Lord" (1 Ch. 23:4, 24, 28, 32; cf. 24:26-30); some may have been officers and judges, some were gatekeepers, and some were involved in music and song (1 Ch. 16:42; 23:4f.; 26:1-19, esp. 10f., 16-19). They may also have assisted the Aaronite priests in their priestly duties (1 Ch. 23:28f.). Those appointed to share in the organization of music and song were the Merarite sons of Ethan (or Jeduthun), along with the Kohathite sons of Heman and the Gershonite sons of Asaph (1 Ch. 6:31-48 [MT 16-33]; 15:16-24; 16:41f.; 25:1-31).

In Hezekiah's time two Merarites, Kish and Azariah, participated in the cleansing of the temple (2 Ch. 29:12). In the reign of Josiah two Merarites, Jahath and Obadiah, were among the overseers of the workmen repairing the temple (2 Ch. 34:12). Merarites were also among those who returned to Judah from Babylon and served under Ezra (Ez. 8:18f.) and Nehemiah (1 Ch. 9:14; cf. Neh. 11:15).

See R. de Vaux, *Ancient Israel* (Eng. tr. 1961), 390-94.

2. The father of Judith (Jth. 8:1; 16:7).

M. J. HORSNELL

MERATHAIM mer'ə-thā-əm [Heb. *mᵉrāṯayim*–'two rebellions']. A name used for "Babylon" in Jer. 50:21. It is believed to be a wordplay on Bab. *nâr marratu*, "bitter river" (i.e., the Persian Gulf), since the root of both words is *mrr*, "bitter." The name Pekod, used similarly in the same verse, may be a wordplay on *Puqudu*, an Aramean tribe in the same region. Cf. *GTTOT*, § 1397-8.

W. S. L. S.

MERCHANDISE [Heb. *saḥar, sāḥār*] (Prov. 31:18; Isa. 23:18; 45:14); NEB BUSINESS, TRADING, MERCHANTS; [*rᵉḵullâ*] (Ezk. 26:12); [*maʿᵃrāḇ*] (Ezk. 27:13, 17, 19, 25, 27, 33f.); AV also MARKET; NEB IMPORTS, MERCHANTS (Ezk. 27:27), WARES.

The RSV uses "merchandise" only in the OT. *Saḥar* refers basically to the goods sold, but can be extended to mean "trade" (Ezk. 28:16, NEB "commerce") or "business" (Prov. 31:18, NEB). *Maʿᵃrāḇ* is a collective term denoting "articles for exchange," translated "wares" in Ezk. 27:9. The term occurs only in Ezk. 27 in a description of the extensive commercial relationships of Tyre.

See also BUSINESS; COMMERCE; MARKET; MERCHANT; TRADE; TRAFFIC. J. E. HARTLEY

MERCHANT [Heb. *sôḥēr*] (Gen. 23:16; 2 Ch. 9:14; Prov. 31:14; Isa. 23:2f., 8; Ezk. 27:36; 38:13); AV also MART; NEB also TRADER, MERCHANDISE, TRADE; [*rôḵēl*] (1 K. 10:15; Neh. 3:31f.; 13:20; Cant. 3:6; Ezk. 17:4; 27:3; Nah. 3:16); NEB also TRADE, "foreign trade," SPY; [*kᵉnaʿanî*] (Job 41:6 [MT 40:30]; Prov. 31:24); [Gk. *émporos*] (Mt. 13:45; Rev. 18:3, 11, 15, 23); NEB also TRADER.

Hebrew *sôḥēr* is the active participle of the verb *sāḥar*, "go about, go to and fro, go in" (KoB, p. 655). In Isa. 23:3 the RSV apparently takes the construct *sᵉḥar* as a participle; the AV ("mart") and NEB ("trade") take it as the

noun *sahar*. The verb *rāḵal*, "go about," occurs in the Hebrew Bible only in the part. *rôḵēl*, "trader, trafficker" (KoB, p. 892). *Kᵉna'anî* comes from *kᵉna'an*, "Canaan"; originally it referred to the Phoenicians, who were traders of red-purple wool. Gk. *émporos* denotes a "wholesale dealer" (Bauer, rev., p. 257).

Merchants constantly crossed Palestine or Canaan, the land bridge between Asia, Africa, and Europe. As the basic roots imply, they were always on the move, from house to house or from village to village. In particular, the Phoenicians had numerous colonies as trading bases along the Mediterranean; Tyre and Sidon were the most famous in Lebanon. They were seamen and traders who monopolized much of the Mediterranean market during the Israelite occupation of Palestine. As a result, "Canaanite" and "merchant" came to be synonymous terms. Thus most OT references to merchants are to the Phoenicians (cf. Ezk. 27–28). Ezekiel called Tyre the "merchant of the peoples on many coastlands" (27:3).

Thanks to the merchants, palaces and homes enjoyed exotic wares and were enriched with unique objects from distant lands (Ezk. 27:33). Spices and fragrant perfumes were valued highly (Cant. 3:6). The reign of Solomon in particular brought much international commerce to Jerusalem (1 K. 10:11-29). The traders then included royal merchants (v. 28, NEB). Solomon was in league with the Phoenicians; together they financed long expeditions from Ezion-geber to Africa, bringing back gold, silver, ivory, apes, and peacocks (v. 22).

The merchants had their own standard weights (Gen. 23:16). There was no National Bureau of Standards at that time; however, governments and temples established standard measures to control their revenues (cf. Dt. 25:14).

In quest of greater profits the merchant frequently cut corners or cheated the buyer outright. The merchants in northern Israel around the time of Jeroboam II sought to "make the ephah small and the shekel great, and [to] deal deceitfully with false balances" (Am. 8:5). They gave less goods and exacted more money. Hosea recorded a proverb from the same period: "False scales are in merchants' hands, and they love to cheat" (Hos. 12:7, NEB). For these false practices the merchants were warned that they would experience the judgment of God. When the Day of the Lord comes, "it [will be] all over with the merchants" (Zeph. 1:11, NEB). Ezekiel also delivered strong oracles of judgment against the Phoenicians of Tyre (chs. 27–28). With pride and self-exaltation they vaunted their increased wealth. Because of such a bearing they came under God's condemnation. Rev. 18 picks up a similar motif in the lamentation against Babylon, the obstinate enemy of God. The merchants had grown wealthy from Babylon's extreme extravagance (v. 3). Now that she was gone, so was their source of wealth (v. 11). Thus they became mourners at her departure (vv. 11-20), but they wept at a distance, fearing that her torment would become theirs (v. 15). Babylon's merchants were a significant means by which her false ideology and religion reached distant places and held peoples bound (v. 23), and consequently they participated fully in her judgment.

Scripture does not consider merchants *per se* evil; they are condemned only when their practices violate God's moral standards. A righteous merchant enjoys the blessing of God (Dt. 25:15; Prov. 11:1). In the same tenor, the proper role of a merchant provided the setting for one of Christ's parables about the kingdom of Heaven: "A merchant looking out for fine pearls found one of very special value; so he went and sold everything he had, and bought it" (Mt. 13:45f., NEB). Thus the people of God need to possess some basic business sense in seeking God's kingdom.

J. E. HARTLEY

MERCURIUS mər-kyoo'rē-əs (Acts 14:12, AV); **MERCURY** mer'kyə-rē (NEB). The Latin name of the Greek god HERMES (1).

MERCY; MERCIFUL [Heb. *rāḥam* (Ex. 33:19; Ps. 116:5; Prov. 28:13; etc.), *raḥᵃmîm* (Gen. 43:14; Dt. 13:17; 2 S. 24:14; etc.), *raḥûm* (Ex. 34:6; Dt. 4:31; 2 Ch. 30:9; etc.), *ḥānan* (Dt. 7:2; Job 9:15; Ps. 51:1 [MT 3]; 57:1 [MT 2]; 123:2f.; Prov. 21:10), *tᵉḥinnâ* (Josh. 11:20), *ḥeseḏ* (1 K. 20:31; Ps. 23:6), *ḥasîḏ* (Jer. 3:12), *ḥāmal* (Lam. 2:2, 21), *ḥemlâ* (Gen. 19:16); Aram. *raḥᵃmîn* (Dnl. 2:18); Gk. *eleéō* (Mt. 5:7; 9:27; 15:22; etc.), *éleos* (Mt. 9:13; 12:7; 23:23; etc.), *eleḗmōn* (Mt. 5:7; He. 2:17), *híleōs* (He. 8:12), *hiláskomai* (Lk. 18:13), *oiktirmós* (Rom. 12:1; 2 Cor. 1:3; He. 10:28), *oiktírmōn* (Lk. 6:36; Jas. 5:11)]; AV also PITY, COMPASSION, MAKE SUPPLICATION (Job 9:15), FIND FAVOUR (Prov. 21:10), etc.; NEB also TENDERNESS (Jer. 31:20), AFFECTION (Ezk. 39:25), KINDNESS (Neh. 1:11), HEART (Prov. 12:10), SPARE (Dt. 7:2; Gen. 19:16), etc.

I. OT.–The Heb. *rāḥam* (cf. *reḥem*, "bowels") referred to the seat of compassion (cf. Gen. 43:30; 1 K. 3:26 [RSV "heart"]). It was used for the deep, tender feeling of compassion that was awakened by the trouble, weakness, suffering, or vulnerability of another in need of help. It was particularly applicable in cases where a familial tie would arouse compassion for one in a pitiable condition, e.g., a father's love for a son (Jer. 31:20), a mother's love for her nursing infant (Isa. 49:15 [RSV "compassion"]), a man's love for his betrothed (Isa. 54:7 [RSV "compassion"]).

The OT affirms that mercy was a basic characteristic of God. The psalmist declared, "our God is merciful" (Ps. 116:5; cf. Prov. 12:10). Israel's earliest experience of God was that of One who was merciful, gracious, and slow to anger (Ex. 34:6). Thus the OT is rich in words that express the concept of mercy. Since mercy was part of God's nature, it would never fail (Dt. 4:31; Lam. 3:22), even when Israel proved unworthy (Neh. 9:17, 19, 27f., 31). God's compassion was something the enemies of Israel totally lacked (Isa. 13:18; 47:6; Jer. 6:23; 50:42). Therefore, David preferred the mercy of God, even if it should bring pestilence, rather than be left to the hands of men (2 S. 24:14; 1 Ch. 21:13).

The mercy of God is integrally related to His steadfast love (*ḥeseḏ*), the loving demonstration of God's covenant faithfulness to His chosen people. The Psalms frequently link God's mercy and steadfast love. They are of old (Ps. 25:6); they preserve and help those in distress (Ps. 40:11 [MT 12]; 69:16 [MT 17]); they redeem from the pit and provide the basis for God's willingness to forgive, heal (Ps. 103:4), and give life (Ps. 119:77, 156; cf. Ps. 51:1 [MT 3]; 86:15; 103:8; 145:8; Isa. 63:7; Jer. 16:5; Joel 2:13; Jonah 4:2).

Because of God's mercy toward the helpless and His forbearance of human frailty, sinners are able to appeal to Him in hope. Daniel appealed to God on the ground of His great mercy, not on the ground of his own righteousness (Dnl. 9:8f.). Sinners who confess and forsake sin may boldly appeal for and find mercy (Ps. 51:1; Prov. 28:13). While mercy can be expected because of God's nature and historical actions, it can never be demanded or earned; God freely bestows it. As God said to Moses, "I will be

gracious to whom I will be gracious, and will show mercy on whom I will show mercy" (Ex. 33:19).

Finally, it must be noted that the mercy of God is not simply an emotion; it is always manifested historically in personal actions. He has mercy on His people and multiplies them (Dt. 13:17), restores their fortunes (Jer. 33:26; Ezk. 39:25), and delivers them from their enemies (Jer. 42:12).

II. NT.–A. God's Mercy. The OT record of God's mercy forms the context for its manifestation in the NT. His steadfast, covenantal, electing love (*ḥeseḏ*) for Israel is conspicuously reflected in the Lukan infancy canticles. The birth of the Messiah reveals God's covenantal mercy and faithfulness to save His unworthy people (Lk. 1:50, 54, 72, 78; cf. Ps. 103:17).

In the OT, God's steadfast love (*ḥeseḏ*) was focused on His covenant people, Israel. Thus Rom. 9–11 (where the key word is mercy) is striking, for there Paul argued that God's mercy was for *all* peoples. In Rom. 9:15, Paul cited Ex. 33:19 to affirm the freedom of God's mercy. No one has a claim on it. He has mercy on whomever He wills and hardens whomever He wills (Rom. 9:18); He has vessels of wrath and vessels of mercy (9:23). The hardening that has come upon Israel (11:25) has resulted in riches for the Gentiles (11:12). God shut up Jew and Gentile to disobedience that He might have mercy on all (vv. 30-32). Therefore, Gentiles in particular may glorify God for His mercy (15:9). That same line of thought is expressed in the quote from Hos. 2:23 in 1 Pet. 2:10: the no-people are now God's people; the ones who formerly were outside God's mercy have now received mercy. The Church, therefore, lives by God's mercy alone. That assumption provides the basis in Rom. 12:1 for Paul's subsequent exhortations; his "therefore" is grounded in the mercies of God.

God's mercy is the foundation of mankind's salvation. It is God's unmerited response to human need: "He saved us, not because of deeds done by us in righteousness, but in virtue of his own mercy" (Tit. 3:5). Mercifully, God made those dead in trespasses alive together with Christ (Eph. 2:4f.). By His great mercy He caused Christians to be born anew to a living hope (1 Pet. 1:3); He will be merciful (*híleōs*) toward their iniquities (He. 8:12).

God's mercy is displayed in many other ways. When Elizabeth was advanced in years, He gave her a son (Lk. 1:58). He saved Epaphroditus from death (Phil. 2:27). By God's mercy Paul, the blasphemer and persecutor of the Church, became an apostle of Christ (2 Cor. 4:1; 1 Tim. 1:13, 16) and was made trustworthy (1 Cor. 7:25).

God is compassionate and merciful (Jas. 5:11); He is the Father of mercies (2 Cor. 1:3). God's mercy was so prominent that "mercy" was added to the usual greeting "grace and peace" in some NT epistles (1 Tim. 1:2; 2 Tim. 1:2; 2 Jn. 3; Jude 2) and to the conclusion of Galatians (6:16).

B. The Mercy of Jesus Christ. The healing ministry of Jesus revealed the breaking in of divine mercy and compassion on the helpless and weak. Jesus told the Gerasene demoniac to proclaim what the Lord had done, how He had mercy on him (Mk. 5:19). Trench's famous distinction between grace (*cháris*) and mercy (*éleos*) applies: ". . . the *cháris* of God, his free grace and gift, displayed in the forgiveness of sins, is extended to men, as they are *guilty*, his *éleos*, as they are *miserable*" (Trench, p. 170). Jesus was consistently confronted with and responded to appeals for help from those in misery. Blind men (Mt. 9:27; 20:30f. par. Mk. 10:47f.; Lk. 18:38f.), a Canaanite mother (Mt. 15:22), the father of an epileptic (Mt. 17:15), and ten lepers (Lk. 17:13) all pleaded for and received mercy from Jesus.

Hebrews interprets Jesus' compassion in terms of its significance for salvation. He became a merciful and faithful high priest to make expiation for the sins of the people (He. 2:17). Because of Him, they can draw near to the throne of grace to receive mercy and find help in time of need (4:16).

C. Mercy Required of Humans. Because God has been merciful, He expects His people to be merciful. The merciful shall receive mercy as their reward (Mt. 5:7). This is not a matter of *quid pro quo*. That which renders one incapable of being merciful to others also renders one incapable of receiving mercy. In the parable of the unmerciful servant (Mt. 18:23-25), the king compassionately forgave the enormous debt; but the servant dealt harshly with his fellow servant who owed him only a token amount. The ruthless servant was punished because mercy requires mercy (Mt. 18:33). James states the corollary: "judgment is without mercy to one who has shown no mercy" (Jas. 2:13). The requirement to show mercy is clearly expressed in Luke's Gospel. Disciples are to be merciful, as their Father in heaven is merciful (Lk. 6:36). By showing mercy, the Samaritan proved to be the neighbor of the man who fell among robbers; Jesus commanded the inquiring lawyer to go and do likewise (Lk. 10:37). The tormented rich man cried out to Abraham for mercy but received none since he had not shown mercy to Lazarus (Lk. 16:19-25).

The Jewish leaders in Matthew's Gospel failed to grasp the fundamental requirement of being merciful. Because of their relentless legalism, Jesus instructed them to learn Hos. 6:6, "I desire mercy, and not sacrifice" (Mt. 9:13). Failing to learn that, they remained intolerant (Mt. 12:7). Therefore, Jesus condemned them for their pettiness, the scrupulous tithing of garden herbs, while ignoring the weightier matters of justice, mercy, and faith (Mt. 23:23).

Mercilessness (*aneleḗmōn*) is a result of deliberately rejecting the knowledge of God (Rom. 1:28, 31). Finally, mercy also appears in lists of Christian virtues (Rom. 12:8; Jas. 3:17).

D. E. GARLAND

MERCY SEAT [Heb. *kappōreṯ*; LXX usually *hilastḗrion* (as in He. 9:5; cf. "expiation," Rom. 3:5)]; NEB COVER. A rectangular slab, 2½ cubits by 1½ cubits, of an unspecified thickness, which Bezalel fashioned of solid, refined gold under Moses' direction (Ex. 25:17ff.; 37:6ff.). This slab covered the ARK OF THE COVENANT, and also supported the two gold CHERUBIM figures.

The importance of the mercy seat is twofold: it is the place of the Lord's revelation of His Word to Moses from the cloud of His presence between the cherubim figures (Ex. 25:22; Nu. 7:89) and the place where blood was sprinkled on the Day of Atonement (Lev. 16). Appropriately, the mercy seat was to be obscured from view at all times, either by the inner veil (Ex. 26:31ff. — also used when moving the ark, Nu. 4:5) or by a cloud of incense on the Day of Atonement (Lev. 16:13).

Though compatible with the imagery of God's throne (cf. Ps. 99:1, 5; 132:7) Heb. *kappōreṯ* in no way suggests a seat. Most modern translations render *kappōreṯ* "cover" (so NEB) or "lid," in part on the basis of the position of the slab on top of the ark. Also, one possible etymology for Heb. *kpr* relates this term to Arab. *kafara*, "to cover." It is then suggested that the usual meaning of Heb. *kpr*,

"propitiate" or "make atonement," derives from the more original concept "to cover (sin)." This etymology is by no means certain, however (cf. Driver; Görg; Wenham), and in biblical usage *kpr* no longer bears its alleged etymological meaning. Rather, it is used exclusively in contexts appropriate to the ideas of propitiation (including bribery) and atonement.

Thus the LXX *hilastḗrion* and the Vulg. *propitiatorium*, "a place of propitiation" or "a propitiatory," admirably suit the context of the use of this object on the Day of Atonement, and comport well with the preeminence and distinctiveness of the propitiatory from the ark below (cf. *TDNT*, III, 318f.).

G. P. HUGENBERGER

MERED mē'red [Heb. *mereḏ*–'rebellion']. Son of Ezra; a Judahite who married two wives: one an Egyptian ("Bithiah, the daughter of Pharaoh") and the other a Jewess (1 Ch. 4:17f.). His sons founded (cf. NEB "founder" in place of RSV [lit.] "father") the towns of Eshtemoa, Gedor, Soco, and Zanoah. The MT of vv. 17f. is confused (cf. AV, which follows the MT), and the RSV and NEB are probably correct in transposing the last clause of v. 18 to v. 17 (see KD). *See also* BITHIAH.

MEREMOTH mer'ə-moth [Heb. *mᵉrēmôṯ*–'heights'(?); Gk. *Mereimōth*].

1. AV, NEB, also MERAIOTH (Neh. 12:15). One of the twenty-two priestly leaders who returned to Palestine from the Babylonian Exile with Zerubbabel in 537 B.C. (Neh. 12:3, 7). At Neh. 12:15 the Hebrew MSS read *mᵉrāyôṯ*, i.e., MERAIOTH, but this is probably an error for Meremoth (see LXX, Syr.).

2. One of the descendants of Bani who put away his foreign wife at Ezra's insistence (Ezr. 10:36).

3. AV Apoc. MARMOTH; NEB Apoc. MARMATHI. A priest, the son of Uriah; he was one of those entrusted by Ezra with the weighing of the silver and gold brought from Mesopotamia (Ezr. 8:33; 1 Esd. 8:62).

4. The son of Uriah, the son of Hakkoz; he repaired two sections of the Jerusalem wall under Nehemiah in 445 B.C. (Neh. 3:4, 21). This is no doubt the same individual who signed the covenant under Nehemiah (Neh. 10:5 [MT 6]).

Since both **3** and **4** have the same patronymic, many scholars identify them as one individual. Advocates of the "reverse order," which places Nehemiah in 445 and Ezra later in 398, argue that it is more likely that Meremoth worked on the wall in his youth under Nehemiah and then served as a treasurer some forty-seven years later under Ezra (see Brockington, p. 88). Those who follow this interpretation must assume that the difficulty that the descendants of Hakkoz had in establishing their lineage (Ezr. 2:61-63) was later resolved.

Supporters of the traditional order, which has Ezra returning in 458 before Nehemiah, suggest that despite similar patronymics we have two different individuals — Meremoth **3**, a priest, and Meremoth **4**, a layman.

5. (1 Esd. 8:2, AV); NEB MAREROTH. *See* MERAIOTH **1.**

E. M. YAMAUCHI

MERES mer'əz [Heb. *meres*] (Est. 1:14). One of the seven princes who ranked next after King Ahasuerus in the Medo-Persian kingdom. *See* PRINCES, THE SEVEN.

MERIBAH mer'ə-bə [Heb. *mᵉrîḇâ*–'strife']. The name of two different places at which the Israelites stopped on their journey through the wilderness: (1) at Rephidim (Ex. 17:1-7; referred to also in Dt. 33:8; Ps. 95:8; probably also 81:7 [MT 8]); (2) at Kadesh-barnea (Nu. 20:1-13; referred to also in Dt. 32:51; Ps. 106:32; Ezk. 47:19; 48:28). At both places the Israelites complained because they had no water (hence the name Meribah), and the Lord gave them water from a rock. Other passages allude to one or both of these occasions as examples of God's power and providence (e.g., Dt. 8:15; Ps. 78:15-20; 105:41; 114:8; Isa. 48:21).

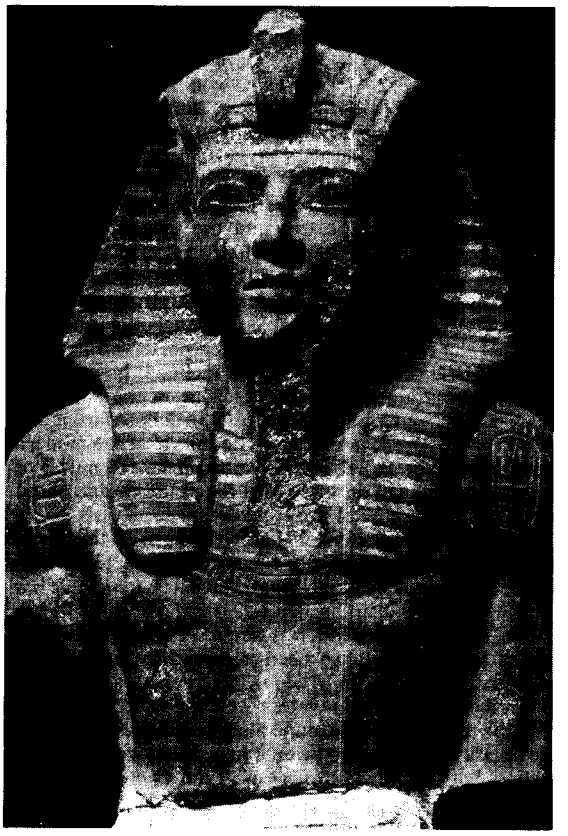
According to some scholars these were not two different places but two different traditions (JE in Ex. 17; P in Nu. 20) about one place. *See* MASSA AND MERIBAH.

N. J. O.

MERIBATH-KADESH mer'ə-bəth-kā'dəsh [Heb. *mᵉrîḇaṯ-qāḏēš*–'strife of Kadesh'] (Dt. 32:51; Ezk. 47:19; 48:28); AV MERIBAH-KADESH, STRIFE IN KADESH; NEB MERIBAH-BY-KADESH. The southern border of the restored land of Israel in Ezekiel's vision. *See* MERIBAH; KADESH **1.**

In Dt. 33:2 some scholars have emended the MT slightly so that it reads *mimriḇaṯ qāḏēš*, "from Meribath-Kadesh" (so NAB; *BHS*) rather than *mēriḇᵉḇōṯ qōḏeš*, "from the ten thousands of holy ones." On this difficult text see A. D. H. Mayes, *Deuteronomy* (*NCBC*, repr. 1981), pp. 398f.; S. R. Driver, comm. on Deuteronomy (*ICC*, 3rd ed., repr. 1973), pp. 392f.; P. D. Miller, *Divine Warrior in Early Israel* (1973), pp. 75-81.

G. A. L.



MERIB-BAAL mer-ə-bā'əl [Heb. *mᵉrîḇ-baʿal* (1 Ch. 8:34; 9:40), *mᵉri-ḇaʿal* (9:40)]. The original name of MEPHIBOSHETH **(2)** the grandson of Saul. The name appears in two forms in 9:40. Some commentators have conjectured that *mᵉrî-ḇaʿal* ("hero of Baal") was the original form, later changed to *mᵉrîḇ baʿal* ("Baal contends" or "contender with Baal"). The substitution of *bōšeṯ* ("shame") for *baʿal* ("lord") in the later form "Mephibosheth" reflects a reluctance to use a name by which a Canaanite deity was honored. For other examples of this substitution, cf. Jer. 3:24; Hos. 9:10; *see also* ISHBOSHETH; JERUBBESHETH.

N. J. O.

MERNEPTAH mer-nep'tə [Egyp. *mr-n-ptḥ*–'the beloved of Ptaḥ']. A pharaoh of the 19th Dynasty (*ca.* 1224-1214 B.C.); thirteenth son and successor of Ramses II (*ca.* 1290-1224). Merneptah inscribed a series of victory hymns on a black granite stele, the so-called Israel Stele (first published by W. M. F. Petrie, *Six Temples at Thebes* [1897], plates XIII-XIV; see also *ANET*, pp. 376-78; *DOTT*, pp. 137-141). The monument was discovered by Petrie in 1895 in the ruins of Merneptah's mortuary temple at Thebes. A fragmentary duplicate also exists in the temple of Karnak.

Among Merneptah's conquests in Syria-Palestine is *Ysr'r* (Egyptian for *Yśr'l*), clearly recognizable as "Israel." *See* ARCHEOLOGY OF EGYPT IV.D; ISRAEL II. Thus the Israel Stele provides a *terminus ad quem* for the presence of the Israelites in Palestine (*ca.* 1220 B.C.). (On the efforts of some scholars to deny a Palestinian campaign to Merneptah, see K. Kitchen, *Ancient Orient and OT* [1966], pp. 59f.) Neither Merneptah nor this event is mentioned in the OT.

A few scholars have viewed the Israel Stele as bearing

Granite statue of Merneptah wearing the royal *nemes* headdress. From Thebes (Cairo Museum; picture courtesy of The Metropolitan Museum of Art)

witness to the Exodus event. Merneptah is thus considered to be the pharaoh of the Exodus and Ramses II, his father, is identified as the pharaoh of the oppression (P. Montet, *Le Drame d'Avaris* [1940], p. 149; H. H. Rowley, *From Joseph to Joshua* [1950], p. 137ff.). But *see* EXODUS, DATE OF THE.

MERODACH mer'ə-dăk. *See* MARDUK, MERODACH; MERODACH-BALADAN.

MERODACH-BALADAN mer'ə-dak-bal'ə-dən [Heb. *mᵉrō-ḏaḳ bal'ᵃḏān* (Isa. 39:1), *bᵉrō'ḏaḳ bal'ᵃḏān* (2 K. 20:12); Gk. *Marōdachbaladan*]; AV also Berodach-baladan (2 K. 20:12). The king of Babylon who sent envoys to congratulate Hezekiah on his recovery from illness. Hezekiah "welcomed them," showing them all the assets of his kingdom (Isa. 39:2), for which he earned a stinging rebuke from Isaiah, together with a prophecy that the wealth and even some of the king's sons would be carried off to Babylon (vv. 6f.).

Merodach-baladan II, whose name in Assyrian is written Marduk-apla-iddina, "Marduk has given an heir," claimed descent from Erība-Marduk, a king of the 8th Babylonian dynasty; Sargon called him "seed of a murderer" (*ARAB*, II, § 66), suggesting that he had descended from one who had gained the throne by assassinating the legitimate king. The biblical texts call him "son of Baladan," a name that obviously lacks the divine element. Merodach-baladan's patronymic, according to Sargon, was "son of Yakini," most likely meaning that he was a member of the Yakin tribe. He is also called "King of Kaldu" (*ARAB*, II, § 31). The Kaldu (Chaldeans) were a people that occupied the "Sea-Land" region, i.e., lower Babylonia, and were divided into five tribal groups: Bīt-Dakkūri, who were located along the Euphrates S of Borsippa; Bīt-Sa'alli, their neighbors; Bīt-Amukkani, who occupied the southernmost part of the country; Bīt-Šilani, who by the time of Sargon had been assimilated by the Bīt-Amukkani; and Bīt-Yakin, who lived along the Tigris and were bordered on the north and east by Aramean tribes. The largest tribes were Bīt-Dakkūri and Bīt-Amukkani, which were composed of subtribes, Bīt-Adini belonging to Bīt-Amukkani.

Tiglath-pileser III (747-727 B.C.) in the Nimrud Tablet recorded that when he invaded Babylonia in his seventeenth year (731), Merodach-baladan, who had previously not submitted to Assyrian kings, "came to the city of Sapia, into my presence, and kissed my feet." The Assyrian king also recorded the huge tribute paid by Merodach-baladan (*ARAB*, I, § 794). The silence of the records suggests that Merodach-baladan was permitted to maintain only a limited kingship over his people during the reign of Shalmaneser V (727-722). When Sargon II (722-705) acceded to the Assyrian throne, however, Merodach-baladan apparently seized the throne of Babylon, where he reigned for the next twelve years. Various references to his allies allow the situation to be reconstructed as follows: Merodach-baladan gradually won the loyalty of the other tribes of the Kaldu; next he gained the support of the Aramean tribes; finally he made an alliance with Ḫumbanigaš king of Elam. He "took the hands of Bel," symbolizing his claim to Babylon, at the New Year Festival in 721.

Sargon engaged Merodach-baladan's allies in battle near the city of Dēr in 720 (*ARAB*, II, § 55), but the Chaldean arrived late, when the Elamites and the Assyrians were well spent. All parties claimed victory, but the Chaldean king continued to reign (cf. G. Roux, *Ancient Iraq* [1964], p. 258). In 717 Ḫumbanigaš I died and was succeeded by his son Šutur-nuḫundu. In his twelfth year (710) Sargon marched on the tribes in the lower parts of Babylonia, and Merodach-baladan fled to the marshes of the Persian Gulf. Sargon conquered Dūr-Yakin, the royal city, and brought all of Bīt-Yakin under his sway (*ARAB*, II, § 69). Then he entered Babylon and grasped the hands of Marduk, making the pilgrimage to "the House of the New Year's Feast" (II, § 70). Sargon seems to have allowed Merodach-baladan to continue as a tribal sheikh in Bīt-Yakin.

Upon the death of Sargon, Merodach-baladan again asserted his desire to rule Babylon. It was most likely during the turmoil, which was usual at any change of rulers, that Merodach-baladan managed to get envoys through to Jerusalem (2 K. 20:12). There is little doubt that he also attempted to incite his former allies to rebel against Assyria. A complication occurred, however, when the people of Babylon installed Marduk-zākir-šumi II as king (703). Sennacherib (705-681) acted swiftly, reporting that in his first campaign (702) he "accomplished the defeat of Merodach-baladan, king of Babylonia, together with the army of Elam, his ally, in the plain of Kish" (*ARAB*, II, § 234). The Chaldean saved his life but lost everything else.

Sennacherib placed Bēl-ibni on the throne of Babylon, but his claim of total victory over the entire region seems to have been somewhat exaggerated, for in his fourth campaign (701) he again moved against Bīt-Yakin. Bēl-ibni had revolted, and Merodach-baladan probably had a hand in this event. Sennacherib conquered the region and placed Aššur-nadin-šumi on the throne in Babylon. According to Sennacherib's account Merodach-baladan "gathered

together the gods of his whole land in their shrines, and loaded them into ships and fled like a bird to the city of Nagite-riqqi, which is in the midst of the sea" (II, § 242) — actually in Elam — "and in that place he died" (II, § 345).

The peoples of lower Mesopotamia continued to give Assyria trouble, and Sennacherib at last mounted a sea invasion of coastal regions (693). Since various inscriptions name sons of Merodach-baladan but not the father, we conclude that he died prior to this campaign. Of his son Nabû-šum-iškun Sennacherib said, "My hands took [him] alive" (II, § 338). Another son, Nabû-zēr-kitti-līšir, trusted in the king of Elam but "failed to save himself" (II, § 534). A third son, Nā'id-Marduk, seeing what happened to the others, fled and "came to Nineveh," where he kissed Sennacherib's feet in submission (II, § 534). Another son (?) is mentioned, Adinu "son of the wife of Merodach-baladan" (II, § 259). Esarhaddon named a grandson of Merodach-baladan, Nabû-bēl-šumāti, and also his "twin brother" (?), Nabû-kātā-ṣabat (II, § 815).

The annals of Sargon and Sennacherib, with their many references to Merodach-baladan and boasts of conquests over him, his city, his people, and his allies, give the impression that he was indeed a very powerful king. We can well understand how Hezekiah could have been greatly impressed by stories that Merodach-baladan's emissaries must have told.

Bibliography.—*CAH*, III (1925), 32-87; *ARAB*, II, *passim*; J. A. Brinkman, "Merodach-Baladan II," in *Studies Presented to A. L. Oppenheim* (1964), pp. 6-53.

W. S. LASOR

MEROM, WATERS OF mir'əm [Heb. *mê mērôm*—'waters of Merom'; LXX *epí toú hýdatos Marrōn* (Josh. 11:5), *epí tó hýdōr Marrōn* (v. 7)]. The location of the alliance of kings with Jabin of Hazor and the subsequent battle with Joshua (Josh. 11:1-9). Since the Middle Ages the waters of Merom have been identified with Lake Huleh (*Baḥret el-Ḥûleh*), a small lake about 22.5 km. (14 mi.) N of the Sea of Galilee (cf. *GP*, I, 493). Prior to the middle of the 20th cent. this region was a swamp, which was drained by the State of Israel and is now known as the Huleh basin. But careful study of the passage in Joshua makes this location unlikely. (1) The alliance had "very many horses and chariots" (11:4), and the Huleh basin was probably too marshy for such troops. (2) More important, the scattered forces, suffering defeat by Joshua, seem to have gone in two directions: some to "Great Sidon and Misrephoth-maim," which is westward toward the coastal plain and then northward toward Sidon; and others "eastward as far as the valley of Mizpeh" (v. 8), which is "under Hermon" (v. 3), possibly in the vicinity of Bâniyâs (Caesarea Philippi). These data suggest a location between the Huleh basin and the coast rather than in the Huleh basin, so that the forces of Joshua, most likely coming from the south (cf. 10:43), split the allied armies, driving some to the east and some to the west.

Although he recognized that the Huleh location was not without difficulties and furthermore identified Merom with Meirôn at the foot of Jebel Jarmāq (*GP*, II, 285), Abel hinted that the Huleh basin may be the intended gathering point of waters from the heights of Kadesh, Marûn er-Râs, and Meirôn (*GP*, I, 494), and he described Joshua's campaign in this region in some detail (*RB*, 56 [1949], 335ff.). The argument sometimes suggested (cf. *HDB*, III, 348) that Jonathan was basing his campaign against Demetrius on Joshua's example (1 Macc. 11:67) has little if any worth, for "the waters of Gennesaret" can hardly be equated with "the waters of Merom."

Rejecting Huleh as the possible site, some scholars have proffered other suggestions. On the basis of the occurrence of *m-r-m-i-m* in the list of Thutmose III (*LBHG*, rev., p. 181; *ANET*, p. 243 no. 85), *m-r-m* in a list of Ramses II (*ANET*, p. 256), and *marum* in an inscription of Tiglath-pileser III (*ARAB*, I, § 779 [p. 280]), attempts have been made to locate Merom, generally at Meirôn (Har Mêrôn, see below), but with no certain consensus. Garstang gave a vivid picture of the battle and rout of the allies of Jabin, preferring the location at Jebel Marûn (elevation 930 m. [3050 ft.]) and the village of Marûn er-Râs (*Joshua-Judges*, pp. 183-198, esp. 193f.). Simons accepted this identification (*GTTOT*, § 505), pointing out that it has an abundant water supply. Aharoni agreed that the location is more suitable to the account in Joshua and that the name has probably been preserved in these sites (*LBHG*, rev., p. 225); he was inclined, however, to locate Merom at Tell el-Khirbeh, "one of the large Canaanite tells" in Upper Galilee (p. 226). Jebel Marûm and Marûn er-Râs are located 2 km. (1¼ mi.) N of the modern frontier between Israel and Lebanon, 11 km. (6 mi.) S of Tibnine, 16 km. (10 mi.) NNW of Safed (Ṣfat), and about the same distance W of the Huleh basin.

Noth, however, preferred Meirôn (Meirun) on the slopes of Jebel Jarmāq (Har Mêrôn, elevation 1208 m. [3962 ft.]), located 6 km. (4 mi.) WNW of Safed (*Das Buch Josua* [2nd ed., *HAT*, 1953], p. 67; *OT World* [Eng. tr. 1966], p. 54). This location, which is about 19 km. (11 mi.) SW of the Huleh basin, has been accepted by many other scholars (cf. *Macmillan Bible Atlas* [rev. ed. 1977], Map 62), although the terrain is less well suited to horses and chariots than the region around Marûn er-Râs. It is true that the region around Meirôn would have fitted with Joshua's tactics, but one must question why the Canaanite kings, who arrived first at the scene (vv. 5-7), would have let Joshua trap their cavalry in such a difficult situation. On the other hand, Meirôn is located near the junction of a road from the south with a main east-west road that would allow for the surprise attack of Joshua and the flight of the defeated armies as described in 11:8.

There are other, less likely suggestions. Conder and Kitchener (*SWP*, I, 251ff.) proposed Wâdī el-Melek (Shimron-merom [cf. Josh. 12:20], modern Šammûmiye, 8 km. [5 mi.] W of Nazareth); this identification depends on the equation of Shimron (11:1) with Shim'ôn (cf. LXX *Symoōn*, 12:20) and with Shimron-merom (12:20; cf. *LBHG*, rev., p. 118). The location seems to be too far south to fit the account (cf. 11:10), and depends in part for support on attempts to conflate the records in Josh. 11 and Jgs. 5. Madon (Khirbet Madîn, 1 km. [2/3 mi.] S of the Horns of Ḥattin) depends on efforts to equate Madon with Maron (MT *Māḏôn*, Josh. 11:1; 12:19; LXX B *Marrōn* but A *Madōn* in 11:1) and the similarity in sound of Madon and Madîn. The same objection based on location applies equally to Šammûniye and Khirbet Madîn. Quite impossible is the location of the site of the conflict in the vicinity of Dothan, 12 Roman m. (18 km., 11 mi.) from Sebaste in Samaria (*Onom.* p. 129, Latin text *apud* Abel, *GP*, I, 494 n. 2).

In an account that seems to be largely imaginary and certainly without biblical basis, Josephus has Joshua making a five-day forced march against the coalition that numbered 300,000 men-at-arms, 10,000 horsemen, and 20,000 chariots. He engaged them at Berothē, "a city of Upper Galilee, not far from Kedese" (*Ant.* v.1.18 [63]). Kedese is Kedesh in Naphtali (Jgs. 4:6), identified with Tell Qades, about 10 km. (6 mi.) NW of the Huleh basin, which would be an acceptable location but without support since there is no indication of Josephus's source.

Positive identification of the site is not possible.

W. S. LASOR

MERONOTHITE mə-ron'ə-thīt [Heb. *mērōnōṯî*]. The designation of two persons in the OT: Jehdeiah, who was in charge of King David's asses (1 Ch. 27:30), and Jadon, who was among those who repaired the wall under Nehemiah (Neh. 3:7). Meronoth seems to have been near Gibeah, but its precise location is unknown.

MEROZ mē'roz, mer'əz [Heb. *mērôz*]. A village placed under a curse in the Song of Deborah (Jgs. 5:23) for failing to aid the armies of the Lord in the battle against Jabin king of Canaan. The poet used the reprehensible inactivity of this people to set the heroic intervention of Jael in bold relief. It is generally supposed that the forces of Jabin fled past Meroz, an Israelite village, and that the inhabitants, who were in a position to block his path of retreat, were prevented by cowardice. Alt, however, presents the theory that the inhabitants were Canaanites, one of the many non-Israelite peoples who were incorporated into the tribe of Manasseh. In this conflict they remained neutral because their sympathies were with the enemy, and as a consequence their relationship with Israel was severed by the curse (A. Alt, *ZAW,* 58 [1940/41], 244-47).

No attempt to locate the site has been conclusive, but many favor the suggestion of Abel (*GP,* II, 385) that Meroz is to be identified with Khirbet Mārûs a few kilometers SW of Lake Huleh. D. H. MADVIG

MERRAN mer'ən [Gk. *Merran*] (Bar. 3:23); AV MERAN. A place name that seems unidentifiable as it stands. Probably the name is the result of a transcription error in the Hebrew original by which ד (*d*) was read as ר (*r*). If so, the correct reading would be *Meddan,* probably meaning MIDIAN (cf. Gen. 37:36). See *APOT,* I, 589.

MERRY [Heb. *ṭôḇ*–'good' (adjective), *yāṭaḇ* (vb.)] (Jgs. 16:25; 19:6, 9, 22; Ruth 3:7; 1 S. 25:36; 2 S. 13:28; Est. 1:10; Eccl. 9:7); NEB also ENJOY YOURSELF, "feel at peace with the world" (Ruth 3:7), CHEERFUL; **MAKE MERRY** [Heb. piel of *śāḥaq*–'dance,' 'play'] (1 S. 18:7; 2 S. 6:5, 21; 1 Ch. 13:8; 15:29; Jer. 30:19); AV also PLAY; NEB also DANCE; [*šāḵar*–'become drunk'] (Gen. 43:34); [*śāmaḥ*–'rejoice'] (Jer. 31:13); NEB REJOICE; [Gk. *euphraínomai*–'be glad'] (Lk. 12:19; 15:23f., 29, 32; Rev. 11:10); NEB also ENJOY, CELEBRATE, FESTIVITIES, FEAST; **MERRY-HEARTED** [Heb. *śāmē(a)ḥ lēḇ*] (Isa. 24:7); NEB REVELLERS; **MERRYMAKERS** [Heb. piel of *śāḥaq*] (Jer. 15:17; 31:4); AV also MOCKERS; NEB ROISTERERS; MERRY THRONG.

In the RSV "merry," "make merry," etc. are used most often in contexts of eating and drinking. WINE was an important part of any festive occasion; although the lightheartedness it induces was not viewed as evil in itself (Eccl. 9:7; cf. Gen. 43:34; Jgs. 19:6, 9, 22; Ruth 3:7; Lk. 15:23-32), the dangerous consequences of excessive drinking were well known: imprudent behavior (e.g., Est. 1:10-12) and blindness to danger, resulting sometimes in death (e.g., Jgs. 16:25-30; 1 S. 25:36-38; 2 S. 13:28f.; cf. Lk. 12:16-20). *See also* DRUNKENNESS.

Where it renders the piel of *śāḥaq,* "make merry" is associated not so much with drinking as with the dancing that was also an important part of festive occasions, especially victory celebrations. In times of estrangement from Yahweh conviviality was not appropriate; thus Jeremiah could not participate in the merrymaking of his time (Jer. 15:17), but he prophesied a day of victory when it would be appropriate again (31:4; cf. Eccl. 3:4).

See also MIRTH. N. J. O.

MERUTH mer'əth (1 Esd. 5:24, AV). *See* IMMER **1.**

MESALOTH mes'ə-loth [Gk. *Maisalōth, Messalōth*]; AV MASALOTH; NEB MESSALOTH. A place where the army led by Bacchides and Alcimus encamped on the march to Judah (1 Macc. 9:2). The passage includes the words "by the road which leads to Gilgal," which may be somewhat misleading. Mesaloth is "in Arbela" (*see* ARBELA **2**), which has been identified with Khirbet Irbid on the Wâdī el-Hamam in Galilee, 4 km. (2.5 mi.) W of the Sea of Galilee. Simons suggested that "Gilgal" is a scribal error for "Galilee" (*GTTOT,* §§ 1127f.), a reading that accords with Josephus (*Ant.* xii.11.1 [421]). "Gilgal" and "Galilee" are apparently confused in Josh. 12:23, where the MT reads *gilgāl* and the LXX *Galilaias,* and in 22:10, where the MT reads *gᵉlîlôṯ* and the LXX *Galgala.* Simons, however, further suggested that the LXX *Massaloth* is a transcription of Heb. *mᵉsillôṯ,* "highways, raised roads," and refers to the raised banks of the Wâdī el-Hamam (*GTTOT,* §§ 1147f.). But the spellings of the Greek word in both cases do not confirm this theory. W. S. L. S.

MESECH mē'sək. *See* MESHECH.

MESHA mē'shə.

1. [Heb. *mêšā'*] (1 Ch. 8:9). A Benjaminite, son of Shaharaim by his wife Hodesh, born in the country of Moab (v. 8).

2. (AV, NEB, RSV mg., 1 Ch. 2:42). *See* MARESHAH **1.**

3. [Heb. *mêša'*–'salvation'(?); Gk. *Mōsa*]. A king of Moab and son of Chemosh-melek. All the biblical information regarding this monarch is contained in 2 K. 3, which describes him as a contemporary of Ahab, Ahaziah, and Jehoram. As Moab was at this time under Israelite control, Mesha was tributary to Israel. His annual contribution probably comprised the wool sheared from 100,000 lambs and 100,000 rams. The breed of animals that he raised was renowned for the superior quality of its fleece. Some have regarded the description of Mesha as a *nōqēḏ* ("sheep breeder," v. 4) with suspicion. Thus M. Bič (*VT,* 1 [1951], 293-96), followed by J. Gray (*I & II Kings* [*OTL,* rev. ed. 1970], pp. 484f.), translated *nōqēḏ* as "hepatoscoper," i.e., one who reads livers to get omens. But A. Murtonen (*VT,* 2 [1952], 170f.) and S. Segert ("Zur Bedeutung des Wortes *nōqēḏ,*" in B. Hartmann, *et al.,* eds., *Hebräische Wortforschung* [*SVT,* 16; 1967], pp. 279-283) pointed out the weaknesses of this theory and reasserted the traditional meaning of sheep breeder (cf. also P. Craigie, *Studies in Religion,* 11 [1982], 29-33; *Ugarit and the OT* [1983], pp. 71-74, 108).

After the death of Ahab, Mesha asserted his independence. The kings of Judah (Jehoshaphat) and Edom joined forces with Jehoram king of Israel in an attempt to quell the rebellion. Together they marched through the wilderness of Edom to approach Moab from the south. When they were about to perish of thirst, water was miraculously provided through Elisha. Mesha came out against them, but his attack was repulsed with heavy slaughter and he was pursued by the allies to the great fortress of Kir-hareseth. Thwarted in his attempt to escape the besieged city, Mesha in desperation offered his eldest son as a sacrifice to Chemosh upon the city wall (see A. Green, *Role of Human Sacrifice in the Ancient Near East* [1975], pp. 169-171; *see also* SACRIFICE, HUMAN). This act apparently terrified the Israelites (so W. F. Albright, *ARI,* p. 158), and they withdrew, leaving their conquest incomplete.

Mesha's description of his rebellion is preserved on the MOABITE STONE, an inscription in which he names the places he captured and fortified during the reign of Omri's "son" after forty years of Israelite subjugation. Not sur-

prisingly, Mesha's inscription does not mention his reverses at the hands of Jehoram of Israel and his allies. The date of the rebellion is uncertain. If it began forty years after the vigorous Israelite king Omri (*ca.* 884-873 B.C.) subjugated Moabite territory, it would have occurred in the reign of Omri's grandson Ahaziah (*ca.* 853-852 B.C.) or great-grandson Jehoram (*ca.* 852-841 B.C.). Understanding *bnh* ("his son") to mean "his grandson" or "his descendant" is in complete accord with Semitic usage. It was evidently interpreted in this way by Josephus, who placed Mesha's uprising in the second year of Ahaziah (*Ant.* ix.2.1 [18-19]).

Bibliography.—N. Glueck, *Explorations in Eastern Palestine* (*AASOR*, 14, 1933/34), 82; A. D. Tushingham, *BASOR*, 133 (Feb. 1954), 25. W. EWING R. K. H.

MESHA mē'shə [Heb. *mēšā'*; Gk. *Massē*]. A boundary town of the land occupied by the sons of Joktan, a son of Shem, a son of Noah; it is listed in the TABLE OF NATIONS with SEPHAR (Gen. 10:30). The sons of Joktan were tribes of south Arabia, hence Mesha is probably not to be identified with MASSA in north Arabia (Gen. 25:14; 1 Ch. 1:30). According to one view the ethnic and geographical information in the Table was from the period of the Israelite monarchy and reflects conditions of that time (*LBHG*, rev. ed., p. 8). J. MCKENNA

MESHACH mē'shak [Heb. *mêšaḵ*]. The Babylonian name given to Daniel's companion in captivity, Mishael, by Nebuchadrezzar's chief official (Dnl. 1:7). Each of Daniel's three associates received a new name corresponding roughly to his Hebrew name. Mishael in Hebrew (*mîšā'ēl*) probably meant "Who is what God is?" Meshach appears to reflect an attested Babylonian name, *Mišaaku*, which probably meant "Who is what (the god) Aku is?".

Daniel's three associates, Shadrach, Meshach, and Abednego, are always mentioned together in the book of Daniel, and always in the same order (Dnl. 1:7; 2:49; 3:12-30). They, like Daniel, were young, attractive, noble-born, well-educated captives from Judah, taken prisoner in the first deportation (605 B.C.) and assigned to be trained to serve the Babylonian court (1:1-7). They showed loyalty to Israel's God Yahweh by such actions of faith as keeping the Mosaic food laws (vv. 8-16) and refusing to engage in idolatry (3:12-27), and thus won praise for their God as well as honor for themselves (3:28-30). D. STUART

MESHECH mē'shek [Heb. *mešeḵ*; Gk. *Mosoch*]; AV also MESECH.

1. One of the sons (or descendants) of Japheth, named along with Gomer, Javan, Tubal, etc. (Gen. 10:2; 1 Ch. 1:5; *see* TABLE OF NATIONS). He founded a small but formidable kingdom in Asia Minor. Its people, who appear in classical Greek authors as the *Moschoi* and in Assyrian annals as the Muški, belonged to the Indo-European group of nations. They were associated with Javan and Tubal as trading partners with Tyre in bronze vessels and slaves (Ezk. 27:13). Excavations at Gordion in 1950 produced evidence that the Muški also traded extensively with Syria and Urartu as well as with Cilicia.

Perhaps because of trading opportunities with the Assyrians, or possibly as the result of aggression from their neighbors, the Muški migrated to an area of Armenia SE of the Black Sea, where from their mountain strongholds they engaged in sporadic battles with the Assyrians. The Muški suffered their first recorded defeat *ca.* 1100 B.C., when Tiglath-pileser I overcame five of their kings in Kutmuhi territory E of the Euphrates. Despite the tendency of Assyrian records to exaggerate victories, it appears that the Muški fared poorly on that occasion.

The Muški engaged in numerous battles with Assyria over the next three centuries, including skirmishes with Tukulti-Ninurta II and Ashurnasirpal II. The most important occurred during the reign of Sargon II (727-705 B.C.), who decided to conquer the Muški allies one by one. In 717 B.C. he subjugated Pisiris king of Carchemish and made him tributary. Two years later Sargon captured some cities of Cilicia (known as Que to the Assyrians) that had been held by Mita, a Muški ruler in Asia Minor. Then he began to consolidate and reinforce Assyrian power in the area, finally subjugating Mita in 709 B.C. Mita is probably the legendary King Midas of Greek tradition, who died *ca.* 695 B.C. While Midas was known to the Greeks as a Phrygian king, his cosmopolitan empire would undoubtedly have embraced the warlike Muški.

In Scripture Meshech is described as a barbaric and remote people (cf. Ps. 120:5-7). Ezekiel includes Meshech and Tubal among the peoples destined for the underworld (32:26). They are also associated with GOG (**2**), the ruler of MAGOG and leader of the northern hordes who are to fight a final battle against Israel in the messianic age (38:2f.; 39:1).

2. A son of Shem and founder of an Aramean people (1 Ch. 1:17). The name appears as MASH in Gen. 10:23.

MESHELEMIAH mə-shel-ə-mī'ə [Heb. *mᵉšelemyâ* (1 Ch. 9:21), *mᵉšelemyāhû* (26:1f., 9)—'Yahweh repays']. Son of Kore, a Korahite; a gatekeeper at the temple. The names Shelemiah (26:14), Shallum (9:17, 19, 31), and Meshullam (Neh. 12:25) may refer to the same person.

MESHEZABEL mə-shez'ə-bel [Heb. *mᵉšêzaḇ'ēl*—'God delivers;]; AV MESHEZABEEL.

1. An ancestor of Meshullam, who helped to repair the wall of Jerusalem (Neh. 3:4).

2. One of the "chiefs of the people" who signed the covenant with Nehemiah (10:21 [MT 22]).

3. A descendant of Judah through Zerah; father of Pethahiah (Neh. 11:24).

MESHILLEMITH mə-shil'ə-mith [Heb. *mᵉšillēmîṯ*] (1 Ch. 9:12); **MESHILLEMOTH** mə-shil'ə-moth [Heb. *mᵉšillēmôṯ*] (2 Ch. 28:12; Neh. 11:13).

1. A priest, son of Immer (1 Ch. 9:12; Neh. 11:13).

2. An Ephraimite ancestor of Berechiah, who was a chief of the tribe in the reign of Pekah (2 Ch. 28:12).

MESHOBAB mə-shō'bab [Heb. *mᵉšôḇāḇ*] (1 Ch. 4:34). A Simeonite "prince" whose clan settled in rich pasture land near Gerar (LXX; MT Gedor) after driving out its former inhabitants (vv. 39-41).

MESHULLAM mə-shōō'ləm [Heb. *mᵉšullām*—'restitution' (for a child who died); Gk. *Mesollam, Mosollam(os), Mesoulam, Masallam* (1 Ch. 9:8), *Ōlamos* (1 Esd. 9:30)]; AV Apoc. MOSOLLAMON, MOSOLLAM, OLAMUS; NEB Apoc. MOSOLLAMUS, OLAMUS.

1. Grandfather of Shaphan the secretary of King Josiah (2 K. 22:3).

2. A son of Zerubbabel (1 Ch. 3:19).

3. The head of a Gadite family that lived in Bashan (1 Ch. 5:13).

4. Son of Elpaal, a Benjaminite (1 Ch. 8:17).

5. Father of the Sallu who was one of the first Benja-

minites to live in Jerusalem after the Exile (1 Ch. 9:7; Neh. 11:7).

6. Son of Shephatiah and one of the first Benjaminites to live in Jerusalem after the Exile (1 Ch. 9:8).

7. A priest, son of Zadok and father of Hilkiah (1 Ch. 9:11; Neh. 11:11).

8. Another priest, son of Meshillemith and father of Jahzerah (1 Ch. 9:12; the name is omitted in Neh. 11:13).

9. A Kohathite appointed by King Josiah as one of the overseers to direct the repairs of the temple (2 Ch. 34:12).

10. One of the "leading men" sent by Ezra to procure Levites to serve in the temple at Jerusalem (Ezr. 8:16; 1 Esd. 8:44).

11. A layman or Levite (some MSS read "the Levites") who opposed either Ezra's policy regarding the divorcing of foreign wives or the procedural change requested by the people (Ezr. 10:15; cf. 1 Esd. 9:14); possibly the same as **10** and **12.**

12. Son of Bani; a layman who had married a foreign wife and was required to divorce her (Ezr. 10:29; 1 Esd. 9:30); possibly the same as **10** and **11.**

13. Son of Berechiah; one who helped to repair the wall of Jerusalem (Neh. 3:4, 30). His daughter was married to Jehohanan the son of Tobiah the Ammonite (6:18).

14. Son of Besodeiah; one who helped to repair the Old Gate of Jerusalem after the Exile (Neh. 3:6).

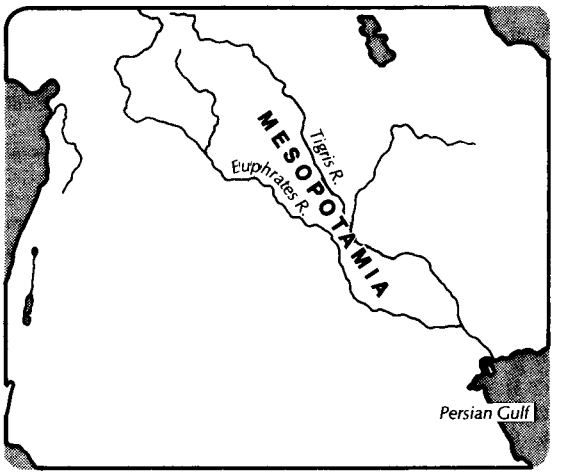
15. One who stood at Ezra's left hand during the reading of the law (Neh. 8:4; omitted in 1 Esd. 9:44); possibly the same as one or more persons mentioned above.

16. A priest who signed the covenant with Nehemiah (Neh. 10:7 [MT 8]).

17. A "chief of the people" who signed the covenant with Nehemiah (10:20 [MT 21]).

18, 19. The heads of two priestly families in the time of Joiakim the high priest (Neh. 12:13, 16).

20. A gatekeeper at the storehouses of the gates in the time of Joiakim, Nehemiah, and Ezra (Neh. 12:25). *See also* MESHELEMIAH.



21. One of those who took part in the procession at the dedication of the rebuilt walls of Jerusalem (Neh. 12:33); possibly the same as one or more persons mentioned above.

See *IP*, p. 174. J. A. LEES N. J. O.

MESHULLEMETH mə-shŏŏ'lə-meth [Heb. *mᵉšullemeṯ*–'restitution' (fem. of Meshullam)] (2 K. 21:19). Wife of King Manasseh; mother of Amon; daughter of Haruz of Jotbah.

MESOBAITE mə-sō'bə-īt (1 Ch. 11:47, AV). *See* MEZOBAITE.

MESOPOTAMIA mes-ə-pə-tā'mē-ə. The Greek equivalent (lit. "between the rivers") of the Heb. *ʾᵃram nahᵃrayim* ("Aram of two rivers"). The Greek historian Polybius (2nd cent. B.C.) and the geographer Strabo (1st cent. A.D.) used the term to define the area enclosed between the Euphrates and the Tigris rigers. This agrees with its use in the LXX in Gen. 24:10, which includes the city of Haran, and Dt. 23:4 (MT, LXX, 5), which mentions Pethor, the home of Balaam son of Beor. The AV and RSV use Mesopotamia also in Jgs. 3:8, 10 to designate the land ruled by Cushanrishathaim, and in 1 Ch. 19:6 for the area from which the Ammonites hired mercenaries to fight against Israel. Many modern texts (e.g., NAB, NEB, and NIV) transliterate the Hebrew as Aram-naharaim in Gen. 24:10; Dt. 23:4 (NAB 5); Jgs. 3:8, 10; and 1 Ch. 19:6. All the English translations use Aram-naharaim in the title of Ps. 60 (except NEB, which omits all titles).

Mesopotamia is used in Acts 7:2 to designate the home of Abraham before he lived in Haran. The inclusion of "the residents from Mesopotamia" with Parthians, Medes, and Elamites (Acts 2:9) probably indicates the Jews of the Diaspora from Babylonia. If so, this would extend the use of Mesopotamia to include the whole Tigris-Euphrates valley, i.e., from the Persian Gulf to the eastern part of modern Turkey. This would conform to its use by Greek and Roman authors after the 4th cent. B.C.

The term Mesopotamia is ambiguous. To some it means the "region between and around the Euphrates and Tigris from the Persian Gulf to Mosul; to others, at home in the classics, it implies an area at the north-west end of this" (Saggs, p. 3). The OT use seems to be the latter. If the original home of Abraham was Ur of Sumer, then Mesopotamia would include Sumer and Akkad (*see* ASSYRIA; BABYLONIA; SUMER; SYRIAN).

R. E. HAYDEN

MESSALOTH mes'ə-loth. *See* MESALOTH.

MESSENGER [Heb. *malʾāḵ*]; AV also ANGEL (Ps. 104:4; Eccl. 5:6 [MT 5]); NEB also MAN, ANGEL OF GOD (Eccl. 5:6), ENVOYS, DEPUTATION, MISSION, MESSAGE, SERVANTS, PARTY, EMBASSY, etc.; [part. of *nāgaḏ*] (2 S. 15:13; Jer. 51:31); NEB also NEWS; [*ṣîr*] (Prov. 25:13; Jer. 49:14; Ob. 1:1); AV also AMBASSADOR; NEB also HERALD; [*rāgal*] ("secret messengers," 2 S. 15:10); AV SPIES; NEB RUNNERS; [Gk. *ángelos*] (Mt. 11:10; Mk. 1:2; Lk. 7:24, 27; 9:52; 2 Cor. 12:7; Jas. 2:25); NEB also HERALD; [*apóstolos*] (Phil. 2:25; 2 Cor. 8:23); NEB DELEGATES, etc.

In 1 S. 31:9 (and par. 1 Ch. 10:9) the RSV and the NEB supply "messengers," although the AV does not; in these difficult passages the head or armor of Saul could also have been sent among the Philistines (cf. the *autá* used in the LXX of 1 S. 31:9; see S. R. Driver, *Notes on the Hebrew Text and Topography of the Books of Samuel* [2nd ed. 1913], pp. 229f.). In Isa. 23:2 the RSV uses "messengers" and the NEB "agents" (both reading *malʾāḵāw* for MT *milʾûḵ*; cf. 1 QIsᵃ, *malʾāḵayiḵ*) in an attempt to correct and clarify a difficult passage; the AV follows the MT literally. In Nah. 2:13 (MT 14) both the RSV and AV read "messengers" for *malʾāḵ*, following the MT, while the NEB suggests as a correction "feeding" (*maʿᵃḵōlēḵ*). In Eccl.

5:6 the AV translates *mal'āḵ* as "angel" (NEB "angel of God"; cf. the Targ.); the LXX (followed by Pesh.) reads *theós*, "God" (on the tasks of the angels serving God, cf. Tob. 12:12-22; Acts 10:4). As noted above, the RSV twice renders *apóstolos* as "messenger," i.e., a delegate sent out for some service (*see also* APOSTLE).

Runners and messengers of various sorts were crucial to ancient Near Eastern societies, for they provided a vital link between parties wishing to communicate. Runners carried messages from Jacob to Esau (Gen. 32:3-5); from Moses to the king of Edom (Nu. 20:14-17); from Gideon to Ephraim to gather soldiers (Jgs. 7:24); between Jephthah and the king of the Ammonites (Jgs. 11:12-28); between David and Joab (2 S. 11:18-25); from Queen Jezebel to Elijah (1 K. 19:2); between King Benhadad and King Ahab (1 K. 20:1-12); from King Sennacherib to King Hezekiah (2 K. 19:9-14; Isa. 37:9-14); to Job with words of the calamities (Job 1:13-19); etc. Furthermore, Heb. *mal'āḵ*, by far the most common term translated as "messenger," also denotes those who spied and explored for Joshua (Josh. 6:17, 25; cf. Jas. 2:25), retrieved Achan's booty (Josh. 7:22), watched and attempted to capture David for Saul (1 S. 19:11-21), functioned as an embassy from King Hiram to King David (2 S. 5:11; 1 Ch. 14:1), and consulted Baalzebul god of Ekron for King Ahaziah (2 K. 1), etc.

Prophets, too, are messengers of God, sent from God with a divine word for humanity (cf. Isa. 44:26 and particularly Hag. 1:13, where the prophet is termed "the messenger of the Lord"; cf. also 2 Ch. 36:15f. for a summation of how God sent His prophetic messengers and His words and was angry when the people rejected them). Mal. 2:7 calls the priest "the messenger of the Lord of hosts," and 3:1 promises God's coming messenger, later to be identified with John the Baptist (cf. Mt. 11:10; Mk. 1:2; Lk. 7:27). (*See* MALACHI.)

Angels are heavenly messengers. In Ps. 104:4 the AV translates *mal'āḵ* (LXX *ángelos*) as "angels," though it seems more likely that winds are here being described as the cosmic "messengers" of God (cf. the RSV and NEB). Again, though the RSV, AV, and NEB all translate *ángelos* in 2 Cor. 12:7 as "messenger," thus terming Paul's thorn in the flesh "a messenger of Satan," this "messenger of Satan" may denote a real or symbolic angel. Thus, both *mal'āḵ* and *ángelos* can designate either an earthly or a heavenly messenger (i.e., an angel).

See also ANGEL.

MESSIAH.

I. Usage of the Term
II. OT
  A. Anointing
  B. Oriental Kingship Ideology
  C. Eschatology
III. Intertestamental Literature
IV. NT
  A. Messianic Titles
  B. Jesus' Self-understanding
  C. Experience of the Early Church
  D. Proof from Scripture

I. Usage of the Term.—"Messiah" is the current English equivalent of Lat. *messias*, derived from Gk. *messías*. In the NT that term is found only in Jn. 1:41; 4:25. It is the transliteration of Heb. *māšî(a)ḥ* and the corresponding Aram. *mašîḥā'*. Both terms are verbal adjectives or nouns derived from the root *mšḥ*, which means "touch lightly" or "rub with oil" and hence "anoint." In the OT *māšî(a)ḥ* is an honorific title given particularly to the high priest and the king. Occasionally, however, it refers to the patriarchs (Ps. 105:15), to a prophet (1 K. 19:15), to the Servant of the Lord (Isa. 61:1), or to the cherub appointed for the protection of Israel (Ezk. 28:14). In Hab. 3:13 the term probably applies to the chosen people.

Rabbinic literature uses the expression as a proper name and hence without article, as also in Jn. 4:25, whereas in English usage the articular form is common. The LXX and NT do not as a rule transliterate the Semitic term but rather prefer the Greek translation *ho christós*. In the few places where the Vulgate preserved the transliteration, Wyclif and the other early Protestant translators of the Bible adopted the Latin form *messias*. The Geneva Bible (1557-1560) introduced the transliteration *Messiah*, and the popularity of that version accounts for English writers preferring the form. The AV somewhat inconsistently adopted the form "Messias" in John and "Messiah" in Dnl. 9:25f. The RV and all subsequent English translations espoused the form "messiah" in John, reflecting the common theological usage, but translated Heb. *māšî(a)ḥ* in the OT, including Daniel, as 'anointed."

II. OT.—A. Anointing. From early antiquity the use of olive oil was common in the eastern Mediterranean area. The OT reports two of its applications, one practical and the other ritual. The practical use was mainly cosmetic: people anointed their faces and hair when going to a feast (e.g., Ruth 3:3; 2 Ch. 28:15), and hosts anointed their guests as a sign of welcome (e.g., Ps. 23:5).

Equally common in the Near East was ritual unction with oil, a practice based upon the belief that oil of olives has special properties of healing and preservation. Ritual unction was thought to extend the oil's efficacy both to objects and to persons. Thus the tabernacle (Ex. 40:9) and the altar (29:36; cf. v. 29; 40:10) were anointed to make them fit for religious purposes. In order to officiate validly, the priests, too, had to be anointed (e.g., Lev. 4:3, 5, 16; 6:15, 20; Nu. 3:3). Underlying this rite was the belief that ordinary things and persons lack "power" to serve the ends of the deity and are unfit to render its presence effective.

Ritual anointing, unlike cosmetic anointing, had to be done by a person endowed with special authority in order for the "power" to be conferred to objects or persons. Thus Moses was commissioned to anoint Aaron as high priest (Ex. 28:41; 29:7; 30:30; 40:13); Aaron in turn was to anoint his successor as well as the "lower" priesthood. Similarly, when Israel adopted the monarchic system, those with political authority would anoint the incumbent of the throne; for instance, the "men of Judah" (2 S. 2:4) and the elders of the tribes (5:1-3) anointed David. The mention of Samuel as well (1 S. 16:13) indicates differing views concerning the seat of political authority in ancient Israel.

The designation "the anointed one" originated from the anointing of the king. Appellations like "Yahweh's anointed one" or "my anointed one" in preexilic Psalms (e.g., Ps. 2:2; 18:50 [MT 51]; 20:6 [MT 7]; 28:8; 45:7 [MT 8]; 84:9 [MT 10]; 105:15) show that the title went back to the days of the monarchy and cannot be considered a late Jewish reinterpretation of the royal office. It is true, however, that exilic and postexilic use of the term "messiah" is generally metaphorical. When in Isa. 61:1 the prophet calls himself anointed, when in a vision Zechariah saw Zerubbabel as God's anointed one (Zec. 4:1-14), or when in the Dead Sea Scrolls prophets are designated as anointed ones (1QM 11:7; CD 2:12), the title no longer refers to the original rite. The term's metamorphosis cannot be understood as a historical change in the interpretation of the religious rite of anointing. Its explanation must be found in two new factors: Israel's adoption of the oriental kingship ideology, and the rise of eschatological hopes. Among

many others, Volz, Engnell, A. Bentzen, S. Mowinckel, and S. H. Hooke, have greatly contributed to the elucidation of that development.

B. Oriental Kingship Ideology. The so-called royal Psalms (esp. Pss. 2, 18, 20–22, 89, 101, 139) entertain the view that the king's authority derives from God Himself rather than from those who appointed him. In the light of Ugaritic and Mesopotamian documents there is considerable evidence that those Psalms were connected with the New Year Festival, which commemorated God's rejuvenating not only nature but also His people. By manifesting His renewing power God was, as it were, reascending to His throne after defeating the forces of destruction (e.g., Tiâmat, Behemoth, or Leviathan). In this connection, the king would be regarded as God's representative on earth, whom God Himself anointed. Even if this kingship ideology is rooted in a myth of primeval man, as Reitzenstein, Schaeder, and Bentzen contended, the Israelites would not adopt it in its primitive form but rather as a political myth. God's power manifests itself through the political institution, and thus it would be as the temporary incumbent of the institution, rather than as a particular individual, that the king was God's delegate. The institution of kingship did not merely symbolize God's reign, however; it was in the political field, through the king of Israel, that God actually wielded His power over the world.

In this view Israel's king was the "Son of God" (Ps. 2:7) whom Yahweh "engendered" as he ascended to the throne. Divine sonship did not result from procreation, in which divine substance is joined with a human being, as Greek mythology held, nor was it a purely legal fiction by an act of adoption. Rather, it resulted from God's power that effectively operates through His chosen agent. As such the king shared God's privileges, in particular those of legislator, judge, and lord over his subjects' life and property. Moreover, God endowed him with wisdom and justice, which enabled him to convey divine blessings (cf. Ps. 72:4, 12-14, etc.) to the people. Although rightly called the "Son of God," the king of Israel, unlike rulers in the rest of the Fertile Crescent, was never addressed or worshiped as God. Though he never ceased to be human and a creature, he was, nevertheless, the legitimate owner of his country and people, and whoever challenged him opposed God Himself. In turn, the actual rule of Israel's king was considered evidence of God's care and concern for His people (e.g., 2 S. 7:14).

The language of the royal hymns of the OT has often been considered unrealistic and typical of oriental exaggeration. Yet one must remember that in the person of the sovereign it was the institution that was extolled. An unending reign and life was ascribed to the king as representative of the institution (Ps. 72:5). In him as anointed by God the nation enjoyed unending prosperity (72:6f., 15-17; Isa. 9:7) and would triumph over all its enemies (Ps. 2:1-9; 18:44-48 [MT 45-49]; 72:8-11), for in the king's rule God's power was revealed (45:7). Since he was the "Son" of God, the king's person is sacrosanct and inviolable; God alone had a right to punish him (1 S. 26). Sellin and other scholars held that 2 S. 7:14 describes David himself as savior. But the next verse shows that God acts as the savior of His people by conferring certain privileges on David and his descendants.

A comparison of Israel's kingship ideology with that of its neighbors shows not only that the Israelites had dropped all features incompatible with their view of God as Creator but also that they had no use for such ceremonies as the king's dying and rising again. Rather, the king was reminded of his moral task. God had chosen Israel as His property (Ex. 6:7) and through a covenant destined it to be holy (Lev. 11:44f.). To work to attain this goal was the king's obligation (Mic. 5:3f.). By anointing Zerubbabel and Joshua as political and spiritual heads of Israel, God indicated that He had not lost sight of the goal for which He had chosen Israel as His people (Zec. 4).

In Israel the kingship ideology was apparently coupled from an early period with the promise of the permanent rule of David and his successors (cf. 2 S. 7:11-16; 1 K. 2:3f.; Ps. 18:50 [MT 51]; 28:9; 89:4, 29-38). Among the prophets, Isaiah especially emphasized the providential role of David and his house (Isa. 4:2; 9:6; 11:1; 16:5; 55:3f.). Isaiah was followed by Micah (5:2-4), Jeremiah (17:25; 23:5; 30:9; 33:17), Ezekiel (34:22f.; 37:24f.), and Zechariah (3:8; 6:12). Most scholars also regard Am. 9:11 as preexilic. The references to the house and descendants of David have often been interpreted in a genealogical sense. In the light of 1 K. 2:3f. it seems more probable, however, that the term "house of David," like "Son of God," meant David's spiritual successors who "walked like him in the ways of God."

C. Eschatology. Quite apart from its nonmythical character, the OT idea of the Messiah differs from the oriental kingship ideology by its eschatological character. The ancient Near East understood time as determined by the cosmic law of change. Each deity had his or her own limited period of rule and would be succeeded by another deity. As Creator, however, the God of the Bible controls everything in this world, including time. Furthermore, His character lifts Him high above mere nature. His is a reasonable will, by which He pursues a comprehensive goal for the whole universe. This teleological element in God was originally understood as His asserting His holy will by means of the law He had given to His people; that idea was eventually supplemented by the notion of a transformation of the structure of this world. By coupling the latter view with the belief in a divinely appointed kingship, the prophets endowed Israel with a new idea: the Messiah. The political institution of kingship was no longer understood as an end in itself, but rather as the foretaste of the rule of a perfect king by whom peace and justice would be realized forever.

Until the time of Isaiah, Israel's hope was confined to the restoration of the splendor of David's kingdom, whose glory increased in proportion to the deterioration of Israel's political and social conditions. Isaiah in particular castigated these expectations as the wishful thinking of a people in search of happiness. Yet he also offered a genuine hope, which rested upon God's work in the past. In God's acts the prophet saw the evidence of His purposiveness. As Creator, God was concerned not exclusively with the Hebrew people, but rather with all mankind. Out of the combination of the kingship ideology and this new perspective, the belief in the advent of the Messiah as divinely appointed Savior of the world was born.

The eschatological outlook did not necessarily include the kingship ideology. The description in Ezk. 40–48 of the final age, for instance, mentions no mediator of the divine blessings. The term "messianic age," although invariably implying the expectation of an age of bliss, should be confined to the type of eschatology that looks forward to the appearance of a personal savior. A strict division of prophetic eschatology into a messianic and a nonmessianic type is not feasible, however, because in either instance the language of both the creation story and the kingship ideology is used. The absence of direct references to a personal, divinely appointed savior does not necessarily mean that a prophet did not believe in one. The cryptic language with which the prophets refer to the final age makes one think that the eschatological hopes were treated

as top secrets. Some scholars make a possibly helpful distinction between a "historical" and an "eschatological" Messiah. Haggai and Zechariah as well as rabbinic Judaism understood the Messiah as an ordinary human being, although one "anointed" by God and thus endowed with extraordinary capacities. The Messiah was to inherit all the promises given to David, Israel's first anointed king, and like David was to be a political ruler. This view seems to contrast with views of the Messiah as a heavenly gift to Israel. But references to the raising of David (Ezk. 34:23f.; cf. 2 Esd. 13; 2 Bar. 29; 72) and in particular the characterization of the age to come as something entirely new (Heb. *ḥāḏāš*, Isa. 50:6-8; 63:4; 65:25; Jer. 31:31-34; 34:16; Ezk. 37:24; 48:35; Hos. 3:5) clearly indicate that even rabbinic messianic literature conceives of the coming of the eschatological future as a creative act of God by which this world is remade rather than as a mere restoration or reform of the nation's political or social life.

Notwithstanding their common origin in Israel's religion and history, the two kinds of messianic hope differ fundamentally. Like the kingship ideology, the expectation of a "historical" Messiah presupposed a sense of security and adequate power. The institution of kingship was held to be firmly rooted in the covenant, even though no king may have been available. This outlook explains the Jews' wavering reception of Jesus: was He the legitimate representative of the institution? The expectation of the "eschatological" Messiah, on the contrary, was held against the background of impending disaster and ruin, the "messianic woes" (e.g., Mic. 5:3; cf. Ezk. 21:27), from which God alone could save. Although the conflicts were usually described in terms of the ancient creation myth, God's fight and triumph were nevertheless spiritualized as the conflict of belief and unbelief (cf., e.g., Isa. 11:9; Zec. 9:10). The eschatological hope remained closely related, nevertheless, to the fate of Israel, the Lord's chosen people. God's victory would entail prosperity for the Jewish people as well as international order. The prophets pointed out, furthermore, that God's "coming" was not to be understood as an automatic process. God challenges His nation; by a kind of second exodus Israel would be tested and sifted (Isa. 40:3-5, 10f.; 44:24-28; 51:4-6; 52:8-10). The final goal of Yahweh's saving work is the establishment of His holy will on earth.

As with all His works, God carries out that of savior-king through His agents. Agents are implied in all references to God's salvation, even though they may not specifically mention a mediator. The centrality of His saving plan is indicated, for instance, in that the prophet who proclaims the news of salvation considers himself God's anointed (Isa. 61:1-3; cf. Zec. 2:9-13 [MT 13-17]). As messenger of God's final salvation, the "Servant of the Lord" (Isa. 42:1-7; 49:1-9; 50:4-9; 52:12–53:12) himself ushers in the new age (ch. 53; cf. Mal. 3:1). Mal. 4:5 (MT 3:23) emphasizes the messenger's spiritual function: the prophet Elijah rather than King David will make the final announcement. Dnl. 7 describes the agent of God's salvation as "one like a son of man," who after the brutal and wicked reign of the four earthly kingdoms, symbolized by the wild beasts, will consummate God's rule as His viceregent. The Danielic vision shows the principal difference between the kingship ideology and the messianic idea. The term "messiah," originally a generic noun, is in the eschatological context transformed into a proper name or personal title. While many officebearers in Israel may be anointed, it is through His Messiah that God completes His plans with mankind and the universe, whereas the kingship ideology is inevitably tied up with the well-being of the Jewish people. Because of the finality implied in the idea of Messiah, his work is capable of an ever deepened and widening interpretation.

The very idea of a divinely appointed yet earthly agent through whom God's comprehensive purpose is carried out is apt to perplex the modern reader. Although the expression "one like a son of a man who was brought before the Ancient of Days" in Dnl. 7:13 is meant to symbolize true humanity as contrasted with the beasts designating the preceding empires or periods of history, v. 18 states that the saints of the Most High shall possess the divine kingdom. Thus the symbol stands for the divine commission of the faithful members of Israel. The same event is described as a heavenly as well as an earthly reality.

It is obvious that the new prophetic idea of the Anointed One, though heavily indebted to the kingship ideology, has been detached from the rite of anointment. While in constitutional life the actual rite was required in order to confer God's approval on the ruler, the prophets use the term metaphorically. It is meant primarily to designate the divine mission and commission of the Messiah and the finality of his ministry.

III. Intertestamental Literature.–The prophetic literature of the preexilic and exilic age describes the coming of the Messiah and the nature of the final age in various ways. As growing emphasis was laid upon instruction and theoretical understanding, a tendency to systematize eschatology and messianic hope characterized the rich Jewish literature of the intertestamental period. All the diverse prophetic visions of the future age of bliss are presumed to refer to the same event. Likewise, the various agents of God's salvation are fused into one savior. Thus 2 Esdras holds that the "anointed one" is of David's lineage (12:32); he is a mortal like Israel's past kings (7:28), yet he is also the "Son of God" (13:32ff.). Similarly, the Tannaim interpreted all eschatological and messianic passages of the OT according to a preestablished pattern. Along with the idea of a canonical Scripture, Israel developed the belief in the canon's intrinsic unity. Divine promises that originally referred to historical events (e.g., Gen. 13:16; Ps. 72:17; Zec. 8:13) were then presumed to refer to the Messiah or the age to come. Likewise, references to the anointing of the king, especially in the royal Psalms, were applied to the Messiah. Such exegesis was not altogether arbitrary. Through searching for the intrinsic oneness of the Scriptures Israel learned to think of God as one who pursued a saving purpose throughout the ages. Historical events could thus be interpreted as indicating the ongoing work of salvation; Jesus and His followers interpreted their Bible in this sense. The extent of this process of reinterpretation can be seen in the LXX espousal of translations with eschatological connotations, even in cases where such meaning is not obvious in the Hebrew text. The best-known instance is Isa. 7:14, where Heb. *'almâ*, "young woman," is rendered *parthénos*, "virgin," whereby the historical promise is transformed into a hope based upon supernatural eschatology.

In spite of those exegetical tendencies the Jewish Messiah never evaporated completely into a purely mythical or supernatural being, nor was he thought of as a deity. He had been promised to Israel and thus remained closely related to the fate of the Jewish people and their political history. He was thought of as a ruler who would be thoroughly familiar with the law and whose faithful observance of it would set an example to the whole nation. Thus he would be worthy to be the king and judge of God's chosen people. But despite all harmonizing and systematizing attempts, the Jewish people never succeeded in forming a generally accepted view of the Messiah and his work. In the light of Dnl. 7:18, Ezekiel, Amos, Obadiah, and certain

Psalms, some Jewish exegetes identified the Messiah with the faithful remnant of the people of Israel, while others conceived of him as an individual. The apocalyptic and devotional literature of intertestamental Judaism has given free rein to imagination in depicting the manner in which God would accomplish His saving work. According to the Apocalypse of Moses, for instance, an angel of the Lord will eventually overcome Satan (ch. 10). In the Psalms of Solomon it is the "anointed of the Lord" (18:3-9) who comes to Israel's rescue. Similarly, 2 Baruch and 1 Enoch distinguish the "days of the Messiah," which have limited duration, from the never-ending "age to come." Whereas 1 Enoch says that the Messiah will live forever, the rabbis discussed the limits of his reign. Messiah ben Joseph was thought of as a suffering Messiah who would be killed in battle.

Moreover, it is not clear whether the Messiah was to establish God's kingdom or only to prepare its advent (2 Esd. 7:28; 12:34; 2 Bar. 40:3). The great diversity of titles used for the saving agent of God — Messiah is by far the least frequent one — should warn against the modern fashion of building views of intertestamental soteriology on those names and titles as though each of them had a clearly circumscribed and different meaning. As a rule, the intertestamental literature considers God rather than the Messiah the one who ushers in the cosmic transformation and salvation (1 En. 90:37f.; 2 Esd. 7:28f.; 2 Bar. 72:1-5). In Ps. Sol. 18:7-9 God installs the Messiah as the ideal judge and ruler. The whole Jewish literature agrees on only one feature of the Messiah: he will be a political ruler and national hero. His saving power requires that he deliver Israel from its oppressors and restore the authority of the law.

The excessive Jewish nationalism that characterizes the intertestamental period resulted in transferring OT features of Yahweh the warrior and conqueror to the Messiah (Sib.Or. 5:108f., 414-431; 2 Bar. 70:9; 73; 1 En. 38:2f.; 90:38; Jub. 23:30; 2 Esd. 13:10f.). It is not surprising, therefore, that the idea of the Messiah as rebel and political deliverer appeared in the Maccabean age. Since God will appoint the Messiah, no one, not even the Messiah Himself, will foreknow his election and dignity (e.g., Justin Martyr *Dial.* 8.4). Did postexilic Judaism believe in the preexistence of the Messiah? Dnl. 7:13 speaks of the Messiah as though he belonged to the retinue of God (cf. also 2 Esd. 7:26; Apoc. Abr. 31), but that is not the preexistence later ascribed by Christian theology to Christ. Some scribes postulated for the Messiah an ideal existence in God's mind. The notion of a Messiah residing in heaven (*Pesikta Rabbathi*, 7th cent. A.D. but based on earlier traditions) shows clearly the influence of Christian speculation.

In postexilic Judaism anointing designated a status directly below God rather than a specific task or function. In Ps. Sol. 17:21-40, for instance, all the kings allied with Israel will be anointed. This view of anointing is particularly obvious in the coexistence of two messiahs, one from the house of David and one from the house of Aaron or Levi (e.g., T. Jud. 21:2-5; 24; T. Levi 18; Jub. 31:12-20; 1 QS 9:11; CD 12:23; 14:19; 19:10; 20:1). The idea of dual messiahship goes back to Zec. 4:14. It may be rooted in the primitive office of a priest-king, of which traces still linger in the NT (e.g., 1 Pet. 2:9f.; Rev. 1:6). A late rabbinical distinction was made between Messiah ben Joseph, a belligerent and suffering Messiah who would eventually be killed, and Messiah ben David, who would succeed him and reign forever. Though the rabbis identified this Joseph with the patriarch, the distinction of these two messiahs is an attempt to reconcile the Jewish and Christian messianic ideas. Apart from this instance, Judaism has never known a suffering Messiah. Although the Qumrân community identified itself with the Servant of the Lord in Isaiah and understood its mission in a messianic sense, the Dead Sea writings never refer to the sufferings of the Messiah.

This survey of the intertestamental period has shown that Judaism had never reached agreement on what to expect of the future, except that all believed that God would eventually vindicate His people. In turn, none of the eschatological and messianic views claimed exclusive authority; thus divergent views could easily coexist. Modern attempts to reduce this multiplicity to one system do violence to the evidence. Above all, the relationship of the Jewish ideas of the Messiah and the Christian idea should not be thought of as an evolution from a primitive to an articulate view. While the early Church adopted most of the representational material of the Jewish view of the Messiah, it rejected the underlying understanding of time. According to postexilic Judaism the world necessarily moves according to the Creator's will (cf., e.g., the three times and a half time in Dnl. 7:25). The coming of the Messiah is the sign that the final period has begun or that the goal has been reached. The early Christians were aware of a divine purpose realizing itself in and through creatures of this world. The final goal is seen in God's manifesting His mercy in sending a savior-messiah to this earth.

IV. NT.–A. Messianic Titles. In the NT the designation *christós* occurs with great frequency as a title of Jesus. 1 Jn. 2:20, 27 refer to the anointing (*chrísma*) of believers but do not call them *christoí*. By giving Jesus alone the title "Christ," the Greek-speaking congregations of the first generation obviously followed the LXX. The use of this title is an indication that the idea of God's Anointed One was deeply embedded in the religious thinking of the apostles. In Christian usage *christós* lost a number of its OT and Jewish connotations. In fact, by forming an integral part of the Christian message, it was fraught from the beginning with features alien to its Jewish antecedents. *Christós* is not the only title given to Jesus by the early Church. Paul in particular used *kýrios*, "lord," in many instances, either alone or combined with "Jesus" or "Jesus Christ." In most of its NT uses "Christ" had become part of Jesus' name, and "Lord" was the title then given to Jesus. The use of the appellation *kýrios* probably originated in the Greek-speaking Jewish-Christian churches and was considered the full equivalent of Messiah. Since the Hellenistic world was not familiar with the ritual practice of anointing, the title "anointed one" as a religious designation would not have been meaningful to people not familiar with its Jewish connotation. According to the Synoptic Gospels Jesus never designated Himself by the title "Messiah." He was sometimes acclaimed as Christ (e.g., Mk. 10:47 par.; 15:18; Mt. 9:27) but never encouraged the use of this appellation. After Peter's confession, for instance, the tradition has Jesus foretelling the sufferings of the "Son of man" rather than of the Messiah (Mk. 8:27–9:1 par.); He also spoke of Himself as "master" or "shepherd." Most appropriate in Jesus' opinion, however, was the self-designation "Son" or "Son of God" (e.g., Mt. 11:27 par. Lk. 10:22; Mt. 24:36 par. Mk. 13:32) or the indirect reference to His Sonship implied in the phrase "my (the) Father" (e.g., Mt. 7:24; 10:33; Mk. 8:38 par.; Lk. 22:29).

The evidence preserved in the Gospels points to the following facts. Jesus was reluctant to use or claim the title "Messiah" for Himself, probably because of its political connotations in contemporary Judaism. The various agents through whom, according to the OT, God took care of this

world (e.g., Servant, Son of man, Son of David) were for Jesus integrated in the title "Son of God." The "Son" is God's redemptive presence (e.g., Lk. 4:21). On the basis of Jesus' understanding of His ministry, the early Church could acclaim and proclaim Jesus as Messiah in an entirely new way, which transcended both the OT understanding and the intertestamental development of the title.

B. Jesus' Self-understanding. Even scholars who, like the representatives of form criticism or the school of *Traditionsgeschichte*, assign most of the teachings found in the Gospels to the literary activity of the early Church must admit that the position the Evangelists ascribe to Jesus would be inexplicable without Jesus' awareness of His divinely assigned mission. Two factors cooperated to form His self-consciousness: His experience of a unique relationship with God His "Father," and the assurance that He had been commissioned to start the final phase of the redemptive history whose beginnings were recorded in the OT. To understand Jesus' self-consciousness it is therefore wrong to start from the titles ascribed to Him in the NT.

The Evangelists formed their portraits of Jesus by describing how He dealt with all kinds of people. Although their portrayals of Jesus differ according to their vantage points, these writers had one feature in common: they all characterized Jesus as a man who in His actions was certain that He played a central role in the advent of God's kingdom and the execution of His redemptive plan (e.g., Mk. 8:38 par.; 9:14-29 par.; Mt. 13:16; Lk. 10:23f.). Jesus appears in the Gospels as one who has dedicated His whole life to the task set before Him irrespective of the cost. This awareness gives Him the right to demand unreserved allegiance to His person (e.g., Mk. 1:16-20 par.; Mt. 19:21 par.). It also explains the paradox of Jesus' mission. His place was within the framework of Jewish history and national life. Nevertheless, on account of His special relation to God, His ministry would benefit the whole of mankind. This self-consciousness enabled Him to use traditional titles in a new and sovereign way, interpreting and transforming them in the light of God's will as it shone in Him. He was certain that such obedience would imply suffering. Unlike most of Judaism, He saw in the Suffering Servant of Isa. 53 a type of the final savior. The Jews were confounded and irritated by Jesus' humility and meekness, which contradicted their idea of a national liberator who would appear in royal splendor and power. From their viewpoint they were bound to reject Jesus. But to Him this very rejection was proof of His divine mission, for God had predicted it long ago (Mk. 4:11f. par.). The close connection that Jesus felt with God can be seen in His giving commandments that practically upset Jewish law and His foretelling the way in which God's reign would be established without feeling the need to indicate the source of such knowledge.

Like his contemporaries, Jesus thought of the messianic age as an eschatological event. But whereas for them it was the future fulfillment of certain prophetic predictions and divine promises, for Jesus it was the realization of a divine dynamic working in and through Him. He viewed the eschatological events as a process of which His earthly ministry was but an intermediate phase; it was, however, the decisive phase (Mk. 8:38 par.; Lk. 12:8f.). This conviction explains the sense of finality with which Jesus spoke and acted as well as His assurance that His mission would not be terminated until His Parousia. Thus Jesus' eschatological outlook was not purely futuristic, as held by Bultmann and others, according to whom Jesus had announced the imminent arrival of a Messiah not identical with Himself. Also, He did not conceive of Himself as merely designated to become the Messiah at a later date (e.g., B. Weiss). The NT books do not bear out, either, the view of C. H. Dodd and others that Jesus saw all the promises of God already fulfilled in His earthly ministry ("realized eschatology"). Jesus was painfully aware of the power of Satan and the forces of evil over this world. Nevertheless, since He saw God as the Father of all creatures, He interpreted the Lord's redemptive plan for Him as embracing the whole world.

In 1 Cor. 15:20-28 Paul lucidly interpreted Jesus' eschatological outlook. The progressive character of Jesus' eschatological work, of which the apostle was aware, explains the bewildering way in which Jesus referred to His "coming." He could say that He had come (Mt. 11:19 par. Lk. 7:33f.; Mt. 10:34; Mk. 10:45; Lk. 12:49) and also that He was the coming one (e.g., Mt. 16:28; Mk. 8:38; Mt. 25:31; Mt. 26:64 par. Mk. 14:62, where the present participle *erchómenos* is used with a future meaning). The assurance with which Jesus announced His Parousia has no parallel in Jewish messianism. The Parousia is not a return but rather His self-manifestation in glory.

Another feature in the Gospels that points back to Jesus' experience is what W. Wrede called the "messianic secret." It is strange indeed and without parallel in Judaism that at no occasion did Jesus proclaim Himself as Messiah. His references to the "Son of man," which unquestionably have a messianic meaning, are invariably enigmatic and indirect. But according to Wrede this "messianic secret" is a secondary feature in the Gospels, invented by Mark to explain the otherwise scandalous fact that one whom His followers proclaimed as the Messiah had been killed by those to whom He had been sent.

Wrede's ingenious hypothesis rests on a precarious foundation, however. Quite apart from the psychological problems that would be involved in such a literary fraud, Wrede implies that Jesus had in fact proclaimed Himself as Messiah. To make His historical fiction plausible Mark would have had to suppress all references to Jesus' messiahship. One wonders how Mark's Gospel would ever have won acceptance if it so blatantly contradicted the original tradition of the Church. Much more plausible is the assumption that Jesus was reluctant to use messianic titles for His mission because He was afraid of popular misunderstandings. The political connotation of the title "Messiah" might have pushed His work in the wrong direction; for instance, He might have been proclaimed leader in a popular uprising (cf. Jn. 6:15). While eager to see people recognize the nature and effects of His ministry, Jesus did not care for specific titles. Thus He stated unambiguously that a person's salvation would not depend on the title by which he addresed Jesus but rather on his following the man of Nazareth and His example because He was the true man according to God's will (e.g., Mt. 8:22; 10:38; 19:16-22; cf. Jn. 1:9; 15:1; 1 Jn. 2:8; 5:20). By following Him, people would learn from experience that He was the Son of God. Thus Jesus liked to speak of Himself, His work and destiny, in parables (Mt. 13:34; Mk. 4:34), not in order to keep certain people out of God's kingdom but rather in order to induce people first to receive the "mystery of the kingdom" (Mk. 4:11 par.). The "mystery" was that God was establishing His reign on earth through the man Jesus and His followers. Jesus intimated His dignity in a veiled way only, by referring, e.g., to the Son of man in the 3rd person.

The Gospel portrait of the man Jesus is difficult to reconcile with the dogma of the two natures of the incarnate Christ. Often in the traditional presentation of the hypostatic union either the deity of Christ is lost or His manhood is suppressed. To do justice to the Gospel portrait

of Jesus, Thomasius, von Hoffmann, and many other nineteenth-century Lutheran theologians advocated the kenotic hypothesis. They thought that the work of the Messiah consisted of two successive stages, namely, His humiliation during His earthly ministry and His exaltation in His resurrection and heavenly reign. Although already divine on earth, the Logos would not have used His divine attributes and thus would have appeared as mere man. According to the Synoptic records, however, Jesus was fully aware of God's redemptive power as it operated in His ministry. That presence manifested itself in Jesus' ability to cast out Satan and the demons (Mt. 12:28; Lk. 11:20), in His lordly use of the divinely instituted sabbath (Mk. 2:28 par.) and in His sharing the divine prerogative to forgive sins (Mk. 2:10 par.). Similarly, Jesus could state confidently that, however His adversaries might harm Him, God would vindicate Him in His resurrection (Mk. 8:31 par.; 9:30-32 par.; 10:32-34 par.). Thus the Synoptic Gospels depict Jesus as a man who is aware of His being God's instrument and servant in the execution of His redemptive work and who plainly states that fact.

On account of the NT evidence, some scholars abandoned the ontological explanation of Jesus' ministry and attempted a psychological approach. Ever since Albert Schweitzer's *Quest of the Historical Jesus*, however, theologians have contended that seeking a psychological explanation of the "messianic self-consciousness" of Jesus has a serious methodological fault because it leads to an insuperable dilemma. When Jesus' consciousness was interpreted in analogy with an ordinary man's mind, the result was a portrait of Jesus that despite its attractiveness failed to explain how such a man could ever be proclaimed the Savior of mankind. The alternative is the assumption that Jesus suffered from paranoia or schizophrenia, because no healthy-minded man would make for himself the claims that Jesus made. According to Schweitzer, the solution to that dilemma is recognizing that Jesus considered Himself the servant of God and that His messiahship consisted in His willingness to be used by God as an obedient instrument for the execution of God's saving will.

J. Weiss and numerous other theologians suggested another way to come to terms with the historical record. Jesus, they held, never thought of Himself as occupying the central place in God's plan. He was a mere teacher or at the best a prophet who announced the coming of God's sovereign rule. Belief in His messiahship resulted from some strange experience that His disciples had at Easter. In the early years of the 20th cent. that "Easter faith" was conceived of as having an extra-subjective basis, but Bultmann and his followers interpreted it in terms of existential experience, regarding the gospel story as a myth never meant to be understood as history. The first-century presentation of the gospel, however, in no way bears out this ingenious hypothesis. Far from relating a myth of a dying and rising savior or a "redeemed redeemer," the NT documents refer to a man whose place in history is unmistakably circumscribed. Saying that the early Church invented the materials found in the Gospels is tantamount to asserting that it committed one of the biggest frauds in the history of religion.

C. Experience of the Early Church. Although Jesus did not leave a single written line, it is absurd to postulate complete discontinuity between the ministry of Jesus and the worship of Christ. If during his lifetime Jesus had never intimated that He was the Son of God, it would be very strange that His followers worshiped Him in that capacity after His death. In lieu of the books of the NT, they might have left writings that combined the teachings of Jesus with Jewish apocalypticism. Nothing in Jewish tradition would lead them to the worship of Christ. One can agree with the form critics' contention that at the bottom of the new religion is a powerful spiritual experience that permeated the whole life and thinking of the early Church. Yet, difficult as it may be to produce a scientific explanation of the Resurrection, the fact is incontestable that the Church was built upon the disciples' witness that their faith was occasioned by a miraculous event outside of their minds, which concerned the man Jesus with whom they had associated during His earthly ministry.

The Synoptic Gospels are the early Church's witness to the power of God as manifested in Jesus' life and ministry. The disciples had been able to discern a divine plan in the healings and exorcisms, the miracles and heavenly manifestations, the singular fellowship of Jesus and His followers, the faith of those who were considered religious outcasts, and the rejection of Jesus by the official representatives of the Jewish religion. Jesus' resurrection had confirmed the paramount significance of these events. Hence His first associates proclaimed Him as Messiah or Christ, as the early speeches in Acts show. The importance of that proclamation is best indicated by the early Church's confession or *homología* that Jesus was the Messiah or *christós* (e.g., 1 Jn. 4:2f.; Jn. 20:31) or the heavenly Lord *kýrios*, e.g., Rom. 10:9; 1 Cor. 12:3; Phil. 2:11). By assuming the grammatical form of a nominal sentence, the *homología* expresses the substantial identity of name and title. The confessional statement does not mean that Jesus happened to be a messiah or a lord, but rather that it was His very nature to be such. "Confessing Christ" meant that a Christian was willing to make a public stand for the messianic dignity of Jesus, regardless of hostile reactions.

Literary criticism indicates that the sayings of Jesus found in the Gospels probably were rarely preserved in their original form. For teaching purposes the apostles and leaders of the early Church would have altered the original tradition concerning Jesus to bring out His significance for them. In particular they would have insisted that in His resurrected life Jesus had manifested His full identity. As a result, certain sayings of Jesus and narratives about Jesus' deeds might have been styled to make their mysterious intimations obvious; the procedure of the Fourth Evangelist is especially illuminating. John was anxious to show that although God Himself was speaking through Jesus' teachings, God's sublime meaning was hidden by Jesus' veiled or metaphorical language. Similarly, John intended to bring to light the revelatory meaning of Jesus' miraculous deeds. Such editorial activity of the early Church has been grossly misrepresented, however, by those who contend that the early Church fabricated the Gospel material.

The tradition about Jesus' self-consciousness was also influenced by the varied spiritual experiences of the early Church leaders, which caused them to interpret Jesus' messianic role in various ways. For instance, the materials forming the original tradition of the Church were not placed side by side at random, as K. L. Schmidt surmised. Rather, apart from the general frame that all Gospels have in common, each Gospel was arranged in agreement with a specific messianology. For that purpose some of the NT writers adopted traditional patterns. Matthew describes the work of Jesus more or less in accordance with the kingship ideology of the OT; Jesus' dignity and claim as the Son of David are frequently underscored (e.g., Mt. 1:1, 6, 17, 20; 9:27; 15:22; 20:30; 21:9, 15). The authors of Mark and Revelation obviously had in mind the apocalyptic image of the Son of man. Both books describe Jesus as winning His kingdom by fighting with Satan, the ruler of this world, and finally overcoming Satan's opposition

(e.g., Mk. 1:13; 3:22, 26; 4:5; 8:33; Rev. 2:9, 13, 24; 3:9; 12:9; 20:2, 7). Luke finally seeks to adjust the record to the pattern of the Suffering Servant of Isa. 53, who takes upon himself the burden of God's people. The book of Hebrews, which depicts Jesus both as the Son of God appearing on earth and as the heavenly high priest, seems to follow a sacerdotal tradition of which few traces have been preserved elsewhere (e.g., Testament of the Twelve Patriarchs and the Qumrân Scrolls).

Paul and John made an entirely new departure. Their interpretations of Jesus' person and work indicate the shift that Christian thinking underwent from the Hebraic categories of Palestine to the Hellenistic perspective of the Dispersion. These writers were familiar with the Church's original proclamation and evangelistic tradition but seem anxious to overcome the particularism that for a Hellenistic mind were still inherent in the traditional patterns. On the basis of the radical transformation that the encounter with the risen Jesus had called forth in their lives, Paul as well as the Fourth Evangelist felt touched by God Himself. Both described Jesus as the preexistent Son of God who had participated in the work of creation and prepared the whole world for its final salvation. In the historical life of Jesus, the redemptive plan that God envisaged for mankind had entered into a new and final stage (e.g., Jn. 3:16; Rom. 11; Eph. 1–2). In this process the followers of Jesus were held to be united in and with Him organically (Jn. 15:1-7; Eph. 4:12-16). That view led to the realization that, as the Messiah, Jesus had given His life as a sacrifice by which a sinful mankind had been reconciled with God (e.g., Rom. 3:25f.; 5:6-8; Jn. 1:29; 10:11; 1 Jn. 2:2; 3:16) or as a ransom by which believers had been freed from slavery to sin and death (e.g., Mk. 10:45; Mt. 20:28; Rom. 6; Gal. 4:8; Eph. 2:1f.; 1 Tim. 2:6).

This shift of emphasis from rulership to remission of sins and newness of life indicates the transition from the traditional Jewish messianic ideology to a new understanding of Jesus' achievement. Guided by such spiritual experience, the apostles could then apply to the ministry of Jesus all kinds of OT metaphors. There is, however, one remarkable fact. As in the Synoptic Gospels, in the Pauline and Johannine writings mythical language may be used; yet it is never coupled with mythological representations or speculations. Rather, such figurative terminology is determined and restricted by the conviction that the risen Lord is identical with the man Jesus of Nazareth. Hence such expressions as "ascending to heaven," "absence," "coming of the Lord," "first and second man," "light of the world," "heavenly city," "Satan the prince of this world," and "hell" must be interpreted metaphorically.

Seen in the light of this new experience, the ministry of Jesus the Christ forms the turning point of history. It takes place at the "fulness of time" (Gal. 4:4; cf. Mk. 1:15). Yet Jesus' coming is a blessing only to those who join Him and acknowledge the divine origin of His mission. Through His redemptive work He becomes Lord, the ruler of believers, for He wields power over their consciences (e.g., Rom. 12:1-21; Eph. 5:22–6:9) as well as over their destinies. Hence His coming results in doom for those who reject Him (e.g., Jn. 5:22; 8:16; 12:47; Rom. 8:3, 34), because apart from Him there is no effective help against the hostility of the cosmic forces (e.g., Jn. 6:68; Acts 4:12; Gal. 4:6-9; Col. 2:8, 15).

Protestant exegesis has often stressed the atonement as the only objective of Christ's ministry and the exclusive basis of His messianic dignity. To the early Church, however, both the miracles and the resurrection of Jesus were conclusive evidences of His messiahship because they revealed Him as the Lord of the universe (e.g., Rom. 8:18-23, 31-39; cf. Col. 1:15-20). In turn, however, the NT has no Christology that confines the messianic office of Jesus to His fight with and triumph over the evil forces of the universe, as Aulén contended (*Christus Victor* [Eng. tr. 1937]).

Having experienced the power of the risen Christ over their lives, believers like Paul and John concluded that in contrast to the transitory and corruptible natural life, they had been endowed with a never-ending and divine life (e.g., Jn. 3:15; 20:31; Rom. 5:17; 6:23; 2 Cor. 4:10). Christ's lordship would manifest itself in that in and through Him the believers were used as the instruments through whom God transformed this world into His kingdom (e.g., Jn. 6:5; Rom. 5:17; Col. 3:4; Rev. 5:10). The weaknesses and shortcomings of believers were no obstacle to the full deployment of God's saving power.

Although the Synoptic description of Jesus' messiahship might have seemed strange to the apostles' contemporaries, it was nevertheless rooted in the OT and thus compatible with orthodox Judaism. John and Paul, however, proclaimed an entirely novel Messiah. The reason is to be found in their specific experience. Their encounters with the risen Lord had caused a powerful change in their self-consciousness that they could not account for as a merely mental process. They were reborn (Jn. 3:3) or created afresh (2 Cor. 5:17). As they proclaimed Christ, unexpected and extraordinary results became manifest in the lives of the people addressed. So radical was the transformation that they were constrained to ascribe it to the operation of Jesus' divine power in them.

Unlike the Jewish Messiah, who was thought of as an extraordinary human being who acted at God's behest, Jesus appeared to His disciples as the direct manifestation of God's redemptive will. John underlined this by making Jesus frequently use the formula "I am," which in the light of Ex. 3:14 was understood as authenticating the deity's presence on earth. In Paul's writing the title "Lord" (*kýrios*) had the same function. Regardless of the origin of the appellation *kýrios* in the early Church, Paul obviously understood the title as the LXX did, namely, as designating the divine power by which this world was being transformed toward its divinely appointed goal (e.g., Rom. 10:8f.; 1 Cor. 1:8; 10:22).

Although such a view of Jesus' messianic work transcended the understanding of the title "Son of God" as found in the Synoptic Gospels, it did not imply, as the Jewish critics contended, that Paul and John introduced a second deity in the manner of pagan Hellenism. Similarly, the Nativity narratives in Matthew and Luke do not describe the birth of a new god but are rather intended to make clear that in the person of Jesus, the Son of God has identified Himself with the historical predicament of mankind. Thus these apostles emphasized that whatever the Son has was given Him by the Father (Jn. 3:35; Col. 1:15f.) and that the Son's authority rested upon His having been "sent" by the Father (Jn. 5:23f.; Acts 3:26; Rom. 8:3). Though Christ participated in the work of creation, the world was not made by Him. Rather, through Him (*diá* with gen.) as mediator all things were related to each other (Jn. 1:3; 1 Cor. 8:6; Eph. 4:12-16), i.e., through Him they received their meaning and value, because through Christ's work God accomplished the harmony of all things (*eis autón*, Col. 1:16). In contrast to the Father's invisible power of creation stands Christ's redemptive manifestation in this world.

D. Proof from Scripture. The messianic titles given to Jesus did not exclusively depend on the experience of the apostolic generation. In addition to the hints given by Jesus Himself, the early Church also turned to the OT.

A Messiah whose life and work would not be in agreement with God's promises to His people could not be accepted as God's appointed agent. The first Christians were strengthened in their belief in Jesus' messiahship by the fact that His ministry and its outcome proved to be the fulfillment of the Scriptures. This feature is most conspicuously expressed in 1 Cor. 15:3f., where Paul, quoting oral tradition, twice added "in accordance with the Scriptures." The scribes and rabbis also took an active interest in Scripture but emphasized the correct interpretation of the Law much more than the predictions found in the Prophets. They believed in the inspiration of the Scriptures but did not infer from them a system of messianic thought. They were satisfied with quoting a few OT statements about birthplace, family, and work of the coming Messiah in order to check the rank growth of popular expectations and apocalypticism.

Scriptural exegesis differed in Christian circles. To rebut the Jewish rejection of the messianic claim made for Jesus, the early Church deemed it necessary to prove that theirs was not a self-styled Messiah, let alone that He had been raised to messianic dignity by the acclaim of His followers. The Church argued that the Scriptures offered proof that Jesus had been sent by God, since His ministry fulfilled God's requirements for His Savior. The NT refers, e.g., to the scriptural character of His birth in Bethlehem (Mt. 2:1-6; Lk. 2:4), to His descent from David (Rom. 1:3), and to His mission to the Jewish people (Gal. 4:4f.). Only people who considered the OT a divinely inspired book, i.e., the Jews, found the proof from Scripture meaningful and valid. It is therefore arbitrary and gratuitous to contend that the early Church used the OT to invent stories about Jesus and then presented those "facts" as fulfillment of OT promises and predictions. Quite apart from the absurdity of establishing faith on self-fabricated legends, this hypothesis makes no sense historically, for Palestinian Jews would have easily refuted such fictions. Extant Jewish literature shows on the contrary that the Jews of the 1st cent. A.D. accepted the Gospel record in principle. Judaism questioned only the Christian contentions that Jesus was the Messiah and that God had been directly at work in the ministry of Jesus.

A novel exegetical feature introduced into Scripture exposition by the early Church was typology. It consisted in the parallel arrangement of certain OT features and the person and ministry of Jesus, e.g., Adam and Christ (Rom. 5:12-21; 1 Cor. 15:45f.), the mission of Moses in the wilderness and that of Christ (1 Cor. 10:1-6), and Moses and Christ as legislators (Jn. 1:17; 6:32-35). The underlying idea is that since God does not change, neither does the goal He set for this world. Specific characteristics of the manner in which God moves this world can therefore be recognized in the similarity of types. Yet since in all His doings God aims at a future objective, the final realization is infinitely greater and more marvelous than all the preceding phases. Typology was another way of showing that the providential role and heavenly dignity that the disciples ascribed to Jesus was more than a subjective evaluation even though based upon their experience, for that experience was confirmed by God's own Word. The Bible showed that as the fulfiller of the OT Jesus occupied the supreme and final place in holy history. The similarities proved that Jesus' ministry fulfilled and surpassed what the OT had predicted of the Messiah. This "much more" of the final stage (e.g., Rom. 5:9f., 15, 17) denies the contention that the disciples applied contemporary Jewish messianic expectations to Jesus. It is obvious that already in the Synoptic Gospels the portrait of Jesus by far surpassed that of a Jewish Messiah.

Closely related to typology was the spiritualization of the OT. This device was used, e.g., in interpreting the effect of Jesus' messianic power as an atoning sacrifice (e.g., Lk. 24:20; Jn. 1:29; Rom. 3:25; Eph. 5:2; Col. 1:20; He. 2:15; 1 Pet. 1:18; Rev. 5:6). In God's dealing with His chosen people, Jesus occupies the place that under the old covenant was assigned to the cultic sacrifices. This spiritualization had nothing in common with the apocalyptic extolling of the Messiah in popular Jewish expectation nor with Philo's allegorical interpretation of the OT sacrifices. Jewish apocalypticism had formed an idea of the Messiah that grossly and fantastically magnified Jewish kingship ideology. Philo, in turn, had attempted to rationalize the OT institutions, treating them as allegories of mankind's spiritual powers. Quite differently, the Christian exegetes recognized the redemptive purpose of God imparting meaning to the OT sacrifices. They contended, however, that the institution had a limited and provisional significance. The history of God's revelation had demonstrated that the personal approach to Him must take precedence over the institutional approach (Mt. 9:13; Acts 7:45-50; Rom. 12:1; 1 Pet. 2:5). The early Church saw in the death of the Messiah the disclosure of the profoundest mystery of God's redemptive purpose, which Jesus had intimated to the Twelve in the Last Supper (Mk. 14:24 par.). That in spite of this spiritualizing tendency the Christians nevertheless should have called Jesus by the Jewish title "Messiah" or "Christ" was due to the spiritualization that the concept had already undergone in exilic and postexilic times, and also to Jesus' determination to interpret His ministry in agreement with the spiritual purpose of God's past works.

Quite apart from typology and spiritualization, the early Christians' searching of Scripture made them adopt a new perspective in their exegesis. Jesus had taught His disciples that what made Jewish history worth remembering was that in it God's redemptive will was being disclosed. The future of the Jewish nation, though closely connected with that process, was nevertheless not its final goal. Consequently, the early Christians attempted to learn from the OT how God, in sacred history, had prepared trends that the Messiah would bring to completion (e.g., Jn. 1:45; 12:38; 1 Cor. 2:9; Gal. 3:8). The Gospel of Matthew is particularly fond of such perspectival or "christocentric" interpretation of the OT, probably because in addressing a Jewish audience it would support the Church's proclamation that Jesus was the Christ. The proof from Scripture meant more than that OT predictions had come true in Jesus' ministry; the events of Jesus' life were thereby shown to carry finality. Judaism had never been quite certain about the function of the "age of the Messiah." (Would the period of final bliss foretold by God coincide with the reign of the Messiah, or would the blessings of the "age to come" surpass those of His reign?)

The early Church had no doubt about the finality of Jesus' work. Since Judaism had never completely cast off the circular view of history inherited from Babylon, sacred history was identified with the restoration of earlier conditions, e.g., the reign of David or the bliss of Adam's Paradise. The apostolic congregation, however, adopted their Master's teleological eschatology. They consequently saw Jesus' messianic work as infinitely greater than the whole past of Israel and Jesus as surpassing in dignity all of Israel's outstanding men, whether Adam (e.g., Rom. 5:15), Moses (Lk. 11:31; Jn. 1:17; 7:22), or David (Mt. 13:3; Mk. 12:35 par,; Acts 2:29-36). Everything in the OT was understood as merely provisional, a promise, seed, or sign of the definitive redemption ushered in by Christ. Hence, in exegeting the OT the NT writers looked for the

hidden teleology of teachings and events. In 1 Cor. 9:9, for instance, Paul pointed out that the commandment not to muzzle the threshing ox (Dt. 25:4) implies a principle applicable to all who work for the benefit of others, including the messengers of the Christ. No circular reasoning is implied in this kind of exegesis. It was based upon two premises: first, that the work of Jesus had offered deliverance from all evils and thus would never be surpassed; second, that through Jesus the very purpose of the OT had been revealed to His disciples (e.g., Lk. 24:32; Jn. 5:46f.; 1 Cor. 1:24, 30; Col. 2:3). The very existence of the OT was for the followers of Jesus the evidence of God's willingness to make Himself known to mankind. As a result human beings not only can transcend their natural limitations but also can avail themselves of God's power to free themselves from the bondage of cosmic forces.

The OT's role in the early history of Christology has recently been interpreted as though the followers of Jesus had arbitrarily and recklessly read their ideologies into the OT text. It is not surprising that this impression was formed. The Messiah whose picture the primitive Church found preformed in the OT was indeed different from what Jewish exegesis and positivistic Christian scholarship discover in the OT. But the exegetical differences do not result from an unscientific and dogmatic approach to the OT as contrasted with a scholarly and unprejudiced one, but rather from different underlying views of history. Jewish and later Christian exegetes regarded history as the self-explanatory, gradual deployment of an initial urge or the constant modification of its substance, whereas the NT writers held that apart from an absolute goal history remains ambiguous and perplexing. The ministry of Jesus indicated to the apostles that by the will of God the world process was drawing to its goal. As God's own work, the coming of Jesus was an eschatological event, namely, the apex of history (Gk. *syntéleia toú aiónos*, He. 9:26; cf. Mt. 13:39f.; 24:3). Like Jesus, His apostles were convinced that Judaism had become the slave of the letter of the OT law (e.g., Jn. 5:46; Rom. 7:6; 2 Cor. 3:6; cf. Mt. 11:10; Mk. 14:27; Lk. 10:27-37) and thus had failed to realize that Jesus was nothing less than the mighty agent and final revelation of God's redemptive purpose. Conversely, Jesus was for His followers the Lord of Scripture, to whose redemptive power all subsequent revelation would bear witness (e.g., Rom. 16:25-27; Eph. 3:20; Col. 2:3).

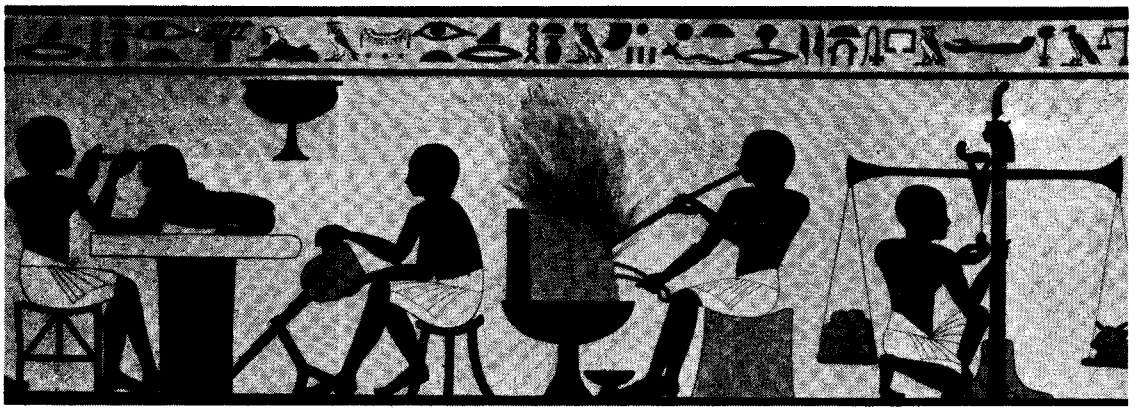
METAL [Heb. *massēḳâ*] (Hab. 2:18); AV MOLTEN; NEB "image"; **METALLURGY.**

I. Terminology
II. Metals in Ancient Palestine
III. Description and Definition of Metallurgy
IV. Metallurgical Language in the Bible
V. Metallurgical Discoveries from Ancient Palestine

I. Terminology.—In its only occurrence in the RSV (Hab. 2:18) "metal" is an adjective describing an idol shaped by human hands. The term it represents, Heb. *massēḳâ* (<*nsk*, "pour out"; cf. Isa. 40:19; 44:10), is usually translated "molten" (so AV; see RSV Ex. 32:4, 8; 34:17; Lev. 19:4; Nu. 33:52; Dt. 9:16; Neh. 9:18; Isa. 30:22) although twice, on the basis of context, the RSV translates it "molten image" (2 K. 17:16; Ps. 106:19). A noun (*neseḳ*) from the same root is used of a molten image in Isa. 41:29; 48:5; Jer. 10:14; 51:17. Two other Hebrew words, *mûṣāq* and *mûṣāqâ*, are used for castings of metal (1 K. 7:16-27; 2 Ch. 4:3). These passages refer to capitals of molten bronze for the tops of pillars and for other accoutrements in the Solomonic temple. The use of *mûṣāq* is more obscure in Job 38:38, which refers to dust clodding into a "mass" as a result of rains, perhaps like a bloom of metal gathering in a refining FURNACE.



II. Metals in Ancient Palestine.—Ancient Palestine was never known for its variety or quantity of mineral resources. The one exception is stone, of which there is an abundant supply for construction purposes, including limestone, sandstones, granites, and basalt. Metal-bearing ores, however, are present sparsely and only in portions of the country. Transjordan has ancient sources of iron ore, especially in the Gilead ('Ajlûn) region N of the Jabbok (Zerqā) River and in the Wâdī Feinan region E and S of the Dead Sea. Copper ores are found both E and W of the Arabah between the Dead Sea and the Gulf of Aqabah. Dt. 8:9 recognizes the presence of these ores in describing Canaan as "a land whose stones are iron, and out of whose hills you can dig copper" (*see* MINE).

Despite the paucity of ancient resources, biblical references to metals are rather frequent. They are allusive, however, and a few passages refer to the processes by which metals are produced (see REFINE; SMITH; SMELTING).

The significance of metals for Palestinian antiquity is demonstrated by the fact that researchers designated the cultural shifts from age to age by means of the principal metal in use; e.g., the Chalcolithic (copper-stone Age, *ca.* 4000-3150 B.C.; the Early Bronze Age, *ca.* 3150-2200; the Middle Bronze Age, *ca.* 2200-1500; the Late Bronze Age, *ca.* 1550-1200; the Iron Age, *ca.* 1200-300. (For the period after *ca.* 300 B.C. historians and archeologists use historical/cultural designations, e.g., Hellenistic, Roman, Byzantine, Islamic.) This practice of dividing world history according to metals is probably of Iranian origin, but it is found biblically in Dnl. 2:31-45, where successive ages are designated gold, silver, bronze, and iron (so also in the Avesta, Buddhist doctrine, Hesiod, and even in Plato's *Republic*).

Recent textual and object evidences for metals have come from Tell Mardikh (Ebla), dating from as early as 3200 B.C. The excavated objects include a ceremonial hammer of gold and silver, and pictures in bas-relief attached to wooden frames by means of copper pegs; some of the wood frames are overlaid with gold. A burial site named "Tomb of the Lord of Goats" shows evidence of a goldsmith's art.

The Ebla texts seem to indicate the existence of a guild or caste of smiths. They also mention tin, which was probably brought overland from northeast Iran, and quite specific quantities of precious metals brought to Ebla or stored at Ebla (e.g., bronze, 77 bars; gold, 100 bars; silver, 840 bars). There are a few not-yet-clarified references to the metallurgy of bronze. The letters also mention the use of silver for payments to state officials and judges and for

Reconstruction of an Egyptian wall mural of metalworkers who (from right to left) weigh out metal, smelt and hammer copper, and chisel a golden sphinx (Royal Ontario Museum, Toronto)

demonstrating the value of cattle. The Kingdom of Mari apparently paid tribute to Ebla in quite large quantities of silver and lesser quantities of gold.

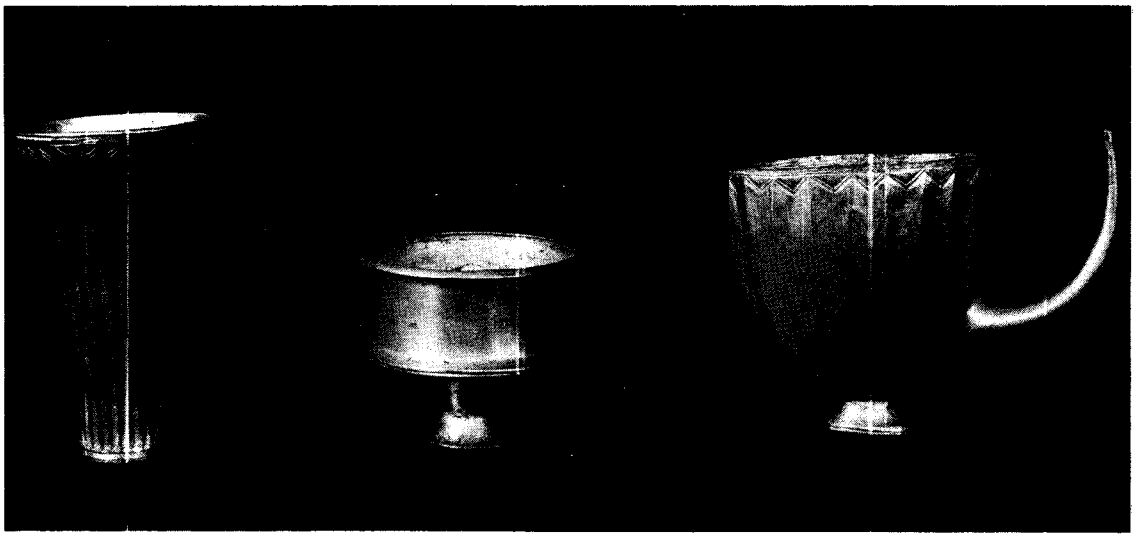
For metals mentioned in biblical texts, *see* BRASS; BRONZE; COPPER; GOLD; IRON; LEAD; SILVER; TIN.

III. Description and Definition of Metallurgy.–Metallurgy is the art or science of separating metals from their ores, of making or compounding alloys, and of working or heat-treating metals to give them certain desired shapes or properties. "Today, metallurgy would be described as the science of metals, but up to the 18th century, it was only concerned with the practice of metallurgy, which consists of the traditional methods of smelting, melting, and working of metals" (Tylecote, p. ix). The stages in the development of metallurgy are characterized by many processes and methods, a complex of discoveries and inventions. Forbes describes four stages in this development. (1) Native metals e.g., copper, gold, silver, and meteoric iron were simply collected as stones and used as they were found. (2) The native metal stage came when it was realized that these "strange stones" had individual properties, that they could be reshaped by heating, and that they held their shape when cooled. There arose a complex of treatments including hammering, tempering, cutting, and grinding. (3) The ore stage came when it was discovered that ores could be reduced and the resultant metal could be melted and cast. The methods associated with this stage are casting, welding, and soldering. The manufacturing of alloys is placed in this stage. (4) The iron stage, roughly corresponding to the Iron Age, is described in terms of its methods of treatment: tempering, quenching, and annealing (Forbes, VIII, 8f.).

IV. Metallurgical Language in the Bible.–A. Persons. Tubal-cain (Gen. 4:22) is known as the prototype of all smiths and as the father of metallurgy. The "cain" (Heb. *qayin*) portion of the name is probably a personification of the KENITE tribe. Since Arab. *qayn* means "smith", it is likely that the name Kenite comes from the tribe's use of copper and iron ore in the Arabah. Moses' marriage to the daughter of Hobah the Kenite (Nu. 10:29; Jgs. 4:11) suggests a connection of Israelites with the craft of bronze metallurgy.

The name of Barzillai the Gileadite (2 S. 17:27) is obviously related to Heb. *barzel*, "iron." His importance to David might be associated with the Davidic exploitation of the Gilead iron mines and smelting sites. Solomon brought Hiram from Tyre to do the bronze work for the temple (1 K. 7:13-47). Hiram's father (1 K. 7:14) is also called a "worker in bronze."

The Bible employs general terms for metalworkers of various sorts, e.g. artisans (Jer. 52:15), or craftsmen and smiths (2 K. 24:14, 16; Jer. 24:1; 29:2). The Bible also mentions silversmiths (Jgs. 17:4; Acts 19:24), goldsmiths (Isa. 40:19), a goldsmith's guild (Neh. 3:8, 31f.), and an ironsmith (Isa. 44:12).



B. Processes and Techniques. The Bible alludes to a large number of metallurgical processes and techniques. Many of these must be inferred from the adjectives describing particular products, e.g., "hammered" gold or "molten" idols, or from verbs demonstrating activities such as refining, smelting, melting, overlaying. In addition to refining (*see* REFINE), SMELTING (and melting), and SOLDERING, the Bible knows of forging (*see* FORGE), casting, beating (or hammering), overlaying, burnishing (or polishing), whetting, and cutting. Other known techniques for the handling of metals are not mentioned at all, e.g., tempering, welding, quenching, annealing, and grinding (the verb is often used but never in connection with ores or metals).

The forming of molten metal into particular shapes by pouring it into molds must have been well known in Palestine as early as the 10th century B.C., judging from the numerous references to images, idols, and gods. Many passages refer to casting with gold (e.g., Ex. 25:12; 37:13), silver (e.g., 36:36; 38:27), and bronze (e.g., 26:37; 38:5); but none of these describes the process.

Beaten (i.e., hammered) silver or gold is mentioned in many passages (e.g., 1 K. 10:16f. par. 2 Ch. 9:15f.; Jer. 10:9). References to swords being beaten into plowshares (Isa. 2:4; Mic. 4:13) and plowshares into swords (Joel 3:10 [MT 4:10]) imply that there were those who could accomplish the task. Of the passages that mention hammering as a method (cf. Ex. 25:18, 31, 36; 37:7, 17, 22; Nu. 8:4; 16:38) Ex. 39:3 is especially important, for it describes how gold sheets were hammered out thin enough to be cut into threads to be woven into Aaron's linen ephod. Two of the three Hebrew nouns for "hammer," *maqqāḇâ* (Isa. 44:12) and *paṭṭîš* (41:7), are used in shaping metals. The plural form in 44:12 suggests that several hammers were used for various stages of the process.

Another technique, overlaying objects with precious metals, is indicated some forty-seven times in the OT by the intensive form (piel) of *ṣāpâ* (e.g., 1 K. 6:20, 35; 2 K. 18:10; 2 Ch. 3:10; Ex. 24:11; 26:19, 32; 38:5, 27). Most likely the process involved hammering out the metal and then fastening it with pegs or nails to various forms — frames, idols, and occasionally even walls and doors.

Burnishing to smoothness is a technique well known in

Gold cups from Ur (*ca.* 2700 B.C.). From left to right: long fluted cup, chalice, fluted cup with spout (University Museum, University of Pennsylvania)

both ceramics and metallurgy. The polishing of metal objects by friction was known as early as the Bronze Age and continued into the later biblical periods (cf. "burnished," niphal part. of *mārat*, 1 K. 7:45; pass. part. of *māraq*, 2 Ch. 4:16; *qālāl* Ezk. 1:17; Dnl. 10:6; "burnished bronze," Gk. *chalklíbanon*, Rev. 1:15; 2:18).

The whetting or sharpening of metal weapons and implements is referred to several times. To "whet" (Heb. pilpel of *qāla'*) an iron implement requires wisdom as well as strength (Eccl. 10:10). Two other terms are used for sharpening. 1 S. 13:19-21 says that the Israelites did not possess the metallurgical technology even to sharpen (*lāṭaš*) plow points, axes, and mattocks (cf. Ps. 7:12 [MT 13]. Other passages use the verb *šānan* for sharpening a sword (Dt. 32:41), arrows (Isa 5:28), and (metaphorically) the tongue (Ps. 64:3 [MT 4]). In none of these passages, however, is the technique described.

The only passages referring to the cutting of metal are Ex. 39:3 (the cutting of hammered gold sheets) and 2 K. 24:13 (the cutting of vessels already formed and in use). The implement used (probably shears or saw) is never named.

C. Objects. The Bible mentions various tools and utensils used in the manufacturing or shaping of metal, including the BELLOWS, FORGE, FURNACE, CRUCIBLE, HAMMER, ANVIL, and TONGS. Tongs made of gold are mentioned in 1 K. 7:49 par. 2 Ch. 4:21, and tongs of unspecified manufacture and use are well known from Isaiah's call/vision (Isa. 6:6).

A great variety of metal objects receives mention in the Bible. Such objects were used, e.g., in temple and architectural materials, as weaponry, as idols, for ornaments, and for agricultural implements.

D. Figurative Use. In all sections of the Hebrew Bible and at all periods of biblical history, metals and metallurgical processes are referred to figuratively. The smith at work illustrates diligence and skill (Sir. 38:28; cf. Isa. 44:12). Mining for hidden ore is compared to the search for inacessible widsom (Job 28:1). GOLD and SILVER were symbols of wealth (e.g., Job 3:15; 22:25; 27:16; 28:15, 17; 31:24f.; Isa. 60:17; Zec. 9:3). Refined silver symbolized the purity of God's promises (Ps. 12:6 [MT 7]). The corrosive deterioration of silver and other metals into dross is a metaphor for a people's unfaithfulness and impurity (Isa. 1:22; Jer. 6:29f.; Ezk. 22:18-20), while the refining process (esp. for silver or gold) is a metaphor for the testing and purifying of God's people (Ps. 66:10; Isa. 48:10; Jer. 9:7 [MT 6]; Zec. 13:9; Mal. 3:2f.; cf. Prov. 17:3; 27:21; 1 Cor. 3:12f.; 1 Pet. 1:6f.). IRON can be used as a simile because of its hard and unyielding property (e.g., Lev. 26:19), proverbially, "iron sharpens iron and one man sharpens another" (Prov. 27:17). Alternately iron may be a symbol of strength (e.g., Jer. 1:18) or oppression (28:13).

V. Metallurgical Discoveries from Ancient Palestine. *A. The Chalcolithic Period.* Several excavated sites from this period yield information on metallurgical processes and products. The sites are Teleilât el-Ghassûl in southeast Jordan across the valley from Jericho (first half of the 4th millennium B.C.), Abū Matar near Beer-sheba (*ca.* 3500 B.C.), Beer-sheba and Kefar Monash (*ca.* 3300 B.C.), Jericho (*ca.* 3200 B.C.), and Timna' in the southern Negeb (near the end of the 4th millennium B.C.).

Timna''s site 39 disclosed a rock-hewn bowl-type smelting furnace 50 cm. (20 in.) across by 40 cm. (16 in.) deep with the air probably blown by a bellows. Most likely the slag was broken up after removal from the furnace in order to recover copper pellets still embedded in it. The copper recovered from this furnace was found to be impure, low in arsenic, and typical of the oxide ore deposits of the region. A crucible furnace was also found at Timna' constructed of square stone boxes within which four stone slabs had been set into the ground.

The earliest known crucible furnace is located at Abū Matar near Beer-sheba. This type of circular furnace had a diameter of 30-40 cm. (12-16 in.) with vertical walls 3 cm. (1 in.) thick and about 12-15 cm. (5-6 in.) high. Crucibles made of gray clay mixed with straw are oval shaped with rounded bottoms 11 by 8 cm. (4 by 3 in.) outside and about 7 cm. (3 in.) deep inside. Abū Matar also produced the first known copper workshop. Archeologists uncovered malachite ores, flint anvils for breaking the ore, fireplaces with metal slag and vessels for pouring and casting the copper, in addition to axes, chisels, awls, and mace-heads (Aharoni, p. 42).

Other artifacts from this period include a cache of objects found in "The Treasure Cave" at Mishmar about 10

Bronze and electrum axe inscribed with the name of the Elamite king Untaš-Ḫumban (*ca.* 1285-1206 B.C.) (Louvre; picture M. Chuzeville)

km. (6 mi.) SW of En-gedi on the west side of the Dead Sea. Of the 429 objects uncovered, most were copper cultic artifacts, including mace-heads, tubes, and crowns (Aharoni, p. 45); these were composed mainly of arsenical coppers (1.92-12.0% As) with strong traces of antimony and silver (Tylecote, p. 9). Other objects included a staff-head from Beer-sheba, axes, a chisel, and a saw from Kefar Monash, and awls and axes from Ghassul. Thus the earliest Palestinian copper objects were mainly cultic in use and date from *ca.* 3200 B.C.

B. Bronze Age. Bronze Age sites in Palestine are too numerous to cite all the findings. Generally, while copper continued to be used, bronze in abundance replaced copper and new types of weapons, vessels, and ornaments appeared. The Egyptian inflence on bronze metallurgy is well attested.

For details of furnace technology the sites in the Negeb are most productive. Dating from the 14th-12th cents. B.C., the Timnaʿ furnaces have furnished much information about metallurgy in this period. Dug into the sandy soil, they are roughly cylindrical in shape, about 60 cm. by 60 cm. (24 by 24 in.). Ground was cut away in front to give access for the tapping of slag. The furnace was blown through inclined tuyeres of unusual form. Tuyeres (i.e., ceramic tubes, often flanged to admit a bellow's nozzle, through which air was forced into the furnace) were found with holes about 2 cm. (0.8 in.) in diameter. Discovered near the furnaces were slag discs (about 50 kg., 110 lbs.) with a central hole. The bowl is lined with a limey cement (Tylecote, pp. 30f.). The presence of this copper smelter in Bronze Age Timnaʿ demonstrates clearly that copper continued to be used during this period and serves as a reminder that all archeological terminology is general and schematic (Aharoni, p. 35).

Among the other significant sites is Hazor. Here a workshop for bronze was uncovered, in which was found a ritual standard of bronze covered with gold. Documents at Hazor include a receipt for large quantities of tin for use in the manufacture of bronze (Aharoni, p. 101). Beth-shemesh (Stratum III), about 19 km. (12 mi.) W of Jerusalem, had bronze ovens and furnaces. Archeologists found at Tell Harashim a room that served as a copper and bronze workshop, containing a kiln, ovens, benches, and vessels (Aharoni, p. 160). Wâdī Feinan in south Jordan, yet to be excavated, shows remains dating probably to 2000 B.C. At Metsamor two types of smelting furnaces dating to the 2nd millennium B.C. were found by Russian archeologists in 1956-1965.

Some of the artifacts from the Bronze Age deserve mention: from Timnaʿ a copper snake in the L.B. Egyptian temple (sometimes called the Hathor temple; Hathor was the Egyptian goddess of mining); from Nahariyah, a town near the Israel-Lebanon border, a mold for bronze figurines from M.B. II.B; from Shechem, a bronze Egyptian sickle sword; from Meggido, a cache of bronze implements and ornaments from tombs in Strata VII A and VI: from Kefar Monash, metal weapons and tools; from Maʾborot, a fenestrated bronze axe; from Tell Beit Mirsim, an adze-head and a mace-head.

C. Iron Age. It is generally believed that the Iron Age began in Asia Minor *ca.* 2000 B.C. The Hittites held a monopoly on iron in the 14th-13th cents., after which the products and technology were disseminated throughout the ancient Near East. Iron materials began to be used in Palestine in the 12th and 11th cents., but iron findings are much more rare than previously thought (see Dothan, pp. 91f.). Iron was first used as jewelry and then for daggers, knives, and other implements. A table of the distribution of iron from twenty-one sites in Palestine shows few thirteenth-century findings and far greater volume in the 11th cent. B.C. (Y. Baumgarten in Dothan, p. 92). Probably too much has been made of the Philistine monopoly on iron that David broke when he came to power: too little is known about the industry in the Davidic period to be conclusive.

Iron Age metallurgical centers include the Timnaʿ mining and smelting camps and four other ARABAH sites: Meneʿiyyeh, Khirbet en-Nahas, Khirbet el-Gheweibeh, and Khirbet el-Jariyeh. A building at Tell el-Kheleifeh was originally interpreted by N. Glueck to be a large copper smelter of the Solomonic era, making this site the "Pittsburgh of ancient Palestine." It is now known, however, that the building was not a copper smelter. The ruins date as early as Chalcolithic and as late as Roman; the site was used in the 13th cent. and first half of the 12th cent., but not in the Solomonic period. Iron workshops have been found at Tel Zeror in the plain of Sharon and at Tell Jemmeh, 10 km. (6 mi.) S of Gaza. At Tell Jemmeh a number of smithing furnaces dating between the 12th cent. and 870 B.C. have been found. Metal-working forges have been found in the Jordan Valley at Tell Deir-ʿallā (biblical Succoth) and at a site just a few kilometers farther south. Tell el-Mazâr, ʿAin Shems, et-Tell (Ai), and Tell el-Qasîleh also had furnaces. Artifacts of iron have been uncovered at Tell el-Fârʿah, at Tell el-Fûl, and in large quantities in ninth- and eighth-century Ashdod. An iron mine with an associated smelting operation was found at Mughâret el-Wardeh in Gilead (ʿAjlûn), but the evidence is mainly medieval (A.D. 1185-1450). Iron artifacts found at this site include knives, sickles, an iron plow blade, bracelets, rings, toggle-pins, arrowheads, lance heads, spearheads, swords, axes, chisels, pins, hooks, nails, needles, and tweezers.

R. A. COUGHENOUR

METE. To measure, either with a utensil of dry measure (e.g., AV Ex. 16:18; Lk. 6:38 par.) or with a measure of length (e.g., AV Ps. 60:6 [MT 8]; 108:7 [MT 8]; Isa. 40:12).

The RSV uses "mete out" only in Job 28:25 (AV "weigh"; NEB "measure out") to render the Heb. piel of *tāḵan*, which here means "determine the measure of" (*CHAL*, p. 390). *See* MEASURE; PORTION.

In Isa. 18:2, 7 the AV renders "meted out" for Heb. *qaw-qāw*, based on the usual meaning of *qāw* ("measuring line"; cf. *qaw lāqāw*, 28:10, 13; AV, RSV, "line upon line"). The meaning of the Hebrew is obscure. Some scholars have understood it as a cognate of Arab. *qūwa* ("strength"; cf. RSV "mighty"; NEB "strong"). KD suggested the translation "command upon command," i.e., "a commanding nation." In any case, the context indicates that the prophet is describing a powerful nation that subdues other nations — not one that is "meted out and trampled down" (AV; see comms.). N. J. O.

METERUS mə-tē'rəs (1 Esd. 5:17, AV). *See* BAITERUS.

METEYARD mēt'yärd. Archaic for "measuring rod" in Lev. 19:35, AV, translating Heb. *middâ*, "measure, measurement" (RSV "measures of length").

METHEG-AMMAH me-theg-am'ə, meth-eg-am'ə [Heb. *meṯeg hā'ammâ*–'bridle of the mother-city'; Gk. *hē aphōrisménē*]; NEB METHEG-HA-AMMAH; cf. RV "the bridle of the mother city." Apparently a place taken from the Philistines by David (2 S. 8:1), although no such site is known. The parallel passage (1 Ch. 18:1) reads differently: "David . . . took Gath and her daughters [i.e., her surrounding towns]." To "take the bridle" in Eastern idiom means to "take control of"; the meaning then would be that David took control of Gath and its metropolitan area. The Philistines, however, had no single metropolis; Gath was but one of five chief cities. The text is difficult, and the JB (as the NEB) leaves the expression untranslated, with the comment that it is unintelligible. See S. R. Driver, *Notes on the Hebrew Text and Topography of the Books of Samuel* (2nd ed. 1913), pp. 279f.

F. WEDDLE

METHUSAEL mə-thōō'sə-el (Gen. 4:18, AV). *See* METHUSHAEL.

METHUSELAH mə-thōō'sə-lə [Heb. *mᵉṯûšelaḥ*; Gk. *Mathousala*]; AV also MATHUSALA (Lk. 3:37). Son of Enoch and father of Lamech (Gen. 5:21-27; cf. 1 Ch. 1:3; Lk. 3:37).

The meaning of "Methuselah" is debated. If one assumes a Semitic background for the name, the first element, *mᵉṯû*, should mean "man (of)" (cf. Akk. *mutu*, Ugar. *mt*, Egyp. *mt*, and Heb. *mᵉṯîm* [a pl. form]; proper names with this element are common in Amorite as well; see H. Huffmon, *Amorite Personal Names in the Mari Texts* [1965], pp. 119f., 134f.).

But scholars disagree about the etymology of the second element, *šelaḥ*.

(1) The traditional view, still held by many, understands *šelaḥ* as the Hebrew word for "javelin," hence "javelin man" (i.e., referring to the inventor of, or expert with, the javelin).

(2) Others relate *šelaḥ* to the general meaning of the root, "send," hence, "man of sending," or "a sent man." Such an interpretation comports well with the prophetic cast of Gen. 5 (see below).

(3) According to some (e.g., *CHAL*, p. 372), *šelaḥ* can also mean "canal." On this view, a person would have been so named because he came from such a place, or possibly invented or improved this form of irrigation.

(4) A. van Selms divided *šelaḥ* into *šᵉ*, a relative particle meaning "who," and *laḥ*, which he takes as the name of a Semitic deity. But the use of *šᵉ* in such a name is elsewhere unattested (Tromp, p. 149), and it is by no means clear that a deity named *laḥ* existed (as Fensham admits).

(5) Similarly, M. Tsevat took *šelaḥ* as the name of a deity associated with a canal or river of judgment in the netherworld — hence "man of *šlḥ*" (cf. the Ugaritic and Amarna name *mtb'l*, "man of Baal"; cf. also the Phoenician name *'bšlḥ*). But *šlḥ* is nowhere directly attested as a divine name; thus this proposal must remain conjectural.

Various attempts have been made to account for the astounding longevity and fertility of Methuselah and the other early Sethites (*see*, e.g., ANTEDILUVIAN PATRIARCHS). M. G. Kline suggested that the governing interest in Gen. 5 is a contrast between Sethites selected for their prophetic witness and the apostate Cainites in Gen. 4:17-24 and 6:1-8. Evidence for this prophetic cast is most obvious in the prophetic ministry of Noah as the climactic descendant, but apparent also in the prophetic imagery implied in the description of Enoch as one who "walked with God" (cf. Kline, *NBC*, p. 87; *Images*, p. 102). Anticipating the later prophet Elijah, Enoch too was translated, and so was supernaturally spared from death. In the context of Gen. 5 the unusual longevity of Methuselah and the other Sethites perhaps conveys miraculous interventions suited to the prophetic ministry of these individuals, who would have been concerned to address the self-made immortality of the Cainites (Gen. 4:17, 23; 6:4).

On the selective nature of the genealogy, *see* GENEALOGY II.

See also METHUSHAEL.

Tsevat, *VT*, 4 (1954), 41-49; *IDBS*, *s.v.* 'Shalah (God)"; A. van Selms, "A Forgotten God: *Laḥ*," in *Studia Biblica et Semitica* (*Festschrift* for T. C. Vriezen, 1966), pp. 318-326.

G. P. HUGENBERGER

METHUSHAEL mə-thōō'shə-əl [Heb. *mᵉṯûšā'ēl*–'man of God'(?); Gk. *Mathousala*]; AV METHUSAEL. A descendant of Cain and ancestor of Lamech in the Cainite genealogy (Gen. 4:18). Some scholars (e.g., E. A. Speiser, *Genesis* [*AB*, 1964], pp. 35f.) assign the Cainite genealogy to one source or tradition (J) and the Sethite genealogy (Gen. 5) to another source (P), both stemming from one original tradition, and thus identify Methushael and Methuselah. Others (e.g., KD), however, note the differences in the genealogies and regard them as distinct (*see* ANTEDILUVIAN PATRIARCHS II). G. A. L.

MEUNIM mə-ū'nim; **MEUNITES** mə-ū'nīts.

1. [Heb. *mᵉʿûnîm*, *mᵉʿînîm* (1 Ch. 4:41 *K*); Gk. *Minaioi*]; AV also MEHUNIM(S) (2 Ch. 26:7); "habitations" (1 Ch. 4:41); [Heb. *ʿammônîm*; Gk. *Minaioi*] (2 Ch. 20:1); AV "Ammonites"; **MAONITES** mā'ə-nīts [Heb. *māʿôn*; Gk. *Madiam*] (Jgs. 10:12); NEB "Midianites." A hostile people, linked with the Amalekites and Zidonians, who at some unknown time oppressed Israel (Jgs. 10:12); also, a pastoral people attacked by Hezekiah (1 Ch. 4:41) and Uzziah (2 Ch. 26:7). They may have come from Ma'an, about 35 km. (22 mi.) SE of Petra on the ancient caravan route that led from Damascus to Mecca. The Alexandrian (LXX) translators seem to identify the Meunim with the Minaeans, Arabian tribes in southern Arabia (Hadramaut) that dealt in spices and incense. See *GTTOT*, § 164.

In 2 Ch. 20:1 the RSV, following the LXX, makes better sense than the MT (followed by AV), which seems to be redundant (see KD).

2. [Heb. *bᶜnê-mᵉʿûnîm*; Gk. *Maōnim, Meinōm*] (Ezr. 2:50; Neh. 7:52); AV also MEHUNIM (Ezra); [Gk. *hyioí Maani*] (1 Esd. 5:31); AV MEANI; NEB MAANI. A people mentioned in the official list of those who returned from exile (Ezr. 2:50; Neh. 7:52). They may be the descendants of prisoners taken in the wars of Jehoshaphat and Uzziah, who were given menial tasks in the service of the temple (*see* NETHINIM).Today Tell Maʿîn (Maon) is a small heap of ruins S of Hebron, and as in ancient times the surrounding territory is widely used as pasture for numerous flocks. F. E. YOUNG

MEUZAL mə-o͞o'zəl (Ezk. 27:19, AV mg.). *See* UZAL.

MEZAHAB mez'ə-hab [Heb. *mê zāhaḇ*–'waters of gold']. According to most versions, the father of Matred and grandfather of Mehetabel the wife of Hadar, one of the kings of Edom (AV, RSV, Gen. 36:39; 1 Ch. 1:50). The name may, however, denote a place (cf. NEB); some scholars have suggested that it may be identical with Dizahab (Dt. 1:1).

MEZARIM mez'ə-rim [Heb. *mᶜzārîm*]. *See* ASTRONOMY II.C.

MEZOBAITE mə-zō'bə-īt [Heb. *hammᵉṣōḇāyâ*]; AV MESOBAITE. The designation of Jaasiel, one of the "mighty men" in David's army (1 Ch. 11:47). The meaning is unknown. Possibly the MT should be emended to *miṣṣōḇâ*, "from Zobah."

MIAMIN mī'ə-min (AV Ezr. 10:25; Neh. 12:5). *See* MIJAMIN.

MIBHAR mib'här [Heb. *miḇḥār*]. According to 1 Ch. 11:38, the name of one of the "mighty men" of David's army. No such name, however, appears in the par. 2 S. 23:36, which reads "of Zobah, Bani the Gadite" in place of "Mibhar the son of Hagri." The 2 S. 23:36 reading is probably the original, with *miḇḥār* being a corruption of *miṣṣōḇâ* and *ben-hagrî* a corruption of *bānî haggāḏî*.

MIBSAM mib'sam [Heb. *miḇśām*].

1. A son of Ishmael (Gen. 25:13; 1 Ch. 1:29), and the name of an Arabian tribe (cf. Gen. 25:16, 18).

2. A descendant of Simeon; the father of Mishma (1 Ch. 4:25).

MIBZAR mib'zär [Heb. *miḇṣār*–'fortress']. An Edomite clan chief (Gen. 36:42; 1 Ch. 1:53). Eusebius identified Mibzar with *Mabsara*, a village subject to Petra in Northern Edom. Others have suggested Bozrah (v. 33; so *GTTOT*, § 393) or Petra itself.

MICA mī'kə [Heb. *mîḵā'*]; AV MICHA, MICAH; NEB also MICAH. A contracted form of MICAIAH.

1. A son of Mephibosheth and grandson of Jonathan the son of Saul (2 S. 9:12); called Micah in 1 Ch. 8:34f.; 9:40f.; *see* MICAH (3).

2. An Asaphite, son of Zichri (1 Ch. 9:15; Zabdi in Neh. 11:17; MICAIAH [5] son of Zaccur in 12:35); father of Mattaniah (11:17, 22) and ancestor of Uzzi, an overseer of the Levites in Jerusalem (v. 22), and Zechariah, a trumpeter at the dedication of the wall of Jerusalem in the time of Nehemiah (12:35).

3. A Levite who sealed the covenant with Nehemiah (Neh. 10:11 [MT 12]).

MICAH mī'kə [Heb. *mîḵâ*–abbreviated form of *mîḵāyāhû*, "who is like Yahweh?"; LXX *Michaias*; Vulg. *Michaeas*].

1. An Ephraimite and the central character of an episode given as an appendix to the book of Judges (Jgs. 17–18). Micah stole one thousand one hundred pieces of silver from his mother, but later confessed and returned the silver because of a curse she had pronounced on the thief. In gratitude she blessed Micah and gave two-hundred pieces of silver to have a graven and molten image crafted for him. Micah established a domestic shrine and appointed one of his sons priest, and his worship accessories included an ephod and teraphim. A Levite (Jonathan son of Gershom, son of Moses), from Bethlehem-Judah, soon replaced Micah's son as priest in exchange for room, board, clothing, and wages. The Levite gave a favorable oracle to five Danites who were seeking a new home; they later returned with an army of six hundred, confiscated the ephod and teraphim, and enlisted the Levite as their priest in Laish. Micah protested and pursued the Danites, but was helpless in the face of their superior strength, and he returned home empty-handed. Micah's graven image thus became the focus of the well-known cultic center in Dan.

While scholars agree that the account in Judges is an ancient record of the traditions behind the origin of the Danite shrine and has great value historiographically and for the study of early Israelite worship, the exact nature and purpose of the narrative remain topics of debate. The story certainly has etiological significance, since it seeks to explain the origin of the Danite cult and priesthood, and attempts to legitimize that shrine by making it contemporary with Shiloh and by tracing its priesthood to Moses himself. More importantly, the account further illustrates the purpose of the compiler of Judges in that it graphically portrays the political and religious anarchy of the day. This breach of covenant led to idolatry, immorality, political and religious syncretism, and finally Israel's destruction (Jgs. 2:1-6, 11-15; cf. 2 K. 17:7-23; 24:1-7).

2. A son of Shimei, a descendant of Reuben, and an ancestor of the Beerah who was carried into captivity by Tiglathpileser III (1 Ch. 5:5f.).

3. A son of Meribaal (Mephibosheth) and grandson of Jonathan; the father of four sons (1 Ch. 8:34f.; 9:40f.; called Mica in 2 S. 9:12; *see* MICA **1.**).

4. AV MICHAH. A Levite, head of the chief family of the Uzziel branch of the Kohathite Levites, who lived during the last days of David's reign (1 Ch. 23:20; 24:24f.).

5. The father of Abdon and a contemporary of Josiah (2 Ch. 34:20; called Micaiah in 2 K. 22:12).

6. Micah of Moresheth, a prophet of God (Jer. 26:18; Mic. 1:1; 2 Esd. 1:39 [AV MICHEAS]). *See* MICAH, BOOK OF.

7. A Simeonite, father of Ozias, and one of the three rulers of Bethulia in the days of Judith (Jth. 6:15; cf. 9:2).

Bibliography.–J. D. Martin, *Judges* (*CBC*, 1975); M. Noth, "The Background of Judges 17–18," in B. W. Anderson and W. Harrelson, eds., *Israel's Prophetic Heritage* (*Festschrift* for J. Muilenburg; 1962), pp. 68-85. A. E. HILL

MICAH, BOOK OF. The sixth book of the Minor Prophets.

I. Date
II. Historical Background
III. Author
IV. Literary Structure
V. Literary Value
VI. Theological Value
VII. Relevance

I. Date.–The superscription to the prophecy of Micah places the book in the 8th cent. B.C., during the reigns of Jotham (*ca.* 740-732), Ahaz (*ca.* 732-716), and Hezekiah

(*ca.* 716-687), kings of Judah. The consonance of the prophet's message with the contemporary historical situation supports the chronological parameters of the superscription.

According to 1:6, the destruction of Samaria, the capital of the northern kingdom, was still in the future. Thus Micah's prophetic ministry would have begun some time before that event, which occurred in 722 B.C. Probably this prophecy about Samaria was proclaimed during the reign of Jotham. The discourses in chs. 2–5, which do not mention Samaria, probably came from the time of Ahaz and the early period of Hezekiah.

Certainly the strong denunciation of paganism in the oracles of Micah is in keeping with the syncretistic tendencies of Ahaz's reign (2 K. 16:3f., 10-18). The specific mention of Ahaz's use of the high places (*bāmôṯ*) in 2 K. 16:4 indicates that Micah's condemnation of the high places in 1:5 is appropriate for the religious climate during the reign of Ahaz, and the prereformation period of Hezekiah's reign.

K. Elliger (*ZDPV*, 57 [1934], 81-83) thought that ch. 1 reflected Micah's personal involvement in the siege of Jerusalem by the Assyrians in 701 B.C., but this cannot be demonstrated. Chapters 4 and 5 were denied to Micah by numerous nineteenth-century OT scholars and attributed mostly to later unknown authors. But such conservative writers as G. Wildeboer affirmed that there was no one element in the prophecy that was inconsistent with Micah's authorship and a date in the 8th cent. B.C. (*De Profeet Micha* [1884], p. 57). Part of the difficulty lies in the messianic oracles, as well as in the promises of restoration in 4:6f. and 5:6-9. The sections concerning restoration, however, reflect the language of Isaiah (2:2-4, 6-8), while the promise of a Messiah in 5:2 constitutes a forthright and genuine element of prediction in a section of the prophecy that is free from any suspicion of textual corruption. While the passage may be assigned to a later date on a priori grounds such as the impossibility of a futuristic element in Hebrew prophetism, such grounds would be tendentious rather than historical. Comparative study of the text shows distinct consonance with the thought of Amos, Hosea, and Isaiah in such matters as the mention of Canaanite idolatry (cf. Isa. 2:6-8; Am. 5:26; 8:14), the Messiah (cf. Isa. 9:1-7; 11:1-9), and the defeat of the pagan assault upon Zion (cf. Isa. 10:24-34; 17:12-14; 29:1). There is thus little reason to question the chronological span of time established by the superscription.

II. Historical Background.–The halcyon days of prosperity and relative peace achieved under Uzziah king of Judah (792-740 B.C.), and Jeroboam II king of Israel (793-753 B.C.) were on the wane in the time of Micah. A new era was dawning in which the political situation in the ancient Near East began to change. The major force in this change was the nation of Assyria. After a long period of quiescence, Assyria again became a potent political force. The kings of Israel and Judah were forced to regard that nation as an important factor in their political considerations.

The prosperity enjoyed by Israel and Judah in the first part of the 8th cent. B.C. was more apparent than real. It was actually the result of a lack of military pressure upon the northern kingdom by the Syrians, who had been forced to defend their eastern frontier against attacks by the resurgent Assyrians. While trade and commerce flourished, they did so largely at the expense of the small landowners and the peasants, who steadily lost whatever land they had possessed because of the greed of the wealthy classes. Perhaps emboldened by Ahab's example (1 K. 21:1-16), rich landowners bribed the judges to look favorably upon improper land acquisitions (cf. 2:1f.; 3:11), and the result was the rapid disappearance of the small farmer. Those who were dispossessed drifted from the countryside to the city, and for the first time in Hebrew history the larger centers of population experienced overcrowding. Micah was outspoken in his condemnation of corrupt judges, who were supposed to be upholding covenant law, and he castigated venal priests and prophets, who would condone the perversion of justice for the poor as long as they continued to receive money for doing so.

Micah's utterances, like those of the other eighth-century prophets, reflect the extent to which the Sinaitic covenantal stipulations had been abandoned in favor of the grossly licentious Baal-worship that was practiced in Israel and had also influenced religious and social life in Judah. Under the so-called controversy (*rîḇ*) provisions of the covenant, God was proposing to summon His people to court to make them formally answerable for their misdeeds (6:1f.). The high moral and ethical values of the Sinai covenant (6:8) had been replaced by Canaanite idolatry and sensual worship at the shrines. Samaria, the leader in such apostasy, would pay the ultimate penalty of destruction for such blatant disobedience of the covenant stipulations. Unless Israel rejected the example of Ahab's house and returned to its God in penitence and faith, its current prosperity would be short-lived. Although Micah sorrowed over the fact that the provisions of the covenant had been violated for so long, he believed that true repentance would result in God's forgiveness and a consequent restoration of the whole nation to spiritual fellowship with Himself. Despite his faith in God's mercy, however, Micah held out no hope for the future of Israel and Judah. Their doom was absolute (1:6; 3:12) However, a remnant was to be delivered under the aegis of a king who would provide security for his people (5:2-4 [MT 1-3]).

III. Author.–Little is known about the prophet Micah. The superscription identifies him with the town of Moresheth (1:1), probably MORESHETH-GATH, a town in Judah.

Micah appears to have been as individualistic as his other eighth-century counterparts in his prophetic ministry. Whatever prophetic guilds existed at that time did not include him in their membership, since in 3:5-8 he drew a sharp distinction between their activities and his own spirit-filled prophetic ministry.

The prophecy of Micah portrays him as a man of deep religious sensitivity. His prophetic statements are bold and forthright, yet tempered with a deep concern for his nation.

The influence of Micah is attested in Jer. 26:18, where a prophecy of his (Mic. 3:12) was cited by certain elders in the time of Jeremiah. They argued that Micah, who prophesied earlier, had not been put to death by Hezekiah, even though he also had predicted the destruction of Jerusalem. Thus this passage implies that Hezekiah's reforms were due in part to the influence of Micah: "Did Hezekiah, king of Judah, and all Judah put him to death? Did he [Hezekiah] not fear the Lord and entreat the favor of the Lord, and did not the Lord repent of the evil which he had pronounced against them?" One may wonder why the reference to Micah is immediately followed by the account of Hezekiah's return to the Lord if there was no substantive connection between them. On the other hand, the message of Micah had so much in common with that of his senior contemporary Isaiah that the supposed influence of Micah upon Hezekiah's spiritual life could well be coincidental though correlative. Micah apparently had no access to the royal court, unlike Isaiah, and his advice was never sought by the officials of Jotham, Ahaz, or Hezekiah.

Micah's prophecy bears a close resemblance both in

form and content to certain portions of Isaiah, e.g., Mic. 4:1-3 and Isa. 2:2-4. Conjectures to the contrary, it is not possible to state with certainty who the original author was, or whether the material was adapted from the utterances of some earlier prophet whose work has not otherwise survived. Mic. 4:4f. is an addition to the parallel material in Isaiah; thus Micah's oracle was a specific prediction of peace in the nation and points to a time when the people will be walking in the name of their covenant Lord. To that extent, therefore, Micah places his own prophetic imprint upon the saying, regardless of whether Isaiah or some other person was the original author. Mic. 1:10-16 is reminiscent of Isa. 10:27-32, while Mic. 2:1f. reflects Isa. 5:8, but in both instances Micah is clearly the author of his own oracles.

IV. Literary Structure.–Three literary units are apparent in the book. Each is based on a structure that begins with a summons to hear followed by statements of doom, and each concludes with a statement of hope. These units are 1:2–2:13; 3:1–5:15; 6:1–7:20.

It is possible that these oracles were given by Micah at various times in the course of his prophetic career. The first oracle may be assumed to be the earliest because of its prediction of the doom of Samaria. Since the second concerns only Jerusalem, the northern kingdom may have already fallen. In Jer. 26:18f. a portion of this oracle (Mic. 3:12) is placed in the time of Hezekiah. The third oracle is difficult to place historically.

Several portions of the book are commonly regarded as late redactive intrusions. Perhaps the most celebrated of these is 5:7f. (MT 8f.), which apparently indicates an ideological conflict with respect to the way in which the remnant effects its mission in the world. In v. 7 the remnant seems to be portrayed in pacifistic terms, whereas the portrayal of v. 8 is militaristic in nature. This conflict seems to support the presence of several "hands" in the construction of the final form of the book.

But the point of v. 7 is the inexorability of the progress of the remnant. The "dew" and "showers" "tarry not for men." That is, the remnant will not achieve its destiny because of human effort. The same concept of the inexorable progress of the remnant is set forth in v. 8 as well. Thus the two verses have no clear ideological conflict.

The unity of literary style that pervades the book and the closely knit structure of the religious concerns within it give strong support to the possibility that the work is a literary production of the eighth-century prophet whose name it bears.

V. Literary Value.–The most distinctive literary characteristic of the prophecy of Micah is its use of paronomasia. This device, which plays on the sounds of words for literary effect, may be found in a number of places in the book. The most outstanding example of paronomasia is in 1:10-15, where the prophet effects a consonance between his statements of doom and the names of towns that will experience that doom in the impending exile. Thus in 1:10 the inhabitants of Beth-le-aphrah ("house of dust") are told "roll yourselves in the dust." In 1:14 the prophet says that "the houses of Achzib [Heb. *'aḵzîḇ*] shalt be a deceitful [Heb. *'aḵzāḇ*] thing."

Another example of paronomasia may be found in the double reference assigned to the word *bāmôṯ* ("high places") in 1:3-5. In 1:3 it refers to mountains, but in 1:5 it occurs in a parallel structure as the counterpart of "sin" (*peša'*). This latter usage evidently requires the connotation of pagan sanctuaries. This deft use of the pun thus serves to picture Yahweh treading across the mountains as the pagan sanctuaries are crushed beneath His feet.

Like other prophets, Micah made use of bold anthropomorphism. The first oracle begins with a depiction of Yahweh treading upon the mountains, which melt beneath His feet (1:4). This theophanic motif elicits within the mind of the reader images of the majestic grandeur of Yahweh, as well as His awesome power to judge within the sphere of human events.

VI. Theological Value.–One of the most important theological concepts of the prophecy of Micah is the immanence of God in history. The theophanic imagery of 1:2-4 does not represent a literal appearance of God. It is a depiction of His intervention in history to bring about the destruction of Samaria, the capital of the northern kingdom (1:6). This cataclysm was actually brought about by the Assyrians, but Micah saw it as the direct result of Yahweh's response to the disobedience of His people.

The immanence of God is a concept shared by other Israelite prophets, but in the prophecy of Micah it develops into a theology of the nations that is depicted by him in a way unique to his prophecy. Yahweh's intervention in history to effect the destruction of Samaria (1:6) and Jerusalem (3:12) was seen by Micah as a witness against the nations (1:2). The destruction of the vaunted capitals of God's own people had a direct relevance to the nations. It witnessed to the fact that God punishes sin even in His own people. In that way the charred remains of the two cities were a portent of doom for the nations, whose wickedness would spell their doom as well.

The doom spelled out for Israel and Judah was not absolute. Therein lay the theology of hope of the prophet Micah. In the oracle in 4:11-13 the prophet envisions Israel in the sphere of the nations. The nations are pictured as gloating over the destruction of Israel and Judah. But they are unaware that God has a purpose for them (4:12). God's people will be made into a powerful force that will ultimately triumph over the nations (4:13).

The people of God are portrayed as a REMNANT (*šᵉ'ērîṯ*) by Micah. This concept is a theme that appears in several prophetic books. Micah adds an important perspective to that concept. Above we observed that the remnant of God's people will make inexorable progress throughout the course of history toward the achievement of God's purposes for them (5:7f.). This affirms that God's promise to His people of future blessing will never be vitiated.

This emphasis on the remnant as a powerful force in history is set forth by the prophet in 4:6f. as well: "and the lame I will make the remnant; and those who were cast off, a strong nation." Micah envisioned the remnant not simply as a residue of people, as the term "remnant" may imply, but as a strong nation. The lame are to be made into (*śîm lᵉ*) a remnant. They do not automatically constitute the remnant.

In 2:12f. the ultimate restoration of the remnant is accomplished in association with one whom Micah calls "the breaker" (*happōrēṣ*; RSV "he who opens the breach"). The people of God are pictured as a milling flock of sheep penned up in a fold, but "the breaker" will open a breach in the enclosure and will lead them out, with the Lord marching triumphantly at their head. This figure is evidently one of the people, and his close association with Yahweh warrants his identification as the messianic figure cited in 5:2-4 (MT 1-3). This future restoration of the people of God effects their vindication and establishes the continuing validation of God's promises to His people.

Thus Micah's contribution to the theological concept of the people of God is to be found in his doctrine of the remnant. The people of God are a strong force in the world, a force that moves inexorably forward toward the ultimate goal of the manifestation of God's kingdom in history (4:7b).

In Micah's theology Yahweh is no mere tribal god. His universality is too apparent for that. He intervenes in history, yet He is in constant control of the forces of history that move toward the manifestation of His absolute rule.

The concept of covenant is also an essential element in Micah's theology. He makes no direct reference to the Mosaic covenant as such, but it is evident that its stipulations and curses are very much in his mind. In 2:2 he speaks of those who covet (*ḥāmaḏ*) fields and who oppress their fellow man. Both are clear violations of the covenantal stipulations (e.g., Dt. 5:21; Lev. 19:13).

His denunciation of the oppression of the less fortunate is particularly vehement. Some of his harshest and most vivid language is used to condemn that violation of the spirit of the Mosaic law. He pictures the oppressing classes as treating the people like an enemy (Mic. 2:8). They eat the flesh of the people, flay their skin, and break their bones in pieces (3:3).

The covenant pronounced curses on those who violated its commands. Micah is quick to note that those curses must surely be realized. One of the curses cited in the Deuteronomic expression of the covenant is dispersion among the nations (Dt. 28:64-68). Micah envisioned a future exile of the people in 4:10 and a dispersion of the people in 4:6 (note that those who have been driven away will be regathered). The curses of Deuteronomy also involved Israel's destruction at the hands of its enemies (Dt. 28:25f.). This was fulfilled in the destruction of the capital cities so vividly described by Micah in 1:6 and 3:12.

Micah's God is clearly the God of the Sinaitic covenant. The power, righteousness, and high morality that motivated God's approach to the Israelite tribes at Mt. Sinai were at the forefront of his prophetic message. He saw clearly that the covenant stipulations required implicit obedience on the part of God's people to His revealed will, as one means of protecting them from idolatry. But despite the Israelites' strict commitment to monotheism, they became conformed to Canaanite idolatrous ways after settling in the Promised Land. Despite periodic revivals of covenantal faith, the general trend, especially in the northern kingdom, was to espouse the worship of false gods, and it was this act of apostasy that called down the wrath of the Hebrew prophets. Micah was particularly aware that the northern kingdom would not be able to withstand the attacks of the Assyrians once they commenced. He regarded Israel's impending doom as appropriate punishment under the covenant stipulations (cf. 6:13-16) for the nation's infidelity and defiant espousal of a totally false system of worship. More than that, Micah strove energetically in elegant poetic utterances to convince the people of Judah that they should learn a lesson from the forthcoming destruction of Samaria and return in repentance and faith to the religion of the Sinai covenant. See, e.g., 6:8:

"He has showed you, O man, what is good;
and what does the LORD require of you
but to do justice, and to love kindness,
and to walk humbly with your God?"

The theology of hope in the prophecy of Micah is centered in a messianic figure who is associated with Bethlehem, the city of David. This obvious Davidic motif is typical of other prophets (Isa. 9:7; Ezk. 34:23f.; 37:24f.; Hos. 3:5; Am. 9:11), but no other prophet cites his birthplace. The Davidic king will provide his people with security in a kingdom that will extend his power to "the ends of the earth" (5:4).

VII. Relevance.–The prophecy of Micah extends the sphere of God's control beyond the confines and interests of the people of Israel to the nations of the world. The prophet warns that sin must ultimately come under God's judging hand, whether that sin is found among His chosen people or other peoples.

His description of the nature of God's forgiving love in 7:18-20 is one of the classic OT passages. He sees God as a vital, living power, in implied contrast to the deities of wood and stone that the apostate Israelites had been venerating. This God is a moral Being, who is well aware that transgressions of covenant holiness have been taking place in Israel. Yet although He is holy and just, and could therefore quite legitimately bring upon His apostate people the curses promised in the covenant (Dt. 28:15-68), He is also a God whose mercy is over all His works. Because of His covenant love toward Israel, He is both anxious and ready to pardon the penitent transgressor and renew the bond of covenant spirituality that had been severed. Micah affirms that God is faithful to His promises and will remove His people's sins far from them (7:19).

The prophetic vision of a future king, to be born in Bethlehem, is one of the most distinctive and apposite Messianic utterances in the entire OT. Coming nearly seven centuries before the event itself, this prediction (5:2 [MT 1]) is a dramatic illustration of one facet of prophetic activity. The reference occurs as part of a straightforward oracle, and is the more remarkable because there is no evidence of textual corruption or interpolation of any kind. So firmly rooted did this tradition of the Messiah's birthplace become that, when Herod inquired of his priests and scribes about the locale where the newborn "king of the Jews" could be found, they promptly cited Bethlehem on the authority of the verse from Micah (Mt. 2:5f.).

The prophet's urgent call to obedience should not be relegated only to the era of the old covenant in which Micah lived. It reflects God's continuing concern for the allegiance of His people and the ethical response of His people which is echoed so clearly by the NT writers.

Micah's vision of an era of peace in which nations would cease to learn war (4:3) is the expression of an optimistic philosophy of history. In conjunction with the other eighth-century prophets, Micah regarded the God of Sinai as Lord of human history. All nations were under His supreme control and could be raised up or thrown down as He desired. The rebellious would be pounded like sheaves on the threshing floor (4:12), but the obedient, by contrast, would be nourished and tended like sheep under the care of a loving shepherd (5:4 [MT 3]).

The basis of Micah's optimism is not to be found in a humanistic philosophy nor in a shallow view of history. It is found in his faith in God. Even though he lived in a society that was desperately corrupt and bent on its own ruin (7:1-6), he could say, "But as for me, I will look to the Lord, I will wait for the God of my salvation; my God will hear me" (7:7). The prophet expected God to act on behalf of His people. Micah could triumph over the wrongs so evident about him because his was the triumph of faith.

T. E. MCCOMISKEY

MICAIAH mī-kā'yə, mī-kī'ə [Heb. *miḵāyāhû*–'who is like Yahweh?'; Gk. *Meichaias, Michaias*]; AV usually MICHAIAH. A frequently occurring OT name occasionally contracted to MICA or MICAH.

1. NEB MAACAH. The mother of Abijah (2 Ch. 13:2). The parallel passage (1 K. 15:2; cf. 2 Ch. 11:20) indicates that Micaiah here is a corruption of MAACAH (so LXX, NEB).

2. The father of Achbor (2 K. 22:12). *See* MICAH **5.**

3. A prince of Judah sent by Jehoshaphat to teach in the cities of Judah (2 Ch. 17:7).

4. The son of Gemariah (Jer. 36:11, 13) who heard Baruch reading the roll of Jeremiah to the people and informed the nobles. As a result of his report the roll was read to the nobles and then to the king. He may have been the same as **3.**

5. The son of Zaccur and ancestor of Zechariah, a priestly trumpeter and processionist at the dedication of the wall (Neh. 12:35); probably the same as MICA **2.**

6. A priestly trumpeter and processionist at the dedication of the wall (Neh. 12:41).

7. Eng. versions MICAH. The Morashthite in Jer. 26:18, the same as the canonical prophet MICAH.

8. The son of Imlah, a prophet contemporary with Elijah who appears only in 1 K. 22:4-28 par. 2 Ch. 18:3-27, although he had made previous prophecies (1 K. 22:8).

The one incident in which he appears is significant for the understanding of the nature of OT prophecy. Jehoshaphat was on a visit to Ahab, who suggested that they join in a campaign to take Ramoth-gilead from the Syrians. Jehoshaphat agreed but asked that first the mind of Yahweh be ascertained. Ahab readily consented and inquired of the four hundred prophets attached to the court, who, realizing that the king desired the expedition, gave a unanimous and encouraging prophecy. Jehoshaphat, however, detected their obsequious conformity to their master's wishes and asked if there were not another prophet of Yahweh from whom they might inquire. Ahab reluctantly called for Micaiah but warned Jehoshaphat that this man had never prophesied anything but evil for him. At first Micaiah agreed with the other four hundred prophets, but Ahab recognized the note of irony in his agreement, and adjured him to tell the truth. Micaiah therefore prophesied in solemn and majestic language a disastrous outcome to the expedition. Ahab tried to detract from the prophecy by declaring that it was only in line with Micaiah's usual unfavorable predictions. In reply the prophet related a vision he had had of a scene in the heavenly court in which Yahweh sent a lying spirit to deceive the false prophets and bring about Ahab's downfall. Zedekiah, the spokesman for the four hundred, struck Micaiah, not denying the allegation but asserting that Micaiah too had been deceived. In the spirit of true prophecy (Dt. 18:22) Micaiah appealed to the fulfillment of his prediction to show its truth; the death of Ahab in the battle (1 K. 22:37f.) did prove his claim.

Thus true and false prophecy existed side by side in Israel. Any attempt to understand OT prophecy or to compare it with prophecy in other parts of the ancient Near East (e.g., Mari) must acknowledge this distinction. Particular care must be taken not to compare things that differ in origin, expression, and result.

MICE. *See* MOUSE.

MICHA mī'kə (AV 2 S. 9:12; Neh. 10:11; 11:11, 22). *See* MICA.

MICHAEL mī'kəl [Heb. *miḵā'ēl*–'who is like God?'; Gk. *Michaēl*].

1. An Asherite, the father of Sethur who scouted the promised land for the Israelites (Nu. 13:13).

2. A Gadite clan patriarch, otherwise unknown (1 Ch. 5:13).

3. Another Gadite clan patriarch, also otherwise unknown (1 Ch. 5:14).

4. A temple musician, great-grandfather of the temple singer and psalm writer Asaph (1 Ch. 6:40 [MT 25]).

5. An Issacharite clan chieftain and warrior, one of the sons of the Issacharite clan patriarch Izrahiah (1 Ch. 7:3).

6. A Benjaminite, son of Beriah, otherwise unknown (1 Ch. 8:16).

7. A Manassite military commander who defected from Saul to David at Ziklag. He was appointed a commander in David's army (1 Ch. 12:20f.).

8. The father of the Issacharite tribal military leader Omri (1 Ch. 27:18).

9. A son of King Jehoshaphat of Judah. He was killed and his land holdings were confiscated by his brother Jehoram once Jehoram had firmly established his grip on the kingship (2 Ch. 21:1-4).

10. A descendant of Shephatiah and father of Zebadiah, the latter being a family leader who returned with Ezra from Babylonia to Judah *ca.* 458 B.C. (Ezr. 8:8).

11. The archangel, guardian of Israel. Michael is called "official" or "prince" (Heb. *śar*) over Israel in Dnl. 10:21. He was one of the "chief princes" (10:13), i.e., archangels, involved in the angelic warfare against the demonic powers that influenced the national leadership in Persia and Greece (v. 20) during and after the Israelite Exile. Michael is the only archangel identified as such in the Bible, though GABRIEL (Dnl. 8:16; 9:21; Lk. 1:19, 26) appears to function as an archangel.

In Jewish apocalyptic tradition as reflected in 1 En. 20:1-7 and Tob. 12:15 there were seven archangels, four of whom stood in God's presence (1 En. 9:1; 40:9). These were Michael, Gabriel, RAPHAEL, and URIEL (sometimes called Phanuel). Rev. 8:2 mentions "the seven angels who stand before God," but the Bible otherwise neither names archangels nor describes specifically their duties. Nevertheless it may be presumed that they, on the analogy of generals in an army, stand directly under the supreme authority of God, and command other angels, though never independently of God's will. The Bible clearly implies that the events of nations can be influenced by both God's angels and by fallen angels (Ex. 23:20-23; Ps. 78:49; 82:1-8; Isa. 63:9; Mt. 4:8f.) and seems to imply also that archangels may be assigned individually to given nations (e.g., Dnl. 10:13, 21; 11:1; 12:1).

In the rather baroque angelology of noncanonical Jewish and Christian apocalyptic, Michael's character and role are elaborated far beyond the biblical evidence. He is called "merciful and long-suffering" (1 En. 40:9; 68:2f.), "mediator and intercessor" (Asc. Isa. 9:23 [Latin]; T. Levi 5; T. Dan 6). He is the angel who records the names of those deserving eternal life in Asc. Isa. 9:22f. (Latin) and the intermediary for the giving of the Law from God to Moses in the (Greek) Apocalypse of Moses; Jub. 1:27; 2:1; Shep. Herm. Sim. 8:3:3, etc. In 1 En. 60:12 he is depicted as the angel who guards the incantations by which the heavens and the earth are sustained. The apocalyptic Book of Elijah portrays Michael as the intermediary for information about the future revealed to Elijah (*see* ELIJAH, APOCALYPSE OF [HEBREW]). Among the Dead Sea Scrolls is a fragmentary Aramaic apocalypse beginning: "Words of the book which Michael repeated to the [other] angels . . .", thus presumably demonstrating his status as a commander of a host of angels. Michael is the gatekeeper to paradise in the Ethiopian Bar. 9:5 and the one who reveals Mary's body in the clouds in the Syriac History of the Blessed Virgin. He serves as guardian of the souls of the righteous

in the Testament of Abraham, ch. 19. Michael's role as an angelic warrior is developed in 2 En. 22:6 and 33:10, and his name is written on the shields of one division of the divine army listed in the Dead Sea War Scroll (1QM 9:14-16). All of these noncanonical characterizations of Michael appear to be imaginative embellishments of the few details which can be gleaned about him from the biblical accounts.

Michael is specifically the heavenly defender and patron of Israel who supports God's people against their foes, both human and demonic. Some scholars have attempted to identify Michael with the preincarnate Christ on the basis of Dnl. 10, though this has not been widely accepted. The unnamed "man dressed in linen" (Dnl. 10:5) who speaks to Daniel at length about angelic warfare and the related future of several nations is more probably Gabriel, Michael's co-archangel.

Michael is mentioned twice by name in the NT. In connection with teaching about blasphemy Jude 9 relates that Michael disputed with Satan over the body of Moses and yet held back from attacking Satan verbally, leaving Satan's judgment to God. The background of this allusion is not clear. Perhaps the devil sought to deny Moses a proper burial (cf. Dt. 34:6). Origen (*De prin.* iii.2.1) claimed that Jude's words reflect the pseudepigraphic Assumption of Moses, though nothing similar is found in the extant text. Rev. 12:7-9 identifies Michael as the leader of the righteous angels in the battle that caused Satan to fall from heaven.

D. STUART

MICHAH mī'kə. *See* MICAH **4.**

MICHAIAH mī-kā'yə, mī-kī'ə. *See* MICAIAH.

MICHAL mī'kəl, mē'kal [Heb. *mîḵal*, prob. a contraction of *miḵā'ēl*–'who is like God?'; cf. Phoen., Ugar., *mkl*; Gk. *Melchol*, as if from *mlkl* (?); cf. Syr. *mlky'l* < *malkî'ēl*–'God is my king']. The younger daughter of Saul; David's first wife (1 S. 14:49; 18:20ff.).

Saul saw in Michal's love for David an opportunity to have David killed: he set the brideprice for Michal at one hundred Philistine foreskins (1 S. 18:20-30; cf. David's similar design against Uriah, 2 S. 11). This plan failed, so Saul set an ambush, but Michal helped David to escape. When Saul confronted her she lied, saying that David had threatened her. This lie sharply contrasts Michal with her brother Jonathan, who defended David against Saul even at the risk of his own life (1 S. 20:32f.; cf. 19:4f.).

Apparently Michal's false testimony implied David's repudiation of the marriage, and so Saul gave her to Palti(el) (1 S. 25:44). However, because David and Michal had not been legally divorced, fourteen years later David demanded his wife back (2 S. 3:14ff.) — without violating Dt. 24:1-4. While one should not rule out a motive of love (1 S. 18:20ff.; 2 S. 6:20a), David's renewed marriage to Michal would legitimate his succession to the throne (cf. Tsevat and Levenson-Halpern).

Michal rebuked David for his unseemly self-degradation (at least in her eyes) when he danced before the Lord as the ark was brought up to Jerusalem (2 S. 6). The transfer and housing of the ark in Jerusalem, David's royal city, implied peace and the promise of dynastic succession (cf. Ulshoefer). David detected in Michal's rebuke an underlying bitterness that God had so established a dynasty for David rather than her father (v. 21). For her rejection of God's purpose toward David, Michal was cursed with barrenness (2 S. 6:22f.; so Hertzberg, p. 281).

The mention of Michal's name in 2 S. 21:8 (AV, following MT) is based on a corrupt reading and ought to be corrected to Merab (Michal's elder sister), with the LXX (so RSV, NEB).

MICHEAS mī'kē-əs (2 Esd. 1:39, AV). *See* MICAH **6.**

MICHMAS mik'mas [Heb. *miḵmās* < *kāmas*–'store up'; Gk. *Machmas, Machemas*] (Ezr. 2:27; Neh. 7:31); [Gk. Apoc. *Makalōn*] (1 Esd. 5:21); AV, NEB, MACALON; **MICHMASH** mik'mash [Heb. *miḵmāś* (*BHS*), other MSS *miḵmāš, maḵmāś*; Gk. *Machamas, Machemas, Machmas*] (1 S. 13:2; Neh. 11:31; etc.); AV also MACHMAS (1 Macc. 9:73). A village in Benjamin, the modern Mukhmâs, 12 km. (7.5 mi.) N of Jerusalem. In NT times it was called Machmas.

No archeological research has been done in the village; K. Baedeker mentioned a grotto with columbaria (*Palestine and Syria* [1912], p. 98). Cf. Josephus *Ant.* vi.6.2 (103-114).

Saul occupied Michmash and the hill country of Bethel (1 S. 13:2) but left it to gather more troops at Gilgal near Jericho, which he reached by way of Wâdī Ṣuweinît and its prolongation Wâdī Qelt, a distance of about 26 km. (16 mi.). The Philistines occupied Michmash, cutting off the way from Gilgal to the area around Bethel (vv. 5, 11).

With the few men left to him Saul encamped at Geba 3 km. (2 mi.) S of Michmash (v. 16). By sending a detachment to the pass of Michmash the Philistines protected their eastern flank (v. 23). Jonathan attacked this detachment (14:1-15), while Saul stayed at Migron, Tell Miriam, 1.6 km. (1 mi.) SW of Michmash (v. 2). After Jonathan's initial success Saul went into battle against the Philistines and drove them past Beth-aven (Bethel or a locality in its immediate neighborhood). Thus a two-pronged attack from the southeast and southwest resulted in the flight of the enemy to the northwest. Michmash seems to have remained an open village.

The next time its name occurs is in Isa. 10:28, the description of the impending attack by the Assyrians. Here the prophet alluded to the etymology of the name ("to the storehouse he confides his baggage"). After the Exile a small Israelite population came to Michmash (Ezr. 2:27; Neh. 7:31); they were Benjaminites (Neh. 11:31).

Michmash became newly important during the time of the Maccabees. Jonathan chose it for his armed camp (158-152 B.C.; 1 Macc. 9:73; Josephus *Ant.* xiii.1.6 [34]) "because he could not easily be taken by surprise there" (S. Zeitlin, *First Book of Maccabees* [1950], p. 167). The

gorge of Wâdī Ṣuweinît protected it from Jerusalem on the south. After the Maccabean period Michmash sank to insignificance again, though the Mishnah (*Menahoth* viii.1) praises the quality of its grain.

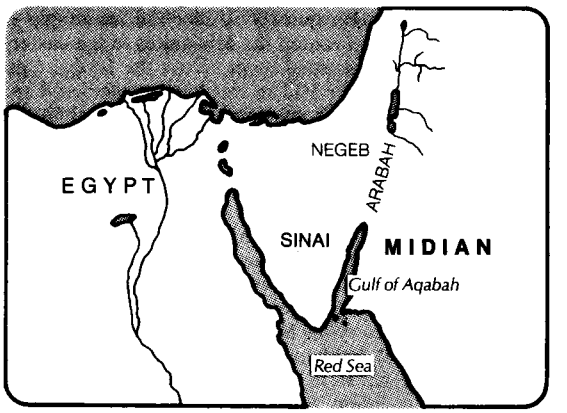
MICHMETHATH mik'mə-thath [Heb. *hammiḵmᵉṯâ*]; AV MICHMETHAH. A place named in defining the territory of Ephraim and Manasseh (Josh. 16:6; 17:7). It is said to lie "before," i.e., E of, Shechem. The meaning of the name is obscure, and the presence of the article suggests that it may be a description rather than a proper name. Most commentators identify Michmethah with Khirbet Juleijil, E of Shechem. Another site has been suggested at Khirbet Makhneh el-Fôqā, about 8 km. (5 mi.) SE of Shechem (*LBHG*, rev., p. 257). R. P. DUGAN

MICHRI mik'rī [Heb. *miḵrî*]; NEB MICRI. A Benjaminite, ancestor of Elah (1 Ch. 9:8).

MICHTAM mik'təm. *See* MIKTAM.

MIDDAY. *See* NOON.



MIDDIN mid'ən [Heb. *middîn*]. One of a group of six cities in the wilderness of Judah (Josh. 15:61) that constituted part of the inheritance of the tribe of Judah. The LXX B reads *Ainōn*, "springs," but A reads *Madōn*. If the six cities in the MT are to be read from north to south (cf. *GTTOT*, § 320), the last two being City of Salt, identified with Khirbet Qumrân, and En-gedi on the west side of the Dead Sea, then the others are to be located N of Qumrân. Middin has been tentatively identified with Khirbet Abū Ṭabaq in the Buqeiʿah (Valley of Achor) (cf. F. M. Cross and J. T. Milik, *BASOR*, 142 [Apr. 1956], 5-17). Abel's suggestion of Qumrân (*GP*, II, 92) is now generally rejected. Aharoni maintained that sites between ʿAin Feshkha (Qumrân) and En-gedi are candidates for these cities (*LBHG*, rev., p. 356); these sites do not accord with the N-S interpretation of the list, but this is not a serious objection. The reading *Ainōn* seems to support a location near springs, such as those by ʿAin Feshkha and En-gedi. The locations of Middin and the other cities, except En-gedi and probably City of Salt, remain doubtful.

MIDDLE WALL OF PARTITION (Eph. 2:14, AV). *See* HOSTILITY, DIVIDING WALL OF.

MIDIAN mid'i-ən, **MIDIANITES** [Heb. *miḏyān, miḏyānî, miḏyānîm*]. The biblical materials regard the Midianites as the descendants of the union between Abraham and Keturah (Gen. 25:2). References to the Midianites and the land of Midian are scattered throughout the OT, but are more frequent prior to the establishment of the monarchy under Saul (*ca.* 1020 B.C.). The ancestors of Israel and the Midianites sustained a curious relationship, ranging from close, cordial ties with Moses (Ex. 2:15-18) to an attempt by Israel to exterminate the males of Midian (Nu. 31:1-9). Defining the nature of this relationship is difficult since little is known of the Midianites outside the biblical references.

In the Bible the Midianites first appear in connection with the sale of Joseph (Gen. 37:25-36). Some confusion exists since this narrative identifies those responsible for the sale both as "Midianites" and as "Ishmaelites." Perhaps Ishmaelite is a more inclusive term subsuming the Midianites (cf. Jgs. 8:22-24; *see also* ISHMAELITES). Interestingly, in

the Joseph story the Midianites are called "traders" while elsewhere they appear as shepherds (Ex. 2:17).

Midianites are next mentioned in connection with Moses. After Moses was forced to leave Egypt he traveled to the "land of Midian," where he encountered Jethro, a Midianite priest, and subsequently married his daughter (Ex. 2:15-21). Later at Mt. Sinai Jethro aided Moses in certain organizational tasks and participated in cultic ceremonies before Yahweh (Ex. 18). Moses' close relationship with a priest of Midian has led some scholars to speculate that Jethro mediated the worship of Yahweh to Moses and Israel. Elsewhere the father-in-law of Moses is termed a Kenite (Jgs. 1:16; 4:11). These links form the basis of the so-called Kenite hypothesis, in which the origins of Yahwism are sought among the nomadic or seminomadic Kenites, perhaps a wandering group of metalsmiths, who in turn are considered to be related to the Midianites. This hypothesis has received some support from the excavation at Arad, a site in a region said to be settled by the Kenites (Jgs. 1:16), where an early Israelite temple and an altar built according to early biblical specifications (Ex. 20:24-26; 27:1) have been found. All such speculations are based on circumstantial evidence, however, and may be said to read much more into the biblical text than what in fairness may be said to be there. It is doubtful that the Midianites played any part in mediating Yahwism to Moses.

The Midianites appear next in connection with Israel's attempt to penetrate the Transjordan region after the wilderness wanderings. The elders of Midian and the Moabites conspired against Israel and secured the services of BALAAM to curse Israel (Nu. 22:4-7). Apparently Midianite women were also involved in an attempt to lead Israel into apostasy (Nu. 25:1-9). Although the attempt failed, the Midianites were linked firmly with the paganism of Baal-peor; consequently the Midianites were considered the enemy of both Israel and Yahweh. Israel took vengeance on the Midianites through warfare. Five kings of Midian were killed along with their men, and the women were taken captive (Nu. 31). Henceforth the Midianites consistently appear in an adversary relationship to Israel.

The Midianites, along with the Amalekites and the "people of the East," periodically harassed certain tribes of Israel during the period of the Judges. Since Palestine at this time was particularly vulnerable due to the collapse of the Canaanite city-states and the decline of Egyptian influence, groups from the fringe areas could penetrate deeply into otherwise secure areas. Moving from the Transjordan region into the Jezreel Valley and beyond, the Midianites preyed upon Israel, apparently during the harvest times (Jgs. 6:1-6). The Israelites had difficulty dealing with the Midianites, who used the camel to make

long raids and retreat quickly. Under the leadership of Gideon the Hebrews routed the Midianites in the eastern Jezreel Valley and pursued them across the Jordan (Jgs. 7–8). This victory over Midian was long remembered and served as a source of confidence in Yahweh's ability to deliver (Isa. 9:4; 10:26; Ps. 83:9 [MT 10]).

The Moses narrative raises the problem of the location of the land of Midian. The biblical materials reflect a significant diversity with regard to the geographical distribution of the Midianites. Most references imply that the Midianites were found in and along the southern fringes of Transjordan where they are associated with the Amorites (Josh. 13:21) and the Moabites (Nu. 22:4-7; 1 Ch. 1:46). After Gideon's victory the Midianites fled across the Jordan southward (Jgs. 8), implying that their home lay in southern Transjordan. 1 K. 11:18 suggests that Midian was E of Paran and W of Edom. Since Paran refers to an area near Kadesh-barnea, i.e., some part of the northeast Sinai or southwest Negeb, Midian would seem to be restricted to the Arabah in this description. Further, some passages indicate that the Midianites had contacts as far south as Egypt (Gen. 37:25) and possibly as far north as the Euphrates ("the River," Nu. 22:4f.).

Classical sources are unanimous in locating the land of Midian in northwest Arabia. Josephus located a city of Mediane on the Red Sea in Arabia (Josephus *Ant.* ii.11.1 [257]). Ptolemy described two cities in Arabia, a certain Modiane and Madiane, the former apparently located on the Red Sea coast and the latter further inland (Ptolemy *Geog.* vi.7.27). Eusebius likewise mentioned a town of Madian located in Arabia (Eusebius *Onom.* 124). All these references place the land of Midian E of the Gulf of Aqabah in northwest Arabia. Indeed, on the basis of the traditional location of the land of Midian in northwest Arabia and because Moses was so closely associated with the land of Midian, some scholars have proposed that Mt. Sinai should be located in northwest Arabia.

Although many scholars have agreed with the classical authors in locating the land of Midian in northwest Arabia, some caution regarding this equation is necessary. As indicated above the biblical evidence suggests that the Midianites ranged over a large area, including northwest Arabia, southern Transjordan, the Arabah, portions of the Negeb, and possibly northern Sinai. Although northwest Arabia eventually became associated with the land of Midian, probably the range of the Midianites at one time was much larger. This would be particularly true if, as B. Mazar believes, the Midianites were involved in the spice and incense trade between southern Arabia and western Asia. Further, some research has raised the possibility that Midian refers not to a land but to an amorphous league of tribes (see Dumbrell). This league dominated the people and areas of the southern Transjordan, Negeb, and portions of Arabia from the Late Bronze Age until approximately the 11th cent. B.C., when other people gradually supplanted the league. If this hypothesis is true, then the "land of Midian" should be understood less in purely geographical terms and more in geopolitical terms.

Biblical references contain clues to the political organization of the Midianites that strongly imply some sort of tribal structure. Five "kings" of Midian are mentioned in Nu. 31:8; these same persons were termed "leaders" elsewhere (Josh. 13:21). Zur, one of these kings, seems to have been a tribal chieftain (Nu. 25:15). Oreb and Zeeb are referred to as two "princes" of Midian (Jgs. 7:25). All these terms suggest a tribal organization in which smaller groups were headed by local chieftains. The association of the Midianites with other known nomadic and semi-nomadic groups, e.g., the Amalekites and "the people of the East" (Jgs. 6:3), suggests that the Midianites shared a similar mode of existence.

Archeological research has shed some light on the Midianites through the recovery of a distinctive pottery

The Wâdī Rām region of Midian (A. D. Baly)

Typical Midianite juglet with bichrome decorations representing an ostrich (14th-mid-12th cent. B.C.) (Institute of Mining and Metals in the Biblical World, Arabah Expedition)

with bichrome decorations in surveys conducted in the northern Hejaz, E of the Gulf of Aqabah. The pottery, dating from the 13th-12th cents., was found in the region classically associated with Midian and has been designated "Midianite." The same type of pottery appeared in the excavation at Timnaʿ, a copper-mining and smelting site located in the southern Arabah a few miles N of the Gulf of Aqabah. In addition, a small shrine found at Timnaʿ has been attributed to the Midianites. The shrine, in its initial phases an Egyptian temple built during the reign of Seti I and dedicated to Hathor, was repaired after its destruction by an earthquake. New features included the defacing of all Egyptian sculpture, the erection of a row of standing stones (*maṣṣēḇôṯ*), and possibly a tent that covered parts or all of the structure. The last is particularly interesting in the light of Israel's tent-shrine (*ʾōhel mōʿēḏ*) of its desert days.

See *EAEHL*, IV, *s.v.* "Timnaʿ" (B. Rothenberg), for a full report on the excavations.

MIDRASH mid'rash [Heb. *miḏrāš* < *dāraš*–'to seek, examine, investigate']. This term, which is evidently post-exilic in usage if not in origin, occurs only in the MT of 2 Ch. 13:22 (RSV, AV, NEB, "story") and 24:27 (RSV "commentary"; AV, NEB, "story"); both JB and NAB have "midrash." The New King James Version renders the word on both occasions by "annals," which brings out clearly the implication that the materials involving Abijah and the records of Joash's reign were official court documents, and not writings analogous to the later rabbinic commentaries on scriptural passages, for which *miḏrāš* came to be used after the return from exile.

Ezra seems to have practiced the use of *miḏrāš*, having as his objective in life to study and apply the Torah, as well as to instruct the nation in the ordinances and statutes of the Law (Ezr. 7:10). The necessity for interpreting these precepts for the life of the postexilic theocracy prompted the rise of two varieties of midrash, the *haggadah* or "narration," which interpreted nonlegal materials in an ethical and expository manner, and the *halakah*, which applied the general principles of OT laws to more specific situations.

Midrashic material was preserved orally from its inception for a considerable period, and only in the 2nd cent. A.D. were the halakic midrashim written down. The most important of these were the *Mekilta* (treatise) to Exodus and the *Sifra* (book) on Leviticus, Numbers, and Deuteronomy. The earliest written haggadah was the midrash on Genesis, going back to the 3rd cent. A.D., and this was followed by the midrashim on the rest of the Pentateuch and the Five Scrolls (Megilloth). These commentaries became known as the Midrash *Rabbah*, and with later compositions were much favored by the rabbis for homiletical purposes.

MIDWIFE [piel part. of *yālaḏ*–'to bear, bring forth'; thus, 'one who causes or helps to bring forth']. Midwives are mentioned briefly in Gen. 35:17, where the midwife assures Rachel that her son would be born safely, and in 38:27-30, where, to determine the firstborn, the midwives tie a scarlet cord on the hand that comes out first.

The most notable account of midwives in the OT is in the story of the Egyptian oppression (Ex. 1:15-20). Here Pharaoh instructs the midwives attending the Hebrew women to kill all the male babies, but the midwives refuse because of their fear of God. This account has several problems. First, scholars disagree whether Shiphrah and Puah were Hebrew midwives (so MT) or non-Hebrew midwives who took care of the Hebrew women (cf. LXX, Vulg.). Second, it is uncertain whether they were the only midwives for the Hebrews; perhaps they were in charge of the midwives or were the only two remembered. Third, a theological problem arises in that God appears to bless these midwives for lying (vv. 19f.), although some scholars argue that God rewarded them because they feared Him, not because they deceived Pharaoh. See B. Childs, *Book of Exodus* (*OTL*, 1974), pp. 16f., 22-24, for a good discussion of these problems.

Ezekiel 16:4 may reveal some of the standard practices of Hebrew midwives: they cut the navel cord, cleansed

Clay statuette of a midwife assisting a birth (ca. 8th cent. B.C.) (published by permission of the Director of Antiquities and the Cyprus Museum)

the baby, rubbed it down with salt (although no biological purpose is known), and wrapped it in strips of cloth.

See also BIRTH. R. B. ALLEN

MIGDAL-EDER. *See* EDER, TOWER OF.

MIGDAL-EL mig'dal-el [Heb. *migdal-'ēl*]. The name, which means "fortified tower of El," appears between Yiron (AV, NEB, Iron) and Horem (Josh. 19:38) in the list of fortified towns in the territory of Naphtali. The site is unknown, but the context seems to place it in Upper Galilee (cf. M. Woudstra, *Book of Joshua* [*NICOT*, 1981], pp. 292f., who mentions the possible identification with Mejdel-Islim, about 26 km. [16 mi.] ESE of Tyre). It is thought by some to be the Magadan of Mt. 15:39.

D. PECOTA

MIGDAL-GAD mig'dəl-gad [Heb. *migdal-gad*–"tower of Gad']. One of sixteen cities named along with other groups of cities in the Shephelah (Lowlands) as part of the inheritance of the tribe of Judah (Josh. 15:37; cf. vv. 33-36; 42-47). Migdal-gad is named between Hadashah and Dilean in a group that includes Lachish and Eglon; therefore it is to be located near those four cities. Since the name appears to be preserved in Khirbet el-Mejdeleh ("ruins of the tower"), this identification has been widely accepted. Khirbet el-Mejdeleh is 1.8 km. (1.1 mi.) E of ed-Dawaniyah (Harûs), 6 km. (3.7 mi.) ESE of Tell ed-Duweir, 8 km. (5 mi.) SSE of Beit Jibrîn (Beth Guvrin, Eleutheropolis). W. S. L. S.

MIGDOL mig'dol, mig'dōl [Heb. *migdôl*; Gk. *Magdōlon*]. The term is of West Semitic, probably Canaanite, origin, meaning "fortress" or "tower" (Ugar. *mgdl*). In this sense it appears as a loanword in Egyptian and also as the proper name of various military stations on the northeast frontier of Egypt. In Am.Tab. 234:29 the name ^{alu}*ma-ag-da-lí*^{ki} *ina* ^{mâtu}*mi-iṣ-ri* occurs as the designation of an Egyptian city, but the context unfortunately furnishes no hint as to its precise location. The OT mentions Migdol as a town or city in Lower Egypt in three different contexts.

1. A place along the route of the Exodus, adjoining PI-HAHIROTH, BAAL-ZEPHON, and the sea (Ex. 14:2; Nu. 33:7). Identification is difficult, depending partly upon the route of the Exodus and partly upon the location of Pi-hahiroth and Baal-zephon, neither of which can be placed precisely. Advocates of a northern route for the Exodus identify Baal-zephon variously with Râs Qasrun on the Mediterranean coast (Greco-Roman Casium) or Tahpanhes. Pi-hahiroth, which according to Nu. 33:7 lay E of Baal-zephon, has been seen as the Hebrew equivalent of *Pr-Ḥthr*, "the house of Hathor." Egyptian papyri, however, make clear that the Hebrew location was not the well-known *Pr-Ḥthr* of the west delta region. Several Egyptian cities bore this name, but in its present form Pi-hahiroth cannot be identified with any *Pr-Ḥthr* or another known town or city in the east delta region. Albright proposed a broadly southern route for the Exodus, locating Baal-zephon at later Tahpanhes (Tell Defneh) and placing Migdol at Tell el-Ḥeir, just S of Pelusium, near his site for the *yām sûp* or "Reed Sea." The name "Baal-zephon" or "Baal of the North" suggests the presence of a notable Canaanite sanctuary in the east delta area, probably dating from the early Amarna period. In any event, the Migdol of the Exodus can be placed with certainty in the east delta region. The papyrus sources mention a Migdol of Seti I near Tjeku; if this site can be identified with Succoth (modern Tell el-Maskhûṭah), it is likely the Migdol of the Exodus.

See also EXODUS, ROUTE OF THE.

2. A residence of Egyptian Jews, along with Memphis and Tahpanhes (Jer. 44:1; 46:14).

3. A north Egyptian site, contrasted with Syene in the south (Ezk. 29:10; 30:6). This northern Migdol is probably the Magdolum (perhaps Tell el-Heir) of *Itinerarium Antonii*, 12 Roman mi. (18 km., 11 mi.) from Pelusium.

R. K. H.

MIGHT; MIGHTY. *See* POWER.

MIGHTY MEN [Heb. *gibbôrîm*]; NEB HEROES, FIGHTING MEN, SOLDIERS, BODYGUARD, etc. Warriors who were stronger and more agile in combat than ordinary men. Physical strength was probably combined with an inner strength or courage to make them stand out as powerful people of their times. While "mighty men" are frequently referred to in groups, sometimes an individual was identified as "a mighty man" (*gibbôr*), e.g., Nimrod (Gen. 10:8), Gideon (Jgs. 6:12), David (2 S. 17:10; cf. 1 S. 16:18), and Naaman (2 K. 5:1). Nimrod was remembered as a mighty hunter (Gen. 10:9) as well as a great city builder (vv. 10-12). But more frequently the *gibbôrîm* were remembered for their military exploits.

David's "mighty men" were a group of warriors, at first numbering four hundred (1 S. 22:2) and later six hundred (27:2), who through their loyalty and adeptness in battle helped him to secure the kingdom after Saul's death (1 Ch. 11:10). Sometimes David divided them into two or three units, with four hundred doing the fighting and two hundred protecting the camp and weapons (1 S. 25:13; 30:9f., 21-25). In the succession dispute between Adonijah and Solomon these warriors supported Solomon (1 K. 1:8, 10; 1 Ch. 29:4).

Some of the best of David's "mighty men" were known as "the thirty," and among these were three whose heroic deeds were especially notable. Josheb-bas-shebeth, the chief of "the three," killed eight hundred men with his spear in one encounter (2 S. 23:8; cf. 1 Ch. 11:11); Eleazar the son of Dodo struck down the Philistines single-handedly after the rest of the Israelite troops retreated (2 S. 23:9f.; cf. 1 Ch. 11:12); and through Shammah the son of Agee

the Hararite the Lord brought a great victory against the Philistines after the other Israelite troops had fled (2 S. 23:11f.; cf. 1 Ch. 11:13f. "The three" once fulfilled David's longing for a drink of water from the Philistine-held well in Bethlehem by an act of bravery that so overwhelmed David that he was unable to drink the water they brought him (2 S. 23:13-17 par. 1 Ch. 11:15-19).

While information about "the thirty" is limited, this special unit of troops probably served as a commanding council for the remaining warriors and for the army that David later assembled (2 S. 23:24-39 par. 1 Ch. 11:26-47). The position of chief of "the thirty" must have changed hands, because more than one person is identified as holding this title: Ishmaiah (1 Ch. 12:4), Amasai (v. 18), Jashobeam (according to 1 Ch. 11:11 *K;* cf. RSV mg.), and Abishai (according to the Syr. and two Hebrew MSS of 2 S. 23:18, and also the Syr. of 1 Ch. 11:20; the MT of both passages reads "the three"; cf. also RSV mg. of 1 Ch. 11:11, where the MT reads "the thirty").

Among David's *gibbôrîm* were also a group of mercenaries (including CHERETHITES and PELETHITES) who formed his bodyguard after he had become king (cf. 2 S. 23:23; cf. 15:18; 16:6; 1 K. 1:8, 10, 38, 44).

MIGRATE [Heb. *nāsaʿ*–'pull out'] (Gen. 11:2); AV, NEB, JOURNEY. The verb *nāsaʿ* perhaps developed in meaning from "pull out (a tent peg)" (see Isa. 33:20) to "journey" (so BDB, p. 652; KoB, p. 620). According to G. von Rad (*Genesis* [Eng. tr., rev. ed., *OTL,* 1972], p. 148) Gen. 11 here "betrays an acute historical observation: nationalities tend to emerge from great migrations." *See also* NOMADISM.

MIGRON mig'ron, mig'rən [Heb. *migrôn*; Gk. *Magōn*]. A place in Benjamin, on or near Wâdī Ṣuweinîṭ (1 S. 14:2; Isa. 10:28). 1 S. 14:2 states, "Saul was staying in the outskirts of Gibeah under the pomegranate tree which is at Migron." It is generally accepted that "Gibeah" here must be Geba (*Jebaʿ*), which is across the valley from Michmash (cf. *GP,* II, 387). Wâdī Ṣuweinîṭ is an eastward-deepening ravine that joins Wâdī Farah to form Wâdī Qelt, the spectacular ravine emptying into the Jordan Ghor near Jericho. According to v. 5 Michmash (Mukhmâs) was on the north and Geba on the south. Migron has been provisionally identified with Tell Miriam, which lies on the northern edge of the wadi where the crossing is less difficult, 7.5 km. (4.5 mi.) SE of Ramleh, and 1 km. (0.6 mi.) SW of Mukhmâs.

In Isaiah's vision of the Assyrian invasion (Isa. 10:28-34), however, Migron appears to be N of Michmash. It is possible, of course, to follow Alt's suggestion (abstracted in *GP,* II, 387) and assume that the invader sent the baggage to Michmash while the troops took the less difficult route through Migron. But it should be recognized that Isaiah was recounting a vision, not lecturing on geography. Albright's proposed emendation (*AASOR,* 4 [1924], 37, 135-38) — the transposition of the positions of Michmash and Geba in vv. 28f. — is likewise not necessary if the passage is accepted as a vision whose purpose was to portray the frightening advance of the enemy.

See also *GTTOT,* § 1588. W. S. LASOR

MIJAMIN mij'ə-min [Heb. *mîyāmîn, mîyāmin* (contraction of *minyāmîn*–'from the right hand,' i.e., 'fortunate'); Gk. *Meamin, Miamin, Meimin,* Apoc. *Maēlos*]; AV also MIAMIN, Apoc. MAELUS; NEB Apoc. MAELUS.

1. A priest, descendant of Aaron, in David's time, who was assigned to the sixth division of the temple service (1 Ch. 24:9).

2. A son of Parosh who was among those required to divorce their foreign wives (Ezr. 10:25 par. 1 Esd. 9:26).

3. A priest who participated in sealing the covenant with Nehemiah (Neh. 10:7 [MT 8]).

4. A priest who returned from the Exile with Zerubbabel (Neh. 12:5).

MIKLOTH mik'loth [Heb. *miqlôṯ*].

1. A Benjaminite, descendant of Jeiel, who lived at Gibeon; the father of Shimeah (1 Ch. 8:32; 9:37f.). A comparison of the two passages and support from LXX B, Vulg., Syr., and Arab. shows that the name Mikloth has been dropped by haplography at 8:31 and should be restored (cf. NEB; *BHS*).

2. According to the RSV mg. of 1 Ch. 27:4, a chief officer under Dodai the Ahohite during the reign of David. The RSV omits "and his division and Mikloth the chief officer," based on the LXX, but the AV includes it, based on the MT. The MT is corrupt here, and the clause should probably be deleted.

MIKNEIAH mik-nē'yə [Heb. *miqnēyāhû*–'Yahweh possesses']. A Levite of the second order in David's time, appointed as one of the leaders on the lyre in the procession at the return of the ark (1 Ch. 15:18, 21). His name is omitted in the similar list in 16:5.

MIKTAM mik'təm [Heb. *miḵtām*]; AV MICHTAM. A technical term of uncertain meaning in the superscriptions (= MT v. 1 in each case) to Pss. 16, 56–60 (and possibly in Isa. 38:9, if *miḵtāḇ* is emended to *miḵtām*). Several interpretations have been suggested. (1) An early rabbinic interpretation derived it from *keṭem,* "gold," and some modern interpreters have followed this theory (e.g., Luther, "a gold jewel"; C. A. Briggs, "a choice piece"; see Briggs, comm. on Psalms, I [*ICC,* 1906], lx). (2) Combining this derivation with the LXX translation *stēlographía,* "inscription," J. D. Michaelis understood it as a gold-lettered inscription (cf. M. Dahood, *Psalms I (1-50)* [*AB,* 1966], 87; P. D. Miller "Psalms and Inscriptions," in *SVT,* 32 [1981], 311-332, esp. pp. 312-14). (3) S. Mowinckel, on the other hand, derived *miḵtām* from Akk. *katāmu,* "cover" (i.e., "atone for"); thus he took it to mean a "Psalm of Atonement" (*Psalms in Israel's Worship* [Eng. tr. 1962], II, 209).

N. J. O.

MIKVAH mik-vä' or **MIKVEH** mik've [Heb. *miqwâ,* plur. *miqwā'ôṯ*. An immersion pool used for ritual washing (not used in this sense in the MT). The word *miqwâ* is translated "ditch" (AV), "reservoir" (RSV, NASB), or "cistern" (NEB) in Isa. 22:11. The word *miqweh,* "collection, gathering, mass," is used of water (Gen. 1:10; Ex. 7:19; Lev. 11:36).

The religious Jew was required to cleanse him- or herself from ceremonial uncleanness by immersion in a mikveh. Vessels or other objects that were required to be ceremonially clean could be immersed in a mikveh. According to the Mishnah, flowing water or, even better, water from a spring of any amount is valid for ritual purification (*Mikwaoth* i.6-8). An immersion pool (mikvah) is valid only if it contains 40 seahs (approximately 75 U.S. gals., 270 l.) of water and is deep enough for total immersion while standing (*Encyclopedia Judaica* [1971], XI, 1536 f.). Making a play on a similar word, *miqweh,* "gathering" (Gen. 1:10), the rabbis declared that all seas are valid as an immersion pool (*Mikwaoth* v.4; *Parah* viii.8). With a similar

Mikvah in the south wall of the temple mount in Jerusalem (W. S. LaSor)

play on the word *miqweh*, "hope," God is the one who cleanses Israel (*Yoma* viii.9, using Jer. 17:13 and Ezk. 36:25). Immersion was self-administered (see n. 4 to *Mikwaoth* iii.4 in Danby's edition), with a witness to ascertain that the entire body (including the hair) was immersed. Even if a finger was held by someone, or a girl had ribbons on her head, the immersion was invalid since it was not total (cf. *Mikwaoth* viii.5; ix.1 and n. 5 to ix.1 in Danby's edition).

The discovery of a number of *miqwā'ôṯ* in Israel, notably at Masada and in connection with the great staircase at the south wall of the temple mount as well as at Qumrân and several excavated synagogues, has increased interest in the immersion pools. By way of contrast, G. F. Moore, for example, seems to deal only with baptism of proselytes (*Judaism*, I [1927], 332ff.) and pagan slaves (*Judaism*, II [1927], 18, 136). He states, "In the whole ritual there is no suggestion that baptism was a real or symbolic purification . . . It is essentially an initiatory rite, with a forward and a backward look" (I, 334). I do not find in his work a single reference to the tractate *Mikwaoth*. Similarly, there is only one reference to *miqweh* in C. G. Montefiore and H. Loewe, *Rabbinic Anthology* (repr. 1974), and this concerns the play on the word for "hope" (p. 152).

In view of the practice of self-immersion, the relationship of John the Baptist to baptism probably needs further study. The expression "repent and be baptized," in some contexts at least, could as well be translated "repent and immerse yourself." Gk. *ho baptízōn* as the reflex of Heb. *hammaṭbîl* could have the meaning "the one causing someone to immerse him/herself" (cf. 1 Cor. 10:2 — Moses obviously did not perform the act of baptizing Israel in the Red Sea).

The presence of a fairly large number of immersion pools by the staircase leading to the temple beyond doubt indicates provision for a multitude of ritual immersions as worshipers approached the temple mount. Some scholars have suggested that this would be the most feasible place for the baptism of the three thousand to have taken place on the day of Pentecost (Acts 2:41). W. S. LASOR

MILALAI mil'ə-lī [Heb. *milᵉlay*]. A Levitical musician who took part in the dedication of the rebuilt wall of Jerusalem (Neh. 12:36). The name is omitted in the LXX and may have entered the MT through a scribal error (note the similarity with the following name, Gilalai).

MILCAH mil'kə [Heb. *milḵâ*–'queen'].

1. Daughter of Haran the brother of Abraham; wife of Nahor, another brother of Abraham; mother of eight sons; grandmother of Rebekah (Gen. 11:29; 22:20-23; 24:15, 24, 47).

2. One of the five daughters of Zelophehad (Nu. 26:33; 27:1; 36:11; Josh. 17:3); *see* MAHLAH **1.** It appears that the names of Zelophehad's daughters represented towns; Milcah may be an abbreviated form of Beth-milcah.

MILCOM mil'kəm. *See* MOLECH.

MILDEW [Heb. *yērāqôn*; Gk. generally *íkteros*–'jaundice']; NEB RED BLIGHT. A condition associated with "blasting" (Heb. *šiddāpôn*) in Dt. 28:22; 1 K. 8:37 par. 2 Ch. 6:28; Am. 4:9; Hag. 2:17. In Jer. 30:6 *yērāqôn* is translated "paleness" (AV) or "pale" (RSV, NEB) in reference to people, indicating either a jaundiced condition or loss of color due to fear. (The LXX interpreted 1 K. 8:37; 2 Ch. 6:28; Jer. 30:6; Am. 4:9 as referring to humans and thus used *íkteros*.) Arab. *yarqān*, related philologically, means "jaundice" or "blight." The mildew of grain may have been the fungus *Erysiphe graminis*, though many other fungi were designated "mildew." R. K. H.

MILE [Gk. *mílion*] (Mt. 5:41). Literally, "a thousand paces" (cf. Lat. *mille passuum*). The Roman mile was equal to about 1,479 m. (1,618 Eng. yds.) and thus was slightly shorter than the Eng. mile. In Lk. 24:13; Jn. 6:19; 11:18 the RSV and NEB translate the Gk. *stádia* (equal to about 185 m. or 607 ft.) into Eng. miles (the AV uses "furlongs"). *See* WEIGHTS AND MEASURES

MILETUS mī-lē'təs [Gk. *Milētos*]. The most illustrious Ionian seaport on the west coast of Asia Minor, situated on the south promontory of a gulf into which the Meander River once emptied. It lies in ruins today, but the small town of Palatia occupies part of the ancient site.

Although the identification of the ancient Hittite settlement of Millawanda with Miletus is not certain, the region was inhabited by Hittites before Minoan traders moved into the area. The discovery of Minoan artifacts of probable Cretan origin in the western segment of the city suggests a Minoan settlement, perhaps as early as the 16th or 15th cent. B.C. The area was certainly colonized by Mycenaean settlers, who fortified the city in the 13th cent. B.C. The fortifications were destroyed about a century later, but the importance of Miletus assured its rebuilding. If Homer is correct (*Il.* ii.868f.), the Carians controlled the city during the Trojan War. During the Ionian period this seaport was a leading city, a jewel for which Persians and Greeks regularly fought from the 6th to the 4th cents. B.C. In Roman times Miletus experienced significant prosperity, but during the Byzantine period it declined because the

silt from the river gradually closed the harbor and left the city about 8 km. (5 mi.) from the coast. Ephesus now lies overland less than 65 km. (40 mi.) N of Miletus, but in NT times the overland traveler had to go about 50 km. (30 mi.) farther, around the large Gulf of Priene. Today this gulf is an inland lake, and the island of Lade, which once sheltered the harbor, has become a hill surrounded by a swampy alluvial plain.

Paul was eager to reach Jerusalem by Pentecost on the return segment of his third missionary journey and did not wish to take the time necessary to stop at Ephesus. Accordingly, he summoned the Ephesian elders to meet him at the major seaport city of Miletus in order to give them his final charge (Acts 20:15–21:1). The last biblical reference to Miletus is 2 Tim. 4:30, which seems to indicate that Paul visited the city after his imprisonment in Rome.

German archeologists have worked the site several times in the 20th cent., and an extensive plan of the Roman city has been reconstructed. The seaport encompassed four harbors, the most sheltered being in the north. Near this inlet, where Paul may have landed, were the Delphinion (sanctuary of Apollo) and the northern agora (market). To the south were the town hall, a large agora, and a Serapeum (temple of the Egyptian god Serapis). Immediately to the west was a magnificent nymphaeum (bath) apparently dedicated to Queen Faustina, who visited the city *ca.* A.D. 164. It had both hot and cold rooms adorned with beautiful marble statues and friezes such as those of Apollo and the nine Muses, now in a museum in Istanbul. Along the coast to the northwest was a large theater, and on a small western peninsula was a temple to Athena. Although Apollo was the chief god of the Roman city, Athena had been worshiped there at least since the 7th cent. B.C.

A worshiper at the Apollo sanctuary of Miletus could pass through the sacred gate built in the time of Emperor Claudius (A.D. 41-54) and journey 18 km. (11 mi.) south along the sacred way to the magnificent Milesian temple of Apollo at Didyma (Branchidae), famed for its oracles. Construction of this temple began in the time of Alexander and continued through the Roman period, but it was never finished.

Not only was the city economically prosperous, architecturally beautiful, and religiously significant, but during the 7th and 6th cents. B.C. it also produced some of that period's most important Greek minds, including the great philosopher-scientist Thales and the early evolutionist Anaximander.

In the Christian period a Byzantine church was built within the environs of the great temple, but before Constantine few Christian memorials seem to have been erected at Miletus, probably because of the close imperial surveillance kept on this strategic seaport. During the 5th cent., however, it became an independent archbishopric.

MILK [Heb. *ḥālaḇ, hem'â* (Job 29:6, emending MT *ḥēmâ,* "anger," with some MSS; see *BHS,* comms.); Gk. *gála*]; AV also BUTTER (Job 29:6); NEB also MILKY WATER (Cant. 5:12). Humanity's oldest food is a white or creamy fluid secreted by the mammary glands of female mammals for the nourishing of their young. In Scripture the term is used both of human secretions (Isa. 28.9) and those of animals (Ex. 23:19).

As a food milk ranked next in importance to bread (Sir. 39:26). Palestine is frequently described as a land "flowing with milk and honey" (e.g., Ex. 3:8, 17; Nu. 13:27; Dt. 6:3; Josh. 5:6; Jer. 11:5; Ezk. 20:6, 15; cf. Sir. 46:8; Bar. 1:20). Milk was among the first things set before the weary traveler (Gen. 18:8). In fact, it was considered a luxury (Jgs. 5:25; Cant. 5:1). The people used the milk of cattle and also that of sheep (Dt. 32:14), and especially that of goats (Prov. 27:27). It was received in pails and kept in leather bottles (Jgs. 4:19), where it turned sour quickly in the warm climate of Palestine before being poured out thickly like a melting substance (cf. Job 10:10). Cheese of various kinds was made from it; or the curds were eaten with bread, and possibly also made into butter by churning (Prov. 30:33). *See* FOOD III.

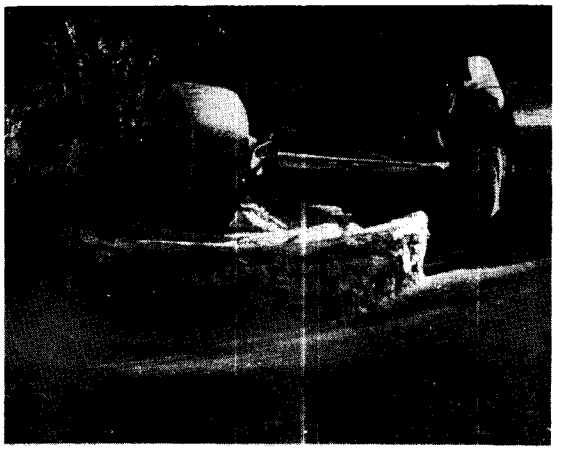
From the references in Ex. 23:19; 34:26; Dt. 14:21 the Israelites appear to have been prohibited from cooking a young goat in its mother's milk, and by a very general understanding of these passages Jews have come to abstain from consuming mixtures of meat and milk. Support of this tradition was thought to be furnished by a damaged text from Ugarit (*UT,* 52:14), which was interpreted in this way by C. Virolleaud (*Syria,* 14 [1933], 128-151) and followed by H. L. Ginsberg (*Journal of the Royal Asiatic Society* [1935], pp. 45-72). Closer examination shows, however, that the Ugaritic text says nothing about any physical relationship between the kid and the source of the milk in which it was supposedly cooked. Furthermore, the term that Virolleaud rendered "cook" (*ṯbḥ*) actually seems to mean "slaughter" (cf. Heb. *ṭbḥ,* "slaughter"), thus removing the proposed support completely. Ugaritic studies therefore do not explain Dt. 14:21, and the most that can be said about the verse is that it prohibits something that was abhorrent in Canaanite religion, though for what reason is unknown. See P. C. Craigie, *Ugarit and the OT* (1983), pp. 74-76.

Figuratively the word is used of abundance (Gen. 49:12; Isa. 7:21f.); of a loved one's charms (Cant. 4:11); of blessings (Isa. 55:1; 60:16; Joel 3:18 [MT 4:18]); of the (spiritual) food of immature people (1 Cor. 3:2; He. 5:12f.; cf. 2 Esd. 8:10f.); of purity (1 Pet. 2:2; cf. Lam. 4:7). R. K. H.

MILL; MILLSTONE [Heb. *rēḥayim* (Ex. 11:5; Nu. 11:8; Dt. 24:6; Isa. 47:2; Jer. 25:10), *reḵeḇ* ("upper millstone," Dt. 24:6), *pelaḥ reḵeḇ* ("upper millstone," Jgs. 9:53; 2 S. 11:21), *pelaḥ taḥtîṯ* ("nether millstone," Job 41:24 [MT 16]), *ṭāḥan* ("grind at the mill," Jgs. 16:21), *ṭᵉḥôn* (Lam. 5:13); Gk. *mýlos onikós*–'donkey millstone' ("great millstone," Mt. 18:6; Lk. 17:2), *mýlinos mégas* ("great millstone," Rev. 18:21), *mýlos* (Mt. 24:41; Rev. 18:22), *líthos mylikós* ("great millstone," Mk. 9:42)]; NEB also HANDMILL, "to grind corn" (Lam. 5:13).

In biblical times mills were used to GRIND grain and — during the journey through the wilderness — manna (Nu. 11:8). Primarily one basic type of handmill was used in Israel during the whole of the OT period. These mills, consisting of two carved stones (note the dual ending on *rēḥayim*), were made of basalt, a rough black volcanic rock whose hardness was proverbial (Job 41:24). Although the sizes of the mills varied, a typical bottom stone (*pelaḥ taḥtîṯ*) was rectangular in shape and had a flat or slightly concave surface. The miller knelt at one end of this semi-stationary stone, which sloped downward about 15° away from the miller (see *ANEP,* no. 149, for a picture of an Egyptian model, *ca.* 2700-2200 B.C.). The upper stone (*reḵeḇ* or *pelaḥ reḵeḇ*) was smaller in size and fitted into the hand of the worker. After placing the grain on the lower stone, the miller rubbed the upper stone against the lower in a back-and-forth motion, applying downward pressure on the upper stone. The ground grain fell off the far end of the mill, forming a small heap.

Scattered archeological finds indicate that small rotary handmills may have been in use in the Levant from 1200 B.C., but their usage was very limited. They may have



been primarily employed to grind pigments (see Forbes, pp. 148f.). Rotary handmills were not in common use until the Hellenistic period (*ca.* 330 B.C. to 63 B.C.; Forbes, p. 146; Moritz, p. 105).

Grinding grain was a daily task usually performed by women or their female slaves (Ex. 11:5). Isa. 47:2 (cf. Ex. 11:5) indicates that this was considered humble work. Occasionally male captives such as Samson were humiliated by being forced to grind at the mill (Jgs. 16:21; Lam. 5:13). For poor families the mill was a valuable piece of equipment. To lose the mill, or even just the upper millstone, would deprive the family of the means of making bread, the basic element of their diet; thus the Israelites were forbidden to take such an essential household tool as a pledge against a loan (Dt. 24:6). The grinding of the millstones was a common sound in the small Israelite villages; its absence indicated that catastrophe had befallen the community (Jer. 25:10; Rev. 18:22). A woman of Thebez once used a millstone as a deadly weapon. Standing on the top of the city wall she dropped an upper millstone on the head of "King" Abimelech, who besieging the city had approached its wall too closely (Jgs. 9:53; 2 S. 11:21).

Some time during the 2nd or 1st cent. B.C. donkey-mills were introduced. These mills were also composed of two parts but were much larger than the handmills used in OT times. Usually made of basalt, the lower portion (Lat. *meta*) was a solid bell-shaped stationary piece, typically measuring about 75 cm. (2.5 ft.) in diameter at the base and 60 cm. (2 ft.) in height. Placed on top of this was a large basalt stone carved in the shape of a hollowed-out hour glass (Lat. *catillus*). Its outer diameter was approximately 70 cm. (28 in.), while at the narrow "waist" its inner diameter was only about 18 cm. (7 in.). A donkey was yoked to this upper "hopper," which was filled with grain. As the donkey walked in a circle, the grain was ground between the rotating upper hopper and the lower, stationary stone. In this way large amounts of grain could be processed for commercial purposes. Many such mills have been found at Roman sites such as Pompeii and Ostia, and a few have been discovered in Israel also. Since this type of mill was not introduced until the late Hellenistic or early Roman period, it could not have been the type of mill that Samson operated.

Small grain mill from Beth-shean. The upper circular stone was rotated by a lever inserted in the hole on the side (Jamie Simson/Das Photo)

Large grist mill from Alaça Hüyük (D. H. Condit)

Jesus referred to the upper stone of a donkey mill when He said that those who cause "little ones" to sin would be better off to have a "great millstone" fastened about their necks and be cast into the sea (Mt. 18:6 par. Mk. 9:42; Lk. 17:2). A similar image is used in Rev. 18:21, which depicts the violent downfall of Babylon (= Rome) as a great millstone being hurled into the sea by a mighty angel. A sign of the city's desolation will be the cessation of "the sound of the millstone" (v. 22). In His Olivet Discourse Jesus used the image of two women at their daily task of grinding grain (Mt. 24:41; cf. Lk. 17:35). The TR here reads *mýlōn* ("mill, millhouse"), but the earliest texts read *mýlos;* the phrase is probably best rendered "grinding with the handmill" (Bauer, rev., p. 529).

C. G. RASMUSSEN

MILLENNIUM mə-len'ē-əm [Lat. *mille*–'thousand' plus *annus*–'year']. A time of penultimate divine triumph over the forces of evil on earth before God's final conquest of all His enemies and the establishment of everlasting righteousness. The corresponding Greek expression in Rev. 20:4-7, *chília étē,* gives rise to the term "chiliasm," properly a synonym for "millennialism" but sometimes used in a pejorative sense to designate especially gross and sensual conceptions of bliss on earth.

C. Premillennial Philosophy of History

I. In Ancient Religious Literature.–A. Canonical Picture. Much stress is placed in the canonical OT on a future condition of earthly blessedness for the Jewish nation (Isa. 9:6; 11:1–12:6; 40:9-11; 52:7-12; Jer. 33:17-22; Ezk. 37:25; Hos. 3:4f.; Joel 3:20 [MT 4:20]; Am. 9:14f.; Zec. 9:9f.; etc.). But this period is not temporally limited and so, though compatible with a time of millennial bliss, does not expressly require it. The eternity of the messianic kingdom as delineated in such key prophetic books of the OT as Daniel (2:44; 7:27) leads millennial interpreters to extend the history of Israel's restoration across the millennial age into the ultimate eschaton when "God shall be all in all" (cf. Culver; W. M. Smith, *World Crisis and the Prophetic Scriptures* [1951], pp. 179-237; *Israeli/Arab Conflict and the Bible* [1967]; Saarnivaara, pp. 24-37). Thus, in spite of attempts, represented by W. E. Biederwolf's *Millennium Bible* (1924), to find chiliastic teaching clearly set forth in the OT, the biblical foundation of the doctrine cannot be located there.

As for the NT, 1 Cor. 15:22ff. is regarded, even by those who oppose millennial views, as providing through its "doctrine of a limited reign of Christ . . . a foothold in the Church for chiliastic expectations" (E. Bratke, in Sch.-Herz. [repr. 1950], VII, 375). Other NT passages to which millennial interpreters occasionally appeal are Mt. 19:28; 25:31-46; Lk. 14:14; 1 Thess. 4:13-18. But it is almost universally admitted, by both opponents and advocates of millennialism, that the case for the doctrine rests squarely on the exegesis of Rev. 20. According to this text, after Messiah's victory over the beast, the false prophet, and all their followers, Satan will be confined in a bottomless pit for one thousand years. During this period Christ will reign with His martyred saints, who have been brought to life in the "first resurrection" at the outset of the millennial period. At the end of the thousand years Satan will be loosed for a little time, the ultimate battle between God and His adversaries will occur, and the last judgment will take place, followed by "second death" of all evil forces and the establishment of everlasting righteousness. The disputed questions relative to this passage are whether the text is to be taken literally (millennialism) or figuratively (amillennialism) and, assuming a millennial interpretation, whether the second coming of the Lord is to precede (premillennialism) or follow (postmillennialism) the time of chiliastic victory. To these questions we shall return later (see III below).

B. Apocrypha and Pseudepigrapha. Noncanonical Jewish literature of the biblical era offers several instances of temporally delimited periods of divine rule. The four most important examples, in chronological order, are: (1) 1 En. 91:12-17 and ch. 93; (2) 2 En. 32:3–33:1; (3) 2 Esd. 5:1–7:35; and (4) 2 Baruch.

(1) The 1 Enoch passages are in the section known as the "Apocalypse of Weeks," considered by R. H. Charles (*Book of Enoch* [1917], p. xiv) "the oldest pre-Maccabaean" portion of the book. The seer has Enoch predict the future in terms of ten unequal "weeks." During the final three apocalyptic weeks judgment will take place against oppressors (eighth week), the whole godless earth (ninth week), and the evil angels (tenth week). Although only at the end of time, following the tenth week, does perfection come about ("the first heaven shall depart and pass away, and a new heaven shall appear, . . . and all shall be in goodness and righteousness, and sin shall no more be mentioned for ever"), the eighth week constitutes a kind of millennial interlude, since "at its close they [the righteous] shall acquire houses through their righteousness, and a house [the temple] shall be built for the Great King in glory for evermore, and all mankind shall look to the path of uprightness" (Charles, pp. 132-34). No personal Messiah, however, plays a role in these predictions.

(2) An analogous picture is offered by 2 En. 32:3–33:1. In this apocalypse, "written by an Alexandrian Jew during the first fifty years of our era" (R. H. Pfeiffer), the world exists for a total of seven days of a thousand years each, and the Lord decrees that the seventh constitutes a penultimate sabbath, to be followed by the endless eighth day of eternal bliss. No Messiah is integrated into this millennial picture, but the implicit use of the canonical theme that "a thousand years in thy sight are but as yesterday" (Ps. 90:4; 2 Pet. 3:8), with the consequent specification of a future era of explicitly millennial dimensions, is noteworthy.

(3) 2 Esd. 5:1–7:35 presents a vision of the end time almost certainly written before the end of the 1st cent. A.D. "The details include the promise that God's Messiah will reign in his kingdom four hundred years; after this he and all humankind will die, and primeval silence will prevail for seven days; finally will come the Resurrection and the Day of Judgment" (B. M. Metzger, *Intro. to the Apocrypha* [1957], p. 26). The sharp contrasts between this prediction and canonical teaching should be noted — contrasts in no way blunted by the reference to "Jesus" in 7:28, which derives from the Latin text only and "is due to a Christian corrector" (Oesterley). The four-hundred-year figure is explained in the Talmud (T.B. *Sanhedrin* 99a; Midr. *Tanhuma, Ekeb* 7) as deriving from Israel's period of captivity in Egypt (cf. Gen. 15:13; Ps. 90:15; Mic. 7:15). Other talmudic estimates of the length of Messiah's kingdom were 40 years (equaling the period in the wilderness), 70 years, 100 years, 365 years, 600 years, 1000 years, 2000 years, and 7000 years. The logic behind such figures was often the assumption of symmetry (history consisted of 2000 years before the giving of the Law and 2000 years under it, so Messiah's reign would be of this same length) or the symbolism of joy contained in the numbers 1000 and 7000 (see F. Weber, *Jüdische Theologie auf Grund des Talmud* [1897], pp. 371-73).

(4) 2 Baruch, "written about the same time as II (IV) Esdras (*ca.* A.D. 90)" (Pfeiffer, *HNTT*, p. 86), portrays a messianic kingdom as the successor to four world kingdoms, the last of which is Rome (chs. 39–40). In chs. 29 and 73 the messianic reign is depicted in terms quite obviously recapitulating the Edenic paradise and annulling the curse placed upon our first parents: childbearing will occur painlessly (cf. Gen. 3:16), and the soil will become so fertile (cf. Gen. 3:17-19) that each vine will have a thousand branches, each branch a thousand clusters, each cluster a thousand grapes! Papias later applied this description to the Christian millennium.

What is the bearing of these pseudepigraphical and apocryphal millennialisms on the NT conception as set out in Rev. 20? If any influence exists at all, it is of the most indirect kind, not extending beyond the general idea of a future divine interregnum. Neither 1 Enoch nor 2 Enoch connects a personal Messiah with penultimate bliss; the Messiah of 2 Esdras reigns only four hundred years and then dies; and the technicolor portrait of chiliastic blessings in 2 Baruch (almost certainly composed too late to have influenced Revelation in any case) has no parallel in the NT. Even the thousand-year span of time in Rev. 20 need not be derived from 2 Enoch, since the apostle John was able to rely, no less than the author of 2 Enoch, on Ps. 90:4 for the 1 day = 1000 years formula.

C. Question of Persian Origin. Some have made efforts

to locate in ancient Persian religious literature an extra-canonical source for the Bible's millennial teaching. Zoroastrianism conceived of the last times as consisting of three millennia, each with its particular savior. "The later Parsi legends distinguish three great prophets who will appear before the end of the world.... They will be commissioned to check the influence of the devil, which increases at the time when this world is verging toward its end" (M. Haug, *Essays on the Sacred Language, Writings, and Religion of the Parsis* [1878], p. 314). Only with the appearance of the third and greatest savior — Sosyosh, a supernatural offspring of Zoroaster himself — will the world be permanently transformed; then "the devil will disappear" and "all the world will remain for eternity in a state of righteousness" (Yt. 19:89f.; quoted in Haug, p. 217). We are told that "these ideas exerted strong influence upon the apocalyptic expectations of late Judaism" (*Encyclopedia of the Lutheran Church*, II [1965], *s.v.* [K. Hutten]), and this opinion is supported by F. Cumont (*RHR* [1931], 29-96) and M. Eliade (*Myth of the Eternal Return* [1954], pp. 124-27). On the other hand, W. Adams Brown warned, "Our sources for the Persian eschatology are so late (the Bundahis, in their present form, dating not earlier than the 7th cent. A.D....) that we must use great caution in drawing conclusions" (*HDB*, III, *s.v.*). Factors such as the lateness of the Mazdean sources and the radical difference between their trimillennial view and the unitary messianic kingdom in the Judeo-Christian tradition have led to a rejection of the Persian-influence theory by N. Söderblom (*La Vie future d'après le mazdéisme* [1901], pp. 270-320), and, more recently, P. Vulliaud (p. 33); and with this judgment we concur. One must be especially careful, even when some genuine similarities exist between two religious positions, not to assume that one must have influenced the other. The unique characteristics of the millennial eschatology in Rev. 20 warrant the closest examination on their own ground.

II. In Church History.–*A. Patristic Period.* Those who regard millennialism as an alien import into the Christian faith have been much embarrassed by its early and widespread acceptance in the patristic Church. Salmond, for example, who considered millennial conceptions totally foreign to Christ's teachings, had to admit that "the dogma of a Millennium... took possession of Christian thought at so early a date and with so strong a grasp that it has sometimes been reckoned an integral part of the primitive Christian faith" (p. 312).

Papias, who had personal contact with those taught by Christ and His apostles and may well have been a disciple of the apostle John, asserted that "the Lord used to teach concerning those [end] times" that "there will be a period of a thousand years after the resurrection of the dead and the kingdom of Christ will be set up in material form on this very earth" (cited in Eusebius *HE* iii.39.12; Irenaeus *Adv. haer.* v.33.3f.). Though Papias fleshed out his millennial reference with details from 2 Baruch (see above), his account is a weighty testimony to primitive Christian eschatological beliefs.

The author of the Epistle of Barnabas (no later than A.D. 138) "is a follower of chiliasm. The six days of creation mean a period of six thousand years because a thousand years are like one day in the eyes of God. In six days, that is in six thousand years, everything will be completed, after which the present evil time will be destroyed and the Son of God will come again and judge the godless and change the sun and the moon and the stars and he will truly rest on the seventh day. Then will dawn the sabbath of the millennial kingdom (15, 1-9)" (Quasten, I, 89).

Justin Martyr, "the most important of the Greek apologists of the second century" (Quasten, I, 196), while granting that "many who belong to the pure and pious faith and are true Christians think otherwise" than he on the millennial issue, explicitly declared: "I and others are right-minded Christians in all points and are assured that there will be a resurrection of the dead and a thousand years in Jerusalem, which will then be built, adorned and enlarged" (*Dial.* 80f.; cf. J. Daniélou, *VC*, 2 [1948], 1-16).

Other important patristic millennialists were Irenaeus (see below, the final quotation in this article); Hippolytus of Rome and Julius "Africanus" (see Froom, I, 268-282, and note his helpful tabular summary of patristic views, pp. 458f.); Victorinus of Pettau, the chiliasm of whose commentary on Revelation was edited out by amillennialist Jerome (see Quasten, II, 411-13; Froom, I, 337-344); and the Africans Tertullian (*Adv. Marc.* iii.24; *Apol.* 48; cf. Quasten, II, 318, 339f.), Cyprian (see Froom, I, 331-36), and Lactantius (whose detailed picture of millennial bliss in *Divine Institutes* vii.14, 24, 26 by no means presupposes Zoroastrian influence — Eliade notwithstanding). In taking a millennial viewpoint, these fathers ranged themselves on the side of orthodoxy in two particulars: they supported the apostolicity and canonicity of Revelation (against those who combined a denial of its authenticity with amillennialism, e.g., Dionysius of Alexandria, as cited in Eusebius *HE* vii.14.1-3; 24.6-8); and they opposed both the Gnostics, whose dualistic spiritualizing of Christian doctrine completely wiped out eschatological hope, and Christian Platonists such as Origen (*De prin.* ii.11.2), whose rejection of a literal millennium stemmed from an idealistic depreciation of matter and a highly dangerous allegorical hermeneutic (A. C. McGiffert, *History of Christian Thought*, I [1932], 227f.).

It is a moot point whether the Clementine epistles, the Shepherd of Hermas, the Didache, the Apocalypse of Peter, Melito of Sardis, the letters of the Lyons martyrs, Methodius of Tyre, and Commodian show traces of millennialism. Polycarp of Smyrna and Ignatius of Antioch certainly do not — but little can be derived one way or the other from arguments from silence. Active opposition to chiliastic views arose (1) as a result of Origen's influence (thus Eusebius's later shift to amillennialism, *HE* iii.39, with his false attribution of chiliastic origins to the heretic Cerinthus, *HE* iii.28); (2) in reaction to Montanist excesses, e.g., their prophetess's claim that "Christ came to me in the form of a woman... and revealed to me that this place [the insignificant village of Pepuza] is holy and that here Jerusalem will come down from heaven" (Epiphanius xlix.1; cf. McGiffert, I, 171); and (3) as a defense against attempts to calculate the end time (a practice that has consistently brought discredit, through guilt-by-association, to millennialism in every age: e.g., cf. Vulliaud, pp. 75-85; Toulmin and Goodfield, *Discovery of Time* [1965], pp. 55-73; H. J. Forman, *Story of Prophecy* [1940]; R. Lewinsohn, *Science, Prophecy and Prediction* [1961]; L. Festinger, *et al.*, *When Prophecy Fails* [1956]; T. C. Graebner, *Prophecy and the War* [1918]; *War in the Light of Prophecy* [1941]; and finally, as an especially gross modern example, O. J. Smith, *Is the Antichrist at Hand? What of Mussolini* [1927]).

B. Middle Ages and Reformation. No theologian of the ancient Church had a greater influence on its history during the medieval period than Augustine. Once a chiliast himself but driven away from that position by the "immoderate, carnal" extremism of some of its advocates (*Civ. Dei* xx.7), he followed the symbolical-mystical hermeneutic system of the fourth-century donatist Tyconius in arguing that the thousand years of Rev. 20 actually designated the interval "from the first coming of Christ to the end of the world,

when He shall come the second time" (xx.8). Thus was "a new era in prophetic interpretation" introduced, wherein Augustine's conception of the millennium as "spiritualized into a present politico-religious fact, fastens itself upon the church for about thirteen long centuries" (Froom, I, 479, with tabular summary of medieval views, 896f.; see also R. C. Petry, *Christian Eschatology and Social Thought: A Historical Essay on the Social Implications of Some Selected Aspects in Christian Eschatology to A.D. 1500* [1956], pp. 312-336). Millennialism did not die, but under the pressure of the "medieval synthesis" it tended to assume aberrational forms, particularly after the year 1000 when the Augustinian chronology (if literalized) ran out. Thus, as is frequently the case, polar extremes developed: mystical, spiritualistic chiliasms presupposing the end of the church-age, as represented by Joachim of Fiore's "third age of the Spirit," and by Cathari, Spiritual Franciscans, and Waldenses; and grossly materialistic chiliasms bound up with the crusading enterprise, as illustrated by Urban II's speech at Clermont: "As the times of Antichrist are approaching and as the East, and especially Jerusalem, will be the central point of attack, there must be Christians there to resist." (On both varieties of medieval chiliasm, see J. J. von Döllinger *The Prophetic Spirit and the Prophecies of the Christian Era,* published with his *Fables Respecting the Popes* [1872]; A. Vasilev, *Byzantion* [1942/43], pp. 462-502; R. A. Knox, *Enthusiasm* [1950], pp. 110-13; and esp. N. Cohn, *Pursuit of the Millennium . . . in Europe from the 11th to the 16th Century* [1961].)

Though both Renaissance and Reformation stood against the world view of medieval scholasticism, they did not oppose the accepted Augustinian amillennialism. The Renaissance was too favorable toward Neoplatonic modes of thought to be chiliastic, and the Reformers were so (legitimately) preoccupied with correcting the Church's soteriological errors that they could not give high priority to eschatology. But from the pre-Reformers Wyclif and Hus to Luther, Calvin, and the doctrinal affirmations of Protestant Orthodoxy, the papacy was identified with the antichrist. This conviction led many Reformation Protestants to believe that the end of the world was at hand (T. F. Torrance, *SJT,* Occasional Papers 2, pp. 36-62; Vulliaud, pp. 127f.). Had it not been for the outbreak of chiliasm in a particularly offensive form at Münster (1534), early Church teaching on the millennium might have been recovered along with other doctrines obscured in the medieval synthesis. The speculations of radicals, however, as concretized in Münzer's "Zion," were so offensive to all that this was rendered impossible. The Augsburg Confession, art. 17 (Lutheran) and the Helvetic Confession, art. 11 (Reformed) expressly rejected such "Jewish opinions" (but, let it be noted, did not reject millennialism per se — cf. Peters, *Theocratic Kingdom,* I, 531-34; M. Reu, *Lutheran Dogmatics* [1951], pp. 483-87; and Saarnivaara, pp. 94f.).

Virtually all the Reformation commentators on Rev. 20 followed the Augustinian line, even when other aspects of their eschatology seemed to cry out for a millennial interpretation of the passage (cf. tabulation of views in Froom, II [1948], 530f.). The same was true even of Anabaptists: "except for Melchior Hofmann, only a few fringe figures of the Anabaptist movement were chiliastic" (*Mennonite Encyclopedia,* I, 557). The oft-heard claim that theosophical mystic Jacob Boehme was a millennialist is repudiated by his own writings (cf. J. J. Stoudt, *Sunrise to Eternity* [1957], pp. 127f.). In contrast, many of the seventeenth-century divines of the Westminster Assembly, e.g., Thomas Goodwin, were decidedly premillennial in their theology (cf. P. Schaff, *Creeds of Christendom,* I, 727-746); and "Cambridge Platonist" Henry More believed in a chiliastic future when "all the goodly Inventions of nice Theologers shall cease . . . and the Gospel shall be exalted" (see A. Lichtenstein, *Henry More* [1962], pp. 101f.).

C. Modern Times. New England Puritanism, continental Pietism, and the evangelical revivals of the 18th cent. came long enough after the events of the Reformation that perspective on the Reformers' limitations became possible. Among the results were increased missionary outreach and more careful eschatological study. Chiliasm revived, and it was generally of the premillennial variety (cf. the tabular summary of seventeenth- and eighteenth-century interpretations of Rev. 20 in Froom, II, 786f.). Except for Jonathan Edwards, who was postmillennial (J. P. Martin, *The Last Judgment . . . from Orthodoxy to Ritschl* [1963], pp. 71f.), virtually all the Christian leaders of colonial America maintained premillennialism: John Davenport; Samuel, Increase, and Cotton Mather; Samuel Sewall; Timothy Dwight (tabulation of views in Froom, III, 252f.; see also G. H. Williams, *Wilderness and Paradise in Christian Thought* [1962]). Spener, Halle Pietist and hymnwriter Joachim Lange, and distinguished NT scholar J. A. Bengel held millennial views. John Wesley's hymns attest his early premillennarian belief, though later he embraced Bengel's concept of a future double millennium (first on earth, with Satan bound; second in heaven, representing the saints' rule with Christ).

In sum, it can hardly be maintained, as is commonly alleged, that chiliastic belief did not have serious influence in Christendom before the rise of Adventist sects and J. N. Darby's Plymouth Brethren in the 19th cent., and the appearance of the Scofield Reference Bible and the Fundamentalist movement early in the 20th cent. (cf. W. H. Rutgers, *Premillennialism in America* [1930]; L. Gaspar, *The Fundamentalist Movement* [1963], pp. 7f., 53f., 157). Certainly Darby and the Scofield editors introduced the Church to dispensationalism (at least as a formal theology), and premillennialism was an essential element in that hermeneutical schema; but a premillennarian view of Rev. 20 did not logically require dispensational commitment and had in fact existed independently of it since the early days of the Church.

D. Utopian Dream. Secular utopianism is a theme in the history of ideas correlative with the millennial hope, and it is instructive to note that where Christian millennial expectation has been absent or downplayed its utopian counterpart has entered the breach. Greco-Roman civilization conceived of history cyclically, with the "golden age" as a future hope (cf. Vergil's 4th Eclogue). During the amillennial Middle Ages the legend of an idealistic kingdom in the East, under the rule of Christian "Prester John," captured the imagination and directly influenced the mythology of exploration (Ponce de Leon's search for the fountain of youth, Pizarro's quest for a city of gold). The Renaissance, similarly unsympathetic to chiliasm, marked the beginning of literary utopianism wth the work of Thomas More. The rise of the modern secular era during the deistic "Enlightenment" offered a secular alternative to the Christian millennium in what Carl Becker perceptively termed "the heavenly city of the 18th-century philosophers." The Marxist goal of a "classless society," the Nazi dream of the "thousand-year Reich," and aspects of the capitalist-materialist "American way of life" are inversions of the millennial hope. E. Voegelin (*Order and History* [1956]) has rightly seen them as illustrations of "metastatic gnosis," the idolatrous effort of man to create a millennial kingdom for himself without God. It would appear that the loss of theocentric chiliasm

leaves a vacuum into which rush the monstrosities of anthropocentric utopianism. At the same time, perennial utopian dreams (and extrabiblical religious chiliasms, as in the Parsi faith — see I.C above) can be viewed as the groping of the human soul, individual and collective, for the truth embodied in Christian eschatology. (See, e.g., S. Baring-Gould, *Curious Myths of the Middle Ages* [1866-1868]; K. Mannheim, *Ideology and Utopia* [1936]; E. Sanceau, *The Land of Prester John* [1944]; F. R. White, ed., *Famous Utopias of the Renaissance* [1946]; K. Amis, *New Maps of Hell* [1960]; S. B. Liljegren, *Studies on the Origin and Early Tradition of English Utopian Fiction* [1961]; J. P. Roux, *Les Explorateurs au moyen âge* [1961]; R. Thévenin, *Les Pays légendaires* [1961]; C. Walsh, *From Utopia to Nightmare* [1962]; G. Kateb, *Utopia and Its Enemies* [1963]; *Daedalus*, Spring, 1965; L. Gallagher, *More's "Utopia" and Its Critics* [1964]; E. L. Tuveson, *Millennium and Utopia* [1964]; H. B. Franklin, *Future Perfect* [1966]; M. R. Hillegas, *The Future as Nightmare* [1967]; T. Molnar, *Utopia, the Perennial Heresy* [1972]; J. W. Montgomery, *Where Is History Going?* [1969].)

III. Contrasting Millennialisms.–A. Amillennial Allegory. Since chiliasm is bound directly to the interpretation of Rev. 20, consideration must be given to the diverse ways in which this passage has been exegeted. Amillennialists are unconvinced that the chapter should compel belief in a literal period of penultimate divine triumph, either before or after the Parousia. Liberal theology takes this viewpoint because of its objection to the miraculous character of predictive prophecy and because of its reductionistic approach to biblical inspiration; the book of Revelation loses force because of its alleged disunity, lack of authenticity, or factual unreliability (see, e.g., A. Harnack, *Enc.Brit.* [11th ed. 1910-1911], XVIII, 461-63; R. H. Charles, *Studies in the Apocalypse* [1913]; comm. on Revelation [2 vols., *ICC*, 1920]; *Lectures on the Apocalypse* [1922]; G. R. Berry, *Premillennialism and OT Prediction* [1929]; and R. W. McEwen's "Factors in the Modern Survival of Millennialism" [Diss., University of Chicago, 1933]). "Conservative" amillennialism holds to a symbolical interpretation of Rev. 20, either in the Augustinian manner or along the lines of W. W. Milligan (*Expos.B.*): "The saints reign for a thousand years; that is, they are introduced into a state of perfect and glorious victory." Important orthodox proponents of amillennialism include G. Vos, *Teaching of Jesus Concerning the Kingdom of God and the Church* (1903; repr. 1951); W. Masselink, *Why Thousand Years?* (1930); F. E. Hamilton, *Basis of Millennial Faith* (1942); P. Mauro, *The Seventy Weeks* (1944); O. T. Allis, *Prophecy and the Church* (1945); G. L. Murray, *Millennial Studies* (1948); A. Pieters, *Seed of Abraham* (1950); L. Berkhof, *Kingdom of God* (1951); *Second Coming of Christ* (1953); J. Wilmot, *Inspired Principles of Prophetic Interpretation* (1967). The difficulty all amillennialisms face is the textual weight of Rev. 20. The admission of liberal amillennialist Salmond concerning this passage is noteworthy: "The figurative interpretation, it must be owned, cannot be made exegetically good even in its most plausible applications.... This remarkable paragraph in John's Apocalypse speaks of a real millennial reign of Christ on earth together with certain of His saints, which comes in between a first resurrection and the final judgment" (pp. 441f.).

B. Postmillennial Progress. Postmillennialism of both a "conservative" and a "liberal" type is likewise to be found in the Church. Orthodox advocates of this position (among the best: P. Fairbairn, *Interpretation of Prophecy* [1865]; Hodge, Shedd, and Strong, in their systematic theologies; B. B. Warfield, *Biblical Doctrines* [1929]; J. M. Kik, *Revelation Twenty* [1955]; L. Boettner, *The Millennium* [1958]) interpret Rev. 20 less symbolically than do the amillennialists (a period of divinely ordained blessedness will in fact precede the end), but nonliteral force is given to the details of the chapter (no de facto resurrection of martyrs or physical presence of Christ on earth is anticipated during the millennial period). Rather, God's immanent power will be more fully manifest over His enemies as the time of Christ's return draws closer. Boettner argues, "We do not understand how anyone can take a long range view of history and deny that across the centuries there has been and continues to be great progress, and that the trend is definitely toward a better world" (p. 136).

This is precisely the opinion of "liberal" postmillennialists — but their confidence stems from a different quarter: the eighteenth-century optimistic view of man as basically good and the nineteenth-century "myth of progress." Thus the old modernism found premillennialism abhorrent because "the world is found to be growing constantly better" (S. J. Case, *The Millennial Hope* [1918], p. 238) and "the clear vision of present-day prophets... in religion, in philosophy, and in business, revels in a growing future of blessedness for mankind" (G. P. Mains, *Premillennialism* [1920], p. 107). Unchastened by two world wars, the new secular theology endeavors to revivify nineteenth-century motifs along much the same lines, e.g., with its view of an immanent Christ more and more fully manifested in the social movements of our day. (For critique see J. W. Montgomery, *Suicide of Christian Theology* [1970].) Protestant "process theology" (J. B. Cobb, Jr., S. Ogden, N. Pittenger) sees man dynamically growing into God. Roman Catholic evolutionary theologian Teilhard de Chardin glimpses God "up ahead" where human history will be fully divinized at a Christic "Omega point" (cf. Schillebeeckx, *God the Future of Man* [1968]; J. W. Montgomery, *Ecumenicity, Evangelicals and Rome* [1969]). Moltmann's "theology of hope," in part dependent on Ernst Bloch's dialectic humanism, has similar affinities with postmillennial confidence in the future of the human drama.

Critics of postmillennialism, whether of the conservative or of the liberal variety, argue that neither the Bible nor human history offers ground for assuming that the human situation is in process of continual amelioration; indeed, because of humanity's sinful condition, the reverse would appear to be the case. And "if world history is not a movement of progress but rather tends to an increasing concentration of anti-christian power, then the second advent of Jesus for which the Church is praying is not a direct continuation and completion of world history but an event that comes from an entirely different dimension, that suddenly breaks off the preceding development and throws the whole constitution of the present world off its hinges" (K. Heim, *Jesus the World's Perfecter* [1961], p. 189).

C. Premillennial Philosophy of History. Premillennialism endeavors to offer as literal an interpretation of Rev. 20 as possible (Christ will physically return to a world under the sway of the antichrist, defeat him, and with the resurrected saints rule on earth a thousand years; the ultimate destruction of Satanic power will then occur and "God shall be all in all"). Naturally, such an eschatology is anathema to the liberal theological community, so premillennialism is a phenomenon to be observed today only among those holding a strong doctrine of biblical inspiration. The major differences among contemporary premillennialists do not touch the above points, but have to do with whether the millennium ought to be integrated into a dispensational view of Scripture, and whether the "lifting up" of the Church spoken of in 1 Thess. 4:17 occurs before, during, or after the great

antichristic tribulation ("pretribulation rapture," as supported by E. S. English, *Re-Thinking the Rapture* [1954], *v.* "midtribulation rapture," as argued by N. B. Harrison, *The End* [1941], *v.* "posttribulation rapture," as maintained by N. S. McPherson, *Triumph Through Tribulation* [1944]). Without any attempt to classify according to these differences, we can list the most important modern supporters of the premillennial position: Alf.; F. Godet, *Studies on the NT* (1873); E. R. Craven, comm. on Revelation (Lange, 1874); N. West, *The Thousand Years* (1880); Peters; S. P. Tregelles, *Hope of Christ's Second Coming* (1886); J. A. Seiss, *The Last Times* (1878); *Lectures on the Apocalypse* (1900); W. E. Blackstone, *Jesus is Coming* (1908); A. Reese, *Approaching Advent of Christ* (1917); T. Zahn, *Intro. to the NT* (1909); comm. on Revelation (*KEK*, 1926); A. C. Gaebelein, *Return of the Lord* (1925); H. A. Ironside, *Lamp of Prophecy* (1940); L. S. Chafer, *Systematic Theology* (1948); G. E. Ladd, *Crucial Questions about the Kingdom of God* (1952); *The Blessed Hope* (1956); C. C. Ryrie, *Basis of Premillennial Faith* (1953); Culver; C. L. Feinberg, *Premillennialism or Amillennialism?* (1954); J. D. Pentecost, *Things to Come* (1958); J. F. Walvoord, *Millennial Kingdom* (1959): M. C. Tenney, "Importance and Exegesis of Rev. 20:1-8," in J. F. Walvoord, ed., *Truth for Today* (1963.

The arguments for premillennialism are generally of two types: exegetical and doctrinal. Exegetically, the claim is made that only a literal interpretation of Rev. 20 fulfills the basic hermeneutic rule that a passage of Scripture must be taken in its natural sense unless contextual considerations force a nonliteral rendering. (The burden of proof thus falls upon the opponent of premillennialism to show that such considerations do in fact exist.) Doctrinally, the premillennialist argues that the vindication of God's ways to humanity entails Christ's victory and reign in the very sphere in which Satanic power has so long been manifest. For God's will to be done "on earth as it is in heaven" demands what T. A. Kantonen has so effectively termed "the harvest of history" (*The Christian Hope* [1954], pp. 65-70; cf. Peters, III, 427-442; and A. J. McClain, *Greatness of the Kingdom* [1959], pp. 527-531). A. Saphir asked, "Is earth simply a failure, abandoned by God to the power of the enemy, the scene of divine judgment, and not the scene of the vindication and triumph of righteousness?" (*Lectures on the Lord's Prayer* [1870]). Perhaps the best statement of the case remains that of Irenaeus (*Adv. haer.* v.32.1) at the end of the 2nd cent.: "It behooves the righteous first to receive the promise of the inheritance which God promised to the fathers, and to reign in it when they rise again to behold God in this creation which is renovated, and that the judgment should take place afterwards. For it is just that in that very creation in which they toiled or were afflicted, being proved in every way by suffering, they should receive the reward of their suffering; and that in the creation in which they were slain because of their love to God, in that they should be revived again; and that in the creation in which they endured servitude, in that they should reign. For God is rich in all things and all things are his. It is fitting, therefore, that the creation itself, being restored to its primeval condition, should be without restraint under the dominion of the righteous" (*ANF* translation).

MILLET [Heb. *dōḥan*; Gk. *kénchros*]. One ingredient of the prophet's bread (Ezk. 4:9) when he was symbolically acting out the role of the besieged. The European millet (*Panicum miliaceum* L.) is one of the oldest cultivated grains. An annual that seldom exceeds 1 m. (3 ft.) in height, it bears an enormous number of tiny seeds in each panicle. It has been used continuously as both animal fodder and a staple item in human diet. The seeds were commonly ground to flour, which was then mixed with other cereals to make bread. Very often impoverished peasants ate the seeds uncooked. Millet, durra (*Sorghum vulgare*), and Italian millet (*Panicum italicum* L.) were cultivated in the ancient Near East; *dōḥan* refers to millet but could include all three. R. K. H.

MILLO mil'ō [Heb. *millô'*–'filled,' 'mound,' 'rampart,' hence interpreted as 'fortress,' 'tower,' or something that fills a gap or hole; or, with both meanings, as a tower of solid stone standing on a terrace or raised platform 'filling' the defense gap of a depression or gully; cf. LXX Gk. *ákra*–'citadel,' 'acropolis,' *Maallōn* (Jgs. 9:6, 20)].

1. (Jgs. 9:6, 20, AV). *See* BETH-MILLO.

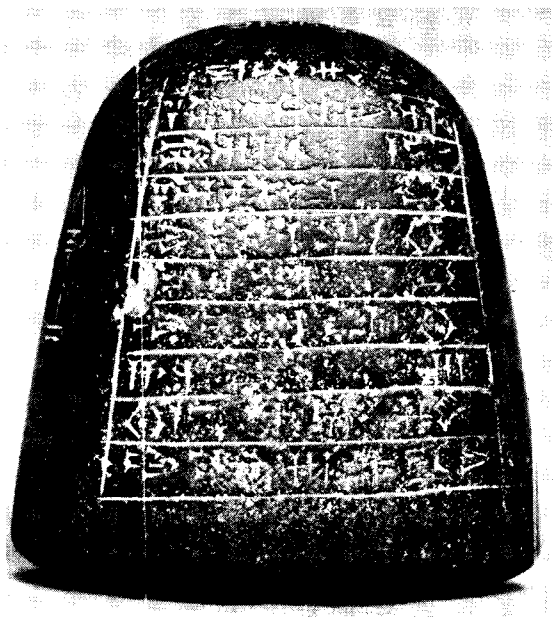
2. An element of the circumvallation of Jerusalem, especially constructed for the defense of a naturally vulnerable spot and known well enough in Solomon's time to be recognized by its name alone. In 2 S. 5:9; 1 Ch. 11:8, it is named in connection with David's activities in fortifying or refortifying the city. The references identify a place where the Millo stood in a later time or possibly suggest that, beginning with the Jebusite Millo, David reinforced the Canaanite city walls.

In 1 K. 9:15, 24; 11:27 Solomon is credited with having "built" the Millo; the verb here, as above, may mean "rebuild," "repair," or "remodel." The extent of Solomon's activities made them noteworthy. They would be understandable if structural weakness in the Millo had been suddenly disclosed or if new developments in the techniques and potential of offensive warfare had alarmed the defense officers.

According to 2 K. 12:20, the assassination of Joash took place in "the house of Millo," probably indicating, following 1 above, the precinct in which Millo was located (cf. J. Gray, *I & II Kings* [*OTL*, 2nd ed. 1970], pp. 590f.).

In response to Sennacherib's threat to invade Jerusalem, Hezekiah reinforced the Millo (2 Ch. 32:5).

That the Millo was located on the southeast hill of Jerusalem, S of the temple hill and on the northern border of the Jebusite city, is uncertain but plausible, since only the north side of the city lacked formidable natural defenses. The precise nature of the Millo has so far not been demonstrated, though many suggestions have been made. K. Galling (*Biblisches Reallexikon* [1937], col. 300) thought that Millo was the name for the entire area where Solomon built the palace, temple, and government buildings. W. R. Arnold (*Ephod and Ark* [1917]), followed by G. E. Wright, more plausibly speculated that the Millo was a broad, solid-fill, raised platform built by Solomon as a causeway over a steep gully that had previously isolated the temple area from the Jebusite stronghold. J. Simons moderately urged that present information permits a description for Millo no more specific than "a special feature of the



defense works of the City of David" (*Jerusalem in the OT* [1952]).

MILLSTONE. *See* MILL.

MINA mī'nə [Heb. *māneh*; Gk. *mná*] (Ezk. 45:12); AV MANEH mā'nā. A unit of measure elsewhere translated "pound" or "shekel." The science of metrology was not highly developed among the Israelites, and the standard of weights and measures varied from city to city. Abraham is said to have "weighed to Ephron . . . four hundred shekels of silver, current with the merchant" (Gen. 23:16); consequently the *māneh*, which was the equivalent of 60 shekels, varied in value also. If the shekel is taken as 16.7 gm. (0.6 oz.) then the ordinary or heavy *māneh* would be about 1 kg. (2.2 lbs.). The light *māneh* was only half that value. These two values explain the difference between the parallel passages in 1 K. 10:17 and 2 Ch. 9:16. *See* WEIGHTS AND MEASURES. M. A. MACLEOD

Weight of one (Babylonian) mina (about 60 shekels). The inscription states that it is an exact copy of a weight made by Nebuchadrezzar II (605-562 B.C.) after the standard fixed by Shulgi (king of the 3rd Dynasty of Ur, *ca.* 2000 B.C.) (Trustees of the British Museum)

MINAEANS min-ē'ənz. The people of a kingdom in the southwestern Arabian peninsula (northern Yemen; *see* ARABIA X, bibliography); they are not mentioned in the Bible. The south Arabic name, *m'n*, pl. *m'nyn* and *'m'nn* (K. Conti Rossini, *Chrestomathia Arabica Meridionalis* [1931], pp. 179f.), has sometimes led to identification of the Minaeans with the biblical MEUNIM (*K m^e'înîm*, 1 Ch. 4:41), an Arab people who lived near Ma'an, SE of Petra. This identification is unlikely, for the south Arabian kingdom, which has been historically and geographically established, was far from the city of Ma'an. Possibly Minaean caravaneers settled in or near Ma'an, thereby giving it its name, but the Meunim of the Bible (9th-8th cents. B.C.) predated the period of Minaean supremacy (4th cent. B.C.).

W. S. L. S.

MINCING [Heb. *ṭāpap*–'go like a child' (cf. *ṭap*–'small child'), i.e., 'trip along,' 'take small steps']. An affected manner of walking or acting, descriptive of the haughty women of Jerusalem (Isa. 3:16).

MIND [Heb. often *lēḇ* or *lēḇāḇ*–'heart,' also *šāmar*–'keep' (e.g., "keep in mind," Gen. 37:11), *nepeš*–'soul' (e.g., 2 K. 9:15; Eccl. 7:28), *rû(a)ḥ*– 'spirit, breath' (e.g. 1 Ch. 28:12; Ezk. 11:5; 20:32), *zāḵar*–"remember' (e.g., "keep in mind," Ps. 78:42), *yēṣer*–'form,' 'purpose' (e.g., Isa. 26:3), niphal of *nāḥam*–'regret' (e.g., "change [one's] mind," Ps. 110:4), etc.; Aram. *lēḇ* (Dnl. 7:28), *l^eḇaḇ* (e.g., Dnl. 2:30), *bāl*–'heart' (Dnl. 6:14 [MT 15]); Gk. often *noús*, also *diánoia*–'understanding,' *phronéō*–'think, set one's mind on,' *sōphronéō*–'be in one's right mind' (e.g., 2 Cor. 5:13), *phrónēma*–'thought,' *nóēma*–'mind,' 'thought,' *kardía*–'heart'; (e.g., Lk. 21:14), *psychḗ*–'self, soul' (Acts 14:2; 15:24; Phil 1:27), *pneúma*–'breath, spirit' (2 Cor. 2:13; 7:13), *dialogízō*–("consider in [one's] mind," Lk. 1:29), *meteōrízō*–'worry' ("be of anxious mind," Lk. 12:29), *mélei*–'care' (1 Cor. 7:21), *metamélomai*–'regret' ("change one's mind," He. 7:21), *eknéphō*–'become sober' ("come to one's mind," 1 Cor. 15:34), *prássō*–'do' (1 Thess. 4:11), *nephrós*–'kidney' (Rev. 2:23), *metabállō*–'change' ("change one's mind," Acts 28:6), *krínō*–'judge' ("make up [one's] mind," 2 Cor. 2:1)]; AV also HEART, SPIRIT, SOUL, RESPECT, REMEMBER, UNDERSTANDING, AFFECTION, etc.; NEB also HEART, SKILL, UNDERSTANDING, THOUGHT, DESIGN, REASON, etc.; **(BE) MINDFUL** [Heb. *zāḵar*–'remember' (e.g., Ps. 8:4 [MT 5]), *pāqaḏ*–'visit' (Zeph. 2:7); Gk. *mimnḗskomai*–'remember' (He. 2:6), *syneídēsis*–'consciousness' (1 Pet. 2:19)]; AV also REMEMBER, VISIT, CONSCIENCE; NEB also CALL TO MIND, REMEMBER, TURN TO, etc. *See also* DOUBLE MIND; HUMBLE II.B.

I. In the OT.–The Hebrew OT does not have one term that refers to "mind" in the modern sense of brain or organ of cognition. Most instances of "mind" are a translation of *lēḇ/lēḇāḇ*, "heart," a comprehensive term for the integrative center of a person's emotional, volitional, and intellectual life. (*See* HEART.) The translation "mind" is used in passages that focus on the heart as the seat of remembrance, reason, or direction. The LXX reflects this nuance by translating *lēḇ/lēḇāḇ* with Gk. *noús*, "mind", rather than *kardía*, "heart," in Ex. 7:23; Josh. 14:7; Job 7:17; Isa. 10:7, 12; 41:22.

A. Memory. The mind of the faithful Israelite harbors knowledge of the Lord's past redemptive deeds (Isa. 46:8; 65:17; Jer. 3:16; Lam. 3:21). God promised that if His people "call to mind" the blessing and the curse and return to Him, He will return their prosperity (Dt. 30:1-3). "Mind" is also used idiomatically to reproduce verbs of remembering, as in Ps. 77:11 (MT 12): "I will call to mind [*zāḵar*] the deeds of the Lord." God too remembers. He is "mindful"(*zāḵar*) especially of His covenant (1 Ch. 16:15; Neh. 9:17; Ps. 25:6; 105:8; 111:5) and also of His people (Ps. 9:12 [MT 13]; 115:12). But He remembers in judgment when He calls to mind Israel's evil deeds (Jer. 44:21).

B. Reason. The mind is the seat of reason and comprehension. This sense is evidenced extensively in wisdom contexts. Solomon is given a "wise and discerning mind" (1 K. 3:12) that enables him to distinguish between right and wrong. He is given the power of judgment and perception, literally a "hearing mind" (*lēḇ šōmē[a]*', v. 9). Mind (comprehension) and ear (perception) are contextually associated also in Prov. 18:15; 22:17; 23:12; both are necessary for the acquisition of knowledge. Eyes, ears, and mind are linked in Dt. 29:4; Isa. 32:3f.; Ezk. 40:4.

The mind possesses knowledge and wisdom (Prov. 18:15; 22:17; 23:12; Eccl. 1:13, 17; 7:25; 8:16). The innermost thoughts and secrets are found in the mind (Jgs. 16:17f.). Some things, however, are beyond comprehension. According to Eccl. 3:11 God put a yearning for ultimate meaning into the human mind, but the mind, being finite, cannot discover that meaning. "Mind" can denote a practical understanding as well as cognition. The tabernacle craftsman who has technical skills and abilities has an "able mind" (lit. "wise spirit," *rú[a]ḥ ḥokmâ*, Ex. 28:3; cf. also 36:2).

C. Direction. The mind is the seat of intention and direction as well as disposition, attitude, and inclination. It is the faculty that makes choices and is responsible for a person's course in life. The mind plans, but ultimately God determines the way (Prov. 16:9; 19:21). The mind reflects a person's true being (Prov. 27:19). The directing core of an individual's life is sometimes called the "heart and mind," (*lēḇ/lēḇāḇ* and *nepeš*, 1 S. 2:35; 1 K. 8:48; 1 Ch. 22:19; 28:9; 2 Ch. 6:38; cf. *kᵉlāyôṯ* and *lēḇ*, Ps. 26:2; *qereḇ* and *lēḇ*, 64:6 [MT 7]). This expression does not refer to two bodily organs or even to emotion and reason respectively, but to the seat of a person's direction. The heart is deep within, but God is able to search it out and see what lies at the base of one's life (*kᵉlāyôṯ* and *lēḇ*, "heart" and "mind," Jer. 11:20; 17:10; 20:12). Once a course of action has been chosen, one sets one's mind (*lēḇ/lēḇāḇ*) upon it (Ex. 14:5; Dt. 5:29; 1 Ch. 12:38 [MT 39]; Neh. 4:6 [MT 3:38]), i.e., intends to realize it. God also sets about to accomplish "the intents of his mind" (Jer. 23:20; 30:24).

Persons of perverse mind despise the way of the Lord (Prov. 11:20; 12:8; 17:20; 23:33). They do not perceive the way that leads to righteousness, but choose the way of wickedness. But the nation whose mind (*yēṣer*, lit. "inclination") is fixed on God is kept in peace (Isa. 26:3).

II. In the NT.–The RSV NT uses "mind" to translate terms for the cognitive, reasoning, and purposive parts of human personhood. Mk. 12:30 par. ("heart ... soul ... mind [Gk. *diánoia*] ... strength") shows a unified, but not rigid, concept of personhood, one that allows for both a physical and a spiritual nature (cf. also the hendiadys "body and mind" in Eph. 2:3 [*diánoia*], and "hearts" and "minds" in Phil. 4:7 [*nóēma*]; He. 10:16 [*diánoia*]). The mind can and should be fixed upon God (Rom. 7:25 [*noús*]; 8:6 [*phrónēma*]) and Christ (Col. 3:2 [*phronéō*]); it should be under one's control (2 Thess. 2:2 [*noús*]; 1 Pet. 1:13 [*diánoia*]). But it has been corrupted (Rom. 1:21 [*kardía*], 28 [*noús*]; 2 Tim. 3:8 [*noús*]) by earthly things (Phil. 3:19 [*phronéō*]) and is now depraved (1 Tim. 6:5 [*noús*]), following its own desires (Eph. 2:3 [*diánoia*]). The Gentiles are futile in their minds (Eph. 4:17 [*noús*]), and even the Jews are hardened in mind by a Christless law (2 Cor. 3:14f. [*nóēma, kardía*]). Unless the mind is set on the Spirit there can be no life (Rom. 8:5-7 [*phronéō, phrónēma*]). Therefore the mind needs renewal (Rom. 12:2 [*noús*]), which brings transformation of character, an integration of personality, and submission to the will of God.

As the center of intellectual undestanding and perception (cf. Lk. 24:45 [*noús*]), the mind can be seriously altered both by demonic possession (Mk. 5:15; Lk. 8:35 [pass. part. *sōphronéō*]) and by ecstatic experience, which in public worship is less desirable than full use of the mind (1 Cor. 14:14-19 [*noús*]). Indeed, people should strive to submit their minds in obedience to God (1 Cor. 15:34 [*eknḗphō*]; Phil. 2:5 [*phronéō*]; 1 Pet. 1:13 [*diánoia*]), and then by the leading of the Spirit they will do the will of God and have the mind of God (1 Cor. 2:16 [*noús*]; Rom. 8:5 [*phronéō*]). Where minds are set on the will of God, there will be unity (Phil. 2:2, 5 [*phronéō*]; 1 Cor. 1:10 [*noús*]).

Several NT occurrences of "mind" merit special comment. Mt. 22:37 ("heart ... soul ... mind [*diánoia*] ") has sometimes been used to support a trichotomous theory of human nature. By this reckoning, however, since the parallels in Mk. 12:30 and Lk. 10:27 add "strength" (*ischýs*), one might argue for a quadripartite nature. But in Dt. 6:5 ("heart [Heb. *lēḇāḇ*] ... soul [*nepeš*] ... might [*mᵉʾōḏ*]"), the text upon which the NT passages are based, "mind" is conspicuously absent. Total commitment is the concern here, not the dissection of human nature.

Romans 12:2 speaks of the renewing (Gk. *anakainóō*) of the mind (*noús*). In discussing the need for repentance (*metánoia*) in Christian faith, Paul appears to move beyond the initial change of mind to a continual yielding of the mind to the will of God ("be transformed," present pass. imperative of *metamorphóō*). (Cf. the thanksgiving of Col. 1, where, after acknowledging the faith, love and hope of the Colossians, Paul says that he prays continuously that they might know God's will [v. 9].)

Philippians 2:5 presents a special problem. It is not clear whether the present imperative of *phronéō* exhorts readers to have the same mind as Christ (i.e., to have Christ's mind; so AV) or to have the same mind or attitude toward one another as they do *toward* Christ (so RSV). Perhaps it is best to accommodate both positions. As stated in 1 Cor. 2:16, the Spirit of God helps Christians to know the mind (*noús*) of Christ. As believers conform to His will, they have the mind of Christ. Thus they will treat others as they treat Christ, and they will be in harmony with one another, which is Paul's main concern (cf. Phil. 1:27; 2:2).

BANDSTRA S. S. STUART

MINE [Heb. *môṣā'*] (Job 28:1); AV VEIN; **MINING**. A pit for extracting minerals from the earth; the process of working mines. The absence of a technical vocabulary for mining in the Bible may demonstrate the ancient Hebrews' unfamiliarity with the science. Heb. *môṣā'*, the only word translated "mine" by the RSV, is a general term meaning "source," derived from the verb *yāṣā'* ("go out, come out"). Dt. 8:9 uses the verb *ḥāṣaḇ* (RSV, lit., "dig") for the mining of copper.

The only OT description of mining occurs in Job 28, a passage showing the inaccessibility of wisdom. The author recognizes there is a "source" (*môṣā'*) for silver and a "place" (*māqôm*) for gold (v. 1); that iron is "taken" (pual of *lāqaḥ*) out of the earth and copper is "poured out" (pass. part. of *yāṣaq*; RSV "smelted") from the "stone" (*'eḇen*; RSV "ore," v. 2); that "they" (RSV "men") search underground for "stone" (RSV "ore," v. 3); that they open a "stream bed" (RSV "shafts") in uninhabited valleys (v. 4); that man puts his hand to flinty rock, overturns mountains (v. 9), and cuts "channels" (*yᵉʾōrîm*) in the rocks (v. 10). In none of this descriptive language can one find a technical term connected with the mining industry.

Archeological and geological explorations have shown that, apart from various formations of stone adequate for construction purposes, mineral resources in Palestine are generally scarce. The Arabah, however, possesses rich

Mining sanctuary of Hathor at Timna' in its Midianite phase. The pillars are from the original Egyptian sanctuary; they were reused in the Midianite phase after the destruction of the Hathor shrine (Institute of Mining and Metals in the Biblical World, Arabah Expedition)

deposits of copper. Copper mines dating as early as the end of the 4th millennium B.C. have been found on both sides of the Arabah between the Dead Sea and the Gulf of Aqabah (Elath), notably at Timna' in Israel and at PUNON (Feihân) in Jordan. The largest iron mine in Palestine is found at Mughâret el-Wardeh in the 'Ajlûn Mountains of Gilead, but as yet there has been no definite evidence linking the mining activity there to a time earlier than the 1st cent. A.D. For specific information on these and other centers of mining *see* ARABAH III, V; METAL, METALLURGY; IRON I.D.

The Israelites most likely learned mining from the KENITES, who inhabited the areas in which copper deposits have been found. Desire to control the mines of the Arabah was probably an important factor in the frequent wars between Judah and Edom.

MINGLED PEOPLES. *See* MIXED MULTITUDE.

MINIAMIN min'yə-min [Heb. *minyāmîn*–'from the right hand,' i.e., 'fortunate'; *see also* MIJAMIN].

1. A priest who assisted Kore the Levite in distributing the freewill offering in the time of King Hezekiah (2 Ch. 31:15).

2. A priestly family in the time of Joiakim the high priest (Neh. 12:17).

3. One of the priests who played the trumpet at the dedication of the rebuilt wall of Jerusalem (Neh. 12:41).

MINISH. Archaic for "diminish" in the AV of Ex. 5:19; Ps. 107:39.

MINISTER [Heb. piel of *šāraṯ*–'serve, wait upon,' piel of *kāhan*–'act as priest' (Dt. 10:6), *'āḥaḏ eṯ-'ªḇōḏâ*–'perform the service' (Nu. 3:7f.), *'āmaḏ*–'stand' (Jgs. 20:28; Neh. 12:44), *ṣāḇā'*–'serve' (Ex. 38:8)]; AV also SERVICE, STAND, WAIT, ASSEMBLE, etc.; NEB also ASSIST, ATTEND, SERVE, "on duty" (Ex. 38:8), etc.; [Gk. *diakonéō*–'serve,' *diákonos*–'servant,' *dynástēs*–'court official' (Acts 8:27), *leitourgós*–'servant' (Rom. 13:6; 15:16; Phil. 2:25; He. 8:2), *leitourgikós*–'serving' (He. 1:14), *hypēretéō*–'help, assist' (Acts 20:34), *hypērétēs*–'helper' (Lk. 1:2)]; AV also "of great authority" (Acts 8:27); NEB also "come to (one's) help," ATTENDANT, WAIT ON, DISPENSE (2 Cor. 3:6), HELPER, WORKER, etc.; **MINISTRY** [Heb. *yāḏ*–'hand' (2 Ch. 7:6), piel inf. of *šāraṯ* (2 Ch. 8:14); Gk. *diakonía*–'service,' *leitourgía*–'service' (He. 8:6)]; NEB also TASK, COMMISSION, etc.

I. In the OT.–In the RSV OT the noun "minister" always represents Heb. *mᵉšārēṯ* (piel part. of *šāraṯ*); the verb usually translates *šēreṯ* (piel of *šāraṯ*, "serve"), with the exceptions noted above. In contrast to *'āḥaḏ* and *'eḇeḏ*, which often refer to menial service, *šēreṯ* and *mᵉšārēṯ* (sometimes rendered "attend," "attendant," or "servant" by the RSV) generally describe personal service rendered by someone who stands in a special relationship to a superior.

Sometimes these terms are used of one human being rendering service to another. Joseph "attended" (*šēreṯ*) Potiphar as a highly trusted servant whom Potiphar put in charge of his entire household (Gen. 39:4). Joshua served as Moses' personal attendant and deputy before succeeding his master as leader of the Israelites (Nu. 11:28; Josh. 1:1; RSV "servant," Ex. 24:13; 33:11). Similarly, Elisha rendered personal service to Elijah before succeeding him (1 K. 19:21). Elisha also had a personal servant who was designated a *mᵉšārēṯ* (RSV "servant," 2 K. 4:43; 6:15). The term is also applied to royal servants of various kinds, e.g., Abishag the Shunammite, who ministered to the aged King David (1 K. 1:4, 15); the personal servants of King Solomon (2 Ch. 9:4); the nephews of King Ahaziah, who served as his attendants (22:8); and the courtiers of King Ahasuerus (Est. 2:2; 6:3).

Far more frequent, however, is the use of *šēreṯ* and *mᵉšārēṯ* to designate Yahweh's personal attendants. The angelic hosts (Ps. 103:2) and "fire and flame" (104:4) can be described as Yahweh's "ministers" because of their devoted service to His will. Samuel, an Ephraimite (1 S. 1:1), from his boyhood ministered to Yahweh in the temple under Eli's supervision (2:11, 18; 3:1). Most commonly, however, these terms are used to designate the priests and Levites.

All the Levites were set apart for special service to Yahweh in the tabernacle and later in the temple (cf. Nu. 16:9; 2 Ch. 29:11). Among the Levites, some (Aaron and his sons, Nu. 3:3; cf. v. 10; the Zadokites, Ezk. 40:46; 44:15f.) were ordained as priests, and it was especially they who were designated as Yahweh's "ministers" (cf. Jer. 33:21; Joel 1:9, 13; 2:17). The priests had the weighty responsibility of representing the people before God, and a very important part of their ministry involved offering sacrifices to Yahweh on behalf of the people (e.g., Ezk. 43:19). The holiness of their ministry required that they wear special garments when they entered the holy place to perform their priestly service (e.g., Ex. 28:40-43; 29:29f.; 39:1, 41; Ezk. 42:14; 44:17-19). Their ministry also included burning incense, blessing the people, and settling legal disputes (Dt. 17:12; 21:5; 1 Ch. 23:13; cf. Nu. 6:23; Ezk. 44:24). The rest of the Levites were appointed to minister to the priests and to attend to cultic duties in the tabernacle and temple (Nu. 3:6-9; 18:2-4; Ezr. 8:17). These duties included the care of the furniture of the tabernacle (Nu. 3:31), carrying the ark (Dt. 10:8; 1 Ch. 15:2; 16:37), and, from the time of David, a ministry of music and praise (1 Ch. 6:32; 2 Ch. 7:6; 8:14; cf. 31:2). (*See also* PRIESTS AND LEVITES.)

Isaiah (56:6f.) prophesies a messianic age when even

foreigners will worship Yahweh and "minister" *(šēreṭ)* to Him. They will minister to the Israelites by rebuilding their cities (60:10) and by offering their animals as sacrificial victims (v. 7). At this time the distinctions between priests and laity will break down, and all Israelites will be called "the priests of the Lord" and "the ministers of our God" (61:6).

Exodus 38:8 refers to "the mirrors of the ministering [part. of *ṣābā'*] women who ministered [*ṣābā'*] at the door of the tent of meeting." These women are mentioned elsewhere only in 1 S. 2:22, which states that the sons of Eli "lay with the women who served [part. of *ṣābā'*] at the entrance to the tent of meeting." The use of *ṣābā'* (which most often denotes military service but refers to the cultic service of the Levites in Nu. 4:3, 23, 30, etc.) suggests some kind of organized service, but the precise function performed by these women is not known. Some commentators have suggested a service of cleaning and repairing the tabernacle, others of singing and dancing, others of doorkeeping. Still others have suggested a parallel to the Canaanite practice of temple prostitution, based on 1 S. 2:22; but the fact that the behavior of Eli's sons is condemned argues against this interpretation (see comms.).

II. In the NT.–In the RSV NT "minister" and "ministry" most often represent the *diakon-* word group. The verb *diakonéō* originally means "wait at table" (e.g., Acts 6:2; cf. RSV "serve," Mt. 8:15 par.; Lk. 12:37; 17:8; Jn. 12:2). More often, however, the term is used in the wider sense of "render a service." The noun *diakonía* denotes the activity of *diakonéō*, i.e., "service at table, provision of food" (e.g., Lk. 10:40; cf. RSV "distribution," Acts 6:1), or, in a wider sense, "service" of any sort. Likewise, the noun *diákonos* denotes a "waiter at a meal" (cf. RSV "servant," Jn. 2:5, 9; "attendant," Mt. 22:13) or, in general, a "servant"; in a few instances it designates a specific ecclesiastical office (*see* DEACON).

The angels' ministry to Jesus following His temptation in the wilderness probably involved the provision of nourishment (Mt. 4:11 par. Mk. 1:13; cf. 1 K. 19:5-7). A group of Galilean women accompanied Jesus and His disciples on their travels and provided them with food and other forms of material support (Mt. 27:55 par. Mk. 15:41; cf. RSV "provide" [*diakonéō*], Lk. 8:3).

Jesus Himself provides the model for ministry in the NT. He defined His own mission in terms of serving others (*diakonéō*, Mt. 20:21 par. Mk. 10:45) by giving His life for them. Likewise, His true disciples are those who minister to the needs of others (Mt. 20:26f. par. Mk. 10:43f.; cf. Mt. 25:44).

In Acts and the Epistles *diakonía* can denote any form of loving service performed by members of the Christian community (Eph. 4:12). More specifically, it is often used as a technical term for the work of proclaiming the gospel, a ministry especially entrusted to the apostles and their coworkers (Acts 1:17, 25; 6:4; 20:24; 21:19; Rom. 11:13; 2 Cor. 4:1; 5:18; 6:3; Col. 4:17; 2 Tim. 4:5). Thus the apostles and other office-bearers in the Church who are entrusted with this task can be referred to as *diákonoi* (Eph. 6:21; Col. 1:25; 4:7; of the gospel, Eph. 3:7; Col. 1:23; of Christ, Col. 1:7; 1 Tim. 4:6; of the new covenant, 2 Cor. 3:6). (*See also* MINISTRY.)

Another general term for "servant" or "assistant" is Gk. *hypērétēs*. Lk. 1:2 uses the phrase *hypērétai toú lógou* (RSV " ministers of the world"; cf. Acts 6:4) to describe those who served the cause of Christ by passing on the tradition of His teaching (see J. A. Fitzmyer, pp. 294f.). Acts 20:34 records Paul's use of the verb *hypēretéō* in stating that he had supported himself and his companions through his own labor.

In four passages the RSV NT uses "minister" to render Gk. *leitourgós*. Unlike the verb *leitourgéō*, which the LXX employs to render only the cultic uses of Heb. *šēreṭ*, *leitourgós* is employed by the LXX primarily for the noncultic uses of Heb. *mᵉšārēṭ*. *Leitourgós* refers to the priestly ministry in Rom. 15:16 and He. 8:2; similarly, in 8:6 the noun *leitourgía* denotes Christ's priestly ministry, which far surpasses that of the old covenant. In Rom. 13:6 and Phil. 2:25, however, *leitourgós* simply means "servant" and is basically synonymous with *diákonos*. The use of *leitourgikós* in He. 1:14 to describe the angels is likewise non-cultic.

The term *dynástēs* differs from the preceding terms in that its primary idea is one of ruling power rather than of servanthood (cf. *dýnamis* ["power"], *dynatéō* ["be strong"], etc.). In Acts 8:27 the term designates an official in the court of the queen of Ethiopia.

MINISTRY [Heb. *yāḏ*–'hand,' *šārēṭ*, *ʿᵃḇôḏâ*; Gk. *diakonía*, *leitourgía*].

I. Distinctions of Ministry
II. Apostolic Ministry
  A. Apostles
  B. Prophets
  C. Teachers
  D. Evangelists
III. Local Ministry
  A. Deacons
  B. Elders
  C. Bishops
IV. Threefold Ministry
  A. Emergence
  B. Enforcement
  C. Development

NT cognates to Gk. *diakonía* include *diákonos*, *ho diakonôn*, and *diakoneín*. All these words can be used very generally. Even when applied to Christian service they have such varied meanings as (1) discipleship in general (Jn. 12:26); (2) service as a spiritual gift (Rom. 12:7; 1 Cor. 12:5) and therefore service of all kinds (Acts 6:2; Mt. 20:26); (3) the ministry of the word (Eph. 4:12) and most frequently the apostleship (Acts 1:17; 20:24; 21:19; Rom. 11:13; etc.); (4) charitable service such as feeding the poor (Acts 6:1; 11:29; 12:25) or organizing and providing the great collection for the poor at Jerusalem (Rom. 12:25; 2 Cor. 8:4, 19; etc.); and (5) such services as those of Stephanas (1 Cor. 16:15), Archippus (Col. 4:17), Tychicus (Eph. 6:21; Col. 4:7).

The present article is concerned with the Christian usage and more particularly with its application to the regular ministry of word and property in the Church. The very existence of the Church implies not only a general ministry but also the more specific ministry demanded by orderly life of both inward and outward mission. The specific ministry is not to be divorced from the more general, nor is it to be understood or fashioned in categories other than those of ministry, e.g., hierarchical. No matter how correct in other respects, ministry loses its very essence if it is not true service impelled and oriented by the spirit of service. Many problems of the specific ministry take on a new aspect, and many related tensions or conflicts are resolved when these simple but basic truths are perceived, maintained, and practiced.

I. Distinctions of Ministry.–The first specific ministry

in the Church is obviously that of the apostles chosen and commissioned by Christ Himself. In important respects it was a unique ministry. Therefore there can be no apostolic succession in the full and strict sense. But secondarily the apostles exercised a ministry that has permanent validity and with which others are particularly associated, namely, the ministries of prophets, teachers, and evangelists, and also in a slightly different sense of bishops, elders, and deacons. Apostolic ministry must be understood primarily as a ministry of prayer and preaching rather than of practical administration. But in contrast to that of bishops or elders, it may also be regarded as a universal and extraordinary ministry primarily adapted to missionary and evangelistic activity rather than a local and settled ministry of edification and direction.

The distinction between the ministries of Word and administration is clear enough in the NT and seems to have been carried through locally in the form of elders or bishops on the one side and deacons on the other. Even here, however, we are to see a difference of function rather than of office. Thus the Seven appointed to serve tables also exercised a powerful ministry of Word (at least in the case of Stephen and Philip), and the apostles could not escape some involvement in practical concerns (cf. Paul's organizing of the great collection). In later historical practice bishops often were leading administrators, and deacons had their place in the administration of word and sacrament.

Behind this distinction of functions is the larger distinction between extraordinary and ordinary ministry, to use two inadequate and rather question-begging terms. Thus in the missionary and evangelistic situation of the early Church, which perhaps is or ought to be the true norm of every church situation, the "missionaries" on the one side exercised an itinerant ministry of evangelism, exhortation, and instruction, and the local pastors on the other were instituted to fulfil the regular demands of spiritual and practical ministry in the newly established churches. This is the distinction that has given rise to most of the misconceptions, difficulties, and tensions in later discussion and practice.

On the one side, the relationship has been wrongly conceived. Thus it has sometimes been identified with the basic distinction between a ministry of word and a ministry of organization, as though the local ministry were of the latter category. This view is shattered by the twofold fact that the apostles are also elders (1 Pet. 5:1) and that bishops must be able to teach (1 Tim. 3:2). When apostles or prophets were present, the local ministers no doubt gave them precedence in the ministry of the word, but in their absence the ministers themselves had to see to the ongoing ministry of word and sacrament.

Again, the distinction has often been stated in terms of a charismatic ministry on the one side and a noncharismatic on the other. What is meant is that there is a specific moving of the Spirit in the one case and a more institutional form in the other. But one cannot presuppose too easily that there is no gift of the Spirit where there is no extraordinary call or task. Although the Holy Spirit cannot be institutionalized, He can be assumed to work through the regular order, even if in less spectacular fashion. Nor should one assume too easily that in the NT any person might become a wandering evangelist or prophet without some form of authorization. To put the distinction in this form is to introduce confusing factors and misleading assumptions.

It is surely another misconception to think that the extraordinary ministry was only for a limited period and then came to be invested solely in the ordinary ministry of presbyter-bishops. The data available from the first centuries contradict this. In the Didache, Justin Martyr, Barnabas, and Hermas are traces of a prophetic ministry different from that of the local bishops and elders. The continuing evidence of history also contradicts this idea. In spite of the concentration of ministry and ministerial power in the regular ministry, there have always been special figures who in evangelism, edification, or missionary endeavor have transcended the ordinary limits and channels and exercised a ministry of apostolic range, power, and authority, at least in a secondary sense. Indeed, many missionaries, themselves elders or bishops, have often reflected the apostolate even in the institution and supervison of a new regular and local ministry. Finally, it runs counter to the obvious needs and tasks of ministry, which can never consist merely of the shepherding of settled congregations but always involves at some level the ongoing task of evangelism and mission. Even the terms "extraordinary" and "ordinary" do not properly express the distinction, since the evangelistic and missionary and wider edificatory ministry is as much a part of the ordinary ministry as the local fulfillment. It can be argued that the failure to see this and the resulting treatment of the NT situation as unusual rather than normative are responsible for most of the difficulties in the conception of the ministry and of the weaknesses in its exercise.

Accompanying misconception of the relationship has been failure to achieve a right attitude to the varying ministries. Thus the more local ministry has sometimes been disdained, and the wider ministry has been the object of subjugation and even attempted elimination. The proper relationship of the ministries, however, is not competitive but complementary. There is a local exercise of the ministry of the word but also an ongoing task of mission, edification, and theology that cannot be fulfilled in the local setting and creates a constant need for wider ministry in the Church. The pastoral claim and task are legitimate but they are not the totality. Indeed, it may be doubted whether they can or should be described as the primary claim and task. Alongside them in every age and situation exists the urgent missionary, evangelistic, and theological need that can be met only by apostles, prophets, and teachers, who may also, of course, be local elders or bishops. This does not mean that a twofold structure of ministry is required or that a larger hierarchical ranking is demanded, for these are distinctions of function or discharge rather than of office. What it does mean is that the one ministry is fulfilled in different modes according to divergent callings, needs, and tasks, and therefore that the order necessary for the ministry must not enforce a rigid pattern or seek to compress all the expressions of ministry into a single form. Order must be based upon a comprehensive understanding of what the ministry is for, what it is summoned to do, and how it may best fulfil its total task according to the NT norm. Practical difficulties arise if this understanding is achieved not at all or only partially, or if an exclusive claim is thus lodged at some point to inheritance of apostolic calling and prerogative.

A working integration of the forms or functions of ministry is possible to attain, however. A missionary, evangelist, or theologian may very well be a bishop, presbyter, deacon, or recognized minister at some level; it is reasonable that they be allowed responsibly to exercise their ministry across, above, or beyond the regular parochial framework. On the other hand, the special minister can and should aim at strengthening the local ministry, and even at instituting it in a pioneer missionary situation, so that a ministry of the word continues, and calling, endowment, or authority is not centralized in the minister's person. Problems naturally arise in the detailed outworking of these arrangements, but they are by no means insoluble

once the underlying antithesis is seen to be more apparent than real. Indeed, the exigencies of real situations have often led to reasonably harmonious solutions, e.g., in the relations of theological teachers to their churches or of missionaries to the local ministries they have established.

Perhaps one of the most helpful considerations is that neither the local nor the special ministry inherits the actual ministry of the apostles in the full sense. Each may make a certain claim. The first bishops, elders, and deacons were apostolically appointed in order that the ministry might continue in the new congregations. The apostolic function thus devolves in some measure upon them. Yet they are obviously secondary and derivative in this ministry and perform it only in the local and predominantly pastoral sphere. Special ministers and particularly missionaries come closer to what the apostles actually did, moving out to new peoples, establishing new churches, and supervising the formation of new local ministries. Yet they, too, are ultimately derivative. Although they are the first preachers in a given place, they are not the first in the absolute sense of the apostles. Although they are normative for those who learn the gospel through them, they are themselves under the apostolic norm. Similarly, theologians may guide the thought and therefore the preaching and instruction of their generation, but in a responsible fulfillment of their office can never aspire to apostolic authority. Properly conceived, the apostolic element thus unites rather than divides, for in different ways the ministers in both forms are fulfilling the same task, ministering the same word, and acknowledging the same unique authority of the first apostles. Once it is seen that the apostolic function may be variously discharged in its secondary form, that there are varying needs and tasks which constantly demand this varying discharge, and that the apostolate in its primary form is unique, normative, and nontransmissible, there is no further room for the rivalry and even conflict of ministry and the consequent arrogance of rule or divisiveness of individualism that have so often created havoc in the Church and prevented the effective fulfillment of the commissioned task.

II. Apostolic Ministry.–In the NT the wider or special ministry is fulfilled by three or possibly four main groups or by three or four main functions. These functions, however, merge into one another, and the use of terms is quite fluid. The decisive point is that this nonlocal ministry, which is primarily that of the apostles, was fulfilled by a special ministry of evangelism, edification, and instruction both outside and inside the churches. The groups mentioned in relation to this ministry are the apostles, prophets, teachers, and evangelists. The apostles engaged in both evangelism and edification, the prophets and teachers primarily in the latter, the evangelists in the former.

A. Apostles. In the NT the word "apostles" has both a narrower and a wider sense. It can be used of the Twelve (and later the Eleven) who had been called by Jesus and who had shared His incarnate ministry at the most intimate level (cf. Mk. 3:14). In place of Judas, Matthias was added to this group as one who had also known the Lord during the span of His earthly ministry (Acts 1:25). Paul, too, was granted a special, direct knowledge that qualified him for inclusion in the narrower circle of apostles on equal terms with the rest (Rom. 1:1ff.; Gal. 2:7-9). Barnabas can be called an apostle, was almost certainly an eyewitness, and seems to have ranked with the Twelve (Acts 14:14; Gal. 2:7-9), but in his case with some transition to a wider usage. In the wider sense, though probably with the implication of eyewitness, the term was also applied to others like Andronicus and Junias (whom Chrysostom took to be a woman, Rom. 16:7), Silvanus and Timothy (1 Thess. 1:6), and possibly Apollos (2 Cor. 8:23) and Epaphroditus (Phil. 2:25), though in the latter case the term seems differently used. The NT already recognized the possibility of false apostles (2 Cor. 11:13; Rev. 2:2), so that demarcation was demanded.

Certain leading characteristics of the apostolate may be briefly mentioned. Apostles had a direct calling, knowledge, and authority by association with the Lord. They were the pioneers of the Christian mission. Their primary task was prayer and the ministry of the word; they were thus evangelists and teachers. Though they may have settled for shorter or longer periods in specific places, they exercised an itinerant and ecumenical ministry. They had a final responsibility for the nurture and instruction of Christians, the purity of doctrine, and the continuation of the ministry on a more local scale. As noted already, the first apostles are unique. No others can enjoy the same normativeness as sources of information and understanding. Nevertheless, there may have been a secondary exercise of their ministry. Wherever missionary outreach or even doctrinal and spiritual reformation was needed, people of special calling and endowment may have been elected who were charged with a wider ministry. But this field in particular needed to differentiate between people of true calling and false or pretended apostles, the ultimate tests being faithfulness to the apostolic norm and conformity to the mind and commission of Christ.

B. Prophets. A resurgence of OT prophecy also marked the NT period. In the earliest stages John the Baptist (Mt. 11:9), Simeon (Lk. 2:25-35), Anna (Lk. 2:36), perhaps Zacharias, and even Mary herself gave evidence of the prophetic gift. Many regarded Jesus as a prophet (Jn. 4:19), and He certainly promised the coming of prophets (Mt. 10:41; 23:34; Lk. 11:49). After Pentecost, this promise found swift fulfillment; prophets were at Caesarea, Antioch, and the various Pauline communities (Acts 11:27; 15:32; 21:9f.; Rom. 12:6f.; 1 Cor. 14:32, 36f.; 1 Thess. 5:20; Gal. 3:3-5). Some of these prophets are named, e.g., Agabus (Acts 11:28; 21:10), Symeon (13:1), Judas and Silas (15:32). The reference to the daughters of Philip shows that there might still have been prophetesses, as in the OT (21:9; cf. also Anna). Paul not only mentioned prophets next to the apostles but also expected to find the gift of prophecy in the Church and urged all members to cultivate it (1 Cor. 14:1, 5; 1 Thess. 5:20; Rom. 12:6). At the same time he warned against a false use of the gift.

The exact nature of NT prophecy is not easy to determine. It might have carried an element of foretelling, as in the OT. It might also have involved enacted illustration (cf. Acts 21:11). In the main, however, it seems more likely to have consisted of edifying utterance and exhortation distinguished from simple exposition or instruction by a more direct inspiration and even sometimes by ecstatic or visionary elements or aspects. Like the apostolate, it was a special ministry probably exercised by itinerants, though it must also have been found within the local congregations, and there is no reason why elders should not also have been prophets. The possibility of false prophets was no less real than in the OT, and therefore the tests of apostolic conformity and appropriate conduct were to be applied. Thus no one speaking in the Spirit could contradict the basic elements of the faith (1 Jn. 4:1ff.), nor could a true prophet demand things for himself in the name of the Spirit (Did. 11–13). The Didache seems to assume not merely that the prophets could use extemporaneous forms of prayer (ch. 10) but also that they could take precedence in church affairs, though the reference seems to be to itinerant rather than local prophets.

Prophecy fell into some disrepute after the excesses of the Montanists at the end of the 2nd century. Although the phenomenon of prophecy has never regained its former

recognition, church history confirms that either within the congregation or over a wider sphere the Holy Spirit does constantly give special gifts to meet special needs of edification, instruction, admonition, or warning, especially in days of decadence, corruption, or secularization. The important point is that prophecy should not be suspected or viewed as a threat to the settled ministry but welcomed and allowed for as a special gift of God to His people (cf. Moses in Nu. 11). The difficulty is that this type of ministry cannot be brought under formal rules or organization. A ministry of prophecy cannot be instituted, trained, and supervised, but the basic test of apostolicity and conformity of life may still be made. Thus it is possible to steer the delicate course between flexibility and gullibility that is necessary if this ministry is to be effectively pursued without schism on the one side or scandal on the other.

C. Teachers. Alongside the apostles and prophets, teachers exercised a special ministry in the NT and postapostolic Church. Paul gave them a definite place in the local meeting (1 Cor. 14:26) and on the wider scene described himself as a teacher as well as an apostle or a prophet (cf. also Apollos). Teaching differs from the apostolate in that it is primarily devoted to edification rather than evangelism. It differs from prophecy by demanding greater regularity of form and content than does prophecy with its freer exhortation. Thus teachers might be itinerant ministers but usually need to settle in a particular center for longer periods, although they can exercise a more than local ministry. There is thus a greater tendency for teachers to be incorporated into the local ministry or for teaching to pass more fully into the sphere of the bishops and later of the elders, who might well be among the great teachers of the Church at large. Calvin could rightly argue that teaching is an integral part of the local ministry and thus plead for a "doctor" as well as a pastor in each congregation (cf. the lectureships set up by many Puritans in England and the modern ministers of education in many American churches). On the other hand, Dominic in the Middle Ages saw the need, at least in certain circumstances, for a wider order of teaching missionaries, and the medieval universities saw the need for teachers of the whole Church, the doctors of theology, as well as teachers in the local congregations. The modern tendency for theologians to be academic specialists isolated to some degree from the pastoral work of the Church is an evil fruit of failure to maintain a comprehensive view of the ministry and more specifically of the teaching office. Teaching is necessarily more exacting and systematic and therefore less spectacular than certain other functions, e.g., prophecy. Yet in addition to its obvious importance in the NT, there is evidence that it lingered much longer than prophecy in the early Church and that no age has been able to dispense with a ministry of teaching supplementary to that of the regular local ministers.

D. Evangelists. Paul mentioned evangelists as a separate group, but little is said about them or their work. They might perhaps be defined as people who, like the apostles, declared the gospel but without the particular qualifications of the apostolate: i.e., without necessarily being firsthand witnesses or having a firsthand commission. Thus Philip the evangelist initiated preaching the gospel to Samaria, so that in a more extended sense he might be called the apostle to Samaria. Yet he was not strictly an apostle, and the apostles themselves followed up his work, adding the seal of their authority and confirming the believers as members of the Church of Christ and not just of a sect. If the apostles were evangelists, they were more than evangelists, playing a role that has since been played by their writings, as the authoritative norm of all Christian witness. The evangelists fulfilled an apostolic role in the work of preaching but could not claim direct apostolic authority. The need of evangelists quickly manifested itself both for the assistance of the apostles in pioneer operations and for the extension of the Church from established centers to surrounding areas. Perhaps the closest modern parallel is the mission field, where exists the normative situation from the NT standpoint. Evangelists are associates of the missionaries, who are also evangelists but have a wider role analogous to that of the first apostles. On the other hand, Christianity can never be taken for granted in any place or generation, and therefore the modern use of the word evangelist for special preachers of the gospel in Christianized lands seems to be a legitimate extension with many historical examples to support it. More churches might do well to find a place for some special order of evangelists to fulfil this special function, preferably within the organized ministry.

III. Local Ministry.–The local ministry raises many problems of great historical difficulty. How was it instituted? On what patterns or precedents was it fashioned? How was it related to the apostles on the one side and the congregations on the other? How far did it derive from a fixed policy, and how far did it arise simply as a response to given situations that might have varied in different places?

A. Deacons. The appointment of the Seven in Acts 6 forms an obvious starting point Their appointment was to meet a practical situation; they supervised the daily ministration, thus relieving the apostles for prayer and the ministration of the word. The work of Stephen and Philip shows, of course, that they might also have fulfilled other tasks in addition to the primary administrative duty. The congregation obviously selected the Seven according to certain specified qualifications. The number was possibly suggested by the common Jewish practice of committing the rule of a village to seven wise men, though others find a closer general parallel in the synagogue deacons.

Whether the Seven were the first deacons is a much disputed question. Some writers argue that they were in fact the elders later referred to in connection with the Jerusalem church. On the other hand, even if they are not called deacons, their primary function was more readily associated with the diaconate. *See* SEVEN, THE.

Although Acts does not tell of the appointment of deacons in the apostolic churches, Philippians refers to deacons, and the Pastorals stipulate that deacons are to be appointed and indicate the necessary qualifications (1 Tim. 3:8ff.). Little light is shed, however, either on the mode of appointment or on the exact nature of the duties.

B. Elders. The NT gives no information about the origin of elders. Acts 11 mentions elders in relation to the Jerusalem church, but their identities, functions, method of appointment, supervisors, and relations with the apostles and deacons are unknown. In favor of a more congregational polity it is sometimes argued that the Church could call to account even the apostles (Acts 11:1), but Peter did not so much render an account to the whole body as meet the charges of a Judaistic group (11:2f.), and the apostles and elders certainly took the lead in the conference in Acts 15 (v. 6, though cf. vv. 22f.). Paul's and Barnabas's ordination of elders in the communities they founded shows that the Jerusalem elders were not simply a local phenomenon (14:23; cf. 20:17). For more detailed information, *see* ELDER (IN THE NT); PRESBYTER.

Various explanations of this form of local ministry have been given. Some argue that the apostles instituted it in accordance with a special commission from the Lord, but in the absence of information this is mere conjecture.

Others see a parallel to the confraternities of the gentile world (guilds, burial clubs, unions, etc.), but despite possible similarities, it is hard to think that the first Christians, with their strong OT background, found it either right or necessary to follow a gentile pattern. The most natural explanation still seems to be the best, namely, that the system of administration by elders was taken over from Judaism, especially from the Jewish synagogues with their archons. Two main arguments have been brought against this: first, that there were differences in function, and second, that Epiphanius saw this model followed by Jewish (Judaizing) Christians in contrast to the gentile churches. On the other hand, the first converts in many Pauline churches came from the synagogues, where some had held office (Acts 18:8). The varied development does not of itself refute a common origin, and Epiphanius may well have been referring to the detailed system or even to titles rather than to the general structure in its initial stages.

The relationship of the elders to the congregation is another problem. The importance of the congregation is apparent in the NT; the Church is in no sense an organization of hierarchs. One may also assume that the various communities had no little say in the selection of elders and that some account of their stewardship would have been expected. Certainly, the NT never suggests autocratic or oligarchical rule. Nevertheless, the presbytery apparently ordained elders, and we have no grounds for thinking that elders could have been easily deposed or even subjected to attack (cf. 1 Tim. 5:19). Indeed, the instruction to elders not to be lords over God's heritage (1 Pet. 5:3) is counterbalanced by the admonition to submit to the elder (v. 5) and to obey the leaders (He. 13:17).

C. Bishops. As noted in other articles (*see* BISHOP; PRESBYTER), a distinction between the original elders and bishops is hardly possible unless one assumes that only some elders are bishops. Yet even in the NT certain forces contributed, perhaps by a process of assimilation, to the later emergence of a single bishop supported by presbyters in each church. Thus James, possibly by a unique right of kinship, obviously assumed a position of leadership, or at least presidency, in the Jerusalem church, though he could hardly have been called a bishop in the later sense (cf. Acts 15:13; 21:18). The supervisory functions of Timothy and Titus, while apparently temporary, suggest the need for some oversight by an individual at least in certain areas. Again, the synagogue pattern provides for an *archisynágōgos* (Acts 18:8); if this pattern was followed at all, it undoubtedly contributed to the final development of a presiding elder to whom the title of bishop was gradually appropriated even though the presbytery in concert exercised the function of oversight. Although the matter is indefinite, this was perhaps the most important single factor in the slow emergence of monepiscopacy. The examples of James, Timothy, and Titus probably contributed. The model of the Lord and His apostles may also have had some influence, e.g., on the later Benedictine conceptions of the abbots and monks. Neither the NT nor early Church history shows transmission of apostolic authority to bishops alone, since the critical passage in 1 Clement 40ff. is ambiguous and the statements in Ignatius (e.g., Smyrn. 8) presuppose an integrated ministry and cannot be proved to have a universal reference.

IV. Threefold Ministry.—*A. Emergence.* Although the NT provides no clear evidence of a threefold structure of ministry, the germs are already present both in the threefold functions of diaconate, spiritual ministration, and rule, and also in the existence of the three groups of deacons, elders, and presiding elders (or outstanding figures like James, Timothy, and Titus). Postapostolic literature has further traces of the gradual, or possibly sporadic, emergence of this system. Thus the Didache seems to encourage prophets or apostles to settle as local leaders (13:1), and Justin told of the president and deacons (*Apol.* i.65). History mentions bishops in particular churches, e.g., Polycarp in Smyrna, Papias in Hierapolis, and Irenaeus in South Gaul (cf. the Roman lists). Finally, Ignatius presented a more developed form of the structure in his advice to the Ephesians, Magnesians, Trallians, and others to avoid heresy and schism by loyal adherence to the bishop, elders, and deacons and by attendance at only their ministrations.

One can hardly presume that this had become the general rule by the time of Ignatius. Perhaps many presbyteries still had temporary presidents and therefore a plurality of bishops, if any distinction was made. One cannot even say that the bishops of Ignatius were permanent, although this seems likely. Concerted action and loyalty are certainly emphasized. The bishoprics, if one may use such a term, were still much smaller than the feudal episcopate of a later period. Nevertheless, the pressure of the 2nd cent. is evidently toward a form of episcopacy and therefore a threefold structure. The threats posed by heresy and persecution probably accelerated the process.

B. Enforcement. By the 3rd cent., definite instructions were being given to all local Christian groups, however small, to organize a threefold ministry. One bishop and at least two elders and three deacons were to be appointed, with perhaps a reader if the bishop was illiterate and deaconesses to minister more specifically to women. No great financial burden was thereby imposed, since the ministers were unremunerated and the churches at first had little property except copies of the Scriptures, records, and a place of burial. The deacons were primarily administrators of charitable relief, the elders supervised the orderly life of the church, and the bishop led in worship and exhortation. Discipline lay in the hands of the whole church, but the bishops and elders could take the initiative.

The Apostolic Canons contain rules for the appointment of bishops. The congregation has a right of election, although not of ordination or consecration. In a very small church, neighboring larger churches were to be invited to send three men to assist. Some historians see here the origin of the later and more general custom of insisting on the presence of at least three bishops at an episcopal ordination, though the Council of Arles seems to have appointed the practice largely to prevent irregular or purely factional consecrations (canon 20).

Four features of primitive episcopacy demand attention. First, it was on a small scale, the bishop being for the most part the local pastor. Second, it had no external grandeur. The evils of prelacy were hardly possible in the 3rd cent., though we do perhaps see trends in this direction in the larger and wealthier sees. Third, there was no autocracy; both the elders and the whole congregation had an important voice. Fourth, the exact relations of bishops and elders in the work of ministry are uncertain. In small churches, the bishops naturally took the lead in pastoral functions. In the larger, which might have included many congregations, the presbyters shared the work and were later allocated to specific charges. The idea that they were simply delegates of the bishop, however, is probably an inversion of the real truth that the bishop himself is a representative of the presbytery in the personal discharge of his function. This is not a decision for Presbyterianism but a decision for the unity of bishop and presbytery that makes the Presbyterian-Episcopalian alternative both unnecessary and misleading.

C. Development. The problem arises of how the simple

organization of the early centuries could culminate in the more elaborate hierarchy of a later time. Two separate though related questions are involved: that of the emergence of an ecclesiastical order, and that of the extension of diocesan or provincial control. In both cases one probably must account for the influence of both the political and the religious organization of the contemporary world. But inner factors should not be underestimated.

As concerns the ecclesiastical order of the clergy, the decisive words *ordo* and *clerus* may well have been suggested by current usage, *ordo* denoting the municipality or the committee in charge of a confraternity and *clerus* signifying rank or class. In the 3rd cent. the bishops and elders constituted the ecclesiastical order or class, but before long others were added, especially the deacons. Probably the very mundane factor of the introduction of stipends did more than anything else to accentuate the ideas of ecclesiastical persons distinct from others, for all recipients of church funds, including even widows and orphans, might be regarded as members of the *ordo*. Thus minor assistants appointed and paid to attend to the lesser duties, either in answer to practical needs or partly by assimilation to pagan usages, soon constituted the minor orders of readers, acolytes, exorcists, singers, subdeacons, or doorkeepers.

Organization was extended through a similar natural development, with perhaps some assimilation to secular or pagan structures. The numerical growth in larger centers obviously created a need for more elaborate organization of the Church in these cities, and when surrounding areas were evangelized, often in accordance with geographical or political groupings, the new communities naturally looked to the central churches for guidance and often preferred to attach themselves to them if they were reasonably near rather than forming new churches (Justin *Apol.* i.67). The existence of a supporting presbytery enabled the bishop to minister to several congregations at the same time, and it is interesting to note that the NT model was taken to be an autonomy of the one Church in the one place rather than of the individual congregation. Even new bishoprics founded in smaller towns and villages could have enhanced the position of the bishop in the original larger center, partly through his role in appointments and consecrations and partly through his authority at the synods or local councils, which were not unnaturally convened on matters of mutual concern and at which the more prominent bishops very quickly came to preside. Outstanding cities like Rome, Carthage, Alexandria, Antioch, and later Constantinople almost inevitably came to have even greater spheres of influence commensurate with their size, political and economic importance, and centrality in such varied Christian enterprises as evangelism and theology. Hence, even though one may deplore the tendency toward a hierarchy of metropolitans and patriarchs, one must see that it corresponded to certain needs and realities, however influenced in form by extraneous factors. Indeed, modern experience teaches that the Church in its interrelationships will always be influenced by geographical, national, and linguistic groupings, is always pressed toward a wider confederacy by outgoing missionary enterprise, and will always follow, more perhaps than it realizes, the contemporary forms of political and economic organization (cf. the growth of bureaucracy in so many modern churches irrespective of the professed polity).

In spite of the dangers inherent in this type of development, the ministry might have been spared the worst evils of medieval prelacy and papacy had it not been for the virtual establishment of Christianity as the religion of the empire and of the resultant Western European states. This enabled the bishops to take over the civil precedence and prerogatives of the higher priests of the imperial cult and thus completed the process of secularization against which the NT, and especially Our Lord Himself, plainly warned. One need hardly be surprised at the consequences for the ministry, whether in the form of tyranny, ambition, and avarice on the one side or of pastoral neglect, theological and practical aberration, and missionary sterility on the other. Nor need one wonder that the more vital work of the Church had often to be done through the special ministrations of monks, friars, reformers, and even supposed heretics outside the established structure.

MINNI min'ī [Heb. *minnî*]. A kingdom mentioned only in Jer. 51:27.

Jeremiah summoned the kingdoms of Minni, Ararat (Urartu), and Ashkenaz (the Scythians), as subjects of the Medes, to crush Babylon. This association points to the identity of Minni with the Mannai of Akkadian sources, a people who occupied the Persian highlands S of Lake Urmia. They were perhaps non-Indo-Europeans, akin to the Elamites. Assyrian and Urartian inscriptions reveal names of some Mannean kings from *ca.* 840 B.C. onward, but no native records are known. Assyria and Urartu held sway over different parts of Mannean territory during the 8th cent.; Mannai's importance especially as a horse-breeding land drew the Assyrians' interest. The Mannai helped the king of Assyria crush Urartu in 714. In the early decades of the 7th cent. Mannai gained strength, revolting with the Scythians and Medes against Assyria *ca.* 673, only to be subjugated again *ca.* 660. Scythian invaders took control of Mannai soon afterward and held it until the Medes broke their yoke some time after 625. Mannia may have enjoyed a brief independence then; at least a Mannean contingent aided the Assyrians against the Chaldean attackers from Babylon in 616. By the end of the century, however, the Medes had conquered all of Mannai, and it passed from them under Persian rule.

Electrum bracelet decorated with lions. From Kurdistan, early 1st millennium B.C. (Louvre)

Fulfillment of Jeremiah's words may be found in the Persian conquest of Babylon in 539, when troops from Mannai no doubt comprised a part of the army of Cyrus.

Excavations at Hasanlu, just S of Lake Urmia, and discovery of a rich treasure at Ziwiye further S near Saqqiz reveal something of the Mannean culture. The people were skilled in metalworking, adapting and copying the styles of their more advanced neighbors. One silver bowl from Ziwiye bears a row of hieroglyphs that may show that there was a native script, most probably inspired by the Urartian. Nothing definite is known of Mannean religious beliefs.

MINNITH min'ith [Heb. *minnîṯ*; Gk. A *Semōith*, B *áchris Arnōn*]. A city in the region of the Ammonites mentioned in connection with Jephthah's military campaign against the "twenty cities" (Jgs. 11:33). A possibly corrupt second text (Ezk. 27:17) names Minnith (so AV, NEB; RSV "olives") as the source of wheat exported from Judah in commerce with Tyre. Eusebius (*Onom.*) equates it with a village known to him in the Greek as *Maanith*, and located 4 Roman miles NE of Heshbon on the way to Philadelphia. While several contemporary sites have been suggested, none is yet confirmed.

MINOAN mə-nō'ən **CULTURE.** *See* GREECE III.B.

MINT [Gk. *hēdýosmon*] (Mt. 23:23; Lk. 11:42). An herb mentioned by Jesus as one of the small things tithed by the Pharisees. Of the various species of mint that grow in Palestine, either the peppermint (*Mentha piperita*) or, more likely, the perennial horse mint (*Mentha longifolia*) would suit the Gospel references. The Greek name *hēdýosmon* (lit. "sweet-smelling") refers to the plant's fragrance, which results from its aromatic oils. Mint was a very popular condiment in the ancient Near East. Jesus' mention of this and other herbs was not a depreciation of tithing but a criticism of the Pharisees' legalistic scrupulosity in small matters while they neglected such moral issues as justice, mercy, and faith.

Although not mentioned by name, mint was traditionally one of the "bitter herbs" eaten at the Passover meal (cf. Ex. 12:8; Nu. 9:11). R. K. H.

I. The Concept of Miracle.–A. Biblical Terminology and Its Use. 1. OT Terms. Two Hebrew words are commonly used in the OT to denote what we loosely call a miracle. They are *'ôṯ*, "sign, pledge, token," and *môpēṯ*, "wonder, sign, portent." They occur together in the warning of Dt. 13:1-3, which was decisive for Jewish attitudes to miracles: "If a prophet arises among you, or a dreamer of dreams, and gives you a sign or a wonder, and the sign or wonder which he tells you comes to pass, and if he says, 'Let us go after other gods,' which you have not known, 'and let us serve them,' you shall not listen to the words of that prophet or to that dreamer of dreams; for the Lord your God is testing you, to know whether you love the Lord your God with all your heart and with all your soul." Not only should such signs and wonders be disregarded. The prophet or dreamer should be put to death, so that evil would be purged out of the midst of the people (vv. 5-11). Signs and wonders, however, are not necessarily the work of false prophets. They are also performed by Yahweh Himself, notably in bringing His people out of Egypt (Ex. 7:3; Dt. 4:34; 6:22; 7:19; 26:8; 29:3; 34:11; Ps. 78:43; 105:27; 135:9; Jer. 32:20f.; Neh. 9:10). The decisive factor is the relationship of the sign or wonder to Yahweh, and this is recognized in the light of previous teaching, the previous acts of Yahweh, and continuing knowledge of Him.

The Heb. *'ôṯ* and *môpēṯ* are usually translated by *sēmeíon* and *téras* in the LXX, and by *signum* and *portentum* in the Vulgate. Heb. *'ôṯ* does not necessarily denote violations of nature. A sign points beyond itself and indicates Yahweh's ordering and overriding of nature and history. It is used in Gen. 1:14 of the sun and the moon; in Gen. 17:10 of circumcision; in Ex. 12:13 of the blood of the Passover lamb; in Isa. 7:11, 14 of Immanuel; and in Isa. 38:7 of Ahaz's sun dial. A sign may confirm faith that Yahweh will do what He has undertaken (cf. Ex. 4:1-10), or embody and exemplify His saving action (cf. Ex. 7:1-17). Heb. *môpēṯ* often carries with it the suggestion of a divine threat or warning, as a discouragement to wrongdoing (Ex. 11:9; Dt. 28:46). It, too, does not necessarily imply a violation of the natural order. At the same time it indicates an ordering and a significance beyond the natural (cf. Ps. 71:7; 105:5; Isa. 8:18; 20:3; Zec. 3:8).

Other terms that occur in the OT are *pele'*, "wonder, marvel" (Ex. 15:11; Ps. 77:11, 14 [MT 12, 15]; 78:12; 88:10, 12 [MT 11, 13]; 89:5 [MT 6]; Isa. 25:1), and its cognate *niplā'ôṯ*, "wonderful deeds" (Ex. 3:20; Jgs. 6:13; Ps. 9:1 [MT 2]; 26:7; etc.). Meditation on Yahweh's great and terrible acts, which include the signs and wonders of the Exodus, is a cause for praise and encouragement (2 S. 7:23; 1 Ch. 17:19; Ps. 105:5; 145:5f.).

2. NT Terms. The OT expression "signs and wonders" occurs frequently in the NT (*sēmeía kaí térata*, Mt. 24:24 par. Mk. 13:22; Acts 2:19 [citing Joel 2:30 (MT 3:3)], 22, 43; 4:30; 5:12; 6:8; 7:36; 15:12; Rom. 15:19; 2 Cor. 12:12; 2 Thess. 2:9; He. 2:4). Signs and wonders are wrought by God as a testimony, but they also may be performed by false prophets who seek to deceive. The apocalyptic, though not necessarily miraculous, sense of a sign is evident in Mt. 24:3 par. Mk. 13:4; Lk. 21:11, 25f. The demand for conclusive signs is deprecated (Mt. 12:39; 16:4; cf. Lk. 11:16, 29; Jn. 4:48; 1 Cor. 1:22). Such a demand is indicative of a refusal to respond to what has been already revealed.

The Gk. *téras* occurs only in the plural and in conjunction with *sēmeía*. However, *sēmeíon* is found on its own in

addition to the phrase "signs and wonders." It occurs in connection with the request to Jesus for a sign and His saying about the sign of Jonah (Mt. 12:38f. par. Lk. 11:29f.; cf. Mt. 16:1, 3f.; Lk. 11:16), the sign of the parousia (Mt. 24:3 par. Mk 13:4; Lk. 21:7; cf. Mt. 24:30; Lk. 21:11, 25), the attendant signs in the longer ending of Mark (Mk. 16:17, 20). Luke also mentions signs in his birth narratives (Lk. 2:12, 34), and observes that Herod hoped to see Jesus perform a sign (Lk. 23:8).

The word *sēmeíon* is characteristic of the Fourth Gospel (Jn. 2:11, 18, 23; 3:2; 4:54; 6:2; 7:31; 9:16; 10:41; 11:47; 12:18, 37; 20:30). The signs of Jesus are grounds for belief. At the same time John also describes Jesus' miracles and other actions as "work" (*érgon*) or "works" (*érga*) which are also the Father's "work" or "works" (Jn. 4:34; 5:20, 36; 7:3, 21; 9:3f.; 10:25, 32f., 37f.; 14:10-12; 15:24; 17:4; cf. also Mt. 11:2, 19; Lk. 24:19). The vb. *ergázomai* is similarly used to describe Jesus' work (Jn. 3:21; 5:17; 6:27f., 30; 9:4).

The word *dýnamis*, "power," is also used of a deed of power, a mighty work, mostly in the pl. *dýnameis* (Mt. 7:22; 11:20f., 23; 13:54, 58; Mk. 6:5; Lk. 10:13; 19:37; Acts 2:22). The mighty works of Jesus are presented as grounds for response. Failure to respond is culpable. Mighty works wrought by Christians in the NT Church are attributed to the Spirit (1 Cor. 12:10, 28f.; Gal. 3:5; He. 2:4; 6:5). They belong to the signs of an apostle (2 Cor. 12:12).

B. Later Definitions. The English word "miracle" derives from the Lat. *miraculum*, "a wonder, a wonderful thing." Both the Latin noun and the cognate vb. *miror*, "wonder, be astonished," draw attention to the subjective response to the event rather than to speculation as to whether the event breaks the laws of nature. Augustine gave an open-ended definition of a miracle as "whatever appears that is difficult or unusual above the hope and power of them who wonder" (*De utilitate credendi* xxxiv). He preferred to think of a miracle as "contrary to what we know of nature," for God never acts against Himself and the ultimate order that He has created (*Contra Faustum Manichaeum* xxvi.3). Aquinas followed Augustine but stressed the incapacity of nature to produce miracles. "The more it exceeds nature's capability, the greater any miracle is said to be" (*Summa Theol.* i.105.8).

With the advent of modern science and its increasing stress on laws, miracles came to be defined increasingly in terms of violations of the laws of nature. This led Spinoza to seek natural explanations for the biblical miracles (*Tractatus Theologico-politicus*, § 6) and Hume to claim that the whole idea of miracles was self-refuting (*Essay Concerning Human Understanding*, § 10).

R. F. Holland is representative of thinkers who have sought to draw a distinction between the violation and contingency or coincidence concept of miracle. In the latter case it is possible to discern, at least in principle, natural causes and factors which brought about the event (e.g., the strong east wind which caused the waters to part for the Exodus, Ex. 14:21). In such a case the miracle consists in the divine ordering of events. In the case of the violation concept of miracle two conditions must be fulfilled. On the one hand, the event must involve a violation of the laws of nature. Otherwise, it is an ordinary event or a case of the contingency concept. On the other hand, the event must be empirically certain. Otherwise, doubt may be entertained as to whether it occurred at all.

C. S. Lewis represented a return to a more Augustinian position with his definition of a miracle as "an interference with Nature by supernatural power" (*Miracles*, p. 15). This leaves open the question as to how nature has been interfered with. It gives recognition to the fact that God's working is ultimately a mystery. It allows for the fact that miracles are never seen directly. What is observed is a state of affairs before and after the event. Recognition of an event as a miracle is bound up with the wider view that one takes of reality, just as rejection of miracles is bound up with one's beliefs about the uniformities of nature.

II. Miracles in the Bible.–A. OT. Miracles are not uniformly distributed throughout the OT. This has led some scholars to conclude that the miracles occur only at special times of crisis and redemptive history. They are mentioned in connection with the Exodus from Egypt under Moses, the life-and-death struggle with Baal-worship under Elijah and Elisha, and the trials of Daniel.

Miracles serve to legitimate the mission of Moses before the people (Ex. 4:1-9) and Pharaoh (Ex. 7:8-13). In the latter case Pharaoh's magicians duplicated Aaron's act of casting down his rod, so that it became a serpent. But Aaron's rod swallowed their rods. Later tradition identified the magicians as Jannes and Jambres (2 Tim. 3:8).

Through the "plagues" of Egypt (Ex. 9:14) both Israel and Pharaoh learn who the Lord is. The magicians are compelled to recognize the limits of their magic and tell Pharaoh, "This is the finger of God" (Ex. 8:19). Although Pharaoh hardens his heart at the first nine plagues, he finally allows Israel to leave Egypt (Ex. 7:8–13:16). The first nine plagues are narrated in a continuous series, but the literary structure suggests their grouping into three sets of three: (1) water turned into "blood"; frogs; the land filled with mosquitoes or gnats; (2) flies; cattle plague; boils; (3) hail destroying the crops; locusts devouring what is left; darkness. The tenth and final plague destroys the firstborn. The sources of the stories have been variously assigned to J, E, and P by some scholars, though only the first and the last miracles are thought to be reported in all three sources. The plagues have been interpreted as a series of natural disasters, beginning with the washing down of red earth from the Abyssinian and Ethiopian plateau together with reddish microorganisms called flagellates (cf. G. Hort, *ZAW*, 69 [1957], 84-103, and 70 [1958], 48-59). Decomposing fish caused the frogs to leave the Nile and spread the diseases described in the second set of plagues. The third set begins with hail and thunderstorms typical of the time of year which produced the earlier sequences. The hail would destroy flax and barley, but would leave wheat and spelt for the locusts. The darkness was an unusually strong Khamsin, or desert sandstorm, of the kind which strikes Egypt from the south in late February or early March. Although natural explanations are to hand, Yahweh is shown to be the one who controls nature and history for His purposes.

Yahweh's subsequent provision for His people in leading them through the Red Sea and providing food and drink also exhibits Yahweh's control of nature. When Moses stretched out his hand over the sea, "The Lord drove the sea back by a strong east wind all night, and made the sea dry land, and the waters were divided" (Ex. 14:21; cf. vv. 26f.). The quails were brought by "a wind from the Lord" (Nu. 11:31). It is known that eating quails which have fed on poisonous plants may cause illness and death. The manna described in Ex. 16:14, 31 and Nu. 11:7-9 resembles the excretion of two scale-insects which feed on the twigs of the tamarisk tree. The discovery of water (Ex. 17:1-6; Nu. 20:2-13) appears to be related to the known geological phenomenon of water which lies below the limestone surface in the Sinai desert and may be found through striking the rock. Such considerations have led many scholars, including W. Eichrodt (*Theology of the OT*, II [Eng. tr. 1967], 162-67), to see the characteristic

OT emphasis to fall on Yahweh's control of nature in miracles. They are not violations of the natural order but evidence of His control of it.

The book of Joshua presents the conquest of Canaan as divine work rather than a purely military achievement. The long day of Josh. 10:13 has been variously explained as a supernaturally induced thunderstorm, an abnormal refraction of light, and poetic imagery (cf. Homer *Od.* xxiii.243-46).

A series of miracles is associated with Elijah and Elisha. Against the background of a time of drought in the reign of Ahab, the cycle begins with three stories which show Yahweh to be the Lord and giver of life. Elijah is fed by the ravens at the brook Cherith (1 K. 17:1-7). The jar of meal and cruse of oil of the widow of Zarephath sustain Elijah, the widow, and her son (1 K. 17:8-16). Elijah restores the boy to life by lying on the boy and crying to the Lord (1 K. 17:17-24). As a consequence the woman recognizes that the prophet is a man of God, and that the word of the Lord in his mouth is truth. The contest with the prophets of Baal issues in fire from heaven that vindicates Elijah and his God and ends the drought (1 K. 18). Nevertheless, Elijah is forced to flee for his life.

The ascension of Elijah introduces the Elisha cycle. Elisha has already been appointed Elijah's successor. Like the eldest son, he receives a "double portion" of his inheritance, Elijah's "spirit" (2 K. 2:9, 15; cf. Dt. 21:17). This is recognized by the sons of the prophets from Elisha's act of striking the Jordan with Elijah's mantle and crossing the parted waters (2 K. 2:13-15). The act is followed by miracles greater and more numerous than those performed by Elijah. Elisha purifies the water of Jericho by throwing in salt (2 K. 2:19-22), an act interpreted by some scholars as a fertility rite. This is followed by the incident of the bears (2 K. 2:23-25). 2 K. 4 parallels the Elijah miracles in the account of the provision for the widow's household (vv. 1-7) and the restoration of the Shunammite woman's son (vv. 8-37). Elisha purifies a poisoned pot (2 K. 4:38-41) and feeds a hundred men with twenty loaves (2 K. 4:42-44). Naaman, the commander of the army of the king of Syria, is cleansed of his leprosy after bathing seven times in the Jordan (2 K. 5). Like the story of Elijah at Carmel, this story shows the superiority of Yahweh over other gods. Whereas some take the recovery of the iron axe head (2 K. 6:1-7) to be an outright miracle defying the laws of gravity, others see the locating of the axe head as a result of Elisha probing in the water and report the story more as an account of the prophet's insight and Yahweh's providential care. The story of the chariots of fire at Dothan (2 K. 6:8-23) illustrates Yahweh's saving care, comparable with His care and provision for Elijah. The relief of Samaria fulfils Elisha's prophecy (2 K. 7).

The Immanuel sign of Isa. 7:14 has been the subject of much discussion, not least over whether the young woman was a virgin. The point of the sign in Isaiah, however, is not to describe a miraculous conception, but to give a token that "God is with us." In the time that it takes for the child to be conceived, born, and weaned, the danger will be over. In Mt. 1:23 the Immanuel sign of Isaiah is seen as typology which points prophetically to the greater fulfillment by Jesus.

The sun dial of Ahaz was probably a series of steps (2 K. 20:8-11; Isa. 38:7f.; cf. Josephus *Ant.* x.2.1 [24-29]). Attempts to explain the phenomenon of the changed position of the shadow include the suggestion that it was some kind of mirage, and the possibility that the light was a manifestation of the Shekinah glory.

The view that one takes of Jonah and the great fish (Jonah 1:17–2:10), of Shadrach, Meshach, and Abednego in the fiery furnace (Dnl. 3), and of Daniel in the lions' den (Dnl. 6) is bound up with the view that one takes of the literary genre of the books in question. Traditionally these stories have been regarded as historical miraculous events, not least because Jesus' allusion to "the sign of the prophet Jonah" (Mt. 12:39; cf. 16:4; Lk. 11:29) has been taken to be an endorsement of the historicity of an event which provides a historical type for the death and resurrection of Jesus. Critical study, however, has raised the question of whether Jesus' reference to Jonah was intended to be taken in this way, and whether the book of Jonah is not itself intended to be an allegory or parable concerning Jewish exclusivism.

The fiery furnace in Dnl. 3 has been thought to be a kiln for baking bricks or smelting metal. The fire which killed the guards has been attributed to a sudden gust of flame or an explosion. Execution by being cast into a furnace is attested by documentary evidence from Babylonian times (cf. J. B. Alexander, *JBL*, 69 [1950], 375f.). In the case of the lions a spiritual presence may have inhibited them from attacking Daniel (Dnl. 6:22 [MT 23]). If, however, the book of Daniel is an apocalyptic pseudepigraph, written *ca.* 164 B.C. to encourage Jewish resistance to Antiochus Epiphanes, the stories may have an intended allegorical character.

B. Synoptic Gospels. For an outline of Jesus' miracles in all four Gospels see the accompanying table of Miracle Stories in the Gospels. *See also* VIRGIN BIRTH OF JESUS CHRIST, TRANSFIGURATION, and RESURRECTION for further discussion of these subjects. Form-critical studies dealing with possible motives in the handling of the miracle stories by the respective evangelists are noted in the bibliography. Comment here is restricted to the place of miracles in the Gospels and to remarks on some of their features.

The Gospels themselves draw no sharp distinction between Jesus' acts of healing, His exorcisms, and the nature miracles. Luke, especially, speaks of healing in terms of casting out evil spirits or Satan (e.g., Lk. 4:38f.; 13:16). John, on the other hand, omits all mention of exorcism. In their descriptions of Jesus' exorcisms, healings, and nature miracles the Gospels present the events either explicitly or implicitly as following His pronouncement of the word of God in the power of the Holy Spirit. Jesus acts and speaks with the authority of Yahweh Himself.

The tendency to treat the miracles of Jesus apart from His teaching and the course of His life has been encouraged by Christian piety, apologetic interests, and critical study. Piety has found encouragement and inspiration from reflection on individual miracles. Apologetics has tended to focus on the Gospel miracles as supernatural attestation of the divinity of Christ. Critical study has tended to prefer the teaching of Jesus to the miracles, and form criticism has seen the miracle stories as products of pious belief, produced by churches anxious to invest Jesus with the credentials of a divine man.

The miracles of Jesus cannot, however, be detached from His teaching, the course of His ministry, or indeed the reason why the Pharisees and others sought to kill Him. At a very early stage Jesus was perceived by His opponents as a blasphemous false teacher, who was possessed by Satan and who must be eliminated. Underlying this attitude was the conviction that action must be taken in accordance with the teaching laid down in Dt. 13. Jesus' attitude to the sabbath and the current interpretation of the law and His presumption in pronouncing forgiveness of sins (Mk. 2:7, 18, 23 par.) were perceived as the work of a blasphemous false prophet who used signs and wonders in order to accredit Himself. The healing of the

man with a withered hand on the sabbath led to the Pharisees taking counsel with the Herodians to destroy Jesus (Mk. 3:6 par.).

The result was the charge that Jesus was possessed by Beelzebul, i.e., Satan (Mk. 3:22f. par. Mt. 12:24; Lk. 11:15). Conviction on such a charge, as the Pharisees and their colleagues well knew, carried a sentence of death. Jesus' rebuttal of the charge drew attention to the patent self-contradiction involved in it, and led Him to make the counter-charge of blasphemy against the Holy Spirit. By attributing Jesus' works to Satan, when they were in fact the work of the Spirit of God, Jesus' opponents were themselves guilty of blasphemy (Mk. 3:29f. par. Mt. 12:32; Lk. 12:10).

Both the charge of being possessed by Beelzebul in the performance of His works and Jesus' response should be read in the light of Jesus' anointing by the Spirit at His baptism and His identification as the anointed Son of God by the voice from heaven (Mk. 1:11 par.; cf. Ps. 2:7; Isa. 42:1). John the Baptist identified Jesus with the one who would baptize with the Holy Spirit (Mk. 1:8 par.). This identification is further brought out in connection with Jesus' works by Mt. 12:18-21 (citing Isa. 42:1-4). Luke's account of Jesus' reading of Isa. 61:1f. in the synagogue at Capernaum (Lk. 4:18f.) presents Jesus as one who understood Himself to be anointed by the Spirit of the Lord in order to fulfil His preaching, healing, and saving work. Jesus' casting out of demons by the Spirit of God is evidence of the presence of the kingdom of God (Mt. 12:28; cf. Lk. 11:20; 17:21).

Jesus' refusal to perform a sign and His allusion to the sign of Jonah (Mt. 12:38-42; 16:4; Lk. 11:16, 29-32; cf. Mk.

8:11f.) were not simply the result of His reluctance to perform a sign on demand. For those who had eyes to see His works bore eloquent testimony. However, Jesus' reply needs to be seen in the light of the consistent attitude of the Pharisees and their understanding of Dt. 13:1-11 and 18:15-22. No amount of signs could legitimate a false prophet, whose teaching should be evaluated by the word of God. (Indeed, according to Mk. 13:22 par. Mt. 24:24, this was also Jesus' own attitude to the deceptive character of signs and wonders.) A sign would be at best neutral and at worst positively damning. Given their preconceived attitude to Jesus, the Pharisees viewed Jesus as a blasphemous subverter of the law. Any sign that He might perform would only incriminate Him further.

The motivation behind the request for a sign was the desire to "test" Jesus (Mk. 8:11). In Mark the request comes immediately after the feeding of the four thousand. Having failed in their attempt to convict Jesus of being possessed by Beelzebul, and having only hearsay evidence of a nature miracle to go on, the Pharisees evidently hoped to get Jesus to perform a sign before competent witnesses, viz., themselves. If Jesus had performed such

a sign, it would have been impeccable evidence of their contention that He was in league with Satan. They could then have proceeded with His conviction and execution. Such signs were the subject of the temptations described in Mt. 4:1-11 and Lk. 4:1-13.

The sign of Jonah was not a sign performed by the prophet to accredit himself. His fate of being cast into the sea was a judgment on the prophet by the crew of the ship in order to save themselves from shipwreck. The fish was the means of Jonah's rescue and reinstatement. The story of Jonah is thus used as an ironic parable, commenting on the actions of Jesus' opponents, who seek to do away with Him in order to avoid national shipwreck. The resurrection of Jesus will reverse their verdict.

For those who had eyes to see, Jesus' actions were such as fulfilled the prophecies of the coming one, and this was sufficient (Mt. 8:17; cf. Isa. 53:4; Mt. 11:5 par. Lk. 7:22; cf. Isa. 35:5f.; 61:1). The signs of Jesus were in the tradition of prophetic signs. These were not, in the first instance, performed to accredit the prophet. They were part of his message, and were in fact the embodiment of it. Jesus enacted numerous such signs. The act of taking children in His arms, His washing of the disciples' feet, His entry into Jerusalem, the rite of baptism, and the Last Supper were all in the prophetic tradition of signs which embodied and actualized the message. In the same way the miracles of Jesus were enactments of His message.

The cursing of the fig tree was a symbolic, prophetic act of judgment. The words and actions of Jesus embody the words and actions of God Himself. Like Yahweh, Jesus stills the roaring of the seas (Ps. 65:7 [MT 8]; 89:9 [MT 10]) and even tramples it (Job 9:8; Hab. 3:15). The saving acts of Yahweh described in Ps. 107 are mirrored by many of the events in the synoptic accounts of the miracles of Jesus. The feeding of the multitudes takes up the theme of God's provision for His people in the wilderness and also that of the eschatological banquet. The miracles of Jesus show God the Creator, Sustainer, and Redeemer at work in the end time.

C. Gospel of John. The Fourth Gospel makes no mention of exorcism, and focuses attention on seven signs. For the location of the signs see the table of Miracle Stories in the Gospels. For John's use of the terms "sign" and "work," see I.A.2 above. The choice of seven may reflect the idea of the perfect number, completeness, the days of creation, or the restoration of creation. The signs have been seen as reflecting Jesus' lordship over quality (water into wine), space (the healing of the nobleman's son at a distance), time (the healing of the man who had been lame for 38 years), quantity (the feeding of the five thousand), nature (walking on the sea), misfortune (the healing of the man born blind), and death (the raising of Lazarus). At the same time the signs are parabolic and function like prophetic signs which illustrate and embody the message of Jesus. Thus the feeding of the five thousand leads to the discourse on the bread of life (Jn. 6:35-65). The healing of the lame man and the blind man and the raising of Lazarus are parabolic of the saving work of Jesus, who restores the spiritually lame and blind, and gives life to the dead.

The miracle at Cana has been interpreted as a Christian borrowing from the cult of Dionysus, who was credited with turning water into wine (C. K. Barrett, *Gospel According to John* [1955], p. 157). It is questionable, however, whether John's Jewish readers would have appreciated such a comparison. J. D. M. Derrett has suggested that the incident be understood against the background of obligations incumbent upon wedding guests in the Jewish community, and the problems created by Jesus' appearance at the wedding in the company of His disciples (*Law in the NT*, pp. 228-246).

Whereas in the Synoptics Jesus' actions are attributed to Beelzebul, in John Jesus is said to be a Samaritan and to have a demon (Jn. 8:48; cf. 7:20; 10:20). The accusation was evidently bound up with Jesus' attitude to official Judaism, His associations with Samaritans (cf. Jn. 4), and the identification of Samaria with a deviant religion and magical practices (cf. Acts 8:14-24). The charges of demon possession and blasphemy were linked with attempts to kill Jesus on the grounds that He was leading the people astray (Jn. 7:12, 20, 25; 8:59; 10:33, 36). Jesus' death was justified by Caiaphas as the ultimate act of expediency that would avert the national disaster which would come about through the people being led astray by following Jesus' signs (Jn. 11:47-53). Nicodemus, on the other hand, recognized Jesus as "a teacher come from God; for no one can do these signs that you do, unless God is with him" (Jn. 3:2).

The signs of Jesus, like His teaching, provoke both belief (Jn. 2:11, 23; 4:50, 53; 5:9; 6:14, 21; 9:11, 17, 33, 38; 11:27, 45; 12:11) and unbelief (Jn. 5:18; 6:66; 9:16, 24, 29, 40f.; 11:53). Rejection of the signs on the basis of pretended claims to know the truth is culpable. The signs are the work of the Father, revealing the Father in Jesus (Jn. 10:37f.; cf. 5:20-27, 30-47; 7:27-29; 8:28f.; 9:3f.; 14:10f.; 15:24; 17:2-4, 21). As such, they reveal the glory of God and bring glory to God (Jn. 6:41-47; cf. 1:14; 2:11; 5:41, 44; 7:18; 8:50; 9:24; 11:4, 40; 12:41, 43; 17:5, 22, 24). They are reported, so that those who have not seen, and who are not in a position to prove by examining for themselves, may believe that Jesus is the Christ, the Son of God, and that believing they may have life in His name (Jn. 20:30f.; cf. vv. 20-29).

D. Book of Acts. The preaching of Peter at Pentecost describes Jesus of Nazareth as "a man attested to you by God with mighty works and wonders and signs which God did through him in your midst" (Acts 2:22). Peter describes to Cornelius "how God anointed Jesus of Nazareth with the Holy Spirit and with power; how he went about doing good and healing all that were oppressed by the devil, for God was with him" (Acts 10:38). In the preaching of Acts the resurrection of Jesus is proclaimed as His vindication and reinstatement, which reverses the verdict and the action of the lawless, wicked men who killed Him. He who was anointed by the Spirit is the one who pours out the Holy Spirit (Acts 2:33; cf. 1:5; 11:16).

The new situation calls for repentance and dissociation from the crooked generation which condemned Jesus (Acts 2:37-40). The disciples are to receive the Holy Spirit and be witnesses to Jesus "in Jerusalem and in all Judea and Samaria and to the end of the earth" (Acts 1:8). In the context of this mission Acts describes a number of healing miracles and exorcisms, wrought by the apostles and their associates. The use of the expression "signs and wonders" is a deliberate echo of OT language. Its use by Stephen draws attention to the fact that they are a counterpart to "signs and wonders" wrought in connection with the Exodus (Acts 7:36). At Pentecost Peter declares them to belong to the eschatological outpouring of the Spirit (Acts 2:19, 22; cf. Joel 2:28-32 [MT 3:1-5]). They are wrought by the apostles at Jerusalem (Acts 2:43; 4:30; 5:12), by Stephen (Acts 6:8), and by Paul and Barnabas at Iconium (Acts 14:3) and on their missionary journey (Acts 15:12). The word "sign" is used on its own to describe Peter's healing of the lame man in the temple (Acts 4:16, 22; cf. 3:1-10) and Philip's healings and exorcisms in Samaria (Acts 8:6, 13).

Acts 5:12-16 describes the many healings and exorcisms

performed by the apostles and the great response. Some even sought to have Peter's shadow fall on them. The healings by Peter are counterbalanced by those of Paul, who healed a lame man at Lystra (Acts 14:8), cast out a spirit from a slave girl with the gift of divination at Philippi (Acts 16:16-18), and performed such extraordinary miracles at Ephesus that handkerchiefs or aprons were carried from his body for the healing and exorcism of the sick (Acts 19:11f.). At Troas, Eutychus survived a fall that everyone except Paul deemed fatal (Acts 20:9-12).

As in the Gospels the healings and exorcisms produced a mixed reaction. They led to the imprisonment of both Peter and Paul, and in both cases the apostles were given an opportunity to escape (Acts 5:17-20; 16:19-27). In both cases, too, healings and exorcisms provided opportunity to proclaim the word of God. Whereas the actions of Peter and the apostles in Jerusalem were questioned, but could not be gainsaid (Acts 4:13-22; 5:33-40), those of Paul in the gentile world were attributed to his being a god (Acts 14:11; 28:6). In Samaria Simon Magus deemed the gift of the Spirit to be a form of superior magic and sought to purchase it from Peter and John (Acts 8:14-24). At Ephesus itinerant Jewish exorcists undertook to practice in the name of Jesus, but failed (Acts 19:11-20). The episode led to wholesale abandonment of magic and the opposition of those with vested interests.

E. Other NT Writings. The ambivalent character of signs is also evident in Paul's writings. He could describe his ministry among the Gentiles in terms of winning their obedience "by word and deed, by power of signs and wonders, by the power of the Holy Spirit" (Rom. 15:18f.). He rejected sign seeking by the Jews and wisdom seeking by the Gentiles (1 Cor. 1:22) and, in a manner comparable with the sign of Jonah, proclaimed Christ crucified as the power and wisdom of God (vv. 23-25). At the same time Paul could point to "the demonstration of the Spirit and power" (1 Cor. 2:4). Healing and miracle working are among the gifts of the Spirit in the body of Christ, but such gifts are given only to some (1 Cor. 12:28-30). They have their place only in relation to the other gifts. A faith which could move mountains is nothing without love (1 Cor. 13:2). Miracle working in the Church is again related to the Spirit in Gal. 3:5, where it also related to faith.

Although Paul wrought "the signs of a true apostle . . . in all patience, with signs and wonders and mighty works" (2 Cor. 12:12), his thorn in the flesh was not removed. In response to his earnest petitions he received the reply, "My grace is sufficient for you, for my power is made perfect in weakness" (2 Cor. 12:9).

Signs, wonders, and the gifts of the Spirit are a witness which God gives (He. 2:4). On the other hand, "The coming of the lawless one by the activity of Satan will be with all power and with pretended signs and wonders" (2 Thess. 2:9). The visions of Rev. 12:1 and 15:1 describe various signs in heaven. But Satan, the beast, and demonic spirits also perform signs that deceive (Rev. 13:13f.; 16:14; 19:20).

In Jas. 5:13-18 prayer, the anointing of the sick by the elders of the Church, and confession of sin are encouraged for the healing of the sick. Such healing is not treated as a sign or wonder. It is not advocated for apologetic purposes in order to convince the heathen. It belongs to the context of prayer, for which Elijah provides a role model in his intercession for rain (cf. 1 K. 18:42).

III. Miracles in the Jewish and Hellenistic Worlds. *–A. The Jewish World.* Rabbinic thought recognized miracles in the Jewish canonical Scriptures and also in subsequent times. Miracles, however, were not regarded as a test of truth. The Torah was more decisive than either miracles or a voice from heaven, as Rabbi Eliezer found to his cost in his debate with Rabbi Joshua (T.B. *Baba Metzia* 59b). Having reportedly moved a carob tree, caused water to flow backward and the walls of a house to bend inward, and having received endorsement by a voice from heaven, Rabbi Eliezer was told by Rabbi Joshua and Rabbi Jeremiah that the Torah was not in heaven but on the earth, and that the Torah provided for judgments to be made in accordance with majority decisions. (For this and other rabbinic teaching see C. G. Montefiore and H. Loewe, *Rabbinic Anthology* [repr. 1974], pp. 339-341, 690-93.)

Rabbinic literature contains many fanciful tales of miracles. Some scholars think that Galilee was more prone to superstition, credulity, and charismatic phenomena than Judea. Rabbinic discussion of miracles tended to stress the miracle of creation (Midr. *Ex. Rabbah* 24:1; the thanksgiving prayer Modim in the daily Amidah). Some rabbis explained the biblical miracles as having been implanted in the created order at the beginning of the creation (Midr. *Gen. Rabbah* 5:45; Midr. *Ex. Rabbah* 21:6; Mish. *Aboth* v.6).

In the 1st cent. B.C. Honi (Onias) the Circle Drawer was regarded as a saint and miracle worker (Josephus *Ant.* xiv.2.1 [22]; Mish. *Taanith* iii.8; T.B. *Taanith* 23a; T.J. *Taanith* iii.10-12, 66d). His nickname derives from the occasion when he drew a circle, stood in it, and successfully interceded for rain. The incident is more illustrative of God's grace in answering prayer, however, than of a sign or wonder.

Similarly Hanina ben Dosa (1st cent. A.D.) appears to have been a pious charismatic, known as a prayerful intercessor for the sick and troubled (T.B. *Berakoth* 34b; *Yebamoth* 121b). He is also said to have caused vinegar to burn in lieu of oil in the sabbath light, and to have performed numerous miracles (T.B. *Taanith* 25a).

A decisive difference between these miracles and those of Jesus lies in the fact that these miracles were not associated with particular teaching or messianic claims. Jesus' miracles, on the other hand, were associated with His distinctive teaching and practices. Moreover, they are presented in the NT as the work of the Spirit-anointed Christ.

B. The Hellenistic World. In Greece Asclepius was revered as the god of healing. Cures were reported at shrines dedicated to him, notably at Epidaurus and Pergamum, which were centers of healing. In the East Asclepius was supplanted by Serapis, whose cult originated in Egypt. Tacitus reports how at Alexandria the Emperor Vespasian was induced (albeit reluctantly) to put spittle on the eyes of a blind man and allow his foot to be touched by a man with an ailing hand (*Hist.* iv.81). Both sufferers had received instructions from Serapis, and both were healed to the surprise of the Emperor. Thereafter Vespasian became interested in the cult of Serapis.

Charges that Jesus was really a magician, who had acquired His arts from the magi and His sojourn in Egypt, were made by Celsus in his comprehensive polemic against Christianity, the *True Word* (*ca.* 178-180). They were preserved and rebutted by Origen in *Contra Celsum* (*ca.* 249; cf. 1.28, 68).

Through the centuries critics of Christianity have repeatedly drawn attention to what they conceived to be parallels between Jesus and Apollonius of Tyana, a Neo-Pythagorean sage and wandering ascetic who lived in the first century and was credited with exorcistic and miraculous powers. Philostratus was commissioned by the Empress, Julia Domna, who was the wife of Septimius Severus, to write a *Life of Apollonius*. The circumstances

and contents of the book have prompted the suggestion that Apollonius and his cult were fostered as a rival alternative to Christianity. The most striking parallel occurs in the comparison of Lk. 7:11-17 and the *Life of Apollonius* iv.45, which tells how Apollonius encountered the funeral procession in Rome of a bride who had died in the hour of her marriage. Apollonius restored her, but Philostratus leaves open the question of whether the ascetic "detected some spark of life in her . . . or whether life was really extinct."

In the 19th and 20th cents. the History of Religions School sought to demonstrate parallels between the Gospel miracles and miracle stories from the Hellenistic world. In *Kyrios Christos* (1913; Eng. tr. 1970) W. Bousset tried to trace Jesus' Lordship and the miracle stories to the influence of Hellenistic religion on the Church. His sources were largely post-Christian, however, and some of them were patently suspect of being anti-Christian polemic. Other scholars who sought to investigate parallels include R. Reitzenstein, O. Weinreich, and P. Fiebig. Their work deeply influenced R. Bultmann in his program of demythologization.

L. Bieler's thesis that the Hellenistic world provided the Church with a role model of the "divine man" also found some following (cf. Bieler, *Theios Anēr*, I-II [1935-36]). Apollonius was seen as an instance of such a "divine man." The term is found in the Hellenistic Jewish writers Josephus, Philo, and Artapanus. Further investigation, however, has not confirmed the suggestion that "divine man" was a technical term denoting a distinctive category of divinized men in antiquity. Contrary to assumptions, it was not associated, in the sources where it occurs, with miracle working. It was capable of a variety of senses, suggesting an inspired man, a man somehow related to God, or simply an extraordinary man. The term does not occur in the NT, and in view of its broad range of meaning and the fact that it was not associated with miracle working, it does not seem to have been used in any way as a model for NT christology.

J. M. Hull attempted to show possible connections between magic and the Gospels' picture of Jesus in *Hellenistic Magic and the Synoptic Tradition* (1974). His sources date from the 3rd and 4th cents. A.D., however, and few scholars appear to have found his case convincing. Whereas Hull stopped short of attributing magical practices to Jesus Himself, M. Smith contended that Jesus practiced magical arts (*Jesus the Magician* [1978]). Smith argued that the NT writers and the early Church tried to cover this up. His case turns on radical reinterpretation of incidents and sayings on the supposition that their present form is a deliberate, but not altogether successful, attempt to remove all suggestions of magic. Smith regarded the Lord's Supper as "the clearest evidence of Jesus' knowledge and use of magic" (p. 152). It may be noted that his reconstruction (like Hull's) leans heavily on Egyptian magical papyri of the 3rd and 4th cents. A.D. and other artifacts that are not earlier than the 2nd century. These themselves are patently products of a syncretism which sought to combine Christianity with magic. Smith's contentions bear a marked resemblance to the views of Celsus and to those of the opponents of Jesus in the Gospels. Smith himself, however, gives no credence to magic.

IV. Miracles in Philosophy and Christian Apologetics. – *A. Miracles and Apologetics.* From the 2nd cent. onward Christian apologists have appealed to miracles as evidence of divine attestation in support of the truth claims of Christianity (e.g., Justin Martyr *Dial.* 39, 69; Origen *Contra Celsum*, i.2, 46; Athanasius *De Incarnatione Verbi Dei* xviii; Augustine *Civ. Dei* xxi, xxii). At the same time the fathers were aware that a simple appeal to miracles was not without difficulty. There were skeptics in the ancient world just as there are today. In ancient times people were well aware of the uniformities of nature and judged reports of alleged happenings in the light of their understanding of the way things are. In other words, long before E. Troeltsch developed his doctrine of analogy in the 19th cent., people were applying it in practice.

In reply to the anticipated objection that miracles no longer occur, and hence reports of miracles in the Bible should be dismissed, Origen, Augustine, and others appealed to continued miracles in the Church which were supported by reliable testimony. The fathers tended to lay greater stress on fulfilled prophecy than on miracles as accreditation of their faith. Whereas reports of miracles were open to question, clear fulfillment of a prophecy made hundreds of years beforehand could not readily be gainsaid. Augustine, in particular, wrestled with the philosophical questions raised by miracles, and argued, as noted, that miracles were not necessarily contrary to nature, but only to what we know of nature. Miracles are the result of the higher, divine ordering of nature (*Contra Faustum Manichaeum* xxvi.3). Augustine suggested that miracles were like the fruit of seeds long dormant (*De trin.* iii.9.16).

Aquinas, on the other hand, tended to shun such speculation and stressed the incapacity of the created order to produce miracles on its own (*Summa Theol.* i.105; *Summa Contra Gentiles* iii.102-106). The Reformers were, in general, skeptical of postbiblical miracles. Calvin, in particular, repudiated the claim that continued miracles in the Church accredited the teaching of the Church. He denounced such works as "sheer delusions of Satan" that drew people away from God and that should be repudiated in accordance with the teaching of Dt. 13; Mt. 24:24; and 2 Thess. 2:9 (*Inst.*, Prefatory Address; cf. also i.8.5-7; i.13.13; i.14.18; iv.19.6, 18). The miracles of Scripture accredit the biblical revelation, which Calvin insisted was the test of all truth in religion. Miracles which draw people away from this do not bring glory to God in the way that the biblical miracles do. Hence they must be rejected. The miracles of Christ show His divinity. They serve as sacramental signs, embodying in nature what God promises and does in His Word.

Following the Reformation, the Roman Catholic Church continued to appeal to miracles in the Church as divine accreditation of its position, whereas Reformed theology, in line with Calvin, insisted that miracles ceased with the apostolic age. From the Catholic side J. H. Newman offered a notable defense in *Two Essays on Biblical and Ecclesiastical Miracles* (1870). The First Vatican Council (1869-70) pronounced that since miracles and prophecies "so excellently display God's omnipotence and limitless knowledge, they constitute the surest signs of divine revelation, signs that are suitable to everyone's understanding" (*Dogmatic Constitution on the Catholic Faith*, ch. 3). Subsequent Modernist questioning of miracles was condemned. The Second Vatican Council held that "the miracles of Jesus also demonstrate that the kingdom of God has already come on earth" (*Lumen Gentium* [1964], ch. 1, § 5). But it went on to say that the kingdom is principally revealed in the person of Christ Himself.

A classic statement of the Protestant appeal to the miracles of Jesus as divine authentication of His teaching was given by Locke in *Discourse of Miracles* (1702). The Deistic controversy in the late 17th and first half of the 18th cents. further served to confirm Protestants in their defense of miracles as objective events in history which accredited Christian beliefs. In Britain J. B. Mozley's Bampton Lectures on *Miracles* (1865) made a strong statement of the evidentialist case. In America A. Alexander's

Evidences (1825), which clearly focused on the Deistic question, reiterated the Reformed position in the light of philosophical objections. In doing this, it laid down the lines followed by subsequent Reformed apologists. The position of C. Hodge and B. B. Warfield is not materially different from that of Alexander. Warfield's *Counterfeit Miracles* (1918; reissued as *Miracles: Yesterday and Today, True and False* [1954]) was a catalog and critique of post-biblical miracles. It thus developed and strengthened the Reformed Protestant belief that miracles ceased with the apostolic age.

B. Skepticism. Skepticism concerning the Gospel miracles dates from NT times. But with the rise of modern science and history skepticism became increasingly articulate. Spinoza rejected miracles on the grounds that they were precluded by "the universal laws of science" which were decreed by God (*Tractatus Theologico-politicus* [1670], § 6). Spinoza used the language of Calvinistic orthodoxy to express a rationalistic pantheism, which admitted no interventions in the universal, rational order. The British Deists sought to detract from the Gospel miracles by appealing to those of Apollonius of Tyana and the miracles of other religions. Advocating the religion of reason and nature, they made it their aim to undermine the Christian appeal to miracles and fulfilled prophecy. T. Woolston's six *Discourses on the Miracles of Our Saviour* (1727-29) pronounced the Gospel miracles to be fraudulent and the Resurrection a Robinson Crusoe romance. Woolston was condemned for blasphemy. His attack on the Resurrection led to T. Sherlock's classic *Tryal of the Witnesses of the Resurrection* (1729).

By the time that Hume published his celebrated attack on miracles in *An Inquiry Concerning Human Understanding* (1748), § 10, the British debate concerning the historicity of miracles and their evidential value had been going on for over half a century. In the first part of his essay Hume rejected miracles as impossible on the grounds that they violated the laws of nature and that "a firm and unalterable experience has established these laws." In the second part of the essay Hume argued that the actual testimony to miracles was weak and inconclusive, originating in obscure parts of the world from ignorant, obscure men. When account is taken of human propensity to exaggerate and of miracles in other religions which cancel out those of Christianity, miracles are devoid of apologetic value. Instead of providing reasons for faith, they cannot be believed in without faith.

Hume's essay came to be regarded as the classic attack on miracles. Subsequent skepticism has only modified details. Hume studiously avoided mention of the Gospel miracles, but it was evident to all that Hume was attacking the apologetic appeal to the miraculous as divine accreditation of the Christian revelation. His thoughts were further prompted by discussions that he had in France and by reports of continued miracles connected with the tomb of François de Pâris, who had died in 1727. Such miracles, like the earlier Jansenist miracles which had confirmed the faith of Pascal, were appealed to as acts of divine attestation.

It is now widely recognized that Hume did not disprove the possibility of miracles. His argument was essentially defensive. It was more concerned with demonstrating the impossibility of appealing to miracles as proof of a religious belief system, than with showing outright that miracles could not happen, although at times Hume spoke as if he had shown that miracles were impossible. Hume acknowledged that scientific laws are based on statistical observation. On this basis laws may be said to describe the observed regularities of nature. This may lead us to call in question the veracity of testimony to the miraculous and invite consideration whether such testimony might be mistaken. At the same time testimony to the unusual, if well founded, may call in question our understanding of the laws of nature and the extent of their applicability. Only on the basis of an absolute knowledge of nature could it be argued that this or that miracle would be impossible.

This consideration has led contemporary philosophers in Hume's tradition to modify his argument. Instead of trying to show the impossibility of miracles as violations of the laws of nature, and therefore that any given miracle could not have happened, such skeptics argue that an event which was previously thought to have been a violation must be regarded as an instance of a law which is not yet understood. The historicity of the event is acknowledged at the price of its character as a miracle (if a miracle be indeed a violation of natural law).

In his own day Hume's argument was overshadowed by C. Middleton's *Free Inquiry into the Miraculous Powers which are Supposed to have Subsisted in the Christian Church* (1748). Like Hume, Middleton refrained from questioning the Gospel miracles. His aim was to criticize testimony to miracles in the early Church. Although his work found endorsement from B. B. Warfield, whose views on miracle stories in the early centuries were substantially similar to Middleton's, J. Wesley believed that Middleton had contrived to "overthrow the whole Christian system" (*Journal*, Jan. 28, 1749).

The Deistic approach to religion and miracles found expression in America among such founding fathers as Jefferson and in Europe among such leaders of the Enlightenment as Voltaire, Lessing, Reimarus, and Kant. In the 19th cent. D. F. Strauss scorned the explanations of the rationalists who proffered psychological and natural accounts of the miracles. His *Life of Jesus* (1835-36; Eng. tr. 1846) saw the Gospel miracles as the product of the myth-making mind which invested Jesus with supernatural characteristics drawn from the OT. L. Feuerbach explained miracles as projections of deep-seated wishes. The History of Religions School ascribed the Gospel miracles to the alien influence of pagan religion (see III.B above).

Underlying these objections to miracles was the common conviction that the world is a closed system of natural causes which does not admit of supernatural interventions. Bound up with this is the doctrine of analogy, enunciated by E. Troeltsch, which maintains that all historical judgments must be made in the light of our contemporary understanding of the world. Hence, that which bears no analogy to our present experience and understanding is rejected.

Such convictions underlie Bultmann's demythologizing program. Bultmann differed from Strauss, however, in that he ascribed what he considered to be the mythical elements of the NT world view to the influence of Gnosticism, Jewish apocalyptic, and Hellenistic religion.

C. Reassessment. That acceptance and rejection of miracle stories is bound up with one's wider view of reality has become increasingly recognized by Christian apologists. If miracles are thought of as violations of the laws of nature, and if such laws cannot be violated, no amount of historical testimony to any alleged miracle will suffice to qualify it as a miracle. It will always be explained away as myth, pious fabrication, deception, or an event which was only *thought* to be miraculous. For this reason, Christian apologists like A. E. Taylor and C. S. Lewis attempted to establish a prior theistic world view which would allow them to interpret miracles as the action of a personal God in nature and history.

Given a personal Creator who is free to use powers beyond man's imagination, as and when His own purposes require, miracles are feasible. Much of C. S. Lewis's

influential study of miracles was devoted to showing the inadequacy of materialism and determinism, and the superiority of Christian theism as an explanation of the world, as a prior step to presenting the feasibility of the NT miracle stories within the context of Christian theism. Similar approaches had, in fact, long been adopted by apologists who are generally regarded as evidentialists. Paley, Alexander, Hodge, and Warfield all appealed to theological considerations concerning God and His purposes in arguing for the historicity of the NT miracles. In doing this they were in fact agreeing that prior beliefs played an important part in their judgment that the Gospel miracles were historical events.

If apologists posit certain attributes and purposes of God, which belong to the Christian revelation, as the condition for grasping the feasibility of the miracle stories, it must be recognized that they have shifted the traditional apologetic appeal to miracles. Miracles no longer function as an objective, external guarantee of the Christian belief system, for their historicity is dependent upon the truth of that system. This is particularly evident in writers like C. S. Lewis who urge that individual miracle stories be seen in the context of "the grand miracle" of the Incarnation. For in this case belief in the Incarnation has become the necessary ground for determining the intelligibility and historicity of the miracle stories.

This view enables the believer to grasp the feasibility of miracles, but it raises the question of whether the NT miracle stories were ever intended to provide the objective, evidential attestation that they were deemed to have in some apologetic systems. In this connection several observations may be made. In Scripture the miracle stories never have the function of proving the existence of God. They come within the context of belief in God, and within that context serve as signs. But a sign is not the same as a proof. It is a pointer, an indication, and a revelation. As such it calls for a response. But both true and false signs have themselves to be identified and evaluated in the light of prior revelation. The signs of a false prophet are to be rejected, not on account of lack of empirical evidence but because they conflict with prior revelation (Dt. 13:1-6). The signs of Jesus are identified, according to the Synoptic Gospels, because they are those works which fulfil messianic prophecy. In the Fourth Gospel they are identifiable, because they can be recognized to be the work of the Father. In the Gospels miracles and fulfilled prophecy do not function as two parallel tracks of objective attestation to Jesus as the Christ. It is because the miracles of Jesus fit what is known through previous revelation that they can be recognized as the work of God.

Thus miracles in the NT are part of the revelation itself. They reveal God in Christ. In the NT the resurrection of Jesus is presented as a historical event, corroborated by testimony, by experience of the power of the risen Christ, and by the existence of the Church. The thought is not (as in some modern writers) that, if God could raise Jesus from the dead, then all the other miracles would be relatively easy for Him to perform. Rather, the Resurrection vindicates Jesus as the Lord's anointed and the one in whom God had been active all along. This point has added significance in view of the repeated charge leveled against Jesus that He was possessed by Satan, the charge of blasphemy for which He was ultimately condemned, and the charge that His death on the cross was self-evidently a sign of God's curse (Mk. 14:64 par.; Gal. 3:13; cf. Dt. 21:23). That Jesus was perceived by His Jewish opponents as a false prophet, who wrought signs and wonders in order to accredit Himself, shows incidentally that His miracles belong to the thought world of Judaism, rather than to the Hellenistic world. The point is corroborated by the apostolic preaching in Acts. Stress on miracles belongs to preaching to the Jews rather than to the Gentiles.

In response to Hume's charge that miracles of rival religions cancel each other out, two observations may be made. On the one hand, the charge would hold, if rival religions had duplicate miracles which functioned to validate diametrically opposed truth claims (e.g., if a rival religion could claim the resurrection of a messiah). On the other hand, claims to miracles are susceptible of various interpretations. They may be false claims or works of a false prophet. Just as God sends His sun and rain upon the just and the unjust (Mt. 5:45), His providential acts are not necessarily the monopoly of the Church. Moreover, it is possible for people to place a wrong construction on such acts, just as people in Paul's day attributed his actions to a pagan deity (Acts 14:11-13; 28:6).

The decisive factor from the biblical standpoint is not the stupendous character of the miracle per se but the way in which it relates to the self-revelation of God. Signs and wonders may or may not involve suspension of ordinary, natural causes. Where natural causes are present in biblical signs and wonders (e.g., the plagues and the Exodus miracles), they are identified as such. Unlike some apologists, the Bible never suggests that miracles are simply accelerated natural processes. Regardless of whether natural factors are identifiable, biblical miracles are signs of the intervention of God and His ordering of events. Such divine ordering is presented against the background of the normal, observed regularities of nature and human life.

The resurrection of Jesus especially is seen as the breaking of the resurrection order into our world of time and space. Jesus Himself with His resurrection body is the first fruits (1 Cor. 15:20-56; Col. 1:18). As such, the Resurrection is not a pure anomaly. It represents the incursion of a higher order into the present world. Some events, like the Transfiguration, may also be thought of as anticipations of the eschatological glory in the present world. Other miracles, like the healings and exorcisms, are sacramental signs embodying and exemplifying the redemptive love and power of the Creator in the person and actions of Jesus Christ.

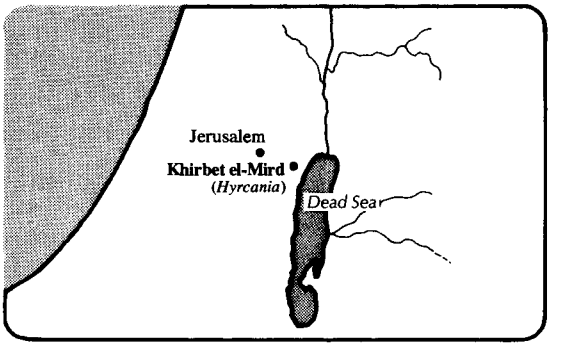
MIRACLES, GIFT OF. *See* SPIRITUAL GIFTS; MIRACLE.



MIRD mird; **KHIRBET EL-MIRD** [Arab.] A ruin in the Wilderness of Judea where some of the Dead Sea Scrolls were found.

In the desert of Judah, 3 km. (2 mi.) NE of the present monastery of Mar Saba, rose the Hasmonean fortress Hyrcania, razed by Gabinius in 57 B.C., and rebuilt by Herod the Great. He had his son Antipater executed and buried there (Josephus *Ant.* xiv.5.4 [89]; xv.10.4 [366]; xvii.7.1 [187]; *BJ* i.8.2 [161], 5 [167]; 19.1 [364]; 33.7 [664]).

In A.D. 492 St. Saba passed the Lenten season at this place, called *Marda* ("fortress") in Aramaic and *Kastellion* in Greek. He had the ruins rebuilt for a monastic community. John Moschos mentioned it in several places in *Pré Spirituel* (end of the 6th cent.), and it still existed in 1355.

In 1925 some monks of Mar Saba attempted to establish themselves at this site, but within a few years they were obliged to withdraw because of the harassment by the bedouin, who *ca.* 1939 completed the demolition of the monks' modest accommodations.

In 1952 the bedouin discovered a considerable number of documents in Greek, Christian-Palestinian Aramaic, and Arabic, which the Palestinian Archeological Museum of Jerusalem (now the Rockefeller Museum) acquired.

From February 10 to April 16, 1953, Monsignor Robert De Langhe, professor at the University of Louvain, guided by Ibrahim Shaourieh, systematically excavated a cave-cistern belonging to the ruins and recovered about six hundred fragments of parchment or papyrus, of which nearly a quarter contained written characters. These remains proved beyond doubt that the documents sold by the bedouin had indeed come from Khirbet el-Mird. The excavations are described by De Langhe (*Onze Alma Mater* [in Flemish], 7/4 [1953], 14-19; 8/1 [1954], 3-5; 8/3 [1954], 1-6), G. Leclercq (*Bulletin de la société Belge de géologie*, 64 [1956], 414-431), and J. Coppens (*Ephemerides theologicae Lovanienses*, 40 [1964], 104-125 and esp. pp. 111-16).

In April 1960 a new expedition comprising J. M. Allegro, De Langhe, G. R. H. Wright, and four other scholars continued the archeological investigations but could not complete them in an exhaustive manner. For the Herodian period they studied: (1) the fortress itself with its central court and the living quarters constructed on vaulted basements provided with cisterns; (2) an aqueduct of beautiful dressed stone; (3) a mysterious monument situated 300 m. (1000 ft.) SE; (4) two dug stepped tunnels 300 m. (1000 ft.) N; (5) some tombs, 500 m. (550 yds.) E, which contained various objects of pottery. For the monastic period they yielded especially the remains of the church constructed in the northern part of the ancient fortress and an adjacent building (*diakonikón*) decorated with a mosaic of the finest workmanship. Wright described these results in *Bibl.*, 42 (1961), 1-21; in the same issue J. T. Milik traced the history of the monastery (pp. 21-27).

The Greek documents from Khirbet el-Mird relate to both the OT and the NT and contain some verses of Euripides.

Documents in Christian-Palestinian Aramaic, constituting the oldest extant documents in this language, include: Josh. 22:6f., 9f.; Mt. 21:30-34; Lk. 3:1, 3f.; Col. 1:16-18, 20f.; sixteen minuscule fragments of parchment of which six are palimpsests, six small fragments of papyrus, and remnants of an inscription on plaster. The first texts to have been edited are (1) a letter published by J. T. Milik in *RB*, 60 (1953), 526-39, with some corrections in *Bibl.*, 42 (1961), 21-27; (2) a passage from Acts 10:28f., 32-41, published by Perrot in *RB*, 70 (1963), 506-555, which seems to be from the 6th century.

The documents in Arabic, mainly of the first two centuries after the Hegira (i.e., *ca.* A.D. 700-800), have been edited and studied by Adolf Grohmann, *Arabic Papyri from Ḫirbet el-Mird* (Bibliothèque du Muséon, 52; 1963), with a review by B. Couroyer in *RB*, 62 (1965), 1467f.

In addition, a small notebook bought for De Langhe in 1953 by Shaourieh came from a cave in the region. M. Baillet published it (*Le Muséon*, 76 [1963], 375-401).

MIRE [Heb. *ṭîṭ*–'mud, wet clay' (2 S. 22:43; Job 41:30 [MT 22]; Ps. 18:42 [MT 43]; 69:14 [MT 15]; Jer. 38:6; Mic. 7:10), *ḥōmer*–'clayish mud' (Job 30:19; Isa. 10:6), *yāwēn*–'mud' (Ps. 69:2 [MT 3]), *repeś*–'slime' (Isa. 57:20), *bōṣ*–'silt' (Jer. 38:22); Gk. *bórboros*–'mud, slime' (2 Pet. 2:22)]; **MIRY** [Heb. *yāwēn* (Ps. 40:2 [MT 3]); Aram. *ṭîn* (Dnl. 2:41, 43; cf. Heb. *ṭîṭ*)]; AV also DIRT (Ps. 18:42); NEB also MUD, MUDDY DEPTHS, etc. Heavy, deep mud; wet, spongy earth, as in a bog.

To be trampled "like the mire of the streets" (2 S. 22:43; Ps. 18:42; Isa. 10:6; Mic. 7:10) is a simile for total defeat and humiliation. The mud of the unpaved streets would

have contained debris, since these areas were often used as refuse dumps (Frick, p. 85).

In Hebrew poetry the place of the dead is often pictured as a miry pit (*bôr*) or watery abyss into which one sinks as in quicksand (cf. Ps. 69:1f., 14f.). When critically ill or in great danger, the afflicted poet pictures himself as already sinking into the miry depths of the underworld. God is the only one who can draw him up and set his feet on solid ground again (cf. Ps. 40:2). Job, in his extreme distress, complains that God is killing him (i.e., has cast him into the mire, 30:19). The prophet Jeremiah was literally thrown into a miry pit (*bôr*) to die, but he was rescued before he suffocated in the mud (Jer. 38:1-13). Later he prophesied that King Zedekiah would suffer this fate (figuratively) but would have no one to rescue him (v. 22).

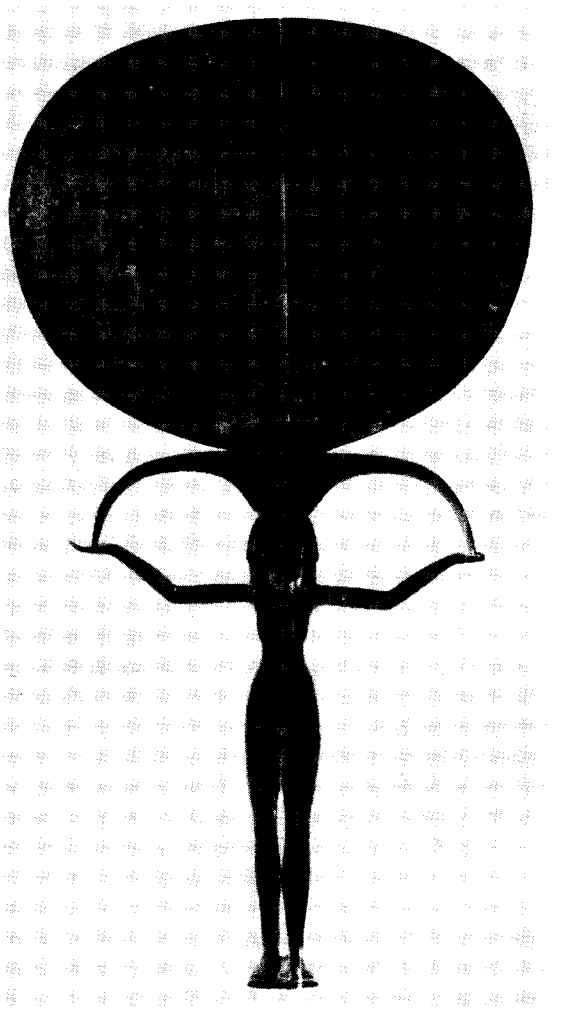
MIRIAM mir'ē-əm [Heb. *miryām*; Gk. *Mariam*, the name rendered MARY in the NT]. The name Miriam is difficult etymologically. It may mean "loved," from Egyp. *mr*; "loved of Yahweh" (*mr* + *yw*/*m*); "plump," from Heb. *mr'* III; "bitter(ness)," from Heb. *mr'* I/*mrh*/*mrr* (cf. Ruth 1:20); or some other option. Jerome interpreted it to mean *stella maris* ("star of the sea"); in some rabbinic texts it is related to Heb. *mrh*, as above.

1. Sister of Moses and Aaron, prophetess and influential member of the Exodus leadership. As the only known daughter of Amram and Jochebed, Miriam was probably the sister who stood watch over the ark of bulrushes which bore the fugitive baby Moses on the Nile (Ex. 2:4). Her quick thinking upon the discovery of the baby by Pharaoh's daughter allowed Jochebed to help raise her own son (2:7-10). After the crossing of the Red Sea where Pharaoh's pursuing troops were drowned, Miriam led the Israelite women in music and dancing and sang the "Song of the Sea" (Ex. 15:20f.), in the composition of which she may even have had a part. That she is called a "prophetess" (Heb. *nᵉḇî'â*) in 15:20 may indicate not only that she composed what is now part of Scripture but also that God spoke to the Israelites through Miriam as well as through her brothers (Nu. 12:2).

Miriam and Aaron came to oppose the leadership of Moses, using his probably unpopular interracial marriage to a Cushite (Nubian) woman as their occasion. In ironic punishment for their opposition to God's leadership through Moses and their antiblack racism, God turned them completely white, i.e., leprous. As a result of Moses' intercessory prayer they were healed; but Miriam was confined outside the Israelite camp for seven days (Nu. 12). No further mention is made of Miriam until Nu. 20:1, where her death and burial at Kadesh are recorded. The Law uses Miriam as a warning to the people of Israel about the importance of strict adherence to the leprosy regulations (Dt. 24:9). Miriam's part in the Exodus triumvirate leadership is remembered in Mic. 6:4.



2. A descendant of Ezrah (1 Ch. 4:17). The text of v. 17 is extremely difficult to reconstruct in both the MT and LXX. Miriam may be a son or daughter of Ezrah, or a grandson or granddaughter. The AV, following MT, lists neither father nor mother. The RSV and NEB, following LXX in part take Miriam to be a daughter of Mered and Bithiah.

MIRMAH mûr'mə [Heb. *mirmâ*]. A Benjaminite; son of Shaharaim by his wife Hodesh (1 Ch. 8:10).

MIRROR [Heb. *mar'â* (Ex. 38:8), *rᵉ'î* (Job 37:18); Gk. *ésoptron* (1 Cor. 13:12; Jas. 1:23)]; AV GLASS; LOOKING GLASS. Mirrors in antiquity consisted of a metal surface, made usually of copper, silver, gold, electrum, or, especially in Palestine during the postexilic period, of bronze. Some are simply round surfaces; others have handles, often shaped in the form of a female figure; others have pedestals and can be placed on furniture. The unpolished face was usually bare. The Amarna correspondence suggests a heavy production of mirrors in Egypt, since Ikhnaton sent thirty-two mirrors of polished bronze as a gift to Burnaburiaš; the Kassite king gave in return a silver mirror.

Bronze mirror with handle in the form of a girl supporting a papyrus flower (Egypt, 18th Dynasty, 16th-14th cents. B.C.) (Royal Ontario Museum, Toronto)

In Ex. 38:8 women who rendered menial service at the tabernacle supplied bronze mirrors for a laver. Job 37:18 compares the vault of heaven to a mirror (cf. Dt. 28:23). The "glasses" of Isa. 3:23 (AV) may be articles of women's apparel (the RSV follows the suggestion of the LXX, "garments of gauze"; NEB "scarves of gauze"; *see* GAUZE, GARMENTS OF); in any event, if glass is meant, the reference is more likely to beads than to mirrors, which were made of metal. In the Apocrypha, wisdom is called an "unspotted mirror [Gk. *ésoptron*] of the power of God" (Wisd. 7:26); Sir. 12:11 warns not to trust an enemy, for his wickedness is like the rust that clings to a mirror (Heb. *rʾʾî*) after it has been wiped.

In Jas. 1:23-25 the author compared the thoughtless hearer of the Word to a man who looks in a mirror and immediately forgets what he has seen, making no personal improvement. The use of the word in 1 Cor. 13:12 in connection with Gk. *aínigma* (lit. "a riddle") is more difficult. Most versions and commentaries suggest that Paul saw a deficiency in the reflecting quality of the mirror, but a number of ancient writers, including Plato (*Timaeus* 71b, 72c), illustrated spiritual purity and mental clarity by referring to mirrors (some of the mirrors found by archeologists still possess a remarkable luster). Nor was it Paul's habit to imply that he had received an indistinct impression of God's revelation in Christ (cf. Rom. 8:38f.). More probably he contrasted the personal encounter in the beatific vision ("face to face") with the reflected image received in the present time. The reflection need not be indistinct to be less satisfactory than the possession of the thing reflected. The possibility that very early a scribe who misunderstood Paul's meaning added *en ainígmati* as a gloss cannot be dismissed. 2 Cor. 3:18, which uses *katoptrízō* to describe looking in a mirror (see Bauer, rev., p. 424), probably refers to a similar second-hand view of the glory of the Lord.

F. W. DANKER

MIRTH [Heb. *śimḥâ* (Gen. 31:27; Ps. 137:3; Eccl. 7:4), *māśôś* (Isa. 24:8; Hos. 2:11 [MT 13]), *śāśôn* (Jer. 7:34; 16:9; 25:10; 33:11), (vb.) *śûś* (Ezk. 21:10 [MT 15])]; AV also JOY; NEB also SONGS, MERRY, JOY, etc. All the terms rendered by "mirth" denote both the emotion of joy and its outward expression in singing and merrymaking.

From earliest times the Israelites observed certain FEASTS to celebrate Yahweh's goodness to them. They were constantly tempted, however, to attribute to Baal the fruitfulness of the land and to turn their harvest festivals into fertility rites. Because of Israel's unfaithfulness Hosea prophesied that Yahweh would end all such festivities by withdrawing His blessing on the land (Hos. 2:8-13). Similarly, Isaiah and Jeremiah spoke of the lack of festivals (vintage festivals, Isa. 24:4-13; wedding feasts, Jer. 7:34; 16:9; 25:10) as a picture of the total devastation of the land. Jeremiah was commanded to refrain from marriage and all festive meals as a sign that Yahweh had withdrawn His *šālôm* from the land (16:1-9); he prophesied, however, of a time when there would again be occasion for rejoicing (33:11). Ps. 137 expresses the psalmist's inability to be joyful because of the destruction of Jerusalem.

See JOY I-II; *see also* MERRY.

N. J. O.

MISAEL mis'ə-el (AV, NEB, 1 Esd. 9:44; AV Song Three 66; 1 Macc. 2:59). *See* MISHAEL.

MISCARRIAGE [Heb. *yāṣʾʾû yʿlāḏeyhā*–'her children came out'] (Ex. 21:22); AV "her fruit depart"; [piel fem. part. of Heb. *šāḵal*] (2 K. 2:21); AV "barren land"; **MISCARRY** [piel of Heb. *šāḵal*] (Gen. 31:38); AV "cast (their) young"; [hiphil part. of Heb. *šāḵal*] (Hos. 9:14). The premature ejection of a fetus was an especially disturbing event to ancient peoples, and laws were made to punish those who caused miscarriages. Both the Babylonian and Hittite laws imposed fines on one who caused a miscarriage resulting in the fetus's death. For the Babylonians the amount of the fine depended on the status (class) of the mother (Code of Hammurabi, §§ 209-214; see *ANET*, p. 175; G. R. Driver and J. C. Miles, *Babylonian Laws*, I [1952], 413-16), while the Hittites added distinctions based on the age of the fetus (see E. Neufeld, *Hittite Laws* [1951], p. 5). The Middle Assyrian laws, however, appear to stipulate a life-for-life retribution or *talion* (Middle Assyrian Laws, §§ 21, 50-53; see G. Cardascia, *Les lois Assyriennes* [1969], pp. 136-38, 239-247; *ANET*, pp. 181, 184f.), although some scholars (e.g., Jackson) interpret the Assyrian laws as calling for substitution rather than *talion*.

The interpretation of Ex. 21:22f. is debated. The meaning and referent of Heb. *ʾāśôn* ("harm") are unclear. According to BDB (p. 62) it means "mischief, evil, harm," but *CHAL* (p. 23) defines it as "mortal accident" (cf. Childs, pp. 471f.; Tg. Onk. translates it *môṯāʾ*, "death"). The only other OT occurrences of *ʾāśôn* (Gen. 42:4; 44:29) seem to refer to mortal harm (see JB), though other interpretations cannot be ruled out (cf. LXX *malakía*, "sickness," in Gen. 42:4; 44:29; and *mḗ exeikonízō*, "not fully shaped," in Ex. 21:22). The referent of *ʾāśôn* could be the woman (so JB, NEB, Moff., Hyatt), the fetus (Jackson; cf. Kline), or perhaps both (as implied in the ambiguous translations of RSV, NIV, NAB, etc.; see Kline, Cassuto). See the comms., especially Childs, Cassuto, and KD.

In Gen. 31:38 Jacob indicates his good work to Laban by pointing out the lack of miscarriages among the animals under his care. In 2 K. 2:21 Elisha's first miracle is the healing of some poisonous water so that "neither death nor miscarriage" results. In Hos. 9:14 the prophet asks God to curse the fertility worshipers with lack of fertility.

Bibliography.–Comms. on Exodus by U. Cassuto (Eng. tr. 1967); B. Childs (*OTL*, 1974); J. Hyatt (*NCBC*, repr. 1980); articles by B. Jackson, *VT*, 23 (1973), 273-304; M. G. Kline, *JETS*, 20 (1977), 193-201.

G. A. L.

MISCHIEF [Heb. *rāʿâ*–'evil,' 'misery' (Jgs. 15:3; 1 K. 11:25; Ps. 28:3; 52:1 [MT 3]), hiphil part. of *rāʿâ*–'do evil' ("bent on mischief," Dnl. 11:27), *ʿāmāl*–'trouble,' 'labor, toil' (Job 15:35; Ps. 7:14, 16 [MT 15,17]; 10:7; 94:20; 140:9; Prov. 24:2; Isa. 59:4), *ʾāwen*–'trouble,' 'sorrow,' 'wickedness' (Ps. 36:3f. [MT 4f.]; 41:6 [MT 7]; 55:10 [MT 11]), *mᵉzimmâ*–'[evil] plot' (Ps. 21:11 [MT 12])]; AV also INIQUITY, DISPLEASURE; NEB also HARM, MALICE, BAD NEWS, WICKEDNESS, CONSPIRACY; **MISCHIEF-MAKER** [Heb. *baʿal mᵉzimmôṯ*– 'master of [evil] plots' (Prov. 24:8); Gk. *allotriepískopos* (1 Pet. 4:15)]; AV MISCHIEVOUS PERSON, BUSYBODY IN OTHER MEN'S MATTERS; NEB INTRIGUE, INFRINGING THE RIGHTS OF OTHERS; **MISCHIEVOUS** [Heb. *ʾāwen*] (Prov. 17:4); AV NAUGHTY; NEB SLANDER.

"Mischief" has serious connotations in the Bible. It translates Hebrew terms that often refer to evil or wickedness, and it is usually associated with evildoers. Thus "mischief" parallels "evil" (*ʾāwen*, Job 15:35; Ps. 7:14; *rāʿâ*, 21:11; hiphil of *rāʿâ*, Prov. 24:8), "violence" (Ps. 7:16; Prov. 24:2), "iniquity" (*ʾāwen*, Ps. 10:7; Isa. 59:4), "deceit" (Job 15:35; Ps. 36:3), "trouble" (*ʿāmāl*, Ps. 55:10); note the interchange among the Hebrew terms.

Samson's mischief was the burning of Philistine fields and orchards (Jgs. 15:3-5). Other mischievous acts include slander (Ps. 10:7; cf. 41:6; 52:1-4; 140:9-11; Prov. 17:4), and fighting or war (1 K. 11:25; Ps. 21:11f.; 55:9-11; Prov. 24:2). Wicked rulers, those who legislate "mischief," cannot be allied with God (Ps. 94:20; cf. Isa 59:4; Dnl. 11:27).

The meaning of *allotriepískopos* (lit. "those who watch over another's things") in 1 Pet. 4:15 is uncertain (Bauer, rev., p. 10). Some scholars argue that it must refer to a criminal offense, since the other offenses are criminal (so Beyer, *TDNT*, II, 62f.), while others disagree (e.g., according to E. G. Selwyn, *First Epistle of St. Peter* [2nd ed. repr. 1981], p. 225, the repetition and position of *hōs* ["as"] indicate that the author is moving from a legal category to a social one; but cf. *TDNT*, II, 62). J. H. Elliott rightly pointed out that the context must determine the meaning. He concluded that *allotriepískopos* means "a type of person ... who transgresses the boundaries of the household of God, ... one who meddles or interferes in the affairs of others to whom he does not belong" (*Home for the Homeless* [1981], p. 141). G. A. L.

MISGAB mis'gab. The AV and NEB translation of Heb. *hammiśgāḇ* (lit. "the high spot," "the refuge"; Gk. *A tó krataíōma, B Amath*) in Jer. 48:1. No such place name has been found in Moab, and the RSV may be correct in rendering it "the fortress." *See* FORTIFICATION I.B; IV.A.

MISHAEL mish'ə-el [Heb. *mîšā'ēl*–'who is what God is?'(?); Gk. Apoc. *Misaēl*]; AV, NEB, also MISAEL.

1. A Levite in the line of Kohath; son of Uzziel and cousin of Aaron (Ex. 6:22). He and his brother Elzaphan carried out Moses' order to remove from the camp the bodies of Nadab and Abihu (Lev. 10:4f.).

2. One who stood beside Ezra at the public reading of the Law (Neh. 8:4; 1 Esd. 9:44).

3. The Hebrew name of one of Daniel's three companions (Dnl. 1:6f., 11, 19; 2:17; Song Three 66; 1 Macc. 2:59). The Babylonians named him MESHACH.

MISHAL mī'shəl mish'al [Heb. *miš'āl* (Josh. 19:26; 21:30)]; AV also MISHAEL; **MASHAL** mā'shal [Heb. *māšāl* (1 Ch. 6:74 [MT 59])]. A Gershonite Levitical town in the territory of Asher (Josh. 21:30). It is thirty-ninth in a list of towns conquered by Thutmose III; it also appears in an Execration Text (19th-18th cents. B.C.) and in a papyrus mentioning the *maryannu* (military élite); see *LBHG*, rev., pp. 144, 165. The exact location is unknown, although Aharoni (*LBHG*, rev., p. 439) suggests Tell Keisân, which others (e.g., *WHAE*) identify with ACHSHAPH.

D. B. PECOTA

MISHAM mi'sham [Heb. *miš'ām*]. A Benjaminite; second son of Elpaal who built Ono and Lod (1 Ch. 8:12).

MISHEAL mish'i-əl (Josh. 19:26, AV). *See* MISHAL.

MISHMA mish'mə [Heb. *mišmā'*].

1. A son of Ishmael and founder of an Arabian tribe (Gen. 25:14; 1 Ch. 1:30).

2. A Simeonite, son of Mibsam and father of Hammuel (1 Ch. 4:25f.). The fact that the names Mibsam and Mishma appear together in this list as well as the Ishmaelite genealogies of Gen. 25:14 and 1 Ch. 1:30 has led to speculation that these may have been two Arabian tribes that later became affiliated with the Simeonites.

MISHMANNAH mish-man'ə [Heb. *mišmannâ*]. A famous Gadite warrior who joined David at Ziklag and became an officer in his army (1 Ch. 12:10 [MT 11]; cf. v. 14 [MT 15]).

MISHNAH mish'nə [Heb. *mišnâ*–'repetition']. The body of Jewish oral law that was written down by the end of the 2nd cent. A.D. *See* TALMUD.

MISHNEH mish'nə. The district of Jerusalem in which the prophetess Huldah lived was called Heb. *mišneh* (2 K. 22:14; 2 Ch. 34:22; Zeph. 1:10; AV "college," "second"; RSV, NEB, "second quarter"). *See* SECOND QUARTER.

MISHRAITES mish'rə-īts [Heb. *mišrā'î*]. One of the families of Kiriath-jearim, from whom came the Zorathites and the Eshtaolites (1 Ch. 2:53).

MISMATED [Gk. part. of *heterozygéō*–'draw unequally,' 'be unequally yoked'] (2 Cor. 6:14); AV UNEQUALLY YOKED; NEB UNITE. *See* YOKE.

MISPAR mis'pär [Heb. *mispār*; Gk. Apoc. *Aspharasos*]; AV MIZPAR, Apoc. ASPHARASUS; NEB Apoc. ASPHARASUS. One of those who returned from the Exile with Zerubbabel (Ezr. 2:2; 1 Esd. 5:8 [RSV mg. "Aspharasus"]). In the par. Neh. 7:7 the name is given in the feminine, "Mispereth."

MISPERETH mis'pə-reth [Heb. *mispereṯ*] (Neh. 7:7). *See* MISPAR.

MISREPHOTH-MAIM miz'rə-fōth mā'əm [Heb. *miśrᵉpôṯ mayim* < *śārap*–'burn'; perhaps 'lime burning at the water']. A place on the Phoenician coast 48 km. (30 mi.) S of Sidon and 19 km. (12 mi.) N of Acco. It has been identified by some with Khirbet el-Musheirefeh (*WHAB; GAB*) and with 'Ain Mesherfi by others. Nearby warm springs favor the latter identification. With a surprise attack Joshua routed the forces commanded by Jabin king of Hazor near the waters of Merom. The defeated armies of Jabin and his allies fled to Great Sidon, Misrephoth-maim, and the Valley of Mizpeh, where Joshua pursued and annihilated them (Josh. 11:8). The inhabitants of the hill country extending from Lebanon to Misrephoth-maim are called Sidonians in 13:6, indicating that the Sidonians controlled that area. God promised this territory to Israel and promised to expel the native population. Joshua was to include it in the land allotted to the Israelites.

D. H. MADVIG

MISSION. A noun derived from Lat. *mittō* ("send"), denoting a task that a person or group has been assigned (usually by God or God's representatives) and sent out to perform. In the RSV OT the term occurs only in 1 S. 15:18, 20 as a translation of Heb. *dereḵ* (lit. "way"; AV "way," "journey"; NEB paraphrases). Here it refers to King Saul's God-given assignment to destroy the Amalekites.

In the NT the RSV uses "mission" more specifically with reference to the ministry of the GOSPEL, both in word and in deed. In Acts 12:25 "mission" translates Gk. *diakonía* (lit. "service, ministry"; AV "ministry"; NEB "task"), referring to the famine-relief expedition upon which the church in Antioch sent Barnabas and Saul (Paul) (cf. 11:29; RSV "relief"). In Gal. 2:8 the RSV appropriately uses "mission" to render Gk. *apostolḗ* (lit. "apostleship" [so AV]; NEB "apostle"; cf. *apostéllō*, "send out"), which here refers to Peter's commission to PREACH the gospel to the Jews. In 2 Cor. 11:12 the RSV supplies "mission" and the NEB supplies "apostleship" in rendering the obscure Greek phrase *en hṓ kauchṓntai*

(lit. "in which they boast"; cf. AV "wherein they glory"). The passage is difficult to interpret, since the exact situation that Paul faced in Corinth is not known today, but Paul appears to be referring to the claims to apostleship made by some who opposed him (cf. v. 13; see comms.).

For discussions of missions in NT times, *see* APOSTLE; APOSTOLIC AGE; PROSELYTE; SEND. N. J. O.

MIST [Heb. *'ēḏ* (Gen. 2:6; Job 36:27), pl. of *nāśî'* (Jer. 10:13; 51:16), *'ānān* (Isa. 44:22; Hos. 13:3), *śeḵwî* (Job 38:36); Gk. *achlýs* (Acts 13:11), *atmís* (Jas. 4:14), *homíchlē* (2 Pet. 2:17)]; AV also VAPOUR(S), CLOUD, "heart" (Job 38:36); NEB also FLOOD (Gen. 2:6), "secrecy" (Job 38:36). Water vapor that causes the air to be only partially transparent, differing from a CLOUD in that it is near the ground.

Hebrew *'ēḏ* is an obscure term occurring only in Gen. 2:6 and Job 36:27. In Gen. 2:6 it seems to refer to water that came from below the earth and preceded the first stages of plant life (cf. v. 5). The RSV renders it "mist," but other contemporary versions have translated it "flood" (NEB, JB; cf. also RSV mg.) or "stream(s)" (NIV, NAB). The translation "flood" is supported by a possible derivation from Akk. *edû*, "high flooding of a river" (see *CAD*, IV, 35f.; Speiser; Kidner; cf. also Gen. 1:2), although Albright proposed an alternative derivation from Akk. *id*, "fresh-water stream" (the river-god Id was one of the chief deities of the Middle Euphrates region). The context suggests that the earth was uninhabitable and unproductive in its watery state prior to the special creative care given to it by Yahweh. The term may also denote subterranean waters in Job 36:27 (see Pope, p. 273; most versions, however, use "mist"), a passage that describes Yahweh's control over the watering sources of the universe (cf. vv. 28-33).

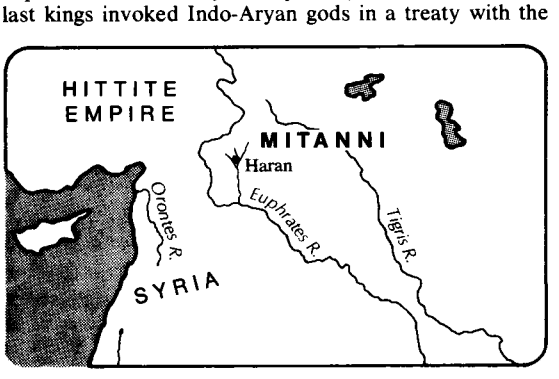
The meaning of *śeḵwî* in Job 38:36 is even more difficult (as is *ṭuḥót* [RSV "clouds"], the parallel term in the preceding line), and numerous conjectures have been proposed (cf. AV, NEB). Several commentators have followed Jewish tradition in rendering *śeḵwî* "cock" (see KoB, p. 921; KD *in loc.*; cf. Tg.; Vulg.); others have connected it with the Coptic name of the planet Mercury (see Pope, p. 302). The RSV apparently understands the term as a passive noun derived from the root *śkh*, "look at" (thus "something seen," "celestial phenomenon"; see comms.). Although the translation "mist" lacks strong philological support, it does fit well with the context.

Yahweh's sovereignty over meteorological forces is also described in Jer. 10:13; 51:16: it is He (and not the other gods) who causes the "mist" (*nᵉśi'îm*; cf. RSV "clouds" in Ps. 135:7; Prov. 25:14) to rise from the earth and releases the rain.

All other RSV uses of "mist" are figurative. The rapid evaporation of mist in the sunshine is used as a simile for the removal of sins (Isa. 44:22), the swiftness of judgment (Hos. 13:3), and the transitoriness of life (Jas. 4:14; cf. Wisd. 2:4). Unlike rainfall, mist lacks real substance and provides no refreshment; thus 2 Pet. 2:17 uses the metaphor of "mists driven by a storm" to describe false teachers. Gk. *achlýs* is a medical term denoting an inflammation that causes a clouding of the eyes (Acts 13:11).

Bibliography.–W. F. Albright, *JBL*, 58 (1939), 102f. n. 25; *CAD*, IV, *s.v.* "edû"; D. Kidner, *Tyndale Bulletin*, 17 (1966), 109-114; M. Pope, *Job* (*AB*, 3rd ed. 1973); E. Speiser, *BASOR*, 140 (Dec. 1955), 9-11. D. H. ENGELHARD N. J. O.

MISTRESS [Heb. $g^{e}\underline{b}$*îrâ* or $g^{e}\underline{b}$*ereṯ* < *gāḇar*–'excel,' 'be strong' (Gen. 16:4, 8f.; 2 K. 5:3; Ps. 123:2; Prov. 30:23; Isa. 24:2; 47:5, 7), *baʿᵃlâ* < *baʿal*–'lord, master, owner' (1 K. 17:17), *huṣṣaḇ* (Nah. 2:7 [MT 8])]; AV also LADY (Isa. 47:5, 7), HUZZAB (Nah. 2:7); NEB also QUEEN (Isa. 47:5, 7), "train of captives" (Nah. 2:7). A term usually referring to a noblewoman, especially as she relates to her (female) servant. For example, Sarah was Hagar's mistress (Gen. 16), and the wife of the Syrian commander Naaman was mistress of an Israelite maid (2 K. 5:1-3). The context of Isa. 47:5, 7 seems to point to a more exalted personage (see NEB), while 1 K. 17:17 seems to refer only to a woman who owns a house (see NIV).



The psalmist parallels the servant-master and maid-mistress relationships with the believer's relationship to God (Ps. 123:2f.). Similar parallels are used in Isa. 24:2 to express the totality of Yahweh's judgment.

Scholars disagree about the interpretation of Prov. 30:21-23, which lists several reversals of fortune, including a "maid" who becomes a "mistress." According to some (e.g., KD) these reversals cause societal upheaval, but others (e.g., W. McKane, *Proverbs* [*OTL*, 1970], pp. 659f.) interpret these as satirical examples of people who become insufferable when their situations change radically for the better.

The difficult text of Nah. 2:7 (MT 8) has given rise to a number of interpretations. The crux of the problem is the meaning of *huṣṣaḇ*. The AV transliterates as a proper name, Huzzab, who was supposedly a Babylonian queen. But no such queen is known, and the form of the name is unparalleled. KD also tried to make sense of the MT, analyzing *huṣṣaḇ* as the hophal of *nāṣaḇ*, hence "it is determined, established (by God)" (see NASB), but this does not fit the context well. The RSV rendering is conjecture based on the context; "mistress" probably refers to (a statue of) Ishtar, the Assyrian war-goddess who was of primary importance in Nineveh. (It was common ancient Near Eastern practice to carry off the idols of a captured city.) For a convenient summary of various emendations, some of which result in interpretations similar to the RSV, see K. Cathcart, *Nahum in the Light of Northwest Semitic* (1973), pp. 96-98; cf. *BHS*. G. A. L.

MITANNI mə-tä'nē. A political term referring to a state or empire in northwest Mesopotamia that played an important role in the history of the area from a little before 1500 to shortly after 1340 B.C. The population of Mitanni was predominantly Hurrian, and the state's establishment and duration are intimately connected with the penetration of the Hurrians into northwest Mesopotamia and Syria in ever-increasing numbers during the 16th cent. B.C. The scarce written evidence from the area for the 17th and 16th cents. tells the names of several of its early kings but almost nothing else about the foundation and development of the state.

Surprisingly, none of the known kings of Mitanni bears a Hurrian name. On the contrary, their names are generally explained as Indo-Aryan, especially since one of their last kings invoked Indo-Aryan gods in a treaty with the

Hittites. Consequently, the formation of Mitanni is usually linked with the arrival of the Indo-Aryans in the Near East. They formed a very small ruling aristocracy at the head of the Mitannian state, and their presence has been detected in numerous other sites that fell under Hurrian influence after 1500. Their contribution to the Mitannian civilization has at times been exaggerated, however; their influence was mainly political. It is quite improper to speak of a Hurro-Indo-Aryan "symbiosis," as has sometimes been done.

Although it appears unlikely that the Indo-Aryans introduced the horse and chariot to the ancient world, they probably developed them as weapons of war and pioneered in the breeding of horses. The Mitanni-Hurrians and their Indo-Aryan aristocracy also seem to have introduced the composite bow and the defense for it, a type of scaled armor used on men, horses, and chariots, the Hurrian name (*šaryani*) of which appears in Egyptian, Akkadian, Hittite, Ugaritic, and Hebrew (*širyôn*; see E. A. Speiser, *JAOS*, 70 [1950], 47-49). These new weapons revolutionized warfare and became decisive in battle beginning in the 15th century.

At the height of its power, under Saustatar in the latter half of the 15th cent., Mitanni controlled territory from the Mediterranean Sea in the west to beyond the Tigris River in the east. In the north it controlled Kizzuwatna (modern Cilicia in southeast Asia Minor), and states as far south as Hamath on the middle Orontes River in southern Syria were tributary to it. Its hegemony, however, was brief. Its Syrian territories fell to the early pharaohs of the Egyptian 18th Dynasty in the last decades of the 15th cent., and the Hittites under Šuppiluliuma finally destroyed it shortly after 1350 and made it a vassal state.

The term Mitanni does not appear in the OT, but the flood of Hurrians (with their Indo-Aryan ruling aristocracy) that created Mitanni also widely influenced the Near East. By the 14th cent. their presence was attested in Palestine itself, where, however, they represented nothing more than a ruling class imposed in feudal style on the city-state system. Probably the OT ethnic term "Horite" was related to this presence, although that relationship is obscure (*see* HORITES).

The patriarchal homeland, the region of Haran, is situated in the heart of what was to become the state of Mitanni proper, an area where Hurrian presence is attested from late Akkadian times (*ca.* 2250 B.C.). It is thus not surprising that numerous parallels have been suggested between Hurrian customs, particularly family law, and some of the puzzling aspects of the patriarchal narratives (*see* NUZI). F. W. BUSH

MITE. The smallest copper or bronze coin current among the Jews of Jesus' time (Gk. *leptón*; AV Mk. 12:42; Lk. 12:59; 21:2). *See* MONEY.

MITHKAH mith'kə [Heb. *miṯqâ*]; AV, NEB, MITHCAH. An Israelite encampment during the wilderness wanderings, between Terah and Hashmonah (Nu. 33:28f.). The location is unknown. *See* WANDERINGS OF ISRAEL.

MITHNITE mith'nīt [Heb. *miṯnî*]. Designation of Joshaphat, one of David's officers (1 Ch. 11:43).

MITHRADATES mith-rə-dā'tēz (1 Esd. 2:11, 16, NEB). *See* MITHREDATH.

MITHREDATH mith'rə-dath [Heb. *miṯr^{e}dāṯ* < Pers. 'gift of Mithra'] (Ezr. 1:8; 4:7); **MITHRIDATES** mith-rə-dā'tēz [Gk. A *Mithradatēs*, B *Mithridatēs*] (1 Esd. 2:11, 16); NEB MITHRADATES.

1. The treasurer of Cyrus king of Persia who delivered to Sheshbazzar the temple vessels that were to be brought back to Jerusalem by the returning exiles (Ezr. 1:8; 1 Esd. 2:11).

2. An official, probably the Persian consul at Samaria, who was among those who wrote a letter to Artaxerxes I persuading him to order a cessation of the rebuilding of Jerusalem (Ezr. 4:7; 1 Esd. 2:16).

MITRE. *See* TURBAN.

MITYLENE mit-ə-lē'nē [Gk. *Mitylēnē*] (Acts 20:14). A town on the island of Lesbos, located off the northwest coast of Asia Minor about 100 km. (60 mi.) S of Troy. At the end of his third missionary journey, Paul stopped briefly at Mitylene as he traveled from Philippi down the western side of Asia Minor to Jerusalem.

Aeolians settled Mitylene before 1000 B.C.; they colonized a small nearby island and in time spread to Lesbos proper. Eventually they linked the two parts of their city by bridges. Mitylene's position near the old trade route between the Hellespont and ports south and east made it an important center. In the 7th cent. B.C. its commercial power and cultural development were considerable.

Mitylene became a member of the Athenian Empire. For revolting against Athens in 428, it lost its fleet and fortifications and was brought to the verge of destruction. Membership in the Second Athenian Confederacy in 377 was amicable, however. Under Rome's rule the island became a favorite resort for Roman aristocrats. From the middle of the 1st cent. B.C., Mitylene was a free city within the province of Asia. An earthquake destroyed the city of NT times in A.D. 151 H. F. VOS

MIXED MULTITUDE; FOREIGN FOLK. The RSV uses various expressions to translate Heb. *ʿēreḇ* ("mixture," "mixed company"). The "mixed multitude" (*ʿēreḇ raḇ*, Ex. 12:38; NEB "large company of every kind") that left Egypt with the Hebrews was probably a conglomeration of slaves from a variety of tribal backgrounds (cf. Nu. 11:4; *see* RABBLE; see also *BHI*, pp. 131-37). After the Exile, INTERMARRIAGE with "those of foreign descent" was viewed as a threat to the Jewish community (Neh. 13:3; AV "mixed multitude"; NEB "all who were of mixed blood"). *See also* FOREIGNER.

Sometimes *ʿēreḇ* refers to foreign populations living in other countries: Egypt (Jer. 25:20; RSV "foreign folk"; AV "mingled people"; NEB "rabble"), Arabia (25:24; RSV "mixed tribes"; AV "mingled people"; NEB omits, apparently assuming a dittography with *ʿ^{a}rāḇ*, "Arabia"), and Babylon (50:37; RSV "foreign troops"; AV "mingled people"; NEB "rabble").

Some scholars have emended *ʿēreḇ* to *ʿ^{a}rāḇ* in Ex. 12:38; Neh. 13:3; Jer. 25:20 (cf. KoB, p. 733). N. J. O.

MIZAR mī'zar, **MOUNT** [Heb. *har miṣʿār*; Gk. *óros mikrós*–'little mountain']; AV, NEB, HILL (OF) MIZAR. The name of a mountain found only in Ps. 42:6 (MT 7), apparently in the region of Mt. Hermon and the Jordan River: "I remember thee from the land of Jordan and of Hermon, from Mount Mizar." *Miṣʿār*, however, may be taken as an adjective meaning "little," and the phrase may be understood as meaning "from the little (or humble) mountain" — i.e., the little mountain of Zion — which is contrasted with the lofty Mt. Hermon. Some scholars have thought that the *m* in *mēhar* may have arisen from dittography and have read instead "From the land of Jordan, and the Hermons, O thou little mountain (of Zion)." Modern scholars have been unable to identify the site, although

the name may be an allusion to *za'ūrā* or Khirbet Mazârā near the source of the Jordan (cf. *HGHL*, p. 476 n. 1).

W. W. BUEHLER

MIZPAH miz'pä; **MIZPEH** miz'pə. The Hebrew word in both these forms (fem. and masc., respectively) means "lookout" or "watch tower" and is a place name or place-name element. It is appropriate for towns occupying high, commanding positions.

1. Mizpah in northern Gilead [Heb. *hammiṣpâ* (Gen. 31:49; Jgs. 10:17; 11:11, 34), *miṣpâ* (Hos. 5:1); Gk. *Massēpha*, etc.]; AV Apoc. Maspha. A city of Gilead mentioned in Jgs. 10–11 in connection with Jephthah's conflict with the Ammonites. At Mizpah, Jephthah's residence (11:34), the Israelites assembled for battle against the Ammonites encamped in Gilead. Verse 11 implies that the town served as a cult center in Transjordan as its namesake did in Benjamin (1 S. 7:5). The description of the covenant between Jacob and Laban in Mt. Gilead intimates the sanctity of this site (Gen. 31:44-50). Hosea may have intended this Mizpah (5:1), and 1 Macc. 5:35 (AV) mentions it (the AV Maspha has no textual support; it may have been interpolated on the basis of 3:46; cf. J. Goldstein, *I Maccabees* [*AB*, 1976], p. 302).

The above references do not specifically indicate the site's location. Its identification depends upon: (1) the location of the original Gilead, N of the Jabbok near 'Ajlûn, or S in the Jebel Jel'ad (if the latter suggestion is correct, then Mizpah was located either near Mt. Gilead [Gen. 31:23], or on the mountain opposite Gilead [Gen. 31:25; Jgs. 10:17]); (2) the relationship among the names Mizpah, Mizpah of Gilead, RAMATH-MIZPEH, and RAMOTH-GILEAD.

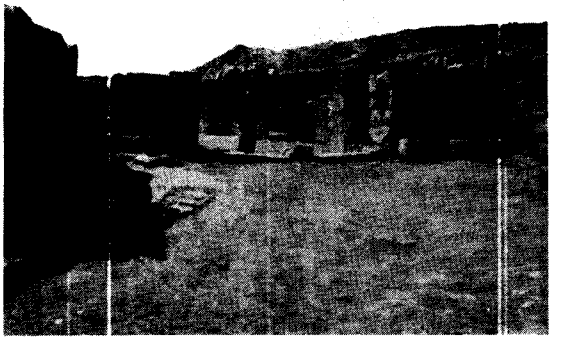
Jacob's crossing the Jabbok only after making his covenant with Laban (Gen. 32:23) favors the northern location. Though some scholars look for Mizpah S of the Jabbok, Gen. 31 and the allusion in 1 Macc. 5:35 (AV; NEB mg. Maapha) seem to demand that it be to the north. Jacob probably entered Transjordan by the principal route from Mesopotamia to Tadmor and Damascus, whence he continued on the "King's Highway." The events pertaining to Jephthah do not require that Mizpah should be S of the Jabbok.

It would not be surprising if the Ammonites had crossed the Jabbok northward. Furthermore, Jephthah did not cross the Ammonite boundary from Mizpah but from Mizpah of Gilead (Jgs. 11:29), which is probably to be located in southern Gilead (see **2** below).

2. Mizpah (AV, NEB, Mizpeh) of Gilead [Heb. *miṣpēh gil'āḏ*]. In Jgs. 11:29 Jephthah is said to have passed Mizpah-gilead on his way to battle with the Ammonites. This place is usually identified with the Mizpah discussed above, whose location seems almost certainly to be in northern Gilead. The LXX distinguishes this present site from the other by calling it *skopián Galaad*, "the lookout point in Gilead" (cf. Isa. 21:8; 2 Ch. 20:24). Jephthah passed through Gilead and Manasseh, but these are only general indications. Perhaps Jgs. 11:33, "And he smote them from Aroer to the neighborhood of Minnith, twenty cities, and as far as Abel-keramim," provides a more adequate clue to the southern orientation of the passage as a whole. The generally accepted identifications for these latter places point to the southern region of Gilead, between Rabbath-ammon and Heshbon. Thus it is difficult to equate Mizpah-gilead with Mizpah, which was most likely in the north. According to Josh. 13:26 it is possible to identify it with Ramath-mizpeh, listed as a town in the inheritance of Gad between Heshbon and Betonim.

3. In Benjamin [Heb. *hammiṣpâ*; Gk. *Massēpha, Maspha, Masphe*, or (due to Heb. directive suffix) *Massēphath*, and once translated *skopiá* (1 K. 15:22)]. A city in the northern part of the Benjaminite territory. It appears in the list of Benjamin's towns (Josh. 18:26), but the order is not sufficiently clear to determine its location.

Mizpah is mentioned in the account of the concubine who was raped and murdered at Gibeah (Jgs. 20–21). The entire Israelite congregation gathered at Mizpah before opening hostilities against Benjamin; it was also important as a place of sacred assemblies during the judgeship of Samuel (1 S. 7:5-12). The town was one of his main centers of activity (vv. 16f.). With the division of the monarchy Mizpah began to assume special importance as a border fortress between Judah and Israel. After Abijah's occupation of Mt. Ephraim and the collapse of Jeroboam's dynasty, Baasha came to the throne and pushed his boundary with Judah S to Ramah, thus posing a threat to Jerusalem's communication with the coastal plain via the Beth-horon road. Asa called on the Arameans from the north; when this diversion caused Baasha's withdrawal, the Judeans dismantled the fortification at Ramah and moved the border back northward as far as Mizpah and Geba (1 K. 15:17-22; 2 Ch. 16:1-6).



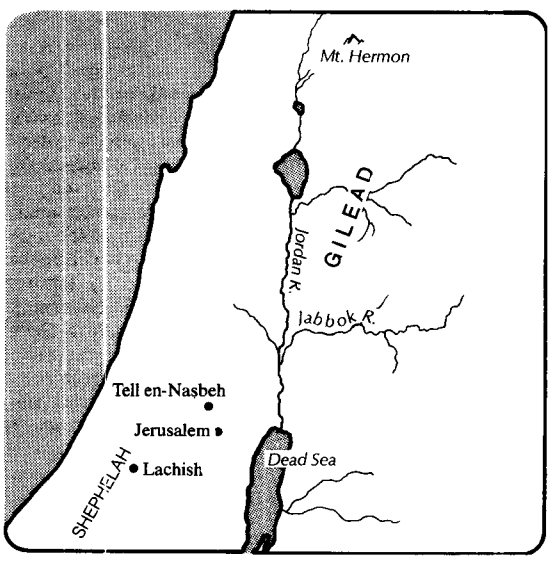
Toward the end of the preexilic period Mizpah assumed special importance as the residence of Gedaliah, whom the Babylonians appointed governor over Judea after the destruction of Jerusalem (2 K. 25:22-25; Jer. 40–41). During the postexilic period Mizpah became a district capital in the province of Jehud (Neh. 3:15). The town reappears as an assembly point during the intertestamental period; Judas Maccabeus gathered his forces at Mizpah "opposite Jerusalem" in preparation for a battle with Gorgias (1 Macc. 3:46). Neither Josephus nor Eusebius provided any precise details about its location.

The principal suggestions for the site of Mizpah are Nebī Ṣamwîl and Tell en-Naṣbeh. The main passages that must be considered in making any identification are 1 K. 15:22, Asa's fortification of Mizpah; Jer. 40–41, Ishmael's murder at Mizpah of pilgrims from Shechem, Shiloh, and Samaria who were going to Jerusalem; and 1 Macc. 3:46.

Those who equate Mizpah with Nebī Ṣamwîl argue that the expression "opposite Jerusalem" (1 Macc. 3:46) suits this site and that the name Mizpah is appropriate for the highest topographical point in the region. In the opinion of these scholars, Asa was not extending the border of his territory but was making a purely defensive measure along the line Nebī Ṣamwîl — Tell el-Fûl (Gibeah of Saul). To maintain this suggestion it is necessary to emend Geba to Gibeah.

The position of Mizpah in the war between Asa and Baasha, its importance as an urban center in all periods, and archeological excavations there favor the identification with Tell en-Naṣbeh. Nebī Ṣamwîl is not of such great strategic importance and hardly represents a town that enjoyed such administrative significance. No ancient source requires an association with Nebī Ṣamwîl, not even 1 Macc. 3:46. That Ishmael, while fleeing to Ammon, met Jochanan beside Gibeon (Jer. 41:12) tells nothing about the location of Mizpah, since neither the direction from which Jochanan and his men came nor the route taken by Ishmael is known. Neither can anything be inferred concerning the return of the prophet Jeremiah from Ramah to Gedaliah (40:5f.). On the other hand, 41:5 suggests the equation with Tell en-Naṣbeh. The men who came from the land of Samaria probably were on their way to the ruins in Jerusalem when Ishmael came forth to meet them from Mizpah, which was on their route, in order to lure them into the town. Ishmael's action would have been unnecessary if these men had intended to go to the temple at Mizpah (off the main road, i.e., at Nebī Ṣamwîl).

Tell en-Naṣbeh is in the northern part of the Benjaminite



City gate at Tell en-Naṣbeh (Mizpah?) (Iron Age) (Israel Department of Antiquities and Museums)

territory near the ascent to the hill country around Bethel and beside the main road that follows the watershed from north to south. It commands the whole district, especially the narrow pass through Wâdī Jilyân. According to the excavations, the settlement was founded at the beginning of the Iron Age (there had also been an Early Bronze settlement) and was occupied until the Hellenistic period. Signs of destruction by the Chaldeans in 587 B.C., so typical of Judean sites further south, are remarkably absent here. The archeological finds, especially the solid fortification wall from the monarchial period and its geographical position, indicate that a very important urban center had been located on this site. Tell en-Naṣbeh is by far the most likely candidate for the identification of Mizpah.

Placing Mizpah at this site helps to elucidate the account of the war between Asa and Baasha. Only this identification and that of Geba with Jeba' permit discerning how Asa extended the northern boundary of Judah to a reasonable and safe distance from Jerusalem without going too far, as his father had done (thus provoking the ire of Baasha).

Bibliography.–C. C. McCown and J. C. Wampler, *Excavations at Tell En-Nasbeh* (2 vols., 1947); G. E. Wright, *BA*, 10 (1947), 66-77; *EAEHL*, III, *s.v.* "Naṣbeh, Tell en-" (M. Broshi); *LBHG*.

4. In Judah [Heb. *hammiṣpâ*; Gk. *Maspha*]. A town in the second precinct of the Shephelah (Josh. 15:38) associated with Lachish and Makkedah. Eusebius apparently referred to this site when he mentioned another Mizpah (Gk. *Massēba*) on the northern border of the Eleutheropolis district (*Onom.* 130.2f.) and in the same context a Mizpah on the road to Jerusalem. The latter, however, must be sought NE of Beit Jibrin (Beth-guvrin, ancient Eleutheropolis) and is too far E for identification with the Shephelah town. In any case the Mizpah of the Shephelah must be near Lachish; therefore the old suggestion to locate it on Tell eṣ-Ṣâfī must be abandoned (the latter is probably ancient Gath).

5. Land of Mizpah (Upper Galilee). A region at the foot of Mt. Hermon occupied by Hivites (Josh. 11:3). It is called both "the land of Mizpah" (Heb. *'ereṣ hammiṣpâ*; Gk. *gēn Massēpha* [v. 3]) and "the valley of Mizpeh" (Heb. *biq'aṭ miṣpeh*; Gk. *tōn pedíōn Massēpha* [v. 8]). It is evidently to be equated with the Merj 'Ayyún.

Bibliography.–*LBHG* (Eng. tr., rev. ed. 1979), pp. 32, 239; B. Maisler, *Untersuchungen zur alten Geschichte Syriens und Palaestinas* (1930), p. 75.

6. Mizpeh of Moab [Heb. *miṣpēh mô'āḇ*; Gk. *Massēpha tēs Mōab*]. The place where David sought refuge for his family with the king of Moab (1 S. 22:3). Since David was being pursued by King Saul, he most likely reached Moab via the southern end of the Dead Sea (cf. the route taken by the kings of Israel and Judah, 2 K. 3). None of the suggested identifications is particularly convincing. Mizpeh-moab has even been proposed as another designation for KIR OF MOAB.

Bibliography.–N. Glueck, *AASOR*, 18-19 (1939), 60-63, 82-88; *GP*, II, 391; A. Musil, *Arabia Petraea*, I (1907), 270, 274; A. H. van Zyl, *Moabites* (1960), pp. 88, 134 n. 2. A. F. RAINEY

MIZPAR miz'pär. *See* MISPAR.

MIZRAIM miz'rā-əm [Heb. *miṣrayim*, a dual form perhaps referring to Upper and Lower Egypt; Gk. *Mesraim*]. Except for the RSV (and Moff.), the major English versions transliterate Heb. *miṣrayim* when it is used for the son of Ham (Gen. 10:6; 1 Ch. 1:8). Egyptians are thus classified as Hamites. In Gen. 10:13; 1 Ch. 1:11 Mizraim "begot" the Ludim and six other peoples. This expression may simply mean that these peoples had some connection with Egypt (cf. RSV), and in other cases *miṣrayim* is translated "Egypt" in all the versions. Some scholars think that in a few passages referring to horses (1 K. 10:28; 2 K. 7:6; 2 Ch. 1:16f.; 9:28) the word should be emended to Muṣri or Muṣur, a land in Asia Minor (cf. Moff. Muzri).

Bibliography.–*DBSup.*, V, cols. 1468-1474; *GTTOT*, §§ 69, 835, 913. JOHN ALEXANDER THOMPSON

MIZZAH miz'ə [Heb. *mizzâ*]. Son of Reuel and grandson of Esau; an Edomite clan chief (Gen. 36:13, 17; 1 Ch. 1:37).

MNASON nā'sən [Gk. *Mnasōn*]. A Cypriot Christian who lived in Jerusalem (Acts 21:16). As a Hellenist he made an ideal host for Paul and his gentile companions when they came with the collection at the end of the third missionary journey (A.D. 57). The designation "early disciple" probably refers to a founding member of the Jerusalem Church, one of the original 120 on whom the Spirit came at Pentecost (Acts 1:15). As such, Mnason may have provided Luke with valuable information about the early Church.

The Western text places Mnason's residence in a village on the way from Caesarea to Jerusalem. The AV, RV, and NEB have Caesarean disciples bringing Mnason, while the RSV, NIV, JB, and NASB have Paul's party being brought to the house of Mnason. While either understanding is possible from the difficult syntax of this passage, the latter is probably correct since it is difficult to understand why the disciples would bring the prospective host.

I. Name.–The name appears in Akkadian sources as *ma'aba*, *ma'ab*, or *mu'aba*, in an Egyptian text as *m-ỉ-b*, in the LXX as *Mōab*, and in Josephus as *Mōabos*. According to Gen. 19:37 Lot's older daughter named her son Moab, a name explained in the LXX as "from my father" (= Heb. *mē'āḇî*). Thus to the Israelites the name may have been a derogatory pun reminding them of Moab's incestuous origins.

II. Geography.–Moab proper is a high plateau between the valleys of the Arnon (Wâdī el-Mōjib) and the Zered (Wâdī el-Ḥesā) and between the scarps of the Dead Sea rift and the gorge of the north-flowing Arnon. Bounded by desert to the east and the rift-valley to the west, it covered only about 2100 sq. km. (800 sq. mi.).

Territory N of the Arnon fell under Moabite control in at least two periods, when the nation included the plains (the *belqā* or *mîšôr*) from the Arnon to N of Heshbon and the plain in the Jordan Valley E of Jericho. At its greatest extent Moab covered an area of about 3600 sq. km. (1400 sq. mi.). Within these borders conditions suitable for agriculture and permanent settlements were found in a narrow band about 19 km. (12 mi.) wide.

A. Terrain. Jebel Shīḥān (about 1070 m., 3500 ft.), an extinct volcano in the north, and Jebel Khinzira (about 1240 m., 4060 ft.) in the south dominate the Moabite plateau. Thick layers of rich, brown Mediterranean soil cover the undulating plains that slope away from these peaks, especially along the western rim of the plateau. Outcroppings of limestone and basalt are found throughout Moab.

Deep gorges cut the plateau's perimeters into segments and reduce the areas useful for agriculture. Within the wadis freshwater springs form small pools or seep onto natural terraces. Bālū', a large site occupied in most periods since the Early Bronze Age (*ca.* 2700 B.C.), sits on a rocky bluff above such a spring.

Mt. Nebo, projecting westward from the plateau, rises to 802 m. (2631 ft.) and overlooks the *mîšôr*, a tableland flatter than the plateau of Moab proper to the south. The agricultural potential of the *mîšôr* was superior to that of the plateau; consequently its cities, e.g., Heshbon, Elealeh, Dibon, and Jalul, grew larger than those S of the Arnon. Yet its gentle terrain provided no natural boundaries, and Amorites, Ammonites, Midianites, Gad, Reuben, and Israel contested with Moab for its control.

The Arnon presents a formidable barrier to traffic between these two regions of Moab. It flows from a source near Lejjun north through a gorge 24 km. (15 mi.) long, that divides the arable plateau from the eastern desert; the wadi then turns west and descends sharply to the Dead Sea. The gorge at its widest point has rims about 5 km. (3 mi.) apart that tower about 700 m. (2300 ft.) above the stream bed.

B. Climate. Up to 33 cm. (13 in.) of rain normally fall annually on the *mîšôr* and along the western rim of the plateau. The shores of the Dead Sea receive a mere 5 to 7½ cm. (2 to 3 in.) annually, and only 20 cm. (8 in.) fall near the southern reaches of the Arnon. Variations in annual rainfall are important to life in such an area. Kerak has received as much as 67 cm. (26.25 in.) and as little as 9.4 cm. (3.7 in.) in a single year. Ancient peoples' migrations into and out of Moab were probably stimulated by similar fluctuations. Ruth 1:1-6 suggests that in some years the plateau was better watered than were the hills of Bethlehem, and that in such times migrations occurred across the rift-valley.

C. Vegetation. Deforestation, overgrazing, and erosion have reduced Moab's topsoil. Few trees survive there; grain crops or winter grasses cover most of the land. A definitive statement on the ancient vegetation of Moab awaits adequate excavation of its archeological deposits.

From Isa. 15–16 and Jer. 48, however, one can conclude that in the 8th and 7th cents. the wadis of the *mîšôr* and around Kir-hareseth (Kerak) were noted for their vineyards. But use of land for wine production depends on relatively stable military conditions, since crops must be cultivated over several years. During most of their history Moabites planted light grains.

D. Way of Life. Since the soil and rainfall needs of settled, agrarian people are met only on the western edges of the plateau, most Moabite settlements were located in the western 16 km. (10 mi.) of the plateau. The valleys, including the Dead Sea ghors, are generally lost to agricultural subsistence.

Herders of sheep, goats, and cattle found the entire land useful, however, and formed an important aspect of its economy. Pastoralists move toward the drier zones — which in Moab are E of the Arnon and on the slopes of the rift-valley — in the rainy season and bring their flocks to the wetter regions in the rainless summer. In so doing they establish various social, economic, and military ties with the sedentary peoples.

In return for allowing the sheep and goats to graze on their wheat and barley stubble, farmers receive organic

fertilizer, wool, and meat from the flocks. Townspeople provide needed craft products and food stuffs for the nomads. Often the settled folk are kin to the nomads. Wealthy pastoralists may buy land (or take it by force) when their flocks exceed the resources of their pastures and wells, and unfortunate shepherds may be forced to a sedentary life when they lose their flocks.

Such interaction of pastoral and agricultural peoples began in Moab by the end of the Early Bronze Age at the latest. By the Israelite monarchy it was basic to the Moabite economy and culture. 2 K. 3:4 recalls Mesha's reputation as a sheep baron. The "King of Moab" in the narratives of the Exodus need not have been a monarch over an entirely settled population. Only an occasional merchant settlement was needed to provide a background for Dt. 2:9-11 (see VII.A below).

At no point did large cities develop in Moab. Walled towns of over 4 ha. (10 acres) were infrequent. Small villages and in some periods isolated farmsteads and campsites seem to have served as the seats of Moab's culture.

A mixed economy of grain farming, herding, and trading provided the population's livelihood. As climatic and political conditions varied the peoples of Moab correspondingly increased or decreased their dependence on one or another of these elements.

III. Prehistory.–Biblical references to a prehistoric population in Moab (Dt. 2:10f.) offer no clues about the actual nature or precise date of such peoples. Consequently, it is unknown whether the Emim were E.B. sedentarists, hunters and gatherers of earlier periods, or L.B. invaders.

A scattering of stone tools at Khirbet el-Mahāri'am on the east-central plateau suggests sporadic but recurrent camping from the late Lower Paleolithic period (*ca.* 78,000 B.C.) through the Upper Paleolithic (*ca.* 10,000 B.C.). Although no Mesolithic or Neolithic remains have been reported, their absence may merely indicate that the peoples of such prehistoric cultures inhabited zones that have not been explored.

Chalcolithic settlements fairly covered the Jordan rift-valley, especially in the area later called the "plains of Moab" and near Bâb edh-Dhrâ' by the south end of the Dead Sea. Only a few sherds from this period appear in campsites on the plateau.

With the appearance *ca.* 3000 B.C. of the E.B. cultures came a way of life that has persisted into modern times. People settled in hamlets near the heads of small wadis. One extended family probably made up the population of most settlements. Women tended grain crops in the upland plateaus and in the valleys near the Dead Sea, while men and boys herded small flocks in areas less suited to agriculture. Herders' camps might be found dozens of kilometers from the village in the moist winter months but merged with the base settlements in the summer.

No large cities dominated E.B. I Moab. Bâb edh-Dhrâ', which grew into a major walled town, was a small, unwalled village of stone and brick huts. 'Arâ'ir on the north edge of the Arnon seems to have been only a campsite.

The villagers of Bâb edh-Dhrâ' were former nomads who had made earlier periodic visits to the location to tend crops and to bury in laboriously cut tombs the bodies of those who had died during the migratory circuit. They experimented with agriculture and *ca.* 3000 B.C. (E.B. IB) began building more permanent structures. Whether the E.B. IA nomads had immigrated or had developed from earlier local peoples is subject to question.

The E.B. I pottery is widely scattered on the plateau in regions favorable to both agricultural and pastoralist use.

IV. Formation of Urban Culture.–Some of these settlements began to outstrip their neighbors in size and importance with the rise of the E.B. II culture (*ca.* 2900 B.C.). Twenty-seven sites on the plateau and several from the less adequately surveyed northern area are known. Of these only Ader, Arjum, Rujm umm el-Quleib, Khirbet umm es-Sedeirah, and Khirbet Iskander exceed 5 ha. (12 acres), and most are smaller than 2½ ha. (6 acres). No walled city from E.B. II-III is known on the plateau, although several ruins show surface clues that may indicate walls from E.B. II-III. Bâb edh-Dhrâ' may have been walled during E.B. II and certainly was so by 2500 (E.B. III).

Moab in E.B. II and III seems to have been mainly agricultural, although pastoral pursuits no doubt continued. All but three of the known E.B. II-III settlements are in the area that receives enough rain for farming. Lejjun, Khaif, and Bâb edh-Dhrâ', the exceptions, are near perennial springs and may have used irrigation. Carbonized grain in a pit in Level 6B at 'Arâ'ir suggests agriculture there. Glueck thought that the terraces around Khirbet umm es-Sedeirah, on the north slope of the Wâdī el-Ḥesā, were built in this period, but his suggestion has not been tested by excavation.

Villages in Moab at this time probably housed craftsmen, including metallurgists, and participated in trade. Some scholars have suggested that Moab traded stone — basalt and hematite — to western Palestine, where it was used for maceheads, vessels, palettes, and grinding stones. Transit across the el-Lisan area of the Dead Sea, known from the historical period, would have made Moab a trade partner of Arad, Ai, and other southwest Palestine cities.

Evidence of worship includes the menhirs of Lejjun, Ader, Arjum, and Iskander, where ceremonies were probably enacted to bind scattered regional populations in political and religious alliances. Fertility figurines found at Bâb edh-Dhrâ' suggest the importance of the divine gift of life to these people.

By 2200 B.C. Moab, like much of Transjordan, had taken on a new appearance. Villages appeared more frequently, including five towns large enough to house over one thousand persons. Indeed, two town sites in the Bālū' area could have been inhabited by over two thousand, and Lejjun's population is estimated at two thousand to four thousand in E.B. IV.

Curiously, this explosion of settlements occurred when the cities of western Palestine had fallen to unknown forces. Some suggest that immigrants from the west had spread themselves over the agricultural land in Transjordan in an attempt to survive the dissolution of the E.B. III-IV urban culture. New elements from the north brought some stylistic innovations, but the basic population continued from the native stock. Bâb edh-Dhrâ' remained settled, and the vast cemetery continued to grow. But burial styles changed once more, and the E.B. III town was abandoned for areas N, E, and S of its decaying walls.

Ader, a town of about five hundred persons, had a small sanctuary building. One broad room, entered on its long side unlike the later Canaanite and Israelite temples, contained an altar table. Nearby were menhirs not unlike the Israelite *maṣṣēḇôṯ* ("standing stones"). The date of this complex and the form and object of any ceremonies performed there are, unfortunately, uncertain.

Nomads also ranged into Moab during this time, if the DOLMENS found in the northern Moab area are taken as artifacts of a nomadic culture. Dolmens are rectangular structures of massive stone slabs that once were covered by earth heaps. Recent excavation shows that dolmens housed burials from the E.B.-M.B. transitional period. Since most dolmens are located away from settlement sites and since they contain secondary burials, it has been suggested that nomads built them. The stylistic attributes

MOAB

Pottery and bones from a tomb at Bâb edh-Dhrâ' (*ca.* 2000 B.C.) (B. VanElderen)

of artifacts from dolmens indicate that the dolmen builders before migrating to Transjordan may have had contact with Syrians.

Was E.B. the time of the Emim? Although the biblical and archeological references are too fragmentary to allow certainty, this period of expansion provides an attractive hypothetical matrix.

V. Decline of Population.—Although remarkably few artifacts from the M.B. and L.B. have turned up in archeological surveys and excavations in Moab, the plateau and northern Moab were not necessarily abandoned during most of the second millennium. Jālūl, Dhībân (Dibon), 'Arâ'ir, el-Miṣna', and Bālū' are among the sites that have yielded M.B. and L.B. sherds. A tomb at Medeba contained bronze weapons and jewelry along with scarabs of the 19th and 20th Egyptian Dynasties and poorly made pottery.

Egyptian records seem silent about Transjordan at least until the late 13th century. Egyptians were aware, however, of a group called the Shasu as early as Amenhotep II (1436-1410). These seemingly nomadic inhabitants of southern Transjordan may be the ancestors of the Edomites and Moabites.

Did the decline in settled population in southern Transjordan result from the attack of the armies of the Elamite king Chedorlaomer (Gen. 14:5-7)? Some have held that he demolished city-states there sometime in the late E.B. IV-M.B. I period, leaving the area decimated. This reconstruction rests on no biblical or extrabiblical evidence, however. Gen. 14 is notoriously difficult to fit into a chronological context. Archeological evidence allows the event to be dated at any time from the early second millennium, when the names of the kings fit well enough but the cities of Moab and Edom did not exist, into the Iron Age, when the narratives probably were written down.

Genesis 14 cannot explain the near absence of settled population in Moab for one thousand years because the chapter cannot be precisely dated and because an invasion does not account for a lengthy population decline. Perhaps Moab lost its settled population as a result of the political disturbances in the power centers of the eastern Mediterranean, especially in the Palestine-Lebanon area. As Egyptian commercial and military interests increased in the 19th cent., cities built massive defenses, apparently against one another. In the wake of Egypt's expulsion of the Hyksos these cities fell. Fifteenth-century pharaohs plundered and subjugated the Canaanites, and in the 14th cent. 'Apiru disrupted domestic tranquillity. As petty kings warred and tyrannized, border areas such as Moab became refuges. Settled agricultural peoples became nomads, thus avoiding taxation and military conscription. This explanation fits the evidence of M.B. II-L.B. II Moab. Hadad son of Bedan and king of Edom, who thwarted a Midianite incursion into his tribe's pasturage, was likely chief of a small group during this kind of period in Moab.

The *'êlîm* (Ex. 15:15) may be such tribal leaders. *'Êlîm* means "rams," but the term parallels references in adjacent lines to the leaders of Edom and the inhabitants of Philistia and Canaan. Thus Israelite tradition, recalling the pastoralist foundation of Moabite economy, nicknamed Moab's leaders "rams."

VI. Moabite Kingdom.—As Egypt's sovereignty waned in the late 13th cent. and as small settlements appeared in the hills of Palestine, an incipient kingdom of Moab emerged. This nation-state did not spring suddenly from the desert. L.B. pottery from sites on the Moabite plateau suggests that the area became settled in the 13th cent. or even earlier.

Three lines of evidence may point to increased political organization on the plateau in the 13th century. First, the Luxor inscription of Rameses II may portray a fortified town that Egypt plundered in Moab (*ca.* 1285 B.C.). Second, a stele found at Bālū' in 1930 shows three figures, two presumably divinities and the third a king. The Egyptian style of art and attire is often interpreted as indicating royalty in Moab and relations with Egypt. Third, an apparent line of fortresses, dated by Glueck from *ca.* 1200 B.C. (*Other Side of the Jordan,* pp. 169-171), further suggests national organization. It should be noted, however, that the Luxor inscription is not clearly legible, the Bālū' stele was not found in stratified context and has not been translated, and Glueck's fortresses have not been excavated and therefore are not dated. A developing monarchy in thirteenth-century Moab is as yet an untested hypothesis.

By 1100 B.C., however — and probably as early as 1200 — many villages and fortified sites punctuated the Moabite landscape. In central Moab these appeared along the fertile central area as well as around the edge of the plateau. Probably Bālū', Rabbah, Miṣna', Imra', and others covered over 0.4 ha. (1 acre) and were unwalled. Farmsteads or hamlets like Abū Zārūra, in the eastern farmland of the plateau, covered barely 900 sq. m. (10,000 sq. ft.).

Walled towns or fortresses are found around the southern and eastern edges of Moab. Typical are two nearly identical sites in central Moab now called by the frequently used Arabic name Medeiyineh ("little city"). These Medeiyinehs stand on flat-topped hills on the eastern edge of the plateau. Fortifiers cut dry moats into the ridge connecting them with the plateau, thus isolating oval areas of about 17,300 sq. m. (186,000 sq. ft.), and further strengthened them by erecting stone towers beside the moats. Walls of flat blocks cut from the fortress site dominate the steep slopes, and thick gate towers protect the only entrance. Buildings one and two stories high were constructed of limestone blocks and slabs. At the southern Medeiyineh stairway treads and lintels of stone remain undisturbed. The pottery and house styles suggest a date of 1200-1000 B.C. for these fortresses.

Similar strongholds stand at Medinet er-Ras, Mahaiy, and Khirbet Medeiyineh on the Wâdī Themed. Other bastions feature blockhouses, some preserved to 6 m. (20 ft.) in height. Qaṣr el-'Al on Moab's northeast border is a structure of large blocks laid in header-and-stretcher manner that measures over 12 by 18 m. (40 by 60 ft.) Qaṣr Abū el-Kharaq, el-Maḥri, and Khirbet Remeil, equally remote and agriculturally unlikely areas, also have blockhouses. Since none of the blockhouses has been excavated, their precise date and function are not known. All seem to have been constructed between 1200 and 1100, however, and their locations suggest that they guarded the border of an agricultural kingdom.

MOAB

Well-formed pottery head of a Semitic king or god from Khirbet Medeiyineh (ca. 900-600 B.C.) (E. K. Vogel; picture N. Glueck)

The population of this kingdom probably was largely descended from the Bronze Age folk. Some evidence suggests that an external stimulant provoked the formation of the town culture of the Iron Age. The script on the Bālūʿ stele is similar to Linear B, used in the second-millennium Minoan civilization. This resemblance, the discovery of Mycenaean imported pottery in a thirteenth-century tomb near Medeba, and the Cypro-Phoenician decorative style of Moabite pottery (12th-6th cents.) may indicate that the leaders of Moab entered from the west. An alternative hypothesis is that the catalyst of Moabite political growth and unification was the establishment of a trade network from Syria southward to Arabia that crossed Moab. The presence of anthropoid clay coffins — associated with Egypt and/or the Philistines — in Transjordan (including a ninth-century context at Dibon [Dhībān]) adds to the evidence, as yet inconclusive, for Moab's associations with the west.

Moabite tribes and towns quite likely united under a single leader in response to external pressures from north and west and exploited their location on the trade route. Connections of some sort with Egypt seem certain, as the Bālūʿ stele suggests.

VII. Israel and Moab (*ca.* 1400-1000 B.C.).—*A. The Exodus.* When did Israel first encounter Moab? Nu. 21 portrays Sihon as Israel's enemy N of the Arnon and indicates that he had earlier overthrown Moab's first king (if *riʾšôn* in v. 26 is translated "first" [JB] rather than "former" [RSV]). This situation would harmonize nicely with a reconstruction that sees Moab established as a state in the 13th cent. and Israel dealing with it shortly thereafter.

According to this scenario Israel petitioned the king of Moab, who controlled only from the Arnon to the Zered, for permission to pass through his area. Permission having been denied, Moses led his cohorts around Moab, through the eastern desert, and then into the *mîšôr,* where the tribes defeated Sihon at Jahaz. Sihon had recently taken the region from the Moabites, so his defeat did not transgress the brotherhood of Israel and Moab. Weakened by his wars with Moab, he was vulnerable to Israel's assaults and fell to its armies.

Problems beset this reconstruction, however. First, the biblical episodes could fit several periods in Moab, and archeological evidence does not demand a thirteenth-century date for the Israel-Moab encounter. Enough sedentary life to form a setting for the biblical events existed in L.B. Moab. Approximately 25 percent of the largest sites surveyed in central Moab, including the ruins of Bālūʿ, Rabbah, and Imraʿ, yielded L.B. surface sherds. ʿArâʿir on the north rim of the Arnon also showed signs of L.B. use. Without excavation and careful pottery analysis it would be wrong to claim that some city-states did not appear on the plateau earlier than the 13th century.

Is it necessary that the Moabites of the Exodus were city-dwellers, however? Nomads have chiefs who could be called "kings." Such peoples normally guard jealously the very rights at issue in Israel's communications (Nu. 20:14-21; Dt. 2:26-37; Jgs. 11:15-20): land passage and water.

Whether or not the Exodus events in Transjordan require a sedentary Moab, they could have occurred as early as the 15th or as late as the 12th century.

Archeological evidence for a placement of the Sihon event is limited. If ancient Heshbon was identical with modern Ḥesbân, it left no ruins for excavators. Unless Sihon's city was located in another nearby site (the ruin at Jālûl has been suggested), it did not exist as early as the 13th century.

A second challenge to the popular harmonization of archeological and biblical evidence emerges when the varied biblical references to Israel's routes and to its contacts with Moab are examined. Nu. 33:44f. seems to indicate passage through Moabite territory, as do the references to the favorable treatment "by the men of Ar" (Dt. 2:29; cf. vv. 9, 18) and to Israel's passage over the Arnon to Sihon's territory (v. 24). Nu. 21:10-13 and Jgs. 11:18, however, show Israel's avoidance of Moabite lands. Also geographically difficult is the order of events in Nu. 21:18-23. Regardless of Jahaz's location — most have placed it SE of Heshbon — it is unclear why Sihon challenged Israel there if the latter had already encamped "by the top of Pisgah which looks down upon the desert" (v. 20), a site W of Heshbon.

The Sihon texts are themselves difficult. Since the song of Nu. 21:27-30 also occurs (slightly modified) in Jer. 48:45f. but there lacks the name Sihon, and since the line "to an Amorite king, Sihon" (Nu. 21:29) disrupts the assumed meter of the poem, it has been suggested that the song in its original form had nothing to do with Sihon or his victory over Moab. If this is so, Israel did not encounter Sihon in its move from Kadesh-barnea to Canaan. Rather, the account was added to show that Israel legitimately owned territory later claimed by Moab, since it was commanded to take no land from Moab (Dt. 2:9).

Since the biblical and archeological evidence is uncertain, scholars have proposed several ways of treating the historical encounter of early Israel and Moab. Some have suggested that two or more groups moved across Transjordan to settle in Canaan and become Israel. One crossed Moab in the 14th cent., before a dense and well-organized kingdom appeared there. The other, traveling in the 13th cent., was forced to circumvent Moab's newly formed state but could not avoid conflict with Heshbon. Later Israelite historians merged the two episodes but never smoothed out the details. Hence the Bible contains seemingly inconsistent narratives.

An alternative to such a reconstruction is that there was no actual unified movement by all of Israel, but that individual tribal groups conquered and settled the land. No one has successfully identified the origins of these tribes, but it should be noted that Nu. 32:33-38 suggests that Reuben and Gad occupied their land peacefully, building sheepfolds and towns.

Other scholars have said that actual events may underlie

the narratives but cannot be precisely known because of editorial transformations made centuries later. Each editor thought of the Transjordan of his day and used the older traditions to support his own political position. This explanation accounts for some differences in the various passages but is so speculative that it is difficult to test.

B. Israel, Moab, and Midian. In the earliest period of Moabite statehood the nation seems to have been allied with the fully nomadic Midianites who ranged into Canaan from South Arabia. The episodes in Nu. 22–32 show a conflict between the Israelites (or at least the tribes of Reuben and Gad) and the pastoralist Midianites allied with the Moabite king Balak. When Israel was camped in the plains of Moab across the Jordan from Jericho, it was confronted by Balak and his hired seer Balaam. This encounter, in which the foreign holy man blessed rather than cursed Israel, stands as the first of Yahweh's several victories over the political-religious establishments of the land's owners. Another "first" incident at the same campsite — Israel's participation in the worship of Baal of Peor — began the apostasy that plagued Israel for the rest of its time in the land.

Moses gave his final instructions to Israel while in this area (Dt. 1:5) and was buried near the Moabite-Midianite shrine at Beth-peor (32:48-52; 34:1-8).

C. Period of the Judges. Moab must have regained territory N of the Arnon soon after these events, for according to Jgs. 3 Eglon, a rotund king of Moab, had expanded his nation to include the Jordan ford near Gilgal and Jericho. Gad and Reuben, not yet ensconced in their territory, would have been cut off from their allies on the west bank of the Jordan, and Benjamin also would have been threatened.

Some references (Jgs. 3:19, 26) confuse one's understanding of the geography, but Eglon most likely resided at Jericho ("city of palms") and was there assassinated by Ehud. Ehud then led the Ephraimites in retaking the fords of the Jordan. Moab's eighteen-year domination of east-west trade was thus broken.

The events in Ruth reflect a more peaceful relationship between Moab and Israel when, as probably had been customary since the E.B., the passage of peoples between the two sides of the rift-valley permitted survival when periodic climatic fluctuation or political unrest made life difficult on the west bank. The ease of communication and social involvement of the two peoples underscores the archeological evidence of similar pottery, house styles, scripts, and languages. Kinship ties such as those of Ruth and Elimelech maintained a necessary potential for the survival of many common folk.

D. Kingdoms of Moab and Israel. 1. Israelite Domination (ca. 1050-922 B.C.). By the time of Saul Moab had matched its western neighbors in building towns and fortresses (see VI above). Dibon, later the capital of Moab, was at least a small town, and the building of the Moabite fortress system had neared completion.

Efforts at fortification were likely a part of a military upsurge in the Transjordan. Both Saul and David entered the area (1 S. 14:47; 2 S. 8:2), and David severely retaliated against Moab, killing two-thirds of its warriors and confiscating a significant spoil of silver and gold. The unparalleled harsh treatment of this nation raises the question of what had happened to the personal relationship of David and Moab, since it was in Mizpeh of Moab that David had found refuge from Saul (1 S. 22:3-5). Perhaps Moab had joined its neighbors against Israel once too often and was punished for disregarding a former treaty of brotherhood. Mass execution of Moabite males left the state powerless and allowed Israel to dominate the increasingly valuable trade route, thus advancing its sovereignty over Syria (2 S. 10:15-19; 1 K. 8:65). Solomon maintained this domination but seemingly by his ritual alliance system, since 1 K. 11 recounts that he loved a Moabite woman (v. 1) and built a high place for Chemosh, the Moabite god, on a mountain E of Jerusalem (vv. 7, 33).

2. Moabite Resurgence and Omride Sovereignty (922-735 B.C.). Israelite dominion was short-lived. Moab seemingly took advantage of the disunity that followed Solomon's death and asserted its independence. The Moabite Stone's report that Omri subjugated Moab suggests that Israel's dominion had not continued unbroken from Solomon. Dibon and other areas N of the Arnon came under Moabite control.

Omri's reassertion of sovereignty over Moab — which Moabite religion interpreted as divine punishment of Moab — was probably no more than the establishment of a garrison at Jahaz (Moabite Stone, lines 19f.) and the imposition of tribute in wool and meat (2 K. 3:4). Israel was thereby able to control the trade route and to protect Gadites dwelling in the *mîšôr* at Ataroth and Nebo.

According to both the Moabite Stone and 2 K. 3, Mesha successfully overthrew the Israelite yoke late in the Omride dynasty. The chronology and the identity of the Israelite personalities involved in these events are not clear, however.

Israel had dominated Moab for forty years, according to the Moabite Stone. This dominion lasted through half of the reign of Omri's son. Since the reigns of Omri and his son Ahab total only thirty-four years, and since the account in 2 Kings states that the revolt occurred after Ahab's death (3:5f.), scholars (e.g., Murphy, Miller) have sought to clarify the chronology.

First, regarding the "forty-year" sovereignty of Israel, scholars have suggested that Omri overcame Moab before his reign began, i.e., while he was a general in Baasha's army (J. Morgenstern, cited by Murphy, p. 412). Most have thought this solution unlikely, however, and have preferred to take the "forty years" as a round number. The available information on Omri and Baasha indicates that Omri was more likely to have reached across the Jordan to control trade there and thus to enhance his relations with the Phoenician merchants.

As for the claim of Mesha that Chemosh released him from Israel midway through the reign of Omri's son, one solution is that Mesha reckoned his victories beginning with early skirmishes against Ahab. Ahab was quite strong at that point, however, and not likely to allow a petty vassal to disrupt a valuable area of his trade empire. Other historians have read "grandson" (i.e., Joram) for "son" in Mesha's inscription, thus lengthening Israel's years of sovereignty nearer the forty years that Mesha claims and harmonizing with 2 K. 3:5.

If Mesha was not referring to a particular victory but to the results of his total reign, however, the discrepancies evaporate. The turning point in Chemosh's favor of Moab was not a victory but the god's gift of the throne to Mesha during the reign of Omri's son, although actual reconquest from Israel did not begin until the turmoil following Ahab's death.

3. Mesha's Kingdom. Mesha cleared Israelite garrisons and settlements from the *mîšôr,* established a Moabite population in the Israelite fortress at Jahaz, connected the two sides of the Arnon with a highway, secured his own forts, and built Dibon into a self-sufficient city.

Israel responded with an attack through the southern wilderness (2 K. 3:5-27). Since the northern approaches were blocked by Mesha's fortresses, Joram allied with Jehoshaphat of Judah and the king of Edom, Jehoshaphat's vassal, to strike at Moab's southern border. Both Judah and Edom stood to lose if Moab controlled the trade

route from Elath to Damascus. The armies circled SE of Moab's fortresses on the Wâdī el-Ḥesā. Their initial encounter resulted in a rout of the Moabite garrison (perhaps Mahaiy) when its defenders, mistaking the sunlit pools of water in the wadi for blood, rushed the invaders' camp in quest of booty. Joram led his troops to the walls of Kir-hareseth and put the fortress under seige. The allies' victory seemed only a matter of time. Mesha tried to break through with a troop of swordsmen who directed their attack at the Edomite cohorts, thinking perhaps that these were the inferior army. The failure of this thrust left Mesha with the desperation tactic of bringing his firstborn son to the city's wall to sacrifice him. Distressed by this extreme act, the invaders retreated. Perhaps superstition motivated their flight. On the other hand, it has been suggested (Herzog and Gichon, p. 125) that Mesha offered his son to placate the god because a plague had broken out in the city. Israel may have retreated due to the fear of contagion.

Another confrontation of Moab with its western neighbors is reported in 2 Ch. 20. Moab, with Ammon and "the men of Mt. Seir" (Edom), seems to have crossed the ford of the Dead Sea at the Lisan and aimed an attack at the area S of Bethlehem. After Ammon and Moab turned on Edom and then on each other, however, Jehoshaphat led his men in looting the dead invaders' camp. The passage vaguely resembles 2 K. 3 and may be a prophetic version of that account. As it stands, the 2 Chronicles account cannot be fitted into the Mesha-Joram chronology.

Mesha's successes should be measured in terms of his liberation of the Moabites' economy as well as his securing of the borders. Rather than devoting their energies to producing sheep and wool for Israel, the Moabites were free to set their own priorities and to trade on their own terms. More of the plateau could be used for agriculture, and a larger portion of the people could settle and unify under the monarch. Mesha's boasting about settling and modernizing towns (Moabite Stone, lines 9, 23-32) reflects this aspect of his policy. Chemosh gained adherents as tribesmen relinquished tribal and ancestral deities. Conversely,the god served to unify the once politically divided nomads.

Isaiah 15–16 and Jer. 48 reflect the success claimed by Mesha; Heshbon, Elealeh, Sibmah, and Jaazer — all in the *mîšôr* — are known as Moab's. Furthermore, these same prophets refer to Moab's strength in terms of agricultural produce rather than pastoral wealth.

Sherds collected from Moabite ruins demonstrate that Moab had links with the north and possibly with trading interests in Phoenicia. Yet it developed its own distinctive artistic style. I.A. II decorated pottery is polished and banded in red or brown. While similar to Cypro-Phoenician and Edomite wares of the same period, it is clearly distinct from the foreign products of both Syria and Edom.

Walled cities have been excavated at ʿArâʿir and Dhîbân. At the former an eighth-century fortress of over 2000 sq. m. (2500 sq. yds.) was constructed of roughly hewn stones laid in header-and-stretcher style. A citadel, perhaps Mesha's capitol, stood on the crest of Dhîbân's mound.

VIII. Decline of Moab (*ca.* 735-500 B.C.).–*A. Assyria Judah, and Moab* (*ca.* 735-609 B.C.). After Mesha's death Moab lost control of some territory but still made forays outside its base between the Arnon and Zered. Israel and Aram vied for control over the towns N of the Arnon (2 K. 10:32f.), but Moabites during this period were able to raid the area of Elisha's tomb, perhaps in Gilead (13:20f.).

Jeroboam II seems to have reasserted Israel's control over all Transjordan or at least to have restricted Moab's sovereignty to the Arnon (2 K. 14:25-28). Uzziah's subjugation of Ammon (2 Ch. 26:8) probably shifted the rule of much of Transjordan to Judahite hands, facilitated Jerusalem's control over the eastern routes to the newly reopened part of Elath (2 K. 14:22), and provided additional grazing herds that complemented Uzziah's expanded agricultural enterprises (2 Ch. 26 10).

Assyria's ambitions, which first intruded into Transjordan *ca.* 800 B.C. (*ANET,* pp. 281f.), guaranteed that Israel and Judah would not long control Moab. Though Adadnirari III's dominion (*ca.* 810-783) was short-lived, Tiglath-pileser III in 733 took captives from Gad, Reuben, and Manasseh and received tribute from Transjordanian and Arabian chiefs, including Salamanu of Moab (*ANET,* pp. 282-84). Between the reigns of Sargon II (722-704) and Esarhaddon (681-669) Moab paid one mina of gold to Assyria. Moab's relative poverty during this period is indicated by Ammon's payment of twice this amount.

Tribute was not paid without protest. Moab was invited to join the Ashdod rebellion along with Judah and Edom (*ANET,* p. 287). Somehow it was spared Sargon II's reprisals (711) and participated in the rebellion that Merodach-baladan of Babylon provoked against Sennacherib. The latter's military response against Judah is well known from 2 K. 18–19 as well as from Assyrian texts. Moab escaped destruction by paying tribute (*ANET,* p. 287).

Decimated by decades of warfare and costly vassalhood, Moab was overrun by Arabian tribes. Although the Moabite king Kamashaltu, a vassal of Ashurbanipal, sent an Arabian chieftain bound in chains to Nineveh (*ANET,* p. 298), the nation soon became a sparsely settled pastureland for Arabian herds. Town sites with late I.A. pottery are rare, although the larger cities of Dibon, Heshbon, and possibly Bālūʿ and Kir-hareseth survived. The battered stone wall at Dhîbân, built *ca.* 600 B.C., may well represent Dibon's final refortification in the face of the desert hordes; the dirges in Isa. 15–16 and Jer. 48 may reflect destructions by these bands, although many scholars (e.g., Bartlett, pp. 242f.) have read them as referring to Nebuchadrezzar's invasion. The abundant references in these texts to cities N of the Arnon reinforces the impression left by archeology that few large towns remained in central and southern Moab.

Zephaniah's oracle against Moab (Zeph. 2:8-11: *ca.* 630 B.C.) responded to Moab's recent taunts against Judah in a time that Assyria dominated both lands. Shortly thereafter Josiah defiled an altar of Chemosh that had presumably stood since Solomon's apostasy (2 K. 23:13). While Moab was then in no position to retaliate, it joined bands of Syrians, Ammonites, and Chaldeans to strike Judah after Jehoiakim's rebellion against Nebuchadrezzar (24:2).

B. Moab in the Babylonian and Persian Empires (*ca.* 605-500 B.C.). Moab was by no means solidly in Babylonia's camp, however. Jer. 27:3-11 indicates that it plotted a rebellion in 594, and Josephus (*Ant.* x.9.7 [181f.]) implied that Nebuchadrezzar struck Ammon and Moab in 582, doubtless a punitive action. Ruined cities at Ḥesbân, Dhîbân, and ʿArâʿir probably testify to this attack.

In their mutual adversity Moab and Judah seem temporarily to have rediscovered their earlier kinship. Jews found refuge in Moab (Jer. 40:11) between the fall of Jerusalem (598) and Gedaliah's restoration (*ca.* 586). Following the Babylonian Exile Moabites intermarried with Judahites (Ezr. 9:1f.; Neh. 13:23). Moabites also suffered a somewhat similar dispersion, if the presence of seemingly Moabite names in Neo-Babylonian and Persian inscriptions is indicative. Nevertheless, by the mid-5th cent. leaders of Judah and Moab were at odds, probably due to competition within the Persian satrapy (Neh. 13:1-3, 23-27; Josephus *Ant.* xi.2 [19-30]).

IX. Later History.–No town life appeared in Moab until the arrival of Nabatean organization. The NABATEANS had probably been among the Arabian raiders of the mid-7th

cent. (*ANET*, p. 298). They may have originated in the merging of desert tribes with native Edomite and Moabite populations, but not until the mid-2nd cent. did they extend political sovereignty north toward ancient Ammon. Nabatean temples at Qaṣr and Khirbet et-Tannur demonstrate their presence in Moab, as do dozens of settlements in agricultural areas.

When Emperor Trajan finally brought the Nabateans under Roman control he linked their domains with Damascus by a new highway, still marked by numerous mile posts and roadbed remnants. Roman and Byzantine road networks cover Moab.

X. Language.–While knowledge of the Moabite language is limited primarily to the Moabite Stone and a few seals, it is clear that Moabite is a dialect of Northwest Semitic and is closely related to Hebrew, Phoenician, Ugaritic, and Aramaic. Moabite script is similar to the old Aramaic and Phoenician scripts.

A three-consonant verbal root is basic. Gender, number, and tense are indicated by afformatives and preformatives, and the causative by the *h-* preformative. The perfect denotes completed actions, events, and states; the imperfect indicates acts yet to be accomplished or completed.

Moabite differs from Hebrew in its use of the *iphteal* form of the verb and from Judahite Hebrew in its contraction of the *ay* and *aw* diphthongs to *é* and *ó*, respectively.

As in northern (Israelite) Hebrew the final *t* indicates a feminine noun, but the Moabite plural and dual masculine use the final *n*, as in Aramaic. Other similarities to Hebrew include the use of pronominal suffixes, independent first and second personal pronouns, *waw* consecutives, the accusative particle *'t*, the relative *'šr*, and the *h-* preformative demonstrative pronoun.

Seal inscriptions indicate that Aramaic had become dominant in Moab at least in the sphere of business and government by the 6th century.

XI. Religion.–The Moabites of the kingdom period worshiped Chemosh, whom they believed provided national security. The Moabite Stone, biblical statements, and nonverbal artifacts provide fragments of information about the history and nature of the Moabite cult.

Moab's and its neighbors' religions had several features in common. Animals were sacrificed on hilltop altars (Nu. 22:40; 23:1, 14, 29), and standing stones (menhirs or *maṣṣēḇôṯ*) marked holy sites. Sexuality was openly admitted into worship and the pantheon, astral symbolism appeared, gods were thought to bring military victory, and kings led priestly functions.

The Moabites knew at least two deities. Chemosh led the pantheon of the kingdom. God of war and judgment, he may be pictured with astral symbolism in the Bālū' stele and represented on horseback on a clay figurine discovered at el-Medeiyineh in the *mišôr*. Since no inscriptions verify the identity of these figures, however, scholars should remain cautious on this point. Mesha recognized Chemosh as a deity involved with the history of his nation just as the eighth-century Israelite prophets claimed Yahweh as active in their history. Chemosh had chastened Moab by giving it into the power of Omri and later had made Mesha his champion to restore Moab's good fortune. Furthermore, Chemosh called for devotion of war spoils, as did Yahweh.

Names compounded with the divine name Chemosh appear on inscriptions as late as the Persian period. Whether they always refer to the Moabite deity cannot be said, however, since there may be evidence of a general Semitic divinity by that name from as early as the Ebla documents (*ca.* 2400 B.C.).

Aštar, a female consort of Chemosh, seems to have received Moabite devotion as well (Moabite Stone, line 17; but cf. J. Gray, *JNES*, 8 [1949], 77f.). She was presumably the goddess of fertility and may be represented in the figurines discovered in several Moabite ruins. These images show a female clutching an object — perhaps a bread loaf — to her breast in earth-mother fashion. *See* ASHTORETH.

Perhaps the Bālū' stele shows a meeting of Chemosh, Aštar, and a Moabite king. But the Egyptian motifs on this relief suggest that these figures may not be local deities at all. Since the inscription accompanying the scene has not been translated, scholars cannot be certain.

Baal also appears in connection with Moabite history (Nu. 25:3; Moabite Stone, lines 9, 30). "Baal" need not be always a name, however; it can denote a "lord" or master of a location or power. Other possible divine names associated with Moab that are known from Semitic religion include Peor, Meon, Nabu (Nebo), and Horon (Horanan of the Moabite Stone; Horonaim of Isa. 15:5). *See also* MOABITE STONE.

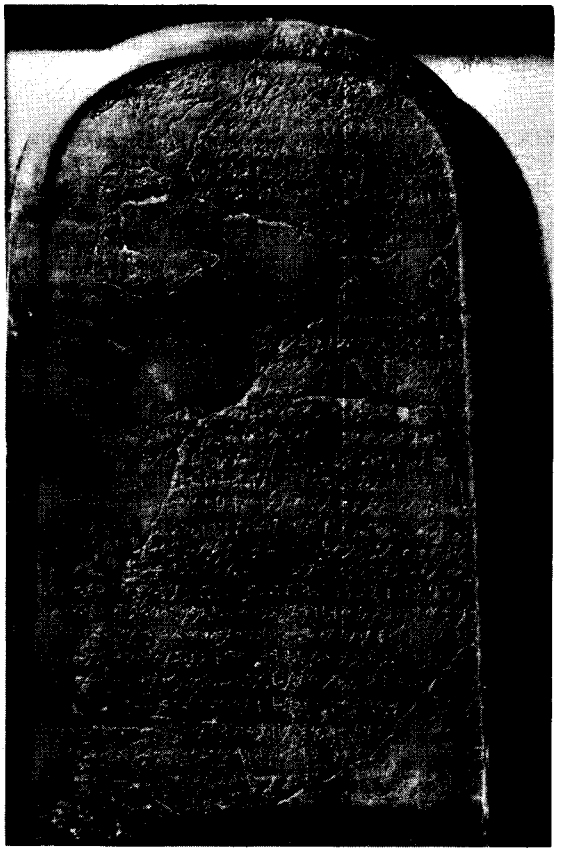
J. R. KAUTZ, III

MOABITE STONE. A stele of black basalt found at modern Dhībán (OT Dibon) in the Transjordan, containing an inscription of about thirty-four lines commemorating various military and building activities of Mesha king of Moab in the 9th cent. B.C. The following translation is the author's.



1) I am Mesha', son of Chemosh[-yat], king of
2) Moab, the Di-
3) bonite. My father ruled over Moab thirty years,
4) and I became
5) king after my father./ I made this high place for
6) Chemosh in Qarḥoh/as a high [place of de]liverance
7) because he delivered me from all assailants (?) and
8) caused me to triumph over all my enemies./ Omri,
9) the king of Israel, had oppressed Moab many days
10) because Chemosh was angry with his land./
11) His son succeeded him, and he too said, "I will
12) oppress Moab."/ In my time he spoke thus,
13) but I triumphed over him and his house./ Israel
14) has utterly perished forever. Now Omri had
15) occupied al[l the lan]d
16) of Medeba./ He had dwelled in it his days and
17) half the days of his son, forty years. But Chemosh
18) restored it in my days. I built Ba'al-me'on and
19) made in it the reservoir; and I built
20) Qiryaten./ Now the people of Gad had dwelled in
21) the land of 'Atarot from of old, and the king of Israel
22) had built for himself
23) 'Atarot./ But I fought against the city and
24) took it./ I killed all the people of
25) the city as satiation for Chemosh and for Moab.
26) I brought back from there 'Ar'el (?), its DWD, and I
27) dragged it before Chemosh into Qiryat./ I settled
28) in it people of Sharon and people
29) of Maḥarit./ Then Chemosh said to me, "Go,
30) seize Nebo from Israel." So I
31) went by night and fought against it from the break
32) of dawn until noon./ I
33) seized it. I killed all of them, seven thousand
34) men and male aliens,/ women, and female aliens
35) and female slaves; for I had devoted them to
36) destruction to 'Ashtar-Chemosh./ I took from
37) there the
38) [ves]sels of Yahweh and dragged them before
39) Chemosh / The king of Israel had built
40) Yahaṣ and lived in it when he fought against
41) me./ But Chemosh drove him out before me, and
42) I took from Moab one hundred men, all its
43) chiefs (?),/ and set them against Yahaṣ and seized it
44) to add on to Dibon./ It was I who built Qarḥoh,
45) the wall of the forests and the wall of
46) the citadel./ I am the one who built its gates.
47) I built its towers./ I
48) built the royal palace. And I am the one who made
49) the pair of reservoirs (?) [for the spr]ing in the midst
50) of the city./ But there was no cistern in the
51) midst of the town at Qarḥoh. So I said to all
52) the people, "Each of
53) you make for yourselves a cistern in his
54) house."/ And it was I who cut the beams(?) for
55) Qarḥoh with Israelite
56) prisoners./ I am the one who built 'Aro'er and
57) made the highway in the Arnon (valley)./
58) It was I who built Bet-bamot, for it was
59) destroyed./ I built Beṣer — for it was in ruins —
60) with fifty men(?) of Dibon, because all Dibon
61) is subject (to me)./ And I ruled over
62) [ ] hundreds in the towns which I added to the
63) land./ It was I who built
64) Medeba and Bet-diblaten/ and Bet-ba'alme'on;
65) and I brought there
66) [ ] the flock of the land./ And as for
67) Ḥauronen, there dwelled in it [ ]
68) [And] Chemosh said to me, "Go down, fight
69) against Ḥauronen."/ And I went down [ ]
70) [and fought against the town and seized it]; and
71) Chemosh [dwelled] in it in my days . . .
72) . . .

I. Discovery and Authenticity.–F. A. Klein, a German missionary, discovered the stone in 1868. While negotiations for its purchase were underway Arabs broke up the stone, but not before the French scholar C. S. Clermont-Ganneau had made an imprint of the inscription. Most of the pieces were recovered and are in the Louvre. The fragments and the imprint have allowed the stone and its important inscription to be restored and reconstructed. Although the authenticity of the inscription was long disputed, it is no longer in doubt. The form of the letters is consistent with other inscriptions of the 9th cent. B.C. and could not have been known when the stone was discovered. Certain linguistic peculiarities have since found parallels in other epigraphic discoveries.

II. Linguistic Characteristics.–The inscription is the primary evidence for the Moabite language, a Canaanite dialect in the group of Northwest Semitic languages. It is closely related to Hebrew in grammar and vocabulary but has affinities with Ugaritic (the infixed *-t* verbal form, which is found sporadically in Hebrew), Phoenician (the nominal feminine singular ending *-t*), and Aramaic (orthography and the nominal masculine plural ending *-n*). The similarity between the language of the inscription and Hebrew is best seen in the following characteristics: use of the *waw* consecutive; the relative *'šr*; the infinitive absolute in connection with the finite verb; *'t* as the sign of the direct object; and such vocabulary and forms as *hwšy'*, *yrš*, *grš*, *hrg*, *hḥrym*, *lpny*, *bqrb*, *w''š*. The syntax closely resembles that of Hebrew.

III. Stylistic Characteristics.– Mesha's inscription is comparable to numerous monumental inscriptions set up by ancient Near Eastern kings. It is essentially a victory stele celebrating Mesha's victory over Israel and the dynasty of Omri and acknowledging the help of the Moabite national deity Chemosh, who figures significantly in the text. The inscription also catalogs various building activities of Mesha, some of which resulted from his military accomplishments. The first twenty lines deal primarily with military matters and the last thirteen or fourteen with construction, although the subject matter sometimes overlaps. Despite a basic consistency in the language of the inscription, two distinct styles of writing are discernible in the two sections (see F. I. Andersen for details). The style of the war section resembles classical Hebrew narrative prose; that of the building section is similar to various Phoenician and Aramaic monumental inscriptions.

MOABITE STONE

The Moabite Stone (Oriental Institute, University of Chicago)

If, as Andersen has suggested, the inscription is "a mixture of conventional models" (p. 119), a mixed style may characterize other royal inscriptions.

IV. Historical Significance.–The inscription is of primary importance as extrabiblical testimony to the relationship between Israel and Moab in the 9th century. It is a valuable supplement to the account of Mesha's revolt against Israel in 2 K. 3:4-27 but also apparently conflicts with the biblical data. The chief issue is the meaning of the chronological data in lines 7-9 and the identification of the king of Israel against whom Mesha rebelled. The inscription says that Israel conquered and maintained control of the land of Medeba during Omri's reign and half of his son's, i.e., forty years. Mesha's revolt would therefore have occurred during the latter part of Ahab's reign, presumably while Ahab, who was fighting the Arameans and involved in the coalition against Shalmaneser III of Assyria, could not have put it down.

This interpretation, accepted by the majority of scholars, may well be correct. It is faced with two problems, however: (1) the "forty years," if taken literally, would extend considerably beyond Ahab's death; and (2) the account of 2 Kings twice states explicitly that Mesha rebelled after the death of Ahab (1:1; 3:5). The usual answers are that "forty years" is only a round number referring to a generation or two, and that the biblical report is somewhat inaccurate. These assumptions are questionable and do not remove the difficulty in correlating this interpretation with Mesha's implication that he triumphed completely over the house of Omri. That suggests a time for the revolt — as well as the inscription — toward the end of the Omride dynasty. It is possible, therefore, that Mesha revolted against Joram, the last of the house of Omri to sit on the throne of Israel. This view, which accords with the account in 2 Kings, necessitates understanding "his son" *bnh*) in line 8 as "his grandson," a solution that is not entirely satisfactory although *bēn* can mean grandchild or descendant as well as son. Still another possibility is that the revolt took place after the end of the Omride dynasty, i.e., against Jehu, but neither the inscription nor the biblical text suggests that.

The question when the revolt began remains, therefore, unresolved. It may have started shortly before Ahab's death but reached its full force only during the reign of Joram. In any event, the inscriptional and biblical accounts combine to give a fairly detailed picture of the ensuing conflict between Israel and Moab during the 9th century.

Under Omri Israel had conquered Moab and established citizens and garrisons in various Moabite cities, particularly in the northern plateau country. The inscription alludes to certain building operations by the king of Israel during this period. When Mesha revolted, he moved north from his capital in Dibon to capture the four main districts of the northern plateau: the land of Medeba (lines 8f.), the land of Ataroth (lines 10f.), Nebo (lines 14-18), and Yahaṣ (lines 18-21) — possibly in that order. The time span of these military operations is unknown. They may have been individual campaigns over a long time that are summarized in order on the stele. But more likely that they were particular engagements of a single, well-devised campaign.

Mesha also described his extensive construction of new towns and rebuilding of others previously destroyed. He apparently used Israelite captives in these endeavors (lines 25f.).

The broken conclusion to the inscription tells of a campaign against Ḥauronen (or Horonaim). The exact location of this city is uncertain, but it was in the southern part of Moab, where Joram of Israel in alliance with the kings of Judah and Edom sought to put down Mesha's revolt (2 K. 3:4-27). Apparently to avoid confronting Mesha's fortified cities in the north, Joram took a circuitous route to the south through Judah and Edom. Although the coalition armies initially captured a number of southern cities, their siege of Kir-hareseth failed and they were forced to withdraw, leaving Moab under Mesha's control.

V. Religious Significance.–The worship of Chemosh in Moab as reflected in the inscription resembles in several ways the worship of Yahweh in Israel. The roles of the deities in military activities are especially comparable. Like Yahweh, Chemosh was regarded as the source of victory or defeat. The Israelite conquest of Moab was attributed to the anger of Chemosh at his land (lines 5f.). Chemosh, however, also saved Mesha or Moab (line 4) and gave victory to the king.

Chemosh directed the military activities of Moab. His responses to the important pre-battle inquiry of the deity ("Then Chemosh said to me, 'Go, seize Nebo from Israel'" [line 14]; "[And] Chemosh said to me, 'Go down, fight against Ḥauronen'" [line 32]) resemble the oracular divine responses prior to battle in the OT (e.g., Jgs. 10:23, 28; 1 S. 23:2, 4). The expression in line 19, "But Chemosh drove him out [*wygršh*] before me," is used in the OT for Yahweh's expulsion of the people of Canaan before Israel in the Conquest (Ex. 23:29f.; Dt. 33:27; Josh. 24:18).

The most significant characteristic from a religious point of view is the mention in line 17 of the *ḥērem* or ban as an element of war. This is the only clearly attested example outside the OT; it reveals the similarity between the sacral war practices of Israel and those of Moab. The *ḥērem* was

a strongly religious activity involving a vow or promise to give the spoils of war to the deity who had commanded the attack (line 14) and insured victory. The phrase "for I had devoted them to destruction [*hḥrmth*] to 'Ashtar-Chemosh" indicates that the *ḥērem* had been vowed to Chemosh prior to battle. The following sentence, "I took from there the [. . .] of Yahweh and dragged them before Chemosh," has an unfortunate break; the missing word would give further insight into the practice of *ḥērem*. The most plausible reconstruction for this word is "vessels" (*kly*), which allows a comparison with the Israelites' taking of silver, gold, and vessels (*kᵉlê*) of bronze and iron from Jericho for the treasury of Yahweh (Josh. 6:19). Lines 11f. may contribute further to the understanding of *ḥērem*; they appear to say that Mesha killed all the people of Ataroth as satiation (*ryt*) for Chemosh and for Moab. This episode may be likened to the apocalyptic war scene of Isa. 34:5-7 which describes the bloodthirstiness of the sword of Yahweh.

Finally, the inscription contains the oldest extant extrabiblical occurrence of Yahweh as the name of the God of Israel. It also suggests that shrine or cultic implements involved in the worship of Yahweh were in the town of Nebo while it was under Israelite control (lines 17f.); perhaps the presence of a Yahweh sanctuary is indicated.

Liver, *PEQ*, 99 (1967), 14-31; J. M. Miller, *PEQ*, 106 (1974), 9-18; S. Segert, *Archiv Orientální*, 29 (1961), 197-267; A. H. van Zyl, *The Moabites* (1960). P. D. MILLER, JR.

MOABITESS mō-ə-bī'təs [Heb. *mô'ᵃḇîyâ*]; NEB also MOABITE WOMAN (2 Ch. 24:26). A woman from MOAB. The term is applied to Ruth (1:22; 2:2, 21; 4:5, 10) and to Shimrith, whose son was one of the conspirators who murdered King Joash (2 Ch. 24:26). Some of Solomon's wives also came from Moab (1 K. 11:1).

MOADIAH mō-ə-dī'ə [Heb. *mô'aḏyâ*—'Yahweh shakes' or 'Yahweh promises']. A priestly family in the time of Joiakim (Neh. 12:17). *See* MAADIAH.

MOAT [Heb. *ḥārûṣ*] (Dnl. 9:25); AV WALL; NEB CONDUITS. The Hebrew term, a hapax legomenon, is based on the verb *ḥāraṣ*, "cut," and thus probably refers to a protective trench surrounding the walls of the restored Jerusalem. Cf *ḥrṣ* in the early (8th cent. B.C.) Aramaic inscription of Zakkur (formerly called Zakir). Here the context is one of a siege against Zakkur's city Ḥatarikka; Zakkur's enemies built a higher wall and deeper moat (*ḥrṣ*) than those of Ḥatarikka (for the text, translation, and discussion see *KAI*, I, 37 [Text 202 A]; II, 204-209; cf. *ANET*, pp. 655f.). The cognate *ḥārîṣ* also occurs in postbiblical Hebrew (e.g., T.B. *Shabbath* 22a) with the meaning "furrow, trench," as well as in postbiblical Aramaic, where *ḥᵃrîṣâ* can denote a channel or trench (Tg. to Job 38:25). G. A. L.

MOCHMUR mok'mər [Gk. *Mochmour*] (Jth. 7:18). A wadi (seasonal brook) near Acraba where a contingent of Edomites, Ammonites, and Assyrians attempted to surround the Israelites, cutting off their water supply (vv. 7:16-19). The town of Chusi (Quza) was located on the banks of the wadi, and Acraba was nearby. Acraba has been tentatively identified with 'Aqrabeh, 12.8 km. (7.7 mi.) SE of Nablus and 8.8 km. (5.5 mi.) E of Quza, and Mochmus with Wâdī Maḥfuriyeh S of Acraba. Another suggested site is Wâdī Aḥmar, but it is farther east and does not support the identification of Chusi with Quza.

W. S. L. S.

MOCK [Heb. hiphil of *tālal* (Jgs. 16:10, 13, 15), *hāṯal* (1 K. 18:27), piel of *ḥārap* (2 K. 19:4, 16, 22f. par. Isa. 37:4, 17, 23f.; Ps. 89:51 [MT 52]), *lîṣ* (Prov. 19:28; 20:1), hiphil part. of *lā'aḇ* (2 Ch. 36:16), *lā'ag* (2 Ch. 30:10; Job 9:23; 11:3; 21:3; Ps. 22:7 [MT 8]; 79:4; Prov. 1:26; 17:5; 30:17; Jer. 20:7), *lā'ēg* (Ps. 35:16), hithpael of *qālas* (Ezk. 22:5), *qallāsâ* (Ezk. 22:4), *śāḥaq* (Lam. 1:7), pilpel part. of *tā'a'* (Gen. 27:12); Gk. *diachleuázō* (Acts 2:13), *chleuázō* (17:32), *empaigmós* (He. 11:36), *empaízō* (Mt. 20:19; 27:29, 31, 41; Mk. 10:34; 15:20, 31; Lk. 14:29; 18:32; 22:63; 23:11, 36), *myktērízō* (Gal. 6:7)]; AV also REPROACH, SCORN, LAUGH, LAUGH TO SCORN; NEB also TAUNT, DERIDE, RIDICULE, JEER, etc.; **MOCKER** [Heb. *hᵃṯulîm* (Job 17:2), qal part. of *lîṣ* (Hos. 7:5)]; AV also SCORNER; NEB MEN TAUNT, ARROGANT MEN.

The Hebrew words translated "mock" have a wide variety of meanings: reproach, scorn, scoff, deceive, jest, and laugh. Sennacherib king of Assyria high-handedly taunted the living God (2 K. 19:4, 16, 22f. par. Isa. 37:4, 11, 23f.; cf. 2 K. 18:33-35). The Israelites mocked Hezekiah's messengers, who urged repentance and the keeping of Passover (2 Ch. 30:1-10). This mocking of God's messengers persisted and brought God's judgment (36:16f.). In his role as a prophet of doom Jeremiah was also mocked (Jer. 20:7; cf. 2 K. 2:23f., where Elisha is also mocked). The righteous sufferer is often mocked by enemies surrounding him (Ps. 22:7; 35:16; 89:51; cf. Job 17:2; 21:3), a circumstance that influenced the martyr piety of Judaism (see *TDNT*, V, 633).

But the situation can be reversed. Thus with biting sarcasm Elijah mocked the prophets of Baal on Mt. Carmel (1 K. 18:27; cf. God's scorn for impious rulers, Ps. 2:4).

Mocking could also refer to the playful deception of lovers. Delilah complained that Samson mocked her by withholding the secret of his strength (Jgs. 16:10, 13, 15).

Proverbs warns against (1) mocking the poor and rejoicing over calamities (17:5), (2) making a mockery of justice (19:28), and (3) scorning obedience to parents (30:17). Drunkenness, too, is associated with mockery (Prov. 20:1; Hos. 7:5). God also warns that when the people are disobedient, He will subject them to the mockery of neighbors (Ps. 79:4; Lam. 1:7; Ezk. 22:4f.; Prov. 1:26).

In the NT *chleuázō* and the related *diachleuázō* each occur twice. They are related to *chleúē*, which means joke or jest, and suggest a flippant kind of mockery. At Pentecost the disciples were mockingly accused of being filled with new wine (Acts 2:13). At the Areopagus Paul spoke of the resurrection of the dead, and some (presumably the Epicureans) mocked (Acts 17:32). In the parable of the tower builder, Jesus said that a wise man counts the cost to see if he has enough to complete the project. Otherwise, he is subject to ridicule (*empaízō*) for laying an incomplete foundation that serves as a monument to failure (Lk. 14:29).

Like the OT prophets and righteous sufferers, Jesus was severely mocked, especially during the Passion. He had predicted that He would be mocked by the Gentiles (Mt. 20:19 par. Mk. 10:34; Lk. 18:32). According to Luke, those who had arrested Jesus mocked Him and buffeted Him about (Lk. 22:63). Luke also reported that Jesus' silence provoked the frustrated Herod and his soldiers to treat Him with contempt and to mock Him. They arrayed Him in "gorgeous apparel" and transferred Him back to Pilate (Lk. 23:11). Possibly the fine clothing was the white

The *Mocking of Christ*, a fresco by Giotto di Bondone (ca. A.D. 1305) in the Arena Chapel, Padua, Italy (Museo Civico, Padua)

toga candida worn by the candidate for office; if so, the soldiers were mocking Jesus' claim to royalty (cf. Acts 12:21). Or, since Luke used that phrase in Acts 10:30 to describe the appearance of an angel (cf. Rev. 15:6; 19:8), "gorgeous apparel" perhaps mocked His claim to be God's messenger.

After the sentence of death, Matthew and Mark report that the Roman soldiers mocked Jesus for His messianic claims (Mt. 27:27-31 par. Mk. 15:16-20). They gave Him a red cloak, which footsoldiers wore (Mt. 27:28; Mk. 15:17 has a purple cloak, suggesting the emperor's cloak; see comms.), a plaited crown of thorns, and a reed as a mock sceptre (Mt. 27:23), and then saluted and knelt in feigned homage. The crown of thorns was not expressly said to be a form of torture; it may have been simply a mock radiate crown. The greeting, "Hail, King of the Jews," was a parody of *Ave Caesar, victor, imperator.* This perverted humor was combined with violence.

Finally, Jesus was taunted by the chief priests, scribes, elders (Mt. 27:41 par. Mk. 15:31), and soldiers (Lk. 23:36) at His crucifixion. All the mocking scenes in the passion narratives make sport of the claims of Jesus: that He was a prophet (Lk. 22:63f.), that He was king of the Jews (Mk. 15:18), and that He could save others (Mt. 27:42 par. Mk. 15:31). The mocking of Jesus also accords well with the martyr theology of Judaism; righteous martyrs had to expect mockery (He. 11:36).

The word *myktērizō* occurs in Gal. 6:7: "God is not mocked." Literally it means "to turn up the nose at" and hence to treat with contempt. The context does not suggest blatant ridicule of God, but an attempt to outwit Him by evading the responsibilities of His laws and reaping a harvest different from what was sown (E. D. Burton, comm. on Galatians [*ICC*, 1920], pp. 340f.; cf. H. D. Betz, *Galatians* [*Hermeneia*, 1979], pp. 306f.).

MODAD, BOOK OF ELDAD AND. *See* ELDAD AND MEDAD, BOOK OF.

MODEIN mō'din, mō'dēn [Gk. *Mōdeein, Mōdein, Mōdeeim*, etc.; Talm. *môḏî'îm* and *môḏî'îṯ* are reflected in the caption of the Madeba Map, *Mōdeeim hē nyn Mōditha*, "Modein which is now Moditha" (Avi-Yonah, no. 58)]; AV, NEB, MODIN. A town on the plain near Lod (Lydda); the ancestral home and burial place of the Maccabee family.

Mattathias, a priest of the sons of Joarib, had sought seclusion at Modein from the campaign of blasphemy and defilement instigated by Antiochus IV Epiphanes. But when a Jew went forward to make a heathen sacrifice in response to a Seleucid officer who offered royal beneficence in order to seduce the people to idolatry, Mattathias became enraged. He slew on the altar both the offerer and the official. Thus began the Maccabean revolt (1 Macc. 2; Josephus *Ant.* xii.6.1-4 [263-286]; *BJ* i.1.3 [36f.]). Mattathias, his wife, and his sons were all buried in Modein (1 Macc. 2:70; 9:19; 13:25-30; *Ant.* xii.6.4 [285]; 11.2 [431f.]).

It was near Modein that Judas Maccabeus pitched his camp, in the face of a new Seleucid threat. He went forth by night under the slogan "To God be the victory" and by a surprise attack overwhelmed the army of Antiochus V Eupator (2 Macc. 13:14). Judah and John, the sons of Simon Maccabeus, rested at Modein before the battle in which they defeated Cendebeus (1 Macc. 16:4).

Over the tombs of his ancestors Simon Maccabeus erected a magnificent monument consisting of seven pyrmids standing on pillars and bearing the designs of all their weapons; it was capped by models of ships facing the sea (1 Macc. 13:29). Eusebius remarked that their tombs were still shown in his own day (*Onom.* 132.16).

The Talmud (T.B. *Pesahim* 36) gives the distance from Modein to Jerusalem as 15 Roman miles (about 22 km., 14 mi.). The modern site has been confidently located at el-Arba'în beside el-Midieh, where remains of ancient buildings and especially tombs carved in the rock are visible. About ½ km. (¼ mi.) W of el-Midieh is a special group of tombs formerly known as Qubûr el-Yehûd, the most important being that of Sheikh el-Gharbâwî. The monument erected by Simon may have been situated here.

A. F. RAINEY

MODERATELY. The AV translation of Heb. *liṣ^eḏāqâ* in Joel 2:23. The translation of this term has been in much dispute. Its literal meaning, "according to righteousness," has been interpreted in basically three ways: (1) "in just measure" (ASV; cf. AV "moderately"; NEB "in due measure"; BDB [p. 842] "for prosperity"); (2) "according to [God's covenant] righteousness," with the derived meaning, "for your vindication" (RSV); and finally (3) the whole expression *hammóreh liṣ^eḏāqâ* has been translated

"teacher for [or of] righteousness" (cf. NIV, NAB). According to some scholars (e.g., A. Dupont-Sommer, *Essene Writings from Qumran* [Eng. tr. 1961], p. 228 n. 1), this expression and the similar one in Hos. 10:12 were the basis for the title "Teacher of Righteousness" at Qumrân. H. Wolff (*Joel and Amos* [Eng. tr., *Hermeneia*, 1977], pp. 63f.), however, pointed out that no Qumrân texts relate these verses to that title. Cf. also L. Allen, *Books of Joel, Obadiah, Jonah, and Micah* [*NICOT*, 1976), pp. 92f. n. 26. On the theme of rain as a sign of God's covenant righteousness, cf. Lev. 26:3f.; Dt. 11:13-15. (See comms.; *see also* VINDICATE.) N. J. O. G. A. L.

MODERATION. The AV rendering of Gk. *epieikḗs* in Phil. 4:5. *See* FORBEAR.

MODESTY [Gk. *euschēmosýnē*] (1 Cor. 12:23); AV COMELINESS; NEB SEEMLINESS; [*sōphrosýnē*] (1 Tim. 2:15); AV SOBRIETY; NEB "with a sober mind"; **MODESTLY** [Gk. *aidṓs*] (1 Tim. 2:9); AV SHAMEFASTNESS.

The RSV's translation of *euschēmosýnē* as "modesty" in 1 Cor. 12:23 obscures its connection with words of the same group in that passage (*aschḗmona, euschḗmona*) and hides Paul's intended contrast. The unity of the body of believers is shown by Paul's statements that the "weaker" members are really indispensable, the "dishonorable" members are treated with special honor, and the "unpresentable" members (Gk. *aschḗmona*) are given a special quality of presentability (Gk. *euschḗmosýnē*). The "presentable" members (Gk. *euschḗmona*) do not require special treatment. The NEB attempts to retain this contrast: "To our unseemly parts is given a more than ordinary seemliness, whereas our seemly parts need no adorning." If the translation "modesty" is retained, then it must be remembered that it does not refer to a virtue but to the honor accorded the "unpresentable" members of the body.

The Gk. *sōphrosýnē* of 1 Tim. 2:15 gives quite a different meaning to "modesty." *Sōphrosýnē* and its cognates were among the most important in the vocabulary of Greek ethics. The term refers to a basic disposition that makes possible and demands certain modes of conduct. Its broadest meanings include rationality, prudence, temperance (cf. AV, NEB). It took on special narrower meanings when recommended for various roles. *Sōphrosýnē*, meaning restraint of sexual desire, i.e., chastity, was frequently recommended for women (e.g., Plutarch *Coniugalia praecepta*, 9f. [139c]).

In the NT *sōphrosýnē* and its cognates appear only infrequently; most occurrences are in the Pastoral Epistles. There seems to have been a gradual acceptance of the Greek ethical tradition in the early Christian tradition, culminating in the Pastorals (*see* GODLINESS, on Gk. *eusébeia*). One should not too summarily disparage this acceptance as accommodation. It provided a defense against dualistic misunderstandings of the faith and, as a consequence, against both ascetic and libertinistic misunderstandings of the Christian ethic. According to the Pastorals moderation and contentedness mark life in this world as a life in God's presence. In this context the *sōphrosýnē* required especially of women must find its referent. Thus in 1 Tim. 2:15 "modesty" means a disposition toward sexuality including both moderation and contentedness, excluding both asceticism and libertinism. Similarly, v. 9 (where *sōphrosýnē* also occurs but is translated "sensibly" by the RSV while *aidṓs* is translated "modestly," the two terms being virtually synonymous) demands that women show restraint and contentedness in all things, as is suitable to godliness (Gk. *theosébeia*). Cf. 2 Macc. 15:12, where *aidḗmōn* (RSV, NEB, "modest"; AV "reverend") occurs in a description of Onias the high priest.

Bibliography.–*TDNT*, I, *s.v.* αἰδώς (R. Bultmann); VII, *s.v.* σώφρων (U. Luck). A. D. VERHEY

MOETH mō'eth [Gk. *Mōeth*]. Son of Binnui (RSV; but cf. Gk. *Sabannos*; RSV mg., NEB, Sabannus); one of the Levites to whom the returned exiles handed over the temple treasures they had carried from Babylon (1 Esd. 8:63); probably the same as NOADIAH in Ezr. 8:33.

MOLADAH mō'lə-də [Heb. *môlāḏâ*, perhaps < *môleḏeṯ*– 'offspring,' 'parentage'; Gk. *Mōlada*]. A place in the Negeb, the southern desert of Palestine. According to Josh. 19:2 it belonged to the tribe of Simeon (cf. 1 Ch. 4:28). Josh. 15:26, however, assigns it to the territory of Judah in a list that reflects conditions under Joshua, when the tribe of Simeon no longer formed a separate entity. Neh. 11:26 mentions it in a list of places where "some of the people of Judah lived"; this does not mean that it was part of the postexilic province of Judah but rather that it was a place outside the province that Jews peacefully penetrated and settled in the 4th cent. B.C.

Moladah cannot be identified with any certainty. Scholars point to Malatha, where Agrippa in his penury retreated and considered suicide (Josephus *Ant.* xviii.6.2 [147-150]); it was later a fortress of the *limes* in southern Palestine, mentioned in Eusebius (*Onom* 14.3) and in the form Moleatha in the *Notitia Dignitatum* (74.45). Malatha may be confidently identified with present-day Tell el-Milḥ, 24 km. (15 mi.) E of Beer-sheba, called Malḥ^{a}tā on the Israeli topographical map. The objection that Malatha is described in the *Onomastikon* as "near Iattir," whereas Tell el-Milḥ lies nearly 16 km. (10 mi.) S of that village, is not valid. In that desolate region few places are in immediate proximity to each other, and moreover the same name (Malathis oppidum) is given to a civil settlement a few kilometers NE, only 11 km. (7 mi.) from Iattir (*Onom.* 15.2). Perhaps ancient Moladah should be identified with the latter settlement, present-day el-Quseife. It is clear, however, that the two names Moladah and Malatha are unrelated; thus the identification remains uncertain.

MOLDING [Heb. *zēr*–'circlet, border']; AV CROWN; NEB BAND. Evidently a decorative ridge made of gold, attached to and surrounding each of the following pieces of tabernacle furniture: the ark of the covenant (Ex. 25:11; 37:2), the table for the show bread (25:24f.; 37:11f.), and the incense altar (30:3f.; 37:26f.). For examples of moldings on an altar and on an incense stand, see *ANEP*, nos. 575, 583. C. G. RASMUSSEN

MOLE. This term appears in the RSV only in Isa. 2:20, where *laḥpōr pērōṯ* has for long been emended conjecturally to *ḥ^{a}parpārōṯ*, "moles, rats." Apparently these animals were worshiped in Egypt (see KoB, p. 322). In Lev. 11:30 *tinšemeṯ* was rendered "mole" by the AV but "chameleon" by the RSV. Precisely what was signified by the term *tinšemeṯ* is uncertain (*see* LIZARD), and the RSV rendering has no greater intrinsic probability of correctness than that of any other version. That the Vulg. used the word *talpa*, "mole," could imply that the animal was thought to have been a member of the genus *Talpa*, but this is purely coincidental since the Vulg. appears to have been translating the LXX *aspálax*, "mole," into Latin. In actu-

ality small insectivore *Talpidae* mammals have not been observed in Palestine.

The Isaiah emendation may indicate the activity of mole-rats (*Spalax typhlus*), which belong to the *Rodentia*. They are larger than moles, varying from about 13 to 23 cm. (5-9 in.) in length, and have adapted to an almost completely subterranean existence. Their teeth are similar to those of a rat or squirrel, and they are herbivorous rather than insectivorous. Though blind like moles, the mole-rats dig with their noses, whereas the true moles excavate their tunnels and nests by means of large incisor teeth and powerful, peculiarly shaped front feet. The activity of mole-rats is marked by little mounds of fresh soil pushed to the surface as the rodents search for roots and other edible material. For "mole-rat" in Lev. 11:29, NEB *see* WEASEL. R. K. H.

MOLECH mō'lek [Heb. *mōleḳ* (Lev. 18:21; 20:2-5; 1 K. 11:7; 2 K. 23:10; Jer. 32:35), *meleḳ* (Isa. 57:9)]; AV also "king" (Isa. 57:9); NEB also "tresses" (Isa. 57:9); **MILCOM** mil'kom [Heb. *milkōm* (1 K. 11:5, 33; 2 K. 23:13), *malkām* (Jer. 49:1, 3; Zeph. 1:5)]; AV MALCHAM (Zeph. 1:5), "their king" (Jer. 49:1, 3); **MOLOCH** mō'lok [Gk. *Moloch*] (Acts 7:43).

All OT references allude to an individual deity identified in specific instances with the Ammonite god Molech (cf. 1 K. 11:7), for whom Solomon built a shrine in Jerusalem. Elsewhere the Ammonite national deity was known as Milcom (1 K. 11:33), but it is incorrect to identify them uniformly since they were worshiped individually (cf. 1 K. 11:5, 33; 2 K. 23:13). Some scholars have thought that Molech was a combination of the consonants for "king" (*m-l-k*) and the vowels of the word "shame" (*ō-e*), since the title of king not infrequently forms part of the names of deities in Phoenician and Hebrew. *See also* ASHTORETH.

This association of kings and gods was not unusual in the Near East, because the king was regarded as the earthly representative of the national deity. He was also accorded certain quasidivine attributes by virtue of having supposedly been nursed in infancy by a goddess (cf. C. H. Gordon, *Ugaritic Literature* [1949], p. 122; T. H. Gaster, *Thespis* [1950], p. 179). Such a situation would account in part for the usage whereby a pagan god was called "king." (Cf. Jer. 49:1, 3, where the RSV reads "Milcom," and Am. 5:26, where the RSV has "their king," but AV Moloch.) The LXX rendering of "ruler" (*árchonti*, e.g., Lev. 18:21) or "king" (*basileús*, e.g., 1 K. 11:5) in some instances may also reflect this understanding. It should be noted that the designation also occurs in lists of names from Mari (*ca.* 1800 B.C.) in the forms *malik* and *muluk*, probably the Adrammelech and Anammelech of 2 K. 17:31.

Supporting the concept of Molech as a deity is the occurrence of Milkom with Baal in a list of gods recovered from Ugarit (C. H. Gordon, *Ugaritic Literature*, p. 108; *UT*, p. 434). J. Gray (*IDB*, III, 422) argued from the Mesha inscription, where the Moabite deity was described as Athtar ('Ashtar)-Chemosh, that Chemosh, regarded by Jephthah (Jgs. 11:26) as Moab's national god, was in fact an astral deity Athtar, with Chemosh and Milcom constituting local titles. Alternatively, the reference in the Moabite Stone might well represent the fusion of two gods, following such notable combinations as Amon-Re of Egypt, or Kothar-and-Hasis from Ugarit.

There is also the possibility that Molech may not allude to a deity at all, but instead may designate some type of sacrifice, perhaps votive in nature. O. Eissfeldt and others have pointed to Punic inscriptions (Phoenician-Carthaginian) from *ca.* 400-150 B.C. in which the term *mlk* occurs alone or in the compound expressions *mlk'mr* and *mlk'dm*. Their argument that *mlk* may mean "votive offering" is based on Latin inscriptions from Carthage dated *ca.* A.D. 200 in which the Punic *mlk'mr* was vocalized as *malchomor*.

An even earlier inscription containing *mlk'mr* was found by Dussaud on a stele from Malta dated between the 7th and 6th cents. B.C. (R. Dussaud, *Comptes-rendus de l'Académie des Inscriptions et Belles-Lettres*, I [1946], 376f.). No Phoenician inscription employing *mlk* in a sacrificial context has yet been recovered, but traditions ascribed to Sanchuniathon stated that the Phoenicians sacrificed children. *Mlk* occurs in Ugaritic texts, and has been interpreted by Gordon as a kind of sacrifice (C. H. Gordon, *Ugaritic Handbook*, [1947], p. 246, no. 1183; but cf. *UT*, pp. 433f., no. 1484, where Gordon did not cite any instances of *mlk* as a sacrifice — rather it is the divine name). A text discovered in 1956 contained the plural form *mlkm*, which was associated with cultic activities, but the nature of these activities is uncertain.

In speaking of Molech the OT clearly referred to a specific deity (cf. Am. 5:26 AV; quoted in Acts 7:43) whose cult flourished among the Ammonites (1 K. 11:7, 33). His regnal position may well be indicated by the appellative form in the MT of Lev. 18:21; 20:2-5; 2 K. 23:10; Jer. 32:35. In the last of these references Baal also appears with the definite article as an appellative, and is associated with the fire rituals in the valley of the son of Hinnom. Molech-worship was prohibited to the Israelites, partly because it was pagan but also because its abhorrent rites involved offering children to Molech (cf. Lev. 18:21; 20:2-5). Scholars have frequently inferred that instances of child sacrifice mentioned in the OT (cf. 2 K. 17:17; 21:6; Ps. 106:38; Ezk. 16:21; etc.) involved Molech-worship. Ahaz offered his children by fire (2 Ch. 28:3), and this example was followed by Manasseh (2 K. 21:6). Although Josiah destroyed the shrines of Molech in Judah (2 K. 23:10, 13), the memory of this detestable ritual was still alive in the 6th cent. B.C. (cf. Ezk. 16:20f.; 20:26, 31; 23:37).

Precisely how Molech-worship was conducted is uncertain. It is usually assumed that children were thrown into a furnace or fire as part of a ceremony, though whether they were killed or made insensitive is unknown. Among the Canaanites, Baal Melkart was offered human sacrifice at Tyre, a tradition that was also evident in Judah during the 7th cent. B.C. (cf. Jer. 19:5). The name Topheth most probably comes from a root meaning "fireplace, incinerator," and Jer. 7:31 makes it clear that Molech cult-worship involved the cremation of human victims rather than the presentation and subsequent withdrawal of live child offerings.

A divergent view suggesting that children were dedicated to Molech prostitution instead of being sacrificed by fire was based on the inclusion of a reference to the Molech cult (Lev. 18:21) in a section that otherwise dealt with sexual morality (cf. Snaith; cf. also Jub. 30:10). This opinion has the disadvantage of presupposing a late date for the Leviticus material, while at the same time introducing the concept of cultic prostitution, which was entirely foreign to Israelite life at the period when the Levitical material was promulgated by Moses. Furthermore, the antiquity and pervasiveness of Molech-worship was already well known long before the Mosaic period, and there is nothing inherently impossible about Moses being familiar with Ammonite cultic depravity.

The rabbinic writers described a bronze statue, human in form but with an ox's head, hollow within and heated from below. Children were placed inside this structure and immolated while drums drowned out their cries. Cf. also Diodorus xx.14 for a similar description.

MOLI mō'lī (1 Esd. 8:47, AV). *See* MAHLI 1.

MOLID mō'lid [Heb. *môlîḏ*]. A descendant of Judah; son of Abishur and Abihail (1 Ch. 2:29).

MOLLIFY. Used by the AV in Isa. 1:6 (RSV "soften"); Wisd. 16:12 (RSV "poultice" for AV "mollifying plaister") for "soften" in the literal sense.

MOLOCH mō'lok [Heb. *malkᵉḵem*–'your king'; cf. LXX *Moloch*] (Am. 5:26, AV); [Gk. *Moloch*] (Acts 7:43). A variant form of MOLECH, thought by some to be an Ammonite or Canaanite deity, although O. Eissfeldt suggested that Heb. *mōleḵ* was a sacrificial term for the royal (cf. *mlk*) sacrifice (*Molk als Opferbegriff im Punischen und Hebräischen und das Ende des Gottes Moloch* [1935]; cf. W. F. Albright, *Yahweh and the Gods of Canaan* [1968], pp. 236-242). In Am. 5:26 the RSV and NEB follow the MT for the most part, but the AV follows the LXX. On this difficult text see H. W. Wolff, *Joel and Amos* (Eng. tr., *Hermeneia*, 1977), pp. 260, 265-68; S. R. Driver, *Joel and Amos* (*CBSC*, 2nd ed. 1915), pp. 192f.

The passage in Acts is also problematic. Here Stephen quotes from the LXX of Am. 5:26f., and as E. Haenchen pointed out, it is difficult to believe that Stephen would have tried "to persuade the High Council with a LXX text which diverges widely from the Hebrew" (*Acts of the Apostles* [Eng. tr. 1971], p. 289). Thus he concluded that this was a Lukan addition to Stephen's speech. Although I. H. Marshall agreed that Luke's hand may be seen here, he also noted that Stephen's point could have been made equally well from either the LXX or the MT (*Acts of the Apostles* [*Tyndale*, 1980], p. 145; cf. F. F. Bruce, *Acts of the Apostles* [*NICNT*, 1954], pp. 153-56). G. A. L.

MOLTEN IMAGE. *See* IDOL.

MOLTEN SEA. *See* SEA, MOLTEN.

MOMDIS mom'dis (1 Esd. 9:34, AV, NEB). *See* MAADAI.

MOMENT [Heb. *regaʿ*] (Ex. 33:5; Nu. 16:21, 45; Job 7:18; Isa. 27:3; etc.); AV also SPACE (Ezr. 9:8), SUDDENLY (Ps. 6:10 [MT 11]); NEB also INSTANT, SUDDEN, etc.; [hiphil of *rāgaʿ*] (Prov. 12:19); [piel of *bālaʿ*] (Nu. 4:20); AV "covered"; NEB "passing"; [*peṭaʿ*] (Prov. 6:15); AV, NEB, SUDDENLY; [*mᵉʿaṭ*] (Ruth 2:7); AV "a little"; [*paʿam*] (Isa. 66:8); AV "at once"; [Gk. *hōra*] (Mt. 8:13; Gal. 2:5); AV HOUR; [*apó tóte*] (Mt. 26:16); AV TIME; [*stigmḗ*] (Lk. 4:5); NEB "in a flash"; [*exautḗs*] (Acts 11:11); AV IMMEDIATELY; [*átomos*] (1 Cor. 15:52); NEB "in a flash"; [*páreimi*] (He. 12:11); AV PRESENT; NEB TIME; **MOMENTARY** [Gk. *parautíka*] (2 Cor. 4:17); NEB SHORT-LIVED.

In Ps. 30:5 (MT 6), a difficult passage, the NEB has "in his anger is disquiet, in his favour there is life" for RSV "for his anger is but for a moment, and his favor is for a lifetime." Since the Hebrew verb *rāgaʿ* can mean "stir, disturb" in some OT passages (cf. BDB, pp. 920f.), the NEB reading has much to commend it (for a similar approach cf. M. Dahood, *Psalms I* [*AB*, 1965], 182f.). Comparable considerations led the NEB to translate Jer. 4:20b as "my tents are thrown down, their coverings torn to shreds" rather than the RSV's "suddenly my tents are destroyed, my curtains in a moment." Here, however, the NEB reading is hardly correct, since it entirely omits *piṯ'ôm*, "suddenly," in the first clause, which parallels *regaʿ* in the second clause.

An examination of the above sampling of passages in their contexts will reveal that stress on the moment often signalizes the momentous in the Bible. In such cases point in time rather than duration of time is emphasized (cf. esp. D. Daube, *The Sudden in the Scriptures* [1964]). *See* TIME. R. F. YOUNGBLOOD

MONEY. A "medium of exchange," a commonly recognized item of value that usually can be stored and transported more easily than items for which it is exchanged. In ancient times there was no money in the common modern sense of objects used only for this purpose, i.e., coins and paper money (see I.C. below).

Since silver came to be the most common medium of exchange in early OT times, "money" in the RSV usually represents the word for silver in Hebrew (*kesep*) or Greek (*argýrion*). These became the usual terms for money in those languages.

Of the four exceptions in the OT, three involve the RSV's use of "piece of money" (Gen. 33:19; Josh. 24:32; Job 42:11) to translate Heb. *qᵉśîṭâ* which actually represents a unit of weight (amount unknown). In Lev. 25:52 "money" is supplied by the translators to clarify the meaning of this use of *gᵉ'ullâ* the Hebrew word for redemption."

In the NT "money" twice represents Gk. *chalkós*, lit. "copper, bronze" (Mk. 6:8; 12:41), and three times *chrēma*, "wealth, means" (sing. as a definite amount in Acts 4:37; pl. in 8:18, 20; 24:26). In Mt. 22:19 "money" represents Gk. *nómisma* (cf. Eng. "numismatic"), a term for money that is put into use legally (cf. "legal tender") and is therefore an acceptable coin. In 27:6 Gk. *argýria* is translated in its original sense, "(pieces of) silver," and "blood money" represents Gk. *timḗ haímatos*, "price [or reward] of blood." For the expression "love(r) of money" (Lk. 16:14; 1 Tim. 3:3; 6:10; 2 Tim. 3:2; He. 13:15), *see* MONEY, LOVE OF. For Gk. *glōssókomon* in Jn. 12:6; 13:29, *see* MONEY BOX.

I. Before Coinage.–A. Bartering and Payment in Kind. Money was developed as a suitable and convenient medium of exchange to supplement the system of barter and to facilitate commercial transactions. It was not intended to replace barter, which is still evident in modern times in the exchange of skills and commodities. In OT times wealth was determined by possessions, particularly cattle but also rare metals, e.g., gold and silver. Gen. 13:2 describes Abraham as "very rich in cattle, in silver, and

gold"; he was therefore quite able to pay what seems to have been an exorbitant price for the cave of Machpelah as a burial place for his wife Sarah (23:16).

In the ancient nomadic or seminomadic societies wealth was determined predominantly by the number of cattle that a person possessed, and as a result the animals themselves became a readily acceptable medium of exchange. The degree to which cattle were recognized as the normal standard for evaluating wealth is reflected in the Latin term for money, *pecunia*, which is derived from *pecus*, "cattle." In the ancient Near East dues were frequently paid in cattle, and the priests readily bartered surplus animals for things needed to maintain the temple, its sacrificial system, and its personnel.

Perishable goods, especially food, were less acceptable as a medium of exchange than animals or weighed amounts of gold or silver, although timber, wine, and honey were used frequently instead of money in commercial dealings (1 S. 8:15; 2 K. 3:4; Ezk. 45:13-16). Taxes, tribute, and debts were paid in any acceptable form of exchange, as illustrated by the international transaction between Solomon and Hiram king of Tyre (1 K. 5:11), in which Solomon exchanged wheat and olive oil for the Tyrian king's assistance in constructing the Jerusalem temple. Jars of wine and olive oil were frequently substituted for gold or silver when citizens paid their taxes to the state in the 8th cent. B.C. This practice was verified archeologically in 1910, when the Harvard University expedition to Samaria uncovered sixty-three inscribed potsherds in ruins lying just W of the royal palace. One potsherd records the name of the treasury official who had received the wine as well as the names of the peasants who had paid their taxes in this manner. The clarified wine and refined oil shipped to Samaria typified the demands of the luxury-loving royal court and provoked a characteristic reaction from Amos (Am. 6:6). Mesha king of Moab paid his annual tribute to Ahab king of Israel in commodities — 100,000 lambs and the wool of the same number of rams (2 K. 3:4)

B. Silver and Gold as Money. The most common precious metal available in the ancient Near East was silver; it is the metal most frequently mentioned in Scripture as used in exchanges by weight (Heb. *šeqel*, "shekel"). Later it became the preferred metal for coins. When Abraham purchased the field and cave of Machpelah (Gen. 23:13-16), Ephron the Hittite apparently would accept only pieces of silver as payment. As was customary, Abraham's four hundred shekels of silver were weighed out before witnesses according to the weights current among the merchants (cf. Jer. 32:9f.). Since Abraham's transaction took place early in the 2nd millennium B.C., the term "shekel" would have represented a weighed amount of silver (perhaps 11.5 gm.; 0.4 oz.), and not a coin. Joseph's brothers sold him as a slave to the merchants for twenty shekels of silver (Gen. 37:28). So frequently was silver used as a medium of exchange in antiquity that the word itself was not mentioned in transactions but simply understood from the context. Solomon, for example, purchased chariots and horses for 600 and 150 (shekels) respectively (1 K. 10:29). Smaller amounts were the BEKA (Heb. *beqaʿ*), half a shekel (Ex. 38:26, cf. 30:13, 15; Gen. 24:22); the PIM (Heb. *pîm*, 1 S. 13:21) perhaps two-thirds of a shekel; and the GERAH (Heb. *gērâ*), one twentieth of a shekel (Ex. 30:13; Lev. 27:25; Nu. 3:47; 18:16; Ezk. 45:12). Gen. 33:19; Josh. 24:32; and Job 42:11 mention a different unit of weight for metal — the *qᵉšîṭâ*, which may have represented a value approximating that of a lamb. Its worth is uncertain, however, since the value of a lamb could vary also.

The talent, a basic weight of gold or silver, was the largest measure in use before the introduction of coins. Even after that development, money continued to be weighed out on occasions. Thus John Hyrcanus sent three thousand talents of silver to Antiochus VIII Sidetes in 133 B.C. as a ransom for the city of Jerusalem. The talents were part of a nine-hundred-year-old hoard from the sepulcher of King David. The treasure that the Romans took from the temple in A.D. 66 amounted to seventeen talents.

Business dealings, general trade, and the payment of tribute required the transportation of vast quantities of gold and silver. 2 K. 5:5 records that *ca.* 895 B.C. Naaman's servant departed for Israel to give Elisha ten talents of silver, which would have weighed well over six hundred pounds, and six thousand shekels of gold, about two hundred pounds. Although biblical weights are neither precise nor uniform and thus the load could have been considerably heavier, it is noteworthy that the two talents stolen by a servant (vv. 23-27) required two servants to carry them.

Metals used as a medium of exchange increasingly were formed into standardized shapes. Egyptian bas-reliefs show piles or bundles of silver. According to Gen. 42:35 the sons of Jacob tied their silver in bundles when traveling to Egypt to purchase grain; Dt. 14:25 also implies the use of strips of silver bundled together. By *ca.* 1500 B.C. metal bars, ingot, tongues, and animal heads, in addition to flat discs and then rings made of gold, were used for commercial transactions.

Metal jewelry has always been a popular medium of exchange. Gold chains, bracelets, signet rings, and earrings (Nu. 31:50) were listed among the booty captured by the Israelites in their war against Midian. Although there is no direct evidence for this supposition, it is possible that by Moses' time bracelets and rings were made in a fairly standardized weight and used as currency. It is noteworthy, however, that the gifts sent to Rebekah by her fiancé Isaac were recorded in terms of weight: "a gold ring weighing half a shekel, and two bracelets for her arms weighing ten gold shekels" (Gen. 24:22). The value of gold at that time has been estimated as thirteen to sixteen times that of silver. Thus Rebekah's engagement gifts represented a sum far in excess of the twenty pieces of silver paid *ca.* 1700 B.C. by the merchants for Joseph.

To define ancient monetary values in terms of modern currency tends to be meaningless, and therefore it is more appropriate to relate values to purchasing power. While the cost of sacrificial animals is not stated, fifty shekels would buy four bushels of barley (Lev. 27:16). In the middle of the 9th cent. B.C. one shekel purchased one-fifth of a bushel of fine flour or two-fifths of a bushel of barley at the end of a siege (2 K. 7:16; *see* WEIGHTS AND MEASURES). Comparative values for types of food and animals would probably have remained constant, despite the fluctuations of the economy and the effects of climate.

C. Anachronistic Terms for Money. Since coins apparently were not known in Palestine before the Exile, biblical references to money in the preexilic period are to the weight of metal. Occasionally an author writing about an earlier event used a monetary term familiar to his readers rather than the word for the money of the earlier period. This procedure may explain the term "daric" in 1 Ch. 29:7.

Later translators used English terms like "farthing" (AV Mt. 5:26; 10:29 par. Lk. 12:6; Mk. 12:42) to familiarize readers with the minuscule value of the widow's mite. Similarly, "penny" was used for the Roman denarius (e.g. AV Mt. 20:2, 9f., 13), and as a result the English abbreviation for penny became *d*, which remained in use until the introduction of decimal coinage in the early 1970's.

II. Quality and Weight Standards.–Although goods or

pieces of metal used as a medium of exchange could all be measured or counted, their size and quality were often surprisingly variable. These variations provoked attempts to institute standards based on an item's intrinsic value or purchasing power. A uniformly high level of quality was demanded of those who brought sacrificial offerings to the tabernacle or temple in Israel (Lev. 1:3; 3:1, 6; etc.), but in certain periods in Israelite history some people attempted to avoid such stringent requirements (Mal. 1:7f.). No standard weights and measures existed, however, in any period of ancient Near Eastern history. The age of David and Solomon came closest to establishing a uniform measure of weight for the Hebrews. This "king's weight" (2 S. 14:26) was used for goods received at the royal court, but there is no evidence that it was imposed on the country as a whole or even accepted voluntarily. The same was true for the "sanctuary shekel" (Ex. 30:13; Lev. 5:15; etc.), a standard of weight favored by the Hebrew priests.

Estimating the quantity of ancient currency by observation alone was often inaccurate, and determining quality was yet more difficult. Even the weighing and close examination of metal did little to hinder those determined to cheat. Because of the lack of uniform standards, the weighing process was frequently long, elaborate, and inaccurate. Sometimes the pieces of iron, bronze, or dressed stone employed by merchants were labeled or engraved with the purported weight, but still there was considerable disparity. Coins show evidence of having been clipped over many centuries until they represented a far lower weight of silver or gold than was originally intended. Indeed, this practice continued to some degree until the invention of milling for the edges of coins in the late 18th cent. A.D.

In the postexilic period the metal used as currency, whether a disc, strip, ring, or bar, began to carry a stamp, and in this way pieces of silver began to be recognized as monetary units valid for trading. In the Greek and Roman periods the city of origin was sometimes stamped on gold to indicate its purity. Silver from Tyre was renowned in the ancient world for its purity and the tetradrachmas produced by the mint at Tyre were accepted gladly everywhere. Coins were sometimes slashed to prove that they were solid gold or silver, not merely bronze coated in the precious metal. The idea that a coin's face value could be greater than the value of the metal of which it was made was slow to develop.

III. Early Coinage.–A. Lydian, Greek, and Persian. The earliest coins were probably minted somewhat before 700 B.C. in Lydia and displayed a lion's head. Called staters by the Greeks, they were made of electrum, a natural or artificial alloy of gold and silver; in the ancient world natural electrum occurred most plentifully in the Pactolus River area of Lydia. The first electrum coins were actually irregularly shaped ingots and bore the stamp of King Gyges of Lydia as a guarantee that the bars could be negotiated at a specific value. About this time silver coins of irregular shape and thickness and bearing a turtle design were in use on the Greek island of Aegina. *See* Plates 10-11.

One of the earliest designs on Lydian gold coins — a lion confronting a bull — came from the reign of King Croesus (560-546 B.C.). The reverse side of the coin simply has a punch mark or indentation that is common to the earliest coins from Lydia, Aegina, and Persia. The Lydians and subsequently the Persians produced silver coins in this design; one has been found that dates from the reign of Alyattes (617-560), the father of King Croesus of Lydia. It is very unlikely, however, that these coins were familiar to the Hebrews.

After Lydia came under the control of Persia in 546 B.C., a new style of coin was developed, probably during the reign of Darius I (522-485). The gold coin, called a daric, shows the king poised on one knee holding a bow and spear. Coins of similar design in gold and silver were circulated widely for the next two centuries and were probably among the first coins encountered by the Hebrews. *See* Plate 4. Two coins of the 6th cent. B.C. have been discovered in Palestine, one originating from Thrace and found at Shechem, and the other originating from Athens and found at Jerusalem.

When the Persians under Cyrus the Great overthrew Babylon in 538 B.C., it was natural that the area became flooded with the new Persian coinage, much of it minted in Lydia. As the Hebrew people were released from their Babylonian captivity and returned to Palestine, they took with them vast quantities of the new coins (Ezr. 2:68f.). Very soon thereafter values began to be mentioned in terms of new coinage as well as in terms of shekels and talents (8:27; Neh. 7:70-72).

During the 6th and 5th cents. B.C. the influence of Hellenism spread far beyond the city-states of Greece itself. Traders established settlements in southern Europe and the Middle East, and Greek coins, including the stater and didrachma, circulated along with the Persian darics. *See* Plates 5, 12. The Greek coins were distinctive with their clear designs on the reverse which sometimes had a definite pattern and sometimes an animal or bird. When the heads of gods or goddesses began to appear on coinage, they were usually on the obverse. A silver coin that bears the winged Pegasus on the obverse and the goddess Athena on the reverse, found at Corinth and dated about 4 B.C., was unusual. Much more common were coins like the Athenian tetradrachma with Athena on the obverse and an owl on the reverse. This style of coin circulated from *ca.* 500 B.C. Respected because it always contained the same weight of fine silver, it became the standard monetary unit in Greece, Asia Minor, and Phoenicia because of the extensive trading among these areas and has been found in coin hoards in sites from the Black Sea to Israel. In 230 B.C. it was replaced by a tetradrachma with a helmeted Athena on the obverse and the owl standing on an upturned amphora on the reverse. *See* Plates 6, 13-18.

During the latter part of the Persian period, between 350 and 332 B.C., small coins were minted in Judah with a

Silver hemiobol struck in Jerusalem *ca.* 350 B.C. (Israel Museum, Jerusalem)

design similar to designs of the Athenian coins but with the inscription "Yehud" (Judah) in ancient Hebrew script. These tiny silver coins were probably minted with the permission of the Persian authorities at a time when the Jews had a little more autonomy. Had the Jewish people been in a position to authorize the general minting of coins, they would have made coins of larger size, greater value, and more impressive appearance than these minute ones.

Another coin, perhaps found in Gaza, is inscribed with Aramaic script and was probably made by the Persian authority in Judah; it has been dated to the 4th cent. B.C. A mint in Judah would account for its greater size and worth. On the obverse is the helmeted head of a god and on the reverse a seated figure, presumably a deity holding a falcon. Unusual among these coins bearing the provincial name Yehud is one with a lilylike flower on the reverse instead of the owl, and a bird similar to the falcon on the obverse. This beautiful lily was found commonly throughout the area, and the frequent reference to it in the Talmud indicate its special significance for the Hebrews. Several other coins with a lily design were minted in Jerusalem in the late Hasmonean period.

The Greek monetary system was based, like others, on a concept of weight, in this case the Babylonian silver *mina*. In Greek coinage seventy *drachmas* equaled one mina, and four drachmas equaled one *tetradrachma*. Many of the tetradrachmas minted by smaller city-states are smaller than the tetradrachmas from which they were copied; and in fact they greatly resemble the Greek *didrachma*, which was worth only half as much. Unscrupulous merchants and others could use such differences to their own advantage. The Greek coins popularized a design that showed Athena, the patron deity of Athens, but sometimes they displayed other gods and goddesses. The coins also depicted creatures of land, sea, and air, the products of the land, and familiar objects such as wine jugs and shields. It has been suggested that many of the designs constituted a subtle form of advertising. The Arkagos didrachma used a design incorporating its famous crabs; the turtle on the coins of Aegina indicated that island's maritime economy.

B. Under Philip of Macedon and Alexander the Great. As Philip of Macedon obtained control of Greece in 338 B.C., his silver stater bearing the portrait of the god Zeus and gold stater with the head of Apollo became the accepted units of monetary exchange in Greek trading areas. Philip's love of horses was evident in the prancing hoofs and two-horse chariot on the reverse of the gold stater, and the noble horse and jockey on the reverse of the silver stater. The king's portrait was not shown on coins for fear of incurring the wrath of the gods, whose privileges would have been usurped. *See* Plates 19, 20.

After Philip died his son Alexander the Great began minting coins representing figures from Greek mythology. The tetradrachma bears the portrait of Heracles, a deity popular with the Romans as Hercules. The legend of the invulnerable lion's skin associated with Heracles particularly appealed to Alexander, who may have thought that it reflected the stability of his monetary system. The reverse of the coin shows a seated figure of the all-powerful Zeus. Alexander's gold stater from the same period shows the helmeted head of Athena on the obverse and the standing winged goddess of victory, Nike, on the reverse. *See* Plates 21-23.

Alexander's army defeated the Persians under Darius III in 331 B.C. Not only the entire area of Asia Minor, northern Syria, and Assyria but also Afghanistan and the Indus Valley fell under his sway. In Egypt Alexander was hailed as the son of a god, and being thus deified he could join all the other gods and have his own portrait on coins. He did not venture to place this kind of personal stamp on the monetary system himself, probably because of a superstitious fear of reprisal by the other gods. After his death, however, his portrait appeared on coins, e.g., the tetradrachma of Lysimachus of Thrace, which has the portrait of Alexander as Zeus on the obverse and a seated Athena with Nike on the reverse. The gold stater and the silver tetradrachma became the standard coins of his rule. *See* Plate 24.

C. Ptolemaic and Seleucid. After the untimely death of Alexander in Babylon in 323 B.C., the empire was divided among four of his generals. In Greece and Macedon the power-hungry and bloodthirsty Cassander retained the use of the gold and silver coinage of his predecessor. Lysimachus of Thrace continued to mint the beautiful, unique, gold and silver coins showing Alexander as the son of Zeus-Amon. It is not surprising that Ptolemy I of Egypt issued coins bearing the head of Athena, goddess of wisdom, since he turned his attention increasingly away from war toward founding the great center of learning at Alexandria with its world-renowned library. More successful in military campaigns was the fourth general, Seleucus of Syria. His early coins strongly resemble those of the former period, showing Heracles and the lion's-skin headdress, with Zeus and Nike on the reverse. As his lust for power increased, he followed Ptolemy I in minting coins with his portrait on the obverse, sometimes wearing a horn as a symbol of strength. *See* Plates 7, 25-27. During this time Palestine was part of the empire of Ptolemy I and in consequence used Egyptian coins extensively. Ptolemy II, who subsequently married his sister, issued a beautiful gold tetradrachma showing in profile the sensitive Grecian features of the brother and sister side by side.

As the names of the kings and the cities in which the coins were minted were gradually incorporated into the design of the coins, inscriptions lengthened and became propaganda. An example is the silver tetradrachma of Antiochus IV Epiphanes (175-164 B.C.), which is inscribed ΒΑΣΙΛΕΩΣ ΑΝΤΙΟΧΟΥ ΘΕΟΥ ΕΠΙΦΑΝΟΥΣ ΝΙΚΗΦΟΡΟΥ *(BASILEŌS ANTIOCHOU THEOU EPIPHANOUS NIKĒPHOROU)*, "King Antiochus, magnificent god [or god who manifests himself], bringer of victory."

In 198 B.C. Antiochus III captured Jerusalem from Egypt and made the Jews part of the Syrian empire. The peaceful tolerance and gradual process of hellenization that had existed under Egyptian rule abruptly halted when Seleucus IV succeeded to the Syrian throne in 187.

D. Hasmonean. The rebellion of the MACCABEES, whose descendants are known as the HASMONEANS, against the intense hellenizing policies of Antiochus IV Epiphanes (175-164 B.C.), gave the Jewish people about a century of relative independence from direct Syrian rule, the Hasmonean era. Sometime in this period the first Jewish coins were minted, but just when is a matter of disagreement among numismatists.

The strong city of Tyre began minting its own shekels in the latter part of the 2nd cent. B.C. but Gaza and Ashkelon, cities similar in importance to Jerusalem, did not begin their own minting until almost the end of the century, 104 B.C. It is therefore unlikely that Jewish coins were minted in Jerusalem before that date. According to 1 Macc. 15:6, Simon Maccabeus, as high priest and governor (143-135 B.C.), received a letter from Antiochus VII (139-129 B.C.) granting permission to mint his own money. This permission, however, was probably either withdrawn or not acted upon at the time. Coins bearing the Hebrew

inscription *šm'wn* were once thought to have been minted by Simon Maccabeus, but now they are dated to the period of the Second Revolt (B.C. 132-135) under Simon Bar Cochba. F. Banks, however, dated the first Jewish coins, the small bronze lepta, to 139 B.C., the period of Simon Maccabeus.

According to G. L. Archer, Simon's son and successor John Hyrcanus I (135-105 B.C.) was the first Hasmonean ruler to strike Jewish coins (*Zondervan Pictorial Encyclopedia of the Bible* [1975], I, 906). If this is true, the minting of coins probably occurred in conjunction with a declaration of independence from Syria at the death of Antiochus VII in 129 B.C. The coins that some attribute to Hyrcanus are inscribed "Yehohanan the High Priest and the Community [*heḇer*] of the Jews," which reflects Hyrcanus's opinion that he was foremost a priest and only secondly a prince. Other coins bear the name Yehudah, the Hebrew name of Hyrcanus's son and successor Aristobulus.

Other scholars (e.g., Y. Meshorer) have argued that since Yehohanan and Yehudah were common names during the Hasmonean era, these names could just as easily refer to two later Hasmoneans. After the one-year reign and death of Aristobulus, his three brothers, whom he had imprisoned, were released. The eldest, Alexander Janneus (Hebrew name Yehonathan) eventually won control. His sons were Aristobulus II (Hebrew name Yehudah) and Hyrcanus II (Hebrew name Yehohanan). Meshorer has contended that the title inscribed on the freshly minted coins in the Beth Sahur hoard,"head of the community [*heḇer*] of the Jews," probably did not come into use until 47 B.C. The late date of this hoard and the ambiguous evidence of the names (stated above) have led him to conclude that it is not certain that Jewish coins were minted during the reign of Hyrcanus I.

It is certain, however, that coins were minted in the time of Alexander Janneus (103-76 B.C.), for two hoards of them have been found, at Jaffa (Joppa) and at Gideon. One indication that these may have been the first Jewish coins is that they follow very closely the designs on the coins of the former Syrian masters of Judea. If Alexander's Hasmonean predecessors had minted their own coins, he probably would have copied a more Jewish style.

Throughout the reign of Alexander Janneus bronze coins featuring the double cornucopia and a pomegranate were minted. These designs were frequently struck over the previous flower-and-anchor design. Because of his military victories, on some coins Janneus used the title "king" in bilingual inscriptions — "Yehonathan the King — King Alexander" — in Hebrew and Greek. Others were inscribed "Yehonathan [or "Yonathan"] the High Priest and the Community of the Jews"

The quality of these early Jewish coins varies considerably. Some are large, thick, and well shaped, but coins of the more turbulent years later in Janneus's reign are thin and small, possibly reflecting a shortage of metal. These coins are of low denomination, and large quantities of the smallest, the lepton, were minted. These lepta remained in circulation for more than a century and were still plentiful in the time of Jesus. The tiny lepton is the coin commonly known as the widow's mite, mentioned by Jesus in Mk. 12:41-44 (cf. Lk. 21:2; 12:59). It was made of bronze or copper of such inferior quality that the coin deteriorated readily; obtaining clear specimens has thus been very difficult. The radiant sun, typifying the sun of righteousness (Mal. 4:2 [MT 3:20]), and the ship's anchor, signifying the reliability of God's promises, are common motifs on these coins.

Bronze coin of Hyrcanus II. Obverse (right): Hebrew inscription, "Yehohanan the high priest and the community of the Jews." Reverse (left): double cornucopiae (Israel Museum, Jerusalem)

Any semblance of independent Hasmonean rule came to an end within fifteen years after the death of Alexander Janneus in 76 B.C. His widow, Salome Alexandra, ruled for nine years. At her death Janneus's younger son Aristobulus II seized power and ruled for four years, not without opposition from the supporters of the elder son, Hyrcanus II. Both sides appealed to the Roman Pompey to arbitrate the dispute. Pompey settled the matter in his own way by taking over Judea in 63 B.C., making it a Roman province.

Pompey had also destroyed the once-powerful Seleucid dynasty by conquering Syria. The last Seleucid king, Philip II Philadelphus (*ca.* 93-82 B.C.), minted a traditional silver tetradrachma with his own portrait on the obverse and Zeus with Nike on the reverse. Throughout the Hasmonean period the silver coins of the Seleucid empire had continued to be the main coinage in Palestine. The tetradrachma, which had been the principal unit of monetary exchange for several centuries, at first existed along with the Roman denarius but eventually gave way to the denarius as the inscriptions were changed from Greek to Latin.

Another Hasmonean, Antigonus II (Greek for Mattathias), a son of Aristobulus II, gained power briefly through the aid of the Parthians in the early 30's B.C. Some of his coins read "Mattathias the High Priest and the Community of the Jews" on the obverse in Hebrew and "King Antigonus" on the reverse in Greek. Antigonus was the first to inscribe the seven-branched lampstand on coins. He was defeated by Herod the Great, who had been appointed King of Judea by Rome, and was beheaded in 37 B.C.

IV. Coinage in NT Times.–A. Roman. Roman coinage had developed gradually from the 4th cent. B.C. The as, originally a measurement of weight (the Roman pound, about 340 gm., 12 ozs.), was at first oblong and later round. The quadrans is one of several coins bearing a ship design to signify the importance of Rome as a maritime power. Because of the idea that the metal in the coin must have a value equivalent to that represented by the coin, these early coins, made of bronze, are thick, heavy, and cumbersome. Merchants who traded abroad found that peoples who normally dealt in silver or gold would not accept bronze coins.

In the 3rd cent. B.C. the Romans began to mint silver drachmas, which almost immediately were reduced in size. By the Second Punic War (218-201) the coins weighed only 28 gm. (1 oz.), and by 89 B.C. they were half that size. From 180 B.C. the drachma gave way to the denarius, a coin of similar value that was the established day-laborer's wage in NT times and also the Roman soldier's daily wage. The AV translates denarius as "penny" (Mt. 20:2-10). Several denarii were minted to commemorate the capture of Judea. One of these, struck *ca.* 40 B.C.,

MONEY

Menorah (lampstand) on bronze coin (reverse) of Antigonus II. A Greek inscription (mostly broken off) read "King Antigonus" (Israel Museum, Jerusalem)

shows the head of Pompey, who had been murdered in 48, and bears the inscription MAG(NUS) PIUS I(MPERATOR) ("great holy conqueror"). *See* Plates 28, 29. Another denarius, minted *ca.* 58, carries a design of King Aretas, who had allied himself with Hyrcanus II, in supplicant position beside his camel; it is inscribed REX ARETAS, "King Aretas." Julius Caesar was the first living Roman to be immortalized on a coin; his head is drawn on the obverse of the denarius and Venus appears on the reverse. The inscription reads CAESAR DICT(ATOR) PERPET(UUS) ("Caesar, perpetual dictator").

Circulating at the same time were the silver quinarius, worth half a denarius, and a sestertius, worth one-fourth of a denarius. The latter, originally a small silver coin, was later replaced by a large bronze coin of the same name. The shekel and half-shekel, previously known as a weight rather than a coin, were minted for two centuries at the great silver mint at Tyre. It is likely that such Tyrian shekels or tetradrachmas, rather than Roman coins, were those paid to Judas Iscariot (Mt. 26:15; 27:3-5). These and other coins minted at Tyre remained among the most readily accepted in the Roman world because of the purity of the silver.

B. Herodian. Herod the Great, who had chosen sides wisely, became vassal king of Judea and continued to mint Jewish coins of small denominations. In 37 B.C., when he returned in triumph with his new title of king, he began minting lepta. These lepta are easily recognizable because they are dated, an innovative feature for Jewish coins. The inscriptions on Herod's coins are in Greek, unlike his predecessors' inscriptions, which are either entirely in Hebrew or on later coins, in both Greek and Hebrew. The symbols on his coins show foreign influences and thus are not necessarily Jewish. Many have a noncommital design that could be interpreted as either a local or a foreign symbol; e.g., the tripod on a lepton could be seen as a Jewish symbol of worship or as a familiar Greek object. Some coins, however, show undeniably non-Jewish objects, e.g., the small caduceus in the double cornucopiae and the eagle, the latter a symbol of Roman strength.

Jewish coins struck in the reign of Herod's son Archelaus (4 B.C.-A.D. 6) are small and made of bronze. Archelaus continued the tradition of using symbols that were inoffensive to the Jews. The coins he minted have traditional designs, such as the helmet and cornucopiae, but they also frequently have maritime symbols and a new design of

Bronze lepton of Herod the Great. Obverse: tripod with bowl; Greek inscription, "King Herod"; the date is just to the left of the tripod (year 3). Reverse: incense altar between two palm branches (Trustees of the British Museum)

grapes, a characteristic Jewish symbol in view of the quantity of grapes grown in Judea. The name and title ΗΡΩΔΗΣ ΕΘΝΑΡΧΗΣ or ΗΡΩΔΟΥ ΕΘΝΑΡΧΟΥ (Gk. *HĒRŌDĒS ETHNARCHĒS* or *HĒRŌDOU ETHNARCHOU*, "[of] Herod, ethnarch") form the only inscription on these bronzes; these coins are thus readily identified, for Archelaus was the sole ruler of his dynasty to bear the title of ethnarch rather than king. Since the kingdom of Herod the Great was divided among his three sons, it is not surprising that the coins of Archelaus had limited circulation and have been unearthed only in a relatively small area, ranging from Caesarea in the north of Jerusalem and Jericho in the south. A few have also been found in excavations of Herod the Great's fortress at Masada about 48 km. (30 mi.) SE of Jerusalem on the western shore of the Dead Sea.

Herod's second son, Herod Antipas, minted thick, heavy coins that are clearly dated, although for some unknown reason he did not begin minting coins until the twenty-fourth year of his reign. His bronzes are Jewish in design and depict the familiar local palm trees, particularly the date palm. The earliest bronzes of his reign, dated A.D. 19/20, bear the design of a reed, a symbol of the city newly founded by Herod Antipas and named ΤΙΒΕΡΙΑΣ (*Tiberias*) in the inscription. Excavations indicate that the coins of this reign, minted at Tiberias, circulated solely in the region of northern Israel controlled by Herod Antipas.

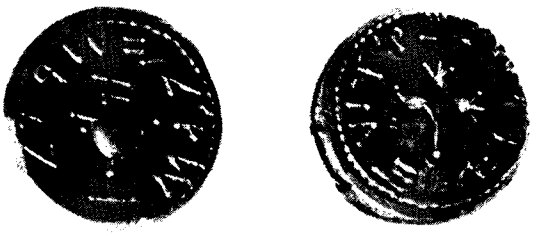
The third son of Herod the Great, Philip II, ruled a population far less Jewish in character. As a result, the coins struck at Caesarea Philippi (Paneas) completely lack Jewish symbolism and have a distinctly Roman style — the head of the emperor and a temple — showing strong allegiance to the overlords. This was the first time a Jewish coin was minted that disregarded the second commandment. The few extant coins from this reign usually have the head of Augustus with the title ΚΑΙΣΑΡ ΣΕΒΑΣΤ (*KAISAR SEBAST*, "revered Caesar") on the obverse and the name and title of Philip surrounding the temple design on the reverse. One coin, however, shows on the obverse the head of Augustus surrounded by (ΦΙΛΙΠΠΟ)ΟΥ ΤΕΤΡΑ(ΡΧΟΥ) (*PHILIPPOU TETRA[RCHOU]*, "Philip, tetrarch"). The coins of Philip's reign have mostly been found in the area that he controlled, although one has been unearthed as far away as Cyprus. Philip's successor, Herod Agrippa I, first used his predecessor's mint at Paneas; but when he succeeded to all the lands of his grandfather Herod the Great, he transferred his minting operations to Caesarea and Jerusalem. The few large coins from his reign show confusing designs that are difficult to interpret, but it is noteworthy that Agrippa I was the first Jewish king to mint a coin showing his own head. His small bronzes issued for use in Judea show a canopy as a symbol of monarchy, rather than the head of Agrippa or the emperor; the latter symbols would have

offended the Jews, and thus, they appeared on coins circulated in mostly non-Jewish areas. *See* Plate 30; *see also* pictures in HEROD.

The last ruler of the Herodian dynasty was Agrippa II. Educated in Rome and having sympathies that lay more with his Roman masters than with his Jewish ancestors, he reigned during, and survived, a turbulent period of Jewish history. Coins of his reign present severe dating problems, since many carry two dates separated by a five-year gap. H. Seyrig has plausibly suggested that the two dates derive from two eras in the reign of Agrippa II, one beginning in A.D. 56 and the other in 61. The earlier coins have Greek inscriptions and styles, while those with later dates have Latin inscriptions. Most belong to the earlier era, but those bearing the double dates and Latin inscriptions show changes in style and composition; the artistry is undoubtedly superior, and the coins are thinner and have a higher copper content. The head of Nero appears on coins once thought to have been undated but later dated by Meshorer to A.D. 61. Meshorer has suggested that the refounding of Caesarea Philippi (Paneas) as Neronias in 61, in honor of the emperor who had come to power in 54, was such an important event in the reign of Agrippa II of Chalcis (the last of the Herodian line) that he issued commemorative coins and regarded 61 as the start of his second era. *See* Plate 33.

C. Under Judah's Procurators. Most of the Roman procurators sent to Judea minted small coins. Some, like those of Pontius Pilate, are undeniably Roman in style, but others, like those of Antonius Felix (A.D. 52-60), bear symbols that would have been more acceptable to the Jews. Most of the procurators adhered to the practice of not overtly offending Jews with their coinage. Even though Felix married the sister of Agrippa II, the Jews never quite trusted him, and his coins reflect his dual sympathies. Although some show Jewish symbols of palm trees and branches, others with designs incorporating Roman weapons reconfirm the overbearing presence of Rome.

Porcius Festus became procurator in A.D. 60 and two years later was succeeded by increasingly career-oriented procurators who managed to inflame once more the latent nationalism of the Jewish people. The rebellion against Rome began in 66 and continued for four years; during that time the Jews again began to mint coins, some of them "dated" by the words "Year One of the Liberation of Zion" (= A.D. 66). Some of these coins were silver, the minting of which was itself an act of rebellion. At the beginning of the revolt they minted shekels (*see* Vol. II, Plate 41) and half-shekels, which supplanted the foreign silver currency (Tyre's shekel and Antioch's tetradrachma).These coins reflected the ideology behind the rebellion, having inscriptions such as "Jerusalem is Holy," "Freedom of Zion," and "Of the Redemption of Zion." Later in the revolt half-, quarter-, and eighth-shekels were made of bronze, as were the small lepta, perhaps because the supply of silver in the treasury was depleted. Many of the coins show the libation cup with pearls on the rim that was used in Jewish sacrifices. Vine-leaf designs, pomegranates, and date palms are also stamped on the coins. *See* Plate 34.



The second revolt in A.D. 132 again included the minting of coins as a proclamation of independence. The Jews minted silver and bronze coins, but, evidently because they had no raw materials, they overstruck other coins with their own design and inscriptions. These coins have sayings such as "Year One of the Redemption of Israel," "Simeon Prince of Israel," and "Eleazar the Priest." Probably the coins formerly dated to the time of Simon Maccabeus come from this period (see III.D above). *See* Plate 8.

Bronze coin of Pontius Pilate. Obverse: simpulum (ladle) with Greek inscription, "Tiberius Caesar." Reverse: three ears of corn with inscription, "Julia Caesar" (Trustees of the British Museum)

Bronze coin of the procurator Porcius Festus struck in Judea in A.D. 59. Obverse: Greek inscription within wreath, "Of Nero." Reverse: palm branch with Greek inscription, "Year 5 of the emperor" (Israel Museum, Jerusalem)

Silver shekel from the First Jewish Revolt. Obverse: chalice with Hebrew inscription, "shekel of Israel." Reverse: stem with three flowers and Hebrew inscription, "Jerusalem is Holy" (Trustees of the British Museum)

Silver tetradrachma of Bar Cochba. Obverse: temple with shrine containing scroll. Reverse: palm branch and ethrog with Hebrew inscription, "Deliverance of Jerusalem" (Trustees of the British Museum)

D. Qumrân Excavations. Excavations in the area of the community center at Qumrân uncovered a number of coins dating from the Hasmonean period to the second Jewish revolt. Almost 250 coins were found in the ruins of the community center itself, while caches of coins recov-

ered from other parts of the settlement brought the total number to over 750. Some are in such bad condition that they cannot easily be identified but clearly belong to the Hasmonean period. Only one coin, however, has been identified with certainty as belonging to the time of Herod the Great. Others were isssued during the rule of the Roman procurators until the fall of Jerusalem in A.D. 70. Approximately a dozen coins date from the period of the Second Jewish Revolt. This numismatic evidence greatly helped to authenticate the settlement at Qumrân and relate the occupational activity of the site to the contents of the Qumrân caves.

E. NT References to Money. In the time of Christ, locally minted Jewish coins circulated along with those of the occupying Romans. The portrait of Augustus Caesar, emperor at the birth of Jesus (Lk. 2:1), dominates the obverse of the silver denarius and later the bronze sestertius, with inscriptions attesting to his divine status. The Roman Senate had bestowed divinity on Augustus, partly in recognition of his being the adopted son of Julius Caesar. The "coin" (Gk. *dēnárion*) used for tribute and requested by Jesus when the Pharisees asked him whether paying tribute to Caesar was lawful (Mt. 22:19 par.) would have been the silver denarius of the succeeding emperor, Tiberius (14-37). This coin displays a portrait of Tiberius on the obverse and a seated female figure on the reverse. *See* Plates 35, 36. The Good Samaritan of Jesus' parable left two denarii with the innkeeper to pay for food and care for the man attacked by robbers (Lk. 10:35); this sum was two days' wages (Mt. 20:2, 9f., 13). In Jn. 6:7 Philip estimated that supplies of food worth two hundred denarii would be insufficient to feed the multitude that was assembled to hear Jesus (cf. Mk. 6:37). The "silver coin" of Lk. 15:8f. represents the drachma (Gk. *drachmá*), a Greek coin of about the same value as the Roman denarius.

The "thirty pieces of silver" (Gk. *triákonta argýria*, "thirty silver [coins]") given to Judas for the betrayal of Christ (Mt. 26:15; 27:3, 5f., 9; cf. the sing. *argýrion*, "money," in Mk. 14:11; Lk. 22:5) were probably Tyrian shekels or tetradrachmas; these also may well have been the form of the "sum of money" (Gk. *argýria hikaná*, "much money") given by the chief priests and elders to the Roman guards to misrepresent the circumstances of the Resurrection (Mt. 28:12f.) Abbreviations on these coins included DIV ("divine"), AUG (*Augustus*), PON (*Pontifex Maximus*, "highest priest" or "religious ruler") and PM (*Pontifex Maximus*), COS ("consulship"), TRP (*Tribunica Potestate*, "tribune authority," "civil head of state"), and IMP (*Imperator*, "emperor"). *See* Plates 9, 31, 37-41.

"Penny" is used in the RSV for Gk. *assárion* (= Lat. *as*), worth about one-sixteenth of a denarius, in Mt. 10:29 par. Lk. 12:6. The quadrans (Gk. *kodrántēs*), one-fourth of an as, is mentioned twice in the Gospels (Mt. 5:26; Mk. 12:42) and rendered "farthing" by the AV but "penny" by the RSV. For the "copper coin" (Gk. *leptón*) of Mk.12:42; Lk. 12:59; 21:2 (AV "mite") see III.D above.

Silver denarius of Tiberius. Obverse: head of Tiberius with Latin inscription, "Tiberius Caesar son of the divine Augustus." Reverse: Livia holding branch and scepter; Latin inscription, "high priest" (Trustees of the British Museum)

The shekel (Gk. *statḗr*) found in the fish's mouth by Peter (Mt. 17:27) would have paid the dues of two persons, since the temple tax was half a shekel. Jewish tradition used the shekel, either as a weight or as a coin, for the temple tax, the poll tax, and redemption from the priesthood (cf. Ex. 13:13; 30:11-16; Nu. 3:44-51). If three thousand shekels equaled one talent of silver, the ten thousand talents owned by the unmerciful servant was indeed an enormous debt (Mt. 18:23-25). The RSV "pound" (Lk. 19:13) is the rendering of the old weight known as *mina* or *maneh* (Gk. *mna*), equivalent to fifty shekels in Hebrew weight and one hundred drachmas in Greek money; thus the parable values highly the activities of those who work for the coming of Christ's kingdom.

H. W. PERKIN

MONEY BOX [Gk. *glōssókomon*] (Jn. 12:6; 13:29); AV BAG; NEB COMMON PURSE. Originally a container for holding mouthpieces of wind instruments (*glṓttai*) but more generally a container for varied purposes.

According to Jn. 12:6; 13:29 this container was used for storing money (cf. 2 Ch. 24:8, 10 par.) held in common by the disciples. From this common purse, replenished by the friends of Jesus (Lk. 8:3), the necessities of life were supplied for the group (cf. Mk. 6:37; Jn. 4:8; 6:5; 13:29) and for the poor (Jn. 13:29). Jn. 12:6 describes the character of JUDAS ISCARIOT, the treasurer of the group; his betrayal of Jesus for thirty pieces of silver was in perfect accord with his being a thief during the ministry of Jesus.

R. H. STEIN

MONEY, CURRENT [Heb. *kesep ʿōḇēr*–'money passing (along)'] (Gen. 23:16, AV). Abraham paid Ephron 400 shekels "current money with the merchant" (AV) for the field and its cave, in which he buried Sarah. ("Shekel" at that time was not a coin but a weight; *see* MONEY; WEIGHTS AND MEASURES.) The RSV translates "according to the weights current among the merchants," while the NEB translates "of the standard recognized by merchants." There are four different interpretations of the phrase.

(1) Coinage was not yet in use. In order to assure that, for example, a bar of silver had as much silver as the owner claimed, the bar would be weighed against other weights, which the merchant knew were accurate. Ephron was thus assured that he had received a full 400 shekels. "Current money" would refer to the weights currently in use in checking the weight of silver ingots. See E. Speiser, *Genesis* (*AB*, 1964), p. 171.

(2) Some think that "current money" refers to the fact that Abraham paid a price that was current for the value of the field. The price of 400 shekels, however, seems to be abnormally high.

(3) Others think "current money" indicates that the

silver with which Abraham paid the price was an acceptable medium of payment. S. R. Driver cites the Targum of Pseudo-Jonathan as saying "good silver, passing at every (banker's) table, and receivable in all transactions" (*Book of Genesis* [*WC*, 1913], p. 227).

(4) On the basis of the occurrence of the same Hebrew verb in 2 K. 12:4 (MT 5), some would interpret "current money" as a poll tax paid in addition to the price of the field. W. D. MOUNCE

MONEY, LOVE OF [Gk. *philargyría*] (1 Tim. 6:10). The dangers of the "love of money" was a popular theme in the ethical literature of both paganism (e.g., Democritus and others, who described *philargyría* as the mother city [*mētrópolis*] of all evil; see Diogenes vi.50) and Judaism (e.g., T. Jud. 17–19). Jesus also warned that striving after material WEALTH brings alienation from God and neighbors (e.g., Mt. 6:24; Lk. 16:19-31). The Pharisees scoffed at Jesus' teaching because they were "lovers of money" (pl. of *philárgyros*; AV "covetous;" cf. 2 Tim. 3:2). 1 Tim. 3:3 instructs that a bishop must be "no lover of money" (*aphilárgyros*; AV "not covetous"), while He. 13:5 warns all its readers to keep themselves "free from the love of money" (*aphilárgyros*; AV "covetousness"; cf. NEB "do not live for money").

MONEY-CHANGER [Gk. *kollybistḗs*] (Mt. 21:12 par. Mk. 11:15; Jn. 2:15); AV also CHANGER; [*kermatistḗs*] (Jn. 2:14); AV CHANGER OF MONEY. *See* BANK III.

MONGREL PEOPLE [Heb. *mamzēr*] (Zec. 9:6); AV BASTARD; NEB HALF-BREEDS. The Hebrew term apparently denotes one born of a prohibited union, in this case probably the offspring of intermarriage with another people (cf. "bastard," Dt. 23:2, the only other occurrence of *mamzēr*; cf. also P. Craigie, *Book of Deuteronomy* [*NICOT*, 1976], p. 297). KD saw the fulfillment of Zec. 9:5f. in Arrian's later description of how Alexander the Great conquered Gaza, put the male citizens to death, sold the women and children into slavery, and populated the city with neighboring tribesmen (Arrian *Anabasis* ii.27).

MONSTER; SEA MONSTER [Heb. *tannîn*] (Gen. 1:21; Job 7:12; Ps. 148:7; Jer. 51:34); AV WHALE, DRAGON; NEB also SEA-SERPENT, WATER-SPOUT, DRAGON. *See* DRAGON.

MONTH. *See* CALENDAR II.A.2, B.1.

MONTHLY PROGNOSTICATORS (Isa. 47:13, AV). *See* ASTROLOGY IV.

MONUMENT [Heb. *yāḏ*–'hand'] (1 S. 15:12; 2 S. 18:18; 1 Ch. 18:3; Isa. 56:5); AV PLACE, DOMINION; NEB also MEMORIAL; [*ṣîyûn*] (2 K. 23:17); AV "title"; [Gk. *mnēmeíon*–'token of remembrance'] (Mt. 23:29); AV SEPULCHRE. A landmark such as a cairn or gravestone made from one stone or a pile of stones.

The very common Hebrew word *yāḏ*, which basically means hand, in a few instances means monument, a reflection of the hand's function of pointing. In most of these occurrences it refers to a gravestone or a more elaborate memorial to mark a burial. This may be what Saul made for himself (1 S. 15:12). Clearly that is the case with Absalom in 2 S. 18:18, with the anonymous Judean prophet in 2 K. 23:17, and in the one NT reference (Mt. 23:29), where Jesus spoke of the tombstones of the righteous. Isaiah used the term figuratively when he spoke of godly eunuchs who would be remembered by something better than a gravestone (56:5).

The reference in 1 Ch. 18:3 (par. 2 S. 8:3) is doubly ambiguous. (1) Heb. *yāḏ* may mean "power" (see 2 S. 8:3, RSV), "dominion" (so AV; *CHAL*, p. 243; J. Myers, *I Chronicles* [*AB*, 1965], pp. 131, 135) or "monument (of victory)" (so RSV; NEB; BDB, p. 662). (2) The subject of "set up" (hiphil of *nāṣaḇ*) may be David (see M. Unger, *Israel and the Aramaeans of Damascus* [repr. 1980], pp. 50, 139 n. 15) or Hadadezer (so NEB; KD; S. R. Driver, *Notes on the Hebrew Text and Topography of the Books of Samuel* [2nd ed. 1913], p. 281). R. L. ALDEN

MOOLI mōō'lī (1 Esd. 8:47, NEB). *See* MAHLI 1.

MOON [Heb. usually *yārē(a)ḥ*, also *lᵉḇānâ*; Gk. *selḗnē*]; **FULL MOON** [Heb. *kese'* (Prov. 7:20), *kēseh* (Ps. 81:3 [MT 4])]; AV DAY (TIME) APPOINTED; in Job 26:9 the RSV and NEB emend MT *kissēh* (AV, lit., "throne") to read *keseh*. *See also* NEW MOON.

According to the creation account in Gen. 1, God made two lights — the greater light (the sun) to rule the day and the lesser light (the moon) to rule the night (vv. 16-18; cf. Jer. 31:35; Ps. 104:19; 136:9; 2 Esd. 6:45). God set these light-giving bodies in the heavens along with the stars as signs for days, seasons, and years (Gen. 1:14). Appearing in multiple phases, the moon (*yārē[a]ḥ*) measured time in months (cf. *yeraḥ*, "month"; *see* CALENDAR II.A.2) and set the times for festivals (cf. Sir. 43:6-8). The great festivals of Passover in the spring and the Feast of Booths in the fall began at full moon. Furthermore, the "new moon" (*ḥōḏeš*, also rendered "month") was celebrated each month in a manner similar to a sabbath but with a little more festivity (cf. Nu. 28:11-15).

The term "moon" usually occurs in combination with "sun" and "stars." All three times that "moon" represents Heb. *lᵉḇānâ* (lit. "white lady") it is paralleled by *ḥammâ* (lit. "hot one," i.e., "sun"; Cant. 6:10; Isa. 24:23; 30:26). "Moon" occurs with "stars" in Job 25:5; Ps. 8:3 (MT 4); Jer. 31:35.

Ancient Near Eastern peoples believed the moon to be a powerful force. They thought it could strike a person by night, producing mental illness (cf. Ps. 121:6). Such an idea may lie behind Gk. *selēniázomai* (lit. "be moonstruck"; cf. Eng. "lunatic"), which in Mt. 4:24; 17:15 may be describing a case of epilepsy.

Like the sun, the moon is a common symbol of permanence (Ps. 72:5; 89:37 [MT 38]; cf. Jer. 31:35f.), although its changing phases can also be a simile for the instability of a fool (Sir. 27:11). The moon's brilliant whiteness symbolizes beauty (Cant. 6:10), and as one of the heavenly bodies it represents regal glory (cf. 1 Cor. 15:41); thus the woman in Rev. 12:1, who most likely represents the true Israel, is pictured as "clothed with the sun, with the moon under her feet, and on her head a crown of twelve stars."

The ancient Near Eastern peoples were fascinated by the heavenly bodies and worshiped them with great devotion (cf. 2 K. 23:5; Jer. 8:1f.). The prominent deity of Ur and Haran, two Mesopotamian cities closely associated with Abraham, was the moon-god Sin (Sum. Nanna). This deity appears in the name of the Assyrian king Sennacherib ("Sin has replaced the [lost] brothers"), who set siege to Jerusalem during the reign of Hezekiah. Ugaritic texts refer to a moon-deity called *yrḥ*. Thoth, the Egyptian moon-god, was the god of knowledge; order and wisdom were his special powers. Moon-worship probably lies behind the name Jericho (*yᵉrîḥô*). The crescent was a beloved symbol associated with the moon and its worship (*see* CRESCENTS). The ancients believed that careful observa-

Boundary stone of Meli-shipak (12th cent. B.C.) from Susa. The text on the back of this stone is a grant to King Marduk-apla-iddina; gods, whose symbols are pictured here (note the crescent, top left, the sign of the moon-god), are invoked to curse anyone who violates the terms of the grant (Louvre)

tion of the moon, particularly in its relationship to the sun, could offer insight into the course of affairs on earth. In Mesopotamia, e.g., an eclipse was feared as a bad omen, and special rituals were performed to ward off the portended dangers.

The OT presents a strong polemic against the worship of heavenly bodies (Dt. 4:19; cf. 17:2-5; Job 31:26-28; Isa. 47:13; *see also* ASTROLOGY IV). They are not worthy of human devotion, for they have their origin solely in Yahweh and He continually directs their courses (cf. Ep. Jer. 6:60). As one of God's creatures, the moon renders Him praise (Ps. 148:3; cf. Song Three 40). Because their movements are fully subject to God, Joshua was able to command both the moon and the sun to stand still (Heb. *dāmam*, lit. "be silent, be motionless") during a critical battle (Josh. 10:12f.).

Certain passages speak of great disturbances occurring throughout nature in the last days. The prophet Joel spoke of the moon being darkened (2:10; 3:15 [MT 4:15]; but cf. 2 Esd. 5:4) or turned to blood (Joel 2:31 [MT 3:4], quoted in Acts 2:20; cf. Rev. 6:12; 8:12). According to Isaiah (13:10; cf. Ezk. 32:7; Mt. 24:29; Mk. 13:24; Lk. 21:25), the moon will not give its light on the day of the Lord; but in the new age when God, the eternal light, will reign supreme, there will be no need for the light of either the sun or the moon (Isa. 60:19; Rev. 21:23; cf. 2 Esd. 7:39).

Deuteronomy 33:14 contains the unusual expression *gereš yᵉrāḥîm* (lit. "yield of moons," parallel to *tᵉḇû'ōṯ šāmeš*, "fruits of the sun"). The RSV renders it "the rich yield of the months." Although *yᵉrāḥîm* sometimes means "months," the parallel to "sun" indicates that the meaning "moons" is prominent here. No doubt the ancients thought that the moon played a critical role in the crops' coming to harvest; at least several moons must pass before the fields ripen. Unfortunately this play on the meaning of *yᵉrāḥîm* cannot be captured in English.

MOON, NEW. *See* NEW MOON.

MOOSSIAS mō-ə-sī'əs [Gk. *Mooseias*]; AV MOOSIAS. One of those who had married a foreign wife and was obliged to divorce her (1 Esd. 9:31); possibly the same as MAASEIAH (9) in Ezr. 10:30.

MORALITY. *See* ETHICS.

MORALS [Gk. pl. of *ēthos*–'habit, custom,' 'character (as the result of habit)'] (1 Cor. 15:33); AV MANNERS; NEB CHARACTER. The term occurs only here in the RSV. "Bad company ruins good morals" is a proverbial saying that occurs in Menander's comedy *Thais*. The same idea is expressed by other Greek authors (cf. Bauer, rev., p. 344). Paul's quotation of the proverb need not imply that he is familiar with Menander's play. He uses the saying to warn the Corinthian Christians against cultivating friendships with those libertines who, lacking hope in the resurrection, reject moral restraints in their pursuit of pleasure (cf. v. 32; 5:9-13). N. J. O.

MORASTHITE môr-as'thīt (AV Jer. 26:18; Mic. 1:1). *See* MORESHETH, OF.

MORDECAI mor'-də-kī [Heb. *mordᵉḵay, mordᵉḵay;* Gk. *Mardochaios*]; AV Apoc. MARDOCHEUS; NEB Apoc. MARDOCHAEUS.

1. A man who returned with Zerubbabel from exile (Ezr. 2:2; Neh. 7:7; 1 Esd. 5:8).

2. One of the two central characters in the book of Esther.

I. Role in Esther.–Mordecai is identified as a Jew, resident in the Persian capital of Susa, who had raised Hadassah (Esther), his orphaned cousin (Est. 2:7). When Esther was chosen by Ahasuerus to be his queen, Mordecai ingratiated himself with the king by revealing, through Esther's auspices, a plot against the king's life (ch. 2). Haman, the king's chief minister, stung by Mordecai's refusal to do obeisance to him, devised a stratagem to destroy all the Jews in the Persian empire (ch. 3). When this intended pogrom became publicly known, Mordecai instructed Esther to go to the king and inform him (chs. 4–5). While Esther was thus engaged in unmasking Haman, Mordecai's previous good deed for the king was remembered and suitably rewarded (ch. 6). Immediately thereafter Esther told Ahasuerus of Haman's plot to annihilate the Jews, Haman was executed, and Mordecai succeeded to Haman's place as the second in rank in the kingdom. Mordecai then mobilized the Jews to defend themselves and procured the assistance of Persian officials throughout the empire to this end. As a result the Jews were delivered, and all those who attacked them were put to death (chs. 7–9). Mordecai then wrote to the Jews throughout the empire to establish the festival of Purim to commemorate this event (ch. 9), and he subsequently achieved a position of honor and repute in the kingdom and among his people (ch. 10).

II. Name.–There is now no doubt that the name Mordecai is genuine; it is the Hebrew form of a Babylonian name based on the divine name Marduk. It occurs as *mrdk* in an Aramaic letter of the 5th cent. B.C., as *mardukkâ* in the Persepolis Treasury Tablets, and as the theophoric element in the name *mardukkannaṣir*. (For documentation see C. A. Moore, *Esther* [*AB*, 1971], p. L.) Much more important, because of date and provenance, is the appearance of *Marduká* (possibly *Mardukaya*) in a text apparently from Borsippa that mentions Persian dignitaries from Susa. Note that the LXX form of the name, *Mardochaios*, is closer to the Babylonian original than the Hebrew is.

III. Date and Historicity.–The date of the story hinges on the identification of Ahasuerus, since no other person mentioned is known from extrabiblical documents. Few today doubt that Ahasuerus is to be identified with Xerxes I, 486-465 B.C., although the matter is complicated somewhat by the consistent LXX rendering Artaxerxes (*see* AHASUERUS 1). A fact favoring the identification with Xerxes I is that his Greek campaign can explain the chronological gap of four years between 1:3 and 2:16 (*see* ESTHER, BOOK OF VI; see W. Shea, *Andrews University Seminary Studies*, 14 [1976], 227ff.).

Mordecai cannot with certainty be identified with any

extrabiblical individual, but this may well be due to the extreme paucity of extant texts from the period and the limited historical pertinence of those that do exist (see Yamauchi, pp. 102f.). The major historical difficulty concerning Mordecai is the statement in 2:6, which seems to read that he was taken into exile with Jeconiah (Jehoiachin) in 597 B.C.; thus he would have been well over one hundred by the time of Xerxes. But possibly the pronoun "who" in 2:6 refers not to Mordecai but to Kish, the preceding final name in his patronymic. It has been suggested that the genealogies in 2 Ch. 22:9 and Ezr. 2:61 use similar syntax (see J. S. Wright, p. 38). However, the parallels are not exact, particularly since the phrase "a Benjaminite," which stands between the name Kish and the pronoun "who," much more likely describes Mordecai than his great-grandfather Kish. At any rate, such a chronological mistake would not in itself impugn the historicity of Mordecai himself.

A much more important piece of evidence may be the discovery of the cuneiform text mentioned in II above (see A. Ungnad, *ZAW*, 17 [1940/41], 243f.). It lists payments of silver to Persian dignitaries and their agents, who were apparently at Borsippa on an inspection trip from Susa. Although the tablet itself is undated, its contents allow a date either late in the reign of Darius I or early in that of Xerxes (see Ungnad, *AfO*, 19 [1959/60], 79-81). The tablet twice mentions a certain *Marduká*, identified as a *sipir* ("accountant" or "privy councillor") of *Uštannu* of Babylon, who is well known from other texts as a satrap of Persia. According to Ungnad, it is improbable that two high officials named Marduká would have served in Susa at the same time.

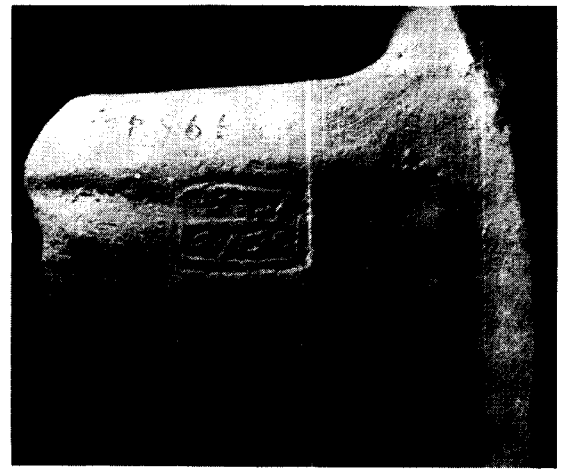
It is also important to note the implication in Est. 2 that Mordecai already occupied a position of some importance in Susa; women from the common ranks of society would hardly have been considered as eligible for the queenship. Moreover, Mordecai is often described as "sitting at the king's gate" (2:19, 21; 5:9, 13; 6:10). Since the gate (and the square before it) was where business was conducted (Ruth 4:1-12) and legal tribunals were held (Dt. 21:18-21; 22:13-21, 23f.; etc.; *see* GATE), this phrase very likely refers to an official position. R. Gordis (pp. 47f.) interpreted the phrase to mean that Mordecai was a magistrate or judge. In addition, Greek sources indicate that royal officials in Persia had to stay at the gate of the royal palace (see C. A. Moore, *BA*, 38 [1975], 74). Thus the Borsippa inscription may well contain, as Ungnad suggested, the only extrabiblical mention of Mordecai. Yet one must reserve judgment, for nothing makes the identity certain. For example, there is no evidence for determining how common the name Marduká/Mordecai was in Susa in Achaemenian times (so C. A. Moore, *BA*, 38 [1975], 73f.; but cf. Horn, p. 22 n. 45).

Wright, "The Historicity of the Book of Esther," in J. B. Payne, ed., *New Perspectives on the OT* (1970), pp. 37-47, esp. 44-46; E. Yamauchi, *Bibliotheca Sacra*, 137 (1980), 106-108. F. W. BUSH

MOREH, HILL OF mōr'ə [Heb. *giḇ'aṯ hammôreh*–'hill of the teacher (or archer)'; Gk. B *Gabaath Amōra*, A *toú bounoú toú Abōr*]. A hill mentioned in Jgs. 7:1 to locate the Midianite camp that Gideon was preparing to attack. It is probably the modern Jebel Daḥi, located between Mt. Gilboa and Mt. Tabor on the north side of the Valley of Jezreel, about 5 km. (3 mi.) N of the spring of Harod by which Gideon was camped. Jezreel is about 6½ km. (4 mi.) SSW of Moreh; Shunem is at the southwest edge of the hill, Endor about 1½ km. (1 mi.) N, and NT Nain at the northern base. R. J. HUGHES, III

MOREH, OAK OF mōr'ə [Heb. *'ēlôn môreh*–'terebinth of the teacher'; Gk. *tḗn drýn tḗn hypsēlḗn*]; AV incorrectly PLAIN OF MOREH; NEB TEREBINTH-TREE OF MOREH. A place where Abraham built an altar (Gen. 12:6); probably where Jacob hid the teraphim (35:4), and where Joshua set up a memorial stone (Josh. 24:26). It is undoubtedly the place mentioned in Dt. 11:30; Jgs. 9:37 (*see* DIVINERS' OAK). The location cannot be identified today. The name of the tree or wood may indicate that it was a place to consult a teacher or a Canaanite abode of ancestral spirits; or perhaps the name refers to the theophany that occurred there. R. P. DUGAN

MORESHETH môr'ə-sheth, **OF** [Heb. *môrašṯî*]; AV MORASTHITE. Designation of the prophet Micah, indicating his home town (Jer. 26:18; Mic. 1:1), which was otherwise known as MORESHETH-GATH.



MORESHETH-GATH môr'ə-sheth-gath; mō-resh'eth-gath [Heb. *môreṣeṯ gaṯ*–'possession of Gath'; LXX Gk. *klēronomías Geth*–'inheritance of Gath']. A town in the Shephelah of Judah, mentioned by its full name only in Mic. 1:14. It was near Mareshah (v. 15) and is identified as Tell ej-Judeideh, about 2½ km. (1½ mi.) NNE of Beit Jibrîn.

The Palestinian Exploration Fund excavated Tell ej-Judeideh in 1899-1900 under the direction of F. J. Bliss (cf. *PEQ* [1900], pp. 87-101, 199-222; Bliss and Macalister, *Excavations in Palestine, 1898-1900* [1902]). Many jar handles with royal stamps were found (with the inscription *lmlk*, 'to the king," followed by the name of a city), as well as handles with private stamps giving some personal names known in the OT.

Moresheth was the home town of the prophet Micah, who is called "Micah of Moresheth" (Mic. 1:1; Jer. 26:18; AV "the Morasthite").

The compound name Moresheth-gath indicates not only a relationship to the city of Gath, one of the five leading cities of the Philistines (1 S. 6:17), but also some degree of domination exercised by a larger and more powerful city over smaller towns in its area. Verse 18 mentions

Stamped jar handle from Moresheth-gath. The inscription reads *lnḥm 'bdy*, "to Nahum, Abdi" (Israel Department of Antiquities and Museums)

both fortified cities and country villages controlled by the Philistine Pentapolis (cf. 7:25).

Micah 1:15 names Moresheth-gath as one of the cities of the Shephelah that would figure in an invasion of Palestine by the Assyrians.

See *EAEHL*, III, *s.v.* "Judeideh, Tell" (M. Broshi).

C. E. DE VRIES

MORIAH mō-rī'ə.

1. [Heb. *har hammôrîyâ*]. The prominent hill of Jerusalem upon which Solomon's temple was built. 2 S. 24:16-25 describes the site as "the threshing floor of Araunah the Jebusite" and implies ("go up") that it was on high ground, as threshing floors often were. 1 Ch. 21:16-26 names "Orman the Jebusite" as owner of the threshing floor to which "David should go up." Only 2 Ch. 3:1 refers to the temple site as "Mount Moriah" (also called ZION; cf. Ps. 65:1 [MT 2]; Jer. 31:6), thus reflecting a theological tradition that was to develop later. See below and the comms. by P. Ackroyd (*Torch*, 1973), pp. 106f., and H. Williamson (*NCBC*, 1982), pp. 203-205.

2. [Heb. *'ereṣ hammôrîyâ*]. "The land of Moriah" (Gen. 22:2), a hill territory that was a three-day journey from Beer-sheba. The topographical requirements could be met by some hilltop sanctuary in the Hebron district, possibly the Râmet el-Khalîl (MAMRE). In some texts, as well as in Samaritan claims, "Moriah" (Gen. 22:2) reflects the Moreh ("sight," "vision") of Gen. 12:6, a place near Shechem where a sacred oak grew (Jgs. 9:6; *see* MOREH, OAK OF). 2 Ch. 3:1 probably intends to associate the temple mount with the theophanies of both 2 S. 24 and Gen. 22:14. Josephus (*Ant.* i.13.1f. [222-27]; vii.13.4 [329-334]), Jub. 18:13, rabbinic literature, and Islamic folklore concerning the Dome of the Rock made this connection explicit.

P. L. GARBER

MORNING [Heb. *bōqer*–'daybreak, morning' (e.g., Gen. 1:5; Ex. 7:15), *šaḥar*–'reddish light before dawn' (e.g., Gen. 19:15; Ps. 139:9), *mišḥar*–'light before dawn' (Ps. 110:3), *'ôr*–'light,' 'daybreak' (Neh. 8:3), *šāḵam*–'rise early' (Jgs. 6:38; 19:9; 2 K. 6:15); Gk. *prōí* ("in the morning," Mt. 16:3; 20:1; 21:18; etc.), *prōïa* (Mt. 27:1), *prōïnós* (Rev. 2:28; 22:16), *órthros* ("early in the morning," Jn. 8:2), *orthrinós* ("early in the morning," Lk. 24:22), *orthrízō* ("early in the morning . . . came," Lk. 21:38)]; AV also DAY, EARLY, MORROW, "dawning of the day," etc.; NEB also DAWN, DAYBREAK, DAYLIGHT, EARLY, etc.; **MORNING STAR** [Gk. *phōsphóros*–'bringing light'] (2 Pet. 1:19); AV DAY STAR.

The Hebrews reckoned a day as a unit of time lasting from evening to evening (cf. Gen. 1:5, 8, 13, 19, 23, 31). Morning was the beginning of the light part of the day and the second component of their threefold division of the day (evening, morning, and noon; cf. Ps. 55:17 [MT 18]). Postexilic and NT times saw a twelve-hour day measured from sunrise to sunset (or dawn to dusk, Jn. 11:9; cf. Mt. 20:1-12). Morning sunrise marked the end of the third night watch in OT times (Ex. 14:24; Jgs. 7:19) and the end of the fourth night watch in Roman times (Mt. 14:25 par. Mk. 6:48). Morning began at sunrise, usually calculated at 6:00 A.M. The first hour was therefore 7:00 A.M. and the sixth hour was noon (cf. Mt. 20:5).

The most common OT word for "morning" is Heb. *bōqer*, which is derived from a root meaning "to split" or "to break"; hence morning is the splitting of darkness by daylight. *Bōqer* can refer to a period of time (e.g., Gen. 19:27) or to the precise moment when light begins to overrule darkness (e.g., Jgs. 16:2).

"Morning" (*bōqer*) is first mentioned in the creation account of Gen. 1; it began when God separated the light from the darkness (v. 5; also vv. 8, 13, 19, 23, 31; cf. Job 38:12). In the OT morning was a time for travel (Gen. 24:54; Jgs. 19:8f.; cf. Gen. 19:15), for waging war (Josh. 8:10; 1 S. 11:11), and for decisive action (Gen. 28:18; Josh. 7:16; 2 S. 11:14). It was also the time of day when God provided manna for Israel in the wilderness (Ex. 16:7-24). Occasionally revelation was received from God in the morning (Nu. 16:5; Jgs. 6:38).

More importantly, morning was a time of prayer (Ps. 5:3 [MT 4]; 88:13 [MT 14]), sacrifice (Lev. 6:12 [MT 5]; 9:17), and worship (1 S. 1:19). The morning was a time of rejoicing (Ps. 30:5 [MT 6]) and was eagerly awaited (130:6) because it symbolized God's faithful love, mercy, and justice for His people (cf. 90:14; 92:2; Isa. 33:2). As each dawn brings a new day, so the morning reminded Israel of the freshness, reliability, and vastness of God's care for His people (cf. Lam. 3:23; Zeph. 3:5).

In the NT the early morning was the time when Jesus prayed (Mk. 1:35), taught in the temple during His passion week (Lk. 21:38), was tried by the Jews and delivered to Pilate (Mt. 27:1; Mk. 15:1); it was also the time when the women arrived at Jesus' tomb (Lk. 24:22).

Jesus Christ is described as the "morning star" in 2 Pet. 1:19 (*phōsphorós*) and in Rev. 2:28 (*astḗr prōïnós*), and He identifies Himself as "the bright morning star" (*ho astḗr ho lamprós ho prōïnós*) in Rev. 22:16. This apocalyptic motif reflects OT and intertestamental teaching on the "celestial" nature of Messiah and His advent (cf. "star of Jacob," Nu. 24:17; "sun of righteousness," Mal. 4:2 [MT 3:20]; T. Levi 18:3; T. Jud. 24:1). "Morning star" actually refers to the planet Venus, which appears in the eastern sky just before sunrise and the beginning of the new day. Jesus Christ is the "Venus star," that first light which marks the dawn of the new age (cf. Mt. 24:29-31). The words also connote the brightness of His second coming (already portended in the Transfiguration; cf. 2 Pet. 1:16-19). Believers in Thyatira who conquered and kept Christ's works until the end were promised the "morning star" (Rev. 2:28), i.e., possession of Jesus Christ and the blessed hope of life everlasting (cf. 22:16). *See also* LIGHT.

A. E. HILL

MORNING WATCH [Heb. *'ašmōreṯ habbōqer* (Ex. 14:24; 1 S. 11:11); Gk. *heōthinḗ phylakḗ* (Jth. 12:5)]. The last division of the night. *See* DAY II; DAY AND NIGHT; WATCH.

MORNING, WINGS OF THE [Heb. *kanpê-šāḥar*] (Ps. 139:9); NEB FLIGHT TO THE FRONTIERS OF THE MORNING. The psalmist seems to be picturing a flight from the extreme East (the place where the dawn breaks) to the extreme West ("the uttermost parts of the sea"). *See* ASTRONOMY II.B.

MORROW. *See* TOMORROW.

MORROW AFTER THE SABBATH. *See* SABBATH.

MORSEL [Heb. *paṯ* (e.g., Jgs. 19:5; 1 S. 28:22), *kikkār* (2 S. 2:36), hithpael part. of *lāham*–'swallow greedily' ("delicious morsels," Prov. 18:8; 26:22); Gk. *psōmíon*]; AV also MEAT, SOP, "wound"; NEB also LITTLE FOOD, SOMETHING TO EAT, BREAD, CRUST, DISH,

PIECE. A bit of bread that is used for food. As a gracious host, Abraham modestly offered a "morsel of bread" to his three visitors (Gen. 18:5) — and then served them a lavish meal (vv. 6-8; cf. Jgs. 19:5; 1 S. 28:22; *see also* ENTERTAIN). Boaz invited Ruth to eat some bread and dip her morsel in wine (Ruth 2:14). Job maintained that he was not guilty of eating his morsel alone — a figurative way of saying that he shared his food with the poor (Job 31:17). In Prov. 18:8; 26:22 the words of a slanderer are compared to delicious morsels, probably a reference to the "appetite for evil gossip and the relish with which it is . . . devoured" (W. McKane, *Proverbs* [*OTL*, 1970], pp. 519f.; similarly KD). The AV rendering "wounds" is based on LXX *malakoí*. Ps. 147:17 figuratively describes hailstones as morsels of bread that God scatters on the earth.

In the NT "morsel" occurs only in Jn. 13:26-30. In an action that most of the disciples did not understand, Jesus, acting as the host at the Last Supper, dipped a bit of food (probably — but not necessarily — bread) into a sauce and gave it to Judas, who accepted it and left the room to betray Him.

The AV uses the term also in He. 12:16, where it renders Gk. *brôsis* by "morsel of meat" (RSV, NEB, "meal").

P. L. BREMER

MORTAL; MORTALLY [Heb. *ʾĕnôš* ("mortal man," Job 4:17), *bᵉnê ʾāḏām*–'children of man' ("mortal men," Ezk. 31:14), hiphil of *nāḵâ*–'strike' (+ *nepeš*–'life') ("wound mortally," Dt. 19:6, 11), *ḥālāl*–'pierced' ("mortally wounded," Ezk. 30:24); Gk. *phthartós*–'perishable' (Rom. 1:23), part. of *apothnḗskō*–'die' (He. 7:8), (*prós*) *thánaton*–'(unto) death' (1 Jn. 5:16f.; Rev. 13:3, 12), *thnētos*–'mortal, subject to death' (Rom. 6:12; 8:11; 1 Cor. 15:53f.; 2 Cor. 4:11; 5:4)]; AV also "children of men" (Ezk. 31:14), DEADLY, SLAY, UNTO DEATH, THAT DIE, CORRUPTIBLE; NEB also "common doom" (Ezk. 31:14), "take a life," "strike a blow," DEADLY, etc. Related to death, usually in one of two ways: (1) subject to death or (2) causing death.

In most passages "mortal" bears the meaning "subject to death." Subjection to decay and death is the common lot of all mankind (cf. Ezk. 31:14), and the fleetingness of human life is a pervasive theme in the OT (e.g., Job 4:17-21; Ps. 39:4-6 [MT 5-7]; 90:3-12; 103:15f.; *see also* DEATH II). The biblical concept of human mortality, however, refers to more than mankind's natural vulnerability to death and decay: it also points to the moral condition of the human race. The biblical writers perceived an intimate connection between human mortality and human sinfulness (cf. Gen. 2:17; 3:19). This theme was developed especially by Paul (cf. Rom. 6:23: "For the wages of sin is death . . ."; cf. also 5:12-14). And just as sin is not produced by and confined to the body but is produced by the whole person that allows sin to rule the body (cf. 6:12), so also mortality applies to the whole of human nature and not simply to the body (in contrast to the Platonic idea of the immortality of the soul; *see* IMMORTAL I.A; V). The whole person (described as Heb. *ʾĕnôš* and *geḇer* in Job 4:17; *see* ANTHROPOLOGY III.A) is unable to measure up to the righteousness and purity of God, who alone is inherently immortal (1 Tim. 6:16; cf. Rom. 1:23: the folly and perversity of idol-worshipers is that they worship "a copy of an image of mortal [*phthartós*] man" and other creatures in place of "the glory of the immortal [*áphthartos*] God"). It is only through the divine gift of life in Jesus Christ that mortal human nature can "put on immortality" (1 Cor. 15:53f.; cf. Rom. 8:11; 2 Cor. 4:11) or — to use another metaphor — that everything in human nature that is presently inclined toward death and decay "may be swallowed up by life" (5:4). *See* IMMORTAL; *see also* DEATH V.

In a few passages "mortal" means "deadly" or "leading to death." Severe wounds are mentioned as a cause of death in Dt. 19:6, 11; Ezk. 30:24; Rev. 13:3, 12. The meaning of "mortal sin" in 1 Jn. 5:16f. has been the subject of much debate. John recommends intercessory prayer for fellow Christians who commit "what is not a mortal sin" but not for those who commit "sin which is mortal" (Gk. *hamartía prós thánaton*; AV, lit., "sin unto death"; NEB "deadly sin") — although he does not in fact forbid prayer for such persons. Some scholars have suggested that "mortal sin" is sin that leads to the immediate physical death of the sinner (cf. Acts 5:1-11; 1 Cor. 5:5; see Bruce, pp. 124f.); but most have understood it as sin that results in eternal death. Perhaps the soundest interpretation is that offered by I. H. Marshall (p. 248): "Sin that leads to death is the deliberate refusal to believe in Jesus Christ, to follow God's commands, and to love one's brothers. It leads to death because it includes a deliberate refusal to believe in the One who alone can give life, Jesus Christ the Son of God." *See also* SIN XI.

MORTAL SIN. *See* MORTAL.

MORTAR.

1. [Heb. *mᵉḏôḵâ*] (Nu. 11:8); [*maḵtēš*] (Prov. 27:22; Zeph. 1:11). A vessel in which items are pounded or ground with a pestle.

It is likely that *mᵉḏôḵâ* is the typical mortar found frequently on almost all archeological excavations. Usually made of basalt or related magmatic stone because of its hardness and abrasiveness, mortars were used to crush grain into flour, herbs into seasonings and medicines, and various materials into pigments, dyes, and cosmetics. In Roman and Byzantine times, according to the Mishnah, large mortars could be embedded into the floors of houses. Small mortars could be carved very delicately for use as cosmetic palettes. But the most frequent forms are medium in size (15 to 25 cm. [6-9 in.] in diameter) and shaped like

Tripod mortar of medium size, from Jericho (Israel Department of Antiquities and Museums)

a thick bowl. Finer examples were made with three feet. Copper mortars are known from rabbinic literature, and Herod's temple was furnished with mortars of gold. According to Nu. 11:8 a *mᵉḏōḵâ* was used to grind manna into flour to be used in making cakes. The Akkadian cognate (*daku*) of the verbal root from which *mᵉḏōḵâ* is derived means "kill," indicating the violent, beating nature of the activity associated with this item.

The second word translated "mortar," *maḵtēš*, probably should be understood as a geographical or geological formation, a HOLLOW place as the RSV translates the word in Jgs. 15:19. Prov. 27:22 can certainly be understood in this fashion, as can Zeph. 1:11. Modern Hebrew uses the word as a geographical descriptor in names such as Maktesh Ramon in the central Negeb. The use of the term "pestle" in Prov. 27:22 would be a logical part of a metaphor to be used with such a mortarlike natural depression.

2. [Heb. *ḥōmer*] (Gen. 11:3; Ex. 1:14; Isa. 41:25; Nah. 3:14); NEB also CLAY, MUD; [*meleṭ*; cf. Syr. *mlṭ*] (Jer. 43:9); AV CLAY; NEB CEMENT. An initially plastic material, which may harden when dry; used to bind bricks or stones together in construction.

The common mortar of ancient Palestine (*ḥōmer*) was made of clay or soil sometimes mixed with straw for binder and lime for hardener. Isa. 41:25 and Nah. 3:14 seem to indicate large, open vats of mortar mixed at one time. Clay dries so slowly that when covered a single batch could last for several days. After the ingredients had been placed together workers entered and mixed the materials by treading on them. Ex. 1:14 makes it clear that this was very hard work. In Mesopotamia BITUMEN could be used for mortar, because it was readily available (Gen. 11:3).

The hapax legomenon *meleṭ* in Jer. 43:9 is problematic, because it would seem difficult to hide large stones in the mortar-filled interstices of a flagstone pavement as the text seems to suggest. The word probably means cracks or open spaces which, in more modern parlance, could indicate potholes.

The best masons needed no mortar because they used stones which were very finely cut to fit tightly. Ordinary houses also used no mortar. For these reasons mortar is a relatively infrequent find on archeological excavations. All brick constructions, of course, used mortar, but it is very difficult at times to separate the bricks from the mortar, which was essentially undried brick material.

L. G. HERR

MORTAR, THE [Heb. *hammaḵtēš*]; AV MAKTESH; NEB LOWER TOWN. A part of the city of Jerusalem, apparently near the Mishneh (second quarter) and the Fish Gate (Zeph. 1:11). Heb. *maḵtēš* occurs three times in the OT: Prov. 27:22, where "mortar" and "pestle" are used literally (*see* MORTAR); Jgs. 15:19, translated "a hollow place" near Lehi; Zeph. 1:11, which intends a portion of Jerusalem. In all three passages the Greek translators appear to have had difficulty with the word, translating it "hollow" only in the B text of Jgs. 15:19. In Zeph. 1:11 the LXX translates "the [city that has] completely fallen" (*katakekomménēn*). The shape of a mortar determines the location in Jerusalem; it is quite likely at the confluence of the cross valley and the Central Valley but possibly somewhat farther north in the Central Valley.

See JERUSALEM II.B; III.D.5.e.

See J. Simons, *Jerusalem in the OT* (1952), pp. 52f. n. 2.

W. S. L. S.

MORTGAGE. Used by the RSV, AV, and NEB in Neh. 5:3 to translate the Hebrew verb *ʿāraḇ*, "give (or become) surety." In this passage it refers to putting up real estate as security on a loan. Some poverty-stricken Jews were forced to put up their property as a PLEDGE in order to secure loans for buying food. Vv. 5, 11 show that the creditors had already taken over these lands, thus depriving their fellow Jews of a means of income and making it impossible for them to redeem their sons and daughters sold into slavery. This was a violation of Israelite law, which was designed to protect the poor from oppression by the rich, and it provoked Nehemiah's righteous indignation (vv. 6-11). *See* DEBT; INTEREST; LEND; OPPRESS III.

N. J. O.

MORTIFY. A term used by the AV in the obsolete sense of "put to death" (cf. RSV, NEB), which is a literal translation of Gk. *thanatóō* (Rom. 8:13) and *nekróō* (Col. 3:5). In both passages Paul calls his readers' attention to the ethical implications of their union with Christ. If they have died and been raised with Christ, then their lives must show that they have died to the rule of sin and are now governed by the new principle of life in the Spirit. *See* DEATH V; OLD NATURE.

MOSERAH mō'sə-rä [Heb. *môsērâ*–'bond'] (Dt. 10:6); AV MOSERA; **MOSEROTH** mō'sə-roth [Heb. *môsērôṯ*–'bonds'] (Nu. 33:30f.). An Israelite encampment during the wilderness journey, between Hashmonah and Bene-jaakan (Nu. 33:30f.). According to Dt. 10:6, however, the people traveled from Beeroth Bene-jaakan (= Bene-jaakan) to Moserah, where Aaron died. This tradition thus seems also to conflict with that of Nu. 33:38, which states that Aaron died on Mt. Hor (but *see* HOR). The location of Moserah is unknown.

See also WANDERINGS OF ISRAEL.

MOSES mō'zəs [Heb. *mōšeh*; Gk. *Mōysēs*]. The liberator and lawgiver of Israel, the most important person in the OT. While Abraham may be regarded as the founder of Israel's faith, Moses is the founder of Israel's religion.

I. Historicity and Date.–Many who have affirmed the historicity of Moses have often questioned certain elements of the traditions embodied in the pentateuchal narratives (or regarded them as embellishments; cf. Auerbach, Bimson, Horn, Herrmann, *Israel in Egypt*, p. 61). After observing that many of the key figures of the Exodus narrative

are unnamed (e.g., Pharaoh and his daughter; Moses' mother, father, and sister — in ch. 3, that is), Herrmann said, "Thus we are left ultimately with only the mighty figure of Moses, which cannot be put aside as invention or interpolation, but which is constitutive for the whole account" (*Israel in Egypt*, pp. 41f.).

One of the vexing problems relating to Moses is the dating of the Exodus (*see* EXODUS, DATE OF THE). The Merneptah stele (*ca.* 1233 B.C.) seems to indicate that the Hebrews had already arrived in Canaan; thus it provides a *terminus ad quem*. The so-called biblical date is based on 1 K. 6:1, which places the Exodus 480 years before Solomon's fourth year (967 B.C.). This would date the Exodus *ca.* 1447, during the reign of Amenhotep II. Since concrete information on the sojourn and Exodus was not evident in Egypt, biblical scholars naturally looked to Palestine for data to determine when the Conquest took place. Then they could reckon back forty years to find the date of the Exodus. Initially this approach appeared successful when Garstang's work at Jericho produced a destruction level that he dated *ca.* 1400 B.C. Subsequently, however, K. Kenyon's work showed that Garstang's conclusions were erroneous.

The work of Albright, Wright, and others uncovered destruction in levels from the 13th cent. in many sites in Palestine, thus opening the way for widespread acceptance of the thirteenth-century date. This squared nicely with the appearance of Raamses in Ex. 1:11 as the name of one of the store-cities built by Hebrew forced labor. Thus it was concluded that the Exodus occurred in the first third of Ramses II's reign, (i.e., *ca.* 1304-1275). Many scholars followed this dating scheme, even those of a more conservative position (e.g., Kitchen, Harrison); some, however, continued to hold to the traditional dating (S. Schultz, *OT Speaks* [3rd ed. 1980], p. 48; M. Unger, *Archaeology and the OT* [1954], p. 148; J. Rea, pp. 58f.). Others advocated a date as late as the 20th Dynasty (1200-1085; cf. M. B. Rowton, *PEQ*, 85 [1953], 46-60).

In a most thorough review of how scholarship has dealt with the dating of the Exodus, Bimson argued quite convincingly for a mid-fifteenth-century date. Basing his conclusions on an exhaustive reassessment of the Palestinian sites traditionally associated with Joshua's conquest, he suggested that the termination of the M.B. II culture, usually attributed to the Hyksos and the kings of the early 18th Dynasty, should be lowered to *ca.* 1430 B.C. and credited to the Israelites.

Thus some have returned to a fifteenth-century date, or at least recognized its possibility (cf. S. Horn, p. 23, who chided those who criticize the earlier date but uncritically accept the thirteenth-century date). But this is by no means the position of the majority. The issue is far from settled; perhaps future excavations will provide new evidence.

II. Life.—*A. Early Years.* The period from Moses' birth until his flight from Pharaoh is perhaps the most intriguing part of his life, and yet one that is most obscure. According to later tradition Moses was forty years old when he left for Midian (Acts 7:23), but the OT is silent on this. Ex. 7:7 reports that he was eighty when he returned to Egypt, and Dt. 34:7 says he was one hundred twenty when he died. Although these figures may be approximate, they suggest a stylized division of his life into three forty-year periods: the first, in the Egyptian courts; the second, in Midian; and the third, during the Exodus and the period of wandering.

1. Birth. The narrative dealing with the birth of Moses and his placement in the "ark of rushes" by his mother to save his life (Ex. 2:1-10) has been likened to the tales surrounding the birth of Sargon the Great, king of Akkad (Gressmann; Redford, *Numen*). The story of the humble beginnings of a child who achieves hero status is thought to be a borrowing from the well-known motif found in Near Eastern, Classical, and Indian literature, and is often relegated to a later strand of the Exodus traditions (Childs, *Exodus*, pp. 11f.). In the more than thirty stories that deal with the birth of a child who is then abandoned (for his own safety), many include a prophetic statement that the child will grow up to be a king. This usually leads the reigning monarch to try to kill the baby or all babies (Redford, *Numen*; his category II contains thirteen such examples). Gressmann wanted to fit the birth of Moses into this classification. As Childs (*JBL*, pp. 109f.) has pointed out, however, this element about the prophecy is missing in Ex. 2. Moses' leadership was never a threat to Pharaoh's crown. Therefore, Pharaoh's edict had nothing to do with the birth of Moses.

Others think the purpose of the Sargon tale was to legitimate his kingship, since his birth would have been under very special circumstances and his pedigree clearly royal. This interpretation has been challenged by H. Güterbock (*Zeitschrift für Assyriologie*, 42 [1934], 62-64), who believed that the function of the Sargon tale was oracular, and its purpose was to consolidate the future by tying it to the past. Other Near Eastern kings whose legitimacy was questioned (e.g., Amenemhet I, Hatshepsut, Ḫattusilis) used apologetic literature showing divine favor to help legitimate their kingship. This would have been true of Sargon, a Semite who had usurped the throne of the Sumerian king Ur-Zabbaba. The narrative about the birth of Moses appears to have no apologetic intent. Moses does not need this so-called rags-to-riches tale to legitimate his leadership. His position comes by the divine appointment of Ex. 3, not from the birth narrative.

Since the setting of Ex. 2 is Egypt, one might expect any borrowing of the abandoned-child motif to reflect Egyptian tradition. But similar Egyptian stories are not true parallels (Redford, *Numen*, p. 219). These are regarded as purely etiological, which Childs claims is not the case with the Moses story. Redford favored a Levantine or Mesopotamian origin for the motif that would have been known in the 2nd millennium B.C. Since the majority of the tales come from Greek, Anatolian, and Indian traditions, the origin of the motif might be Indo-European. This would explain why the motif is not found in Egypt until Ptolemaic times, when it would have been imported by the Greeks. The Moses story, therefore, may well have had a completely independent origin.

Many scholars (e.g., Beegle, p. 52; cf. Childs, *Exodus*, p. 18) believe that Ex. 2:1 makes it appear that Moses was the firstborn, a mistake due to the "lateness" of the birth narrative. But it is hard to believe that the author (or subsequent redactor[s]) would create the impression in v. 1 that Moses was the firstborn and then so naturally tell about his elder sister in v. 4 (cf. 7:7, which states that Aaron was three years older than Moses). The birth of Moses was simply the first birth to this family after the king's edict, making Moses the endangered child. There was no need to mention the birth of Miriam and Aaron since they were not subject to the edict.

Ironically the daughter of the king is the one responsible for saving the child's life. (There is no way to be certain that she was the reigning monarch's daughter; her father could just as well have been the preceding king.) Attempts to identify this princess must be viewed with skepticism, since a king who reigned for a substantial period could have had many daughters. Ramses II, it has been reckoned, may have had around one hundred daughters!

Some who favor the fifteenth-century date of the Exodus have suggested Hatshepsut as a possible candidate for this unnamed princess (*see* EXODUS, DATE OF THE III.B.2).

This creates the problem that she could then have been the ruler from whom Moses fled for fear of being killed (2:15). It seems unlikely that the same woman who had sympathy on Moses the baby would not have compassion on her adopted son in this case of involuntary manslaughter.

The discovery of the tomb of a daughter of Seti I (and sister of Ramses II) at Saqqârah (G. T. Martin, *JEA*, 69 [1983], 25-29) raised another possibility for the unnamed princess. The name of Seti's daughter is Tia, and a connection between this woman and "Bithiah the daughter of Pharaoh" in 1 Ch. 4:17 has been put forward. It has been suggested that Bithiah is a corruption or an abbreviation for *baṯ (meleḵ) tîyâ*, "the daughter (of the king), Tia." The appearance of this Egyptian princess in the genealogy of Judah is puzzling. Her position in the list seems to be too late to fit the thirteenth-century Tia.

Regardless of the date of the events in Ex. 2 and the identity of the princess, she was responsible for Moses' being brought up in the court along with the royal children. Albright (p. 123) saw no reason to doubt this tradition. Because of Moses' connections with the court he would have received the education of a prince that later traditions ascribe to him (Acts 7:22; Josephus *Ant.* ii.9.7–10.2 [236-253]). Life in the royal harem for the prince was a very good one that included learning to read, training in weapons and horsemanship, etc. (cf. *NBD*, 843f.).

2. Name. The etymology of Moses has long been associated with the Egyptian root *msi* ("to bear") and would probably fit nicely into the popular name formulas of the New Kingdom (e.g., Ahmose, Thutmose, Amenmose, Ramose; the second *s* in Moses reflects the LXX writing of the name). But this poses a linguistic problem, for when the name Rameses appears in Gen. 47:11 and Ex. 12:37; Nu. 33:3, 5 (cf. Raamses in Ex. 1:11), the Hebrew letter *s* is used, whereas in the name of Moses Hebrew *š* is used. These two sibilants are quite different phonetically and therefore cast doubt on associating the two words. The best discussion of this problem still is that of J. G. Griffiths. Griffiths pointed out that there are essentially two types of loanwords: those of a temporary nature (e.g., a place-name) and those that find a permanent place in the language of the borrower (esp. personal names). Thus, e.g., in Phoenician inscriptions the Egyptian goddess Isis is written with *s* when *š* is expected. More interesting is the mixed name *ʿana(t)mošʿe)* (9th cent., found at Samaria), which incorporates the name of the Canaanite goddess Anath with the Egyptian root *msi*, written with *š* rather than *s*. Therefore Canaanite or Hebrew *š* can equal Egyptian *s*, and the name Moses may well find its root in Egyp. *msi*.

Herrmann believed that Moses' Egyptian name could have come from his servitude (or that of his parents) to some member of the royal family. From the Middle Kingdom, lists of servants on papyri show that many of these had Semitic names while their children had Egyptian names (*ANET*, pp. 553f.). Sometimes they actually bore the name of their master or mistress.

The name of Moses, then, may have been part of a theophoric name (i.e., divine name + *mōse*). (The name *mōse* [with no divine name], meaning "son" [Cassuto, pp. 20f.], cannot be ruled out, however.) Once aware of his Hebrew, monotheistic tradition, Moses may have dropped the pagan deity's name, leaving only the verb stem. Since many date the birth of Moses to the Ramesside period (though such a date is still debated), the name Raʿmose(s) is frequently suggested, sometimes with great certainty (e.g., *ISBE*, III, 2084). The abbreviation Mose for the longer theophoric names is attested in the New Kingdom (*ca.* 1570-1085; see Griffiths, pp. 226f.).

After Moses grew (and perhaps was weaned) he was brought to the princess and then named "Moses" (Ex. 2:10). Part of the problem surrounding the naming is that the meaning of "Moses" is said to be "draw out," which argues that Jochebed named him, not the princess as many assume. The statement, "She called [*wattiqrāʾ*] his name Moses, for she said [*watt'ōmer*]" could apply grammatically to either woman, the mother or the princess. Kitchen (*NBD*, p. 845) and Cassuto (pp. 20f.) favored the mother as the speaker. Noth (*Exodus*, p. 26) recognized that the nature of the woman's statement requires the use of Hebrew. Some have falsely assumed that the Hebrew writer imposed the Hebrew language on the princess here as in 2:6f. It is far more likely that the Hebrews were bilingual (cf. the Joseph story, where it is clear that in just over ten years in Egypt Joseph had mastered the Egyptian language, e.g., Gen. 42:23).

It might be expected that Moses' name would appear in the passive form since he was "drawn out" of the water. In fact it is written in the active voice (*mōšeh*), no doubt a deliberate wordplay: written in this fashion it lent itself to the Egyptian word *mōse* (meaning "son") or divine name + *mōse*, which is undoubtedly how the princess understood the name. Both the Egyptians and the Hebrews enjoyed wordplays and this is clearly a bilingual one. Symbolic wordplays between Egyptian and Hebrew words and concepts are known elsewhere (cf. J. K. Hoffmeier, *Journal of the Society of the Study of Egyptian Antiquities*, 11 [1981], 167f.).

B. Refuge in Midian and Call. The enslavement of the Hebrew people had begun before the birth of Moses (Ex. 1:11-14). In the years between 2:10 and 2:11 Moses had grown to manhood and the oppression had continued. Although thoroughly Egyptian in language, dress, and culture, Moses had not forgotten his Hebrew roots. One day as he toured the work sites (perhaps in some official capacity) he observed a Hebrew being beaten (apparently to death — hiphil part. of *nāḵâ*) by an Egyptian taskmaster (2:11-15). This angered Moses, who in turn struck (hiphil of *nāḵâ*) the Egyptian dead when he thought no one was watching. But word of this incident reached Pharaoh, who was enraged and sought to kill Moses. This led him to flee across the Sinai to Midian (located on the eastern side of the Gulf of Aqabah; certain Midianite tribes may have been located in southeastern Sinai). He there met the nomadic peoples of the area when he helped the daughters of Reuel/Jethro the priest of Midian (*see* JETHRO for discussion of the interchange of these names). Moses and Jethro established a good relationship, and Jethro married his daughter Zipporah to Moses.

A literary parallel between this section of Moses' life and the Egyptian "Tale of Sinuhe" has been recognized (Herrmann, *Israel in Egypt*, pp. 45f.; Beegle, 56f.; tr. in *ANET*, pp. 18-22; M. Lichtheim, *Ancient Egyptian Literature*, I [1973], 222-233). Both stories reflect well the hospitality shown by bedouin to their guests. In both cases the chief marries his daughter to "the Egyptian" (as Moses appears to the daughters of Jethro, Ex. 2:19) who was escaping the wrath of Pharaoh. Both return to Egypt to appear before Pharaoh, albeit under different circumstances.

Moses' stay in Midian proved to be valuable in several ways. It has been suggested that Jethro, the "Midianite priest" (Ex. 2:16), was a worshiper of Yahweh (18:10-12 bears this out) and that Moses was introduced to Yahwism by Jethro. The Midianites, it must be recalled, were the descendants of Abraham's and Keturah's son Midian (Gen. 25:1). The Keturah tribes apparently were linked in a tribal confederacy with the Ishmaelites (note the close association between the Midianites and Ishmaelites, Gen. 37:25-28; Josh. 8:22-24) as well as with the Medanites (so MT, Gen. 37:36; *see* MEDAN). Such tribal confederacies were well known in Syria-Palestine during the 2nd mil-

lennium B.C. For example, Abraham was an ally (*b°rît*) of Mamre, Eshcol, and Aner (Gen. 14:13), who joined him in fighting the coalition of Mesopotamian kings to free Lot (v 24). Likewise, while living in Syria (Retjenu) Sinuhe could speak of his tribal confederates.

Since the Ishmaelite-Midianite(-Medanite) confederacy was made up of descendants of Abraham, it is not inconceivable that they knew "the God of Abraham." The name of Yahweh is thought to appear in Egyptian monuments as early as the time of Amenhotep III (1416-1379). The writing *ya-h-wa* is appended to the name Shasu (bedouin), who were primarily located in northern Sinai and Edom (see M. Astour, "Yahweh in Egyptian Topographic Lists," in M. Görg, ed., *Elmar Edel Festschrift* [1979], pp. 17-33). Therefore Moses may well have been introduced to Yahweh, "the God of Abraham," while in Midian. His introduction to Yahweh was necessary since he had been raised in the Egyptian court and may not have known his Hebrew religious heritage.

Also, by staying in the area of Sinai-Midian Moses became familiar with the terrain and would have gained valuable experience in wilderness survival, which would prove valuable to the future leader of the Israelites in that same area. And by living in Midian and marrying into Jethro's family, he became the brother-in-law of Hobab, who would act as a guide for Moses and the Israelites in their trek from Sinai to Moab (Nu. 10:29-32).

The greatest and most important experience of Moses in his exile from Egypt was his call by God at the mount of God, Sinai (Ex. 3:1–4:17). The call of Moses is also one of the thornier problems in the Pentateuch. Literary critics see this unit as a blending of J, E, and P traditions, largely because of the use of the divine names (Beegle, pp. 59-63; Clements, pp. 19-21; Childs, *Exodus*, pp. 52-56; Noth, *Exodus*, pp. 38-40). Scholars still disagree, however, about how the unit is to be divided into the different sources. The use of the divine names as a criterion for determining sources is extremely unreliable (cf. W. J. Martin, *Stylistic Criteria and the Analysis of the Pentateuch* [1955]; Kitchen, *Ancient Orient*, pp. 112-125; *see also* PENTATEUCH). The wide range of the conclusions by literary critics shows that this methodology should be subordinated to a more objective approach.

According to Ex. 3:1-3 Moses discovered the theophany. The principle of discovery is consistent with records of theophanies in other religious traditions (M. Eliade, *The Sacred and the Profane* [Eng. tr. 1959], pp. 20-24). Furthermore, mountains are often associated with such manifestations, not because the gods are thought to dwell there but because the mountain marks the meeting place of heaven and earth (Eliade, pp. 40-42.)

The precise location of the call of Moses is disputed. The traditional location is Jebel Mûsā in southern Sinai, although nearby Jebel Serbal has also been suggested. A location in northeastern Sinai, closer to Kadesh-barnea, has been proposed. According to 17:1ff. the Israelites moved toward Mt. Sinai and stopped at Rephidim for a while. Verses 1-6 suggest that Rephidim was in Horeb, but that the Israelites had not quite reached the mountain (cf. 19:1f.). Since a Wâdī Refâyid (which is cognate with Rephidim) is located near Serābīṭ el-Khâdim (an Egyptian mining center often identified with Dophkah, an early stop on the Israelites' journey; cf. Nu. 33:12-16), a southern location seems preferable to the northern one. Furthermore, Dt. 1:2 states that it is an eleven-day journey from Horeb, by way of Edom, to Kadesh-barnea. This, too, seems to argue in favor of a more southern location. The problem of the designations Sinai and Horeb for this area is discussed below (II.E). *See also* SINAI.

When the theophany appeared in the bush, Moses saw "the angel of Yahweh." As Moses approached the "fiery bush" God called to him by name. The presence of the "angel of Yahweh" and 'Elohim's speaking have been cited as evidence of the blending of the J and E traditions (Beegle, pp. 59-61). But this pattern of the appearance of an angel followed by a speech of 'Elohim (or Yahweh) is consistent with other OT theophanies (e.g., Gen. 18:1-10 records that three men appear to Abraham; one turns out to be Yahweh [18:10-33] and the other two were angels [19:1]; similarly, see Josh. 5:13–6:2 and Jgs. 13:3-8, where angels are seen before Yahweh speaks). It could be that the angel appears and then speaks Yahweh's word without Yahweh actually appearing. Alternatively, perhaps the angel precedes the theophany as the guardian of the divine presence (Gen. 18:1-10 supports this). In any event, the encounter of Moses with God fits a well-established pattern and need not be seen as a conflation of traditions.

Yahweh introduced Himself as "the God of Abraham, Isaac, and Jacob" who had seen the suffering of His people, Israel. His plan was to "come down" and deliver the Israelites and bring them back to Canaan. Cassuto (p. 34) noted that the expression "come down" (Heb. *yāraḏ*) is well known in Canaanite literature to describe "divine intervention in human affairs." In this case deliverance was the purpose, while elsewhere in the Pentateuch *yāraḏ* occurs in contexts of judgment ("go down," Gen. 11:7; 18:21).

God told Moses that He would send him to Pharaoh (Ex. 3:10) to help secure Israel's release. Moses' response is to be expected: "who am I that I should go to Pharaoh . . .?" (3:11). God assured Moses that He would be with him.

The dialogue continues in 3:13ff. with Moses asking God the name by which He should be introduced to the Israelites. What follows is the disclosure of the divine name *YHWH* (Yahweh), which is derived from the verb *hāyâ*, "be." Inherent in this name and the description is the unchanging character of "the Lord God Almighty who was and is and is to come" (Rev. 4:8b). (For additional information on the divine name and titles of God *see* GOD, NAMES OF.) Buber (p. 48) argued that this emphasis on the character of Yahweh, not simply the name, was the purpose behind Moses' question. In 3:13 Moses posed the question "what is your name" with the interrogative *mah*; normally *mî* is used to inquire about one's name (Buber, p. 48; J. Motyer, *Revelation of the Divine Name* [1959], pp. 18f.). Therefore, Motyer argued, Moses did know the name Yahweh; it was something more of the character of Yahweh that he wanted to know in order to communicate it to the Israelites.

Literary critics have seen this passage (J-E) as a parallel account to Ex. 6:2ff. (P; Clements, pp. 23, 37; Beegle, pp. 90-92). The contexts of the two are different, however, and other differences have been recognized by form critics (e.g., Childs, *Exodus*, p. 111). Ex. 6:2ff. appears to be a further word to Moses to assure him that despite the initial rebuff from Pharaoh, Yahweh would fulfil His covenant (apparently that of Gen. 15 and 17, which promised Canaan as Israel's possession after a four-hundred-year period of enslavement in another land). The declaration "I am Yahweh" is completely different in form from the introduction of the divine name in 3:14f. The formula "I am god (or king) X" is well known in ancient Near Eastern texts as "an elevated style of address which asserts the authority of the speaker of the name" (Childs, *Exodus*, p. 113). Noth believed that the affinities between the two are so close that 6:2ff. was a literary expansion on Ex. 3. This explains why there was no need to discuss the etymology and meaning of the name Yahweh in 6:2ff.

What is extremely perplexing is God's statement in 6:3 that He had appeared to the patriarchs as God Almighty (*'ēl šaddāy*), "but by my name Yahweh I did not make myself known to them." This statement was the *locus classicus* for nineteenth-century scholars who argued that the religion of Israel had evolved (in accordance with current evolutionary theory). While the evolutionary model has been abandoned by most historians of religion, some OT scholars still maintain that a new name for God was given at this point (e.g., Childs, *Exodus,* p. 113). This view is questionable for two reasons. (1) It assumes that the use of Yahweh earlier in the Pentateuch (e.g., Gen. 22:14) is anachronistic. (2) It dismisses some possible extrabiblical occurrences of Yahweh in the 2nd millennium, e.g., fifteenth-century Egyptian inscriptions that appear to use Yahweh's name in connection with the Shasu bedouin and the occurrence of the name *Yahwi-el* at Mari (Beegle, p. 70). Most scholars explain the former as a geographic designation and the latter as a verb form (see, e.g., F. M. Cross, *Canaanite Myth and Hebrew Epic* [1973], pp. 60-75; de Vaux, pp. 334, 337-348; *TDOT,* V, *s.v.* "yhwh" [Freedman, O'Connor]).

It appears that more than a literal reference to knowledge of the divine name is behind God's statement "by my name Yahweh I did not *make myself known* [*nôḏaʿtî,* niphal of *yāḏaʿ*] *to them.*" Both Cassuto and Motyer argued that the use of the niphal form is not the normal way of referring to such disclosures (cf. Ezk. 20:9, which refers to the Exodus as the way God made Himself known [*nôḏaʿtî*] to the nations). Motyer argued that the meaning was thus *revelation* (p. 13).

The word *yāḏaʿ* can mean more than simply to know a fact. It also means to experience and to know in a sexual sense (and therefore it means to know intimately). As the prophets looked back on the Sinai experience, they regarded it as the marriage ceremony of Yahweh and Israel (e.g., Hos. 13:5; Hosea uses this term throughout his book in the sense of intimate and sexual knowledge). Ezekiel also discussed the wilderness experience in 16:1-14. Here clearly the marriage motif is used. Even though this passage is allegorical, it does refer back to the Sinai event. God speaks of finding Israel as an abandoned baby (16:4-6) whom He cared for and nourished. After she had matured He "spread his skirt" over her, a way of claiming her for marriage (Ruth 3:9); this claim is followed by the promise of marriage or betrothal. In Near Eastern marriage customs a written or unwritten covenant agreement preceded the actual marriage. The marriage was consummated on the wedding night (e.g., Gen. 29:21-23).

It may be that Ezekiel looked back in history and saw the Abrahamic covenant as the betrothal (cf. Ex. 6:4) and the revelation at Sinai as the consummation of the marriage. The choice of *yāḏaʿ* in Ex. 6:3, as in Hos. 13:5 and Ezk. 20:9, bears out the sexual intimacy of the union that was about to take place. The Sinai revelation and covenant were unique, and therefore God could say that in this sense (i.e., marriage covenant) He had not been *known* to the patriarchs.

C. Before Pharaoh. Moses returned to Egypt after his commission by Yahweh with the assurance that God would be with him and that his staff would be a vehicle for God to show His power over Egypt (4:1-17). Additionally, Moses had been informed that "all the men" who were seeking his life were now dead (v. 19). This is an interesting statement, for it could mean that the king (from whom Moses had fled) and his co-regent were dead. The length of time that Moses was in Midian is described as "many days."

At God's instruction, Aaron joined Moses at "the mountain of God," where Moses informed his brother of the mission to which they had been called. When they returned to Egypt Moses and Aaron approached the Israelite elders believing that God had seen the affliction of His people and that He would liberate them (vv. 29-31).

The situation of the Israelite bondage had not changed. Moses requested that the Hebrew people be excused from work in order to go into the wilderness to celebrate a feast to Yahweh (5:1-3). This request may have had a precedent. Egyptian work rosters from Deir el-Medinah occasionally mention a person being absent from work for some religious observance. The king's response is an emphatic "no," with the addition of increased quotas. The Egyptians were very conscious of quotas. This applied to a quarrying expedition to Sinai or even to brick making (Kitchen, *Ancient Orient,* pp. 56f.). In the latter, even the Egyptians fell far behind the daily quotas (Kitchen, *Tyndale Bulletin,* 27 [1976], 140-42).

Moses was understandably distressed by this turn of events, and so God encouraged him that He was about to fulfil the promise made to Abraham (6:2-9; see II.B. above for discussion of this passage).

With Aaron at his side Moses approached the king once more, and the contest between Yahweh and Pharaoh began (7:8-15). Perhaps Moses' earlier connections with the court gave him the opportunity to approach Pharaoh. The story of Aaron's staff turning into a serpent and this act being matched by the Egyptian magicians has been called "fanciful" by some (e.g., Beegle, p. 96). But the writer has seen present-day snake charmers handle a cobra that remained as stiff as a stick one moment and then at a command began to move freely. Apparently the charmers use some sort of hypnosis or by massaging create a temporary paralysis. See *Biblical Archaeology Review,* 9/3 (1983), 72f.

When this initial show of strength proved fruitless, the plagues began in earnest (*see* PLAGUES OF EGYPT). The accounts of the ten plagues (7:20–12:22) are regarded by source critics as an excellent illustration of the blending of the sources J, E, and P (*IDB,* III, 822-24; Beegle, pp. 92-96; Childs, *Exodus,* pp. 130-142). Some who subscribe to this literary analysis of the plague cycle admit, however, that the results of separating the traditions are "rather unsatisfactory" (Auerbach, p. 50). Other scholars have argued that the ten plagues have a literary unity, which Childs maintained is simply due to final redaction (*Exodus,* pp. 130f.). Cassuto suggested that the plague stories were originally an epic poem, traces of which can still be seen in the use of parallelism and rhythm (pp. 92ff.). This may account for the complex literary quality of this section.

The historicity of the plagues is generally accepted even by more liberal scholars. G. Hort's thorough study (*ZAW,* 69 [1957], 84-103; 70 [1958], 48-59) has been instrumental in demonstrating that the first nine plagues can all be linked to natural occurrences, the first seven arising out of an especially high Nile. The Nile being turned to blood (or the appearance of blood) echoes a statement in the "Admonitions of Ipuwer" (a late 12th-Dynasty work): "Lo, the river is blood."

After the first nine plagues the Egyptians greatly feared Moses and the Israelites (11:3) and no doubt were only too happy to see the Hebrews leave (v. 2). But one more decisive plague was needed to persuade the stubborn monarch that liberating the Israelites was in his best interest.

God instructed Moses that the final plague would affect everyone in Egypt, including Israelites (who had been exempt from the previous plagues [Ex. 9:4, 26]), unless they responded in faith to what God was about to do. The tenth plague would be the death of all the firstborn in Egypt, including the crown prince (11:5). The Israelites

would be spared if they sacrificed an unblemished, year-old lamb and sprinkled the blood on the doorposts and lintels of their houses (12:5-7). This was to take place on the evening of the 14th of Abib (Nisan). As God Himself traveled through the length of the land, every house would be struck with the plague unless the blood was seen on the doorway. For those who had so responded, God would pass over (*pesaḥ*; vv. 12f.). For this reason, PASSOVER was to be celebrated as an annual memorial of God's deliverance from Egypt (v. 14).

D. Exodus. The results of this plague (which cannot be explained by natural causes) evoked an immediate response from Pharaoh; Moses and his people were free to leave (12:31f.). The group started from Rameses and headed for Succoth to pick up other Israelites along the way. Added to this number were other peoples, called "a mixed multitude" (*ʿēreḇ*). Perhaps these were other Semites and Ḫabiru who had been pressed into forced labor. The number of people leaving Egypt with Moses is debated. The text reads six hundred *ʾelep* (usually translated 600,000) men, as well as women and children (12:37). If one assumes at least an equal number of women and of children, the total could easily approach two million. This figure presents several problems when consideration is given to the terrain in Sinai through which this large group would have to pass. Furthermore, in the initial attempt to conquer Ai in Josh. 7:2-5, the Israelites suffered a grave setback in which thirty-six were killed. This number is hardly a serious loss to an army that would have exceeded 600,000 (Nu. 1:45f.)! The problem lies not with the text of Ex. 12:37 but with the interpretation of *ʾelep*. While *ʾelep* does mean one thousand, it also means a tribal unit or clan (*CHAL*, p. 18). Therefore, six hundred *ʾelep* could refer to the number of units. Following this interpretation one could read the figures for each tribe as, e.g., Nu. 1:21 (Reuben's fighting men), forty-six *ʾelep* totalling 500 rather than 46,500). Counting through the twelve tribes, one arrives at a total of 598 *ʾelep* or 5,500 men (see Beegle, p. 141). In the light of the figures from the census in Nu. 1, which was to determine the size of Israel's fighting force (made up of men twenty years old and upward, Nu. 1:3), the six hundred *ʾelep* could be a round figure. The grand total, including the tribe of Levi (not counted in the census), along with women, children, and elderly men, may have been between fifteen and twenty thousand.

The Israelites were humanly led out of Egypt by Moses, but divinely guided by a pillar of cloud by day and a pillar of fire at night (Ex. 13:21). The normal route to Canaan was along the northern coast of Sinai and then north via Gaza. But for two reasons the Israelites did not go that way. First, God had indicated to Moses that the people were to assemble before him at "the mountain of God" (3:12). Second, 13:17 relates that the Israelites were not led "by the way of the land of the Philistines [known in Egyptian as the way of Horus] although that was near, for God said, 'Lest the people repent when they see war, and return to Egypt.'" For many years it has been known that a network of forts with garrisons protected Egypt's northern frontier. It was also known from pictorial and inscriptional material from Ramesside times that such forts were located periodically along this well-traveled route to guarantee Egyptian control. One of these forts, uncovered at Deir el-Balaḥ (near Gaza), has prompted the excavator T. Dothan to suggest that the Egyptian military presence was what the Israelites feared (report at the International Congress of Egyptology in Toronto, Ontario, Sept. 1982). Moses may well have known about these forts from his earlier flight from Egypt.

The precise movements of the Israelites from this point are difficult to reconstruct since many of the place-names are not known with certainty (*see also* EXODUS, ROUTE OF THE). Ex. 12:37 suggests that Moses led the people from Rameses, which could be the city of 1:11 or the name for the area (Gen. 47:11; also known as Goshen in Gen. 47:6). Probably Hebrews lived in Succoth; this would account for the Israelites' going there first. If Succoth is to be identified with Tell el-Maskhûṭah then it is located at the east end of the Wâdī Ṭumilât, an important route of travel to northern Sinai. This is probably why military outposts were in the area (cf. E. Bleiberg, "The Location of Pithom and Succoth," in J. K. Hoffmeier and E. S. Meltzer, eds., *Egyptological Miscellanies* [*Ancient World*], 6 [1983], pp. 21-27). Papyri Anastasi V and VI (cf. *ANET*, p. 259) make clear that a number of military installations, forts, and "walls" were in the east end of the Wâdī Ṭumilât. In one of the letters in Anastasi V (*ANET*, p. 259) an officer of one of these outposts during the 19th Dynasty reported that he had not seen the two runaway slaves that he had been sent to hunt down, but he had seen their footprints. A second letter (Anastasi VI, *ANET*, p. 259) mentions the monitoring of the Edomite bedouin who were passing the fort. These communications illustrate that the Egyptians were very concerned to maintain control of their borders. Thus the Israelites moved north to avoid contact with these forts. Ex. 14:2 suggests that the Israelites were in the general vicinity of Baalzephon (perhaps Tell Defneh) and Migdol (Egyptian Sile). Migdol, as the Hebrew name bears out, was also a fortified installation on the northern frontier of Egypt (A. Gardiner, *Ancient Egyptian Onomastica* [1947], II, 202f.). Its Egyptian name was *ḥtm ỉ3rw*, "the fortress of Tjelu." No doubt the Israelites wanted to avoid this location.

While they were between Baal-zephon and Migdol, near Pi-hahiroth (14:2, 9), the identification of which is still unknown, Pharaoh decided to pursue his runaway slaves (14:1-7). He believed the Hebrews to be "entangled in the land; the wilderness has shut them in" (v. 3b). This may allude to the difficulty the Israelites were having in trying to escape Egypt; the forts and impassable desert areas had impaired their exodus. The chariot corps was dispatched to round up and return the escapees.

God had forewarned Moses of the coming of the Egyptian force (14:1-4). When the Israelites saw the approaching chariots, they were understandably fearful and began to complain to Moses and blame him for their plight (vv. 10-12). Here Moses' faith and strong leadership emerged. He was convinced that God would deliver Israel from the charging Egyptian army and the "sea of reeds" against which they were pinned. Throughout the narrative it is clear that God wanted to show Pharaoh, once and for all, that He is supreme (vv. 4, 17). At God's bidding, Moses commanded the people to move forward toward the sea; he raised his staff and the waters were divided, providing a way of escape. The text explains that a "strong east wind" was used to part the waters (v. 21). When the Egyptian chariotry pursued the Israelites their wheels became clogged and hampered movement (vv. 24f.). After the Israelites had gone through, Moses stretched out the staff once again, and the waters returned to their place, thus inundating the Egyptian army (vv. 26-31). This great triumph for Yahweh and His people is echoed in the so-called Song of the Sea or Song of Moses (ch. 15; *see* MOSES, SONG OF).

For a discussion of the Re(e)d Sea problem, *see* RED SEA.

E. From Egypt to Sinai. The deliverance of the Israelites was a test of Moses' leadership, but the testing did not end when the Egyptians were left behind. From this point

on the people continually murmured against Moses and the plan of seeking freedom. The pattern is that the people complain to Moses, who in turn calls on God. Ex. 15:23-25 records a problem with water, a real concern for anyone traveling in the Sinai. The water found at Marah (which in Hebrew means "bitter") was bitter and therefore undrinkable. When Moses cried to God, He told him to throw a tree in the water, and the water became sweet. In Ex. 16:2-8 the people murmur about the lack of food. In this situation God provided MANNA from heaven (vv. 14-16) and QUAIL, which "covered the camp" (v. 13). While the quail appear to have been available for a short period, the manna was available throughout the wilderness wanderings (v. 35).

During their stay at Rephidim, the Israelites again murmured against Moses because of the lack of water (17:1-4). Moses was instructed to strike "the rock at Horeb" with his staff and water would spring forth. By following God's command the water was produced. But Moses was clearly angered by his people; thus he called the place "Massah" (proof) and "Meribah" (contention) "because of the fault-finding of the children of Israel, and because they put the Lord to the proof by saying 'Is the Lord among us or not'" (v. 7).

Also while at Rephidim the Israelites encountered their first military opposition (vv. 8-13) — the Amalekites, descendants of Edom-Esau (Gen. 36:12). Apparently they were a seminomadic people whose movements took them as far north as the southern Negeb (1 S. 30:1-10); they were fearful that the presence of the Israelites in their territory could deplete their grazing land, food, and water sources (Beegle, p. 186).

Moses took his position on a nearby hill, with his associates Aaron and Hur, who upheld Moses' hands until Israel triumphed. The gesture of holding up hands is associated with prayer (cf. 1 K. 8:22f.; Ps. 63:4 [MT 5]). While Moses was apparently engaged in the spiritual end of the battle, JOSHUA (whose name appears here for the first time) was in the valley below leading the army in the fighting (Ex. 17:9, 13).

Apparently only a short distance from Rephidim was the mountain of God where the revelation of Yahweh and the giving of the law was to take place (Ex. 19:1f.). Ch. 18 records the arrival of Jethro, ZIPPORAH, and her children to meet Moses. Apparently Moses had sent his wife and children back to her father when he feared for their safety in Egypt (18:2f.). The activities described in ch. 18 appear to take place after the arrival at Sinai. Therefore many have speculated about its placement before ch. 19, which speaks of the arrival at "the mountain," but no convincing answers have been put forward (Childs, *Exodus*, pp. 321f.).

The Israelites had come to this location because they were to "serve" God at the same spot where He had appeared to Moses (Ex. 3:12). This statement comes in the context of Moses' call to liberate the enslaved Hebrews (3:1–4:17). The theophany takes place at "the mountain of God." Some think that this mountain had a history of theophanies, but that Moses was simply not aware of this (Buber, p. 39). Cassuto (p. 30) is probably correct in saying that "mountain of God" is used "proleptically," i.e., "the mountain that was destined to become God's mountain" by virtue of the revelation that was to take place (Ex. 19ff.).

Exodus 3:1 may provide crucial information on locating the mountain of God: "Now Moses was keeping the flock of his father-in-law, Jethro, the priest of Midian; and he led his flock to the west side of the wilderness, and came to Horeb, the mountain of God." The translation of *'aḥar* (lit. "behind") as "west" is possible and is supported by some commentators (Cole, p. 62; cf. Childs, p. 49). Since Midian, which was E of the Gulf of Aqabah, would have been the starting point of Moses, his point of reference would have been the east (or Midian) and thus *'aḥar* would refer to the Sinai Peninsula. (Although this seems far from his home base, shepherds are forced to move where pasture is available [cf. Gen. 37; 46:1].)

The use of Horeb (*ḥōrēḇ*) rather than Sinai (*sînay*) in 3:2 has provoked much discussion. Literary critics observe that Horeb is the name of the sacred mountain in the E and D traditions, while Sinai is preferred by J and P (*IDB*, IV, 376; Clements, p. 19; Noth, *Exodus*, pp. 31-35). While it is generally true that the name Yahweh appears when Mt. Sinai is mentioned in the Pentateuch, in Ex. 31:18 it is on Mt. Sinai that Moses receives the two tablets of stone that God (*'ĕlōhîm*) had written with His finger. After being in the presence of Yahweh for forty days and nights, Moses descended Mt. Sinai after talking with God ('Elohim, 34:28f.). So there are two occasions where God ('Elohim) is mentioned in connection with Mt. Sinai. (Mt. Sinai is mentioned sixteen times in the Pentateuch.) In Deuteronomy (1:6, 19; 4:10; 5:2; 9:8; 18:16; 29:1) when Horeb is mentioned "Yahweh your (or our) God ['Elohim]" is used. Only in Dt. 4:15 does the name Yahweh appear alone. So the use of divine names in connection with Horeb or Sinai is not consistent and therefore simply cannot be used as a criterion for sources or authorship. Also, it seems unlikely that the name of the place where God made His covenant with Israel would have been confused and thus give rise to different traditions since the Sinai theophany was the most important event in the history of Israel. OT scholars generally agree, regardless of the critical approach used, that Horeb and Sinai refer to the same place and that the terms are used synonymously. *See also* SINAI.

F. Theophany. The high point in the career of Moses is the intercessory role he played on the mountain of God. The people were informed that in three days they were to stand before the mountain, where the revelation would take place (Ex. 19:10-15). In the meantime the people were to sanctify themselves, including washing their clothes (19:10). The mountain was to be cordoned off and thus segregated from the profane, and no one was to pass the markers (19:12f.; for a discussion of segregation of a holy spot from a phenomenological perspective with numerous examples from Egypt see J. K. Hoffmeier, *"Sacred" in the Vocabulary of Ancient Egypt* [1985]).

On the third day, Yahweh descended onto the mountain, which was wrapped in smoke and fire (19:16-20). What followed was the ceremony in which the covenant was made (chs. 20–24). The form of this ceremony fits into the six-point structure of Hittite suzerainty-vassal treaties of the period 1600-1200 B.C. (Kitchen, *Bible in Its World*, pp. 79-85; *see* COVENANT [OT]). The ceremony on the mountain culminated with a fellowship meal attended by Moses, other leaders, and the seventy elders (24:9-11). The leaders witnessed God (apparently shrouded) and they were unharmed because they had been properly initiated (24:5f., 8). Following the ceremony of the verbal declaration of the law, Moses received instructions concerning the building of the tabernacle, the ark of the covenant, priestly regalia, and cultic paraphernalia (chs. 25–31). Most of the material contained in this section is attributed to the priestly writer and dated late (see Haran; Childs, *Exodus*, 529f.). Some of the material, however, is considered early (Childs, *Exodus*, 531f.). The questions about the date of the material arise partly from the differences in terminology for the structure(s). The tabernacle (*miškān*) would house the ark and be located in the center

of the camp while the tent of meeting (*'ōhel mō'ēḏ*) was pitched outside the camp and was named by Moses (33:7). The functions of the two were different. The *miškān* appears to be the residence of God (as the root *škn* implies), while the "meeting" is where He would appear at appointed times (Haran, p. 58). In other words, the *miškān* was both the palace and place of Yahweh's appearing. The *'ōhel mō'ēḏ* was a place where people could go to seek God (33:7-10) and worship. The function of the tabernacle was more cultic, the tent of meeting more a place of prophetic utterance (Nu. 11:24f.), where Moses would converse with God (Ex. 33:11). The importance of this tent increased when the mountain was no longer available as a place from which one could call on God.

Because Moses could communicate with God in this unique way, he asked God if he could see His glory (Ex. 33:18). This suggests that in the theophanies in Ex. 19–32 God's glory was veiled by the smoke; thus Moses wanted to see God unveiled. The nature of God made such a request impossible, but God did reveal more of His glory, allowing Moses to see His back (33:20-23). The nature of Moses' relationship to God is unique in the OT, a point acknowledged by God (Nu. 12:6-8).

The material contained in the covenant of Ex. 20–24 was presented to Israel orally by God. Now the time had come for the covenant with the stipulations (or laws) to be recorded. So Moses was summoned to the mountain to receive the tablets of stone on which God had inscribed the laws (31:18). During Moses' stay on the mount, the Israelites under Aaron's leadership made the golden calf and worshiped it (32:16). When he descended and saw what was taking place, Moses threw down the tablets, shattering them (v. 19). The Israelites had violated the first and second commandments, or two of the covenant stipulations. By destroying the inscribed tablets Moses may have been trying to nullify the covenant in order that Israel might not immediately be destroyed by God.

Through this incident Moses emerges again as the intercessor for his people (32:30-34). He was willing to receive the punishment due the people rather than let them be destroyed.

At God's command, Moses made replacements of the original tablets (34:1f.) and the laws were rewritten on them (vv. 27f.). This time when Moses descended the mountain he was met by people who witnessed an unusual phenomenon: "Moses did not know that the skin of his face shone because he had been talking with God" (v. 29). The Hebrew verb rendered "shone" is *qāran*, which may literally mean "have horns" (as in Ps. 69:31 [MT 32]; cf. *qeren*, "horn"; the Vulgate translated this as "horns" and is thus the source for some medieval representations of Moses with horns). As the commentators point out (e.g., Cassuto, pp. 448f.; Childs, *Exodus*, p. 604) the word is used here metaphorically and may be related to the common depiction in ancient Near Eastern iconography of horns or rays as symbols of power on crowns of divinities. The LXX understood the word metaphorically, and Paul explained it in the same way (2 Cor. 3:7f., 12f.).

G. From Sinai to Moab. After a stay in the vicinity of Mt. Sinai for nearly a year (Nu. 10:11) the Israelites moved on "at the command of the Lord by Moses" (Nu. 10:13). Nu. 1–10 describe a census taken by Moses at God's directive (1:1-3; 4:1-3). The purpose was twofold: to determine the size of Israel's fighting force (1:3), and to find out the number of Kohathites available to serve in the "tent of meeting" (4:3).

This segment of the wilderness period was most difficult in every way. Moses received the complaints of the people on many occasions and had to intervene when God's wrath was released on them (e.g., 11:1-3, 4-15; 20:2-7; 21:4-9). His leadership was challenged by Aaron and Miriam (12:1-8) and also by some of the priests headed by Korah (16:1ff.). In both cases God vindicated Moses.

God's intention in leading Israel to Mt. Sinai was to make the covenant. From there the plan was for Israel to move to Canaan via the Negeb. From Kadesh-barnea, in the wilderness of Paran, Moses dispatched the twelve spies (one representing each tribe) to determine the best route for invasion (13:1-16). After forty days of spying they returned, but only Joshua and Caleb gave a promising report concerning the feasibility of conquest (14:6-10). The people accepted the report of the other ten and were prepared to return to Egypt (14:1-3).

This display of unbelief angered God, who was ready to destroy the people (14:10b-12), but Moses pleaded the cause of Israel, arguing that should God do this, it would be a victory for Egypt and Israel's enemies. Above all, God could not then fulfil His promise to give Israel the Promised Land (14:13-19). This act of rebellion marked the tenth occasion that Israel had broken faith with God (14:20-22). Therefore God would not allow that generation, except Joshua and Caleb, to enter Canaan; rather, they would remain in the wilderness forty years and die (14:26-35).

The forty-year length of the wandering cannot be doubted, since Dt. 2:14 mentions that it was thirty-eight years from the departure from Kadesh until the crossing of the brook Zered in Moab. The number forty is used so often in the OT that it appears to have a symbolic meaning for a period of judgment, purging, purification, or rest (e.g., Gen. 7:17; Jgs. 3:11; 5:8; 8:28; Jonah 3:4). No doubt the forty years of the wilderness gave rise to the later symbolic use.

The most tragic event in the life of Moses took place at Kadesh when he did not follow God's instructions (Nu. 20:1-13). The parallels between this story and that of Ex. 17 are so numerous that many scholars assign Nu. 20 to P and Ex. 17 to JE (Beegle, p. 299). The most troubling point is that the spot is named Meribah in both stories (Ex. 17:7; Nu. 20:13). Apart from this, the differences between the two are so great that they appear to be independent traditions. In Nu. 20:8 Moses is told to take the rod with him, but to speak to the rock in order to produce water. But he struck the rock twice (Nu. 20:11). In Ex. 17:6 Moses is instructed to strike the rock. It has been pointed out that in disobeying God's directive, Moses was rebelling against God, since in the OT these two concepts are related and associated with unbelief (Nu. 20:12; see Wenham, *Numbers* [*Tyndale OT Comms.*, 1981], p. 150). Just as the unbelief of the nation in Nu. 14 prevented them from entering the Promised Land, so Moses' rebellion barred him from this privilege.

The association of Nu. 20 with P is questionable. Dt. 32:48-52 recalls the incident and gives it as the reason for Moses being denied entrance to Canaan. It is thought that P simply looked back at this and expanded the story to explain why Moses did not enter Canaan (Beegle, p. 300). But some studies on P from grammatical, linguistic, and socioreligious perspectives raise very serious questions on the lateness of the priestly material (see, e.g., G. Rendsburg, *Journal of the Ancient Near Eastern Society of Columbia University*, 12 [1980], 65-80; A. Horvitz, *RB*, 81 [1974], 24-56; *A Linguistic Study of the Relationship Between the Priestly Source and the Book of Exodus* [1982]; Z. Zevit, *ZAW*, 94 [1982], 481-511).

After Israel's unsuccessful attempt to enter Canaan from the Negeb (Nu. 14:39-45), the Canaanite king of Arad felt confident that he could destroy Israel (21:1), and he enjoyed initial success. But Israel rallied, and with God's help conquered some of the cities of the Negeb (vv. 2f.).

H. Conquest of Transjordan. The conquest of Transjordan was the first step in taking possession of the Promised Land since this area was to be allotted to the tribes of Reuben, Gad, and Manasseh (Nu. 32). Transjordan was controlled by the Edomites in the south, the Moabites in the area E of the Dead Sea, and the Ammonites E of the Jordan River and N of Moab. The accounts of the conquest of this region are recorded in Nu. 20–24 and Dt. 2. The key figures who confronted Moses and the Israelites were Sihon king of Heshbon, Og king of Bashan, and Balak king of Moab. Sihon and Og were the Amorite overlords of the area, while Balak was a Moabite. Israel's policy was simply to pass through this region without fighting Edom, Moab, and Ammon, because they were all distantly related (cf. Gen. 19:36-38; Dt. 2:4-6, 9, 19), but they met opposition (Nu. 20:14-21) and so had to detour to the east of this area (21:4, 10-13). Even against the Amorite kings the Israelites had no desire for conflict, only to pass through (v. 21). When passage was denied, battle ensued and Israel defeated these kings. The details are incomplete but the event was well remembered (vv. 27-30; cf. Dt. 2:26-37; Josh. 24:12; Ps. 135:11).

The historicity of these events has been called into question due to the complexities and apparent tension between the traditions of Deuteronomy and Numbers (cf. J. Van Seters, *JBL*, 91 [1972], 182-197; M. Weippert, "Israelite 'Conquest' and the Evidence from Transjordan," in F. M. Cross, ed., *Symposia* [1979], pp. 15-34). While such investigations raise important critical questions, the solutions proposed are not especially convincing.

The archeological evidence for the Conquest has been problematic. From his survey of sites in Transjordan N. Glueck concluded that there was a hiatus in settled occupation of Transjordan from 1900 B.C. to the beginning of the Iron Age (*Explorations in Eastern Palestine* [*AASOR*, 15, 1935]). This evidence lent support to the thirteenth-century date of the Conquest, when Moab would have been reestablishing fortified cities. Subsequently Glueck modified his conclusions, and more Middle and Late Bronze material has come to light (Bimson, pp. 61-68; Weippert, pp. 25f.). Excavations at Heshbon, however, have revealed no material from before 1200 B.C. Problems surrounding the Israelite conquest of Transjordan thus remain. The Israelite presence at an early date (pre-monarchy) cannot be denied. Jephthah (Jgs. 11:12-26) argued with the Ammonites that the Israelites' right to the territory went back three hundred years when they took it, not from the Ammonites and Moabites, but from the Amorite Sihon. Furthermore, the Moabite stone (*ca.* 830 B.C.) mentions that the men of Gad had been living in Ataroth from time immemorial (*m'lm*).

I. Deuteronomic Legislation. While camped in the plains of Moab and waiting for the command to enter Canaan, the Israelites received the Deuteronomic legislation. As early as the beginning of the 19th cent., de Wette had thought that Deuteronomy was written during Josiah's reign (7th cent. B.C.) to provide the apologetic needed for his reforms (2 K. 22:3-13). This interpretation of the origins of Deuteronomy is certainly the most widely accepted by source critics (*see* DEUTERONOMY).

The book itself claims to be Moses' interpretation or explanation (*bē'ēr*, "explain," Dt. 1:5) of the law. The form of the book fits into the Hittite covenant treaty formula and appears to be a covenant renewal (Kitchen, *Bible in Its World*, pp. 80-85). The fourth section of the Hittite treaty called for the periodic reading of the treaty by the vassal. Ex. 24 does not specify how often this should take place, but since the wilderness tradition has no record of such a renewal earlier, it appears that it was to take place during each generation. Josh. 24 contains such a renewal at the end of Joshua's life, perhaps for the next generation. In Dt. 31:10f. Moses informed the people that on the sabbatical year the law was to be read publicly.

Moses not only took the lead in this ceremony, but he also established the tradition that the role of the scribes was to teach and interpret the law (e.g., Ezr. 7:10). Since Moses was "explaining" the law, he digressed in certain areas and expanded in others. But throughout, the passion of a preacher who is concerned with his flock is very evident. He regarded commitment to the covenant and its stipulations as an actual encounter with God at Horeb just as had happened at the initial revelation (Dt. 5:2-5). In other words, the faith of Israel involved a dynamic, ongoing theophany.

Moses finished writing a copy of "this law" (Dt. 31:9, 24), and it was given to the Levites to place in the ark along with the tablets of stone (vv. 24-26). Moses then addressed a song to the people reminding them of God's past faithfulness and of his future provision (Dt. 31:30–32:1-43). Shortly before his death Moses gave one last blessing to the people (Dt. 33). In form it is very much like Jacob's blessing (Gen. 49:1-27), in which each tribe is mentioned by name and is given an appropriate blessing.

At the age of 120 (Dt. 34:7) Moses died, after seeing the Promised Land from the top of Pisgah on Mt. Nebo, and was secretly buried by God (34:6). Thus Moses, the servant of God, completed his course, liberating his people from Egypt, being the medium of receiving God's law, and bringing Israel to the land of their inheritance.

III. Work and Ministry.—In the Pentateuch Moses has many different roles. He was the divinely appointed leader of Israel and thus had both civil and religious duties. Some scholars are disturbed by Moses having so many qualities; they see him as larger than life and therefore regard some of these attributes as embellishments. But Moses was indeed an outstanding figure, and later tradition must have had its basis in reality. His special encounters with God at Sinai are reason enough to elevate him to such a position in biblical and postbiblical traditions.

A. Leader. Without a doubt Moses was Israel's greatest leader, though he was a reluctant one (Ex. 3:11) who was aware of his limitations (4:10). For this reason, God provided Aaron to be his spokesman (4:14-16; 7:1). Throughout the period of the plagues Moses emerged as a strong individual who was willing to confront Pharaoh. Under the extreme pressure of the situation at the sea of reeds (14:13-18) Moses showed great confidence in God: "Fear not, stand firm, and see the salvation of the Lord . . ." (v. 13). In his exuberant response to God's saving act, he led the nation in a song of triumph (ch. 15).

One of Moses' responsibilities was to judge. The task was enormous (18:13-16), and Jethro suggested that he appoint other judges to lighten the load (vv. 17-23). Moses responded positively to this suggestion (vv. 24-26), thus illustrating that he did not cling to his responsibilities but was willing to delegate work. We are told that Moses was very meek (Nu. 12:3). Thus when Miriam and Aaron contested his authority (v. 2), he did not try to justify himself. Then God rebuked Aaron and Miriam (vv. 4-8), pointing out that there was no one with whom He communicated like Moses. Miriam, who apparently was the instigator of this incident, was made leprous because of God's anger toward her (vv. 9f.). But Moses could not accept this judgment on his sister; he interceded for her (v. 13), and after seven days she was cleansed.

When Korah led what appeared to be a rebellion against Moses (Nu. 16), once again Moses did not retaliate but said that God would declare which of the two was right.

God clearly responded in favor of Moses (vv. 31-33). Moses apparently felt that, since he had been called by God to lead this people, he did not need to defend himself. Despite these attacks he remained absolutely committed to his people and to God. In so doing he was the prototype for future leaders of Israel.

B. Lawgiver. Moses is best remembered as being the "lawgiver" par excellence. The Pentateuch depicts Moses as the recipient of God's laws, which he in turn passed on to the people after recording them (Ex. 24:4). Ex. 24:12 maintains, however, that some laws were given to Moses in written form by God on the "tables of stone." Those apparently contained the Ten Commandments (Ex. 34:27f.). In the Pentateuch both covenant stipulations and codified laws are present for the theocratic nation. When Moses appeared in history, whether in the 15th or the 13th cent., codified laws had existed in Mesopotamia for a millennium. This is not true of Egypt, since Egypt was ruled by the religio-philosophical concept of *ma'at,* which comprises right, order, justice, truth, etc.

Mesopotamian law codes were actually collections of common laws and legal precedents that could be consulted in legal cases (see J. J. Finkelstein, *JCS,* 15 [1967], 91-103). In the Pentateuch certain legal and religious precedents were established in patriarchal times, e.g., tithing (Gen. 14:20; Nu. 18:24-28) and circumcision on the eighth day (Gen. 17:11-12; Lev. 12:3).

The laws given at Mt. Sinai were not the only legal material to be placed in the Pentateuch. In certain cases laws were subsequently introduced to address particular problems. A good example is the petition of the daughters of Zelophehad that they be able to inherit their father's possessions since he had no son (Nu. 27:1-4). Moses took this case to God, who then declared that women should inherit their father's estate if there were no sons (Nu. 27:5-11).

See also LAW IN THE OT.

C. Prophet. Not only was Moses a prophet, he was the standard by which subsequent prophets were measured. In Dt. 18:15-18 God announced that He would raise up prophets after Moses who would be like him — they would be God's spokesmen. The prophet in Israel was one who constantly called the people back to the covenantal obligations. The meaning of the root of *nāḇî'* (prophet) is "call" (BDB, p. 611). Not only does the prophet call the people's attention to the law, he also receives a "call" from God. The call of Moses in Ex. 3 has been seen as a prophetic call like that of Samuel (1 S. 3:1-14), Isaiah (Isa. 6:1-13), Jeremiah (Jer. 1:4-19), and Ezekiel (Ezk. 1:1ff.) (see Childs, *Exodus,* pp. 67f.).

Prophets were usually intercessors, not in the cultic and sacrificial sense of the priest, but in prayer. Moses so regularly interceded on behalf of sinful Israel (e.g., Ex. 33:12-16; Nu. 11:1f.; 12:13; 14:10b-19; 21:4-9) that he gained the reputation of being effective in turning God's heart from anger (see Jer. 15:1).

Moses also prophesied ecstatically, which is not reported of others until Nu. 11. When God's Spirit rested on others, Joshua wanted Moses to stop them from prophesying, perhaps because Joshua thought this activity was solely the prerogative of Moses. Moses rebuked him (Nu. 11:25-29), again demonstrating his willingness to share his responsibilities.

See also PROPHECY.

D. Author. OT, rabbinic, and NT traditions credit Moses with the authorship of the PENTATEUCH. Early in the Christian era Gnostics began to raise questions concerning Mosaic authorship of the Pentateuch, and Jewish and Moslem scholars continued raising questions into medieval times (see R. K. Harrison, *Intro. to the OT* [1969], pp. 3-7). From the 17th cent. onward much of the quest of OT scholarship was to determine the sources used by Moses or subsequent writers. This was especially true for Genesis since the period it covers is pre-Mosaic. Scholars of the 18th and early 19th cents. raised the legitimate question concerning the ability to write during the 15th cent. B.C. By the end of the 19th cent., however, the cuneiform scripts of Mesopotamia and the hieroglyphic and hieratic writings of Egypt had been deciphered and were being actively studied. The Proto-Sinaitic inscriptions attest an alphabetic script in the 15th cent. (*see* INSCRIPTIONS I.A.3). Not only was writing at a sophisticated level during the 15th cent. B.C., but writing of lengthy literary works could be traced back a millennium earlier. It is now very clear that one cannot use the question of writing for denying a priori that Moses could have been an author.

Since Moses was reared in the royal court (Ex. 2:10) he undoubtedly learned to read and write along with the other princes. The Pentateuch makes several references to Moses recording the events of the wilderness period (Ex. 17:14-16; Nu. 33:2), the covenant (Ex. 24:4, 7), and covenant renewal (Dt. 31:9, 22). That Moses had a central role in the writing and forming of the Pentateuch cannot be denied. However, such statements as "Now the man Moses was very meek, more than all men that were on the face of the earth" (Nu. 12:3) appear to be the words of an editor, not Moses, if the statement is taken at face value. But this description does seem to have come from someone who intimately knew Moses. The questions concerning subsequent editorial work and just when the books appeared in final form are perhaps impossible to answer.

***IV. Outside the Pentateuch.**—A. OT.* In the remainder of the OT Moses is mentioned frequently, mostly in connection with his law, commands, or instructions. The book of Joshua contains more references to Moses than any other book. The approximately fifty occurrences deal mostly with Joshua and the Israelites doing this or that "as Moses had commanded (or directed)" (e.g., Josh. 4:10, 12; 8:33), "according to what is written in the Book of the Law of Moses" (Josh. 23:6), etc. The book of Joshua contains the history of the Conquest after the death of Moses and the allotting of the tribal territories. Moses had given specific directions about these matters (Josh. 11:12; 13:8; 14:3, etc.), so the writer is making it clear that Israel and its leaders were faithful in executing this command. No doubt the great respect the people had for Moses (Josh. 4:14), who had recently departed from them, accounts for the frequency of these references.

The "law of Moses" is mentioned by David (1 K. 2:3) and in connection with Joash (2 K. 21:8) and Josiah (2 K. 23:25). The stone tablets of Moses were apparently in the ark at the dedication of the temple by Solomon (1 K. 8:9).

Moses is remembered as the miracle worker who delivered Israel from the servitude of Egypt (1 S. 12:6-8; Ps. 105:26-37; Isa. 63:11f.; Mic. 6:4). Other events surrounding the wilderness experience are also recalled (Ps. 106:23, 32). Ps. 90 was called "a prayer of Moses." The prophets do not refer to Moses by name as frequently as might be expected, but their messages are couched in covenant terminology with frequent quotations from, and general references to, the Law (e.g., Isa. 1:2; 5:24; 24:5; Jer. 2:8; 9:13; Hos. 4:6; Am. 2:4). Mic. 6:1-8 and Jer. 2:9ff. use the *rîḇ* pattern (a legal letter form charging the covenanted vassal with violation of stipulations and warning that reprisals will follow if the stipulations are not kept). This of course presupposes the covenant of Ex. 20–24.

The postexilic writings continue to refer to the book or law of Moses (Ezr. 6:18; Neh. 1:7f.; 8:1, 3; 9:3; 13:1).

Moses and the Pentateuch play a vital part throughout the OT. It is fitting that Malachi, the last prophetic book (last book of the OT in the LXX and English versions), in the closing chapter should say, "Remember the law of my servant Moses, the statutes and ordinances that I commanded him at Horeb for all Israel" (Mal. 4:4 [MT 3:22]).

B. Intertestamental Literature. As one might expect, this literature not only continues the OT traditions about Moses but also embellishes them. The Apocrypha frequently refers to "the law of Moses" (e.g., 1 Esd. 8:3; 9:39; Tob. 6:12; Bar. 2:2; cf. T. Zeb. 3:4) and "the book of Moses" (e.g., 1 Esd. 1:11; 5:49; 7:6, 9), and 2 Macc. 7:6 refers to the Song of Moses (cf. 4 Macc. 18:18). Several texts recount events of Moses' life, either summarily (e.g., IV Ezra 14:3-6) or with many embellishments (e.g., Sib. Or. 3:253-260; Jubilees; cf. 1 Enoch 89:16-40, which uses the image of Moses as a sheep). 2 Esd. 14:3 refers to the burning bush episode, 7:106 to his intercessory role, and 2 Bar. 17:4 to his death at the age of 120. In his praise of famous men, Sirach says Moses "was beloved by God and man" (Sir. 45:1; cf. vv. 2-6). On the pseudepigraphic Assumption of Moses, *see* APOCALYPTIC LITERATURE III.E.

Moses was also important to the Qumrân community. This community was organized according to the Mosaic law (see F. M. Cross, *Ancient Library of Qumran and Modern Biblical Studies* [rev. ed. repr. 1980], p. 78 n. 36a). Each member took an oath to "return to the Torah of Moses" (1QS 5:8), and anyone who "transgressed a word of the Torah of Moses" would be banished (1QS 8:20-22). Because of their eschatological orientation, they naturally focused more on the prophetic and apocalyptic OT texts, but even here they stressed the "prophet like Moses" and appealed to Moses as the authority for this emphasis (4QTestim 1-8, quoting Dt. 5:28f.; 18:81f.).

Josephus and Philo also have many references to Moses, including extensive accounts of his life (see esp. Josephus *Ant.* ii.9.1 [201]–iv. 7.49 [331]; Philo *De vita Mosis*).

See also *TDNT*, IV, 848-864.

C. NT. Moses' importance extended through NT times as well. Throughout the Gospels, the law of Moses is seen as the absolute standard for faith and conduct among the Jews. Therefore references to the "law," "teaching," and "customs" of Moses abound. There is no question in the NT that the Pentateuch came from the hand of Moses. In fact, "Moses" is used synonymously with "the law" (Lk. 24:27). The Jews believed that God had spoken to him (Jn. 9:29), and therefore they were his disciples (Jn. 9:28).

In His teaching, Jesus Christ regarded the writings of Moses (or the Law) and the Prophets as ultimately pointing to Himself (Lk. 24:27, 44). As an endorsement of this view, the Synoptics all mention that Moses and Elijah appeared to Jesus on the mount of transfiguration (Mt. 17:4; Mk. 9:4; Lk. 9:30).

Since the early Church was mostly Jewish, Moses and the law continued to have a place of importance in its life and teaching. Peter's sermons frequently included quotations of or allusions to the law (Acts 3:22f., 25). Stephen's sermon before the Sanhedrin included nine citations of the name of Moses (Acts 7:20-44). The Epistles have several quotations from Moses, as well as more allegorical interpretations of the life of Moses or events from his lifetime (1 Cor. 10:2; 2 Cor. 3:7, 13, 15; see esp. He. 3:2f., 5, 16; 7:14; 8:5; 9:19; 10:28; 12:21). Moses is upheld in He. 11:23-29 as an example of a man who lived by faith. Finally, in heaven the saints will sing "the song of Moses" (Rev. 15:3), apparently a reference to Ex. 15. Thus Moses is connected with the Bible in some way from Genesis to Revelation.

MOSES, ASSUMPTION OF. *See* APOCALYPTIC LITERATURE III.E.

MOSES' SEAT [Gk. *tês Mōuseōs kathédras*]; NEB CHAIR OF MOSES. In Mt. 23:2, Jesus said, "The scribes and the Pharisees sit on Moses' seat." Many claim that Jesus was referring to a familiar piece of furniture in ancient synagogues and identify the stone chairs excavated from synagogues in Hammath by Tiberias and in Chorazin as the Moses' seat (see Sukenik). With their backs toward Jerusalem the elders of the synagogue sat facing the people. The most prominent elder sat in the stone seat on a raised platform next to the ark containing the OT scrolls. From here, it is supposed, teachers expounded the Mosaic law. This seat symbolized their authority as interpreters of the law in unbroken succession from Moses. The earliest reference to Moses' seat in rabbinic literature appears in *Pesikta de Rab Kahana* 7b where Rabbi Aḥa (*ca.* A.D. 320) referred to a seat of special shape, like the throne of Solomon (1 K. 10:19), that was reserved for the president of the Sanhedrin.

While a conspicuous seat may have been situated at the head of the congregation in the synagogue, Jesus was not referring simply to a physical chair. That "scribes" and "Pharisees" are plural and "Moses' seat" is singular and that in Mt. 23:6 Jesus denounced their love for the first *seats* of the synagogue strongly suggest that He was not referring to a physical sitting but to the collective symbol of their legal authority. The imperatives in 23:3 ("do and keep") are based on the authority implied in v. 2. Mt. 23:2f. is the prelude to the denunciation of the scribes and Pharisees and presents the claims of the Pharisaic scribes to be the ordained guardians and interpreters of the Mosaic law.

D. E. GARLAND

MOSES, SONG OF [Gk. *hē ōdḗ Mōyséōs*]. The name given to the song that John heard the saved singing (Rev. 15:3). Scholars disagree about the identity of this song, since two poetic passages in the Pentateuch are often designated the Song of Moses: Ex. 15:1-18 extols Yahweh's deliverance in the Exodus, and Dt. 32:1-43 recites His faithfulness despite the waywardness of the Israelite nation.

Exodus 15:1-18 is the better known and liked of the two Songs of Moses (it is also called the Song of the Sea [cf., e.g., Cross, *Canaanite Myth*] and the Song of Miriam [cf. Cross and Freedman, *JNES*]). It is quite positive, celebrating the victory of Yahweh at the Red Sea and His miraculous deliverance of His people from the oppressive hand of Pharaoh.

The song does not immediately lend itself to an outline. There are, however, two foci both given in v. 1: God the miracle-working deliverer (esp. vv. 11-17), and the actual defeat of the Egyptian army by drowning (vv. 1, 4f., 10, 12). In vv. 1-3 God is spoken of in the 3rd person almost as if Moses were addressing the people. Beginning with v. 6 he speaks to God, and this continues through v. 17. V. 18 is a kind of doxology. The whole episode appears in a capsule prose form in v. 19.

Another theme dominates the last third of the poem. It is the testimony that such a deliverance will have on the neighboring nations. The miracles were, after all, not merely designed to benefit Israel but proofs to both believers and unbelievers that the Lord did exist, had power to save, and did choose to bless His people.

The other Song of Moses, Dt. 32:1-43, has a different focus. This longer one is more negative in its underscoring the faithlessness of the nation (vv. 5f., 15-18, 21) in contrast to the faithfulness of God (vv. 3f., 7-14). In addition there is the theme of God's discipline or retribution both on His own people (vv. 19-35) and on their enemies (vv. 40-43).

MOSOLLAM mō-sol'əm (1 Esd. 9:14, AV); **MOSOLLAMON** mō-sol'ə-mən (1 Esd. 8:44, AV); **MOSOLLAMUS** (1 Esd. 8:44; 9:14, NEB). *See* MESHULLAM 10, 11.

MOST HIGH. *See* GOD, NAMES OF II.B.2.

MOST HOLY PLACE [Heb. *qōḏeš haqqᵉḏāšîm*] (Ex. 26:33); NEB HOLY OF HOLIES; [*dᵉḇîr*] (1 K. 6:16); AV ORACLE; RSV INNER SANCTUARY; NEB INNER SHRINE; [Gk. *hágia hagíōn*] (He. 9:3); AV HOLIEST OF ALL; RSV HOLY OF HOLIES. The innermost compartment of the several biblical sanctuaries. *See* HOLY PLACE; TABERNACLE; TEMPLE.

The generally accepted view is that the most holy place in the tabernacle was a room of ten cubits (approximately 4½ m., 15 ft.) on a side. This supposition is strengthened by the cubic form of the inner sanctuaries in both Solomon's and Ezekiel's temples. The only furniture in the most holy place was the ark of the covenant, which held the two tablets of the law (Ex. 25:10-16). The mercy seat, a slab of pure gold surmounted by two golden cherubim, rested on top of the ark (vv. 17-22). Dividing the most holy place from the holy place (the outer chamber) was a curtain ornamented with figures of cherubim (26:31-33). Access to the inner shrine, whether in tabernacle or temple, was forbidden to all but the high priest who, on the annual Day of Atonement, was allowed to enter bearing sacrificial blood (Lev. 16; He. 9:7).

The most holy place in Solomon's temple was a room of twenty cubits (approximately 9 m., 30 ft.; see 1 K. 6:20) on a side. Flanking the ark were two cherubim made of olivewood and overlaid with gold (1 K. 6:23, 28); these faced the entrance of the most holy place (2 Ch. 3:13). In his temple plans Ezekiel retained the dimensions of the Solomonic inner sanctuary (Ezk. 41:4), and the same probably holds for the second temple founded by Zerubbabel (Ezr. 3). Since the ark was lost when the Babylonians destroyed Jerusalem in 587 B.C., the most holy place in the rebuilt temple had no furniture at all. There is no representation of the ark on the Arch of Titus, erected in Rome to commemorate the Romans' destruction of Jerusalem in A.D. 70; only furniture from the holy place is depicted.

The writer of Hebrews expounded the death of Christ to show that the barrier between God and mankind, symbolized by the partition of the OT sanctuaries, had been removed, making access to the presence of God the prerogative of every Christian (He. 10:19-22).

R. P. GORDON

MOTE. *See* SPECK.

MOTH [Heb. *'āš*–'waster,' 'consumer'; Gk. *sḗs* (Mt. 6:19f.; Lk. 12:33), *sētóbrōtos*–'moth-eaten' (Jas. 5:2)]. The clothes moth, of the insect order *Lepidoptera*. In Palestine the common form is the *tineola biselliella*. Moths lay eggs especially in wool, the most common clothing fabric of biblical times, and the larvae mutilate garments as they feed on their fabric. Thus moths are associated often with destruction, decay, frailty, etc. in the Bible (Job 4:19 [NEB "bird"]; 13:28; Ps. 39:11 [MT 12; NEB "festers"]; Isa. 50:9; 51:8; Hos. 5:12 [NEB "festering sore"]; Mt. 6:19f.; Lk. 12:33; Jas. 5:2). The MT of Job 27:18 ("moth") is usually corrected with the LXX and Syr. to "spider" (see comms.).

D. STUART

MOTHER [Heb. *'ēm* (cf. Akk. *ummu;* Ugar. *um*); Gk. *mḗtēr*]; AV also DAM; NEB also GRANDMOTHER; PARENT; etc.

***I. Meaning of Heb.* 'ēm.**—Hebrew *'ēm* is probably related to the root *'mm*, "be wide, roomy," although some see *'ēm* as a *Lallwort* (KoB, p. 58), i.e., the lisping of an infant. Both derivations easily associate the term with children. Along with the usual, biological meaning of "mother" (e.g., Gen. 2:24; Ex. 2:8; Ps. 113:9), *'ēm* can also mean "grandmother" (e.g., 1 K. 15:10; cf. NEB or "ancestress" (e.g., Gen. 3:20; Ezk. 16:3); pejoratively, it can denote undesirable origins (Job 17:14; Ezk. 16:45). Some passages use *'ēm* in a less literal sense to designate the nation as the "mother" of the people (e.g., Hos. 2:2,5 [MT 4,7]; Isa. 50:1), either unfavorably (e.g., Babylon as the "mother" of her inhabitants, Jer. 50:12) or as a term of honor (e.g., Deborah as a "mother" in Israel, Jgs. 5:7). In combination with Heb. *'āḇ*, ("father") the meaning is "parents" (so occasionally, NEB). Usually the order is "father and mother," but in Lev. 19:3; 21:2; Ezk. 16:45 the order is inverted. Heb. *'ēm* is also used for nonhuman species (e.g., Lev. 22:27; Dt. 22:6f.), in which cases the AV usually translates it "dam." In Ezk. 21:21 (MT 26) *'ēm* means "parting of the way;" that it is coupled with the *rō'š* ("head") suggests that *'ēm* can connote "origin" in somewhat the same way as *'āḇ*.

II. Function of the Mother in the Family.— Biblical society was clearly a male-centered world with the family structured along patriarchal lines. Some have claimed to find traces of a matriarchate in Israel (cf. R. de Vaux, *Ancient Israel* [Eng. tr. 1961], I, 19f.; see esp. *Real-Encyclopädie für Protestantische Theologie und Kirche*, V [1898], 739f. (I. Benzinger); E. B. Cross, *Hebrew Family* [1927], pp. 31, 39). The evidence is not sufficient, however, to prove that matriarchy existed in Israel; at best there is evidence of metronymy (tracing the genealogy through the mother).

The mother's primary role in the Israelite family was to bear and nurture children, a function that began often as

early as sixteen years of age (cf. L. Koehler, *Hebrew Man* [Eng. tr. 1961], p. 53). Motherhood was honored and coveted, and painful was the lot of the Israelite woman who was BARREN (e.g., 1 S. 1:4-11; cf. Ps. 113:9; Isa. 54:1). The Israelites' high regard for faithful motherhood is indicated by the biblical writers' utilization of the word or concept to express the idea of deepest loving attachment (e.g., Ps. 131:2; Isa. 49:15), of self-giving love (e.g., Isa. 66:13), and of profound sorrow when bereaved (e.g., Jer. 31:15). Consequently children were expected to obey and honor their mothers (Ex. 20:12; Lev. 19:3; Dt. 5:16; Prov. 1:8; 10:1; 15:20; 19:26; 20:20; 23:22, 25; 28:24; 29:15; 30:17). It was not uncommon for the mother to take the initiative in directing the affairs of the family. Sarah insisted on the expulsion of Hagar despite Abraham's misgivings (Gen. 21:10); Rebekah instigated the shift of the blessing from Esau to Jacob (Gen. 27:5-17); Abigail interceded on behalf of her household (1 S. 25:14-35); Bathsheba intervened on behalf of her son Solomon (1 K. 1:11-31). It appears that the primary responsibility for instructing the children lay with the father (e.g., Dt. 6:20-25), but it is noteworthy how frequently the book of Proverbs speaks of the mother's instruction (1:8; 6:20; 30:17; 31:1). Timothy was apparently instructed in the faith by his mother Eunice, who was taught by her mother Lois (2 Tim. 1:5).

III. Mother as Imagery for God, Israel, and the Church.–Nowhere does the Bible apply "mother" metaphorically to God as it does "father." The Bible's hesitation to introduce a feminine element into its concept of God can, no doubt, be explained partially by its polemic against the fertility cult in which the mother-goddess played such a prominent role. It is more significant that Yahweh is nonsexual; unlike pagan deities, He has no consort other than Israel, which is figuratively called His bride. Since a gender had to be chosen to refer to Yahweh as a personal God, it is not surprising that the masculine was preferred. Several factors may have been active in this choice; e.g., there is solid evidence that in the ancient world the mother was considered less the parent than the father. Aeschylus in *Eumenides* (658-661) has Apollo defend Orestes, the murderer of his own mother, by saying, "To be called mother is no wise to be Parent, but rather nurse of seed new-sown. The male begets: she's host to her small guest; preserves the plant, except it please God to blight it." That the biblical authors chose masculine rather than feminine metaphors to refer to God is to be attributed to the role of the sexes in that society rather than to the nature of God Himself.

It should not be overlooked, however, that the Bible does at times employ figurative language that is maternal in character to speak of God. "As one whom his mother comforts, so will I comfort you" (Isa. 66:13). The eagle of Dt. 32:11 can be considered maternal (so AV, ASV) or neuter (so RSV, NEB, and NIV; this, of course, is biologically impossible). Clearly maternal is the imagery of Isa. 49:15; "Can a woman forget her sucking child . . . ?" But here one should not infer too much from the feminine aspect of the figure, since its purpose is to show that the Lord's compassion transcends even that of a mother: "Even these may forget, yet I will not forget you." 2 Esdras freely combines masculine and feminine similes; "Thus says the Lord Almighty: Have I not entreated you as a father entreats his sons or a mother her daughters or a nurse her children, that you should be my people and I should be your God, and that you should be my sons and I should be your father? I gathered you as a hen gathers her brood under her wings . . . " (2 Esd. 1:28-30). Jesus' simile concerning Jerusalem (Mt. 23:37) is nearly identical.

In the NT "mother" takes on a new dynamic with the VIRGIN BIRTH. While the Roman Catholic theology may have exaggerated the role of MARY, her role as "mother of Our Lord" has received scanty attention in Protestant theology. Especially noteworthy are Jesus' submission to His parents (Lk. 2:51) and His deep concern for His mother even during the crucifixion (Jn. 19:26f.). Nevertheless, Mary's significance must be seen in the light of Jesus' statement that His relationship with believers transcends that of maternal affection (Mt. 12:46-50 par.).

The OT frequently alludes to Israel as a mother, but often with negative overtones. Isa. 50:1 challenges the Israelities to produce their mother's bill of divorce in order to justify their disbelief in the Lord's saving power (cf. vv. 2f.). Ezekiel ironically portrays Israel as a mother lioness who raises her cubs (i.e., kings) only to have them captured and put in cages — first by Egypt (Ezk. 19:1-4) and then by Babylon (vv. 5-9). Hosea's wife Gomer also represents Israel as a faithless wife and mother (Hos. 2:2, 5 [MT 4,7]; 4:5; cf. 1:2f.).

By contrast, the NT refers to the Church as "the mother of us all" (Gal. 4:26). This term, says J. Calvin, "is a title of wonderful and highest honor," and "he who refuses to be a son of the church desires in vain to have God as his Father" (comm. on Galatians, *in loc.*). Negatively, Rev. 17:5 describes "Babylon the great"(probably representing Greco-Roman culture) as the "mother of harlots;" this imagery, no doubt echoes that of Jer. 50:11-15 (cf. Rev. 18).

C. J. VOS

MOTHER-IN-LAW. *See* RELATIONSHIPS, FAMILY.

MOTHER-OF-PEARL [Heb. *dar*] (Est. 1:6); AV WHITE (MARBLE). "Mother-of-pearl" was perhaps part of the costly material in the mosaic pavement of the royal palace's garden at Susa. Since *dar* occurs only here its meaning is uncertain, but the LXX *pínninos*, "mother-of-pearl," supports the RSV's translation (cf. also Arab. *durr*, "pearl").

MOTION [Gk. *kataseíō* (Acts 12:17; 13:16; 19:33; 21:40), *neúō* (24:10)]; AV BECKON; NEB also "with a movement . . . signed," "made a gesture," etc. *See* GESTURE I.

In Rom. 7:5 the AV renders "motions of sin" for Gk. *pathḗmata tôn hamartiôn*; the RSV and NEB offer a more accurate translation, "sinful passions" (cf. Bauer, rev., p. 602).

MOTTLED [Heb. *bārōḏ*] (Gen. 31:10, 12); AV GRISLED; NEB DAPPLED. The Hebrew term may be related to *bārāḏ*, "hail," in which case it would mean "spotted as with hail." Zec. 6:3, 6 apply the same term to horses. *See* DAPPLED.

MOUND [Heb. *tēl*] (Josh. 11:13; Jer. 30:18; 49:2); AV "in their strength" (Josh. 11:13), HEAP; NEB RUINED MOUNDS, MOUND OF RUINS. In the OT Heb. *tēl* sometimes refers to the mound formed by centuries of building, destruction, and rebuilding on the same site. Arab. *tell* and Heb. *tel* in many Near Eastern place names (e.g., Tell Mardikh, Tel Aviv) attest to this practice.

The AV reading in Josh. 11:13 is apparently an interpretative rendering, inferring strength from the idea of a large mound.

See also ARCHEOLOGY V; for the other references to mounds, *see* SIEGE.

G. A. L.

MOUNT; MOUNTAIN. *See* HILL.

MOUNT EBAL. *See* EBAL, MOUNT.

MOUNT EPHRAIM [Heb. *har 'eprayim*] (Jer. 4:15). Elsewhere the RSV and NEB translate this expression "hill country of Ephraim" (AV consistently Mount Ephraim); no reason for this exception is apparent. *See* EPHRAIM, HILL COUNTRY OF.

MOUNT GERIZIM. *See* GERIZIM, MOUNT.

MOUNT OF CONGREGATION. *See* ASSEMBLY, MOUNT OF.

MOUNT OF CORRUPTION. *See* CORRUPTION, MOUNT OF.

MOUNT OF OLIVES. *See* OLIVES, MOUNT OF.

MOUNT OF THE AMALEKITES. The AV rendering of Heb. *har hā'ᵃmālēqî* in Jgs. 12:15 (RSV "hill country of the Amalekites"; NEB "hill of the Amalekite"). The Amalekites were a nomadic tribe generally associated with the valleys (cf. Nu. 14:25) and hill country (vv. 40-45) of the Negeb (13:29). From this passage, however, it appears that for a time they had penetrated as far north as the hill country of Ephraim. *See* AMALEK; EPHRAIM, HILL COUNTRY OF.

MOUNT OF THE AMORITES. The AV translation of Heb. *har hā'ᵉmōrî* in Dt. 1:7, 19f. (RSV, NEB, "hill country of the Amorites"; cf. vv. 24, 44; Nu. 13:29; Josh. 10:6; etc.). The reference is probably to the central mountainous regions later assigned to Judah and Ephraim; but some commentators take it to mean all the hill country of both eastern and western Palestine (see comms.). *See* AMORITES; PALESTINE IV.

MOUNTAIN-SHEEP [Heb. *zemer*]; AV CHAMOIS; NEB ROCK-GOAT.

The Heb. *zemer* is used only in Dt. 14:5; context indicates it is a wild animal useful for food, though exact identification is difficult. It cannot be the chamois, since this goat-like antelope did not inhabit the Palestinian region. Most likely it is a type of mountain-sheep. The best possibility is a type of mouflon standing about 66 cm. (26 in.) high and dark reddish brown. It is thought to be an ancestor of the domesticated sheep. A less likely possibility is the barbary sheep (aoudad) standing about 1 m. (40 in.) high. It is attested in Africa, including Egypt, where it has been found mummified. It probably never inhabited the Palestinian area, however.

See G. S. Cansdale, *All the Animals of Bible Lands* (1970), pp. 86f. J. C. MOYER

MOURN. *See* BURIAL II.C; III.D; DEATH III.A; DIRGE; GRIEF; LAMENT.

MOUSE; MICE [Heb. *'aḵbār*; Gk. *mýs*]; NEB also JERBOA (Lev. 11:29), RATS (1 S. 6:4f., 11, 18).

Of infrequent occurrence in Scripture, the term could refer to any one of numerous species of Palestinian rodents, of which Tristram identified twenty-three varieties near the end of the 19th century. If the true mouse or rat was actually being described, the animals concerned would be species of the genus *Mus*. The Arab. *'akbar* is used of the male jerboa, hence the NEB rendering and the identification of *CHAL* (p. 272) with the species *Jaculus jaculus*. In Lev. 11:29 the prohibition seems to cover a wide range of small rodents that were deemed unclean for food while living, and defiling to the touch when dead. The concern of the legislation was evidently a hygenic one, since infectious disease could be spread by contaminated containers or polluted food.

In 1 S. 6 Philistine priests advise the Philistine lords to return the ark of the Lord to Israel with a "guilt offering" — five golden tumors and five golden mice — to rid the land of the devastating disease (cf. the Israelite practice of a scapegoat, Lev. 16). Presumably the tumors represented the effects of the disease, the mice represented the transmitters of the disease, and the number five corresponded to the number of chief Philistine cities. The ailment in question was bubonic plague, which occurred suddenly and spread rapidly along lines of human communication (*see* DISEASE III.H). Both plague buboes (1 S. 5:12) and dead rodents (1 S. 6:5) were mentioned, the latter acting as host to the rat flea (*Pulex Cheopis*), that infects human beings. The black rat, which has now spread worldwide, is the main transmitter of bubonic plague.

The rodent mentioned as part of the diet of those indulging in idolatrous cultic rites (Isa. 66:17) was probably a small animal, perhaps the size of a hamster. In ancient Egyptian therapeutics, a freshly killed, skinned mouse was sometimes forced down the throat of a moribund person in an attempt to prolong life. R. K. H.

MOUTH [Heb. usually *peh*, also *ḥēḵ*–'palate' (e.g., Ps. 137:6; Ezk. 3:26), *miḏbār* (Cant. 4:3), *mišbār* (Hos. 13:13), *sāpâ* (Ps. 22:7 [MT 8]; Isa. 37:29); Aram. *pum* (Dnl. 7:5, 8, 20); Gk. usually *stóma*, also *lógos* ("word of mouth," Acts 15:27; 2 Thess. 2:15), *aphrízō* ("foam at the mouth," Mk. 9:20)]; AV also LIPS, SPEECH, "uttermost part," "breaking forth," END, etc.; NEB also BEAK, FACE, GREED, JAWS, LIPS, etc.

I. As the Organ of Speech.–In the Bible the mouth is most typically the organ of speech. As the organ that gives intelligible expression to what is seen or heard, the mouth distinguishes humans from all other living creatures. It stands, therefore, quite near to mankind's essential being. No other human organ has so many distinct activities predicated of it (see Wolff, pp. 77f.; *see also* LIP; TONGUE).

The Semitic formula "to open the mouth and speak" is sometimes used to call attention to something especially significant that is said (cf. Jgs. 11:35f.; Dnl. 10:16; Mt. 5:2; Acts 8:35; cf. Job 3:1; Ps. 119:131). The prudent person guards his mouth (Prov. 13:3; Mic. 7:5; cf. Ps. 39:1 [MT 2]; 141:3). One of the highest functions of the mouth is to testify concerning the saving deeds of God (Ps. 89:1 [MT 2]; Lk. 21:13-15; cf. Rom. 10:8-10, where the RSV translates Gk. *stóma* by "lips").

The mouth reveals much about a person's disposition: laughter (Ps. 126:2), derision (Ps. 35:21; Isa. 57:4), flattery (Prov. 26:28), exultation (1 S. 2:1), arrogance (2:3; Ps. 17:10), thankfulness (Ps. 63:5 [MT 6]; 109:30), bluster (Job 8:2), cursing (Rom. 3:14; cf. Prov. 11:9, 11), and blasphemy (Rev. 13:6) all proceed from the human mouth (cf. Jas. 3:10), "for out of the abundance of the heart the mouth speaks" (Mt. 12:34). By their mouths the wicked reveal themselves (cf. Ps. 36:3 [MT 4]; 50:19; 59:12 [MT 13]; Prov. 15:28; 18:6f.; Col. 3:8; Jude 16; etc.) and the righteous manifest their true being (cf. Ex. 13:9; Josh. 1:8; Ps. 34:1 [MT 2]; 37:30; 40:3 [MT 4]; 119:43; Prov. 8:7f.; 10:11, 31; etc.). Hypocrisy can be described as a lack of agreement between the heart and the mouth (Ps. 62:4 [MT 5]; Jer. 12:2; cf. Ezk. 33:31, where the RSV translates Heb. *peh* by "lips"); it inevitably results in judgment (Isa. 29:13f.). The mouth's importance as a reflection of the inner essence of a person explains the apostles' repeated calls for purity of speech (Eph. 4:29; 1 Pet. 3:10; cf. Jas. 3:10; Rev. 14:5).

As its Creator (Ex. 4:11), Yahweh can use the human

mouth as a means of revelation by putting His words into it (v. 12; Nu. 22:38; 23:5, 12, 16; Isa. 51:16; Jer. 1:9; cf. 1 K. 17:24; 2 Ch. 36:21). Thus the prophet becomes the mouth of the Lord (Jer. 15:19); cf. the same process at the human level when one becomes the messenger of another (Ex. 4:15f.; 2 S. 14:3). When a human mouth is used by God, however, it must first be purified at the altar of His holiness (Isa. 6:7; Jer. 1:9). If it is taught to the people, the word of God can even live on in the mouths of succeeding generations (Dt. 31:19, 21f.; Isa. 59:21).

By way of anthropomorphism the Bible also speaks of the "mouth of God" as an organ of speech by which He reveals Himself (Dt. 8:3; Jer. 9:12 [MT 11]; cf. Mt. 4:4), e.g., in judgment (Isa. 1:20), in blessing (34:16), and in commandments (cf. Ps. 119:13, 72, 88). Idols also have mouths (Jer. 51:44) but no word of power (Ps. 115:5; 135:16f.). From Yahweh's mouth, however, issues the power of righteousness (Isa. 45:23), the power to create (Ps. 33:6) and to destroy (18:8 [MT 9] par. 2 S. 22:9; cf. the mouth of Jesus' witnesses, Lk. 21:15; Rev. 11:5).

The authority and majesty of Jesus' words are sometimes highlighted by reference to His mouth (Mt. 5:2; Lk. 4:22). Moreover, from the mouth of the resurrected Lord issues an eschatological sword of judgment (Rev. 1:16; 2:16; 19:15, 21) reminiscent of the prophecy of Isa. 11:4; 49:2.

II. As the Organ for Eating and Drinking.–In many contexts the Bible refers to the mouth as the organ for eating and drinking (e.g., Ps. 78:30; Dnl. 10:3). Ezekiel is invited to eat a scroll (Ezk. 2:8) and finds that in his mouth it is "sweet as honey" (3:3; cf. Ps. 119:103). The mouth is the place where either clean or unclean foods enter the body (Acts 11:8; cf. Mt. 15:17) and where liquids are either taken in (Jgs. 7:6) or spewed forth (Rev. 3:16). When thirst is great the tongue may cleave to the roof of the mouth (Lam. 4:4; cf. the reference to Jesus' thirst in Jn. 19:28f.). The mouths of animals are similarly referred to in Ps. 22:21 (MT 22); Dnl. 6:22 (MT 23); 7:5; Am. 3:12.

III. As the Organ for Kissing.–The erotic use of the mouth in kissing is noted in Cant. 1:2 (cf. 4:3). The KISS was also an ancient form of adoration. Kissing the hand in Job 31:27 probably refers to the idolatrous act of throwing kisses to the moon, a practice known elsewhere in the ancient Near East (see comms.). A similar kind of idolatry involving Baal is evidenced in 1 K. 19:18 (cf. Hos. 13:2).

IV. Other Entrances or Openings.–"Mouth" occurs in figurative descriptions of the earth soaking up blood (Gen. 4:11) or "swallowing" persons or a river in an earthquake (Nu. 16:30, 32; Rev. 12:16); similarly, Sheol is described as swallowing people (Ps. 141:7; Isa. 5:14; cf. Ps. 69:15 [MT 16]). Other objects described as having a mouth are caves (Josh. 10:22), lions' dens (Dnl. 6:17 [MT 18]), wells (Gen. 29:2f., 8, 10; 2 S. 17:19), rivers (Josh. 15:5), a gorge (Jer. 48:28), sacks (Gen. 42:27f.; 43:12, 21; 44:1f., 8) and the womb (Hos. 13:13). The "mouth" of a sword is its "edge" (*see* EDGE).

V. Idiomatic Usages.–To speak "mouth to mouth" (Heb. *peh 'el-peh*, Nu. 12:8) means to speak directly or "face to face" with someone (cf. AV, RSV, Jer. 32:4; cf. Gk. *stóma prós stóma*, 2 Jn. 12). To be of "one mouth" (*peh 'eḥād*) means to be unified (AV 1 K. 22:13; cf. AV, RSV, "with one accord," Josh. 9:2).

VI. Gestures.–The Hebrew genius for expressing abstract ideas through concrete language is shown in the use of gestures to describe various emotions or attitudes. Laying the hand on the mouth is a gesture of awed silence or shame (Job 21:5; 29:9; 40:4; Mic. 7:16). Putting one's mouth in the dust is a sign of self-abasement (Lam. 3:29). *See also* GESTURE V.C.

Bibliography.–*TDNT*, VII, *s.v.* στόμα (K. Weiss); *THAT*, II, *s.v.* פה (C. J. Labuschagne); H. W. Wolff, *Anthropology of the OT* (Eng. tr. 1975). K. H. MAAHS

MOWING; MOWN GRASS [Heb. *gēz*] (Ps. 72:6; Am. 7:1); NEB EARLY CROP. Heb. *gēz* denotes something that is shorn (e.g., fleece of sheep, Dt. 18:4; etc.) or cut (cf. the verb *gāzaz*, "cut"). "The king's mowings" (Am. 7:1) refers to the first cutting of grain, claimed by the kings of Israel as tribute for the support of their military establishment (cf. 1 S. 8:15; 1 K. 18:5). In Ps. 72:6 *gēz* might better be rendered "grass about to be mown" (see Anderson, pp. 521f.; Briggs, p. 134); cf. 2 S. 23:4, which likens a just king to rain that causes grass to grow (cf. also Dt. 32:2). The process of mowing grain is described in Ps. 129:7 (AV, NEB, "mower"; RSV "reaper"). In Jas. 5:4 "mow" represents Gk. *amáō*. The withholding of wages from laborers was a common form of oppression in biblical times (see Adamson, pp. 185f.; Davids, pp. 177f.; *see also* OPPRESS).

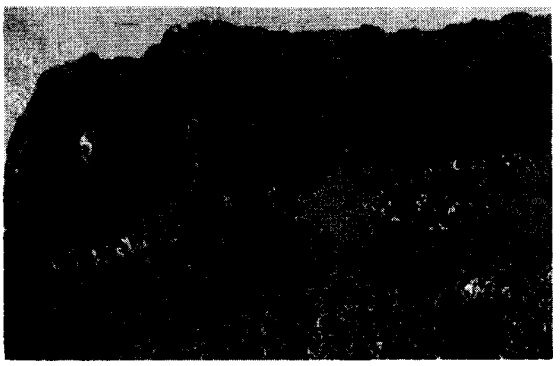
MOZA mō'zə [Heb. *môṣā'*].

1. Son of Caleb and his concubine Ephah (1 Ch. 2:46).



2. A descendant of Saul; son of Zimri and father of Binea (1 Ch. 8:36f.; 9:42f.).

MOZAH mō'zə [Heb. *(ham)môṣâ*; Gk. A *Amōkē*, B *Amosa*]. A town of the tribe of Benjamin in Judah (Josh. 18:26). It was an ancient settlement absorbed by the Israelite tribes, possibly to be identified with modern Qâlunyah, (< Lat. *Colonia?*) an Arab village 6½ km. (4 mi.) NW of Jerusalem on the road to Tel Aviv (*LBHG*, rev. ed., p. 356). It is mentioned in the Babylonian Talmud (*Sukkah* iv.5) and is said by Josephus (*BJ* vii.6.6. [217]) to have been settled by eight hundred troops of Vespasian, who called the town Emmaus; it is possibly the town mentioned in Lk. 24:13 (*see* EMMAUS). Its name is stamped on the handles of royal pottery of the Roman Empire excavated at Jericho and Tell en-Naṣbeh. The name may survive in Khirbet Beit Mizzah, somewhat N of Qâlunyah and has been adopted by the Jewish colony of Moṣah W of Qâlunyah (*GTTOT*, § 327, pp. 176f.). J. MCKENNA

MUFFLERS. The AV translation of Heb. *rᵉʿālôṯ* in Isa. 3:19 (cf. RSV "scarfs"; NEB "coronets"). *See* GARMENTS IX (and chart).

MUGHÂRAH mōō-gär'ə, WÂDĪ EL- wä'dē el [Arab. *wâdī el-muġârah*–'valley of the cave']. A valley on the south-

Wâdī el-Mughârah caves (B. VanElderen)

western slope of Mt. Carmel with four caves, three of which contained important archeological remains of several successive Stone Age cultures.

Excavated 1929-1934 by the Joint Expedition of the British School of Archaeology in Jerusalem and the American School of Prehistorical Research under the direction of D. A. E. Garrod, the caves have provided the key to the relative sequence of cultures for a large segment of the Stone Age in that region. Although individual cultural industries had been previously identified from isolated sites, the relationship between industries was only imperfectly known from evidence of incomplete series of occupations Garrod's correlation of stratigraphy from the Wâdī el-Mughârah caves (Mughâret el-Wâd, eṭ-Ṭābūn, and Mughâret es-Skhûl) demonstrated successive occupation of the site beginning with the Tayacian and extending through the Acheulean, Yabrudian, Levalloiso-Mousterian, Aurignacian, Atlitian, and Natufian cultures. The data indicate that Stone Age Palestine was more closely tied with Eurasia than with Egypt and Africa, and they further suggest that the Aurignacian culture, known in central and western Europe, spread there from Palestine, where it originated.

D. M. A. Bate's analysis of faunal remains has revealed that Palestine was a bridge for successive mammalian migrations from Asia to the African continent. Bate also tried to deduce from the relative frequency of certain types of fossil remains the fluctuation of wet and dry periods during this segment of the Stone Age. It proved difficult (if not impossible), however, to make satisfactory connections between these wet-dry oppositions and the various glacial stages of the Pleistocene period.

Human fossil remains from the Wâdī el-Mughârah caves show extremely broad variation in their physical characteristics, ranging from Paleoanthropic, Neanderthal-like individuals (eṭ-Ṭābūn) to those more nearly associated with the Neanthropic Cromagnon man (es-Skhûl). This variation led T. D. McCown and A. Keith (1939) to believe that Wâdī el-Mughârah was the scene of evolutionary change from Paleoanthropic to Neanthropic man. By 1962, however, Garrod concluded that the two types represented at Wâdī el-Mughârah are most likely distinct races, widely separated in time.

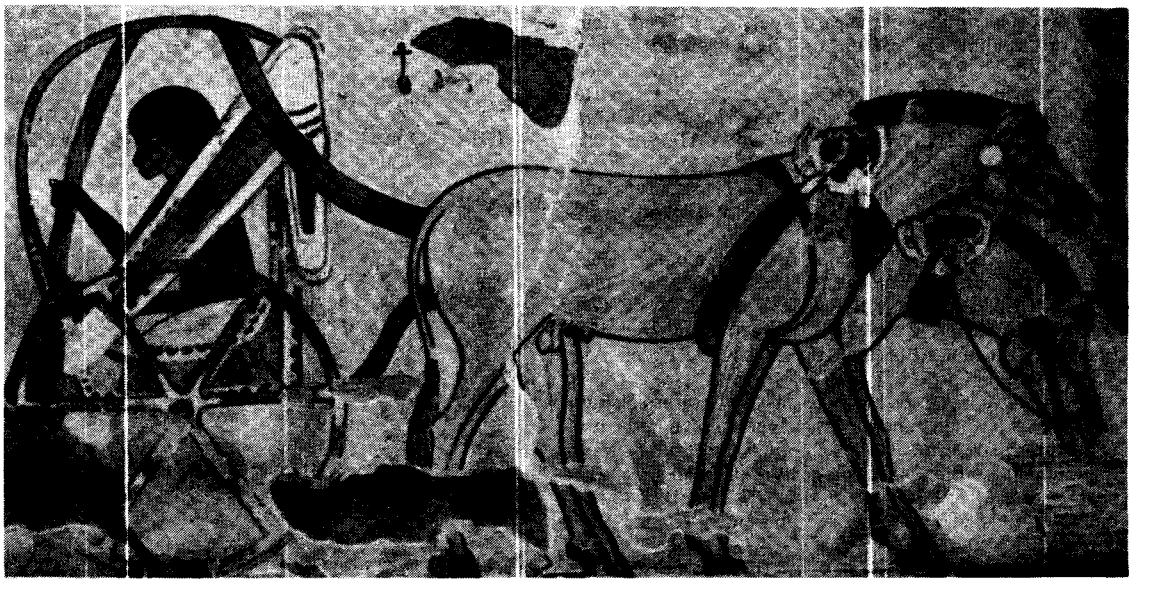
G. H. WILSON

MULBERRY [Gk. *móron*]. The black mulberry, *Morus nigra* L., native to northern Persia, whose juice was used to incite the elephants of Antiochus to battle (1 Macc. 6:34).

On 2 S. 5:23f.; 1 Ch. 14:14f., AV "mulberry trees," *see* BALSAM TREES.



On Ps. 84:6 *see* BACA, VALLEY OF.

On Lk. 17:6 *see* SYCAMINE TREE. R. K. H.

MULE [Heb. *pereḏ* (2 S. 13:29; 18:9; Ps. 32:9; etc.); fem. *pirdâ* (1 K. 1:33, 38, 44)]. The offspring of a mare bred by a donkey. The mule is a hybrid animal that is strong, patient, and surefooted. It is a more vigorous species than the reverse cross between a stallion and a donkey mare, which produces an animal known technically as a hinny. Because the Torah specifically prohibited the crossbreeding of animals (Lev. 19:19), it was necessary for the Israelites to import mules at some expense, either from Phoenicia, or from more distant places such as Beth-togarmah, which sold horses and mules in Palestine (Ezk. 27:14). Mules appeared in Israel in the early monarchy, and they seem to have been used for riding only by royalty (2 S. 13:29; 18:9; 1 K. 1:33, 38, 44; cf. Isa. 66:20). They were also used as pack animals (2 K. 5:17; 1 Ch. 12:40; cf. Zec. 14:15). That they were presented to Solomon as gifts indicates their high value (1 K. 10:25 par. 2 Ch. 9:24; cf. 1 K. 18:5; Ezr. 2:66).

In a wisdom saying the psalmist urges his listeners to be sensitive to his teaching, and not like the horse and mule, who can be guided only by physical means since they lack understanding (Ps. 32:9).

N. Davies's reconstruction of a New Kingdom tomb painting. Harvest scene with unique Egyptian representation of mules (Oriental Institute, University of Chicago)

In Neh. 7:68 the MT omits mention of the horses and mules; the English versions supply these references on the basis of the parallel Ezr. 2:66. R. K. H.

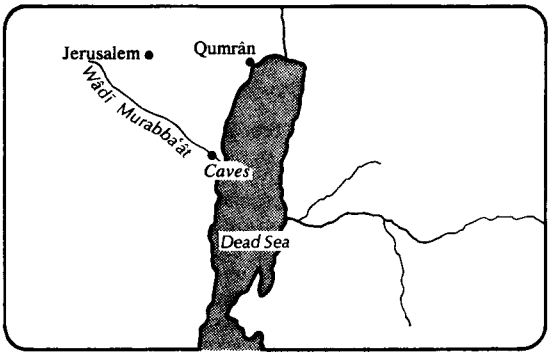
MULTITUDE [Heb. *hāmôn, rōḇ, raḇ*–'numerous, many' (e.g., Ex. 12:38), hiphil of *rāḇâ* (Jer. 46:16), *mᵉlō'*–'abundance' (e.g., Gen. 48:19), *marbîṯ*–'majority, multitude' (2 Ch. 30:18), *šip'â*–'mass' (Isa. 60:6), *qāhāl*–'assembly' (2 Ch. 31:18)]; AV also MANY, COMPANY, CONGREGATION; NEB also HOST, GREAT PEOPLE, LARGE COMPANY, MAJORITY, MOB, HORDE, etc.; [Gk. *óchlos, plḗthos*]; AV also PEOPLE, COMPANY; NEB also PEOPLE, CROWD, GREAT NUMBERS, WHOLE BODY, VAST THRONG, etc.

In the OT "multitude" usually represents Heb. *rōḇ* (*rôḇ*) or *hāmôn*. *Rōḇ* simply means a "great number" or "abundance." Often it denotes a number too great to count, e.g., the descendants promised to Hagar (Gen. 16:10) and to Abraham (32:12 [MT 13]), the Israelites at the time of their entry into Canaan (Dt. 1:10; 10:22; 28:62) and during Solomon's reign (1 K. 3:8), and the enemies (and their camels) who opposed Gideon (Jgs. 7:12). The term is also used to describe the vast number of Israel's idols (Ezk. 14:4) and transgressions (Lam. 1:5), of Tyre's iniquities (28:18), of Jerusalem's inhabitants in Zechariah's vision (Zec. 2:4 [MT 8]), etc. Covenant law warned against perverting justice in order to find favor with the masses (*rabbîm*, Ex. 23:2), and the prophets warned Israel against seeking security in the "multitude" (*rōḇ*) of its warriors (Hos. 10:13) or sacrifices (Isa. 1:11).

In some passages *hāmôn*, like *rōḇ*, seems to denote simply a very great number, i.e., "any large aggregate whose individual components are discernible" (*TDOT*, III, 416; see, e.g., Gen. 17:4f.; 2 S. 6:19; Job 31:34; Isa. 5:13f.). But overtones of the term's primary meaning of "confusion, uproar, tumult" (cf. vb. *hāmâ*, "make an uproar") are present in most of its uses (cf. 1 S. 14:16; 2 K. 7:13; Ps. 42:4 [MT 5]; Ezk. 7:12-14; 23:42; Dnl. 10:6). The term is frequently applied to the assaulting armies of enemy nations, which in their attack upon Yahweh's people represent the forces of chaos in revolt against God (1 K. 20:13, 28; 2 Ch. 13:8; 14:11 [MT 10]; 20:2, 12, 15, 24; Isa. 16:14; 29:5, 7f.; Ezk. 30:15; 31:2, 18; Dnl. 11:10-13, etc.; see *TDOT*, III, 416f.).

The LXX primarily uses Gk. *plḗthos* ("large number," "crowd") to render Heb. *rōḇ*; both *plḗthos* and *óchlos* ("crowd, throng, populace") are among its translations of Heb. *hāmôn*. In the Apocrypha "multitude" occasionally represents *óchlos* (e.g., Wisd. 8:10; 1 Macc. 9:35; 1 Esd. 2:30; 5:65); most often, however, it translates *plḗthos*, which is variously used to describe a crowd that cannot be numbered (Jth. 2:20; 5:10), the vast army of an enemy (7:2, 18; 16:4; 1 Macc. 3:17; 6:41), the assembled people of Israel (1 Esd. 8:91; 9:2, 4, 6, etc.), etc. Like the OT prophets, Sirach warns against trusting in a multitude of sacrifices as an atonement for sin (Sir. 7:9; 34:19; cf. 5:6).

In the NT the RSV uses "multitude" interchangeably with "crowd" to translate Gk. *óchlos* (the AV consistently uses "multitude"). Apart from Rev. 7:9; 17:15; 19:1, 6, *óchlos* occurs only in the Gospels and Acts. Usually it refers to the disorganized crowd of people who followed Jesus (e.g., Lk. 7:9; Jn. 6:2, 5) and heard His teaching (e.g., Lk. 5:15; 12:54; 14:25) or, similarly, to the crowds that gathered to hear the preaching of the apostles (Acts 8:6; 13:45; 14:14). Sometimes the *óchlos* is contrasted with the religious leaders, whose actions were influenced by their fear of popular opinion (Mt. 21:26, 46 par.). *Plḗthos* also occurs predominantly in the Gospels and Acts. In the Gospels it is sometimes used to highlight the large number of people who followed Jesus and witnessed His ministry and crucifixion (e.g., Mk. 3:7f.; Lk. 6:17; 23:27). Similarly, in Acts 5:14 it calls attention to the great masses of men and women who responded to the apostles' ministry, forming a large community of believers (6:5; cf. 4:32 [RSV "company"]; 6:2 [RSV "body"]; see Haenchen, p. 230 n. 1; Bauer, rev., p. 668). In 2:6 it refers to the large crowd of Diaspora Jews assembled at Jerusalem for Pentecost. *Plḗthos* also occurs in Jas. 5:20 and 1 Pet. 4:8, which speak of the power of mutual discipline and love to cover "a multitude of sins" (cf. Prov. 10:12).



See also CROWD; PEOPLE II.

MUNITION. Archaic term meaning "rampart" or "defense," used by the AV to render Heb. *mᵉṣôḏâ* in Isa. 29:7 (RSV "stronghold"; NEB "siege-works"), *mᵉṣāḏ* in 33:16 (RSV "fortresses"; NEB "fastness"), and *mᵉṣûrâ* in Nah. 2:1 (RSV "ramparts"; NEB "siege"). *See* FORTIFICATION; RAMPART.

MUPPIM mup'im [Heb. *muppîm*]. A son of Benjamin (Gen. 46:21), elsewhere called SHUPPIM (1 Ch. 7:12, 15), SHEPHUPHAM (Nu. 26:39), and SHEPHUPHAN (1 Ch. 8:5).

MURABBA'ÂT mōō'rab-ba-at [Arab.]. A wadi in the Wilderness of Judea where caves that contained some of the Dead Sea Scrolls are located.

I. Initial Excavations.–Near the end of the summer of 1951, in the gorges of a wadi called successively Ta'amrah, Marshash, Murabba'ât, and Daradjeh, 26 km. (16 mi.) SE of Jerusalem, 18 km. (11 mi.) S of Qumrân, and 4.8 km. (3 mi.) W of the Dead Sea, bedouin explored four nearly inaccessible caves. They discovered documents and brought them to Jerusalem to sell. R. de Vaux and G. L. Harding bought the documents for the Palestine Archeological Museum and then organized a scientific expedition that completely excavated the caves under extremely difficult conditions from Jan. 21 to Mar. 3, 1952.

Numerous remains showed that Caves 1 and 2, very narrow but about 50 m. (165 ft.) deep, and Caves 3 and 4, somewhat smaller, had been inhabited at different periods. In the Chalcolithic era (4000-3000 B.C.) nomads left objects of bone, wood, flint, and ceramic. In the Middle Bronze Age (2000-1600 B.C.) a refugee left a scarab, a comb, and an alabaster cruse, imported from Egypt. To Iron II, *ca.* 850-700 B.C., belong some knives, lamps, different kinds of pottery, and most importantly a papyrus palimpsest. During the First Jewish Revolt (A.D. 66-73) and particularly during the Second Revolt (132-135) Jewish warriors accom-

panied by their families sought refuge at Murabba'ât. They left much pottery, various utensils, domestic items, cloth, arms, coins, and numerous parchments and papyri. The Romans finally exterminated these refugees and established there a military post, as evidenced by later coins, documents, a Roman javelin, and a seal in the name of "Gargiliu(s), of the H(undred) of Annaeus." A coin of the Omayyads and some papers written in Arabic indicate that the caves again served as a temporary shelter.

For these excavations and their results see the preliminary reports by G. L. Harding, *PEQ*, 1952, pp. 104-109; R. de Vaux, *RB*, 60 (1953), 245-275. The official edition is *Discoveries in the Judaean Desert II: Les Grottes de Murabba'ât*, by P. Benoit, J. T. Milik, and R. de Vaux, with contributions by G. M. Crowfoot, E. Crowfoot, and A. Grohmann, vol. I text, vol. II plates (1961).

II. Recovered Artifacts.–A. Principal Documents. 1. Hebrew. The papyrus palimpsest (no. 17 of the official edition) of the 8th cent. B.C., which is the oldest known papyrus in Hebrew, contains first a private letter and then a list of proper names. See F. M. Cross, *BASOR*, 165 (Feb. 1962), 34-46.

Biblical fragments (nos. 1-3), conforming to the MT, contain Gen. 32:4f., 30, 33; 33:1; 34:5-7, 30f.; 35:1, 4-7; Ex. 4:28-31; 5:3; 6:5-11; Nu. 34:10; 36:7-11; Dt. 10:1-3; 11:2f.; 12:25f.; 15:1 or 2; Isa. 1:4-14.

A phylactery (no. 4), well preserved, contains Ex. 13:1-10, 11-16; Dt. 11:13-21; 6:4-9. Another document (no. 5) is in such bad condition that no one has determined whether it is a phylactery or a mezuzah. See H. Stegemann and J. Becker, *RQ*, 3/3 (1961), 443-48.

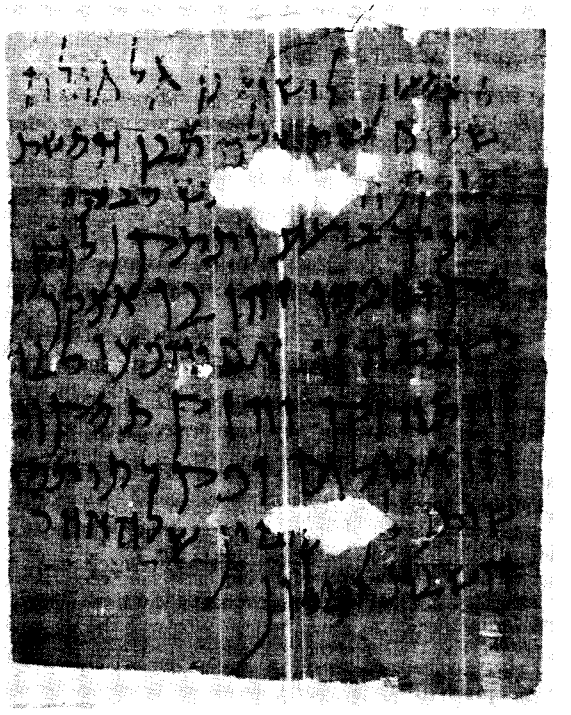
A badly damaged fragment (no. 6) juxtaposes biblical quotations to form a poem resembling that of 1QM 12:7-16.

Three deeds of sale of land (nos. 22, 29, and 30) are dated in Year 1, Year 2, and Year 4 of the Liberation of Israel (A.D. 132, 133, and 135).

A series of rent contracts (no. 24) are all dated in Year 2 (A.D. 133).

A letter of the administrative officers of Beth-Mashiko to Joshua the son of Galgula (no. 42), concerning the sale of a cow, states, "The nations [the Romans] are approaching us." For this letter and for the following, the official edition supplies a bibliography up to 1956.

A letter of Simon son of Kosbah (Simon Bar Cochba, the head of the Jewish Resistance) to the same Joshua (no. 43) says: "I call heaven to witness against me that if any one of the Galileans who are with you is mistreated I will put your feet in irons as I did to Ben Aphlul."



Another letter of Bar Cochba to the same Joshua (no. 44) concerns the ration of wheat (see the important interpretation by M. R. Lehmann in *RQ*, 4/1 [1963], 68-70).

A partly mutilated letter (no. 45) reveals moving details about the Jewish resistance: ". . . until the wheat supply is finished . . . they can no longer exist . . . at Meṣad Ḥasidin [Qumrân or Masada?] and I shall remain . . . some among them have perished by the sword . . . only my brother. . . ."

Another letter (no. 46), sent from En-gedi, recommends a person who, among others, "will take up the dead."

2. Aramaic. Among the Aramaic documents are several tax receipts (nos. 8, 9, 10a); a statement of indebtedness (no. 18, dated the Year 2 of Nero); an act of repudiation (no. 19) written perhaps A.D. 111; two marriage contracts (no. 20, written A.D. 117, and no. 21); and four deeds of sale (nos. 23, 25, 26, 27, the first two dated in Year 1 and Year 2 of the Liberation of Jerusalem [A.D. 132 and 133]).

3. Greek. Identifiable documents include two marriage contracts (no. 115, dated in Year 7 of Hadrian [A.D. 124], and no. 116); an admission of indebtedness (no. 114, perhaps A.D. 171); two extracts of official laws (no. 117) that mention the emperor Commodius, A.D. 180-192; and a prayer of St. Basil, transcribed about the 11th or 12th cent. (no. 156). Two leaves of Greek shorthand have not been deciphered (no. 164).

Letter of Simon Bar Cochba to Joshua concerning wheat ration. In Hebrew, on papyrus (Israel Department of Antiquities and Museums)

4. Latin. Some badly damaged papyri have been recovered.

5. Arabic. Arabic documents comprise a receipt of the year 327 of the Hegira (i.e., A.D. 948-949); a fragment of a contract from the 9th or 10th cent.; two magical texts in bad condition (10th cent.); and a large amulet fairly well preserved (10th cent.).

B. Coins and Cloth. The coins from the Murabba'ât caves that can be identified with some certainty are described in the introduction of the official edition (I, 44-47), but the photographs are not reproduced. These coins are distributed as follows:

Antigonus Mattathias (40-37 B.C.)
Agrippa I (A.D. 42-43)
The Procurators under Nero (A.D. 58-59), three coins
Year 4 of the First Revolt (A.D. 69-70)
Ashkelon, under Trajan (A.D. 113-114)
Tiberiades, under Hadrian (A.D. 119-120)
Year 1 of the Second Revolt (A.D. 132), two coins
Year 2 of the Second Revolt (A.D. 133), two coins
Second Revolt (A.D. 132-135), five coins
Two Roman coins with a double surcharge of the Tenth Legion
A Roman coin not identified
A coin of the Omayyads

Cloth or clothing found in the Murabba'ât caves comprises sixty-nine articles in wool that seem to date approximately from the Second Jewish Revolt (A.D. 132-135), forty articles in linen that are difficult to date, and thirty-

two articles in linen, cotton, or silk that are certainly medieval, one even bearing an Arabic inscription in Kufic. G. M. and E. Crowfoot have technically studied all of these articles in the official edition (I, 51-63; II, plates XV-XVIII).

III. Subsequent Excavations and Studies.–The four caves were completely excavated, and treasures that according to reliable "information" also had come from Wâdī Murabba'ât were offered for sale in Jerusalem in 1952. Recovered pieces comprised 119 or 120 Nabatean denarii (of Aretas IV, Maliku II, or Rabbel II), fifty-one Roman denarii (from the time of C. Allius Bala, *ca.* A.D. 96, to Hadrian), fourteen tetradrachmas of Antioch (from Nero to Trajan), forty-three coins from Caesarea in Cappadocia (all under Trajan) (see J. T. Milik and H. Seyrig, *Revue Numismatique*, 6th ser., 1 [1958], 11-26).

In March 1955 a bedouin discovered another cave 300 m. (1000 ft.) upstream from the first caves and retrieved from it a MS of the Twelve Prophets, which once consisted of forty columns and still contains twenty-one, more or less complete. The passages preserved (no. 88 of the official edition) are Joel 2:20; 2:26–4:16 (Eng. 3:16); Am. 1:5–2:1; 7:3–8:7; 8:11–9:15; Obadiah and Jonah complete; Micah complete except 6:8-10; Nahum complete; Hab. 1:3–2:11; 2:18 to the end; Zeph. 1:1; 1:11–3:6; 3:8 to the end; Haggai complete except 2:11; Zec. 1:1-4. The text is remarkably similar to the MT, and its few variant readings are unimportant for the general meaning.

Since the publication of the official edition, several authors have contributed articles clarifying certain problems posed by these documents. S. Segert studied the philological side in *Archiv Orientální*, 31 (1963), 122-137. The legal side was discussed by R. Yaron, *JJS*, 11 (1960), 157-171; E. Koffmann, *RQ*, 4/3 (1963), 421-27. The historical side was discussed by Y. Yadin, *IEJ*, 11 (1961), 51f.; J. A. Fitzmyer, "Bar Cochba Period," in *Bible in Current Catholic Thought: Gruenthaner Memorial Volume* (1962), pp. 133-168 (repr. in J. A. Fitzmyer, *Essays on the Semitic Background of the NT* [1971], pp. 305-354); E. M. Laperrousaz, *Syria*, 41 (1964), 347-358.

Explorations carried out farther south by Israeli scholars, particularly in 1960, resulted in the discovery of important documents that complement the information furnished by the Murabba'ât documents (see the official edition, or *IEJ*, 11 [1961], 2-72).

J. CARMIGNAC
tr. W. S. L. S.

MURATORIAN mūr-ə-tōr'i-ən **FRAGMENT.** A list of NT books preserved in medieval Latin MSS that provides valuable evidence about the formation of the NT canon. L. A. Muratori discovered the list in an eighth-century MS that was in the Ambrosian Library, Milan, but originally belonged to Columban's Monastery, Bobbio. Muratori published the text in 1740. Four fragments of the same list were later found in Latin MSS of the 11th or 12th cent. at Monte Cassino. The poor Latin of the Fragment makes exact interpretation of the text difficult and indicates that it was copied from an earlier text. Most scholars believe that it was written originally in Greek, but some have suggested a Latin original.

Comprising eighty-five lines, the eighth-century document is mutilated at the beginning and end. Luke is the first book named, but it is described as the third Gospel; thus references to Matthew and Mark likely had appeared at the beginning. The list also cites as acceptable to the Church the Gospel of John, 1 John, the Acts of the Apostles, and thirteen Pauline Epistles: 1 and 2 Corinthians, Ephesians, Philippians, Colossians, Galatians, 1 and 2 Thessalonians, Romans, Philemon, Titus, and 1 and 2 Timothy. It rejects as forgeries the Epistles to the Laodiceans and the Alexandrians that are attributed to Paul. Also listed as accepted are Jude, two (additional?) Epistles of John, the apocryphal Wisdom of Solomon, the Revelation of John, and the Revelation of Peter, although the last work is said to be rejected by some. Shepherd of Hermas is excluded from public reading in church but is recommended for private use. More emphatically rejected are the writings of various figures apparently regarded as heretics (Arsinous, Valentinus, Miltiades, Marcion, and Basilides). In the light of the later development of the canon, James, 1 and 2 Peter, and Hebrews are conspicuously absent.

The exact importance of the list depends upon its date and origin, and these matters are disputed. The dominant view has been that the list was composed in the Western Church *ca.* A.D. 200 (Tregelles, Harnack, Beare); this position is still stoutly defended (von Campenhausen, Grant, Kümmel). Sundberg's 1973 article, however, is a strong case for a fourth-century date and an Eastern origin (see also *IDB Supp.*). But he has not settled the issue, for the absence of Hebrews from the list may reflect an origin in the West, where that book took longer to be accepted. Moreover, the heresies mentioned in the Fragment are 2nd cent. and thus suggest a date *ca.* A.D. 200 or a little later. Other evidence for this date may be the categorization of Christian writings — as recognized, disputed, or spurious — found in Eusebius (*HE* iii.25; 3rd-4th cent.); this categorization seems more developed than that in the Muratorian list. But the list is difficult to interpret with full confidence, and conclusions about it both affect and are affected by one's understanding of the early history of the NT canon. Von Campenhausen has given the most complete recent treatment of this subject (but cf. Groh, Dungan).

Not only the list's date but also its purpose and occasion remain problematic. Suggestions about authorship are only speculative. The lengthy description of the origin of John's Gospel may be a reply to the Alogoi (late 2nd cent.), who rejected both the Gospel and the Revelation of John. The emphasis upon the symbolic significance of Paul's letters to seven churches may be a response to Marcionism. The rejection of works believed to be forgeries in Paul's name reflects some stress upon authorship as a basis for the Church's acceptance of writings. The rejection of Shepherd of Hermas because of its late date indicates the idea that normative revelation was given for a limited time; this idea perhaps countered Montanist claims of ongoing inspiration. But the list's dominant criterion for acceptance of writings seems to have been simply their widespread use in church services.

Whatever the conclusion about the date, purpose, and origin of the Muratorian Fragment, it remains an important witness to the complex process of NT canonization. *See also* CANON OF THE NT.

MURDER; MURDERER [Heb. *rāṣaḥ* (Nu. 35:16-31; Jgs. 20:4; Dt. 22:26; 2 K. 6:32; Job 24:14; Ps. 94:6; Isa. 1:21; Jer. 7:9; Hos. 6:9), *hārag* (1 K. 2:5; 2 K. 9:31; Ps. 10:8; Jer. 4:31), hiphil of *mûṯ* (Jer. 41:4), hiphil of *nāḵâ* (2 K. 14:6), pl. of *dām*–'blood' (Hos. 4:2); AV also SLAY, KILLING; NEB also KILL, DO TO DEATH, HOMICIDE, SLAUGHTER; [Gk. *phónos* (Mt. 15:19 par. Mk. 7:21; 15:7; Lk. 23:19, 25; Acts 9:1; Rom. 1:29; Rev. 9:21), *phoneús* (Mt. 22:7; Acts 3:14; 7:52; 28:4; 1 Pet. 4:15; Rev. 21:8; 22:15), *phoneúō* (Mt. 23:31, 35), *spházō* (1 Jn. 3:12), *anthrōpoktónos* (Jn. 8:44; 1 Jn. 3:15), *patrolṓas* ("murderer of fathers," 1 Tim. 1:9), *mētrolṓas* ("murderer of mothers," 1 Tim. 1:9)]; NEB also "murderous threats," PARICIDES, MATRICIDES.

1. In the OT.–Homicide is a person's killing of another person, and murder is a homicide done unlawfully and with malice aforethought. Israelite law functioned within the overarching framework of the covenant to safeguard the covenant relationship. It was therefore never lax in prescribing punishment for offenses against God and for the crimes that diminished the holiness of His people. In contrast to earlier codes, the Deuteronomic code exhibits a markedly increased disposition (through the influence of the prophets according to the documentary hypothesis) to protect those who tend to slip between the societal cracks — the widows, orphans, sojourners, poor, and needy (cf. Dt. 23–24). The *lex talionis* was in force but apparently was not followed to the letter. Rather, it served to enforce the principle of proportional compensation (i.e., it kept compensation or punishment from exceeding the crime). Indeed, the context of Ex. 21:23 (the earliest expression of *lex talionis*) is a list of compensations for specific injuries. The development of the *lex talionis* was an important breakthrough in the ancient Near East in that it gave equal legal standing to the poor and curbed the callousness of the nobility toward them. The only crime for which compensation in money or kind was not allowed was murder. The murderer had to forfeit his life, because the blood that he had shed unlawfully was understood to defile the holiness of the land (Nu. 35:31-34).

The very infrequency of Heb. *rāṣaḥ* in the MT (forty-six occurrences; other Hebrew verbs for taking life occur three or four times as often) suggests its specialized meaning. The RSV usually translates the verb as "murder" and the participle as "murderer," but in both the Exodus and the Deuteronomic versions of the Ten Commandments it renders "kill" in the sixth commandment (Ex. 20:13; Dt. 5:17).

Numbers 35 constitutes the most significant context for defining *rāṣaḥ*. There *rōṣē(a)ḥ*, the participle of *rāṣaḥ*, occurs eighteen times (seven times rendered "manslayer," eleven times "murderer"). In vv. 16-18 certain crimes are defined as *rāṣaḥ* by the formula *rōṣē(a)ḥ hû'*, "He is a murderer": (a) killing with an iron weapon (*ḵᵉlî ḇarzel*), (b) killing with a throwing stone (*'eḇen yāḏ*), and (c) killing with a wooden hand weapon (*ḵᵉlî ʿēṣ-yāḏ*). In each case the penalty for the murder is defined by the formula *môṯ yûmaṯ hārōṣē'a)ḥ*, "The murderer shall be put to death." This penalty was carried out by the "avenger of blood" (*gō'ēl haddām*), usually a relative of the deceased (vv. 17-21).

In its earliest usage *rāṣaḥ* has a certain neutrality or objectivity, so that it can be used both for the acts of murder by weapon in Nu. 35:16-18 and for the act of blood revenge by the *gō'ēl haddām* in v. 27. Yet in the later usage reflected in vv. 20f. (see B. S. Childs, *Book of Exodus*, pp. 419-421) *rāṣaḥ* loses that neutrality and takes on sharper definition as a malicious act (i.e., murder as distinguished from homicide). The proofs of malicious intent to deprive of life listed in vv. 20f. are the sort that a court would seek to demonstrate: hatred for the victim, and ambush (cf. Ex. 21:13). The sense of "murder," then, ultimately characterizes *rāṣaḥ* as it is used in the sixth commandment. (*See also* KILL.)

When a homicide was demonstrably accidental the killer could flee to a designated city of refuge, where he would be safe by law from the avenger of blood (cf. Nu. 35:9-15; Ex. 21:13; Dt. 19:1-10; *see also* AVENGER; REFUGE, CITIES OF). When a homicide was demonstrably malicious, the Hebrew view of the utter sanctity and inviolability of human life made the killer's death at the hands of the avenger of blood the just and requisite punishment. The rationale was not simply to punish, however, but, as stated in Dt. 19:13, to "purge the guilt of innocent blood from Israel, so that it may be well with you." To determine justice in cases of alleged malicious intent there were two very important procedural regulations: "If any one kills a person, the murderer shall be put to death on the evidence of witnesses," and "No person shall be put to death on the testimony of one witness" (Nu. 35:30; cf. Dt. 19:15-19 for the requirement of more than one witness and the problem of false witnesses).

Although it was common custom to offer and to accept compensation for bodily injury, despite the principle of the *lex talionis*, compensation was never allowed in cases of murder. Nu. 35:31, in contrast with some other ancient Near Eastern law codes, prohibits the payment of ransom for the life of a *rōṣē(a)ḥ* "who is guilty of death," for it would have made life far too cheap and would have allowed the wealthy to run roughshod over the poor.

Even though the RSV translates *rāṣaḥ* "kill" in the two primary texts of the sixth commandment (Ex. 20:13; Dt. 5:17), it has "murder" in Jeremiah's prophetic echo of the sixth commandment (Jer. 7:9). This is Jeremiah's famous temple speech, in which the people are said to "steal, murder, commit adultery, swear falsely, . . . and go after other gods," convinced in their self-delusion that the temple (and thus the city itself) was inviolate. Jeremiah counseled instead that they "execute justice" and "not oppress the alien, the fatherless or the widow, or shed innocent blood" (vv. 5f.). Cf. Hos. 4:2 (RSV "killing"), where similarly the callous breaking of the commandments (the dark side of the thriving economy under Jeroboam II) violates the covenant relationship in that each cited transgression is against the neighbor and has no place in the life of God's covenant people. In Ps. 94:6 it is the ignominy of the "wicked" that they stoop even to "slay [Heb. *hārag*] the widow and the sojourner, and murder [piel of *rāṣaḥ*] the fatherless." Hosea observed (6:9) that even bands of priests were like robbers waiting to murder (piel of *rāṣaḥ*) on the road to the old refuge city of Shechem (cf. Josh. 20:7). Isa. 1:21 laments how in the erstwhile justice-cherishing Jerusalem "righteousness [once] lodged . . . but now murderers [Heb. *mᵉraṣṣᵉḥîm*]." Hos. 9:9 likens Israel to the lawless premonarchial Gibeah, where the especially vicious and wanton murder of the Levite's concubine occurred (Jgs. 20:4f.).

The RSV translates Heb. *hārag* "murder(er)" four times: 1 K. 2:5 (Joab's revenge against Amasa and Abner); 2 K. 9:31 (Jezebel's accusation of Jehu); Ps. 10:8 (the work of the wicked); Jer. 4:31 (Zion's gasping cry of woe).

The RSV renders the hiphil of the Hebrew verb *mûṯ* "murder" (noun) only in regard to the assassination of

Gedaliah in Jer. 41:4. The RSV once translates the plural participle of Heb. *nāḵâ* (hiphil) "murderers" (2 K. 14:6), in reference to Amaziah's "servants who had slain the king his father" (v. 5).

In Hos. 4:2 the RSV translates Heb. *wᵉḏāmîm bᵉḏāmîm nāgāʿû* "and murder follows murder" (cf. AV "and blood toucheth blood," NEB "one deed of blood after another"). The phrase characterizes the preceding list of societal crimes as unrelenting (and unaddressed) offenses that merit only the death penalty (see H. W. Wolff, *Hosea* [Eng. tr., *Hermeneia*, 1974], pp. 67f.). The same term *dāmîm* is translated "bloodguilt [incurred by a murderer]" in Ex. 22:2 (MT 1). *See* BLOODGUILTINESS.

II. In the NT.–Greek *phoneús*, "murderer," occurs seven times in the NT and is always translated "murderer(s)" or "murdered." In Matthew's highly allegorized version of the parable of the marriage feast (Mt. 22:1-10) the invited guests who had not only refused their invitations but also killed the messengers so outraged the king that (v. 7) "he sent his troops and destroyed those murderers [Gk. *phoneís*] and burned their city" (an action thought by some commentators, e.g., D. Hill [*NCBC*, 1972], p. 302, to allude to the destruction of Jerusalem in A.D. 70; this violence is peculiar to Matthew — cf. Lk. 14:16-24).

Phoneús appears three times in Acts (though never in Luke): in Peter's mention of Barabbas the "murderer" (3:14), who ironically was released while the "Author of life" was "killed" (Gk. *apokteínō*, v. 15); in Stephen's climactic reference to the Righteous One's being "betrayed and murdered" (7:52); and in the Maltese people's initial assessment of Paul, who had survived shipwreck only to be bitten by a viper (28:4). *Phoneús* also appears in a list of criminal activities in 1 Pet. 4:15 and twice in lists of vices (Rev. 21:8; 22:15; cf. Barn. 20:2; Did. 5:2).

Greek *phónos*, "murder, killing," has nine occurrences in the NT, of which eight are translated "murder(s)" by the RSV. The term appears in Mt. 15:19, where Matthew reduced Mark's parallel list (Mk. 7:21f.) of evil things that proceed out of the human heart from thirteen to seven and ordered them so that the final six correspond to the sixth ("murder") through the ninth commandments. In three places *phónos* is associated with Barabbas, "who had committed murder [Gk. *phónos* + *poiéō*] in the insurrection" (Mk. 15:7 par. Lk. 23:19, 25). It occurs twice in lists of crimes and vices (Rom. 1:29; Rev. 9:21) and is applied to Saul of Tarsus when, "breathing threats and murder," he was zealously persecuting the disciples of Jesus (Acts 9:1; cf. NEB "murderous threats").

The idiom *en phónō machaírēs apothaneín* (lit. "be killed in murder by sword," RSV "be killed with the sword") appears once in He. 11:37 (cf. the same idiom in the LXX of Ex. 17:13; Dt. 13:15 [MT 16]; 20:13, representing Heb. *lᵉpî ḥāreḇ*, "with the edge of the sword"). *Phónos* also represents Heb. *rāṣaḥ* in Hos. 4:2, LXX (RSV "killing"). In 2 Macc. 4:3 the plural form *phónous* refers to "murders" by agents of the treacherous temple captain Simon.

The RSV translates the cognate Greek verb *phoneúō* "murder" in only two of its ten NT occurrences. One of Matthew's woes against the scribes and Pharisees (Mt. 23:31, 35) uses *phoneúō* twice in reference to the killing of the prophets (cf. v. 37, where the same act is expressed with *apokteínō* [NEB "murders"]). The RSV has "kill" for the other eight occurrences of *phoneúō*, six of which cite the sixth commandment (e.g., Mt. 5:21; 19:18 par.; the NEB usually has "murder").

Greek *anthrōpoktónos*, "murderer," occurs only three times in the NT. Jn. 8:44 says that the devil has been "a murderer from the beginning" (according to his traditional role in leading Adam and Eve into sin; cf. Wisd. 2:24). The term occurs twice in 1 Jn. 3:15, where the person who hates his brother is considered a "murderer."

Greek *spházō* is usually translated "slay" (e.g., Rev. 5:6, 12; 6:4; 13:8), but in 1 Jn. 3:12 it twice refers to Cain's "murder" of his brother (although the LXX in Gen. 4:8 uses *apokteínō*, "kill," for the original narration of Cain's deed).

In 1 Tim. 1:9 plural forms of *patrolǫ̗as*, "murderer of one's father," and *mētrolǫ̗as*, "murderer of one's mother," appear in a list of criminals. The two terms are followed immediately by the plural of Gk. *androphónos*, "manslayers" (NEB "murderers").

D. G. BURKE

MURMUR [Heb. *lûn* (Ex. 15:24; 16:2, 7f.; 17:3; Nu. 14:2, 27, 29, 36; 16:11, 41 [MT 17:6]; 17:5 [MT 20]; Josh. 9:18), *rāgan* (Dt. 1:27; Ps. 106:25; Isa. 29:24); Gk. *gongýzō* (Lk. 5:30; Jn. 6:41, 43, 61), *diagongýzō* (Lk. 15:2; 19:7), *gongysmós* (Acts 6:1)]; AV also MURMURING (Acts 6:1); NEB also COMPLAIN, "make complaint," "raise an outcry" (Ex. 17:3), "be indignant" (Josh. 9:18), GRUMBLE, etc.; **MURMURINGS** [Heb. *tᵉlunnôṯ*] (Ex. 16:7ff.; Nu. 14:27; 17:5, 10 [MT 20, 25]); NEB COMPLAINTS; **GRUMBLE** [Gk. *gongýzō* (Mt. 20:11; 1 Cor. 10:10), *stenázō* (Jas. 5:9)]; AV MURMUR, GRUDGE; NEB also BLAME; **GRUMBLER** [*gongystḗs*] (Jude 16); AV MURMURER; **GRUMBLING** [*gongysmós*] (Phil. 2:14); AV MURMURING; NEB COMPLAINT; **MUTTER** [Heb. *hāgâ* (Isa. 59:3), hiphil part. of *hāgâ* (8:19); Gk. *gongýzō* (Jn. 7:32)]; AV also MURMUR; NEB also GIBBER, UTTER; **MUTTERING** [*gongysmós*] (Jn. 7:12); AV MURMURING; NEB WHISPERING.

Murmuring is an outward expression of deep inward discontent and rejection of one's lot. During the wilderness journey from Egypt to Sinai the Israelites frequently complained against Moses. They became thirsty (Ex. 15:24), hungry (16:2f.), and distressed (Nu. 14:2f.). The memory of their better moments in Egypt caused them to ask why they had ever left. Although they murmured against Moses and at times against Aaron, their real complaint was against God. God heard their complaining and took action against it, generally by eliminating the area of complaint and punishing a portion of the congregation. For the congregation of God, murmuring signifies unbelief and may result in death (Nu. 17:10). Dt. 13 requires one who deliberately turns the people away from God to be killed immediately.

When the Israelites first approached Palestine to occupy it, the spies brought back an evil report and caused the congregation to murmur against God and His chosen leaders, Moses and Aaron. God answered the people's complaint, "Would that we had died in this wilderness!" (Nu. 14:2), by allowing no one to enter the land. The spies who incited the congregation to complain died by plague (vv. 1-37).

Afterward Korah and his company rebelled against Moses and Aaron for assuming too much of the leadership of the nation (Nu. 16:1-35). A test was made between Korah and the house of Aaron. The Lord accepted Aaron's censer but rejected Korah's, who thus was subject to immediate death. After Korah's punishment the rods of all twelve tribes along with Aaron's were presented before the Lord (17:6f.). Aaron's rod budded; thereby God reconfirmed visibly that the household of priests was to come from the family of Aaron (v. 8). This visual test was undertaken to end the murmuring among the people (v. 5).

Murmuring in the OT is concentrated in these incidents

in the wilderness. A complaining congregation is a divided congregation that can accomplish little. To achieve His purpose for Israel God had to rid the people of their persistent murmurings. Thus Isa. 29:24 speaks of a time when "those who murmur will accept instruction."

In the NT the words and acts of Jesus caused a great deal of murmuring. The Pharisees and scribes particularly were offended at Jesus' practice of eating with tax collectors and sinners (Lk. 5:30; 15:2; 19:7). Jesus' teaching at Capernaum, "I am the bread which came down from heaven," caused not only the crowds but also the disciples to murmur (Jn. 6:41-71). Jesus quickly perceived this and asked them. "Do you take offense at this?" In compassion He wished to destroy the seeds of their unbelief. The Twelve began to separate from Jesus, but Peter confessed the deity of Jesus and thereby held the Twelve together. Judas, however, persisted in unbelief; perhaps he was the one who murmured against the woman who anointed Jesus (Mk. 14:3ff., AV; cf. Jn. 12:3-8).

The NT Church experienced the murmuring of the Hellenists against the Hebrews "because their widows were neglected in the daily distribution" (Acts 6:1). The disciples, realizing the detrimental force of discontent, moved quickly to end its cause.

Paul exhorted the Corinthians not to murmur as the Hebrews had done in the wilderness; they had been destroyed (1 Cor. 10:10). The worst portrait of the complainer appears in Jude 16: "These are grumblers [AV "murmurers"], malcontents, following their own passions, loud-mouthed boasters, flattering people to gain advantage." Murmurings oppose faith and will soon destroy it. Therefore, in regard to achieving salvation, Paul exhorted the Philippians: "Do all things without murmurings and disputing" (Phil. 2:14, AV). Faith eliminates murmurings.

MURRAIN mûr'ən [Heb. *deḇer*; Gk. *thánatos*] (Ex. 9:3, AV); RSV PLAGUE; NEB PESTILENCE. A medieval term describing diseases of high morbidity affecting people or animals. The fifth Egyptian plague involved a plague of flies; it was probably epizootic in nature and conveyed by insects. Many writers have reported the incidence of severe cattle plagues in Egypt.

The disease may have been rinderpest, an affliction that can be transmitted by flies and quickly attain destructive proportions. Human contact with putrefying carcasses sometimes results in staphylococcal infection, which produces boils. An alternative diagnosis is anthrax, an infectious disease of the herbivora characterized by the presence of *Bacillus anthracis* in the bloodstream. Severe losses often occur among animals, and the disease can be transmitted to people. R. K. H.

MUSE [Heb. qal and polel of *śî(a)ḥ*] (Ps. 77:12 [MT 13]; 143:5); AV also TALK; NEB also "fill my mind"; [*hāgâ*] (Isa. 33:18); AV MEDITATE; NEB "call to mind"; [*hāgîg*] (Ps. 39:3 [MT 4]); NEB "mind wandered." To be absorbed in thought, repeated turning something over in the mind.

Śî(a)ḥ and *hāgâ* are used in synonymous parallelism (Ps. 77:12 [MT 13]; 143:5) to express the idea of being completely absorbed in thought about God. In times of distress the psalmists found hope in meditating on God's saving deeds in the past. In 39:3 (MT 4), however, the psalmist is ruminating on his own miserable condition. He chose to brood in silence, in order not to give the wicked occasion for gloating (vv. 1f.), but this only intensified the excruciating feelings that raged inside of him; he found relief only when he expressed his anguish to God. In Isa. 33:18 the prophet foretells a time when the terror of defeat and captivity will be merely a painful memory.

In Lk. 3:15, AV, "muse" renders Gk. *dialogízomai*, "ponder," "discuss" (RSV "question"); *see* QUESTION; DISCUSSION.

See also MEDITATE. N. J. O.

MUSHI mōō'shī [Heb. *mûšî, mušî*]; **MUSHITES** mōō'shīts [Heb. *hammûšî*]; NEB also FAMILY OF MUSHI. The second son of Merari and the patronymic of one of the two families of Levites descended from Merari (Ex. 6:19; Nu. 3:20, 33; 26:58; 1 Ch. 6:19, 47 [MT 4, 32]; 23:21, 23; 24:26, 30).

MUSIC [Heb. *nᵉgînâ*] (Lam. 5:14); AV MUSICK; NEB STRINGS; [*maśśā'*–'burden'] (1 Ch. 15:22, 27); AV MUSICK; NEB also SONG; [pl. hiphil part. of *šāmaʿ*–'cause to hear'] (1 Ch. 16:42); AV "those that should make a sound"; NEB "players"; [*šîr*–'sing'] (1 Ch. 25:6); AV SONG; NEB SINGING; [*hᵘmôn*–'noise'] (Ezk. 26:13); AV "noise"; NEB "clamour"; [Aram. *zᵉmārā'*] (Dnl. 3:5, 7, 10, 15); AV MUSICK; NEB SINGING; [Gk. *symphōnía*] (Lk. 15:25). The RSV paraphrases two prepositional phrases: [Heb. *ʿᵃlê-āśôr wa ʿᵃlê-nāḇel*] (Ps. 92:3 [MT 4]) — "to the music of the lute and the harp"; AV "upon an instrument of ten strings and upon the psaltery"; NEB "to the music of a ten-stringed lute, to the sounding chords of the harp"; [*bᵉkinnôr*] (Ps. 49:4 [MT 5] — "to the music of the lyre"; AV "upon the harp"; NEB "on the harp"; **MAKE MUSIC** [hiphil part. of *šāmaʿ*] (1 Ch. 15:28); AV "make a noise"; NEB "play"; **MUSICAL INSTRUMENTS, INSTRUMENTS OF MUSIC, INSTRUMENTS FOR MUSIC, INSTRUMENTS** [Heb. *kᵉlê šîr*] (1 Ch. 15:16; 16:42; 2 Ch. 5:13; 7:6; 23:13; 34:12; Neh. 12:36; Am. 5:6); AV also INSTRUMENTS OF MUSICK; NEB also MUSICIANS (2 Ch. 34:12); [*šālîšîm*–'three'] (1 S. 18:6); NEB "dancing"; **STRINGED INSTRUMENTS** [pl. of *nᵉgînâ*] (Isa. 38:20; titles of Pss. 4, 6, 54, 55, 61, 67, 76 [all MT v. 1]); AV also NEGINOTH (in Psalms); NEB "music of praise" (NEB omits all Psalm titles); [pl. of *mēn*] (Ps. 45:8 [MT 9]); AV "whereby"; NEB MUSIC OF STRINGS.

I. Ancient Near Eastern Music.–A. Mesopotamia and Egypt. The history of ancient Near Eastern music begins at approximately the same time in both Mesopotamia and Egypt.

On clay tablets found at Uruk, dating to the turn of the 4th millennium B.C., there appears the earliest form of the cuneiform sign *balaĝ*, clearly showing the rounded contours and diagonal strings of the typical Sumerian arched or boat-shaped harp. From several centuries later, two harpers figure on a fragment of a stone vase from ancient Adab (Bismaya). From the Royal Cemetery at Ur, the traditional home of Abraham, come the actual remains of nine richly ornamented lyres, one arched harp with gold-

capped tuning pegs, and a set of pipes, found among the funerary furnishing of Queen Pu-Abi and her retinue (*ca.* 2650 B.C.). One panel of a plaque of shell inlay that once decorated one of the Ur lyres shows a fanciful animal orchestra: a donkey plays a lyre, a bear claps and sings, and a jackal beats time with a percussion instrument and a sistrum (*see* picture in BEAR). The so-called Standard of Ur mosaic depicts a leisurely banquet scene, the entertainment provided by a male lyre player and singer. This and other iconographic evidence from Mesopotamia throughout the 3rd millennium witness to the prominent place of music in the secular life of ancient Sumerian culture.

As the cuneiform writing system matured to the point that ideas as well as objects could be represented, textual evidence begins to appear. From the early second half of the 3rd millennium comes the first mention of the *kinnāru*, the West Semitic lyre (Heb. *kinnôr*), in lexical lists from the ancient Syrian kingdom of Ebla. The Mesopotamian hymnic tradition begins at about the same time, at Tell Abu Ṣalabīḫ, with a collection of divine hymns of praise and a fragment of a hymn to the temple-city of Kish. The poetess Enheduanna, daughter of Sargon of Akkad (*ca.* 2350 B.C.) and high priestess of the moon-god at Ur, is credited with the composition of several powerful and finely crafted hymns to the goddess of love and war, Inanna/Ishtar, and of a long, litany-like collection of hymns to the principal temples and deities of Sumer and Akkad — all known from versions preserved in later scribal schools. At the end of the 3rd millennium, texts commemorating temple construction at Lagash and numerous hymns to and for the kings of the 3rd Dynasty of Ur — replete with musical terminology — attest to a rich and well-developed musical tradition in the last days of Sumerian civilization.

Resources for the history of Assyro-Babylonian music in the 2nd and 1st millennia are even more extensive. Iconographic evidence from both the heartland of Mesopotamia and neighboring countries within the Mesopotamian cultural area increases substantially. New instruments make their appearance, particularly the long-necked lute sometime before the beginning of the 2nd millennium. First-millennium Assyrian reliefs depict a number of common musical instruments, often in great detail, including several varieties of harps and lyres, hand drums, pipes, and cymbals. Lexical lists from the scribal schools and other sources have preserved the Sumerian and Akkadian names of many different instruments and varieties of instruments, although — as in the case of the biblical instruments — identification, beyond general type or character, is usually difficult, as is the exact matching of names with graphic illustrations.

While little is known about Mesopotamian secular song, the use of song in religious ritual is well attested. An extensive repertory of divine hymns, lamentations, and liturgical litanies is preserved, albeit often in fragmentary form, and catalogs of hymn titles mention many further examples not yet recovered. Many hymns still composed in Sumerian from the first half of the 2nd millennium feature performance indications. The *tigi* and *adab* hymns, for example, both named after types of drums, were generally composed of two sections of approximately the same length, the *saĝara*, "set(?) strings," and the *sagida*, "plucked(?) strings"; the *adab* ended with a coda-like doxology, its *uru*, "high/loud-part(?)." Each of the major sections could be further divided and subdivided into subsections all identified by descriptive technical terms, all of which suggests formalized and complicated choral or instrumental performance. Other Sumero-Akkadian hymn-types named after (accompanying?) instruments include the *zami* (lyre) hymn of divine praise, and the *balaĝ* (harp) and *eršema* (drum-wail) liturgical hymns of penitential petition.

Mesopotamian sacred and courtly music was primarily the province of families of musicians. The *nâru* was an ordinary musician,probably providing secular entertainment as well as assisting in temple performances. The *kalû* had a more specialized profession, performing harp music and laments at private funerals and officiating in the lengthy, involved, penitential liturgies particularly associated with the later stages of Assyro-Babylonian religion. Descriptions of rituals from Mari (18th cent. B.C.) and Uruk (4th cent. B.C.) give details of some of the *kalû*'s activities, and late Babylonian calendars list the names and orders of different temple liturgies to be performed by him on specific days of the year. Professional musicians were necessarily literate, trained in the temple schools, and such musician-scribes were probably responsible for the cuneiform tablets from *ca.* 1800 to *ca.* 500 B.C. that set forth the Mesopotamian theory of musical intervals and scales whose details have gradually come to light over the past several decades (see III.A below).

Egyptian musical practice also has a long and well-documented history. Among the earliest iconographic evidence is a depiction of a fox playing an end-blown flute, accompanied by a dancing giraffe and ibex, found on a ceremonial palette from Hierakonpolis (*ca.* 3000 B.C.). Depiction of end-blown flutes, single and double clarinets, harps, and trumpets appear in tombs of the Old Kingdom (*ca.* 2686-2040 B.C.), alongside singers and, often, dancers. By the New Kingdom (*ca.* 1558-1085 B.C.) soloists and ensembles illustrate a variety of new instruments, including the lute (a Mesopotamian import), several types of lyres and harps, the double oboe, and various sorts of drums, tambourines, clappers, and sistra.

Many of these instruments still exist. Among preserved percussion instruments are animal-headed clappers from

Musicians on a mural from the tomb of Nakht (18th Dynasty), playing a double flute (left), lute (center), and harp (right) (Oriental Institute, University of Chicago)

the 1st Dynasty (*ca.* 3100-2890 B.C.), other sorts of wooden clappers, bronze cymbals of varying size and shape, bells, jingles, rattles, decorated metal and faience sistra, and an array of hand drums. Extant wind instruments include a bronze and copper trumpet from the tomb of Tutankhamen (1347-1338 B.C.), a number of end-blown true flutes, a much larger number of pipes, double clarinets (Old Kingdom) and double oboes (New Kingdom), and terra-cotta rhyton-shaped wind instruments from the Greco-Roman period. Strings include symmetrical and asymmetrical lyres, both angular and arched or bow-type harps, which show great variety in size and number of strings, and two sizes of two or three-stringed lutes. The well-preserved state of many of these instruments has permitted experimentation on the spacing of flute finger holes and lute frets, and reconstructions of lyre and harp stringing, in attempts to determine the musical intervals in use at the times of their construction. The attempts have met with some small success, but as no written music exists, nothing is known about the actual sound of ancient Egyptian music. Music was apparently of great importance to the Egyptians. Many of their greatest deities, including Hathor, Isis, and Osiris, had musical associations. The iconographic evidence is extensive, and the literature of Egypt is replete with musical references. Remarks concerning Egyptian music and musical traditions are common in the works of the classical authors (see *New Grove Dictionary of Music and Musicians* [1980], VI, *s.v.* "Egypt I" [R. Anderson]).

B. OT. Biblical references to music open with the ascription of its origin to one of Cain's descendants, the legendary Jubal, who was "the father of all those who play the lyre and pipe" (Gen. 4:21). His name is related to Heb. *yôḇēl,* "ram," from whose horns the primitive *šôpār*-horn was made, easily perceived as a most ancient instrument indeed. While Enki/Ea, the god of wisdom, magic, and crafts, was the proper Sumero-Akkadian patron of music, Jubal's counterpart in the Mesopotamian king-sage tradition may have been the first postdiluvian sage Nungal-piriĝgal, who is associated with the introduction of musical instruments.

References to the popular uses of music are common in the early times of biblical history. It was always a vital part of secular celebrations. Laban chides Jacob for denying him the opportunity to hold a farewell party, complete with "mirth and songs, with tambourine and lyre" (Gen. 31:27); Jephthah's daughter showed her happiness at her father's return by greeting him "with timbrels and with dances" (Jgs. 11:34). Isaiah condemns the idle rich who wile away their days with "lyre and harp, timbrel and flute and wine at their feasts" (Isa. 5:12); and Job complains of the happy lives of the wicked, whose children dance, and who "sing to the tambourine and the lyre, and rejoice to the sound of the pipe" (Job 21:11f.). In more mundane circumstances the welcome arrival at an oasis could occasion a work song by the well diggers (Nu. 21:17f.); and singing enlivened the labors of the watchman (Isa. 21:12), the vineyard keeper (Isa. 27:2-5), or the wine pressers (Jer. 25:30; 48:33).

The first biblical song depicts Lamech's vengeance (Gen. 4:23), and warfare, particularly during the nomadic period and the time of the Conquest, gave rise to many songs or song quotations. Such heroic songs were probably the subject matter of the lost Book of the Wars of the Lord (Nu. 21:14) and the Book of Jashar (Josh. 10:13; 2 S. 1:18), and no doubt formed a good part of the repertory of the early OT minstrels and bards (cf. Nu. 21:27-30).

Victory in battle was an especially heady theme. Miriam sang of the victory over Pharaoh while "all the women went out after her with timbrels and dancing" (Ex. 15:20f.); and Deborah's song celebrating the defeat of the Canaanite king Jabin is a brilliant and artful celebration of Israel's triumph (Jgs. 5). Samson exults over his defeat of the Philistines with a rhythmic couplet (Jgs. 15:16):"With the jawbone of an ass,/heaps upon heaps,/With the jawbone of an ass/have I slain a thousand men," a chant doubtless taken up and repeated by the men of Judah, like that which the women sang to one another at Saul's homecoming (1 S. 18:6f.): "Saul has slain his thousands,/And David his ten thousands."

Not every battle was won, however, and songs mourning the deaths of heroes were also recorded. The earliest example is David's moving lament for Saul and Jonathan, a citation from the lost Book of Jashar (2 S. 1:19-27); cf. also David's lamentation for Abner (2 S. 3:33f.).

Apart from the use of the trumpet as a signaling instrument (cf. Nu. 10:1-10), music seems to have played a rather minor role in the national religion of the nomadic period and during the Conquest. The arrival of the monarchy, however, and with it the first temple, saw the beginnings of professional musicianship at the court (cf. 1 K. 1:34, 39f.; 10:2; Eccl. 2:8) and in religious ritual. David served as Saul's private musician (1 S. 19:9), and by tradition David was a skillful lyre player (1 S. 16:16-18), an inventor of instruments (Am. 6:5), and also a dancer (2 S. 6:14f.). King David's prowess in music was foreshadowed only by that of the Sumerian King Shulgi of Ur (2093-2045 B.C.), who boasted of his remarkable talents in music as well as in athletics and statesmanship. Whether the establishment of liturgical music in Israel truly began only with David, as described in detail in 1 Ch. 15, cannot be easily ascertained; it was probably less elaborate in Solomonic times.

Apart from trumpet flourishes (Nu. 10:10; Ps. 98:6), the music of the temple probably consisted essentially of the singing of religious lyrics to the accompaniment of primarily stringed instruments (cf. Am 5:23) following the offering of the sacrifices (2 Ch. 29:20-30). Since much of the Psalter may be a postexilic creation or recasting, it is a better guide to the nature of the liturgy of the second temple. But praise, thanksgiving, and penitential petition are common themes in religious expression, and the psalms that feature them may give some idea of the form and content of the earlier liturgy.

After the Exile and the reestablishment of the temple the responsibility for the vocal and instrumental music of the shrine was reassumed by the descendants of the original Levitical musicians (cf. Ezr. 2:41), and the influence of these guilds of musicians is reflected in the Levitical ascriptions in the headings of the Psalter (see III.B below). Some idea of liturgical performance techniques may be gained from the structures of many psalms. The appearance of refrains and recurrent acclamations (e.g., "Hallelujah"), the strophic construction of many psalms, and above all the common device of poetic parallelism frequently suggest varieties of responsorial or antiphonal presentation.

II. Musical Instruments.–Identification of the sixteen or more distinct biblical musical instruments must rely primarily on literary evidence: the Bible itself and its early translations, the reports and explanations of the rabbinic and patristic literature, and descriptions and observations of Greek and Roman authors. In recent years the Qumrân discoveries and the recovery of the Ugaritic literature have added somewhat to the discussion, as has the increasing availability of Sumero-Akkadian materials. The newly discovered written remains of ancient Ebla are now also beginning to make their impact. Each resource, how-

ever, has its own weaknesses. Many of the biblical names occur only once or twice, and descriptive or explanatory information is extremely rare. The translations frequently provide the only hints as to the exact nature of an instrument, but they are often inconsistent or contradictory, as are many of the rabbinic and patristic explanations; the problem of anachronisms is always present, and motivation and point of view must also be taken into account. Parallels drawn from the languages of neighboring countries or linguistic areas are often valuable but must be utilized with care; many secondary sources for Sumerian and Akkadian references, for example, are now completely out of date and misleading, and the names of instruments change over time, as do the instruments themselves.

Much additional evidence has been obtained from archeological discoveries. Excavations in Israel, Syria, and Asia Minor have produced a surprising number of fragmentary instruments, mostly of metal, bone, or clay, since the climate of the eastern Mediterranean does not favor the preservation of wooden remains. Many Egyptian instruments have survived intact, however, including those made of wood and reed, and a number of Mesopotamian instruments have also been found.

More significant, perhaps, are the abundant pictorial representations on reliefs, sherds, and coins, also in the form of figurines, that have been found throughout the entire Near Eastern and Mediterranean world. Based upon such data, reliable generalizations concerning the existence and development of instrument types and the wandering of instrument styles across cultures are beginning to be possible.

Despite the help provided by both recent archeology and new literary and linguistic resources, however, the matching of a biblical name with a specific instrument or variety of instrument must still, in most cases, represent merely the best guess possible at the present stage of research.

A. Horn and Trumpet. The Bible distinguishes between two types of horns: one made of natural animal horn and the other a trumpet of metal.

1. Qeren is the ordinary Hebrew term for "(animal) horn"; this basic meaning may be seen, e.g., in Gen. 22:13 (of a ram) or Ps. 22:21 ([MT 22] of oxen). As a musical instrument it appears only in Josh. 6:5 (*qeren hayyôḇēl,* "horn of a ram") as a synonym for *šôpār* (see next entry). The Aramaic form *qarnā'* also occurs in Dnl. 3:5, 7, etc. (see II.G.1 below).

2. The *šôpār* "horn," the most frequently named instrument in the OT, is the only ancient instrument to have survived in Hebrew ritual, where it is used to announce the New Year and the Day of Atonement.

The origin of the word is uncertain. It may have a borrowing from Akk. *šappāru,* itself considered a loan from Sum. *šeĝbar,* "ibex" or "wild goat." If so, the *šôpār* was named from the material from which it was made, usually the horn of a ram (cf. *šôp^{e}rôṯ [hay]yôḇ^{e}lîm* in Josh. 6:4ff.), but also that of a wild goat, especially in the time of the second temple (Mish. *Rosh ha-shanah* iii.3-5). *Qeren yôḇēl,* "ram's horn," and *šôpār* are exact synonyms in Josh. 6:5, and *yôḇēl* is used alone with the same meaning in Ex. 19:13 (cf. *šôpār* in 19:16). The *yôḇēl* lent its name to the Jubilee (*hayyôḇēl,* Lev. 25:13, etc.), which was inaugurated by the blowing of the ram's horn (Lev. 25:9); it may also be the source of the name Jubal, the legendary "inventor" of musical instruments (Gen. 4:21).

Both modern and ancient translations fail to distinguish consistently between the (animal) horn and the (metal) trumpet. The RSV, NEB, and AV usually give "trumpet," but use "horn" (AV "cornet") where the *šôpār* and the trumpet *(ḥ^{a}ṣōṣ^{e}râ)* co-occur (1 Ch. 15:28; 2 Ch. 15:14; Hos. 5:8 [the NEB reverses the terms!]; Ps. 8:6 [MT 7]); the NEB also uses "horn" in other scattered occurrences (Job 39:24f.; Ps. 81:3 [MT 4]; Zec. 9:14). In the LXX *keratínē* translates only *šôpār,* while *sálpinx* translates several terms; the Vulg. translates both *buccina* and *tuba,* but once also *tuba cornae,* "horn trumpet," to mark the contrast in Ps. 81:3.

The *šôpār* could be embellished with carved ornamentations and inscriptions. The natural horn could also be softened in hot water and straightened or shaped. Even when provided with a mouthpiece, however, it could still produce only a few notes, the first one or two harmonic overtones of its fundamental, and these only approximately. Its sound was more threatening or frightening than musical, especially when used in concert, and its ability to inspire fear and awe helps explain its role in the fall of Jericho (Josh. 6:6-20) and at the giving of the Law at Mt. Sinai (Ex. 19:13ff.; 20:18).

The *šôpār* was fundamentally a signaling instrument, especially in times of war. It signaled a call to arms (Jgs. 3:27; 6:34; Neh. 4:18-20), a warning of impending war (Jer. 6:1; Ezk. 33:3-6; Hos. 5:8), a retreat (2 S. 18:16), the proclaiming of victory (1 S. 13:3), and the disbanding of forces (2 S. 20:1, 22). Its voice alarmed the enemy (Jgs. 7:8, 16-22) and was a fearful symbol of war itself (Jer. 4:19-21). It would herald the destruction on the Day of Judgment (Zeph. 1:16) and the ultimate return to Zion (Isa. 28:13). The stilling of its voice was synonymous with peace (Jer. 42:14).

In ritual use it heralded David's transfer of the ark (2 S. 6:15; 1 Ch. 15:28) and King Asa's repentance and renewal of the covenant (2 Ch. 15:14). It accompanied the coronations of Absalom (2 S. 15:10) and Jehu (2 K. 9:13) and the anointing of Solomon (1 K. 1:34). A signal horn *(šôpār t^{e}rû'â)* was sent about the land on the tenth day of the seventh month to proclaim the Day of Atonement (Lev. 25:9); it also announced the new and full moons (Ps. 81:3). Its "joyful voice" could be heard in the psalms of praise (Ps. 98:6; 150:3).

3. The *ḥ^{a}ṣōṣ^{e}râ,* "trumpet" (NEB also "horn" in Hos. 5:8, reversing the two instruments), was very likely a short, straight instrument with a mouthpiece and a conical or bell-shaped end. As described it must have possessed a fairly shrill, clarion tone, with a range probably limited to the first three or four harmonic overtones. Unlike the horn it was made of metal, usually bronze, but beaten silver in the case of the temple instruments. Thus the LXX and Vulg. use only *sálpinx* and *tuba,* respectively, never *keratínē* or *buccina;* where trumpet and horn contrast, in Ps. 98:6, they both paraphrase: *en sálpinxin elataís kaí phonḗ sálpingos keratínēs / in tuba ductilis et voce tubae cornae,* "with hammered-metal trumpets and the sound of trumpets [made] of horn."

The first mention of the trumpet, as well as a good summary of its main uses, can be found in Nu. 10:2-10. Moses was commanded to make two trumpets of hammered silver, to be blown to summon the congregation or its leaders to the tent of meeting, to break camp, and above all to sound the alarm in times of war. But they were to be sounded also on "days of gladness" (cf. 1 Ch. 13:8; Ps. 98:6), on holidays; at the beginning of each new moon (cf. *šôpār,* above); and over burnt offerings and sacrifices (cf. 2 Ch. 29:26), as a reminder of God's presence among His people. Moreover, the sounding of the trumpets was to be the duty and privilege of the Aaronite priests (v. 8), who exercised it both in war (2 Ch. 13:12; Nu. 31:6) and in sacred ceremonies: at the bringing of the

ark to Jerusalem (1 Ch. 15:24; 16:6, 42), at the dedication of Solomon's temple (2 Ch. 5:12; 7:6), and at the dedications of the second temple (Ezr. 3:10) and the wall of Jerusalem (Neh. 12:35, 41).

As the quintessential priestly instrument the trumpet was included among the gold and silver vessels of the temple in 2 K. 12:14 (cf. Nu. 31:6); thus it may be two temple trumpets that are depicted among the spoils of Israel on the Roman arch erected by Titus to commemorate his victory over the Jews (*see* picture in LAMPSTAND). If so, they appear to be somewhat longer than the example described by Josephus, who compares it to the Roman military trumpet: "(Moses) also invented a type of silver trumpet . . . whose length was a little less than a cubit; it was a narrow tube slightly wider than an *aulós* [pipe] . . . ending in a bell like [Roman] trumpets" (*Ant.* iii.12.6 [291]). The rough representations of the pair of temple trumpets found on Bar Cochba silver denarii do not permit an accurate assessment of their length.

In twenty-eight of its twenty-nine occurrences *ḥaṣōṣᵉrâ* appears in the plural, and it can be assumed that trumpets were sounded in pairs or in larger ensembles, both to magnify their effect and to fulfil the command of Nu. 10:2. Large choirs could also be amassed: at the magnificent dedication of Solomon's temple 120 priestly trumpeters joined the Levitical singers "in unison in praise and thanksgiving" (2 Ch. 5:12f.).

Two terms describe the trumpet's blast: *tᵉqîʿâ*, elsewhere describing a "thrust" or "clap," and *tᵉrûʿâ*, referring to a (shouted) alarm. The technical meanings of each remain unclear. According to some rabbinic interpretations *tᵉqîʿâ* refers to a long, sustained tone, while *tᵉrûʿâ* designates a kind of tremolo (see Sendrey, p. 347). Both terms occur in Nu. 10:7: "blow" and "sound an alarm," respectively (NEB "sound a trumpet," "raise a shout").

4. For NT *sálpinx*, see II.H.3 below.

B. Strings. The commonest term for "musical instruments" in general was *kᵉlê šîr*, lit. "instruments of/for song," virtually always referring to the strings, which provided the chief accompaniment to singing. Despite their relative prominence, however, and the relative richness of comparative information that now exists concerning ancient Near Eastern stringed instruments, the exact identification of at least one of the principal biblical terms still remains problematic. Three fundamentally different classes of instrument invariably come into question.

The lyre had a quadrilateral shape with a framework consisting of a sound box and two uprights, often of unequal length, topped by a yoke or crosspiece. The strings passed over a bridge and were attached either to the base of the sound box or to the bridge itself. The strings were roughly of the same length.

The harp consisted of a sound box from one end of which a neck protruded at a right or oblique angle; the resonator and the neck often appear to be of one piece, frequently curved. A set of strings of unequal lengths stretched from the top of the resonator to the neck.

The ancient lute generally had a relatively small, rounded or quadrilateral sound box, joined to a long, narrow straight neck. Two or three strings were attached to the base of the resonator, passed over a bridge, and ran parallel to the neck. The instrument was often fretted, like the modern guitar.

1. The *kinnór* is the most often mentioned OT stringed instrument, and the term itself was used widely throughout the ancient Near East. This is David's "harp," although it is now generally considered to a type of lyre.

The RSV translates "lyre" in nearly all occurrences, but "harp" in Ps. 150:3 and Isa. 23:16, (NEB and AV usually "harp"; AV also "psaltery" in Ps. 33:3). The LXX usually either borrows from the Hebrew *(kinýra)* in Samuel, Kings, Chronicles, and Nehemiah, or identifies *kinnór* with the Greek *kithára*-lyre; the LXX also uses *psaltḗrion* (Gen. 4:21; Ps. 49:5; 83:3; 149:3) and *órganon* "instrument" (Ps. 137:2). The Vulg. has mostly *cithara* but also *lyra* (1 Ch. 15:16; 16:5), *psalterium* (Ps. 49:5; 149:3), and *organum* (Ps. 137:2) following the LXX.

The word's origin is uncertain. It has been connected etymologically with the Persian-Arabic word for lotus-wood *(kunar)*, from whose wood other ancient instruments are known to have been constructed. Its first attestation is in Ebla cuneiform lexical lists (G. Pettinato, *Materiali epigrafici di Ebla*, 4 [1982], 264, no. 572), spelled *gi-na-ru₁₂-um*, *gi-na-lum*, *gi-na-rúm*, and equated there with Sum. balaĝ, normally "harp" but perhaps also, by extension, "resonating object." It reappears much later as Akk. *kinnāru* (with wood determinative) in Mari texts dated to the reign of Zimri-Lim (*ca.* 1775 B.C.), whose diplomatic missions included all the princely courts of Syria. One text (*ARM*, XIII [1964], 20) records the shipment of two of five *kinnāru* ordered by the king. In another text (*ARM*, XXI [1983], 298) hides of an exotic animal *(šinuntum)* are issued for the fabrication of temple and palace furnishings, including a variety of "musicians' instruments": 3 *kinnāru*, a "Dilmun-instrument," and a *šepītum*-instrument (elsewhere equated with Sum. ĝiš.balaĝ.tur, "small harp"). It is often attested in Ugaritic as *knr* (once equated with a divinized Akk. *kinnāru* in a bilingual list of gods). It occurs in the Hurrian term LÚ.*kinnaruhuli*, "lyre player/maker" (D. J. Wiseman, *Alalakh Tablets* [1953], no. 172, line 7); in LÚ.*kinirtalla-*, a Hittite term for a kind of musician; and in Ramesside Egypt as *kn-ỉnỉw-rw*.

A good number of illustrations of the West Semitic lyre exist for the biblical period, including the well-known, early nineteenth-century fresco in an Egyptian tomb at Beni-hasan depicting a lyre-player among "Amorite" nomads entering Egypt (*see* picture in BELLOWS); lyre-players on an ivory panel (*see* picture in MEGIDDO) and a "Philistine" jug from Megiddo (12th and 11th cents.); lyre-players among prisoners from Lachish on an Assyrian relief depicting Sennacherib's conquests in Israel (early 7th cent.); and the two types of lyres on Bar Cochba coins (A.D. 132-135) that are thought to represent temple instruments. A seal (*ca.* 7th cent. B.C.) published in 1978 features an elegantly curved twelve-stringed lyre accompanied by the Hebrew inscription, "Belonging to Maʿadanah, the king's daughter" (see N. Avigad, *IEJ*, 28 [1978], 148, for a summary of lyre illustrations).

The illustrations mostly depict a portable, rectangular or trapezoidal instrument, held out from the body at an angle of forty-five to ninety degrees, often with asymmetrical arms, the upper being longer and sometimes curved, and with an average of eight to nine strings. The chief exceptions are the two instruments on the Bar Cochba coins, one of which closely resembles the rounded Greek *kithára*. If the two instruments are truly meant to commemorate sacred instruments in use in the late days of the second temple, then the LXX's treatment of the *kinnór* may reflect a memory of changes in the shape of temple lyres: an older instrument in use in the time of the historical books, for which the original term was retained *(kinýra)*, and later instruments, more Hellenic in style, for which the translation *kithára* was more accurate. The term has come into English both as "guitar" and "zither," and an early type of guitar *(guitare,* or *gittern/cittern/cithern)* is shown in the hands of David or others of his musicians in medieval Psalteries or on architectural reliefs

Musicians at a banquet. From left to right: harp player (singing), lute player (singing) with plectrum, double-pipe player. From the tomb of Amenemhet, 15th cent. B.C. (Oriental Institute, University of Chicago)

(see M. Remnant and R. Marks, "A Medieval 'Gittern,'" in T. C. Mitchell, ed., *Music and Civilization* [1980], pp. 83-134).

According to Josephus the *kinnôr* had ten strings and was played with a plectrum (*Ant.* vii.12.3 [306]); but David played his lyre "with his hand" when comforting Saul (1 S. 16:23), which suggests that the *kinnôr* was also plucked in order to produce a softer, more soothing sound. The pictorial remains show lyre players with and without plectra, and the Gk. *kithára* was played both ways.

The *kinnôr* was played alone, or with other instruments, particularly the *nēḇel* (see next section). Its sound was "sweet" (Ps. 81:3), and it was usually an instrument of joy and celebration, though it was capable of more somber tones (Job 30:31; Isa. 16:11). It was employed at secular festivities (Gen. 31:27; Job 21:12; Isa. 5:11), and it accompanied songs of praise and thanksgiving (Ps. 33:2; 43:4; 92:3; etc.), as well as the ecstasies of itinerant prophets (1 S. 10:5). Its invention is ascribed to Jubal (Gen. 4:21). David is said to have introduced it to the temple service (1 Ch. 15:16), and it was regularly played as part of the Levitical orchestra (2 Ch. 5:12; 9:11; 29:25; Neh. 12:37). With grim irony Isaiah fortells that Assyria's downfall will be accomplished "to the sound of timbrels and lyres" (30:32), and that Tyre will be forgotten like an aged harlot, remembering happier days, who wanders the city making bittersweet music on her lyre (23:16). In the end the joyful sound of the lyre will never again be heard either in Assyria or in Tyre (Isa. 24:8; Ezk. 26:13).

2. The identification of the *nēḇel* (also *neḇel; kᵉlî-neḇel*), the second commonest OT stringed instrument, remains problematic. It was most likely a variety of lyre or harp (hence RSV "harp," also "lute" [Ps. 150:3]; cf. NEB "lute"; AV "psaltery," also "viol" [Isa. 5:12; 14:11; Am. 5:23; 6:5]). The LXX treats *nēḇel* much as it does *kinnôr*. In the historical books (Samuel, Kings, Chronicles) the original term was retained as *nábla;* other, newer terms appear elsewhere: *psaltḗrion* (in Nehemiah, Psalms, Isaiah), *órganon* (Am. 5:23; 6:5), and *kithára* (Ps. 81:2). The Vulg. gives *nablium* in 1 Ch. 15:16; 16:5; 20:28, but otherwise mostly *psalterium;* also *lyra* (2 S. 6:5; 1 K. 10:2; Isa. 5:12; Am. 5:23) and *cithara* with the LXX in Ps. 81:2. Both the LXX and Vulg. paraphrase or misunderstand Ps. 71:22 and Isa. 14:11.

In extramusical use *nēḇel* signifies a clay or skin storage vessel for liquids or cereals, from whose shape the musical instrument may have gotten its name; this, in fact, may be the implication behind the unique expression *kᵉlî-neḇel*, "*neḇel*-instrument," of Ps. 71:22 (contrast *kᵉlê han-nᵉḇālîm*, "*neḇel*-vessels," in Isa. 22:24). In its musical sense both it and Gk. *nábla* may also have been borrowings from a third language. Sopater (*ca.* 300 B.C.), quoted by Athenaeus (*Deipnosophistai* iv.175b), mentions the "Sidonian *nabla*," suggesting the possibility of a Phoenician origin. According to Eusebius (cf. Sendrey, p. 278) it came from Assyria via the Cappadocians, although no such term is as yet attested in Akkadian.

In early usage Gk. *psaltḗrion* was a general term for harplike instruments that were plucked *(psállein)* rather than played with a plectrum (H. Roberts, "Technique of Playing Ancient Greek Instruments of the Lyre Type," in T. C. Mitchell, ed., *Music and Civilization* [1980], p. 44); *órganon* signified any "instrument." Sopater (*op. cit.*, 175c) describes the *nábla* as an inelegant instrument, with lotus wood fixed in its ribs causing it to give forth "breathy music." In Bayer's view (*Yuval*, pp. 114f.) the LXX, continuing the "conservative" policy adopted for the *kinnôr*, retained the term in the historical books, but in view of the *nábla*'s poor contemporary reputation, substituted more neutral terms elsewhere.

MUSIC

The *nēḇel* is virtually always mentioned together with the *kinnôr*-lyre, and must have had a similar or at least complementary character. Comparing the two, the Mishnah states that the strings of the *nēḇel* were made of a sheep's large intestine, those of the *kinnôr* of its small intestine (*Kinnim* iii.6). Having thicker strings, the instrument's register was therefore presumably lower and its sound possibly louder than that of the *kinnôr*, the latter confirmed by T.B. *Arakhin* 13b. Moreover, since it was louder, the *nēḇel* had to be matched with additional lyres when played in ensembles: "no fewer than two *nᵉḇālîm* and no more than six," but "never fewer than six *kinnôrôṯ*, and more may be added" (Mish. *Arakhin* ii.2, 5). A *nēḇel ʿāśôr*, "ten(-stringed) *nēḇel*," appears in Ps. 33:2; 144:9 (and, personified, in 1QM 4:4f.), while Ps. 92:3 (MT 4) has *ʿᵃlê-ʿāśôr waʿᵃlê-nāḇel*, "upon the 10 (-stringed instrument) and upon the *nēḇel*," suggesting that the *nēḇel* usually had other than ten strings. According to Josephus the *kinnór* had ten strings and was played with a plectrum, while the *nēḇel* had twelve tones *(phthóngous)* and was played with the fingers (*Ant.* vii.12.3 [306]); T.J. *Sukkah* 5:6 states merely that the *nēḇel* had more strings than the *kinnôr*.

Somewhat more useful is the general agreement among the early Church fathers that the *psalterium (nēḇel)* had its resonator "on the upper part," the *cithara (kinnôr)* "on the lower part" (Jerome, Augustine, Isidorus), and that the *psalterium* sounded or was played "from above," not "from below" like the *cithara*. While several explanations have been advanced, this description could fit the vertical angular harp, whose resonator extends above the player's head and whose strings descend diagonally to a neck jutting out from the body at an approximate right angle. This sort of harp, played without plectrum, was in common use in Mesopotamia after the beginning of the 2nd millennium, alongside a horizontal variety that was played with a long rodlike plectrum; it also existed in Egypt.

Bayer (*Yuval*, pp. 130f.) has offered a more intriguing solution. One of the two lyres depicted on the Bar Cochba coins is a three-stringed, rounded, Greco-Roman *kithára*, presumably representing a late style of sacred *kinnôr*. The second lyre is somewhat larger and of an unusual design. The arms, which curve outward and resemble animal horns, protrude from a sausage-shaped sack. Three to six strings end at a kind of elliptical holder located *above* the pouchlike body, rather than at a conventional bridge or at the bottom of the instrument. The second Bar Cochba lyre thus demonstrates all of the known main features of the *nēḇel:* it resembles the *kinnôr-kithára* but is somewhat larger; it has a (symbolically) larger number of strings that appear to be attached above the resonator, like those of a harp; and like some varieties of harps and lyres its resonator is covered with leather and resembles a *nēḇel*- "waterskin." Kilmer (*Reallexikon*, VI, 574) compared the Akk. *tungallu*-instrument (< Sum. tùn-gal, "large sack/container" [with wood determinative!]).

As the *nēḇel* is usually found together with the *kinnôr*, the occasions for its use were similar: secular celebrations, the rendering of joyful praise and thanksgiving, and temple ritual.

3. The term *ʿāśôr*, lit. "ten," appears only in Psalms, twice describing the *nēḇel* (33:2; 144:9). The RSV translates it as "ten-stringed harp"; the NEB, "ten-stringed lute"; and the AV, "instrument of ten strings." Once *ʿāśôr* occurs together with *nēḇel* (Ps. 92:3; RSV "lute": NEB and AV as above). If it is indeed a separate, distinct instrument in Ps. 92, it is probably best regarded as a ten-stringed variety of *nēḇel;* there is no substantive evidence for "lute" or "zither" (the latter proposed by C. Sachs, *History of Musical Instruments* [1940], p. 117). *Nēḇel ʿāśôr* also occurs in 1QM 4:4f., personified as a group of ten men.

4. For the Aram. *qayṯᵉrōs, śisabbᵉḳā'*, and *psanṯ/ṭērîn* of Dnl. 3:5, 7, etc., see II.G.3-5 below.

C. Woodwinds. Two classes of woodwind were known throughout the ancient Near East: the vertical end-blown flute, and the single- or double-reed shawm, ancestors of the modern clarinet and oboe, which were usually played in pairs. The true flute, usually made of reed, was a pastoral instrument, with a soft, breathy voice. The louder, more penetrating shawms, made of reed, wood, or metal, were better able to hold their own in orchestral ensembles.

1. The *ḥālîl* was a variety of *aulós*, either a double clarinet or a double oboe. It appears in 1 S. 10:5; 1 K. 1:40; Isa. 5:12; 30:29; and Jer. 48:36. The RSV renders it "flute," also "pipe"; the NEB, "(reed-)pipe," also "fife"; and the AV "pipe." The LXX translates it as *aulós* (except 1 K. 1:40, *echóreuon en chorois*, "dancing dances"), and the Vulg. as *tibia*.

The word may originally have referred to the buzzing sound of a reed instrument. It is commonly derived from Heb. *ḥll*, "to pierce, wound." Compare, however, Akk. *halālu*, which describes not only the sound of an Akk.

Flute player. Fragment of an alabaster relief from Nineveh (ca. 650 B.C.) (Staatliche Museen zu Berlin, DDR)

malîlu-shawm, but also the wheezing or whistling of ailing lungs, the cooing of doves, and the bubbling of a spring.

The double clarinet or double oboe was in widespread use throughout the ancient Near East.

A marble statuette of a double pipe player found on the island of Keros (2200-2000 B.C.) provides the first illustration of an Aegean *aulós* (B. Aign, *Die Geschichte der Musikinstrumente des ägäischen Raumes bis um 700 vor Christus* [1963], p. 34). The classic Greek instrument consisted of two separate pipes, usually of equal length, originally of reed or bone but later of wood or ivory. At the end of each pipe was a bulbous mouthpiece that held a single or, less commonly, a double reed. The pipes usually had three to five finger holes (more in later Roman examples) and were played simultaneously, held at an acute angle, often with the help of a band *(phorbeía)* that encircled the player's neck and compressed his lips and cheeks. Opinions differ as to whether the pipes were played in unison or one served as a drone; polyphony is usually ruled out.

At least three double clarinets and nearly seventy oboe pipes have been found in Egyptian excavations (L. Manniche, *Ancient Egyptian Musical Instruments* [1975], pp. 18ff.).

The double clarinet *(mmt)* was constructed of two parallel pipes of equal length (average 28 cm. [11 in.]) joined together with cloth and resin. Each tube had its own mouthpiece containing a single reed. The extant examples show four or six finger holes placed directly opposite each other, with sufficient differences as to produce slightly different scales. One finger covered two holes simultaneously, to produce, in Manniche's view, intentionally slightly discordant unison tones.

The double oboe (*wḏnj*[?]) also consisted of two reed pipes, slightly thinner and frequently longer than those of the clarinet: each mouthpiece held a double reed. Like the Gk. *aulós*, the pipes were not joined together but were played as separate integral instruments, held either at an angle or almost parallel. Finger holes number from three to eleven, and some pipes show as many as three thumb holes on the back. Resinous paste was used to fill certain holes, either to change a pipe's intonation or, possibly to produce a tuneable drone. Perforated metal bands rotated by small knobs served the same function on Roman instruments.

Representations of the Egyptian double clarinet are limited to the period of the Old Kingdom (*ca.* 2686-2160 B.C.); the double oboe appears at the beginning of the New Kingdom (*ca.* 1558 B.C.) and continues until the time of Augustus. The double clarinet was apparently played only by men, while the double oboe was played mainly by women; both were common in orchestral ensembles.

Two thin silver pipes, one with four finger holes, the other with only one (a variable drone?), were found in the royal graves at Ur (*ca.* 2650 B.C.); otherwise, Mesopotamian representations of double pipes first begin with a late 3rd millennium Akkadian cylinder seal, and continue into the 1st millennium B.C.

Palestinian illustrations include a *ḥālîl* player together with a dancing girl on a late thirteenth-century ivory box from Tell el-Fâr'ah (Sharuhen), and a female *ḥālîl* player on a bronze lamp from Megiddo (9th cent. ?).

The *ḥālîl* was primarily a secular instrument. After the sounding of the sacred *šôpār* at Solomon's coronation, "all the people went up after him, playing on *ḥᵃlilîm*, and rejoicing with great joy" (1 K. 1:39f.). It accompanied drunken revelry (Isa. 5:12), the beginning of a joyous pilgrimage (Isa. 30:29), and the ecstasies of wandering prophets (1 S. 10:5). Children dance to the piping of the *aulós* in Mt. 11:7 (par. Lk. 7:32). The plaintive, nasal tone of the *ḥālîl* also made it a fitting instrument for lamentation. Jeremiah's heart moaned for Moab like *ḥᵃlilîm* (48:36), and *aulós* players accompanied the mourning in Mt. 9:23.

The *ḥālîl* was not a regular temple instrument, but according to the Mishnah it was played before the altar twelve days in the year: at the Passover sacrifices, on the first day of Passover, at Pentecost, and on the eight days of the Feast of Tabernacles. A reed, rather than bronze, pipe *('abbûḇ)* was used because its sound was sweeter; and the music ended with only a single pipe playing to produce a nicer effect (Mish. *Arakhin* ii.3). The *ḥālîl* was also employed at the Water Drawing Festival (T.J. *Sukkah* 5:1) and during the harvest procession to Jerusalem (Mish. *Bikkurim* iii.3f.).

Like a modern oboist, the pipe player must have carried a supply of extra reeds with him. The money box in which Judas Iscariot kept the disciples' funds was a *glōssókonon*, originally a small case for a piper's spare reeds (Jn. 12:6; 13:29).

2. The nature of the *'ûgāḇ* is still unclear. Some evidence favors a stringed instrument, but it is mostly considered a type of pipe, perhaps a true end-blown flute, for which no other term is known. It occurs only four times (Gen. 4:21; Job 21:12; 30:31; Ps. 150:4). The RSV translates it as "pipe"; the NEB, "flute," and the AV, "organ" (< LXX and Vulg.), but both AV and NEB also "pipe" in Genesis.

The Targums consistently translated *'ûgāḇ* by *'abbûḇā'*. According to Mish. *Arakhin* ii.3 the *'ûgāḇ* was one of the instruments played in the first temple; but as it was too delicate for constant use it was later replaced by the sturdier *'abbûḇ*. The latter was also apparently used in a technical sense to refer to one of the two tubes of the *ḥālîl* (Bayer, *Encyclopedia Mikra'it*, V, 771). If so, the *'ûgāḇ* might have been a single-tube clarinet or oboe. Compare the Syr. *'abôbā'*, presumably a double pipe, and the female prostitutes who played it *(ambubaiae)* described by Horace (*Satires* i.2) and Suetonius (*Nero* 27). Akk. *ebbūbu*/*embūbu* (= Sum. GI.GÍD, "long reed," GI.DI.DA, either "single reed" or "reed to be played") was apparently a single-tube pipe or flute; cf. its secondary meaning, "trachea" or "windpipe."

The LXX, on the other hand, seems to have considered the *'ûgāḇ* a stringed instrument. It translates *kithára*, "lyre," in Genesis, *órganon* in Psalms, and *psalmós* in Job, closely paralleled by Pesh. *kinorā'*, "lyre," *minē ḥalyāṯā'*, "sweet-sounding strings," and *zᵉmārā'*, "(string-) music," respectively. *Órganon* elsewhere translates *kᵉlê šîr*, "instruments of song" (generally strings), as well as *kinnôr* (Ps. 137:2) and *nēḇel* (Am. 5:23; 6:5); and *psalmós* (< *psállein*, "to pluck"), particularly outside Psalms, always refers directly or indirectly to string music (cf. 1 S. 16:18; 2 S. 23:1; Am. 5:23; etc.). The Vulg. offers only *organum*, "instrument."

Jubal was the father of all who handled *(tōp̄ēś)* the *kinnôr* and *'ûgāḇ* (Gen. 4:21), and the psalmist praises with *minnîm*, "strings," and *'ûgāḇ*. The *'ûgāḇ* always occurs together with a stringed instrument, and most have preferred to see a contrast between two fundamentally different classes of instrument. Bayer (*Encyclopedia Mikra'it*, V, 771), however, has followed the lead of LXX, citing the Qumrân version of the apocryphal Ps. 151: "My hands have made the *'ûgāḇ*, my fingers the *kinnôr*" (11QPsAp^{a}151:2), for which the LXX has *órganon* and *psaltḗrion* respectively, both of which elsewhere translate *kinnôr* and *nēḇel*. Since the text is attributed to David, who is never mentioned in connection with wind instruments, Bayer concluded that the *'ûgāḇ* was a stringed instrument different from the lyre, probably a lute.

MUSIC

3. For the Aram. *mašrôqîṯā'* of Dnl. 3:5, 7, etc., see II.G.2 below.

D. Percussion Instruments. 1. The *tōp* (onomatopoeic; cf. Ugar. *tp*) was a shallow, round hand drum, consisting of a wooden frame about 25 cm. (10 in.) in diameter covered on one side with a parchment membrane. "Tambourine" is an accurate translation but misleading to the modern reader since, to judge from preserved illustrations, the *tōp* was never provided with the metal jingles found on the modern instrument. The RSV has "timbrel" or "tambourine"; the NEB also "tabor," "drum," and "jingles" (Jer. 31:4); the AV also "tabret."

In Mesopotamia and Egypt the hand drum was a feminine instrument. In Israel, too, the *tōp* seems to have been played mainly by women, despite several instances that might be construed otherwise (2 S. 6:5; 1 Ch. 13:8; etc.). The instrument provided rhythmic accompaniment to singing, dancing, and instrumental music. The prophetess Miriam seized a tambourine and sang of Pharaoh's final defeat, while "all the women went out after her with timbrels and dancing" (Ex. 15:20); Jephthah's daughter greeted his return with "timbrels and dancing" (Jgs. 11:35); and the women of Israel came out to greet Saul singing, dancing, and playing tambourines (1 S. 18:6f.). The *tōp* was played at banquets and other joyous occasions (Isa. 5:12; Jer. 31:4) and, while it was not used in the temple, it could also accompany religious ecstasy (1 S. 10:15) and songs of divine praise (Ps. 81:3; 149:3; 150:4).

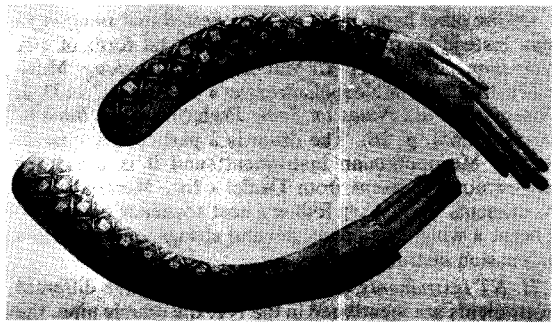
Several examples of both round and rectangular Egyptian tambourines are preserved; no such remains have as yet been found in Palestine or Mesopotamia. Sure illustrations of the frame drum begin in Mesopotamia at the beginning of the 2nd millennium B.C., and by *ca.* 700 B.C. the instrument is well represented throughout the entire ancient Near East. Neither the Egyptian barrel-shaped drum nor the Akkadian kettledrum *(lilissu)* had any apparent counterparts in Israel.

2. Two synonymous terms for the cymbals were derived from the onomatopoeic root *ṣll*, "to ring, tremble."

Mᵉṣiltayim, the more common term, is a dual: "pair of cymbals." The word also occurs in Ugaritic sources, e.g., Râs Shamrah text 24.254:3f.: *dyšr wyḏmr bknr wṯlb* [cf. Akk. *šulpu*, "reed"] *btp wmṣltm*, "who sings and plays on the lyre and the flute, on the tambourine and cymbals" (J. Nougayrol, *et al., Ugaritica*, V [1968], 552).

Ṣelṣᵉlîm is a plural, and occurs only in 2 S. 6:5 and Ps. 150:5.

Preserved examples of cymbals have been found at Ugarit, in Egypt, and at numerous sites in Israel dating from the 14th to the 8th cent. B.C. Generally found in pairs, they take the form of round flat plates, 10-15 cm. (4-6 in.) in diameter, with central bowl-like depressions (cf. Gk. *kýmbalon* < *kýmbē* or *kýmbos*, "cup, basin"). They were made of bronze (cf. 1 Ch. 15:19) and were fitted with (iron) finger rings. A terra-cotta female figurine from a Phoenician tomb in Achzib (8th cent.?) shows them held horizontally, presumably played with an up-and-down motion, like the well-known conical Assyrian cymbals.



In Ps. 150:5 the phrases *ṣilṣᵉlê šᵉmāʿ*, "cymbals of (pleasing?) sound," and *ṣilṣᵉlê tᵉrûʿâ*, "cymbals of alarm" (RSV "sounding cymbals" and "loud clashing cymbals"; NEB and AV vary slightly), are thought to refer to a difference in size or manner of playing. A difference in loudness or of relative pleasantness is certainly implied by the early translations: LXX *kýmbala euēcha* vs. *alalagmoú*, Vulg. *cymbala bene sonanta* vs. *jubilationis*. Compare Paul's "noisy gong" and "clanging cymbal" in 1 Cor. 13:1 *(chalkós ēchōn . . kýmbalon alalázon)*. Bayer, however, stressed that the size of the cymbals excavated in Palestine remains unchanged over a considerable period of time, even though, by Josephus's time, they may have become larger (*Encyclopedia Mikra'it*, V, 768; cf. *Ant.* vii.12.3 [306]).

Nubian drummer on a wall painting from a Theban tomb (18th Dynasty) (Oriental Institute, University of Chicago)

Cymbals make their first appearance in the Bible in the time of David (1 Ch. 13:8; 2 S. 6:5), who introduced them to the temple (1 Ch. 15:16), assigning responsibility for their use to Asaph and his descendants (1 Ch. 16:5; Ezr. 3:10). Thereafter they remained a Levitical instrument (2 Ch. 5:12f.; 29:25; Neh. 12:27).

3. Mᵉnaʿanʿîm (pl. only; < *nwʿ*, "to quiver, shake") were a kind of noisemaker: clappers, rattle, or sistrum. The RSV and NEB have "castanets"; the AV, "cornets." The word occurs only in 2 S. 6:5, among (folk) instruments played at the transfer of the ark to Jerusalem; it was omitted from the second report (1 Ch. 13:8). The LXX, in a confused version of the passage apparently based on an obsolete text, translates *kýmbala*. The Vulg. has *sistra* (< Gk. *seistrón*, "that which is shaken"), which is followed by a number of modern versions. The sistrum originated in Africa and was well known in Egypt and Mesopotamia; but apart from an Egyptian Hathor-headed handle found at Bethel dated to pre-Israelite times (16th or 15th cent. B.C.), no example has been found in Israel.

Egyptian (Middle Kingdom) ivory castanets carved into the shape of human arms (Louvre)

On the other hand, fifty-two pottery rattles, averaging 7 cm. (2.7 in.) in length and containing two or three clay balls, have been discovered, dating from the beginning of the 3rd millennium to the 7th cent. B.C. They first appear in temples, later in burial deposits; by the Israelite period they are found in private dwellings and were presumably toys. Their disappearance coincides roughly with the appearance of metal bells, especially in connection with burials (Bayer, *Relics,* pp. 8-14; *Encyclopedia Mikra'it,* V, 766). Bayer suggested that these represent *mᵉna'anᶜîm,* since in Samuel's time the rattle had not yet apparently become a toy.

4. Two kinds of bells or, better, "metal jingles" (true bells with clappers are unknown before the 9th cent. B.C.) are mentioned in the OT. They were not considered musical instruments in the proper sense, but had, instead, an apotropaic, protective function.

a. The *paᶜᵃmôn* (LXX *kṓdōn;* Vulg. *tintinnabulum*) occurs only in Ex. 28:33f.; 39:25f. Golden bells, alternating with blue, purple, and red cloth pomegranates, were fastened to the bottom of the high priest's robe, which he was always to wear "when he goes into the holy place before the Lord, and when he comes out, lest he die" (Ex. 28:35). The description matches Josephus's later report: "On the fringes hung golden bells alternating with pomegranates, the bells symbolizing thunder and the pomegranates lighting" (*BJ* v.5.7. [231]). Compare the statue of a priest found at Hierapolis/Bambycé in northwest Syria (*ca.* 1st cent. B.C.), wearing a row of bells near the hem of his garment (Bayer, *Relics,* p. 11).

b. The *mᵉṣillôṯ* (< *ṣll,* "to ring") of Zec. 14:20 were attached to the reins or bridles of horses, whence the LXX *chalinós,* Vulg. *frenum.* They were very likely larger than *paᶜᵃmônîm* since they had to carry an inscription, and were probably similar to the bell-shaped jingles on horses in Assyrian reliefs (*see* pictures in BIT; HORSE).

5. For the *chalkós ēchôn* "loud gong," of 1 Cor. 13:1 see II.H.4 below.

E. Collective Terms. 1. The generic OT term for "musical instrument" is *kᵉlî,* "vessel, implement, instrument" (LXX *órganon,* Vulg. *organum);* cf. the parallel use of Akk. *enūtu,* "implement, utensil," in *ARM,* 21 (1983), 298:4, *e-nu-ut* LU.NAR!?. M[EŠ], "musicians' instruments." The term refers in practice to the stringed instruments, the "instruments of David" or "instruments of music" (*kᵉlê šîr,* "instruments of song"), which frequently stand in contrast to the other sacred instruments, especially the trumpets and cymbals (cf. 1 Ch. 16:42; 2 Ch. 5:13; 7:6; Neh. 12:36; Am. 6:5).

2. The term *minnîm* (LXX *chórdai;* Vulg. *chordae*) "strings" (AV also "stringed instruments"), occurs in Ps. 150:4 and, possibly, in Ps. 45:8 (*šel minnî* emended to *kᵉlê minnîm,* the latter also in Sir. 39:15), "stringed instruments" (cf. NEB "music of strings"; AV omits). The interpretation of *minnîm* (sing. **mēn*) is based upon the LXX and Syr. *minā,* "hair," "cord"; cf. Akk. *manānu,* "sinews." Bayer (*Encyclopedia Mikra'it,* V, 766) suggested "lute" instead, since in Ps. 150:3f. the two chief OT strings are already mentioned, and the lute was not entirely unknown in ancient Israel. But other terms for the lute existed (cf. Akk. *inu;* Arab. *ʿūd,* Ugar. *ʿd* [?] < Sum. gudi [?]; Arab. *al-ʿūd* > Span./Port. [*a*]*laude,* Ger. *Laute,* Eng. lute?). See Kilmer, *Reallexikon,* VI, 33; D. Collon and A. Kilmer, "The Lute in Ancient Mesopotamia," in T. C. Mitchell, ed., *Music and Civilization* (1980), pp. 15-17.

F. Uncertain Terms. 1. The word *šālîšîm* appears only in 1 S. 18:6: "the women came out of all the cities of Israel, singing and dancing, to meet King Saul, with timbrels, with songs of joy, and with instruments of music." The RSV mg. offers "triangles" or "three-stringed instruments." Other suggestions incorporating the meaning of the Hebrew root for "three" *(šlš)* include: three-stringed lute, a triangular harp, castanets held by the thumb and two fingers, and a dance-name (cf. Lat. *tripudium*), whence NEB "dancing." The Vulg. translates *sistra,* and mention has been made of the frequent examples of sistra with three horizontal rods. O. Sellers (*BA,* 4 [1941], 46) noted that there are three beats in each half line of the victory chant sung by the women in the next verse. But the LXX, Pesh., and Tg. all translate "cymbals," and therefore Bayer connected it with Ugar. *ṯlṯ*-metal, suggesting "cymbals or struck-metal bowls" (*Encyclopedia Mikra'it,* V, 775).

2. The superscriptions of some psalms include a number of obscure words that have been thought to represent musical instruments, e.g., *gittîṯ, nᵉgînôṯ, šᵉmînîṯ.* According to more recent interpretations, however, they are instead technical terms referring to performance styles or other musical categories (see III.B below).

G. Instruments in Daniel. In Dnl. 3:5, 7, 10, 15 there appears a list of instruments reportedly used in the court of the Babylonian king Nebuchadrezzar (604-562 B.C.). The first two terms are Aramaic; the remainder are Aramaized versions of Greek words. None of the terms has any known counterpart in Akkadian.

1. Qarnā' is the Aramaic form of Heb. *qeren* (see II.A.1 above), "(animal) horn," correctly reflected by the RSV and NEB "horn" and AV "cornet." The LXX and Vulg. (incorrectly) translate (respectively), *sálpinx* and *tuba,* "trumpet." The straight trumpet with mouthpiece is relatively rare in Mesopotamia, seen only on Assyrian reliefs from Nineveh; it was probably an Egyptian import. Depictions of curved horns, however, have been found at Mari (early 2nd millennium), at Alaça Hüyük in Asia Minor, and at Carchemish (early 1st millennium). No musical use is as yet attested for Akk. *qarnu.*

2. The *mašrôqîṭā'* (RSV, NEB "pipe"; AV "flute") was possibly a simple reed pipe of the type played by shepherds, whence Vulg. *fietula.* The root (*šrq,* "to whistle, hiss") is also seen in Heb. *šᵉriqôṯ ʿᵃḏārîm,* "the piping of the flocks," in Jgs. 5:16. The LXX, however, translates *sýrinx,* also a well-known pastoral instrument (cf. Homer, *Il.* x.13; xviii.256). The panpipe may have originated in eastern Europe. An actual set was found in a burial near Mariupol in the south Ukraine (*ca.* 2000 B.C.); the instrument is popular in Rumanian folk orchestras to this day. The syrinx reappears in Aegean representations after the 6th cent. B.C., and in Mesopotamia in the 3rd or 2nd cent. B.C. Thus it is not impossible that the *mašrôqîṭā'* was a variety of multiple flute, particularly if, as has been suggested, the Greek term was originally a Semitic borrowing.

3. The *qayṯ^{e}rōs* (*Q qîṯārōs* or *qîṯ^{e}rōs*) was a type of lyre (so RSV; NEB "zither"; AV "harp"). The word is presumably a borrowing from some phonetic variant of Gk. *kithára* (so LXX; Vulg. *cithara;* see II.B.1 above); cf. Homeric *kítharis* (*Il.* xiii.731; *Od.* i.153), unless both words are derived from some third source. Since the rounded *kithára*-lyre is not attested in Mesopotamia proper, if Daniel's is an accurate report the *qayṯ^{e}rōs* may refer to one of the two types of lyre commonly seen on Assyrian reliefs, one rectangular in form, the other asymmetrical.

4. Śabb^{e}ḵā' is a loan from Gk. *sambýkē* (so LXX; Vulg. *sambuca*), an instrument introduced into Greece in the late 5th cent. B.C., but described as more ancient. Several Greek authors identified it with the *trígōnon*, a small triangular harp with very few strings and a high, bright tone (thus RSV "trigon"; NEB "triangle" [the literal meaning of *trígōnon*]). The AV "sackbut" (a medieval trombone) was evidently chosen based on its slight phonetic resemblance to *śabb^{e}ḵā'*. A Greek nautical siege-engine was named after the musical instrument, and from written descriptions of it attempts have been made to reconstruct the shape of the musical instrument. In the majority view the *sambýkē* was a small, arched or boat-shaped harp, with a few short strings and a high pitch. The harp in general was foreign to Greece and considered a somewhat decadent instrument. The *trígōnon* and *sambýkē* in particular were ridiculed and condemned as instruments of debauchery. The boat-shaped harp was at home in Egypt and in early Mesopotamia, but the instrument most resembling it in first-millennium Assyrian sources was the horizontal angular harp played with a plectrum.

5. Psanṯ^{e}rîn is a loan from Gk. *psaltērion,* originally signifying the comparatively rare (angular) harp that was plucked *(psállein),* unlike the lyre that was played with a plectrum. Via Lat. *psalterium* it is the source of the medieval psaltery, properly a rectangular or trapezoidal zither, either plucked or played with plectra. The same Greek word, possibly via Aram. *psantērîn,* became the Pers. *santur* and its variants (*santīr, santari,* etc.) a trapezoidal dulcimer played with hammers. Thus the *psantērîn* has been described as a boxlike lyre. The varied English translations reflect the long and confusing history of the related terms: RSV "harp"; NEB "dulcimer"; AV "psaltery."

6. The last term, *sûmpōn^{e}yâ* (*K sîppōn^{e}yâ, Q sûppōn^{e}yâ* in v. 10; omitted in v. 7), may not be an instrument at all. The LXX gives *symphōnía,* lit. "sounding together," which has been interpreted in two different ways.

Some have assumed that it referred to an instrument that was capable of sounding two notes simultaneously; cf. RSV "bagpipes"' AV "dulcimer." In the late Middle Ages a corruption of the term yielded Ital. *zampogna,* Span. *zampoña,* "bagpipes"; but that instrument is not mentioned in Greece before the 4th cent. B.C.and then not by that name. There is, moreover, no evidence for bagpipes in Mesopotamia at any time.

Others have assumed that the term referred to the sound of several instruments playing at the same time, whence NEB "music." This translation gains contextual support from the single NT occurrence of *symphōnía,* Lk. 15:26: "and as he came and drew near to the house he heard *music* and dancing." It is also in accord with the earliest meaning of the term: "consonance" of sound, specifically of two different tones at intervals of a fourth, fifth, or an octave. If this is the correct interpretation, then *sûmpōn^{e}yâ* and the last phrase in the line, "all kinds of (string) playing" *(kōl z^{e}nê z^{e}mārā')*, are equivalent expressions, and one of them may be a gloss.

On the other hand, it has been suggested that *sûmpōn^{e}yâ* may instead be a translation of a dialectal form of Gk. *týmpanon,* "drum" (T. C. Mitchell and R. Joyce, "Musical Instruments in Nebuchadrezzar's Orchestra," in D. J. Wiseman, *et al., Notes on Some Problems in the Book of Daniel* [1965], p. 26). The drum is a particularly characteristic Mesopotamian instrument, and it is otherwise conspicuously absent from Daniel's list. Moreover, the instruments would then follow a neat sequence of classes: a horn, a wind instrument, several strings, ending with a percussion instrument.

H. NT Instruments. Only four or perhaps five different instruments are mentioned in the NT: the double pipe, the lyre, the trumpet, the cymbals, and possibly a gong.

1. For a description of the Gk. *aulós* (RSV, NEB "flute"; AV "pipe") see II.C.1 above. The instrument occurs only in 1 Cor. 14:7, but "flute players" (AV also "piper" and "minstrels") appear in Mt. 9:23 and Rev. 18:22, and the verb "pipe" (RSV, NEB also "to play") in Mt. 11:17; 1 Cor. 14:7. The playing of the *aulós* is associated both with dancing (Mt. 11:17; 1 Cor. 14:7) and with mourning (Mt. 9:23).

2. For a description of the Gk. *kithára,* see II.B.1 above. It appears four times (1 Cor. 14:7; Rev. 5:8; 14:2; 15:2). While there is now no doubt that the *kithára* was a type of lyre, the versions maintain the traditional translation "harp" (NEB once also "lyre" in 1 Corinthians), also for the associated verb and *nomen professionis* (1 Cor. 14:7; Rev. 14:2; 18:22).

3. The LXX used Gk. *sálpinx* to translate both Heb. "trumpet," and *šôpār,* "(ram's) horn" (see II.A.1,2 above). In the NT there is no direct evidence favoring one over the other. The instrument itself appears eleven times (Mt. 24:31; 1 Cor. 14:8; 15:52; 1 Thess. 4:16; He. 12:19; Rev. 1:10; etc.); the RSV translates it as "trumpet," also "bugle" (1 Cor. 14:8); the AV also has "trump." The verb and *nomen professionis* appear only in Revelation, Mt. 6:2; 1 Cor. 15:52.

4. Cymbals are mentioned only in Paul's musical metaphor in 1 Cor. 13:1: "clanging cymbal" (*kýmbalon alalázon;* cf. AV "tinkling cymbal"). The first member of the comparison *(chalkós ēchōn)* is also usually taken as another type of musical instrument (hence RSV "noisy gong"; NEB "sounding gong"; the AV translates more literally: "sounding brass"). The two phrases might represent a modified quotation of Ps. 150:5 (see II.D.2 above). According to a more recent interpretation, however, *chalkós ēchōn* refers to the brass sounding vases, about 1 m. (3 ft.) tall, tuned musically to roughly the range of an octave, that were placed in niches at the rear of Greek amphitheaters. They resonated sympathetically to various pitches of the actors' voices, providing a primitive but effective acoustic amplification system (see W. Harris, *Biblical Archaeology Review,* 8/1 [1982], 38-41).

***III. Musical Performance.**–A. Mesopotamian Music Theory.* Assyriological research since 1960 has led to the discovery of six Akkadian texts that, from a variety of different standpoints, describe Mesopotamian music theory and practice from *ca.* 1800 B.C. to *ca.* 500 B.C. The texts, from different places and times, have shown that the musical scales in general use in ancient Mesopotamia were heptatonic and diatonic, thus providing evidence for the antiquity of Western music some 1400 years before the earliest Greek sources.

Fourteen Akkadian terms, used in the tuning procedures for the lyre, are known to be names of musical intervals — seven for intervals of fifths and fourths, and seven for thirds and sixths.

MUSIC

String Designations		
	Fifths and Fourths	
1-5	*nīš gabarî*	"rise of the duplicate"
2-6	*išartu*	"normal"
3-7	*embūbu*	"reed-pipe"
4-1	*nīd qabli*	"fall of the middle"
5-2	*qablītu*	"middle"
6-3	*kitmu*	"closed"
7-4	*pītu*	"open"
	Thirds and Sixths	
7-5	*šēru*	"song"
1-6	*šalšatu*	"third"
2-7	*rebūtu*	"fourth"
1-3	*isqu*	"throwstick/lot"
2-4	*titur qablītu*	"bridge of the middle"
3-5	*titur išartu*	"bridge of the normal"
4-6	*serdû*	"lamentation"

These terms do not indicate differences between major or minor thirds, perfect or augmented fourths, etc.; i.e., they do not reflect the positions of semitones in the scale. These positions depend on the tuning. The seven tunings are:

									Corresponding Greek Octave-Species*
išartu	"normal"	E	F	G	A	B	C	D	Dorian
kitmu	"closed"	E	F♯	G	A	B	C	D	Hypodorian
embūbu	"reed-pipe"	E	F♯	G	A	B	C♯	D	Phrygian
pītu	"open"	E	F♯	G♯	A	B	C♯	D	Hypophrygian
nīd qabli "fall of the middle"		E	F♯	G♯	A	B	C♯	D♯	Lydian (= our major scale)
nīš gabarî "rise of the duplicate"		E	F♯	G♯	A♯	B♯	C♯	D♯	Hypolydian
qablītu	"middle"	E♯	F♯	G♯	A♯	B♯	C♯	D♯	Mixolydian

(*Contrast R. Vitale's different interpretation, "La Musique suméro-akkadienne — Gamme et Notation musicale," *Ugarit-Forschungen*, 14 [1982], 241-263.)

Tuning of the lyre was accomplished by a progressive series of fifths and fourths, which produced a diatonic scale in Pythagorean tuning. Each tuning or scale was named for the fifth or fourth that began the series; in each tuning the tritone was located in a different place, which also altered the locations of the semitones.

One complete piece of music, a syllabic cuneiform Hurrian cult hymn to the moon-goddess Nikkal dating to *ca.* 1400 B.C., has been found at ancient Ugarit. Its Akkadian colophon identifies it as follows: "This is a song of the Fall-of-the-Middle (scale), a hymn(?) of the gods, from Urhiya; copied by Ammurapi." This piece, written in the *nīd qabli* (= major) scale, uses a notational system based on the Akkadian terminology discussed above. No directions for rhythm or tempo are given. The Hurrian lyrics are provided separately, followed by the notation, which consists of interval names followed by numerals. There are several differing interpretations of this notation; see A. Kilmer, *et al., Sounds from Silence: Recent Discoveries in Ancient Near Eastern Music* (1976), p. 14, for an explanation of the basic differences in existing interpretations; cf. M. Duchesne-Guillemin, *Revue d'Assyriologie, 69* (1975), 159-173; R. Vitale, *Ugarit-Forschungen*, 14 (1982), 255-263.

It is of interest to note that a Middle Assyrian song catalog from Asshur (E. Ebeling, *Keilschrifttexte aus Assur Religiösen Inhalts* [1923], no. 158; *ca.* 1100 B.C.), one of the six cuneiform texts that utilize the Akkadian technical musicological terms, lists more than 360 Sumerian and Akkadian song titles, which are divided into thirty-one different song types, ranging from divine and royal hymns to work and love songs. Two of these song types are further divided according to tunings, which is to say that the catalog groups some songs according to the scale or mode in which they were played. This Mesopotamian practice, also exemplified in the colophon of the Hurrian hymn, may have some bearing on the meaning of some of the obscure technical terms in the psalm superscriptions (see next section).

In the Neo-Babylonian period (mid-1st millennium B.C.) a different but related system of notation appears. These notations are placed next to or within the lines of lyrics and apparently signify abbreviated directions (see W. Lambert, "Converse Tablet: A Litany with Musical Instructions," in H. Goedicke, ed., *Near Eastern Studies in Honor of W. F. Albright* [1971], pp. 335-353). This late system is not yet understood.

B. Psalm Superscriptions. While it offers nothing so extensive as the full repertory of Sumero-Akkadian technical musical terms, the OT provides good evidence for a developed or developing musical performance terminology. Much of this evidence is to be found in the Psalm superscriptions. (*See also* PSALMS II.C.)

Two-thirds of the Psalms include personal ascriptions in their headings. The majority of the references are to David, the traditional author of the Psalter. The remainder, apart from three Psalms ascribed to Moses or Solomon, mention members of the Levitical families to which David entrusted the responsibility for vocal performances within the temple ritual: the singers Asaph, Heman, and Ethan, and the sons of Korah. Most of the remaining, more properly musical, terms found in the superscriptions may be divided into three categories.

1. Titles. These are types, characterizations, or remarks concerning the uses of the compositions:

*T*ehillâ*, "song of praise," is applied only to Ps. 145, although it is common in the psalmodic text itself and elsewhere.

*T*epillâ*, the common term for "prayer," is found with four Psalms (17, 90, 102, and 142), also with the "misplaced" psalm in Hab. 3. In the postscript to Ps. 72:20 that and all preceding Psalms are also so identified.

Mizmôr, "psalm" (< LXX *psalmós*, "song to the accompaniment of plucked [*psállein*] instruments") is the title of fifty-seven Psalms. The root meaning is "to play (an instrument)" or "to sing (with instrumental accompaniment)"; cf. Akk. *zamāru*, "to sing (with or without instrumental accompaniment)," also a type of song. Note that the colophon of the Hurrian cult hymn from Ugarit (discussed above) employs this term: *annû zammarum*, "this (is) a *zammaru*-song."

Šîr, "song," is thought to be derived from Sum. šìr, "song; to sing," either directly or via Akk. *šēru*, "song"; cf. Ugar. *šr*. The term appears alone in Pss. 46 and 18 (var. *šîrâ*), otherwise coupled with *mizmôr* — five times preceding it, four times following it; no distinctions are discernible. The RSV gives "song" in all three cases; the AV translates the linked terms separately. One might compare the Middle Assyrian song catalog mentioned above (see III.A), which lists *šēru*-songs (*zamār šēri*) as a distinct category.

*Šîr hamma*ᶜ*alôt* occurs in Pss. 120–134. The translation "Song of Ascents" (AV "Song of Degrees") relies on the root meaning (*ʿlh*, "to rise, ascend") and on the LXX and Vulg. (respectively, *ōdḗ tôn anabathmôn, canticum graduum*, "song of steps"). The term has been thought to refer to songs sung by pilgrims ascending the high city of Jerusalem at the three great agricultural festivals (cf. Ex. 23:17; Dt. 16:16). This set of Psalms is also characterized by an "ascending" structure, in which a verse repeats an element from the preceding verse. Compare the *elēlū sad-*

rūtu, "ordered *elēlu*-songs" (i.e., following in a row), another song type from the Middle Assyrian catalog.

Maśkîl (< *śkl*, "to have insight, act with insight") occurs in thirteen Psalms. The meaning remains uncertain; the RSV and AV transliterate rather than translate. The LXX offers *synéseōs* or *eis sýnesin*, "on insight, understanding"; the Vulg., *intellectus* or *intelligentia*. The term also occurs in Ps. 47, where the RSV has "psalm," the NEB "art," and the AV "understanding." (*See also* MASKIL.)

Miktām (Pss. 16, 56–60) is also obscure, and is left untranslated by the RSV and AV. The LXX has *stēlographía*, "inscription"; the Vulg., *tituli inscriptio*. The term is generally derived from the root *ktm*, "to conceal, secrete." Compare the cognate Akkadian musicological term *kitmu*, "closed," which is known to refer to hymns to be played or sung in a particular tuning or scale (see III.A above). (*see also* MIKTAM.)

Lᵉlammēḏ, "for instruction" (AV "to teach"), occurs only in the heading of Ps. 60. The implications of the expression are unclear.

Lᵉhazkîr, lit. "to cause to remember," may be a request for divine remembrance on the part of the psalmist, or a reference to a certain sacrificial ceremony. It occurs only in Pss. 38 and 70 (RSV "for the memorial offering"; AV "to bring to remembrance").

Šiggāyôn in Ps. 7 is thought to be related to Akk. *šigû*, a cry of woe or lamentation, also a type of prayer (cf. LXX *psalmós*; Vulg. *psalmus*). The term also appears in the heading of Hab. 3: "upon, or in the manner of (?), laments" (*ʿal šigyônôṯ*; LXX *metá ōdḗs*, "with a song"). The RSV and AV simply transliterate.

Šîr ḥᵃnukkaṯ habbayiṯ, "song at the dedication of the house" (Ps. 30), and *šîr yᵉḏîḏôṯ*, "love song" (Ps. 45), may refer to psalms recited at special occasions: dedications or rededications of the temple, and, perhaps weddings.

2. Performance Indications. Some enigmatic terms bear directly on musical practice and may well have been relatively obscure even at the time of the LXX.

Lammᵉnaṣṣēᵊ(a)ḥ, "to the choirmaster" (AV "chief musician"), occurs in the Psalm heading fifty-five times, and again in the subscript of Hab. 3. The piel of *nṣḥ* has the significance "to act as overseer, director" (e.g., 1 Ch. 23:4; Ezr. 3:8f.), and in a musical context it occurs in 1 Ch. 15:21, where Mattithiah and five other Levitical musicians are directed by David "to lead with lyres." The office seems to be described in 1 Ch. 15:27, where the Levite Chenaniah is called "leader of the music of the singers" (*hasśar hammaśśāʾ hamᵉšōrᵉrîm*; NEB "precentor"; AV "master of the song with the singers"); he was David's choice (v. 22) to "direct the music [*yāśōr bammaśśāʾ*], for he understood it." *Lammᵉnaṣṣēᵊ(a)ḥ* may well refer to solo performance by the director himself.

Nᵉgînôṯ (*nᵉgînaṯ* in Ps. 61), "(with) stringed instruments" (AV "[upon] Neginoth"), as a technical term in the superscriptions is not entirely clear. "Stringed instrument" is one meaning of the term (< *ngn*, "to play on a stringed instrument"), but elsewhere it can also refer to music or songs (Isa. 38:20; Lam. 5:14), including a mocking song (Job 30:9) and a drunkard's song (Ps. 69:12 [MT 13]). Its use in the psalm headings is reminiscent of that of the Sumerian hymnic subscript zà-mí, "lyre," also "praise," a label for songs of divine praise which lack any special formal structure. It is unknown whether the hymns so labeled were actually performed to the accompaniment of the lyre; the same might be said for *nᵉgînôṯ* (*see* NEGINAH). Cf. Akk. *nigûtu*, "music" (< *nagû*, "to sing joyously").

ʿᵃlāmôṯ (Ps. 46) and *šᵉmînîṯ* (Pss. 6 and 12) may possibly refer to instrumental tunings or pitches. The terms cooccur in 1 Ch. 15:20f. David designated one group of string players "to play harps according to Alamoth" (*ʿal-ʿᵃlāmôṯ*) and another "to lead with lyres according to the Sheminith" (*ʿal-hašśᵉmînîṯ lᵉnaṣṣēᵊ[a]ḥ*). *ʿᵃlāmôṯ* has been connected with *ʿalmâ*, "young woman," and the expression interpreted as "in the style of young female voices," perhaps referring to a soprano register. *Šᵉmînîṯ* (lit. "eighth") has been taken as an eight-stringed instrument or the "eighth mode." Since the heptatonic scale is now known to have been in common use both in Mesopotamia and in Ugarit (see III.A above), the older interpretation "eighth tone" or "octave" is now less unlikely. *ʿAl-ʿᵃlāmôṯ* may thus refer to a particular harp tuning, and *ʿal-hašśᵉmînîṯ* to a punctuating of the melody line an octave higher on the smaller lyres. The RSV and AV transliterate. (*See also* SHEMINITH.)

ʾEl-māḥᵃlaṯ (Pss. 53 and 88) is obscure. If related to *māḥôl*, "round dance," it may represent either a characteristic rhythmic or melodic pattern, or even a choreographic direction. In Ps. 88 it is followed by *lᵉʿannôṯ*, which has been connected either with *ʿnh*, "to sing, wail," therefore "to be sung (in some particular way)"; or with *ʿnh*, "to humble, oppress," therefore, perhaps, "to perform with a reduced sound, 'piano'." The RSV and AV (also LXX and Vulg.) again transliterate. *See also* MAHALATH (LEANNOTH).

Nᵉḥîlôṯ (Ps. 5) is usually connected with *ḥālîl*, "double pipe" (see II.C.1 above), and therefore thought to refer to a piped accompaniment: hence RSV "for the flutes" (AV transliterates). The term, however, is still unclear (*see* NEHILOTH). Cf. LXX *hypér tēs klēronomoúsēs*, "on behalf of the heirs." Note, for the sake of comparison, the Akkadian technical term *embūbu*, "reed pipe," used to describe a tuning/scale/mode of certain songs (see III.A above).

Gittîṯ (Pss. 8, 81, and 84) is often linked with the city of Gath (*gaṯ*); the heading *ʿal-haggittîṯ* would thus signify "in the style of Gath," or "upon the instrument-of-Gath," since place names are not infrequently associated with musical instruments. Another possible source of the term is *gaṯ*, "wine-press," followed by LXX *hypér tṓn lēnṓn* and Vulg. *pro torcularibus*, "for the pressers/treaders of wine." The RSV and AV again transliterate. It is probably not productive to compare the Akkadian term occurring in the Middle Assyrian song catalog (see above) describing a special song type: *gangiṭṭu*, possibly derived in part from Sum. gíd-da (> Akk. *giṭṭu*, "long"); or to connect it with ancient Egyp. *gngnti*, "lute"(?).

3. Song Cues. A number of superscripts represent *incipits* of favorite older songs, to whose tunes new lyrics were sung — a practice common to hymnology up to the present day. These include:

ʿAl-mûṯ labbēn (Ps. 9); obscure, perhaps for *ʿal-ʿᵃlāmôṯ labbēn*, "upon maidens; to the son." Cf. LXX *hypēr tṓn kryphíōn toú hyioú*; Vulg. *pro occultis filii*, "for the son's secret." *See* MUTH-LABBEN.

ʿAl-ʾayyeleṯ haššaḥar (Ps. 22), "upon hind of the dawn." *See* HIND OF THE DAWN, THE.

ʿAl-yônaṯ ʾēlem rᵉḥōqîm (Ps. 56), "upon dove on far-off terebinths."

ʿAl-šôšannîm (Pss. 45, 69, and 80), "upon lilies." *See* LILIES (ACCORDING TO).

ʿAl-šûšan ʿēḏûṯ (Ps. 60), "upon lily of the testimony(?)." Cf. Ps. 85, *ʾel-šôšannîm ʿēḏûṯ lᵉʾāsāp*, "upon lilies; testimony(?) to Asaph." Ps. 60 may consequently represent an abbreviation; the RSV and AV transliterate. *See* EDUTH.

ʾAl tašḥēṯ (Pss. 57–59, 75), "do not destroy" — thought to refer to a category of penitential prayer for divine clemency; cf. Moses' prayer in Dt. 9:26. *See* AL-TASCHITH.

The term *selâ* (RSV, AV "Selah") occurs seventy-four times in the psalter and in Hab. 3, not as a superscription but at points within the texts (70 times) and at the ends (4 times). It probably indicates a pause in the singing (cf. LXX *diápsalma;* Vulg. omits), possibly signaled by the sounding of cymbals. The pauses may mark points at which differing groups take up the song, or possibly occasions for musical interludes. In Ps. 9:16 (MT 17) *selâ* is preceded by the term *higgāyôn,* perhaps signifying a kind of low "murmuring" (*hgh*) on the strings. Cf. Ps. 92:3, *ʿalê higgāyôn bᵉkinnôr;* RSV "to the melody of the lyre"; NEB "to the sounding chords of the lyre"; AV "upon the harp with a solemn sound."

MUSICAL INSTRUMENTS. The AV translation of Heb. *šiddâ wᵉšiddôṯ* in Eccl. 2:8. The meaning of the Hebrew phrase is uncertain; the NEB omits it (cf. mg.), while the RSV renders "many concubines" (but cf. mg.; *CHAL,* p. 361, supports RSV with "lady [concubine][?]"). For discussions of the various possibilities, see KD and R. Gordis, *Koheleth — The Man and His World* (3rd ed. 1968), pp. 218f.

For the RSV references to "musical instruments" (1 Ch. 15:16; 2 Ch. 5:13; 23:13; Neh. 12:36) and "instruments of music" (1 S. 18:6; 2 Ch. 34:12; Am. 6:5; etc.), *see* MUSIC.

MUSICIAN, CHIEF. *See* ASAPH 2; HEMAN 1; JEDUTHUN 1 MUSIC III.B.2; PSALMS III.D.

MUSTARD [Gk. *sínapi*]. The smallness of the mustard seed is mentioned in Mt. 13:31f.; 17:20; Mk. 4:31; Lk. 13:19; 17:6. The rabbis used a "grain of mustard" to characterize something very minute. The mustard plant, however, can be described as a "tree" (Mt. 13:32; cf. Lk. 13:19) and as putting out "great branches" (Mk. 4:32). Of several varieties of mustard, the references seem to be to *Sinapis nigra* L., cultivated black mustard. Normally attaining a maximum height of 1.2 m. (4 ft.), some species can grow to 4.6 m. (15 ft.) under favorable conditions. *Sinapis nigra, S. alba, S. orientalis,* and others were grown for their aromatic seeds. Birds came to the trees to eat these seeds (Mt. 13:32, etc.), not to build their nests (cf. NEB and RSV). The spindly appearance of the mature shrub might convey the impression of a large tree when compared with the minuteness of the seed, but in any event the contrast is a deliberate exaggeration. The mustard seed was the smallest of its kind in the ancient Near East, and in such an environment it germinated and grew quickly. Birds could then lodge in its branches. It is not necessary to suppose that the large *Salvadora Persica* Garrin is the plant referred to by the Gk. *sínapi.* R. K. H.

MUSTER. Used by the RSV to translate several verbs, always in the context of assembling troops for battle. Most often it translates a form of Heb. *pāqaḏ* (AV usually, RSV often, "number"), which has various nuances of meaning, e.g., "call up" (for military service) or "enroll" (in the army) (e.g., piel in Isa. 13:4; niphal in Ezk. 38:8; qal in 2 S. 18:1; 1 K. 20:15, 26f.), "count" or "call the roll" (e.g., hithpael in Jgs. 20:15, 17; 21:9), "hold a military inspection" (e.g., qal in Josh. 8:10), etc. Other verbs rendered "muster" by the RSV are *qāḇaṣ* (lit. "assemble," 2 K. 6:24; AV "gather"; NEB "call up"), *mānâ* (lit. "count," 1 K. 20:25; AV "number"; NEB "raise"), the niphal of *ʾāsap* (lit. "gather," 1 S. 13:5, 11; 1 Ch. 19:7; AV "gather together"), and the hiphil of *ṣāḇaʾ* (lit. "conscript," 2 K. 25:19; Jer. 52:25). In Nah. 2:3 (MT 4) the RSV renders "mustered in array" for MT *haʿkînô,* the hiphil infinitive of *kûn* (lit. "make ready, prepare"; AV "his preparation"; NEB "the line is formed"; cf. Jer. 46:14; Ezk. 7:14; 38:7, where the hiphil of *kûn* denotes preparing an army for battle).

The noun *pᵉquddâ,* a cognate of *pāqaḏ,* occurs in 2 Ch. 17:14; 26:11, denoting a CENSUS.

See ARMY. N. J. O.

MUSTER GATE [Heb. *šaʿar hammipqāḏ*–'muster gate,' 'inspection gate'; Gk. *pýlē toú Maphekad*] (Neh. 3:31); AV GATE MIPHKAD; NEB MUSTERING GATE. One

of the gates of Jerusalem or of the temple precinct. It probably was near the northeast corner of the temple area. *See* JERUSALEM III.F.2.v. D. J. WIEAND

MUTH-LABBEN mōōth-lab'ən [Heb. *('al)mûṯ labbēn*]. A technical term of uncertain meaning in the superscription to Ps. 9 (MT v. 1). It has traditionally been interpreted as meaning "for the occasion of the death of the son" (cf. Anderson) or as the first two words of a popular song to the tune of which the psalm was to be sung (e.g., "Die for the son" [Weiser]; "Dying [is] to the son" [KD]). More likely, however, is the theory that *'almûṯ* is a scribal error for *'al 'alāmōṯ*, a reading that has the support of some ancient versions (e.g., Aq.). It may then mean "in the manner of young women, for a son" (i.e., falsetto voice) (see Briggs).

Mowinckel, *Psalms in Israel's Worship* (Eng. tr. 1962), II, 216f.; A. Weiser, *Psalms* (Eng. tr. *OTL*, 1962), pp. 146, 148. N. J. O.

MUTILATE [Heb. *ḥārum* ("mutilated face," Lev. 21:18), *ḥārûṣ* (Lev. 22:22); Gk. *apokóptō* (Gal. 5:12), *katatomḗ* (Phil. 3:2)]; AV also "flat nose," MAIMED, CONCISION; NEB also "stunted"; **MUTILATION** [Heb. *mûm*] (Lev. 22:25); AV BLEMISH; NEB PERMANENT DEFECT. Scripture countenances CIRCUMCISION, but any other kind of mutilation, such as the self-imposed cuts of the Baal priests (1 K. 18:28), is forbidden (cf. Jer. 47:5; Hos. 7:14). The mutilated face of Lev. 21:18 could describe incisions of the kind practiced in pagan Baal worship (1 K. 18:28), or possibly disfigurements of a genetic origin (cf. LXX *kolobórin*, lit. "flat nose"; cf. also Heb. *ḥrm*, "split"; *CHAL*, p. 117). Mutilated animals (Lev. 22:22) would include those that had been maimed, hurt, or gouged through fighting, or had survived encounters with wild beasts. Human mutilation of animals, as distinct from the sacrificing of animals according to ritual procedure, was not favored by the Hebrews because of the belief that wild and domestic creatures alike belonged to God (Ps. 50:10). The mutilation referred to in Lev. 22:25 was castration (see v. 24), a procedure that made any such animal, whether imported or domestic, unsuitable for a sacrificial offering. Castration rendered the animal somewhat less than perfect physically, and as such the creature could not reflect divine perfection and holiness adequately.

The allusion in Gal. 5:12 employs the middle voice of *apokóptō* to mean "mutilate oneself," "have oneself mutilated." The reference can hardly be to circumcision, since Paul's opponents would already be circumcised; possibly the apostle was referring to the kind of sacral castration practiced in the cults of Attis and Cybele. Phil. 3:2 contrasts those who mutilated the flesh with the Judaizing Christians who practiced true circumcision. The LXX uses *katatémnō* for forbidden mutilations mentioned in Lev. 21:5 and elsewhere.

MUTTER. *See* MURMUR; DIVINATION III.G.

MUZZLE [Heb. *ḥāsam*; Gk. *phimóō*]. The prohibition against muzzling an ox while it was treading out grain (Dt. 25:4) was interpreted by rabbinic commentators to mean that animals were not to be deprived of sustenance while they were working. Most modern scholars agree that "the law affords another example of the humanity which is characteristic of Dt., and which is to be exercised even towards animals" (S. R. Driver, comm. on Deuteronomy [*ICC*, 1895], p. 280). Paul, however, interpreted it allegorically to illustrate the principle that Christian preachers (1 Cor. 9:9) and elders (1 Tim. 5:18) should receive financial remuneration from the community they serve.

The author of Ps. 39 figuratively put a "muzzle" (Heb. *maḥsôm*, RSV mg., NEB) on his own mouth to restrain himself from complaining aloud about God's apparent injustice (v. 1 [MT 2]). *See* BIT. N. J. O.

MYCENAEAN mī-sə-nē'ən **CULTURE.** *See* GREECE III. C.

MYNDOS min'dəs [Gk. *Myndos*]; AV MYNDUS. A city on the coast of Caria, the southwest portion of Asia Minor, famous for its silver mines. It is also called Mindos.

About 139 B.C. the Roman consul Lucius sent letters to Myndos and other important cities in Asia Minor on behalf of the Jews (1 Macc. 15:23). This action implies that Myndos possessed a measure of independence and was the home of a considerable Jewish colony. The modern location is Gumushli, which takes its name from the silver mines located in its vicinity. W. W. GASQUE

MYRA mī'rə [Gk. *Myra*]. An old Lycian-speaking city that became one of the leaders of the Lycian confederacy of Greek and Roman times, having the maximum of three seats in the federal assembly (*see* PATARA). It lay on the southern coast of Asia Minor on a lofty hill a few kilometers from the sea, being served by its port of Andriace. At Myra Paul and his escort, after making the crossing from Sidon, boarded an Alexandrian vessel bound for Rome (Acts 27:5f.). In spite of its prominence, still attested by the remains, and its large territory, very little is known of ancient Myra.

See Pauly-Wissowa, XVI, 1083-89. E. A. JUDGE

MYRRH mûr.

1. [Heb. *mōr*; Akk. *murru*; Ugar. *mr*; Arab. *murr*; Gk. *smýrna* (Mt. 2:11; Jn. 19:39), *smyrnízō* ("mingled with myrrh," Mk. 15:23), *mýron* (Rev. 18:13)]; AV also OINTMENT; NEB also "drugged wine," PERFUME. This substance is mentioned as valuable for its perfume (Ps. 45:8 [MT 9]; Prov. 7:17; Cant. 3:6; 4:14), and as one constituent of the anointing oil (Ex. 30:23; see also Cant. 4:6; 5:1, 5, 13). Several shrubs produce a perfumed resinous substance described as "myrrh," but the one compounded in the anointing oil was most probably from the *Commiphora myrrha* Nees, a low thorny tree which is distributed across south Arabia and Ethiopia. The exudate from the branches is pleasantly scented and dries quite readily into a solid resin. Myrrh was capable of being diluted to form a liquid cosmetic product (Ex. 30:23 [but AV "pure"; NEB "sticks of"]; Cant. 5:5, 13 [AV "sweet-smelling"]), and this was probably the "oil of myrrh" (RSV; NEB "oil and myrrh") mentioned in Est. 2:12. Such a liquid was known to the Canaanites in the 2nd millennium B.C. (C. H. Gordon, *Ugaritic Literature* [1949], p. 130), and according to Herodotus ii.86 seems to have been used by the Egyptians in embalming. A reflection of this is seen in the use of myrrh in connection with Jesus' burial (Jn. 19:39). The specific mention of myrrh in this context, as opposed to the more general "spices" of Mark (16:1) and Luke (24:1), suggests an eyewitness report. As the end of Christ's life was associated with myrrh (Mk. 15:23), so was its beginning, since this aromatic substance was one of the gifts tendered by the Magi (Mt. 2:11).

Myrrh was also used as a medicine (cf. Am.Tab. 268), for perfuming clothes (Ps. 45:8 [MT 9]) and harlots' beds

(Prov. 7:17), as well as for general deodorant purposes. Myrrh was a familiar symbol in Hebrew poetry (cf. Cant. 4:6, 14; 5:1, 13; Sir. 24:15).

The *mýron* of Rev. 18:13 was the "ointment" of Mt. 26:7, 12; Mk. 14:3-5; Lk. 7:37-46; Jn. 11:2; 12:3, 5, and should be rendered in that manner, since it occurs in the LXX principally as a translation of the Heb. *šemen*, "oil," "butter," "fat."

2. [Heb. *lōṭ*; Gk. *staktḗ*] (Gen. 37:25; 43:11). The fragrant resin obtained from some species of cistus and called in Arab. *lādham*, in Lat. *ladanum*. The cistus or "rock rose" was once common all over the mountains of Palestine (*see* FLORA IV.A), the usual varieties being the *C. villosus* with pink petals, and the *C. salviaefolius* with white petals. Quite probably the "bag of myrrh" (Cant. 1:13) used as a perfume and deodorant consisted of dried pellets of the gum, since there is some doubt as to whether Solomon would have imported *C. myrrha*, or a related species *C. kataf*, for his gardens.

3. [Heb. *nēšeq*; Gk. *staktḗ*] (1 K. 10:25; 2 Ch. 9:24); AV "armour," "harness"; NEB PERFUMES. The Heb. *nēšeq* usually refers to armor or some kind of weapon (cf. Ugar. *nṯq*), but that hardly fits the context, which is a list of tribute brought to Solomon. The LXX *staktḗ* and the next item in the list, "spices" (Heb. *bᵉśāmím*), provide the basis for the RSV and NEB readings.

Bibliography.–M. Zohary, *Arboreal Flora of Israel and Transjordan* (1951); *MPB*, pp. 77, 82-84. R. K. H.

MYRTLE mûr'tl [Heb. *ḥᵃḏās*; Gk. *myrsinḗ*] (Isa. 41:19; 55:13; Neh. 8:15; Zec. 1:8, 10f.); also the name "Hadassah" (a transliteration of the fem. form *ḥᵃḏassâ* in Est. 2:7), the Jewish form of Esther. A native of western Asia, the myrtle (*Myrtis communis* L.) is commonly found in Palestine. In suitable locations it can attain a height of 9 m. (30 ft.) and bears dark green leaves, beautiful white flowers, and scented berries. It yields a fragrant oil. Sacred in antiquity to Astarte, it was one of the choice plants of the land (Isa. 41:19; 55:13). It was used at the Feast of Tabernacles (Neh. 8:15; cf. T.P. *Sukkah* iii.4) and is popular today when procurable. For references to the myrtle in Jewish writings see *Jew.Enc.*, IX, 137.

In Greek religion the myrtle plant was venerated by the cult of Aphrodite in ceremonies held at Athens, Corinth, Argos, and other Aegean sites. In postexilic Judaism the myrtle was a symbol of justice and peace. R. K. H.

MYSIA mish'yə, mizh'yə [Gk. *Mysia*] (Acts 16:7f.). A region in northwestern Asia Minor. As Strabo noted (*Geog.* xii.4.10), the precise boundaries of Mysia are not defined, but it may be described as bounded on the north by the Propontis, on the east by Bithynia and Phrygia, on the south by Lydia, and on the west by the Aegean Sea. Mysia was never a separate state but rather part of various states. In 133 B.C. it was incorporated into the Roman Empire as part of Hellespontus. Cities of Mysia included Adramyttium (Acts 27:2), Alexandria Troas (16:8, 11; etc.), Assos (20:13f.), and Pergamum (Rev. 1:11; 2:12).

According to Acts 16:6-10, Paul, Silas, and Timothy, on Paul's second journey, were forbidden "by the Holy Spirit" to preach in proconsular Asia. Thus they passed through Phrygia and Galatia and were "opposite" (i.e., E of) Mysia. They were kept from entering Bithynia by the Spirit of Jesus, and (according to the RSV) "passing by Mysia, they went down to Troas" (v. 8). But Troas was in Mysia, and their route, since it was not through the principal portion of Asia (which included Phrygia, Lycia, Caria, Lydia, and probably part of Mysia) or Bithynia, had to pass through Mysia. Therefore the expression "passing by" must mean that they traversed the region but did not evangelize it, instead continuing to Troas and thence to Macedonia (see F. F. Bruce, *Book of Acts* [*NICNT*, 1954], pp. 325-28, esp. p. 327 n. 20).

Paul passed through Mysia on his third journey, probably on his way north from Ephesus (20:1), and certainly on his return journey (vv. 6-14).

MYSTERY.

I. Etymology
II. Meaning
III. Use
  A. Synoptic Gospels
  B. Pauline Literature
  C. Book of Revelation
IV. Sources of the Pauline Idea of Mystery
  A. Mystery as a Phenomenon in the OT
  B. Apocryphal and Pseudepigraphical Literature
  C. Qumrân Literature

I. Etymology.–Although the word occurs in the OT in Daniel (see the LXX of 2:18f., 27-30, 47; 4:6) its chief importance as a biblical term depends on its use in the NT. Here it translates Gk. *tó mystḗrion*, which appears in the Synoptics once, in the Pauline literature twenty or twenty-one times, and in Revelation four times.

The etymology is uncertain, but the word appears to derive from Gk. *mýō*, "to close or shut" (see esp. H. Frist, *Griechisches Etymologisches Wörterbuch*, II [1963], 279f.; cf. also *TDNT*, IV, *s.v.* μυστήριον, μυέω [G. Bornkamm]). Although *mýō* may mean to shut the mouth or any other aperature of the body, its chief reference is to shutting the eyes. From *mýō*, therefore, appears to derive *ho mýstēs*, one who shuts his eyes, hence one who is initiated in the mysteries. Probably this use accounts for the rise of *myéō*, which in the active means "to initiate" and in the passive "to be initiated into the mysteries."

It is within the context of religious terminology, therefore, that *tó mystḗrion* and its more usual plural form *tá mystḗria* occur in nonbiblical Greek. The term is applied mostly to the mysteries, a religious phenomenon of ancient Greece that thrived *ca.* 700 B.C.-A.D. 400.

Paul's frequent use of this word and of other key terms in the mystery religions was once taken as proof that he either belonged to such a cult or at least was strongly influenced by one. More careful examination has shown, however, that such a supposition is entirely unnecessary, since much of the language of the mysteries was common to Greek culture in general. Moreover, Paul's practices and beliefs move in such a completely different direction that direct borrowing cannot be maintained. It is well known that Paul selected certain words out of the general flow of language, knowing something of their backgrounds, and used them for his own purposes. Thus he could communicate the gospel in terms and concepts with which non-Jews were already familiar. That *mystḗrion* was such a word, however, is certain (see A.D. Nock, *JBL*, 52 [1933], 139).

II. Meaning.–Although the meaning of *mystḗrion* in the Scriptures can be determined only by a careful examination of each occurrence, one important preliminary observation can be made. *Mystḗrion* is by no means an exact equivalent of the English word "mystery." In contemporary usuage mystery refers to something unexplainable, e.g., the disappearance of a painting, a peculiar phenomenon in the sky, or the actions of an individual for which no one can account. In each instance, once the riddle is solved the mystery disappears.

The Greek term, however, refers to a mystery of divine

nature that remains hidden from human beings because their normal powers of comprehension are insufficient. Nonetheless, these mysteries are intended for human beings and when known prove profitable to them. Not only do they heal people's afflictions and provide successes in their life endeavors, but they also assure them of a blessed immortality.

To gain access to these mysteries it was necessary to depend on specially appointed persons (e.g., priests) who had in turn received their knowledge from divine messengers or the deity itself. After special rites of initiation that prepared candidates safely to possess the information, they were instructed in the secret teachings and granted possession of the sacred words belonging to the mystery. Possession of these secrets, however, in no way lessened their mysterious character. Because candidates had been joined to the deity, the element of mystery was enhanced, not diminished. *See also* RELIGIONS OF THE BIBLICAL WORLD: GRECO-ROMAN II.D.

In the NT *mystḗrion* as a religious term has an even more precise meaning. In its fullest expression it refers to the secret thoughts, plans, and dispensations of God, which, though hidden from human reason, are being disclosed by God's revealing act to those for whom such knowledge is intended. Here also, disclosure does not mean that the mysterious nature of what has been revealed has been diminished. On the contrary, because the disclosure is of God and pertains to divine things, it continues always as "mystery." Although the word of this mystery can be proclaimed in human terms, apart from God's act it remains forever enigmatic and incomprehensible.

The Hellenistic mysteries and the Christian mystery differ significantly. The content of the Hellenistic mystery had to be carefully hidden lest it fall into unworthy hands. In the Christian mystery the revelation is freely proclaimed to the whole world, for even where it is most openly displayed it remains unknown apart from the grace of God.

III. Use.—A. Synoptic Gospels. Mark 4:11 (par. Mt. 13:10f.; Lk. 8:9f.) states: "Those who were about him with the twelve asked him concerning the parables. And he said to them, 'To you has been given the secret [*mystḗrion*] of the kingdom of God, but for those outside everything is in parables; so that they may indeed see but not perceive, and may indeed hear but not understand; lest they should turn again, and be forgiven.'"

In this text two questions are raised: the relationship between mystery and Jesus' parabolic utterances, and the meaning of mystery insofar as it relates to the kingdom of which the text speaks. With reference to the parables three observations can be made. First, it becomes quite clear in the tradition that Jesus' practice was to speak the Word (i.e., the word of the gospel or, as in this context, the mystery of the kingdom) in parables. Mark preserves the statement "He did not speak to them without a parable" (4:34). Certainly this cannot mean that all Jesus' utterances originally consisted of parables. The Gospels record that Jesus taught the multitudes many things apart from parables. What is meant, therefore, is that what was most characteristic of Jesus' teaching was its parabolic (i.e., enigmatic) character. Although He taught the people many things about God, righteousness, sin, and judgment in the plainest of terms, all His teachings had a mysterious side that they did not understand. Uncertainty about exactly what Jesus was saying and what he wanted them to believe is present in the Baptist's questions, "Are you he who is to come, or shall we look for another?" (Lk. 7:20); in the disciples' complaint about what the parables really mean; and in a statement of his enemies, "If you are the Christ, tell us plainly" (Jn. 10:24). The crowds, the enemies of Jesus, and the disciples were aware of a certain hidden element in Jesus' utterances.

Second, Jesus did not speak in this way because He was anxious to conceal from His hearers the Word that He spoke, but rather because He desired to preserve for them a genuine possibility to hear in His words the Word of grace, i.e., the Word of mystery. The hearing of this Word depended not on His skill as a teacher nor on the plainness of His utterance, but first on their own desire to be addressed by God's Word and second, upon the gracious act of God by which their blind eyes and deaf ears were opened to it. That is why Jesus says, "I thank thee, Father, Lord of heaven and earth, that thou hast hidden these things from the wise and understanding and revealed them to babes; yea, Father, for such was thy gracious will" (Mt. 11:25f.).

Third, there is the question of the force of Mk. 4:12, which says that Jesus spoke in parables lest those outside should turn again and be forgiven. There seems little doubt that in the Synoptic tradition Jesus' parabolic utterance was seen, at least in part, as symbolic of Israel's hardening and rejection. But since Mk. 4:12 is a quotation of Isa. 6:9f., Jesus most likely meant that uttering parables was necessary to protect hearers from a faulty seeing and distorted hearing of His words. Many were anxious to hear in Jesus' words and see in His actions the Word of God as they conceived it. Therefore some wanted to hear from Him the words of a new prophet. Others wished to see Him as Elijah come from the dead. Most wished to find in Him a Messiah who would deliver Israel from the hand of its enemies. Thus Jesus' words not only had to reveal the Word of God, but also had to conceal it. If His hearers had concluded that He was the Messiah on a basis other than hearing in His words the Word of the Father, then they would have inevitably been led to repentance, but the repentance offered and the forgiveness gained would not have been of God — in which instance, as in the parables, the Word would have had no effect. Either Satan would have come and stolen it, or it would have developed no proper root, or it would have been strangled by the world (Mk. 4:15f.). Jesus, therefore, spoke the Word only in parables "as they were able to hear it" (v. 33).

The last question is the meaning of the "mystery" of the kingdom. Mystery might have referred to individual elements of the gospel that are either hidden or disclosed within Jesus' parables if Mark had used the plural form (*tá mystḗria;* cf. Matthew and Luke). Since Mark used the singular, however, it seems clear that he was regarding the mystery of the kingdom of God (i.e., of the gospel) in its most singular aspect. He is concerned for that to which all the parables, acts, and words of Jesus bear witness (cf. Mk. 4:17). On this basis the secret or mystery of the kingdom could be nothing other than Jesus Himself, who as God's own Son is the Messiah, the one in whom God's reign is both revealed and concealed. In His person God's kingdom has broken into human history in its ultimate expression. The kingdom is where the Messiah is, and the Word of the kingdom is His utterance.

If, then, Jesus is the secret of the kingdom, it is easier to understand why there must always be a "mystery" to His actions and His word, and why He must conceal His identity (cf. Mk. 1:24f., 43f.; 9:30). As *mystḗrion* He cannot on human terms bear witness to Himself. Only the Father knows Him for who He is (Mt. 11:27), and therefore only the Father can reveal Him. If He is known apart from the Father (i.e., apart from grace), then He will become part of people's activity on their own behalf. He will be made

king, Messiah, and Savior, but His kingdom will be of this world and will belong to Satan, and not God.

Therefore Jesus said of Peter's confession ("You are the Christ, the Son of the living God," Mt. 16:17) that flesh and blood were not sufficient to reveal this to him, but only his Father in heaven. Peter may indeed have known that Jesus is the Christ, and for this reason he was "blessed," but he knew because of God's grace ("To you it has been given to know," 13:11) and through God's grace ("no one knows the Son except the Father," 11:27).

At this point of the revelation of the mystery one can discover what distinguishes the Christian mystery from all others. In the Hellenistic mysteries revelation took place through special rites and ecstasies. In the apocalyptic literature the mysteries of God are revealed by visions or angelic beings. But in the NT the disciples meet the revelation or mystery of God in a historical event, in Jesus who is the Christ.

B. Pauline Literature. In the Pauline literature *mystḗrion* occurs more frequently, more deliberately, and more pointedly than in any other group of writings. It appears already in 2 Thess. 2:7, twice in Romans (11:25; 16:25), six times in 1 Corinthians (2:[1], 7; 4:1; 13:2; 14:2; 15:51), and twice in 1 Timothy (3:9, 16). But the word attains its most significant development in Ephesians and Colossians, where it is used no less than ten times. Although the idea represented by the term is usually limited to those passages where *mystḗrion* occurs, in a few instances elements of the concept appear independently of the word (i.e., 2 Cor. 12:4; Gal. 1:3). Its use undeniably progresses from a rather simple application to what, by the time of the Captivity Epistles, must be termed a highly sophisticated application.

1. 1 Cor. 4:1; 13:2; 14:2. The simplest usages have to do with its appearance in plural forms *(tá mystḗria).* Since these are limited to three passages in 1 Corinthians, it seems likely that Paul was using the term in these contexts polemically against certain developments within the Christian assembly. In none of these instances did he attempt to develop or define the term conceptually.

In 1 Cor. 4:1 Paul required that he be acknowledged as a servant of Christ and a steward of the mysteries of God. *Tá mystḗria* appears to be equivalent to the revelation of God of which he was an apostle. The plural form might indicate the breadth of Christian teaching and therefore have a more general scope than the great mystery of salvation mentioned elsewhere by Paul (so Deden, *Ephemerides Theologicae Lovanienses,* 13 [1936], 410: R. E. Brown, *Bibl.,* 39 [1958], 440).

In 13:2 ("if I understand all mysteries") Paul employed the terminology of those who considered themselves superior in their understanding of Christian teaching in order to rebuke them. The mysteries are not different from the mystery but rather are its essential ingredients. He might have said, "If I were acquainted with the sum of knowledge possible through divine revelations."

It is even more difficult to determine the force of "mysteries" in 14:25 "For one who speaks in a tongue speaks not to men but to God; for no one understands him, but he utters mysteries in the Spirit." Paul apparently meant that with tongues one may speak the hidden truths of God in the Spirit, but unless these mysteries are interpreted (i.e., reduced to specifics) so that they become intelligible, they accomplish little.

2. 1 Cor. 2:7. Paul's own use of the term is in its singular form. Although "mystery" occurred in a negative sense as early as 2 Thess. 2:7, not until Paul's letter to the Corinthians did the basic structure of the idea begin to be clarified.

The context of its occurrence is as follows: "...that your faith might not rest in the wisdom of men but in the power of God. Yet among the mature we do impart wisdom, although it is not a wisdom of this age or of the rulers of this age, who are doomed to pass away. But we impart a secret and hidden wisdom [*sophían en mystḗrioi*] of God, which God decreed before the ages for our glorification. None of the rulers of this age understood this; for if they had, they would not have crucified the Lord of glory. But, as it is written, 'What no eye has seen, nor ear heard, nor the heart of man conceived, what God has prepared for those who love him,' God has revealed to us through the Spirit. For the Spirit searches everything, even the depths of God" (1 Cor. 2:5-10).

Paul obviously used *mystḗrion* here in an early attempt to subsume the divine plan under a single comprehensive term or phrase (so Brown, p. 437). He did not repeat the expression "the wisdom of God in mystery." Perhaps the wisdom enthusiasts in Corinth and the forerunners to Gnosticism elsewhere doomed its usefulness. Although Paul continued the conjunction of wisdom (or knowledge) with mystery (i.e., Col. 1:28; 2:2; Eph. 1:8f.; 2:9f.), he reversed the order, and the mystery became the dominant term. Undoubtedly it proved to be a happier choice, since mystery suggested in a far more definitive way Paul's twofold understanding of the gospel as divine disclosure and power (see K. Prümm, *Bibl.,* 37 [1956], 146f.). Even in this early attempt by Paul occur some of the emphases that characterize later developments.

(1) The mystery is intended not for everyone, but only for the mature *(téleioi)* (1 Cor. 2:6; cf. Col. 1:28). The *téleioi* mentioned here are not the *téleioi* ("initiates") of the Hellenistic mysteries, who became qualified through sacred rites, but rather those mature by the Spirit (1 Cor. 2:13f.). In later contexts Paul designated those for whom the mystery is intended simply as saints (cf. Col. 1:26; Eph. 3:5).

(2) The mystery that is imparted is not new; God decreed it before the ages (1 Cor. 2:7; cf. Eph. 1:9, 11; Col. 1:26). Therefore it is more than knowledge. It is nothing less than the salvation that God ordained through the cross of Jesus Christ. The choice of the cross as the means for human salvation is possible because it already belonged to God's original and eternal purpose.

(3) The mystery has been hidden from human view till this present moment (cf. Col. 1:26; Eph. 3:9; Rom. 16:25). It has been hidden from the prophets and saints in the past, from the Jews, and most of all from those who are perishing (cf. 2 Cor. 4:3-6). Moreover, it has been kept hidden from the dark rulers and powers of this world; even if they had knowledge of Jesus and the cross, they could not understand it, for God concealed the true meaning from their eyes (1 Cor. 2:8).

(4) The mystery is now being revealed by God through His Spirit (1 Cor. 2:10; cf. 14:2; Eph. 3:5). The chief point of reference to God's revealing act is the historic event of Jesus' death upon the cross. This event by no means exhausts the meaning, however, for even where it is known it remains hidden or foolish apart from the Spirit. Moreover, what is revealed at the cross is never fully comprehended even by those for whom it is intended. Because it belongs to the depths of God, only the Spirit of God can unveil it. Therefore only those willing to be taught and matured by the Spirit can really apprehend these depths of God.

3. Rom. 16:25f. Although Paul made no attempt in Romans to set forth his concept of mystery, he nonetheless used the term twice, and each time with some significance. The more important use occurs in Rom. 16:25f. in

the context of doxology. Although circumstances did not let Paul elaborate, his words are important as a transition between his early use of mystery and the use that develops in Ephesians and Colossians. The two especially noteworthy facets are (1) the identification made between the mystery and Jesus (see Sanday and Headlam, comm. on Romans [*ICC*, 1901], p. 434), and (2) the connection between mystery and the salvation of the Gentiles; it is interesting to note that the term's only other occurrence in Romans is a reference to the other side of the mystery, the salvation of the Jews (11:25).

4. Col. 1:26f.; 2:2; 4:3. All of the traditional elements of mystery previously mentioned are present here. Among the new elements is Paul's word that the grandeur of the divine plan can be recognized only where Christ Himself is recognized as present in His people (cf. Col. 1:27, "the glory of this mystery, which is Christ in you, the hope of glory"). Since Christ is the one who is supreme over all things (1:15-18) and the one in whom the fulness of God is present (1:19), Christ's presence gives to the Colossians their hope of glory (see R. E. Brown, *Bibl.*, 40 [1959], 71). Therefore Paul strove for the Colossians that they might have knowledge of God's mystery, namely Christ, in whom are hid all the treasures of wisdom and knowledge (2:2).

In Col. 4:3 Paul again referred to the mystery of Christ, but this time in the context of proclamation (cf. Eph. 6:19f.). Whereas apostles of other mysteries were required to conceal their word, Paul was obliged to declare his. This connection of proclamation with mystery can be traced to the earliest statements of Paul — 1 Cor. 2:1f. as well as Rom. 16:26. In the latter instance Paul said that the mystery was made known according to the command of the eternal God, who had established the basis for the proclamation through the prophetic writings.

5. Ephesians. Ephesians has been called "the Epistle of the mystery." Six times Paul employed the term; moreover, 3:2-11 set forth the most elaborate NT expression of the idea. All the familiar expressions occur, along with many of the key words ordinarily associated with *mystērion*.

Two new concepts add to the overall picture. Eph. 1:10 states that God's plan is to unite in Christ all things in heaven and on earth. The context of the first chapter, especially vv. 22f., is the work of subduing all things — not only earthly creatures but also heavenly powers — and placing them under the feet of Christ. Every principality and power that has dominion shall become subject to Him. Here is the picture of the final stage of the divine plan. From God's point of view the mystery of subjection to Christ already exists, for Christ has come and evil is vanquished; from the temporal point of view, however, the forces of evil are now engaged in a mighty conflict against the headship of Christ (Brown, *Bibl.*,40 [1959], 77). Nonetheless, in the fulness of time all things shall become united under Him.

Along with this statement belongs Eph. 3:10, "that through the church the manifold wisdom of God might now be made known to the principalities and powers in the heavenly places." The very existence of the Church and Christ's headship over it bears witness not only to the earthly powers but also to angelic powers that their authority is ended. Within the *koinōnía* of the Church, where every barrier is broken down and every alienation overcome, is already manifest the mystery of the headship of Christ. Whereas Colossians emphasizes the essence of the mystery, which is Christ present in and with the believer, Ephesians emphasizes the realization of the mystery, which is Christ present in and over the Church.

In Eph. 3:3 Paul mentioned that particular element of the mystery over which he observed stewardship, the salvation of the Gentiles. Although Paul had made other references to this event (cf. Col. 4:3), here he stated it most precisely. The mystery included more than that Gentiles could be saved; to Paul had been revealed that the Gentiles were destined also to be fellow heirs, members of the same body, and partakers of the same promises as Israel (Eph. 3:6). It was this development, the reconciliation of Jew and Gentile in one body, that revealed the unsearchable riches of Christ and demonstrated the manifold wisdom of God (vv. 8, 10). It also provided the "earnest" for the future expectation — God's ultimate demonstration to mankind and angels of the reconciling power of the blood of Christ.

6. Other Usages in the Pauline Literature. In 1 Thess. 2:7 Paul spoke of the mystery of lawlessness. What he likely meant is the mystery of Satan's rule and the kingdom of evil. Since they are supernatural and beyond human understanding, Paul had no difficulty referring to them in a negative sense as mystery.

In 1 Cor. 15:51 Paul mentioned the Resurrection as mystery. This use is consistent with his overall use of mystery as something hidden but now revealed. Here, however, application is limited to one facet of the great mystery.

In the context of a homily on marriage, Eph. 5:32b, Paul concluded, "This is a great mystery, and I take it to mean Christ and the church." The "secret mystery" appears to be the symbolic reference to the union of Christ and the Church, whose meaning, like that of the marital union described in Gen. 2:24, is hidden. Paul's use of the term mystery here is quite different from his use elsewhere; its closest parellel is the symbolic visions of Revelation.

The final Pauline use of "mystery" is in 1 Timothy, where the mysteries of faith (3:9) and of religion (v. 16) are mentioned. The mystery of faith is what is believed, i.e. true doctrine. The mystery of religion is further defined by a hymn of praise to Christ, which makes clear that the center of the Christian religion, the supreme mystery, is Christ Himself.

C. Book of Revelation. The use of mystery in Revelation is generally of a different order from that found in Paul. Its employment is less deliberate and its meaning less precise. In addition, since Revelation is an apocalypse, the use resembles that of Daniel and apocalyptic literature more than that of the rest of the NT. Thus mystery has special reference to the supernatural form (visions, symbols, etc.) in which communication from God takes place.

Mystery in Rev. 1:20 designates the nature and source of the revelation, while the context makes clear that the subject involved is in the historical incidence of the Church and its particular fate in history. The material is parenetic and practical, not theological. Rev. 10:7 refers to the day of the trumpet call by the seventh angel, when there will be no more delay (cf. 10:6) but the mysterious plan of God will be finished. Mystery here means the secret counsel of God (cf. Am. 3:7), which finds its ultimate and final expression in the eschatological acts of God. In 17:5, 7 mystery again designates the particular form of the communication as well as its symbolic meaning. Since the disclosure is from God it is necessary that its meaning be somewhat hidden, but it is to be assumed that the name Babylon was meant to convey a specific reference to the reader.

IV. Sources of the Pauline Idea of Mystery.—Attempts to designate sources from which Paul supposedly developed his ideas are a modernization of history of the worst order. Whatever ideas influenced Paul, they passed through the crucible of his own particular understanding of Christian

faith in such a way that they appear always with a unique form and meaning. It is equally strange to try to separate Paul from the stream of life from which he emerged as if there had never been any connection between it and his faith. One must look not for the source of his ideas but for the stream of life from which they emerge. Here will be found the way of approach, the kind of thinking and feeling, the type of discussion and questioning that prompted his own contribution. As has been already indicated, no matter how much Paul may have been at home in the Roman world, the stream of of life from which he emerged was not that of Greek religion or philosophy. The work expended in this area, particularly as it relates to his use of *mystḗrion*, has proved to have only negative value. Far more profitable has been the quest within Hebrew culture.

A. Mystery as a Phenomenon in the OT. Although mystery as a term appears only in Daniel, the idea of a secret council (Heb. *sôḏ*) and a heavenly assembly are present elsewhere (cf. Pss. 82, 89; Job 2:1f.; see also H. W. Robinson, *JTS*, 45 [1944], 15lf.). It is also clear that the prophets were those who had access to this hidden council of God and authority to declare it (so Jer. 23:18; Am. 3:7). In Daniel God is further revealed as the one who makes known secrets (Aram. *rāz*), i.e., grants visions that unveil particularly the course of future events as He has determined them.

B. Apocryphal and Pseudepigraphical Literature. This literature emphasizes the council of God as consisting of secrets hidden from mankind, (e.g., Sir. 11:4; 3:21f.) and connects mystery with wisdom (Sir. 4:18; Wisd. 6:22). *Mystḗrion* occurs in Tob. 12:7, 11; Jth. 2:2; 2 Macc. 13:21 but usually with a profane meaning. In Enoch, 2 and 3 Baruch, and 2 Esdras mysteries become an ever greater matter of concern. Important discourses revolve around cosmic mysteries (1 En. 41:3f.; 60:11f.; 3 Bar. 1:8), and mysteries having to do with evil (1 En. 6–11), human destiny (41:1), God and His providential acts (63:3), and eschatology (38:3; 69:14; 2 Bar. 76–86; 2 Esd. 14:5).

C. Qumrân Literature. This literature extensively treats the mysteries of divine providence (1QM 14:14; 1QpHab 2:1f.; 1QS 11:3f.), mysteries only for the elect (1QS 11:5-8), and cosmic and evil mysteries.

When all this diverse Hebrew literature is examined (and the materials are far too many to receive more than a cursory treatment here), it becomes very clear that (1) mystery was used in a great variety of situations and with many different meanings, (2) the terminology was exceedingly prevalent and demonstrates the wide range of interest the Jews had in the subject, (3) Hellenistic words and concepts had already penetrated Jewish thought before NT times. It is difficult to point to any one facet of Paul's use of mystery, including facets that are apparently most Hellenistic, that he could not have found in Judaistic thought. This does not mean that the Hellenistic world contributed nothing to Paul's thought, but only that the kind of penetration it made took place largely within the framework of Judaism, not outside of it.

MYTH, MYTHOLOGY. Since the terms "myth, mythology, mythical, and mythological" have often been used in biblical studies to characterize biblical narratives or aspects of the biblical story, it is necessary to discuss the appropriateness and accuracy of using such terminology. This discussion will consider the ancient Near Eastern and Greek contexts and survey representative scholarly positions.

I. Terminology
  A. Classical Greek
  B. LXX
  C. NT
II. Ancient Near Eastern Myth
  A. Mythopoeic Thought

  B. Greek Myth vis-à-vis Ancient Near Eastern Myth
IV. The OT and Mythology
V. Myth and Ritual
VI. Modern Redefinition of Myth
VII. The NT and Mythology
VIII. Mythology in Biblical Interpretation

I. Terminology.—The terms "myth" and "mythology" are related to the Greek words *mýthos* and *mythológos* (and the related verbs *mythologeúō* and *mythologéō*). *Mýthos* occurs five times in the NT (1 Tim. 1:4; 4:7; 2 Tim. 4:4; Tit. 1:14; 2 Pet. 1:16) and once in the LXX (Sir. 20:19). *Mythológos* occurs once in the LXX (Bar. 3:23). The two verbs do not occur in the LXX or the NT. *Mýthos* is thus the most important word of the group for our purposes.

A. Classical Greek. Mýthos originally meant "thought" (*TDNT*, IV, 766), either unexpressed ("intention," "purpose," "opinion," "idea") or expressed ("word," "saying," "statement," and "speech"). As expressed thought *mýthos* can be either an "account of facts," i.e., a true story, or an "(unauthenticated) story" or "rumor" such as "primitive history," "saga," "legend," "fairy story," "fable," i.e., an invented story or fiction (*TDNT*, IV, 766f.). *Mýthos* could, therefore, come to mean "a story dealing with gods and demigods" that is by nature unverifiable.

Mýthos has a semantic range similar to that of *lógos*. The distinction between true and false is not any better developed for *lógos* than for *mýthos*. *Lógos*, however, did eventually come to be used for a "true story" in contrast to *mýthos*, a "false story," although this distinction in meanings was never absolute; it was a later, but dominant, development (*TDNT*, IV, 770), which shows up in the negative connotation given *mýthos* in the NT.

Mythológos as a substantive means "teller of legends," "romancer," and as an adjective, "mythological." The related verbs are *mythologeúō*, meaning "tell word for word," "relate," and *mythologéō*, meaning "tell mythic [or legendary] tales," "tell stories," "converse," "relate [with exaggeration]." (See LSJ, p. 1151.)

B. LXX. Mýthos and *mythológos* occur once each in the LXX, only in the Apocrypha. *Mýthos* occurs in Sir. 20:19: "An ungracious man is like an ill-timed story [*mýthos*]." Here the context (vv. 18-20), which deals with inappropriate speech, allows for a pejorative sense. *Mythológos* occurs in Bar. 3:23: ". . . the story tellers [*mythológoi*] and the seekers for understanding have not learned the way to wisdom, nor given thought to her paths." Again the context allows a pejorative sense; if the story-tellers (*mythológoi*) have not learned the way to wisdom, the implication is that their stories (*mýthoi*) are false.

C. NT. Of the word-group, only *mýthos* appears in the NT and only with a pejorative sense. In 1 Tim. 1:4 teachers are not to occupy themselves with myths which "promote speculations" and are opposed to the divine order or economy, for such myths teach spurious doctrine (cf. v. 3) and are not conducive to "love," a "pure heart," a "good conscience," and "sincere faith" (cf. v. 5). In 1 Tim. 4:7 myths are said to be "godless and silly" and

are set in contrast to "the words of the faith and of the good doctrine" (cf. v. 6). 2 Tim. 4:4 refers to myths into which listeners with "itching ears" allow themselves to be beguiled by false teachers (cf. v. 3). Such myths are contrary to "sound teaching" (v. 3) and are contrasted with the "truth" (*alētheia*). Tit. 1:14 says that to give heed to "Jewish myths" is to give heed to "commands of men who reject the truth [*alētheia*]" and is not conducive to being "sound in the faith" (cf. v. 13). 2 Pet. 1:16 refers to "cleverly devised myths," i.e., apparently imaginative speculations not rooted in historical facts in contrast to the eyewitness testimony that bases the making known of "the power and coming of our Lord Jesus Christ" on historical events.

In the above contexts the term *mýthos* does not mean "myth" in the modern technical sense nor in the ancient Greek or Near Eastern senses (see II, III, VI below). It would best be translated as "untrue story" or "fiction," referring to a mixture of Jewish and Christian Gnostic speculations (cf. *TDNT*, IV, 781-84).

II. Ancient Near Eastern Myth.—*A. Mythopoeic Thought. 1. Lucien Lévy-Bruhl* regarded myth as the product of the prelogical thought of ancients and primitives. Such thought is mystical; primitives feel surrounded by unseen but real and directly apprehended powers. Thus they experience a "mystical participation" with the objects of thought in contrast to the modern separation of subject and object in the context of scientific, logical thinking.

Primitives apprehend what Lévy-Bruhl calls "collective representations" or "group ideas and sentiments" that are "common to the members of a given social group" and are "transmitted from one generation to another within it" (*Primitive Mentality*, pp. 5-13). Their overwhelming tendency is to avoid "discursive operations of thought" such as logical or reflective thought, which is abstract. This is not because the primitive mind has an inherent incapacity for such thought but because it has not differentiated logical and reflective thought in the modern way. Instead, it thinks with ideas that are more concrete than abstract.

The weaknesses of Lévy-Bruhl's position are: (1) that one should not simply equate the thought processes of ancients and contemporary primitives; (2) one should not so strongly contrast the prelogical, mystic thought of antiquity and the logical, reflective thought of today. The ancients could think logically and reflectively, though not to the same extent as moderns, and moderns often think prelogically and mystically.

2. H. and H. A. Frankfort believed that Lévy-Bruhl had overemphasized the difference between modern thought and mythopoeic thought (*Kingship and the Gods*, p. 362 n. 4). The Frankforts distinguished three kinds of thought (*Before Philosophy*, pp. 11-19): (1) scientific, logical thought, which involves a disciplined reasoning that clearly separates subject and objects and which predominates in modern society; (2) speculative thought, which, although not ignoring reality, is intuitive; which transcends experience by seeking order, coherence, and meaning from the "chaos of experience"; and which is today informed and limited by scientific, logical thought; but which in antiquity "found unlimited possibilities for development" since "it was not restricted by a scientific (that is, a disciplined) search for truth" (*Before Philosophy*, pp. 11f.); (3) mythopoeic thought, in which the ancient persons as subject experienced the world as personal subject, having an I-Thou relationship with the world; it viewed man as embedded in nature, which as a whole constituted a living organism that was apprehended from within in the form of subject apprehending subject.

Mythopoeic thought apprehends the world intuitively through mystical participation. This direct apprehension of transcendent ontological realities is not open to experience through the ordinary physiological senses. It expresses its apprehension in myths, which in narrative form portray transcendent reality in imaginative and concrete symbols of gods and goddesses, and of their interrelationships with each other and humanity.

Ancient mythopoeic thought was influenced by speculative thought, but without the restrictions of scientific, logical thought, so that in the resultant myths we can detect a clear attempt to order and organize the direct mystical experience of transcendent reality. What we perceive as inanimate the ancients perceived as animate. They experienced natural forces as personal and also as transcendent, suprahuman powers. They thus conceptualized them pictorially through imagination as having personal existence and concrete form as gods, goddesses, and other supernatural beings. They imaginatively conceived of the interaction of these forces with each other and with humanity as mythical events.

For further discussion see Rogerson, pp. 85-100.

B. Characteristics of Ancient Near Eastern Myth. 1. It is *tied to nature and the cosmos* (and thus to reality), since it grew out of a direct experience of them. The imaginative, personalized symbols used to represent this experience seldom gain a personality independent of the forces and entities experienced.

2. It expresses an experience of *nature and the cosmos as personal* and animate. Cosmic powers and entities are therefore conceptualized imaginatively as having personal form. Their interrelationships are conceptualized as events in which personal beings interact with each other. This was not personification, which implies that what is represented as animate and personal is consciously known to be inanimate and impersonal.

3. It is *dynamic* by virtue of being tied to nature and natural forces, which are all experienced as personal and pulsating with life.

4. It also expresses the ancient Near Eastern *experience of transcendence*, of transcendent ontological realities. Mythopoeic thought began with a direct experience of nature and the cosmos but moved beyond it, experiencing the personal forces and entities in the universe, as well as their interrelationships, as in some way beyond human comprehension and empirical experience, i.e., as transcendent and mysterious. Cosmic forces and entities were experienced as more than merely empirical, natural, and inanimate.

The content of the myths illustrates this transcendent awareness. The mythical events portrayed take place in an "otherworldly" time and space, beyond ordinary matter and history. Myths deal with primordial events — with the origins and organization of the cosmos, humanity, and the origins of earthly institutions. Myths may deal with ends, with eschatological events, although this is not prominent in ancient Near Eastern myths. Myths may also deal with humanity's continuing quest for meaning.

5. It was *prescientific and prelogical.* Scientific and logical thought was not foreign to the ancient Near East but it was not paramount in attempts to comprehend cosmic and human existence.

6. It *used imagination in producing symbols* to represent the natural and cosmic powers and entities. Such symbols had personal, animate form, e.g., gods, goddesses, and other superhuman beings. The interrelationships of natural and cosmic powers and entities were conceived of as events in which the personalized, animate symbols interacted with each other as living beings. Mythopoeic thought,

although imaginative, was not fantasy. Whereas fantasy loses contact with reality, ancient Near Eastern myth maintains that contact.

7. It expressed itself in *narrative form* as myth. Because of the imaginative and personalized symbols used, this narrative form is pictorial, dramatic, and storylike.

8. It is *intuitive and revelatory.* The universe as personal revealed itself through a direct, mystical, and intuitive encounter of subject with subject.

9. It *conveys truth authoritatively.* Myth, through its imaginative symbols, established direct contact with truth concerning ontological realities. It conveyed this truth with an authority difficult for the modern scientific, logical, and critical mind to comprehend.

10. It *evidences reflective thought.* Mythopoeic thought, which dominates, is combined with reflective thought. The reflective aspect of ancient Near Eastern myth shows up in the tendency to order, organize, and explain natural and cosmic powers and entities.

11. It is *polytheistic.* The various natural and cosmic powers and entities are symbolized as diverse divine and superhuman beings. Even when one god is supreme a hierarchy of lesser gods remains.

III. Greek Myth.–Greece created a rich world of mythology that has been most influential on Western civilization. Modern popular concepts of myth have been conditioned by an understanding of Greek mythology rather than of ancient Near Eastern mythology, from which Greek mythology differs noticeably.

A. Rise and Development. Greek mythology arose largely as a native phenomenon, with only a few instances of borrowing from the ancient Near East. We may suppose that in archaic times, prior to Homer, it originated from mythopoeic thought as an unconscious but natural process. The rise of Greek critical thought in the 5th cent. B.C., challenged what was sacred and traditional. Homer (8th cent. B.C.?) could laugh at the gods in his humorous depictions of them. Euripides (485-406 B.C.), deeply critical of traditional religious and social beliefs, was "the destroyer of myths" (*TDNT,* IV, 771). Socrates (469-399 B.C.), a constant and strong critic of the inherited standards and values of society, pointed up their inconsistencies; he was "cool towards myth" (*TDNT,* IV, 773). The Sophists undermined myth by developing logic and strongly criticized communal loyalty to the gods.

Many myths were reformulated so that their origin in mythopoeic thought became less clear, and other myths came into being through a conscious desire to entertain or to instruct. In the 4th cent. Plato (427-347 B.C.) revived myth in his dialogues, as a means of conveying in symbols the final vision of the otherworldly reality which was accessible only to faith, not logic. He no longer believed in myths and their world of gods per se. He either created new myths from traditional materials or made completely new ones as tools for instruction. Built into his myths is the allegorical method of interpretation. Consequently, he was aware of the differentiation between symbol and reality.

After Plato "myth falls from its high place" (*TDNT,* IV, 775). Plato's pupil, Aristotle (384-322 B.C.), is renowned for his work in logical thought and his use of the scientific method. These made him critical of myth and of the allegorical interpretation of traditional Greek myth. Stoicism, founded by Zeno (335-263), strongly advanced this method of interpretation. It viewed the world as divinely governed on rational principles and defined the wise as those who live their lives in conformity to the rational divine plan. It interpreted traditional Greek mythology allegorically in an attempt to safeguard myth against attacks on its irrationality and immorality. The use of this method, however, implied the untruth of myth when interpreted literally. Stoicism's monotheistic concept of divine power was also incompatible with the polytheism of traditional Greek myth. Epicurus (342-271 B.C.) adopted the atomic theory to show that the universe was made up of atoms, although these atoms had a measure of free will to move on their own. Epicurus also adopted and emphasized the principle of the reality of sensation. The blessed life was the life that was able to secure pleasure as the most desirable end. The gods played no active role in this materialistic scheme. Epicureanism was naturally critical of traditional Greek myth and also of its allegorical interpretation.

The intellectual world of Greece had an ambivalent attitude toward myth. It never totally rejected it but it openly criticized and sometimes derided the traditional understanding of myth and its deities as deficient in truth and morality and nonsensical and childish (cf. *TDNT,* IV, 779). Throughout the Hellenistic world mythology continued to play a strong role in poetry, although in an increasingly figurative way, and in religion. Christianity, as documented in the NT and early Christian writers, finally rejected myth on religious grounds (*TDNT,* IV, 779). The antithesis that developed between *mýthos,* "myth," and *alētheia,* "truth," in the Greek world never emerged in its full profundity and radicalness until the rise of Christianity. In the NT *mýthos* is diametrically opposed to the truth of the gospel. (See *TDNT,* IV, 784.)

B. Greek Myth vis-à-vis Ancient Near Eastern Myth.

1. Greek mythology in the form it has been handed on is *not closely tied to nature and reality* as is ancient Near Eastern myth. It early lost its contact with the forces of nature. The independence of Greek myth from nature and reality led to a number of consequences: (a) The actors in Greek mythology exhibit *highly personified and individualized forms,* which are independent of the forces of nature. (b) Greek mythology often moves in the realm of *fantasy* in its development of actors and plots. (c) Greek mythology often functions to *entertain.* (d) As a result of (b) and (c) Greek mythology is often *fictitious* in content. (e) Greek mythology is *static* in contrast to ancient Near Eastern mythology. Perhaps it arose under the influence of a more dynamic view of nature but it early lost that contact. (f) Greek mythology *does not exhibit the same consciousness of transcendence* as ancient Near Eastern mythology. In Greek mythology the divine actors are more human; they are depicted as subdivine rather than as fully divine. The Greeks tended to make their gods in their own image.

2. Greek mythology, as transmitted to us, is *no longer prescientific and prelogical.* Greek logical and scientific thought affected the form in which myth was handed down, and became more and more critical of myth.

3. The Greek understanding of myth came to imply an *implicit untruth* to myth in contrast to the truth of philosophical and logical thought and the scientific method. The awareness of the untruth value of myth produced the allegorical method of interpretation in an attempt to try to salvage its truth value. The term *mýthos* itself came to mean "untrue story" or "invented story" in contrast to *alētheia,* "truth." Greek mythology is thus no longer revelatory or authoritative in the same way as ancient Near Eastern myth. The educated Greek had a growing awareness of the differentiation between symbol and reality, which were held together in ancient Near Eastern mythological thinking.

4. Reflective thought is less obvious in Greek mythology than in ancient Near Eastern mythology. In the latter, reflective thought shows itself in its attempt to order and

organize the personal powers of nature. In Greek mythology such an attempt is overshadowed by the tendency to fantasize and entertain, which in turn is due to loss of contact with the forces of nature. In ancient Greece speculative thought made its main impact in philosophical theorizing about the structure, order, and meaning of the universe.

Greek mythology has some similarities to ancient Near Eastern mythology. Both take narrative form. Both are polytheistic. Both may trace their origins to a conception of nature and the cosmos as pulsating with life. Only ancient Near Eastern mythology, however, retained this view. In the final analysis the differences between the two mythologies are greater than the similarities.

IV. The OT and Mythology.–The narrative forms of myth that existed in the ancient Near East and in ancient Greek culture do not exist in the Bible. Comparative studies may show the influence of the ancient mythological world, but the dissimilarity of the biblical narratives from ancient mythological thought overshadows any similarities. Influences of ancient mythological thought can readily be adduced, but any conceptual borrowings have been profoundly modified by ancient Israelite and early Christian thought.

Only the latest parts of the OT could have been influenced by Greek thought by way of Hellenistic culture. But Greek influence on the Hebrew canon is minimal and no influence of Greek mythology is detectable. Ancient Near Eastern culture, which provided the OT life-setting, is thus the only potential source of mythological influence on the OT. As R. K. Harrison has stated: "It seems difficult to imagine on purely rational grounds that the OT writings could remain completely untouched by mythological tendencies in the ancient Near East" (*Intro. to the OT* [1969], p. 451). From a human perspective, the OT was conditioned by a culture that included mythopoeic thought. Though sharing basic patterns of thought as those with the rest of the ancient Near East, Israelite thought had distinctive aspects.

T. H. Gaster has offered a useful and concise presentation of the ways in which scholars have found an influence of ancient Near Eastern mythopoeic thought on the OT (*IDB*, III, 481-87). Gaster categorized such supposed influence as figurative expressions, allusions, and direct parallels.

Examples of figurative expressions are: (1) the voice of God as thunder (2 S. 22:14); (2) the wind as winged (2 S. 22:11; Ps. 104:3; Hos. 4:19), which reflects the ancient Near Eastern idea that storms were caused by the flapping of the wings of a large bird; (3) the sun as winged (Mal. 4:2 [MT 3:20]), which reflects the idea of the winged solar disk; (4) references to a mountain in the north (Isa. 14:13; Ps. 48:2 [MT 3]) where the gods assembled; (5) the Promised Land as a land "flowing with milk and honey" borrows from ancient Near Eastern mythological concepts of paradise; (6) the idea of a Book of Fate, which recorded a person's days even before birth (Ps. 139:15f.); (7) references to *lîlîṯ*, "night hag" (Isa. 34:14); *rešep*, "Canaanite god of pestilence" (Hab. 3:5); and the latter's sons, *bᵉnê rešep* (Job 5:7), all of whom reflect divine beings in ancient Near Eastern mythology. All the above ideas are readily explicable as borrowed mythological ideas that the OT has used in a purely figurative way without any commitment to the underlying theology.

The allusions are:

(1) The idea of a primordial revolt of the gods in heaven. In Ps. 82:6f. Yahweh metes out judgment upon certain "gods," and in Isa. 14:12-15 the king of Babylon arrogantly aspires to divinity and heavenly enthronement (Canaanite mythology is reflected in *hêlāl*, "day star," and *šāḥar*, "dawn," which are names of gods, and in the reference to "the mount of assembly," i.e., the mountain in the north [see above] where the council of the gods convened). Again, however, there is no evidence that the biblical writers accepted the underlying theology. They made figurative use of a borrowed mythological idea in order to demonstrate Yahweh's supremacy over nature and created beings.

(2) Mythological and astrological ideas. Job 38:31f. refers to "the chains of the Pleiades," "the cords of Orion," and "the Bear with its children," but once again there is no evidence that the underlying theology of these mythological and astrological ideas is accepted; in their present use they emphasize the power and sovereign rule of Yahweh.

(3) The wondrous child motif (Isa. 7:14; 9:6f.), which, Gaster said, reflects ancient myths "familiar especially from the Iranian lore of the Saoshyant (Savior) and from Vergil's Fourth Eclogue — of the virgin-born hero and of the Miraculous Child who is to usher in the New Age" (*IDB*, III, 483). Isa. 7:14, however, seems in context (7:1-17) to refer to an actual historical child. The ideals of government in Isa. 9:6f. are best seen as a development of, and a projection into the future of, the ideals inherent in the Davidic covenant (2 S. 7). Any perceived influence of ancient mythology on these two Isaianic passages rests on supposed evidence that is weak and tangential. The poem of Vergil (70-19 B.C.) is too late to have had any influence.

(4) Traces of ancient Hebrew hero myths. But references to Enoch, who "walked with God; and he was not, for God took him" (Gen. 5:24), and to Nimrod, who was "a mighty man [*gibbōr*] . . . a mighty [*gibbôr*] hunter before the Lord" (Gen. 10:8f.; Gaster took *gibbōr* to mean "giant"), provide no evidence that we are dealing with mythological ideas.

Gaster also referred to the "use of the name David to denote the future messianic king" (Jer. 30:9; Ezk. 34:23f.; 37:24; Hos. 3:5) as reflecting "a version of the widespread myth that great national heroes . . . do not die, but will return to their peoples in the hour of need." There is no evidence that such mythological ideas existed contemporary with the biblical passages cited; Gaster adduced only Arthur of Britain and Friedrich Barbarossa. Furthermore, it is doubtful that the idea that David was to be the future ideal ruler should be treated as myth in the ancient Near Eastern and Greek senses. What is more likely is that the name "David" is used with poetic license to refer to the heir of the Davidic dynasty who was expected to reign in the New Age; and the passages in which this idea is expressed project into the future an ideal already inherent in the Davidic covenant rather than reflecting the influence of any ancient mythology.

Gaster accepted the untenability of the assertion of some scholars that an ancient sun myth may have influenced the biblical statement that Enoch lived 365 years (Gen. 5:23) and the story of Samson, whose name (*šimšôn*) is compared with the Hebrew for "sun" (*šemeš*).

(5) The annual dying and reviving of the deity, who died or slept in the nether world during the dry summer and revived with the return of vegetation in the autumn. Associated with this idea is the myth and ritual of "sacred marriage" of a god and a goddess, through the instrumentality of a priest/king and a priestess, to ensure fertility. Some scholars find these ideas reflected in the OT, in such passages as Isa. 53 (the Suffering Servant), several Psalms in which the psalmists call on Yahweh to "wake" (Ps. 35:23; 44:23 [MT 24]; 59:4 [MT 5]), Canticles, and Hosea's imagery of Yahweh's marriage to Israel. The arguments adduced for this view are weak, and better

interpretations of the supposed biblical evidence are available (see *IDB*, III, 483).

Three major examples of "direct parallels" between ancient Near Eastern mythology and the OT are:

(1) The story of Yahweh's battle with a dragonlike creature. This does not occur as a complete narrative in the OT, but a number of passages allude to various aspects and variant traditions of the story and can be used as a basis for reconstructing the general outline. The monster against which Yahweh is said to have fought is variously called Leviathan (*liwyāṯān* — Job 3:8; 41:1 [MT 40:25]; Ps. 74:14; Isa. 27:1; 2 Esd. 6:49, 52), Rahab (Heb. *rahaḇ* — Job 9:13; 26:12; Ps. 89:10 [MT 11]; Isa. 30:7; 51:9), Tannin (*tannîn*), i.e., "dragon" or "sea monster" (Job 7:12; Ps. 74:13; Isa. 27:1; 51:9), Yam (*yām*), i.e., "sea" (Job 7:12; Ps. 74:13; Isa. 51:10; Hab. 3:8), Nahar (*nāhār*), i.e., "river, stream" (Ps. 93:3; Hab. 3:8), and Nahash (*nāḥāš*), i.e., "serpent" (Job 26:13; Isa. 27:1). It had several heads (Ps. 74:13f.) and had apparently made the gods afraid (Job 41:25 [MT 17]). Yahweh subdued and killed it (Isa. 27:1) by smiting it (Job 26:12), by cutting it to pieces (Isa. 51:9), by piercing it (Job 26:13; Isa. 51:9), by crushing it (Ps. 89:10 [MT 11]), and by bludgeoning its heads (Ps. 74:13f.). Yahweh also defeated the monster's allies (Job 9:13; Ps. 89:10 [MT 11]). A variant tradition presents Yahweh as merely restraining the monster (Job 7:12). To this tradition probably belongs the idea that the monster would break loose at the end of the world to engage in a renewed but unsuccessful fight against Yahweh (Job 3:8; Isa. 27:1; 2 Esd. 6:52). This story resembles the Ugaritic "Myth of Baal" (in which Baal wages a victorious fight with Yam, the god of sea and rivers) and the victorious fight of Marduk against the monster Tiâmat in the Mesopotamian creation epic. The story occurs elsewhere in variant forms in Sumerian, Egyptian, and Phoenician mythology. (See M. Wakeman, *God's Battle with the Monster* [1973].)

That the OT uses traditional mythological concepts in the above passages cannot be denied, but there is no evidence of a commitment to the underlying theology. The purpose for which these scattered mythological concepts are used is the crucial issue. The OT uses them to demonstrate the power and supremacy of Yahweh over nature. Their occurrence no more indicates a commitment to the underlying pagan theology than does the use of similar mythological concepts in Milton's *Paradise Lost*. As R. K. Harrison said: "Where the language of myth was countenanced in the OT writings, it carried with it a very different meaning for the Hebrews than for the pagan nations of the Near East" (*Intro. to the OT*, pp. 452f.).

(2) The stories of Creation and Paradise. These reflect ancient Near Eastern mythology in a number of ways.

(a) The Creation story (Gen. 1:1–2:4a). In ancient Near Eastern creation myths the idea of a primeval watery mass from which the gods created the universe is a common motif. The Egyptian "Theology of Memphis" describes the god Ptah as conceiving the various parts of the universe in his mind ("heart") and bringing them into being through his divine speech ("tongue"), after which he was "satisfied" or "rested" (lines 53-59; see *ANET*, pp. 4f.; W. Beyerlin, *Near Eastern Religious Texts*, pp. 4f.). God's speech in the first person plural, "Let *us* make man in *our* image, after *our* likeness" (Gen. 1:26, italics mine), may reflect the ancient Near Eastern idea of a divine assembly of heavenly beings (cf. Job 1:6; 2:1).

The closest parallel to the Genesis Creation story is the Mesopotamian creation myth, *Enuma Elish* (*ANET*, pp. 60-72; Beyerlin, *Near Eastern Religious Texts*, pp. 80-84). Both narratives describe a primordial watery mass (*Enuma Elish*, I:1-4; Gen. 1:1f.) out of which the universe was created. In Genesis this watery mass is called *t^{e}hôm*. In the *Enuma Elish* it is made up of a comingling of *Apsû* (fresh waters) and *Tiâmat* (salt waters). Hebrew *t^{e}hôm* is etymologically related to Akk. *Tiâmat*, although *t^{e}hôm* in Genesis has lost the mythological force of its antecedent. In both accounts light, and also day and night, are present before the luminaries are created (*Enuma Elish*, I:38, 68, 102-104; Gen. 1:3-5). Heaven and earth are created from the primeval waters (*Enuma Elish*, I:55-77; IV:137-45; Gen. 1:6-10). The creation of humankind is the final and climactic act (*Enuma Elish*, VI:1-34; Gen. 1:26-30). At the end of all the creative activity there is a divine rest (*Enuma Elish*, VI:45-70; Gen. 2:2f.). The order of creative events is similar.

(b) The Paradise story (Gen. 2:4b-25). The forming of man from dust or clay (Gen. 2:7; cf. Job 33:6) is reflected in a Babylonian myth concerning the creation of humankind from clay mixed with the flesh and blood of a god (*ANET*, pp. 99f.) and in the Sumerian myth *Enki and Ninmah* in which man is fashioned from clay (Beyerlin, *Near Eastern Religious Texts*, pp. 76f.). Ancient Near Eastern mythology conveys the idea of a tree of life or of a life-giving plant. In Egypt the gods are represented as sitting in a large tree, from the eating of which they gain life and immortality. Mesopotamian cylinder seals often show scenes with a sacred tree from which a king draws life by touching it. The tree or plant of life is for humankind a potential source of immortality, which, however, it fails to attain. Thus in the *Epic of Gilgamesh* the hero Gilgamesh gets a plant of life from the bottom of the sea, but a serpent steals it from him. Gilgamesh sits down and weeps because he has lost the chance to become immortal. There is no ancient Near Eastern parallel to the tree of knowledge. An Assyrian myth quoted by Gaster (*IDB*, III, 482) described mankind as created to care for the soil and plants (*Keilschrifttexte aus Assur religiösen Inhalts*, I, no. 4; cf. Gen. 2:15). An Old Babylonian myth declares that "the *burden* [?] of creation man shall bear" (*ANET*, p. 99). Ancient Mesopotamian mythology also contains the idea of an original place of paradise in primeval times (cf. *ANET*, pp. 34ff.; Beyerlin, *Near Eastern Religious Texts*, pp. 85f.).

(3) The biblical story of the Deluge (Gen. 6:5–9:29). This has counterparts throughout the ancient world. The most important parallels are the Sumerian *Deluge Myth*, the Akkadian *Gilgamesh Epic* (tablet XI), and the Akkadian *Myth of Atra-ḫasis* (*ANET*, pp. 42-44, 104-106, 93-97; Beyerlin, *Near Eastern Religious Texts*, pp. 89-97), which are dependent on each other in the order listed above. Of the three accounts, tablet XI of the *Gilgamesh Epic* bears the closest affinity to the Genesis Deluge narrative. For a summary of these myths and their relation to the biblical story *see* BABYLONIA IX.A; FLOOD (GENESIS) VI.

That there is a relationship between the Genesis and Mesopotamian accounts of Creation, Paradise, and Deluge is clear. The precise nature of the relationship is not so clear. The basic questions explored by scholars are: (1) is there a dependence of one set of narratives on the other; if so (2), in which direction does that dependence function; and if not (3), do both derive from a common original narrative, or should we conceive of both sets of narratives as arising out of a general cultural milieu? The most likely answer probably lies in a combination of some sort of dependence and the derivation of both sets of narratives from common thoughts and ideas.

If we have so far emphasized the similarities between the Genesis and the Mesopotamian accounts of Creation, Paradise, and Deluge, it is the differences that are most important and that clearly set them apart. The Mesopotamian accounts are clear examples of ancient Near Eastern

mythology. The Genesis accounts are not. The purpose and theology of the two sets of narratives are quite different. The Genesis narratives have used the ancient mythological ideas to support the radically different theology of Yahwistic faith: (1) The OT narratives have been historicized. They are part of the prologue, i.e., the "Primeval History" (Gen. 1–11), of a more extensive narrative that describes Yahweh's redemptive actions in history. (2) The OT narratives have a high view of deity. (a) There is a strong monotheistic tendency in contrast to the polytheism of the myths. (b) God is transcendent. He is not tied to the forces of nature, which in Genesis are inanimate and impersonal, only Yahweh is personal, and mankind whom He made in His own image. Yahweh has sovereign power over natural forces and entities. (c) Yahweh is a moral God who requires obedience to His will and judges disobedience and wickedness. His judgment in the Flood is not arbitrary nor due to a mere capricious dissatisfaction with the tumult of multiplying mankind. His judgment is just; it is due to the magnitude of human wickedness and rebellion. (d) Throughout, Yahweh is demonstrated to be a God of grace who acts with a view to human redemption and reconciliation. (3) Ancient Israelite Yahwistic faith maintained a strong antimythological tendency in its condemnation of polytheistic religion and its rejection of any representation of Yahweh in natural forms.

V. Myth and Ritual.–The expression "myth and ritual" refers to studies of the relation of myth to ritual. Jane Harrison in her work on ancient Greek religion (*Themis* [1912]) described the *mýthos* ("the tale told, the action recounted") as the spoken correlative of the *drṓmenon* ("the acted rite, the thing done"). The *mýthos* and the *drṓmenon* were two complementary ingredients of a sacred ceremony or drama (pp. 327-331).

In OT studies the relation of myth and ritual was pursued by Scandinavian scholars, such as S. Mowinckel, and by the British "myth and ritual" school led by S. H. Hooke. Mowinckel (*Psalmenstudien, II: Das Thronbesteigungsfest Yahwäs* [1922]; *Psalms in Israel's Worship*, I [Eng. tr. 1962], 106-192) concluded, on the basis of comparative studies, that the autumn Festival of Tabernacles/Ingathering in ancient Israel included a New Year Enthronement Festival patterned after a festival of divine kingship in Canaan and Babylonia. In this festival Yahweh was reenthroned seasonally as universal king. He believed that the festal myths and ritual activities of the Enthronement Festival were reflected in, and could be reconstructed from, many of the Psalms, especially Enthronement Psalms, as well as other Scriptures.

In Britain S. H. Hooke and his followers argued for a "cultic patternism," namely, that throughout the ancient Near East there was a single cultic pattern of rituals and myths (Hooke, ed., *Myth and Ritual* [1933]; *Labyrinth* [1935]). This pattern, which was central to a New Year Festival, included: (a) a dramatic representation of the death and resurrection of the deity, (b) a recitation of the myth of creation, (c) a ritual combat in which the deity triumphed over his enemies, (d) a sacred marriage, and (e) a triumphal procession. The king had a central role, as source of community well-being; he played the part of the deity. Hooke and his followers argued that this pattern influenced the early religion of the Hebrews, e.g., in myths and rituals concerning sacral kingship and the enthronement rite, which were considered central to the main Hebrew festivals, especially the autumn Festival of Tabernacles.

Both Scandinavian and British scholars have been criticized for subjectivity. Parallels between the Babylonian *akītu* festival and a reconstructed Hebrew New Year Feast of Ingathering are weak and conjectural. The existence of a New Year Enthronement Festival among the ancient Hebrews has not been proven. Furthermore, the ancient Hebrew festivals did not fit the supposed ancient Near Eastern pattern. Hooke's use of the OT to support ideas of divine kingship and of the king acting as Yahweh's cultic substitute lacks any sound basis. Both the historical emphasis and the antifertility emphasis of ancient Hebrew religion argue against the possibility that the ancient Hebrews shared in a common ritual and mythical pattern of the ancient Near East.

T. H. Gaster (*Thespis* [1950]) continued to argue for a primitive and seasonal pattern of myth and ritual, survivals of which are reflected in the ancient literature of the Canaanites, Hittites, Egyptians, and Hebrews. Gaster conceded, however, "that most of the texts in question now stand a long way from the primitive form and have been subjected to considerable literary and artistic development" (p. 18). The latter is true of the OT. Any survivals there of the seasonal pattern of myth and ritual are just that, survivals. They do not indicate a commitment to the underlying theology or attitude to nature and the gods of the ancient Near Eastern seasonal pattern. In the OT such survivals have been theologized, historicized, and adapted to Yahwism.

See Rogerson, pp. 66-84; *see also* NEW YEAR.

VI. Modern Redefinition of Myth.–In modern times the idea of myth has been redefined and broadened, as a transcultural and transhistorical phenomenon, to include much more than would fit into our previous descriptions of ancient Near Eastern and Greek mythology. This redefinition has occurred in response to the influence and growth of scholarly investigations in anthropology, sociology, psychology, linguistics, and history of religions. A modern approach would, generally speaking, view myth as a technical term for the symbolical expression, using picturesque terms and concepts familiar to ordinary human experience, of transcendent ontological realities, intuited emotively, which surpass ordinary human comprehension, and which concern the origins, ends, and meaning of human existence.

This broadened definition stands in contrast to the older scholarly view, which understood myth to be both religious and polytheistic per se, as was ancient Near Eastern and Greek mythology, and which understood myth to entail a way of thinking superceded by modern logical, scientific thought. The new redefinition sees myth as neither religious nor secular per se. It considers mythological thinking to be integral to being human and basic to all human thought and expression. Mythological thinking is as real today as in ancient times. When human knowledge reaches the limits of what can be logically and scientifically explained, it faces the unknown or transcendent, which, if an attempt is made to express it in human language, can be expressed only in terms of the known or ordinary. Creative imagination steps in to provide order and meaning to the unintelligible, transcendent realities by speaking in picturesque symbols. This, according to much modern scholarship, is to think mythologically.

The transcultural and transhistorical redefinition of myth needs to be evaluated both positively and negatively. On the positive side we might readily agree with the main point made in the redefinition. If myth is "the picturesque and symbolic expression of transcendent reality," it is a fundamental aspect of human nature and characteristic of all culture.

On the negative side the following considerations are important:

(1) In the popular mind the term "myth" continues to

bear the later Greek connotation, namely, that which is false, untrue, contrary to reality, and therefore unbelievable.

(2) According to its modern redefinition, myth is often used to describe what is consciously understood not to accord with reality. Raphael Patai pointed to George Sorel's "myth of the general strike" (*Myth and Modern Man*, pp. 91f.), and Ernst Cassirer to the "myth of German Social Nationalism" (in Verene, ed., *Symbol, Myth and Culture*, pp. 234-39). These so-called myths convey only an apparent truth. They have lost contact with reality. The myth of the general strike shields the striker from the truth, i.e., the "uselessness of the general strike"; the term "mythical" describes that which does not accord with actual reality. Cassirer allowed that modern myths are no longer spontaneous, but artificially and consciously tailored for planned, political ends due to the influence of logical and scientific thought.

(3) The modern redefinition of myth, with its emphasis upon the possibility of purely secular myths, tends to lose sight of the truly transcendent aspect of reality and to deal instead with that aspect of the immanent, physical universe that is not yet comprehended by intellect. Since the aspect of reality that is beyond intellectual comprehension has something of the sacredness of the transcendent, some scholars, working with a modern redefinition, define myth in religious terms. Mircea Eliade said: "Myth narrates sacred history; it relates an event that took place in primordial Time, the fabled time of the 'beginnings'" (*Myth and Reality*, p. 5). Elsewhere he said: "Myths reveal that the world, man, and life have a supernatural origin and history, and that this history is significant, precious, and exemplary" (*Enc.Brit.*, XV, 1133). G. Henton Davies said: "Mythology is a way of thinking and imagining about the divine rather than a thinking or imagining about a number of gods" (as quoted by J. L. McKenzie, *Dictionary of the Bible* [1965], p. 599).

(4) The above three considerations point to the conclusion that the redefined concept of myth differs essentially from that of ancient Near Eastern myth. The latter wedded symbol and reality together. With Greek logical and scientific thinking human thought began to become conscious of the differentiation between symbol and reality. Modern logical and scientific thought, the heir of ancient Greek thought, has the tools available to see the differentiation more clearly. Modern thought made it possible to opt for a logically, scientifically, and phenomenologically accurate description of more and more of reality. Thus Eliade could say, "at least apparently, the modern world is not rich in myths" (*Myths, Dreams and Mysteries*, p. 25; cf. pp. 24-38).

(5) In the light of the above considerations, the validity and usefulness of the continued use of the terms "myth," "mythology," "mythical," and "mythological" is open to question. The transcendent and sacred aspects of reality remain, however, and humanity continues to respond intuitively and emotively, expressing its experience of the transcendent in symbolic language. Rather than speak of this as mythological thought (which implies falsehood) we might better speak of intuitive thought (which implies neither truth nor falsehood). Instead of myth we might speak of "story" (Fackre, *Christian Story*), "religious drama" (R. K. Harrison, *Intro. to the OT*, p. 451), "parable" (A. Richardson, *Genesis 1-11* [*Torch*, 1953], pp. 27-32), "narrative drama" (M. Horsnell), or even coin a new term.

VII. The NT and Mythology.—We saw previously that the OT has been influenced by ancient Near Eastern mythology. The NT, through its use of the OT as Scripture, has, therefore, been indirectly influenced as well. Although the NT might also have been influenced by ancient Greek mythology, nothing comparable to Greek mythology occurs in the NT. In fact, the NT uses the term "myth" (*mýthos*) pejoratively to mean "untrue story" or "fiction." "Myths" in the NT most probably refer to a mixture of Jewish and Christian Gnostic speculations that are to be rejected because they are contrary to the gospel. The negative meaning of the NT term "myth" is comparable to the later meaning that the ancient Greeks developed for it when they became critical of their own myths, and came to see *mýthos* as the opposite of "truth" (*alētheia*), as that which was not in accord with reality. It is natural, then, that the NT would not use Greek mythology as the OT does ancient Near Eastern mythology.

The English term "myth" entered into the arena of modern theological and biblical debate primarily through the work of D. F. Strauss, who provided a mythological interpretation of the life of Christ (for the following survey of Strauss's position see P. C. Hodgson, "Editor's Intro.," in Strauss, *The Life of Jesus Critically Examined*, pp. xv-l). He maintained that the Gospels are composed of myths, legends, materials deriving from the authors' literary activity, and a residue of historical materials. Myth, for Strauss, is the narrative expression of an idea. By "idea" Strauss meant "religious imagery" in contrast to the Gospels' essential content of truth and historical facts. For Strauss the following narratives are largely mythical and therefore unhistorical: the Birth, Infancy, and Childhood narratives; the narratives dealing with the relations between Jesus and John the Baptist; the miracle stories; the Transfiguration account; the description of the entrance into Jerusalem; predictions of the Passion; the Passion story; and the Resurrection and Ascension narratives.

Inevitably, the result of Strauss's study were negative, for (1) his approach was atomistic; Strauss emphasized the individual stories, the smallest units of tradition, apart from their function in the Gospel as a whole; (2) he was also not overly concerned with the historical and theological context of the Gospels in their final form.

Part of Strauss's lasting impact on biblical studies was his broad understanding of myth. To quote from Hodgson's estimate of Strauss: "Religion is by definition *imaginative* . . . and therefore *mythical* . . . , for myths are expressions in storylike form of temporally conditioned religious ideas. This definition has the effect of greatly enlarging the role of myth, for where true religion is found so also is myth, as its proper mode of expression" (p. xxvi).

A scholar who was influenced by Strauss and who has profoundly affected the modern understanding of the NT is Rudolf Bultmann (see *Kerygma and Myth; Jesus Christ and Mythology*). In 1941 Bultmann initiated a debate concerning the demythologizing of the NT in a paper entitled "NT und Mythologie." The initial debate that ensued is reflected in a series of essays, including Bultmann's original paper, which was published in two volumes entitled *Kerygma und Mythos* (Eng. tr. *Kerygma and Myth*). Bultmann believed the NT to be heavily laden with mythical ideas, conditioned by a prelogical and prescientific world view. Under the influence of Strauss, he treated myth as a narrative dealing with the "other side" (i.e., a narrative concerning transcendent religious realities) expressed in terms of "this side" (i.e., in time-bound terms derived from ordinary human language and experience) (see *Jesus Christ and Mythology*, pp. 18f.). Bultmann claimed that the NT presents a "mythical view of the world" (i.e., a three-storied universe) and a "mythical view of redemption" (see *Kerygma and Myth*, I, 1f.). "It proclaims in the language of mythology that the last time has now come. 'In the fulness of time' God sent forth his Son, a preexistent divine Being, who appears on earth as a man. He dies the death of a sinner on the cross and makes

atonement for the sins of men. His resurrection marks the beginning of the cosmic catastrophe. Death, the consequence of Adam's sin, is abolished, and the daemonic forces are deprived of their power. The risen Christ is exalted to the right hand of God in heaven and made 'Lord' and 'King'. He will come again on the clouds of heaven to complete the work of redemption, and the resurrection and judgement of men will follow. Sin, suffering and death will then be finally abolished. All this is to happen very soon; indeed, St. Paul thinks that he himself will live to see it. . . . All this is the language of mythology. . . . To this extent *the kerygma is incredible to modern man, for he is convinced that the mythical view of the world is obsolete*. . . . Theology must undertake the task of stripping the Kerygma from its mythical framework, of 'demythologizing' it" (pp. 2f.). Demythologizing was necessary because the NT embodies "a truth which is quite independent of its mythical setting?" (p. 3).

Bultmann's approach was a twofold program of demythologizing and existential interpretation. The biblical interpreter must demythologize to distinguish the mythological, time-bound language that constituted the "setting" or "framework" within which a real truth was conveyed. That truth could be detected by existential interpretation. Bultmann used the existential philosophy of Martin Heidegger as a tool to arrive at the truth of the NT kerygma. This truth lay in what it conveyed concerning one's self-understanding within the world and concerning one's existence before God. By responding to the truth of the kerygma one comes to faith and experiences authentic human existence in freedom from insecurity, in independence of the tangible and transitory sphere of this world, and in loving fellowship with others (pp. 17-22).

The kerygma was all-important for Bultmann. He saw no continuity between the Jesus of history and the Christ of faith, i.e., the Christ of the kerygma. The Jesus of history was a Jewish apocalyptist. Proclaiming a Word of God in view of the imminent end of the world, He called for decision. He finally died a tragic death. The Jesus of history occasioned the kerygma but the Christ of the kerygma is a mythical reinterpretation of the historical Jesus by the post-Easter Church. Jesus was reinterpreted, under the influence of Jewish apocalyptic and Gnostic redemption mythology, as having risen bodily from the dead, as "Son of Man" who would return as judge, as "begotten of the Holy Spirit," as "born of a virgin," and as "the Son of God in a metaphysical sense, a great, preexistent heavenly being who became man"(*Jesus Christ and Mythology*, pp. 16f.). His resurrection, for Bultmann, meant His rising into the kerygma to become the kerygmatic Christ. In the process the Christ of the kerygma has been separated from history, for Jesus of Nazareth was not what the kerygma claimed Him to be. Here lies the profound weakness in Bultmann's program. Without a continuity between the kerygmatic Christ and the historical Jesus, faith is faith in a mythical construction. In order for faith in the kerygmatic Christ to be grounded in reality the Christ of the kerygma must also be continuous with the Jesus of history. It is not enough to reply that Bultmann emphasized the historical event of Jesus and therefore did not abandon the historical basis of the kerygma: the gulf between the historical Jesus and the kerygmatic Christ remains too great.

Much of what Bultmann called myth should be seen as factual event or metaphysical reality (either past, present and continuing, or yet to be), e.g., the Incarnation, the supernatural activity of God and of Satan in human history, miracles, the death of Jesus as atonement, the bodily resurrection of Jesus, the resurrection of the dead, and final judgment.

Some of Bultmann's students and followers have seen the inherent weakness of his radical discontinuity between the historical Jesus and the kerygmatic Christ, and have initiated a new quest for the historical Jesus, in which Jesus' words and deeds are seen as part of the kerygma. God is manifested in the "language-event" of the historical Jesus, not merely in the Christ of the kerygma. Thus, continuity is re-established. (Cf. Bornkamm, Robinson, and Conzelmann.)

Bultmann has been criticized on other grounds too. His argument for the influence of Gnostic redeemer mythology on the NT kerygma has been strongly contested in the light of recent Gnostic research. He has also been censured for working with an outdated concept of myth as a pre-scientific way of representing transcendent otherworldly reality in this-worldly terms, a concept that has not taken contemporary redefinitions into account.

Later interpreters have taken a literary and linguistic approach to the problem of the NT and mythology. The structuralists, using theories of Claude Lévi-Strauss and Ferdinand de Saussure, seek to move beyond the surface structures of a text to the deep structures, which correspond to universal and transhistorical structures of human life and thought, that are present in the human unconscious. Myths, or mythological texts, manifest a mythical structure as one of these deep structures. The mythical structure reflects real, absolute oppositions that are characteristic of human experience, such as Life-Death, Nature-Culture, Heaven-Earth, God-Man. (Cf. D. Patte, *What is Structural Exegesis?* [1976], esp. pp. 53ff.; Rogerson, pp. 101-127.) Structural exegesis has been applied in NT studies by scholars such as Daniel Patte, John Crossan, and Dan Via, and to OT studies by Robert Culley and Robert Polzin, *et al.*

Other interpreters who take a literary approach focus on the biblical text as it confronts the reader. Amos Wilder (*Jesus' Parables and the War of Myths*) believes in the validity of the historical and theological study of the text. Ultimately, however, the text must be read and heard so that its imagery, symbolism, and mythology have an immediate impact. For Wilder, both figurative discourse (poetry, imagery, symbolism, and myth) and discursive discourse are grounded in truth and reality. In them "the 'word' has been wedded to 'reality'" (p. 16), to create a "language-world' (p. 19). Language reflects a particular understanding of reality that is time-bound and conditioned by the social and historical dimensions of human existence. There is also, in spite of many differences, a basic continuity in human nature and experience. The task of the interpreter is to enter into the frame of mind, the experience of human existence, conveyed by the biblical text and its imaginative language. The interpreter can relate the text to the present by discovering the continuity between the text and today. Because myth is part of a unified "language-world," the interpreter cannot, following Bultmann, engage in "demythologizing." (See also Wilder, *Theopoetic*.)

In contrast to Bultmann, the merit of structural exegesis and of Wilder's literary approach is that they work with an understanding of myth that is compatible with the modern scientific view of reality. Their understanding of myth has been so broadened and attenuated, however, that the term "myth" has clearly moved in the direction of equation with metaphor, imagery, and symbol, and has thus become rather meaningless and confusing. Hence the question arises whether the use of such terms as "myth," "mythology," "mythological," and "mythical" to characterize biblical literature is not ill-advised.

VIII. Mythology in Biblical Interpretation.–By way of summary, a number of principles, helpful as guides to a

correct interpretation of Scripture, can be drawn from the preceding discussion.

A. The Bible Is Culturally Conditioned. Mythopoeic thought was an integral part of the ancient Near Eastern "setting in life" out of which the OT arose. It was impossible for the ancient Hebrews to remain unaffected by such thought. Communication always occurs in contemporary categories. Thus, OT thought shares in much of what constitutes mythopoeic thought.

B. Biblical Transformation of Culture. Mythopoeic thought has been transformed and adapted in the OT by the following forces stemming from Yahwistic faith: (1) ancient Hebrew religion was not tied to nature but to a reality that transcended nature, namely, Yahweh; (2) nature was not experienced as personal; (3) a high view of deity was maintained with a strong monotheistic and anti-polytheistic tendency, which opposed fertility religion and entailed a high ethical demand for obedience; (4) a strong antimythological tendency, inherent in its condemnation of the polytheistic and fertility religion that was the matrix of ancient Near Eastern mythology, was present in Yahwistic faith; (5) there was a strong tendency to historicize ancient Hebrew religious traditions.

The NT, which is firmly rooted in the OT, is even further removed from true mythopoeic thought. In the NT the OT's antimythological tendency is raised to a higher level and, under the influence of the Greek world's negative critique of its own *mýthoi,* the NT came to view *mýthos* pejoratively.

C. The Bible Is Not Mythological but Uses Mythological Ideas. Biblical thought should not be called "mythopoeic," neither should any of the resultant biblical narratives be termed "myth." The OT uses ancient Near Eastern mythological ideas figuratively and symbolically without any commitment to the underlying theology of the mythological world from which they have been borrowed. Biblical narratives, such as those of Creation (Gen. 1:1–2:3), Paradise (2:4-25), Fall (3:1-24), and Flood (6:5–9:17), may appear to be of the same type as ancient Near Eastern myths, but are different due to the impact of the transforming forces of Yahwistic faith.

D. Picturesque Symbolism Is a Biblical Phenomenon. The picturesque, symbolic narrative expression of an emotive intuition of the transcendent and sacred does occur in the Bible. Examples are the Creation, Paradise, Fall, and Flood narratives in Genesis as well as apocalyptic eschatology and parables in the NT. The use of picturesque symbolism does not mean that historical or factual reality did not occasion such narratives. Scholars may differ over the extent to which factual reality is represented in them, but in the above examples that factual reality includes the following: God's primordial creative action in bringing the universe, living creatures, and human beings into being; human nature as fallen in primeval time; the occurrence of a primeval flood interpreted as divine judgment on human sin; and the occurrence of an end and consummation to this age of human history.

E. Validity of Distinguishing Symbol and Reality. Ancient Near Eastern mythopoeic thought held symbol and reality together as an undifferentiated whole. Since the ancient Hebrews shared in much (but not all) of mythopoeic thought, we find in the OT a similar holding together of symbol and reality. The rise of Greek scientific and logical thought placed a wedge between them and eventually led the Greeks to a negative assessment of their own mythology. This negative connotation of *mýthos* was taken over into the NT. In the NT the tendency to hold symbol and reality together is still present, but perhaps not as strongly as in the OT.

Modern scientific, logical, and reflective thought, the heir of ancient Greek thought, can differentiate symbol and reality more readily. OT and NT thought was *sui generis* unable to think in precisely this same way. Modern interpreters can and ought so to think. The responsible interpretation and application of Scripture today demands that they attempt to differentiate symbol and reality. This is not always an easy task and may at times seem to be impossible, for often transcendent reality can be expressed only in picturesque symbols.

NAAM nā'əm [Heb. *naʿam*]. A son of Caleb (1 Ch. 4:15).

NAAMAH nā'ə-mə [Heb. *naʿᵃmâ*–'pleasant'; Gk. *Noema*].

1. Daughter of Lamech and Zillah, and sister of Tubal-cain (Gen. 4:22; cf. Josephus *Ant.* i.2.2 [65]).

2. Ammonite wife of Solomon and mother of Rehoboam (1 K. 14:21; 2 Ch. 12:13). According to an addition in the LXX following 1 K. 12:24, "her name was Naaman, the daughter of Ana (Hanun) son of Nahash, king of the sons of Ammon" (see I. Benzinger, *Die Bücher der Könige* [1899], *in loc.*).

NAAMAH nā'ə-mə [Heb. *naʿᵃmâ*–'delightful'; Gk. *nōman, nōma,* suggesting that the LXX translators read a short *o* vowel in the first syllable, possibly by analogy to the name Naomi (Heb. *noʿᵒmî*)]. A city in the Philistine plain assigned to the tribe of Judah (Josh. 15:41). It is one of sixteen listed in vv. 37-41, where it is named between Beth-dagon and Makkedah. The name, it is said, is preserved in ʿArâq Naʿaman, but the location has been identified with nearby Khirbet Fered (*GP,* II, 89), 3 km. (2 mi.) S of the railroad station of Nahal Soreq (*GP,* II, 393). Since the list in vv. 37-41 includes Lachish, Eglon, and Migdal-gad, however, it may be more reasonable to look for Naamah in the region nearer to Lachish, about 25 km. (15 mi.) farther S, than to place confidence in the supposed similarity of the names.

In Job, Zophar is called "the NAAMATHITE," the Hebrew word being a gentilic (name of a people) formed on *naʿᵃmâ* (apparently a different place). W. S. L. S.

NAAMAN nā'mən [Heb. *naʿᵃmān*–'pleasantness']. Similar names, or names containing this element, are found in the Ugaritic texts and in the Mari texts (see Gray, p. 504, and H. Huffmon, *Amorite Personal Names in the Mari Texts* [1965], pp. 53f., 237-39, for references).

1. A descendant of Benjamin who entered Egypt (Gen. 46:21). He is further described as a son of Bela and eponymous ancestor of the "Naamites" (Nu. 26:40; 1 Ch. 8:4, 7).

2. The commander of the Syrian army who was cured of "leprosy" by Elisha (2 K. 5). The Syrian king mentioned in the story is probably Ben-hadad II (cf. 2 K. 8:7); although the name of the Israelite king is not given, the event probably took place during the reign of Jehoram (852-841 B.C.). Naaman, to whom the Lord had given victories (5:1), was a leper. His wife's Israelite servant girl suggested that the prophet in Samaria would be able to cure him. Following her advice, Naaman traveled to Samaria with gifts and a letter from his king demanding that Naaman be cured (see Montgomery, p. 374, for ancient Near Eastern parallels). When the Israelite king read the letter he believed that the king of Syria was attempting to provoke war. Hearing of the king's distress, Elisha sent a messenger to request that Naaman come to him. When Naaman arrived, however, Elisha did not even go out to meet him, but through an intermediary told him to wash in the Jordan seven times. Following the promptings of his servants, Naaman obeyed the prophet's command and was indeed cured. Returning to thank the prophet, Naaman confessed, "I know that there is no God in all the earth but in Israel" (5:15). In addition, in proof of his sincerity, he took "two mules' burden of earth" back with him to Syria to use in the construction of a sacrificial altar (5:17). This probably reflects the traditional Near Eastern attitude that a deity was god over a specific land. Naaman even requested that the Lord would pardon him when, for the sake of expediency, he entered the temple of Rimmon, the storm-god of Damascus, with his master. Instead of rebuking him for such a request, Elisha told him to "go in peace" (5:19; see Ellul, pp. 35-40). After Naaman's departure, Elisha's servant Gehazi pursued Naaman and lied in order to receive a portion of the gifts that his master Elisha had refused. His scheme having been exposed upon his return to Elisha, Gehazi and his descendants were cursed with leprosy (Heb. *ṣāraʿaṯ,* 5:27).

It cannot be ascertained with certainty what type of disease Naaman had, for the term "leprosy" (Heb. *ṣāraʿaṯ*) includes more illnesses than Hansen's disease (*see* LEPER V). It must not have been the most severe type, for his case did not require isolation (Lev. 13:45f.). Possibly he had what Herodotus (i.138) called *leúkē* as distinct from *lépra* (J. Gray, p. 504).

In Lk. 4:27 Jesus uses Naaman to illustrate God's freedom — God chose to heal Naaman, an enemy of Israel, but no Israelites. This scandal of God's grace so provoked Jesus' listeners that they attempted to kill Him (vv. 28f.), thus dramatically illustrating Jesus' point that "no prophet is acceptable in his own country" (v. 24).

Bibliography.–J. Ellul, *Politics of God and the Politics of Man* (Eng. tr. 1972), pp. 23-40; J. Gray, *I & II Kings* (*OTL,* rev. ed. 1970); J. Montgomery, comm. on Kings (*ICC,* 1951).

C. G. RASMUSSEN

NAAMATHITE nā'ə-mə-thīt [Heb. *naʿᵃmāṯî* (Job 2:11; 11:1; 20:1; 42:9); Gk. *ho Minaiōn basileús*–'the king of the Mineans' (2:11), *ho Minaios*–'the Minean' (11:1; 20:1; 42:9)].

A person of or from NAAMAH; Zophar in the book of Job is the only person so described. In view of the location of the book of Job, a site in Edom or northwestern Arabia has been proposed, possibly in the vicinity of Jebel el-Na'ameh (*IB*, III, 923). The Greek, if it is to be taken seriously, locates the site in southern Arabia. Except for Naamah in Josh. 15:41 no other place of this name is mentioned in the Bible. W. S. L. S.

NAAMITE nā'ə-mīt [Heb. *naʿᵃmî*]. A family that traced its descent from Naaman (Nu. 26:40). *See* NAAMAN **1.**

NAARAH nā'ə-rə [Heb. *naʿᵃrâ*–'a girl']. One of the two wives of Ashhur father of Tekoa (1 Ch. 4:5f.).

NAARAH nā'ə-rə [Heb. *naʿᵃrâ*; Gk. B *hai kómai autón*, A *Naaratha*] (Josh. 16:7); AV, NEB, NAARATH nā'ə-rath; **NAARAN** nā'ə-ran [Heb. *naʿᵃrān*; Gk. B *Naarnan*, A *Naaran*] (1 Ch. 7:28). A town in the territory of Ephraim, not far N of Jericho (Josh. 16:7). Eusebius (*Onom.*) places it 5 Roman mi. (about 7½ km., 4½ mi.) from Jericho. Naarah has been considered to be near ʿAin Dûq (see *EAEHL*, III, *s.v.* "Naʿaran" [M. Avi-Yonah]), but since that site has no early archeological evidence, N. Glueck suggested Khirbet el-ʿAyâsh near the Wâdī el-ʿAujā. In NT times the name was Noarah (cf. Neara in Josephus *Ant.* xvii.13.1 [340]). R. P. DUGAN, JR.

NAARAI nā'ə-rī [Heb. *naʿᵃray*]. Son of Ezbai, and one of David's mighty men (1 Ch. 11:37). In the parallel list in 2 S. 23:35 he is called Paarai the Arbite.

NAARAN nā'ə-ran [Heb. *naʿᵃrān*] (1 Ch. 7:28); **NAARATH** nā'ə-rath (AV, NEB, Josh. 16:7). *See* NAARAH.

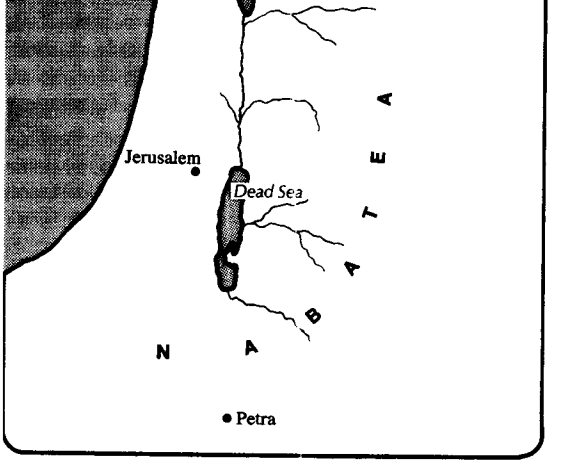
NAASHON nā'ə-shon (Ex. 6:23, AV); **NAASSON** nā'ə-son (Mt. 1:4; Lk. 3:32, AV). *See* NAHSHON.

NAATHUS nā'ə-thəs [Gk. A *Naathos*, B *Lathos*]. A son of Addi; one of those who had married a foreign wife and was required to divorce her (1 Esd. 9:31); possibly the same as Adna in the parallel list in Ezr. 10:30.

NABAL nā'bəl [Heb. *nāḇāl*–'fool']. A wealthy Calebite who lived in Maon and pastured his large flocks of sheep and goats in Carmel near Hebron (1 S. 25). The account of Nabal's folly and demise forms an episode in the story of David's progress toward the throne.

Nabal's name portrays his character before his actions and behavior are reported. Heb. *nāḇāl* denotes a "fool" in a spiritual and moral sense, i.e., one who is impious and ignoble (*see* FOOL I); cf. Abigail's description of Nabal: "for as his name is, so is he; Nabal is his name, and folly [*nᵉḇālâ*] is with him" (v. 25).

Nabal's folly is manifested in the magnificent banquet he prepared for himself and his friends when he knew that David and his men were going hungry nearby. It is demonstrated further in his callous rejection of David's request for food (vv. 5-11) in compensation for the protection David and his men had provided for Nabal's shepherds (v. 7; cf. vv. 14-16). Nabal was like the fool described in Isa. 32:6: "For the fool [*nāḇāl*] speaks folly, and his mind plots iniquity . . . to leave the craving of the hungry unsatisfied, and to deprive the thirsty of drink." When David was told about Nabal's churlish denial of his request, he prepared to take vengeance (vv. 12f., 21f.). David and his men were intercepted, however, by Nabal's wise and beautiful wife Abigail, who, having heard about her husband's insolent behavior, went out to meet David with a generous gift of food and persuaded him to desist from taking vengeance into his own hands (vv. 18-35). Nabal's drunkenness prevented Abigail from relating to him what she had done to save him and the family. But when he was sober the following morning she told him these things, "and his heart died within him, and he became as a stone. And about ten days later the Lord smote Nabal; and he died" (vv. 37f.; *see* DISEASE III.B). Ironically, Nabal lived his last ten days as he had the rest, i.e., with a heart like stone, unresponsive to the needs of others.



The author presents Nabal as emblematic of the fool who rejects God (cf. Ps. 14:1) and His anointed. Nabal's feigned ignorance of David (1 S. 25:10) is strange, since David's military exploits were well known (17:50; 18:7, 13-16, 30) and he was widely recognized as Israel's future king, e.g., by Jonathan (20:14f.), by the servants of Achish (21:11 [MT 12]), by Abigail (25:30), and even by Saul himself (24:20f. [MT 21f.]). Except for Yahweh's intervention by Abigail, David might well have damaged his own reputation and future by responding violently to Nabal's rebuff (cf. vv. 26, 30-34, 39).

NABARIAH nab-ə-rī'ə [Gk. *Nabarias*] (1 Esd. 9:44); AV, NEB, NABARIAS. One of those who stood at Ezra's left hand as he read the law to the people. The name is lacking in the parallel list in Neh. 8:4.

NABARIAS nab-ə-rī'əs (AV, NEB, 1 Esd. 9:44). *See* NABARIAH.

NABATEANS nab-ə-tē'ənz [Gk. *Nabataioi*] (1 Macc. 5:25; 9:35); AV NABATHITES. An originally South Semitic tribe that emerged in history and inhabited PETRA in southeast Transjordan sometime in the 4th cent. B.C. By the 1st cent. B.C.–A.D. they controlled the land caravan routes from China, India, southern Arabia, and Egypt to the west. By the time of Josephus their kingdom was called Nabatene (*Ant.* i.12.4 [220f.]) and was of major commer-

cial significance in the Near East. Early identifications of this group with the Ishmaelite tribe of Nebaioth, the Nebayat of the Assyrian chronicles, or other similar-sounding tribal names are no longer accepted.

Although of Arabic origin, the Nabateans apparently had given up their own language by at least the 4th cent. B.C. and had adopted the Aramaic script and language used by the rest of the Persian empire. This is indicated both by Diodorus's account of their letter to Antigonus (312 B.C.) and by the earliest recorded inscriptions.

Inscriptional materials (largely short inscriptions and graffiti) in the cursive greatly ligatured script evolved by the Nabateans are abundant, but their content is extremely sketchy. Few long, connected inscriptions exist (one of the exceptions is the Turkmaniyeh Tomb inscription at Petra), and most epigraphic remains are the caravaners' terse greetings found along the trade routes, especially in the Sinai Peninsula.

The prehistory of the Nabateans is unknown aside from allusions to Red Sea piracy thwarted by the Egyptians. The first historical note of the group is Diodorus's description (xix. 94-97) of an abortive campaign by the Greek general Antigonus I, who dispatched Athenaeus against Petra in 312 B.C. The action was little more than a raid, but it surprised the inhabitants of the Petra area during the absence of most of the male population and netted the victors considerable booty. While the Greeks were returning northward, however, word of the pillage reached the absent warriors of Petra, who regained the spoil in an ambush. A second expedition by the Greeks in the same year was foiled, and no record of further attempts is extant.

Thus by the 4th cent. B.C. the Nabateans had secured the site of Petra and had begun to amass considerable wealth through caravan trade. After 312 B.C. nothing is recorded about them until 2 Macc. 5:8, which notes their relations with the Hasmoneans in *ca.* 169 B.C. By that time the Nabateans had consolidated into a political body under a "tyrant" or king, Aretas I. It was this ruler who held Jason, the Jewish high priest, prisoner after his escape from the Greek-appointed high priest Menelaus. Aretas I was probably followed by an unknown king and then by Aretas II, known as Erotimus, who opposed Alexander Janneus at Gaza (Josephus *Ant.* xiii.13.3 [360]) in 96 B.C. and expanded Nabatean territory during the internal disorder that weakened Seleucid power. Obodas I became king *ca.* 95 B.C. and continued his predecessor's skirmishes with Janneus (*Ant.* xiii.13.5 [375]; *BJ* i.4.4 [90]) and territorial expansions.

Antiochus XII led an expedition against the Nabateans but was defeated and slain at Kana (*Ant.* xiii.15.1 [387-391]; *BJ* i.4.7 [99-102]), possibly by Rabbel I (88-86 B.C.). Aretas III Philhellene was able to extend his kingdom somewhat farther, apparently with the help of the people of Damascus, and to defeat Janneus at Adida in 85 B.C. (*Ant.* xiii.15.2 [392]). No mention is made of Nabatean influence at Damascus until long after the Armenian conquest of the city (70 B.C.) and its occupation by the Romans (66 B.C.). Aretas espoused the cause of Hyrcanus against Aristobulus, at the instigation of Antipater. He helped to defend Jerusalem during the siege and thus incurred the displeasure of Pompey. The Roman general Scaurus was sent against the Nabateans but soon withdrew after receiving three hundred talents as tribute (*Ant.* xiv.2.3 [29-33]; *BJ* i.6.3 [128-130]). In 55 B.C. Gabinius defeated a Nabatean force, but the victory was not decisive.

Malichus I, the successor of Aretas, emerged in history only as an ally of Caesar in the Egyptian War and as an opponent of Herod. Although Herod was part Nabatean through his mother Kypros, Malichus refused to grant him sanctuary and aid in his flight to Rome *ca.* 40 B.C. to escape the Parthian puppet Antigonus II Mattathias. Thus

One of the many inscriptions of Nabatean king Aretas IV (B. VanElderen)

began anew a period of Nabatean-Jewish clashes, which culminated in 31 in an almost disastrous defeat of the Nabateans in a pitched battle with Herod over taxes. Anthony had "granted" Nabatean lands to Cleopatra, with Herod as the guarantor. Only Roman entanglement in the Egyptian civil war precluded Roman support of Herod in the field and probably reduction of all of Nabatene.

Obodas II (30-9 B.C.) inherited the quarrel and let relations between the two states further degenerate under the influence of his prime minister Syllaeus, whose career was one of continual intrigue, abetted by the weakness of his monarch. It was Syllaeus who led the forces of Augustus in circles through the southern desert until Gallus their commander, in sheer desperation, gave up searching for trade routes. This action did not escape the notice of Augustus, however, and relations with Rome became even more strained. In addition, Syllaeus became enamored of Salome, the sister of Herod, and after being spurned by Herod began a period of active harassment of the Jews.

The death of Obodas brought to the throne Aretas IV (9 B.C.–A.D. 40), the most powerful ruler that Nabatene ever had. After a period of estrangement from both Caesar and Herod, Aretas began a consolidation of strength and an ultimate expansion of territory. Under Aretas the Nabatean kingdom reached its zenith culturally and artistically as well as commercially. Its relationship to Rome is unclear, although the Romans obviously considered it a subject state.

Domestic problems weakened Roman control in Syro-Palestine as well as Jewish strength in the north; Aretas used both factors for commerical and territorial gains. He reexerted some influence over Damascus, as Paul's report indicates (2 Cor. 11:32).

Malichus II (A.D. 40-70) is known chiefly from coins and inscriptions. During his apparently uneventful reign the kingdom weakened politically and in other ways. Malichus II was the king cited by Josephus (*BJ* iii.4.2 [68]) who assisted the Romans during the First Jewish Revolt, but this identification is problematic.

In the reign of Rabbel II (A.D. 70-106), the last king of the Nabateans, Nabatean holdings and power completely declined. In A.D. 106 the army of Trajan occupied Petra, and Nabatene ceased to exist as a separate kingdom. Cornelius Palma, governor of Syria, made the area part of the province of Arabia with Petra as its capital.

Thus the Nabateans, who had risen to great commercial heights, political power, and national awareness, became once again an indistinct Transjordanian tribe. Culturally they rose from nomadic simplicity to hellenized sophistication and then returned to nomadic obscurity.

VIII. Text from Qumrân

I. Parents.–We know relatively little about Nabonidus's father, Nabû-balāṭsu-iqbi. He may have been an Assyrian governor of Aramean origins. Thanks to several stelae from Haran (see *ANET*, pp. 311f.; 562f.) we know a great deal about his mother, one of the most long-lived women in antiquity. Adad-guppi was born in the twentieth year of Ashurbanipal (650). Whether or not she was a priestess at Haran (as suggested by É. Dhorme, *Revue d'assyriologie*, 41 [1947], 1-21; but denied by B. Landsberger, *Halil Edhem hâtira kitabi*, 1 [1947], 115-151 [cited by W. Röllig, p. 236] and J. Lewy, *HUCA*, 19 [1945-46], 405-489), she was extraordinarily devoted to the moon-god Sin, to whom she dedicated her only son. Nabonidus was most likely born before 610, when the family probably left Haran due to the invasion of the Medes and Chaldeans; they were perhaps transferred to the court at Babylon.

Adad-guppi was ninety-five years old when she saw her son crowned king, and then lived on to the ninth year of her son's reign (547). Her memorial stelae claim that she was still clear-sighted at the time of her death and could number descendants to the fourth generation (*ANET*, pp. 312).

II. Pre-Accession Years.–Adad-guppi boasted that she introduced her son into the service of Nebuchadnezzar. Since Belshazzar is described in Dnl. 5:2 as a "son" (or descendant) of Nebuchadnezzar, it is quite plausible that Nabonidus married a daughter of Nebuchadnezzar (perhaps the queen mentioned in Dnl. 5:10); see Dougherty, *Nabonidus and Belshazzar*; D. J. Wiseman, *NBD*, p. 139; J. C. Baldwin, *Daniel* (1978), p. 122.

Herodotus has three passages (i.74, 77, and 188-191) which refer to a Labynetus, but whether they refer to the same individual is debated (cf. R. Dougherty, *Nabonidus and Belshazzar*, pp. 193f.; H. Lewy, *Archiv Orientální*, 17 [1949], 28-109). It is certainly possible to regard the Labynetus (Herodotus i.74) who mediated a peace between the Medes and the Lydians in 585 as Nabonidus in the service of Nebuchadnezzar. He demonstrated in this case the political skill which qualified him to be chosen eventually as a candidate for the throne.

III. Accession and Early Years.–Nabonidus came to the throne in 556, which in the Babylonian postdating system would be his accession year (*see* CHRONOLOGY OF THE OT V.A). His first regnal year would have begun with the New Year on March 31, 555. According to Berossus, Nabonidus received the throne as the result of a conspiracy. According to his own basalt stele, Nabonidus

was elevated by the order of Marduk even though he was "one who did not know Marduk."

In his first three years he campaigned in Syria, Cilicia, and northern Arabia.

IV. Religious Convictions.–Because of Nabonidus's concern to restore ancient temples, earlier scholars characterized him as an "antiquarian." But this zeal to rediscover the ancient roots characterized all the Neo-Babylonian kings. Some of Nabonidus's texts refer to the discoveries of foundations of Sargon and Naram-Sin, who lived 1700 years before.

Inscriptions speak of the king's concern for the temples of the sun-god Shamash. The king restored his temple at Sippar after discovering the original foundations buried deep underground. He also restored the Shamash temple at Larsa and the temples of Ishtar at Agade, Babylon, and Sippar.

But it was above all the moon-god Sin which commanded Nabonidus's devotion. He restored the ziggurat at UR, a notable center of the moon cult. In his second year Nabonidus dedicated his only daughter to the lunar temple in Ur. The exaltation of Sin over all the other gods and even the suggestion of converting the Esagila, the temple of Marduk in Babylon, into a temple of Sin, naturally offended the Babylonians. Moreover, the king's insistence in interpreting divinatory signs himself must have alienated the priestly interpreters (see the Haran inscription, *ANET*, p. 562).

In a dream Marduk commanded Nabonidus to restore the temple of Sin at Haran, which had been destroyed by the Medes in 610. The god reassured the king that within three years CYRUS (the Persian king, see VII below) would defeat the Umman-manda (Medes) who had occupied the site. Following indications in the Persian Verse Account (*ANET*, pp. 312-15), most scholars have placed Cyrus's uprising against the Medes in Nabonidus's third year (553/552) and have placed Nabonidus's rebuilding of the temple soon thereafter. But H. Tadmor noted that the Chronicle places Cyrus's victory over his Median grandfather Astyages in Nabonidus's sixth year (550), soon after which Nabonidus retired to Arabia (see V below). He has therefore argued that Nabonidus was not able to complete the rebuilding until his return from Arabia toward the end of his reign. According to Tadmor, Nabonidus's devotion to Sin was intensified by his sojourn at the center of a moon cult in Arabia. The Haran texts, written after his sojourn there, are replete with exaggerated praise for Sin (*ANET*, pp. 562f.).

V. Sojourn in Arabia.–In an unprecedented move Nabonidus shifted his capital into the middle of the Arabian peninsula some 800 km. (500 mi.) from Babylonia. We learn from the Haran texts that he was away for a total of ten years. From the fragmentary entries in the Nabonidus Chronicle (*ANET*, pp. 305-307) we are certain that he was away at least from the seventh to the eleventh year. We also know that the king returned to Babylon in time to participate in the New Year's festival in 539. His stay must therefore have begun at the earliest in his fourth year, since we know his activities for the first three years (see III above). He must also have returned not later than 540. His sojourn in Arabia therefore lasted either from 552 to 542, or from 550 to 540.

The reasons for Nabonidus's self-imposed exile have been much debated. Some suggested that Nabonidus went for reasons of health; he had become ill early in his reign. Others have suggested that he wanted to control the lucrative Arabian trade or obtain allies against the rising power of Persia.

According to the Haran texts Nabonidus chose to occupy a string of six oases about 160 km. (100 mi.) inland from the coast in northwestern Arabia, with his capital at Tema (Teimā). Tema was strategically situated halfway between Babylonia and Egypt, and between Damascus and Mecca. According to the Verse Account Nabonidus beautified Tema and built a palace there like his palace in Babylon. The famous Tema Stone, an inscription in Aramaic that scholars have dated to the 5th cent. B.C., may actually date from Nabonidus's reign in view of the close iconographic parallels with the Haran stelae. The image of Ṣalm on the stone may represent the deified Nabonidus (see Winnett). Other oases were Dedan, Padakku, Ḫibrâ, Yadiḫu, and Yatribu (Medina).

VI. Belshazzar and Daniel.–Nabonidus associated his son Belshazzar with him in oaths and inscriptions. Though he did not abdicate, Nabonidus did entrust kingship to his son as he left for Arabia. In view of Nabonidus's long absence, Belshazzar served as the de facto king of Babylon as far as the Jews there were concerned. This explains why Daniel mentions Belshazzar but not Nabonidus, and also why Daniel was exalted to the "third" position in the kingdom (Dnl. 5:7, 16, 29). As G. Hasel (*Andrews University Seminary Studies*, 15 [1977], 153-168) pointed out, Belshazzar's first year (Dnl. 7:1) would correspond to the first year of Nabonidus's ten-year stay at Tema. W. H. Shea has suggested that the feast of Dnl. 5 was held to celebrate the coronation of Belshazzar after the defeat of Nabonidus at Sippar two days earlier.

VII. Final Years.–As the Persian threat on the eastern frontier became acute, Nabonidus hastened home to organize resistance some time between 542 and 540. But it was too late. His attempt to collect the gods of the cities to the north of Babylon failed, because the images of the gods of Borsippa, Cutha, and Sippar were not sent. Indeed, morale was so low that many of the Babylonians welcomed Cyrus, who honored Marduk more than their own king, according to the Cyrus Cylinder (*ANET*, pp. 315f.).

According to the Chronicle, in September, 539, Cyrus "did battle at Opis on the Tigris against the army of Akkad." By October 10 the Persians were able to capture Sippar "without a battle." The Chronicle indicates that Gubaru, Cyrus's general, and his troops entered Babylon "without a battle" on October 12 (cf. Dnl. 5; Herodotus i.191; Xenophon *Cyropaedia* vii.5.15). Cyrus himself entered the city on October 29, greeted as a liberator by the inhabitants, who spread green branches before him.

We do not hear of the fate of Belshazzar. According to the Chronicle Nabonidus was captured in Babylon. Berossus (preserved in Josephus *CAp* i.20 [153]) maintains that Cyrus spared Nabonidus and gave him a residence in Carmania in south central Persia. But according to Xenophon (*Cyropedia* vii.5.30) two of Cyrus's nobles killed the king in the palace. In view of the tradition that Cyrus also spared Croesus, Berossus was probably correct. The fragmentary line in the Chaldean Chronicle, which has been interpreted to contradict Cyrus's clemency to Croesus, is too broken to inspire confidence (see M. Mallowan, *Iran*, 10 [1972], 1-17; J. Cargill, *American Journal of Ancient History*, 2 [1977], 97-117).

VIII. Text from Qumrân.–Many scholars since H. de Genouillac (*Revue d'assyriologie*, 22 [1925], 71-83) and W. von Soden (*ZAW*, 53 [1935], 81-89) have assumed that the madness of Nebuchadnezzar in Dnl. 4 is actually the story of Nabonidus's irrational behavior in Arabia. For many that conviction has been strengthened by the discovery of "The Prayer of Nabonidus" in Cave 4 of Qumrân in 1955. The Aramaic text of four fragments (4QPrNab) contains thirteen lines with many lacunae. It is dated to the second half of the 1st cent. B.C.

The text relates the prayer said in *Teman*, by King *Nabunai*, who had been afflicted with a sickness for seven

years. Evidently after repenting of his worship of idols, the king is healed through the intervention of a Jewish diviner (*gzr*, lit. "divider"; cf. Dnl. 2:27). Some scholars restore line 3 to read, "so I became like the animals," but this is gratuitous.

Because of the broad parallels and similar vocabulary many scholars who hold to a Maccabean date for the composition of Daniel believe that the Prayer of Nabonidus may have influenced the composition of Daniel. There are, however, some major differences between Dnl. 4 and the Prayer of Nabonidus:

(1) Dnl. 4 speaks of Nebuchadnezzar, the Qumrân fragment of Nabonidus.

(2) Nebuchadnezzar was in Babylon, Nabonidus in Tema.

(3) Nebuchadnezzar suffered from boanthropy; according to the Qumrân text Nabonidus suffered from *šᶜḥîn* (cf. Job 2:7), a skin inflammation.

(4) Nebuchadnezzar was restored through Daniel, Nabonidus by an unnamed Jewish diviner.

(5) Nebuchadnezzar was insane for seven seasons (*'iddānîn*; Dnl. 4:13, 22, 29), which may not necessarily have been seven years. The Haran texts now indicate that Nabonidus was in Tema for ten years.

(6) The earlier identification of Nabonidus with Nebuchadnezzar was based in part on S. Smith's rendering of a line in the Verse Account, "an evil demon [*šedu*] had altered him," i.e., made him mad (*Babylonian Historical Texts*, p. 87). But Oppenheim rendered this line, "(his) protective deity became hostile to him" (*ANET*, p. 313). Another phrase in the Verse Account, "the king is mad" (*ANET*, p. 314), does not mean that Nabonidus was "insane," but that he was "angry" (Akk. *a-gu-ug šarru*).

NABOPOLASSAR [Akk. *Nabû-apal-uṣur*—'may Nabû protect the son']. The ruler of a small southern Babylonian state who became king of Babylon (626-605 B.C.) after rebelling against Sin-šar-iškun, the son and successor of Ashurbanipal, in 626 B.C. Of professedly lowly origins, Nabopolassar was the founder of the Chaldean dynasty, which his illustrious son Nebuchadrezzar II continued in the Neo-Babylonian period.

Sensing that the Assyrian empire would collapse with the demise of Ashurbanipal and the resultant threat of

Scythian invasion from the north, Nabopolassar endeavored to reduce the Assyrian garrisons of Nippur and Uruk. His initial attempts were unsuccessful, but once he had consolidated his political and military position in Babylon he seized Uruk in 623 B.C. and occupied Nippur the following year. For the next few years he marshalled his armies in the north along the Euphrates, avoiding costly battles with Assyrian forces but ensuring that the enemy moved steadily out of Babylonia and into the more northerly areas of Asshur, Nineveh, and Haran.

About 616 B.C. Nabopolassar made an alliance with Cyaxares king of the Medes and both the Babylonians and the Medes prepared to attack Asshur. The city ultimately fell to the Medes in 614 B.C., but Nabopolassar gained some of the spoils. As a result of the political alliance, which was apparently made more binding by the marriage of Nebuchadrezzar and Cyaxares' daughter Amytis (for whom the celebrated "hanging gardens" of Babylon were reportedly constructed), Nabopolassar's eastern front was secured. He inherited what remained of the Assyrian empire, and the Medes occupied themselves with preparations for reducing Nineveh. Nabopolassar made Assyria's vassals in Syria, Palestine, and Cilicia pay tribute to him, and in 612 B.C. he joined the Medes in victory over Nineveh. The remaining Assyrian forces fled to Haran, which then came under attack by Nabopolassar, and in 610 B.C. the city fell, thus terminating the mighty Assyrian empire and fulfilling the predictions of Zephaniah (2:13-15) and Nahum (3:1-19).

The warlike tribes of the Zagros mountains were a potential threat to the security of the Babylonians after the Assyrian empire fell, and this, coupled with the control which Pharaoh Neco II held over Carchemish, prompted Nabopolassar to regroup his forces in the north Euphrates area. He became ill at this period, however, and it was left to his son Nebuchadrezzar to defeat the Egyptians at Carchemish and Hamath (cf. Jer. 46:2) and expedite their withdrawal from Palestine. Meanwhile, Nabopolassar journeyed back to Babylon and died there in August, 605 B.C., leaving his son to continue the task of making the Neo-Babylonian empire one of the most splendid in the Near East.

NABOTH nā'both [Heb. *nāḇôṯ*—'sprouts'(?), 'elevation'; Gk. *Nabouthai*]. The owner of a vineyard adjacent to the palace of King Ahab in Jezreel (1 K. 21:1-29). Ahab desired

to extend his property by purchasing the vineyard or by offering Naboth a better one in its place. Naboth justifiably refused the offer of the king on the valid ground that the vineyard was his family inheritance. Since his land was a gift from God, Naboth would have been transgressing God's law as well as being unfaithful to his descendants by selling it (Lev. 25:23-28; Nu. 36:7-9). When Ahab gave up his attempt, Jezebel ruthlessly secured the vineyard for him by hiring false witnesses who accused Naboth of blaspheming both God and king. Naboth and apparently his sons as well (2 K. 9:26) were executed. This cruel plan of Jezebel gave Ahab access to the vineyard, but when he came to take possession of it, the prophet Elijah met him and condemned him for the crime. A temporary respite was given to Ahab because of his repentance (1 K. 21:27-29). Later, however, dogs licked his blood at the pool of Samaria where his dead body had been returned from the battle at Ramoth Gilead (1 K. 22:38). Jehu, remembering Elijah's curse, brought it to complete fulfillment when he killed Jehoram, Ahab's second son, and dumped his body on the vineyard of Naboth (2 K. 9:24f.). In addition, Jehu was responsible for the death of Jezebel (2 K. 9:33) and the execution of seventy other sons of Ahab (1 K. 10:1-11).

NACON nā'kon [Heb. *nāḵôn*–'correct'; Gk. B *Nōdab*, A *Nachon*] (2 S. 6:6); AV NACHON; NEB "a certain." A proper name of either a person or a place. At the threshing floor of Nacon (CHIDON in 1 Ch. 13:9), Uzzah "put out his hand" to steady the ark of God and was struck dead. The place was thereafter called Perez-uzzah ("the breaking forth upon Uzzah"); it was probably located near Baale-judah (2 S. 6:2) or Baalah, which is Kiriath-jearim (1 Ch. 13:6).

Hebrew *nāḵôn* occurs in 1 S. 23:23; 26:4 but is translated, respectively, "with sure information" and "of a certainty" (see the comms.). In modern Hebrew *nāḵôn* means "right!, correct."

W. S. L. S.

NADAB nā'dab [Heb. *nāḏāḇ*–'generous, noble'; LXX *Nadab, Nabat,* and *Nabath*].

1. The eldest son of Aaron. He is always associated in the Bible with his brother ABIHU, although he also had two other brothers, Eleazar and Ithamar (Ex. 6:23). Nadab and Abihu accompanied Moses, Aaron, and the seventy elders on Mt. Sinai when they saw the God of Israel (although at some distance from Moses and the Lord Himself, 24:1, 9-11). With his father and his brothers Nadab was consecrated a priest before the Lord and was arrayed in holy garments (28:1-4).

Leviticus 10:1f. describes only briefly the event for which we remember Nadab and Abihu — their offering of "unholy fire" (Heb. *'ēš zārâ*) before Yahweh. Immediately a fire of judgment (lightning? but cf. Laughlin, pp. 561f.) fell on them. This occurred on the very first day that Aaron served as high priest. What should have been Aaron's finest hour was indelibly marred by the grief he suffered with the loss of his sons (10:2). Despite their grief, Moses forbade Aaron and his two remaining sons to mourn the deaths of Nadab and Abihu, although the rest of the Israelites were permitted to mourn (v. 6; cf. Wenham, p. 157, who has suggested that Aaron and his sons were forbidden to mourn in order "to identify themselves entirely with God's viewpoint"). Aaron and his sons were instead to confront in a new and drastic way the holiness of Yahweh (see vv. 3, 7; cf. the story of Uzzah, 2 S. 6:6f.).

The precise meaning of the phrase "unholy fire" has long confounded scholars. Some Jewish interpreters (e.g., Rashi) have suggested that the young priests had approached their duties in a drunken state (see Lev. 10:8-11), or that they were filled with pride (see, e.g., *Encyclopedia Judaica,* XII, 750f.). Others have wondered if they had taken the coals from the wrong location (cf. Lev. 16:12) or had offered the sacrifice at the wrong time of day (see KD *in loc.*; cf. Ex. 30:7f.). Wenham offers perhaps the most cogent explanation: Nadab and Abihu offered fire that God had not commanded (p. 155).

Both Nadab and Abihu died childless (Nu. 3:4). Thus not only did they die abruptly at God's judgment; their lines were ended as well.

Israel remembered the sad end of Nadab and Abihu; all but one (1 Ch. 6:3) of the subsequent notices of these brothers point back to this event (Nu. 3:1-4; 26:60f.; 1 Ch. 24:1f.).

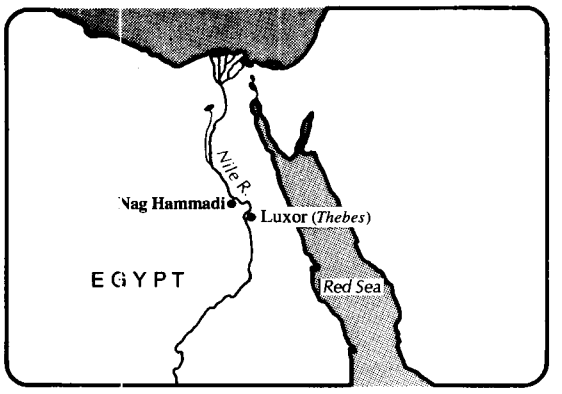
Bibliography.–J. C. H. Laughlin, *JBL,* 95 (1976), 559-565; G. J. Wenham, *Book of Leviticus* (*NICOT,* 1979), pp. 152-160.

2. The son and successor of Jeroboam I. He ruled for parts of two years (1 K. 14:20; 15:25-32). The wickedness of his father became a model for his own reign (v. 26) and a pattern for the kings that followed in the northern kingdom (thus fulfilling 14:10f.). The only notable thing about the reign of Nadab was his assassination at the hands of Baasha while he was besieging Gibbethon, a city in Dan under Philistine control.

3. One of the descendants of Jerahmeel. He was one of the two sons of Shammai and is mentioned with his brother Abishur (1 Ch. 2:28) and his sons Seled and Appaim (v. 30).

4. A son of Gibeon and an ancestor of King Saul. He was the sixth of Gibeon's ten sons (1 Ch. 9:35-37; cf. 8:30).

5. AV NASBAS (Tob. 11:18), AMAN (Tob. 14:10). The nephew of AHIKAR who attended the marriage ceremony of Tobias (Tob. 11:17f.). In 14:10 Tobit briefly recounts Nadab's fate, which is described in detail in the book of Ahikar: after trying to have his uncle Ahikar killed, Nadab was caught and punished, dying in chains (see *APOT,* II, 768-776). *See also* AHIKAR, BOOK OF.



The AV variants result from the AV's following different MS traditions. "Aman" may indicate some confusion with Haman, a similar character in the book of Esther. The extant MSS of the book of Ahikar include several other variants for Nadab (e.g., Nadin, Nabas, Nabal, etc.).

R. B. ALLEN

NADABATH nad'ə-bath [Gk. *Nadabath*] (1 Macc. 9:37); AV NADABATHA na-dab'ə-thə. A city in Transjordan from which the sons of Jambri were conducting a bride when Jonathan and Simon attacked to avenge the murder of their brother John (1 Macc. 9:37ff.). If this is the Nadabatha mentioned by Josephus (*Ant.* xiii.1.4 [18-21]; Loeb ed. reads Nabatha), it was near Medeba (although another reading in Josephus is Gabatha; the story is otherwise the same as the account in 1 Maccabees).

It has been identified with en-Nebâ, the ancient Nebo, NW of Medeba, and with Khirbet et-Teim, 2 km. (1¼ mi.) S of Medeba. Cf. N. Glueck, *AASOR,* 14 (1934), 33.

NAG HAMMADI näg hə-mä'dē **LITERATURE.** A collection of documents found in the area of Nag Hammadi, Egypt.

I. Discovery
II. Publication of Texts and Translations
III. Contents of the Thirteen Codices
IV. Literary and Religious Relationships
V. Evaluation

I. Discovery.–In 1945 peasants from Hamra Doum, a village about 10 km. (6 mi.) NE and across the Nile from Nag Hammadi, found a large jar containing thirteen Coptic codices (or, more exactly, twelve plus some sections of a thirteenth). The site of the discovery is about 80 km. (50 mi.) downstream from Luxor, in the area of the Nile Valley sometimes called the "great bend." The exact site is

Coptic codices were found under the boulder (lower right) at the foot of Jabal el-Tārif in Upper (southern) Egypt (by courtesy of the Institute for Antiquity and Christianity, Claremont, California)

Nag Hammadi codex in its cover (photograph by J. Doresse by courtesy of the Institute for Antiquity and Christianity, Claremont, California)

believed to be at the foot of cliffs that are honeycombed with tombs of kings of the 6th Dynasty.

The codices were offered for sale surreptitiously. G. Page finally purchased one codex (I) on May 10, 1952, and presented it to the famous Swiss psychologist C. G. Jung of the Jung Institute in Zurich. Part of this codex was missing. The missing material was subsequently identified with certain pages published in a photographic edition along with the first half of Codex II. (P. Labib, *Coptic Gnostic Papyri in the Coptic Museum at Old Cairo,* I [1956]). The Coptic Museum in Cairo purchased Codex III in 1948. After much haggling, on June 9, 1952, the Egyptian government took possession of all the remaining codices. The unstable political situation in Egypt delayed study of Codices II-XIII until 1956. Complete details of the discovery and subsequent vicissitudes of the codices are given in J. M. Robinson's introduction to the *Facsimile Edition of the Nag Hammadi Codices.* John Dart's *Laughing Savior* (1976) is a popular report basically dependent on Robinson and Doresse.

II. Publication of Texts and Translations.–Inevitably, in the long delays before all the codices were acquired and properly preserved, some pages were lost and small fragments were torn from some pages. P. Labib, director of the Coptic Museum, began the actual work of preservation in 1957. Later (1959-1961) M. Krause worked on the preservation of Codices IV-XIII, taking inventory and assigning numbers to the pages as they were sealed in plexiglass. A UNESCO team was charged in 1961 with the publication of the Coptic texts, translations, critical notes, and indices, but because of delays they did not complete their photographing of the texts until the summer of 1966. In response to an appeal by the International Colloquium on the origins of Gnosticism (held at Messina, Italy, in April, 1966) to undergird the restoration of the texts and publish a facsimile photographic edition of the MSS, UNESCO negotiated a new contract with the Egyptian government, and a team of international experts set to work on the texts. The international editorial board has completed the twelve-volume *Facsimile Edition of the Nag Hammadi Codices* (1977ff.), which includes all the codices and also an introductory volume by J. M. Robinson, director of the Institute for Antiquity and Christianity at Claremont Graduate School.

In addition, under Robinson's leadership, a group of international scholars undertook preparation of text editions and translations of all the texts, to appear as the Coptic Gnostic Library, a series within the *Nag Hammadi Studies*. The original plan of the Institute to publish text editions for Codices VII–XIII was expanded to include Codices I–VI, Codex Berolinensis 8502, Codex Askew, and Codex Bruce.The following is a list of the text editions already published (with dates) and some that are still in preparation.

Nag Hammadi Codex I, ed. H. Attridge;

Nag Hammadi Codex II, 1, III, 1 and IV, 1 with Papyrus Berolinensis 8502, 2: The Apocryphon of John, ed. F. Wisse;

Nag Hammadi Codex II, 2-7, ed. B. Layton;

Nag Hammadi Codices III, 2 and IV, 2: The Gospel of the Egyptians, ed. A. Böhlig and F. Wisse in co-operation with P. Labib (1975);

Nag Hammadi Codices III, 3-4 and V, 1 with Papyrus Berolinensis 8502, 3: Eugnostos the Blessed and the Wisdom (Sophia) of Jesus Christ, ed. D. Parrott;

Nag Hammadi Codex III, 5: The Dialogue of the Savior, ed. S. Emmel (1984);

Nag Hammadi Codices V, 2-5 and VI with Papyrus Berolinensis 8502, 1 and 4, ed. D. Parrott (1979);

Nag Hammadi Codex VII, ed. F. Wisse;

Nag Hammadi Codex VIII, ed. B. Layton;

Nag Hammadi Codices IX and X, ed. B. Pearson (1981);

Nag Hammadi Codices XI, XII, and XIII, ed. C. Hedrick;

Nag Hammadi Codices: Greek and Coptic Papyri from the cartonage of the Covers, ed. J. Barns, G. Browne, and J. Shelton (1981);

Pistis Sophia, text ed. Carl Schmidt, and notes by V. MacDermot, vol. ed. R. Wilson (1978);

The Books of Jeu and the untitled text in the Bruce Codex, ed. C. Schmidt, tr. and notes by V. MacDermot, vol. ed. R. Wilson (1978).

A one-volume English translation of the Nag Hammadi texts along with the *Gospel of Mary* and the *Acts of Peter* from BG 8502 has been published as *The Nag Hammadi Library in English* (ed. J. M. Robinson, 1977). (BG 8502 is a MS found late in the 19th cent. and first mentioned in scholarly works by C. Schmidt in 1896. After a series of unfortunate events, the texts were finally published by W. Till, *Die gnostischen Schriften des koptischen Papyrus Berolinensis 8502* [*TU*, 60, 1955]. This work also contains versions of the *Apocryphon of John* and *Sophia of Jesus Christ* that are duplicates of works in the Nag Hammadi library.)

As a corollary to these endeavors, E. J. Brill (Leiden) is publishing a monograph series, *Nag Hammadi Studies (NHS)*, which contains some text editions. The volumes published include D. Scholer, *Nag Hammadi Bibliography, 1948-1969* (1971); A. Böhlig and F. Wisse, *Nag Hammadi Codices III, 2 and IV, 2 (The Gospel of the Egyptians)* (1975); M. Krause, ed., *Gnosis and Gnosticism* (1978); *Pistis Sophia*, ed. C. Schmidt, tr. and notes by V. MacDermot (1978); D. Parrott, ed., *Nag Hammadi Codices V, 2-5 and VI with Papyrus Berolinensis 8502, 1 and 4* (1979); C. Schmidt and V. MacDermot, *The Books of Jeu and the Untitled Text in the Bruce Codex* (1978); R. Wilson, ed., *Nag Hammadi and Gnosis* (1978); B. Pearson and S. Giversen, *Nag Hammadi Codices IX and X* (1981); J. Barns, G. Browne, and J. Shelton, *Nag Hammadi Codices, Greek and Coptic Papyri from the Cartonnage of the Covers* (1981).

III. Contents of the Thirteen Codices.–Although the most common name for these MSS is "Nag Hammadi Gnostic Texts," not all of the tractates are Gnostic. Some are semi-gnostic (e.g., *Gospel of Thomas*) and others are clearly non-gnostic (e.g., *Sentences of Sextus*, Plato's *Republic*). There are duplicate texts in the corpus (e.g., *Gospel of Truth, Apocryphon of John*). All of this is understandable only if the codices are considered a library of a Gnostic group that included semi-gnostic and non-gnostic writings.

In technical terms the find consisted of twelve codices (some very fragmentary) and a folio of Codex XIII. The cover of Codex XIII is missing and eight of its folios were found inside the front cover of Codex VI (see J. M. Robinson, "Inside the Front Cover of Codex VI," in M. Krause, ed., *Essays on the Nag Hammadi Texts in Honor of Alexander Böhling* [*NHS*, 3, 1972], pp. 74-87). The MSS restored and inventoried number 1261 pages, plus some fragments not yet identified.

It seems likely that most of the tractates are translations from Greek or (possibly in a few cases) Aramaic. The dialects of Coptic into which they were translated are Sahidic, Akhmimic, and sub-Akhmimic. The spellings in Codex II seem to indicate a date *ca.* A.D. 340 for the translation (or final copying), which has been verified by the discovery of some backing sheets dated *ca.* 340. Most of the other codices seem to date from that time to about seventy years later. The original composition of the various treatises seems to have occurred *ca.* A.D. 150–250. The Coptic language, the final stage of ancient Egyptian, possibly became a written language when the NT was translated into it, beginning *ca.* A.D. 200.

The following list of codices and tractates is the one officially adopted for the *Facsimile Edition*, replacing several lists used earlier. In scholarly works the codices are referred to by the abbreviation CG (Cairensis Gnosticus) for the corpus, Roman number for the specific codex, and Arabic number for the tractate in the codex; e.g., CG V, 1 is Codex V, Tractate 1: *Eugnostos the Blessed*.

Codex I (Jung Codex)
Tractate 1, *Apocryphon of James*
Tractate 2, *Gospel of Truth*
Tractate 3, *Treatise on the Resurrection*
Tractate 4, *Tripartite Tractate*
Tractate 5, *Prayer of the Apostle Paul*

Codex II
Tractate 1, *Apocryphon of John*
Tractate 2, *Gospel of Thomas*
Tractate 3, *Gospel of Philip*
Tractate 4, *Hypostasis of the Archons*
Tractate 5, *On the Origin of the World*
Tractate 6, *Exegesis on the Soul*
Tractate 7, *Book of Thomas the Contender*

Codex III
Tractate 1, *Apocryphon of John*
Tractate 2, *Gospel of the Egyptians*
Tractate 3, *Eugnostos the Blessed*
Tractate 4, *Sophia of Jesus Christ*
Tractate 5, *Dialogue of the Savior*

Codex IV
Tractate 2, *Apocryphon of John*
Tractate 3, *Gospel of the Egyptians*

Codex V
Tractate 1, *Eugnostos the Blessed*
Tractate 2, *Apocalypse of Paul*
Tractate 3, *First Apocalypse of James*
Tractate 4, *Second Apocalypse of James*
Tractate 5, *Apocalypse of Adam*

Codex VI
Tractate 1, *Acts of Peter and the Twelve Apostles*
Tractate 2, *Thunder, Perfect Mind*
Tractate 3, *Authoritative Teaching*
Tractate 4, *Concept of Our Great Power*
Tractate 5, Plato *Republic* 588B-589B
Tractate 6, *Discourse on the Eighth and the Ninth*
Tractate 7, *Prayer of Thanksgiving*
Tractate 8, *Asclepius 21-29*

Codex VII
Tractate 1, *Paraphrase of Shem*
Tractate 2, *Second Treatise of the Great Seth*
Tractate 3, *Apocalypse of Peter*
Tractate 4, *Teaching of Silvanus*
Tractate 5, *Three Steles of Seth*

Codex VIII
Tractate 1, *Zostrianos*
Tractate 2, *Letter of Peter to Philip*

Codex IX
Tractate 1, *Melchizedek*
Tractate 2, *Thought of Norea*
Tractate 3, *Testimony of Truth*

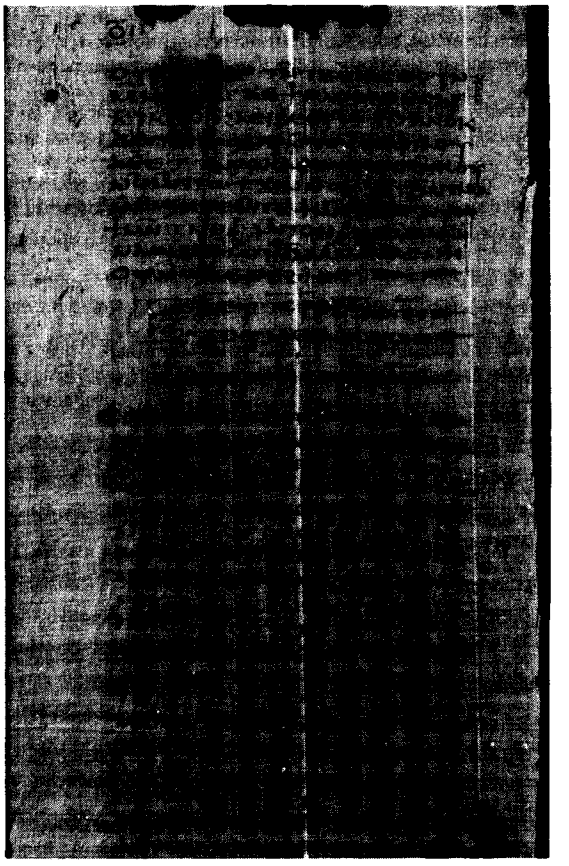
Codex X
Tractate 1, *Marsanes*

Codex XI
Tractate 1, *Interpretation of Knowledge*
Tractate 2, *A Valentinian Exposition*
Tractate 2a, *On the Anointing*
Tractate 2b, *On Baptism A*
Tractate 2c, *On Baptism B*
Tractate 2d, *On the Eucharist A*
Tractate 2e, *On the Eucharist B*
Tractate 3, *Allogenes*
Tractate 4, *Hypsiphrone*

Codex XII
Tractate 1, *Sentences of Sextus*
Tractate 2, *Gospel of Truth*
Tractate 3, Fragments

Codex XIII
Tractate 1, *Trimorphic Protennoia*
Tractate 2, *On the Origin of the World*

IV. Literary and Religious Relationships.–Literary genres of the tractates in the Nag Hammadi corpus include the following: apocryphons (hidden, secret books, often using revelational dialogue), epistles, gospels, prayers, apocalypses, acts of apostles. Until scholars have studied all the tractates it is premature to draw final conclusions about their contents, but it is possible to indicate certain features that stand out in the materials already published.



(1) The documents tend to validate the church fathers, who have often been accused of overrating the influence of Gnosticism. The first part of the *Apocryphon of John*, e.g., is almost identical to a section of Irenaeus's *Adv. haer.* xxix that deals with the Barbelo-gnostic beliefs.

(2) The find includes materials that are plainly Valentinian (e.g., *Gospel of Truth*), but more of the documents are Sethian or Barbelo-gnostic in their contents. Scholars will be studying these documents for evidence of the priority of either the Sethian or Barbelo-gnosticism or the Valentinian; i.e., they will be trying to discover which form of Gnosticism developed first, the philosophical or the mythological.

(3) The codices contain some Hermetic tractates that were already known, but they also include Hermetic literature not previously published.

(4) The unresolved question of the source and scope of the collection has important bearing on the interpretation of the various documents. At first the collection was called by a title such as "The Nag Hammadi Gnostic Texts";

NAG HAMMADI LITERATURE

Nag Hammadi Codex VII, p. 70. It contains the Second Treatise of the Great Seth 2:55, 14-56, 19, an account of the Crucifixion, and the beginning of the Apocalypse of Peter, a pseudonymous Gnostic work about a vision seen by Peter and explained by Jesus. The titles of both works are in Greek and the texts in Coptic (by courtesy of the Institute for Antiquity and Christianity, Claremont, California)

but the discovery that the documents include everything from the vague Gnostic ideas in the *Gospel of Thomas* to a section from Plato's *Republic* and *The Sentences of Sextus* has raised questions about the nature of the collection. Some have called it a Gnostic library, others have suggested that it was a collection made by an unknown heresiologist (Pachomius's monastery was nearby), while A. K. Helmhold has suggested that it was simply a collection of works made by a Gnostic individual or community that accepted works not strictly Gnostic in character (*JBL*, 87 [1968], 69f.).

(5) Comparisons and contrasts of the Nag Hammadi texts with writings of other groups, e.g., the Mandean and Manichaean communities, may settle the question whether the Mandeans and Manichaeans should be called Gnostic. The texts may also help scholars determine the priority and source of these and similar movements (cf. Yamauchi's books dealing with these issues).

V. Evaluation.–Some scholars have called the Nag Hammadi texts the most important MS find of the century. In part this is because these texts provide prolific sources from which scholars can trace the philosphical-theological ideas in Gnosticism and its influence upon other religious movements. The Nag Hammadi texts (like the Dead Sea Scrolls) not only give the scholar insights

into the character of the group producing them: they also contribute to textual criticism. Furthermore they offer new resources for studying the nature and development of the languages in which they were written or translated. Obviously, it will take scholars many years to exhaust the mine of information contained in these codices. Some of the more important (but no means exhaustive) results or by-products of research in these texts are given below.

(1) The finds at Nag Hammadi have already given much information in those writings that are definitely Gnostic about what Gnosticism taught and practiced. E.g., the *Gospel of Philip* has a list of Gnostic sacraments. Most Gnostic documents say much about the doctrine or philosophy taught by a particular Gnostic sect, but references to Gnostic rites and worship are much less known or documented.

(2) While the essence of Gnosticism has been known since the days of the early church fathers, the Nag Hammadi texts enable scholars to delineate more precisely the distinctions between various Gnostic groups and the relation of the Gnostic movement as a whole to Christianity. Scholars can more accurately assess the Gnostic impact on Christianity that compelled it to define the doctrine of the Church, the canon of Holy Scripture, and the governmental structure of the Church.

(3) With all the texts edited and translated, scholars can give a complete listing of biblical parallels, which will be useful in understanding how the Gnostics used the Scriptures. Since most scholars date the Nag Hammadi texts to A.D. 150-200, any reference by these texts to a biblical book tends to support a date for that book earlier than the 2nd cent. A.D.

(4) As study progresses, the source (or sources) of Gnosticism may be conclusively determined. Some scholars have suggested that the movement was a Jewish heresy (so R. Grant, *Gnosticism and Early Christianity* p. 34), others that it originated in Jewish-Christian circles, and still others that it was originally Hellenistic or Babylonian.

(5) The Nag Hammadi texts contain some quotations from the so-called Western text of NT. This factor could prove profitable for pinpointing the source(s) of Gnosticism.

(6) Finally, and most importantly, these texts should shed clearer light on the Reitzenstein-Bultmann thesis that early Christianity freely borrowed existing Gnostic terms and beliefs. G. Quispel ("Jewish Gnosis and Mandaean Gnosticism," in J. É. Ménard, ed., *Les Textes de Nag Hammadi* [*NHS*, 7, 1976] pp. 82-122) theorized that *Thunder* (VI, 2) was a piece of Jewish wisdom literature from the 1st cent. B.C. Other scholars have looked elsewhere for the origins of Gnosticism, while still others have attempted to demonstrate that Christianity was a Gnostic sect created by the interaction of Gnostic beliefs with the life and work of Jesus.

Was Christianity, indeed, a mythologization of earlier Gnostic concepts, especially concepts about a "redeemed redeemer"? Is the Gnostic "primal man" an archetype of the Christian savior? To understand the question, one must go back to W. Bousset, who argued (*Hauptproblem der Gnosis* [1907]) that the Gnostic redeemer was originally a pagan concept and that Gnosticism was a pre-Christian movement. Bousset cited Philo, the *Hermetica*, and the *Chaldean Oracles*, but especially emphasized the Babylonian and Persian sources. He was followed by R. Reitzenstein, who contended (*Poimandres* [1904]), on the basis of the Naasene sermon found in Hippolytus *Ref.* (rejecting its Christian element) and the Hermetic work published by Bousset, that the myth of a primal man (*ánthrōpos*) was pre-Christian. He argued that belief in a primal man who descended into the world, was given a revelation and reascended to heaven, was borrowed from the Parthian *Avesta's* teaching about Gayomart. This Gnostic redeemer myth was developed, he argued, in the Son of man motif in the Gospels. When Reitzenstein discovered that the Parthian texts he used had been found in Chinese Turkestan and were Manichaean, he concluded that these texts must reflect a pre-Christian Iranian source. When the Mandean texts became available Reitzenstein concluded, on the basis of the *Right Ginza*, that the Mandean messenger from heaven was the prototype of the NT Son of man motif.

R. Bultmann, convinced that Reitzenstein had demonstrated the existence of the redeemer myth long before the 1st cent. A.D., tried to prove (*ZNW*, 24 [1925], 100-146) that this redeemer myth was basic in the Gospel of John. He cited as proof Mandean and Manichaean texts, the Odes of Solomon (2nd cent. A.D.), and the apocryphal acts of the apostles — all writings later than John's Gospel. But he considered much of the Gospel to have been derived originally from writings about John the Baptist (cf. his 1941 comm., *Gospel of John* [Eng. tr. 1971]). Many of Bultmann's students not only held his views of the Gospel of John but also applied his theories about pre-Christian origins to other parts of the NT. (Cf. details in E. Yamauchi, *Pre-Christian Gnosticism*; "Some Alleged Evidence for Pre-Christian Gnosticism," in R. Longenecker and M. Tenney, eds., *New Dimensions in NT Study* [1974], pp. 46-70.)

Reitzenstein's reconstruction of the redeemer myth has been assailed by scholars such as C. Colpe (*Die religionsgeschichtliche Schule* [1961]). The leading scholars of the *Hermetica* believe that the extant texts of this work date from the 2nd to 4th cents. A.D.; this is also true of the Manichaean texts, both those from Turfan and those found in Egypt in 1931. The Mandean texts are much later, but may contain ideas that go back to the postapostolic times. The only way that one can set forth these documents as the source of the redeemer myth is by assuming that the doctrines and motifs contained in them (2nd cent. and later) had their origin in the pre-Christian era.

Numerous attempts have been made to relate Gnostic and gnosticizing literature to portions of the NT. C. Talbert (*Luke and the Gnostics* [1966]) viewed Luke and Acts as written to refute Gnostic tendencies. W. Schmithals contended that Gnosticism was the source of the licentiousness depicted in 1 and 2 Thessalonians and that the words "the day of the Lord is here" (cf. 2 Thess. 2:1f.) reflect a Gnostic saying that spiritualized the return of Christ. He also thought that the Gnostic problem was faced in the Corinthian Epistles, Philippians, and Galatians (*Gnosticism in Corinth* [Eng. tr. 1971]).

Some scholars have seen Gnostic influence and reinterpretation in Philippians. J. B. Lightfoot (*St. Paul's Epistle to the Colossians and to Philemon* [1897]) described the Colossians heresy as "incipient Gnosticism." Others have seen certain ideas in Ephesians as being originally Gnostic motifs. Bultmann found an expression of a Gnostic redeemer myth in 1 Tim. 3:16 (cf. A. K. Helmbold, "Redeemer Hymns — Gnostic and Christian," in R. Longenecker and M. Tenney, eds., *New Dimensions in NT Study* [1974], pp. 71-78). Many passages in the Pastorals about false teaching and portions of Hebrews have affinities to Gnostic doctrine, but frequently these affinities and parallels are tenuous. Bultmann and Käsemann attributed ideas in 1 and 2 Peter to borrowings from the Gnostics. Bultmann's thesis that 1 John had a pre-Christian Gnostic source has been widely followed.

John's apology for Christianity probably was a polemic against Gnosticism (cf. A. Wikenhauser, *NT Intro.* [Eng. tr. repr. 1967]). Suggestions of Gnostic parallels in the book of Revelation have not been generally accepted.

Bibliography.–*General:* U. Bianchi, ed., *The Origins of Gnosticism* (Colloquium of Messina 13-18 April 1966; Texts and Discussions; 1967); J. A. K. HELMBOLD

NAGGAI nag'ī [Gk. *Naggai*]; AV NAGGE. Son of Maath and father of Esli; an ancestor of Jesus (Lk. 3:25).

NAHALAL nā'hə-lal; **NAHALOL** nā'hə-lol [Heb. *nahᵃlāl* (Josh. 19:15; 21:35), *nahᵃlōl* (Jgs. 1:30)–possibly 'pasture, watering place'; Gk. *Naalōl, Nabaal, Domana,* A *Enamman, L Amman, Analōth, Alōm*]; AV also NAHALLAL (Josh. 19:15). A Levitical city in Zebulun. The site was formerly identified with Tell en-Naḥl N of the Kishon River at the southern end of the Plain of Acco, but two arguments can be raised against this suggestion. (1) The word is always written with *hê,* not *ḥēṭ* (*pace* Abel). (2) There is no conclusive evidence that Zebulun's territory extended so far west at that period. Simons believed that the ancient name is preserved in Maʿlûl, a village 4 km. (2½ mi.) NE of the modern Nahalal. The Talmud (T. B. *Megillah* 77a) identifies *mahlûl* with Nahalal, but the equivalence of *mahlûl* and *maʿlûl* is difficult to accept. Hence Simons' observation (p. 182) may be challenged on this point. He observed, moreover, that Maʿlûl is not sufficiently ancient and suggested that the ancient site may be Tell el-Beiḍā S of the modern village of Nahalal. The parallel passage in 1 Ch. 6:77 (MT 62) reads "Tabor," which seems highly improbable. The numerous and very different readings in Greek versions further complicate the problem.

Bibliography.–F.-M. Abel, *GP*, II, 63, 74; Simons, *GTTOT*, §§ 329, 337, 525. W. S. L. S.

NAHALIEL nə-hā'lē-əl [Heb. *nahᵃlîʾēl*–'wadi of 'El'; Gk. B *Naaliēl,* A *Manaēl*]. One of the last stopping places in the march from Sinai to the Promised Land, between the Arnon gorge and Jericho (Nu. 21:19). Eusebius (*Onom.*) placed it near the Arnon, and its name suggests that it was a wadi rather than a town.

It has been identified with Wâdī Wāleh, a tributary of the Arnon, and with Wâdī Zerqā Māʿîn, which flows through a gorge into the Dead Sea 18 km. (11 mi.) N of the Arnon. *WHAB*, plate IX, adopts the latter. W. S. L. S.

NAHALLAL nā'hə-lal (Josh. 19:15, AV); **NAHALOL.** *See* NAHALAL.

NAHAM nā'ham [Heb. *naḥam*–'comfort']. The brother-in-law of Hodiah (1 Ch. 4:19). The AV and NEB read "his wife Hodiah (the) sister of Naham," making Hodiah, rather than Hodiah's wife, the sister of Naham; but HODIAH is elsewhere a masculine name, and the RSV reading ("the wife of Hodiah, the sister of Naham") has stronger MS support (but cf. *BHS*). The text is difficult (see comms.).

NAHAMANI nā-hə-mā'nī [Heb. *naḥᵃmānî,* an abbreviated form of *nᵉḥemyâ*–'Yahweh has comforted'; Gk. *Naemani*]. One who returned from the Exile with Zerubbabel (Neh. 7:7). In Ezr. 2:2 the name is omitted; in 1 Esd. 5:8 it is replaced by Gk. *Enēnios,* rendered "Bigvai" by the RSV, without any MS support, in an attempt to reconcile this list with the two parallel lists.

See *IP*, pp. 39, 175.

NAHARAI nā'hə-rī [Heb. *naḥᵃray*]; AV also NAHARI (2 S. 23:37). One of David's thirty mighty men, Joab's armor-bearer, from the city of Beeroth (2 S. 23:37; 1 Ch. 11:39).

NAHASH na'hash [Heb. *nāḥāš*–'serpent'].

1. King of the Ammonites during the reigns of Saul and David. His military incursions were part of the reason that the Israelites sought a king of their own (1 S. 12:12), and Nahash's attack upon Jabesh-gilead and Saul's subsequent victory over him was the event that cemented Saul's kingship in Israel (11:12-15). Nahash was not content with a "peaceful" victory over Jabesh-gilead (i.e., by way of a treaty, 11:1), but insisted on a more violent victory. He apparently wished to disgrace Israel more than he wanted to conquer it (11:2). Thus he allowed the inhabitants of Jabesh-gilead seven days to secure more troops to deliver them — the more Israelites defeated and disgraced the better. This was his undoing, however, since Saul mustered an army large enough to scatter Nahash's troops and deliver Jabesh-gilead (11:11).

Later in Saul's reign or early in David's the relationship with Nahash must have improved. When Nahash died, David pledged loyalty to his son Hanun (2 S. 10:2). Furthermore, Nahash's son Shobi later helped David during the time of Absalom's uprising (17:27). Some suggest this relationship between David and Nahash's family is due to their both having a common enemy (i.e., Saul). While this may be true, it may also be that David and Nahash were related through David's (step-)sisters Abigail and Zeruiah (17:25).

2. The father (or mother?) of Abigail (2 S. 17:25). While it is remotely possible that Nahash is a woman's name, it is more likely that here it refers to the father of Abigail. Jesse is not said to be the father of Abigail (although cf. variant in some LXX and Lat. MSS of 17:25), but she is referred to as the sister of David (1 Ch. 2:16). When and under what circumstances Nahash became the father of Abigail is not recorded. If this is the same Nahash as above, then David's loyalty to his family would be for familial as well as political reasons.

D. H. ENGELHARD

NAHATH nā'hath [Heb. *naḥaṭ*–'clear, pure'(?); cf. Arab. *naḥtun*].

1. Grandson of Esau (Gen. 36:13; 1 Ch. 1:37); an Edomite clan chief (Gen. 36:17).

2. A Kohathite Levite, son of Zophai and ancestor of Samuel (1 Ch. 6:26 [MT 11]); probably the same as Toah (v. 34 [MT 19]) and Tohu (1 S. 1:1).

3. A Levite appointed by King Hezekiah to assist in overseeing the collection of offerings (2 Ch. 31:13).

See *IP*, p. 228.

NAHBI nä'bī [Heb. *naḥbî*]. Representative of the tribe of Naphtali among the twelve spies (Nu. 13:14).

NAHOR nā'hôr [Heb. *nāḥôr*; Gk. *Nachōr*]; AV also NACHOR (Josh. 24:2; Lk. 3:34). Terah's father and Terah's son, brother of Abraham.

1. The most elementary facts about the older of the two Nahors appear in Gen. 11:22-25. His father was Serug, the seventh recorded generation from Noah. Nahor's father was 30 years old when Nahor was born, and lived for 200 more years. Nahor himself was 29 when he fathered Terah, the father of Abraham. Nahor died at 148 years of age; thus he lived well into the life of Abraham. The two genealogies where his name appears later offer no additional information (1 Ch. 1:26; Lk. 3:34).

2. The younger Nahor, a grandson of **1**, also appears in Gen. 11, but always in the shadow of his more famous brother Abraham. We cannot be certain that Abraham was the oldest of the three brothers mentioned in v. 27. Nahor married Milcah, the daughter of Haran, Nahor's other brother (v. 29). Gen. 22:20-24 provides the names of Nahor's twelve children — eight by Milcah his wife (his son Kemuel is called the father of Aram; this familial relationship accounts for the close relation between the Arameans and the Hebrews) and four by Reumah his concubine. The purpose of these details is to point out that Rebekah, who later became Abraham's daughter-in-law, was a granddaughter of Nahor.

Genesis 24 records the episode of Abraham's servant's discovery of Rebekah as a wife for Isaac. It happened in "the city of Nahor" (v. 10). A city Naḥur, or Nakhur, on the Habor (Ḥābûr) River, appears in both the Mari and Ebla texts. This may indicate that the city of Gen. 24:10 is not merely Haran, an even more frequently mentioned city, or simply the city where Nahor lived, but a city actually named Nahor, perhaps after either of the two Nahors (cf. de Vaux, pp. 195f.).

Rebekah is identified twice as Nahor's granddaughter in response to the demand of Abraham that Isaac wed someone from his own relatives. Although Nahor was alive at this time, Laban his son and hence Rebekah's brother played the major role in the negotiations for the wedding. Laban's important role here has led some to posit that the society in which he lived was fratriarchal, or at least had fratriarchal elements (see C. H. Gordon, *JBL*, 54 [1935], 223-231; E. A. Speiser, *Genesis* [*AB*, 1964], pp. 92, 184f.; N. Sarna, *Understanding Genesis* [repr. 1978], pp. 174f.; but cf. de Vaux, pp. 234f., 246). In the Rachel-Leah episode a generation later, Laban was again identified by his grandfather Nahor (Gen. 29:5).

Although Gen. 31:53 might appear to imply that Nahor was also a Yahwist (thus B. Vawter, *On Genesis: A New Reading* [1977], p. 343, suggests that J thought the gods were identical) most scholars distinguish Nahor's pagan god from Yahweh (see the comms.).

See R. de Vaux, *Early History of Israel* (Eng. tr. 1978).

R. L. ALDEN

NAHSHON nä'shon [Heb. *naḥšón*–'snake'(?)]; AV also NAASHON, NAASSON. Son of Amminadab and brother of Elisheba, who married Aaron the high priest (Ex. 6:23). He was the leader of the tribe of Judah at the time of the first census in the wilderness (Nu. 1:7; 2:3), and as the leader he brought the tribal gifts and offerings at the time of the dedication of the tabernacle (7:12, 17). In addition, he led his tribe as they set out on their march from Sinai (10:14). He also appears in the genealogical lists of David and Jesus (1 Ch. 2:10f.; Mt. 1:4; Lk. 3:32).

C. G. RASMUSSEN

NAHUM nā'həm [Heb. *naḥûm*–'comfort'; LXX *Naoum*]. This title appears at the beginning of the seventh book within the collection of the Twelve Minor Prophets and is the name of the author of the "vision" within the book.

I. Author
II. Book
  A. Survey of the Message
  B. Composition of the Prophecy
  C. Theological Significance

I. Author.–The prophet Nahum cannot be identified with Naham (1 Ch. 4:19), Nehemiah (Neh. 1:1), or Nahamani (Neh. 7:7); thus knowledge of him must be derived from evidence within the book. Haldar questioned whether he was an individual and regarded the reference to "comfort" (Heb. *naḥûm* in 1:1; 3:7) as an allusion to the purpose of the book. "Nahum of Elkosh" in 1:1, however, implies that Nahum was a person who was born or who lived in a certain city (cf. Mic. 1:1, Micah of Moresheth). ELKOSH has been identified with (1) the Galilean cities of Capernaum ("the city of Nahum") and Helkesei, modern el-Qauze (Jerome); (2) el-Qôsh, a town about 50 km. (30 mi.) N of modern Mosul in Iraq; (3) Eleutheropolis (modern Beit Jibrîn) in southwestern Judah (pseudo-Epiphanius), Kessijah, a city near Beit Jibrîn (G. Nestle, *PEQ* [1879], pp. 136-38), and Umm Lagish, which is also near Beit Jibrîn (U. Cassuto, *Giornale della Società Asiatica Italiana*, 26 [1914], 291-302). The Assyrian location is unacceptable, since the book makes no allusions to the life of Israelites exiled from Samaria. A Galilean location is also unlikely unless the prophet had moved from Galilee to Judah (KD), for the northern nation of Israel was in exile at this time. Most believe that the book was written with a Judean audience in mind, since 1:15 mentions Judah and temple worship. Those who take the book to be a liturgical text (e.g., Humbert, Sellin) think that Nahum was a cultic prophet, but these conclusions are unwarranted. Nahum was neither a narrow-minded nationalist from the country nor a false prophet (J. M. P. Smith, Marti), but a man well acquainted with international affairs and possessing a clear concept of God's sovereignty over the nations.

II. Book.–A summary of the book will introduce the message of the prophet and provide a perspective for discussion of the book's date, unity, structure, and theological significance.

A. Survey of the Message. A general analysis of the prophecy indicates that the message can be divided into five paragraphs (see II.B.2 below), which present a message of comfort for Judah. The Assyrians had afflicted Judah, but now God would destroy Nineveh and restore Judah.

1. God's Powerful Wrath and Goodness (1:2-8). Although God is not quick to judge, His great power will take vengeance on His enemies (1:2-3a). When He appears in majesty, nature shrinks before His presence, for all the world is under His control (vv. 3b-6). His indignation destroys everything, but His strength protects those who trust in Him (vv. 7f.).

2. God Would Destroy Those Who Afflicted Judah (1:9–2:2 [MT 3]). Judah had suffered distress and affliction (1:12f., 15; 2:2) and might have doubted the goodness of God (1:9a), but God promised to restore its peace (v. 15; 2:2) and not to afflict it again (1:9, 12, 15). He would make a complete end of its enemies (vv. 9, 11, 15), decree that their graves be dug, and send an army to destroy them (v. 14; 2:1).

3. Fall of Nineveh (2:3-13 [MT 4–14]). Troops and chariots attacked the city (2:3f.), and the defenders raced to the wall (v. 5), but in the end the city was entered and its leadership removed (v. 6). Some mourned and others fled (2:7f.), but the enemy plundered the city and turned it into a desolate place (vv. 9f.). This paragraph ends with lion imagery and a mocking question concerning the former greatness of Nineveh (vv. 11f.); a final divine answer interprets this defeat as an act of God (v. 13).

4. Nineveh Would Be Destroyed Because of Its Sin (3:1-7).

Nineveh's sins included murder, robbery, a thirst for war, bloodshed, and deceptive policies (3:1-4). Because of these sins, God would shame Nineveh. When the nations saw it destroyed, they would laugh (vv. 5-7).

5. Nineveh's End, Like No-amon's, Was Inevitable (3:8-19). No-amon, the Egyptian capital of Thebes, had good defenses and many allies, but it was captured and the people were killed (3:8-10). In like manner, Nineveh's walls and troops would be nothing (vv. 11-13), and all efforts to withstand the enemies' siege would be useless (vv. 14-15a). Nineveh's swarming masses and its army would disappear (vv. 15b-17), its leaders would perish, and its people would run for the hills, for the city's fate was sealed (vv. 18-19a). The nations that Assyria had once humbled would rejoice at this news (3:19b).

B. Composition of the Prophecy. 1. Date. The reference to the fall of Thebes (No-amon) in 3:8 indicates that Nahum proclaimed his message after 663 B.C. Since Nineveh's defeat was yet to come, this prophecy must be dated before 612. Three possible dates within this period have been proposed. A few scholars have suggested a date after the fall of Nineveh.

a. Soon After the Fall of Thebes. Von Orelli, Maier, Christensen, and van der Woude placed the prophecy *ca.* 654-648 B.C. because 1:12f., 15; 2:1 presuppose that Judah was suffering under Assyrian rule (Judah was suppressed by Esarhaddon and Ashurbanipal from 687 to 642, during the reign of Manasseh, and by Sennacherib in 701, during the reign of Hezekiah). The reference to the fall of Thebes is more fitting if Nahum wrote soon after the event and before Egypt recovered the city (654).

b. Around the Time of Ashurbanipal's Death. Some scholars, e.g., van Hoonacker, Eybers, Keller, and Rudolph, chose a date near the death of Ashurbanipal (632-626 B.C.). Nineveh was strong (3:1) but under attack (2:3-12; 3:2f., 13) and about to be defeated. Most of these scholars preferred a date *ca.* 627 B.C., but Eybers and Rudolph suggested a slightly earlier date (632-630 B.C.) when Assyria was stronger and not yet under direct attack.

c. Just Before the Fall of Nineveh. Most scholars, including Davidson, Marti, J. M. P. Smith, Haldar, Mihelic, Horst, Taylor, van Selms, and Watts, dated Nahum *ca.* 614-612 B.C. because the fall of the city was imminent and Judah was pictured in a positive light (implying a date after the reform of Josiah in 621 B.C.).

d. Shortly After the Fall of Assyria. Humbert and Sellin interpreted Nahum as a liturgy celebrating the defeat of all Assyrian forces. H. Schulz derived most of the book from a postexilic setting.

e. Maccabean Date. Happel and Haupt believed that the foe in Nahum was actually the Greeks, not the Assyrians, and therefore dated the book *ca.* 175-165 B.C.

f. Conclusion. The Maccabean date is out of the question because of the discovery of the Nahum Pesher at Qumrân and Sir. 49:10-12 (cf. H. H. Rowley, *JBL,* 75 [1956], 188-193; Y. Yadin, *IEJ,* 21 [1971], 1-12). A date after the fall of Nineveh or very soon after the defeat of Thebes is contrary to the threatened disaster for Nineveh that lay in the near future. A date *ca.* 614-612 B.C. places the book in a period when Judah was not afflicted, for after 621 Josiah was free from Assyria, Judah was enjoying its feast (1:15), and God had already restored it (2:2). A date around the death of Ashurbanipal (628) seems preferable. Assyria still was powerful but was under tremendous pressure from the Medes and Babylonians. Assyrian domination during the reigns of Manasseh and Amon had just ended for Judah. Nahum was a message of comfort to Josiah and Judah (2 Ch. 34:3 mentions a reform in 628).

2. Unity and Structure. Since the work of Gunkel in 1893 many have questioned the authenticity of the acrostic poem in 1:2-8/10 and the contrasting promises and threats in 1:9/11–2:2. J. M. P. Smith, Taylor, and Schulz believed that the negative statements (1:11, 14; 2:1) are from Nahum but the initial poem (1:2-8/10) and the positive portions (1:12f., 15; 2:2) are from another source. Smith concluded that the poem and positive sections presuppose the fall of Nineveh, and Taylor followed Arnold in positing a third-century origin for this material. Horst, van Selms, and Childs (*Intro.*), however, believed that Nahum had found an earlier poem and adapted it to his message. Nothing in the poem requires a third-century date, and the positive sections,which picture Judah under oppression and looking forward to release, are before the fall of Nineveh. Van Selms thought that a recasting of an earlier acrostic poem might explain the imperfect acrostic form of the present text. Smith also dated 3:18f. after the fall, but this date overlooks the verses' canonical function of confirming the certainty of the prophecy (Childs, *Intro. to the OT as Scripture* [1979], p. 445).

The structure is marked by changes in the form of literature and the introduction of new themes. The initial poem magnifies the power of God (1:2-8) and is followed by a series of positive and negative statements that contrast the power of God's goodness and His wrath (1:9–2:2). The vision of the fall of Nineveh in 2:3-14 is very descriptive and ends with a mocking question (vv. 11f.) and a prose divine answer (v. 13). 3:1-7 is a woe speech. The final paragraph (vv. 8-19) contains a lengthy comparison and also ends with a mocking encouragement for the people of Nineveh (vv. 14-17) and with a divine answer that removes all hope (vv. 18f.). Allis defined many of the subtle stylistic features of Nahum.

3. Problems of Interpretation. Humbert, Sellin, and Mihelic believed that Nahum is a liturgy composed for reading at the New Year Festival to celebrate the sovereignty of God over Nineveh. Horst, von Rad (*OT Theology,* II [Eng. tr. 1965], 189), de Vries, and Watts supported a more general cultic use of Nahum. The works of Elliger and Rudolph reject this approach. Haldar also rejected this interpretation and developed Mowinckel's radical suggestion (*Jesaja-disiplene* [1926], p. 58; *Psalmenstudien* [repr. 1961], II, 57) that Nahum uses the basic themes of the Babylonian enthronement festival in the *Enuma Elish.* Judah employed this myth-ritual battle between God and His foes (the mythical sea or Assyria) for political propaganda. H. Schulz found an eschatological emphasis in the prophecy. J. Jeremias (*Kult prophetie und Gerischtsverkundigung* [1970]) approached the book from a completely different angle and concluded that the threats of destruction were originally against Judah. Rudolph made all of 1:11–2:3 an oracle of salvation for Judah; J. M. P. Smith, Taylor, and Schulz derived the positive and negative portions from sources from different time periods. None of these interpretations seems to solve the complex problems of the book adequately. The liturgical, cultic, and mythical connections remain unproven and improbable; the highly complex contrasts in 1:9–2:2 cannot be weakened or destroyed without eroding the thrust of the prophet's message.

C. Theological Significance. Judah faced two problems: oppression from Assyria and discouragement within. The prophet addressed these issues by reminding the people of God's character and promises. The initial poem (1:2-8) reaffirms God's awesome power over the earth. He is living and active, administering justice with vengeance (v. 2) as well as loving care (v. 7). This perspective establishes a foundation for the application of God's sovereignty over the nations. His universal control of history is demonstrated by His wrath toward those who plot against Him

and afflict Judah (1:9–2:2). Those who trust Him will be delivered from bondage and receive peace and restoration (1:15; 2:2). Nineveh's defeat was envisaged because God was against it (2:13; 3:5) and because of its violence, bloodshed, and deceptive political policies (3:1-4). God's promises to destroy Assyria (Isa. 10:5-27; 31:6-9) are repeated using eschatological imagery (cf. Isa. 33) to assure Judah of God's comfort. The Qumrân community saw these theological issues and took comfort because they believed that God would destroy their enemies.

Bibliography.–*Comms.:* KD; C. von Orelli (1893); A. B. Davidson (*CBSC,* 1896); G. A. Smith (*Expos.B.,* 1898); J. Happel (1902); K. G. V. SMITH

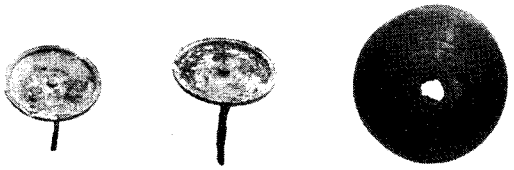
NAIDUS nā'ə-dəs [Gk. A *Naeidos,* B *Naaidos*]. Son of Addi; a layman who had married a foreign wife (1 Esd. 9:31); called Benaiah in par. Ezr. 10:30.

NAIL. (1) In biblical times carpenter's nails (Heb. *masmēr* and *maśmēr* [Eccl. 12:11]; Gk. *hēlos*) were first made out of bronze and then out of iron. The range of sizes was similar to nails used in modern times, i.e., 2.5-23 cm. (1-9 in.) in length. Ancient nails were usually hand forged, having squared tapered shanks with either squared flat or domed heads.



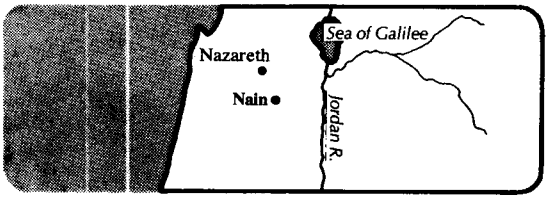
Bronze nail (Late Bronze Age, ca. 1500-1200 B.C.) from Megiddo and two iron nails (right) (late 5th cent. A.D.). All are shown about three-fourths actual size (Israel Department of Antiquities and Museums)

Bronze nail, Iron II (*ca.* 900-539 B.C.), from Tell el-Kheleifeh in the Negeb. It is about 23 cm. (9 in.) long (Israel Department of Antiquities and Museums)

Iron nails, shown about three-fourths actual size (3rd-4th cents. A.D.) (Israel Department of Antiquities and Museums)

David stored iron from which nails were forged for the construction of the doors of the temple gates (1 Ch. 22:3). In addition, Solomon used golden (headed? plated?) nails in the construction of the inner sanctuary of the temple (2 Ch. 3:9). The prophets mocked the worshipers of idols by noting that their statues had to be secured with nails in order to remain upright (Isa. 41:7; Jer. 10:4). In Ecclesiastes the sayings of the wise were compared to the permanence of firmly fixed nails (12:11).

John 20:25 indicates that the Romans nailed Jesus to the cross. This method of execution in Roman Palestine has now received archeological confirmation. The bones of a man who had been crucified were found in an ossuary that was discovered in a tomb located on the outskirts of Jerusalem. The two heel bones were pierced by an iron spike almost 18 cm. (7 in.) long. The spike still had a piece of olive wood attached to it (N. Haas, *IEJ,* 20 [1970], 38-59; *see* CROSS VI). Col. 2:14 states that God nailed (*prosēlóō*) to the cross the "bond which stood against us"; this is probably a reference to the work of Christ on the cross rather than to alleged customs such as canceling bonds by "crossing" them out or by driving nails through them (see F. F. Bruce, comm. on Colossians [*NICNT,* 1957], p. 238 n. 64).



The AV also translated Heb. *yāṯēḏ* as "nail" (e.g., Jgs. 4:21f.; 5:26). But *yāṯēḏ* usually means "peg, tent peg" (so RSV; see KoB, p. 415).

(2) Fingernails, toenails, and claws receive scant mention in Scripture. A captive woman who was going to be taken by an Israelite man for his wife had to shave her head, pare her nails (Heb. *ṣippōren*), change her clothes, and mourn the loss of her parents for a month. After this period she could become the wife of an Israelite (Dt. 21:10-13). This rite seems to mark the transfer of the woman from her pagan community to the Israelite one (see A. D. H. Mayes, *Deuteronomy* [*NCBC,* repr. 1981], p. 303).

The Aramaic word for nails (*ᵉpar*) is used in the description of Nebuchadnezzar's beastlike behavior and appear-

ance. His nails are said to have been like "birds' claws" (lit., "like birds," Dnl. 4:33 [MT 30]). Later in the book, in the vision of the four beasts, the fourth beast is depicted as having "teeth of iron" and "claws [*ṭ'par*] of bronze" (Dnl. 7:19). C. G. RASMUSSEN

NAIN nān [Gk. *Nain* < Heb. *nā'îm*–'pleasant' (so *SSW*, p. 191)]. A town mentioned in Scripture only in connection with Jesus' visit and miracle of raising the widow's son from the dead (Lk. 7:11). It is identified with the modern Arab village of Nein (about two hundred inhabitants), which lies on the northern slope of Jebel ed-Dahi. This hill, with an elevation of 515 m. (1690 ft.), may be the OT "hill of Moreh" (Jgs. 7:1). Since the Middle Ages it has been known as Little Hermon. Josephus (*BJ* iv.9.4 [509-513]) mentioned a town called Nain, but it was E of the Jordan and thus is not to be confused with the Nain of the Gospel narrative.

The town of Jesus' day may have stood higher on the hill than the present village. It probably was named for the pleasant view that the site affords across the plain of Esdraelon. To the west one can see Mt. Carmel, and to the north the hills behind Nazareth stand out, about 9½ km. (6 mi.) away. To the northeast one can look past nearby Tabor (3 km. [2 mi.] away) to snowcapped Mt. Hermon in the distance. Southward lies Mt. Gilboa.

The reference to a city gate (Lk. 7:12) has caused some discussion, since the evidence indicates that Nain was never enclosed by a wall. "Gate" probably refers to the entrance into the village between houses. H. B. Tristram (*Eastern Customs in Bible Lands* [2nd ed. 1894], pp. 100f.) thought that he had found traces of an ancient city wall, but apparently he was mistaken.

East of Nain are rock-cut tombs of an ancient cemetery, which Jesus had probably just passed when He saw the funeral procession coming out of the city. A small sanctuary N of the village is called "place of our Lord Jesus." A spring W of the town furnishes water for the olive and fig groves that help to make it a "pleasant" place.

R. EARLE

NAIOTH nā'oth [Heb. *Q nāyôṯ, nāywôṯ*–'dwellings(?)' or 'pasture lands'; Gk. B *Auath*, A *Nauiōth*]. A region, possibly a dwelling or a compound in Ramah belonging to Samuel (1 S. 19:18f., 22f.; 20:1). Something like a "school of the prophets" was located at Naioth under the leadership of Samuel (19:20). David fled there apparently for refuge, and Saul sent messengers three times to capture him. On each occasion the messengers came under the influence of the Spirit and "prophesied." Finally Saul himself went to Naioth; the Spirit of God also came upon him, and he "prophesied," which gave rise to the saying, "Is Saul also among the prophets?" (v. 24). Because of the *kethibh* (which has support of LXX A), some would emend to *nāwôṯ*, "pastures," but this hardly fits the picture as set forth in this passage (cf. P. K. McCarter, *I Samuel* [*AB* 1980], pp. 327f.). W. S. L. S.

NAKED [Heb. *'ārôm, 'êrōm, 'eryâ, ma'ᵃrōm*; Gk. *gymmós*]; AV also NAKEDNESS (RSV "naked flesh," Ex. 28:42); NEB also EXPOSED (RSV "made naked," Lev. 20:18f.), EXPOSURE, BARE, STRIPPED, PRIVATE PARTS; **NAKEDNESS** [Heb. *'erwâ, ma'ar* (Nah. 3:5), *'êrōm* (Dt. 28:48); *yāḏ* (Isa. 57:8); Gk. *gymnótēs* (Rom. 8:35; Rev. 3:18)]; AV also NAKED (Mic. 1:11); NEB also LUST, NAKED, NAKED BODY, PRIVATE PARTS, HAVE INTERCOURSE, RAVISH, BRING SHAME UPON (previous three for "uncover the nakedness"), DISHONOR (1 S. 20:30).

Occasionally "nakedness" is a euphemism for sexual organs. Thus the laws of Ex. 20:26 and 28:42 prohibit the exposure of priests' "nakedness" because it would be cultically defiling. "Uncover the nakedness" in Lev. 18 and 20 refers to incest. In these chapters the same expression also denotes the result of incest, i.e., the bringing of shame upon the aggrieved party (the NEB correctly conveys both meanings).

Shame is also generally associated with nakedness and is seen as originating in the garden of Eden (Gen. 2:25). When the man and woman became aware that they were naked, they were ashamed. The presupposition is that prior to the disobedience nakedness was natural, as it continued to be for animals.

Nakedness can also symbolize lack of possessions. It is the condition of the newborn and the dead (Job 1:21; Eccl. 5:15; cf. Ezk. 16:7, 22, where Israel is likened to an abandoned infant). It can be a synonym for "poor," as Job 22:6 clearly shows: "You strip off the garments of the naked," i.e., oppress the poor (cf. also Job 24:7; Isa. 58:7; Ezk. 18:7, 16; Mt. 25:36f.).

To be naked can refer to the condition of prisoners or victims of war (Ezk. 16:39; 23:29). Thus Isaiah was told to walk about naked in order to symbolize what would happen to the Egyptians and Ethiopians (Isa. 20:2-4). An individual may also be stripped of everything as a divine punishment (Hos. 2:3; Am. 2:16; Rev. 17:16).

In some instances nakedness was part of mourning customs. Micah stated that he would go naked in mourning over the fall of Samaria (Mic. 1:8).

According to 1 S. 19:24 Saul prophesied in a state of nakedness. This is undoubtedly a reflection of the ecstatic nature of such prophecy. Acts 19:16 illustrates the results of possession by an evil spirit.

In 2 Cor. 5:1f., Paul employed the figure of an "earthly tent" for the body. At death the believer's earthly tent will be destroyed, and he will put on a "heavenly dwelling," so that he "may not be found naked." Here to be naked is to have no place in heaven, i.e., to be damned; cf. C. K. Barrett, comm. on 2 Corinthians (*HNTC*, 1973), pp. 153-56; P. E. Hughes, comm. on 2 Corinthians (*NICNT*, 1963), pp. 169-173.

The practice of sleeping unclothed is attested in Rev. 16:15, where being awake and clothed is contrasted with being asleep and naked.

See *TDNT*, I, *s.v.* γυμνός κτλ. (Oepke).

F. B. KNUTSON

NAME [Heb. *šēm*; Aram. *šum*; Lat. *nomen*; Gk. *ónoma*]. In the Bible "name" is that title, label, designation by which a person, place, or thing can be known or marked out as distinguishable from another. More fundamentally, however, "name" is that which (1) reveals the true nature of its bearer (1 S. 25:25), so that to know the name is to know the person (Ps. 9:10 [MT 11]), or (2) designates the relationship that exists between entities, especially between God and His people (2 Ch. 7:14; Isa. 43:6f.).

I. OT
- A. Etymology
- B. Significance
- C. The Divine Name

II. NT
A. Etymology
B. Significance
C. Conclusion

1. OT.–A. Etymology. The most common OT word for "name" is Heb. *šēm*. It is a very old word. Some have related it to the root *wšm*, "sign" or "token," or to the verb *šmh*, "be high," from which are derived such ideas as "monument" (Isa. 55:13) or "memorial" (Isa. 56:5). In this connection note that "name" also translates Heb. *zēḵer* (lit. "remembrance," "memorial") in Ps. 30:4 (MT 5); 97:12; 102:12 (MT 13); Hos. 12:5 (MT 6), and that *šēm* and *zēḵer* parallel each other in Ex. 3:15; Job 18:17; Ps. 135:13; Prov. 1:7; Isa. 26:8.

B. Significance. In many places throughout the OT *šēm* serves no greater purpose than to identify some person, place, or thing, and to distinguish this one from other persons, places, or things. But it would be quite incorrect to say that in the OT a name was just an identity tag and no more. There, as in other ancient literature, the name of a person sometimes revealed his character, his personality, even his destiny. In fact, a person's name was often considered to be but an expression, indeed a revelation, of his true nature, as the many popular etymological explanations of names given to people in the OT makes clear. These explanations may be correct or fanciful, but they bear witness to the widespread belief that name and nature should correspond. For example, Esau can say of Jacob: "Is he not rightly named Jacob? For he has supplanted me these two times" (Gen. 27:36; cf. Hos. 12:2-4 [MT 3-5]). And Abigail can say of her churlish husband: "As his name is, so is he; Nabal [= "fool"] is his name, and folly is with him" (1 S. 25:25; cf. also Gen. 3:20; 11:9; 21:3, 6; 1 S. 4:21; Isa. 7:3; etc.). That "name" on occasion is synonymous with "person" (Nu. 1:2; 26:53) and that to speak or act in the name of another is to speak or act as that person (Ex. 5:23; 1 S. 17:45; 1 K. 21:8; etc.) also indicate the close association between name and essence.

But a person does not need to remain what he has been, nor is his nature forever determined by the name first given to him. This can be seen in those several OT references to a change in one's name, and with it a concomitant change in character and conduct. The new name signifies a new beginning, a new opportunity, a new position, a new person. For example, Jacob, "the crafty one, the overreacher," is renamed Israel and thus becomes the one who has "striven with God and . . . prevailed" (Gen. 32:27f.). Abram is renamed Abraham (17:5), Sarai is renamed Sarah (17:15), Joseph is renamed Zaphenath-paneah (41:45), and Jerusalem, purged of injustice, is renamed "the city of righteousness" (Isa. 1:26), or "Yahweh is there" (Ezk. 48:38; see also Isa. 62:2; 65:15; Dnl. 1:7).

Because a person's name is so closely related to what he is, *šēm* comes also to mean "fame," "renown," "reputation." For one's reputation, the name one makes for oneself, is but an extension of what that person is. The Nephilim, for example, were mighty men of old, whose deeds were told far and wide. Thus they gained the title of "the men of renown" (lit. "the men of the name," Gen. 6:4). So also the people of Shinar attempted to build a tower with its top in the heavens to make a name for themselves, to gain a reputation, and thus to establish themselves in the earth (Gen. 11:3f.; see also 1 S. 18:30; 2 S. 8:13). Hence, *šēm* by itself, without any modifiers, can mean "a *good* name" and is so translated in Prov. 22:1 and Eccl. 7:1, while senseless, disreputable people are literally people "without a name" (Job 30:8, NASB).

In one sense name and existence come extraordinarily close together in Hebrew thought. Perhaps it is going too far to say that the Hebrews believed that nothing existed unless it had a name (cf. Eccl. 6:10a). But certainly they believed that one's name lived on in one's descendants (Gen. 48:16), and that without male heirs one would be left with "neither name nor remnant upon the face of the earth" (2 S. 14:7; cf. Dt. 25:5-10). Thus, on the one hand, expressions like "to blot out their name from under heaven" mean in essence "to destroy, to put an end to, to put out of existence" (Dt. 7:24; 9:14; 20:20; Josh. 7:9; 1 S. 24:21; 2 K. 14:27; Ps. 109:13; etc.), whereas, on the other hand, God's promise to give His people "an everlasting name which shall not be cut off" (Isa. 56:5) is a promise that they will exist forever.

It is widely held that the giving of a name was an OT way of declaring one's power over the person or object named. That is to say, Adam names all the animals (Gen. 2:19f.) and thus exercises his dominion over them. He names his wife, "Eve," and thereby asserts his authority over her (Gen. 3:20). But this is a dubious interpretation of these passages. Notice that when David takes a city and establishes his right of possession over it, he does so not simply by naming it, but by giving to it *his* name (2 S. 12:28; cf. 49:11). Further, in times of national distress, when the male population has been decimated by war, seven women will take hold of one man and seek to become his possession by being called by *his* name (Isa. 4:1). And Yahweh lays claim to Israel, the temple, the ark, and Jerusalem, not by naming them but by calling out *His* name over them (2 Ch. 7:14; Jer. 7:10f.; 2 S. 6:2; Dnl. 9:18). Thus, God's bringing the beasts of the field and the birds of the air (Gen. 2:19f.) and even the woman (2:21-23; 3:20) to Adam to see what he would name them was not to establish Adam's dominion over them by the act of naming (cf. Gen. 1:26f.), but through that act to discover what impression these would make upon him and how he would regard them in relation to himself.

It becomes clear, therefore, that "to call [*qārā'*] one's name over" a people or a place is an idiom that does not mean that these will henceforth bear the name of the person whose name was "called over" them. Rather it declares that they now belong to him. They are now under his authority and protection (2 S. 12:28; Ps. 49:11 [MT 12]; Isa. 4:1). This idiom is especially significant when used to describe the relationship of Yahweh to the people of Israel. They are His peculiar possession, subject to His rule and under His protection and care (2 Ch. 7:14; Isa. 63:19; Jer. 14:9; 15:16; Dnl. 9:19).

On customs and practices involving names, *see* NAMES, PROPER.

C. The Divine Name. For the various names of God and their relation to His nature, *see* GOD, NAMES OF. Here we will discuss aspects of the divine name not treated in that article.

God, who delights to reveal Himself to His people by His name or names, on occasion withholds His name. Jacob, for instance, while wrestling with "God" asks, "What is your name?" but he receives no reply (Gen. 32:24-30). Many say that the reason for such silence springs from the conviction that to know the name of a deity was to possess the secret of his character and therefore to have access to the power which the deity possesses, i.e., to know the name of the god is to prevail over the god. Hence, God here keeps His name to Himself. Such an explanation, while taking note of a primitive and popular belief, fails to take into account the theological significance of the Jacob story — that although one must triumph over personal weakness by perseverance, it is God who is ultimately responsible for this triumph, for God Himself in fact contended with Jacob, forcing him to fight until he won spiritual blessing and became a new man with a new name (Gen. 32:30).

God sent people to speak "in his name" (Jer. 11:21; 14:14f.; etc.). This sharing of His name with others meant that the message they spoke was spoken under inspiration, with authority, by divine appointment, and thus was to be heard as the word of the Lord and responded to accordingly.

"To blaspheme the name of Yahweh" does not mean that someone uses the divine name in a thoughtless oath or expletive. Rather it means that the proud and arrogant and strong intentionally abuse the people of God, those people who bear His name (Ps. 74:10, 18; Isa. 52:5; Jas. 2:7). It means, therefore, that whenever persons revile the people of God, they revile the name of God, and thus revile God Himself (cf. Mt. 25:40).

It is also possible for the people of God themselves to blaspheme the name of God by living in a way contrary to the nature of God, whose name they bear. If the name of God is the revelation of the nature of God, and if the nature of God is characterized by compassion, grace, forgiveness, lovingkindness, truth, justice, etc. (cf. Ex. 34:6f.), and if those who carry that name live in a way opposite to that name, to the nature of God, then that name is reviled by the scandal of inconsistency (Ezk. 36:20; Rom. 2:24).

II. NT.–A. Etymology. In the NT *ónoma* has some meanings that overlap with, and other meanings that are foreign to, classical usage. The latter meanings are due, no doubt, to the influence of the OT upon the NT.

B. Significance. In the NT *ónoma* simply may be that title which distinguishes one person, place, or thing from another. For example, the Roman soldiers seized a certain man whose name was Simon to carry Jesus' crossbar (Mt. 27:32; cf. Mk. 14:32; Lk. 1:5; 3 Jn. 14).

It is also clear that as in the OT so in the NT one's name was at times considered to be a revelation of who the person was or what he would do. Hence, the angel gave strict instructions to Joseph to call Mary's son "Jesus, for he will save his people from their sins" (Mt. 1:21; "Jesus" = "Savior"); and Zechariah said emphatically that his child was not to be named after him, but, contrary to contemporary custom, his name was to be called "John" ("favored of Yahweh"; Lk. 1:63).

A change in name signals a change in character or conduct. Jesus placed a new name on Simon — the name *Petros*, "rock" (Jn. 1:42; cf. Mk. 3:17) — and with this new name came the promise of what he could and would become.

In this connection it is important to notice the references to "a new name" in the Apocalypse. Through the Spirit the risen Christ promises: "To him who overcomes I will give . . . a new name . . . which no one knows but he who receives it" (Rev. 2:17). And again: "He who overcomes . . . I will write upon him the name of my God, and the name of the city of my God, the new Jerusalem [cf. Isa. 62:2] . . . and my new name" (Rev. 3:12). In the first instance, the name which no one knows but the person to whom it is given, it is possible to hear an echo of the Jacob story. The new name is the name of the victor himself, who through perseverance wins the victory. For no one else but the overcomer can know the personal transforming power of fidelity to Christ in the struggle to be true to the faith and to the Savior. In the second instance, the "new name" is Christ's own new name — not that of the overcomer. It symbolizes the full revelation of Christ's character that awaits the second advent (cf. Rev. 19:12; see R. Mounce, *Book of Revelation* [*NICNT*, 1977], p. 121). Like the new commandment, which is really an old commandment newly understood (1 Jn. 2:7f.), so Christ's new name is in reality His former name(s) newly understood in the light of the freshness of His resurrection and return.

Ónoma is so closely identified with what a person is, i.e., name and existence are so nearly one and the same thing, that expressions such as "your names are written in heaven" (Lk. 10:20), "whose names are in the book of life" (Phil. 4:3), "whose name has not been written . . . in the book of life" (Rev. 13:8), and "I will not blot his name out of the book of life" (Rev. 3:5), crop up several times within the NT. The figure is taken from the OT (cf. Isa. 4:3; Ezk. 13:9; Dnl. 12:1), or from the secular world where a criminal's name was removed from the civic register to take from him all rights of citizenship. But now it is endued with a higher meaning. If one could argue from these statements that all names have been recorded in the book of life, thereby assuring existence for each person, and if one might also argue that for some reason, e.g., wilful disobedience to God's commands, deliberate refusal to accept Christ as Savior and Lord, etc., one's name could be removed from this divine register, "blotted out," then one might argue that that person would cease to exist, for his name would no longer exist.

"Name" and that which a person is are so close together in meaning that on occasion "name" by itself simply means "person(s)" (Acts 1:15; Rev. 3:4). Furthermore, because a person's name is so closely linked with the person himself, with what he is and does, it is not surprising to discover that "name" and "reputation" are again used synonymously (Mk. 6:14; Lk. 6:22; Phil. 2:9; Rev. 3:1). This close association of name and person is also seen in the fact that the expression "the Name" becomes a metonym for Jesus (Acts 5:40f.; 3 Jn. 7), just as "the Name" had been a metonym for Yahweh in the OT.

Statements made about God in the OT are now made about Christ in the NT (cf. He. 1:7-12). The most frequent name for God in the OT, Yahweh (LXX *Kyrios*, "Lord"), now becomes the Church's favorite name for Christ. The Church's earliest confession of faith in Christ was in all likelihood "Jesus is Lord" (cf. Rom. 10:9; Phil. 2:9-11). Hence, all that can be said about the name of Yahweh — that prophets prophesy in that name (Jer. 20:9), the righteous trust in that name (Isa. 50:10), people call upon that name (Ps. 105:1), etc. — can be and is said about the name of Jesus Christ (Acts 4:17f.; Jn. 14:1; 1 Cor. 1:2).

Jesus' disciples prophesied "in his name" (Mt. 7:22), cast out demons "in his name" (Lk. 10:17), performed miracles "in his name" (Mk. 9:39), etc. With the use of this expression it becomes evident that the disciples spoke and acted like Jesus, in His place and with His authority, as did the prophets of Yahweh in the OT (see Acts 4:7-10). Similarly, the gospel is to be preached in all the world "in his name," i.e., by His authority, and thus be made effectual to save people (Lk. 24:47), justify sinners (Acts 10:43), and forgive people their sins (1 Jn. 2:12).

The expression "to believe in the name of Jesus" is found only in the Johannine writings (Jn. 1:12; 2:23; 3:18; 1 Jn. 3:23; 5:13). Since it alternates with the phrase "to believe in him/me," i.e., Jesus (Jn. 2:11; 5:38; 6:35; etc.), it is clear that belief in the name of Jesus is not different from belief in Jesus. The former expression, however, "brings out clearly that to believe in Jesus one must believe that he bears the divine name given him by God" (Jn. 17:11f., 26; R. E. Brown, *Gospel According to John*, I [*AB*, 1966], 11; cf. Phil. 2:9-11). Thus it is that John's Gospel presents the christological interpretation of the OT statements about the name of Yahweh. That is to say, "the Fourth Gospel . . . picks up and follows through the lines of the ancient biblical tradition, that God's revelation is bound to a personal name" — here to the name of Jesus

(H. Bietenhard, *DNTT*, II, 653; cf. Mt. 11:27; 28:18 with Jn. 3:35; 5:21; 13:3; 7:29; 10:15; 17:25).

The most common baptismal formulas in the NT are "in the name of Jesus Christ" (Acts 2:38; 10:48), and "in the name of the Lord Jesus" (8:16; 19:5). The constructions used in these phrases involve the Greek prepositions *en* ("in"), *eis* ("into"), and *epi* ("upon"). From each use of these formulas, irrespective of the prepositions used, one gets the picture that the persons baptized invoke the name of Jesus as Messiah, and that the baptizer names the name of Christ over them as they are being baptized. This is made especially clear from Jas. 2:7, where the writer speaks of men who, by evil acts against the people of God, blaspheme "the honorable name which was invoked over" them. Thus, in the baptismal formula there appears a Christian formula modeled after a very similar Jewish one. Just as the name of Yahweh was named over Israel with the result that Israel became His people, His special possession (see I.B above), so the name of Jesus has replaced the name of Yahweh, with the result that the Church becomes His peculiar treasure, His very own people. And when it is said that Christians bear the name of Jesus, or that the name of Jesus is pronounced over them, this is more than a metaphor. For in baptism the name of Jesus is named over those who are baptized as a sign that they are now the possession of Jesus (M. Dibelius and H. Greeven, *James* [Eng. tr., *Hermeneia*, 1976], p. 141; W. Heitmüller, *Im Namen Jesu* [*FRLANT*, 2, 1903], pp. 88-91, 115-17).

The significance of the name of Jesus in relation to prayer deserves special notice. To pray in the name of Jesus, to ask anything in His name (Jn. 14:13; cf. v. 14; 15:16; 16:23f.; etc.), is not merely to add to one's prayers a meaningless formula, but it is to ask something from God as Christ's representatives on earth, in His mission and stead, in His spirit, and with His aim. Such a phrase, correctly understood, cannot help but govern the kind and quality of the prayers Christians pray.

C. Conclusion. The importance of a name to the biblical writers cannot be overstated. Their fondness for names and their understanding of the significance of names is everywhere observable — from their noting that God knows Moses by name (Ex. 33:17) and calls Cyrus by name (Isa. 45:3) to simply filling whole pages with names (see Gen. 5; Nu. 1–3; Mt. 1:1-17; Lk. 3:23-37; etc.). These writers thus articulate in a quiet but emphatic way what has been called "the personalism of the Bible." The Bible presents people not as a mass, nor as a fraction of a mass, or as cases to be studied, but as persons. The proper name in the Bible is the symbol of the person, and to address a person by name is to give to that person significance, meaning, dignity, and worth.

II. NT Proper Names
A. Place Names
B. Names of Persons

I. OT Proper Names.–Names provide a means of indicating specific identity, and as such are essential to efficient communication about times and circumstances involving individual people and places. Proper names are therefore found most frequently in the historical portions of the OT, less frequently in the Prophets, and least frequently in the purely poetic, wisdom, and legal portions. In general, the more any portion of the OT is concerned with specific past events, the more likely it is to contain proper names.

A. Place Names. Events described in the OT cover a wide field geographically. Place names of various sorts and of various language groups from parts of Asia, Europe, and Africa are recorded in the OT in connection with the peoples and activities chronicled.

1. Hebrew. The vast majority of place names in the OT are Hebrew/Canaanite in form. As Hebrew is a dialect of Canaanite, it is not always possible to determine whether a given geographical name has its origin with the Israelites or with their Canaanite predecessors in Palestine. Virtually no Hebrew place names are mentioned in the Bible outside of Palestine, however.

a. Pre-Israelite. This group includes the names of Palestinian sites already in existence and presumably already fixedly named by the time of the Israelite conquest (15th cent. B.C.?), as well as other sites in the OT world likely extant and named by that time. For example, Jericho, which means something like "(city of the) moon (-god)," was settled already by 7000 B.C. according to carbon-14 dating. Jerusalem, "foundation of (the god?) peace," was settled in 4000 B.C.

Several early sites bear names compounded with *beth*, meaning "place of" or "location of" (less accurately "house of"): Beth-shean/Beth-shan, "location of security" (Josh. 17:11), Beth-shemesh, "location of the sun (-god?)" (Josh. 15:10), Beth-peor, "location of the open area" (Dt. 3:29), and Beth-horon, "location of hollow ground" (Josh. 10:10).

Other major pre-Israelite sites mentioned in the OT include, in northern Canaan: Megiddo (meaning uncertain; Josh. 12:21), Hazor, "enclosed" (Josh. 11:1), Tirzah, "delight" (Josh. 12:24); Kedesh, "holy" (Josh. 20:7), and Dothan, "two feasts/decrees" (Gen. 37:17); in central and southern Canaan: Gezer, "precipice" (Josh. 10:33), Gibeon, "hill" (Josh. 9:3), Lachish (meaning uncertain; Josh. 10:3), and Beer-sheba, "southern well"/"well of the oath" (Gen. 21:14). Where their meaning is clear these names indicate that a variety of name types was already in evidence prior

to the Israelite conquest, and that the Israelites did not invent *de novo* most of the naming techniques they used.

b. Derived from Flora and Fauna. A substantial number of sites were named after plants and animals, in a fashion analogous to the modern practice (Appleton, Moose Lake, Palm Springs, etc.). Names derived from plants include Tamar, "palm" (Ezk. 47:19); Baal-tamar, "lord of the palm" (Jgs. 20:33); Luz, "almond (tree)" (Gen. 28:19); Shittim, "acacia (trees)" (Nu. 25:1); Tappuah, "apple tree" (Josh. 12:17); and En-tappuah, "apple tree spring" (Josh. 17:7).

Several dozen place names derive primarily from animals, in many cases probably because the animals they were named after frequented the local area. Included in this group are the pass of the Akrabbim, "scorpions" (Nu. 34:4); Arad, "wild ass" (Josh. 12:14); Aijalon, "hart" (1 S. 14:31); Laish, "lion" (Jgs. 18:7); Humtah, "lizard" (Josh. 15:54); Zorah, "wasp" (Jgs. 13:2); as well as names deriving from domesticated animals: Eglon "young bull" (Josh. 10:3); En-gedi, "kid spring" (Josh. 15:62); En-eglaim, "pair of young bulls spring" (Ezk. 47:10); Hazar-susah, "horse enclosure/village" (Josh. 19:5); Parah, "cow" (Josh. 18:23); Telaim, "lambs" (1 S. 15:4).

c. Derived from Geographical Characteristics. Just as modern place names are often based upon local physical characteristics (Butte, Portsmouth, Hot Springs, Twin Forks, etc.) ancient sites were frequently so named. The brine of its waters led to the naming of the "Salt Sea" (Gen. 14:3), the modern Dead Sea. The rough resemblance of the Sea of Galilee to a harp produced its ancient name, Chinnereth, "harp" (Nu. 34:11). The Sidonians saw in Mt. Hermon the likeness of a soldier's torso armor, and thus they originally called the mountain Sirion, "breastplate" (Dt. 3:9). Carmel, "garden land" (1 K. 18:27); Lebanon, "white" (Dt. 1:7); Bashan, "fruitful" (Nu. 21:33); and Argob, "mound(s)" (Dt. 3:4), all represent regions named after local geographical features.

Many cities were likewise named, including Adam, "soil" (Josh 3:16); Abel, "meadow" (2 S. 20:14); Beer, "well" (Nu. 21:16); Beeroth, "wells" (Dt. 10:6); Beth-emek, "location of the valley" (Josh. 19:27); Bezer, "fortification" (Dt. 4:43); Bethlehem, "location of bread" (Gen. 35:19); Gath, "wine press" (1 S. 5:8); Gibeah, "hill" (Jgs. 19:12); Jabesh, "dry place" (1 S. 11:1); Rabbah, "big" (Dt. 3:11); Ramah, "height" (1 S. 1:19); Ramoth, "heights" (1 S. 30:27); Ziz, "shining" (2 Ch. 20:16); and Zoar, "small" (Gen. 13:10).

d. Miscellaneous. Several other criteria apparently played a role in the naming of regions and towns. Historical events sometimes resulted in the naming or renaming of a place. Examples of the results of this practice include: the valley of Achor, "trouble," in connection with the sin of Achan/Achar (Josh. 7:26); Peniel, "God's face," named by Jacob after his wrestling with an angel (Gen. 32:30); Beer-lahai-roi, "well of the Living One who sees me," named by Hagar on the occasion of her encounter with God's angel in the wilderness (Gen. 16:14); Witness, the altar area named to remind Reubenites and Gadites of their covenant obligations (Josh. 22:34); Bochim, "weepers," a town named for the response of the Israelites to God's hard warning (Jgs. 2:5); Ramath-lehi, "jawbone height" (Jgs. 15:17) and En-hakkore, "the caller's spring" (Jgs. 15:19), both named by Samson in connection with God's aid in his exploits; and Perez-uzzah, "Uzzah's breaking," named by David after God punished Uzzah for defiling the ark in transport (1 Ch. 13:11).

Religion also played a prominent role in the process of naming places. Many sites bear titles which reflect the religious practices associated with them, or the god or goddess worshiped at a prominent sanctuary. The Canaanites worshiped especially the god Baal ("lord") and the goddess Asherah ("blessed woman"), as well as Asherah's syncretistic alter-egos Anat and Ashtoret/Ashtaroth. Asherah, being Baal's consort, was also known as Baalat ("lady"). These deities figure in the names of towns which continued in Israel after the Conquest. Among such sites are: Baal-hamon, "Baal of the multitude" (Cant. 8:11); Baal-hermon, "Baal of Mt. Hermon" (Jgs. 3:3); Baal-meon, "Baal of the dwelling" (Nu. 32:38), also called Beth-baal-meon, "location of Baal of the dwelling" (Josh. 13:17) and shortened to Beth-meon in Jer. 48:23; Baal-tamar, "Baal of the palm" (Jgs. 20:33); Baal-zephon, "Baal of the north" (Ex. 14:2); Baalah, "lady" (Josh. 15:9); Baalath-beer, "lady of the well" (Josh. 19:8); Ashteroth (simply the name of the goddess, 1 Ch. 6:71); Ashteroth-karnaim, "Ashteroth of the two horns" (Gen. 14:5); and Anathoth, "the Anats [another Canaanite goddess]" (Josh. 21:18).

The Israelites also assigned names to places on the basis of religious associations, or took nonoffensive names over from their predecessors. Such names include: Yahweh-shalom (RSV "The Lord is peace"), an altar area at Ophrah built by Gideon and used by the Israelites thereafter (Jgs. 6:24); Yahweh-nissi (RSV "The Lord is my banner"), an altar erected by Moses (Ex. 17:15); Yahweh-yireh (RSV "The Lord will provide"), a part of Jerusalem named by Abraham (Gen. 21:14); El-bethel, "God of Bethel," named by Jacob as the place God appeared to him (Gen. 35:7); El-tolad, "God is begetter" (Josh. 15:30); and Elon-beth-hanan, "oak of the place of grace" (1 K. 4:9). It should be noted that the Israelites founded relatively few new cities after the Conquest, but tended rather to occupy cities already named by their previous Canaanite inhabitants. Moreover, orthodox Israelite worship was limited to a single sanctuary (Dt. 12:5ff.) while Baal-Asherah worship was dispersed among countless small "high places" (Dt. 12:2; cf. 1 K. 14:23f.). As a result, many more Israelite towns bore "Baal" names than "Yahweh" names.

Many sites were named on the basis of a wish or attitude about a location, sometimes in connection with its beauty or pleasant environs. The names of such places were presumably intended simply to inspire the heart or to bring positive associations to mind (cf. modern Philadelphia, Concord, Buena Vista, Mount Pleasant, etc.). Among such names are Salem, "peace" (Gen. 14:18); Tirzah, "delight" (Josh. 12:24); Timnah, "allotment" (Josh. 15:10); Joppa, "beauty" (2 Ch. 2:16); and Janoah, "rest" (2 K. 15:29).

A few names represent associations with important personages as in "Gibeah of Saul" (1 S. 15:34), a convenience in distinguishing it from other Gibeahs once Saul's fame was manifest; Samaria, "Shemer's place" (1 K. 16:24), named after its original owner; or the City of David (1 Ch. 11:7).

2. Non-Hebrew. Of the many non-Hebrew/Canaanite language families extant in OT times, the Egyptian, Akkadian, and Aramaic language groups had the greatest representation among OT names. Such non-Hebrew names appear, as expected, most frequently where events connected with the nations where these languages were spoken are described.

The meanings of several of the Egyptian place names found in the OT are understood: "Egypt" translates Heb. *miṣrayim*, meaning "the two red mud lands," i.e., Upper and Lower Egypt, the traditional divisions of the two-part united nation. The meaning of No (Jer. 46:25), the Hebrew rendering of the Egyptian name for Thebes, is simply "the city" (Egyp. *niw*). Noph (Isa. 19:13) is Hebrew for

the Egyptian name of Memphis, *mn-nfr*, "fire platform," which is a shortened form of the name of the temenos of the pyramid of the pharaoh Pepi. Rameses (Nu. 33:3; cf. Raamses in Ex. 1:11) was presumably named after the great pharaoh Rameses II. Tahpanhes (Jer. 2:16) probably means "mansion of the Nubian." The meaning of Egyptian names such as Zoan (Isa. 19:11) or the Palestinian city of Sharuhen (Josh. 19:6) is not clear.

A significant number of Babylonian-Assyrian names are found in the OT, including some which incorporate Sumerian elements, such as Ir-nahash, "snake city" (1 Ch. 4:12), and Shinar (Gen. 10:10), probably lower Mesopotamia, a transliteration of Sum. *Kengir*. Babylon, Heb. *bāḇēl*, represents the Akk. *bāb-ili*, "gate of the gods." Assyria is named for its chief god, Ashur.

Aramaic place names in the OT whose meanings are understood include: Berothai, "cypresses" (2 S. 8:8); Tibhath, "slaughtering place" (1 Ch. 18:8); Hamath, "fortress/citadel" (2 S. 8:9f.); Betah, "trust" (2 S. 8:8); Riblah, "bare place" (2 K. 23:23); Kadesh, "holy" (Ps. 29:8); and Hazar-enon, "enclosure of the two fountains" (Ezk. 48:1).

B. Names of Persons. Personal names in the OT are of special interest for what they tell of the religious and philosophical views of the ancient Israelites. The naming of persons in OT times obviously went beyond a concern for a convenient means of providing individual designation. Naming intended to capture in some way the essence of an individual, expressing actual identity rather than merely identification (*see* NAME).

1. Hebrew. The vast majority of personal names in the OT as well as many in the NT are of Hebrew origin. Because of a concern for genealogical data in several OT books (e.g., 1 Chronicles) as well as a tendency to provide listings of names such as important forebears (Gen. 10), kings (Josh. 12), or famous soldiers (2 S. 23:8ff.), the OT contains more personal names, even proportionally, than the NT. The great majority of the Hebrew names have discernible meanings, and the range of meanings is quite large. From the hundreds available for study, groupings and classifications are possible that help provide an understanding of the naming process itself.

a. The Practice and Significance of Naming. During the OT era, children were usually named at the time of their birth, rather than before. In other words, no tentative selection of names was normally undertaken prior to a child's birth, and virtually none prior to conception. Because so much importance was attached to a name, people in the ancient Near East had a strong desire to associate a child properly with its name, and vice versa, so that the name would accurately and valuably reflect the individual's character or even destiny. Events or remarks which occurred during the time the mother was in labor were apparently considered especially auspicious for the naming process. Though this can be inferred from the OT evidence, it is explicit in some Mesopotamian texts. The Sumerian mother goddess, variously called Ninḫursag, Nintur, and Aruru, among other titles, plays the role of the divine midwife in several myths. She says of herself, "I am the good midwife of the gods. I say only that which is wise at the time of birth." Jacobsen (*Treasures*, p. 108) comments: "at the moment of birth . . . an incautious word may saddle the child with any manner of unpropitious fate. Therefore Aruru is [called] the 'Lady of Silence'. . . ."

The Israelites, likewise, took very seriously anything which was said or which happened in connection with a child's birth, and often based a name thereupon. It was not necessary for the name actually to have a meaning directly related to the event or saying in question; all that was required was some sort of connection. Frequently, a name already well known as a part of the general stock of names in the culture was chosen by the parent(s) simply because it sounded roughly like something significant which surrounded the birth event. An example using a modern name illustrates this process of nonhomologous homophone naming: Suppose that during a birth process, word was received that workers had completed digging a new well in the village. If a male child were born, the mother (or father; see below) might name the child Doug. That etymologically "Doug" has nothing to do with digging would be considered unimportant. The important consideration would be that the child's birth coincided with something that suggested the name Doug, and the mother or father would take this as an indication of what the child's name should be. In some developing nations in our own day, names such as Hospital, Doctor, Nurse, Ambulance, and even Needle are represented among the names of children because birth-event naming is still practiced. This practice, then, requires three things especially: a sufficiently high view of the significance of a name that parents seek special, circumstantial guidance in the naming process; a reluctance to choose children's names prior to their birth; a willingness to select from a stock of possible names, or sometimes to create new names, according to various kinds of suggestion, the most prominent being homophony.

In the OT the principle of homophony naming without regard for technical etymology is overtly evidenced most often in Genesis. For example, the name Cain (Gen. 4:1) sounds like but is not apparently etymologically derived from the Hebrew for "bring forth" (*qānâ*), a word Eve used at the time of Cain's birth. Jacob, a name attested more than once in pre-Israelite texts, was selected by his parents for the boy who was born grasping his twin's heel since the consonants for "heel" (*ʿqb*) appear in the Hebrew form of Jacob (*yaʿᵃqōḇ*). Reuben, which actually means "Behold the/a son," sounds something like "he has seen my misery," and it therefore was a fitting name for Leah's firstborn in the light of one of her birth-event remarks (Gen. 29:32). Issachar sounds like the Hebrew word for "reward" (*śāḵār*). Because Leah used the term at his birth, the name Issachar was then suggested to her (Gen. 30:18).

Many names given on the basis of homophony are indeed connected etymologically to something in the vocabulary quoted as used at the time of birth. In Genesis, names like Peleg, "division" (10:25); Seth, "provide" (4:25); Esau, "hairy" (25:25); Edom, "reddish" (25:30); Judah, "praise" (29:35); Dan, "judge" (30:6); Naphtali, "my struggle" (30:8); Zebulun, "honor" (30:20); Joseph, "add" (30:24); and Simeon, "hear" (29:33) are, etymologically, technically correct. But this is probably not due to a concern for linguistic precision on the part of the parents who gave the name. Rather, a large stock of names and name patterns was readily available to these parents as a result of their normal social interconnections in a society where naming was taken so seriously. Thus it was virtually guaranteed that many names would happen to coincide etymologically with birth-event vocabulary.

Additionally, however, it must be admitted that since the vast majority of OT names are positive names — giving children ugly or unpleasant names was certainly avoided except in special circumstances — people must have done their best to speak wisely and precisely during a woman's labor and delivery, just as Ninḫursag (see above) claimed. It is possible that parents and other relatives had names in mind when they chose their words during the birth event, and thus helped predispose the choices. Some choices of names may even have been foregone conclusions (other than names revealed prior to birth; see below). But there was apparently a careful avoidance of any discussion of

names prior to the birth. So if the parent(s) or relatives did have a name in mind prior to a child's birth, and one can hardly imagine their not thinking at least idly about the matter, they nevertheless did not say anything to predispose the naming until after the birth. Then, and only then, were names actually given by the parents.

God, however, was free to assign a name prior even to conception. In some instances where a child would grow into a position specially ordained for him or her in relation to God's plan for Israel, a name was revealed well in advance; partly, perhaps, to preempt any tendency on the part of the parents to follow the usual practice of letting events or statements influence their decision. Because a name could relate to a person's character or even destiny, a divinely appointed name could function as a sort of promise of the role he or she would play upon reaching maturity.

Examples of such proleptically divinely revealed names are few, however. Isaac, "he laughs," is a name relating not simply to the fact that Abraham (Gen. 17:17) and Sarah (18:12-15) laughed at the thought they could have a child, but probably also indicating that Isaac would represent the delightful, joyful, originally unpredictable fulfillment of God's promise (21:6f.). Ishmael, "God listened/listens," was a name divinely revealed to Hagar in reference to her plight (16:11). The name probably indicated not only that God had "heard of" Hagar's cruel treatment at the hand of Sarah, but that Ishmael was destined to represent God's response of faithfulness to Arabs, of whom Ishmael was the ancestor. The name Samuel, "name of God(?)," may have been divinely revealed to Hannah, depending on how one interprets 1 S. 1:23, "may the Lord establish his word." Divinely revealed names were also mediated through the prophets (see I.B.1.i below).

It was the parents' prerogative to name. Even a divinely ordained name still had to be given *after* the birth by the parents (Gen. 21:3; 16:5; 1 S. 1:20; cf. Lk. 1:60-63; Mt. 1:25). Either parent could give the name, though more often the mothers are reported as naming their children than the fathers, in those few instances where any mention is made of who gave a name. In one recorded instance, the parents disagreed on a name: Rachel, dying in childbirth, named her last son Ben-oni, "son of my trouble." She undoubtedly felt it to be her right and duty to assign the name. But after her death, Jacob named the child Benjamin, "son of the right hand," a more positive name, and one still probably reflecting the birth-event circumstances (the child would be a support to his father now that his mother was dead). Jacob's intervention in this way was apparently unusual, but nevertheless reasonable, and it may well have been the case that when a mother died in childbirth a renaming was in order. The modern practice of renaming upon adoption may be analogous to this practice.

In later periods patronymy (naming a male child after his father; cf. Lk. 1:59-61) and papponymy (naming a male child after his grandfather) were not uncommon. The practice came into vogue during the Persian period, and may account for the popular identification of Darius with Cyrus (if this is the intent) in Dnl. 6:28 (MT 29).

b. Morphology and Semantics. Semitic names reflected a variety of structures, virtually all of which are represented in the OT. The three basic categories are: single-element names, phrase names, and sentence names. The single-element and phrase names may in many instances have represented shortened forms of sentence names, but this cannot be proved generally to be the case. Virtually any multisyllable name could be abbreviated; an abbreviated form of a name attested in a longer form is called a hypocoristicon.

Single-element names were often common nouns, such as Barak, "lightning" (Jgs. 4:6); Achsah, "anklet" (Josh. 15:16); Deborah, "honey bee" (Jgs. 4:4); or abstract nouns such as Uzzah, "strength" (2 S. 6:3); Hannah, "grace" (1 S. 1:2); Manoah, "rest" (Jgs. 13:2); Shimeah, "fame" (2 S. 13:3); Judith, "(female) Judean" (Gen. 26:34). Single-element names may be participial in form, such as Saul, "asked" (1 S. 9:2); Menahem, "comforting (one)" (2 K. 15:14); Shammua, "heard" (Nu. 13:4); or adjectival in form, such as Ikkesh, "tricky" (2 S. 23:26); Maharai, "quick" (2 S. 23:28); Shallum, "recompensed" (2 K. 15:10).

A single-element name cannot, however, technically be composed of a perfect or imperfect verb form, since such verb forms in Hebrew always contain a morphological element indicating subject, and thus are two-element sentences in themselves. Moreover, such single "verb" names were probably thought of as shortened forms of longer sentence names (e.g., Ahaz from Jehoahaz or Ahaziah, both meaning "Yahweh has taken"). Examples of such single verb names are Shillem, "he has paid back" (Gen. 46:24), and Zarah, "he has sprouted" (Gen. 38:30).

Phrase names are occasionally prepositional, as in Besodeiah, "in Yahweh's council" (Neh. 3:6), but most often are based on the Hebrew construct (possessive) pattern, as in: Penuel, "God's face" (1 Ch. 4:4); Jedidiah, "Yahweh's beloved" (Neh. 11:10); Obadiah, "Yahweh's servant" (1 K. 18:3).

Sentence names follow virtually any of the normal Hebrew patterns for simple sentences, tending especially to compound a divine element with a finite verb. Sentence names with the implicit verb "be" are common: Abijah, "Yahweh is (my) father" (2 Ch. 13:1); Tobiah, "Yahweh is (my) good" (2 Ch. 17:8); Elimelech, "My God is King" (Ruth 1:2). Participial forms also appear in such names, e.g., Obed-edom, "Edom is serving" (2 S. 6:10). Perfect verb forms very commonly occur, some with the divine subject element prefixed: Jonathan, "Yahweh has given" (1 S. 13:2); Jehoshaphat, "Yahweh has given justice" (1 K. 15:24); Eleazar, "God has helped" (Ex. 6:23); Elkanah, "God has created" (1 S. 1:1); and some with the divine element affixed: Benaiah, "Yahweh has built" (2 S. 8:18); Shephatiah, "Yahweh has given justice" (2 S. 3:4); Asahel, "God has made" (2 S. 2:18).

The divine element may precede imperfect verb forms, as in Eliahba, "God conceals/has concealed" (2 S. 23:32; on the problem of translating imperfects as past/present/future in tense, see below). Or it may follow them, as in Ishmael, "God hears/has heard/will hear" (Gen. 16:11); Jezreel, "God sows/has sown/will sow" (1 Ch. 4:3).

In construct phrase names, especially if the first element is a segholate noun or ends in a consonantal cluster, an *i* is commonly found conjoining the two elements (as in Melchizedek or Amminadab). This *i* must be considered anaptyptic, and not the 1st common singular possessive suffix. Thus Melchizedek means "king of righteousness" and not "my king is righteousness." Names from the Amarna period such as Abdi-ḥepa make this apparent, since "my servant is Ḥepa" is nonsensical, Ḥepa being a deity. "Servant of Ḥepa," however, makes perfect sense for the name, the *i* being anaptyctic and probably representing a neutral sound similar to shewa (cf. W. von Soden, *Grundriss der Akkadischen Grammatik* [repr. 1969], pp. 82-86).

A number of hypocoristic elements are found at the end of short or shortened names, the most common of these being *î* and *ay*. These correspond to *y* and *ie* in English, as in Joey and Eddie. The *on* ending may express endearment, but more likely indicates "the one who" or the like, as in Abdon, "the one who serves" (Jgs. 12:13).

It is impossible to be certain of the precise meaning of names that contain imperfect verb forms. Early Canaan-

ite contained *yaqtul preterite* forms, and the association of the imperfect with past action is preserved in the so-called converted imperfect forms of Hebrew, and the past *durative* sense of the imperfect is well attested. Thus to the usual present/future semantic value of the imperfect we must add the past tense value as well. Names such as Jehoiakim (2 K. 23:34) may therefore have meant any or all of the following: "Yahweh has established"; "Yahweh establishes"; "Yahweh will establish." As in Hebrew poetry, no article need be present for nominal sentence elements to be definite: e.g., Adoni-bezek, "the Lord of the lightning" (Jgs. 1:5).

c. The Divine Element. The religious character of the OT era is reflected in the frequency of names which mention God or a god. The most common divine element is Yahweh, which has four hypocoristica: *yāhû* (from *yahw*) and *yâ*, both of which are terminal elements; and *yᵉhô* and *yô* (both from *yahw* by slightly different phonetic processes), which occur as initial elements. Yahweh, in some form, appears in over 10 percent of Israelite names.

'El, "God," is slightly less common as a divine element in names. It occurs both initially and terminally. Baal, "lord," was the name of the Canaanite deity of fertility and the elements. Because the majority of Israelites were so frequently heterodox, false religion found its way, predictably enough, into names. For example, Saul, evidently not always a thoroughgoing Yahwist, named one of his sons Ishbaal, "man of Baal" (1 Ch. 8:33), and Jonathan similarly named his son Mephibaal, "from the mouth of Baal." The Baal element in such names was later changed to *bosheth*, "shame," by pious copyists (Ish-bosheth, 2 S. 2:8; Mephi-bosheth, 2 S. 4:4) in the MS of Samuel-Kings. Baal names are attested with frequency extrabiblically in the eighth-century Samaria ostraca (*ANET*, p. 321), though there, as well as in eighth-century OT names, they are outnumbered by names compounded with Yahweh.

Other divine elements include Shaddai (lit. "the mountain one"), usually translated "Almighty," as in Zuri-shaddai, "the Almighty is my rock" (Nu. 1:6); *melek*, "king," as in Abimelech, "my father is (the) king" (Jgs. 8:31); *'adon*, "lord," as in Adoniram, "my Lord is high" (1 K. 4:6). Some scholars have considered other terms, such as *ṣûr*, "rock," and *ṭôḇ*, "good," to be divine elements, but the evidence is inconclusive.

d. Derived from Flora and Fauna. Plants and animals figure occasionally in OT personal names. Examples of plant-derived names include Elon, "large tree/oak" (Gen. 26:34); Hadassah, "myrtle" (Est. 2:7); Rimmon, "pomegranate" (2 S. 4:2). Animal-derived names include Caleb, "dog" (Nu. 13:6); Aiah, "vulture" (2 S. 3:7); Eglah, "heifer" (2 S. 3:5); Jonah, "dove" (Jonah 1:1); Hamor, "ass" (Gen. 34:4); Nahash, "snake" (2 S. 17:25); Rachel, "ewe" (Gen. 29:6); Zibiah, "gazelle" (1 Ch. 8:9); Zimri, "mountain sheep" (1 K. 16:9). The widespread use of plant and animal names in the ancient Near East would seem to militate against the once popular notion that some sort of totemistic religious impulse was behind such names.

e. Derived from Geographical Characteristics. In a few instances words denoting natural objects or regions were employed in personal names, as with Gibea, "hill" (1 Ch. 2:49); Gilead, "rocky" (Nu. 26:29); Peninnah, "coral" (1 S. 1:2); and Seir, "wooded" (Gen. 36:30).

f. Derived from Circumstances. Situations or conditions prevailing at the time of a child's birth, or which came to mind at that time, undoubtedly influenced the giving of personal names in many instances. Solomon, "peaceable" (2 S. 12:25); Baruch, "blessed" (Jer. 32:12); Kareah, "bald" (Jer. 40:8); and Japhia, "gleaming" (2 S. 5:15), fit this category.

g. Volitive Names. Some names express a wish or a hope, either generally, i.e., unfocused, or specifically on behalf of a child. Examples are: Jeberechiah, "may Yahweh bless" (Isa. 8:2); Iphedeiah, "may Yahweh redeem" (1 Ch. 8:25); Ishmaiah, "may Yahweh hear" (1 Ch. 27:19); Ephraim, "double fruitfulness" (Gen. 41:52); Manasseh, "causing to forget" (Gen. 41:51); Adonijah, "Yahweh be my lord" (2 S. 3:4).

h. Kinship Names. A number of personal names employ terms for relatives (father, brother, kinsman). At least two factors may have been operative in the assignment of such names. In some instances, the kinship terms appear to have been used in reference to God. Additionally, children were sometimes valued symbolically as replacements for beloved relatives now dead. Some names of this type are: Abialbon, "father of strength" (2 S. 23:31); Abiasaph, "my father has gathered" (Ex. 6:24); Abiathar, "father of overabundance" (1 S. 22:20); Abidan, "my father judges" (Nu. 1:11); Ahikam, "my brother has arisen" (2 K. 22:12); Ahilud, "a brother is born" (2 S. 8:16); Ahimelech, "my brother is king" (1 S. 21:1); Ahitub, "good brother" (1 S. 14:3); Ammiel, "my kinsman is God" (Nu. 13:12); Ammishaddai, "my kinsman is the Almighty" (Nu. 1:12).

i. Prophetic Names. In a number of instances, names were given with a conscious prophetic significance attached to them. For example, at God's behest Isaiah named his son Maher-shalal-hashbaz, "hurry prey, hasten plunder" (Isa. 8:1-4), as a sign of the coming Assyrian conquest of Syria and northern Israel (733 B.C.). He had named his first son Shear-jashub, "a remnant will return" (Isa. 7:3), suggesting only a partial escape from the coming destruction (cf. Dt. 4:27-30). The messianic names Immanuel, "God with us" (Isa. 7:14), and "Wonderful Counselor [lit. "miracle counselor"], Mighty God, Everlasting Father, Prince of Peace" (9:6) also convey predictions of coming events. Hosea was instructed by God to name his three children Jezreel, "God sows," the site of a massacre (Hos. 1:4), Lo-ruhamah, "not shown compassion" (1:6), and Lo-ammi, "not my people" (1:9), to symbolize Israel's coming loss of both kingship and covenant protections. Jeremiah renamed Pashhur the priest Magor-missabib, "terror all around," as a prediction of coming miseries (Jer. 20:3-6). Through Ezekiel God gave Samaria the symbolic name Oholah, "dwelling place," and Jerusalem the symbolic name Oholibah, "my dwelling place is in it," as part of an allegory of judgment (Ezk. 23).

j. Significance of Name Changes. Since names were considered to represent something of the essence of a person, a major change in circumstances could lead to a renaming of or by an individual. The change of name signified a new status or relationship. Abram, "lofty father," was renamed by God Abraham, "multitudinous father" (Gen. 17:5), in the light of his election to the headship of a nation. Jacob became Israel, "let God prevail" (Gen. 32:28), in the light of his success with men and God. Sarai became Sarah (both names meaning approximately "princess") when her role as ancestress of a nation was announced (Gen. 17:15). It is the mere fact of a change, rather than what a name was changed to, that is important here. Naomi, "sweet," suggested that her name be reversed to Marah, "bitter," when circumstances had become hard for her (Ruth 1:20). In Hos. 1:9 God even symbolically changes His own name from *'ehyeh*, "I am" (as revealed in Ex. 3:14) to *lō'-'ehyeh-lᵉḵā*, "I am not your I am," as an indication of the temporary withdrawal of His protection and blessing from Israel.

k. Name Styles in Various Eras. Where an office was inherited, as in the case of the kingship and the priesthood, there was a tendency for personal names to be reused frequently through successive generations. Moreover, after the time of the Judean exile, names were probably not

based very often on birth-event statements, judging especially from the relative popularity of patronymy and papponymy (see I.B.1.a above), these being incompatible with the earlier emphasis on the relationship between name and essence or destiny. Some variation in popularity over the centuries of Israel's history is also observable among different name types (single-element *v.* multiple-element names; names with perfect verb forms *v.* names with imperfect verb forms) though the patterns of variation are complex. One constant during OT times was that feminine names only rarely contained divine elements, probably because the role of women in the religion of Israel was less prominent than that of men.

2. Non-Hebrew. At any stage of Israel's history, some Hebrew individuals bore foreign names. This fact reminds us that in many instances, intercultural influences must have played as important a role in the naming process as did purely religious influences. Foreign names tend to be found according to the eras in which Israelites had substantial contact with foreign groups. For example, in the Exodus and post-Exodus generations, several Egyptian names are attested, such as Moses, which sounds something like "pulled out" in Hebrew (Ex. 2:10), Phinehas (Ex. 6:25), and Hophni (1 S. 1:3). In the Neo-Babylonian period, during and after the Judean exile, Babylonian names were common. Shadrach, Meshach, and Abednego were simply the new Babylonian names of Hananiah, Mishael, and Azariah (Dnl. 1:6f.). Mordecai is Babylonian for "the one of (the god) Marduk" (Est. 2:5). Sheshbazzar, "(the moon-god) Sin guard the father" (Ezr. 1:8), and Zerubbabel, "prince of Babylon" (Ezr. 3:2), are also Babylonian names. Esther is a Persian name, meaning probably "star" or the like. Of course, persons identified in the OT as non-Israelites normally bore non-Israelite names.

II. NT Proper Names.–Many of the observations made about OT names apply to NT names as well. Indeed, the names of many persons and places mentioned in the NT text have Hebrew origins. A large number are of Greek or Latin origin, however.

A. Place Names. For the most part, Hebrew place names (especially of Palestinian places) continued from OT times to NT times, though their transliteration into Greek from Hebrew/Canaanite in some instances resulted in slight sound changes. In other instances a Greek term replaced the Hebrew. For example, Chinnereth, the OT Hebrew name for the Sea of Galilee, was replaced by Tiberias, named after the emperor Tiberias (Jn. 6:1). Crete, a Greek name, replaced Caphtor, a Semitic name. Syria was the Greek equivalent of Hebrew Aram; Babylon of Hebrew Babel. Where Greek or Roman influence established a site, that site tended to be known by its Greek name: e.g., Caesarea (Acts 8:40), Caesarea Philippi (Mt. 16:13), or the Decapolis, "the ten cities" (Mk. 5:20).

A very wide range of place names reflects Greek and Roman influence, since most of the places mentioned in the NT had been under the control of Greek-speaking regimes since their conquest by Alexander the Great, *ca.* 333 B.C. This influence is reflected historically, for example, in the fact that Alexandria (Acts 6:9) was named after Alexander, just as Ptolemais (Acts 21:7) was named after Ptolemy, one of Alexander's successors. Likewise, Philip II named Philippi (Acts 16:12) after himself. Greek mythology is reflected in some names, e.g., Areopagus, "hill of Ares" (Acts 17:19), and Euroclydon, "east wind-northeast wind" (Acts 27:14). Physical characteristics or circumstances influenced the naming of such sites as Trachonitis, "stony district" (Lk. 3:1), Puteoli, "sulfurous" (Acts 28:13), and Neapolis, "new city" (Acts 16:11). A name like Philadelphia, "brotherly love" (Rev. 1:11), is essentially volitive in character.

B. Names of Persons. In general, the practices and reasons for naming places and people in NT times were analogous to those in OT times, with the important exception that homophonic naming appears to have largely been abandoned. Personal names were given more on the basis of family tradition (Lk. 1:59) and desirability to the ear, and less on the basis of semantic value, much as in modern Western practice. The official naming of males awaited the circumcision ceremony in the case of orthodox Jews (Lk. 2:21).

Many NT personal names are Greek versions of Hebrew or Aramaic names, the meanings of which reflect the range of possibilities known from OT names. Examples include: Ananias, "Yahweh has shown mercy" (Acts 5:1); Barnabas, "son of consolation" (Acts 4:36); Martha, "lady" (Jn. 11:1); Jason, "Yahweh saves" (Acts 17:5); Barachias, "blessed of Yahweh" (Mt. 23:35); Lazarus, "God has helped" (Lk. 16:19); Zaccheus, "pure" (Lk. 19:2); Zebedee, "Yahweh has granted" (Mt. 4:21).

Other personal names reflect native Greek vocabulary, as in Aretas, "pleasing" (2 Cor. 11:32); Onesimus, "useful" (Philem. 10); Paul, "little" (Acts 13:9); Timothy, "one who honors God" (1 Thess. 3:2); Archelaus, "people's chief" (Mt. 2:22); Eunice, "good victory" (2 Tim. 1:5); Trophimus, "nutritious" (Acts 20:4f.); Aristarchus, "best ruler" (Acts 19:29); Eutychus, "lucky" (Acts 20:9); Tryphaena, "dainty," and Tryphosa, "delicate," who were probably sisters (Rom. 16:12). Aristobulus, "best counselor" (Rom. 16:10); and Philetus, "beloved" (2 Tim. 2:17).

The rapid spread of the gospel through various ethnic groups can be seen in the variety of names borne by believers mentioned in the NT. A list of Christians in a single church reveals a typically variegated mix of Jewish and pagan names of many types, both masculine and feminine (Rom. 16:3-16).

D. STUART

NANEA na-nē'ə [Gk. *Nanaia*] (2 Macc. 1:13, 15); NEB NANAEA. A Syrian goddess who was also one of the early Sumerian deities, Inanna, the goddess of love, later identified with Ishtar. The Phoenicians identified her with Ashtoreth (Astarte), the Persians with Anahita, the Greeks with Aphrodite, and the Romans with Venus. Her cult was centered in Uruk for centuries, until the end of the Assyrian empire (*APOT*, I, 87).

According to 2 Macc. 1:13-17 Antiochus IV Epiphanes was killed in the temple of Nanea in Persia while attempting to seize its treasure. Under pretext of marrying the goddess and obtaining the treasure as a dowry, the king and a few of his men had entered the sacred precinct. The priests closed the temple door to prevent them from escaping and opened a secret door in the ceiling through which they threw stones, killing and dismembering the entire royal party. As a further indignity the heads were thrown to the people outside.

1 Maccabees 6:1-17, however, connects the death of

Antiochus IV with his attempt to plunder a temple in Elymais in Persia. This temple was described to the king as being exceedingly rich, containing among its treasures the golden shields, breastplates, and other weapons left there by Alexander the Great. The people of the city learned of Antiochus's plan to plunder the temple and defeated his army in battle. This defeat and the simultaneous report of a defeat of his army in the land of Judah caused the king to take to his bed in discouragement and hastened his death.

The account of Antiochus's death in 1 Maccabees is considered the more reliable of the two. The temple that he was prevented from looting, however, may actually have been the temple of Nanea mentioned in 2 Maccabees. Possibly the reference to the temple at Elymais is taken from the story of the death of Antiochus III, who was killed while robbing a temple of Belus in the hills near Elymais (Strabo *Geog.* xvi.1.18). H. E. FAGAL

NAOMI nā-ō'mē, nə-ō'mē, nā-ō'mī [Heb. *noʿomî*-'Sweetie' or the like, possibly a fem. form of the name Naaman; the *î* of the name is more likely a hypocoristic ending than the 1st common sing. possessive suffix]. The mother-in-law of RUTH and one of the three leading figures in the book of Ruth. Naomi makes several significant decisions in the story, and shows in each case a deep faith in God, even in the midst of bitter bereavement ("call me Mara" [i.e., "bitter" — a play on the meaning of her name; cf. RSV mg.], 1:21).

During the time of the Judges, specifically in the late 12th cent. B.C., Naomi, her husband Elimelech, and their two sons left Bethlehem in Judah during a famine to seek a better living in Moab. There the sons married. Later Elimelech and both sons died, leaving Naomi widowed and bereaved. She decided to return to Bethlehem and urged her daughters-in-law to stay in Moab and remarry. Orpah agreed, but Ruth insisted on accompanying Naomi to Bethlehem in spite of the dangers and financial strictures two single women faced in that era. Ruth's promise to Naomi, "Your God [will be] my God" (1:16), is a commitment to conversion, influenced undoubtedly by Naomi's faithfulness to Yahweh in spite of many trials.

In Bethlehem Ruth was befriended by a close relative of Naomi's, Boaz, whose responsible, consistent actions Naomi predicted in advising Ruth (ch. 2). As Naomi suggested, Boaz was willing to act as next of kin (ch. 3) and married her, thereby preserving the inheritance rights of Elimelech's succession (*see* KIN I.C; MARRIAGE IV.A.2). Obed, born to Ruth and Boaz, was considered virtually a compensatory son to Naomi. His grandson was David, king of Israel (ch. 4). D. STUART

NAPHATH nā'fəth [Heb. *nāpeṭ*] (Josh. 17:11); AV COUNTRIES; NEB "the district (of Dor)." This term (perhaps meaning "heights") appears to refer to DOR, the third city mentioned in this verse. The designation is apparently used to distinguish it from En-dor. Cf. NAPHATH-DOR in Josh. 11:2; 12:23; 1 K. 4:11. G. WYPER

NAPHATH-DOR nā'fəth dôr [Heb. *nāpaṭ dôr* (Josh. 2:23), *nāpaṭ dō'r* (1 K. 4:11)]; AV "coast of Dor," "region of Dor"; NEB "district of Dor." A region in the vicinity of, or identical to, the city of DOR.

NAPHISH nā'fish [Heb. *nāpîš*] (Gen. 25:15; 1 Ch. 1:31; 5:19); AV, NEB, also NEPHISH; **NEPHISIM** nə-fī'sim [Heb. *K nᵉpîsîm, Q nᵉpûsîm*; Gk. Apoc. *Naphisi*] (Ezr. 2:50; 1 Esd. 5:31); AV, NEB, NEPHUSIM, Apoc. NAPHISI; **NEPHUSHESIM** nə-fōō'shə-sim [Heb. *K nᵉpûšᵉsîm, Q nᵉpîšᵉsîm*] (Neh. 7:52); AV, NEB, NEPHISHESIM. The eleventh son of Ishmael (Gen. 25:15; 1 Ch. 1:31), and the chief (Heb. *nᵉśî'*; RSV "prince") of the Arabian tribe that descended from him (Gen. 25:16). The tribe was defeated by the Transjordan Israelite tribes, and their surviving men were taken captive (1 Ch. 5:19; cf. v. 21). Some of them apparently became temple slaves (*see* NETHINIM); they are listed among the families that returned from the Exile (Ezr. 2:50; Neh. 7:52; 1 Esd. 5:31).

NAPHISI naf'ə-sī (AV, NEB, 1 Esd. 5:31). *See* NAPHISH.

NAPHOTH-DOR nā'fəth dôr [Heb. *nāpôṭ dôr*] (Josh. 11:2); AV "borders of Dor"; NEB "district of Dor." A region in the vicinity of, or identical to, the city of DOR.

NAPHTALI naf'tə-lī [Heb. *naptālî*-'wrestling'; Gk. *Nephthali, Nephthalim*]; AV Apoc. NEPHTHALI; NT NEPHTHALIM. The fifth son of Jacob — the second born to him by Rachel's handmaid Bilhah — and the tribe named for him. He was a full brother of Dan (Gen. 30:6-8). At his birth Rachel is said to have exclaimed, *naptûlê ʾᵉlōhîm niptaltî*, "Mighty wrestlings have I wrestled." Her sister's fruitfulness had been a sore trial to the barren Rachel. Since the offspring of her maid ranked as her own, by artifice her reproach of childlessness was removed. The name Naphtali given to this son was a monument of her victory. She had won the favor and blessing of God as made manifest in the way yearned for by the oriental heart, i.e., the birth of sons.

Scripture has no personal details about the patriarch Naphtali, and the traditions say little about him. According to Tg. Pseudo-Jonathan he was a swift runner and was one of the five brothers that Joseph chose to represent the family of Jacob in the presence of Pharaoh. He is said to have been 130 years old at his death (T. Naph. 1:1). When Jacob and his family moved to Egypt, Naphtali had four sons (Gen. 46:24). In Egypt he died and was buried (cf. Ex. 1:1-6; T. Naph. 9:1-3).

I. The Tribe.—When the first census was taken in the wilderness, the tribe numbered 53,400 fighting men (Nu. 1:43; 2:30), but at the second census the number had shrunk to 45,400 (26:48-50). The position of Naphtali in the desert was N of the tabernacle with the standard of the camp of Dan, along with the tribe of Asher (2:25-29); when the host was on the march, this camp came in the rear (v. 31). The prince of the tribe at Sinai was Ahira son of Enan (2:29). The tribe was represented among the spies by Nahbi son of Vophsi (13:14). Prince Pedahel son of Ammihud was chosen from Naphtali to assist in the division of the land (34:28). Toward the end of David's reign the ruler of the tribe was Jeremoth son of Azriel (1 Ch. 27:19). Hiram the Tyrian artificer is described as "the son of a widow of the tribe of Naphtali" (1 K. 7:14; 2 Ch. 2:14, however, calls him "the son of a woman of the daughters of Dan"). Jgs. 5:15 does not definitely associate Barak with the tribe of Issachar; since he resided at Kedesh (Jgs. 4:6), he possibly belonged to the tribe of Naphtali.

II. The Territory.—In the allocation of the land the lot of Naphtali was the next to last to be drawn (Josh. 19:32-39). In the description of the territory of Naphtali the borders and the list of towns are given separately. Although the list of towns is comparatively complete, the description of the border is shortened and depends on that of the Asher and Zebulun tribes. It is difficult to reconstruct the original lists from which the description of the territory was made. According to Alt, the compilers used a system of shortening with regard to the territory of the tribes in Galilee to avoid repeating names of towns mentioned previously both in the list of towns and in that of the borders. Noth, on the other hand, believed that the original consisted of a list

of the borders that was worked upon by an editor whose knowledge of the geography of the north was insufficient.

Joshua 19:33f. describes the border, and vv. 35-38 lists the fortified towns. Most scholars agree with Aharoni (*LBHG*, rev., p. 259) that the first passage gives the southern part of Naphtali. In his view v. 33 describes the line from Mt. Tabor to the Jordan, which line runs along the brook of Jabneel; all the places in v. 33 should be in the vicinity. The most likely identification is that Adami-nekeb is Khirbet Dâmiyeh, where traces of Canaanite and Israelite settlements have been found. The city's original name was apparently Adamim, as found in the list of Thutmose III (no. 36) and in Papyrus Anastasi I. The name Nekeb probably refers to the Wâdī el-Malâq, through which the caravans used to travel. Nekeb is connected with the quarrying in that area. Other probable identifications (based on Saarisalo's archeological survey) are: Jabneel with Tell en-Nâ'am; Heleph and Aznoth-tabor with two sites of the Israelite period; Khirbet Arbâtah and Khirbet Um Jubeil; and Lakkum with Khirbet el-Manṣûrah. For Za-anannim no satisfactory identification has yet been suggested.

The continuation of the southern and western border of Naphtali is not given; the Bible refers only to the border of Zebulun and Asher. In any case, Khirbet Jumjuma may be the border town separating Asher, Naphtali, and Zebulun. During a survey carried out by Aharoni sherds of the Israelite period were found there. The river Jordan is mentioned as the eastern border of Naphtali, but no northern border is given. Aharoni believed that the first seven names in the list of towns in Naphtali are arranged in geographical order from south to north. The territory of the tribe of Naphtali lay between the area of Mt. Tabor in the south and the river Litani in the north; in the east it reached the river Jordan and thus covered almost the whole of Galilee.

III. History of the Tribe.–The tribe never lacked ready and able warriors; its history afforded ample opportunity for the development of their skills. In the struggle with Sisera, Naphtali was found on the high places of the field (Jgs. 5:18). To David's forces at Hebron Naphtali contributed "a thousand commanders with whom were thirty-seven thousand men armed with shield and spear" (1 Ch. 12:34). Their position exposed them to the first brunt of attack by enemies from the north. They had an important part in the wars of the kings (1 K. 15:20; 2 K. 12:18; 13:22) and were the first living W of the Jordan to be carried away captive (2 K. 15:29).

Jesus spent a great part of His public life in the land of Naphtali. Gennesaret, Bethsaida, Capernaum, and Chorazin all lay within its boundaries (cf. Mt. 3:15).

A. A. SAARISALO

NAPHTALI, MOUNT [Heb. *har naptālî*] (Josh. 20:7, AV); RSV, NEB, "hill country of Naphtali." This was the most northerly of the three parts into which the western range of Palestine was divided, the other two being "Mt." Judah and "Mt." Ephraim, named after the tribe that mainly occupied them. D. PECOTA

NAPHTHA naf'thə [Gk. *náphtha*] (Song Three 23; 2 Macc. 1:36); AV ROSIN, NEPHI. In Song Three 23 the term refers to an inflammable material, rock oil. 2 Macc. 1:36, however, interprets it as "purification." *See* NEPHTHAR.

NAPHTHAR (2 Macc. 1:36, AV). *See* NEPHTHAR.

NAPHTUHIM naf'tə-him [Heb. *naptuḥîm*]. One of a series of peoples of which Egypt was the "father" (Gen. 10:13; 1 Ch. 1:11). The identification and location of this people is not certain, but they are usually associated with the delta region of Egypt. Spiegelberg suggested that the Hebrew name reflects the Egyp. *na-patoḥ*, "the people of the delta," while Erman emended the MT and suggested a relationship with *p-t-maḥi*, "the northland" = Lower Egypt. Kitchen has suggested the possibility of a relationship with Egyp. *n'(-n-)/n'(yw-) p'iḍw*, "they of the Delta" (lit. marshland) or with *n'(-n-)/n'(yw-)p' t' wḥ'(t)* = "they of the oasis land" = oases west of the Nile(?). The location of the Naphtuhim in the delta would fit well with the identifications of the Lehabim as Lybians and the Pathrusim with the inhabitants of Upper Egypt.

Bibliography.–A. Erman, *ZAW*, X (1890), 118f.; W. Spiegelberg, *Orientalistische Literaturzeitung*, IX (1906), 276-79; K. Kitchen, *NBD*, *s.v.*

C. G. RASMUSSEN

NAPKIN [Gk. *soudárion*] (Lk. 19:20; Jn. 20:7); NEB also HANDKERCHIEF. The Greek term is a loanword from Lat. *sudarium*, a cloth used to wipe off perspiration (cf. Lat. *sudāre*, "to perspire"), similar to a handkerchief or small towel. Storing money in a napkin, as the unfaithful servant in Jesus' parable did (Lk. 19:20), was viewed by rabbinic writers as an unsafe practice (cf. SB, I, 970f.; II, 252). The *soudárion* is also mentioned as an item in the burial garb of Lazarus (Jn. 11:44; RSV "cloth") and of Jesus (20:7). It was probably tied under the chin to keep the jaw in place (see comms.). In Acts 19:12 the same term refers to Paul's "handerkerchiefs" (AV, RSV, NEB), which were used in miraculous healings. N. J. O.

NARCISSUS när-sis'əs [Gk. *Narkissos*] (Rom. 16:11). Among others, in Rom. 16 Paul greeted "those in the Lord who belong to the family of Narcissus." Although Narcissus was a common name among slaves and freedmen in the Roman empire, it occurs only here in the Bible. This Narcissus may have been a Christian absent from Rome at the time Romans was written (cf. Ambrosiaster in *PL*, XVII, cols. 179f.), a pagan (since only the Christians of his household are addressed), or a deceased Christian (since he is not addressed). If deceased he could have been the famous freedman Tiberius Claudius Narcissus. (If Rom. 16:1-23 was originally part of Romans, this identification is likely.) This Narcissus, a freedman of the Emperor Tiberius and a person of proverbial wealth, exercised virtually unlimited influence under the Emperor Claudius. After Agrippina poisoned Claudius in A.D. 54, and shortly after Nero's consecration as emperor, she forced Narcissus to commit suicide (only a few years before Romans was written). In accordance with tradition, his household slaves would have become Nero's, but they would have retained the name of their former master and thus been called *Narcissiani*. So Paul may have been referring to a group of Christians among the *Narcissiani* then living in the imperial household (cf. Phil. 4:22).

NARD [Heb. *nērd, nᵉrāḏîm*; Gk. *nárdos, nárdoi*] (Cant. 1:12; 4:13f.; Mk. 14:3; Jn. 12:3); AV SPIKENARD; NEB also SPIKENARD. Spikenard (*Nardostachys jatamansi* Wall.), was native to northern India and was a favorite perfume in antiquity. The prefix "spike-" refers to the shape of the plant from which the oily perfume was obtained. The best spikenard was imported from India in sealed alabaster boxes, which were opened only on very

special occasions. Pliny (*Nat. hist.* xii.24-26 [41-46]) commented on the expensive nature of Indian nard.

The NT adjective *pistikē* (RSV "pure," Mk. 14:3; Jn. 12:3) may mean "genuine, pure" or may be derived from *piçta*, the Sanskrit term for spikenard. See Bauer, rev., p. 662; B. Lindars, *Gospel of John* (*New Century Bible Comm.*; repr. 1981), p. 416. R. K. H.

NASBAS nas'bəs (Tob. 11:18, AV). *See* NADAB **5**.

NASITH nā'səth (AV, NEB, 1 Esd. 5:32). *See* NEZIAH.

NASOR nā'sôr (1 Macc. 11:67, AV). *See* HAZOR **1**.

NATHAN nā'thən [Heb. *nāṯan*–'gift'; Gk. *Nathan*].

1. The prophet in the period of David and Solomon who figures prominently in three narratives: God's promise to David of the continuation of his dynasty (2 S. 7); the announcement of God's punishment of David for his theft of Bathsheba (2 S. 12); Solomon's succession to the throne (1 K. 1).

In the first narrative Nathan simply appears in David's company, with nothing told of his background. To David's query about building a temple Nathan responds that David should do as he wishes, since Yahweh is with him (2 S. 7:3). That night, however, Nathan receives "the word of Yahweh" to the effect that David should not build a temple (vv. 4-8). The message continues with the divine promise of the continuance of a Davidic dynasty (vv. 9-16). Nathan fulfils the command (v. 5) to relay the message to David (v. 17).

Nathan next appears before David in 2 S. 12. Chapter 11 has reported the success of David's plan to have Uriah the Hittite killed, his subsequent marriage to Bathsheba, and the birth of their son. Nathan appears at Yahweh's command (12:1) and tells David the story of a rich man who took a poor man's only lamb (vv. 1-5). The story has the desired effect: David condemns himself. In vv. 7-13 Nathan pronounces Yahweh's judgment upon David for his actions: his wives will be given to another, and the child born of the sinful union will die. (The heading for Ps. 51 presupposes this story.) In v. 25 Nathan figures in the etiological narrative explaining Solomon's other name, Jedidiah ("beloved of the Lord") — although Nathan's role here is unclear.

In 1 Kings 1 Nathan is pivotal in the events that result in Solomon's obtaining the throne. He is among those supporting Solomon, so when Adonijah attempts to gain the throne during David's final illness Nathan alerts Bathsheba (vv. 11f.), who brings it to David's attention. Nathan himself then appears before David (vv. 22f.) and is commanded (with Zadok the priest) to anoint Solomon (v. 34). This is done, ensuring Solomon's succession.

The Chronicler twice mentions "the words" (RSV "Chronicles," "history") of Nathan the prophet, which contain stories of David (1 Ch. 29:29) and Solomon (2 Ch. 9:29). At least part of these "words" are probably represented in 2 S. 12 and 1 K. 1. The Chronicler omitted traditions that were antithetical to his theology, but he did refer to them. Thus in 2 Ch. 9, though he did not relate the selection of Jeroboam as king in the North, his mention of the "prophecy of Ahijah the Shilonite" is an obvious reference to 1 K. 11:26ff. According to 2 Ch. 29:25 the role of the Levites in the temple as musicians came from Yahweh, through David, Gad, and Nathan. Nathan is mentioned in Zec. 12:12 as the head of a "house" (family) in Jerusalem in David's time.

Bibliography.–H. W. Hertzberg, *I & II Samuel* (Eng. tr., *OTL*, 1964), pp. 283-88, 312-15; J. Gray, *I & II Kings* (*OTL*, rev. ed. 1970), pp. 78-97.

2. A son of David, born in Jerusalem (2 S. 5:14; 1 Ch. 3:5; 14:4).

3. Nathan of Zobah, the father of Igal, one of David's warriors (2 S. 23:36). This may be the same man mentioned in the Chronicler's list of David's warriors. There Igal is missing, but listed in his place is Joel the brother of Nathan (1 Ch. 11:38).

4. The son of Attai and the father of Zabad, in the genealogy of Judah (1 Ch. 2:36). According to this genealogy both this Nathan and David are descended from Hezron. There are nine generations from Hezron to David, and eleven from Hezron to Nathan.

5. The name occurs twice in 1 K. 4:5: "Azariah the son of Nathan was over the officers [Solomon's]; Zabud the son of Nathan was priest and king's friend." This Zabud may be identical to Zabad, a son of Nathan (**4**). If so, then perhaps 1 K. 4:5 refers to two different Nathans. On the other hand, there is textual evidence against equating Zabud with Zabad, for thirteen MSS have Zakur in 1 K. 4:5; cf. Zachour for Zabouth in some LXX MSS of 1 K. 4:5; also 2:46h.

6. One of a group that returned to Jerusalem with Ezra (Ezr. 8:16; 1 Esd. 8:44), who may be identical with one of the sons of Binnui who agreed to divorce his wife (Ezr. 10:39; 1 Esd. 9:34). F. B. KNUTSON

NATHANAEL nə-than'ē-əl [Gk. *Nathanaēl* < Heb. *nᵉṯan'ēl* –'God has given'].

1. (AV, NEB, 1 Esd. 1:9). *See* NETHANEL **7**.

2. Son of Pashhur; a priest who had married a foreign wife and was required to divorce her (1 Esd. 9:22; cf. NETHANEL [**8**] in Ezr. 10:22).

3. An ancestor of Judith (Jth. 8:1).

4. An Israelite from Cana of Galilee whose name is found in the Gospel of John. Although John does not explicitly say so, Nathanael appears to have been one of the apostles. At the beginning of Jesus' ministry he becomes a disciple in the same context as Andrew, Peter, and Philip (Jn. 1:45-49). He is mentioned also as being with Peter, Thomas the Twin, the sons of Zebedee, and two other disciples when Jesus appears to this group (21:2); thus Nathanael is a witness to the Resurrection.

Nathanael is not mentioned in the Synoptic lists of the Twelve. But since all the other disciples associated with Nathanael in Jn. 1 and 21:2 became apostles, many have attempted throughout church history to identify Nathanael with one of the apostles listed in the Synoptics. Because Matthew means "gift of Yahweh," some have identified him with Nathanael. Since the 9th cent., however, the most popular theory equates Nathanael with the Synoptic Bartholomew. The evidence for this view is as follows: (1) There is no Johannine mention of Bartholomew; (2) Bartholomew is coupled with Philip in the apostolic lists in all three Synoptic Gospels (Mk. 3:18 par. Mt. 10:3; Lk. 6:14) — the only place that Bartholomew appears in the Synoptics; (3) Bartholomew is listed immediately after Thomas (and Philip) in Acts 1:13 (cf. Jn. 21:2); (4) Bartholomew is a patronymic meaning "son of Tolmai," and the person so called would undoubtedly have another name. Thus, if Nathanael is to be identified with one of the Twelve, it should probably be Bartholomew. But this identification is certainly not necessary, and it may be best to see Nathanael as a disciple of Jesus standing outside the twelve apostles. This view finds patristic support (e.g., Chrysostom, Augustine). In the final analysis the question must be left open.

Some have even held that Nathanael is to be under-

stood allegorically as a representative of the ideal disciple; but there is no evidence that Nathanael was a purely symbolic figure who did not actually exist.

Nathanael's encounter with Jesus in Jn. 1:45-51 is very interesting. Jesus commented that Nathanael was "a true Israelite in whom there is no guile." Jesus was apparently affirming that Nathanael was a model Jew — an Israelite of integrity and openness to the working of God. Jesus demonstrated supernatural knowledge (cf. 2:24f.; 5:42) by referring to an experience Nathanael had had under a fig tree. Many have speculated about what Nathanael experienced under the fig tree, but the contemporary reader cannot determine this with any certainty. What is known, however, is that Jesus' knowledge of this event caused Nathanael to voice an amazing confession of faith: "Rabbi, you are the Son of God! You are the King of Israel!" (a confession very much in line with John's high Christology, especially in the opening sections of his Gospel). In a Gospel that puts great emphasis on believing (cf. 1:7, 12; 20:31), Nathanael has the distinction of being the first person who is said "to believe" (1:50; this statement may be either indicative or interrogative). Finally, Jesus promised Nathanael a marvelous vision of the Son of man (v. 51; cf. Gen. 28:12; see comms., esp. R. E. Brown, I [*AB*, 1966], 88-91). Nathanael stands as an example of how a true Israelite responds to Jesus.

V. R. GORDON

NATHANIAS nath-ə-nī'əs (AV, NEB, 1 Esd. 9:34). *See* NETHANIAH 5.

NATHAN-MELECH nā'thən mel'ək [Heb. *nᵉṯan-meleḵ*– 'the king has given']. A court official who had a room in the temple during the reign of King Josiah of Judah (2 K. 23:11). He is called a *sārîs*, usually translated "eunuch" (cf. NEB; AV, RSV, "chamberlain"), but most likely the term occurs here in its general sense to designate a high political or military officer (see R. de Vaux, *Ancient Israel* [Eng. tr. 1961], I, 121; *see also* EUNUCH II.B.1).

NATIONS. Ancient perceptions of nationality were diverse and often quite different from modern notions, in which political considerations predominate.

I. OT
- A. Terminology
- B. Factors in Ancient Perceptions of Nationhood
- C. The Nation Israel
- D. Foreign Nations

II. NT
- A. Terminology
- B. NT Perspectives

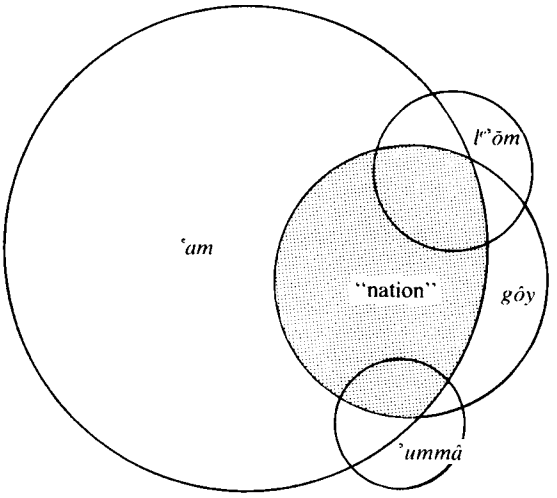
I. OT.–A. Terminology. The Hebrews used four expressions to denote "nation," each contributing its distinctive nuance.

The RSV usually renders the singular *'am* as "people," the plural as "nations." Heb. *'am* is the most frequent term for "nation," and it has cognates in all Semitic languages. The semantic evolution of the expression may be reconstructed as follows: (a) In proto-Semitic *'m* appears to have been a kinship term (along with *'āḇ*, "father," and *'āḥ*, "brother"; cf. the Hebrew personal names 'Abinadab, 'Ahinadab, and 'Amminadab; also expressions like "cut off from one's people [*'am*]," and "gathered to one's people [*'am*]"); it signified "paternal uncle." (b) It became a collective term for all male relatives. (c) It encompassed all male members of the clan, tribe, or settlement. (d) It was applied to all citizens or members of the community. (e) It denoted the entire nation, including women and children. The entire range of usage is found in the OT. *See* PEOPLE. Heb. *'am* was a warm and personal relational term (reflected in the frequent application of pronominal suffixes ("my, his, your people," etc.). Not only did the term imply internal blood relationship, but it was used also when a nation was stated to belong to its deity (e.g., "people of Yahweh," "people of Chemosh"), ruler, or private citizen.

The RSV renders *gôy* as "nations," except in Ps. 79:1 ("heathen"). The AV sometimes translates *gôy* as "gentiles," more often as "heathen," but usually as "nation." *Gôy* seems to have been a uniquely West Semitic term, being attested only in Hebrew, although a cognate has surfaced in the Mari Texts, *gā'um/gāwum*, "group, gang (of workmen)" (*CAD*, V, 59), or perhaps "tribe, *Volk*" (cf. W. von Soden, *Akkadisches Handwörterbuch*, I [1959], 284; R. de Vaux, *Early History of Israel* [Eng. tr. 1978], p. 239; P. Fronzaroli, *Archivio glottologico Italiano*, 45 [1960], 47-49). This gentilic sense may be hinted at in the table of nations, Gen. 10. Usually, however, the term bears distinct political overtones, being commonly paired with *meleḵ/mamlᵉḵâ*, "king/kingdom." *Gôy* is applied to a variety of entities, including the pre-Israelite Canaanite tribes (Dt. 7:1), bedouin-type desert tribes (Isa. 60:5ff.), city-states (2 K. 19:13), nation-states (Israel), and large imperial states (Egypt, Babylon, Jer. 25:17ff.). This was a rather cold and objective term, not given to much variation in form. Only in exceptional cases were pronominal suffixes applied (Gen. 10:5, 20, 31, 32; Ezk. 36:13-15; Zeph. 2:9; Ps. 106:5).

The Heb. *lᵉ'ōm* is an archaic term, not used in everyday speech. The word occurs thirty-five times, always in poetry. Two-thirds of these uses are in Isaiah and Psalms. *Lᵉ'ōm* rarely appears without a correlative (always *'am* or *gôy* or a term paired elsewhere with these words). Morphologically the expression seems to have fossilized into a standardized plural form, the singular appearing only in Gen. 25:23; Isa. 51:4; Prov. 11:26; 14:28. Only in Isa. 51:4 does it have a suffix. The usage betrays few signs of vitality and creativity characteristic of ordinary speech. Its formality is reminiscent of *gôy*, but the singular form in the Proverbs texts requires the translation "population," a sense closer to *'am*. The only Northwest Semitic cognate is Ugar. *limm*, "peoples"; cf. *li-'-mu*, "family, clan," a shadowy concept in Akkadian lexical texts (cf. A. D. Kilmer, *JAOS*, 83 [1963], 427ff.; *CAD*, IX, *s.v.* "*līmu* C").

The Heb. *'ummâ* has the sense "nation" only in Ps. 117:1 (where it parallels *gôyim*; cf. "clan," Gen. 25:16; Nu. 25:15). The Aramaic cognate appears in Dnl. 3:4, 7, etc., in association with *'am* and *lāšôn*, "tongue," and in Ezr. 4:10. A probable derivation from **'mm*, "mother," suggests that the gentilic usage implies descent from a common mother; cf. A. Malamat, *Ugarit-Forschungen*, 11 (1979), 528ff. It is cognate to Ugar. *umt* and Akk. *ummatu*.



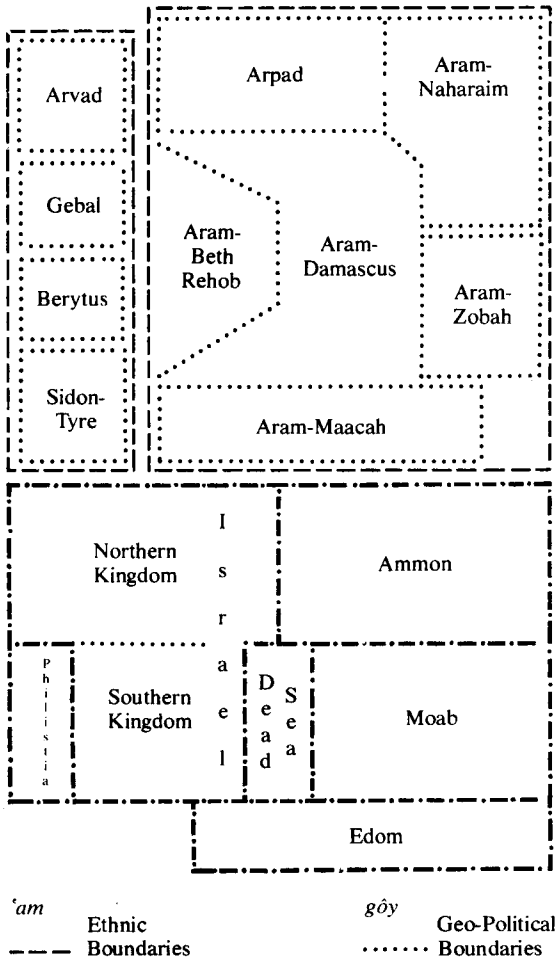
Although each of these words bore its own distinctive nuances (contra G. Bertram, *TDNT*, II, 364ff., the distinctions are inherent in the words; they do not develop only in the course of history), the ease with which they could be synonymously paralleled and interchanged indicates a common semantic range which may be illustrated as in Diagram 1.

B. Factors in Ancient Perceptions of Nationhood. In the development of national self-consciousness the ancient Semites viewed several factors to be operative.

1. Ethnicity. The importance of this factor varied. In northern Syria (encompassing the Phoenicians and Arameans) this element appears to have been superseded by others. In the "national states" farther south (cf. G. Buccellati, pp. 13f., for the distinction between "national" and "territorial" states) it was crucial. The He-

NATIONS

DIAGRAM 1
THE SEMANTIC RELATIONSHIPS AMONG THE OT DESIGNATIONS FOR "NATION"



brews' keen sense of descent from a common ancestor is demonstrated by (a) the use of the eponym Israel as the national name; (b) the designation of the nation as "sons of Israel," "house of Israel/Jacob," and "seed of Israel"; (c) their national and tribal genealogies; (d) preserved traditions of the patriarchal ancestors. This does not mean that such nations were ethnically or racially pure. Extraneous elements were introduced through intermarriage (cf. Gen. 34:15f., "We will give our daughters to you, and we will take your daughters to ourselves, and we will dwell with you and become one people ['am]"; also Ruth 1:16, "Your 'am shall be my 'am"), foreigners' identification with Israel in its worship of Yahweh (Ex. 12:48), the incorporation of native Canaanites (cf. the Gibeonites, Josh. 9), dynastic marriages, which brought with them large retinues of attendants from the princess' native land (cf. Jezebel, 1 K. 16:31), and the engagement of foreigners in royal service (cf. David's staff, 2 S. 15:18ff.; 1 Ch. 27:30f.). Caleb ben Jephunneh, the Kenizzite of Edomite descent, represents the clearest example of total integration (cf. Nu. 13:6; 14; 26:65; Josh. 14:8). However, the core of the population was perceived to be ethnically united. The Hebrews viewed the Edomites, Ammonites, and Moabites similarly (cf. Gen. 19:37f.; 36:1ff.). Whether these nations perceived themselves this way cannot at present be determined.

2. Territory. The geographical limits of nation-states tended to be coterminous with the area inhabited by the ethnic group. This contrasts sharply with the northern territorial states where a single ethnic group ('am) could be divided into a series of states (*gôyim*), each with its own capital city (from which the state usually received its name) and reigning monarch. The difference may be illustrated as in Diagram 2. The boundaries of the territorial states fluctuated, depending upon the ability of the king to control his region or incorporate more land. The territory played a critical role in national development. It was more than a place of residence; it provided the context in which fulness of life (Dt. 4:40; etc.), prosperity (cf. expressions like "a land flowing with milk and honey," Ex. 3:8, 17; Dt. 8:7-10; 11:9-12; 2 K. 18:31f.; also Azitawadda's comment, *ANET*, p. 654, "May this city possess plenty to eat and wine [to drink]! May they have many children, may they be strong numerically . . . by virtue of Ba'l and the Gods [*El*]"), and security (note the emphasis on the land as a resting place [$m^enūḥâ$, Dt. 12:9], and the people living securely [$l^eḇeṭaḥ$, Lev. 25:18; etc.]) could be found. For this reason the promise of land to Abraham represented a natural corollary to the promise that his descendants would become a great nation (*gôy gāḏôl*). Cf. C. Westermann, *Promises to the Fathers* (Eng. tr. 1980), pp. 143-49. This perception of the role of territory in national self-consciousness underlies the ancient practice of deporting entire populations from conquered lands. Cf. B. Obed, *Mass Deportations in the Neo-Assyrian Empire* (1979).

3. Theology. Among the Semites, people as groups commonly identified themselves with a patron deity in a special way. Thus the Ammonites were known as "the people of Malkam" (Jer. 49:1), the Moabites as "the people of Chemosh" ('*am k^emôš*, Nu. 21:29; Jer. 48:46), and the Israelites as "the people of Yahweh" ('*am yhwh*; cf. N. Lohfink, "Beobachtungen zur Geschichte des Ausdrucks 'm Yhwh," in H. W. Wolff, ed., *Probleme biblischer Theologie* [*Festschrift* G. von Rad, 1971], pp. 275-

DIAGRAM 2
THE RELATIONSHIP BETWEEN ETHNIC AND GEO-POLITICAL BOUNDARIES IN ANCIENT SYRIA

305). The Phoenicians and Arameans, like the Mesopotamians, perceived a people to be related to a specific god by virtue of residence in that god's land. The Hebrews by contrast, viewed their association with Yahweh as primary; the land of Canaan represented His grant to them. Indeed, Yahweh was acknowledged as the source of territorial claims of the other nations as well (Dt. 32:8; cf. 2:5, Edom; 2:9, Moab; 2:19, Ammon). The divine patron's function was to maintain the welfare of the people by making them prosper and defending them against foreign aggression. The people, for their part, were charged with maintaining the cult of the god and abiding by his moral expectations. Failure to comply would result in the departure of the deity (cf. R. Borger, *Asarhaddon* [1956], pp. 10ff.; L. Cagni, *Poem of Erra* [1979], pp. 21ff.; Ezk. 8–10) or the expulsion of the people from the land. Uniquely in Israel, the deity-nation association was established prior to the people's presence in the land and maintained even after their departure.

The notion of national deities was not absolute. The gods of the nations outside Israel tolerated the worship of other divinities by their subjects. But to the orthodox in Israel, Yahweh's position was unchallenged and His intolerance of rivals total (Ex. 20:1ff.; Dt. 6:4ff.). Yahweh welcomed veneration by non-Israelites, however. Although He had established a special relationship with Israel as His people, and declared Himself to be their god (Lev. 26:12; etc.), the prophets also proclaimed Him to be the universal God (Isa. 54:5; Jer. 32:27).

4. Politics. In theory the monarchical institution should have promoted national self-consciousness insofar as kings were expected (a) to provide leadership in the conduct of war, the administration of justice (1 S. 8:5f., 19f.), and the support of the national cult; (b) to model the highest standards of courage, dignity, justice, and piety, thus serving as an ideal for the citizens; and (c) to embody the collective aspirations of the people. In practice, however, the exercise of leadership was frequently motivated by ambition and the protection of vested interests. In northern Israel especially, leadership in the cult was replaced by leadership in apostasy and impiety (cf. 1 K. 14:7ff.; 16:30ff.; 2 K. 17). Far from modelling the highest ideals, the kings became known for their inhumanity, treachery, opportunism, and injustice. Instead of embodying the collective aspirations of the nation, they became the focus of collective mistrust and hatred, a cause of shame to the nation (cf. 1 K. 11:26; 12:1ff.). On balance, in view of the disparity between the theory and the exercise of the royal office, the influence of the kings of ancient Syria on the development of national self-consciousness was much less than it might have been. *See also* KING.

5. Linguistic. The "shibboleth" affair in Jgs. 12:1-7 serves as a grim reminder, not only of the linguistic fragmentation occurring in Israel during the era of the judges (*see* JUDGES, PERIOD OF), but also the nation's political disintegration. The account seems to imply a close relationship between language and national self-consciousness. This is supported by the conjoining of "language," *lāšôn,* with *'am* and *'ummâ* in the Aramaic parts of Daniel (e.g., 3:4, 7, etc.), the identification of specific languages on the basis of national names (e.g., *'ᵃrāmîṯ,* Dnl. 2:4; Ezr. 4:7; *yᵉhûḏîṯ,* 2 K. 18:26; cf. *'ašdôḏîṯ,* Neh. 13:24), bound expressions like "the language of the people" (Est. 1:22), in Esther also associated with a national script (cf. 8:9), the appearance of "tongues" in the table of nations (Gen. 10) as one of the organizing features alongside "families" (*mišpāḥôṯ*), "lands" (*'ᵃrāṣôṯ*), and "nations" (*gôyim*), and references to foreigners as those who speak a strange language (Dt. 28:49; Isa. 33:19; Jer. 5:15; Ezk. 3:5f.; Ps. 81:5 [MT 6]; 114:1). The importance of language in modern nationalist movements, however, should not be read into the ancient Semitic records. Designations for "language" (*lāšôn, śāpâ*) occur only thirty-six times in the OT; never, according to the present state of knowledge, in other Northwest Semitic texts. This suggests that the relationship between language and nationality may not have been the subject of much reflection. Gen. 11:1-9 represents an attempt unique in the ancient world to explain the origin of linguistic diversity. A few references to language appear in contemporary Mesopotamian (cf. *CAD,* IX, *s.v. "lišānu"*; A. Borst, *Der Turmbau von Babel* [1952], I, 74-89) and Egyptian (Borst, pp. 32-42) texts. However, given the royal nature of most of the inscriptions, and their preoccupation with territory and power, one may conclude that linguistic realities were of little consequence. Interestingly (contra I. J. Gelb, *Hurrians and Subarians* [1944], pp. v-vi), all of the nations of southern Syria (the Philistines, Edom, Moab, Ammon, Israel) gave up their native tongues in favor of the Canaanite dialect without any loss of national self-consciousness. This seems to have occurred before the turn of the millennium; cf. Samson's ability to converse freely with the Philistines (Jgs. 13–16). The concern of Neh. 13:24 with the loss of *yᵉhûḏîṯ* has a religious, rather than nationalistic, basis.

C. The Nation Israel. This variegated ancient Near Eastern perception of nationhood has important implications for an understanding of Israel's history. According to the patriarchal promise, the achievement of *gôy* status for Israel was a divinely ordained objective. The narratives speak proleptically of a numerous population (Gen. 17:2, 6, etc.), a national deity (17:7f.), a territorial homeland (17:8; 35:12), and even a king (17:16). It appears that the royal institution was commonly perceived as a prerequisite for nationhood status (cf. 1 S. 8:5, 19f.). It is clear from Dt. 26:5ff., however, that the formative period in Israel's evolution toward nationhood transpired in Egypt, independent of a homeland and in the absence of a king. The establishment of the monarchy in the 11th cent. did not mark the emergence of Israel as a *gôy*; it merely brought Israel into conformity with the neighboring nations. The monarchic aspect is also minimized in the rest of the OT. After the arrival of the kingship, Israel is never referred to as a *gôy* in the historical narratives. In the prophets, Jer. 18:6-9 speaks quite naturally of the destruction and rebuilding of a nation or kingdom, but Mic. 4:7 refers to the sick becoming a *gôy* over which Yahweh will function as king (*melek*). This notion of a divine king is also common in the enthronement psalms (e.g., Pss. 93, 95, 96).

On the other hand, the point of Jeroboam's policies at the time of the northern secession now becomes apparent. By establishing a separate national religion, complete with its own shrines, priesthood, and religious calendar (1 K. 12:25ff.), he added the religious dimension to the existing tribal, territorial, and political foundations of the new kingdom. He desired not only a separate state, but a nation, completely divorced from Judah to the south.

The multifaceted nature of the eschatological visions of many of the prophets (in the face of the Assyrian and Babylonian conquests in 722 and 586 B.C.) gains new significance when the complex oriental understanding of nationality is recognized. If the restoration of Israel was to be complete, it had to be described in terms of (a) a return to the land of Canaan; (b) a spiritual renewal of relationship with Yahweh, the patron deity; (c) the involvement of the entire house of Jacob; (d) the restoration of an indigenous (messianic) monarchy (e.g., Hos. 2:1ff.; Jer. 23:3ff.; 30:8-11, 18-22; 33:4-25; Ezk. 37:18-28). Without any one of these elements the restoration would have been interpreted as aborted.

In many contexts the identification of Judah/Israel as

a *gôy* bears overtones of reprimand for the nation's infidelity to Yahweh and its characteristically negative moral qualities. But this usage is not as consistent as A. Cody (*VT,* 14 [1964], 1-6) suggests. Note Isa. 26:2, "Open the gates that the righteous *gôy* which keeps faith may enter in." Cf. also Jer. 31:36, which describes, not the rejection of a faithless *gôy,* but the opposite: Yahweh's commitment to the preservation of Israel as a *gôy* before Him. Cf. also Ps. 33:12; 106:5. On the other hand note also Hag. 2:14 and Mal. 3:9. In the former the tone of reprimand is expressed, not so much in the use of *gôy* (*'am* appears as a correlative), as in the use of the demonstrative "this." Cf. J. Boehmer, *JBL,* 45 (1926), 124-148. Furthermore, even after allowances have been made for the negative connotations which the term assumes in later times, the identification of the postexilic community as a *gôy,* even though it consisted of only a limited population and possessed no king, testifies to the great flexibility of usage.

D. Foreign Nations. The Hebrew explanation for the origins of the nations is summarized poetically in Dt. 32:8,

> When the Most High gave to the nations their
> inheritance, when he separated the sons of men,
> he fixed the bounds of the peoples
> according to the number of the sons of God.

(So RSV, following the LXX and 4Q. Cf. AV "children of Israel," following MT.) According to the MT, the existence of the separate nations is attributed to an act of Yahweh whereby He divided the population of the earth into nations on the basis of the tally of the sons of Israel. Tg. Yerushalmi I associates the number of nations with the number of the tribes of Israel, i.e., twelve. But an expanded paraphrase of this Targum identifies the nations as seventy, thus conflating ideas derived from the table of nations, the tower of Babel account (Gen. 11), and the seventy sons who accompany Jacob to Egypt (Gen. 46:27; Ex. 1:5). Cf. D. Barthélemy, "Les tiqquné sopherim et la critique textuelle de l'AT," *SVT,* 9 (1963), 300f.; R. Meyer, "Die Bedeutung von Dt. 32:8f., 43 (4Q) für die Auslegung des Mosesliedes," in A. Kuschke, ed., *Verbannung und Heimkehr* (*Festschrift* W. Rudolph; 1961), p. 206. The LXX and a fragment from 4Q may, however, preserve the original reading, suggesting that the nations were divided on the basis of the number of angelic patrons available (cf. Dt. 4:19f.; 29:24-28; Dnl. 10:13; Sir. 17:17). To these nations Yahweh then allocated their respective territories. The special status of Israel is reflected in Yahweh's reserving it for Himself; no mediating patron is needed (but cf. later references to Michael, Dnl. 12:1f.). This understanding contrasts with the apparently prevailing perception by the surrounding peoples that the territories had been allocated to the respective patron deities by the highest god, either by lot or as rewards for services rendered. Cf. Block, pp. 415ff.

But Yahweh's authority over the nations was not restricted to this original occasion; He continued to control their boundaries (Isa. 10:13; cf. 2 K. 10:32) and guide the migrations of entire national groups to new lands (Am. 9:7; cf. Acts 17:26). In the apocalyptic writings of Daniel Yahweh's sovereignty over all the nations serves as a dominant motif (e.g., 2:36ff.; 4:31-35 [MT 28-32]; etc.).

The TABLE OF NATIONS (Gen. 10) represents the only extant ancient Near Eastern attempt to explain, on a level approaching the theoretical, the existence of the nations and their relationships to one another from a human perspective. The primary concern of this document is to trace the history of the Noachian family, and to show how its growth and segmentation are reflected in the association of the various groups of descendants with specific territories (*'ᵃrāṣôṯ*), languages (*lᵉšōnôṯ*), kinship groups (*mišpāḥôṯ*), and political entities (*gôyim*). Cf. vv. 5, 20, 31f. This interpretation helps to account for the variety of forms entered; the names consist of a mixture of eponyms, tribal names, gentilics, and toponyms. Within its broader context the Table also recognizes the fulfillment of the Noachian mandate to fill the earth (9:6), and it places the election of Abraham (and the origins of Israel) firmly in the line of universal history. Thus the text goes beyond the patriarchal narratives, in which the origins of Israel are tied genealogically to those of Edom, Moab and Ammon, by treating all the nations as members of one large family.

Although the OT is primarily concerned with the Hebrew nation, a universalistic thread is evident throughout. To Abraham it was announced that he would become an agent of universal blessing (Gen. 12:3, etc.). When Yahweh established His covenant with Israel, He declared it to be "a kingdom of priests and a holy nation," indicative of the nation's mediatorial spiritual role among the "peoples" (*'ammîm*) of the world (Ex. 19:5f.). This mission was to be served even by the temple in Jerusalem (1 K. 8:41-43). Many prophetic texts call attention to the universal recognition of Yahweh in general terms (e.g., Isa. 2:1-4; Mic. 4:1-3; Isa. 66:18ff.; Joel 2:28ff. [MT 3:1ff.]; Zec. 2:11; 8:20ff.; 14:16f.). In Isa. 19:22ff. Yahweh speaks specifically of Egypt as "my people" (*'ammî*) and Assyria as "the work of my hand," while in the same breath referring to Israel as "my inheritance." Perhaps this universalism is displayed most clearly in the Servant Songs in Isaiah. The Servant brings justice to the nations (42:1; cf. 51:4f.); He is a covenant to the people, a "light to the nations," a mission fulfilled by opening blind eyes and releasing prisoners from dungeons (42:6f.; cf. 49:8ff.; 61:1f.). On Israel's universal mission see R. Martin-Achard, *Light to the Nations* (Eng. tr. 1962).

If on the one hand the nations are subject to Yahweh's control and their salvation is His ultimate goal, on the other they represent the antithesis to His chosen people. Israel must be delivered from the nation Egypt (Dt. 4:34ff.; cf. Ex. 15:21). The Canaanite nations must be obliterated in a holy war lest they lead Israel into apostasy (Dt. 7:1ff.). When apostate Israel fails to comply with this injunction, the nations serve as agents of Yahweh's judgment (Jgs. 2:11ff.; 3:1ff.). Later Israel's doom is sealed when it is scattered among the nations or lands of its enemies (Ezk. 11:16, *et passim*; Ps. 106:27; cf. Lev. 26:38). Naturally, then, its restoration will involve a regathering from the nations and the lands (e.g., Ezk. 36:24). It is not surprising that in the Psalms the nations are perceived as the embodiment of evil. Note the paralleling of *gôyim* with "the wicked" (Ps. 9:5 [MT 6]), the treacherous plotters of evil (59:5 [MT 6]), Israel's enemies (106:41). Cf. also 2:1-3; 9:3-6; 17:18; etc. It should be observed, however, that at this stage the negative overtones are not yet inherent in the term *gôy*; *'am* is used similarly (cf. Ps. 7:7f. [MT 8f.]; 33:10; 56:7 [MT 8]; 68:30 [MT 31]; 89:50 [MT 51]; 96:5). The connotation of "heathen" derives from the contexts.

Although the nations were often perceived as agents of divine wrath, this did not excuse them for their barbarous and inhumane treatment of their victims. Even if they were not party to Yahweh's covenant, they were still accountable to Him for their conduct. Thus the oracles against the nations proclaim God's judgment on them for their arrogance and violence (Am. 1:3–2:4; Isa. 13–24; Jer. 46–51; Ezk. 25–32). In the eschatological visions of the prophets the conflict between Israel and the nations becomes a battle with Yahweh Himself. It is Yahweh who summons them to Zion and delivers the final blow (Isa. 24–27; Ezk. 38–39; Joel 3 [MT 4]; Zec. 9–14). In the postexilic period the polarization of Israel and the nations becomes complete. Ezra commands the people of the new commonwealth to put away the foreign wives because

"the holy race has mixed itself with the peoples of the lands" (9:2).

II. NT.–A. Terminology. The LXX generally translates *góy* as *éthnos*, especially when the nations, excluding Israel, are in view. But this pattern is broken occasionally. *Laós* is used of these nations in Isa. 55:5; 60:5; Ezk. 20:41; 28:25. In Ex. 19:6 *góy qāḏôš* is rendered *éthnos hágion*. In seven texts in which *góy* is understood to refer to Israel *laós* is used (Josh. 3:17; 4:1; Isa. 9:2; 26:2; 58:2; Jer. 9:8; 40:9). Cf. *TDNT*, IV, 32ff. The Greek translation of *'am* is more varied, reflecting the wider semantic range of the Hebrew term. Usually, however, when the foreign nations are in view *éthnos* is used; when *'am* refers to Israel *laós* is preferred. Cf. *TDNT*, II, 364ff.

In the main the NT follows the LXX. The "nations" are usually designated by *éthnos*, whether they are referred to in general, without qualification (e.g., Mt. 24:9, 14), or the Jewish nation in particular (cf. Lk. 7:5; 23:2; Jn. 11:48, 50-52; 18:35; Acts 10:22; 24:2, 10, 17; 26:4; 28:19; 1 Pet. 2:9). The RSV translates *éthnos* as "gentiles" when the reference is to non-Jewish nations in contrast to the Jews (Lk. 21:24; Acts 9:15; 1 Cor. 1:23; etc.) or Christians (Mt. 6:7, 32; 10:5; 20:19; Eph. 2:11f.). "Nations" includes the Jews (Mt. 24:9, 14; etc.). "People" is preferred for *éthnos* in Acts 13:19.

Laós occurs 141 times in the NT (including Jn. 8:2), usually to designate "people, population." A national sense is clear when *laós* applies to Israel (e.g., Lk. 2:32). See further *TDNT*, IV, 52ff. The plural *laoí* is found only eight times, but in each instance the characteristically Semitic pairing of words is apparent. *Laoí* is paralleled with *éthnē* in three poems: Lk. 2:31; Acts 4:25 (cf. the coordinate pair in v. 27); Rom. 15:11. The quadruplets in Rev. 7:9 (*éthnos, phylaí, laoí, glṓssai*), 10:11 (*laoí, éthnē, glṓssai, basileíai*), 11:9 (*laoí, phylaí, glṓssai, éthnē*), and 17:15 (*laoí, ócnloi, éthnē, glṓssai*) are reminiscent of Dnl. 3:4, 7, etc. (cf. also Gen. 10).

B. NT Perspectives. By NT times, as a result of the successive Assyrian, Babylonian, Persian, Greek, and Roman empires, the populations and cultures of the ancient Near East had undergone considerable mixing. The dominance of the imperial presence served to weaken national activities in many ways. That the Jews retained a sense of nationhood is to be attributed to their strong religious traditions. For religious reasons they continued to hold non-Jews in contempt (Jn. 4:9), viewing them as unclean (cf. Acts 10:11f.). Although Jesus initially instructed His disciples to go only to the house of Israel (Mt. 10:5f.), after the nation's rejection of His messianic status He began to break new trails by (1) identifying with the Servant of the Lord of Isa. 42:2ff. in His mission to the Gentiles (Mt. 12:18ff.; cf. Simeon's response to the birth of Jesus, Lk. 2:29ff.; also Jesus' inaugural speech, Lk. 4:17ff.); (2) ministering to non-Jews personally (Mt. 15:21ff.; Mk. 7:24ff. [the Syro-Phoenician woman]; Jn. 4:1ff. [the Samaritan woman]) on the basis of the principle stated in Jn. 10:16; (3) predicting the eventual spread of the gospel to all nations (Mt. 24:14; 25:31ff.; cf. Jn. 12:32); (4) commissioning His disciples to take the gospel to all nations (Mt. 28:19f.; Mk. 16:15; Lk. 24:47; Acts 1:8).

Whereas the activity of the Church was initially concentrated in the Jewish mission, Peter's visit to Cornelius (Acts 10) and the conversion of Paul (Acts 9) signalled a revolution in Christian thought. Fundamental to Paul's message was the good news of access for all to God's grace, irrespective of nationality, social status, or sex (Gal. 3:28; Rom. 10:12). In Rom. 9–11 he describes in detail how the Jewish rejection of Christ had turned out for the benefit of the Gentiles. However, he appears to hold out the prospect of an eventual national return of Israel to God (Rom. 11:25ff.).

The Apocalypse of John displays considerable interest in the salvation of the nations. According to Rev. 5:9-10 the ransomed of God will include "men from every tribe and tongue and people and nation"; these will constitute the kingdom of God and exercise dominion over the earth (cf. 2:26f.; 20:6; also Rom. 15:12). In general the book describes the universal triumph of God and His sovereignty over the nations in terms reminiscent of earlier apocalyptic. The establishment of the kingdom of the Lamb through suffering, however, is new (Rev. 5:9ff.).

NATIVITY OF MARY, GOSPEL OF THE. *See* APOCRYPHAL GOSPELS II.D.

NATURAL, NATURE [Heb. *lē(a)ḥ*] ("natural force," Dt. 34:7); NEB "vigour"; [Gk. *génesis* (Jas. 1:23; 3:6)];NEB also "existence"; [*psychikós*] (1 Cor. 2:14; see also "physical body," 1 Cor. 15:44, 46); NEB "unspiritual"; [*phýsis* (Rom. 2:14; 11:21, 24; 1 Cor. 11:14; Gal. 4:8; Eph. 2:3; 2 Pet. 1:4)]; NEB also NATIVE, BEING; [*physikós*] (Rom. 1:26f.); [*ánthrōpos* (2 Cor. 4:16; Eph. 4:22, 24; Col. 3:9)]; AV "(outward) man"; NEB also "humanity"; [*sárx*] (Rom. 6:19); AV "flesh"; NEB "weakness"; [*hypóstasis*] (He. 1:3); AV "person"; NEB BEING; [*spérma*] (1 Jn. 3:9); AV, NEB, "seed"; [*ídios*] ("own nature," Jn. 8:44); AV "own"; NEB "own language"; [*homoiopathḗs* (Acts 14:15; Jas. 5:17)]; AV "passions"; NEB "mortal," "frailty"; [*phthartós* ("perishable nature," 1 Cor. 15:53a), *thnētós* ("mortal nature," v. 53b), *néos* ("new nature," Col. 3:10), *autós* ("same nature," He. 2:14)]; AV omits except for "new man" (Col. 3:10); NEB also "perishable being," "what is mortal."

The terms "natural" and "nature" must be examined carefully. Several factors underline the problem of translation and use: (1) A variety of Greek roots lies behind this rendering in the modern translations. (2) The word "nature" is contaminated by nonbiblical concepts from Greek thought onward, especially concepts lacking the foundational biblical confession of God as Creator. (3) The term's ambiguity (for whatever reasons) allows a spectrum of usage ranging from the abstract and universal to the subjective, sensate life of a person. The present article will focus primarily on the words "natural, nature" in the RSV, with particular attention to *phýsis* and *physikós*, the words most frequently so translated.

The Heb. *lē(a)ḥ* occurs only in Dt. 34:7, but its meaning is suggested by the related adjective *laḥ*, "moist, fresh." W. F. Albright (*BASOR*, 94 [Apr. 1944], 32-35) attempted to relate Ugar. *lḥḥ* to Heb. *lē(a)ḥ*, both relating to sexual potency, but most scholars have rejected his proposal. Moses' "natural force," i.e., the native vigor of youth, was not abated to the time of his death.

Of minor interest in the NT, the Gk. *génesis* stems from a root indicating "birth," "coming into being." The NT canon begins in Matthew with the declaration "The book of the genealogy [*génesis*; AV "generations"] of Jesus Christ." Here the genealogy is kindred to the ideas of

"source," "commencement," "origin," otherwise embodied in *phýsis* and its cognates. The noun *génesis* in Jas. 1:23 and 3:6 carries the thought of a natural but God-ordained order of things — man's "natural face in a mirror" and the larger "cycle of nature," both being subject to the order of evanescence and decay. Philo also made prominent a similar contrast between the eternal stability of God the Creator and *génesis*, i.e., the changing world scene (see *DNTT*, II, 658f.).

The Greek terms *phýsis* and *physikós* appear 17 times in the NT. As suggested earlier, the term "nature" does not appear in the OT; on the other hand, the idea of nature, embodied in the term *phýsis*, became a key concept in early Greek thought and remained prominent in Hellenistic thought, including that sector most closely related to the NT writers. The word "nature" has various connotations in the NT. (1) Birth or physical origin (Rom. 2:27; Gal. 2:15) — the notion of a line of descent governing one's condition. (2) The essential characteristics of a species or person, whether human (Jas. 3:7) or divine (2 Pet. 1:4). Jas. 3:7 twice uses *phýsis* in the sense of "kind," i.e., according with the regular order of nature. 2 Pet. 1:4 may be compared with Paul's teaching on the new creation (*see* NEW NATURE); the thought is that true humanity can be effected only through the work of God Himself, mediated by the knowledge of Jesus Christ (v. 3). (3) An inherited or acquired condition (Eph. 2:3). Whereas the person apart from Christ is, as a sinner, a child of wrath by nature, the grace of God has established the person in Christ in a new order of grace and mercy (Eph. 2:4-10). (4) An inborn perspective of propriety or morality (1 Cor. 11:14; Rom. 2:14). Here "nature itself" teaches one about proper adornment and the just requirement of the law. (5) The forces or laws which govern the world and its inhabitants (Rom. 1:26; 11:21, 24; Gal. 4:8). The natural relationship between the sexes is established in the regular order of nature (Rom. 1:26). The pagan is indicted for the violation of this *phýsis*. In Rom. 11 Paul points to the laws which determine the culture of the olive tree as a parable of the relationship between Jew and Gentile.

All the aforementioned nuances of *phýsis* show the utilization of Greek concepts by early Christian thought, but also the distance between the world view of Hellenism and Christian faith in its NT expression.

The contrast between *psychikós* and *pneumatikós* in 1 Cor. 15:44-46 is especially interesting and instructive, and may be viewed as paradigmatic of the biblical teaching on the concept "natural." The adjective *psychikós* in the NT refers to that which belongs to the *psychḗ*, i.e., sensate, emotive and intelligent life not in covenant with God. The natural body is derived from the first Adam, who perished; all human life bounded by its origins in Adam is subject to death and decay. But there is a new, spiritual life (*pneumatikós*) issuing from union by faith with Christ, the second Adam from above. Flesh and blood, i.e., those determined by descent from the first Adam cannot inherit the kingdom of God (1 Cor. 15:20). Those who are of the new order, the *pneumatikoí*, already have experienced new life in Christ, and in keeping with this new order of existence, will be raised imperishable in the great resurrection of the dead in Christ (1 Cor. 15:35ff.). This is the "natural" outcome of the new life by faith in Christ, whom God has already raised from the dead to a new order of existence.

NATURAL FEATURES. The purpose and limits of this article are to define certain terms used in the Bible with reference to natural features. Terms that have several meanings or that are ambiguous to the modern mind need to be understood as the biblical writers intended them in the contexts in which they are used.

I. Universe
II. Heaven
III. Earth, World
IV. Time
V. Seas, Waterways
VI. Land Features
VII. Climate, Weather
VIII. Directions

I. Universe.—No single term, in either Hebrew or Greek, conveys this idea. In Hebrew "the heavens and the earth," as in Gen. 1:1, is usually understood to mean the universe, but the context is limited to EARTH and the heavens as seen from earth. The sun and moon are the principal bodies ("great lights," 1:16), and the stars, with no distinction between stars and planets, are added almost as incidental. This is not to deny that God created the entire universe (cf. He. 1:3, where "universe" is used to translate Gk. *tá pánta*, "all things"), but rather to understand that the ancients, particularly the Hebrew people, did not have the concept of "universe" that modern scientists have.

II. Heaven.—The Heb. *šāmayim*, "heaven(s)," in general conveys the idea of that which is extraterrestrial or "non-earth." It denotes the heavens that are seen from earth (Gen. 15:5) and which, taken together with earth, constitute the "creation." The term can also be used in a spiritual sense as the dwelling place of God (Dt. 26:15; Isa. 66:1). The statement has sometimes been made that the Hebrew conceived of three (or seven) heavens, and Gen. 1:6-8, 14-17 have been understood to mean that a "firmament" divides earth's atmosphere from outer space. But it is better to consider the passages phenomenological, i.e., they describe heaven as it appears from earth. There are three "heavens" that can be distinguished visually, as the ancients did: the heaven where birds fly and across which clouds move; the heaven where sun, moon, and planets (cf. Jude 13, Gk. *planḗtēs*) move against the background of the fixed stars; and the heaven of the fixed stars. The Gk. *ouranós* as used in the Bible has approximately the same meanings as the Heb. *šāmayim* (cf. Bauer, rev., pp. 593-95). Paul's use of the expressions "third heaven" (2 Cor. 12:2) and "far above all the heavens" (Eph. 4:10) should not be pressed to formulate doctrines where other scriptural support is lacking and a figurative meaning is not unsatisfactory. *See* ASTRONOMY; FIRMAMENT; HEAVEN.

III. Earth, World.—The Hebrew and Greek words variously translated "earth," "world," etc., lack precision as much as the English words. Heb. *tēḇēl*, "world" (BDB, p. 385), is often used in parallel structures with *'ereṣ*, "earth," and refers generally to the planet Earth (1 S. 2:8; Ps. 89:11 [MT 12]). Heb. *'ereṣ*, on the other hand, can mean the entire earth (Gen. 18:18), a country or region (Gen. 21:21), a tribal territory (Dt. 34:2), or just a small piece of ground (Gen. 23:15). Likewise, Heb. *'ᵃḏāmâ*, "ground," has approximately the same range of meanings as *'ereṣ* (BDB, pp. 9f.). Heb. *'ôlām*, "age," is sometimes translated "world" (Ps. 73:12; Isa. 64:4, AV), but refers rathers to the age or world-system. Gk. *kósmos*, "world," has meanings that range from the universe (Rom. 1:20) to the planet (Jn. 11:9) or the inhabited portion (1 Cor. 5:10), from the world that is opposed to God (Jn. 15:19) to the redeemable world that God's Son came to save (Jn. 3:16), as well as spiritual connotations (1 Cor. 1:20f.) similar to

Heb. *ʿôlām*, "age, world-system." Gk. *oikouménē*, "inhabited earth, world," may mean the earth where mankind dwells (Acts 17:31), or a smaller portion, perhaps the Roman empire (Lk. 2:1), or even that part inhabited by Jews (Acts 24:5).

IV. Time.–The ancients depended largely on natural phenomena for indications of time. The basic unit was the day, which at first was marked from sunset to sunset. The month was based on the moon, each month beginning with the first appearance of the new moon. Heb. *yārē(a)ḥ*, "moon, month," however, gave place to *ḥōḏeš*, "newness (of moon)." Likewise Gk. *mēn*, "month," is related to *mēnē*, "moon." The year consisted of twelve months (the lunar year of 354 days), but this quickly got out of phase with the seasons, hence an intercalary month was necessary. The Egyptians, from their need to plan for the annual flooding of the Nile, developed a modified solar year of 365 days, which also needed a slight correction. This was done by observations of the Dog Star Sothis. *See* ASTRONOMY I; EGYPT VI.A.

Smaller divisions of time also depended on natural phenomena. The Sumerians marked a "double hour" (Sum. kaskal.gíd or da.na; Akk. *bêrum*) as a measure of distance; it is relatively simple to distinguish the sun-angle as one-third or two-thirds of the way to zenith or from zenith. The hour was unknown in OT times. Aram. *šāʿâ*, "moment, short time," in Dnl. 3:6, etc., has been translated "hour," leading to questionable interpretations. The sundial appeared in Egypt by the 8th cent. B.C., with six divisions for the day (i.e., double hours). This was improved by Berossus (*ca.* 300 B.C.), who divided the day into twelve equal parts. The twelve-hour day was used by Greeks and Romans, and is found in the NT (Jn. 11:9; Mt. 20:2-7). *See also* HOUR.

Longer periods of time were based on the elements developed from nature, such as the sabbatical year (7th year), the year of the Jubilee (50th year), and the generation. The length of a generation is often figured at forty years, but this is without convincing support. Heb. *dôr*, Aram. *dār*, "generation," are clearly related to Akk. *dârum*, which formerly was defined as 50 years, but now "may tentatively be established as 70 years" (*CAD*, III, 115). It would be unwise to press mathematical precision into the biblical statements concerning generations.

See also CALENDAR.

V. Seas, Waterways.–The Heb. *yām*, "sea," has a wider variety of meanings than the English word sea. It is used of the Mediterranean (Nu. 13:29, also called "the great sea," 34:6), of the Red Sea (Reed Sea, Ex. 13:18), of the Dead Sea ("sea of salt," Gen. 14:3), of the Sea of Galilee (*yam kinneret*, Nu. 34:11), of the sea in contrast to the land (Gen. 1:26), and even of a river such as the Nile (Isa. 19:5) or the Euphrates (Isa. 21:1). That the Mediterranean was the common meaning is indicated by the use of *yammâ*, "seaward," to mean "west" (Gen. 13:14). Heb. *nāhār*, "stream, river," indicated a river that normally had flowing water, as opposed to *naḥal*, "torrent-valley, wadi." The former is used of the Nile (Isa. 19:5), the Euphrates (Mic. 7:12; Gen. 15:18), the Tigris (Dnl. 10:4), and of other rivers (e.g., Zeph. 3:10). It may be used of canals (cf. Ezk. 1:1; Ezr. 8:21; Ex. 7:19) and may have referred to underground waters (Job 28:11; cf. BDB, p. 625). The *naḥal*, on the other hand, was a seasonal river, a rushing torrent after a heavy rain (Jgs. 5:21), but dry or nearly so in the dry season. ("Torrent" is often a misleading translation.) Heb. *ʿayin*, "spring (of water)," was a source of water bubbling from the ground (Jgs. 7:1). A synonym is *māqôr*, "source, spring, fountain" (Jer. 2:13; cf. BDB, p. 881). On the other hand, the pit or dug well was *bôʾēr* (Gen. 21:25) or *bôr* (*Q*, 2 S. 23:15; *K bôʾr*). Dt. 8:7 speaks of "brooks" (*naḥᵃlê mayim*), "fountains" (*ʿᵃyānôṯ*), and "springs" (*tᵉhômôṯ*). This last term, *tᵉhôm*, has a wide range of meanings, but in general refers to underground waters (Gen. 7:11; Prov. 8:23); it may be related to Akk. *tiâmat* etymologically, but mythological identification is highly questionable (cf. DEEP).

The Greek words are not always equivalents. Gk. *thálassa*, "sea," is used of sea as distinguished from land (Mt. 23:15), of the Mediterranean (Acts 10:6), the Red Sea (7:36), and other seas, and of the lake (sea) of Galilee (Mt. 4:18) or Tiberias (Jn. 21:1). Gk. *límnē*, "lake," is used of Galilee by Luke (Lk. 5:1). The word *potamós*, "river," is used as the equivalent of Heb. *nāhār* (Mk. 3:6), but it is also used to refer to a seasonal torrent (= Heb. *naḥal*) in Mt. 7:25. The more precise term for the seasonal river or wadi is Gk. *cheimárros* (Jn. 18:1). Gk. *pēgḗ*, "spring, fountain," is used chiefly for sources of water issuing from the ground (Jn. 4:14), but it is also used of a dug well (Jn. 4:6). For the "deep," Gk. *ábyssos*, "abyss," is generally joined with *pēgḗ* (cf. Gen. 7:11, LXX; lit. "fountains of the deep").

See also RIVER.

VI. Land Features.–The land to which the Israelites were directed (Dt. 1:7) is described as "the hill country of the Amorites, . . . their neighbors in the Arabah, in the hill country and in the lowland, and in the Negeb, and by the seacoast." "Hill country" (lit. "mountain," Heb. *har*) can be used as a general description of the mountain range (Dt. 1:7) or of specific mountains (Sinai, Ex. 19:23) or hilly regions (Bashan, Ps. 68:15 [MT 16]; *see also* HILL). The "lowland" (Heb. *šᵉpēlâ*) was the region of foothills lying between the mountain range and the sea. The name was obviously given to it by those who lived above it. The "seacoast" (Heb. *ḥōp hayyām*, "shore of the sea") was also called in Heb. *śᵉpaṯ hayyām*, "the lip of the sea" (Gen. 22:17). The coastal plain was Heb. *ʿēmeq*, "deep place, valley" (Philistine plain, Jgs. 1:19). This word, however, was generally applied to a valley (Mic. 1:4), although it was also used of a broad plain (Ezk. 37:1). The Negeb (Heb. *negeḇ*, "dry region, southland") was the term applied to the region S of Judah (Josh. 15:21ff.), although the region is not clearly defined (cf. Gen. 20:1). The word was commonly used also to mean "south" (Nu. 34:4). The Arabah (Heb. *ʿᵃrāḇâ*, "steppe, desert-plain") was an imprecise name that could be applied to the Jordan Valley (Josh. 11:2, Arab. el-Ghôr), a region W of the Dead Sea (1 S. 23:24), a plain E of the Jordan (Dt. 1:1; 3:17), the region S of the Dead Sea (Dt. 2:8, Arab. Wâdī el-ʿArabah), the plain of Moab (Nu. 22:1), the northern part of the Arabian desert (Isa. 40:3), or the steppe in general (Jer. 17:5, parallel with *miḏbār*). *See* PALESTINE.

In addition to the words used in Dt. 1:7 other terms are used. The "slopes" (Josh. 10:40) were the detritus at the foot of the mountains that appeared to be the foundation of the mountain (Heb. *ʾᵃšēḏâ*, "foundation, mountain slope"; BDB, p. 78). For "valley" or "plain" Heb. *biqʿâ*, "cleft, valley, plain" occurs (of Jericho [Dt. 34:3], Lebanon [Josh. 11:17], etc.; cf. Dt. 11:11). Heb. *mîšôr* is also imprecise, being used in parallel with *ʿēmeq* (Jer. 21:13), referring to a level place (1 K. 20:23), and particularly referring to the high plateau between the Arnon and Heshbon (Dt. 3:10; cf. BDB, p. 449). The LXX translates the word variously: by Gk. *koiládos*, "deep valley" (LSJ, p. 966) in 3 K. 21:23 (MT 1 K. 20:23); by *tríbos*, "well-worn path," in Ps. 26:11 (MT 27:11); and as a proper noun *Misor* in Dt. 1:7. Heb. *miḏbār*, "wilderness, steppe," is often translated "desert," giving an erroneous impression. The Midbar was land with marginal rainfall: in dry

years it was barren, but with a slight amount of precipitation it yielded greenness (Joel 2:22). It could be uninhabited (Job 38:26), or it might contain cities (Josh. 15:61; Isa. 42:11).

VII. Climate, Weather.–The annual seasons are mentioned in Gen. 8:22. Summer, the dry season (May-Oct.), is Heb. *qayiṣ*, Gk. *théros* (Mt. 24:36), "summer, summer fruit." This is also Heb. *zeraʿ*, "seed(time)," and *ḥōm*, "heat." The latter can be used of the heat of the day, regardless of season (Gen. 18:1; cf. Gk. *kaúma*, Rev. 7:16). Winter, the wet season (Dec.-Mar.), is Heb. *ḥōrep*, Gk. *cheimṓn* (2 Tim. 4:21). This is also Heb. *qōr*, "cold" (Gen. 8:22, cf. Gk. *psýchos*, Acts 28:2) and *qāṣîr* (Gen. 8:22), Gk. *therismós* (Mt. 13:30), "harvest, harvest time." For the remaining months, see "early" and "latter" rains, below.

Because of the importance of rain, the Hebrew vocabulary has various terms that are more or less specific. Heb. *māṭār* (Gen. 2:5), Gk. *brochḗ* (Mt. 7:25), "rain, watering," are the general terms referring to the seasonal rainfall, often conveying the idea of heavy rain. Heb. *gešem* (Gen. 7:12) "rain, showers," Gk. *huetós* (Acts 14:17), are also general terms. Other words are Heb. *zerem*, "downpour, storm" (Isa. 4:6); *śaʿar*, "storm" (Isa. 28:18); *śᵉʿîrîm*, "rain drops," and *rᵉḇîḇîm*, "copious showers" (Dt. 32:2). The "former rains" (Heb. *yôrê*, Dt. 11:14; *môrê*, Joel 2:23) are the early showers that precede the rainy season, preparing the ground for cultivation. Likewise the "latter rains" (Heb. *malqôš*) are showers that extend the rainy season, maturing the crops (cf. *leqeš* "spring crop," Am. 7:1). The LXX of Dt. 11:14 uses a paraphrase to express both these terms. DEW was also of great importance; the word is Heb. *ṭal*, Aram. *ṭal*. Words for "cloud" are Heb. *ʿāḇ* (with or without *māṭār*) (Jgs. 5:4; Prov. 16:15), *ʿānān* (Ex. 19:9) and *ʿᵃnānâ* (Job 3:5), Gk. *nephélē* (Lk. 12:54). "Rainbow" is Heb. *qešeṭ*, "bow" (Gen. 9:13), Gk. *íris* (Rev. 4:3).

"Thunder" is Heb. *qōl*, *qōlôṯ*, "voice(s)" (Job 37:2, 4; Am. 1:2), *raʿam*, "thunder" (Isa. 29:6), Gk. *brontḗ* (Mt. 10:27). "Lightning" is Heb. *bārāq* (Ezk. 1:13), *bāzāq* (1:14, unless *z* was erroneously written for *r*), *ḥᵃzîz*, "thunderbolt, lightning flash" (Job 28:26; Zec. 10:1), *ʾôr*, "light" (Job 36:32), Gk. *astrapḗ* (Mt. 24:27). "Hail" is Heb. *bārāḏ* (Josh. 10:11), *ʾelgāḇîš* (Ezk. 13:11), *ʾeḇen*, "stone" (with and without *bārāḏ*, Josh. 10:11), Gk. *chálaza* (Rev. 8:7). "Wind" is Heb. *rû(a)ḥ*, "wind, spirit" (Gen. 8:1), Aram. *rûḥâ* (Dnl. 2:35), Gk. *ánemos* (Mt. 11:7). For heavy winds, Heb. *sûpâ* (Isa. 21:1), *śᵉʿārâ* (Zec. 9:14), hithpael of *śāʿar* ("rush like a whirlwind," Dnl. 11:40) convey the idea of "whirlwind"; similar in meaning are Gk. *kataigís*, "sudden blast" (Isa. 28:18, LXX); and *eurakýlōn*, "northeast wind," or *euroklýdōn*, "south-southeast wind" (Acts 27:14; *see* NORTHEASTER). Heb. *rû(a)ḥ śᵉʿārâ* (Ps. 107:25) is "storm wind." Winds that bring the *ḥamsîn* are Heb. *rû(a)ḥ qāḏîm*, "east wind" (Jonah 4:8), *rû(a)ḥ ṣaḥ*, "hot wind" (Jer. 4:11), Gk. *nótos*, "south" (Lk. 12:55; *kaúsōn*, "scorching heat," describes the *ḥamsîn*).

VIII. Directions.–"Sunrise" is Heb. *môṣāʾ haššemeš*, "the going forth of the sun" (Ps. 19:7), and "sunset" is *mᵉḇôʾ haššemeš*, "the entering of the sun." Heb. *mizrāḥ* (Nu. 21:1), Gk. *anatolḗ*, "east," is the direction toward the sunrise (or the rising stars, Mt. 2:2). The NT uses paraphrases with *anatéllō*, "rise" (Mt. 5:45) and *dýnō*, "set" (Lk. 4:40). Since the people of the Bible world "oriented" themselves to the east, Heb. *qeḏem* (Gen. 25:6), *qāḏîm* (Gen. 41:6), and other formations from the root meaning "before, in front of" were used for "east." It follows that *yāmîn*, "right (hand)" would mean "south" (Ps. 89:13) and *śᵉmōʾl*, "left (hand)," would mean "north" (Gen. 14:15). Other words for "south" are *negeḇ*, "dry (region)" (Gen. 13:14), *dārôm*, "south" (Ezk. 42:18, chiefly in poetic passages), *têmān*, "south" (Dt. 3:27, derived from the root meaning "right [hand]"), while *ṣāpôn* also is used for "north" (Ps. 89:12 [MT 13]). "West" is *ʾaḥᵃrôn*, "behind, after" (Dt. 11:24), *ʿereḇ*, "evening, sunset" (Gen. 8:11), *maʿᵃraḇ*, "west" (Isa. 45:6, from the root *ʿrb*, "to enter"; cf. Akk. *ereb šamši*, "going in of the sun, sunset"), and *yammâ*, "toward the sea" (Gen. 13:14). The four directions are mentioned in Gen. 13:14; Ezk. 42:16-20, and in Greek in Lk. 13:29. NAVE nāʹvə (Sir. 46:1, AV). *See* NUN.

NAVEL; NAVEL STRING [Heb. *šōr*]. Hebrew *šōr* is probably a cognate of Arab. *šurr*, which denotes first the umbilical cord and then the scar or navel.

In Ezk. 16:4 Israel is likened to a newborn infant who is abandoned shortly after birth without the care necessary to preserve life. Even her umbilical cord was not cut and tied, with the result that the infant's blood would flow out through the placenta until she died. The verse describes the normal midwifery procedures still practiced by Arab peasants in Palestine, which include cutting the umbilical cord, bathing to remove the fatty substance covering the infant's skin as well as any blood or meconium, rubbing with salt and oil, and wrapping for seven days in tight bindings known as "swaddling clothes." (See E. W. G. Masterman, *PEQ*, 1918, p. 118.)

Most modern versions read "navel" in Cant. 7:2 (MT 3) (but for a different interpretation, see M. Pope, *Song of Songs* [*AB*, 1977], pp. 617f.). The AV and RSV mg. read "navel" in Prov. 3:8; but the RSV ("flesh"; cf. NEB "health") apparently follows the LXX, which has Gk. *sôma* ("body, flesh"), suggesting that the translator read Heb. *śᵉʾēr* (cf. Akk. *šīru*, "flesh") or *bāśār* in place of MT *šōr*. If *šōr* is correct, the "navel" by synecdoche implies the entire person. In Job 40:16 the AV reads "navel" for *šārîr*. The RSV and NEB more correctly render "muscles."

NAZARENE naz′ə-rēn, **OF NAZARETH** naz′ə-reth [Gk. *Nazōraios, Nazarēnos*]. An appellation or adjective that occurs nineteen times in the NT, all in the Gospels and Acts. It was applied first to Jesus Christ because He spent His boyhood in the Galilean town of Nazareth, then by

extension to His followers. It is probably to be understood as a Semitic equivalent to the later Greek term "Christian."

Difficulty arises over the word because of its two forms in the NT. Four times in Matthew and twice in Luke the word is spelled *Nazarēnos*; the remaining instances are spelled *Nazōraios*, the form used exclusively in Acts, twice in Matthew, once in Luke, and three times in John. Thus Mark uses only the form *Nazarēnos*, Matthew, John, and Acts use *Nazōraios*, and Luke employs both spellings. This requires some explanation.

The form *Nazarēnos* is simple to trace, for it plainly points to someone from Nazareth, and in the case of the NT, to Jesus Christ. However, the form *Nazōraios* is more complex because of the use of the Gk. *ōmega*, a vowel that may correspond to a weak vowel in the Semitic original of the name; indeed, variations existed in Hebrew and Aramaic spellings of the name Nazareth. But this still does not answer the question posed by the two forms of the word in the NT, and in Luke the problem is intensified in that both forms appear in the one document.

Matthew 2:23, which uses *Nazōraios*, may explain this form, for it relates that Jesus' family settled in Nazareth so that the prophetic utterance might be fulfilled: "He shall be called a Nazarene." The prophecy that was fulfilled may be Isa. 11:1 or Zec. 6:12. If so, Matthew would be making a wordplay on Heb. *nēṣer*, which occurs in Isa. 11:1 as "branch."

Another proposal is that *Nazōraios* derives from the Hebrew proper name *Nesar, from which the name Gennesaret, "vale of Nesar," is taken. Or it may be connected with an earlier Hebrew name *Nazara, which refers not to the town of Nazareth but to the entire district, with the result that *Nazōraios* means "Galilean."

It is indisputable that the two forms of the word are interchangeable and equal in the Gospels, and in several passages the English versions render these adjectives by the words "of Nazareth." In Acts 24:5, however, the form *Nazōraios* presents a difficulty, for it speaks of a *sect* of *Nazōraioi*. Tertullus at Jerusalem accused Paul of being "a ringleader of the sect of the Nazarenes," clearly alluding to those called Christians. Thus the term seems to be a derogatory Jewish term for Christians.

But did the term "Nazarene" (*Nazōraioi*) have a history before Jesus Christ? At Paul's time the Christians were held by the Sanhedrin to be a Jewish sectarian party, in this case subversive and schismatic. Epiphanius (4th cent.) distinguished between Nasareans and Nazoreans; the Nasareans were Jewish heretics (*Haer.* 1.18), and the Nazoreans were Jewish-Christian heretics who had separated from the main body of the Church (*Haer.* 29.7, 9). But since Epiphanius was not a reliable historian, his distinctions may be valueless in this inquiry. It is conjectured that in pre-Christian times a Nazorean party of Jewish sectaries was known for close observance of ascetic rules of conduct (from the Heb. *nṣr*). Perhaps this party was taunted with the name *Nazōraioi* by orthodox Jews, who by Christian times applied the term of disrespect, knowingly or ignorantly, to the new Christian sect.

The end of the matter is that no certain explanation of these two forms of the word Nazarene is at hand. It may be that by NT times, whatever the history of the two words in pre-Christian Judaism, the two forms of the word were completely convertible, having no special meaning attached to them beyond the historical and geographical reference to Nazareth.

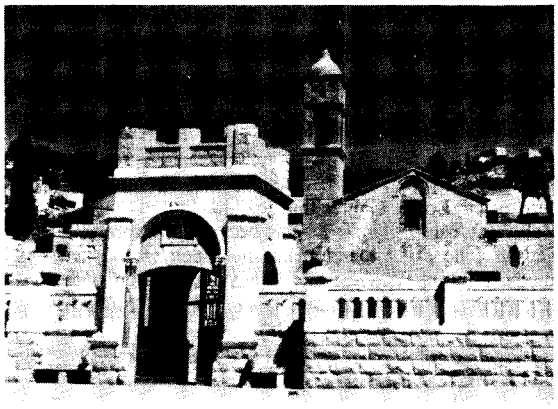
NAZARETH naz'ə-reth [Gk. *Nazara(th), Nazaret(h)* (etymology uncertain; see below)] A city of Lower Galilee in the hill area just N of the great plain of Esdraelon. The top of the hill behind Nazareth commands a magnificent panorama, with the Sea of Galilee about 24 km. (15 mi.) to the east and the blue Mediterranean 32 km. (20 mi.) due west. Mt. Tabor rises 8 km. (5 mi.) to the east, and snow-capped Mt. Hermon stands as a sentinel about 100 km. (60 mi.) to the northeast. The modern city of Nazareth (en-Nâṣirah) lies in a high secluded valley open only to the west. The ancient village seems to have been located higher on the eastern slope of the hill to the northwest. Rock tombs have been located in the area.



Many scholars have regarded the Nazareth of Jesus' time as an unimportant village. This evaluation is based upon its location off the international trade routes, the lack of any mention in the OT, Apocrypha, or Josephus, and Nathanael's rather uncomplimentary "Can anything good come out of Nazareth?" However, it is always designated a *pólis* (city) and never a *kṓmē* (village). A. S. Geden observed that Nathanael's disdain may have been that of a "polished town-dweller for the uncultivated rural population" (*DCG*, II, 236) and need not represent a widely held opinion of the specific town.

The derivation of the name Nazareth is not certain. Some connect Mt. 2:23 ("He went and dwelt in a city called Nazareth [*Nazaret*] that what was spoken by the prophets might be fulfilled, 'He shall be called a Nazarene' [*Nazōraios*]") with Isa. 11:1, which says that a branch (*nēṣer*) would grow out of the roots of Jesse. In this case Nazareth would mean "sprout, shoot." Others relate the name to Heb. *nāṣar*, "watch," and understand it to mean "watchtower" or "guard place." This would imply that the original town was perched upon or near the brow of the hill, an idea that may be supported by Lk. 4:16-30, where Jesus is rejected by His townspeople and "led . . . to the brow of the hill on which their city was built, that they might throw him down headlong." If the same verb is taken in a passive sense, Nazareth could mean "preserved, protected" and the reference would be to the town's secluded setting.

In the NT Nazareth is best known as the boyhood home of Jesus. There Gabriel told Mary of the child she was to bear (Lk. 1:26-38). After the birth in Bethlehem it was to Nazareth that Joseph, Mary, and the Christ-child returned (2:39). Upon beginning His Galilean ministry Jesus left Nazareth to dwell in Capernaum by the sea (Mt. 4:13). He once returned to announce "the acceptable year of the Lord" and was rejected by His own townspeople (Lk. 4:16-30). The Lord was often identified as "Jesus of Nazareth" (Mk. 1:24; 10:47; Jn. 18:5, 7; etc.), and in Acts 24:5 His followers were called the "sect of the Nazarenes."

It is significant that Jesus spent His early manhood in

Greek Orthodox church built over the original Fountain of the Virgin in Nazareth (J. C. Trever)

a city free from the dominance of a parochial regime that would hold a strong aversion to anything foreign. "Galilee of the Gentiles" (Mt. 4:15) lent its impact to the growth of a religion destined to be universal in scope. Secluded, yet not isolated, Nazareth cradled the origin of the Christian faith.

Of the many sacred sites established by the Franciscans in Nazareth, only the Fountain of the Virgin can claim some credibility. However, many feel that this spring, situated in the center of modern Nazareth, is too remote from the ancient settlement to have served in Jesus' day. Nazareth enjoys a moderate climate and sufficient rainfall for vegetation. It began to be populated by Christians in the time of Constantine and in modern times has thousands of inhabitants, many of them Arab Christians.

R. H. MOUNCE

NAZARETH DECREE. An inscription said to have come from Nazareth, brought to Paris in 1878. Its "Ordinance of Caesar" proclaims capital punishment for violation of a grave. Since this is an unusual provision of Roman law at that time, some have taken it as an official response to reports of the resurrection of Jesus (cf. Mt. 28:13), thus as indirect evidence for His resurrection. Even assuming that the inscription is genuine, that it did come from Nazareth, and that it should be dated no later than the middle of the 1st cent., the most that can reasonably be inferred from the proclamation of such a law is evidence for a climate of opinion that would make it highly improbable that the disciples stole Jesus' body.

NAZIRITE naz'ə-rīt [Heb. *nāzîr*–'consecrated one,' < *nāzar*, 'to consecrate'; cf. also *nāḏar*–'to vow'; Gk. *nazeiraíos*, plus various words indicating "holiness" or "devotion." In Nu. 6:21b,c the RSV supplies "Nazirite" (cf. AV, NEB)]; AV NAZARITE. The basic meaning of the different Hebrew and Greek terms is that of "one consecrated, a devotee."

I. Origin and Nature
II. Regulations
III. Nazirites in Scripture
IV. Later Developments

I. Origin and Nature.–The Nazirites were an ancient order of persons consecrated to God by means of a vow. This order was the Israelite counterpart of the votive persons commonly found in ancient Near Eastern religions. Precisely when the institution originated is unknown, but when the regulations governing the Nazirites were laid down in the time of Moses (Nu. 6:1-21) it seems possible that they were intended to normalize a tradition that was already of some antiquity, and bring it firmly within the life of the covenant community.

The role of Nazirite was that of a votary, a sacred person who was consecrated to divine service for a specific period of time as the result of a vow and as an expression of special commitment to God. The nature of this relationship was given formal legal expression in Nu. 6, and was distinctive in character on several counts. A Nazirite could be one whose vow was made for him without his knowledge or approval, as with Samuel, who was offered to God in a vow made by his mother (1 S. 1:11). It is conceivable that Hannah herself was a Nazirite, since she was familiar with the general prescriptions, but the narrative does not mention her in such a capacity. Another involuntary Nazirite was Samson (Jgs. 13:3-5), who was proclaimed a person consecrated to God according to Nazirite tradition in an annunciation.

But the Nazirite could also enter into a relationship with God in full awareness of what would be involved. Some scholars (e.g., G. B. Gray, comm. on Numbers [*ICC*, 1903], pp. 57-61) have thought of an "early" Nazirite tradition, in which an individual such as Samson or Saul was pledged or pledged himself in a lifelong charismatic dedication, as contrasted with a "late" tradition, represented for them by the Numbers regulations, where the commitment was of a temporary nature. Others (e.g., Eichrodt; cf. de Vaux) have developed the idea of different traditions by positing an early Nazirite tradition not only of lifelong service but also of dedication to holy war. Thus the Samson narratives do not mention the prohibition about contact with corpses, and Samson had a great deal of such contact in his exploits. Those who assign an early date to the enactments in Numbers find the distinction between "early" and "late" Nazirite traditions unsupported by the text. The nature of the Nazirite vocation was consistently that of a distinctive, holy person who had dedicated himself to divine service and in return received certain spiritual endowments. Some scholars have related the separateness (*nᵉzîr*) of Joseph (Gen. 49:26; Dt. 33:16, AV) to the office of a prince (cf. Dt. 33:16; cf. also Gen. 49:26, NEB) as one eminent among his brethren (cf. Lam. 4:7, AV, NEB mg.). But aside from the fact of separation by virtue of position the other distinctive characteristics of the Nazirite are lacking. Finally, God "raised up" the Nazirites in a way that was not true of Israelite nobility or princes (Am. 2:11f.; note that here the Nazirites parallel the prophets, thus indicating the importance of the Nazirites to Israelite religion).

II. Regulations.–Basic to the Nazirite's status was the vow, which when made voluntarily was probably marked by a ceremony of dedication that included a consecrated offering (cf. Nu. 6:2, New King James Version). This marked the point of separation, which itself had two aspects, one "to the Lord," implying a definite spiritual relationship that may not have been particularly observable in others, while the second separated the Nazirite from certain contemporary customs and attitudes. He was to abstain from the fruit of the vine in any form, a prohibition that worked some hardship in a land where clean water was scarce and fermented drinks were the normal adult beverage. Yet this regulation alone made for distinctiveness in a cultural environment where alcoholism was an extremely serious social problem, and could leave no doubt

as to the status of the Nazirite. It also recaptured the stern life-style followed by the desert nomads of the wilderness period, and contrasted it forcibly with the far less rigorous sedentary life in Canaan, with its attendant moral temptations.

Equally distinctive was the prohibition against shaving or cutting the hair during the period of the vow (Nu. 6:5). The Nazirite's life was to be analagous to that of the unpruned vine (*nāzîr*) of Lev. 25:11; the vine was deliberately left untended for the first few years of its life so that thereafter its fruit would be mature. The Nazirite's entire body, including the hair, belonged to God, and if the hair remained untrimmed it would serve as a witness against any who shaved the head in the service of pagan deities.

The priestly nature of the Nazirite's witness was indicated by regulations forbidding consumption of unclean food (Jgs. 13:7) and contact with a corpse (Nu. 6:6f.), because of its defiling nature. Such a prohibition also applied to Aaron and his descendants (Lev. 21:1), except that they were excused when the deceased was a close relative. The Nazirite, like the high priest of Israel, was to be consecrated to God and serve as an example of a strict, obedient life of the kind demanded by the Sinai covenant. If the Nazirite became accidentally defiled by a dead person, he had to shave his hair off and make an offering to God to remove the defilement. Then if he so desired he could undertake an entirely fresh vow of consecration and separation.

When the period of a voluntary vow had ended, the Nazirite brought an offering to the door of the tabernacle and the sacrifice was performed by the priest. At that time the Nazirite's hair was shorn and burned, signifying publicly the termination of the vow (Nu. 6:13-20).

III. Nazirites in Scripture.–In the OT the only lifelong Nazirites mentioned were Samson and Samuel. Whereas the former was especially designated in this way by an angel from God (Jgs. 13:7), a commitment that was subsequently acknowledged by Samson himself (Jgs. 16:17), Samuel was nowhere mentioned in the MT as a Nazirite. In a fragmentary recension of 1 Samuel recovered from 4Q, the phrase "he shall be a *nāzîr* for ever" had been omitted from the Hebrew of 1 S. 1:22, due to haplography (F. M. Cross, *BASOR*, 132 [Dec. 1953], 15ff.). In the Hebrew recension of Sir. 46:13, discovered in the Ezra synagogue in Cairo in 1897, Samuel was described as a "Nazirite of God."

In the NT John the Baptist was the most outstanding example of a Nazirite, and may well have begun a fashion that other ascetic Christians emulated. While Jesus was a Nazarean (i.e., from Nazareth, Mt. 2:23) He was not a Nazirite, and as such He contrasted Himself to John (Mt. 11:18f.). Paul had evidently taken a Nazirite's vow which he began to terminate at Cenchreae by cutting off his hair (Acts 18:18), and which was completed formally in Jerusalem with other Christians under Nazirite vows (Acts 21:23f.).

IV. Later Developments.–By the NT period the Nazirite tradition was probably being encouraged in some areas of Essene life. According to Eusebius (*HE* ii.23.3) James the brother of Christ seemed to belong to a Nazirite group, as did a certain Bannus, tutor of Josephus, who was probably the Bunni mentioned in T.B. *Sanhedrin* 43a as a disciple of Jesus. The vow taken by the immoral Bernice, the sister-wife of Herod Agrippa II (Acts 25:13), was apparently Nazirite in character (cf. Josephus *BJ* ii.15.1 [313f.]). Josephus also recorded that on his return from Rome Agrippa was a benefactor to some Nazirites seeking release from their vows (*Ant.* xix.6.1 [294]). In the Mishnah the burning of the hair was recognized as an offering to God (*Nazir* iv.7; this entire tractate deals with the Nazirite vow).

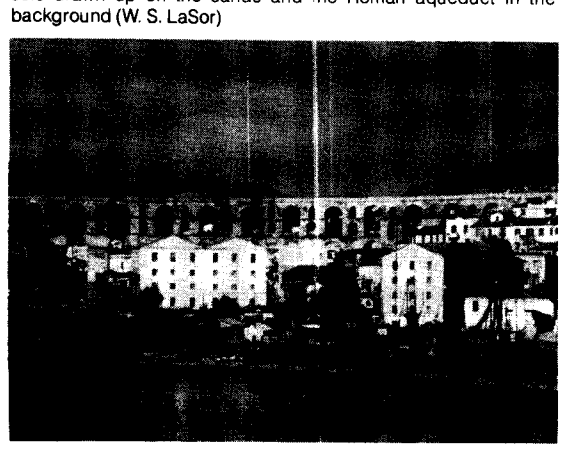
R. K. HARRISON

NEAH nē'ə [Heb. *nē'â*]. A city on the boundary of the territory in Lower Galilee that Joshua allotted to the tribe of Zebulun (Josh. 19:13). It is listed between Rimmon and Hannathon. The exact location has not been established, but modern Tell el-Wâwiyât and Nimrin have been suggested.



D. H. MADVIG

NEAPOLIS nē-ap'ō-lis [Gk. *Nea pólis* or *Neapolis*] (Acts 16:11). The seaport of the city of Philippi on the north coast of the Aegean Sea.

From Neapolis Paul launched his second missionary journey to Europe after he had a vision of a man from Macedonia (Acts 16:11). He probably passed through the town again on his third missionary journey (20:1) and certainly embarked there on his last voyage to Troas (v. 6).

The harbor area at Kavalla (ancient Neapolis), with sailing vessels drawn up on the sands and the Roman aqueduct in the background (W. S. LaSor)

Neapolis was about 16 km. (10 mi.) SE of Philippi and was beautifully situated on a promontory that stretched out into the north Aegean. It had a harbor on either side; at the better one on the west the galleys of Brutus and Cassius were moored during the battle of Philippi in 42 B.C. Although its location was once in doubt, Neapolis is now quite conclusively known to be covered by the modern town of Kavalla (see J. Finegan, *Archeology of the NT: The Mediterranean World of the Early Christian Apostles* [1981], pp. 100f.).

A member state of both the Athenian Empire (5th cent. B.C.) and the Second Athenian Confederacy (4th cent.), Neapolis later passed under the control of Macedonia and at the time of Paul was part of the Roman province of Macedonia. As a result of the success of the gospel in the area, the town was known as "Christopolis" in the early centuries of the Christian era. The only significant ruin at Kavalla that dates back to Roman times is an aqueduct. *See* Plate 62. H. F. VOS

NEAR. A term used by the English versions (AV often "nigh") to denote closeness or proximity of various kinds.

In the OT "near" as an adverb usually translates Heb. *qārôḇ*. Frequently it denotes spatial proximity; e.g., the angel of the Lord tells Lot that a city is "near enough to flee to" (Gen. 19:20). It can also signify temporal imminence; e.g., the prophets (Isa. 13:6; Ezk. 30:3; Joel 1:15; 2:1; 3:14 [MT 4:14]; Ob. 15; Zeph. 1:14) proclaimed that "the day of the Lord is near" (see also below). Sometimes it denotes closeness in a kinship relationship (e.g., Lev. 21:3; cf. "nearer," Ruth 3:12). A close blood relationship can also be signified by *šᵉʾēr* (lit. "flesh, body"; e.g., *šᵉʾēr bᵉśārô*, "near of kin," Lev. 18:6; cf. 18:12f.; 20:19; 25:45). In Ruth 3:12 "near kinsman" renders *gōʾēl* (lit. "redeemer"). (*See also* KIN.)

The expression "draw near" (or "come near") is usually the translation of Heb. *qāraḇ* or the virtually synonymous *nāgaš*. Both verbs are used frequently of approaching a person or object, e.g., coming close enough to speak to (*nāgaš*, Gen. 18:23) or even to touch (27:21f.; *qāraḇ*, Lev. 10:4f.) someone. In military contexts to "draw near" can signify approaching or entering into battle with an enemy (e.g., *qāraḇ*, Dt. 2:37; 20:2f.; *nāgaš*, 1 S. 7:10; 17:40f., 48). To "come near" (*qāraḇ*, Dt. 22:14; cf. "go near," *nāgaš*, Ex. 19:15) can also be a euphemism for sexual relations.

Of more significance is the way these verbs are used in relation to God. Because of God's HOLINESS and mankind's sin there is a great distance between God and humanity. To a human being, therefore, it is an awesome thing to "draw near" to God (cf. Ex. 3:5). At Sinai only Moses was able to ascend the mountain to meet God; the people of Israel "stood afar off" (Ex. 20:21; cf. 24:2). Only the consecrated priests could go near the altar (e.g., 28:43; 30:20; Lev. 9:7; cf. Nu. 3:10, 38; etc.). Yet the OT saints also confess that God draws near to His people (e.g., Ps. 119:151; 145:18; cf. 34:18 [MT 19]; 69:18 [MT 19]; 73:28; Isa. 50:8; 55:6; Lam. 3:57; cf. also in the NT the teaching of Jas. 4:8, which shows both dimensions: "Draw near to God and he will draw near to you").

The NT uses "near" in much the same way as the OT. The most common adverb, Gk. *engýs* (the usual LXX translation of Heb. *qārôḇ*), can denote either spatial proximity (e.g., Lk. 19:11; Jn. 11:38) or temporal imminence (e.g., Mt. 24:32 par.). "Draw near" is used to translate the verbs *engízō* (e.g., Mt. 21:1, 34) and *prosérchomai* (Acts 7:31; He. 4:16; etc.).

The NT presents the work of Christ against the background of the OT's teaching about mankind's alienation from God. Through Christ's blood Gentiles as well as Jews have been brought near to God (*engýs*, Eph. 2:13; cf. vv. 17f.). Therefore, because Jesus through His sacrifice has broken down the barrier between God and mankind, and because as high priest He intercedes for His people, believers can now draw near to God with confidence (*prosérchomai*, He. 4:16; 7:25; 10:22).

In some NT passages *engýs* and *engízō* are used in an eschatological sense to point to the imminence of the day of judgment and salvation promised through the OT prophets (see above; cf. also Isa. 51:5; Ezk. 7:7, 12). In the coming of Jesus, God's kingdom was already present; thus Jesus instructed His disciples to announce that "the kingdom of God has come near" (Lk. 10:9, 11). But the consummation of the kingdom still lies in the future, and the imminence of that day provides the basis for exhortations to a life of readiness and hope (e.g., Rom. 13:11; He. 10:25; Rev. 1:3; 22:10).

P. L. BREMER N. J. O.

NEARIAH nē-ərīʾə [Heb. *nᵉʿaryâ*—'squire (or servant) of Yahweh'].

1. Son of Shemaiah; a descendant of David (1 Ch. 3:22f.).

2. Son of Ishi; a Simeonite who led in defeating the Amalekites in the time of King Hezekiah (1 Ch. 4:42).

NEBAI nēʾbī [Heb. *K nôḇāy, Q nêḇāy*] (Neh. 10:19 [MT 20]). One of the "chiefs of the people" who signed the covenant with Nehemiah.

NEBAIOTH nə-bāʾyoth, nə-bīʾyoth [Heb. *nᵉḇāyōṯ, nᵉḇāyôṯ*; Gk. *Nabaiōth*]; AV also NEBAJOTH. The first-born son of Ishmael, and the chief of an Arabic tribe named after him (Gen. 25:13; 28:9; 36:3; 1 Ch. 1:29). The tribes of Nebaioth and his brother KEDAR were apparently renowned for sheep-raising in the time of Isaiah (Isa. 60:7). Nebaioth and Kedar are often mentioned together in Assyrian inscriptions (e.g., cf. "Nabaiati" and "Qedar" in *ANET*, pp. 298-300). They were apparently two of the most prominent tribes in northwest Arabia. Many scholars formerly identified Nebaioth with the NABATEANS; but the fact that the former is spelled with a Heb. *t* and the latter with a *ṭ* makes this theory unacceptable.

A. S. FULTON N. J. O.

NEBALLAT nə-balʾət [Heb. *nᵉḇallaṭ* (Neh. 11:34); possibly from Akk. *Nabu-uballiṭ*, considered to be an Assyrian governor of Samaria in the 7th cent. B.C. (*IDB*, III, 528)]. A town of postexilic Benjamin in the northern Shephelah, named in a list (Neh. 11:31-35) just before Lod. It has been identified with Beit Nabala (Khirbet Nevallat), 7 km. (4 mi.) NE of Lod (*GTTOT*, §§ 1090, 1095 [p. 395]).

W. S. L. S.

NEBAT nēʾbat [Heb. *nᵉḇāṭ*]. The father of Jeroboam (1 K. 11:26, and frequently elsewhere in 1 Kings, 2 Kings, and 2 Chronicles). The name occurs only in the phrase "Jeroboam the son of Nebat," and is evidently intended to distinguish Jeroboam I from the later son of Joash.

NEBO nēʾbō [Heb. *nᵉḇô* < Akk. *Nabû*].

1. One of the two principal gods of the later Babylonian pantheon, mentioned with Marduk (Bel) in Isa. 46:1: "Bel bows down, Nebo stoops, their idols are on beasts and cattle," an ironic allusion to the New Year (*Akitu*) proces-

sion in which the image of Nabu was brought to Babylon from his temple, Ezida, in Borsippa. Considered the son of Marduk, keeper of the tablets of the gods, and a patron of learning and the scribal art, Nabu began in the 2nd millennium (e.g., with Nebuchadrezzar I, 1125 B.C.) to supersede older Sumerian gods in many theophoric names, including the names of three of the six rulers of the Neo-Babylonian Empire (625-539 B.C.), Nabopolassar, Nebuchadrezzar, and Nabonidus. Cited in the Bible are NEBUCHADREZZAR and his officers NEBUZARADAN and NEBUSHAZBAN. ABEDNEGO may well be an altered name meaning "servant of Nabu." The Neo-Babylonian kings described themselves as "beloved of Marduk and Nabu," an encomium also affirmed by Cyrus when he entered Babylon in 539 B.C.

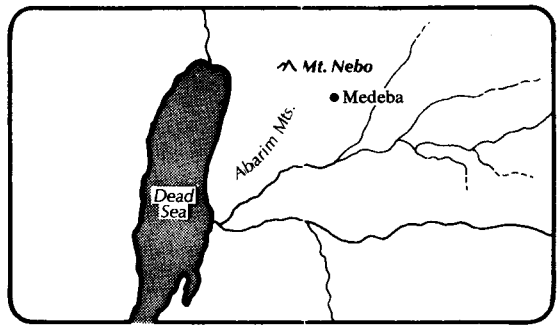
P. W. GAEBELEIN, JR.

2. [Heb. *n'ḇô* (Ezr. 10:43); Gk. *Nabou, Nooma* (1 Esd. 9:35)]; AV also ETHMA (1 Esd. 9:35); NEB also NOOMA (1 Esd. 9:35). One of the faithful Jews who put away their foreign wives.

NEBO nē'bō [Heb. *n'ḇô*].

1. A town in Moab assigned to the tribe of Reuben (Nu. 32:3) and occupied by Bela (1 Ch. 5:8). Nu. 32:3 lists it between Sebam and Beon (taken by some to be Baal-meon) and in 32:38 after Heshbon and Elealeh. Isa. 15:2 names it with Medeba. Jeremiah joins it with Kiriathaim (Jer. 48:2) and mentions it between Dibon and Beth-diblathaim (v. 22). Mesha, king of Moab claimed that he captured it, killed its inhabitants, and dedicated it to Ashtar-Chemosh (Moabite Stone, lines 14-18). Jerome said that it was the site of an idol of Chemosh (comm. on Isa. 15:2).



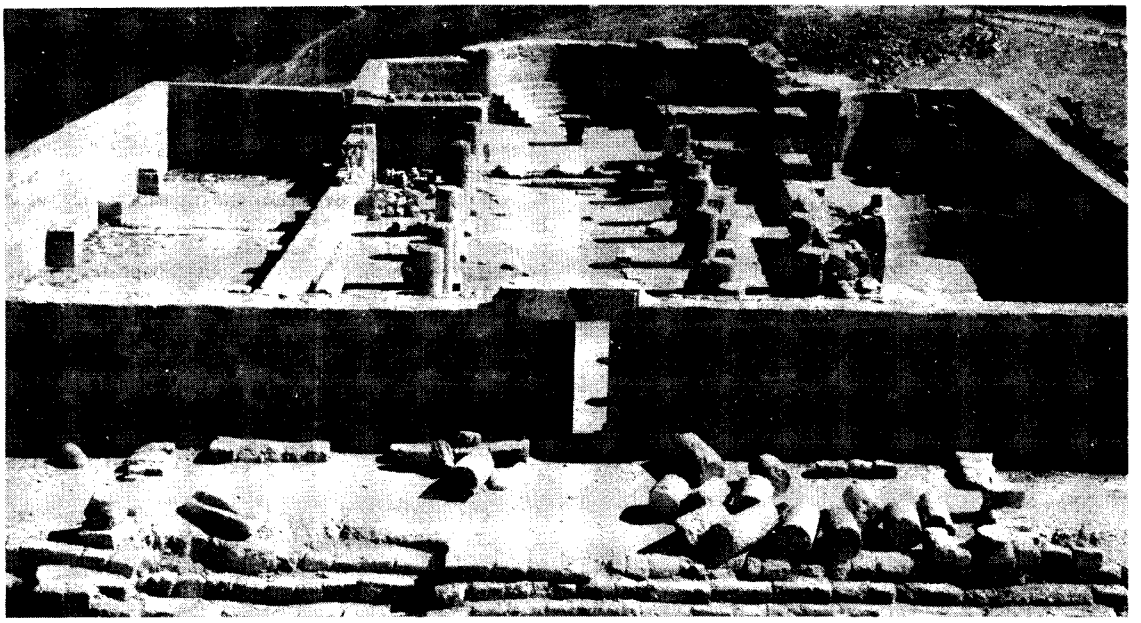
Eusebius (*Onom.* 136.12) located Nebo 8 Roman mi. (about 11 km. [7 mi.]) S of Heshbon, but modern scholars tend to identify it with Khirbet el-Mekhaiyeṭ, about 8 km. (5 mi.) SW of Ḥesbân (Heshbon). Cf. *AASOR*, 15 (1935), 110f.

Bibliography. -M. Piccirillo, *Liber Annuus*, 23 (1973), 332-358; S. Saller, *Liber Annuus*, 16 (1966), 164-298; 17 (1967), 5-64; S. Saller and B. Bagatti, *The Town of Nebo (Khirbet el-Mekhayyat)* (1949).

2. A place in Judah mentioned after Bethel and Ai in the account of the return of the exiles (Ezr. 2:29 par. Neh. 7:33). Grollenberg (*GAB*) identified it with Nûbā NW of Bethzur. *WHAB* locates it near Aijalon, which fits the context better. Abel, following Conder, argued that a site near Khirbet Qilā (Keilah), i.e., NW of Beth-zur, fits the context, but he attempted to identify Elam, Harim, and Magbish as places, whereas the text identifies them as persons (*GP*, II, 398). W. S. L. S.

NEBO, MOUNT [Heb. *har-n'ḇô*]. The mountain from which Moses saw the Promised Land and where he died.

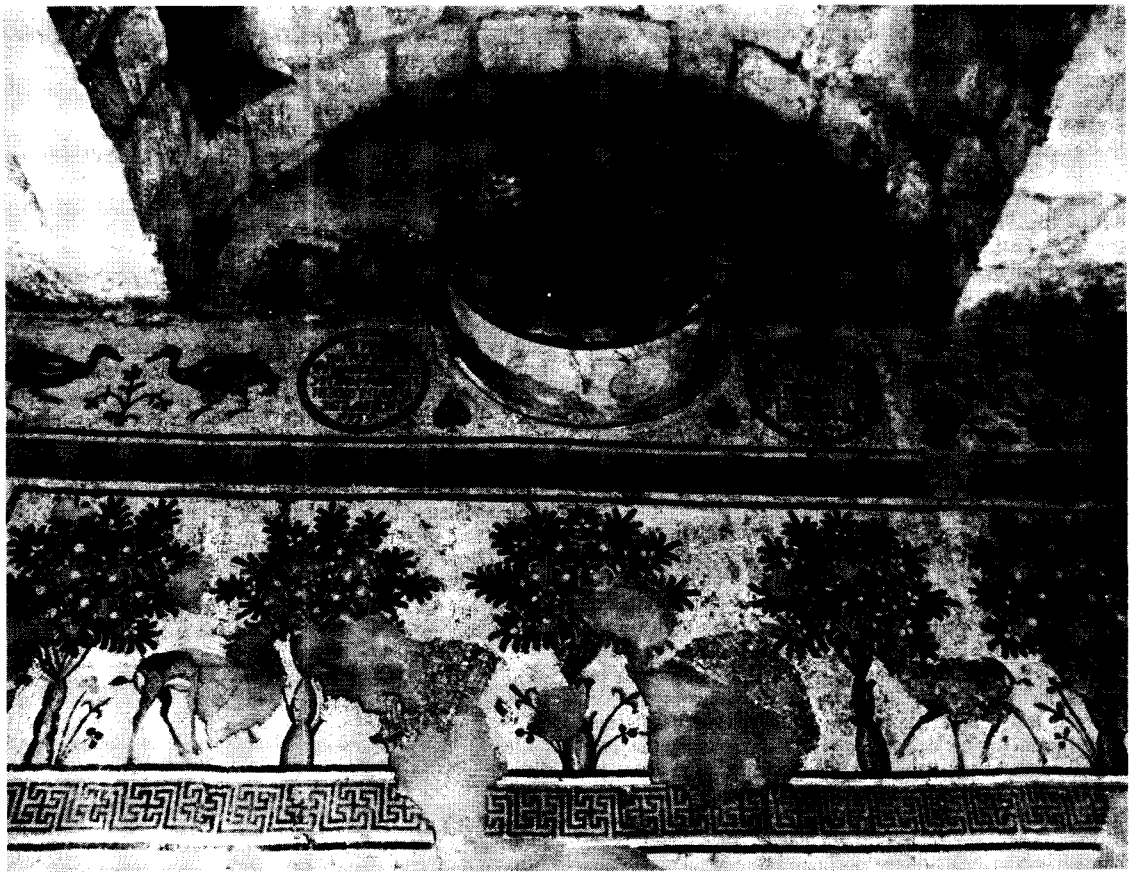
In the Bible this name occurs twice (Dt. 32:49; 34:1). In the first passage Mt. Nebo is said to be in the Abarim mountains; in the second it is called the headland of PISGAH. Today Mt. Nebo is identified with a headland called Râs es-Siâghah, 10 km. (6 mi.) NW of the town of Mâdebā (Medeba) in East Jordan. This headland forms the western extremity of a ridge that is an extension of the plateau more to the east. The ridge could represent Pisgah; it and the neighboring ridges could represent the Abarim Mountains. Dolmens and menhirs, along with flint tools, attest that the ridges were inhabited in remote antiquity. Two tombs of the Early Bronze Age III (3rd millennium B.C.) and one of the Middle Bronze II (2nd millennium B.C.) have been found in the vicinity. Near the foot of the northern slope of the ridge are several springs that supply



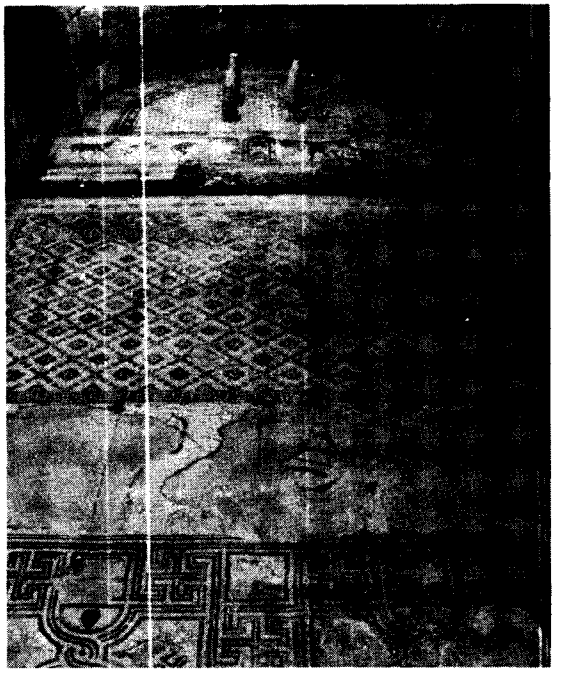
water not only to the fields to the west but also to the town of Mâdebā to the southeast. These springs are called 'Ayun Mûsā, the springs of Moses; the name of Moses is applied also to the wadi on the west, a ruin on the north, and the ridge and headland with its ruin on the south. They thus serve to keep alive the memory of Moses.

The chief events in Moses' career commemorated there were his view of the Promised Land, his death, and his burial. The vision of Moses is described in Dt. 34:1-4 and his death is reported in v. 5. His burial is described in v. 6 as follows: "He was buried in a valley in Moab opposite Beth-peor, but to this day no one knows his burial place" (NEB). Beth-peor, according to O. Henke (*ZDPV*, 75 [1959], 155-163), must be identified with Khirbet 'Ayun Mûsā, the only site in the region that can satisfy the requirements of the biblical text. In this case the "valley" would be Wâdī 'Ayun Mûsā. Thus the approximate location of the burial place of Moses was known but not its precise position.

In Byzantine times, however, the tomb was pointed out to pilgrims. Noteworthy among those pilgrims was Etheria (or Egeria), an abbess, and Peter the Iberian, a bishop. Egeria visited this region toward the end of the 4th cent. A.D. The hermits of 'Ayun Mûsā conducted her to a small church on the top of Mt. Nebo. Near the pulpit of the church a monument, which was a little higher than the pulpit, attracted her attention. When she asked what that monument was, she was told that it was the tomb of Moses. When she protested that according to the Bible no one knew where that tomb was, she was told that the hermits had this information from their forebears. Outside the church the hermits pointed out all the places that were visible from there.



Peter the Iberian visited Mt. Nebo twice in the 5th cent. A.D. He and his companions were informed that the large church that they saw stood over the cave in which Moses was buried. This fact had been revealed to a shepherd from the nearby town of Nebo. He reported his vision to his fellow citizens, who believed the story and on that account erected the church there. Around the church the pilgrims saw extensive monastic buildings. These remained in use until about the 8th cent., when they were abandoned and fell into ruins.



Mt. Nebo with its ruins was acquired by the Custody of the Holy Land in 1932. In 1933, 1935, and 1937 the ruins were thoroughly explored by the archeologists of the Franciscan Biblical Institute under the direction of Fr. Sylvester Saller. The excavations brought to light an extensive Byzantine monastic complex, which had developed around a sanctuary constructed on the highest point of the eastern summit of Siâghah. The archeologists focused their attention on this sanctuary so as to gain a more comprehensive view of its history. Their excavations clarified the last period of the sanctuary as well as of the

General view (looking east) of the basilica, showing the Presbytery (center rear), baptistery (right rear), Theotokos chapel (right front), and diakonikon-baptistery (left) (M. Piccirillo)

Mosaic floor of the baptistery chapel (6th-7th cent. A.D.) (M. Piccirillo)

Mosaic floor of the Theotokos chapel (6th-7th cent. A.D.) (M. Piccirillo)

monastery. The inscriptions of the mosaic floors, which still remained in the presbytery and in the side chapels, constituted a source of primary importance for the history of the Medeba bishopric and of the Medeba School of mosaics. Likewise, the pottery found in the monastery proved particularly useful for the knowledge of Byzantine pottery in Jordan. A platform found near the pulpit, on the eastern end of the southern aisle, was identified as part of the memorial of Moses seen by the pilgrims.

New data on the history of the sanctuary were added during the 1960's when the Superiors of the Custody of the Holy Land decided to cover the ruins of the basilica in order to begin the restoration of the mosaic floors. Fr. V. Corbo removed the mosaics of the Presbytery (area I), southern aisle (area II), baptistery (area III), and Theotokos chapel (area IV), and then excavated and examined the area down to bedrock.

In 1976-1978 the removal of the mosaics in the northern aisle (area V) and in the northern hall (area VI-VII-VIII) enabled Fr. M. Piccirillo to find the ancient diakonikon of the sanctuary, which served also as a baptistery, decorated in A.D. 531 by Soelos, Kayomos, and Elia with a splendid mosaic floor.

At the conclusion of archeological research in the basilica in 1978, the following tentative reconstruction of the history of the monument was made. In Phase I, around the first half of the 4th cent. A.D., a three-apsed monument, a *cella trichora* (possibly a mausoleum) was built on the highest spot of Siâghah. It was used for funeral purposes, if not originally then at least at a later time, perhaps after its violent destruction. In Phase II Christian monks readapted the cella trichora into a church with adjoined synthronon in the central apse, while reusing the two lateral apses as sacristies. To this reconstruction are to be connected the atrium and two funeral chapels on either side. It was in this church that the monks showed the "tomb of Moses" to Egeria. In Phase IIa a diakonikon-baptistery was added on the northern slope of the mountain. In August A.D. 531 the restoration and beautification of the diakonikon took place. On the southern slope, the funeral chapel was changed into a new room, itself decorated with a new mosaic floor. In Phase III, from the middle of the 6th cent. to the first years of the 7th, the sanctuary under went complete reconstruction. The atrium of the 4th century church was destroyed and the new three-nave basilica was built with its atrium extending toward the west. Subsequently the rooms and chapels to the north and south were dismantled and their floor raised to the floor level of the basilica. A long diakonikon was erected to the north, while to the south a baptistery chapel and a Theotokos chapel were the last features added to the basilica in 587/588 and in the first years of the 7th century.

NEBUCHADREZZAR neb-ə-kə-drez'ər, neb-yo͝o-kə-drez'-ər; **NEBUCHADNEZZAR** neb-ə-kəd-nez'ər, neb-yo͝o-kəd-nez'ər [Heb. *nᵉḇûḵaḏre'ṣṣar, nᵉḇûḵaḏne'ṣṣar* < Akk. *nabû-kudurri-uṣur*–'Nabu has guarded my boundary-stone' or 'May Nabu protect . . .' or '. . . the accession-rights'; Gk. *Nabouchodonosor*]. King of Babylon (605-562 B.C.) and conqueror of Jerusalem.

I. Forms of the Name
II. Historical Sketch
III. Biblical Significance
  A. Historical
  B. Apocalyptic

I. Forms of the Name.–The form *nᵉḇûḵaḏre'ṣṣar* (and its variants), with an *r*, occurs thirty-three times in the OT — twenty-nine times in Jeremiah, four times in Ezekiel. The form *nᵉḇûḵaḏne'ṣṣar* (and its variants), with an *n*, occurs fifty-eight times — thirty-two times in Daniel and otherwise in Kings, Chronicles, Ezra, Nehemiah, Esther, and Jeremiah. On the basis of the Akkadian, the form with *r* is generally preferred. The theory that the form with *n* comes from Aramaic is perhaps to be rejected, since the illustration usually given (Ben/Bar Hadad) has *r* in the Aramaic form. Another theory, that "Nebuchadnezzar" arises from an Aramaic word that translates Akk. *kudurri*, is specious. The LXX supports the form with *n* and is followed by the Vulgate; these versions are late, however, and do not provide evidence contemporary with the prophets. The form used by Josephus is that of the LXX. Possibly the *n*/*r* shift is dialectal, but this explanation is made questionable by occurrences of both forms in one book, Jeremiah (chs. 27–29 only). Since Jeremiah and Ezekiel are unquestionably from the time of the king, their evidence may be stronger — but the evidence of Daniel and of Jer. 27–29 is not to be brushed aside lightly.

II. Historical Sketch.–Nebuchadrezzar, frequently called "king of Babylon" in the OT, was the son of Nabopolassar (a usurper of the throne). His sons were Awîl-Marduk

(Evil-merodach; the later spelling Amēl-Marduk is orthographic, not phonetic, as the Hebrew form indicates), Marduk-šum-uṣur, and Marduk-nadin-aḫi, and his wife was Amytis, the daughter of Astyages king of Media. Knowledge about Nebuchadrezzar comes from a number of sources: about five hundred contracts dated variously to forty-three years of his reign, about thirty inscriptions, the biblical books mentioned above, and the authors Berossus, Menander of Ephesus, Megasthenes, Abydenus, and Alexander Polyhistor, who are known mostly from citations in Josephus and Eusebius. Most important for chronology, however, are the tablets published in *CCK*. Records from the eleventh to forty-third years of the reign of Nebuchadrezzar are almost entirely lacking, however, except for fragments of an inscription dated in the thirty-seventh year.

Nebuchadrezzar II — so designated to distinguish him from Nebuchadrezzar I (1112-1103) and from the pretenders Nebuchadrezzar III (Nidintu-Bēl, who reigned three months in 522) and Nebuchadrezzar IV (Arakha, who reigned from Aug. to Nov., 521) — acceded to the throne when his father died in 605. In Nabopolassar's nineteenth regnal year (607) in the month of Siwanu he and the crown prince had led an expedition against mountain tribes (*CCK*, pp. 64-67). The father in his twenty-first year (605) remained in Babylon, probably because of failing health, and the army under Nebuchadrezzar engaged the Egyptians at Carchemish. The Egyptians were badly beaten, and Nebuchadrezzar proceeded to conquer Ḫatti-land (Syria and Palestine; *CCK*, pp. 66-75; cf. Josephus *Ant.* x.6.1 [84-86]). On 8 Abu (Aug. 15) Nabopolassar died, and when Nebuchadrezzar received the news, he hurried back to secure his claim, ascending the throne on 1 Elul (Sept. 7), 605. Following the custom of his predecessors he counted this his "accession year" (MU.SAG; *CCK*, pp. 68f.); the first year of his reign commenced when he "took the hands" of the gods Bel and Bel's son on 1 Nisanu (Apr. 2, 604; lines 14f.). According to lines 13f. Nebuchadrezzar returned to Ḫatti-land in his accession year "until the month of Shabatu" (Feb. 2–Mar. 2, 604) and took "heavy tribute."

In his first year Nebuchadrezzar again invaded Ḫatti-land in Siwanu (May-June), receiving heavy tribute from "all the kings" and sacking Ashkelon in Kisliwu (Nov.-Dec.). According to his chronicle he "turned the city into a mound and heaps of ruins" and returned to Babylon in Shabatu (Jan. 23–Feb. 20, 603). In his second, third, and fourth years Nebuchadrezzar conducted campaigns in Ḫatti-land. The significance of these data for biblical studies will be mentioned below.

Foundations of the Hanging Gardens. According to classical sources, Nebuchadrezzar II designed the gardens as a series of terraces supported by arches to remind his bride Amyitis of her former home in mountainous Media (J. Finegan)

The campaign in the fourth year (Kisliwu, early Dec., 601) brought a confrontation with the Egyptian forces. The chronicle reports that they "inflicted great havoc on each other" (reverse, line 7), and as a result Nebuchadrezzar spent his fifth year at home rebuilding his army (reverse, line 8). Jehoiakim had been placed on the throne of Judah by Pharaoh Neco in 608. 2 K. 24:1 states: "Nebuchadnezzar . . . came up, and Jehoiakim became his servant three years; then he turned and rebelled against him." It is reasonable to assume that this revolt took place soon after the battle with Egypt (cf. Josephus *Ant.* x.6.2 [88]). In his sixth year Nebuchadrezzar was in Ḫatti-land from Kisliwu (Nov.–Dec., 599) until Addaru (Feb.–Mar., 598), during which time he "took much plunder from the Arabs" (reverse, line 10; cf. Jer. 49:28).

In the seventh year in the month of Kisliwu (Dec., 598–Jan., 597) the king marched his troops to Ḫatti-land and "encamped against the city of Judah." After a siege of three months he took the city and captured the king (cf. 2 K. 24:10-16). He dated this event "the second day of Addaru," i.e., Mar. 15/16, 597 (not 598, as sometimes given; the author of 2 Kings, using a Tishri-Tishri year, calculated that this was Nebuchadrezzar's eighth regnal year — the first would have commenced in Tishri, 605, the beginning of Jehoiakim's fourth regnal year). Nebuchadrezzar put on the throne of Judah "a king of his heart," namely, the puppet Zedekiah (v. 17). Jehoiachin, who had succeeded his father Jehoiakim, was taken to Babylon (v. 12; 2 Ch. 36 10; Ezk. 40:1).

In his ninth year the Babylonian king seems to have had a confrontation with Akkad and Elam (reverse, lines 16-20, broken text). In the tenth year (595-594) and again in the eleventh he put down a rebellion in Akkad and also had reason to march into Ḫatti-land (reverse, lines 21-25). The Babylonian Chronicles break off at this point and do not resume until the third year of Neriglissar, 556. Nebuchadrezzar was succeeded by his son Awīl-Marduk (Evil-merodach) in early October, 562. This date is deduced from two bits of evidence: the last date formula based on the reign of Nebuchadrezzar, 26 Ululu of his forty-third year, which is found on a tablet from Uruk (modern Warka, biblical Erech); and the first date formula based on the reign of Awīl-Marduk, 26 Ululu of his accession year, found on a tablet perhaps from Sippar. Nebuchadrezzar could not have died much earlier than the latter date, i.e., Oct. 8, 562 (cf. R. A. Parker and W. H. Dubberstein, *Babylonian Chronology* [2nd ed. 1956], p. 12).

Between Nebuchadrezzar's eleventh and forty-third years a number of events must be placed. According to Josephus there was a thirteen-year siege of Tyre beginning in Nebuchadrezzar's seventh year (*CAp* i.21 [156, 159], an account probably from Menander of Ephesus; cf. Ezk. 29:18). A text published in 1882 by T. G. Pinches (*Transactions of the Society of Biblical Archaeology*, 7 [1882], 210-225) records Nebuchadrezzar's march in the thirty-seventh year of his reign against Amasis king of Egypt. According to Pinches this was an expedition to quell the revolt of Amasis (Ahmoses), who had been placed on the Egyptian throne as a Babylonian puppet after the defeat of Apries (Hophra) in 572. The many building projects in Babylon, some of which have left inscriptions, must be placed in this period (cf. Dnl. 4:30; *see* BABYLON IV). And, of course, the siege and destruction of Jerusalem occurred in this period (*see* JERUSALEM III.E).

III. Biblical Significance.–Since Nebuchadrezzar is named about ninety times in the OT, his importance is

to be carefully evaluated. It falls biblically into two categories, the historical and the apocalyptic.

A. Historical. Nebuchadrezzar was the king who brought the Davidic dynasty to an end. He besieged Jerusalem, captured it, and finally destroyed it completely. He carried its last legitimate king (Jehoiachin) captive to Babylon, recognizing his royal status by providing daily rations and thus preserving his seed.

According to Dnl. 1:1-6 the Babylonian king came to Jerusalem in the third year of Jehoiakim (*see* DANIEL, BOOK OF VIII.B), besieged it, and carried off not only treasures but also members of the royal family and nobility, among whom was Daniel. It is not known what chronological system Daniel used. According to that used in 2 Kings Jehoiakim's first regnal year began in Tishri (Sept. 10), 608, and he reigned eleven years (23:36), or until 597. His third year, according to this reckoning, would have begun in Tishri, 606, and extended to Tishri, 605. It is clear that Nebuchadrezzar was still crown prince until he ascended the throne in September, 605, and it is hardly likely that he would have taken time to collect people and goods from Jerusalem when he was rushing back to Babylon to secure his throne. More reasonable, it seems, is the view that the "siege" of Jerusalem to which Daniel refers took place in 604, when the Babylonian king destroyed Ashkelon and made Jehoiakim his tributary (2 K. 24:1; cf. Jer. 47:5). Jehoiakim revolted in the third year, which coincides with the terrible beating that the Babylonians took at the hands of Egypt in Nebuchadrezzar's fourth year (Josephus *Ant.* x.6.2 [88]).

The siege to which the author of 2 Kings referred (24:10) occurred in the eighth year of Nebuchadrezzar's reign (v. 12). As pointed out above, Nebuchadrezzar's eighth regnal year by his reckoning did not begin until 1 Nisan (Apr. 13) 597, whereas according to the Tishri-Tishri year it had already begun the preceding October, which was also the start of Jehoiakim's eleventh year. Jehoiakim died and was succeeded by his son Jehoiachin (Coniah), who reigned but three months (v. 8; 2 Ch. 36:9). According to the Babylonian Chronicle, Jerusalem was taken on 2 Adar (Mar. 16); hence Jehoiachin's accession to the throne can be calculated as at the end of 598 (specifically Dec. 9, 598, if the "three months and ten days" of 2 Ch. 36:9 are taken literally). Mattaniah, son of Josiah and uncle of Jehoiachin, was put on the throne as a puppet and given the throne-name of Zedekiah (2 K. 24:17). Zedekiah's first regnal year was counted from 1 Tishri (Oct. 9) 597.

Because of Zedekiah's revolt against Babylon, in the ninth year of his reign, on the tenth day of the tenth month (Jan. 15), 588, the armies of Nebuchadrezzar laid siege to Jerusalem (2 K. 25:1; Jer. 52:4; Ezk. 24:1f.). The Egyptians apparently attempted to come to the aid of Judah (cf. Jer. 37:4f.). Ezekiel's prophecy against Pharaoh (Ezk. 29:1ff., dated Jan. 7, 587) and Jeremiah's attempt to go to the land of Benjamin (Jer. 37:11f.) are to be related to this event. On 9 Tammuz (July 18) 586 there was severe famine in Jerusalem (2 K. 25:3; Jer. 39:2). A breach was made in the walls; the Judean king and his warriors attempted to flee but were overtaken "in the plains of Jericho" (2 K. 25:5). Zedekiah was taken prisoner to Riblah (near Hamath on the Orontes), where the Babylonian king had his headquarters, and punishment was meted out (vv. 6f.; Jer. 39:4-8; 52:6-11). On 7 Ab (Aug. 12; cf. 2 K. 25:8) or 10 Ab (Aug. 15; cf. Jer. 52:12) in the nineteenth year of Nebuchadrezzar Jerusalem was burned, the walls were destroyed, and many of the people were taken captive (Jer. 52:13ff.). Gedaliah was appointed governor with his headquarters at Mizpeh (2 K. 25:22f.). He was killed by what appears to have been some of the pro-Egypt Judeans (v. 25; Jer. 41:2; cf. 40:1–43:13). Jehoiachin, the last surviving king of the Davidic dynasty, was released from prison on 27 Adar (Apr. 2) 561, "in the year that he [Evil-merodach] began to reign" (i.e., in his accession year; cf. 2 K. 25:27-30; Jer. 52:31 dates the release two days earlier).

According to Dnl. 2:1 Nebuchadrezzar's dreams occurred in his second regnal year. He built a colossal image of gold and set it up on the plain of Dura (3:1); Daniel's companions refused to worship it. The king's tree dream was fulfilled by a curious disease (sometimes identified as lycanthropy, but more accurately boanthropy) that lasted for "seven times," generally interpreted to mean seven years. Whether these data are to be taken as a record of historical events or as figures used in an apocalyptic prophecy is debatable. The disease in particular has led some scholars to conclude that the author has mistakenly identified Nabonidus, Babylon's last king and often characterized as insane, with Nebuchadrezzar.

B. Apocalyptic. Beyond question, Daniel is an apocalyptic work, for its stated purpose is to reveal what is to take place "in the latter days" (10:14; cf. 2:45). A characteristic of apocalypses is the use of historical and geographical names symbolically to set forth a revelation. Thus "Babylon" in Rev. 17–18 is generally interpreted to mean "Rome," but more likely it was meant to symbolize any tyrannical and satanic anti-God system. "Nebuchadrezzar" can be similarly interpreted as the splendid head of a great world kingdom that was given several opportunities to recognize the kingdom of God (and appeared to do so — but repeatedly, indicating a lack of true repentance; cf. Dnl. 2:29; 4:34-37 [MT 31-34]; likewise Darius, 6:26-28 [MT 27-29]). This interpretation is not a rejection of the historicity of Daniel; it is rather a recognition that the author's dreams and visions were God-given revelations, in the form of apocalyptic, of what would take place concerning the people of God, and in particular the establishment of the kingdom of God (cf. W. S. LaSor, D. A. Hubbard, and F. W. Bush, *OT Survey* [1982], ch. 51). In the days of the great king Nebuchadrezzar, who is portrayed as the head of gold (2:38), was foretold the end of man-made governments and the advent of the kingdom that God will establish and that will never be destroyed (v. 44).

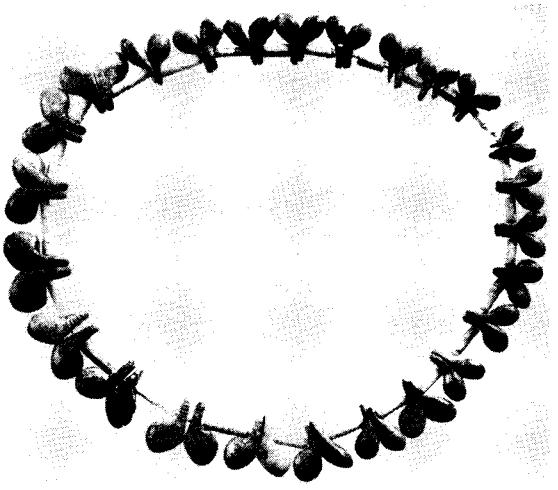
NEBUSHAZBAN neb-ə-shaz'ban [Heb. *nᵉḇûšazbān*; Akk. *Nabû-šûzibanni*–'Nabû, deliver me']; AV NEBUSHASBAN. A high Babylonian military or diplomatic officer (the RABSARIS) who, with other chief officers of King Nebuchadrezzar, was appointed to protect Jeremiah after the taking of Jerusalem (Jer. 39:13).

NEBUZARADAN neb'ə-zär-ā'dən, -zär'ə-dan [Heb. *nᵉḇûzar'ᵉḏān*; Akk. *Nabû-zēr-iddin*–'Nabû has given offspring']. A senior officer of Nebuchadrezzar's army, who destroyed Jerusalem after the siege of 586 B.C. (2 K. 25:8-10; Jer. 52:12-14) and carried out his orders concerning the deportation of exiles (2 K. 25:11f., 18-21; Jer. 39:9f.; 52:15f., 24-27; cf. 41:10; 43:6) and the safety of Jeremiah (39:11-14; 40:1-5). He returned to Jerusalem some four years later (52:30) to deport a further 745 Judeans to Babylonia. His title, *raḇ ṭabbāḥîm* (RSV "captain of the guard"), perhaps means "chief executioner" (cf. *ṭāḇaḥ*, "slaughter [for sacrifice]"; *tabbāḥ*, "cook," "butcher"); it was comparable to that bestowed on high court officials in Egypt (Gen. 37:36) and Babylonia (Dnl. 2:14); *see also* CAPTAIN; GUARD. R. K. H.

NECHO; NECHOH. *See* NECO.

NECK [Heb. *ṣawwā'r, 'ōrep, 'ārap, gārôn* (Isa. 3:16; Ezk. 16:11), *gargārōṯ* (Prov. 1:9; 3:3, 22; 6:21), *mapreqeṯ* (1 S. 4:18); Aram. *ṣawwa'r* (Dnl. 5:7, 16, 29); Gk. *trachēlos*]; NEB also STUBBORN, OBSTINATE. The Hebrews' choice of word for "neck" apparently depended upon which of its physical aspects they wished to emphasize. *Maṗreqeṯ* (<*pāraq*, "break off, split," perhaps denoting the neck as what separates or splits the head from the body trunk) seems to describe the upper spinal column, which if fractured, can cause sudden death (1 S. 4:18). The verb *'ārap* means "break the neck" and is used in sacrificial connections (Ex. 13:13; 34:20; Dt. 21:4; Isa. 66:3). The related noun *'ōrep*, "neck," apparently refers to the neck's rigid, skeletal structure (which can be broken; see Lev. 5:8; Job 16:12; cf. Prov. 29:1). *'Ōreṗ* is used in eight of its twelve occurrences in the metaphor "stiffened his neck" (i.e., refused to obey), which the NEB translates "be stubborn, obstinate" (cf. 2 Ch. 36:13; Neh. 9:16f., 29; Prov. 29:1; Isa. 48:4; Jer. 7:26; 17:23; 19:15). *Gārôn*, "throat" usually refers to the organs of swallowing or speaking (cf. Ps. 5:9 [MT 10]; 69:3 [MT 4]; 115:7; 149:6; Isa. 58:1; Jer. 2:25) and apparently also to the front of the neck. One pictures the daughters of Zion (Isa. 3:16) with heads not only lifted but haughtily tilted back, exposing the throat. Perhaps more appropriate for the external neck is the related *gargārōṯ*, used only in Prov. 1:9; 3:3, 22; 6:21, which liken certain virtues to ornaments hung around the neck.



The common word for neck is *ṣawwā'r*, which means "the back of the neck" (BDB, p. 848), and has a number of associations. It is used of an embrace — "he fell on his neck (and wept)" — especially in Genesis (33:4; 45:14; 46:29). It suggests strength, beauty (Job 39:19; 41:22; Cant. 4:4; 7:4), or resolve (Neh. 3:5). The *ṣawwā'r* is adorned with jewels, collars, and chains (Gen. 41:42; Jgs. 5:30; 8:21, 26; Cant. 1:10; cf. Aram. *ṣawwa'r* in Dnl. 5:7, 16, 29). It dramatizes vulnerability to the sword (Ezk. 21:29) and to drowning (e.g., Isa. 8:8, "[the waters] will overflow and pass on, reaching even to the neck" [cf. 30:28; Ps. 69:1, where *nepeš*, "soul," is translated "neck"]). In Mt. 18:6 par. Jesus said that it is better to be drowned with a millstone around one's neck than to make children sin. Military victory is demonstrated by a foot on the enemy's neck (Josh. 10:24), and servitude and oppression by a yoke around the neck (Gen. 27:40; Dt. 28:48; Isa. 10:27; 52:2; Jer. 27:2–28:14; 30:8; Lam. 1:14; 5:5; Mic. 2:3; cf. Acts 15:10; the NT frequently uses the image without mentioning the neck [e.g., Mt. 11:29]). The "yoke around the neck" is probably the dominant image that uses the neck. The most complete use of the image is in Jer. 27:2–28:14; here the Lord instructs Jeremiah to wear "thongs and yoke-bars" as symbols of submission to Nebuchadrezzar.

Certain animals that were not allowed as food (e.g., the firstborn that were not redeemed) were to be killed by having their necks broken (Ex. 13:13; 34:20); the turtledoves and young pigeons, which were sacrificed as sin offerings or burnt offerings, had their necks wrung (Lev. 5:8).

Finally, Paul praised the devotion of Prisca and Aquila, who had "risked their necks" for him (Rom. 16:4).

H. VAN BROEKHOVEN, JR.

NECKLACE. Several varieties of neck ornaments were popular in the ancient Near East. Gold chains were worn about the neck not only as ornamentation (cf. Heb. *rāḇîḏ*, "chain," Ezk. 16:11) but also as symbols of high rank and royal favor (cf. Gen. 41:42; Dnl. 5:7, 16, 29; *see* CHAIN). Ps. 73:6 (Heb. *'ānaq*, lit. "put on as a necklace"; cf. AV "compass about as a chain") probably refers to such a chain worn as a status symbol. This form of necklace is also referred to in 2 Ch. 3:16, where most commentators (with the RSV and NEB) emend the MT *baddᵉḇîr* (lit. "in the inner sanctuary" [so RSV mg.]; cf. AV "in the oracle") to read *kᵉrāḇîḏ* (RSV, NEB, "like a necklace"). (For one conjectural explanation of the process by which the Hebrew text may have changed see H. G. M. Williamson, *1 and 2 Chronicles* [*NCBC*, 1982], p. 210.)

Early Natufian necklace of dentalia and bone, found with a group burial in one of the Carmel caves, Wâdī el-Mughârah (Israel Department of Antiquities and Museums)

Bead or shell necklaces decorated with gold pendants. From Ur, ca. 19th cent. B.C. (Trustees of the British Museum)

Another style of necklace, a string of beads or jewels (cf. *ḥᵃrûzîm*, Cant. 1:10), is apparently referred to in Cant. 4:9. Although the precise meaning of *ṣawwᵉrôn* (cf. *ṣawwā'r*, "neck") is uncertain, the context supports the RSV and NEB rendering of the phrase *bᵉ'aḥaḏ ʿᵃnāq miṣṣawwᵉrônāyiḵ* by "with one jewel of your necklace" (cf. AV "with one chain of your neck"; see M. Pope,

Song of Songs [*AB*, 1977], p. 482). *See also* STONES, PRECIOUS.

Another variety of necklace was made of plaited wire to which pendants might be attached (cf. RSV "pendants," *ʿănāqîm*, PROV. 1:9).

NECO nē'kō [Heb. *nᵉḵōh*, also *nᵉḵô*; Gk. *Nechaō*]; AV NECHO, NECOH; NEB NECHO. Neco II, who reigned fifteen years (610-595 B.C.), the second king of the 26th Dynasty in Egypt and son of its founder Psamtik I (664-610; on these dates, see R. A. Parker, *Mitteilungen des deutschen archäologischen Instituts, Kairo*, 15 [1957], 208-212).

Neco inherited a strong and reunited Egypt from his shrewd father. At home he continued his father's main policies, including fostering Egyptian prosperity, strengthening the central government, and granting trade facilities to Greek merchants. He began a canal from the Nile to the Red Sea, which was either completed or reconditioned by Darius I of Persia a century later, and he sent out a Phoenician expedition that actually circumnavigated Africa (Herodotus iv.42, with unjustified skepticism; but cf. J. A. B. Lloyd, *JEA*, 63 [1977], 142). Again like his father, in foreign affairs Neco supported the failing strength of Assyria against the rising powers of Babylon and Media, probably to maintain a balance of powers in west Asia.

Thus in 609 B.C. Neco marched through Syria to help the last Assyrian king, Aššur-uballiṭ II, against the Babylonians (so the Babylonian Chronicle and 2 K. 23:29, RSV, NIV, and esp. NEB; contra AV, "Pharaoh-nechoh . . . went up against the king of Assyria"; for a discussion of the textual and political problems, see J. Gray, *I & II Kings* [*OTL*, 2nd ed. 1970], pp. 747f.). But in Palestine Josiah of Judah forced Neco to do battle and lost his life in the process (2 K. 23:29; 2 Ch. 35:20-24). This delay in Neco's march N to Assyria left unaided Assyria to be destroyed by Babylon. Perhaps this was what Josiah had intended — without foreseeing that Babylon would thereafter menace his country. Returning to Egypt, Neco replaced Josiah's son Jehoahaz with another son, Jehoiakim, and required tribute of him (2 K. 23:31-35; 2 Ch. 36:1-4). Egypt thus laid claim to Palestine after Assyria's demise, but at the battle of Carchemish in the summer of 605 Nebuchadrezzar of Babylon, just prior to his accession, captured Carchemish and chased the Egyptian forces home to Egypt (cf. Jer. 46). Judah then passed under Babylonian overlordship (2 K. 24:1, 7).

Egypt did not immediately interfere further in Syro-Palestinian affairs. But the Babylonian Chronicle records that in 601 Nebuchadrezzar II of Babylon marched against Egypt; in the ensuing battle (location not specified), both sides sustained heavy losses, and the Babylonian army had to refit for eighteen months. This Babylonian setback may have tempted Jehoiakim of Judah to rebel against Babylon (2 K. 24:1). Egypt under Neco, now neutral, sent him no aid.

Very few Egyptian historical records from Neco's reign are known. The OT and the Babylonian chronicles are the main sources for his Syrian campaigns; Herodotus added further data.

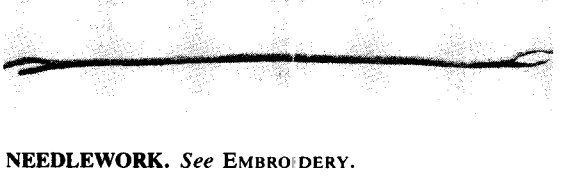
NECTAR [Heb. *nōpeṯ*] (Cant. 4:11); AV HONEYCOMB; NEB SWEETNESS. *Nōpeṯ* literally means "liquid honey" (from the comb); cf. Ps. 19:10 (MT 11), where the RSV renders *nōpeṯ ṣûpîm* "drippings of the honeycomb."

NEDABIAH ned-ə-bī'ə [Heb. *nᵉḏabyâ*–'Yahweh has freely given'] (1 Ch. 3:18). A descendant of David and son of Jeconiah (JEHOIACHIN).

NEEDLE [Gk. *hraphís* (Mt. 19:24; Mk. 10:25), *belónē* (Lk. 18:25)]. A word occurring only in the Synoptic accounts of Jesus' saying about the eye of the needle. Reflecting his medical background, Luke used *belónē*, which refers to a needle regularly used for surgical purposes.



Jesus' saying in the Synoptics is both eschatological and proverbial. It is used to illustrate (from a human perspective) the impossibility and cost of entering the kingdom of God. In Palestine the camel was the largest animal and the eye of the needle the smallest opening (cf. Mt. 23:24), hence the appropriateness of the proverb for Jesus' point. The rich man in the saying is someone who trusts in and identifies himself with his wealth. For such a person to expect a share in God's kingdom is absurd since trust in the Messiah (Mt. 16:13-20), identification with the kingdom and its priorities (6:33), and obedience to its law are the conditions for eternal life (cf. 19:16). Thus Jesus' command to the rich man to sell his possessions, give to the poor, and follow Him in order to have treasure in heaven (19:21) tested him at the point of his resistance to God and His kingdom. So understood, Jesus' words are neither a universal command for all disciples nor a critique of wealth per se, but a warning about the spiritual danger wealth poses to the hearts of the rich and the implications of this for membership in the kingdom.

Other interpretations of "the eye of the needle" have been suggested in order to make Jesus' words less harsh. (1) It was a narrow gorge. (2) It was one of the gates in the walls of Jerusalem. Both views lack supporting evidence. (3) *Kámēlos*, "camel," has been changed to *kámilos*, "cable, rope," in some late MSS.

The proverbial nature of Jesus' saying is reflected in two later talmudic passages (T.B. *Baba Metzia* 38b; *Berakoth* 55b; cf. also Midrash *Cant.* 5:2; Koran 7:38).

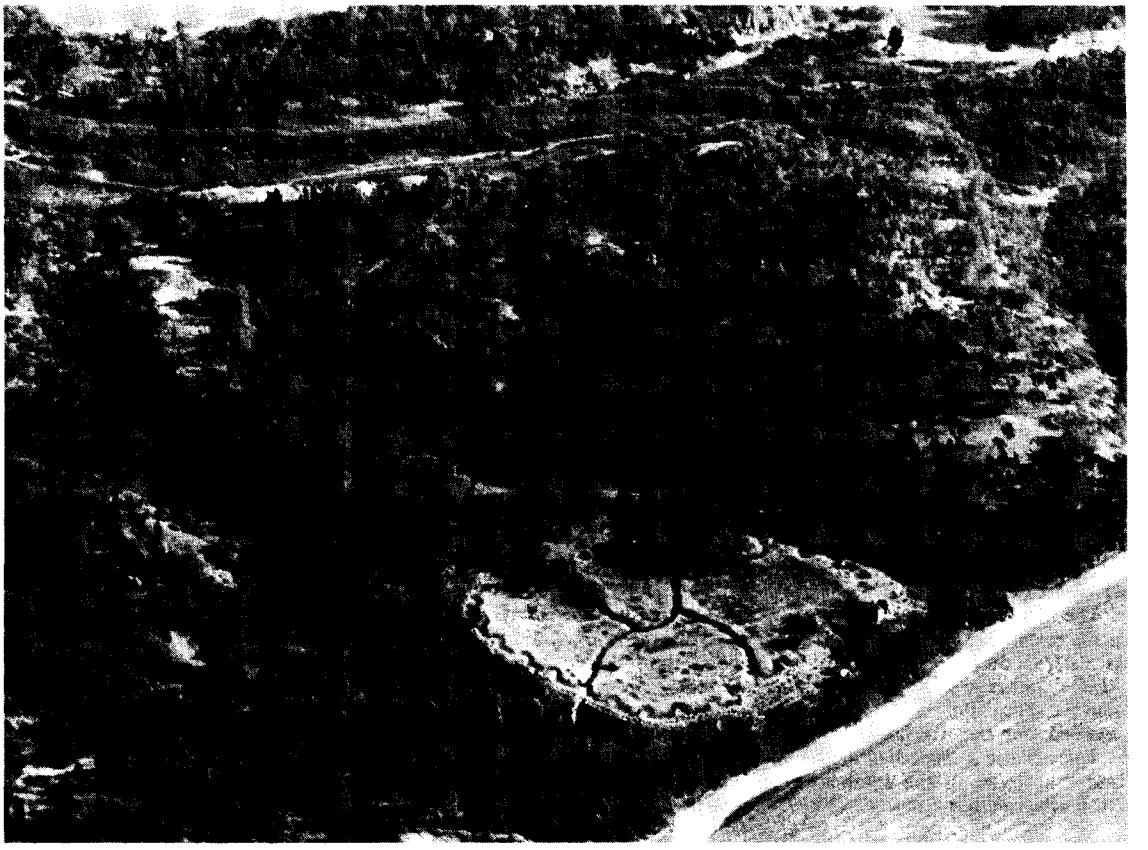
NEGEB neg'eb, neg'ev [Heb. *negeḇ*; LXX usually *lips* or *notos*– 'south'; sometimes *Nageb*]. The southernmost district of Judah (Dt. 1:7; 34:3; Josh. 10:40; 11:16; 12:8; "South," 15:21; Jgs. 1:9).

I. Name.–Because of the verbs derived from the root *ngb*, it is generally thought that *negeḇ* means "dry"; cf. T.B. *Temurah* 16a; Rashi on T.B. *Babba Kamma* 81b. But the LXX renderings and the parallelism with *têmān*/*têmānâ* (Ex. 26:18; 27:9; 36:23; 38:9; Josh. 15:1; Ezk. 47:19) suggest that the original meaning was "south." *Negeḇ* is probably cognate with Arab. *janûb*, "south (wind)," and *janb*, "beside."

II. Location and Topography.–In the Bible the term Negeb is applied to the district E and W of Beer-sheba and N of Kadesh-barnea (Nu. 13:17, 22). Kadesh was not in the Negeb, but in the Wilderness of Paran (vv. 3, 26) or Wilderness of Zin (v. 21; 20:1; 27:14), which was the southernmost district of Canaan (34:3; Josh. 15:1). The "wilderness of Beer-sheba" was S of Beer-sheba but N of Zin (Gen. 21:14; 1 K. 19:3f.). Thus the Negeb was not the triangle extending to Elath that is now called by the name.

The biblical Negeb corresponds to today's Beer-sheba Valley and the Besor region, sometimes called the northern Negeb. It is an hourglass-shaped, east-west zone. The eastern loop is a tectonically sunken area separating the Judean hills from the "wilderness of (Beer-sheba)," now called the Negeb highlands. On the north this loop is divided into two "bays" by a ridge running SW, an extension of the Hebron uplift. The Eocene hills from the Shephelah on the north (Giv'ot Lahav = Khasm el-Buteiyir) nearly close with those on the south (Giv'at Hablanim = Râs Ḥablein), forming a bottleneck near Beer-sheba.



The valley is drained westward by the Beer-sheba wadi system, which includes Nahal Malhata (Wâdī el-Milḥ) and Nahal Aroer (Wâdī 'Ar'arah) from the south. The Beer-sheba system joins Nahal Hebron (Wâdī el-Khalîl) in the center and then flows in a wide arc westward. The eastern loop is encompassed by Nahal Besor (Wâdī el-Khalaṣah) as it curves north and then west (Nahal 'Azza = Wâdī el-Ghazzeh). It collects Nahal Gerar (Wâdī Sherî'ah), the main streambed of an extensive system.

The entire region is covered by a layer of loess soil, a silt rich in quartz in the west and carbonates in the east. It is wind deposited; with the first rain it forms a crust that makes subsequent rains run off in deep gully erosion. The rainfall is marginal, averaging 20 cm. (8 in.) per year.

III. Pre-Israelite History.–*A. Chalcolithic* (4300-3200 B.C.).

Tell Abū Hureirah in the Negeb (A. F. Rainey)

Lining the streambeds are remains of numerous communal settlements, built by groups of pastoralists who possibly stayed only seasonally. The settlements are found in the east, center, and west; examples were excavated at Beer-sheba.

B. Early Bronze (3200-2000 B.C.). A major E.B. I and II city developed at Arad, and an Egyptian trading post was found at 'En ha-Besor ('Ain esh-Shellâl). No traces of E.B. III or IV are found.

C. Middle Bronze (2000-1550 B.C.). No Negeb settlements remain from the pastoralists of M.B. I, a nomadic culture once thought to reflect the patriarchal narratives. Two M.B. II sites are known in each of the "loops": Tel Malḥata (Tel el-Milḥ) and Tel Masos (Tell el-Meshâsh) in the east, and Tel Haror (Tell Abū Hureirah) and Tell el-Fâr'ah (S) in the west.

D. Late Bronze (1550-1200 B.C.). Not a trace of L.B. settlement appears in the eastern Negeb, but the west has some major sites: Tel Haror, Tel Sera' (Tell esh-Sheri'ah), Tel Gamma (Tell Jemmeh), Tel Ḥalif (Tell el-Khuweilfeh), and Tell el-Far'ah (S). Egyptian inscriptions (particularly those of Thutmose III) refer to some of these towns. Seti I encountered Shasu (pastoral nomads, often of a warlike character) when he marched across the north Sinai route toward Gaza. The area S of Beer-sheba, the Negeb highlands of today, was often called Edom and Seir; texts from the reigns of Ramses II and Ramses III speak of Shasu in the land of Edom/Seir (cf. *ANET*, p. 243; called Bedouin on p. 262). The biblical Amalekites and other ethnic groups (see below) were probably part of this nomadic society.

IV. Israelite History.–A. Patriarchs. The patriarchs spent much time in the Negeb (Gen. 12:9; 13:1; 24:62), mainly at Beer-sheba and Gerar. They also lived for a time "between Kadesh and Shur" (20:1) and traveled to Egypt by the "way to Shur" (16:7), the inland route to the delta across Sinai (Ex. 15:22). The Shasu were known to roam there (*ANET*, p. 259a), seeking pasturage in Egypt.

B. Southern Invasion. When the Israelites were at Kadesh-barnea, the Amalekites were in the Negeb (Nu. 13:29); thus the Israelites had to "go up" by the "way of the spies" (LXX interpretation of Atharim) during their abortive attempt to invade Canaan from the south (21:1). They were opposed by the Amalekites and Canaanites (13:29; 14:45; 21:1; 33:40) under the mysterious "king of Arad." The Israelites were routed and pursued from the hill country as far as Hormah (14:45). Their revenge, predicted in 21:1-3, is realized in Jgs. 1:17, but the theory that Simeon (mentioned with Judah in v. 17) penetrated the Negeb from the south has no support.

C. Tribal Groups. In addition to the Amalekites, other groups settled in the Negeb and later were absorbed into Judah. The tribal group of Caleb played a leading role in the conquest of the southern hill country (Josh. 15:13-19; Jgs. 1:10-15). There was also a "Negeb of Caleb" (1 S. 30:14), and one Calebite town, Madmannah, was assigned to the Negeb (Josh. 15:30; cf. 1 Ch. 2:49). The Negeb of Caleb was thus in the northern zone above Beer-sheba and also comprised the southern hill-country district (Josh. 15:48-51; cf. v. 19; Jgs. 1:15).

The "Negeb of the Kenites" (1 S. 27:10) must be sought in the eastern basin around Arad (Jgs. 1:16). Using the LXX (see *BHS*), one may deduce that the Kenites, the sons of Moses' father-in-law Hobab, entered via the wilderness "on the descent of Arad, which is in the Negeb, and they dwelled with the Amalakites" (see also the comms.).

There is also a "Negeb of the Jerahmeelites" (1 S. 27:10), and "the cities of the Jerahmeelites" appear alongside "the cities of the Kenites" (30:29). Like the Calebites, the Jerahmeelites appear in the family tree of Judah (1 Ch. 2:9, 25-33), but no geographical names are listed. The victory list of Sheshonq mentions two Arads, the second being "Arad of Beth-*yrḥm*," which may be a shortened form of Jerahmeel.

The "Negeb of the Cherethites" (1 S. 30:14) was in the western "loop," with GERAR as the chief town. The Cherethites are probably the Caphtorim of Dt. 2:23 (see also Am. 9:7; Jer. 47:4), since the Philistines came from Caphtor and are parallel to the Cherethites in Ezk. 25:16; Zeph. 2:5.

The Bible mentions a "Negeb of Judah" (1 S. 27:10; 30:14) but no "Negeb of Simeon." These tribes' joint conquest of Hormah is recorded in Jgs. 1:17. Judah may have begun to settle there after that victory or perhaps when Saul launched his campaign against the Amalekites (1 S. 14:48; 15:1-9). Simeon is known to have settled in a few places in addition to Hormah (Jgs. 1:17). Some were in the southern Shephelah and others in the northern fringe of the Negeb, namely, "Etam, En-rimmon, Tochen, Ether, and Ashan" (1 Ch. 4:31f.; Josh. 19:7). These were Simeon's towns until the reign of David (1 Ch. 4:31b-32).

D. Early Monarchy. Saul campaigned to drive the Amalekites out of the Negeb (1 S. 15:1-9, 32f.). While at Ziklag, David used his forces to carry the fight into the southern deserts "as far as Shur, to the land of Egypt" (27:8). When he became king in Hebron, David must have encouraged Simeon to occupy towns in the Negeb (Josh. 19:1-9; 1 Ch. 4:28-31); he had won the allegiance of the Negeb communities (e.g., 1 S. 30:26-31). Beer-sheba was evidently the capital of the Negeb of Judah under the united monarchy, as shown by David's census (2 S. 24:7).

E. Later Monarchy. The main Israelite settlements are listed in Josh. 15:21-32, probably in E-W geographical order with Beer-sheba in the center (read Arad for Eder in v. 21, and Aroer for Adadah in v. 22). Very few towns are firmly identified, although many ancient sites are in the area. Most Hebrew place names are not preserved in the Arabic toponymy.

The Negeb was Judah's main link in the trade route from Arabia to the Mediterranean coast (Philistia); because of its strong presence in the Negeb, Judah was able to fortify and control the route to Elath (via Qadesh and the forts in the wilderness of Beer-sheba and Zin/Paran). Solomon could thus launch his fleet to Ophir (1 K. 9:26-28; 2 Ch. 8:17). But in the fifth year of Rehoboam (926 B.C.) Sheshonq destroyed the Judean towns and forts, including two named Arad. Only during the first ten years of Asa's reign (911-901 B.C.; 2 Ch. 14:1, 6 [MT 13:23, 14:5]) could Judah refortify itself; some strongholds in the Negeb were probably built then. Asa's fifteenth year (896) saw a great Judean victory in the western Negeb around Gerar (14:8-14 [MT 7-13]; 15:10f.).

Judah's position was strengthened even more after 870 by Jehoshaphat, who not only increased the Judean armed forces (2 Ch. 17:1f.) but so controlled the caravan routes that the Philistines and Arabs paid him heavy tribute (vv. 10-13). To maintain his forces and stock provisions for sale to the caravans, he built many forts and store-cities. He not only controlled the Negeb as far as Beer-sheba (19:4), but also ruled Edom through a commissioner and dominated the route to Ezion-geber, although his maritime venture from there was unsuccessful (1 K. 22:47f.; 2 Ch. 20:35-37).

Judean hegemony was lost in the reign of Jehoram (849-841) when Edom revolted and set up its own king (2 K. 8:20-22 par. 2 Ch. 21:8-10), and the Philistines and Arabs invaded Judah and even Jerusalem (2 Ch. 21:16f.).

In the 8th century Judah was rejuvenated. Amaziah

reconquered Edom (793), and after his death (767) his son Azariah (Uzziah) rebuilt Elath (2 K. 14:22 par. 2 Ch. 26:2) and dominated the southern and western expanses (2 Ch. 26:7f.), receiving tribute from the Ammonites. But in 734 Rezin king of Syria aided the Edomites in regaining Elath (2 K. 16:5f.); the Edomites in turn joined the Philistines in attacking Judah as part of the Syro-Ephraimite war against Ahaz (2 Ch. 28:17f.; cf. vv. 5-15; 2 K. 16:5f.).

This situation prevailed until Hezekiah restored Judean control over the western Negeb in preparation for the war with Sennacherib. He sent his forces, mainly Simeonites, against the territory of Gaza in the west and against Mt. Seir (the Wilderness of Zin/Paran?) in the south (2 K. 18:8; 1 Ch. 4:39-43, reading Gerar for Gedor, with LXX). But Hezekiah's control of these territories was short lived; in 701 Sennacherib conquered all of Judah except Jerusalem (2 K. 18:13; 2 Ch. 32:1) and gave all the western plain to the loyal king of Gaza (*ANET*, p. 288a).

Judah was thus denied access to the border zones throughout the reigns of Manasseh and Amon, but by 722 could carry out administrative reforms even in Beer-sheba (2 K. 23:8). Judean settlements flourished in the Negeb in the late 7th cent. (Jer. 17:26). But while Nebuchadrezzar was refurbishing his army for an attack on Judah, the neighboring peoples began to raid and plunder (2 K. 24:1f.). As young King Jehoiachin and his mother awaited the Babylonian onslaught (597), the towns of the Negeb were besieged (Jer. 13:18f.). The Edomites supported Babylon and seized the Negeb and southern Judah (Ob. 8-10, 14; Ps. 137:7), as illustrated dramatically by the ostracon found at Arad urging the reinforcement of Ramath-negeb, "lest Edom should come there."

F. Postexilic Period. Some Judean communities must have survived in the Negeb, because Nehemiah recognized them as legitimate even though they were not within his small province of Jehud (Neh. 11:25-30; 444 B.C.).

The Negeb remained part of Idumea throughout the Persian and Hellenistic periods (Josephus *Ant.* v.1.22 [82]). John Hyrcanus conquered it in 125 B.C. and required the inhabitants to convert to Judaism or leave (Josephus *Ant.* xiii.9.1 [257f.]; *BJ* i.2.6 [63]). In the Herodian (early Roman) period a line of forts guarded the frontier.

A. F. RAINEY

NEGINAH nə-gē'nə; **NEGINOTH** nə-gē'nōth. A technical musical term indicating the use of stringed instruments, such as the lyre and harp; the AV transliteration of Heb. *n^{e}gînâ* (sing.) and *n^{e}gînôṯ* (pl.) in the superscriptions to Pss. 4; 6; 54; 55; 61; 67; 76 (MT v. 1 in each case; RSV "with stringed instruments"). The Hebrew term is derived from the verb *nāgan*, which in the piel means "touch" or "strike," indicating the manner in which a musical instrument is played (cf. 1 S. 16:16; 18:10; 2 K. 3:15; cf. also part. *nōg^{e}nîm*, "string-players," Ps. 68:25 [MT 26]).

N. J. O.

NEHELAM nə-hel'əm, **OF** [Heb. *hanneḥ^{ĕ}lāmî*]; AV, NEB, THE NEHELAMITE. The designation of Shemaiah, a false prophet who opposed Jeremiah (Jer. 29:24, 31f.). The RSV interprets it as referring to the place from which he came, but no such place-name has been found. Another possibility is that it may be a family name. Its similarity to the verb *ḥālam* ("dream") has led to the unlikely conjecture that it means "dreamer" (cf. Jer. 23:25, 32), an interpretation favored by L. Yaure, *JBL*, 79 (1960), 306-309.

NEHEMIAH nē-ə-mī'ə [Heb. *n^{e}ḥemyâ*–'Yahweh comforts'; Gk. *Neemia*]; AV Apoc. NEHEMIAS (1 Esd. 5:8), NEEMIAS (2 Macc. 1:18-36; 2:13; Sir. 49:13).

1. A postexilic governor of Judah and writer of the memoirs in the book called by his name. All that is known from contemporary sources about this Jewish patriot is found in this book. He was the son of Hacaliah (Neh. 1:1), and one of his brothers, Hanani (v. 2; 7:2), was a man of sufficient character and importance to have been made a ruler of Jerusalem. Some have inferred from 10:1-8 (MT 2-9) that Nehemiah was a priest, since he comes first in the list of names ending with the phrase "these were the priests." This view is supported by the Syr. and Arab. versions of 10:1 and by the Vulgate of 2 Macc. 1:21, which all refer to him as a priest. 2 Macc. 1:18 also refers to sacrificial activity on his part.

The argument based on Neh. 10:1-8 disappears if the pointing of *śe^{e}rāyâ*, "Seraiah" (v. 2) is changed to *śārāyw* and the verse reads "its princes," referring to the princes of 9:38 (MT 10:1). In this case, Nehemiah and Zedekiah would be the princes; then would come the priests, followed by the Levites.

Since Nehemiah was so grieved at the desolation of the city and sepulchres of his fathers and so zealous for the laws of the God of Judah, one can justly infer that he was brought up by pious parents who instructed him in the history and law of the Jewish people. The prevalence of names with the element Yah(weh) throughout the family reinforces this impression.

Doubtless because of his probity and ability he was apparently at an early age appointed by Artaxerxes king of Persia (Artaxerxes I Longimanus) to the responsible position of cupbearer. The office was "one of no trifling honor" (Herodotus iii.34). One of his chief duties was to taste the wine for the king to see that it was not poisoned, and he was even admitted to the king while the queen was present (Neh. 2:6). As cupbearer his responsibilities most probably included some palace administration, since this office in most royal courts seems to have been of a senior nature. Such personages were often eunuchs whether or not they had administrative duties connected with the female quarter of the palace. Perhaps the fact that Nehemiah was able to be present while the king and queen were together would imply that he was in fact a eunuch, though whether the term *sārîs* is the equivalent of a "castrate" or merely describes the office that Nehemiah held is uncertain. Some eunuchs at least seem to have been married (Gen. 39:1, where in different versions Potiphar is described as an officer, captain, or chamberlain), which leaves the traditional understanding of the term open to some question (cf. W. Rudolph, *Esra und Nehemia* [*HAT*, 1949], p. 103; J. M. Myers, *Ezra. Nehemiah* [*AB*, 1965], p. 96). This position close to the king enabled Nehemiah to obtain his commission as governor of Judea, along with the letters and edicts that enabled him to restore the walls of Jerusalem.

The occasion of Nehemiah's commission was as follows. Hanani brother of Nehemiah and other men of Judah came to visit him while he was in Susa (the Persian winter capital) in the ninth month of the twentieth year of Artaxerxes (Neh. 1:1; probably Nov./Dec., 445 B.C.). They

reported that the Jews in Jerusalem were in great affliction and that the wall was broken down and its gates burned with fire. Nehemiah then grieved and fasted and prayed to God that he might be granted favor by the king. Appearing again before the king in the month Nisan (Mar./Apr.) of the twentieth year (Neh. 2:1, probably 444), he was granted permission to go to Jerusalem to build the city where his fathers were buried. He was given letters to the governors of Syria and Palestine and especially to Asaph, keeper of the king's forest, who was ordered to supply timber for the wall, fortress, and temple. To afford him the proper degree of authority he was appointed royal commissioner (*tiršāṯā'*) of that Persian province ("Beyond the River") of which Jerusalem was the capital.

Armed with these credentials and powers he traveled to Jerusalem and immediately began the restoration of the walls. He was hindered by Sanballat governor of Samaria and others, among them part of the much more assimilated Jewish community that had lived in Jerusalem through the Exile. He nonetheless succeeded in these external renovations, including the provision of gates for the various entrances to the city.

Nehemiah then instituted a number of social reforms. He appointed the officers necessary for better government, caused the people to be instructed in the Law by public readings and expositions, celebrated the Feast of Booths, and observed a national fast at which the sins of the people were confessed and a new covenant with Yahweh was solemnly confirmed. The people agreed to avoid marriages with the heathen, to keep the sabbath, and to contribute to the support of the temple. To provide for the safety and prosperity of the city, one out of every ten persons living outside Jerusalem was compelled to settle in the rebuilt city. In all of these reforms Nehemiah was assisted by Ezra, who arrived in Jerusalem before Nehemiah. In 444 B.C. Ezra dealt firmly with the problem of marriages between Jews and people who stood outside the covenant (Ezr. 9:1–10:44) when he was organizing the life of the theocratic community, although he encountered some opposition to his plans for purifying the national stock. For Ezra, the difficulty was that foreign wives presented a grave threat to the spiritual integrity of the covenantal faith because of their general unwillingness to repudiate their national deities when they married Jews. To a large extent it was the women who perpetuated the religious traditions of the time, and trained their children to follow their ways. This situation continues to exist in some oriental countries, where the women are still regarded as responsible for maintaining the integrity of the religious and social traditions of the particular culture involved. The religious reforms that Ezra instituted regarding mixed marriages caused a considerable amount of social and personal upheaval. Necessary though it was for the spiritual stability of the theocracy, it could only have been carried to completion by the authoritative backing of Nehemiah, who evidently remained in office as governor until 433 B.C., when he visited Persia for a year.

On his return he discovered that Tobiah, one of his principal Ammonite opponents, had been granted accommodation in the temple courts by Eliashib the high priest, with whom Tobiah was evidently on friendly terms (Neh. 13:4-7). Nehemiah ejected Tobiah summarily and restored the accommodation to its former use. He was equally forthright with those Jews who had married women of Ashdod, Ammon, and Moab, beating, cursing, and abusing them for laying again the foundations of those processes of apostasy that had ultimately destroyed the Hebrew monarchy (Neh. 13:23-27). One of the sons of Joiada, the son of Eliashib the high priest, had married a daughter of Sanballat the Horonite, and he too was expelled.

Tobiah seems to have been an important Persian official bearing the title "servant" (Neh. 2:10), who obviously had influential friends in Judea (Neh. 6:18f.; 13:4f.). He may have had some jurisdiction over Ammonite territory (cf. W. F. Albright, "Dedan," in *Geschichte und AT* [A. Alt *Festschrift*; 1953], pp. 4, 6). The connection between this Tobiah and the Tobiad family which governed Ammonite territory from 'Arâq el-Amir is difficult to determine (cf. C. C. McCown, *BA*, 20 [1957], 63-76; P. W. Lapp, *BASOR*, 171 [Oct. 1963], 8-39). An inscription on the family shrine in their capital city mentioning Tobiah was once thought to refer to the enemy of Nehemiah, but it has been assigned subsequently to the period of Antiochus IV Epiphanes (*ca.* 175 B.C.).

Another influential opponent of Nehemiah's named Geshem (Neh. 2:19; 6:1f.; most probably the MT Gashmu of 6:6), was named on a silver bowl recovered from a pagan shrine in the east Delta region of Egypt (I. Rabinowitz, *JNES*, 15 [1956], 2-9 and plates 6-7). Another inscription in ancient Dedan (el-'Ulā) was dated "in the days of Jasm [Geshem]," indicating his prominence in Arabia (K. A. Kitchen, *Illustrated Bible Dictionary* [1980], I, 554).

The overall aim of the activities of Nehemiah was to purify the nation so that it would constitute a true theocracy grounded on the ethos of the Sinai covenant. By removing the stigma of foreign marital connections from the priesthood, Nehemiah was in effect restoring the temple personnel to their characteristically representative position in the nation as the ceremonially pure guardians and exemplars of the Law.

At least once during his governorship Nehemiah returned to Persia or Babylon (Neh. 13:6). Nothing is known about when or where he died. It is certain, however, that he was no longer governor in 407, for at that time, according to the Elephantine correspondence to the priests of Jerusalem, Bagoas occupied the position. Josephus (*Ant.* xi.5.8 [182f.]) reported only that Nehemiah died at an advanced age.

C. E. ARMERDING R. K. H.

NEHEMIAH, BOOK OF.

I. Name.–The book of Nehemiah, like its companion Ezra, is called by the name of its principal subject; more than half the book consists of Nehemiah's personal memoirs. In the LXX Ezra-Nehemiah is called Esdras B, while in English versions of the Apocrypha Nehemiah is usually called 2 Ezra.

II. Purpose.–Nehemiah carries the themes and narrative of Ezra to their conclusion, picking up the story with Nehemiah's concern for the problems facing the community that returned in the days of Artaxerxes I (464-424 B.C.). The account presupposes a remnant already in Jerusalem (Neh. 1:3) and the troubles faced in the work of Zerubbabel and Joshua if not of Ezra as well. Concern for building the wall dominates Nehemiah, as concern for the temple does Ezra. Completion of the temple in Ezra leads to a great spring festival (Passover and the Feast of Unleavened Bread, Ezr. 6:19, 22) while Nehemiah's wall building culminates in the autumn Feast of Booths (Neh. 8:12-18).

In both books the divine service is restored, but Nehemiah carries the worship to a higher climax of its development ("not since the days of Joshua," 8:17).

III. Sources.–Most of Nehemiah consists of personal memoirs. Neh. 1:1–7:4; 13:4-31, possibly augmented by some temple lists (e.g., ch. 3; 7:5-73a), are of the most personal kind of writing in Scripture. Although the final redaction is no doubt the work of someone other than Nehemiah (many find the hand of the Chronicler here), few would question the authenticity of the Nehemiah source.

The rest of Nehemiah consists of various lists (10:1-27 [MT 2-28]; 11:3-32; 12:1-26) and the narrative sections that link them. Of special interest is ch. 8, a narrative in which Ezra and Nehemiah are seen to be contemporaries. The lists in Nehemiah come from various periods, but all are probably taken from temple records. The list of wall builders (ch. 3) would naturally fit into a governor's report. The source of ch. 7 (cf. Ezr. 2) is identified in its heading (v. 5) as the genealogical record of the earliest returnees; Nehemiah himself probably appended it to his memoirs. Neh. 10:1-27 lists the "leaders, Levites, and priests" who signed the covenant of ch. 9. It is certainly to be connected with the source for the Ezra-Nehemiah section. Neh. 11, although it begins like a general census list, is clearly a temple roster, as is 12:1-26 with its genealogy of priests and Levites. The latter list may well have been kept open until the days of Darius II (423-404) or later; it terminates with one Jaddua, whose date is still a matter of dispute.

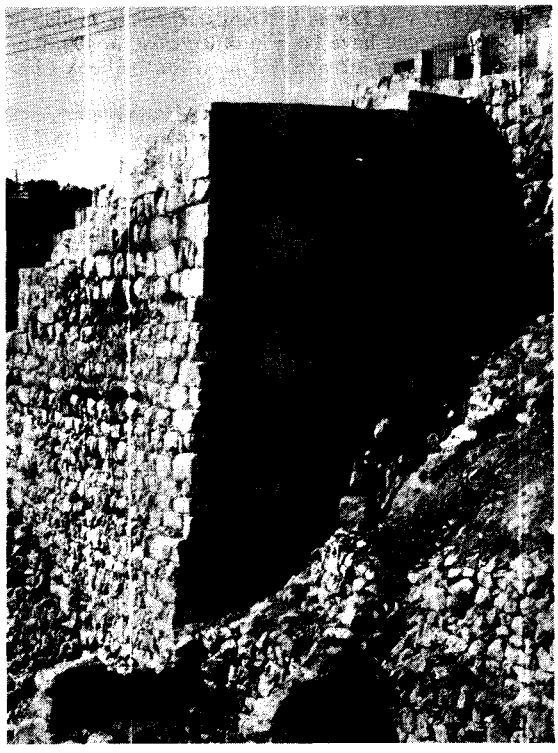
IV. Style.– For the literary style of Nehemiah, *see* EZRA, BOOK OF IV.

V. Special Problems.–Nehemiah is, compared to Ezra, relatively free from historical difficulties. The major problem remains that of fitting Ezra and Nehemiah together, which for Nehemiah involves dating the legal reforms of ch. 8.

Of considerable interest in dating the final form of the book is the attempt to correlate royal and sacerdotal figures in Nehemiah to references in other historical sources. In addition to the references to Eliashib and Jehohanan in Ezr. 10:6, Neh. 12:10f. traces the priestly line through six generations: Jeshua, Joiakim, Eliashib, Joiada, Jonathan (or Jehohanan), and Jaddua. The problem is not only to harmonize Neh. 12:10 with Ezr. 10:6 but to determine the date and identity of such figures as Jaddua the priest and Darius the king (called "Darius the Persian" in Neh. 12:22).

External sources affecting the discussion include the Elephantine papyri from Egypt (late 5th cent. B.C.), the much later *Antiquities* of Josephus, and the Samaria papyri (latter half of the 4th cent. B.C.). According to the Elephantine papyrus (Cowley, no. 30; cf. *ANET*, pp. 491f.), in *ca.* 408/7 B.C. one Bagoas was governor of Judah, King Darius was enthroned in Persia (Darius II Nothus, 423-404), and Jehohanan was the high priest. So far correlation is simple. The first priest to return, Jeshua (Ezr. 2:2; 3:2; 5:2; Hag. 1:1; etc.), was known to have been in office in both 539 and 520. His son Joiakim is identified with "the days of Nehemiah . . . and of Ezra" (Neh. 12:26). The third generation, Eliashib, appears frequently in the sacred text, being identified with Nehemiah's wall-building effort (444; see Neh. 3:1) in the days of Artaxerxes I (464-424). The same figure incurred Nehemiah's wrath by making a marriage alliance with the Ammonite Tobiah (13:4-6) sometime after Artaxerxes' thirty-second year (433).

Of the fourth incumbent less is known, but it is not unreasonable to find an identification between the fifth (Jonathan or Jehohanan) and the priest of the same name in the Elephantine papyri. (For the related problem of the Jehohanan of Ezr. 10:6 *see* EZRA, BOOK OF VI.F.) If this Jehohanan was high priest in 408/7 B.C. (and the Darius of Neh. 12:22 was Darius II Nothus), then the Jaddua of Neh. 12:11 would have been in office close to 400, thus providing a proper *terminus ad quem* for the book's historical lists.



The problem arises with Josephus. Joiakim is confirmed as roughly contemporary with Ezra (*Ant.* xi.5.5 [157f.]), and his son Eliashib is said to have succeeded him. There the easy correlation stops. A later section (xi.8.2 [306-308]), dated by Josephus to the times of Alexander of Macedon (who ruled 336-323), refers to Jaddua (Jaddus) as high priest, Darius as king (clearly Darius III Codomannus, 336/5-331), and Sanballat as the treacherous and double-dealing satrap of Darius (*Ant.* xi.7.2 [302f.]), whose daughter was married to a brother of Jaddua, Manasseh. The entrance of Sanballat as father-in-law of a priest raises a further question in the light of Neh. 13:28, where "one of the sons of Joiada [i.e., a brother of Jehohanan, not of Jaddua] was son-in-law to Sanballat."

One may assume that either Nehemiah or Josephus or both are hopelessly confused, and adherents of each position have not been wanting (see Rowley, "Sanballat," p. 250 n. 1). Evidence from the Samaria papyri, uncovered in 1962 (F. M. Cross, *BA*, 26 [1963], 110-121), has helped unravel at least a part of the mystery. From the data at hand F. M. Cross posited a succession of Sanballats: Sanballat I, who was governor of Samaria when Nehemiah arrived in Jerusalem (*ca.* 445/4); his grandson Sanballat II, the figure mentioned in the papyri (early 4th cent.); and the latter's grandson, Sanballat III, the governor mentioned by Josephus. Evidence for the reappearance of a name in alternate generations (papponymy) has strengthened the argument for more than one Jaddua as well, with the result that Nehemiah's reference to that figure need no longer be seen as equally problematical. Josephus has obviously telescoped certain events and people; Nehemiah, on the other hand, carries the picture down to only the beginning of the 4th cent. B.C.

The nature and activities of one of Nehemiah's opponents, Shemaiah the son of Delaiah, have presented perennial problems to translators. The MT of Neh. 6:10 characterized him as an *'āṣûr*, which from such passages as Jer. 33:1; 36:5 was interpreted in terms of restraint (AV, RSV, "who was shut up"; NEB "confined to his house"; NIV "shut in at his home"). These interpretations understood the verb *'ṣr* to mean "withhold, retain," but encountered the immediate difficulty of explaining how Shemaiah could at once be confined to his home (whether through a vow or for ceremonial uncleanness, so BDB, p. 783), and at the same time be free to meet Nehemiah in the temple. The sense of the passage, however, makes it clear that *'āṣûr* is being employed in a special sense to describe a hidden or secret informer (so New King James Version) who had been hired by Tobiah and Sanballat to report on the activities and plans of Nehemiah.

Many scholars have experienced difficulties in interpreting the sections dealing with the topography of Nehemiah's walls. Ch. 3 described the course of the walls, beginning at the northeast with the Sheep Gate, continuing W and then S to the Kidron Valley, E to the Dung and Fountain Gates, and then N past Ophel and the East Gate to the Corner and back to the Sheep Gate (*see* JERUSALEM III.F.2). While there are difficulties in locating all the points on the city's perimeter, the listing of the most important stations provides valuable information about the nature and general location of the wall.

Debate has focused on whether such areas to the west and south as the Broad Wall, the Tower of the Ovens, and the Valley Gate were part of Nehemiah's Jerusalem. If the hill Gareb (Jer. 31:39) was located SW of Jerusalem, it was obviously outside the city in preexilic times, and would

Hasmonean tower built on a portion of Nehemiah's wall, traces of which can be seen in the lower courses of the tower and in other parts of the wall (W. S. LaSor)

not have been included in the fifth-century-B.C. construction, since according to Kenyon (*Archaeology in the Holy Land* [1960], p. 316) Nehemiah's walls followed the outline of those destroyed in 587 B.C. Kenyon's excavations at Jerusalem made all previous work obsolete. It now appears that the walls of the preexilic city did not enclose both the east and west hills, thus making Nehemiah's city smaller than originally imagined (K. M. Kenyon, *Jerusalem: Excavating 3000 Years of History* [1967], pp. 108-110). In his day the enclosed city was about 1140 m. (3750 ft.) in length and probably not more than 275 m. (900 ft.) wide at its greatest extent (at the north end). Thereafter it tapered to a width of about 165 m. (540 ft.) at the southern extremity. Further, Kenyon regarded as futile any attempt to correlate the description of the north and west walls in Nehemiah with the topography, a position supported by M. Avi-Yonah (in Y. Yadin, ed., *Jerusalem Revealed* [1976], p. 22; cf. Avi-Yonah, *IEJ*, 4 [1954], 239-248). By contrast, the archeological discoveries harmonize more readily with Nehemiah's description of the east wall, which was of solid construction, about 2½ m. (8 ft.) thick, and was newly built along the east ridge of the east hill.

The mention of business and professional guilds (Neh. 3:8-32) as participating in the work of reconstruction indicates the extent to which the pattern of preexilic life had been revived. The businessmen, the goldsmiths, and the perfumers were doubtless the most wealthy elements of society, and in consequence may have been more leisured than others in Judea. Professional guilds had their origin in the presettlement period of Israelite life, and guarded their occupational secrets jealously (cf. R. de Vaux, *Ancient Israel* [Eng. tr. 1961], I, 76-79). They came into increasing prominence in the postexilic period, and flourished in Greek and Roman times. So specialized had certain guild activities become by the period of Christ that to have a door installed required two carpenters, one to deliver the door and the other to install it on its hinges.

C. E. ARMERDING R. K. H.

NEHEMIAS nē-hə-mī'əs, nē-ə-mī'əs (1 Esd. 5:8, 40, AV). *See* NEHEMIAH.

NEHILOTH nə-hil'oth. The AV transliteration of Heb. *n^eḥîlôṯ*, a technical musical term in the superscription to Ps. 5 (MT v. 1). The RSV translation, "for the flutes," is probably correct, assuming that *n^eḥîlôṯ* is derived from *ḥālal*, "pierce," and is a cognate of *ḥālîl*, "play the flute." According to Mowinckel, the flute seems to have been associated with psalms of lamentation. *See* MUSIC III.B.2.

Bibliography.–Comms. on Psalms; S. Mowinckel, *Psalms in Israel's Worship* (Eng. tr. repr. 1979), II, 210; A. Sendrey, *Music in Ancient Israel* (1969), pp. 318-320.

NEHUM nē'hum [Heb. *n^eḥûm*]. One of the twelve men whose names head the list of those who returned from the Exile with Zerubbabel (Neh. 7:7). In the par. Ezr. 2:2 (cf. 1 Esd. 5:8) the name appears as REHUM 1.

NEHUSHTA nə-hōōsh'tə [Heb. *n^eḥuštā'*–prob. 'serpent' (cf. *nāḥāš*) or 'brass' (*n^eḥōšeṯ*)]. Mother of King Jehoiachin of Judah and daughter of Elnathan of Jerusalem (2 K. 24:8); exiled with Jehoiachin and his court when he surrendered to King Nebuchadrezzar of Babylon (vv. 12, 15; Jer. 29:2).

NEHUSHTAN nə-hōōsh'tăn [Heb. *n^eḥuštān*] (2 K. 18:4). Scholars have suggested two possible derivations of this name: (1) from *n^eḥōšeṯ*, "copper" or "bronze," with afformative *ān*; (2) from *nāḥāš*, "serpent." (Some scholars point to a play on words with the verb *nāḥaš*, "practice sorcery" or "divine.") On the first explanation the meaning would be "a copper object" and could be a derogatory evaluation of the serpent (cf. KD; *IB*, III, 289f.). If this is correct the name Nehushtan would have been given by King Hezekiah (cf. H. Bauer and P. Leander, *Historische Grammatik der hebräischen Sprache* [1922, repr. 1965], p. 18). On the second meaning Nehushtan would be a proper name by which the serpent was commonly known, with no derogation intended. See Joines, pp. 61f.

Whatever its derivation, the Nehushtan is associated in 2 K. 18:4 with the "bronze serpent" (Heb. *n^eḥaš n^eḥōšeṯ*) that Moses elevated in the middle of the camp (Nu. 21:4-9). Anyone who looked upon the bronze serpent would recover from the snakebites inflicted on the people as

punishment. 2 K. 18:4 appears to suggest that the bronze serpent had been kept since the Exodus and had become an object of idolatrous worship. As such, although it might have been a precious national relic or heirloom, Hezekiah was forced to destroy it in his reform.

Modern scholars have shown that a serpent cult was widespread in ancient Palestine (and in the entire Fertile Crescent) since at least the time of the Exodus (see Joines, pp. 62-73, 97-100). There are many representations of serpents associated with explicit sexual themes as well as more generally with fertility rites and symbols. (A less likely background is the ancient Greek association of the serpent with healing.) Its apparent association with the goddess Astarte (cf. Joines, pp. 61-67) would fit very well the mention of "high places" and "pillars" in 2 K. 18:4.

The existence of a serpent cult in the Near East, however, has raised for many scholars the problem of the relationship between the events recorded in Nu. 21:4-9 and 2 K. 18:4. Scholars offer two possible explanations of this data: (1) the traditional one given above, i.e., that an innocent relic from the Exodus had become an object of worship in Hezekiah's time; (2) the prevailing modern view that the serpent cult of the period of the monarchy was legitimized by the insertion of the etiological account of Nu. 21:4-9 in the story of the Exodus.

There has been much unnecessary speculation about when the Canaanite serpent cult entered the Israelite cult. Given the Israelites' repeated lapses into pagan practice during the monarchy, the serpent cult could have flourished at any time; e.g., possibly this cult had Assyrian origins and was instituted by Ahaz (2 K. 16:10ff.). If Judah already had a bronze serpent as a relic of national origins, or even just a tradition of which that serpent was a part, it would have been easy as well as shrewd to institute the new serpent cult upon the old tradition, especially for people who tended toward idolatry. There need be no irreconcilable difficulties between Nu. 21:4-9 and 2 K. 18:4.

One refinement of this picture revolves around the improbability that, given the Israelites' propensity toward idolatry, Moses would have kept the serpent for posterity. Nor does the list of temple items mention the serpent (e.g., 1 K. 7:40ff.). In short, there is no record of the serpent in the years between the Exodus and Hezekiah's reform. Assuming that the original serpent had been lost or destroyed, the clause "that Moses had made" would not necessarily mean that the serpents were the same object but that they were identified as such in the popular mind.

In conclusion, at the time of Hezekiah's reform Nehushtan or the "bronze serpent" had been given pagan, obscene, and idolatrous associations while retaining Mosaic associations. This dual association made it especially important for Hezekiah to destroy the serpent. The good symbol that is perverted may be more dangerous than the purely pagan symbol.

H. VAN BROEKHOVEN, JR.

NEIEL nē-ī'əl [Heb. *nᵉʿî'ēl*; Gk. B *Inaēl*, A *Aniēl*]. A town in Asher near the border of Zebulun (Josh. 19:27). The list (vv. 24-31) names Neiel after Beth-emek, N of the valley of Iphtahel. It has been identified with Khirbet Yaʿnîn (*LBHG*, p. 440; *GP*, II, 67) on the eastern side of the Plain of Acco. W. S. L. S.

NEIGH; NEIGHING [Heb. *ṣāhal* (Jer. 5:8; 50:11), *mišhālôṯ* (8:16; 13:27)]; AV also BELLOW (50:11). Used figuratively by Jeremiah to describe the din of a mighty enemy army approaching from the north (8:16), Babylon's exultant delight at the capture of Judah (50:11), and the Israelites' adulterous desires and practices (5:8; 13:27).

NEIGHBOR [Heb. *ʿāmîṯ*–'fellow' (Lev. 6:2 [MT 5:21]; 18:20; 19:15; etc.), *qārôḇ*–'near (one)' (Ex. 32:27; Ps. 15:3), *rē(a)ʿ*–'comrade, fellow' (Ex. 11:2; 18:16; 22:7-11 [MT 6-10]; Lev. 19:13; etc.), *šāḵēn*–'neighbor' (Ex. 3:22; Dt. 1:7; Ruth 4:17; 2 K. 4:3; etc.), etc.; Gk. *geítōn*–'neighbor' (Lk. 14:12; 15:6, 9; Jn. 9:8), *plēsíon*–'near one, neighbor' (Mt. 5:43; 19:19; Acts 7:27; Rom. 13:9; etc.), part. of *perioikéō*–'dwell around' (Lk. 1:65), *períoikos*–'dwelling around' (v. 58), *héteros*–'other' (Rom. 13:8; 1 Cor. 10:24; Gal. 6:4)]; AV also ANOTHER, etc.

1. In the OT.–Most of the terms rendered by "neighbor" in the OT designate a fellow member of the community in covenant with Yahweh, i.e., one who shared in the rights and duties implied by membership in the covenant. All relations between members of the covenant community were sanctioned by divine law (cf. Job 16:21). So closely were God's covenant people bound together that a neighbor was to be treated as a brother (cf. the frequent use of "brother" and "neighbor" as synonyms, e.g., Dt. 15:2f., 12; Isa. 41:6; Jer. 31:34). In fact, one was to treat one's neighbor as one treated oneself (Lev. 19:18). It is not surprising, then, that most of the occurrences of Heb. *ʿāmîṯ*, *qārôḇ*, and *rē(a)ʿ* occur in legal and ethical contexts where specific laws and principles are applied to a variety of relationships between covenant neighbors. Since ethical principles and law were synonymous in the Israelite theocracy, we may consider these contexts as one.

By far the most popular term, *rē(a)ʿ* (a derivative of *rāʿâ*, "have dealings with [someone]") occurs in a variety of contexts; *ʿāmîṯ*, by contrast, occurs only in legal contexts in Leviticus. Although *šāḵēn* can also refer to fellow members of the covenant (e.g., Ps. 31:11 [MT 12]; Jer. 6:21; 12:14), it frequently refers to persons of nearby countries, e.g., taunting nations before whom God humbled disobedient Israel (Ps. 44:13 [MT 14]; 79:4, 12; 80:6 [MT 7]; 89:41 [MT 42]).

Disputes between covenant members were to be settled on the basis of God's statutes (cf. Lev. 19:15); if settlement in private was not possible (cf. the counsel of wisdom in Prov. 25:8-10), such disputes were to be settled by God's judges (cf. Ex. 18:16). The Decalogue forbade bearing false witness against a neighbor (Ex. 20:16; Dt. 5:20; cf. Lev. 19:16; Prov. 24:28; 25:18). Other sins of the tongue, e.g., slander (Ps. 101:5; Prov. 11:9), lying (Ps. 12:2 [MT 3]), reproachful (15:3) or deceitful speech (28:3; Jer. 9:5, 8 [MT 4, 7]), belittlement (Prov. 11:12), joking deception (26:19), and false flattery (27:14; 29:5), were singled out as destructive of personal relationships and of the societal fabric of God's covenant people in general (e.g., Ps. 15:3; Prov. 11:9). Divine punishment awaited those who behaved in such a fashion (e.g., Ps. 12:2-4; 101:5). Despising (Prov. 14:21; cf. Lev. 19:17) or planning evil against one's neighbor (Prov. 3:29) were likewise condemned as sinful.

The Decalogue also forbade coveting anything that belonged to a neighbor (Ex. 20:17; Dt. 5:21; cf. Eccl. 4:4). Frequently this commandment was associated with the sin of adultery. A good neighbor did not commit adultery with his neighbor's wife (cf. Lev. 18:20; Dt. 22:24, 26; Job 31:9-12; Prov. 6:29; Jer. 5:8; 29:23; Ezk. 18:6, 11, 15; 22:11; 33:26), for adultery, like bearing false witness, was a form of covenantal unfaithfulness (cf. Ezk. 16:15-52). It was destructive of society and represented a failure to live up to the holiness demanded by Yahweh's character (cf. Lev. 20:7). Hence it was a capital offense (e.g., 20:10).

Business relations between neighbors were also controlled by covenant law (cf. Lev. 6:2-5 [MT 5:21-24]). The

Decalogue prohibited stealing (Ex. 20:15; Dt. 5:19). Transactions involving buying and selling (Lev. 25:14f.), stored or borrowed property (Ex. 22:7-15 [MT 6-14]), collateral for loans (v. 26 [MT 25]; Dt. 24:10; cf. Prov. 6:1, 3; 17:18), debts (Dt. 15:2), wages (cf. Jer. 22:13; Ezk. 22:12), and property rights in general (Dt. 23:24f. [MT 25f.]; cf. 19:14; 27:17), were all governed by law.

Covenant law also forbade taking a neighbor's life (Ex. 20:13; Dt. 5:17) and specified penalties for murder (Dt. 19:11-13; cf. 27:24). Cities of refuge were provided for those who accidentally caused someone's death (4:41-43; 19:1-10; Josh. 20). The law also prescribed penalties for disfiguring a neighbor (Lev. 24:19f.).

The OT teaching about neighborliness is summarized in Lev. 19:18: "You shall not take vengeance or bear any grudge against the sons of your own people, but you shall love your neighbor [*rē(a)ʿ*] as yourself: I am the Lord." True neighborliness is a reflection of the character of God. It is wise behavior, a manifestation of sanctified common sense, which seeks the neighbor's good just as one seeks one's own good (cf. van Selms). It recognizes that God is the final judge in disputes between neighbors (cf. 1 K. 8:31f. par. 2 Ch. 6:22f.).

The prophets predicted that the erosion of neighborliness would precipitate divine judgment. Isaiah prophesied, "The people will oppress one another . . . every man his neighbor" (Isa. 3:5). In the midst of such oppression, Jeremiah and Micah warned against trusting one's neighbor (Jer. 9:4-9; Mic. 7:5f.). Conversely, the prophets foresaw a new age when true neighborliness would flow from the renewed hearts of God's people. In that day everyone would help his neighbor (Isa. 41:6). Jeremiah envisioned that God would write His covenant law on the hearts of His people; then people would not have to teach their neighbors to "know the Lord," for "they shall all know me, from the least of them to the greatest, says the Lord" (Jer. 31:34). Zechariah pictured the messianic age as a time when people would entertain their neighbors in peace and security under their vine and fig tree (Zec. 3:10; cf. Mic. 4:3f.).

II. In the NT.–The most common NT term for "neighbor" is Gk. *plēsíon*, the usual LXX translation of Heb. *rē(a)ʿ*. Unlike *rē(a)ʿ*, however, *plēsíon* in Greek literature was not restricted to a compatriot but could be applied to any fellow human being who was close at hand.

In Jesus' day there was an ongoing debate within Judaism concerning the definition of "neighbor" (*rē[a]ʿ*) in the love command of Lev. 19:18. Most restricted the obligation to loving one's fellow Israelites and full proselytes. Some (e.g., the Pharisees, the Qumrân community) even restricted it to members of their own group within Judaism, while a popular saying excluded personal enemies (cf. Mt. 5:43; see Jeremias, pp. 202f.). Certain Jewish teachers, however, favored an extension of the commandment to all fellow human beings, and this tendency may be reflected in the LXX's use of *plēsíon* to render *rē(a)ʿ* (see *TDNT*, VI, 315).

The command to love one's neighbor as oneself is the hallmark of NT ethics. It is described as the "royal law" in Jas. 2:8 and as the fulfillment of the law in Rom. 13:8-10; Gal. 5:14 (cf. Mt. 19:19). In Mt. 22:37-40 par. Mk. 12:29-31; Lk. 10:27 this command is combined with the command to love God above all (Dt. 6:5) to form a summary of the entire law. Jesus emphatically rejected the interpretation that limited one's obligation to loving relatives and friends; He demanded love even for enemies, on the model of God's love for all mankind (Mt. 5:43-48).

Jesus' teaching about loving others is presented graphically in His parable of the Good Samaritan (Lk. 10:30-37). The ongoing debate concerning the definition of "neighbor" lies behind the lawyer's question, "And who is my neighbor?" (v. 29). Jesus' parable was shocking in that it presented a despised outsider as the one who showed compassion. Jesus' concluding question, "Which of these . . . proved neighbor to the man. . . ?" (v. 36), reshaped the lawyer's question, focusing on the subject rather than the object of the love command (see Jeremias, p. 205). As T. W. Manson stated, the lawyer's question "is unanswerable, and ought not to be asked. . . . The point of the parable is that if a man has love in his heart, it will tell him who his neighbor is; and this is the only possible answer to the lawyer's question" (*Sayings of Jesus* [repr. 1979], pp. 261f.). K. Barth, following the early Church, interpreted the parable as pointing to Jesus Himself as the compassionate neighbor (*CD*, I/2, 417-19).

In addition to the direct citations mentioned above, the love command is alluded to in several passages that deal primarily with relationships within the Christian community. Paul exhorted the Corinthians, "Let no one seek his own good, but the good of his neighbor" (1 Cor. 10:24; cf. Rom. 15:2). Love for the neighbor also implies speaking the truth to one another (Eph. 4:25) and not being judgmental (Jas. 4:12; cf. v. 11).

NEMUEL nem'ū-əl [Heb. *nᵉmû'ēl*].

1. A Reubenite; son of Eliab and brother of Dathan and Abiram (Nu. 26:9).

2. A son of Simeon and head of the Nemuelites (Nu. 26:12; 1 Ch. 4:24). The name is given as JEMUEL in Gen. 46:10; Ex. 6:15.

NEMUELITES nem'ū-əl-īts [Heb. *nᵉmû'ēlî*]. The family of NEMUEL (2) the Simeonite (Nu. 26:12).

NEPHEG nef'eg [Heb. *nepeg*–'heavy, slow'(?)].

1. A Kohathite Levite; son of Izhar and brother of Korah and Zichri (Ex. 6:21).

2. A son of David born in Jerusalem (2 S. 5:15; 1 Ch. 3:7; 14:6).

NEPHEW. *See* RELATIONSHIPS, FAMILY.

NEPHI nef'ī (2 Macc. 1:36, AV). *See* NEPHTHAR.

NEPHILIM nef'ə-lim [Heb. *nᵉpîlîm* (Gen. 6:4; Nu. 13:33)], AV GIANTS. The etymology of *nᵉpîlîm* is uncertain. The following explanations have been advanced with mixed reception. First, it may derive from the niphal of the verb *pālā'*, meaning "be extraordinary," i.e., "extraordinary men." Second, it may derive from the verb *nāpal*, "fall," in one of the following senses: (1) the "fallen ones" — from heaven, i.e., supernatural beings; (2) morally "fallen

men"; (3) "those who fall upon," in the sense of invaders or hostile, violent men; (4) "those who fell by" the sword (cf. Ezk. 32:20f.); (5) "unnaturally begotten men" or bastards (cf. *nēpel*, "abortion" or "miscarriage"). None of these satisfies all scholars, and some consider *nᵉpîlîm* an unexplainable relic from an ancient, now-forgotten language. Contextual information is unfortunately limited to two enigmatic passages.

The Nephilim were apparently people of imposing physical stature when compared with the smaller Hebrews (Nu. 13:33). This particular reference is glossed by a statement which implies that the offspring of Anak in Canaan were descended from the renowned Nephilim of Gen. 6:4. The latter had gained a reputation as notable heroes in the antediluvian period, and apparently persisted after the Flood (*wᵉgam 'aḥᵃrê-ḵēn*). This could have occurred through migration, on the basis of a local Mesopotamian deluge, and in that case would account for their descendants living in Canaan.

The Anakim were a tall people (Dt. 2:21; *see* ANAK) with whom the REPHAIM, another pre-Israelite group in Canaan, were compared. The large stature of the individuals composing these groups suggests a condition such as hypertrophy of the long bones of the skeleton, or some other disorder of a genetic variety. This becomes even more likely if the Rephaim were being indicated by the use of a term such as *rāpā'* in 1 Ch. 20:6, 8, where genetic mutations are being described (cf. *rāpâ* in 2 S. 21:16, 18, 20, 22).

Genesis 6:1-4, while meaningful to the original recipients, has become obscure with the passing of time. It is impossible to be certain whether the Nephilim were the same as the "mighty men" (*gibbôrîm*) at the end of v. 4, or a separate group that overlapped chronologically. If they were identical, questions are then raised about the "sons of God" which procreated the "mighty men" (*see* SONS OF GOD [OT]). Some modern scholars have followed ancient Jewish tradition in supposing that the "sons of God" were "fallen ones," perhaps angels, who mated with women after being cast out of heaven, thereby giving origin to the "mighty ones" (but see J. Morgenstern, *HUCA*, 14 [1935], 76-107). Such a view generally presupposes that vv. 1-4 are an etiological fragment or a "myth" that helps to explain the character of antediluvian wickedness and the consequent need for the Flood.

That the material may conceivably be ancient Semitic historiography that contains important, if obscure, anthropological, demographic, or sociological information is a proposition that seems to be taken seriously only by some conservative scholars. They consequently oppose the "mythical" conception and interpret "sons of God" as a reference to the Sethite line (Gen. 5) or to the nobility (cf. Kline), whose mixed marriages to the "daughters of men" ("men" in a restricted sense as wicked or common people) contributed to a moral decline. They argue that "myth" is inconsonant with the perspective of the Pentateuch, that "angels" are pure in Genesis and sexless in the Bible as a whole (Mt. 22:30), and that people should not be punished (Gen. 6:3) for a sin that is primarily that of angels (v. 2).

Against the claim that "sons of God" (*bᵉnê hā'ᵉlōhîm*) is always used of angels, it should be noted that the equivalent phrase in Greek described a man (Adam) in Lk. 3:38, as did the comparable expression *bᵉnê 'elyôn* ("sons of the Most High") in Ps. 82:6. The unions would thus appear to be between two human groups, the males being perhaps of the Sethite line and the females possibly constituting neanthropic remnants that were exterminated by the Flood. Whether or not the "mighty men" were actually Nephilim, no particular sin seems to have been attached to their parentage. What was condemned was the violence and corruption that characterized contemporary society (Gen. 6:11f.).

The "demigod" explanation of the Nephilim, so popular in some circles (see Cassuto), seems therefore less preferable than a nonmythological, sociological explanation which sees the people described as specifically human groups engaged in relationships of deteriorating social and spiritual quality.

NEPHTHAR nef'thär [Gk. *Nephthar*] (2 Macc. 1:36); AV NAPHTHAR. The name given by Nehemiah and his associates to an extremely flammable substance, as recorded in 2 Macc. 1:19-36. The substance was discovered when Nehemiah sent priests to a dry cistern in which their priestly ancestors had hidden sacred altar fire at the time of their deportation. In the cistern, however, the postexilic priests found not fire but a "thick liquid" which, after they had sprinkled it on the sacrifice, ignited at exposure to the sun's rays. After the sacrifice had been consumed, Nehemiah ordered that the remainder of the liquid be poured upon large stones, and from these also flames shot up. Upon hearing a report of these events, the king of Persia declared as sacred the place where the liquid had appeared.

"Nephthar" is said to mean "purification" (v. 36), but its etymology is unknown. It is also identified with NAPHTHA, a flammable liquid familiar to the Persians (cf. Song Three 23) and also to the Greeks (e.g., Pliny *Nat. hist.* ii.109; Strabo *Geog.* xvi.1.15). It came to be associated with the postexilic purification rites of the temple (1 Macc. 1:18; cf. Nu. 31:23). N. J. O.

NEPHTOAH nef-tō'ə [Heb. *neptô[a]ḥ*; Gk. *Naphthō*]. A place mentioned only in Josh. 15:9 and 18:15 as marking the northern boundary between Judah and Benjamin. Nephtoah has been identified with modern Lifta, located 5 km. (3 mi.) NW of old Jerusalem (*LBHG*, rev. ed., pp. 122f.), but this requires the double difficulty of a phonetic shift of $n > l$ and the dropping of the final *ḥ*. Papyri Anastasi III, V, and VI also mention the "wells of Merneptah," which could be a reference to the "waters of Nephtoah," the modern Israeli name for the site (*LBHG*, rev. ed., pp. 184, 440), but this also requires manipulation of the text. The evidence of the LXX supports the MT.

J. MCKENNA

NEPHUSHESIM nə-fo͝o'shə-sim; **NEPHUSIM** nə-fo͝o'sim. *See* NAPHISH.

NER nûr [Heb. *nēr*–'lamp'] A Benjaminite; son of Abiel (1 S. 14:51) and father of Abner (1 S. 14:50f.; 26:5, 14; 2 S. 2:8, 12; 3:23, etc.; 1 K. 2:5, 32; 1 Ch. 26:28). 1 Ch. 9:35f. appears to list Kish and Ner as brothers (cf. 8:29f.,

where Ner is omitted), and some have therefore read 1 S. 14:50 as saying that Ner was Saul's uncle. But 1 Ch. 9:39 and 8:33 clearly state that Ner was the father of Kish the father of Saul, which means that Abner and Kish were brothers, that Ner was Saul's grandfather, and that Abner was Saul's uncle (1 S. 14:50f.; cf. 10:14-16). It is possible that there were two men named Kish, one being Ner's brother and the other his son (*see* KISH **1-2**).

NEREUS nir'i-əs [Gk. *Nēreus*]. A Roman Christian greeted by Paul (Rom. 16:15). He, his sister, and Olympas (possibly the children of Philologus and Julia) were members of a household church.

The name comes originally from a minor Greek sea-god, the father of the Nereids; it was found often throughout the Roman empire among freedmen and slaves, some of whom were in the imperial service. Nereus is also the name of one of the earliest Roman martyrs, though the Nereus in Romans cannot with any degree of certainty be identified with him. J. J. HUGHES

NERGAL nûr'gəl [Heb. *nērgal*; Akk. $^{d}ne_3$-iri_{11}-*gal*; Gk. *Nērigel*]. The god worshiped by the men of Cuth who had been relocated in Samaria by the king of Assyria (2 K. 17:30). Nergal was a Mesopotamian deity originally associated with fire and the heat of the sun (according to one text, "Nergal and Shamash are one," *Enc.Brit.* [1970], XVI, 229, and he bears the epithet *šarrāpu*, "the burner") who developed into the god of war, pestilence, and death, the god whose consort Ereshkigal ruled Irkalla (the nether world; cf. *CAD*, VII, 177). (For the myth of Nergal and Erishkigal cf. Am.Tab. 357; *ANET*, p. 103.)

The name is found in various forms, such as Sum. (DINGIR) U.GUR (Am.Tab. 35:13, 37), ÍR.RA (Code of Hammurabi, Prologue, ii.69; *ANET*, p. 165; cf. A. Deimel, *Šumerisches Lexikon*, III/1 [1934], 138), and Bab. ne_3-UNU.GAL, in which UNU.GAL can be read $urugal_2$ (glossed u_2-*rit-gal*) or iri_{11}-*gal* (with UNU glossed *i-ri*) (Code of Hammurabi reverse xxviii.24; *ANET*, p. 180). The values of the Sumerian signs can be translated "the mighty one of the great city," which correlates to the name of his consort, Ereshkigal, Sum. (DINGIR) NIN KI.GAL, "lady of the great land," i.e., "the land of no-return" (*Descent of Ishtar*, lines 1ff.; *ANET*, p. 107). The vocalization of the Hebrew, attested by the LXX, supports the reading *ne-iri-gal*, for none of the other writings would yield "Nergal."

Nergal was widely worshiped. Naram-Sin, grandson of Sargon of Akkad, gave credit to Nergal for his victory over Ebla, among other places (*CAH*^{3}, I/2, 325; *ANET*, p. 268). Shulgi, of the Third Dynasty of Ur (*ca.* 2000), named the temple of Nergal at Kutu E.MESLAM, literally "the house of Hades." Hammurabi called Nergal "the giver of preeminence to Kûtû" (Code of Hammurabi ii.69; *ANET*, p. 268). Kûtû is Cutha, the Cuth of 2 K. 17:30, modern Tel Ibrahim, about 45 km. (28 mi.) NE of Babylon. In pronouncing curses against any who would not heed the words on his stele, Hammurabi said "May Nergal, mighty among the gods, warrior who has no equal . . . by his great power, like angry fire in a bed of reeds, his people let him consume, with his mighty weapon may he split him [i.e., his people] open, his limbs like an image of clay let him smash" (Code of Hammurabi reverse xxviii. 24-39 [tr. from W. S. LaSor, *Handbook of Old Babylonian*]; cf. *ANET*, p. 180).

By a strange but not uncommon development, this god of death and pestilence also became the god to whom men offered gifts for protection of their cattle and fields, and the patron god of the hunter. In Assyrian texts of the 1st millennium he is described as one who restores the dead. Several theophoric names are compounded with Nergal, e.g., NERGAL-SHAREZER and Nergal-ushezib.

Bibliography.–M. Jastrow, *Religion of Babylonia and Assyria* (1898), pp. 65ff.; E. Dhorme, *Les religions de Babylonie et d'Assyrie* (1949), pp. 38-44; A. Deimel *Pantheon Babylonicum* (1914); *ANET, passim*; A. Heidel, *Gilgamesh Epic* (2nd ed. 1949), pp. 129-132; R. W. Rogers, *Cuneiform Parallels to the OT* (1912), pp. 121-135. W. S. LASOR

NERGAL-SHAREZER nûr'gəl-shär-ē'zər [Heb. *nērgal šar-'eṣer*, in some MSS *-šar'eṣer*; cf. Akk. *nergal šar uṣur-* 'may Nergal preserve the king']; NEB NERGALSAR-EZER. One (or two) of the "princes" of Nebuchadrezzar who "sat in the middle gate" when Jerusalem was captured (Jer. 39:3). A problem arises in v. 3 because the name occurs twice, the second time with the apposition "the Rabmag." The latter is the form that occurs also in v. 13. The possibility that these are the names of two different persons seems to be supported by the LXX, for the first is called in Greek *Nargalasar*, whereas the second is *Nagargasnaser Rabmag*. The Greek text (ch. 39 = LXX ch. 46) does not inspire confidence, however, since in v. 3 the other two names are considerably different from the Hebrew and vv. 4-13, including the second occurrence of the name, are omitted. If two different persons are meant, the second would be a lesser official (D. J. Wiseman, in *NBD*, p. 877; but cf. *CCK*, p. 38), a "Rabmag," Akk. *rab mu-un-gu* or *rab mu-ú-gu*, often (but questionably) translated "chief of the soothsayers."

Further support for the two-persons theory may be found in a prism of Nebuchadrezzar in which officials are listed, including the name "Nergalsharusur, the *Sîn-magir*" (*ANET*, p. 308; cf. E. Unger, *Babylon, die heilige Stadt* [1931], pp. 282-294). The name following Nergal-sharezer in Jer. 39:3 is given as Samgar-nebo. Some have objected that this is not a Babylonian name formation and have suggested that the MT has been garbled, that Samgar here has resulted from a misreading of Bab. *sîn-magir* (cf. *IB*, V, 1079). Once again, the LXX appears to lend some support, for in the Greek text the second name is rendered as Samagoth and the "-nebo" element has become part of the third name.

Whether we read one or two Nergal-sharezers, the possible identification of this name with that of Neriglissar, king of Babylon 560-556, must also be considered. Until the publication of *CCK* little was known about this king, and not a great deal more is now available. He was not of the royal line but a nobleman, son of Bêl-šum-iškun (cf. S. Langdon and R. Zehnpfund, *Neubabylonischen Königinschriften* [1912], pp. 208ff.; *CCK*, p. 38 n. 6), who owned land at Babylon and Opis and was appointed to oversee the business affairs at E.BABBAR.RA ("the temple of the sun-god"; cf. *CCK*, p. 38 n. 10). Neriglissar married Nebuchadrezzar's daughter and subsequently seized the throne — but whether he was implicated in the plot that resulted in the death of Awîl-Marduk (Evil-merodach) or acceded to the throne as the legitimate heir (brother-in-law of Awîl-Marduk) is not clear. Upon his death (late April or early May, 556, according to R. A. Parker and W. A. Dubberstein, *Babylonian Chronology* [2nd ed. 1956], p. 12) he was succeeded by his son Labâši-Marduk, a youth who was assassinated after a reign of nine months. His successor was Nabonidus, a native of Haran. For further details see *CCK*, pp. 38-42, 74-77, 86-88.

W. S. LASOR

NERI nir'ī [Gk. *Nēri* < Heb. *nērîyâ*–'Yahweh is light'] (Lk. 3:27). An ancestor of Jesus. According to Lk. 3:27f. Neri was the father of Shealtiel and the son of Melchi,

but according to Mt. 1:12 (and 1 Ch. 3:17) Jeconiah was Shealtiel's father. Cf. I. H. Marshall, *Gospel of Luke* (*New International Greek Testament Comm.*, 1978), pp. 163f.; R. H. Gundry, *Matthew* (1981), pp. 17f.; J. Jeremias, *Jerusalem in the Time of Jesus* (Eng. tr., rev. ed. 1969), pp. 290-97. *See also* GENEALOGY OF JESUS.

NERIAH nə-rī'ə [Heb. *nērîyâ*–'Yahweh is light' (Jer. 32:12, 16; 36:4, 8; 43:3; 45:1; 51:59), *nērîyāhû* (Jer. 36:14, 32; 43:6)]; **NERAIAH** [Gk. *Nērias*] (Bar. 1:1); AV NERIAS; NEB NERIAH. (The two Hebrew forms reflect a common variation of the theophoric element *yh*[*w*]; cf. the two forms of Jeremiah, Heb. *yirm^{e}yâ* and *yirm^{e}yāhû*.) Father of two sons: Jeremiah's scribe Baruch (Jer. 32:12) and the quartermaster Seraiah, who served as a messenger for Jeremiah (51:59).

NERIAS. *See* NERIAH.

NERO nē'rō [Gk. *Nerōn*]. The fifth Roman emperor, who was born at Antium in A.D. 37, began to reign October, 54, and died June 9, 68.

I. Parentage and Early Training
II. Reign
  A. "Quinquennium Neronis"
  B. Poppaea Sabina and Tigellinus
  C. Great Fire
  D. Persecution of Christians
  E. Conspiracy of Piso
  F. Visit to Greece
  G. Death
III. "Nero Redivivus"
IV. Nero and Christianity
  A. Nero and the NT
  B. Neronian Policy and Christianity

I. Parentage and Early Training.–Nero's father was Cnaeus Domitius Ahenobarbus ("brazen beard"), a man from an illustrious family but of vicious life. His mother Agrippina, daughter of Germanicus and the older Agrippina, was a sister of the emperor Caligula. Through her mother she was the great-granddaughter of the emperor Augustus, and this gave her son a strong claim to the throne.

Agrippina schemed to make Nero's imperial claim a reality. He was betrothed and later married to Octavia, daughter of Claudius, who succeeded his nephew Caligula as emperor. After the murder of Claudius's wife, Agrippina (by then widowed) wed Claudius, the law having been changed to allow her marriage to her father's brother. She persuaded Claudius to adopt Nero as his son, and the young man, formerly Lucius Domitius Ahenobarbus, became Nero Claudius Caesar Germanicus. Claudius agreed to make a will in favor of Nero, but when he began to regret disinheriting his own son Britannicus, Agrippina poisoned Claudius. Immediately Nero was proclaimed emperor by the praetorian prefect Burrus; the praetorian guard had been richly bribed. The senate weakly acknowledged the new emperor.

II. Reign.–*A. "Quinquennium Neronis."* The first five years *(quinquennium)* of Nero's reign were characterized by good government at home and in the provinces and by the emperor's popularity with the senate and people. Agrippina's influence over her son was lessened through the efforts of Burrus and Seneca the philosopher, who was Nero's tutor. One of her efforts to retain her power — a threat to present Britannicus as the rightful heir to the throne — resulted in Nero's having Britannicus poisoned and eventually banishing Agrippina from the palace. Seneca and Burrus brought about financial, social, and legislative reforms but allowed Nero to indulge in low pleasures and excesses and to surround himself with dissolute companions — habits that the emperor never abandoned.

Bust of the young Nero (Corinth Excavations, American School of Classical Studies; I. Ioannido and L. Bartziotou, photographers)

B. Poppaea Sabina and Tigellinus. The wife of Otho, one of Nero's notorious companions, was Poppaea Sabina, a woman as ambitious as she was unprincipled. She was endowed, according to Tacitus, with every gift of nature except an "honorable mind." Beginning in 58 she used her husband as a tool to become Nero's consort. Under her influence Nero shook off all restraints, turned a deaf ear to his best advisers, and plunged deeper into immorality and crime. She allowed, if not persuaded, Nero to give Otho a commission in a distant province (Lusitania). With Nero's connivance she plotted Agrippina's death. Agrippina was induced to board a boat that had been carefully constructed to sink, but she saved herself by swimming ashore. She was subsequently killed on a pretext, however, and Nero claimed that she had committed suicide (Suetonius xxxiv; Tacitus *Ann.* cxli-cxlviii).

Having openly become Nero's mistress, Poppaea continued to eliminate her rivals. When Burrus died in A.D. 62, she forced Seneca to withdraw from the court. She had Nero divorce Octavia because of her barrenness and then banish her to the island of Pandateria on a false charge of adultery. Octavia was executed in 62 and her head brought to Poppaea. In 65 Poppaea herself died during pregnancy when Nero in a fit of rage cruelly kicked her.

After his extravagance had exhausted the well-filled treasury left by Claudius, Nero began to confiscate the estates of rich nobles against whom the new praetorian prefect Tigellinus could contrive the slightest charge.

Even this tactic did not prevent a financial crisis — the beginning of the bankruptcy of the Roman empire. Worst of all, the gold and silver coinage was depreciated, and the senate was deprived of the right of copper coinage.

C. Great Fire. The situation was immeasurably worsened by the great fire that began July 18, 64, in the Circus Maximus and that, with the aid of a high wind, consumed street after street of poorly built wooden houses. When after six days it had almost died down, another conflagration started in a different part of the city. Of the fourteen city regions, evidently seven were destroyed totally and four partially. Nero hurried back to Rome from Antium and superintended in person the work of the fire brigades, often exposing himself to danger. He took many of the homeless into his own gardens. Despite his efforts, numerous rumors accused him of arson (cf. Suetonius xxviii; Tacitus *Ann.* xv.38ff.). No serious modern historian, however, charges him with the crime.

D. Persecution of Christians. Since such public calamities were generally attributed to the wrath of the gods, everything was done to appease the offended deity. Tacitus recounted Nero's scheme to avert suspicion from himself. "He put forward as guilty [*subdidit reos*], and afflicted with the most exquisite punishments, those who were hated for their abominations [*flagitia*] and called 'Christians' by the populace. Christus, from whom the name was derived, was punished by the procurator Pontius Pilate in the reign of Tiberius. The noxious form of religion [*exitiabilis superstitio*], checked for a time, broke out again not only in Judea its original home, but also throughout the city [Rome], where all the abominations meet and find devotees. Therefore first of all those who confessed [i.e., to being Christians] were arrested, and then as a result of their information a large number were implicated [reading *coniuncti*, not *convicti*], not so much on the charge of incendiarism as for hatred of the human race. They died by methods of mockery; some were covered with the skins of wild beasts and then torn by dogs, some were crucified, some were burned as torches to light at night... Whence [after scenes of extreme cruelty] commiseration was stirred for them, although guilty of deserving the worse penalties, for men felt that their destruction was not on account of the public welfare but to gratify the cruelty of one [Nero]" (*Ann.* xv. 44).

Such is the earliest account of the first gentile persecution (as well as the first gentile record of the crucifixion of Jesus). Tacitus clearly implied that the Christians were innocent *(subdidit reos)* and that Nero used them simply as scapegoats. Some regard the conclusion of the paragraph as a contradiction of this — "though guilty and deserving the severest punishment" *(adversus sontes et novissima exempla meritos)*. But Tacitus meant by *sontes* that the Christians were "guilty" from the point of view of the populace and that from his own standpoint, too, they merited extreme punishment, but not for arson. *Fatebantur* does not mean that they confessed to incendiarism, but to being Christians; *qui fatebantur* means that some boldly confessed, but others tried to conceal or perhaps even denied their faith.

E. Conspiracy of Piso. The tyranny of Tigellinus and his confiscations to meet Nero's expenses caused the nobles deep discontent, which culminated in the famous conspiracy of 64 headed by C. Calpurnius Piso. The plot was betrayed and an inquisition followed in which perished Seneca the philosopher, Lucan the poet, Lucan's mother, and later Annaeus Mela the brother of Seneca and father of Lucan (Tacitus *Ann.* xvi.21f.).

F. Visit to Greece. Having taken care of every suspected person, Nero abandoned the government in Rome to a freedman, Helius, and made a long visit to Greece (A.D. 66-68). There he took part in muscial contests and games; he won prizes from the obsequious Greeks, in return for which he bestowed on them the "freedom" of their province.

G. Death. In 66 began the revolt in Judea that would end in the destruction of Jerusalem, and in 68 the revolt of Vindex, governor of Lugdunum (Lyons) in Gaul, was put down. Shortly afterward came the fatal rebellion of Galba, governor of Hither Spain, who declared himself *legatus* of the senate and Roman people. Helius persuaded Nero to return to Rome. The emperor confiscated Galba's property and could have crushed him, but the doubts, fears, and distractions that overwhelmed him greatly helped Galba's cause. Nero lost the support of the praetorian guard that made him emperor. He committed suicide, bringing to an end the line of Julius Caesar.

III. "Nero Redivivus."–A freedman, two old nurses, and his cast-off concubine Acte cared affectionately for Nero's remains, and for a long time flowers were strewn on his grave (Suetonius lvii). Soon the strange belief arose that Nero had not really died but was living somewhere in retirement, perhaps in Parthia, and would return shortly to bring great calamity upon his enemies or the world (Suetonius lviii).

Some Jews amalgamated this belief with their concept of the antichrist. Asc. Isa. 4 (1st cent. A.D.) clearly identifies the antichrist with Nero; the idea repeatedly occurs in both Jewish and Christian sections of the Sibylline Oracles (3:66ff.; 4:117f.; 5:100f., 136f., 216f.).

How far the Christians regarded Nero as the historical personage of the antichrist is disputed. It would be natural if they had been inflenced by contemporary thought about the revival of Nero. W. Bousset (*Die Offenbarung Johannis* [1906], *in loc.*) regarded the beast of Rev. 13 as Rome and the smitten head "whose mortal wound was healed" as Nero; some scholars think that Rev. 17:10f. refers to Nero. Such passages in Revelation may refer to the spirit of Nero but certainly not to Nero himself. Some scholars have applied the number 666 in 13:8 to Nero, but it suits many other wicked rulers as well (cf. Farrar, ch. 28, 5). (*See* NUMBER VI.)

IV. Nero and Christianity.-A. Nero and the NT. Although the name Nero does not occur in the NT, he must have been the Caesar to whom Paul appealed (Acts 25:11) and at whose tribunal Paul was tried after his first imprisonment. Nero probably heard Paul's case in person, for he showed much interest in provincial cases. It was during the earlier "golden quinquennium" of Nero's reign that Paul addressed his Epistle to the Christians at Rome. Some have argued that Paul was probably martyred near Rome in the last year of Nero's reign (A.D. 68), but it is much more probable that Paul died in the first Neronian persecution of 64.

The NT never states that Peter visited Rome. The belief in such a visit arose later from tradition (cf. Clement of Rome, Ignatius, Papias, and later Tertullian, Clement of Alexandria, and the *Liber Pontificalis* [catalog of popes]). Although there is no reliable evidence that Peter was bishop of Rome, and while it is certain that if he went to Rome it was for brief period, it is highly probable that he visited the city in old age and was martyred there under Nero.

B. Neronian Policy and Christianity. Before Nero, the Roman government had been on friendly terms with Christianity, for it was not prominent enough to disturb society greatly and was probably confused with Judaism, a licensed religion (Tertullian *Apol.* 21). Paul urged the Christians of the capital to "be subject to the governing

authorities" as "instituted by God" (Rom. 13:1f.). His high estimation of the Roman government as a power operating for the good of society was probably enhanced by his own experiences before his final imprisonment. By that time the difference between Christianity and Judaism had become apparent to the Roman authorities, perhaps because of the growing hostility of the Jews, or perhaps because of the alarming progress of Christianity, and policy had begun to change for the worse.

According to one view, the Neronian persecution was a unique attempt to satisfy the revenge of the mob and was confined to Rome. Christians were put forward as arsonists to remove suspicion from Nero. They were persecuted on account of false charges of Thyestean feasts, Oedipal incest, and nightly orgies; their withdrawal from pagan society and their exclusive manners caused the charge of "hatred of the human race." The evidence of Tacitus seems to support this view.

The preferable view, however, represented by Ramsay (*CRE*, ch. 11) and E. G. Hardy (*Studies in Roman History*, ch. 4), is that Christianity was permanently proscribed as a result of Nero's persecutions. In this view, the accounts of Tacitus and Suetonius are reconcilable; Tacitus gave the initial step, and Suetonius's inclusion of the persecution of Christians in a list of seemingly permanent police regulations (*Nero* xvi) indicates the outcome — an established policy of persecution. Ramsay maintained that Christians had to be tried and their crimes proved before they were executed, but Hardy argued that henceforth the Name itself was proscribed.

There is no reason to suppose that the Neronian persecution of 64 extended throughout the empire. The authorities for a general Neronian persecution and formal Neronian laws against Christianity are late. But the emperor's example in Rome would have greatly influenced the provinces; the persecutions established a precedent of great importance in the imperial policy toward Christianity.

See ROMAN EMPIRE AND CHRISTIANITY.

Henderson, *Life and Principate of the Emperor Nero* (1903).

S. ANGUS
A. M. RENWICK

NEST [Heb. (noun) *qēn* (Nu. 24:21; Dt. 22:6; 32:11; Job 29:18; 39:27; Ps. 84:3 [MT 4]; Prov. 27:8; Isa. 10:14; Jer. 49:16; Ob. 4; Hab. 2:9), (vb.) *qānan* (piel, Ps. 104:17; Isa. 34:15; Jer. 48:28; Ezk. 31:6; pual, Jer. 22:23), *šāḵan* (Ezk. 17:23); Gk. *kataskēnōsis* (Mt. 8:20 par. Lk. 9:58), *kataskēnóō* ("make nests," Mt. 13:32 par. Mk. 4:32; Lk. 13:19)]; AV also LODGE; NEB ROOST, SETTLE, "my powers unimpaired" (Job 29:18).

About half the references are to nests in general, but the following nests may be distinguished. (1) The nests of eagles or the griffon-vulture (Dt. 32:11; Job 39:27; Jer. 49:16; Ob. 4; Hab. 2:9; perhaps Nu. 24:21) are large, deep bundles of sticks and debris of deceptive strength. They are constructed in very inaccessible spots, high on cliffs or trees in the wilderness, providing a secure home for the young, which mature slowly (*see also* EAGLE). (2) Jer. 48:28 accurately describes the nests of the rock dove, built on little ledges on the face of the gorge and quite inaccessible (cf. Cansdale, p. 170). (3) It is uncertain whether Ps. 84:3 refers to nests of the swift or the swallow. Both birds are exclusively fliers with feet too underdeveloped to stand upon. They therefore build nests in niches or holes in vertical walls to which they can cling. Because they feed on insects that multiply around human settlements and because buildings provide suitable vertical walls, both birds are very much at home around people — and in the temple of God. (4) The scops-owl, which is native to Palestine and frequently nests in the ruins of human dwellings, fits the context of Isa. 34:15, although the NEB has "sand partridge" and the JB "viper."

The one literal reference to a nest is Dt. 22:6, where the law protects the nesting mother and thus the procreation of birds. The other references are usually metaphors for the security (or false security) of a person, city, or nation; e.g., the inhabitants of Lebanon "nest" among the cedars (Jer. 22:23) and the Edomites "nest" in their cliffs at Petra (49:16; Ob. 4). On the problematic Job 29:18, see the comms., especially R. Gordis (1978) and E. Dhorme (Eng. tr. 1966).

H. VAN BROEKHOVEN, JR.

NET, SEINE. Nets were used in Israel for HUNTING, FISHING, and fowling (*see* FOWLER).

(1) The most common word for net in the OT is *rešeṯ*. Nets were made out of cords (Ps. 140:5 [MT 6]) and were primarily used to catch the prey by the feet. This led to a figure of speech in which the wicked lay nets to trap the righteous, while the latter pray to God for deliverance (Ps. 10:9; 25:15; 31:4 [MT 5]; 140:5 [MT 6]; Prov. 29:5; Ezk. 19:8; Hos. 5:1) or even for a reversal, so that the wicked are caught in their own trap (Ps. 9:15 [MT 16]; 35:7f.; 57:6 [MT 7]; cf. Job 18:8). Several passages, however, indicate that a *rešeṯ* may have been used on occasion to bring down flying birds (Prov. 1:17; Hos. 7:12). In some instances, the Lord spreads a net to punish His people (Lam. 1:13; Ezk. 12:13; 17:20). *Rešeṯ* refers to a hunting net except in Ezk. 32:3, where it is used to catch a sea monster, and in Ex. 27:4f., where it ("network") refers to the grating that was placed upon the sacrificial altar.

(2) The Heb. *śᵉḇāḵâ* is mainly used to refer to some ornamental decoration on the capital of each of the two columns that stood in front of Solomon's temple. The RSV translates as "net" and "network," the AV as "net" and "wreathe," while the NEB is consistent with "network" (1 K. 7:17f., 20, 41f.; 2 K. 25:17; 2 Ch. 4:12f.;

Servants of King Ashurbanipal carry nets and stakes in a hunting scene from a Nineveh relief (*ca.* 640 B.C.) (Trustees of the British Museum)

Jer. 52:22f.). In 2 K. 1:2 it is translated as "lattice," referring to some type of window covering through which Ahaziah fell.

(3) The Heb. *ḥērem* was a net used in fishing. In a prophecy against Tyre, Ezekiel said that it would be destroyed, scraped bare, and become a place where fishermen would spread their nets (for drying; 26:5, 14). When speaking of blessings to come, Ezekiel prophesied that the Dead Sea (!) would be full of fish with fishermen spreading their nets along its now barren shores (47:10). This word for net was also used as a figure of speech to describe how the wicked snare the innocent (Eccl. 7:26; Mic. 7:2). In a prophecy of judgment the prophet related how the Lord would capture Pharaoh in His dragnet (AV "net"; NEB "meshes"; Ezk. 32:3). As Habakkuk described the evils of the Babylonians, he told how the king of Babylon ensnared his enemies in his net, and then offered sacrifices to his net in appreciation for his victories (Hab. 1:15ff.). Compare the picture of a Mesopotamian ruler who had snared his enemies in his net in *ANEP*, nos. 298, 307.

(4) Large nets (Heb. *miḵmār*) were used to hunt big animals such as antelope (Isa. 51:20). Various words meaning net, derived from this root, are used in Scripture. Fishermen in Egypt spread their nets upon the water (Heb. *miḵmōreṯ*, Isa. 19:8); the psalmist prayed that the wicked would fall into their own nets (Heb. *maḵmôr*, Ps. 141:10); and the king of Babylon captured his enemies in his seine (Heb. *miḵmereṯ*; AV "drag"; NEB "trawls"; Hab. 1:15f.).

(5) The Heb. *mᵉṣôḏâ* is used to refer to a fishing net (Eccl. 9:12). A related word, *mᵉṣûḏâ*, is used in a figure of speech in which God is portrayed as bringing difficult times upon His people (Ps. 66:11) or using the king of Babylon to take the "prince" of Jerusalem captive ("snare," Ezk. 12:13; 17:20). Job complains that God has closed

Eannatum, king of Lagash, holding enemies in a net. Fragments of the "stele of the vultures," mid-3rd millennium B.C., from Tello (Louvre)

Mycenean gold Vaphio cup showing a bull trapped in a net (ca. 1500 B.C.) (National Archaeological Museum, Athens)

His net (*mᵉṣûḏ*) about him (19:6), while a wicked woman has a heart that is a snare (*mᵉṣûḏ*; NEB "trap"; Eccl. 7:26).

The NT mentions three types of nets. The most common type is the *díktyon*, a general term that can include all kinds of nets. Two Greek words are used to describe the nets that the Galilean fishermen were mending when Jesus called them to be His disciples (Mt. 4:18ff.; Mk. 1:16ff.; Lk. 5:2ff.). The more general term *díktyon* dominates in these accounts, but in two instances the Gk. *amphíblēstron* is used along with *díktyon* (Mt. 4:18; Mk. 1:16). The former term referred to a bell- or pear-shaped net that had an opening 3 to 6 m. (10 to 20 ft.) in diameter. Around the circumference of the opening small weights were placed, and when the net was cast into the lake it sank to the bottom, trapping the fish inside.

In contrast to this usage of *díktyon* with *amphíblēstron*, by itself *díktyon* refers to a larger net in John's Gospel (21:6ff.), for in it the disciples caught 153 fish. This was probably a large seine. Seines were normally fitted with floats along the top while weights were placed on the bottom. These vertical nets could be attached to the shore, while a boat dragged it out into the water in a semicircular arc and then back to the shore again. Thus the fish would be trapped between the net and the shore line. It was also possible for two boats to complete a similar maneuver.

A seine (Gk. *sagḗnē*) is specifically mentioned in the parable of the net (Mt. 13:47-50). In it the kingdom of heaven is compared to a net (seine) in which all kinds of fish are caught. The good are kept while the bad are tossed away. Thus it will be at the close of the age, the evil being separated from the righteous.

NETAIM nə-tā'əm [Heb. *nᵉṭā'îm*–'plantings'; LXX A *Ataeim*; B *Azaeim*; Lucian *Etaeim*] (1 Ch. 4:23); AV "plants." A city in Judah, mentioned with GEDERAH, which was in the Shephelah (Josh. 15:36). (The AV translated Heb. *nᵉṭā'îm*, "plants," and *gᵉḏērâ*, "hedges," but the modern versions are correct in reading the words as place names.) W. F. Albright (*JPOS*, 5 [1925], 17-54, esp. pp. 50f.) suggested an identification of Netaim with Khirbet en-Nuweiti' S of the Wâdī Elah. Netaim was the abode of royal potters, who were descendants of Shelah son of Judah. E. M. COOK

NETHANEEL nə-than'i-əl. *See* NETHANEL.

NETHANEL nə-than'əl [Heb. *nᵉṯan'ēl*–'God has given'; Gk. Apoc. *Nathanaēl, Nathanaēlos*]; AV, NEB, NETHANEEL, Apoc. NATHANAEL.

1. Son of Zuar; the leader of the tribe of Issachar who commanded 54,400 men and represented his tribe at the dedication of the tabernacle (Nu. 1:8; 2:5; 7:18, 23; 10:15).

2. The fourth son of Jesse; a brother of David (1 Ch. 2:14).

3. A priest who blew the trumpet before the ark when it was brought up from the house of Obed-edom (1 Ch. 15:24).

4. A Levite; father of Shemaiah the scribe (1 Ch. 24:6).

5. The fifth son of Obed-edom (1 Ch. 26:4); a Levite in the division of gatekeepers.

6. A prince sent by King Jehoshaphat to teach the law in the cities of Judah (2 Ch. 17:7).

7. A "chief of the Levites" who contributed to the Passover offering in the reign of King Josiah (2 Ch. 35:9 par. 1 Esd. 1:9).

8. Son of Pashhur; a priest who had married a foreign wife (Ezr. 10:22; called Nathanael in 1 Esd. 9:22).

9. A priest, head of the house of Jedaiah in the time of Joiakim the high priest (Neh. 12:21).

10. A priest who played a musical instrument at the dedication of the rebuilt walls of Jerusalem (Neh. 12:36); possibly the same as **8.** N. J. O.

NETHANIAH neth-ə-nī'ə [Heb. *nᵉṯanyâ, nᵉṯanyāhû*–'Yahweh has given'].

1. An Asaphite musician assigned by David to "prophesy with lyres, with harps, and with cymbals" (1 Ch. 25:2, 12).

2. A Levite sent by King Jehoshaphat to teach the law in the cities of Judah (2 Ch. 17:8).

3. The father of Jehudi (Jer. 36:14).

4. The father of Ishmael the murderer of Gedaliah (2 K. 25:23, 25; Jer. 40:8, 14f.; 41:1, etc.).

5. [Gk. Apoc. *Nathanias*]; AV, NEB, NATHANIAS. A layman who had married a foreign wife and was required to divorce her (1 Esd. 9:34; called Nathan in Ezr. 10:39).

NETHER WORLD [Heb. *'ereṣ taḥtîyôṯ* (Ezk. 26:20; 32:18, 24), *'ereṣ taḥtîṯ* (31:14, 16, 18); Eng. 'nether'–'lower']; AV "low parts of the earth," "nether parts of the earth"; NEB UNDERWORLD, WORLD BELOW, ABYSS. "Nether world" always refers to the abode of the dead, the destination of the people under God's judgment. In the NT it is called the "nether gloom" (Gk. *zóphos*, 2 Pet. 2:4, 17; Jude 6, 13; *see* GLOOM).

As Tromp pointed out (p. 180), *taḥtîṯ* can mean either "lower" (of two things) or "lowest" (of more than two). He concluded that since *'ereṣ* by itself denotes only "earth" and "underworld" in the OT, the adj. *taḥtîṯ* was added to clarify the sense of *'ereṣ*; thus *'ereṣ taḥtîṯ* is most accurately translated "nether world," i.e., lower world (cf. Eng. "underworld"). But Tromp's distinction between *taḥtîṯ* and *taḥtîyôṯ* ("the furthest extreme" of the underworld, pp. 182f.) is questionable (see A. Anderson, *Psalms* [*NCBC*, repr. 1981], I, 459), although 1 En. 22:9-13 certainly describes the underworld as being separated into various compartments. *See also* HADES.

On the theory (held by, e.g., Stadelmann and Tromp) that the Hebrews conceived of a three-story universe — heavens, earth, and underworld (i.e., Sheol = nether world) — *see* WORLD.

Tromp, *Primitive Conceptions of Death and the Nether World in the OT (Biblica et Orientalia*, 21, 1969), esp. pp. 180-83. G. A. L.

NETHINIM neth'ə-nim [Heb. *nᵉṯînîm*–'given ones'; Gk. *Natheineim*]; AV NETHINIMS; RSV "temple servants"; NEB "temple-servitors." A group of temple servants (1 Ch. 9:2; Ezr. 2:43, 58, 70; 7:7; 8:17, 20; Neh. 3:26, 31; 7:46, 60, 73; 10:28 [MT 29]; 11:3, 21). The word always has the article and does not occur in the singular. The LXX usually transliterates but in one passage renders it "the given ones" (Gk. *hoi dedoménoi*, 1 Ch. 9:2). The Syriac (Pesh.) also transliterates the word in Ezra-Nehemiah but in 1 Ch. 9:2 renders it by a word meaning "sojourners." The meaning "given" is suggestive of a state of servitude, and Josephus seems to confirm the suggestion by calling the Nethinim "temple slaves" (Gk. *hieródouloi, Ant.* xi.5.1 [128]). Another form of the word, however, is used to describe the Levites, "*given* unto [Aaron] on behalf of the children of Israel" (Nu. 3:9; cf. 8:16, 19).

The preexilic history of the Nethinim is little known. Talmudic tradition identified them with the descendants of the Gibeonites, whom Joshua made "hewers of wood and drawers of water for the house of my God" (Josh. 9:23, 27; T.B. *Yebamoth* 78b-79). Ezr. 8:20, however, seems to indicate that David and his officials appointed them for the service of the Levites. Some of the names of the Nethinim indicate a foreign origin. The MEUNIM (Ezr. 2:50; Neh. 7:52) and the Nephisim (Ezr. 2:50; cf. Neh. 7:52; Gen. 25:15; 1 Ch. 5:19; *see* NAPHISH) were probably aborigines in Palestine who harassed the Hebrews from time to time (Jgs. 10:12; 1 Ch. 4:41; 2 Ch. 26:7). In both Ezra and Nehemiah the list of Nethinim is immediately followed by that of the servants of Solomon, whose duties were similar to and perhaps even humbler than theirs. These servants of Solomon appear to be descendants of the Canaanites whom Solomon employed in building (1 K. 5:15; 9:15-21). One may thus assume that the Nethinim were originally foreign slaves, mostly prisoners of war, who were given to the temple and assigned the lower menial duties there (R. de Vaux, *Ancient Israel* [Eng. tr. 1961], I, 89f.). Such was the custom among many ancient peoples, the closest parallel being the *širkûtu* of Babylon (*IB*, III, 584).

At the time of the return from the Exile the Nethinim had become important. Their number was considerable: 392 accompanied Zerubbabel at the first return (538 B.C.; Ezr. 2:58; Neh. 7:60). When Ezra some eighty years later organized the second return, he secured a contingent of Nethinim numbering 220 (Ezr. 8:20). In Jerusalem they enjoyed the same privileges and immunities as the other religious orders, being included by Artaxerxes' letter to Ezra among those who should be exempt from toll, custom, and tribute (Ezr. 7:24). A part of the city in Ophel, opposite the water gate, was assigned them as an official residence (Neh. 3:26, 31); the location was certainly appropriate if their duties at all resembled those of the Gibeonites (cf. Ryle, in *CBSC*, p. 57). They were also organized into a kind of guild under their own leaders (Neh. 11:21; cf. B. Levine, *JBL*, 82 [1963], 207-212, who claims they were a cultic guild of devoted but free persons; he notes parallels with Ugar. *ytnm*).

The Nethinim are not again mentioned in Scripture. It is probable that they, with the singers and porters, gradually were incorporated into the general body of Le-

vites. Their name passed into a tradition, and the Talmud forbade intermarriage with them as un-Jewish.

J. B. GRAYBILL

NETOPHAE nə-tō'fī (1 Esd. 5:18, NEB). *See* NETOPHAH.

NETOPHAH nə-tō'fə [Heb. *nᵉṭōp̄â*–'dropping, drippings'; Gk. Apoc. B *Netebas*, A *Netōphae* (1 Esd. 5:18)]; NEB Apoc. NETOPHAE; **NETOPHATHITE** nə-tō'fə-thīt [Heb. *nᵉṭōp̄āṯî*]; AV also NETOPHATHI (Neh. 12:28). A village 5 km. (3 mi.) SE of Bethlehem on the way to Tekoa, near Anathoth and the Herodium (cf. Ezr. 2:21-23; Neh. 7:26f.). It is probably the modern Khirbet Bedd Fālûḥ, which has a nearby spring, 'Ain en-Natûf, preserving the ancient name.

The Netophathites were descendants of Caleb through Salma (1 Ch. 2:54). The town itself has no real significance except as the home of three minor biblical characters. Maharai (2 S. 23:28 par. 1 Ch. 11:30) and Heled son of Baanah (or Heleb; 2 S. 23:29 par. 1 Ch. 11:30) were two of David's thirty mighty men; they commanded the 10th and 12th army divisions, respectively (1 Ch. 27:13, 15). Seraiah son of Tanhumeth supported Gedaliah after Nebuchadrezzar installed the latter as governor (2 K. 25:23). (The same account is in Jer. 40:8, but there it reads "Seraiah the son of Tanhumeth, the sons of Ephai the Netophathite," thus listing another group, "the sons of Ephai," as coming from Netophah.)

Netophah is also mentioned in connection with the Jewish resettlement after the Babylonian captivity. 1 Ch. 9:16 identifies several Levites who returned. (Netophah was not originally a levitical city, although nearby Anathoth was; cf. Josh. 21:9-12, 18.) These Levites were also called to celebrate the dedication of the wall of Jerusalem (Neh. 12:28). Ezr. 2:22 says that fifty-six Netophathites returned (cf. 1 Esd. 5:18, fifty-five). Neh. 7:26 says that 188 men returned to Bethlehem and Netophah (cf. Ezr. 2:21f., 179 returnees).

Bibliography.–A. Alt, *Palästina Jahrbuch* (1932), pp. 12, 47-54; Y. Aharoni, *IEJ*, 6 (1956), 102-111, 137-155.

W. D. MOUNCE

NETOPHATHI nə-tō'fə-thē. *See* NETOPHAH.

NETTLES.

(1) [Heb. *ḥārûl*] (Job 30:7; Prov. 24:31; Zeph. 2:9); NEB SCRUB (Job), WEEDS. True nettles (genus *Urtica*), which in Palestine are more virulent than in Europe, would scarcely suit the conditions in the text. The LXX of Job 30:7 has Gk. *phrýganа ágria*, "wild brushwood," indicating some perennial shrub. The most probable is some species of *Acanthus*, perhaps *A. spinosus* L. or *A. syriacus* Boiss., which occur commonly as weeds in the east. The "nettles" of Prov. 24:31 may be charlock, *Sinapis arvensis* L.

(2) [Heb. *qimmôś*; Gk. *ákantha*] (Isa. 34:13; Hos. 9:6); NEB also WEEDS (Hos. 9:6). Probably a species of true nettles, the four found in Palestine being *Urtica dioica* L., *U. caudata* Vahl., *U. pilulifera* L., and *U. ureus* L. They flourish in waste places and can attain a height of 2 m. (6 ft.).

R. K. H.

NETWORK [Heb. *maʿᵃśēh rešeṭ*–'working of a net' (Ex. 27:4; 38:4), *śᵉḇāḵâ* (1 K. 7:18, 20, 41f.; etc.)]; AV also WREATHEN WORK (2 K. 25:17), WREATH (2 Ch. 4:12f.). A grill or screen which was part of the altar of burnt offering in the wilderness tabernacle and the decorations made of woven chains on the tops of the pillars in front of Solomon's temple.

The single word net (Heb. *rešeṭ*) in the combination *maʿᵃśēh rešeṭ* is a rather general word for the kind of snare used to catch birds, fish, or even an enemy. It occurs, however, in Ex. 27:4f.; 38:4 to describe the grate or lattice work around the altar of burnt offering. According to most models of the TABERNACLE, this bronze screen allowed air in underneath the fire for better circulation.

Hebrew *śᵉḇāḵâ* is used once in the sense of trap (Job 18:8); elsewhere it refers to some kind of interlacing of ornamental bronze chains decorating the tops of the pillars on the porch of Solomon's temple (1 K. 7:18, 20, 41f.; 2 Ch. 4:12f.). 1 K. 7:17 contains the Hebrew word once in the plural ("nets") and once in the singular ("checker"). To complicate this difficult verse even further the RSV and NEB translators have twice read Heb. *šiḇʿâ*, "seven," as net (cf. LXX). Naturally there is little agreement as to how these architectural details looked. 2 K. 25:17 par. Jer. 52:22f. indicates that Nebuchadrezzar king of Babylon took these networks along with other trophies of war from the TEMPLE in 586 B.C.

R. L. ALDEN

NEW; NEWNESS. The idea of "new" in Scripture is connected primarily with three words: Heb. *ḥāḏaš* ("new, fresh") and Gk. *kainós* ("new" in the qualitative sense) and *néos* ("new" in the temporal sense). While the Greek words are sometimes used synonymously (cf. Mt. 9:17 par., where the wine is *néos* and the wineskins are *kainós* ["fresh"]; what is temporally new may well be qualitatively new also), in most instances they have a difference in nuance that provides insight into the theological significance of certain verses.

In the OT *ḥāḏaš* is often used simply to indicate that something (or someone) was not formerly present, e.g., a new king over Egypt (Ex. 1:8), new grain (e.g., Lev. 23:16), a new house (e.g., Dt. 20:5), new ropes (e.g., Jgs. 15:13), a new cart (e.g., 1 Ch. 13:7), a new sword (2 S. 21:16); *see also* NEW MOON; NEW YEAR. The prophetic literature uses the concept of newness in relation to God's saving work in Israel's future. The prophets anticipate a "new covenant" that God will establish with His people (Jer. 31:31-34), a "new heart" that He will place within them (e.g., Ezk. 36:26; *see* HEART II), and "new heavens and a new earth" that He will create (e.g., Isa. 65:17). God announces "new things" before they come into being (42:9) and places a "new song" on the lips of His people (42:10). Israel looks forward to a deliverance that will usher in a new and glorious age.

In the NT *néos* occurs eight times in the Synoptic Gospels ("new wine," Mt. 9:17 par.), twice in Paul's Epistles ("new lump [of dough]," 1 Cor. 5:7; "new self," Col. 3:10), and once in Hebrews ("new covenant," 12:24).

Greek *kainós* is used to describe wineskins (RSV "fresh," Mt. 9:17 par.), treasure (Mt. 13:52), fruit of the vine (Mt. 26:29 par.), a tomb (Mt. 27:60; Jn. 19:41), cloth (Mk. 2:21; cf. Lk. 5:36), etc. More significantly, *kainós* carries over the basic eschatological orientation of the OT prophets who spoke of the age to come, the new age of messianic fulfillment. Jesus' first coming introduced radical changes in salvation-history, inaugurating the new age anticipated by the prophets. When Jesus established the sacrament of the Lord's Supper, He announced, "this cup . . . is the new covenant [*hē kainḗ diathḗkē*] in my blood" (Lk. 22:20; the preferred MSS of the Matthaean and Markan parallels omit *kainḗ*). By His death, therefore, Christ fulfilled Jeremiah's promise of a new covenant written on the hearts of God's people (cf. Jer. 31:31-34; *see also* COVENANT, THE NEW) and introduced all sorts of new things. Everyone who is in Christ is a "new creation" (2 Cor. 5:17). By His death He abolished all artificial barriers and created "one new person" (Eph. 2:15). He has given a "new commandment" (Jn. 13:34; 1 Jn. 2:7f.), the commandment to love

one another as He has loved us (*see also* COMMANDMENT, THE NEW).

As an eschatological concept, *kainós* appears repeatedly in Revelation. Believers are promised a new NAME (2:17; 3:12) and a new SONG (5:9; 14:3). The consummation of history will occur when God, the source of all newness, will make all things new (21:5). The present order will be replaced by "a new heaven and a new earth" (21:1; *see* HEAVENS, NEW), and God will dwell with His people in the "new Jerusalem" (21:2; *see* JERUSALEM IV.C). Meanwhile, Christians live between the inauguration and consummation of the messianic age.

It is significant that the body of canonical Christian writings produced in the 1st cent. A.D. is called the "New Testament" (or Covenant). These writings declare the fulfillment of the prophetic expectations for the new age, explain the historic basis for the new relationship between God and man, and point to the consummation when what now is new will be perfectly complete.

NEW MAN [Gk. *kainós ánthrōpos*]; NEB NEW HUMANITY. This English expression occurs once in the RSV, where Paul says that Christ has abolished the barriers that divided mankind into two types of persons, Jew and Gentile, "that he might create in himself one new man in place of the two" (Eph. 2:15). "New man" is also used by the AV in 4:24; Col. 3:10. *See* NEW NATURE.

NEW MOON [Heb. *ḥōḏeš*–'new moon,' 'month'; Gk. *neomēnía* (Col. 2:16)]; AV, NEB also MONTH. Hebrew *ḥōḏeš* is derived from the verb *ḥāḏaš*, "make new"; it is never used simply to denote "newness" but always to designate the "new moon" (perhaps because it was a "fresh beginning") or the "month" (i.e., the period of time that begins with each new moon).

The Israelite calendar was lunar (*see* CALENDAR II.A.2); thus it is not surprising that the first day of each lunar month, like the sabbath, was a day set apart to worship God. The festivals of new moon and sabbath are often mentioned together in the OT (e.g., Isa. 1:13; 66:23; Ezk. 45:17; 46:1, 3; see de Vaux, pp. 476f.). As might be expected, the new moon of the seventh month carried special prominence (Lev. 23:24f.; Nu. 29:1-6; cf. 2 Ch. 5:3; Ezr. 3:6; Neh. 8:2); some have suggested, in fact, that this was the day of Israel's New Year Festival (see *TDOT*, IV, 235; cf. de Vaux, pp. 502-504).

The new moon observance was similar to that of a sabbath, but with a greater note of festive joy (cf. Hos. 2:11 [MT 13]). There was to be no mourning or fasting on this day (cf. Jth. 8:6); like the sabbath it was a day of rest from ordinary work (Am. 8:5). The various offerings prescribed for the new moon (Nu. 28:11-15) were significantly greater in quantity and quality than those for the sabbath (28:9f.), suggesting that — at least during one period in Israel's history — the new moon was a higher day than the sabbath. This day was considered an opportune time for offering peace offerings to Yahweh as a memorial (Nu. 10:10). A particular new moon could be chosen as the day for an annual family sacrifice (cf. 1 S. 20:5f., 28f.). Apparently Saul held a feast for his court the first two days of every month (cf. vv. 5, 18f., 24-27, 34); this account suggests that the new moon festival may have been celebrated for two days at certain times in Israel's history, perhaps because of the difficulty in determining precisely the day of the new moon.

As on any other feast day, God was thought to be especially near on the new moon; thus it was a good time to seek God's special guidance by consulting a prophet (2 K. 4:23). Interestingly, Ezekiel four times mentions receiving a vision on the first day of the month (Ezk. 26:1; 29:17; 31:1; 32:1).

The prophets often express a negative attitude toward the new moon and other festivals (e.g., Isa. 1:13f.; Hos. 2:11 [MT 13]; 5:7); they strongly reject the prevalent idea that these cultic observances could please God while social justice is neglected. Nevertheless, Isaiah employed the symbols of the new moon and the sabbath festivals to describe the joy that will characterize the new age to come: at that time all peoples will come to Jerusalem every sabbath and new moon to worship Yahweh (Isa. 66:23). In Ezekiel's picture of the ideal kingdom, the prince leads the people in worship on the new moon and sabbath (Ezk. 45:17; 46:1-7).

It is quite possible, as some have suggested, that the new moon received greater emphasis after the Exile, since in postexilic times Israel became primarily a religious community rather than a nation. The observation of the feasts, including the new moon, was resumed before the temple was rebuilt, beginning on the first day of the seventh month after the return under Zerubbabel (Ezr. 3:1-6 par. 1 Esd. 5:47-53). It was also on the first day of the seventh month that Ezra, during his reform efforts, read the law before the public assembly (Neh. 7:73b–8:2 par. 1 Esd. 9:37-40). The importance of the new moon and other festivals in postexilic Israel is also clear from Neh. 10:33 (MT 34).

That the new moon festival continued to be prominent in the NT era is suggested by Paul's exhortation to believers in Christ at Colossae: "Therefore, let no one pass judgment on you in questions of food and drink or with regard to a festival or a new moon or a sabbath. They are only a shadow of what is to come; but the substance belongs to Christ" (Col. 2:16f.). His point is that observances of special religious days is no longer binding on Christians, since Christ has fulfilled all that the law foreshadowed.

How the day of a new moon was determined is not known. Probably in the various communities a special watch was set at the appropriate time of the month; when the new moon was sighted, the surrounding countryside was informed through a system of relayed signals. At the central shrine a blast of trumpets announced the new moon (Nu. 10:10; Ps. 81:3 [MT 4]). In later times the rabbinic council set the dates of the new moon.

NEW NATURE [Gk. *kainós ánthrōpos* (Eph. 4:24), *néos (ánthrōpos)* (Col. 3:10)]; AV NEW MAN.

I. Biblical Meaning.–In contrast with the "old nature," which means the person that the Christian was "in Adam," before conversion, the "new nature" signifies the renewed being of the person who by faith is "in Christ," recreated inwardly, and indwelt by the Holy Spirit. The "old" nature is corrupt and expresses itself in evil deeds; the "new" bears the image of God and is marked by knowledge, righteousness, and holiness (Eph. 4:22ff.; Col. 3:9f.). *Néos* means new in the sense of "young," e.g., a newborn child; *kainós* means new in the sense of "renovated," e.g., a rebuilt house. One who has put on the *néos ánthrōpos* (lit. "new man") is "a babe in Christ" (cf. 1 Cor. 3:1); one who has put on the *kainós ánthrōpos* has undergone a decisive moral and spiritual change. Only Paul used this phrase, although the thought of renovation through new birth by the Spirit pervades the NT and goes back to Jesus (Jn. 3:3ff.; *see* REGENERATION).

"New nature" in Paul has a christological reference and points to a transforming relationship with the "last Adam," i.e., Christ; "old nature" points to mankind's fatal heritage from "Adam the first." Cullmann wrote on Col. 3:9f.: "The expression 'put on the new man', which is completely parallel to 'put on Christ' (Gal. 3:27; Rom. 13:14), shows that Paul thinks also of the objective basis for this transformation — Adam for the old man, Jesus for the new man" (*Christology of the NT* [Eng. tr. 1959], p. 174). The description of the "new nature" as created in God's image (a clear echo of Gen. 1:26) similarly contrasts Adam, in and through whose unfaithfulness to God mankind became unfaithful, and Jesus Christ, in whom God's image was perfectly displayed and through whom it is beginning to be displayed in mankind. "The 'Man', who alone is and has remained the image of the Creator, can form us according to this image when we 'put on the new man'" (Cullmann, p. 174).

This christological reference explains how Paul could give *kainós ánthrōpos* a corporate application in Eph. 2:15, which describes as "one new man" (RSV, AV) the new Jewish-Gentile community that Christ's reconciling action created. Paul's thought was that in and through Christ those who make up the new community are organically linked together; they are a new humanity, "all one in Christ Jesus" (Gal. 3:28); they share a given corporate life as "members one of another" (Eph. 4:25) and anticipate a promised corporate destiny whereby they will attain to "mature manhood, to the measure of the stature of the fulness of Christ" (v. 13). Meanwhile they must recognize their unity and express it by patient mutual love and service (4:1ff.; Rom. 12:4ff.; 1 Cor. 12; etc.).

The NT uses five different verbs to express the divine act involved when individuals put off the old nature and put on the new. (1) In Eph. 2:10 (cf. 4:24) the Christian is said to be "created in Christ" (*ktízō*), and in 2 Cor. 5:17 (cf. Gal. 6:15) he is called a "new creation" in Christ (*kainḗ ktísis*). (2) In Jn. 3:3-6; 1 Pet. 1:3, 23 and elsewhere the Christian is said to be "born anew" (*gennáō ánōthen, anagennáō*) by the Spirit through the Word as a fruit of Christ's resurrection, so that he is now one of God's "newborn babes" (1 Pet. 2:2). (3) In Eph. 2:5 and elsewhere the Christian is said to be "made alive" (*zōopoiéō*) through coresurrection with Christ, so that he is now brought "from death to life" (Rom. 6:13; cf. Eph. 2:1). (4) In Eph. 4:23 he who puts on the *kainós ánthrōpos* is "renewed" (*ananeóō*) spiritually, while (5) in Col. 3:10 he who puts on the *néos ánthrōpos* is being "renewed" ethically (*anakainóō*, as in Rom. 12:2; 2 Cor. 4:16). The correspondence of the anthropological idea of renewal and the christological concept of coresurrection is evident.

One who has put off the "old nature" and put on the "new nature" (the image is of changing clothes) has become the "spiritual" (*pneumatikós*) person of 1 Cor. 2:15; 14:37; Gal. 6:1 whose life is mastered by the indwelling Spirit, as distinct from the person "of the flesh" (*sarkikós*) and the "unspiritual" or "natural" (*psychikós*) person controlled by sensual appetites and graceless thoughts (Rom. 8:5-9; 1 Cor. 2:14; 3:1, 3f.; Eph. 2:3). (Christians become "of the flesh" if they lapse into sensual and graceless ways; the "unspiritual" or "natural" person, who lacks the Spirit, is "of the flesh" all the time.) The Christian's renewed self — which is his "heart" in the biblical sense — is his "inner nature" (2 Cor. 4:16; cf. Rom. 7:22; Eph. 3:16; 1 Pet. 3:4), the person that he now really is, even though he may sometimes fail to act in character. It is "according to the inner nature" that he seeks God, delights in God's law, and enjoys God's life through Spirit-given fellowship with Christ. His hope is that one day his "outer nature" (physical being, "members," cf. Rom. 6:13, 19; Col. 3:5) will be changed to match the "inner nature" on the pattern of the transformation of the physical in Jesus' resurrection and ascension, so that sin and decay will no more touch him (Rom. 7:22-25; 8:11-23; Phil. 3:20f.).

II. Theological Bearing.–The NT discussion points to the sovereignty of grace in regeneration. Though "put on" by human decision, the "new nature" (or "new man") is God's "new creation," brought about through Christ's resurrection and the sending of the Spirit. The "new man," which subjectively is one's identity as God's adopted child in Christ, is objectively the restoring and fulfilling of one's humanity through union with "the man Christ Jesus" (1 Tim. 2:5). Hereby one's "mind" — disposition, discernment, desire, comprehension, and commitment — is made new. Not by transubstantiation (change of substance), nor by transmutation (change of species), nor by transplant (change of natural organs), but by the indwelling presence of Christ through the Spirit, human beings are brought to behave in a quite new way — differently motivated, differently integrated, differently directed.

NEW YEAR. The starting point of a CALENDAR represents the New Year. In many cultures the turn of the year is marked by special celebrations, commonly designated the New Year Festival. The time and nature of these festivities varied considerably in the ancient Near East.

I. In the Ancient Near East
  A. Egypt
  B. Babylon
  C. Assyria
  D. Canaan
II. In Ancient Israel and Judah
  A. Autumnal New Year
  B. Spring New Year
III. In the NT
IV. In Postbiblical Judaism

I. In the Ancient Near East.–*A. Egypt.* The Egyptian calendar commenced with the first day of the first month of the Season of Inundation. The inscriptions from the temple of Edfu (2nd cent. B.C.) provide the fullest description of the rituals associated with the New Year. The highlight was the removal of the image of Horus from his temple that it might be exposed to the sun's rays and thus effect the reunion of the deity's soul and body. Cf. *DBSup.*, VI, 555f. *See also* EGYPT VI.A.

B. Babylon. Although the *akītu* festival is often associated with the New Year, it is clear that in ancient Mesopotamia the event was celebrated in different cities and at different times of the year. In Babylon it was identified with the New Year observed near the vernal equinox on Nisan 1-11. Although no complete record of the rituals associated with the event has survived (*ANET*, pp. 331-34, describes the ritual for days 2-4), several important features of the festival can be identified: the entire epic of creation (*Enuma Elish*) was recited before Marduk; the temples of Marduk and Nabû were cleansed; the king was ritually humiliated in the temple; the statue of Marduk was taken to the Shrine of Destinies where the events of the coming year were decreed. In the most popular phase of the celebration the king "took Bēl [Marduk] by the hand," leading the grand procession of all the deities down Procession Street, the people bowing in awe before the great god. The images were installed in the *akītu* house outside the city, and a lavish banquet ensued; the sacred marriage (*hieros gamos*) was then celebrated (the exact time, place, and participants are not clear). On the final day the procession returned to Babylon, all the gods assembling at the Shrine of Destinies in Nabû's temple to fix "the destinies of the land." The next day Nabû's image was returned to its home in Borsippa, and the rest of the gods were dispersed to their respective shrines throughout the land.

The Babylonian New Year Festival was an elaborate affair, apparently incorporating aspects of several originally separate rituals. The event seems to have had several objectives: (1) to celebrate the supremacy and enthronement of Marduk; (2) to ensure the success of the enterprises of the coming year; (3) to affirm the king's status as high priest of Marduk; (4) to celebrate the enthronement of Nabû; (5) to mark the New Year on the calendar. It is doubtful that the Babylonian festival had anything to do with the death and resurrection of Marduk. Cf. J. A. Black, *Religion*, 11 (1981), 52f.

C. Assyria. The Assyrian *akītu* festivals probably bore some resemblance to the Babylonian celebrations. Sennacherib constructed an *akītu* house outside Asshur to be used in the month of Nisan. The actual purpose and rituals of the Assyrian festival remain unclear. Since the event was held in various cities at different times of the year, it is unlikely that the *akītu* festival functioned generally as a New Year celebration.

D. Canaan. The discovery of the mythological texts at Râs Shamrah has enabled some scholars to reconstruct an elaborate Canaanite autumnal New Year Festival. The ritual celebrated (1) the death and resurrection of the fertility-god, Baal; (2) the building of Baal's palace, indicative of his triumph over death (Mot); (3) the sacred marriage (*hieros gamos*) of Baal and Anath (enacted by the king and queen); (4) the victory of Baal over the chaotic forces (Yam); (5) and his enthronement as king over gods and men. Since Baal was the god of vegetation, it is generally agreed that the festivities were designed to ensure, by means of "imitative magic," prosperity in the new year.

Though this reconstruction is attractive, it is highly speculative. No Ugaritic texts to date are identified internally with the New Year Festival. Both the occasion of the composition of the texts and the times of their recitation are unknown. Many of the texts are fragmentary, and scholars disagree on the order in which they should be arranged.

The Phoenician and Canaanite texts in linear script discovered to date are silent on the New Year and its rituals.

II. In Ancient Israel and Judah.–Scholars disagree on both the time and the nature of the New Year Festival in Israel. W. Oesterley (in Hooke, ed., *Myth and Ritual*, p. 123) reflects a common opinion in arguing for an autumnal New Year before the Exile and a spring New Year thereafter. Others recognize the simultaneous use of two calendars, the spring New Year inaugurating the cultic year, the autumn festival starting the civil New Year.

A. Autumnal New Year. 1. Evidence. Evidence for an autumnal New Year is gathered from various sources.

(a) The extrabiblical Gezer Calendar (*ANET*, p. 320), reflecting the Palestinian calendar during the early monarchy, commences with the months of olive harvest, a fall agricultural activity.

(b) The Festival of Ingathering (*'āsîp*) is dated to "the going out of the year" (*bᵉṣē't haššānâ*) in Ex. 23:16 (cf. RSV, NEB, JB, NASB, NIV, "the end of the year"). In Ex. 34:22 the same feast is fixed at "the turn of the year" (*tᵉqûpaṯ haššānâ*). These instructions are held to reflect the oldest liturgical calendars. At the opposite side of the annual cycle, the time of year when kings customarily embarked on military activity is identified in 2 S. 11:1 (par. 1 Ch. 20:1) and 1 K. 20:22, 26 as "the return of the year" (*tᵉšûḇaṯ haššānâ*). A synchronism of 2 Ch. 36:10 with the Babylonian Chronicle, which recounts the appointment of Zedekiah as king in Jerusalem in the month of Adar, confirms the interpretation of this expression as the springtime. See A. K. Grayson, *Assyrian and Babylonian Chronicles* (1975), p. 102; but cf. N. H. Snaith, *Jewish New Year Festival* (1947), pp. 32f., for a dissenting view.

(c) The Sabbatical and Jubilee years commenced in the autumn (Ex. 23:10f.; Lev. 25:9). The latter was announced with the blowing of the ram's horn (Shofar), which in later Judaism was characteristic of the New Year celebration (Mish. *Rosh ha-Shanah* iv.1-9).

(d) Some scholars assert that the instruction that the month of Abib (= Nisan) is to be the first month of the year in Ex. 12:2 is a postexilic (P) alteration borrowed from the Babylonians.

(e) The expression "the head of the year" (*rō'š haššānâ*) in Ezk. 40:1 is identified with Tishri 10, or at least an autumnal beginning to the new year.

(f) Solomon is described as having begun the construction of the temple in the second month (Ziv) of his fourth regnal year (1 K. 6:1, 37) and to have completed the project in the eighth month (Bul) of his eleventh year. The entire

task is said to have taken seven years (1 K. 6:38). By the inclusive system of reckoning time, whereby fractions are treated as full units, from the second month of the fourth year to the eighth month of the eleventh can equal seven years only by the Tishri-Tishri system; according to the Nisan-Nisan computation this would total eight years. See Thiele, pp. 28f.

(g) According to 2 K. 22:3 Josiah's repairs to the temple commenced in his eighteenth year. However, 2 K. 23:23 indicates that the climax of the reformation, the celebration of the Passover, also occurred in his eighteenth year. Since it is impossible that the intervening events could have happened in the two weeks required by the Nisan-Nisan calendar, Tishri 1 must have marked the beginning of his regnal year. See Thiele, pp. 29f.

(h) The duration between the command to Jeremiah to record his prophecies in the fourth year of Jehoiakim (Jer. 36:1) and Baruch's reading of the scroll in the ninth month (Kislev) of Jehoiakim's fifth year (36:9) appears to have been limited. Furthermore, since the king is warming himself in his winter house at the time of Baruch's reading, it must have been winter. By the Nisan-Nisan reckoning this would have required a minimum of nine months; with an autumnal New Year no more than nine or ten weeks is needed for the intervening period. See J. Morgenstern, "The New Year for Kings," in B. Schindler, ed., *Occident and Orient* (Gaster Anniversary Volume; 1936), pp. 439-456.

(i) According to Neh. 1:1 Nehemiah was in Susa in the month Kislev of the twentieth year of the king. In 2:1, however, the month of his royal service is Nisan, but it is still the twentieth year. This is possible only if the narrator was assuming an autumnal New Year, an apparent reversion to preexilic practice.

2. Nature of the Israelite New Year Festival. The most important argument for an autumnal New Year for many is the nature of the festival itself. The event is generally interpreted as one aspect of the much greater complex of fall celebrations which included the Feast of Ingathering, the Day of Atonement, and the Feast of Booths, all of which were observed during the month of Tishri. The reconstructed New Year Festival bore many resemblances to those already observed in Babylon and Ugarit. The evidence for these celebrations is drawn largely from the Psalms, many of which are viewed to have had their *Sitz im Leben* in these rituals.

Prominent in the liturgy of the New Year was the celebration of the enthronement of Yahweh. Following the lead of Mowinckel, many see *yhwh mlk* ("Yahweh has become king!") as the watchword of the occasion. This and similar expressions are frequent in the so-called enthronement Psalms (47, 93, 96–100). By annually reenacting the drama in the cult ritual the kingship of Yahweh was made a present reality. The festival recalled several dimensions to his kingship: (1) His lordship over the world was renewed in the dramatic reenactment of his creative (33:6-9; 95:3-5; 104:5-9) and providential (104:10-30) acts. (2) Similar to Marduk's victory over Tiâmat in Babylon, Yahweh's conquest of the unruly watery chaos, the forces of evil, was symbolized in the ritual combat (74:12-14; 89:9-12 [MT 10-13]; 93:3f.). (3) The cultic presentation of His victory over the nations, Israel's enemies, portrayed His providential care for Zion (2, 46–48). (4) His kingship over Israel, as expressed in His electing and saving acts, also featured prominently. Like Baal's supremacy in the Canaanite ritual, so Yahweh's kingship guaranteed Israel's continued prosperity (65:9-13 [MT 10-14]), as well as the maintenance of justice and righteousness (98:1-3; 99:4f.). The festival reached its climax with the bringing up of the ark, representing Yahweh's throne, to the temple on Zion.

These rituals did not merely commemorate Yahweh's past action; they actualized them for each generation of Israelites. Through the enthronement festival ancient Israel witnessed Yahweh's arrival as king and celebrated Him as the creator of the world, king of the whole earth, and savior of the nation.

In these dramatic reenactments the king played a special role. In the Psalms he functions as a divine figure: Yahweh places the crown on his head (21:3 [MT 4]) and promises him eternal life (21:4 [MT 5]; 72:5; 89:29, 36 [MT 30, 37]); the king is called a "son of God" (2:7; 89:27f. [MT 28f.]); he is addressed as God (45:6 [MT 7]); he may claim lordship over the world (72:8; 89:25 [MT 26]); for other kings to rebel against him is to rebel against Yahweh (2:1-9); he rules according to the principles of divine justice (45:6f. [MT 7f.]; 72:4, 12f.); his reign is characterized by fertility and prosperity (72:6f., 16). The New Year served to renew the covenant between Yahweh and the Davidic royal house. Because of this identification of the king and the deity some of the rituals were designed as assurances for the king himself (Ps. 110). Some have claimed that the ritual humiliation of the Babylonian kings also had its counterpart in the Israelite festival (Gottlieb, pp. 87-91).

In addition to these features, traces of the sacred marriage, echoes of which are seen in the Feast of Booths (Oesterley, in Hooke, ed., *Myth and Ritual*, pp. 139f.; Hooke, *Myth and Ritual*, p. 12), as well as the celebration of the death and resurrection of the deity (G. Widengren, in Hooke, ed., *Myth, Ritual, and Kingship*, pp. 190f.) have been recognized in Israel's New Year Festival (but cf. Gottlieb, pp. 77f., who rejected these claims).

This view of the complex rituals involved in the autumnal festival understands them to have been the high point of Israel's religious year. In this way Israel bade farewell to the old year and triumphantly welcomed the new.

B. Spring New Year. 1. Response to the Claims for an Autumnal New Year. Although the evidence for an autumn New Year in Israel is considerable, it is not as impressive as it first appears.

(a) The Gezer Calendar makes no claim to being an official calendar. It is simply a schedule of activities familiar to any farmer in ancient Palestine. Such a schedule may begin anywhere in the cycle, but it is natural in rural societies to measure time informally in relation to the harvest. In this case the olive harvest serves as an appropriate starting point. A similarly designed agricultural calendar has been discovered among the Ebla tablets (3rd millennium B.C.; *see* TELL MARDIKH), but this calendar seems to have been replaced by a more official one (cf. G. Pettinato, *Archives of Ebla: An Empire Inscribed in Clay* [1981], pp. 147-153). Neither calendar claims to begin at an official New Year. Cf. the common modern practice in urban centers of computing time with reference to the annual vacation period.

(b) Concerning the expression *ṣē't haššānâ*, the correlative *bô' haššānâ* in 2 K. 13:20 seems to mean "springtime" (so RSV, NASB, NIV; contra J. Gray, *I & II Kings* [*OTL*, 2nd ed. 1970], p. 600, "late summer"). If the coming in of the year occurred in the springtime, the same must have been true of the end of the old year. The second correlative, *t^ešûḇat haššānâ*, also refers to the springtime (de Vaux, p. 190). This raises the question of how, in the context of Ex. 23, *ṣē't haššānâ* could be applied to an autumnal observance when the expression itself denotes the springtime. The answer is to be found in the analogy of the Gezer text. Ex. 23 says nothing about a calendar year; it has reference to the schedule of agricultural activities consisting of plowing, sowing, harvesting, and gathering in. The Feast of Ingathering terminates this cycle, not any official calendar year.

(c) Being essentially agricultural observances, the Sabbatical and Jubilee years fall naturally after the harvest. But to be precise, according to Lev. 25:9 the Sabbatical Year commences on Tishri 10, not on the postulated New Year on Tishri 1. Furthermore, Neh. 10:31 (MT 32) confirms the independence of the agricultural schedule from the calendar year by referring to the Sabbatical Year at a time when the spring New Year was being observed (Clines, *JBL*, 93 [1974], 30).

(d) The argument for Babylonian influence on Ex. 12:2 can be sustained only if one assumes the text is postexilic and represents an intentional polemic against the use of the old calendar with its purported autumn New Year. Neither assumption is certain. The syntax of the sentence suggests a description of an existing fact, not a new precept. It is assumed that already in Egypt the Israelites had counted the months of the year from Nisan (cf. U. Cassuto, *Comm. on the Book of Exodus* [Eng. tr. 1967], p. 137). But even if the text itself is postexilic, it may still be argued that the instruction represents a much older tradition, attached to Moses himself. As the leader in the Exodus event as well as its theological interpreter, he could readily have recognized its significance and attached the commencement of the Israelite calendar to the birthdate of the nation.

(e) Caution is advised in applying later usage to the meaning of the expression *rō'š haššānâ* in Ezk. 40:1. The adoption of the phrase by later Judaism to designate New Year's Day need not reflect its significance for Ezekiel. It should be understood as "the beginning of the year," but in keeping with the prophet's consistent usage of the Babylonian system of reckoning elsewhere, a Nisan New Year is required. Cf. J. Finegan, *Handbook of Biblical Chronology* (1964), pp. 210-12.

(f) The seven years required for the construction of the temple in 1 K. 6:38 do not demand a Tishri New Year. The number may represent a stylized approximation, quite appropriate for a sacred task such as this, rather than an independent, precise statement of the duration of the project. Furthermore, in view of the apparent use of the exclusive system of reckoning in 1 K. 9:10, the appeal to inclusive usage here is not convincing. Cf. Clines, *JBL*, 93 (1974), 30-32.

(g) The celebration of Josiah's Passover in 2 K. 23:23 on the fourteenth day of the first month (cf. 2 Ch. 35:1) of his eighteenth regnal year, within a fortnight of the discovery of the Book of the Law (2 K. 22:3-13), is problematic only if one assumes that the narrator recounted the events of the reform in their chronological order of occurrence. 2 Ch. 34:1-8 suggests that the repairing of the temple represented one episode in a series of reforms begun ten years earlier (v. 3), rather than the motivation for those reforms as suggested by the order of 2 K. 22–23. The record of Josiah's campaign against any form of idolatry reads like an independent account without any reference to the discovery of the Book. The Book does not resurface until v. 21, where Josiah quite naturally leads the people in a covenant renewal ceremony by celebrating the Passover. Given the urgency of the situation, the immediate issuing of orders to make preparations for the Passover is to be expected. Since the accounts stress that the event was celebrated *in Jerusalem, by those who were present*, that is, *the inhabitants of Jerusalem* (2 K. 23:23; 2 Ch. 35:17f.), there was no need for a long period of preparation. Consequently, appeal to an autumnal New Year is unnecessary.

(h) Apparently Jer. 36:9, 22 describes Jehoiakim's reign on the basis of the spring New Year. The ninth month falls in the winter only by this scheme. Furthermore, the difficulty of finding an explanation for the nine-month delay in the reading of Jeremiah's scroll in the temple is not resolved by adopting an autumnal New Year. If Baruch needed to wait three months, why not nine? No compelling historical occasion can be found that would make the Tishri reckoning preferable.

(i) Admittedly the relationship of Neh. 1:1 to 2:1 is difficult to understand. An appeal to an autumn New Year for the editor of Nehemiah's memoirs is questionable in the light of the consistent assumption of a spring New Year by Ezekiel, the postexilic prophets, the narrator of Kings, "P," and the Chronicler. Thiele (p. 30) attributes this to "an intense spirit of nationalism." But this is valid only if the Israelites and Judeans had begun their official calendar year on Tishri 1 in the past. The foregoing suggests that there is little firm evidence for this. Furthermore, the Persian calendar with its spring New Year is employed consistently elsewhere in the book (2:1; 6:15; 7:72; 8:2, 14). How then are 1:1 and 2:1 to be reconciled? Any proposal which attempts to identify a terminus a quo other than the accession date of Artaxerxes, named in 2:1, is speculative. It is possible that the text of 1:1 has suffered in transmission. The absence of the name of the king looks suspicious. Perhaps the number nineteen has been mistakenly changed to twenty under the influence of 2:1. Or v. 1 may be an editorial addition to Nehemiah's autobiography. In any case, the passage is too problematic to be used in defense of an autumnal New Year.

The OT passages which speak clearly about the time of the New Year in the Hebrew calendar are disappointingly scarce. Indeed, apart from Ex. 12:2 the New Year is never specifically dated. If one excludes the debatable texts discussed above, however, the enumeration of a month *always* assumes an Abib/Nisan beginning of the year. Although the Israelites probably often dated their activities informally in relation to the high points in the religious calendar or the agricultural cycle for practical reasons, just as today students will speak in terms of the academic year or business people of the fiscal year, this should not be interpreted as the recognition of another calendar alongside the official one. From the earliest times, it appears, the Israelites adhered officially to a calendar whose beginning was associated with the vernal equinox. The observance of two simultaneously recognized New Year's days within the same lunisolar year is unlikely (but cf. J. B. Segal, *Hebrew Passover* [1963], pp. 135ff., who postulates an autumn royal New Year Festival and a spring popular festival; Y. Kaufmann, *Religion of Israel* [Eng. tr. 1960],pp. 306f., argues for a priestly spring New Year Festival and an autumn popular celebration).

2. Nature of the Israelite New Year Festival. Even if the Israelites had celebrated the onset of the New Year in the autumn, the reconstruction of the festivities as outlined above has serious weaknesses.

(a) From the perspective of methodology, the type of "patternism" which would recognize uniform cultic practices over widely scattered areas is open to challenge. The interpretation transfers Babylonian ideas and rituals involved in their *akītu* festivals to the Canaanite celebrations, and then via Canaan to Israel. Even if all three may have in principle been celebrating the same event, the turn in the calendar year, allowance should be made for variant conceptions of the roles of deities and kings.

(b) If the New Year Festival was as important a *Sitz im Leben* for many of the Psalms as it is claimed, why are there no unequivocal points of contact? But the original liturgical use of these Psalms, to say nothing of the original situation which spawned them, remains largely unclear. The problem is exacerbated by the total silence of the rest of the OT on the festival. Therefore, any reconstruction is purely hypothetical.

(c) The interpretation proposed for the expression *yhwh mlk*, found in many of these Psalms, is doubtful. Many of the so-called enthronement Psalms are monotheistic hymns in which the phrase declares, "It is Yahweh [not Baal or any other god] who is king!" rather than "Yahweh has become king!" Cf. E. J. Young, *Book of Isaiah*, III (1972), 550-52.

(d) Practices such as the sacred marriage in which the king plays the part of the deity, the reenactment of the deity's death and resurrection, and the ritual combat will be recognizable only to those who expect to find them. But even then, they can be identified only through allusions, suggestions, hints. For a critical response to the pre-Creation *Chaoskampf* interpretation of Ps. 74:12-17 see H. W. F. Saggs, *Encounter with the Divine in Mesopotamia and Israel* (1978), pp. 54-63.

(e) Finally, in Israel the autumn festival was first and foremost a harvest festival, not a New Year's celebration. The texts in which it is described make no allusions to the creation of the world, the conflict with the mythical primordial monster, or the sacred marriage of the king. Cf. Fohrer, p. 204.

In conclusion, the witness of the entire OT points to the commencement of the Israelite calendar in the springtime. In the context of a highly developed liturgical calendar, the silence of the records on any celebrations commemorating the turn of the year is remarkable. To be sure, the Passover falls within a fortnight of the event, but its primary significance has nothing to do with the end of the old year and the commencement of the new. It is to be expected that the Israelites would have welcomed the coming of the New Year in some way, but whatever these practices may have been, they were so overshadowed by the other celebrations of the religious calendar that not a trace remains. Indeed, when the New Year finally emerged as a significant festival in later Judaism its position in the lunisolar calendar had shifted a full 180 degrees, appearing now as an autumnal celebration.

III. In the NT.–Although the official calendar in the NT times was the Roman calendar, events are most often dated with reference to the Jewish religious year: the Passover (Jn. 13:1), the Feast of Tabernacles (7:2), Pentecost (Acts 2 1), the Sabbath (Mk. 2:27). However, the NT is silent on any type of New Year observance.

IV. In Postbiblical Judaism.–The Mishnaic tractate *Rosh ha-Shanah* speaks of four New Year's days: Nisan 1 for kings and feasts; Elul 1 for the tithe of cattle: Tishri 1 for the years (of foreign kings), the years of Release and Jubilee, and the planting of trees and vegetables; Shebat 1 (so Shammai; cf. 15, Hillel) for the tithing of trees and vegetables. In practice, however, Tishri 1 was celebrated as the "head of the year" (*rō'š haššānâ*). How this date came to replace Nisan 1 is not clear. In contrast to the other festivals in the religious calendar, only Rosh ha-Shanah and Yom Kippur (Day of Atonement) were characterized by special solemnity. Although the celebration traditionally marked the creation of the world, the blasts of the ram's horn (Shofar), which figured prominently in the ritual, called the celebrants to soul searching and repentance. This was also a Day of Judgment (*Yom ha-Din*). All of humankind was viewed as passing before the throne of God, each person giving strict account of his or her actions during the past year and receiving assurance of mercy for the year to come. This was possible by virtue of the deeds of the fathers that are remembered by God (hence the designation *Yom ha-Zikkaron*, "Day of Remembrance").

D. I. BLOCK

NEZIAH nē-zī'ə [Heb. *nᵉṣî(a)ḥ*–'faithful, true'; Gk. Apoc. B *Nasi*, A *Nasith*]; AV Apoc., NEB Apoc., NASITH. The head of a family of temple servants (Nethinim) who returned from the Exile with Zerubbabel (Ezr. 2:54; Neh. 7:56; 1 Esd. 5:32).

NEZIB nē'zib [Heb. *nᵉṣîḇ*; LXX *Naseib*]. A city of the Judean Shephelah (Josh. 15:43). It is plausibly identified with Khirbet Beit Neṣib, about 13 km. (8 mi.) N of Hebron and 3 km. (2 mi.) S of KEILAH, with which it is mentioned in the city list in Josh. 15. E. M. COOK

NIBHAZ nib'haz [Heb. *niḇḥaz*]. A word written with a large final *z* (*zayin rabbāṭî*) in many Masoretic MSS and attested only in 2 K. 17:31, where it is recorded that the Avvites, a people settled by the Assyrians in Samaria, "made Nibhaz and Tartak." The reference may be to the Elamite gods Ibnakhaza and Dirtaq (F. von Hommel, *Orientalistische Literaturzeitung*, 15 [1912], 118), but omission of the Hebrew particle *'eṯ*, expected before a proper name, may indicate an otherwise unknown common noun or a textual problem. The proposal that *niḇḥaz* is a tendentious alteration of *mizbē(a)ḥ*, "altar," seems unconvincing. P. W. GAEBELEIN, JR.

NIBSHAN nib'shan [Heb. *hanniḇšān*; LXX A *Nebsan*; LXX B *Naphlazon*; Syr. *n'šn*]. A city in the wilderness area of eastern Judea (Josh. 15:62). Cross and Milik identified Nibshan with Khirbet el-Maqârī SW of Qumrân, where fortifications and other structures from the 9th to 6th cents. B.C. have been found. But the narrow chronological span renders this site too late for Joshua's time (unless, like Cross, one is willing to date Josh. 15 in the 9th cent.).

The divergent forms of the LXX B and Syriac are probably errors in textual transmission, not a reflection of any ancient tradition.

Bibliography.–F. M. Cross and J. T. Milik, *BASOR*, 142 (Apr. 1956), 5-17; F. M. Cross and G. E. Wright, *JBL*, 75 (1956), 202-226, esp. 224.

E. M. COOK

NICANOR nī-kā'nər, ni-kā'nôr [Gk. *Nikanōr*–'conqueror'].

1. A friend and general of Antiochus IV Epiphanes; son of Patroclus (1 Macc. 3:38; 2 Macc. 8:9). Nicanor hated the Jews (1 Macc. 7:26f.).

In 166 B.C. Lysias, regent of the western part of the Seleucidian domain (i.e., Syria), sent Nicanor and two other generals (Gorgias and Ptolemy) to put down the rebellion of Judas Maccabeus. So confident were they of victory that merchants followed to purchase Jewish slaves (1 Macc. 3:32-41; Josephus *Ant.* xii.7.2f. [296-98]). But Judas defeated them decisively at Emmaus and caused the Syrian soldiers to flee into Philistia (1 Macc. 4:1-22; Josephus *Ant.* xii.7.3f. [299-312]). 2 Macc. 8:34-36 (an account questioned by many scholars) embellishes the story by stating that Nicanor fled to Antioch in disguise.

When Antiochus IV died several years later, his nephew Demetrius escaped from Rome, seized and put to death both Lysias and Antiochus V, and assumed the throne of Syria as Demetrius I Soter (1 Macc. 7:1-4; Josephus *Ant.* xii.10.1 [389f.]). Demetrius sent Nicanor with an army to capture Judas and to confirm Alcimus (pro-Hellenist priest of the Aaronic line) as high priest in Jerusalem. Nicanor was appointed governor of Judea before he left (2 Macc. 14:12). Arriving in Jerusalem, he asked Judas to have a peaceful conference; his secret intention was to seize him during a meeting. Judas learned of the plot and would not meet with him a second time (1 Macc. 7:27-30; Josephus *Ant.* xii.10.4 [402-404]). Two battles followed. In the first, at Capharsalama (site uncertain), Nicanor suffered some losses (1 Macc. 7:31f.; Josephus *Ant.* xii.10.4 [405]). In the second, near Beth-horon and Adasa (villages NW of Jerusalem), Nicanor received some reinforcements but was slain early in the battle. His army fled to Gazara (32 km. [20 mi.] W of Jerusalem) and was destroyed by the Jews. The Jews cut off Nicanor's head and right hand and displayed them in Jerusalem. The day of Nicanor's defeat, 13 Adar 161 B.C. (Mar. 9), was annually celebrated by the Jews as "Nicanor's Day" (1 Macc. 7:33-49; 2 Macc. 15:25-36; Josephus *Ant.* xii.10.5 [406-412]). The author of 2 Maccabees closes his story on this triumphant note.

2. One of the seven men selected by the early Church to serve tables in order to free the apostles for other responsibilities (Acts 6:5). *See* SEVEN, THE.

NICODEMUS nik'ə-dē-məs [Gk. *Nikodēmos*–'conqueror of the people' or 'victor over the people']. A Pharisee and member of the Sanhedrin ("a ruler of the Jews," Jn. 3:1), mentioned only in the Fourth Gospel, in connection with the discourse on the new birth (3:1-10), the last day of the feast (7:37-52), and the burial of Jesus (19:38-42). Nothing is known about his family background, although unsuccessful attempts have been made to identify him with Nicodemus ben Gorion in the Talmud.

Nicodemus shared the Jewish expectation of a political messiah who would deliver his people from the Romans. He was perplexed at Jesus' teaching about the spiritual nature of His kingdom. Nicodemus's cautiousness kept him from revealing openly his interest in Jesus and His teachings, but his curiosity compelled him to seek to know more.

By meeting Jesus at night he showed his unwillingness to be seen in His presence and to risk the disfavor of his fellow Pharisees, among whom Jesus was decidedly unpopular. He acknowledged, however, that Jesus was "a teacher sent from God" whose power came from God (Jn. 3:2). Jesus used the occasion to present to him truths concerning the new birth and the necessity of being born "of water and the Spirit" (v. 5) before one could enter the kingdom of God. Although a Pharisee and "teacher of Israel" (v. 10), Nicodemus did not understand even the basic principles of the kingdom. The interview did not result in his acceptance of Jesus openly, but it must have made a deep impression on his mind.

Some months before the crucifixion some of the chief priests and Pharisees denounced Jesus as an impostor and sought to have Him arrested. Nicodemus came to His defense and asked whether it was permissible, according to Jewish law, to judge a man without first giving him a hearing (Jn. 7:50f.). As a result of his seeking just and fair treatment of Jesus he was accused of having joined His Galilean followers. Not until the day of the crucifixion did he reveal more openly his support of the cause of Jesus when he and another member of the Sanhedrin, Joseph of Arimathea, gave the body of Jesus a decent burial (19:39). His providing much expensive myrrh and aloes for the burial implies that he was rich.

John used the Nicodemus interview to illustrate the statement in 2:25 that Jesus "knew what was in man." Jesus saw in Nicodemus a sincere seeker after truth to whom He could reveal a clearer and more complete knowledge of His mission than He could to many others. The statement that Nicodemus came to Jesus "by night" (3:2) fits John's frequent use of words capable of two meanings. Nicodemus came to see Jesus, not only under the cloak of physical darkness but also in a position of spiritual darkness. This leader and spiritual teacher's lack of spiritual understanding illustrates the condition of the Jewish nation as a whole. But he also represents the Jews sincere in their desire to know more about Jesus and the meaning of His mission.

The NT does not say whether Nicodemus ever became a Christian, but he probably did. Later Christian legend embellishes the NT account with stories of his baptism, hardships encountered because of his Christian faith, and his ultimate banishment from Jerusalem. The *Acts of Pilate* (4th cent.) was called the *Gospel of Nicodemus* in the Latin tradition after the 14th century. H. E. FAGAL

NICODEMUS, GOSPEL OF. *See* APOCRYPHAL GOSPELS III.B.

NICOLAITANS nik-ō-lā'ə-tənz [Gk. *Nikolaïtēs*]. Followers of a deviant form of Christianity in Asia Minor, who were sharply condemned by John in his letters to Ephesus (Rev. 2:6) and Pergamum (2:15). The church in Ephesus is commended for its rejection of the Nicolaitans, who may stand in some relationship to the "false apostles" of v. 2. The group had gained a foothold, however, in Pergamum where, like Balaam of old, it encouraged the people to practice idolatry and sexual immorality (cf. Nu. 25:1-3; 31:16). Since the same practices were rampant in Thyatira, because of the influence of a certain prophetess "Jezebel" (Rev. 2:20), it is probable that the Nicolaitans, though not mentioned explicitly, were active there as well.

I. Name.–Nothing can be said with certainty about the origin of the name. Later Christian tradition linked the Nicolaitans with Nicolaus of Antioch, one of "the Seven" of Acts 6:1-6 (Irenaeus *Adv. haer.* i.26.3), attributing the heretical character of the movement either to Nicolaus himself (Hippolytus *Ref.* vii.24) or to misinterpretations of his teaching on the part of his followers (Clement *Misc.* ii.20; iii.4). Since there are related references to contemporary groups of Nicolaitans (see III below), and since

NT personages tended to be glorified rather than vilified in Church tradition, such an interpretation is not implausible. But, in the absence of any solid information on Nicolaus and on the subsequent history of the first-century Nicolaitans, it is advisable to approach this later tradition with caution.

Another approach, originating with C. A. Heumann (1712), is to see the term Nicolaitans as symbolic, resulting from an etymological play on the Hebrew name Balaam (*bil'ām* < *bālaʿ ʿam*, "he has destroyed the people," or *baʿal ʿam*, "lord of the people") that was then rendered into a Greek equivalent (*nikṓ laón*, "he has conquered the people"). Such an explanation should not be dismissed out of hand, especially for a writing like Revelation. While the appearance of the same wordplay in rabbinic tradition (T.B. *Sanhedrin* 105a) is probably too late to have probative value, wordplays on "Balaam" were not unknown in the 1st cent. (cf. Philo *De cherubim* 32). Furthermore, the other terms that appear in John's description of this group — Jezebel (v. 20) and Balaam (v. 14; while the syntax in v. 15 is difficult, it is probable that Balaam and Nicolaitan refer to the same group) — are his own symbolic characterizations, rather than terms used by the group of itself. But if such an explanation is judged to be too fanciful, then all that can be said is that the Nicolaitans owed their name to a Nicolaus about whom nothing is certain apart from his name.

II. Characteristics.–Any assessment of the nature of the Nicolaitan deviance must begin with Rev. 2:14f., where the teaching of Balaam is described as advocating the eating of "food offered to idols" (*eidōlóthyta*) and sexual immorality. The former accusation refers either to the purchase of previously consecrated meat on the open market or to actual participation in pagan religious festivals. The latter could be interpreted as metaphorical reference to idolatry, but should more probably be taken literally. Both practices are among those forbidden in the "Apostolic Decree" of Acts 15:28f.; 21:25.

Ramsay, attempting to put the motives of the Nicolaitans in the best possible light, saw them not as libertines but as well-meaning Christians prepared to make minor concessions in order to participate in the civic and economic life of Hellenistic society. While participation in Hellenistic life was no doubt a factor, the Nicolaitans were more probably advocates of an antinomian life-style, flaunting their "freedom" in a manner not unlike that of certain elements in the church at Corinth (cf. also the antinomian "followers of Balaam" in 2 Pet. 2:15; Jude 11).

The passage has several hints that the antinomian practice of the Nicolaitans might have been the fruit of a deeper doctrinal deviancy. The emphasis on "teaching," together with their claim to "know the deep things of Satan" (v. 24), suggests that Irenaeus was correct in characterising the Nicolaitans as a proto-Gnostic group (*Adv. haer.* iii.11.1).

III. Subsequent History.–Patristic references appear to imply the existence in the late 2nd cent. of a libertine Gnostic group known as Nicolaitans (Irenaeus *Adv. haer.* i.26.3; Tertullian *Adv. Marc.* i.29, *De praescr. haer.* 33; Hippolytus *Ref.* vii.24; Clement *Misc.* ii.20; iii.4; Eusebius *HE* iii.29). While most of these references are vague and insubstantial, Clement at least appears to have had solid information on a contemporary group claiming Nicolaus of Antioch as its founder. Current scholarly opinion, however, is skeptical that any link can be established between this group and that known to John. The most that can be reasonably conjectured is that the latter — whether "Nicolaitan" was a real party name or just John's own cryptic designation — was absorbed into some second-century manifestation of Gnosticism.

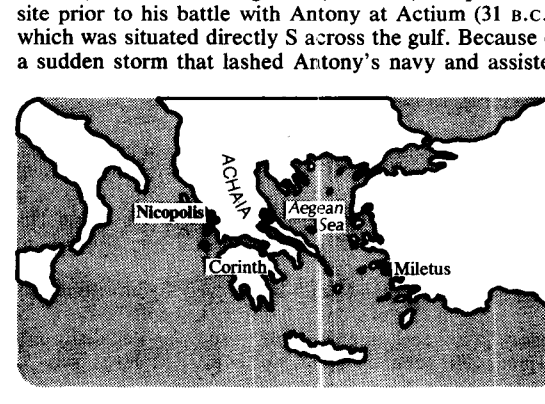
T. L. DONALDSON

NICOLAS nik'ə-ləs (AV, NEB, Acts 6:5). *See* NICOLAUS.



NICOLAUS nik-ə-lā'əs [Gk. *Nikolaos*–'conqueror of the people'] (Acts 6:5); AV, NEB, NICOLAS. One of the seven men chosen by the congregation of Jerusalem to assist the apostles by taking over the ministry of relief to the poor (i.e., "to serve tables," Gk. *diakoneín trapézais*, Acts 6:2). These men are traditionally known as the first deacons; but they are not given any formal title in the text, and the subsequent activities of Stephen and Philip are broader than the normal work of a deacon. (*See* SEVEN, THE.)

We know nothing about Nicolaus from the NT except what can be gleaned from Acts 6:1-7. He is called a proselyte (*prosḗlytos*), i.e., a convert to Judaism rather than a Jew by birth. Luke also mentions that Nicolaus was from ANTIOCH (SYRIAN), which reflects Luke's interest in that city. This information about Nicolaus helps to set the stage for the mission to the Gentiles centered in Antioch (cf. 11:19-26; 13:1-3; etc.) Nicolaus must have been a man "of good repute, full of the Spirit and wisdom" (6:3), for these were the qualifications that the apostles set for the Seven.

From at least the time of Irenaeus (*Adv. haer.* i.26.3; cf. iii.11.1) there have been attempts to link this Nicolaus with the heretical NICOLAITANS referred to in Rev. 2:6, 15. The historical value of these attempts is debatable, and the paucity of information about either Nicolaus or the Nicolaitans makes such a connection questionable — especially in the light of Luke's portrayal of Nicolaus's Christian character. The earliest extant Latin comm. on Revelation (Victorinus of Pettau, *ca.* A.D. 300) says that the heretical group used the name of this Nicolaus, but it implies that he himself was not responsible for the heresy (see F. F. Bruce, *Book of the Acts* [*NICNT*, 1954], p. 129).

V. R. GORDON

NICOPOLIS ni-kop'ō-lis [Gk. *Nikopolis*–'city of victory']. A number of ancient cities — in Pontus, in Cilicia, in Bithynia, on the Thracian border, in Egypt, and elsewhere — were named Nicopolis in honor of victories. Nicopolis in Palestine was halfway between Jaffa and Jerusalem (1 Macc. 3:40, 57; 9:50). But the city at which Paul instructed Titus to meet him (Tit. 3:12) was most likely Nicopolis in Epirus, sometimes rather generally referred to as Nicopolis in Achaia. It was situated on the northern promontory that shuts in the gulf of Ambracia (now known as Arta) to the west. Augustus (Octavian) camped at the site prior to his battle with Antony at Actium (31 B.C.), which was situated directly S across the gulf. Because of a sudden storm that lashed Antony's navy and assisted

in bringing about his defeat, Augustus founded the city of Nicopolis, established it as a Roman colony, instituted a special festival to Apollo, and contributed to the building of a temple there with considerable support from Herod the Great (Josephus *Ant.* xvi.5.3 [147]).

Paul's intended visit to this city (after his release from prison) implies a plan to establish a Christian mission on the west coast of Greece — a task that had not been accomplished during the journeys recorded in Acts. Moreover, if Paul had passed through Miletus and Corinth (see 2 Tim. 4:20) on his way to Nicopolis, then probably he was arrested there and taken again to Rome. The postscript to Titus in Codex Alexandrinus stating that the Epistle was written from Nicopolis is late, however, and can hardly be accurate.

The city suffered early decline but was restored by Julian, and after a sacking by the Goths it was again restored by Justinian. In medieval times it decayed and was succeeded by Prebeza. The ruins are visible today.

See Pauly-Wissowa, XVII/1, 511-18.

G. L. BORCHERT

NIGER nī'jər [Gk. *Niger* < Lat. *niger*–'black']. Surname of SIMEON (6), who was one of the prophets and teachers at the church at Antioch (Acts 13:1). The surname may indicate that he was from North Africa, and some have conjectured that he was the Simon of Cyrene who carried Jesus' cross (Mt. 27:32 par.).

NIGH. *See* NEAR.

NIGHT [Heb. *laylâ, layil*] (e.g., Gen. 1:5); NEB also NIGHTFALL, OVERNIGHT, TONIGHT; [*lîn*–'pass the night'] (e.g., "spend the night," Gen. 19:2; 24:54; etc.); AV ABIDE, LODGE; ['*emeš*–'yesterday evening'] ("last night," Gen. 31:29, 42); AV YESTERNIGHT; NEB YESTERDAY; ['*ereḇ*–'evening'] (Job 7:4; Ps. 30:5); NEB EVENING, NIGHTFALL; ['*ašmûrâ*–'night-watch'] ("watch of the night," Ps. 63:6 [MT 7]); [Aram. *bûṭ*–'pass the night'] ("spend the night," Dnl. 6:18 [MT 19]); [Gk. *nýx*] (e.g., Mt. 2:14); NEB also NIGHTFALL, "as darkness fell," TONIGHT, etc.; [*phylakḗ*–'watch'] ("part of the night," Mt. 24:43); AV WATCH; [*dianyktereúō*–'spend the whole night'] ("continue all night," Lk. 6:12); [*agrypnía*–'sleeplessness, watching'] ("sleepless night," 2 Cor. 11:27); AV WATCHING, NEB "go without sleep"; [*nychthḗmeron*] ("a night and a day," 2 Cor. 11:25); NEB TWENTY-FOUR HOURS. That period of time without sunlight between dusk and dawn (approximately 6:00 P.M. to 6:00 A.M.).

The primary Hebrew word for night is *laylâ* (or the poetic form *layil*). The verb *lîn/lûn* is used most often in the literal sense of lodging for the night in some place (e.g., Gen. 28:11; 31:54; 32:13, 21 [MT 14, 22]; Josh. 3:1; Jgs. 19:6, 9, etc.); on the duty of providing overnight lodging for travelers *see* ENTERTAIN; INN). The primary NT term for night is Gk. *nýx*. In Greek literature *nýx* generally has a negative, ominous character. In mythology Nyx is the goddess of the night.

Night is first mentioned in the creation account of Gen. 1. On the first day God created light and separated it from the primeval darkness (1:3f.), and "God called the light Day, and the darkness he called Night" (v. 5). On the fourth day God created the sun to rule the day and the moon and the stars to rule the night (vv. 14-18; cf. Ps. 136:9); therefore both the day and the night belong to Him (Ps. 74:16).

During OT times the Hebrews divided the night into three night-watches (cf. Ps. 63:6 [MT 7]; Lam. 2:19; Jgs. 7:19; Ex. 14:24), but by NT times they had adopted the Roman custom of four night-watches (Lk. 12:38; Mt. 14:25 par.; cf. Mk. 13:35); *see* WATCH.

In the OT "night" often serves simply to indicate the time that an event occurred (e.g., Gen. 14:15; Nu. 11:9). Night was often the occasion of dreams (e.g., Gen. 20:3; 40:5), of visions (e.g., Dnl. 7:2; Zec. 1:8), and of other revelatory events (e.g., Gen. 26:24; Jgs. 6:40). The most memorable night in the OT was that of Passover, when Israel was delivered from bondage to Egypt (Ex. 11:4; 12:8, 12, 29-32, 42). During the desert wanderings God led His people by night with the pillar of fire (Ex. 13:21). Night was a favored time for clandestine activities (cf. Isa. 16:3). It was often chosen as a time for military deployment (e.g., Josh. 8:3; 10:9; Jgs. 9:34; cf. Isa. 15:1), for occult practices (1 S. 28:8), and for crimes such as thievery, sexual misdeeds, and murder (e.g., Job 24:14-17; Jer. 49:9; Gen. 19:1-5, 33-35; Jgs. 19:25; Prov. 7:8f.; Neh. 6:10). Night could therefore be a time of terror (Ps. 91:5f.). Yet those who trusted God did not need to fear the night (91:5f.); indeed, day and night are the same with God (139:11f.). During sleepless nights one was particularly vulnerable to feelings of dread (Job 4:13-21), worry (7:3f.), and grief (Ps. 6:6f. [MT 7f.]). But for the righteous the night could also be a productive time of personal meditation and spiritual refreshment (Ps. 63:6 [MT 7]; 77:6 [MT 7]; 92:2 [MT 3]; 119:55; cf. Josh. 1:8).

Figuratively, darkness and night symbolize the realm of evil, untruth, and judgment (Mic. 3:6; Wisd. 17:2-21). Zechariah prophesied that on the day of the Lord "there shall be continuous day . . . for at evening time there shall be light" (Zec. 14:7). In 2 Esdras several strange events at the end of the age occur at night (5:4, 7; cf. 7:38-42; the night is also the occasion of angelic visits [5:31; 6:12, 30, 36] and of dreams and visions [7:1; 11:1; 13:1]).

In the NT, as in the OT, "night" is used most often in the literal sense as an indication of time. Jesus walked on the water during the fourth watch of the night (Mt. 14:25). Sometimes He spent the whole night in prayer (Lk. 6:12; cf. Mt. 26:36-46 par.; see also Lk. 2:37; Acts 16:25). Nighttime was a frequent occasion for angelic visitations (Lk. 2:8f.; Acts 5:19; 12:7; 27:23) and for divine revelation through dreams (Mt. 2:12, 22) and visions (Acts 16:9; 18:9; 23:11).

The holy family fled to Egypt by night (Mt. 2:14). Likewise, it was under the cover of darkness that Paul and Silas escaped from Thessalonica (Acts 17:10) and that Roman soldiers escorted Paul from Jerusalem (23:23, 31). Nicodemus's decision to visit Jesus by night (Jn. 3:2) may have been prompted by "fear of the Jews" (cf. 19:38f.), but for John it also had a symbolic meaning: Nicodemus came out of the darkness of evil and untruth into the light of God's truth (cf. 3:19-21). Conversely, Judas left the light to go into the darkness on the night that he betrayed Jesus (13:30). It was at night, during the "power of darkness" (Lk. 22:53), that Jesus was arrested and brought to trial, abandoned by His disciples (Mt. 26:31), and denied by Peter (v. 34 par. Mk. 14:30).

In several NT passages "night" is employed in a purely figurative sense. Usually "night" corresponds to "darkness" (*see* DARK) as "day" corresponds to "light" (*see* LIGHT). In Jn. 9:4 Jesus, the "light of the world" (v. 5), cites a proverb to emphasize the urgency of completing His work on earth before the time arrives when such work is not possible, i.e., the time of His death on the closing of the age (cf. 11:9f.). Paul contrasts the "night" of the present age to the dawning "day" of the new age when God's rule will be consummated (Rom. 13:12). That day will come "like a thief in the night" (1 Thess. 5:2; cf. Mt. 24:42-44 par. Lk. 12:38-40; 2 Pet. 3:10; Rev. 3:3; 16:15; cf. also Lk. 17:34). But those who live in the light of

divine revelation need not be taken unaware, because they are not in darkness (1 Thess. 5:4). Paul therefore exhorts the Thessalonian Christians to avoid the (moral and spiritual) sleep and drunkenness associated with the night and instead to remain alert and sober as befits the daytime (vv. 5-8).

The book of Revelation, like some of the OT prophets (cf. Isa. 13:10; Joel 3:15 [MT 4:15]), depicts a darkening of the sun, moon, and stars at the time of the final judgment (Rev. 8:12; cf. Mk. 13:24f.). In the new Jerusalem, however, there will be no more night, "for the Lord God will be their light" (Rev. 21:25; 22:5).

A. E. HILL

NIGHT HAG [Heb. *lîlîṯ*; Gk. *onokéntauroi*, normally a variety of ape, but in LXX Isa. 13:22; 34:11, 14 it apparently refers to a kind of demon found in deserted places; so LSJ, p. 1232] (Isa. 34:14); AV "screech owl"; NEB "nightjar." The Heb. *lîlîṯ* is ultimately derived from Sum. lil, "wind," "spirit" (cf. Akk. *lilu*, "demon," *lilîtu*, "female demon"); it has no connection with Heb. *laylâ*, "night." Thus the RSV translation "night hag," though better than the AV and NEB translations referring to nocturnal birds, is inaccurate. Heb. *lîlîṯ* is also a cognate of Phoen. *llyn*, which occurs in an amulet from Arslan Tash (7th cent. B.C.) directing incantations against various demons (cf. F. M. Cross and R. J. Saley, *BASOR*, 197 [Feb. 1970], 46 and nn. 24f.; *ANET*, p. 658). Thus Heb. *lîlîṯ* refers to a malevolent supernatural being. In the OT Heb. *lîlîṯ* is found only in Isa. 34:14, where it is associated with other creatures who dwell in deserted places. This corresponds to the widespread belief that chaotic conditions and demonic beings inhabit the regions outside the perimeters of civilization.

The paucity of information makes it impossible to say anything definite about the night hag in the OT. In rabbinic literature, however, doubtless reflecting older folktales and folk beliefs, Lilith is regarded as a feminine demonic creature of the night, possessing wings and long flowing hair. According to legend Lilith was Adam's first wife, but remained with him for only a short time because she insisted on full equality with him (Ginzberg, I, 64-66). By pronouncing the divine name, Lilith flew away into the air and disappeared, and three angels sent by God could not persuade her to return to Adam, even though the penalty for not returning was the death of one hundred of her demonic children each day. Lilith now takes revenge on baby boys during the first night of their lives, and on baby girls for the first twenty days. In the talmudic period Lilith was thought able to take the form of a female *succubus* ("one who lies under") and impersonate a man's wife for the purpose of luring him into sexual relations. As a male *incubus* ("one who lies upon"), a Lili (the masc. sing. Aram. *lyly*) was thought able to impersonate a husband. Any children born of such irregular unions were thought to exhibit the effects of having a demonic parent.

The feminine and masculine forms of *lîlîṯ* occur frequently in the texts of the Aramaic incantation bowls. In one such text (No. 3, Isbell) the author seeks protection from "demons, demonesses, lilis, liliths, plagues, [evil sat]ans and all evil tormentors that appear." Such lists are meant to be as comprehensive as possible and reveal that the liliths were but one class of an elaborate taxonomy of malevolent spiritual beings. The sexually aggressive character of the lilis and liliths accounts for the fact that exorcistic texts are often expressed in formal divorce terminology, such as this text (No. 35, Isbell): "Again, bound and seized are you, evil spirit and powerful lilith. . . . But depart from their presence and take your divorce and your separation and your letter of dismissal. [I have written against] you as demons write divorces for their wives and furthermore, they do not return [to them]."

NIGHT WATCH. *See* DAY II; DAY AND NIGHT; WATCH.

NIGHTHAWK [Heb. *taḥmas*—probably 'violent one'] (Lev. 11:16; Dt. 14:15); NEB SHORT-EARED OWL. One of the abominable or unclean birds that the Israelites were forbidden to eat.

The identification of this bird is uncertain. "Night hawk" in British usage — reflected in the AV rendering — may refer to a small songbird called the nightjar, two species of which are to be found in Israel: the migrant European variety (*Caprimulgas europaeus*) and the resident Nubian species (*Caprimulgas nubicus*). If, however, the Hebrew term connotes a predator, the nightjar would be eliminated as a possibility. A species of owl would be more suitable (cf. LXX *glaúx*, "owl," in both passages).

G. WYPER

NIGHTJAR (Isa. 34:14, NEB). *See* NIGHT HAG.

NIGHT-MONSTER. *See* NIGHT HAG.

NILE nīl [Heb. *yᵉʾôr*, prob. loanword < Egyp. *ỉtrw*, *ỉʾr(w)*, Copt. *eioor*, "watercourse"; cf. Akk. *iaʾuru*, "river Nile"; Gk. *potamós*, "river"]. The river of Egypt, to be distinguished from *nᵉhar miṣrayim*, "the river of Egypt," which refers to Wâdī el-ʿArîsh (Gen. 15:18, etc.). For the physical description of the Nile, *see* EGYPT III.A-D.

1. Name.—The early Egyptian name was *ḥʿpy*, later *ḥp*, which was also the name of the Nile-god, vocalized Ḥaʿpy in A. Gardiner, *Egyptian Grammar* (3rd ed. repr. 1978), p. 580. The word from which the Hebrew term is derived is *ỉtrw* (*ỉʾr*[*w*] from the 18th Dynasty on), "stream, river, watercourse," specifically referring to the Nile and its branches and channels (A. Erman and H. Grapow, *Wörterbuch der aegyptischen Sprache*, I [1926], 146; T. O. Lambdin, *JAOS*, 7 [1953], 151). The Greek *Neilos* and Latin *Nilus* have not been satisfactorily explained etymologically. The suggestion that Gk. *Neilos* was formed by adding the definite article *n-* to the word for river (cf. P. Montet, *Eternal Egypt* [Eng. tr. 1965], p. 6) cannot be accepted, since Coptic evidence proves that the *r* in *ỉʾrw* was phonemic and not an orthographic representation of *l*, as was sometimes the case in Egyptian. In the OT *naḥal miṣrayim*, literally "wadi of Egypt," does not refer to the Nile, for the Nile is never called a wadi, but refers rather to the Wâdī el-ʿArîsh (*see* BROOK OF EGYPT). But *nᵉhar miṣrayim*, "the river of Egypt" (Gen. 15:18), refers to the Nile, if the text is correct (cf. BDB, p. 625). The term Shihor is used also (Josh. 13:3; etc.), probably referring to the easternmost branch of the Nile in the Delta. The term *yᵉʾôr* is used exclusively of the Nile and its arms or canals with the exception of Isa. 33:21, "watercourses," and Dnl. 12:5-7, where it refers to the Tigris and is translated "stream" (cf. BDB, p. 384). The basic meaning of the Egyptian term that lay behind the Heb. *yᵉʾôr* is reflected in the LXX, which translates it consistently by *potamós*, "river," and never by *Neilos*.

II. Significance of the Nile.–To the Egyptian the Nile began at the first cataract (Syene or Aswân). According to one bit of mythology, after emptying into the Mediterranean the river went into an underground Nile and returned to begin anew at Syene (cf. J. H. Breasted, *History of Egypt* [1919], pp. 55f.). This article, therefore, is limited to the portion of the Nile that was of importance to the ancient Egyptian. "Egypt is the gift of the Nile" — so, we are told, Herodotus expressed it (cf. ii.5). Water for irrigation of the fields, as well as for ordinary purposes, replenishing of the soil by the annual inundation, and the means of transportation were all supplied by the Nile. *See* Plate 45. It follows quite reasonably that the Nile was looked upon as a god.

Ḥapi (or Ḥapy) was the Nile-god. He-she is portrayed as a hermaphrodite, a figure with pendant breasts, the fertilizer male and nourisher female (cf. R. Patrick, ed., *All Color Book of Egyptian Mythology* [1972], Plate 1). It was fitting that offerings and prayers be made to the Nile for all the benefits he-she bestowed, and Ramses III recorded the offerings he made at Per-Ḥapi ("the house of Ḥapi," near modern Old Cairo) and other places. Ḥapi responded to such thanksgivings by manifesting him-herself in the annual flooding that renewed the fields and provided food for man and beast. The significance of the Nile to the ancient Egyptian can be seen in the "Hymn to the Nile" (cf. T. E. Peet, *Comparative Study of the Literatures of Egypt, Palestine, and Mesopotamia* [1931], pp. 77f.). It should be added that Osiris is often considered to be the god of the Nile and the causer of the Inundation (but cf. J. Černý, *Ancient Egyptian Religion* [1952], pp. 84f.), while at other times the crocodile-god Subek, or the dead king Unis appearing as Subek, is responsible for the annual flooding. Ḥapi is perhaps to be identified as one of the offspring of Osiris, but it must be admitted that Ḥapi has become all but lost in the Egyptian pantheon because of the prominence given to other deities.

III. The Nile and the Bible.–The story of the preservation of the infant Moses in a basket placed in the Nile (Ex. 2:3-10; Heb. *yᵉ'ôr* is translated "river" in RSV) needs no repetition. Less well known, perhaps, is the prominence of the Nile in the account of the plagues (7:17-19). According to one interpretation, several of the plagues resulted from an unusually high inundation of the Nile (cf. G. Hort, *ZAW*, 69 [1957], 84-103; 70 [1958], 48-59; W. S. LaSor, D. A. Hubbard, and F. W. Bush, *OT Survey* [1982], pp. 138-140; D. M. Beegle, *Moses, the Servant of Yahweh* [1972], pp. 96-118). But even if this "natural" interpretation is rejected, it must still be admitted that the striking of the Nile would be seen as a triumph of the God of the Hebrews over the Nile-god of the Egyptians, just as the tenth plague was seen as a judgment on all the gods of Egypt (12:12). The prophets Ezekiel (30:12) and Zechariah (10:11) foretold a future judgment on Egypt in which, among other things, the Nile would be dried up.

W. S. LaSOR

NIMRAH. *See* BETH-NIMRAH.

NIMRIM, WATERS OF nim'rim [Heb. *nimrîm*]. A place in Moab associated with Zoar and Horonaim in the oracles against Moab in Isa. 15:1ff.; Jer. 48:1ff.

Eusebius (*Onom.* 138.21) identified the site with Bennamarim N of Zoar, and Jerome (comm. on Isa. 15) placed it on the Dead Sea with salt waters around it. Wâdī en-Numeirah, a stream flowing W into the Dead Sea about 13 km. (8 mi.) above its southern end, would fit the context. The suggestion of Wâdī Nimrîm, a stream flowing W into the Jordan about 13 km. (8 mi.) N of the Dead Sea, seems much less likely.

Bibliography.–*GP*, I, 178; II, 399; N. Glueck, *AASOR*, 15 (1935), 7f.; cf. 25 (1945), 36ff. W. S. L. S.

NIMROD nim'rod [Heb. *nimrōḏ*]. A heroic figure listed as the son of Cush among the descendants of Ham in Gen. 10:8-12.

Nimrod is mentioned only three times in the OT: Gen. 10:8-12; 1 Ch. 1:10; Mic. 5:6 (MT 5). The Genesis tradition comprises an ancient fragment of Semitic historiography, which by its terseness is reminiscent of Sumerian history writing. In Gen. 2:13 Cush was described as a region surrounded by the "river" (better, "irrigation canal") known as Gihon. Although often identified with a region S of Egypt (the Ethiopia of ancient authors), it is actually unrelated to Cush (cf. E. A. Speiser, "River of Paradise," in *Festschrift Johannes Friedrich* [1959], pp. 473-485). Most probably the Cush of Gen. 2:13 was the district E of Mesopotamia from which the Kassites (the *Kuššû* of the Nuzi documents) emerged. The presence of Cush as the first name in the Hamite genealogy (Gen. 10:6; 1 Ch. 1:10) merely establishes the fact of his birth in Mesopotamia, and does not necessarily connect him with the land known in later times as Cush/Ethiopia. At the same time it does not preclude the possibility that his descendants may have migrated there.

Nimrod was "the first on earth to be a mighty man" (Gen. 10:8). His skill as a hunter inspired a proverb: "Like Nimrod a mighty hunter before the Lord" (v. 9). The phrase "before the Lord" is either the writer's indication that Nimrod's mighty deeds were in accordance with the will of Yahweh (Speiser) or is the equivalent of "on the earth" (G. von Rad, *Genesis* [Eng. tr., 2nd ed., *OTL*, 1972], p. 146).

Nimrod built a mighty kingdom in Mesopotamia (vv. 10-12). Its beginning was in the major cities of Babel, Erech, and Accad, all in the land of Shinar (the OT name for Sumer). Some translations have listed a fourth city, Calneh (so AV), but the Hebrew word could be read, with slight repointing, as *kullānâ*, "all of them" (so RSV, NEB; cf. KoB, p. 440). Nimrod's kingdom is also associated with Assyria (vv. 11f.). He founded four cities, two of which are identifiable and well known as Assyrian capitals (Nineveh and Calah). The AV reads these verses to indicate that a separate figure named Ashur founded the Assyrian cities, but this rendering is not defensible. The association of Nimrod with Assyria is supported by Mic. 5:6 (MT 5), which refers to Assyria as the "land of Nimrod."

Some commentators suggested that the Nimrod tradition in Gen. 10 is a fragment from the epic of some Babylonian deity (Ninurta is most frequently suggested), but the abundance of concrete detail in vv. 8-12 makes it far more

likely that Nimrod was a historic personage. Speiser and other recent commentators regarded Tukulti-Ninurta I (*ca.* 1246-1206 B.C.) as the most likely choice, since he was the first Assyrian ruler to assert control over Babylonia as well. He was a widely celebrated figure, and his exploits could be the basis for the brief hero tradition of ch. 10. Nimrod could be related to the last half of the compound name, although this identification presents linguistic difficulties, as well as being much too late historically if the Genesis reference is in fact ancient Semitic historiography. Speiser also pointed out that classical sources seem to identify Tukulti-Ninurta I with the legendary figure Ninus, and postbiblical sources independently relate Ninus to Nimrod. No other historical identification seems to recommend itself strongly, although von Rad (p. 146), holding to the Hamitic connections of Cush, suggests Amenhotep III (1411-1375 B.C.), which seems to be at least a millennium too late.

VI. Library of Nineveh
  A. Royal Archives
  B. Literary Texts

I. Etymology.–The word appears in the cuneiform sources as *Ninua* and *Ninuwa*. The latter, which is the older form, is found in the Mari Letters (18th cent. B.C.) and seems to be the origin of the biblical form. Although *Ninuwa* may be of Hurrian origin, the cuneiform ideogram, composed of the sign for fish (*ḫa*) in an enclosure, shows that the name was early associated with the word for "fish" (Akk. *nūnu,* Heb. *nûn* [*nôn*]), an obvious allusion to the river-goddess Nina, whose emblem was the fish.

II. Biblical References.–Nineveh is first mentioned in the Bible in Gen. 10:11f., which states that Nimrod, a mighty hunter before the Lord, came from the land of Shinar (Babylonia) to Assyria and there built "Nineveh, Rehoboth-Ir [possibly a term describing Nineveh as a "city of wide streets"], and Calah, and Resen between Nineveh and Calah; that is the great city." Although the last phrase is used of Nineveh in Jonah 1:2; 3:3; 4:11, in this passage it probably refers to Calah, first, because of the word order of the Hebrew, and second, because Calah (modern Nimrûd) definitely outranked Nineveh in political importance at the time that Gen. 10 was probably written down. The statement in Genesis faithfully reflects the historical fact that Assyria was settled from Babylonia and that from the beginning it was closely attached, politically and culturally, to its southern neighbor.

2 K. 19:36 (par. Isa. 37:37) simply states that Sennacherib after his abortive attack on Jerusalem (19:35) returned to Nineveh, which he had made his capital.

Two contemporary prophets, Zephaniah (2:13-15) and Nahum, told of the fall of Nineveh (612 B.C.). Nahum's poem, which is called "an oracle concerning Nineveh" (Nah. 1:1), depicts in vivid and powerful language the impending doom of the city that had been the scourge of the earth. Its enemies are described as delirious with joy at the news of its crushing defeat (3:19).

In striking contrast with the account in Nahum of Israel's gloating vengeance over Nineveh's downfall is the story in Jonah of Nineveh's repentance and deliverance from the wrath of God. In this "missionary tract," divine mercy supersedes divine judgment upon Nineveh because the Ninevites heeded the preaching of God's messenger Jonah to forsake their violent and evil ways (3:8) and turn in humble contrition to God. The puzzling geographical notation that the great city of Nineveh was "three days' journey in breadth" (v. 3) may refer to the larger environs of the city known as the "Assyrian Triangle," which stretched from Khorsabad, about 23 km. (14 mi.) NE of Nineveh, to Nimrûd, about 37 km. (23 mi.) SE of Nineveh. In Mt. 12:41 (par. Lk. 11:30, 32) Jesus declared that the men of Nineveh to whom Jonah preached would arise at the last judgment and condemn the generation of Jesus' time.

III. Location.–The ancient ruins of Nineveh are located a short distance from the east bank of the Tigris River and opposite the modern city of Mosul, which is about 350 km. (220 mi.) NW of Baghdad. A small river, the Khoser, which traverses the plain from the mountains to the Tigris, flows between the two main tells, or mounds, of the site — Kuyunjik to the northwest and Nebi Yûnus to the southeast. The outline of the city walls, which are about 13 km. (8 mi.) in circumference and enclose an area of about 730 ha. (1800 acres), can still be traced.

Kuyunjik, the larger of the two tells, covers about 40 ha. (100 acres) at its base and rises abruptly from the level plain to a height of almost 30 m. (90 ft.). Already a ruin in the time of Xenophon, the mound was excavated on numerous occasions between 1842 and 1932.

Tell Nebi Yûnus, "the hill of the prophet Jonah," on the other hand, is only half as large as Kuyunjik. With the exception of a small sounding in 1954, it has escaped the archeologists' spade because it is occupied by a village, a burial ground, a mosque (formerly a Christian church), and the traditional tomb of Jonah.

IV. Excavations.–The mighty city with its huge palaces, magnificent temples, and colossal statuary, was so completely destroyed that the very site was in doubt until the 19th century. As the prophets had predicted (Zeph. 2:13-15; Nah. 3:7), Nineveh became "a desolation, a dry waste like a desert," and passed into oblivion for 2500 years.

The exploration of the site of Nineveh began in 1820 with C. J. Rich, Resident of the British East India Company at Baghdad. His excellent description of the Nineveh

ruins included a map of the mounds. Rich was the first orientalist to arouse European interest in the lost civilizations of Mesopotamia.

A. H. Layard, the English archeologist and "father of Assyriology," discovered the great palace of Sennacherib king of Assyria (705-681 B.C.) in the southern corner of Kuyunjik in 1847. Excavations two years later revealed that this massive structure had at least seventy-one rooms, 3010 m. (9880 ft.) of walls covered with sculptured slabs, and twenty-seven gateways formed by colossal winged bulls and lion-sphinxes.

After Layard left Mesopotamia H. Rassam, a native Christian, carried on his work and in 1853 laid bare another great palace in the northern part of the tell that belonged to the Assyrian king Ashurbanipal (669-633 B.C.). The palace yielded vast treasures of sculpture and other works of art, and, most spectacular of all, the Royal Library with thousands of clay tablets (see VII below). The publication of these priceless texts was begun by G. Smith, an assistant in the British Museum.

Excavations continued sporadically at Kuyunjik after Layard and Rassam under the direction of E. A. W. Budge (1888-1891), L. W. King (1903), and R. C. Thompson (1927-1932), who with Hutchinson, Hamilton, and Mallowan explored the mound more scientifically and excavated the temple of Nabû.

V. History.–Although there is archeological evidence that the site of Nineveh was occupied as early as 5000 B.C., not until the 3rd millennium B.C. did signs of its importance as a religious, cultural, and political center begin to appear. Maništusu, a successor of Sargon I, erected a temple of Ishtar at Nineveh during the Semitic dynasty of Akkad (*ca.* 2360-2180). Its many restorations during the next two thousand years of Nineveh's history not only attest to the importance of this shrine of the city's main deity but also indicate that this may be the oldest building at Kuyunjik. A beautifully wrought lifesize bronze head, probably representing Sargon himself, was discovered in a sounding at Nineveh.

By 2000 Nineveh had merchants in an Assyrian colony at Kultepe in Cappadocia, where a text with the earliest known ideogram for Nineveh was discovered.

In the Early Assyrian period King Šamši-Adad I (1748-1716) rebuilt the temple of Ishtar at Nineveh and conquered the rival city of Mari, where he installed his son Yasmaḫ-Adad as governor. In the correspondence between the king and his son at Mari the name of Nineveh occurs several times (*ARM*, I, 35, 41, etc.). Shortly after the death of Šamši-Adad, however, Hammurabi king of Babylon subdued Assyria and made it a vassal state, as the prologue to his famous law code indicates (*ANET*, p. 165).

In the Middle Assyrian Kingdom (14th-12th cents. B.C.) Nineveh was the palace-city of several kings. Inscriptions discovered on the site show that Shalmaneser I (1265-1235), Tukulti-Ninurta I (1234-1197), and Tiglath-pileser I (1118-1078) had palaces at Nineveh, and that the temple of Ishtar, built a thousand years earlier, had been restored several times by the kings of this period.

Building inscriptions from both Kuyunjik and Nebi Yûnus and archeological evidence show that thirteen kings who ruled Assyria from the middle of the 2nd millennium to the end of the 7th cent. B.C. built palaces in Nineveh. Although Nineveh shared the splendor of other royal cities of Assyria — Asshur, Nimrûd (Calah), and Khorsabad (Dûr-Šarrukin) — throughout the centuries, not until the days of Sennacherib (705-681) did it become the capital of the land and one of the architectural wonders of the world.

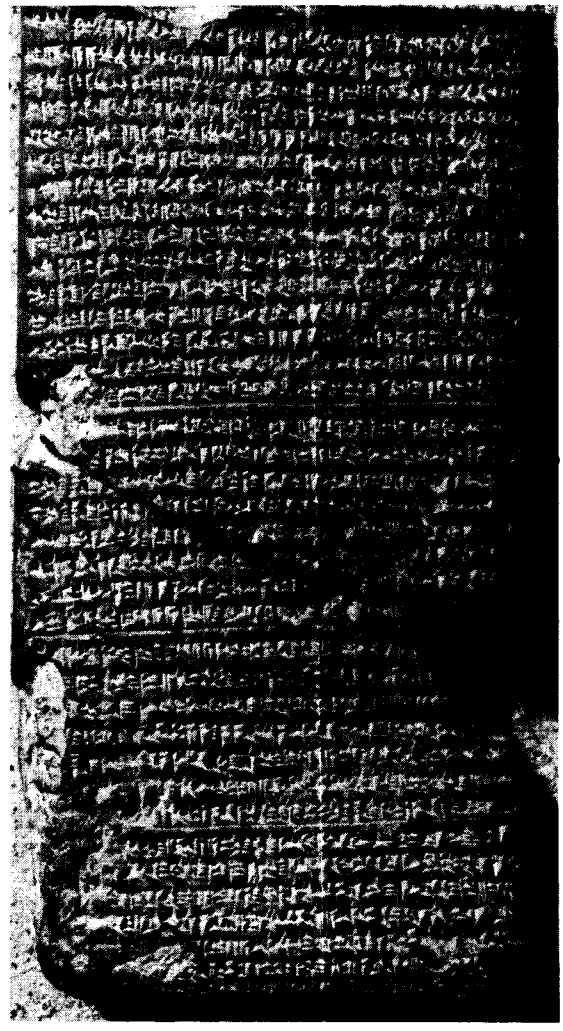
Sennacherib pulled down the old palace and built his new one on a platform well above the level of the city. The site of the palace at the southern end of Kuyunjik has been dug extensively, but its full magnitude has not yet been determined. The remains of its scores of spacious rooms, large halls and courts, decorated walls with the sculptured history of Sennacherib's domestic accomplishments and military victories, and numerous entrances, guarded by colossal winged bulls weighing as much as 30 metric tons and by huge lion-sphinxes, give mute testimony to its majestic splendor. Clay tablets covered the floor of two palace rooms to a depth of a half-meter; the tablets were part of the Royal Library, whose main treasures were found in the palace of Ashurbanipal (669-633). Sennacherib was not exaggerating when he called his residence "the palace without a rival."

Bronze head, perhaps of Sargon. From Nineveh, last half of the 3rd millennium B.C. (Consulate General of the Republic of Iraq)

Sennacherib enlarged and beautified the city with temples, broad streets, and public gardens. Unique in the Near East were the dimensions and design of his aqueduct, which by its system of dams brought fresh water into the city from the mountains to the east. The king also built massive walls and fortifications around the city for protection against his enemies. Only Babylon in the ancient world surpassed Sennacherib's capital in magnificence and beauty.

After Sennacherib's death his son Esarhaddon ruled Assyria (681-669). Nineveh was his capital city also, but he built a new palace on the mound now known as Nebi Yûnus. Evidence of this structure was discovered in 1954 in a sounding made by the Director General of Antiquities in Iraq. Because the site is covered by a village further excavations are impossible.

Ashurbanipal, "the great and noble Osnappar" of Ezr. 4:10, succeeded his father Esarhaddon. Besides restoring the temples of Nabû and Ishtar, he built a new palace on the northern end of Tell Kuyunjik. H. Rassam excavated the site in 1853-54 and found the massive sculptures characteristic of Assyrian art and the famous "Lion Hunt" sequence carved in relief on the walls of the palace. The relief's realistic depiction of animals in action has never been excelled (*see* pictures in ASHURBANIPAL; ARCHEOLOGY OF MESOPOTAMIA). The greatest treasure from the site was of course the library of Ashurbanipal, which included thousands of clay tablets dealing with literary, religious, and historical subjects (see VI below).



In August, 612 B.C., the mighty city of Nineveh fell to the combined forces of the Babylonians under Nabopolassar and the Medes under Cyaxares. This date has been firmly established from Babylonian sources (the Babylonian Chronicle), which give a detailed description of the campaign against Nineveh: "they marched along the bank of the river Tigris and. . . . . .against Nineveh. . . .they encamped[?] From the month of Sivan to the month of Ab three *UŠ* [measures. . . . . .they advanced?] A strong attack they made against the city, and in the month of Ab, [the. . .th day the city was captured. . . . . .] a great defeat of the chief [people] was made. On that day Sin-šar-iškun, the Assyrian king. . . . . The great spoil of the city and temple they carried off and [turned] the city into a ruin-mound and heaps of debris. . . . . ." (*CCK*, pp. 59, 61). The excavations at Kuyunjik have remarkably corroborated this description of Nineveh's complete destruction.

For the next three hundred years the site was not occupied, according to archeological evidence. Remains from the Seleucid, Roman, and Sassanian periods found on the tell point to sporadic settlements during these times. Benjamin of Tudela, a rabbi who visited Jewish communities in the East in the 12th cent. A.D., reported, "Nineveh now lies in utter ruins, but numerous villages and small towns occupy its former space" (T. Wright, ed., *Early Travels in Palestine* [1848], p. 94).

VI. Library of Nineveh.—One of the important buildings in Nineveh was the temple of Nabû on the northern part of the tell of Kuyunjik, at the southern corner of the palace of Ashurbanipal. R. C. Thompson discovered it in 1904-1905 and excavated it more extensively in 1927-28. Its origin is shrouded in mystery, but inscriptional material indicates that it was restored during the reigns of Adadnirari III (811-783 B.C.) and Ashurbanipal.

Nabû son of Marduk, the Nebo of Isa. 46:1, was the god of writing who knew all things. No shrine could have been more appropriate in a city whose ruins were to yield tens of thousands of clay tablets, numerous inscribed prisms, and long wall inscriptions. According to the colophons of several tablets this temple had a library in which the royal writings were deposited. Unfortunately, except for a few important fragments the elusive treasure of tablets has never been discovered on this site. It may lie hidden in some pocket near the temple, or it may have been dispersed among other sites, or it may even have been destroyed in the final sack of the city.

Large deposits of clay tablets did turn up in two places on Kuyunjik. Layard discovered one deposit in 1850 in two chambers of Sennacherib's palace, and H. Rassam found the other in 1853 in the palace of Ashurbanipal. According to R. C. Thompson 26,000 of these tablets have been cataloged, and most have been published.

Part of the Babylonian Chronicle telling of Nineveh's fall in 612 B.C. (Trustees of the British Museum)

Even if not the founder of the Nineveh library, Ashurbanipal was the real patron of science and learning. He collected the tablets for his library from places like Borsippa, Babylon, and Nippur, and he himself could read as well as copy these documents, as the colophon of almost every important tablet indicates: "Palace of Ashurbanipal, king of the world, king of Assyria. . . . The wisdom of Nabû. . . . I have inscribed upon tablets. . . . that I might see them and read them I have placed them within my palace. . . . Whosoever shall take (this tablet) away, or shall write his own name beside my name, may Ashur and Ninlil in wrath and fury cast him down, and may they blot out his name and seed from the land."

The tablets of the library were systematically numbered and cataloged in series whose headings were the first words of the first tablet of the series. The uniformity of the script and the accuracy of the texts suggests that the tablets were copied by a school of scribes, probably connected with the temple of Nabû.

The contents of the library may be divided into two main categories: the royal archives, and literary works in general.

A. Royal Archives. These archives contain letters written by the king, and others (which are in the majority) written to the king by sovereigns, princes, and state functionaries on all sorts of matters. Also found were contracts made with and by the royal house and economic texts dealing with every phase of palace life.

B. Literary Texts. The great majority of tablets are literary texts, which may be divided as follows.

1. Philological. Since the Assyro-Babylonian language was written in a script invented much earlier to record Sumerian, a non-Semitic language, and since many Sumerian literary works had been translated into the Assyro-Babylonian language, the scribes provided syllabaries, lexicons, and grammars of both languages for their students. Many of these texts, which are invaluable for the decipherment of the cuneiform script and the grammatical study of both these languages, have been found in the library at Nineveh.

2. Juridical. These legal texts deal with social practices and points of law concerning familial relationships, ownership of property, contractual agreements, etc.

3. Historical. The Assyrians were distinguished among the nations of the ancient world for their historical sense. Palace walls were lined with accounts and reliefs of military campaigns and victories, and prisms and statuary were inscribed with royal exploits. The annals of the kings were also written down on clay tablets, many of which were found in the library.

4. Religious. The religious texts from Nineveh are of primary importance for the study of the history of religion in the Near East and for biblical exegesis in particular. Here were first found the myths of creation, the Flood, etc., which many scholars think the Hebrews took over and adapted to their theology, particularly in Gen. 1–11. Also discovered were the literary patterns of hymns, prayers, lamentations, and wisdom motifs that were among the models for similar OT genres. Especially interesting is the way that the Babylonians and Assyrians adapted the ancient myths of Sumer to their own theological systems by changing the names of the gods. For instance, the Sumerian deity Enlil, the creator of the world and father of the gods, became Marduk in Babylonia and Ashur in Assyria.

Among the myths discovered in the library of Nineveh are the seven tablets of the Creation story; the twelve tablets of the Gilgamesh Epic, which deals with the age-old quest of mankind for eternal life and includes the Babylonian version of the biblical Flood story; the Legend of Etana, who flew to heaven on an eagle; the Story of Adapa, who squandered the opportunity for gaining immortality; the Myth of Zu the bird-god, who stole the Tablets of Destiny; the Descent of Ishtar to the Netherworld; and the legend of the birth of Sargon of Agade, who like Moses was saved as a young child by being put into a reed basket on the Euphrates River from which he was rescued by Akki. For the translation of these and other myth stories, see *ANET,* pp. 60-119, 501-518.

Also included among the religious tablets are the omen texts, which describe animal organs, especially the liver, and the movements of birds and heavenly bodies; incantation or magical texts used against demons and sicknesses of all kinds; ritual texts; and hymns, prayers, laments, and oracles for kings in times of trouble. A large corpus of wisdom literature includes proverbs, popular tales, and the story of the righteous sufferer, somewhat like Job in the OT.

5. Scientific. The five hundred tablets dealing with medicine indicate that it was an advanced science in Assyria. Diseases of all kinds are carefully described, and the prescriptions for their cure include some five hundred drugs. There are texts on botany, geology, chemistry, mathematics, and astronomy, as well as an invaluable treatise on the components of glass and the glazes for pottery.

The clay tablets from the library of Nineveh are not only the foundation of the science of Assyriology but also the clue to the intellectual and spiritual life of one of the greatest civilizations of the ancient Near East.

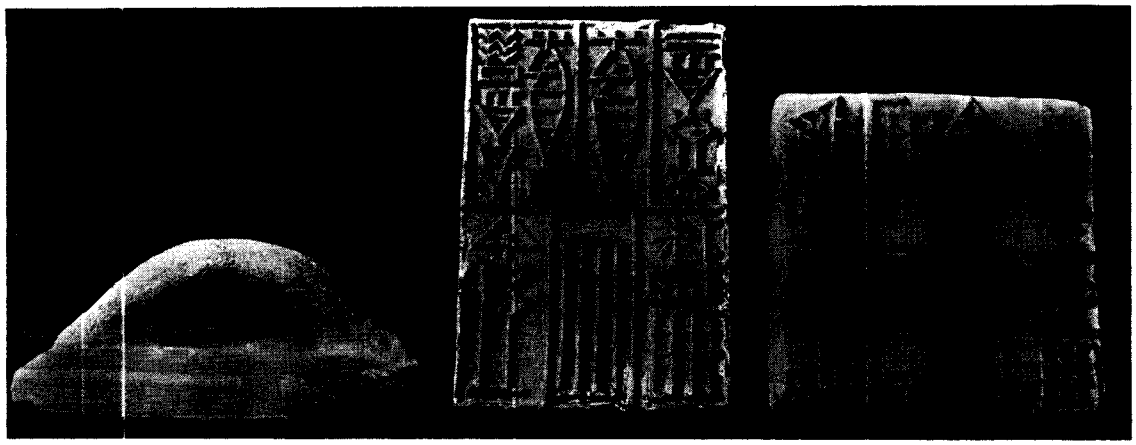
NINEVITES nin'ə-vīts. The AV translation of Gk. *Nineuitai* (Lk. 11:30), designating the inhabitants of NINEVEH.



NIPHIS nī'fis (1 Esd. 5:21, RSV mg.). *See* MAGBISH.

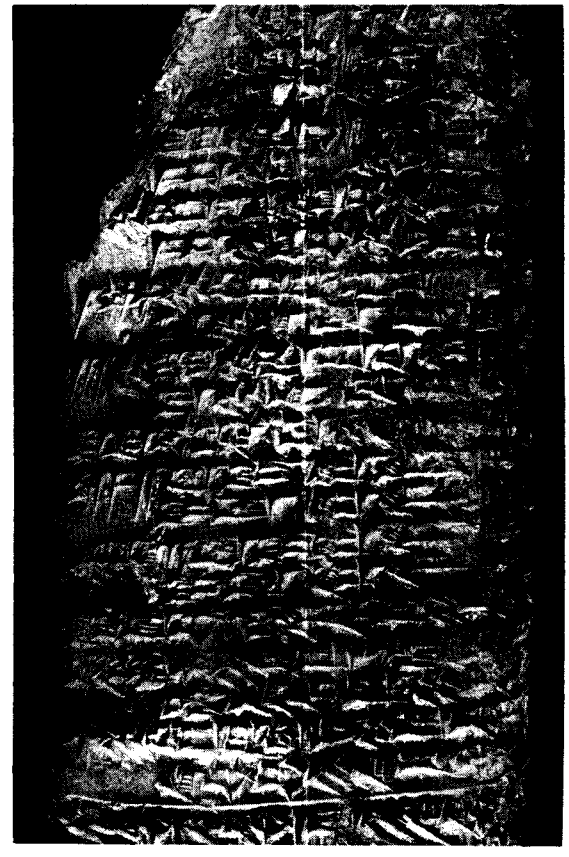
NIPPUR ni-po͝or' [Sum. ^{d}En-lil^{ki}; Akk. *Ni-ip pu-ru*]. An ancient holy city, called "the bond of heaven and earth" (Sum. dur-an-ki), and the principal religious center of southern Mesopotamia. Although Nippur is not mentioned in the Bible (despite the talmudic identification of Nippur with CALNEH), cuneiform tablets found there have been essential for knowledge of Sumerian literature and of the earliest cultural background of the OT.

I. Site.–Covered with drifting sand dunes, bisected by a large wadi, and dominated by the crumbling ziggurat (temple tower) of Enlil ("Lord Storm"), a chief Sumerian god, is the desolate mound still called Nuffar. It is about 72 ha. (180 acres) in area, one of the most impressive mounds in the Near East. Lying midway between the Euphrates and Tigris rivers, Nippur is the center of a once-fertile irrigated region where the cities of southern Mesopotamia flourished for thousands of years. It is 150 km. (93 mi.) SE of Baghdad and 150 km. (93 mi.) NW of Ur, on an ancient waterway of the delta.

II. Historical Significance.–Like Delphi in Greece, Nippur was not a seat of political power. Many kings, however, including Naram-Sin of Agade (*ca.* 2150 B.C.), Ur-Nammu of Ur (*ca.* 2050), and Hammurabi of Babylon (*ca.* 1775), sought approval of the priests of Enlil at Nippur to legitimize their rule over Sumer and Akkad. They restored Enlil's shrine, the Ekur ("mountain house"), and

Three brick stamps from Nippur. The brick at right says "Naram-Sin, builder of the temple of Enlil"; the center brick reads "Šar-kali-šarri, king of Agade, builder of the temple of Enlil" (University Museum, University of Pennsylvania)

many other temples and brought inscribed statues and rich gifts. The Semitic conqueror Sargon (*ca.* 2250) conducted Lugalzagessi, the last Sumerian king of Uruk, to Nippur in a neckstock, and Sumerian literature regards the fall of Agade to the Gutians as retribution for Naram-Sin's desecration of the Ekur. The renown of Nippur is attested in "The Poor Man of Nippur," a broadly humorous tale inscribed on a late Neo-Assyrian tablet from Sultantepe near Urfa in Turkey and prominently featuring the "king of Nippur," a city that had no king (*Anatolian Studies*, VI, 145-162).



III. Archeological Excavations.–The English archeological pioneer A. H. Layard dug only briefly at the dreary site in 1851. After de Sarzec had discovered Sumerian civilization at Telloh in 1871, J. P. Peters of the University of Pennsylvania chose Nippur for excavation by the first American expedition to Mesopotamia. Between 1889 and 1900 four long campaigns under Peters, Haynes, and finally the distinguished Assyriologist Hilprecht endured severe hardships. Precise archeological data were not obtained, but occupation over a very long time was confirmed. Most importantly, about thirty thousand cuneiform tablets were recovered, the majority of which are now in the University of Pennsylvania Museum, with others in the Museum of the Ancient Orient in Istanbul and at the University of Jena in Germany.

After half a century of neglect, excavations were resumed in 1948, largely through the efforts of T. Jacobsen. The expedition, which was still active in 1982, at first involved the Oriental Institute of the University of Chicago, the University of Pennsylvania, and the American Schools of Oriental Research, and subsequently just the Institute. While much work remains to be done, the ziggurat, basically built by Ur-Nammu, and the temple of Enlil have been cleared, more tablets have been recovered, and an archeological sequence of more than five thousand years, from the Ubaid period (*ca.* 4500 B.C.) to 800 A.D., has been established. Excavation of a temple of the goddess Inanna has revealed twenty-two construction levels, probably the longest history for any known building.

Application in Mesopotamia of techniques more usual at American and European sites, such as geomorphology, paleobotany, and paleozoology, may disclose environmental factors that caused a marked decline in population at Nippur and other Mesopotamian cities during the "dark age" between the Old Babylonian and the Amarna periods (*ca.* 1600-1400 B.C.). The main contribution of Nippur, however, remains the epigraphic material.

IV. The Tablets and Their Biblical Relevance.–The content of the Sumerian texts is rich and varied. Most are economic and administrative: bills of sale, accounts, contracts, wills, and court decisions; there are also historical inscriptions and lexical lists of Sumerian words with Akkadian equivalents. But of primary importance are more than four thousand tablets and fragments containing literary compositions: myths, epic poems, hymns, laments, and proverbs. Although many of these texts were copied be-

Fragment of a hymn to Enlil, the god of Nippur (Isin period) (University Museum, University of Pennsylvania)

tween *ca.* 2000 and 1750 B.C., during the Isin-Larsa and Old Babylonian periods when Sumerian was no longer a spoken language, they accurately record compositions of unknown antiquity and comprise about 80 percent of known Sumerian literature.

The Nippur tablets have been indispensable for deciphering the difficult Sumerian language and for interpreting similar texts from other sites. Syntheses by S. N. Kramer and other scholars, notably T. Jacobsen in *Treasures of Darkness*, have demonstrated the great antiquity of Mesopotamian culture, firmly rooted in that of Sumer. Affinities with the Bible are readily apparent. Lamentations over the destruction of Ur and Agade may be compared with the biblical book Lamentations, wisdom texts with Proverbs, poems about a righteous sufferer with Proverbs and Job, and love lyrics of the goddess Inanna and her consort Dumuzi with Canticles. The very old custom of wailing for Tammuz (Dumuzi) is mentioned in Ezk. 8:14. Myths of creation and the flood show some striking similarities to the biblical accounts (*see* FLOOD VI). Far more impressive, however, is the distinctive quality of analogous OT texts. The Sumerian gods, fallible and capricious, formed man to labor for them and then sent plagues and famine to diminish the population. In contrast, the biblical material of each genre is infused and transformed by the ethical monotheism of Israel.

P. W. GAEBELEIN, JR.

NISAN nī'san, nē'sän [Heb. *nîsān*] (Neh. 2:1; Est. 3:7); [Gk. *Nisa(n)*] (Ad. Est. 11:2; 1 Esd. 5:6); AV also NISON (Ad. Est. 11:2). The first month of the year in the Hebrew CALENDAR, corresponding to March/April. The name is Babylonian in origin and appears in OT texts only after the Exile; in the Pentateuch it is called ABIB. *See also* NEW YEAR.

NISROCH nis'rok [Heb. *nisrōḵ*]. God of a temple in which Sennacherib was assassinated (2 K. 19:37; Isa. 37:38). The name, unattested in voluminous cuneiform sources, cannot easily be equated with Marduk or Nusku. Although any identification is problematical, sporadic omissions of *n* from transcriptions in the Greek MSS B, ℵ, and A, and analogies with Nimrod and Marduk, led the distinguished Assyriologist Landsberger to postulate the name of the national god Ass(h)ur with initial *n* and final *k* added.

Bibliography.–B. Landsberger and T. Bauer, *Zeitschrift für Assyriologie*, 37 (1927), 69f.; J. P. Lettinga, *VT*, 7 (1957), 105f.

NITRE nīt'ər (AV Prov. 25:20; Jer. 2:22). *See* LYE.

NO nō. The AV and NEB translation of Heb. *nō'* (Jer. 46:25; Ezk. 30:14-16; Nah. 3:8), rendered THEBES by the RSV.

NOADIAH nō-ə-dī'ə [Heb. *nô'aḏyâ*–'Yahweh has met by appointment'; LXX *Nōadia*].

1. Son of Binnui; one of the Levites to whom Ezra entrusted the silver and gold and temple vessels that were brought to Jerusalem after the Exile (Ezr. 8:33; cf. 1 Esd. 8:63 [LXX 62], where he is called MOETH).

2. A prophetess associated with Tobiah and Sanballat in opposition to Nehemiah (Neh. 6:14).

NOAH nō'ə.

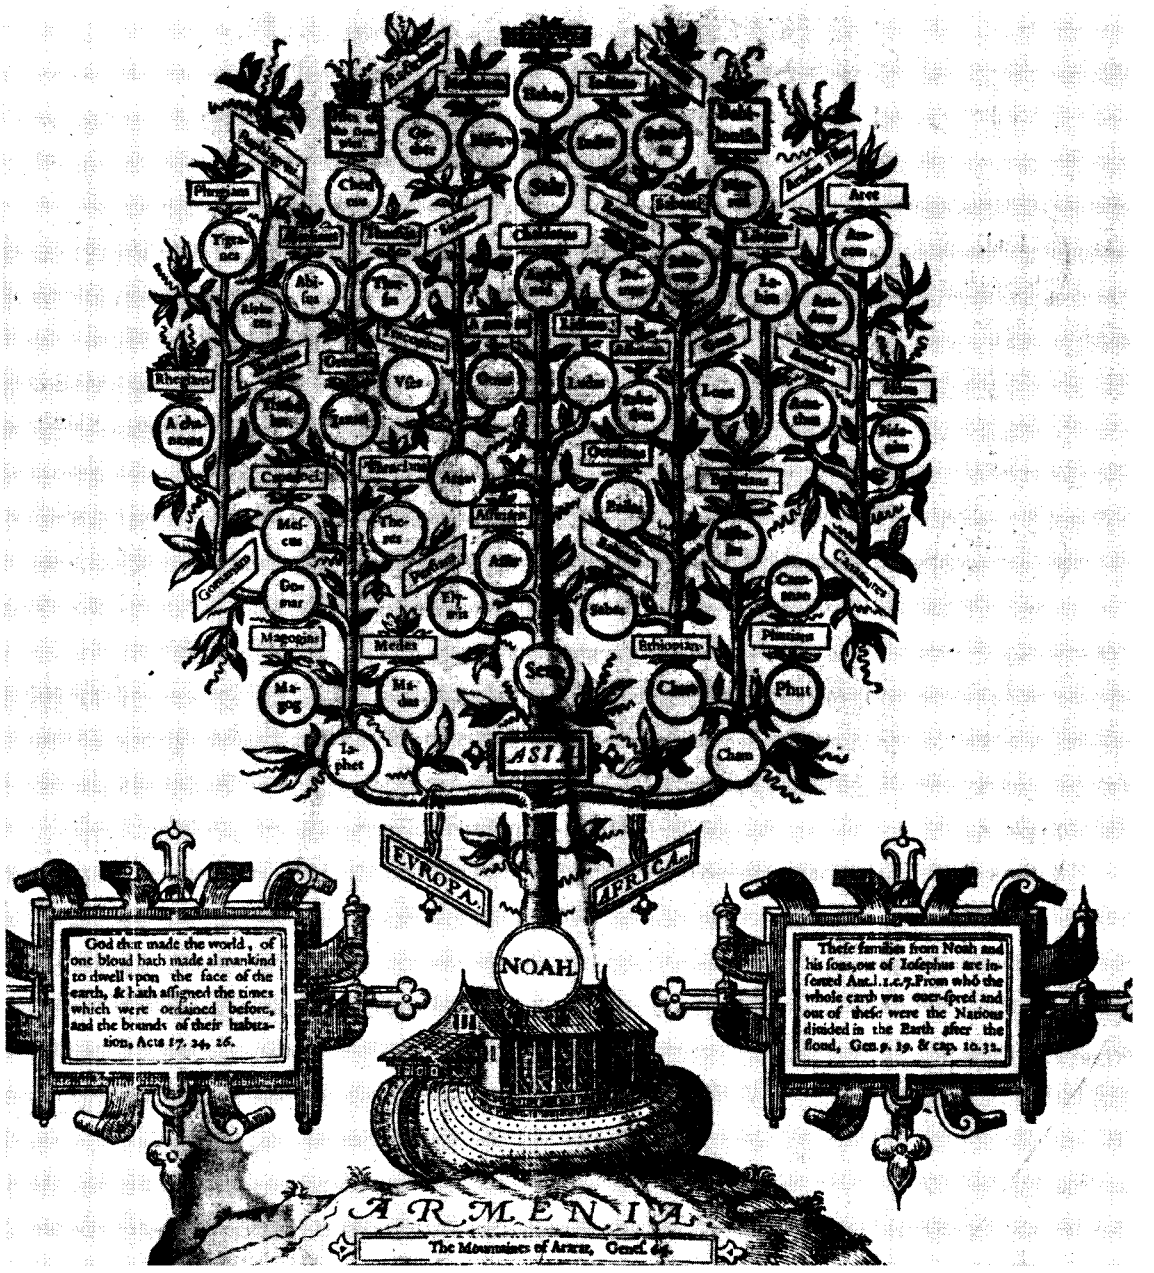
1. [Heb. *nō(a)ḥ*; Gk. *Noē*]; AV also NOE. The last of the antediluvian patriarchs and survivor of the Genesis Flood (Gen. 5:28–9:28).

I. Name.–The etymology of *nō(a)ḥ* is uncertain. Many commentators relate it to Heb. *nwḥ*, "to rest." In Gen. 5:29 the name is mentioned in assonance with the verb *nḥm* (piel), "comfort" (AV and RV) or "bring relief" (RSV), but *nwḥ* is closer to the name Noah.

II. Genealogy and Longevity.–Noah was the son of Lamech (Gen. 5:28f.; Lk. 3:36) and father of three sons, Shem, Ham, and Japheth (Gen. 5:32; 6:9; 9:18f.; 10:1), who were born before the Flood. The order preserved in these verses is not chronological. Ham was the youngest (9:24) and Japheth the second of Noah's sons.

Noah lived 950 years. Reinterpretations of the longevity of the ANTEDILUVIAN PATRIARCHS, such as appealing to the concept of family or dynasty identification rather than individual, are fraught with unresolved difficulties.

III. Noah in a World Under Judgment.–As a prelude to the story of the Flood, Gen. 6:1-7, 11f. paints a portrait of the wickedness of mankind (on the difficulty of identifying the "sons of God" *see* SONS OF GOD [OT]). The importance of this passage is its statement of the progression of evil. The Creator's response to a "corrupt" and "violent" civilization was one of grief and anger (6:5-7, 11-13). Judgment was imminent.



In the context of an already ruined civilization, Noah emerges as a man in step with God (6:9). He was righteous (*ṣaddîq*; cf. AV "just"); responding to events as yet unseen, he "became an heir of the righteousness which comes by faith" (He. 11:7). Noah was also blameless (*tāmîm*; cf. AV "perfect") "among the people of his time" (NIV, preferable to AV "in his generations"). *Tāmîm* signifies perfection in the sense of completeness or wholeheartedness (see BDB, p. 1071). Later writers would recall the days of Noah (Isa. 54:9; Mt. 24:37f.; Lk. 17:26f.) and would remember him as an exemplarily righteous man (Ezk. 14:14, 20; 2 Pet. 2:5).

IV. The Flood.–Noah was informed of the impending destruction 120 years beforehand (Gen. 6:3, 13; cf. 1 Pet. 3:20). The agency of judgment would be a flood (Heb. *mabbûl*, 6:17; 7:6, 7, 10, 17; see also Ps. 29:10). The LXX translates Heb. *mabbûl* by *kataklysmós*, which the NT also uses to refer to the Flood (Mt. 24:38f.; Lk. 17:27; 2 Pet. 2:5). Noah, the one who "found favor in the eyes of the Lord" (Gen. 6:8), this "herald of righteousness" (2 Pet. 2:5), and his family would be spared. The agency of their salvation would be an ark (*tēḇâ*, Gen. 6:14).

Every facet of the Flood narrative has been scrutinized with a view to logical explanation, including questions for which the text speaks not a word. The Genesis Flood is but one of many biblical events whose import has been diminished, if not lost, in the need for thorough explanation and empirical verification. These lines of inquiry may be legitimate, though extravagances abound, but it is more important to seek the intended emphasis and allow the text to speak in its own terms. *See also* FLOOD (GENESIS); ARK OF NOAH.

A. Judgment. The Flood bespeaks the certain judgment of a sovereign and righteous God on an ungodly world (see Kline, p. 89). This ordeal by water (2 Pet. 3:5f.) was a mere token of judgment when compared with the greater judgment that awaits not only the earth but all creation (cf. 2 Pet. 3:7, 10). The emphasis of Jesus' words in Mt. 24:36-41; Lk. 17:26-37, as He compared the days of Noah with those of the Son of man, was not on the sinfulness of Noah's contemporaries, but rather on the unexpectedness of impending doom (cf. Mt. 24:44).

B. Salvation. The Flood also bespeaks salvation to those

The ark, at rest on Mt. Ararat, and the genealogical tree of Noah (see Gen. 10). From the AV (London, 1611) (Rare Books and Manuscripts Division; New York Public Library; Astor, Lenox, and Tilden Foundations)

who put their faith in God (He. 11:7). Although the parallel between the deliverance of Noah and his family and salvation through Christ is not precise at every point, Peter compares the waters of the Flood with those of baptism in which the water symbolizes God's judgment on sin and deliverance into a new life (1 Pet. 3:20f.; *see also* BAPTISM VII.A). Peter emphasizes that the efficacy of baptism lies not in the outward symbolism of the "removal of dirt from the body" but in the inner response of faith to God.

V. Noah's Counterparts in Cuneiform Sources.–Although archeology has not provided empirical data for the Genesis Flood, excavations have unearthed many texts and fragments which preserve the story of a great flood, widely known among the civilizations of the ancient Near East. It is mentioned in the Sumerian King List (*ca.* 2000 B.C.; *ANET,* pp. 265f.; Kramer, pp 328-331). A fragmentary Sumerian tablet from Nippur preserves the story of King Ziusudra, Noah's counterpart, who was warned that the gods had decided to destroy mankind with a flood. A great boat would provide Ziusudra's escape. The last extant lines of the text describe his deification (*ANET,* pp. 42-44).

The Epic of Atra-ḫasis (*ca.* 17th cent. B.C. in the earliest surviving copies) describes a deluge sent by the gods to destroy mankind after earlier attempts through drought had failed to control the increasing number of people and their noise (W. G. Lambert and A. R. Millard, *Atra-Ḫasīs:*

The Babylonian Story of the Flood [1969]). A small fragment of the Babylonian flood story referring to Atra-ḫasis was found at Râs Shamrah and dated to the 14th cent. B.C. (ibid., pp. 131-33).

Similar to the story of Atra-ḫasis is that preserved in the eleventh tablet of the Gilgamesh Epic (the best English translation with discussion of the biblical parallels is that of Heidel; see also *ANET*, pp. 72-99; S. N. Kramer, *JAOS*, 64 [1944], 7ff.). The story is, in part, that of Gilgamesh's quest for immortality which leads him to the island of Utnapishtim. This "Babylonian Noah" tells Gilgamesh the story of the flood which was prompted by Enlil's insomnia, as in the Atra-ḫasis Epic. Utnapishtim narrates how he alone was warned of the impending destruction and instructed to build a boat by which he and his family would be spared. The story leads to the granting of immortality to Utnapishtim, an event which will never recur.

The similarities between the biblical and Mesopotamian flood stories are striking, as are the differences (*see* FLOOD [GENESIS] VI; Heidel, pp. 224-269, esp. p. 269; T. Jacobsen, pp. 215-19). Opinions differ concerning the literary relationship between the biblical and Babylonian narratives. Many scholars consider the latter to comprise the raw materials from which the former was produced. Others contend that the two revert to an unknown common source. The similarities suggest a common recollection of an actual historical event. The differences bespeak the focus of divine inspiration. Genesis records the story of Noah in historical truth and imparts the theological significance of the Flood.

VI. Noahic Covenant.–Noah emerges from the ark and builds an altar of sacrifice. He offers burnt offerings, tokens of dedication and atonement, which produce a "sweet savour" to the Lord (Gen. 8:21, AV). Contrast the imagery of the Babylonian version at this point:

> The gods smelled the savor
> The gods smelled the sweet savor
> The gods gathered like flies over the sacrifice.

What God had once commanded Adam (Gen. 1:28), He now reiterates to Noah and his sons (9:1; see Kline, p. 90). This COVENANT (Gen. 6:18; 9:8-17) is remarkable for its breadth (9:10; 12–13; 15; 17) and permanence. It is an everlasting covenant (Heb. *bᵉrîṯ ʿôlām*, 9:16), initiated by the beneficent Creator. He promised that never again would the world be destroyed by a flood (9:15). The rainbow (Heb. *qešeṭ*, usually denoting the weapon) was the covenant sign, a seal of the promise to mankind and a reminder to God of His commitments.

Wenham, *VT*, 28 (1978), 336-348. G. PRATICO

2. [Heb. *nōʿâ*]. One of the daughters of Zelophehad (Nu. 26:33; 27:1; 36:11; Josh. 17:3). *See* MAHLAH **1.** The names of the five women probably represented towns.

NOAH, BOOK (APOCALYPSE) OF. A lost pseudepigraphical document referred to and quoted in 1 Enoch and Jubilees. The Book of Noah, not a true apocalypse, contained a visionary description of purported events surrounding the birth of the biblical Noah, as well as an account of his death. A messianic notion of God's kingdom coming on earth forms the main theological theme. A special interest in fallen angels (such as those probably indicated in Gen. 6:1-4), who produced prodigious progeny with the daughters of men, structures the discussion of the problem of evil: demoralization of humanity, instigation of the Deluge and natural disasters, and setting the cosmos, angels, and people under awful judgment. The tension between the coming kingdom and the eschatological judgment seems to be the meaning of history.

The Book of Noah is mentioned in Jub. 10:13 and 21:10 and incorporated at length in Jub. 7:20-39; 10:1-15; 1 En. 6–11; 39:1-2a; 54:7–55:2; 60; 65–69; 106; and probably 107. 1 Enoch was written in Greek but preserved only in Ethiopic. Fragments in Aramaic, Hebrew, and Greek have been found in such sources as the Dead Sea Scrolls, as have fragments of the Book of Noah itself, in Hebrew. Since the Book of Noah is generally understood to be a source of 1 Enoch and Jubilees, it must predate *ca.* 150 B.C. The Hebrew Book of Noah is a different and later work based upon the selections of the Book of Noah preserved in the Hebrew, Greek, or Ethiopic version of Jubilees. That later work is treated in H. Rönsch, *Das Buch der Jubiläen* (1874), pp. 385-87, and R. H. Charles, *Ethiopic Version of the Hebrew Book of Jubilees* (1895), p. 179.

NO-AMON nō-am'ən. *See* THEBES.

NOB nob [Heb. *nōḇ*; Gk. B *Nomba*, once *Nomma*; A *Noba*, once *Nobath*]. A village in Benjamin. The meaning of the name is unknown; perhaps it derives from *nûḇ*, "thrive"; cf. targumic *nôḇ*, "fruit."

After the Philistines destroyed Shiloh and its temple, some priests evidently migrated to Nob, which probably was part of the territory of Jerusalem. Under the Jebusite king they were protected from Philistine attacks.

According to 1 S. 21–22 a sanctuary was erected there. The ritual of the bread of the Presence was performed in the sanctuary (v. 6), and those who wished to undergo ritual purification stayed for some time in the temple precincts (v. 7). Votive offerings were stored in the building (21:9). It had an ephod by which the oracle could be consulted (21:9; 22:10); if the priest Ahimelech of these chapters is the same as Ahijah the great-grandson of Eli (14:3), which is very probable, priests from Nob carrying the instrument of oracle accompanied the people on military expeditions. Thus it seems that apart from the absence of the ark the whole cult-system of Shiloh was carried on in Nob.

The connections between David and the priests of Nob (cf. also Mt. 12:3f. par.) led to the massacre of all the inhabitants of the settlement, except for Abiathar, on the command of Saul. The eighty-five male adults killed by Doeg on Saul's command (1 S. 22:18) might justify an estimation of about 340 inhabitants of the settlement in those days. After the massacre Nob lost all importance as a "city of the priests." Fifty-two men among those who returned from the Exile with Zerubbabel traced their origin to the village, called (the other) Nebo in Ezr. 2:29; Neh. 7:33, and settled there again. After that event Nob disappeared from written sources. Josephus, who called it Naba, mentioned it only in connection with David's story. Isa. 10:32 does refer to a locality of the same name in the immediate neighborhood of Jerusalem, but whether it was inhabited in the prophet's days is not clear from this text. Probably Nebo in Ezr. 2:29; 10:43; Neh. 7:33 is the same place.

Jerome looked for Nob in the neighborhood of Aijalon, but Isa. 10:32 requires that Jerusalem was visible from Nob. Solomon's banishment of Abiathar, who originated from Nob, to his estate in Anathoth (1 K. 2:26) points in the same direction. Nob must have been on the road from Anathoth to Jerusalem, either the Râs el-Mesharif 3 km. (2 mi.) directly N of Jerusalem, Josephus's Scopus, or the Râs Umm et-Tala on the eastern slope of the same ridge.

There is no decisive archeological evidence at either place, however. The sanctuary proper may even have been on Mt. Scopus, but the houses were built somewhat to the east, where agricultural conditions are more favorable.

In 2 S. 21:16 "Ishbi-benob" perhaps is to be understood not as the name of a person but as a sentence, "they settled in Nob," but in this case one should read "Gob" (cf. vv. 18f.). The NEB reads, "Then Benob. . . ."

A. VANSELMS

NOBAH nō'bə [Heb. *nōḇaḥ*].

1. A Manassite (Gk. *Nabau*) who conquered KENATH and renamed it Nobah (Gk. *Nobōth*) after himself (Nu. 32:42), therefrom a place with the same name.

2. A city in eastern Gilead W of the caravan route along which Gideon pursued the Midianites (Jgs. 8:11, LXX B *Nabeth*, A *Nabai*). This city was near JOGBEHAH, which Nu. 32:35 also mentions; hence there is no compelling reason not to identify it with **1** (v. 42).

W. S. L. S.

NOBLE; NOBLEMAN; NOBILITY [Heb. *'addîr, 'adderet, hāḏār, ḥōr, nāḏîḇ, nāgîḏ, partᵉmîm, gāḏôl*, niphal part. of *kāḇēḏ*; Aram. *yaqqîr*; Gk. *kalós, timḗ, eugenḗs (ánthrōpos)*]; AV also GOODLY, EXCELLENT, LIBERAL, HONOUR, PRINCE, etc.; NEB also CHIEFTAIN, LEADER, NOTABLE, RENOWNED, MAGNATE, FINE, CIVIL, HIGHLY BORN, etc.

As an adjective "noble" describes persons or things possessing outstanding qualities. It may denote great beauty or magnificent proportions, as of the temple (Gk. *kalós*, lit. "good, beautiful"; Lk. 21:5), the city of Jerusalem (Heb. *hāḏār*, lit. "splendor, grandeur"; Isa. 5:14), or the fruit-bearing vine (*'adderet*, lit. "majesty, glory") and cedar (*'addîr*, lit. "majestic, glorious") that represent Israel (Ezk. 17:8, 23). "Noble" can also denote superior moral qualities, as when it describes words of truth and wisdom (Heb. *nᵉgîḏîm*, Prov. 8:6), magnanimous deeds (*nᵉḏîḇôṯ*, Isa. 32:8; cf. v. 5), honorable conduct (Gk. *kalós*, Rom. 12:17; cf. *timḗ*, 2 Tim. 2:20f.), or a worthy task (*kalós*, 1 Tim. 3:1). Osnappar (Ashurbanipal?) is described as "noble" (so RSV; Aram. *yaqqîr*), but the NEB "renowned" probably better conveys the sense (Ezr. 4:10).

As a noun "noble" denotes a person of exalted rank. The abundance of Hebrew terms designating nobility in the later OT writings presents a sharp contrast to the egalitarian, tribal structure of Israelite society in premonarchial times. The institution of the monarchy contributed to the rise of a wealthy class who modeled themselves after foreign aristocrats. Although they did not form a nobility in the sense of a closed aristocracy of landowners into which one is born, these officials and heads of wealthy families did represent a distinct ruling class (see *BHI*, 3rd ed., p. 223; de Vaux, pp. 69f.).

The role of the Heb. *ḥōrîm* (lit. "freemen") is suggested by the term's frequent association with other terms for leaders in the monarchial and postexilic Israelite community, e.g., *zᵉqēnîm* ("elders," 1 K. 21:8, 11) and *sᵉgānîm* ("officials," Neh. 2:16; 4:14, 19 [MT 8, 13]; 5:7; 7:5; cf. also 6:17; 13:17). It occurs in parallel with *śārîm* ("princes") in Isa. 34:11f. (a prophecy fulfilled in Jer. 39:6; cf. 27:20 par. 2 K. 24:14).

Nāḏîḇ (lit. "willing, generous") originally designated one who gave himself voluntarily in the service of God or who — because of his exalted economic and social position — had a responsibility to do so. A true *nāḏîḇ* is generous and uses his resources wisely for the good of his community (cf. Nu. 21:18; Prov. 7:26; Isa. 32:5, 8). Often, however, *nāḏîḇ* is simply another term for a member of the ruling class, used in parallel with *śārîm* ("princes," Prov. 8:16; also Nu. 21:18) and *nᵉsîḵîm* ("princes," Ps. 83:11 [MT 12]); cf. its association with *melek* ("king"), *śārîm* ("princes"), and *šô(a)'* ("the rich") in Job 34:18f.

Other Hebrew terms for persons of high rank include *nāgîḏ* (used in preexilic texts to designate a leader chosen by God, but used in parallel with *śārîm* in Job 29:9f.), *'addîr* (lit. "majestic one," Jgs. 5:13; 2 Ch. 23:20; Neh. 3:5; 10:29; Ps. 16:3 [apparently referring to saints, but cf. A. A. Anderson, *Book of Psalms* (*NCBC*, repr. 1981), I, 142]; Nah. 3:18), *gᵉḏôlîm* (lit. "great ones," Jonah 3:7), *niḵbᵉḏîm* (niphal part. of *kāḇēḏ*, lit. "weighty or honored ones," Ps. 149:8), and *partᵉmîm* (a Persian loanword occurring only in Est. 1:3; 6:9; Dnl. 1:3).

Although Gk. *eugenḗs* (lit. "wellborn") originally denoted nobility of birth (Lk. 19:12; 1 Cor. 1:26), it also came to denote those qualities expected of nobility, i.e., generosity and broad-mindedness (Acts 17:11). On the AV of Jn. 4:46, 49 ("nobleman"), *see* OFFICER, OFFICIAL; on Acts 24:3; 26:25 (AV "most noble"), *see* EXCELLENT. *See also* PRINCE.

Bibliography.—*BHI*, 3rd ed., pp. 220-24; R. de Vaux, *Ancient Israel* (Eng. tr. 1961, repr. 1965), I, 68-70, 72-74; *TWOT*, I, 327; II, 555.

N. J. O.

NOD nod [Heb. *nôḏ*; LXX *Naid*; Syr. *nwd*]. The land "east of Eden" into which Cain went after murdering Abel and being condemned by God (Gen. 4:16).

The word *nôḏ*, the infinitive absolute of the root *nwd*, means "wandering," and is probably intended to be symbolic; since Cain had been condemned to be a "wanderer" (*nāḏ*, vv. 12, 14), he would live in the "Land of Wandering" (*'ereṣ nôḏ*).

The odd LXX form *Naid* may imply that the Hebrew text used by the LXX translators was, or was read as, *nyd* or *n'd*, and vocalized as an Aramaic-type participle *nā'ēḏ*, "wanderer" (cf. Tg. Onk. *in loc.*).

E. M. COOK

NODAB nō'dab [Heb. *nôḏāḇ*; Gk. *Nadabaioi*]. A Hagrite clan which, along with Jetur and Naphish, was completely defeated by the Transjordanian Israelite tribes (1 Ch. 5:19). In Gen. 25:15; 1 Ch. 1:31 the name Kedemah appears with Jetur and Naphish in a list of the sons of Ishmael (son of Hagar), suggesting that Nodab and Kedemah may be two names for the same clan or that one name may be a corruption of the other. The name Nodab is possibly preserved in Nudebe, a village in the Hauran.

NOE nō'ə (AV Mt. 24:37f.; Lk. 3:36; 17:26f.). *See* NOAH **1.**

NOEBA nō'ə-bə (AV, NEB, 1 Esd. 5:31). *See* NEKODA **1.**

NOGAH nō'gə [Heb. *nōgah*—'shining']. A son of David born at Jerusalem (1 Ch. 3:7; 14:6). In the parallel list in 2 S. 5:14f. the name is lacking. According to H. Williamson (*1 and 2 Chronicles* [*NCBC*, 1982], p. 56), Nogah is "a dittograph of the following name" (Heb. *nepeg*).

NOHAH nō'hə [Heb. *nôḥâ*]; AV also "with ease" (Jgs. 20:43), mg. MENUHAH; RSV mg. "resting-place"; NEB also "without respite." The fourth son of Benjamin (1 Ch. 8:2; but cf. Gen. 46:21, where the name is omitted) and, perhaps, the name of the place occupied by the clan of Nohah (Jgs. 20:43). In the latter passage the RSV follows LXX B (*apó Noua*) and emends the MT (*mᵉnûḥâ*, lit. "resting-place"; cf. RSV mg.) to read *minnôḥâ*, while the AV and NEB follow the MT (but cf. AV mg., NEB mg.). The syntax supports the RSV and NEB mg. reading, "from Nohah."

NOISE, NOISY [Heb. *qôl* (Ex. 32:17; 1 S. 4:6; 1 K. 1:40, 45; etc.), *rāwaʿ* ("make a joyful noise," Ps. 66:1; 95:1f.; 98:4, 6; 100:1), *šāʾôn* (Isa. 24:8; 25:5; Jer. 46:17; 51:55), *hāmôn* (Isa. 31:4; 33:3; Am. 5:23), part. of *hāmâ* (Prov. 9:13), hiphil of *hûm* (Mic. 2:12); Gk. *ēchéō* (1 Cor. 13:1), *rhoizēdón* (2 Pet. 3:10), *phōnḗ* (Rev. 9:9)]; AV also CLAMOROUS, SOUND, VOICE, etc.; NEB also SHOUT, SOUND, ACCLAIM, etc.

The Hebrew and Greek words for "noise" refer to any audible sound, pleasant or unpleasant. The RSV generally translates "noise" in contexts demonstrating either very loud sounds or sounds made by large numbers of animals or people. The RSV has used "noise" fifty fewer times than the AV, the chief difference being the rendering of the frequently used *qôl* as "sound" or "voice" rather than "noise." The RSV NT translates "noise(s)" on six occasions where the AV has either "sound(s)" or "voices" (1 Cor. 13:1; Rev. 8:5; 9:9 [2 times]; 11:19; 16:18).

The RSV OT uses "noise" to describe the sounds of warfare and God's judgment against the earth (Isa. 25:2; 29:6; 33:3; Jer. 4:29; 47:3; 50:22; Ezek. 26:10). There is also the "noise" of nature (Isa. 29:6; Jer. 51:55), as well as the "noise" of people: in worshiping the golden calf (Ex. 32:17), in preparation for battle (1 S. 4:6), in the coronation of a new king (1 K. 1:40, 45), and in heartless religion (Am. 5:23). Elsewhere, the psalmist admonishes God's people to "make a joyful noise" unto the Lord as they shout and sing in celebration and worship of God's perfect character and great deeds (Ps. 66:1; 95:1f.; 98:4, 6; 100:1).

Paul equates the "loveless" exercise of the gift of glossolalia with the "noisy gong" (*ēchéō*) characteristic of the unedifying din of pagan worship (1 Cor. 13:1; cf. 14:5-12, 19). Peter announces this present age will pass away with a "loud noise" (*rhoizēdón*, 2 Pet. 3:10). Like *ēchéō*, *rhoizēdón* is a unique NT word and connotes unexpected suddenness, plus a loud, rushing, crashing noise. Finally, "loud noises" (*phōnḗ*) are associated with the tribulation judgments (Rev. 9:9; cf. 8:5; 16:18) and the opening of God's temple in heaven (Rev. 11:19).

Bibliography.–*DNTT*, III, 111-14; *TDOT*, III, *s.v.* "hāmāh" (Baumann); "hāmam" (Müller). A. E. HILL

NOISOME. A term used by the AV in the archaic sense of "noxious" or "harmful," as a translation of Heb. *hawwâ* ("destruction") in Ps. 91:3 (RSV "deadly"; NEB "raging"), *raʿ* ("evil") in Ezk. 14:15, 21 (RSV "wild," "evil"; NEB "wild"), and Gk. *kakós* ("bad, evil") in Rev. 16:2 (RSV, NEB, "foul"). "Noisome" means "offensive" in the AV of 2 Macc. 9:9 (Gk. *barýnō*, "be burdensome"; RSV "felt revulsion"; NEB "was disgusted") and "malodorous" in the AV mg. of Job 31:40 (*see* COCKLE).

NOMADISM. Many different ways of life may properly be designated nomadism. This study is concerned with the nomadic cultures of the ancient Near East and, specifically, with the phenomenon of pastoral nomadism.

I. Pastoral Nomadism: Definition and Sources
II. Nomenclature
III. Ancient Near Eastern Pastoral Nomadism: The Mari Texts
IV. Archeological Evidence
V. Nomadism in the Bible
  A. Patriarchs
  B. Conquest and Settlement

I. Pastoral Nomadism: Definition and Sources.–Pastoral nomadism is a socioeconomic mode of life that is dependent primarily on the domestication and herding of animals and involves seasonal movement to new pasturelands. For further definition see Gottwald, "Nomads," p. 226.

The primary data for the study of pastoral nomadism in the ancient Near East come from Mesopotamia. Among the most significant are texts of the Third Dynasty of Ur (*ca.* 2060-1950 B.C.), the dynasties of Isin and Larsa (*ca.* 1960 B.C. and later), the Old Babylonian period (*ca.* 1830-1760 B.C.), and those from Upper Mesopotamia and Syria, principally in the Mari age (19th cent. B.C. and later).

II. Nomenclature.–Several terms are often used to designate the various types of migratory pastoral activity, such as full or camel nomadism, seminomadism, and transhumance (see Matthews, pp. 17-21). Full nomadism did not exist before the widespread domestication of the camel toward the end of the 2nd millennium B.C. Some scholars have suggested that only with the 1st millennium B.C. was the camel fully domesticated and that it was not until the 8th and 7th cents. B.C. that it became a common beast of burden (W. Dostal, *L'anticà società bedouina* [1959], p. 22; Matthews, p. 67 n. 7). But this does not mean that the mention of camels in Genesis (chs. 24 and 31) is anachronistic (*see* CAMEL; K. Kitchen, *Ancient Orient and OT* [1966], pp. 79f.).

Seminomadism is another designation applied to tribal people who engage in nomadic pastoralism. The movements of the seminomads, with their sheep, goats, and asses, were restricted by the availability of water sources. The grazing pastures were the steppes on the inner edge of the Fertile Crescent and the semidesert plains of Syria (J.-R. Kupper, *Journal*, p. 114; M. B. Rowton, *Oriens Antiquus*, 15 [1976], 20f.; P. E. L. Smith and T. C. Young, Jr., "The Evolution of Early Agriculture and Culture in Greater Mesopotamia: a Trial Model," in B. Spooner, ed., *Population Growth: Anthropological Implications* [1972], p. 22). Unlike the full or camel nomads, seminomads could not trek deep into the Arabian desert. Their migration was seasonal, following the retreating and advancing vegetation. As the name implies, seminomadism involved an intermixing of sedentary and nomadic living and also the introduction of nonpastoral activities in the tribal economy, such as hunting, gathering, and seasonal agriculture as supplementary forms of food extraction. Although somewhat of an oversimplification, the term seminomadism is used in modern anthropological literature to distinguish between sheep- and goat-breeding pastoralists and the camel nomads of the late 2nd and 1st millennia B.C. The terms seminomadism and pastoral nomadism are often used interchangeably (see Gottwald, *Tribes*, pp. 437-448).

Frequency and range of movement and type of habitation (traditions of more permanent architecture vs. temporary shelters) are generally valid criteria of distinction between the pastoral and camel nomad. Cf. the discussion of Gottwald (*Tribes*, pp. 440f.) on the tent as an accurate index of pastoral nomadism. He argues that the tent is not an unambiguous trait of pastoral nomadism as commonly understood.

The term transhumance, often used interchangeably with seminomadism, generally refers to all pastoral nomadism that involves seasonal movement of livestock to regions of different climate. Gottwald defines a narrower sense in which the term is used — a "form of intensive herd or flock breeding by communities which are primarily agricultural, have developed their crop cultivation intensively, and may even be advanced industrial societies. Pastoral role functions are restricted to a relatively small number of herdsmen-specialists who accompany the flocks and herds to seasonal pasturage, usually without their families" (*Tribes*, p. 445). The most common form of transhumant pastoralism in the Levant was winter steppe grazing with some late spring/summer upland grazing. Although the data are lean, Gottwald interprets Gen. 37:12-17; 2 Sam. 13:23;

and Gen. 38:12f. in the light of transhumant pastoralism.

Specialists do not agree on the criteria for differentiating among these three terms. A fundamental criterion, however, appears to be the degree and nature of the relationship between the nomadic groups and sedentary civilization (discussed under "socioeconomic morphemes" by Gottwald, *Tribes*, pp. 464-473; "dimorphic society" by M. B. Rowton, *JNES*, 32 [1973], 202f.).

The term "ass nomadism" (W. F. Albright, *BASOR*, 163 [Oct. 1961], 36-54), another designation for second-millennium pastoral nomadism, should be rejected (Van Seters, pp. 13f.; M. Weippert, *Bibl.*, 52 [1971], 407-432).

III. Ancient Near Eastern Pastoral Nomadism: The Mari Texts.–The ancient city of MARI was situated on the borders of the settled zone and the steppe; thus the Mari texts represent one of the most important sources for the study of pastoral nomadism and sedentarization in the ancient Near East. They reflect the social and political relations between the nomadic tribes and the urban centers.

J.-R. Kupper emphasized the importance of the Mari texts for the early history and diffusion of the West Semitic peoples (Amorites and Canaanites) and their languages. Kupper has been criticized for basing his study on old uncritical constructs of nomadism, with their faulty conceptions about the relation between pastoral nomads and settled peoples, and on nineteenth-century anthropological theory, which assumes that Semitic peoples passed from nomadic to sedentary stages of culture.

Utilizing anthropological models and ethnographic data from modern nomadic populations of the Middle East, M. B. Rowton has brought significant refinement to our understanding of pastoral nomadism, especially in terms of the relationship established between the social morphemes of "the town" and "the tribe." Rowton defined the symbiotic relationship between the sedentary and nomadic elements of the Mari kingdom as a "dimorphic society," i.e., one in which there was a double process of interaction between nomad and sedentary and between tribe and state. The basic dichotomy was thus not between the nomadic and sedentary peoples, as commonly emphasized, but between the "autonomous tribal chiefdom," composed of both pastoralists and villagers, and the great urban centers (*JNES*, 32 [1973], 202f.). This dimorphic sociopolitical system was, in large measure, the product of several environmental factors. The climate and geography of the region were such that the grazing areas utilized by the pastoral groups were "enclosed" within the area under the political control of the state of Mari (hence Rowton's designation "enclosed nomadism"). The state received a flow of reports from the provincial administrators concerning the movements and activities of the nomads. The pastoral nomads of Mari were thus in close contact with the sedentary community. Rowton commented that "dimorphic structure has its roots, not only in the physical environment, but also in the two apparently contradictory motives, mutual hostility and mutual need" (*Journal*, p. 30). Rowton referred to Mari tribalists, like the Yaminites or Haneans, as "integrated tribes," i.e., town-tribe confederations of which one segment was sedentary all year and another moved seasonally with the flocks in search of pasture (see Matthews, pp. 59-66).

In the light of recent studies on ancient Near Eastern pastoral nomadism/sedentarization, especially those dealing with the Mari texts and other second-millennium sources, the following points should be emphasized: (1) nomadic groups of the 2nd millennium were not true nomads but seminomadic pastoralists of the marginal steppe zones who came increasingly into commercial, social, and political contact with village and urban contexts; (2) sedentarization was not a process of unilinear evolution from desert to urban contexts but involved the "urbanization" of tribalists, "re-tribalization," and "withdrawal"; and (3) these circumstances produced a large, fluid population that constituted a social and political challenge to the urban centers. It must be emphasized that our understanding of ancient Near Eastern pastoral nomadism is far from complete. Our written sources are restricted, chronologically and geographically, and distorted in the sense that the perspective is invariably that of the urbanists. A complete picture will undoubtedly never come to light, though the TELL MARDIKH archives (ancient Ebla) offer the prospect of a better understanding (see G. Pettinato, *Archives of Ebla* [Eng. tr. 1981]).

Finally, a comment on the vexing problem of the AMORITES. The legitimacy of utilizing the images of Mari pastoral nomadism as a context for the study of nomadism in the Bible does not depend on a link between Amorite movements and the migration of Abraham nor even on the veracity of the "Amorite hypothesis." Although the picture of westward expansions by peoples speaking a West Semitic dialect offers an attractive historical context for the migration of Abraham from Ur to Palestine, such a connection is not demonstrable (J. J. Bimson, "Archaeological Data and the Dating of the Patriarchs," in A. R. Millard and D. J. Wiseman, eds., *Essays on the Patriarchal Narratives* [1980], pp. 59-62; W. G. Dever, "Palestine in the Second Millennium BCE: The Archaeological Picture," in J. H. Hayes and J. M. Miller, eds., *Israelite and Judaean History* [*OTL*, 1977], pp. 93-102). In fact, the very westward movements of the Amorites are disputed (Thompson, pp. 67-88). But as N. M. Sarna observed, "If Abraham's migration can no longer be explained as part of a larger Amorite migratory stream from east to west, it should be noted that what has fallen by the wayside is a scholarly hypothesis, not the Biblical text. Genesis itself presents the movement from Haran to Canaan as an individual, unique act undertaken in response to a divine call, an event . . . that inaugurates a new and decisive stage in God's plan of history. The factuality or otherwise of this Biblical evaluation lies beyond the scope of scholarly research" (*Biblical Archaeology Review*, 4/1 [1978], 52).

IV. Archeological Evidence.–It is important to note that the above portrait of the dimorphic society has been constructed by Rowton from written sources that are fragmentary at best. This picture has not been confirmed by archeology. Although archeology has produced a reasonably adequate picture of the urban aspect of the dimorphic society from lower Mesopotamia to Syria-Palestine, the village-pastoral aspect has not been documented for several reasons: (1) the marginal zones have not been investigated archeologically except for isolated surveys; (2) nomadic populations leave few traces for the archeologist's trowel; and (3) the translation of unwritten data into people and politics is methodologically an uncertain task (P. J. Parr, "Pottery, People and Politics," in R. Moorey and P. J. Parr, eds., *Archaeology in the Levant: Essays for Kathleen Kenyon* [1978], pp. 203-209). For what appear to be archeological reflections of the village-pastoral situation, see W. G. Dever, *op. cit.*, pp. 111f.; R. Cohen, *BASOR*, 236 (Fall 1979), 61-79. These data are meager and require caution in their interpretation.

V. Nomadism in the Bible.–The images of pastoral nomadism, as painted by second-millennium sources such as the Mari texts, provide the backdrop for the study of nomadism in the Bible. As noted above, this is particularly true for the period of the patriarchs, less so for the time of ancient Israel's wilderness, conquest, and settlement traditions. Although we shall concentrate on these periods,

glimpses of the nomadic way of life (pastoral and full nomadism) are preserved in numerous biblical contexts (Gen. 4:20; 10; Ex. 2:15-22; 3:1; Dt. 26:5; Jgs. 5:24; 6:1-6; 1 S. 25:2ff.; Ps. 78:55; Jer. 25:24; 35:5ff.; 49:29). A period of nomadism figures in the history of several biblical peoples, such as the Edomites, Moabites, Ammonites, Midianites, Ishmaelites, Kenites, Arabs, and Arameans.

A. Patriarchs. The patriarchs of Genesis are clearly not depicted as full or camel nomads. Furthermore, though ethnological studies on the nomadic populations of the contemporary Middle East can be helpful, it would be methodologically inappropriate to impose the model of today's bedouin on the nomads of patriarchal times. The gap is too great between the patriarchs and the nomadic Arabs of today, whose lives have been radically changed by industrialization and twentieth-century economic and political structures. The most appropriate context for the study of patriarchal nomadism is provided by the Mari texts, although this model must also be used with caution. The nomadism of Genesis is not a mirror image of Mari pastoral nomadism; differences abound and the similarities must not be exaggerated. The political, economic, and social circumstances that prevailed during the period of the Mari kingdom were markedly different from those of Canaan during the time of Abraham, Isaac, and Jacob.

Any attempt to study the nomadism of the patriarchs in the context of the M.B. I-II period (Bimson, *op. cit.*, pp. 54-65; for a survey of the archeological nomenclature, see S. Richard, *BASOR*, 237 [Winter 1980], 5-34) must begin with recognition of the fragmentary nature of our sources, both written and unwritten. It must again be emphasized that our understanding of Mari pastoral nomadism is sketchy and written from the perspective of the urbanists. Furthermore, archeologists have only begun to piece together a cultural history of Syria-Palestine for this period. And perhaps most importantly, Genesis preserves little more than glimpses of the everyday lives of Abraham and his descendants. It is nevertheless clear that the patriarchs are depicted as nomadic herdsmen with recollections of the images of Mari pastoral nomadism.

Both societies are tribally organized. "Kinship is the principal glue in the social organization of nomadic peoples" (Matthews, p. 25). At Mari we read about the (Ben) Yaminites, Suteans, Haneans, and others. The tribal organization of the Genesis patriarchs is similarly clear.

The patriarchs camp in the vicinity of towns (Gen. 12:4-9; 13:1-18; 33:18-19; 37:12-17). They occasionally engage in agriculture (26:12-14). They raise sheep and goats (30:25-43) and dig wells (21:25-31; 26:15-22). There is close interaction, socially and economically, between the patriarchs and townspeople (21:25-34; 23:1-20; 26:17-33; 33:18-20). They move from one place of encampment and pasturage to another (12:8-9; 13:3). Under certain circumstances they dwell in towns as "resident aliens" (Heb. *gēr* and cognates; see 12:10; 15:13; 17:8; 19:9; 20:1; 21:23, 34; 23:4; 26:3; 28:4; 32:4; 35:27; 36:7; 37:1; 47:4, 9). Abraham was remembered as one who "by faith . . . sojourned in the land of promise, as in a foreign land, living in tents with Isaac and Jacob, heirs with him of the same promise" (He. 11:9).

Numerous texts in Genesis refer to the patriarchs living in tents (12:8; 13:3, 18; 18:1-10; 24:67; 31:25, 33f.). J. Van Seters (p. 14) considered these references an indication of the late origin of these narratives. For a rebuttal see D. J. Wiseman, "Abraham Reassessed," in Millard and Wiseman, eds., *Essays on the Patriarchal Narratives* (1980), p. 145.

Certain studies have proposed a first-millennium context for the patriarchal stories of Genesis and have minimized the applicability of second-millennium extrabiblical sources for the study of these narratives (Van Seters and Thompson; cf. the challenge of J. T. Luke, *JSOT*, 4 [1977], 35-47). Van Seters, for instance, addressed the widely espoused position that the patriarchal stories portray a nomadic way of life that can be documented from the textual remains of the second-millennium B.C. and concluded that "very little in the patriarchal stories . . . reflects the nomadic life of the second millennium" (pp. 16f.; see also p. 67 for a clear statement of his methodological premise for the comparative analysis of biblical and nonbiblical materials).

The adoption of Rowton's dimorphic model, which was constructed largely from the Mari texts, eliminates a number of Van Seters's objections to the application of second-millennium nomadic images to the patriarchal stories, such as (1) the use of Heb. *gēr*, "a term not entirely appropriate as a general designation for nomad" (Van Seters, p. 16); (2) the sedentary life of Abraham in Ur and Haran; (3) the theme of patrimony, which is "utterly foreign to the nomadic way of life but a fundamental principle of the settled economy" (p. 16); and (4) Isaac's practice of agriculture. Van Seters's objections to the mention of tents and camels have been addressed above. His dating of the patriarchal traditions to the Iron Age is based on the a priori assumption that they are late literary inventions.

B. Conquest and Settlement. The images of pastoral nomadism in ancient Israel's wilderness, conquest, and settlement traditions are not as apparent as those in the patriarchal traditions. The wilderness wanderings were not the product of regular seasonal movement in search of new pastureland but rather the sovereign hand of God miraculously directing the destiny of a people in fulfillment of promises made to their ancestors. Although we have little socioeconomic data on the Israelites of the Exodus, we may safely assume that survival in the wilderness would have involved ways of life reminiscent of nomadic peoples. This does not permit, however, the designation of this group as pastoral nomads. The narratives create the clear impression that this was a community unfamiliar with life in the wilderness and their survival was in large measure dependent on the Lord's provision (Ex. 13:17-22; 15:22-25; 16:1-21; 17:1-7). The events from Exodus to Conquest/Settlement cannot be explained from the perspective of natural cultural processes.

While rejecting N. K. Gottwald's view of the history of early Israel as an "indigenous revolutionary social movement," one may glean much from his provocative studies on "early Israelite pastoral nomadism" (*Tribes*, pp. 435-463; *Biblical Archaeology Review*, 4/2 [1978], 2-7). Utilizing the sociological models of G. Mendenhall, J. T. Luke, and M. B. Rowton, Gottwald concluded that most of the movements of the patriarchal families were migrations rather than seasonal treks. He acknowledged that "the socioeconomic data permit the interpretation that some or all of the patriarchal groups were transhumant pastoralists" (p. 452). Gottwald's view of Israel's early history as an indigenous social movement is constructed, in part, on the following conclusions relative to Israelite transhumant pastoralism: (1) it was a subsidiary subspecialization within the dominant socioeconomic mode of production, namely, intensive agriculture; (2) transhumant pastoralism of the patriarchal and Mosaic traditions was a sub-specialization indigenous to Syria-Palestine and not a culturally foreign intrusion from the outside; and (3) the transhumant pastoral element in early Israel "did not project a unified military attack against settled Syro-Palestinian peoples, nor a more covert infiltration, with the intent of annihilating or displacing the natives so as to

take over their agricultural means of production, thereby advancing from a lower cultural level of pastoral nomadism to a higher cultural level of intensive agriculture " (pp. 460f.; cf. G. Mendenhall, *BA*, 25 [1962], 66-87 [repr. in *BA Reader*, III (1970), 100-120]).

Gottwald's fundamental diminishing of the cultural and historical significance of pastoral nomadism in the patriarchal period is unfortunate. Although refinements are necessary and assured conclusions are precluded for want of data, his basic rejection of the Exodus Israelites as pastoral nomads in the tradition of the Mari tribalists appears correct. His "parameters for the use of the earliest Israelite traditions in reconstructing the history and sociology of pre-monarchic Israel" must be rejected, however, together with the view of Israel's early history as an indigenous social movement.

NON non (1 Ch. 7:27, AV). *See* NUN (Person).

NOOMA nō'ə-mə (1 Esd. 9:35, NEB). *See* NEBO 2.

NOON; NOONDAY [Heb. *ṣoh^{o}rayim*; Gk. *mesēmbría* (Acts 22:6)]; **NOONTIDE** [Heb. *d^{e}mî*] (Isa. 28:10); **MIDDAY** [Heb. *ṣoh^{o}rayim* (1 K. 18:29), *mah^{a}ṣît hayyôm* (Neh. 8:3); Gk. *hēmēras mésēs* (Acts 26:13)]; **SIXTH HOUR** [Gk. *héktos* (Mt. 20:5), *héktēs hṓras* (27:45), *hṓra héktē* (Mk. 15:33; Lk. 23:44; Jn. 4:6; 19:14; Acts 10:9)]; AV also "cutting off" (Isa. 38:10); NEB also BROAD DAYLIGHT (Dt. 28:29), "prime of life" (Isa. 38:10), "all afternoon" (1 K. 18:29), MIDDAY (Mt. 20:5; 27:45; Mk. 15:33; Lk. 23:44), NOON (Jn. 4:6; 19:14; Acts 10:9). These terms designate (1) the time that is midway between sunrise (about 6:00 a.m.; hence the sixth hour = noon) and sunset (about 6:00 p.m.) (Neh. 8:3; Acts 26:13), and thus (2) the time of day that is usually brightest, as *ṣoh^{o}rayim*, "brightness," indicates in 1 K. 18:29; Jer. 20:16; etc. Accordingly, usage may emphasize either: (1) temporal designation, i.e., "midday," "noon," "noontide," "sixth hour," as estimated from a sundial (e.g., Gen. 43:16, 25; 1 K. 18:26f.; *see also* HOUR); or (2) brightness in contrast to darkness (e.g., Dt. 28:29; Isa. 58:10; Am. 8:9).

A third meaning arises by extension of this emphasis on brightness, namely, that noon is a time when theophany is to be expected (Peter's vision, Acts 10:9; Paul's vision, Acts 22:6 and 26:13; the judgment made against Jesus, Jn. 19:14; cf. Ps. 37:6; Isa. 58:10). But noon may also be, contrary to all expectations, the time of worst confusion, darkness, and judgment (e.g., Job 5:14; Ps. 91:6; Isa. 59:10; Jer. 15:8; 20:16; Zeph. 2:4; Mt. 27:45 par.).

Of significance, particularly stressed in Jn. 19:14 (cf. Mt. 27:45; Lk. 23:44; contra Mk. 15:25, "the third hour"), is the time "about the sixth hour" on the eve of Passover when the trial of Jesus ended by His being handed over for crucifixion. The sun began to decline then from its apex toward evening, and priests could thus begin to slaughter paschal lambs for Passover, the feast that celebrates God's delivering His people in the Exodus (cf. R. E. Brown, *Gospel According to John XIII–XXI* [*AB*, 1970], pp. 882f., 895f.). This "sixth hour" on that day before Passover was revelatory in character, full of theological import about the irony of this people's rejection of their own divinely appointed deliverance (Jn. 17:1; cf. 2:4; 7:30; 8:20; 12:23, 27; 13:1; 16:21).

Bibliography.–C. K. Barrett, *Gospel According to St. John* (1955), pp. 39-41, 454; *TDNT*, II, *s.v.* ἡμέρα (von Rad, Delling); IX, *s.v.* ὥρα (Delling). J. G. GIBBS

NOPH nof (AV, NEB, Isa. 19:13; Jer. 2:16; 44:1; 46:14, 19; Ezk. 30:13; AV 30:16). *See* MEMPHIS.

NOPHAH nō'fə [Heb. *nōpaḥ*] (Nu. 21:30, AV). A town in Moab, if the Hebrew text is to be followed. The LXX reads *kaí hai gynaíkes éti prosexékausan pýr epí Moab*, "and the women yet [again] poured fire upon Moab." The RSV and NEB, on the basis of the LXX and *npḥ 'š ŝr* in the Samaritan Pentateuch, emend to *npḥ 'š*, "fire was blown [= spread]." Grollenberg with reserve located the site N of Dibon (*GAB*, p. 158). W. S. L. S.

NORTH [Heb. *ṣāpôn*]; NEB also ZAPHON (Ps. 89:12 [MT 13]; 48:2 [MT 3], NEB mg.); [*ś^{e}mō'l*–'left hand'] (e.g., Gen. 14:15; Josh. 19:27); AV LEFT HAND; [Gk. *borrás*] (Lk. 13:29; Rev. 21:13); **NORTH COUNTRY** [Heb. *'ereṣ ṣāpôn*] (e.g., Jer. 6:22; 10:22; Zec. 2:6 [MT 10]; 6:8). The RSV rendering "from the north" in Ezk. 23:24 is based on the LXX; the MT has an unknown word, Heb. *hōṣen* (<*haṣṣāpôn*?), which is translated "chariots" by the AV and is emended by the NEB to read "war-horses" (see comms.). In Job 37:9 the AV renders *m^{e}zārîm* (piel part. of *zārâ*, "scatter, fan") by "out of the north"; the RSV reads "scattering winds" and the NEB "rain winds."

Because the Israelites oriented themselves to the rising sun, the north was on the left; therefore it could be indicated by Heb. *ś^{e}mō'l* (*see* LEFT [HAND]; ORIENTATION). As a directional term "north" can be used to locate a specific object or identify a particular place; e.g., it may define a boundary line (Josh. 18:5) or specify a particular city gate (Ezk. 40:20, 23). "North" often is used with "south" as a merismus signifying the entire area between these two extremities (e.g., Ps. 107:3; Lk. 13:29). Sometimes it parallels "east" in references to Mesopotamia, which lay to the north and east of Israel (cf. Isa. 41:25).

Because Israel was protected by the desert on the east and the Mediterranean Sea on the west, and since the main highways ran N-S, Israel's enemies had to approach from either the north or the south. Because Egypt was weak during most of Israel's occupation of Palestine, Israel's enemies (Arameans, Assyrians, and Babylonians) generally came from the north. This fact, combined with the phenomenon that stormy weather from the west descends on Palestine from the north (cf. Prov. 25:23), gave "north" an ominous overtone for the Israelites: it represented a mysterious, unknown region, the location of hostile forces.

Jeremiah often prophesied that disaster from the north would befall Judah (Jer. 1:14f.; 4:6; 6:1). Although Assyria was still the dominant nation at the beginning of Jeremiah's prophecy (cf. Zeph. 2:13), by the height of his ministry the Babylonians had decimated the Assyrian empire. After

Nebuchadrezzar took Carchemish (605 B.C.) Jeremiah referred to Israel's enemy specifically as Babylon (e.g., 25:9-12; cf. references to Babylon as "the north" in Ezk. 26:7; Zec. 2:6f.). Jeremiah also prophesied that an enemy from the north would destroy Egypt (Jer. 46:20, 24), Philistia (47:2), and Babylon (Jer. 50:3, 9, 41 — a prophecy partially fulfilled by Persia's defeat of Babylon). Moreover, Jeremiah prophesied that Yahweh would one day bring Israel back to its homeland from the lands of the north (Jer. 3:18; 16:15; 23:8; 31:8; cf. Zec. 6:6, 8). These references indicate that for Jeremiah, "the north" symbolizes an evil, hostile force far more than a specific geographical location.

Building on Jeremiah's prophecies, Ezekiel depicts Israel's eschatological enemy as hordes from "the uttermost parts of the north" (Ezk. 38:6, 15; 39:2). Another apocalyptic oracle refers more specifically to the Seleucid king (ruler of one of the four nations resulting from the division of the Greek empire) as "the king of the north" (Dnl. 11:6-8).

In Ugaritic mythology Mt. Zaphon (Heb. *ṣāpôn*) is the sacred mountain of Baal, located in the far north. It is usually identified with Mt. Casius (Jebel el-'Aqra'), some 40 km. (25 mi.) N of the ancient city Ugarit (Râs Shamrah;) but the significance of Mt. Zaphon is more mythopoeic than geographical. A. S. Kapelrud postulated that the tower in Baal's temple was called Zaphon ("north"), for in mythical thought two locations endowed with the same sacred quality are identical regardless of their geographical distance. This mythopoeic meaning of *ṣāpôn* occurs several times in the OT. Ps. 48:2 (MT 3), which describes the temple mount as "Mount Zion, in the far north, the city of the great King" (RSV), would perhaps be better translated "like the utmost heights of Zaphon is Mount Zion" (NIV; cf. NEB mg.). A. Robinson takes Zaphon ("the north") to mean the heavenly place of Yahweh's rule, with Zion as its earthly counterpart. Thus Yahweh, the God who reigns over the entire world from Zaphon, His heavenly throne, is at the same time reigning from its earthly counterpart, His temple on Mt. Zion. In a taunt song picturing the downfall of the king of Babylon, Isaiah alludes to Zaphon as the mount of assembly of the gods: "I shall sit on the mount of assembly in the far north" (Isa. 14:13, RSV).

Some scholars have seen allusions to Mt. Zaphon in two accounts of theophanies accompanied by spectacular cloud displays coming out of "the north," in Job 37:22 (see M. Pope, *Job* [*AB*, 3rd ed. 1973], pp. 279, 286f.) and Ezk. 1:4 (see *IB*, VI, 70). In Job 26:7 "north" stands parallel to "earth," indicating that there it refers to the high heavens (cf. NEB "the canopy of the sky"); the verb *nāṭâ* ("stretch out," used of pitching a tent) supports this interpretation (see Roberts; for another view, cf. Pope, p. 183). Some scholars (e.g., M. Dahood, *Psalms*, II [*AB*, 2nd ed. 1973], 308, 314; cf. also NEB) have interpreted *ṣāpôn* in Ps. 89:12 (MT 13) to mean the cosmic mountain, particularly since Mt. Tabor and Mt. Hermon stand in the next stich; but the lack of any solid evidence that "south" has mythopoeic significance casts doubt on this view. The verse is saying that Yahweh created every part of the world, and no part of the universe is outside His rule.

NORTHEAST; SOUTHEAST. The RSV translation of the Greek terms used in Acts 27:12 to describe the Cretan harbor called PHOENIX toward which Paul and his shipmates were bound for safe winter anchorage when they were driven west before a severe storm and shipwrecked on the shores of Malta. The harbor is described in Greek as: *bléponta katá líba kaí katá chŏron*, which is most naturally rendered "facing the southwest (wind) [*líps*] and the northwest (wind) [*chŏron*]." (Cf. the LXX use of *blépō* + *katá* + direction in Ezk. 11:1 and frequently throughout ch. 40.) The translation "southeast and northeast" most probably depends on the common identification of Phoenix with modern Loutro, a harbor on the south shore of Crete that corresponds most precisely to ancient references to Phoenix, except that it faces NE and SE. Suggested solutions to the problem include: (1) the assumption that Luke was mistaken about the actual orientation of the harbor; (2) attempts to identify ancient Phoenix with some harbor other than Loutro (e.g., Phenika, a small harbor on the west shore of the same peninsula that shelters Loutro); or (3) translation of the Greek idiom to represent the orientation of a ship entering the harbor rather than the harbor itself. This last seems quite unsupported by the evidence. G. H. WILSON

NORTHEASTER [Gk. *eurakýlōn* (p^{74} ℵ A B etc.), *euroklýdōn* (TR)]; AV EUROCLYDON. A sailor's term for the wind that blew Paul's ship off course on his voyage to Rome (Acts 27:14). It probably was a wind blowing off Mt. Ida across the open Bay of Messaria on the southern coast of Crete. Ramsay comments that it was typical of that area for a gentle southerly wind to "shift to a violent northerly wind" (*SPT*, p. 327).

The reading *eurakýlōn* is supported by the oldest MSS and is generally accepted as correct. It is a compound of Gk. *eúros* ("east wind") and Lat. *aquilo* ("northeast wind"; cf. *Oxford Latin Dictionary*, p. 158) and therefore designates the east-northeast wind (see MM, p. 264). The variant reading *euroklýdōn*, a compound of Gk. *eúros* ("[south]east wind") and *klýdōn* ("rough water, waves"), would designate a "southeast wind, that stirs up waves" (Bauer, rev., p. 325). Even apart from textual considerations this variant is not to be preferred, since the wind probably came from a northerly direction. Another variant, *eurykýdōn* (< Gk. *eurýs*, "broad," and *klýdōn*), means "the wind that stirs up broad waves" (Bauer, rev., p. 325).

NORTHERNER [Heb. *ṣᵉpônî*] (Joel 2:20); AV NORTHERN ARMY; NEB NORTHERN PERIL. One interpretation is that the "northerner" is an "army" of locusts that came from the north (cf. v. 25), as they did in A.D. 1915 (see Allen, pp. 88f.; Driver, pp. 60, 84-93). If so, most likely God used a wind to drive them away (cf. Ex. 10:19). *See also* LOCUST. But Childs and Wolff argued persuasively that "northerner" refers to an apocalyptic army that is described in terms of locusts; the "northerner" is the "enemy from the north" frequently mentioned in Jeremiah (1:13-15; 4:5-8; etc.) and Ezekiel (38:6, 15; 39:2).

Bibliography.–B. S. Childs, *JBL*, 78 (1959), 187-198; comms. on Joel by L. Allen (*NICOT*, 1976); S. R. Driver (*CBSC*, 1915); H. W. Wolff (Eng. tr., *Hermeneia*, 1977). G. A. L.

NOSE, NOSTRILS [Heb. *'ap*, also *nᵉḥîrayim* (Job 41:20 [MT 12])]; AV also FACE (Gen. 24:47); NEB also ANGER (Ex. 15:8), LIFE (Lam. 4:20); on Ezk. 8:17, NEB, see below.

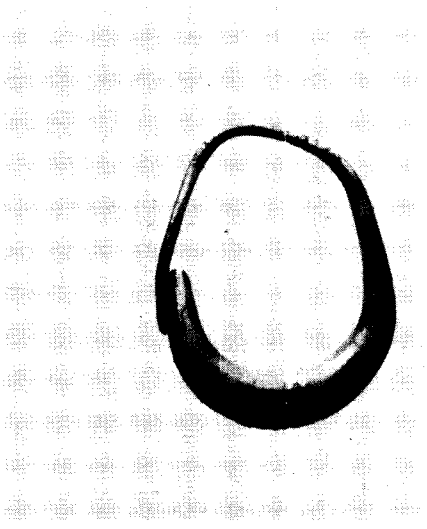
Hebrew *'ap* is frequently translated "face," "anger," or "wrath" as well as "nose" or "nostril," perhaps because the nose is the most prominent feature of the FACE

and readily reflects emotions such as ANGER and WRATH. The cognate verb *'ānap* ("be angry") appears to have been connected originally with angry snorting (see *TDOT*, I, 351, 354). *Nᵉḥîrayim* (dual form of *nāḥîr*) is related to the verb *nāḥar* ("blow"); cf. the cognate nouns *naḥar* (Job 39:20) and *naḥᵃrâ* (Jer. 8:16), which denote the "snorting" of warhorses ready for battle. Yahweh's anger is depicted in poetic and figurative language as a blast of smoke or fire from His nostrils (Ex. 15:8; 2 S. 22:9, 16 par. Ps. 18:8, 15 [MT 9, 16]; Job 41:20 [MT 12]; cf. 4:9). Isa. 65:5 uses the image of "smoke in the nostrils" to describe God's anger at Israel's persistent disobedience (cf. Dt. 32:22; Jer. 17:4).

Like other ancient Near Eastern peoples, the Hebrews thought of the nose, rather than the lungs, as the organ of breathing (cf. Gen. 7:22; Lam. 4:20; Wisd. 15:15; 4 Macc. 15:19). Human beings have life only when the breath of God is in their nostrils (Gen. 2:7; Job 27:3). This dependence on breath, an aspect of human creatureliness and mortality, makes mankind of small account in comparison to the almighty, eternal God (Isa. 2:22; cf. Wisd. 2:2, which is part of the reasoning of ungodly persons [cf. 1:16–2:24]).

The nose is also referred to as the organ of smell — a sense not possessed by idols (Ps. 115:6). In Nu. 11:20 the clause "until it comes out at your nostrils" may indicate that the smell of the meat would become loathsome to the Israelites. Am. 4:10 refers to the stench of decomposing corpses. One form of torture that Antiochus used on Eleazar involved pouring a "broth of evil odour into his nostrils" (4 Macc. 6:25).

A HOOK was sometimes put in the nose or jaw of a wild animal caught in a trap, so that it could be led away (cf. Job 40:24; 41:1 [MT 40:25]). Some ancient peoples (notably the Assyrians) had the cruel custom of humiliating their enemies in this way (cf. Ezk. 19:4, 9), and Isaiah used this figure to describe how Yahweh would lead Sennacherib back to Assyria (2 K. 19:28 par. Isa. 37:29; cf. Ezk. 38:4).



As a prominent facial feature, the nose is important to human beauty (cf. Cant. 7:4 [MT 5]). NOSE RINGS were worn as jewelry by Hebrew women (e.g., Gen. 24:47; Isa. 3:21; cf. the figurative use in Ezk. 16:12). The faces of prisoners of war were sometimes mutilated by cutting off their nose and ears (Ezk. 23:25).

The last clause of Ezk. 8:17 is very obscure. The AV and RSV translate the MT literally ("they put the branch to their noses"), while the NEB offers an unlikely interpretation ("they seek to appease me"). The text contains one of the "scribal corrections" (*tiqqûn sôpᵉrîm*) made by the Masoretes in order to remove material considered disrespectful to God: the original *'appî* or *'appay* ("my nose") was changed to *'appām* ("their nose") (see BH). For the various interpretations that this text has received, see the comms. on Ezekiel, esp. KD and W. Eichrodt (Eng. tr., *OTL*, 1970); *see also* GESTURE V.D.

See *TDOT*, I, *s.v.* "'ānaph" (J. Bergman, E. Johnson).
N. J. O.

NOSE RINGS [Heb. *nizmê hā'ap*–'rings of the nose'] (Isa. 3:21); AV NOSE-JEWELS. Heb. *nezem*, a general term for "ring," specifically designates a nose ring in Gen. 24:47 (cf. vv. 22, 30); Ezk. 16:12; and Prov. 11:22 (where a "beautiful woman without discretion" is compared to a *nezem zāhāḇ bᵉ'ap ḥᵃzîr* [RSV "gold ring in a swine's snout"]), as well as in Isa. 3:21. *See* GARMENTS IX (esp. chart and picture); RING.

NOTABLE [Heb. pass. part. of *nāqaḇ*–'distinguish, designate'] (Am. 6:1); AV NAMED; NEB OF MARK; [Gk. *gnōstós*] (Acts 4:16); **OF NOTE** [Gk. *epísēmos*] (Rom. 16:7); NEB EMINENT. Attracting notice, or worthy of attention.

Gold nose- (or ear-) ring from Megiddo (Late Bronze Age). Actual size 18 mm. (0.7 in.) (Israel Department of Antiquities and Museums)

The irony in Amos' reference to the ruling class of Israel as "the notable men of the first of the nations" (6:1) is made clear in v. 7: "Therefore they shall now be the first of those to go into exile. . . ." Paul described ANDRONICUS and JUNIAS (RSV: but perhaps "Junia"; cf. AV; BDF, § 125 [2]) as "*epísēmos* [prominent, outstanding] among the apostles" (Rom. 16:7); cf. Mt. 27:16, where *epísēmos* occurs in a negative sense to describe Barabbas (AV "notable"; RSV "notorious"). In 2 Macc. 3:26, AV, "notable" renders *ekprepḗs* ("outstanding"; cf. RSV "remarkably"; NEB "surpassing"), and in 6:28, AV, it renders *gennaíos* (cf. RSV "noble"; NEB "fine").

Sometimes "notable" is used in the sense of "conspicuous." The Sanhedrin found it impossible to refute the miracle performed by Peter and John because it was *gnōstós* ("known, clearly recognizable") and *phanerós* ("manifest") to all the inhabitants of Jerusalem (Acts 4:16). The AV uses "notable" to describe the horn(s) of the goat in Daniel's dream (Dnl. 8:5, 8; Heb. *ḥāzûṯ*; cf. RSV "conspicuous"; NEB "prominent") and the "day of the Lord" (Acts 2:20, Gk. *epiphanḗs*; cf. RSV "manifest"; NEB "resplendent"). Similarly, in 2 Macc. 26:33, AV, "notable" renders *epiphanḗs* (cf. RSV "splendid"; NEB "for all the world to see").
N. J. O.

NOTE. In Wisd. 19:18 (NEB "pitch") and 1 Cor. 14:7 (AV "sound"), Gk. *phthóngos* represents the "sound" or "tone" made by a musical instrument; cf. Rom. 10:18, where it denotes the sound of the human "voice" (AV "sound").

On Rom. 16:7 *see* NOTABLE.

NOTE; TAKE NOTE OF [Heb. *yāḏaʿ*–'know' (1 S. 23:23; Jer. 5:1), hiphil of *nāḇaṭ*–'look at' (Ps. 10:14)]; AV TAKE KNOWLEDGE, BEHOLD, etc.; NEB FIND OUT, SEE, etc.; [Gk. *eídon* (Rom. 11:22), *skopéō* (16:17), *sēmeióō* (2 Thess. 3:14)]; AV also BEHOLD, MARK; NEB OBSERVE, "keep your eye on," MARK; **NOTICE; TAKE NOTICE OF** [Heb. hiphil of *nāḵar*] (Ruth 2:10, 19; 2 S.

3:36; Ps. 142:4 [MT 5]); AV also TAKE KNOWLEDGE, KNOW; NEB also "find (no) friend by my side"; [Gk. *katanoéō*] (Mt. 7:3 par. Lk. 6:41; Acts 27:39); AV CONSIDER, PERCEIVE, etc.; NEB also "with (never) a thought for"; **ESCAPE NOTICE** [Gk. *lanthánō*] (Acts 26:26); AV BE HIDDEN; NEB BE UNAWARE; **GIVE NOTICE** [Gk. *diangéllō* (Acts 21:26), *emphanízō* (23:15)]; AV SIGNIFY; NEB also APPLY TO.

"Note," "take note of," "notice," and "take notice of" generally mean to pay attention to something. Paul instructed his readers to be alert for those who opposed his teaching and to avoid such persons (Rom. 16:17; 2 Thess. 3:14). Gk. *katanoéō* is an intensified form of *noéō* ("perceive, understand"; cf. LXX Ps. 9:35 [Eng. 10:14]). Jesus warned against looking at the speck in another's eye while failing to inspect the log in one's own (Mt. 7:3 par.). The hiphil of Heb. *nāḵar* can signify treating someone with polite or friendly attention. Ruth was surprised when Boaz took an interest in her (2:10, 19); but the psalmist complained that no one showed the slightest concern for him (Ps. 142:4 [5]).

In Acts 21:26 "give notice" refers to a cultic announcement; in 23:15 it refers to an official communication with the Roman authority.

NOTHING; NOUGHT. Terms used synonymously to translate a variety of words in the OT and NT. The Hebrew terms include *'ayin* (e.g., Prov. 13:4; Eccl. 2:24; 3:12, 14), *'epes* (e.g., Isa. 34:12; 41:29), *lō' mᵉ'ûmâ* (e.g., Gen. 40:15; Jgs. 14:6; 1 S. 25:21), *lō' ḏāḇār* (e.g., Gen. 19:8; 1 S. 20:2), *lō' ḵōl* (e.g., Gen. 11:6; Prov. 13:7), *tōhû* (e.g., Isa. 44:9; 49:4), *biltî* (e.g., Isa. 44:10; Am. 3:4), *heḇel* (e.g., Ps. 39:6 [MT 7]; "empty nothings," Job 21:34), *šāwᵉ'* (e.g., Hos. 12:11 [MT 12]), etc. In the NT "nothing" most often represents Gk. *mēdeís* (e.g., Mt. 8:4; 27:19) or *oudeís* (e.g., Mk. 7:15; 11:13). "Nothing" and "nought" occur also in expressions such as "for nothing," "for nought" (Heb. *ḥinnām*, lit. "freely, without compensation"; e.g., Gen. 29:15; Ex. 21:2; Job 1:9; Isa. 52:3, 5), "nothing but" (*raq*, lit. "only"; e.g., Gen. 26:29), "bring to nothing" (hiphil of *māʿaṭ*, lit. "diminish," Jer. 10:24; Gk. *katargéō*, lit. "make ineffective," 1 Cor. 1:28), "come to nought" (Heb. *'āḇaḏ*, lit. "perish," Ps. 112:10; Prov. 10:28; 11:7; *'āpēs*, lit. "be at an end," Isa. 29:20; hophal of *pārar*, lit. "be broken," Isa. 8:10), "have nothing to do with" (Gk. *paraitéomai*, lit. "decline, reject, avoid," 1 Tim. 4:7; 2 Tim. 2:23; Tit. 3:10), etc.

Job 26:7 describes God's omnipotence with the words, "He . . . hangs the earth upon nothing" (Heb. *bᵉlî-mâ*). "Nothing" and "nought" are often used to indicate the insignificance of a human life (e.g., Ps. 39:5 [MT 6]), of the nations and their rulers (e.g., Isa. 34:12; 40:17, 23; 41:11f.), and of false gods (e.g., 41:24, 29; 44:9f.) in contrast to the sovereign power of Yahweh, the Creator of the world and Ruler of history.

Qoheleth observes the monotonous cycles of the natural world and the futility of human toil and laments, "there is nothing new under the sun" (Eccl. 1:9), i.e., there is no evidence of change or progress (cf. Ps. 39:6 [MT 7]). In Ps. 73:25 the psalmist rejoices in the communion with God that makes all earthly delights and sorrows insignificant: "Whom have I in heaven but thee? And there is nothing upon earth that I desire besides thee."

An important theme in the Gospel of John is Jesus' total dependence upon His heavenly Father, and therefore the identification of Jesus' mission and authority with God's (Jn. 5:19, 30; 8:28, 54; 9:33). Likewise, Jesus' followers can do nothing apart from Him (15:5; cf. 16:23f.).

Reflecting a familiar OT theme, Paul points to the absurdity of human self-glorification in the light of God's sovereignty: "God chose what is low and despised in the world, even things that are not, to bring to nothing [Gk. *katargéō*] things that are, so that no human being might boast in the presence of God" (1 Cor. 1:28f.). In 13:2f. he reminds the Corinthians that all the other spiritual gifts have no value whatsoever if they are not controlled by the gift of love.

The Pastoral Epistles exhort their readers to exercise congregational discipline by "having nothing to do with" (i.e., avoiding or repudiating) "godless and silly myths" (1 Tim. 4:7), "stupid, senseless controversies" (2 Tim. 2:23), and "a man who is factious" (Tit. 3:10; cf. 2 Thess. 3:14, where "have nothing to do with" renders *mḗ synanameígnymi*, lit. "do not mingle").

P. L. BREMER N. J. O.

NOTICE. *See* NOTE, TAKE NOTE OF.

NOURISH [pilpel of Heb. *kûl*–'sustain, support,' piel of *gāḏal*–'grow'; Gk. *tréphō*–'feed, support,' *ektréphō*, *entréphō*–'bring up, train,' *epichorēgéō*–'give, support']; AV also FEED; NEB also CHERISH, MAKE GROW, NURSE, etc.

The biblical use of "nourish" generally has a spiritual or figurative sense. Thus in Ezk. 31:4 the image of a tree nourished by water or rain refers to Egypt (see comms., *BHS*; the AV and NEB follow the MT and read Assyria in v. 3; cf. Isa. 44:14). Zec. 11:16 refers to a worthless shepherd (vv. 15, 17) whom God raises up and who, instead of caring for his flock, devours them. Though he is an instrument of God's judgment, he will also be judged. In a more positive image the NT seer referred to God's care for the "woman" (the Church? Eve? Mary? see comms.) in Rev. 12:6, 14.

Spiritual nourishing is in view in Eph. 5:29, where Paul draws a parallel between care for one's own body (perhaps one's spouse; see comms.) and the way Christ cares for the Church. Cf. also Col. 2:19, where Paul uses the image of the body to describe the Church and its relation to Jesus Christ. In 1 Tim. 4:6 Paul uses the common image of the word of God as spiritual food (cf. Ezk. 2:8–3:3; Jn. 6:48-51), which Timothy has been fed since childhood (2 Tim. 3:15). G. A. L.

NOVICE. The AV rendering of Gk. *neóphytos* (lit. "newly planted"), which in 1 Tim. 3:6 means "recent convert" (so RSV; cf. NEB "convert newly baptized"). Because of the danger that rapid promotion may lead to pride and clouded judgment, recent converts are specifically listed among those who are disqualified from holding the office of bishop.

NOW. In the older English versions "now" occurs more than twelve hundred times. In the OT it most often translates Heb. *nā'* (a particle expressing urgency) or *'attâ*. The most important NT terms are Gk. *nýn* (and emphatic form *nyní*), *árti*, and *ḗdē* (which is also rendered "already"). What follows here are some of the major types of uses, with special emphasis upon those that appear in theologically significant statements.

English "now," like Gk. *nýn*, is primarily a temporal adverb; but it can also be used as a particle, noun, or adjective, and as an adverb it can be used to express logical or situational as well as temporal relationships. Hence a discussion of "now" in the Bible can best be divided into its nontemporal and temporal uses.

I. Nontemporal Usage
II. Temporal Usage
  A. Point in Time
  B. Period of Time
    1. Recent Past
    2. Imminent Future
    3. "Hour" of Jesus
    4. Time Between Christ's First and Second Comings
    5. "Then" and "Now" of Christian Experience

I. Nontemporal Usage.–"Now" has four common nontemporal uses. (1) It is frequently used as a connecting particle to express a logical connection or a point of transition in thought. Sometimes it is supplied by the RSV when the Hebrew or Greek has simply a coordinating conjunction (e.g., Gen. 16:1: "Now Sarai . . ."; Jn. 18:40: "Now Barabbas . . ."). But is also occurs as a translation of Heb. *nā'* or *'attâ* or of Gk. *nýn* (e.g., Lk. 11:39: "Now you Pharisees . . ."; Acts 10:33: "Now therefore . . .").

(2) It is also used as a particle of emphasis with interjections, requests, and commands. The AV often translates Heb. *nā'* literally while the RSV paraphrases or omits it (e.g., Gen. 12:11; 13:14); but cf. Isa. 1:18 (RSV "Come now . . ."). In the NT the RSV, as well as the AV, usually renders *nýn* as "now" in these expressions (e.g., Acts 4:29; 7:34; 13:11; Jas. 4:13).

(3) The expression "but now" (Gk. *nýn* [*nyní*] *de*) is used to denote a logical antithesis as when one posits the real or true state of affairs over against what is unreal or erroneous (e.g., Lk. 19:42; Jn. 8:40; 9:41; 15:22, 24; cf. Gen. 31:42). The RSV often translates the Greek phrase with "but in fact" (e.g., 1 Cor. 15:20), "but as it is" (1 Cor. 12:18, 20; He. 9:26), or some similar expression. In Rom. 3:21 the logical antithetical force of "but now" combines with the temporal eschatological meaning of "now"; but the temporal meaning is dominant, as v. 26 shows (Gk. *en tō nýn kairō*; RSV "at the present time").

(4) Frequently "now" expresses more of a situational than a temporal relationship, although an element of time may be involved. In such passages it means "in the present situation" or "as things now stand" (e.g., 1 S. 8:5: "you are old . . . now [Heb. *'attâ*] appoint for us a king"; cf. Gen. 29:32; Acts 15:10). At times it is difficult to determine whether the emphasis is on the temporal or the situational relationship. This ambivalence reflects the basic biblical perspective on time, in which the importance of a unit of time lies rarely in its chronological dimension but rather in what has happened, continues to happen, or will happen within it. E.g., when Paul affirms that "now is the day of salvation" (2 Cor. 6:2), he makes that affirmation in the light of God's recent reconciling work in Christ and the ongoing proclamation of the gospel of reconciliation.

II. Temporal Usage.–Strictly speaking, "now" designates a point in time between the past and the future. Thus it can designate the end of a period, the beginning of a period, or a specific point in time. It can also be extended to specify a duration of time; in the Bible it occurs frequently in this sense with a wide range of meanings.

A. Point in Time. The adverbial phrase "until now" is used frequently to designate the end of a period of time, e.g., a period in a person's life (Gen. 46:34; Heb. *'aḏ-'attâ*), in God's grace (2 K. 13:23), in world history (Mk. 13:19; Gk. *héōs toú nýn* par.), or in a congregation's ministry (Phil. 1:5; *áchri toú nýn*).

"From now on" points to the beginning of a period of time. The RSV occasionally uses this phrase (e.g., Lk. 22:69; Acts 18:6; 2 Cor. 5:16), but usually it translates the Hebrew or Greek phrase (e.g., Heb. *mē'attâ*; Gk. *apó toú nýn, ap' árti*) by an equivalent expression such as "from this time forth" (Isa. 48:6), "henceforth" (e.g., Lk. 1:48; 5:10; Jn. 14:7; Rev. 14:13), or "hereafter" (e.g., Mt. 26:64). These beginning points may represent turning points in the history of redemption (Isa. 48:6; Mt. 26:64 par.), in the life of God's people (e.g., Lk. 5:10; Jn. 14:7; Rev. 14:13), and in the proclamation of the gospel to Gentiles (e.g., Acts 18:6).

Very frequently "now" simply denotes a specified point in time. This use appears in 1 Cor. 16:7: "I do not want to see you now (*árti*) just in passing" (cf. also *nýn* in v. 12; Gal. 3:3; He. 9:5; *nyní* in Philem. 9). Sometimes *árti* is also rendered as "just" (e.g., "My daughter has just died," Mt. 9:18) or "at once" (e.g., "and he will at once send me more than twelve legions of angels," 26:53).

B. Period of Time. In Jude 25 ("before all time and now [*nýn*] and forevermore") "now" probably refers to the whole time span of this present world order. "Now" is used in a variety of ways to refer to a long or short span of time. Where Gk. *nýn* is used as an adjective, the RSV usually translates it "present" (i.e., "the present time"; e.g., Rom. 3:26; 2 Cor. 8:14).

1. Recent Past. Used in this sense the term expresses vividly the close connection between past and present. Cf. Josh. 5:14 ("as the commander of the army of the Lord I have now come") and Acts 7:52 ("whom you have now betrayed and murdered").

2. Imminent Future. This usage appears frequently in the OT, e.g., Gen. 19:9 ("Now we will deal worse with you than with them"); 29:32 ("Surely now my husband will love me"); cf. Ex. 6:1; Isa. 49:19; etc. In the NT there may be a similar use in Phil. 1:20 ("now as always").

3. "Hour" of Jesus. In the Gospel of John "now" sometimes refers to Jesus' "hour," which 13:1 describes as follows: "when Jesus knew that his hour had come to depart out of this world to the Father, having loved his own who were in the world, he loved them to the end" (cf. also 2:4; 7:30; 8:20; 12:23, 27; 17:1). John later substitutes "now" (*nýn*) to refer to this "hour," which evidently includes Jesus' passion, death, resurrection, and ascension. Jesus says: "Now is the Son of man glorified . . ." (Jn. 13:31); "But now I am going to him who sent me" (16:5); "and now, Father, glorify thou me . . ." (17:5); "But now I am coming to thee" (v. 13; cf. 12:27); and "But now my kingdom is from another place" (18:36, NIV). Jesus' "hour" has its repercussions in the kingdom of darkness: "Now is the judgment of this world, now shall the ruler of this world be cast out" (12:31). This use of "now" may also be reflected in He. 9:24: "now to appear in the presence of God on our behalf" (cf. v. 26).

This "now" can also designate the time of Jesus' "hour" in the life of the disciples. Jesus says to them: "Where I am going you cannot follow me now; but you shall follow afterward" (Jn. 13:36; cf. *árti* in vv. 7, 37; 16:12; *nýn* in 14:29; 16:22). It can also indicate a time when the disciples had come to a new understanding through Jesus' proclamation (cf. 17:7; 16:31).

4. Time Between Christ's First and Second Comings. According to Rev. 12:10 the prophet John heard a loud voice in heaven saying: "Now [*árti*] the salvation and the power and the kingdom of God and the authority of his Christ have come, for the accuser of our brethren has been thrown down . . . ," and he "knows that his time is short" (v. 12). Paul affirms in 2 Cor. 6:2: "Behold, now [*nýn*] is the acceptable time; behold, now is the day of salvation." This is so because believers participate in the redeeming work of Christ; for "we are now [*nýn*] justified by his blood" and "reconciled to God by the death of his Son" (Rom. 5:9-11), and "in Christ" believers are "now" (*nýn*) free from condemnation (8:1). Never-

theless, "now" is also the time that believers continue to "live in the flesh" (Gal. 2:20) amid affliction and renewal (cf. 2 Cor. 4:16f.).

a. The Christian and the Present World. Although believers have citizenship already in heaven, they continue to live their lives of faith on earth (cf. Phil. 3:20; Col. 3:5). "Now" can describe three aspects of this present world.

(1) It is created by God and affected by sin. Jesus affirms: "My Father is working still [*héōs árti*, lit. "until now"], and I am working" (Jn. 5:17). This is God's world, but it has been subject to futility and the bondage of decay. Therefore "the whole creation has been groaning in travail together until now [*áchri toú nýn*]" and looks forward in hope to sharing in "the glorious liberty of the children of God" (Rom. 8:19-22). 2 Pet. 3:7 speaks of "the heavens and earth that now [*nýn*] exist" as having been stored up for fire.

(2) It is in bondage to the powers of darkness. Although Christ has come and has begun to rule, "we do not yet [*nýn dé oúpō*] see everything in subjection to him" (He. 2:8). Paul refers to "the prince of the powers of the air" as "the spirit that is now [*nýn*] at work in the sons of disobedience" (Eph. 2:2); this power continues to affect both Jew and Gentile outside of Christ (vv. 1-3). Paul can therefore speak of "the present [*nýn*] Jerusalem" that is in slavery with its children (Gal. 4:25). He also speaks of the Jews who "until today" have a veil over their hearts and do not understand the true meaning of the Torah (2 Cor. 3:14-16), and who are "now" (*nýn*) disobedient (Rom. 11:31; cf. Jn. 8:52; 15:22-24). 1 Jn. 2:9 says that anyone who claims to be in the light but hates his brother "is in the darkness until now [*héōs árti*]." In Lk. 6:25 woe is pronounced upon those who are "full now [*nýn*]" and "laugh now."

(3) It is where the Christian lives. The Christian "still" ("yet" or "now") lives in the old aeon. Paul refers to his life of faith as "the life I now [*nýn*] live in the flesh" (Gal. 2:20). This world is the arena in which salvation is enjoyed, but it is also a threatening situation for the Christian life. Because it is a time of "not seeing" Jesus Christ, "now" (*árti*) is a time of suffering (1 Pet. 1:6, 8). Paul sees this as especially true for the apostles "to the present hour" (*áchri tḗs árti hṓras*, 1 Cor. 4:11-13). It is a time of not yet (*ouk . . . ḗdē*, "not . . . already") having achieved perfection (Phil. 3:12). Furthermore, "now" is the time when the eschatological enemies of Christ's kingdom are "already" at work (cf. 2 Thess. 2:6f.; 1 Jn. 2:18; 4:3).

Yet the Christian in the present world has hope of ultimate victory and redemption, for "the sufferings of the present [*nýn*] time are not worthy to be compared to the glories that shall be revealed in us" (Rom. 8:18; cf. 2 Cor. 4:17–5:4; cf. 1 Pet. 1:6; Col. 1:24). And those who hunger and weep "now" (*nýn*) are blessed, for they shall be satisfied and shall laugh (Lk. 6:21).

b. The Present Time of Salvation in Comparison with the Past. (1) The present time of salvation stands in continuity with the former time. By way of allegory the children of promise of the new covenant correspond to the children of promise of the old (Gal. 4:29: "so it is now"). By way of type and antitype, baptism "now [*nýn*] saves you" in correspondence with God's action in the time of Noah and the Flood (1 Pet. 3:21; cf. He. 12:26: "then . . . now"). There is in this continuity also a "more than" in which the new excels the old (cf. He. 8:6: "But as it is [Gk. *nýn dé*], Christ has obtained a ministry which is as much more excellent than the old as the covenant he mediates is better . . . "; cf. the implied "more than" in 1 Pet. 3:20-22; He. 12:26-28).

(2) The present is a time of new revelation. In describing the gospel as a "mystery," Paul sometimes contrasts the "now" as a time of disclosure with the past as a time of concealment. The once hidden mystery of God (or of Christ) is now revealed (Rom. 16:25f.; Col. 1:26; cf. 2:2; 4:3; Eph. 3:5, 10). That mystery is rooted in Christ, is eschatological, and involved Christ's universal work. In other passages this new revelation is presented as the fulfillment of that to which the OT prophets pointed (1 Pet. 1:12; Lk. 2:29; cf. Eph. 3:5).

c. The "Already" of Salvation as Anticipation of the Future. Greek *ḗdē* is used primarily as an adverb of time meaning "now, already, by this time" (though occasionally it may denote logical proximity; cf. Mt. 5:28; 1 Cor. 6:7). Sometimes it designates the present time as the beginning of a process that has been anticipated for the future. It does not always refer to salvation. It can point to an eschatological error, as when some say that "the resurrection is past already" (2 Tim. 2:18) or think that they are "already filled" and "already rich" (1 Cor. 4:8). Paul expressly denies that he has already achieved the resurrection or been made perfect (Phil. 3:12). Sometimes the term is used of eschatological judgment already in process (Mt. 3:10; Lk. 3:9; esp. Jn. 3:18) and of the negative eschatological forces already at work, namely, the mystery of lawlessness (2 Thess. 2:7) and the spirit of the antichrist (1 Jn. 4:3; cf. 2:18).

But *ḗdē* can also be used in an important way to designate the "already" of eschatological salvation. The true light already shines (1 Jn. 2:8), the eschatological Elijah has already come (Mt. 17:12), those in Christ are already cleansed (Jn. 15:3), the sower already has a reward (4:36; or the alternative interpretation [v. 35]: "the fields are already white for harvest"), and, since salvation is near, it is already time for Christians to awaken from sleep and live as children of day (Rom. 13:11f.).

The present is described not only as a time of already possessing salvation but also as a time of expectation and hope, for in the NT the end time also has a future pole. Since we are now justified and reconciled in Christ, we can "much more" expect to be saved in the future (Rom. 5:9f.). Now we are the children of God, but when He appears "we shall be like him, for we shall see him as he is" (1 Jn. 3:2; cf. 1 Tim. 4:8).

The "now," although already a time of salvation, can therefore be contrasted with the future time when God's eschatological salvation will be enjoyed fully. "For now we see in a mirror dimly, but then face to face. Now I know in part; then I shall understand fully . . ." (1 Cor. 13:12). The fullness of the future that is promised makes pale by comparison the present experience of salvation, rich as it is.

5. "Then" and "Now" of Christian Experience. In a formalized way NT authors frequently contrast what "once" (Gk. *poté* or *tóte*) was true with what "now" (*nýn*) is true in their situation and experience as Christians. 1 Pet. 2:10 sets forth this stark contrast: "Once you were no people but now you are God's people; once you had not received mercy but now you have received mercy." This contrast is based on the work accomplished by Christ (cf., e.g., Col. 1:22; Eph. 2:13; Rom. 5:6-11), but the specific point of comparison lies in the experience of those who have become Christians. The emphasis is on what is now true for Christians and what therefore may appropriately be expected of them. In Eph. 2:11-13 Paul reminds the gentile Christians of the great gift of grace that is now theirs: "Therefore remember that at one time [*poté*] you Gentiles in the flesh . . . were . . . separated from Christ . . . having no hope and without God in the world. But now [*nyní dé*] in Christ Jesus you who were far off have been brought near in the blood of Christ." This gift of salvation involves an imperative: "for once

[*poté*] you were darkness, but now [*nýn dé*] you are light in the Lord; walk as children of light . . ." (5:8). Other important passages that use the "then-now" formula are Rom. 6:19-23; 11:30-32; Gal. 1:23; 4:8-10; Col. 1:21f.; 3:7f.; Philem. 11. Passages that contain part of the formula include Rom. 5:8-11; 7:4-6; 1 Cor. 6:9-11; 2 Cor. 5:15f.; Gal. 2:13; 4:3-7, 29; Col. 2:13-15; 1 Tim. 1:13-16; Tit. 3:3-7.

We have seen, therefore, that a study of the temporal use of "now" sheds light on many aspects of the NT view of past, present, and future. The present time has its own importance in the history of redemption because it fulfils God's earlier redeeming activity. But it is also charged with greater significance and an existential quality because the past work of Christ is the beginning of the eschatological future. Rom. 13:11-14 expresses the eschatological character of the present time as follows: "Besides this you know what hour it is, how it is full time now for you to wake from sleep. For salvation is nearer to us now than when we first believed; the night is far gone, the day is at hand. Let us then cast off the works of darkness and put on the armor of light. . . ."

In Hebrew the verbs *sāpar* (Gen. 15:5) and *mānâ* (Gen. 13:16) are commonly used for enumeration and counting. The derivative *mispār* (Ex. 16:16) is the most common noun for number, although *miḳsâ* (Ex. 12:4) and the Aramaic *minyān* (Ezr. 6:17) also appear with this meaning. The passive participle of *pāqaḏ* is used to designate the number of people counted in a census (Ex. 30:12f.). The LXX translates all these nouns by *arithmós*, which appears eighteen times in the NT (ten times in Revelation; cf. esp. 13:17f.; Jn. 6:10; Acts 4:4). Number as an indefinite count of people is indicated by *óchlos* ("multitude," Mk. 10:46; "company," Acts 1:15). The verb *psēphízō* appears with the meaning count in the sense of enumeration (so RSV "reckon") in Rev. 13:18.

I. Ancient Near Eastern Mathematics.–Biblical numbers and their use were no doubt influenced by the highly developed mathematical systems of Egypt and Mesopotamia. Although roughly equal to Mesopotamian mathematics in antiquity, Egyptian mathematics remained the more primitive and practically oriented, with little interest in mathematical theory. The Egyptians used a cumbersome decimal system that failed to discern that only ten symbols were needed to represent all possible numbers. They were, nevertheless, extremely effective in applying mathematics to practical needs, as witnessed in their building projects; e.g., they came very close to determining the exact value of pi.

In Mesopotamia both a decimal system, drawn from Semitic practice, and a sexagesimal system, introduced by the Sumerians, were known from very early times. The two blend together well, and the modern use of numbers still preserves elements of the sexagesimal system (divisions of time, degrees of a circle, a dozen). The Mesopotamians put mathematics to effective practical use, as evidenced by their building achievements and many extant business documents, but they were also interested in more theoretical mathematics. They could find square roots, knew the Pythagorean theorem, and developed basic principles of geometry and algebra. They influenced later Greek and thus modern mathematics and contributed much to the development of astronomy as a science.

II. Terminology and Signs.–The Hebrew OT and usually the Greek NT express numbers by words. The OT has words for each of the units, the tens, one hundred, two hundred, one thousand, two thousand, ten thousand, and twenty thousand. Both the Moabite Stone and the Siloam Inscription use words to express numbers, but the Samaria ostraca and the Lachish Letters provide some evidence for the existence of arithmetic figures. The Aramaic Elephantine papyri use figures (vertical lines for units and horizontal for tens), as do administrative documents from Ugarit and some Phoenician inscriptions. Thus Israel probably represented numerals with figures as well as words during the biblical period.

As early as Maccabean times (as indicated on coins) the Jews used the letters of the alphabet for numerical signs. Units were represented by the first nine letters, tens by the next nine letters, and one hundred to four hundred by the last four letters. The numbers fifteen and sixteen, however, were made by combining *ṭeth* (9) and *waw* (6) and *ṭeth* and *zayin* (7), respectively, since the letters *yod* (10) and *he* (5) or *yodh* and *waw* are shortened forms of the divine name Yahweh. The system of alphabetic notation still commonly denotes chapters and verses in the Hebrew Bible. The Greeks had a similar system of alphabetic notation, of which examples appear in the NT, e.g., the number for the beast in Rev. 13:18. (See the chart below for a view of these systems in Hebrew and Greek.)

Hebrew also has words for many of the ordinal numbers (first, second, etc.), and words for some simple fractions,

TABLE OF ALPHABETIC NOTATION OF NUMERALS

	Hebrew	Greek		Hebrew	Greek
1	א	A	60	ס	Ξ
2	ב	B	70	ע	O
3	ג	Γ	80	פ	Π
4	ד	Δ	90	צ	Ϙ
5	ה	E	100	ק	P
6	ו	F	200	ר	Σ
7	ז	Z	300	ש	T
8	ח	H	400	ת	Y
9	ט	Θ	500	תק	Φ
10	י	I	600	תר	X
20	כ	K	700	תש	Ψ
30	ל	Λ	800	תת	Ω
40	מ	M	900	תתק	Ϡ
50	נ	N	1000	א	/A

e.g., one-third in Isa. 40:12. Certain words for parts of the body were used in biblical Hebrew to denote fractions or multiplication and sometimes both. *Yād*, "hand," indicates a fractional part in Gen. 47:24 ("four-fifths shall be your own"), but shows multiplication in 43:34 ("five times as much"). *Regel*, "foot," indicates multiplication in Nu. 22:28 ("three times"), and *peh*, "mouth" shows a fraction in Zec. 13:8 ("two-thirds shall be cut off"), but multiplication in Dt. 21:17 ("a double portion of all that he has"). The idiom *pî šᵉnayim*, "mouth of two," originally meant two-thirds but came to mean twice as much (2 K. 2:9). *Rō'š*, "head," sometimes means total or sum (Nu. 1:2).

III. Basic Arithmetic.–Simple enumeration accounts for most of the biblical references to numbers. Numbers range in size from one to 100,000,000 in the OT (Dnl. 7:10, "ten thousand times ten thousand stood before him") and 200,000,000 in the NT (Rev. 9:16, "twice ten thousand times ten thousand"). The highest number represented by one word is twenty thousand, *ribbōṭayim* (Ps. 68:17 [MT 18]). The Bible has no mathematical concept of infinity but does recognize numbers beyond the human capability for counting: Gen. 41:49, "he ceased to measure it, for it could not be measured"; Rev. 7:9, "a great multitude which no man could number."

Fractions were known and used in biblical times. There are separate Hebrew words for the fractions from a half to a fifth and for a tenth. One-tenth appears with special frequency in the Bible because of the importance of tithing in the biblical communities (Ex. 16:36; Nu. 18:26, 28; He. 7:1-10). It is also much used because of the decimal system of Hebrew mathematics, as were other decimal based fractions: two-tenths (Lev. 23:13), three-tenths (Lev. 14:10), and one-hundredth (Neh. 5:11). The fraction one-third appears fourteen times in Revelation where it always refers to one of three parts which was to be destroyed (Rev. 8). Other examples of biblical use of fractions include one-third (2 S. 18:2), one-half (Ex. 25:10, 17), one-fourth (1 S. 9:8), one-fifth (Gen. 47:24), and one-sixth (Ezk. 46:14).

Complementary fractions (the numerator is one less than the denominator) are frequently expressed in an indefinite manner reflecting Egyptian and Mesopotamian influence. Examples are: two-thirds expressed as a "double portion" (Dt. 21:17; 2 K. 2:9), four-fifths as "four parts" (Gen. 47:24), and nine-tenths as "nine parts" (Neh. 11:1).

The OT uses fractions only to designate portions of some larger whole, not in mathematical calculations. The Hebrews, like other ancient peoples, did not know how to convert mixed fractions to a common denominator. In the NT fractions are still used only in the simple manner known in the OT, although more sophisticated mathematical uses might have been available from Hellenistic culture.

The four basic arithmetical operations can be illustrated from the biblical material: addition (Gen. 5:3-31; Nu. 1:20-46), subtraction (Gen. 18:28-33; Lev. 27:18), multiplication (Lev. 25:8; Nu. 3:46-50), and division (Nu. 31:27-30). More complex mathematical operations are implied in Lev. 25:50; 27:18, 23.

Although Egyptian and Babylonian mathematics (and later Greek mathematics) were surely known widely in biblical times, the Bible shows little interest in complex mathematical operations and virtually no interest in mathematical theory. Its mathematics are of the simplest and most practical sort. The dimensions of the molten sea in Solomon's temple in (1 K. 7:23) indicate that the Hebrews still thought of the circumference of a circle as three times the diameter. This continued to be the reckoning in the time of the Mishnah (*Erubin* i.5).

IV. Literary Use of Numbers.–Numbers in the Bible do not always indicate exact totals or mathematical operations. They sometimes have literary (rhetorical) or symbolic uses. (For symbolic uses see V below.) Most of the literary and many of the symbolic uses discussed here have parallels elsewhere in the literature of the ancient Near East, particularly in Ugaritic literature (on the use of the numerical saying in Ugaritic and the OT see G. Sauer, *Die Sprüche Agurs* [1963]; Roth).

It is often difficult to tell whether the Bible intends a definite or an approximate number. In Hebrew the word for one (*'eḥāḏ*, fem. *'aḥaṯ*) is sometimes used to express the indefinite article (1 K. 13:11) or to mean "anyone, any one" (Lev. 4:2, 13, 22, 27; 2 S. 7:7). The number two is often used to mean "a few" (Nu. 9:22; 1 K. 17:12). Even more commonly the number three means simply a small number (Ex. 2:2; 10:22; Josh. 1:11; 1 K. 12:5; 2 K. 11:5; Isa. 16:14; Dnl. 1:5).

A sequence of two consecutive small numbers sometimes stresses the indefinite character of a number, e.g., "a day or two" (Ex. 21:21, "God speaks in one way, and in two" (Job 33:14). One and two also appear in sequence in 2 K. 6:10; Sir. 38:17; examples of two and three are Isa. 17:6; Hos. 6:2; Mt. 18:20. Both these pairs seem to indicate fewness. Of particular interest is the numerical saying, which often has the form "x... x + 1..." (e.g., Prov. 6:16-19; cf. Dt. 32:30; Ps. 62:11 [MT 12]; Jer. 3:14; etc.). This device is common in Ugaritic literature as well (e.g., *UT*, 51:III:17-21; 1 Aqht 42-44; Krt 7-9, 16-20, 83f., 94f.). See Roth, p. 6, for a detailed analysis and explanation. Three and four appear together eight times in Am. 1:1–2:6, where they must indicate "several," since the number of sins listed for each nation is neither three nor four. A slightly different use of this pair is seen in Prov. 30:15-29, where the intent seems to be to emphasize the higher number, for a listing of four things follows the formula. Other pairs are four and five (Isa. 17:6), five and six (2 K. 13:19), six and seven (Job 5:19), seven and eight (Mic. 5:5), nine and ten (Sir. 25:7).

Two of the best known uses of approximate numbers appear in covenantal contexts: "visiting the iniquity of the fathers upon the children to the third and fourth generation of those who hate me, but showing steadfast love to thousands of those who love me . . . "(Ex. 20:5f.; cf. also Dt. 5:9f.; 7:9).

The Bible and other ancient literature commonly use round numbers to indicate approximate, traditional, or hyperbolic rather than exact sums. The number one thousand and its multiples are often rounded to signify a large amount and may often be hyperbolic (Lev. 26:8; 1 S. 18:7; Rev. 5:11). The failure to recognize this use has led to difficulties for those who take the numbers as exact sums. The census figures of Nu. 1 and 26 imply a population of two to three million, a figure that does not tally well with the notion that the Hebrews were "the fewest of all peoples" (Dt. 7:7), or that they were overwhelmed in numbers by the Canaanite cities they encountered on entry into the land. Large numbers for armies and the fallen in battle are also problematic. In 2 Ch. 17:12-19 Jehoshaphat's army consists of five divisions numbering 300,000, 280,000, 200,000, 200,000, 180,000, respectively. In 1 K. 20:29 a small army of Israelites is said to have killed 100,000 Syrians in one day.

The Heb. *'elep* ("thousand") may originally have meant "tribe," "clan," or "group," and did not necessarily indicate a group of exactly one thousand members (see N. Gottwald, *Tribes of Yahweh* [1979], pp. 269-284). Jgs. 6:15 clearly uses *'elep* in this way, and the use of the term for a

military unit does not seem to mean the unit has a thousand members (Ex. 18:21; Dt. 33:17). W. F. Petrie (*Researches in Sinai* [1906]) first used this meaning to interpret the census lists in Nu. 1 and 26 as indications of families or tribal subgroups, thus allowing the more reasonable totals of 5550 and 5730 fighting men.

The plausible suggestion has also been made (see the articles by Clark and Wenham) that in many instances *'elep*, "thousand," is to be repointed *'allûp*, "officer" or "warrior." Such a revocalization would make sense of seemingly inflated numbers for armies or slain soldiers, and accords well with the practice of ancient times for mighty men to do much of the fighting (as with Goliath, 1 S. 17).

The most frequently used round number in the Bible is forty (Heb. *'arbā'îm*, Gk. *tessarákonta*), which has the sense of a relatively long period of time and more specifically is the traditional number of years in a generation. In the forty years that Israel spent in the wilderness the old generation died out and was replaced by the new (Ex. 16:35; Nu. 14:33f.; 32:13). A sense of completeness or maturity is attached to the number (perhaps because it is the product of four times ten). A man was considered to reach full adulthood at forty (Josh. 14:7; 2 S. 2:10; Acts 7:23). In the Koran (*Sura* 46) a man is said to attain his strength at forty years, and according to tradition Muhammad came forward as a prophet at that age. Isaac and Esau married at forty (Gen. 25:20; 26:34). Moses' life was divided into three periods of forty years (Ex. 7:7; Dt. 34:7; Acts 7:23, 30, 36). Eli (1 S. 4:18), Saul (Acts 13:21), David (1 K. 2:11), Solomon (1 K. 11:42), and Jehoash (2 K. 12:1) all reigned for forty years. Periods of rest (Jgs. 3:11; 5:31; 8:28) and oppression (13:1) in the time of the judges commonly lasted forty years.

Forty days was a typical period of time for ritual observances: the fasting of Moses (Ex. 34:28), Elijah (1 K. 19:8), and Jesus (Mt. 4:2 par.); Moses' stay on Mt. Sinai (Ex. 24:18; cf. Dt. 9:9). The Flood lasted forty days (Gen. 7:4); the challenge of Goliath was forty days (1 S. 17:16). Jonah proclaimed, "Yet forty days, and Nineveh shall be overthrown" (Jonah 3:4), and there were forty days between the Resurrection and the Ascension (Acts 1:3). The abundant occurrences of the number forty indicate that it was used as a rounded rather than an exact figure.

V. Symbolic Use of Numbers.–Numbers in the Bible and other ancient literature often have symbolic or cultic meaning. Many of these have uses that are simultaneously literal and symbolic in meaning.

A. One (Heb. *'eḥād*; Gk. *heís*). The number one naturally suggests unity. Thus it is basic to the concept of monotheism (Dt. 6:4, "The Lord our God, the Lord is One"; cf. also Wisd. 7:27; Mk. 12:32; 1 Cor. 8:6) and to the concept of human unity (Acts 17:26, "He made from one every nation"). Sin was brought into the world by one man, Adam (Rom. 5:12), but the gift of redeeming grace also by one man, Jesus Christ (v. 15). Jesus is one with the Father (Jn. 10:30).

The Church is one as the "body of Christ" (1 Cor. 12:12-14), thus one in unity with God, Christ, and each other (Jn. 17:21; Gal. 3:28). The unity expressed by the number one is central to the concept of the Church; "There is one body and one Spirit, just as you were called to the one hope that belongs to your call, one Lord, one faith, one baptism, one God and Father of us all..." (Eph. 4:4-6). In the Judeo-Christian tradition one also symbolizes the unity in marriage ("And the two shall become one flesh," Gen. 2:24; cf. Mt. 19:5; Eph. 5:31).

B. Two (Heb. *šᵉnayim*; Gk. *dýo*). This number is associated both with unity and with division or contrast. Examples of division are the alternatives implied in Elijah's taunt, "How long will you go limping with two different opinions?" (1 K. 18:21). There are the "two ways" of Mt. 7:13f. (cf. Mt.6:24; 21:28-32). In Rev. 1:16 a two-edged sword comes forth from the mouth of the risen Christ. The sword is often associated with the "word of God" (Eph. 6:17; He. 4:12; Rev. 19:13, 15), and in this instance seems to imply the double aspect of God's word proceeding from Christ, as both judging and redeeming word.

As a symbol of unity, two describes the unity of man and woman (Gen. 2:20, 24), the pairs of animals entering the ark (7:8f.), the two tablets of the law at Mt. Sinai (Ex. 32:15), and the pairs of disciples sent out by Christ (Mk. 6:7; Lk. 10:1). In Gen. 22:6, 8 Abraham and Isaac went "both of them together" in a poignant reference to their unity in spite of the coming sacrifice. A separate and common use of the number two arises out of the Hebrew legal tradition that there must be two witnesses to constitute adequate evidence in a court proceeding (Nu. 35:30; Dt. 17:6; 19:15). Thus two is the number associated with the theme of witness. In Jn. 8:17f. Jesus appeals to this rule of evidence and claims Himself and the Father as witnesses to His own authority. Several other NT references indicate this need for two witnesses (Mt. 18:16; 2 Cor. 13:1; 1 Tim. 5:19). The two unnamed witnesses in Rev. 11:3-12 seem to represent the Law and the Prophets and are probably intended to recall Moses and Elijah.

C. Three (Heb. *šālōš*; Gk. *treís*). Three was a common sacred number in the ancient Near East. As the number most distinctly marked with a beginning, middle, and end it seems to have been regarded as symbolic of a complete and ordered whole. Triads of gods are known from Egypt and Mesopotamia. The universe was in three parts: heaven, earth, and netherworld. Families consisted of three parts: father, mother, and child. It is not surprising that the number three in the Bible is second only to seven in the frequency of its symbolic use, although distinguishing exact from symbolic use is sometimes difficult.

Persons, things, or acts are often three in number: Noah's three sons (Gen. 6:10). Abraham's guests (18:2), Job's daughters (Job 1:2; 42:13) and friends (2:11), measures of meal (Gen. 18:6; Mt. 13:33), military companies (Jgs. 7:16, 20; 9:43; 1 S. 11:11; 13:17; Job 1:17), great cultic feasts (Ex. 23:14), night watches (Jgs. 7:19), daily prayers (Ps. 55:17 [MT 18]; Dnl. 6:10 [MT 11]), the threefold call of Samuel (1 S. 3:8), the three times Elijah stretched himself over the widow's child (1 K. 17:21), the keepers of the temple threshold (Jer. 52:24), the temptations of Jesus (Mt. 4:3ff. par.), His prayers in Gethsemane (Mt. 26:39, 42, 44 and par.), Peter's denials (Mt. 26:34, 75 par.), his threefold vision of the sheet (Acts 10:16), and Paul's triad of faith, hope, and love (1 Cor. 13:13).

Three is common in designating significant lengths of time, such as three days, three weeks, three months, or three years (Gen. 40:12f., 18; Ex. 2:2; 10:22; 2 S. 24:13; Isa. 20:3; Jonah 1:17; Mt. 15:32; Lk. 2:46; 13:7; Acts 9:9; 2 Cor. 12:8). Of greatest significance in Christian theology is reference to the Resurrection "on the third day" or "after three days' (Mt. 12:40; Jn. 2:19; 1 Cor. 15:4).

Other important uses of three are triple groupings in which the number itself is not mentioned: the threefold benediction of Israel (Nu. 6:24-26), the three cries of "holy" by the seraphim (Isa. 6:3; cf. Rev. 4:8), the trinitarian formula in Mt. 28:19; 2 Cor. 13:14. A threefold repetition of something not only has symbolic meaning but also is a method of expressing the superlative (e.g., Isa. 6:3).

D. Four (Heb. *'arba'*; Gk. *téssares*). Four is a sacred and symbolic number in most ancient cultures de-

rived from the four points of the compass and from the square as the simplest plane figure. The number four is used most frequently as the symbol for comprehensive extent or completeness. In Babylonian mythology four figures of the Zodiac support the four corners of the firmament (Aquarius, Scorpio, Leo, Taurus). As early as the middle of the 3rd millennium B.C. Babylonian rulers assumed the title of "king of the four quarters," meaning the entire earth in all directions. This use of four to indicate the entire earth or universe is also common in the Bible. There is mention of the four winds (Jer. 49:36; Ezk. 37:9; Mt. 24:31), the four quarters or corners of the earth (Isa. 11:12; Ezk. 7:2; Rev. 20:8), the four rivers of Eden (Gen. 2:10-14), and the four corners in Peter's vision of the great sheet (Acts 10:11; 11:5).

There are four letters in the Hebrew spelling of the divine name Yahweh (*YHWH*), which is thus called the tetragrammaton. Four is common in reference to sacred precincts and their furnishing (Ex. 25–27; 1 K. 7:5, 19, 27, 30, 34, 38; Ezk. 41–43). There are the four horns, smiths, chariots, and horses in the visions of Zechariah (1:8 [LXX], 18ff.; 6:1ff.), four punishments (Jer. 15:3; Ezk. 14:21); four kingdoms in Nebuchadrezzar's dream (Dnl. 2:37ff.) and Daniel's vision (7:3, 17); four creatures transporting and guarding God's throne (Ezk. 1:1-26; 10:9-14, 21; Rev. 4:6f.; 5:6, 8, 14; 6:1; 15:7; 19:4). As shown by the location of the references above, four is an especially important number in apocalyptic literature.

Forty as a multiple of four is of great significance in the Bible (see IV above). Four hundred (Gen. 15:13) and four thousand (1 S. 4:2; Mt. 15:38; Acts 21:38) also appear as common round numbers. Forty thousand is a frequent round number for a great multitude (Josh. 4:13; 1 K. 4:26; 1 Macc. 12:41; 2 Macc. 5:14).

E. Five (Heb. *ḥāmēš;* Gk. *pénte*). The use of a decimal system makes five a common round number, and it need not have great symbolic significance. There are five books of the Law of Moses (Pentateuch); the book of Psalms is divided into five books; Canticles, Ruth, Lamentations, Ecclesiastes, and Esther are designated the Five Scrolls or Megilloth; and there are five sections of Jesus' teachings in the Gospel of Matthew. Five is common in legal penalties (Ex. 22:1 [MT 21:37]; Nu. 18:16), multiples of five are used for measurements (Ezk. 40:15) and administrative divisions (Ex. 18:21; Dt. 1:15). There are fifty days in the Feast of Weeks (Lev. 23:16) and fifty years in the Jubilee (Lev. 25:10f.), but these may be the square of the sacred number seven plus one. The woman at the well had five husbands (Jn. 4:18); Jesus fed the five thousand with five loaves (Mt. 14:17-21); there were five wise and five foolish virgins (Mt. 25:2).

F. Seven (Heb. *šeḇaʿ*; Gk. *heptá*). The number seven is the most significant symbolic number in the Bible, appearing in some manner in almost six hundred passages. It was a sacred number in virtually all the ancient Semitic cultures. Some attribute its importance to the worship of seven heavenly bodies: sun, moon, and five known planets. Others suggest, more probably, that it reflects the division of the lunar month into four seven-day weeks. In the OT the week has seven days with the seventh being the sabbath (Gen. 2:2f.). Seven is also important because it is the sum of two other numbers with sacred and symbolic importance, three and four.

Seven is very prominent in passages dealing with ritual observance and oath taking. Indeed, the Hebrew number seven (*šeḇaʿ*) and the verb "swear, take an oath" (*šāḇaʿ*) are etymologically related. Examples of the ritual importance of seven are: the number of lambs that confirmed an oath (Gen. 21:29f.), of Balaam's bulls, rams, and altars (Nu. 23:1, 14, 29), and of lambs for festal offering (28:11, 19, 27); the structure of sacred objects, such as the candlestick (Ex. 25:31-37; Zec. 4:2), temple furnishings (1 K. 7:17), the temple steps (Ezk. 40:22), and the width of the temple entrance (41:3). The consecration of priests (Ex. 29:30, 35, 37), the Feast of Unleavened Bread (34:18), seclusion for uncleanness (Lev. 12:2; etc.), the period before circumcision of a newborn (v. 3), and the Feast of Tabernacles (23:34) all lasted seven days. God promised sevenfold vengeance upon the slayer of Cain (Gen. 4:15); there was sevenfold sprinkling of blood in the ritual for the Day of Atonement (Lev. 16:14, 19), and sevenfold sprinkling or bathing for lepers (Lev. 14:7, 16, 27, 51; 2 K. 5:10, Naaman). The sabbath day and the sabbatical year were both the seventh.

Although in some instances the number seven may be meant literally, its symbolic significance is not far beneath the surface. Jacob served seven years for Rachel (Gen. 29:20) and bowed down seven times to Esau (33:3). There were seven years of plenty and seven of famine in Pharaoh's dream (Gen. 41:53f.). The Israelites marched seven days with seven priests blowing seven trumpets at Jericho (Josh. 6:8ff.). Samson had a seven-day marriage feast (Jgs. 14:12) and seven locks of hair (16:19) and was bound with seven bowstrings (v. 7). Jethro had seven daughters (Ex. 2:16) and Job seven sons and seven daughters (Job 1:2). Jesse (1 S. 16:10), Saul (2 S. 21:6), and Sceva (Acts 19:4) had seven sons. Elijah's servant ascended seven times to the top of Carmel (1 K. 18:43f.); Nebuchadrezzar had the furnace made seven times hotter (Dnl. 3:19) and was mad for seven times or years (Dnl. 4:16, 23, 25, 32). Anna enjoyed seven years of wedded life (Lk. 2:36). There were seven loaves for the four thousand, and seven baskets of fragments (Mt. 15:34-37 par.). There were seven demons cast out of Mary Magdalene (Lk. 8:2), and seven ministers of the church at Jerusalem (Acts 6:3ff.).

Seven is an especially prominent number in apocalyptic literature, e.g., in 1 and 2 Enoch and 2 Esdras, although it is curiously absent in the apocalyptic portions of Daniel. It is amazingly frequent in the book of Revelation: seven churches (1:4); seven golden candlesticks (v. 12); seven stars (v. 16); seven angels (v. 20); seven lamps of fire (4:5); seven spirits of God (1:4; 3:1; 4:5); a book with seven seals (5:1); a lamb with seven horns and seven eyes (v. 6); seven angels with seven trumpets (8:2); a dragon (12:3) and a beast (13:1) with seven heads; seven last plagues (15:1); and seven golden bowls (v. 7).

The Bible also has many examples, too numerous to mention, of sevenfold groupings in which the number seven is not explicitly employed.

Several multiples of seven are important. Seventy is the natural human life span (Ps. 90:10; Isa. 23:15). There were thought to be seventy nations on the earth (Gen. 10; 1 En. 89:59f.). This concept is involved in the translation of the Hebrew Bible into Greek for the seventy nations of the world, completed in legend in seventy days by seventy scholars and called the Septuagint (LXX) (cf. the Letter of Aristeas). The seventy disciples are probably to be seen as sent to the seventy nations (Lk. 10). We are to forgive seventy times seven (Mt. 18:22)). The genealogy of Jesus in Mt. 1 is organized into three groups of fourteen generations (v.17).

G. Six (Heb. *šēš*; Gk. *héx*), *Eight* (Heb. *šᵉmōneh*; Gk. *oktō*), *Nine* (Heb. *tēšaʿ*; Gk. *ennéa*). These numbers do not seem to play any great symbolic role in the Bible. Their importance seems to derive from their position before or after a significant sacred number (seven or ten).

The world is created in six days, with humanity created

on the sixth day (Gen. 1), the sabbath coming on the seventh (2:1-3). Hebrew slaves are to work for six years and be freed in the seventh (Ex. 21:2). There are six steps to the throne in Solomon's temple, but this is to provide for the symbolically more important twelve lions (1 K. 10:19f.).

Male children were circumcised on the eighth day (Gen. 17:12; Lev. 12:3; Lk. 1:59; 2:21; Phil. 3:5). The eighth day for the cleansing of a Nazirite (Nu. 6:10) and for the final assembly of the Feast of the Tabernacles (Lev. 23:36) is the day after a sacred period of seven days. 1 Pet. 3:20 notes that eight people were saved in the ark of Noah; Justin interpreted this allegorically (*Dial.* 138.1) to represent the eighth day of resurrection.

Nine lepers out of the ten healed failed to return for thanks (Lk. 17:17). The ninety-nine are significant as one less than a hundred (Mt. 18:12; Lk. 15:4).

H. Ten (Heb. *ʿeśer*; Gk. *déka*). Ten derives its main significance from being the basis of the decimal system, which no doubt derives from simple calculations on the fingers. Ten is thus a convenient rounded figure for an amount greater than a few. The most important uses of ten in the OT are the Ten Commandments or Decalogue (Ex. 20:2-17; Dt. 5:6-21) and the tithe (Gen. 14:20; Nu. 18:21, 26; Dt. 26:12).

Furnishings of the tabernacle or temple are often measured in ten or its multiples (Ex. 26; 1 K. 6–7; 2 Ch. 4; Ezk. 45). Ten righteous men would have saved Sodom (Gen. 18:32). There were also ten antediluvian patriarchs (Gen. 5), ten postdiluvian patriarchs (Gen. 11:10-30), ten plagues against Egypt (Ex. 7:8–11:10), ten testings of the Lord in the wilderness (Nu. 14:22), ten elders who accompanied Boaz (Ruth 4:2), ten temptations of Abraham (Jub. 19:8), ten virgins in the parable (Mt. 25:1), ten pieces of silver (Lk. 15:8).

The book of Revelation has a special interest in the number ten. Ten days of tribulation are predicted for the church at Smyrna (2:10), a red dragon and a beast with seven heads and ten horns (12:3; 13:1; 17:3, 7, 12, 16; cf. Dnl. 7:24), ten royal diadems (Rev. 13:1), and ten kings (17:12).

Ten played a prominent role in later Jewish life and practice. The tetragrammaton was uttered by the high priest ten times on the Day of Atonement. Ten persons constitute a congregation in the synagogue and must be present at a nuptial blessings. A row of comforters of the bereaved numbered ten.

I. Twelve (Heb. *šᵉnêm ʿāśār*; Gk. *dṓdeka*). In Mesopotamian cultures twelve was significant because of the twelve months in the lunar year, the twelve signs of the Zodiac, and the Sumerian sexagesimal numerical system. These factors may account for the importance of twelve in the Bible, since many scholars relate the number of Israel's tribes to the months of the lunar year and tribal responsibilities at the central sanctuary. Even if this was the original significance of the number twelve, its further significance in the Bible is based almost entirely on the fact that there were twelve tribes of Israel. The twelve tribes are surely reflected in the twelve pillars set up by Moses (Ex. 24:4), the jewels in the high priest's breastplate (28:11), twelve cakes of bread (Lev. 24:5), twelve spies (Nu. 13), twelve rods (17:2), twelve stones in the Jordan (Josh. 4:9), twelve officers of Solomon (1 K. 4:7), and the twelve stones in Elijah's altar (18:31).

Even in the NT the twelve apostles surely reflect the tribes of Israel (Mt. 10:1-5 par.). Paul, before Agrippa, asserts membership in the twelve tribes and claims the promises given them (Acts 26:7). The common use of twelve in the book of Revelation is also rooted, most probably, in the twelve tribes (Rev. 7:4-8; 12:1; 21:12, 14, 16, 21; 22:2). The number is associated with the completeness of divine election applied first to Israel and later to the Church as the New Israel. It derives some significance from being the product of the sacred numbers three and four. Philo called it a perfect number.

J. One Thousand (Heb. *ʾelep*; Gk. *chiliás* and *chílioi*). In the OT the number one thousand and its multiples are often used as a rounded or hyperbolic number for a large amount (already discussed in IV above). One thousand (or the plural thousands) is often used for numbers beyond counting. God shows steadfast love to thousands of those who love Him and keep his commandments (Ex. 20:6; Dt. 5:10; 7:9; Jer. 32:18). God's power is like "thousands upon thousands" of chariots (Ps. 68:17 [MT 18]). "A day in thy courts is better than a thousand elsewhere" (Ps. 84:10 [MT 11]). The difference between the divine and the human time scales is expressed in Ps. 90:4 (alluded to in 2 Pet. 3:8): "For a thousand years in thy sight are but as yesterday when it is past, or as a watch in the night."

The NT uses multiples of one thousand frequently. There were two thousand Gerasene swine (Mk. 5:13); five thousand were fed by Jesus on one occasion (Mt. 14:21 par.) and four thousand on another (Mt. 15:38 par.); three thousand were converted at Pentecost (Acts 2:41); five thousand believed the word (Acts 4:4). Paul mentions the seven thousand who did not bow the knee to Baal in the time of Elijah (Rom. 11:4; 1 K. 19:18), and the twenty-three thousand who died for their idolatry in the wilderness (1 Cor. 10:8; Nu. 25:1-18).

The book of Revelation makes frequent use of the number one thousand and its multiples. The heavenly hosts who praise God number "myriads of myriads and thousands of thousands "(5:11; cf. Dnl. 7:10). The number of the sealed is one hundred and forty-four thousand, twelve thousand out of each of the twelve tribes of Israel (Rev. 7:4-8; 14:1-3). A time of one thousand two hundred and sixty days (= 3½ years?) is mentioned in 11:3 and 12:6. At the end of that time seven thousand will perish in an earthquake (11:13).

Six references to a period of a thousand years occur in Rev. 20:2-7. This is the period for which Satan is bound and after which will come the final conflict, the vanquishing of evil forces, and the establishment of God's kingdom. Already in the early Church this passage had given rise to the concept of a MILLENNIUM (Latin *mille*, "thousand" and *annus*, "year") as a thousand-year kingdom without evil prior to the end of history. It is attested in Barn. 15:3-9; Irenaeus *Adv. haer.* v.32-36; Justin *Dial.* 81; Tertullian *Adv. Marc.* 3.24; 4.31, but it is rejected by Origen *De prin.* 2.11.2 and Augustine *Civ. Dei* 20.7.

VI. Gematria.–This peculiar form of numerology was used for the interpretation of the Scriptures in later Judaism and adopted by some early Christians. The word itself is a Hebraized form of the Gk. *geōmetría*, used to mean "reckoning by numbers." The method employed the numerical values of the letters of the alphabet to find hidden meaning in scriptural passages (see the chart above). Only traces of the method can be found in the OT, but examples are more common in the Talmud and Midrashim, and the Cabalistic literature carries the unlimited possibilities of this method to incredible extremes. Rabbi Eliezer ben Yose the Galilean (*ca.* A.D. 130-160) listed gematria as the twenty-ninth of his thirty-two hermeneutical rules (*Sepher Kerithuth*).

Perhaps the best known of the possible examples of gematria in the OT is Gen. 14:14, in which 318, given as the number of Abraham's trained servants, equals the sum of the numerical equivalents for the Hebrew letter in the name Eliezer (אליעזר: 1 + 30 + 10 + 70 + 7 + 200). It is obvious that any desired meaning can be obtained simply by

manipulating the letters of some scriptural passage. Unfortunately some still claim legitimacy for this interpretative method.

The only clear example of a biblical writer's use of gematria is the mysterious number of the beast, 666, or 616 in variant readings (Rev. 13:18). Most scholars are inclined to believe that these numbers represent a name whose letters add up to one of these numbers. The most likely name seems to be Nero Caesar, which because of two possible spellings can add up to either 616 or 666.

NUMBERS, BOOK OF. The fourth book in the Pentateuch.

I. Introduction
  A. Title
  B. Outline
  C. Pentateuchal Context
  D. Sources, Composition, Author, Date
  E. Literary Structure
II. Theological Message
  A. Character of the People
  B. Character of God
  C. Importance of Cult and Ritual
  D. Recognition of the Authority of God's Chosen Leaders
  E. Gift of the Land
III. Special Problems
IV. Balaam Oracles
  A. Analysis
  B. Inscription from Tell Deir ʿallā
V. NT

I. Introduction.–*A. Title.* The English title is a translation of the Vulgate title, *Numeri*, which in turn is a translation (not transliteration) of the LXX title, *Arithmoi*. Several names were given to the book in Hebrew manuscripts. In modern Hebrew Bibles the title is the fourth major word in the first verse, *bᵉmiḏbār*, "in the wilderness." Another title used often is *wayᵉḏabbēr*, "and he [Yahweh] said," the first word in the MT. The LXX, Vulgate, and English titles were not well chosen, for they focus too heavily on the census lists of chs. 1 and 26 and the frequent occurrence of numbers elsewhere in the book. The Hebrew title *bᵉmiḏbār* is more suitable, for it indicates the geographical locale of most of the significant events that happened to Israel.

B. Outline. Numbers is a dynamic book permeated by a sense of movement. Its structure is discernible, though more difficult to demonstrate than the structure of some other OT books. The outline below attempts to show one viable way that the contents may be analyzed.

I. Preparations for Leaving (1:1–10:10)
  A. Israel and Tabernacle Arrangements (1:1–6:27)
    1. Census of Israel's Military Men (1:1–46)
    2. Arrangement of Israel Around the Tabernacle (1:47–2:34)
    3. Census, Placement, and Duties of Levites (3:1–4:49)
    4. Instructions to Keep the Camp Holy and Undefiled (5:1–6:21)
    5. Aaronic Benediction (6:22-27)
  B. Dedicatory Offerings and Consecration of Levites (7:1–8:26)
    1. Dedication of Altar (7:1-89)
    2. Consecration of Levites and Care of Lampstands (8:1-26)
  C. First Passover Kept (9:1-14)
  D. Preview and Anticipation of Leaving Sinai (9:15–10:10)
II. Israel's Wilderness Experiences (10:11–20:21)
  A. Events Before Kadesh (10:11–12:15)
    1. Tribes Set out from Sinai (10:11-36)
    2. People's Murmuring and Craving; God's Response (11:1-35)
    3. Moses' Uniqueness Challenged: Miriam and Aaron (12:1-15)
  B. Events Around Kadesh Highlighted (12:16–20:21)
    1. Unbelief and Evil Report of the Spies (12:16–13:33)
    2. Murmuring Against Moses and Aaron; God's Mercy and Judgment (14:1-38)
    3. God's Judgment; Israel's Arrogance and Chagrin Before Canaanites (14:39-45)
    4. Supplemental Legislation Pointing to Settlement in Canaan (15:1-41)
    5. Moses' Authority and Position Challenged: Korah, Dathan, Abiram (16:1-50 [MT 16:1–17:15])
    6. Aaron's Rod (17:1-13 [MT 16-28])
    7. Priestly and Levitical Duties Placed on Aaron and Sons (18:1-32)
    8. Purification of Person Defiled by a Corpse (19:1-22)
    9. Death of Miriam and Rebellion of Moses and Aaron (20:1-13)
    10. Edom Opposes Israel's Departure from Kadesh (20:14-21)
III. Israel's Experiences Approaching Canaan (20:22–36:13)
  A. Events Before Plains of Moab (20:22–21:35)
    1. Death of Aaron at Mt. Hor (20:22-29)
    2. Defeat of Canaanites at Hormah (21:1-3)
    3. People's Rebellion Against Moses and Aaron; Fiery Serpents (21:4-9)
    4. Journey to Bashan: Defeat of Sihon, Amorites, Og (21:10-35)
  B. Events in the Area of Moab (22:1–36:13)
    1. Balak and Balaam Episode: Israel Cannot Be Cursed (22:1–24:25)
    2. Apostasy at Baal of Peor (25:1-16)
    3. Second Census of Israel (26:1-65)
    4. Adaptation of Inheritance Laws and Moses' Successor Chosen (27:1-23)
    5. Recapitulation of Various Offerings; Sabbath Law Added (28:1–29:40 [MT 30:1])
    6. Instructions Concerning Women's Vows (30:1-16 [MT 2-17])
    7. Holy War Against Midian: Laws of Holy War Elaborated (31:1-54)
    8. The Transjordanian Lands Allotted (32:1-42)
    9. Review of Israel's Journeys from Egypt to Moab (33:1-56)
    10. Boundaries and Divisions of Canaan Delineated (34:1-29)
    11. Levitical Sites and Cities of Refuge (35:1-34)
    12. Further Adaptation of Inheritance Laws (36:1-13)

Because the major concern of the book is to trace

the theological significance of the journey of Israel as it moved toward the promised inheritance of Canaan, Israel is pictured on the go, or preparing to go, throughout the various sections of the book. Appropriate events and legal material punctuate the book whenever they relate to (1) danger of Israel's failure to receive the promises and hence forfeit its place as God's people, or (2) further development of Israel's preparedness to receive the promises. The content of the book is shaped to serve the above goals and purposes. From the start (1:1–10:10) Israel is goal (future)-oriented as it prepares to march toward the land of Canaan. Chs. 10:1–20:21 record the journey from Sinai and narrate the theologically important episodes that fill the way before Kadesh (10:11–12:16) and highlight the time at or near Kadesh (13:1–20:21). Events before the plains of Moab (20:22–21:35) and in Moab are described (chs. 22–36). The story is not consummated, however, finding its immediate denouement in the book of Deuteronomy and ultimately in Joshua-Judges. The content of Numbers is fully coherent and cogent only when its place in the broader theological, historical, and literary context of the Pentateuch (or Hexateuch) is recognized.

C. Pentateuchal Context. Numbers must be understood in the light of the whole Pentateuch, since it reflects several of the main concerns of the Pentateuch. For example, 1:1–10:10 completes at least three major themes introduced in Exodus: the necessary arrangement of Israel around the tabernacle and God's presence after its completion (Ex. 40; Nu. 2), the dedication of the altar (Ex. 27:1-8; 38:1-7; Nu. 7:1-89), the fulfillment of God's promise to multiply the people (Gen. 12:1-3; 15; cf. Ex. 1:1-7; Nu. 2). The journey toward Canaan fulfils many promises given in both Genesis and Exodus indicating that Israel would enter its own land (Ex. 3:17; 6:4, 8; 23:20-26; etc.). The legal material in Numbers is often a development or adaptation of laws found in Exodus or Leviticus or new legislation necessary as Israel developed and contemplated its inheritance. The Balaam oracles (Nu. 22–24; see IV below) reaffirm the immutable blessings of God upon His people (Gen. 12:1-3; 15; Ex. 1:7, 12) in faithfulness to His word, and also His cursing (Moab) of those who would curse Israel. The book points toward Deuteronomy in various ways, e.g., geographical location, theological preparedness, imminent death of Moses (cf. Nu. 27:12-14; Dt. 31:14-16; 34:1-12). Numbers does not appear to be a mere literary construct between Exodus-Leviticus and Deuteronomy, but rather a vital historical necessity (and a humbling one) that explains why Israel did not immediately enter the land of Canaan upon leaving Egypt. Many other connections between Numbers and other pentateuchal books will be evident in the discussion below.

D. Sources, Composition, Author, Date. Since these topics are interrelated, they will be treated together here.

Numbers is replete with nearly every type of biblical literature (see esp. M. Duvshani, *Beth Mikra,* 24 [1978], 27-32). Various literary types sometimes indicate various original sources; this seems to be the case in Numbers.

According to the book the original impetus for the recording of much of the material was from Moses. It indicates numerous times that Moses received instructions from God. It normally does not indicate whether Moses recorded these instructions in writing (Nu. 33:2 only demands that the writing took place at Moses' command). He may have written some or much of the material himself, or he may have had others record the material (cf. Ex. 18:13-23). It seems that he probably did both. In Nu. 31:21 Eleazar orally disseminates to others commands that Moses had evidently received. Aaron also received revelation from God (19:21), as did Eleazar (26:1, 63). In 5:31 a priest is to write down certain curses in a book (Heb. *sēper*) upon instructions from Moses. It is clear that a priestly circle of influence helped shape the materials of Numbers before the present book was formed. Since priests and scribes (Heb. *sōp'rîm*) were generally responsible for preserving the ancient traditions of their people, this situation in Israel is expected. Blocks of priestly material would have been available to a later composer, whether Moses himself, a contemporary, or a later compiler.

But both the content and style reflect more than a priestly ambience. The census lists in the book may have been produced by incipient bureaucratic levels of persons (cf. Ex. 18:13-23), but this is uncertain because the amount of such activity in Moses' time is not known in detail. This type of activity was paralleled in other ancient Near Eastern cultures (cf., e.g., E. A. Speiser, *BASOR,* 149 [Feb. 1958], 17-25; C. H. Gordon, *Ugaritic Literature,* [1949], pp. 124f.; Mendenhall). Boundary lists (Nu. 34; *LBHG,* rev., pp. 62, 69), spy reports (oral and written? — Nu. 13:25-33; cf. S. Wagner, *ZAW,* 76 [1964], 255-269), pagan narrative of unknown origin (Nu. 22–24; see W. F. Albright, *JBL,* 63 [1944], 207-233), ancient Israelite poetry (10:35f.; 21:14f., 17f., 27-30), some coming from an ancient Book of the Wars of Yahweh, war narratives (from the same book? — 21:1-3, 14f.; 31:1-54), and wilderness travel lists (33:1-49; Davies, *Tyndale Bulletin*) are part of the plethora of literary genres found in Numbers and in the ancient Near East before and after a probable composition date for the book. The multiplicity of sources and hands probably explains the tendency for those following the classical documentary approach to Numbers to affirm several ancient traditions and sources within and outside the accepted critical documents.

It is evident that many hands and oral traditions provided this diverse mix of literature. Ancient Near Eastern studies have shown that all of the above literary features of Numbers were in use by the 13th century. (See Y. Kaufmann, *Religion of Israel* [Eng. tr. repr. 1972], esp. pp. 153-211; he argues that much of "P" is quite old.) So one observes blocks of "priestly" material, narrative material (with legal and ritual material interwoven), technical official census lists, genealogical lists, "archival" materials and non-Israelite blocks of material (reworked to some extent by an Israelite compiler), and some of this is intertwined with snatches of ancient poetry of various kinds. In spite of this situation some basic literary structure is evident in the book. Moses could have assembled the material or he could have directed its utilization. (The use of the 3rd person does not negate Mosaic authorship.) The historical integrity and theological veracity of the material is still intact even if a person other than Moses put the material into its present form in order to dovetail into the larger context of the Pentateuch. Possibly a decision on the final date of the book's composition should await further discoveries.

In *Prolegomena to the History of Israel* (Eng. tr. 1878; repr. 1973) J. Wellhausen established the dominant critical position on the composition of the Pentateuch — the documentary hypothesis that divided the Pentateuch into four main sources, J, E, D, and P (*see also* CRITICISM II.D.5; PENTATEUCH IV.C). One of the most important commentaries based upon these results was by G. B. Gray. He divided the literature in Numbers among J, E, and P (pp. xxix-xxxix). He found different levels of P material in Numbers and attributed three-fourths of the book to this source. He used these symbols to show the different levels of P material in the book: P^g, the fundamental priestly work that focused on sacred institutions (*ca.* 5th cent. B.C.); P^s, material secondary to P^g and later in origin; P^x, legal material not original to P^g but not later than P^s.

The rest of the material was given to J and E sources (*ca.* 9th and 8th cents., respectively). The book reached its final form in the 3rd cent. B.C.

Several presuppositions of this position must be noted. One presupposition was that priestly (P) institutions and concepts of the kind found in most of the book of Numbers appeared very late in the ancient Near Eastern world. Israel's highly elaborate cult and ritual constructed around a central tabernacle was, therefore, an indication that the P content of Numbers must be a description of Israel's cult and ritual in the time of the compiler (*ca.* 4th cent.). Hence, the material was a retrojection of priestly traditions, after the Exile and return, back into an archetypal antiquity. The purpose of this retrojection was to "validate" the circumstance of the compiler's own day.

The critical view of Israel's early worship assumed that it was free, spontaneous, uninhibited, and simple, but gradually became encased in a tradition of cold, formal, rigid legalism. The P writer(s) represented the last stages of this religious development along with 1-2 Chronicles (postexilic books). This general presupposition was supported by appealing to the centralization of the cult assumed by P since centralization of the cult occurred under Josiah (2 K. 23 *ca.* 621 B.C.) some time earlier. (For a discussion of the supposed historical value of Numbers see Gray, pp. xlii-xlvii; Sturdy, pp. 4-6.)

M. Noth broke some new ground. His idea of the composition of Numbers is tied closely to his advocacy of a Tetrateuch (Genesis-Numbers) instead of a Pentateuch and to his understanding of the Deuteronomistic history (Deuteronomy-2 Kings). He noted that Numbers taken as a whole in isolation from the Pentateuch might seem to be "an unsystematic collection of innumerable pieces of tradition of very varied content, age and character ('Fragment Hypothesis')" (Noth, *Numbers*, p. 4). But Noth went on to describe a compositional makeup for Numbers that includes P as the dominant material, a Yahwistic source (J), E, which appears first in 21:21f., D (appearing basically late in the book and used to connect other materials to the "Deuteronomistic history"), and a good amount of late material (e.g., 5:1–9:14; chs. 25–31; 33–36 [includes some D material]) not susceptible to the usual source-analysis approach. He spoke of "old sources," meaning J and E, but these sources contain a bare minimum of ancient material, which would have had an oral history before being placed into the narratives of J and E.

The oldest material is the poetical material in chs. 22–24; 10:35f.; 21:27b-30. The spy story might be the remnant of an old tradition (chs. 13–14). Nevertheless, Noth maintained that Numbers contains an immense amount of late material, and "it certainly originated in the post-exilic cultic community in Jerusalem and is of interest and importance for our knowledge of the ordinances and concepts prevalent in that late period" (*Numbers*, p. 10).

J. Sturdy (pp. 1-9) supported a view of one original line of tradition that gave rise to the Pentateuch. He located this tradition in the monarchy under David and Solomon from whence it passed to the southern kingdom. This tradition gradually assimilated various traditions not already in the older tradition. The so-called evidence for E is in reality the inconsistencies caused by this assimilation of tradition by "J." This original line of tradition first crystallized *ca.* 1000-980 B.C. The P work absorbed this earlier tradition *ca.* 500-450 B.C. The historical worth of Numbers still is considered negligible according to Sturdy. The forty years of wanderings are merely J's theological reflection, and the tabernacle and its cult and ritual are the idealization of P. Both P and J seek to express the concerns of their day through drawing up theological stories in Numbers.

The above examples show that some details and some presuppositions of the original critical position have been modified and some scholars of this school allow for some reflection of preexilic practices even in the P material. The late origin of the various sources is still generally maintained, however, and a very low view of the historicity of the content of Numbers is asserted. Although some original historical veracity in tradition underlies the text, the story line of the present text is largely a theological construct.

Conservative scholars of the 20th cent. find no problems with the existence of sources used in the construction of Numbers. Above we concluded that several "sources" were used in the compilation of Numbers. One could call the priestly blocks of material "P," but the other material reflects many more kinds of self-contained sources dependent upon and interlocking with each other. This situation seems to argue for a final compiler and against separate original sources of the supposed nature of J E P. This also agrees with Sturdy's literary tendency to find a single line of tradition outside "P" with additions.

The material is put into a pattern to give a theological message, but this does not negate its historicity, which should be accepted until disproven. In Israel theology and history were inextricably linked to form an inseparable mosaic of meaning. The basic procedure of Israel's theology was to review history and draw great theological lessons from it.

The content of the history in Numbers no longer militates against its thirteenth-century historical provenance (cf. Gray, pp. xlii-xlvii). Much evidence from the ancient Near East coalesces to give the content an air of historical veracity (cf. Wenham, *Numbers*, pp. 23-25, for a good summary). These facts do not prove the historicity of Numbers, but as Wenham noted, "This evidence lends weight to the book's own testimony that the traditions on which it is based originated in the Mosaic period" (p. 24). R. Rendtorff (for Genesis; *Das überlieferungsgeschichtliche Problem des Pentateuch* [*BZAW*, 147, 1977]) and Wenham (for Numbers) also suppose that the biblical materials may profitably be looked at as original blocks of material that developed and were later combined by skilled compilers. This seems to be a viable explanation of the way Numbers may have come together. Connecting links would have been added and ancient poetry would have already been embedded in these blocks of ancient material. There is, however, no reason to suppose that the origination of the materials in Numbers could not have been in the Mosaic era. It is, of course, impossible to know when the material was molded into its present form, but dates from the early entry into Canaan (1250 B.C.) until the time of the breakup of the monarchy (*ca.* 931 B.C.) seem viable options at this time.

E. Literary Structure. The structure of Numbers is subordinated to the requirements of the theological-historical message, with the author's theological concern giving the book its structural continuity.

Some structural features of Numbers have been outlined above. The first major part of the book (1:1–10:10) records the preparation of Israel to move from Sinai toward Canaan. Material in 1:1–6:21 is placed before events in 7:1–9:16 even though the events in 1:1–6:21 actually took place after 7:1–9:16 (cf. 1:1; 7:1; 9:1, 15; 10:10; Ex. 40:1, 17). The sequence seems theologically, as well as literarily, acceptable, for the mustering of Israel around the tabernacle indicates the writer's concern for the central shrine of Israel. God's holiness permeates the camp and it must not be defiled (1:47-54). Before normal operations within the sphere of Yahweh's holiness can begin the congregation

must be properly protected from Yahweh's holiness (1:53). Certain laws are added which are aimed at keeping the camp holy and undefiled lest Yahweh's holiness destroy the camp (5:1–6:21). The Aaronic benediction is fittingly placed at 6:22-27 because the holy congregation has been established. The dedication of the altar is subordinate to the establishment of Israel around the tabernacle (7:1-89). After the consecration of the Levites the people can keep the first Passover (9:1-14), and Israel's final preparation for moving out of the camp is described, including a specific description of how and when the people moved.

The writer has arranged the rest of his book to describe Israel's wilderness experiences (10:11–20:21) and its experiences in the approach to Canaan (20:22–36:13). To expect a perfectly "logical" arrangement of material in a book that purports to record the vicissitudes of Israel in the wilderness during a time of confusion and rebellion is perhaps unrealistic. However, the writer's material is arranged on principles within this broad dynamic structure: (1) rebellious and murmuring responses of the people cluster in various places to demonstrate theological lessons; (2) the movement of Israel from location to location is used to give the book action and continuity with events before Kadesh (10:11–12:15) and subsequently. God's judgment against Israel's unbelief is a major motif (14:39-45) that is fulfilled before Israel leaves the wilderness (26:64f.).

Various legal and ritual materials are added in 10:11–36:13. The principles that the writer(s) used for placing this material are not immediately clear. That it was vital to the existence of Israel is the reason for its inclusion and may reflect three considerations. (1) The material concerns Israel on the move and is reflective of Israel's developing community life. Legal and ritual material has an organic connection to life and hence develops as new understanding, needs, and demands arise. (2) The material is needed as the approach to and settlement of the land of Canaan are more fully contemplated. (3) The material also has exhortative value (esp. ch. 15); e.g., the strategic placement of the second census list gives emphasis to the fact that Israel's punishment for unbelief is over (26:64f.).

II. Theological Message.–The theological message of Numbers cannot be discussed in isolation from the rest of the Pentateuch. The chronological and geographical links among the books of the Pentateuch reinforce the fundamental theological themes of these books. Each book contributes in its own way to pentateuchal theology, but it is often a matter of emphasis rather than theological uniqueness that differentiates one book from the others. Numbers completes the establishment of God's ideal relationship to His people in 1:1–10:10. The travel narratives of the book show how these arrangements worked out on the road to Canaan.

A. Character of the People. The people were to reflect their God — He was holy, they were to be holy. The program set forth in Ex. 6:6; 19:5f.; Leviticus, *passim,* made God's goal the creation of a kingdom of priests and a holy nation. Although there were different levels of consecration to God (holiness) such as lay, Levitical, priestly, high priestly, and Nazirite, from the outset God's presence at the center of His people demanded that everyone be holy unto Him. In Numbers God's presence made the camp itself holy, and Israel was instructed in how to maintain this holiness (e.g., 1:50-54; ch. 5; etc.) through their obedience to God's instructions. However, what the people were, as opposed to what they should have been, is a theme clearly expressed in Numbers. The unbelief, murmuring, and rebellion of Israel as depicted by the author is in stark contrast to the characteristics that should have marked Israel (cf. chs. 11; 12; 13–14; 16; 20:1-13; 21:4-9; 25:1-4; 26:63-65). Even Moses did not escape censure from the Lord (20:12; 27:12-14). The failures of the people are part of the continuing saga of the stubbornness and rebelliousness of Israel already evident in Exodus (Ex. 5; 15:22–16:36; 17:1-7; 32; 33). The underlying sin of the people is their unbelief clearly revealed in the events of chs. 13–14. The Israelites, to be God's people, were to exercise the faith of their father Abraham. If they would not obey God, He would chastise them. The ultimate threat of the annihilation of the people in the wilderness is reached in 14:10b-12. The people were expendable before God and only the gracious character of God in response to Moses' magnificent intercession delivered them. Nevertheless, the destruction of that generation of people (twenty years old and over) in effect meant that because of unbelief the generation of Israel that could have inherited all the promises did not do so.

B. Character of God. Israel's God dwelt among them (Ex. 40:34-38; Lev. 26:11f.; Nu. 1:47-54; 9:15-23), both to sanctify them and to destroy the evil from among them (e.g., 11:1-3). This closeness between a people and their God was considered unique by Israel (Dt. 4:7f.). His guidance was always with them and He blessed them with visible signs of His presence and leadership (9:15-23). God's holiness had to be treated with meticulous respect; therefore the Levites camped around the tabernacle of the testimony to protect the rest of Israel from the holy wrath of God (1:47-54). God's holiness demanded Israel's holiness and faithfulness if His presence was to continue (cf. Ex. 33). His holiness made the camp and the land holy, and Israel was to be careful not to defile the land or make it unclean (e.g., 36:29-34). Uncleanness was to be cared for according to the instructions of Yahweh (e.g., ch. 19).

God was the provider and preserver of Israel. Although He judged the people according to His word, He loved and preserved them according to His nature. Israel was cared for during the forty years of wanderings in the face of serious threats (cf. ch. 26), surviving only by the grace of the One who was judging them.

God's gracious nature is revealed in His decision to hearken unto Moses rather than annihilating the rebellious people (ch. 13–14). The prayer of Moses and the description of the gracious character of God in 14:13-19 recapitulates Ex. 32:9-13. God's response to intercession by Moses (esp. Nu. 14:13-19) illustrates His concern for Israel's plight.

The sovereignty of God is apparent throughout the book, but especially in the Balaam oracles, which tie His sovereignty to His covenantal promises. Israel's first encounter with a famous Mesopotamian soothsayer (see V below) might have been intimidating at best and possibly disastrous. However, these oracles proclaim that no pagan religious system will be able to remove the blessing that God had placed upon Israel (Gen. 12:1-3; 15:1-20). The king of Moab falls under the curse of Yahweh's covenant with Israel: because he tried to curse Israel, Balak brought a curse upon his own people. God's sovereignty extends over all history according to His covenant with Israel (24:20-25), and only He can effect blessings and curses on nations and peoples.

C. Importance of Cult and Ritual. The book of Numbers continues to show the importance of cult and ritual in ancient Israel. Even after the extensive regulations of Leviticus the author of Numbers found it necessary to add to the religious practices of the people to ensure their prosperity before Yahweh. Approaching a holy God, avoiding uncleanness, purifying oneself if unclean, ministering before the Lord in the affairs of the tabernacle — all these matters seem foreign to us, but are clearly the heart of the matter for Israel as they worship before God with a good conscience from a stance of faith.

The support of the tabernacle and its workers was vitally

important (Nu. 18), and Israel's approach to God was to be one of respect and awe. Anthropological studies have helped us begin to understand the issues involved in this sacrosanct arena of ancient society (Gray, *Numbers*, pp. 47f.; Wenham, *Numbers*, pp. 25-39; Douglas). The holiness of God, contrasted with the unholiness and uncleanness of humanity, necessitated the cult and ritual, requiring God to delineate an acceptable way in which His people might approach Him without devastating consequences.

D. Recognition of the Authority of God's Chosen Leaders. Several episodes in Numbers establish the true line of religious authority within Israel. Moses, the priests, and the Levites are all confirmed in their positions. Chs. 12 and 16 illustrate the challenges that were placed before Moses. Each time confirmation was given to Moses' unique authority and position in God's economy of creating His own people (esp. 12:6-8; 16:25-50). Moses' position and plenary powers were not passed on to anyone in the way that he had embodied them. Moses exercised authority over Aaron the high priest, over the judges and military commanders, and over those empowered with the prophetic spirit. He exercised all the various powers of prophet, priest, and king (cf. esp. 15:32-36; 27; 31; 36). Ch. 17 confirms the Aaronic priests and the Levites as those who will "bear iniquity" for the people in regard to the sanctuary. Any others who take this ministry by force shall die (17:12f.; 18:7). The establishment of the structures of society and the lines of authority were highly important to the developing "kingdom of priests and a holy nation" of Israel.

E. Gift of the Land. The goal of the travel narratives of Numbers is Canaan. The land is as much a theological goal as it is a mere physical goal, however. The inheritance of the land consummates a vital part of the promise-fulfillment theme running through the Pentateuch.

Such inheritance is possible because God owns the land and gives it to whatever nation He wills. He therefore gives it freely to Israel (13:1f.; 14:8, 23, 39; 32:7-9; 33:53). But Israel because of unbelief failed to enter it the first time (14:11), and God refused to let Israel's rebellious invasion succeed (14:40-43). The land is a gift, the Lord owns the land, but Israel through exercise of faith must qualify to enter it (32:7-9, 15). Unbelief at Moab would have resulted in disaster again (32:14-15). Only if God went into the land with the people would they be successful in attaining possession (14:13-42; 32:20-22). Above all it is clear that possession of the land was ultimately dependent upon the moral and religious faithfulness of Israel to Yahweh and His Torah. The retention of the land was dependent upon Israel's faithfulness to the Mosaic instructions. The land would otherwise be defiled (e.g., 35:34) and Yahweh's continued presence that made the land holy would be in danger (33:56).

III. Special Problems.—A few of the most difficult problems encountered in a study of the book of Numbers have already been mentioned. Two issues deserve to be emphasized. A prominent concern has always been the exceedingly high numbers encountered in the book, especially in the census lists of chs. 1 and 26. The list in ch. 1 (v. 46) totals 603,550 men of twenty years of age or older. The total in ch. 26 is 601,730. This implies a total population of two to three million, a number that hardly seems appropriate.

It is hard to imagine the difficulties attendant upon sustaining two to three million people in the wilderness for forty years: food, sanitation, living space, morale. Some numbers appear internally inconsistent (e.g., the ratio of first-born males to all adult males was 1:27!). Each family would then appear to have had on the average twenty-seven sons and possibly as many daughters. Some verses indicate the smallness of Israel, such as Ex. 23:29f. where fear is expressed that Israel is too small to occupy the land if God drives out its inhabitants too fast. Dt. 6:6f. is somewhat ambiguous but seems to stress the small size of Israel compared to the inhabitants of Canaan. Nu. 13:27-29 indicates that Israel considered itself inadequate to overcome the inhabitants of the land. Finally, it is important to note that the whole population of the Promised Land was probably below three million people at this time (R. K. Harrison, *Intro. to the OT* [1969], p. 632). Several solutions have been offered to this knotty problem.

R. K. Harrison suggested (p. 633) that the numbers in the census lists rest upon some basis of understanding not now available to us. They represent "terms of relative power, triumph, importance" and are symbolic in some sense. They were meaningful to the ancients but we have lost the key. This suggestion is noteworthy. The fulfillment of Yahweh's promise to multiply Israel as the stars of heaven (Gen. 15:5) and the enormous deed of salvation at the Red Sea would call for some extraordinary expressions of God's deeds for Israel and His promise of fulfillment. A solution along these lines does not require a corrupt extant text and does not take the numbers in a strict literal sense.

Other scholars have been content to assert the literalness of the numbers. The physical multiplication of Israel to this extent was possible. The desert could have been much more supportive at an earlier date than it is now, although this is a moot issue since the miraculous intervention of God was precisely that which the text says preserved them several times in the face of sure destruction. This must remain a possibility but it hardly seems probable, based on archeological evidence of the demography of that time and geographical area (cf. Wenham, p. 67).

Several scholars have argued for the symbolic use of the numbers. M. Barnouin (*VT*, 27 [1977], 280-303) claimed that the numbers can be related to ancient Babylonian astronomical periods. But it seems highly doubtful that the biblical writer would have cared to relate the numbers to Babylonian astrology. It is also highly questionable that his original readers would have grasped or appreciated his point.

Several solutions to the problem have been offered based upon the assumption that the present text is corrupt. Some assume that *'elep* (usually signifying 1000) in the text was misunderstood by later copyists and the numbers have themselves become inaccurate because of this. In addition, the actual totals of the numbers may have been incorrectly passed on through the inadvertent dropping of noughts, etc. (For a full discussion see articles below by Clark, Mendenhall, J. Wenham.) One must conclude at present that objective material is needed before a solution will be possible

The historical or nonhistorical nature of the material in Numbers has occasioned warm controversy for some time. Numerous ancient Near Eastern archeological finds have tended to support the probablity of the historicity of numerous individual items and features of the book. The census lists no longer need to be considered fourth-century creations (see I.D above). Silver trumpets (Nu. 10) were used in Egypt at this time (K. A. Kitchen, *NBD*, p. 847) and ox-wagons were used by Egyptian pharaohs from 1470 B.C. Even the arrangement of Israel around the tabernacle with God in the center as king is reminiscent of the arrangement used by Rameses II in the 13th cent. when he went on campaigns (but cf. A. Kuschke, *ZAW*, 63 [1951], 74-105). The transmission of family records over long periods of time is found in Egyptian literature (Kitchen, *Tyndale Bulletin*, 5/6 [1960], 14-18). The design of the lampstand is found in the 15th-13th centuries. The

use of spies in the land was an activity carried out also by the Hittites and Rameses II (cf. A. H. Gardiner, *Kadesh Inscriptions of Rameses II* [1960]). For the antiquity of the Balaam oracles see IV below. For the authenticity and coherence of the wilderness itinerary of Nu. 33 see Davies, *Way of the Wilderness*, pp. 58ff. The laws of Nu. 28–29 find a close resemblance in an Ugaritic ritual calendar from the 14th cent. B.C. (L. R. Fisher, *HTR*, 63 [1970], 485-501). This material could be multiplied, even though the goal has not been to prove the historicity of Numbers. This should be enough, however, to demonstrate the weakness of the position that would describe Numbers as neither authentic nor very ancient. The door is open to an assertion of the essential historicity of the book's content and perhaps especially of its P material.

Other problems abound in Numbers: the priesthood, the sometimes puzzling structure of the book, its legal material, etc., but here is not the place to discuss them in detail. E. E. CARPENTER

IV. Balaam Oracles.–A. Analysis. The oracles are interesting from many standpoints. They represent an archaic form of Hebrew which witnesses to their antiquity. They sometimes describe God's past blessings on His people and at other points His unique future blessing of Israel.

The first poem (23:7-10) has a symmetrical pattern of synonymously parallel lines. The opening (v. 7a), middle (v. 9a), and closing (v. 10b) bicola consist of what Balaam has to say about himself: he was brought by the king of Moab, he is on the top of the rock to view the Israelites, and finally, he expresses the nostalgic thought that he would like to share in Israel's blessing in the end.

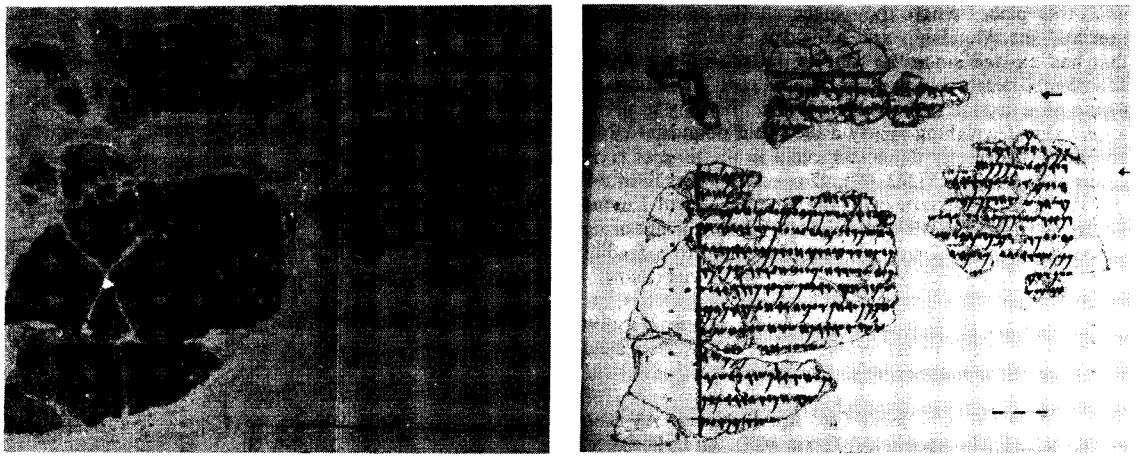
Flanking the middle bicolon are two quatrains about Israel. In the first (vv. 7a-8) Balaam expresses his frustration in not being able to curse them, and in the second (vv. 9a-10a) he observes the unique place that Israel has among the nations.

The second poem (Nu. 23:18-24) contains an introduction (v. 18) followed by two stanzas (vv. 19-21a, 21b-23) and a conclusion (v. 24). Here Balaam sees Yahweh as the one who forces him to bless Israel because Israel's deity is a God who must bring to pass His promised word. The figure of the stalking lion (v. 24) goes back to Jacob's prophetical oracle about Judah (Gen. 49:8-10). Indeed, Balaam will particularize the figure in the third oracle in 24:8f. At the beginning of stanza two (v. 21b), where the Hebrew text reads "the shout of the king," the LXX, the Tg. Onk., and the Sam. Pent. translate "royal majesty." Albright presented evidence to support the versions in this translation (p. 215 n. 43).

The third poem (24:3-9) has an introductory strophe (vv. 3f.) similar to that in the fourth poem (23:15f.). Then two stanzas flank the main oracle (v. 7b). A conclusion (v. 9b) answers back to v. 5, the opening line of the poem proper. These couplets are the only place where Israel is addressed in the poems (using the 2nd person sing.). The purpose of the poem is to predict Israel's coming monarchy. That is why the prophetic oracle is the apex of the poem (v. 7b).

The stanzas that flank the oracle present two contrasting views of Israel (these remind us of the peace and war standards from the Royal Tombs of Ur; see J. Finegan, *LAP*, Fig. 16; *ANEP*, nos. 303f.). Israel is described as a well-watered garden and flourishing cedars (vv. 5-7) and then as a warlike nation with the imagery of a wild ox and devouring lion (cf. Ezk. 19). The conclusion (v. 9) is a reminder of God's covenant promise to Abraham (Gen. 12:3), a promise that makes it impossible for God to turn His back on Israel at the whim of a Moabite king or a diviner from Mesopotamia.

The fourth poem has an introductory strophe almost identical to that of the third. In addition to his eyes being opened to see a vision, he hears the words of God (v. 16). The rest of this poem is oracular, i.e., the vision is descriptive of Israel's future king whose greatness has been alluded to in the apex of poem three (v. 7b). Now he is seen as the conqueror of the surrounding nations, especially Moab and Edom. The reference is, no doubt, to David and only in a secondary sense to the Messiah. The Dead Sea community made much of it as a prediction of the Messiah (1QM 11:6f.; see T. H. Gaster, *Dead Sea Scriptures* [rev. ed. 1964], pp. 296f.) but the NT does not. Note how Jeremiah in his curse on Moab integrates some of these words (v. 7b) with a quote from the poetic taunt of Moab in Nu. 21:27-30.



The rest of the Balaam poems (24:20-24) are short oracles concerning peoples whose history and destiny would overlap with Israel's. The Amalekites and Kenites are easily identified, but who are Asshur and Eber? And who are the sea-faring Kittim? At Qumrân the latter were identified as the Romans (F. M. Cross, *Ancient Library of Qumran* [rev. ed. repr. 1980], p. 124 n.). To others they are the Greeks or Philistines, but it seems wiser to leave these issues open. For example, Asshur need not be the Assyrians (cf. the Asshurites of Gen. 25:3 and 2 S. 2:9) and Eber here might conceivably be linked with Eber of Gen. 11:14-16. Cf. the 3rd-millennium king Ebrium of Ebla (Tell Mardikh), whose name is related to the root from which the term "Hebrew" (*'ibrî*) comes. The latter originally had a wider meaning (social class?) than the term Israelite. *See* HABIRU.

B. Inscription from Tell Deir 'allā. In 1967 at the Jordan Valley site of Tell Deir 'allā archeologists found plaster fragments bearing a text in a language that exhibits both Canaanite and Old Aramaic features. The script is an Old Aramaic cursive type known also from certain Ammonite inscriptions. The fragments of plaster had originally been on a mud-brick wall or mud-brick stele within a sanctuary or other chamber where visitors could become acquainted with the message recorded. The writing was in two colors — red and black on white plaster — and archeologists have dated it to the end of the 8th and the beginning of the 7th cents. B.C. The *editio princeps* is by Hoftijzer and van der Kooij; see also the diss. by Carlton (Hackett).

The fascinating part of this text is the reference to Balaam the son of Beor as a religious leader who was obviously revered in Transjordan, just as we would expect from the biblical data. He is the leader of a cult that is not Yahwistic since the text clearly presents a polytheistic religion. The syntax and vocabulary are not unlike that of the OT; the text seems to be tied to Canaanite literary traditions (see McCarter).

Scholars have put the fragments together in two combinations (groups of fragments) and are still unsure of the relationship between them. The first tells of this man Balaam the son of Beor who was called a seer of the gods. He sees a vision at night when the gods speak to him and give him a message (all of which has not been preserved). The vision is so disturbing to Balaam that he wails and laments as he tells his people what the gods are going to do. A goddess, whose name begins with the letter *š* (the rest is lost), carries out the will of the gods, who are determined to cover the heavens with a cloud and bring darkness on the earth because of the shameful behavior of man.

In Nu. 24:4, 16 Balaam calls himself "the one who hears the words of *'El* (God), the one who sees the vision of *Šadday* (the Almighty)." In the Deir 'allā text these epithets are used in a *polytheistic* setting. According to Carlton (Hackett) *šdyn* is used as a divine name, similar to the

Actual fragments and line drawing (combination 1) of the Balaam text from Deir 'allā (Department of Antiquities, Hashemite Kingdom of Jordan)

epithet *šadday* ("Almighty") used for God in the OT. The *šdyn* stand together as at an assembly of deities. In the period between the Exodus and the Conquest Israel "sacrificed to *šdym* and not to God, even gods they did not know" (Dt. 32:17). And in Ps. 106:37 the Israelites "sacrificed their sons and daughters to *šdym*." In both cases the MT has vocalized the word *šēḏîm*, and it has traditionally been interpreted as "demons," a typical post-biblical (i.e., post-OT) way of handling earlier names of pagan deities (cf. Mt. 10:25; 12:24; Lk. 11:15).

The picture presented here shows Balaam among his own people while the biblical appraisal of Balaam is consistently negative. Even the story in Nu. 22–24 appears to be strongly ironic. Balaam, a man who might have gladly cursed Israel, finds himself unable to do so. As for the dating, the fragments evidently come from a wall or a stele. Such a monument must have preserved material that was already old to the people of the 8th or 7th cent. B.C. in whose context this document existed.

V. NT.–Although the NT quotes from Numbers only three times (according to the United Bible Societies' Greek NT [3rd ed. 1975], 9:12 in Jn. 19:36; 16:5 in 2 Tim. 2:19; 30:2 in Mt. 5:33), the influence of Numbers is far greater in the NT than those few citations imply.

Jude 5-7 lists the rebellious generation that was destroyed in the wilderness along with the rebellious angels (v. 6) and the corrupt and apostate cities of Sodom and Gomorrah (v. 7) as a warning to the Christian saints to continue in their faith lest they too lose their first inheritance through unbelief. He. 3:1–4:13 continues along this same line to encourage Christians to continue to "hold fast our confidence and pride in our hope" (3:6). The major religious problem of the wilderness generation was their tendency to lose faith and hope in the face of adversity (3:12-19) and be confirmed and rejected in a state of unbelief. The Christians' challenge is to maintain their faith lest they too lose their inheritance and future hope (4:11-13). The future hope of Christians is parallel to the Promised Land of Canaan for Israel.

Paul's use of several episodes from Numbers in 1 Cor. 10:1-11 is indicative of his general assertion that "these things happened to them as a warning, but they were written down for our instruction . . ." (v. 11). Conditions at Corinth reminded Paul of certain events recorded in Numbers. God was not pleased with most of the people even after they had all experienced his mighty deeds of salvation (1 Cor. 10:1-5; Nu. 14:10-35). The whoredom of Israel at Baal of Peor (Nu. 25:1-18), the test of the Lord by the people (e.g., 21:5-6) and incessant murmuring (16:14, 49) are all listed as instructive to God's people at Corinth not to walk in the same rebellious way that Israel had walked. Paul affirms both the historical meaning and reality of the text ("happened *to them* as a warning") and its present significance at Corinth ("written down *for our* instruction").

The events of Numbers and the NT's use of them illustrate a typological significance that the OT had in some texts. Because of God's continued goals and purposes for mankind, because of His constant nature, because of mankind's constant failure and nature, a moral-religious cycle of relationship between God and mankind takes place in history. Inevitably, *unless* people remain faithful, the punishments of the covenant will come upon them. The marvelous provisions of God in the wilderness, however, remain as a challenge to trust His unparalleled care.

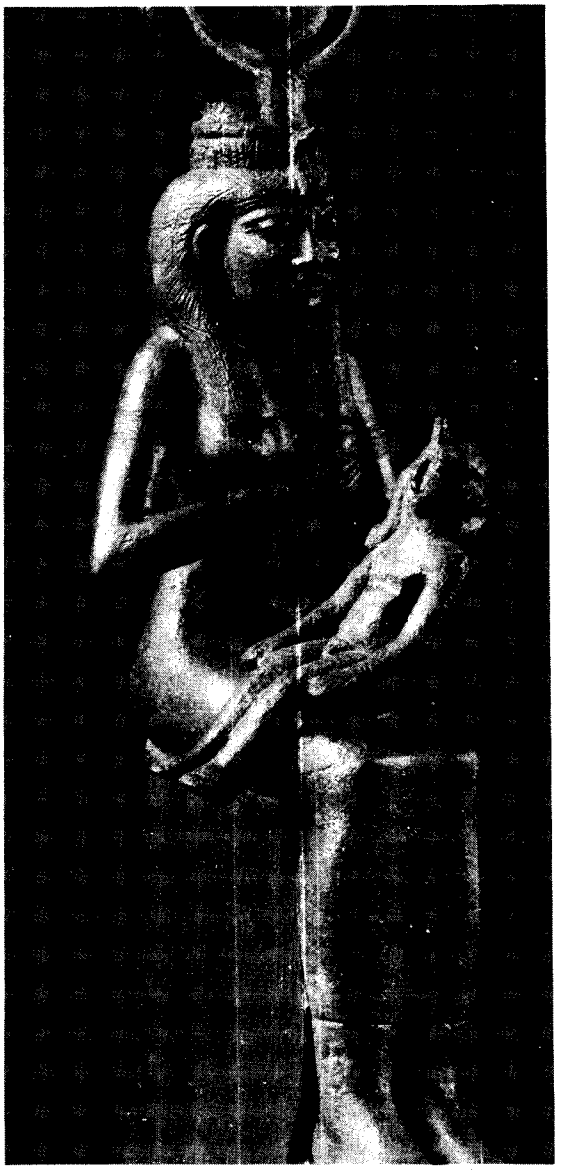
NUMENIUS nū-mēn'i-əs [Gk. *Noumēnios*]. Son of Antiochus and a Jewish ambassador. In 144 B.C. Jonathan (the Maccabee) sent Numenius and Antipater to Rome, Sparta,

and other places where they successfully confirmed and renewed the friendship and alliances (1 Macc. 12:1-23) that had existed since the time of Judas (8:17ff.). After Jonathan's death, his brother Simon sent Numenius to Rome on a second embassy in 141 B.C., bearing as a gift a gold shield weighing nearly a thousand pounds (14:24). Josephus incorrectly dates this event in the time of Hyrcanus II (*Ant.* xiv.8.5 [143-48]), 47 B.C. Numenius returned in 139 B.C. with letters from the Roman consul Lucius declaring friendship with the Jews, forbidding neighboring states to harm the Jews, and requiring them to extradite any Jewish deserters (15:15-24). R. L. OMANSON

NÛN nōōn [נ, ן]. The fourteenth letter in the Hebrew alphabet, in *ISBE* transliterated as *n*. It was also used to represent the number fifty. *See* WRITING.



NUN nun [Heb. *nûn*–'fish'; Gk. Apoc. *Nauē*]; AV also NON (1 Ch. 7:27), Apoc. NAVE (Sir. 46:1). An Ephraimite, the father of Joshua (Ex. 33:11; Nu. 11:28; Dt. 1:38; Josh. 1:1; 1 K. 16:34; Neh. 8:17; etc.). Nun is also called the father of Hoshea (e.g., Nu. 13:8, 16; AV Oshea), of Jeshua (Neh. 8:17), of Jehoshua (e.g., Nu. 13:16, AV), and of Jesus (Sir. 46:1, AV); but all of these are other forms of the name Joshua.

NURSE; NURSING [Heb. qal part. of *yānaq* (Cant. 8:1; Joel 2:16), hiphil and hiphil fem. part. (*mêneqeṯ*) of *yānaq*, part. of *'āman*, part. of *sāḳan*; Gk. *tróphos* (1 Thess. 2:7)]; AV also SUCK, SUCKING, GIVE SUCK, CHERISH (1 K. 1:2, 4); NEB also SUCK, "at breast," WET-NURSE, SUCKLE, "take care of" (1 K. 1:2, 4), etc. To take or give nourishment at the breast; one who cares for children or the infirm.

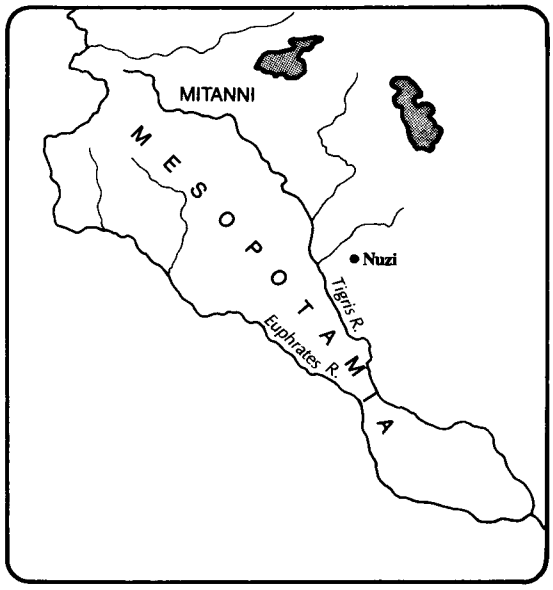
Hebrew *yānaq* in the qal means "suck" and in the hiphil "give suck, suckle." Heb. *mêneqeṯ* generally refers to a wet nurse. Although Hebrew women usually nursed their own children (cf. 1 S. 1:23; 1 K. 3:21; Cant. 8:1), some families employed a wet nurse (e.g., the nurse of Joash [2 K. 11:2; 2 Ch. 22:11]; Jochebed, hired as a wet nurse for her own son by Pharaoh's daughter [Ex. 2:7-9]). Children were not weaned until they were two or three years old (cf. 1 S. 1:22-24). Often the wet nurse remained with the family as a trusted servant after her charge was weaned (e.g., Deborah, Rebekah's nurse [Gen. 24:59; 35:8]).

The part. of *'āman* (fem. *'ōmeneṯ*; masc. *'ōmēn*) has the more general sense of one who is entrusted with the care of children (e.g., Naomi [Ruth 4:16]; the nurse of Mephibosheth [2 S. 4:4]). Moses protested against being burdened with the responsibilities of a foster parent (*'ōmēn*) for the people of Israel (Nu. 11:12; cf. 1 Thess. 2:7, where Paul compares his care for the Thessalonian Christians to the tender affection that a nursing mother shows to her children). Deutero-Isaiah (49:23) prophesied a time when foreign kings and queens would attend to the needs of the Israelites like foster fathers (*'ōmᵉnîm*) and wet nurses (*mêniqôṯ*). (*See also* GUARDIAN.)

ABISHAG the Shunammite was chosen to be a *sōḳeneṯ* (part. of *sāḳan*, "be of service") for the aged King David (1 K. 1:2-4). Although the text explicitly states only that her task was to keep the king warm and that he did not have intercourse with her, some have seen in this story a parallel to the custom in certain tribal societies of deposing a king who is no longer virile. That Abishag was chosen for her beauty (vv. 3f.) gives some credibility to the theory that the passage describes a virility test that the king failed (v. 4), setting the stage for his successor to take the throne (cf. 1:5–2:46). (See J. Gray, *I & II Kings* [*OTL*, 2nd ed. 1970], p. 77.) N. J. O.

Bronze statuette of Isis nursing Horus (ca. 7th cent. B.C.) (University Museum, University of Pennsylvania)

NURTURE. The AV rendering of Lat. *erudio* (2 Esd. 8:12, RSV "instruct"), Gk. *paideúo* (Sir. 18:13, RSV "train"), and Gk. *paideía* (Wisd. 3:11, RSV "instruction"; Eph. 6:4, RSV "DISCIPLINE").



NUT.

1. NUT ORCHARD [Heb. *ginnaṯ ᵉgôz*; Gk. *kêpos karýas*] (Cant. 6:11); AV "garden of nuts"; NEB "garden of nut-trees." The reference is to the walnut tree (*Juglans regia* L.), indigenous to northern Persia and common in Palestine, particularly in the hills. The nuts are esteemed for food and for their oil content. Cf. M. Pope, *Song of Songs* (*AB*, 1977), pp. 574-79.

2. PISTACHIO NUT [Heb. *boṭnâ*; Gk. *terébinthos*] (Gen. 43:11); AV NUT. The *Pistacia vera* L., the *baṭam* of the Arabs. The LXX rendering is an error, since Gk. *terébinthos* invariably refers to Heb. *'êlâ*, identified with *Pistacia*

terebinthus var. *palaestina* (Boiss.) Post, native to Gilead. *See* OAK. R. K. H.

NUZI nōō'zi. A city near modern Kirkûk, Iraq, which flourished in the middle of the 2nd millennium B.C. and whose inhabitants in that period were predominantly Hurrian. Parallels have frequently been drawn between the socio-juridical practices evidenced in the tablets found there and those of the patriarchal narratives of Genesis.

The mound of Yorghan (also Yoghlan) Tepe, containing the remains of ancient Nuzi, is located approximately 15 km. (9 mi.) SW of Kirkûk, ancient Arrapkha. It was excavated during 1925-31 by a team led by E. Chiera under the primary sponsorship of the American School of Oriental Research in Baghdad. Although remains were found dating from the early 4th millennium B.C. down to Roman times, the main periods of occupation were the late 3rd millennium, when the site had a primarily Akkadian population and was known as Gasur, and the mid-2nd millennium, specifically the 15th-14th cents. B.C. In the latter period the site was known as Nuzi and was part of a province of the kingdom of Mitanni. Its population was now overwhelmingly Hurrian, a development doubtlessly related in some way to the mass movement of Hurrian peoples that created the state of Mitanni during the second quarter of the 2nd millennium.

More than four thousand clay tablets were found in the excavations, some of them administrative records but most private family archives covering a period of some five generations. They were written in a dialect of Akkadian that was heavily influenced by the Hurrian language both in vocabulary and grammar. A wide variety of document types is represented in these archives. There are family-law documents comprising adoptions of various kinds, wills, and marriage contracts, as well as business records detailing the sale and transfer of land and the exchange of persons and goods. A number of lawsuits, both civil and criminal, have also been recovered.

From these texts scholars have gleaned much knowledge about the social customs and practices of these people, such as the ownership, exchange, and sale of land, the prices and sale of commodities of various kinds, the status and treatment of women and slaves, the nature and procedures of the legal system, and especially the nature and functioning of family law. Other genres of texts, giving information of a literary, political, or religious nature, are notably lacking, however, so that our knowledge in these areas is correspondingly slight. One implication of the nature of these texts needs to be stressed: since they are the records of actual transactions of a legal, business, and social nature between specific individuals, they record only the barest essentials pertinent to the situation, leaving much unsaid that was understood by all the parties involved. Therefore much in them is obscure and problematic, and they are only indirect evidence for the social and legal institutions, practices, and principles which governed the transactions involved. Thus they are capable of a wide latitude in interpretation and understanding.

Certain features of these socio-juridical customs provide parallels with biblical data, particularly the patriarchal narratives, but with varying degrees of exactness and probability. Only a partial list can be alluded to here. (1) In the area of inheritance rights, the granting of special privileges to an eldest son was widespread. At Nuzi and in Dt. 21:15-17 a double share is prescribed. (2) The regular term at Nuzi for the eldest son, *rabû*, "eldest," occurs in Gen. 25:23 (Heb. *raḇ*) instead of the usual Hebrew term (*bᵉḵôr*, "first-born"). (3) In at least two texts from Nuzi a slave could be adopted in the absence of a son. This may provide an explanation of the status of Eliezer in Gen. 15. (4) In one marriage contract at Nuzi it is stipulated that the wife may provide a slave girl for her husband if she should prove to be barren, as was also done by Sarah, Rachel, and Leah (Gen. 16:1-4; 30:1-13). It is important to note that customs similar to all of these can also be found at sites other than Nuzi in this same era and some of them at much later times, including the 1st millennium. One very probable parallel occurs thus far only at Nuzi: the use of the idiom *kaspa akālu*, "to consume the money," with a meaning parallel to that of the cognate Hebrew phrase *'āḵal kesep* "to use up the money," in Gen. 31:15. Other suggested parallels also seem valid (see Selman).

A number of the parallels suggested in the past between Nuzi customs and those of the patriarchs must now be regarded as invalid. These include (1) a reputed wife-sister marriage as a background to the relationship between Abraham and Sarah (Gen. 12, 20), (2) the existence of a fratriarchy and a sistership adoption practice as a background for the relationship between Laban, Rebekah, and Abraham's servant in Gen. 24, and (3) the inheritance of household gods by the eldest son as the background to Rachel's theft of the teraphim in Gen. 29–31.

One line of argument for the historicity and date of the patriarchs that was based on these Nuzi parallels, particularly these last three, must now be significantly modified. In this approach many of these Nuzi customs were identified as specifically Hurrian on the basis of a presumed difference between them and the customs of the general Assyro-Babylonian culture of Mesopotamia, which otherwise formed the basic fabric of Nuzi society. This close parallel between patriarchal customs and these presumed Hurrian customs from Nuzi seemed particularly significant since the Hurrians' longest and deepest penetration into Mesopotamia occurred in the very area that the Bible presents as the homeland of the patriarchs, viz., northwest Mesopotamia in the general vicinity of Haran. This special connection between the patriarchal texts and specifically Hurrian Nuzi socio-juridical customs must be given up for clear and decisive reasons. First, a number of the customs that seemed most clearly idiosyncratic and so could be

interpreted as Hurrian are now seen to stand in only a tenuous relation (if any) to Hurrian practice. Second, these particular customs were drawn from an interpretation of no more than twelve, most frequently only four or five, of the approximately three hundred Nuzi family-law texts known. Hence they can hardly be said to be representative even of the Nuzi texts themselves! Third, the Nuzi customs show much greater similarity to the socio-juridical practices of the Mesopotamian world at large than originally thought, and consequently the whole question of a specifically Hurrian pattern of family law is extremely suspect. The very criteria for determining when a particular custom is Hurrian in origin have yet to be worked out. Finally, it must be stressed that socio-juridical customs, even when valid parallels exist between the two groups of texts, are generally insufficiently precise chronologically to be used for dating purposes. A custom can only be chronologically significant if it can be shown to be confined to a reasonably limited period of time. In fact most socio-juridical customs in the ancient Near East were in use in various forms for long periods of time, frequently stretching through many centuries.

F. W. BUSH

NYMPHA nim'fə [Gk. *Nympha* or *Nymphas*; most likely an abbreviated form of Nymphius, Nymphodotus, or Nymphodorus]; AV NYMPHAS. An otherwise unknown but probably wealthy Laodicean Christian (Col. 4:15). This person was singled out because the church (or some part of it) met in his (or her) home.

Scholars disagree about the gender of *Nymphan*. This form, an accusative, can be accented either as fem. *Nýmphan* (nominative *Nympha*) or as masc. *Nymphán* (nominative *Nymphas*). The uncertainty of the gender of the noun resulted in a variation in the gender of the following possessive pronoun: "her" (RSV), "his" (AV), or even "their" (ASV) in some MSS. Lightfoot's contention that the feminine is improbable because of its Doric form (hardly to be expected at Colossae; cf. Moule) was answered by Moulton, who saw here an Attic feminine form. If a scribe altered "her" to "his" on the assumption that a woman would not be referred to in this way, "her" becomes the most difficult and therefore the preferred reading (see Lohse).

OABDIUS ō-ab'di-əs (1 Esd. 9:27, NEB). *See* ABDI 3.

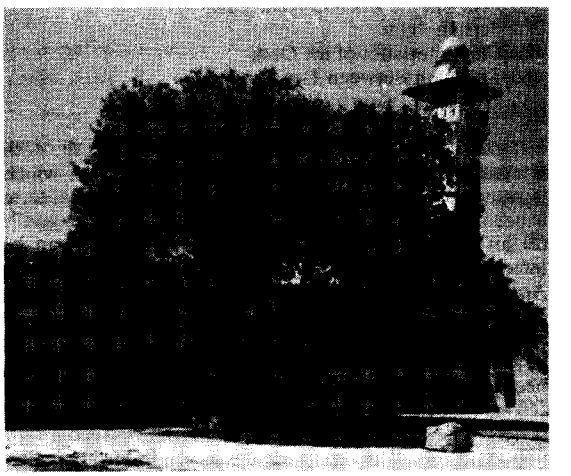
OAK [Heb. *'ēlâ, 'allâ, 'allôn, 'ēlôn, 'êlîm* (pl.); Gk. *terébinthos, drýs, bálanos*]; AV also "plain" (*'ēlôn*), TREES (*'êlîm*, Isa. 61:3), "hinds" (Ps. 29:9), "idols" (*'ēlîm*, Isa. 57:5), "ALLON" (*'allôn*, Josh. 19:33); NEB also TEREBINTH-TREE, TEREBINTH, Elon- (Josh. 19:33; Jgs. 4:11), "hinds" (Ps. 29:9), TREES (Isa. 61:3); **EVERGREEN OAK** [Gk. *prínos*] (Sus. 58); AV HOLM TREE; NEB "yew-tree" (for the sake of preserving pun in original; mg. "oak"); **TEREBINTH** [Heb. *'ēlâ*; Gk. *terébinthos*]; AV TEIL (Isa. 6:13), ELM (Hos. 4:13), TURPENTINE TREE (Sir. 24:16); NEB also OAK (Isa. 6:13). Several varieties of trees in the OT.

Hebrew *'ēlâ* (e.g., Jgs. 6:11, 19; 2 S. 18:9f., 14; Isa. 1:30; 6:13; Ezk. 6:13), Vulg. *terebinthus*, refers usually to the Palestinian terebinth *Pistacia terebinthus* var. *palaestina* (Boiss.) Post, though Gen. 35:4 probably refers to a true oak species. Cf. "valley of Elah" (1 S. 17:2, 19; 21:9) and "Elah" (Gen. 36:41; 1 K. 16:8). The *'allâ* (Vulg. *quercus*, Josh. 24:26) is an oak, perhaps *Quercus pseudococcifera* or *Q. palaestina*.

For Heb. *'ēlôn* the AV has "plain" (Gen. 12:6; 13:18; 14:13; 18:1; Dt. 11:30; Jgs. 4:11; 9:6, 37; 1 S. 10:3), but almost certainly the references are to species of the true oak, perhaps *Quercus coccifera* var. *pseudococcifera* (Desf.) Boiss., *Q. ilex* L., or *Q. aegilops*. In Josh. 19:33; Jgs. 4:11 the AV ("Allon") and NEB ("Elon-bezaanannim") take the same word as a proper name.

Hebrew *'êlîm*, perhaps the plural of *'ēlâ*, is probably *Q. coccifera* L., *Q. ilex*, or *Q. palaestina*. It occurs in Isa. 1:29; 57:5 (defective, AV "idols"); 61:3 (AV, NEB, "trees"). Heb. *'allôn* probably indicates the same varieties (Gen. 35:8; Isa. 2:13; 6:13; 44:14; Ezk. 27:6; Hos. 4:13; Am. 2:9; Zec. 11:2).

In Ps. 29:9 the RSV has "oaks," reading *'êlôṯ* for MT *'ayyālôṯ*, but probably the AV, RSV mg., and NEB are correct in translating "hinds."



Greek *prínos* (Sus. 58) is generally agreed to be the evergreen holm oak, *Quercus ilex* L., one of numerous kinds of oaks now growing in Palestine. *Q. ilex* is often stunted and bears glossy green leaves like the holly. The reference plays on the words *prínos* and *prísai*, "saw" (vv. 58f.). *See* SUSANNA.

There are two dozen kinds of oaks in Palestine, and in antiquity the Hebrews probably used a variety of terms for them. Confusion in identification may well arise from the similarity between the Hebrew words for "oak" and "terebinth." The Palestinian terebinth (Sir. 24:16, AV "turpentine tree") is a deciduous species attaining a maximum height of 7.6 m. (25 ft.) and is notable for the fragrant resinous juice in the leaves and branches. It is seldom found in clumps, thickets, or forests and grows in localities too warm or arid for the oak. The Cyprus turpentine of commerce is derived from this species. Since it was native to Gilead its resinous juice was probably part of the "spicery" carried by the Ishmaelite caravan to Egypt (Gen. 37:25). Some commentators have identified the "oak" of Jgs. 6:11; 2 S. 18:9; Am. 2:9 with the terebinth, but this is improbable.

Commonly found are the evergreen oaks, *Q. ilex, Q. palaestina*, and *Q. coccifera*; the deciduous oaks are principally *Q. aegilops, Q. cerris, Q. libani, Q. syriaca*, and *Q. lusitanica*. Of the evergreens, *Q. ilex* is shrublike, with prickly, dark-green leaves. *Q. coccifera* is somewhat larger and is distributed over the mountainous regions of Syria and Palestine. It is infested by a parasite, *Coccus ilicis* ("kermes"), which yields a scarlet dye (cf. Isa. 1:18).

The deciduous species *Q. cerris* is common in Palestine, attaining a maximum height of 18 m. (60 ft.). It bears large acorns and produces a hard, finely grained wood. *Q. aegilops*, the Valonea oak, has prominent oblong leaves and large acorns, whose cupules ("valonica") are used in

Terebinth (*pistaschia terebinthus*) in a corner of the Ḥaram esh-Sherîf (the temple mount in Jerusalem) (J. C. Trever)

tanning leather. *Q. lusitanica* seldom exceeds 9 m. (30 ft.) in height, and its branches are subject to infection with galls.

The oak was sometimes connected with a particular historical event, e.g., Abraham's oak at Hebron, and the "oak of weeping" (Gen. 35:8). The "groves" or trees surrounding Canaanite shrines have been interpreted animistically as the abodes of spirits that were venerated in worship, but Canaanite texts furnish little support for this view. The Hebrews certainly worshiped idols under oak trees (Isa. 1:29) in characteristic Canaanite fashion, and the oak may also have been a favorite place for outdoor divination (Gen. 12:16), not so much because of any inherent oracular features in the tree itself but because it afforded welcome shade from the sun. A famous Greek shrine was located at Dodona in Epirus, where the priests lay down among the oak groves to receive messages from the deities that supposedly spoke through the rustling leaves of the tree. R. K. H.

OAK OF TABOR. *See* TABOR, OAK OF.

OAK OF THE PILLAR [Heb. *'ēlôn muṣṣāḇ*] AV PLAIN OF THE PILLAR; NEB OLD PROPPED-UP TEREBINTH. This tree was doubtless one of many solitary oaks of magnificent proportions that grew in ancient Palestine. It was a feature of the landscape at Shechem and witnessed numerous important civic ceremonies, including the coronation of Abimelech (Jgs. 9:6). The oak may have also been the very one under which Jacob buried the jewelry of his wives (Gen. 35:4), and perhaps the site of Joshua's monument to commemorate the covenant-renewal ceremony (Josh. 24:26). Whereas the RSV reads "oak" in the above references, the New King James Version has "terebinth" in Gen. 35:4 and Jgs. 9:6 (see NEB).

See also PILLAR. R. K. H.

OAR. *See* SHIPS.

OATH. The confirmation of a statement or promise by an oath occurs in all cultures of the world. It is usually associated with maledictions when it is broken (*see* CURSE), but with benedictions when it is kept (*see* BLESS). The oath is also associated with the promise, the contract between two parties, sometimes with legal enforcement and with the judgment of God. While generally spoken, it sometimes is accompanied by certain GESTURES to emphasize the seriousness of the occasion. An oath can be taken between two persons or parties, taken by a person to verify his promise to another, or taken in the name of God.

I. Oaths in the Ancient Near East
II. Terminology
III. Characteristics of the Oath
IV. The Oath Between Two Parties
V. The Oath Taken by the Lord
VI. The Oath in NT Times

I. Oaths in the Ancient Near East.–In Akkadian the oath is usually expressed by the technical term *nišum,* which is associated with *balāṭum,* "to live." This technical term is used in two ways: (1) *niš ilim,* "by the life of the god"; (2) *niš šarrim,* "by the life of the king." This can be interchanged by "may the god Šušinak live forever." In Am.Tab. 256 the following oath formula occurs: "As the king my lord lives, as the king my lord lives, Ayab is not in Pella" (*ANET,* p. 486). The repetition stresses the importance of the oath, which may be classified as religious because the Egyptian king was regarded as divine.

The oath was also used in Mesopotamia in the juridical sphere. The purification oath or ordeal oath played a very important role. The river ordeal is a well-known phenomenon where, e.g., a supposedly unfaithful wife was thrown into the river. If she succeeded in escaping the ordeal, she was purified and declared innocent. In Mesopotamian contracts the oath was not regarded as a necessity and in many instances it was not expected that witnesses would take an oath.

In Egypt the technical term for oath was *'nḫ,* "to live," or its substitute *w3ḥ,* as in Mesopotamia. Here also the oath could be taken in the name of the god or the king, e.g., "may the god live for me," or "may the king live for me." A person could even take an oath by himself, e.g., "may I live." In these cases it is understood to mean: "may the god live for me if I speak the truth."

In both these ancient cultures the danger of an oath was fully realized. There is evidence that in the Late Sumerian Period the oath was refused. In the Third Intermediate Period of Egypt the Wisdom of Amenemope (*ca.* 1000 B.C.) warned against the abuse of an oath. Still later the following pronouncement was made: "One who is quick to take an oath, will be quick to meet his death." Thus a negative reaction to an oath is older than many scholars have suspected.

The Hittites occasionally used the oath in their vassal treaties. If the oath was broken (*šarra-*), certain curses would come into effect, a general feature of most Ancient Near Eastern oaths. The Hittite military oaths exhibited the same characteristics (from *ca.* 1400 B.C.).

In the Canaanite-Phoenician world there is a strong resemblance between the oath and the vow (*ndr*). The vow occasionally occurs in Phoenician texts, suggesting that the vow must be regarded as an oath. In the Ugaritic Keret epic Keret makes a vow at the sanctuary of Asherah and Elat that if he acquires a wife, he will pay twice her price in silver and thrice her price in gold. When Keret does not meet his commitment, he becomes fatally ill. It is thus obvious that a curse accompanied the vow if it was broken, as with the oath.

II. Terminology.–In the OT the stem *šbʿ* in the niphal and hiphil expresses the idea "to take an oath," "to swear," or "to adjure," i.e., cause someone else to take an oath (2 S. 21:17; 1 K. 22:16 par. 2 Ch. 18:15; note also the use of the hiphil several times in Canticles for "adjure" as the heroine imposes an oath on the "daughters of Jerusalem"; on this oath *see also* GAZELLE). The noun is *šᵉḇûʿâ.* This stem occurs 216 times in the OT, demonstrating its importance. Not all its occurrences are associated with taking an oath. Sometimes it is closely linked with the curse. Another formula used to pronounce the oath is *kōh yaʿᵃśeh-lᵉḵā ʾᵉlōhîm wᵉḵōh yôsîp,* "may God do to me thus and add thus" (e.g., 1 S. 3:17). This oath is closely associated with the curse. Another term for the oath is *ḥālîlâ,* "may it be far from (me to do this or that)" (cf., e.g., Gen. 44:7, 17; Josh. 24:16; 1 S. 12:23). Still another formula for the oath is *ḥê-napšᵉḵā,* "as your soul lives" (1 S. 17:55). Interesting is the double form of the oath in 2 S. 11:11, the words of Uriah to David: *ḥayyeḵā wᵉḥê napšᵉḵā,* "as you live and as your soul lives" (cf. the example from Am.Tab. 256 cited above). This terminology has close affinities with that used in Mesopotamia and Egypt. In both these cases the oath is taken by the life of the king (cf. also Gen. 42:15). These formulas are sometimes followed by a negative or positive oath (the negative oath is usually introduced by *'im* and the positive oath by *'im lō'*; see GKC, § 149; *TWOT,* I, 48f.). Another term which can mean both oath and curse is *'ālâ.* In Lev. 5:1 *'ālâ,* "adjuration," refers to an oath or self-curse; one who makes such an oath sins (*ḥāṭâ'*) if he does not testify as he said he would. The verb *nāḏar,* "take a vow," closely resembles the meaning "take an oath."

In the NT the most common term for oath is *hórkos* (Mt. 14:7, 9; 26:72; Mk. 6:26; Lk. 1:73; Acts 2:30; He. 6:16f.; Jas. 5:12). The related noun *horkōmosía* is also used (He. 7:20f., 28). Several related verbs are translated "adjure": *horkízō* (Mk. 5:7; Acts 19:13), *exorkízō* (Mt. 26:63), *enorkízō* (1 Thess. 5:27). The noun *anáthema* (lit. "curse") occurs once for "oath" (Acts 23:14), and its related verb *anathematízō* is translated "bind by an oath" in Acts 23:12, 14, 21. Finally, *opheílei* (<*opheílō*, "owe, be indebted") is also translated "bind by an oath" in Mt. 23:16, 18.

III. Characteristics of the Oath.–A. Conditional. The one who takes the oath can be exempted from it under certain circumstances. In Gen. 24 Abraham instructed his chief servant to fetch a wife for Isaac from Mesopotamia, rather than from the Canaanites. Because of possible difficulties in keeping the oath, Abraham exempted him from it if the woman was unwilling to return with him (Gen. 24:8). In Josh. 2:17 Rahab of Jericho requested the Israelite spies to swear that they should show kindness to her and her family when they conquered the city. The spies agreed on the condition that a scarlet cord should hang outside the window of her house where her whole family was assembled. If not, they would be exempted from their oath.

B. Unconditional. This is the most common oath in the OT. In Gen. 47:28-31 the aged Jacob requested Joseph not to bury him in Egypt, but with his fathers. Joseph took this unconditional oath to fulfil his father's wish and thus was bound by it. (50:5 notes that Joseph kept his oath.)

C. Binding on later generations. In Gen. 50:25 Joseph requested that the Israelites carry his bones from Egypt to Canaan for burial. Gen. 50:26 shows that the body of Joseph was embalmed and kept in Egypt until the Exodus, when his bones were taken for burial in Canaan. 2 S. 21:2 and 7 records the oath taken by the Israelites (Josh. 9) to spare the Gibeonites and conclude a vassal treaty with them. Saul, however, had broken this oath and annihilated them, causing a famine to rage during David's reign. David decided to make amends because of the binding force of the oath in the time of Joshua. The causality of the binding force of the oath is clearly important in this story. A. Malamat (*VT*, 5 [1955], 1-12) has shown that the same approach existed among the Hittites, where the calamities in the time of Mursilis II were interpreted as punishment for the breach of a treaty concluded by his father Šuppiluliuma with the Egyptians. An oath was clearly regarded as binding on later generations, and if broken required certain reparations. The breaking of an oath, or PERJURY, was regarded as a grave offense (cf. Jer. 7:9). Ps. 24 gives certain characteristics of a pious supplicant, including that he should not commit perjury (v. 4). People are warned not to take an oath lightly. If one makes a vow to God, one must not be slow to fulfil it, because it is better not to take a vow than to take it and not fulfil it (Eccl. 5:4ff.). This is a remarkable parallel to the story of Keret and to the Egyptian material cited above.

D. Sacred and Profane Oaths. It is sometimes difficult to determine whether an oath is profane or sacred, since certain descriptions of the taking of an oath do not mention God. Some scholars have thought that this must be understood, since there could hardly be an oath without indirect reference to the Lord. The one that takes an oath is always obliged to the Lord to keep it. Although this approach might be true for most examples of oath-taking, it is not uniformly so, as the instances where the oath is taken on the life of the king demonstrate (cf., e.g., 1 S. 17:55; 2 S. 11:11).

E. Purification oath. This was well known among the Israelites. It could be an oath taken at the sanctuary in the name of God to proclaim a person innocent (Ex. 22:8). To purify him from suspicion of the crime of theft, he had to go to the sanctuary to take an oath that he had not stretched out his hand to his neighbor's property (cf. also the Code of Hammurabi, §§ 125f., and esp. the Laws of Eshnunna, §§ 36f.). Another kind of purification oath is the ordeal. In Nu. 5:5ff. a woman suspected of adultery was forced to drink a concoction of water and dust and swear that she was innocent of adultery. If she swore falsely, the Lord would cause her thigh to waste away and her abdomen to swell. If she was innocent, this oath would purify her and nothing would happen to her (cf. the discussion above on the ordeal by river in Mesopotamia). It is clear that this oath, performed at the sanctuary in the presence of a priest with the Lord to execute the punishment in case of perjury, is placed in the religious sphere (cf. also 1 K. 8:31f.). It was not humanly possible to decide whether the wife was innocent. The same was true of the theft of movable property.

IV. The Oath Between Two Parties.–This kind of mutual oath could be executed between two persons, or between two countries in the international sphere. The former is best illustrated by the mutual oath of David and Jonathan to remain friends (1 S. 20:42; cf. David's lament on Saul and Jonathan in 2 S. 1, esp. v. 26).

In the sphere of international law parity and vassal treaties required both parties to take an oath. The vassal treaties show that the vassal was bound by an oath in the names of several gods to keep the stipulations of the treaty. If the treaty should be broken, the incorporated curses would take effect. This can be seen in the Hittite vassal treaties, the Assyrian vassal treaties of Esarhaddon, and the Aramaic vassal treaty of Sfire. That this custom was also known in Israel is clear from certain incomplete treaty contracts, e.g., Josh. 9 (notably vv. 14f.). The vassal treaty concluded between Israel and the Gibeonites was ratified by oath, which was later broken, bringing the curse of a famine in the time of David.

The oath that normally confirmed a covenant is absent from the oldest biblical form (Ex. 24). In Deuteronomy, however, the oath is mentioned, but then taken only by God (cf., e.g., Dt. 4:31). There may be traces of a possible mutual oath in Dt. 26:16-19. In such a case the stem *'mr* is used to express the taking of an oath. The Israelites have declared that the Lord is their God and that they will keep His commandments. The Lord has declared that Israel is His people, His treasured possession. The covenant formula is clearly present in both these expressions.

V. The Oath Taken by the Lord.–The oath is also used theologically, indicated by instances where the Lord is the subject of the verb *šāḇaʿ* (niphal), "swear." Nowhere is the Lord subject of the causative (hiphil) form of the verb, since people do not cause the Lord to swear. The formula used with the Lord as subject closely resembles the ordinary oath formula, viz., that one has to take an oath by someone or something. But the Lord takes an oath by Himself (cf. He. 6:13). This is expressed in various ways, e.g., by the preposition *bᵉ* (e.g., Gen. 22:16; Ex. 32:13; Jer. 22:5) or by *napšô* (Am. 4:2; Jer. 51:14). The Lord also swore by His holiness (Am. 4:2; Ps. 89:35 [MT 36]), by the pride of Jacob (Am. 8:7), and by His faithfulness (Ps. 89:49 [MT 50]).

In thirty-four instances God swears concerning the promise of the Holy Land, but elsewhere about the nation, the Davidides (e.g., Ps. 89:4 [MT 5]; 132:11), and the priestly king (Ps. 110:4). In all these cases the oath is taken to benefit people (Isa. 54:9ff.; Mic. 7:20; Josh. 21:44; Gen. 22:16ff.).

In a number of cases the oath of the Lord has a threat-

ening character: against Israel (e.g., Nu. 32:10), the city of Jerusalem (Am. 6:8), or the Assyrians (Isa. 14:24ff.). It is also directed against individuals or families (1 S. 3:14), or groups such as the women of Israel, all of whom will be punished if they are disobedient.

VI. The Oath in NT Times.–The use of *šbʿ* in the Qumrân literature shows that the oath was still well known in the 1st cents. B.C. and A.D. A novice who was accepted as member of the community was obliged to take an oath to keep the laws of the community (1QS 5:8). The poets of the Qumrân *Hôḏāyôṯ* were obliged to promise not to sin (1QH 14:17), but a certain reticence to take an oath is observable.

The oath of confirmation plays an important role in the NT. Some scholars are of the opinion that the introductory formula *amēn* used by Jesus must be interpreted as a confirmation oath (see Talmon). Peter's self-curse in Mk. 14:71 must be interpreted as an oath. In his letters Paul occasionally uses the oath of confirmation, e.g., when he calls on God as witness that he remembers the Romans in his prayers (Rom. 1:9).

Covenant oaths are also mentioned in the NT. In Lk. 1:73 Zechariah refers to the oath God has sworn to Abraham; in Acts 2:30 Peter refers to God's promise of succession. Other examples (Rom. 14:11; He. 3:11, 18; 4:3; 6:13-17) reflect the OT conception of the divine oath.

In the passage dealing with swearing falsely and the prohibition of oath (Mt. 5:33-37; cf. also 23:16-22; Jas. 5:12), Jesus criticized all of the things used by the Jews for taking an oath. Instead He taught that it was better to avoid an oath by making a positive or negative decision on a person's attitude toward a certain problem. He stressed the seriousness of oaths because the oaths were made to the Lord (cf. Mt. 5:33).

F. C. FENSHAM

OBADIAH ō-bə-dī'ə [Heb. *ʿōḇaḏyāh, ʿōḇaḏyāhû*–'servant or worshiper) of Yahweh'; Gk. *Abdiou*]. A common name in Israel comparable to "Christian" in English or "Abdullah" ("servant of Allah") in Arabic.

1. AV also ABDIAS (2 Esd. 1:39). The prophet (see the next article).

2. Ahab's chamberlain; he did his best to protect Yahweh's prophets from Jezebel, and carried the news of Elijah's reappearance to Ahab (1 K. 18:3-16).

3. A descendant of David (1 Ch. 3:31).

4. The son of Izrahiah and chief of the tribe of Issachar (1 Ch. 7:3).

5. The son of Azel, a Benjaminite, and a descendant of Saul (1 Ch. 8:38; 9:44).

6. A Levite descended from Jeduthun (1 Ch. 12:9); called Abda in Neh. 11:17 (*see* ABDA 2).

7. David's officer, a Gadite chief (1 Ch. 12:9 [MT 10]).

8. A chief of Zebulun, father of Ishmaiah (1 Ch. 27:19).

9. A prince of Judah sent by Jehoshaphat to teach the law in Judah (2 Ch. 17:7-9).

10. A Merarite who oversaw the repair of the temple under Josiah (2 Ch. 34:12).

11. AV, NEB, also ABADIAS (1 Esd. 8:35). The head of a family who went up with Ezra from Babylon (Ezr. 8:9).

12. One of the men who sealed the covenant with Nehemiah (Neh. 10:5 [MT 6]); perhaps the same as **10.**

13. A gatekeeper under Joiakim, the high priest in Nehemiah's time (Neh. 12:25).

J. D. W. WATTS

OBADIAH, BOOK OF. The fourth of the Minor Prophets (fifth in the LXX). Obadiah is the shortest book in the OT: one chapter of twenty-one verses.

I. Name and Date
II. The Book
  A. Outline
  B. Composition
    1. Foreign Prophecy
    2. Prophetic Liturgy
    3. Relation to Jeremiah
  C. Meaning and Message
    1. The Dominion of Yahweh
    2. Edom
  D. Text

I. Name and Date.–The book is called "a vision" (Heb. *ḥāzôn*). This designates a prophetic book (cf. Isa. 1:1; Nah. 1:1) which interprets the work of God in history (cf. *TDOT*, IV, 283; here Jepsen defines *ḥāzôn* as "an event in which words are received"). OBADIAH is a fairly common name in Israel meaning "servant (or worshiper) of Yahweh." The short superscription adds nothing to identify which Obadiah is meant.

With no identifying marks for its author, the date of the book can be learned only from a study of the book itself. The focus of the book is obviously EDOM. The period of Edom's existence parallels that of Israel, and a number of conflicts erupted between them. Those who judge the order of books in the Minor Prophets to have been determined by chronology see events in the reigns of Jehoshaphat (872-852 B.C.) recorded in 2 Ch. 20 or those under Jehoram (852-845 B.C.) recorded in 2 K. 18–20 as possible backgrounds for an eighth-century date. Those who are not bound to an early date find more explicit correspondence in the destruction of Jerusalem in 586 B.C. when the city was plundered and refugees cut off in flight (2 K. 25:3-7). Bitter references in Lam. 4:21 and Ps. 137:7 seem to imply that Edomites participated in the plundering of the city that followed. If this is the reference in Ob. 10-14, the book must have come into existence after that.

The matter of dating becomes more complicated when the book is divided up into two or more separate oracles, as with J. A. Bewer (pp. 3ff.) and R. H. Pfeiffer (*PIOT*, pp. 585f.), or regarded as an anonymous assemblage of several fragmentary oracles (W. O. E. Oesterley and T. H. Robinson, *Intro. to the Books of the OT* [repr. 1958], pp. 370f.). Given such presuppositions, a date of *ca.* 400 B.C. or even later could be postulated for the finished work. The relationship between Obadiah and Jeremiah will also be an important factor in determining the date.

Obadiah 1-4 announces the imminent end of Edom. Its closing days came at the end of the 6th cent. and the beginning of the 5th when the Nabateans occupied the country. This marks the latest date for the book. Mal. 1:2-4 implies that Edom stands in ruins.

II. The Book.–A. Outline. The book is composed of a series of prophetic words of different types, all about the coming fall of Edom and all leading up to the announcement of God's sovereign rule.

Superscription (v. 1a)
Audition: "Rise to battle!" (v. 1b-c)

OBADIAH, BOOK OF

First Announcement of Judgment (vv. 2-4)
Second Announcement of Judgment (vv. 5-10)
Indictment and Deprecation (vv. 11-14)
A Theological Explanation (vv. 15-16)
A Vision of Conditions to Follow (vv. 17-21)

B. Composition. The book is composed in a fashion that is familiar in the prophets.

1. Foreign Prophecy. A major feature of prophetic books in the OT is found in those prophecies relating to nations other than Israel and Judah. They witness to the universal rule of Yahweh. Major books have sections made up of these prophecies, while several complete books, including Obadiah, are prophecies about foreign nations.

Obadiah focuses on Edom, which appears in many other such prophecies. Edom is judged for misconduct against its "brother Jacob" and against Jerusalem. Pride has brought Edom down. So now on Yahweh's day for action against all the nations Edom is singled out for particular attention. This will show that the right of rule really does belong to Yahweh. The correct way to understand foreign prophecies is to see them as a part of Yahweh's royal exercise of authority as universal king.

2. Prophetic Liturgy. The composition of prophetic books is highly complex and is often difficult to understand. Many of them, like Obadiah, give evidence of being arranged in a way that fits liturgical presentation. When they are read in order, like a cantata, they display an artistic whole that is most effective. The audience is clearly Judeans and Israelites of the dispersion. The book brings a word from God.

Yahweh is understood to be the instigator of a call to battle against Edom (v. 1b-c). Twice Yahweh is quoted in direct announcement of judgment (vv. 2 and 4, and v. 8). The first two verses speak of judgment for Edom's arrogance and pride toward God. The last verse links the judgment to "violence done to their brother, Jacob."

The indictment is expanded in v. 11 while vv. 12-14 scold Edom for its actions "on the day of Israel's misfortune."

This historical judgment means much more to Israel than just vengeance on an enemy. It is set in the frame of Yahweh's great day in which justice is made real and the purpose of God's election of Zion and Israel will be fulfilled (vv. 15-18). For believing Israel, the sequence of events had implied an end to all God intended for it. Obadiah's message is that God will accomplish His purpose for His chosen through and beyond the tragic circumstances they endure. Justice that brings destruction to Edom is the same justice that gives Israel a future on Zion and in their own possession.

The final passage justifies the title of the book. It is a vision of things to come as elements of the dispersion move back to possess the promised land (vv. 19f.). Their leaders are called "saviors" who from Zion will rule over the land of Edom as in David's time (v. 21a). This will be a sign that the right of rule really does belong to Yahweh (v. 21b).

3. Relation to Jeremiah. Verses 1b-4 are remarkably similar to Jer. 49:14-16 and v. 5 to 49:9. In the nineteenth century, the literary relationship was analyzed by C. P. Caspari (pp. 7ff.), who concluded that Jeremiah had taken parts of an earlier oracle against Edom and reworked and expanded it in his own language. K. H. Graf (*Der Prophet Jeremia erklärt* [1862], pp. 559ff.) and S. R. Driver (*Intro. to the Literature of the OT* [repr. 1956], pp. 319f.) were among those who accepted this view, but Driver also followed H. Ewald (*Prophets of the OT* [Eng. tr. 1868], II, 277ff.) and Graf in thinking that, whereas Jeremiah had taken liberties textually with an earlier prophecy against Edom, Obadiah had cited it more faithfully. By contrast, Bewer concluded that Jeremiah had preserved the original oracle of Ob. 1-9 better than Obadiah himself did (p. 3), and T. H. Robinson concurred in this opinion. L. C. Allen (pp. 132f.) along with some other conservative authors, also considered Jer. 49 to be more primitive.

In addition to reflections of Jeremiah in Obadiah's prophecy, there appears to be a direct allusion in Joel 2:32 (MT 3:5) to Ob. 17. It is difficult to determine whether Joel was quoting the alleged earlier oracle which some scholars think both Jeremiah and Obadiah used, or whether he was actually citing one of these prophetic authors. If Joel was prophesying between 597 and 587 B.C. (cf. Joel 1:13f.; 2:15-17), he could have been reflecting the earlier prophecy rather than Jeremiah or Obadiah. But if Joel prophesied after the Exile, he may only have alluded in a general manner to one aspect of seventh-century B.C. prophetic eschatology rather than to the utterances of specific prophets of that period.

C. Meaning and Message. 1. The Dominion of Yahweh. The book has meaning when it is perceived as a prophetic and liturgical application of the OT understanding of God's rule over Israel and the nations (v. 21c). The OT teaches that Yahweh's dominion includes the nations, but that He has a special relation to Israel. This special relationship determines His relation to specific nations. The OT also teaches God's promise to unite Israel in Canaan.

God's acts toward the nations concern Israel because God uses the nations to accomplish His will for His people. If God fails to restrain the nations from pressure on Israel, it is seen as a judgment on Israel. When the nations are subdued, it is seen as God's acts on behalf of Israel. God holds the nations accountable for their acts toward Israel.

Within that setting, Obadiah sees the announced attack that will destroy the remnant of Edom as divine retribution for Edom's earlier attitude and action against Israel. Edom's destruction may also be seen as a sign of Yahweh's renewed dominion over the world, of His continued special relation to Israel, and of His loyalty to His promise to unite Israel again in Canaan.

2. Edom. Edom has theological significance in the OT. Edom is seen as the descendant of Esau (Dt. 23:7) and thus Israel's brother, both by blood and by treaty (Am. 1:11). But kinship and common interests also created conflict. David subdued Edom (2 S. 8:13f.) and Judah fought often with Edom (e.g., 2 K. 14:7). On other occasions they were allies against invaders (e.g., 2 K. 3).

In the Babylonian destruction of Jerusalem in 587 B.C. Edom was somehow involved in ways that Israel considered treacherous and unfair. Obadiah joins Ps. 137:7; Isa. 34:3-15; 63:1-6; Jer. 49:7-22; Lam. 4:21f.; Ezk. 35:3-15 (cf. Jth. 7:8, 18; 1 Esd. 4:45) in seeing God's judgment on Edom as a meaningful aspect of the Day of the Lord in which justice is finally done for an earlier wrong. This is evidence of God's faithfulness to do justice and to keep His promises concerning Israel's special relation to Him.

D. Text. The brevity of the prophecy has probably contributed to a reasonably good preservation of the text. Some scholars have postulated dislocations or transpositions in vv. 5, 15, and 21, along with certain early annotations to vv. 19f. In v. 6, the LXX, Syr., and Vulg. read the singular *niḥpaś* ("has been pillaged") for MT *neḥpᵉśû* (see AV). The LXX of v. 9 placed the final words "by slaughter" at the beginning of v. 10, making a couplet of "slaughter and violence," and this tradition was followed in the NEB (cf. AV, RSV). Verse 20 presents certain difficulties, with the MT reading "the captivity of this army" (see AV). This was rendered conjecturally by RSV as "the exiles in Halah" and by the NEB as "exiles of Israel." In v. 21, the LXX, Syr., and some versions had

"those who have been saved" (interpreting MT *môšî'îm* as a presumed hophal part., *mûšā'îm*) for "saviors" (RSV, AV) and "those who find safety" (NEB).

J. D. W. WATTS

OBAL ō'bəl [Heb. *'ôḇāl*] (Gen. 10:28). Son of Joktan and ancestor of an Arabian tribe; called Ebal in 1 Ch. 1:22. The location of the tribe has not been identified (see M. F. Unger, *Archaeology and the OT* [1954], pp. 98f.).

OBDIA ob-dī'ə (AV, NEB, 1 Esd. 5:38). *See* HABAIAH.

OBED ō'bed [Heb. *'ôḇēḏ, 'ōḇēḏ*–'worshiper'; Gk. *Iōbēd*].

1. Son of Ruth and Boaz; father of Jesse; grandfather of David; ancestor of Jesus (Ruth 4:17, 21f.; Mt. 1:5; Lk. 3:32).

2. Son of Ephlal, a descendant of Jerahmeel the Judahite (1 Ch. 2:37f.).

3. One of David's "mighty men" (1 Ch. 11:47).

4. A Korahite gatekeeper at the temple, son of Shemaiah; described as a man "of great ability" (1 Ch. 26:6f.).

5. Father of Azariah, one of the commanders who aided Jehoiada in deposing Queen Athaliah and crowning Joash (2 Ch. 23:1).

6. [Gk. Apoc. *Ōbēth*]; AV, NEB, OBETH. Son of Jonathan; one of the men who returned from Babylon with Ezra (1 Esd. 8:32); called Ebed in Ezr. 8:6.

OBED-EDOM ō'bəd ē'dəm [Heb. *'ōḇēḏ 'ĕḏôm*–'servant of Edom'(?)].

1. A Philistine living somewhere between Kiriath-jearim (where the ark of God had been for some twenty years, 1 S. 7:1f.) and Jerusalem (2 S. 6:10-12; 1 Ch. 13:13f.; 15:25). He was a Gittite (i.e., from Gath) who had taken up residence in Judah. After the sudden death of Uzzah — who had touched the ark while it was being transported to Jerusalem — David was afraid to move it further and left it at the house of Obed-edom. During the three months the ark remained with Obed-edom, he and his household were blessed by Yahweh. This was a clear sign to David that he should bring the ark to Jerusalem, which he did with much rejoicing.

2. A Levitical gatekeeper and musician; son of the musician Jeduthun (1 Ch. 16:38). His primary work was apparently that of gatekeeper (15:18, 24; 16:38), but he was also among those assigned to play the lyre before the ark of the covenant (15:21; cf. vv. 16-18; 16:5).

3. Head of a Korahite family of gatekeepers assigned to the south gate of the temple and the storehouse (1 Ch. 26:4, 8, 15). He was blessed of God in that he had sixty-two sons and descendants who served as gatekeepers, and they were men of great ability (26:4-8).

4. A temple servant in charge of its vessels and precious metals. Joash king of Israel took Obed-edom hostage when he defeated Amaziah of Judah in battle, sacked Jerusalem, and stole the sacred vessels and silver and gold of the temple (2 Ch. 25:24).

OBEDIENCE. *See* HEAR.

OBEDIENCE OF CHRIST.

I. His Outward Obedience.—At times the Gospels note Jesus' obedient response to the claims of human authority and custom, His subjection to His parents (Lk. 4:16), His observance of religious ordinances (Lk. 4:16), and His payment of tribute money (Mt. 17:24ff.). But the chief emphasis is that His whole earthly career was worked out step by step in perfect obedience to God's plan for Him as Savior (cf. Mt. 3:15). He lived under the constant constraint of fulfilling this career, which climaxed in His baptism in blood on the cross (Lk. 24:26). Knowing well from the start all that it involved (Mk. 2:20), He set His face unflinchingly in the direction of its fulfillment (Lk. 13:22). His whole career is described as "obedience" in Phil. 2:6ff.; He. 5:8. It is the fulfillment of the prophecy of Ps. 40:7 (MT 8) (cf. He. 10:7).

II. His Inward Obedience.—Christ's obedience was not automatic. He struggled greatly to overcome temptation from outside (cf. Mk. 1:13; Mt. 16:23) and to subdue what in Himself required stern and wholehearted discipline to bring it fully into line with God's purpose. He shrank from the agony involved in obedience (Mt. 26:38ff.). Although it was not possible for Him to sin, He nonetheless was tempted with a severity that He alone could resist triumphantly (cf. He. 4:15).

In making His obedient choice of God's will, He was completely without sin (Jn. 8:46; 2 Cor. 5:21; He. 4:15; 7:26). He claimed for Himself a perfect obedience in all the inward thoughts and tendencies of the heart: a continual openness of mind to learn what was God's will and a continual readiness to do it (Jn. 8:28), an inability to act without divine leading (5:19) or to judge anything apart from God (v. 30), a continual concern never to fail God in His work (9:4). He had such an identity of will with the Father that He could say: "The Father is in me and I am in the Father" (10:8; cf. 14:10). 'I and the Father are one" (Jn. 10:30) is not simply a metaphysical statement. It is His affirmation that in Himself "there is no purpose of self; no element of self-will; no possibility, even for a moment, of the imagination of separateness" (Moberly, pp. 99f.).

III. His Active and Passive Obedience.—As well as having the active element of fulfilling a victorious career in the midst of the moral, spiritual, and other conflicts of life, His obedience had a passive aspect of acknowledging the judgment of God on sinners, with whom He more and more identified Himself, and of taking the responsibility for their sins. Such obedience ultimately meant submission to the shame and dereliction of the cross.

Thus in Christ's career and response to God an "active" and a "passive" obedience can be distinguished, as classical Protestant theology frequently does. But these two aspects of Christ's obedience cannot be separated. "They do not differ in time: both extend from the beginning of the incarnation to the death. Nor in subject; the same obedience is active and passive in a different respect" (Wollebius, in H. Heppe, p. 467).

IV. The Place of Obedience in the Atonement.—Due weight must be given to Rom. 5:19, "As by one man's disobedience many were made sinners, so by one man's obedience many will be made righteous," and to He. 9:14, "who through the eternal Spirit offered himself without blemish to God." It is obvious that the whole course of Christ's earthly obedience, as well as His death, contributes toward the full accomplishment of the atonement. Thus Calvin thought of the obedience of Christ as His merit and insisted that His reconciling and sanctifying work in human nature was carried out throughout His life on earth.

The Westminster Confession of Faith (cf. 8.5 and 11.3) distinguishes, almost sharply, between Christ's obedience and His death. Some have tended to attach His obedience to the work of sanctification and His death to the work of satisfaction. Moberly (pp. 98f.) suggested that the cancellation of the past should be attributed to the offering of atonement, and the sanctification of the present to the offering of obedience (cf. also Rom. 5:10).

No basis may exist, however, for such fine distinction. People require His obedience for their atonement, and fellowship with His death as well as with His life for their sanctification (cf. He. 10:10). As Denney said, "Obedience is the one term by which His work can always be described in relation to God" (*Death of Christ*, p. 232; cf. *Christian Doctrine of Reconciliation*, pp. 94-96). In the cross the obedience seems to be as important as the event; as P. T. Forsyth pointed out, what matters in it is not simply the "depth of agony" but also the "height of surrender" (p. 193).

Yet His saying (Lk. 12:50) "I have a baptism to be baptized with; and how am I constrained until it is accomplished" undoubtedly concentrates on His death as the focal point and fulfillment of His whole life's purpose. His death is significant as a deliberate act of "laying down" His life (Jn. 10:17). The blood by which people are saved from their sins is undoubtedly the *obedient life* poured out in death (Rev. 1:5; Rom. 3:25), but it is doubtful if the analogy of sacrificial blood would have been used unless a good deal of emphasis could be placed on the death in which the life is poured out.

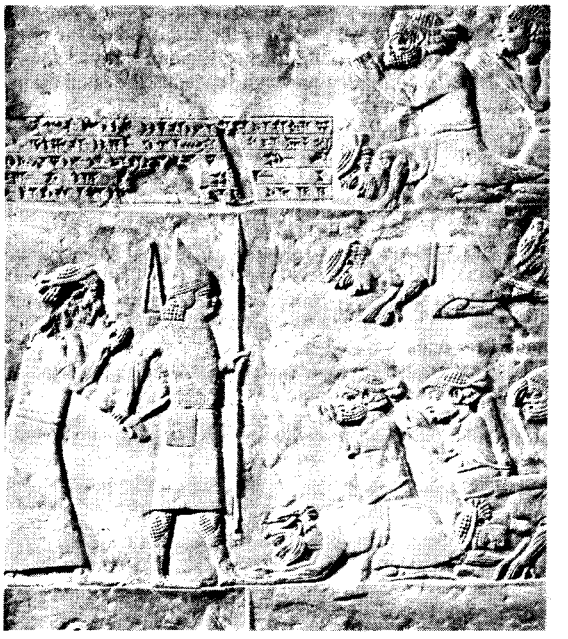
R. S. WALLACE

OBEISANCE [Heb. *hištaḥᵃwâ*–'bow down deeply, prostrate oneself']; AV also BOW ONESELF, DO REVERENCE, WORSHIP, "humbly beseech" (2 S. 16:4); NEB also PROSTRATE ONESELF, BOW LOW, "I am your humble servant, sir" (2 S. 16:4); **PROSTRATE** [Heb. *hištaḥᵃwâ* (Isa. 49:7), *nāpal*–'fall down, throw oneself down' (Ps. 36:12 [MT 13]; hithpael, Dt. 9:18, 25), *šāḥaḥ*–'bow down' (Ps. 38:6 [MT 7])]; AV FALL DOWN, FALLEN, BOWED DOWN, WORSHIP; NEB also LIE, BOW DOWN. A gesture of respect or submission, which involved dropping to one's knees and touching one's nose and forehead to the ground. *See* picture in JEHU.



The Hebrew verb *hištaḥᵃwâ* was formerly understood as the hithpalel of *šāḥâ* (cf. BDB, p. 1005; KoB, p. 959). Modern scholarship, however, has discovered the Ugaritic verbal root *ḫwy*, which has a form *yštḫwy*, "he prostrates himself"; and this has led to the conclusion that Hebrew once had a rare verbal root *ḫwh*, which has vanished except for the hishtaphel form *hištaḥᵃwâ* (*TDOT*, IV, 249). The form occurs 170 times in the OT (almost always translated *proskynéō* by the LXX). Its first meaning is the act of prostration, which can be performed before persons as a gesture of respect or submission or before Yahweh or other gods as an act of worship. Frequently it is used as a technical term for cultic worship (cf. the frequent prohibitions against "bowing down" [*hištaḥᵃwâ*] to other gods; e.g., Ex. 20:5; 23:24; Dt. 5:9; Josh. 23:7, 16; Ps. 81:9 [MT 10]). Thus the RSV most often renders it "worship" (e.g., Gen. 24:26, 48; Dt. 4:19; 8:19; 17:3; 26:10); the translation "bow (down)" is also common.

The RSV renders "do (or make) obeisance" in twenty-one passages where the term denotes prostration before a person. Frequently it represents HOMAGE paid to a king or ruler, especially when one is making a request. Thus Joseph's brothers make obeisance before him in fulfillment of his dream (Gen. 43:28; cf. 37:7, 9f.; 42:6; 43:26). Likewise, David prostrates himself before Saul (1 S. 24:8 [MT 9]); and Mephibosheth (2 S. 9:6, 8), the wise woman of Tekoa (14:4), Joab (v. 22), Ziba (16:4), Araunah (24:20; cf. 1 Ch. 21:21), Bathsheba (1 K. 1:16, 31), Nathan (v. 23), and the assembly of Israel (1 Ch. 29:20) prostrate themselves before David; cf. 2 S. 1:2; 15:5; 18:28; 1 K. 1:53; 2 Ch. 29:20. Such a gesture of respect is also shown to visitors by Abraham (Gen. 18:2) and Lot (19:1), to Esau by Jacob and his family (33:3, 6f.), to Israel by Joseph (48:12), to Jethro by Moses (Ex. 18:7), to Boaz by Ruth (Ruth 2:10), to Jonathan by David (1 S. 20:41), to David by Abigail (25:23, 41), to Samuel by Saul (28:14), to his mother Bathsheba by Solomon (1 K. 2:19), etc. Mordecai incurred Haman's wrath by refusing to prostrate himself before him (Est. 3:2, 5).

Captive Elamites doing obeisance before Assyrian soldiers. Relief from Ashurbanipal's palace in Nineveh (*ca.* 645 B.C.) (Trustees of the British Museum)

OBELISK ob'ə-lisk [Heb. *maṣṣēḇâ*–'pillar']; AV IMAGE; NEB SACRED PILLAR. Jeremiah 43:13 predicts Nebuchadrezzar's invasion of Egypt, prophesying that he will break the *maṣṣᵉḇôṯ* of Beth-shemesh, which is in the land of Egypt. The Heb. *maṣṣᵉḇôṯ* is appropriately rendered "obelisks" here (so RSV, JB, NAB) in view of the Egyptian context. Beth-shemesh, "house of the sun," is no doubt the Egyptian city of Yenew, "city of the column" (*see* ON), called by the Greeks Heliopolis, "city of the sun" (LXX "the pillars of Heliopolis, which are in On"). Located 9.6 km. (6 mi.) NE of Cairo, Heliopolis was the center of the sun-god Re (known also as Atum-Re). Seti I (*ca.* 1318-1304) boasted that he filled Heliopolis with obelisks.

According to the Heliopolitan theology the obelisk symbolized the primeval hill at the beginning of creation. It

became the symbol of the sun-god, guaranteeing life and prosperity to the pharaohs. Pliny the Elder called the obelisks "symbolic representations of the sun's rays" (*Nat. hist.* xxxvi.14.64, *LCL*). As sacred objects, they had offerings made to them.

Egyptians called obelisks either *tekhen* or *benben*. The latter word is derived from the verb *wbn*, "shine," indicating its association with the sun. As a joke Greek visitors called these huge monuments *obelisks* (<*obelós*, "spit"), i.e., "little spits."

Obelisks can be traced back to the 5th Dynasty (*ca.* 2400 B.C.), and they continued in use (with some lapses) through the Ptolemaic period. The Romans removed many Egyptian obelisks for their own use, as well as erecting some new ones.

The best known example of the obelisk shape in America is, of course, the Washington Monument.

Giedion, *Eternal Present II: The Beginnings of Architecture* (1964); A. Badawy, *History of Egyptian Architecture: The Empire* (1968); K. Martin, *Ein Garantsymbol des Lebens* (1977). E. M. YAMAUCHI

OBETH ō'beth (AV, NEB, 1 Esd. 8:32). *See* OBED 6.

OBEY. *See* HEAR.

OBIL ō'bil [Heb. *'ôḇîl*–'camel driver']. An Ishmaelite who was in charge of King David's camels (1 Ch. 27:30).

OBJECT. The verb is used by the AV in the archaic sense of "accuse" in Acts 24:19 (RSV "make an accusation"); Wisd. 2:12 (AV "he . . . objecteth to our infamy the transgressions of our education"; RSV "he . . . accuses us of sins against our training").

OBLATION. The RSV translation of Heb. *minḥâ* (1 K. 18:29, 36), which often signifies the cereal offering, but may be used here in the general sense of an offering or sacrifice (cf. AV, NEB, "sacrifice"; also RSV of 2 K. 3:20). The time of the evening sacrifice was around 3 p.m.

The AV uses "oblation" more often. Sometimes it translates *minḥâ* (Isa. 1:13; 19:21; 66:3; Jer. 14:12; Dnl. 2:46; 9:21, 27). In Leviticus (also Nu. 18:9; 31:50) it is occasionally used for *qorbān*, a general term for all kinds of offerings. In 2 Ch. 31:14; Isa. 40:20; Ezk. 44–48 it renders *t^erûmâ* (AV usually "heave offering"; RSV "offering" or "wave offering").

See SACRIFICES AND OFFERINGS IN THE OT.

OBOTH ō'both [Heb. *'ōḇôṯ*–'waterskins']. A station of the Israelites in their journey from Mt. Hor to Moab (Nu. 21:10f.; 33:43f.). In Nu. 33 the sequence given is: Mt. Hor, Zalmonah, Punon, Oboth, Iye-abarim in the territory of Moab. In Nu. 21 the route is deliberately taken to avoid Edom, and Iye-abarim is described as in the wilderness "opposite Moab toward the sunrise" (21:11) and followed by the next location at the valley of Zered. The place therefore would seem to be E of Edom, between Feinân (Punon) and Wâdī el-Ḥesā (Zered). It has been suggested (*LBHG*, rev. ed., p. 55) that several stations on the King's Highway are named in the biblical account, and *Macmillan Bible Atlas* (Map 52) indeed does locate Oboth on this road, N of Bozrah. Abel marks it as the crossroads of the Gaza-Petra and the Tell el-Milḥ-Aqaba highways (*GP*, II, 401). The intention to circumvent Edom, however, suggests a location farther east, possibly on the Way of the Wilderness (the desert road or "Pilgrim Road"; cf. Baly, *GB*, rev. ed., p. 97). One suggested site, namely, 'Ain el-Weiba, based principally on a supposed similarity of the Arabic and Hebrew names and supported by the fact that it would be a suitable campsite (*GTTOT*, § 439), is actually located on the western side of the Arabah, opposite Feinân. It therefore is to be rejected on two counts: the Israelites would have reached that site before they came to Punon (cf. Nu. 33:43), and it is toward the west, not the east (cf. Nu. 21:11). W. S. LASOR

OBSCURITY. A term used by the AV to denote total darkness. In Isa. 29:18 the AV renders "out of obscurity, and out of darkness" for Heb. *mē'ōpel ûmēḥōšeḵ* (RSV "out of their gloom and darkness"; NEB "out of impenetrable darkness"). Similarly, in 58:10; 59:9 "obscurity" renders *ḥōšeḵ* (RSV, NEB, "darkness") and "darkness" renders *'ōpel* (RSV "gloom"; NEB "dusk," "deep gloom"). In Prov. 20:20 "obscure darkness" renders *'išôn ḥōšeḵ* (*K*) (lit. "eye of darkness"; cf. RSV "utter darkness"; the NEB "darkness comes" renders *'ĕšûn ḥōšeḵ* [*Q*]).

The RSV uses "obscure" in the sense of "humble" or "unimportant" in Prov. 22:29 to render *ḥ^ašukkîm* (cognate of *ḥōšeḵ*; RSV "obscure men"; AV "mean men"; NEB "common men"), and in the sense of "impenetrable" or "unintelligible" in Isa. 33:19 for *'āmēq* (AV "deeper"; NEB "so hard to catch"; cf. Ezk. 3:5f., RSV "foreign"). N. J. O.

OBSERVE.

(1) [Heb. usually *šāmar*, also *ḥāgag* (Ex. 12:14), *'āśâ* (31:16), etc.; Gk. *tēréō* (Mt. 23:3; 28:20), *paratēréō* (Gal. 4:10), *phylássō* (Mt. 19:20 par.), *kratéō* (Mk. 7:3f.), *peripatéō* (Acts 21:21), *phronéō* (Rom. 14:6)]; AV also KEEP, REGARD, etc.; NEB also KEEP, DO, etc. In these passages "observe" means to practice, keep, or carry out. Heb. *šāmar* occurs frequently in the sense of "keep," especially with reference to obeying commands (e.g., Ex. 34:11; Lev. 19:37; 26:3; Josh. 22:5; Ps. 105:45) and celebrating feasts or holy days (e.g., Ex. 12:17; Dt. 5:12; 16:1). *Ḥāgag* ("celebrate a feast") and *'āśâ* ("do") are used in much the same way, as are also the NT terms.

(2) [Heb. *šāmar* (1 S. 1:12; 2 S. 20:10; Job 39:1; Eccl. 11:4; Isa. 42:20), *pāqaḏ* (Ex. 3:16), *yāḏa'* (Ruth 3:4), *bîn* (Ps. 33:15; Prov. 23:1), hiphil of *śāḵal* (Prov. 21:12), *nāṣar* (Prov. 23:26), *rā'â* (Eccl. 8:9; Jer. 33:24; Dnl. 1:13); Gk. *paratéresis* (Lk. 17:20), *katanoéō* (Acts 11:6; Jas. 1:23f.), *anatheōréō* (Acts 17:23), *parakolouthéō* (2 Tim. 3:10)]; AV also MARK, CONSIDER, SEE, BEHOLD, etc.; NEB also "turn [my] eyes toward," "take note of," WATCH, KNOW, etc. Here "observe" means to see, notice, watch, or inspect. Heb. *šāmar* occurs in the sense of "watch." Some of the terms connote understanding as well as perception (e.g., *bîn, śāḵal*). Gk. *katanoéō* means "notice" or "inspect," while *parakolouthéō* means "follow," both with mind and in practice (2 Tim. 3:10). *See also* MARK II; SEE.

(3) Occasionally "observe" is used by the AV in an archaic sense; e.g., "his father observed [Heb. *šāmar*] the saying" (Gen. 37:11; RSV ". . . kept the saying in mind"); "observe [*šāmar*] lying vanities" (Jonah 2:8 [MT 9]; RSV "pay regard to"); "heard . . . and observed [*šûr*] him" (Hos. 14:8 [MT 9]; RSV ". . . and look after . . ."); "for Herod . . . observed [Gk. *syntēréō*] him" (Mk. 6:20; RSV ". . . and kept him safe"). N. J. O.

OBSERVE TIMES. *See* MAGIC II.A(5).

OBSTINACY. *See* STUBBORN.

OCCASION. The RSV translation of several terms with a wide range of meanings, e.g., Heb. *t^enû'â* ("grounds for opposition," Job 33:10), Gk. *chreía* ("need," Eph. 4:29),

aphormḗ ("opportunity," 1 Tim. 5:14), and *tópos* (lit. "place," He. 8:7). In 1 S. 22:22 the AV and RSV render "I have occasioned" (i.e., "caused") for Heb. *sabbōṭî* (from *sāḇaḇ*, "turn, go around"), which many commentators (e.g., P. McCarter [*AB*, 1980], p. 363) emend to *ḥaḇṭî* (from *ḥûḇ*, "be guilty"; cf. KoB, pp. 280, 647) on the basis of the LXX and Syriac.

OCCUPATIONS [Heb. *ma'ᵃśeh*] (Gen. 46:33; 47:3); [*mᵉlā'ḵâ*] (Jonah 1:8); NEB BUSINESS; [Gk. *hoi perí tá toiaúta ergátai*–'the workers who do such things' ("the workmen of like occupation," Acts 19:25); NEB ALLIED TRADES. Both *ma'ᵃśeh* and *mᵉlā'ḵâ* are general terms usually translated "work." Shepherd (Gen. 47:3) and silversmith (Acts 19:24) are only two out of about two hundred different occupations mentioned or implied in the Bible. *See* CRAFTS; WORK.

OCCUPY. A term used by the RSV in three different senses: (1) "engage someone's energy or attention" (Heb. piel of *hālaḵ* [Ps. 131:1; AV "exercise"; NEB "busy"], hiphil of *'ānâ* [Eccl. 5:20 (MT 19); AV "answer"; NEB "fill time"]; Gk. *synéchomai* [Acts 18:5; AV "pressed"; NEB "devoted"], *proséchō* [1 Tim. 1:4; AV "give heed to"; NEB "study"]); (2) "take possession of" (Heb. *yāraš* [Nu. 13:30; Dt. 2:31; 3:20; AV "possess," "inherit"]); (3) "reside in" (Heb. *bō'* [Neh. 2:8; AV "enter"]).

The AV uses "occupy" several times in the obsolete sense of "trade." In Ezk. 27:16, 19, 22 the AV renders Heb. *nāṯᵉnû bᵉ'izḇônāyiḵ* "they occupied thy fairs" (RSV "they exchanged for your wares"). In vv. 9, 27, AV, "occupy" and "occupiers" render forms of *'āraḇ* (Heb. *yāraš* [Nu. 13:30; Dt. 2:31; 3:20; AV "possess," "inherit"]); (3) "reside in" (Heb. *bō'* [Neh. 2:8; AV "enter"]).

The AV uses "occupy" several times in the obsolete sense of "trade." In Ezk. 27:16, 19, 22 the AV renders Heb. *nāṯᵉnû bᵉ'izḇônāyiḵ* "they occupied thy fairs" (RSV "they exchanged for your wares"). In vv. 9, 27, AV, "occupy" and "occupiers" render forms of *'āraḇ* (Heb. *'āśâ*; cf. RSV "use") and in He. 13:9 (part. of Gk. *peripatéō*, lit. "walk," "behave"; RSV "adherents"). In 1 Cor. 14:16 "occupy" renders *anaplēróō* (lit. "fill up"); *see* OUTSIDER. N. J. O.

OCCURRENT. An obsolete form of "occurrence" used by the AV in 1 K. 5:4 (MT 18), rendering Heb. *peḡa'*, "chance" (RSV "misfortune"; NEB "attack").

OCHIEL ō-kī'əl [Gk. B *Ochiēlos*, A *Oziēlos*]; NEB OZIELUS. A Levite "captain over thousands" who furnished the Levites with cattle for the Passover in the time of King Josiah (1 Esd. 1:9); called JEIEL (7) in 1 Ch. 35:9.

OCHRAN ok'rən [Heb. *'oḵrān*–'trouble']; AV, NEB, OCRAN. The father of Pagiel, the leader of the tribe of Asher in the journey through the wilderness (Nu. 1:13; 2:27; 7:72, 77; 10:26).

OCIDELUS os-ə-dē'ləs (1 Esd. 9:22, AV). *See* GEDALIAH 3.

OCINA ō-sī'nə [Gk. *Okina*] (Jth. 2:28); NEB OKINA. A town located somewhere along the Phoenician coast S of Tyre. The only clue to its exact location is its position in the list of cities: Sidon, Tyre, Sur, Ocina, Jamnia, Azotus, and Ascalon. Sandalium (Iskanderun) and various other places have been suggested but have little support. Both the name and location of Acco make it a likely possibility. Ocina is one of several cities named in Judith as representative of all the people along the eastern Mediterranean seacoast who were filled with terror when they heard of the approach of Holofernes, an Assyrian general sent by Nebuchadrezzar to devastate the lands that had revolted against him. D. H. MADVIG

OCRAN ok'rən (AV, NEB, Nu. 1:13; etc.). *See* OCHRAN.

ODED ō'ded [Heb. *'ōḏēḏ*–'restorer'].

1. The father of Azariah, who prophesied in the reign of Asa of Judah (2 Ch. 15:1). The conjecture that Oded was the same as Iddo (12:15; 19:29) has no tenable foundation. The difficulty of 15:8, which makes Oded himself the prophet, cannot be explained by dropping "Azariah the son of," for the phrase "the prophet" is still in the Hebrew absolute state. The only solution is to delete the words "Oded the prophet" from the text as a gloss (cf. KD, *in loc.*; GKC, § 127f).

2. A prophet of Samaria (2 Ch. 28:9) who lived in the reigns of Pekah of Israel and Ahaz of Judah. He protested the enslavement of Judahites captured during the Syro-Ephraimitic attack on the southern kingdom. Because chiefs of Ephraim supported him, the prisoners were treated kindly and escorted back to Jericho.

ODES OF SOLOMON. *See* SOLOMON, ODES OF.

ODOLLAM ō-dol'əm (2 Macc. 12:38, AV). *See* ADULLAM 1.

ODOMERA od-ə-mē'rə [Gk. B *Odomēra*, A *Odoarrēs*] (1 Macc. 9:66); AV ODONARKES. According to most LXX MSS, the victim of a surprise attack by Jonathan in the Judean wilderness near Bethbasi. He is usually understood to have been the chief of a bedouin clan or the leader of the pro-Greek party that incited Bacchides to attempt, unsuccessfully, to capture Jonathan and his forces (*ca.* 156 B.C.).

Two Greek MSS (V and 340), however, read *epétaxen* ("summoned," "commanded") in place of *epátaxen* (RSV "struck down"), and J. A. Goldstein (*I Maccabees* [*AB*, 1976], pp. 379, 395) has suggested that this is the correct reading. Odomera and his clansmen would then have been Nabateans who sympathized with Jonathan (cf. 5:25) and aided him in attacking Bacchides (cf. 9:67, RSV mg.: "Then they began to attack . . ."). This interpretation finds support in the parallel account of Josephus (*Ant.* xiii.1.5 [28]): "and [Jonathan] himself secretly went out into the country; then having gathered together a large force from among those who sympathized with him, he fell upon Bacchides' camp. . . ."

ODOR [Heb. *rê(a)ḥ*] (Gen. 8:21; Ex. 29:18, 25, 41; Lev. 1:9; etc.); AV SAVOUR; [hiphil of *bā'aš*] (Eccl. 10:1); AV SAVOUR; NEB RANCID; [Gk. *ózō*] (Jn. 11:39); AV STINKETH; NEB STENCH.

In forty-three of its forty-four occurrences in the RSV OT, "odor" translates *rê(a)ḥ* (lit. "breath," for scent is always air-borne) and always as it appears in the phrase "pleasing odor" (NEB "soothing odour"). This phrase was an old liturgical formula for the calming, pleasant smell of the ascending sacrifice before the Lord. This formula had very ancient roots but in time lost its literal sense and became simply a technical term for divine acceptance of (1 S. 26:19) or delight in (Am. 5:21) sacrificial offerings.

"Pleasing odor" appears often in Leviticus and Numbers in the context of priestly instructions for different categories of sacrifice. First, Lev. 1:1-17 mentions the "burnt offerings" of cattle (v. 9), the smaller animals (v. 13), and birds (v. 17). Each such offering is said to be "an offering by fire, a pleasing odor to the Lord" (cf. also Lev. 8:21, 28; Ex. 29:18). Second, Lev. 2:1-16 describes the "cereal offering" and again employs the formula "pleasing odor" (vv. 2, 9, 12), particularly with respect to the "memorial

portion" (cf. Lev. 6:15, 21 [MT 8, 14]; Nu. 5:26), the small handful which was burned with oil and frankincense as a "pleasing odor" and which for the very poor could serve as a sin offering (Lev. 5:12). Third, Lev. 3:1-17 discusses the "peace offering," which is to be burned (v. 5) on top of the burnt offering as "a pleasing odor to the Lord." In Lev. 4:31 the same stock phrase is applied to a fourth category, the "sin offering," which atoned for unintentional sin. In Lev. 8:28 a similar phrase is applied to the "ordination offering" and in Nu. 15:7 to the "drink offering."

This long enduring anthropomorphic formula first appears in Gen. 8:21 (J). According to this passage, after the Flood Noah offered burnt offerings and "the Lord smelled the pleasing odor" and determined never again to send such a deluge. This language may bear a literary relationship to the sacrificial language and thought patterns of ancient Mesopotamia — the deity upon smelling the deliciously soothing odor of roasting food is delighted and relaxed and thereby assuaged of wrath (cf. the Gilgamesh Epic, tablet XI, lines 159-161; *ANET*, p. 95). Possibly, then, Hebrew sacrificial language ultimately derives from the ancient idea of sacrifice as feeding the deity, though this concept of sacrifice is certainly not Hebraic (cf. W. Eichrodt, *Theology of the OT*, I [Eng. tr., *OTL*, 1961], 141ff.). The OT also has a dimension of gratitude in sacrifice, clearly seen in the early example of Noah and no doubt also in that of his Mesopotamian counterpart Utnapishtim (cf. A. Heidel, *Gilgamesh Epic and OT Parallels* [1946], pp. 255-57).

The same liturgical formula ("pleasing odor") appears four times in Ezekiel. This is indicative of the prevalence of priestly terminology in that book. In three places (6:13; 16:19; 20:28) the prophet refers disparagingly to the sacrificial worship of idols as offering up a "pleasing odor" to them (reflecting surely the strong Deuteronomistic polemic against the high places and probably referring to the excesses of the notorious reign of Manasseh). In Ezk. 20:41 the old liturgical formula is again applied positively to Yahweh — "As a pleasing odor I will accept you, when I bring you out from the peoples."

Beyond this formula, "odor" appears only in Eccl. 10:1, for the hiphil of Heb. *bā'aš*, "stink." Here dead flies trapped in a bottle of precious ointment cause it to "give off an evil odor" (cf. NEB "turn rancid"), analogous to the way a small indiscretion may end up outweighing great honor and wisdom in a person.

The Greek verb *ózō*, "smell, emit an odor," occurs only once in the NT (Jn. 11:39) in the phrase *ēdē ózei*, "by this time there will be an odor" (cf. NEB "stench"), spoken by the decorous Martha with reference to the body of her brother Lazarus, who had been dead for four days.

"Aroma" in 2 Cor. 2:15 (AV "savour"; NEB "incense") translates Gk. *euōdía*, which appears elsewhere in the NT only in the expression *osmḗ euōdías*, "odor of fragrance" (cf. Heb. *rê(a)ḥ nîḥô(a)ḥ*) in Eph. 5:2; Phil. 4:18 (*see* FRAGRANCE).

OF. In Anglo-Saxon "of" has the meaning "from," "away from" (as the strengthened form "off" has still), and is not used for genitive or possessive relations, which are expressed by special case forms. In the Norman period, however, "of" was used in place of French *de*, which among other things can indicate possession; this usage was well developed by the time of Chaucer. In the Elizabethan period both these senses were in common use. After *ca.* 1600 the later sense became predominant, and "of" in the earlier usage (which is now practically obsolete) was replaced by other prepositions. As a result, the AV often uses "of" in several ways that are no longer familiar.

(1) The AV commonly uses "of" in the sense of "from." In modern English "hear of" means "gain information about," as it does frequently in the AV (Mk. 7:25; Rom. 10:14; etc.). But more commonly in the AV the expression denotes the source of the information — e.g., "all things that I have heard of my Father" (Jn. 15:15); "to hear words of thee" (Acts 10:22); "We desire to hear of thee" (28:22; cf. 1 Thess. 2:13; 2 Tim. 1:13; 2:2; etc.; similarly "and learn of me," Mt. 11:29; cf. Jn. 6:45). In most of these cases the RSV substitutes "from."
