pearance at the end of history may be considered in this connection (I Cor. 1:8; 16:22; Phil. 1:6, 10; 2:16; 3:20; I Thess. 1:10; 3:13; 4:13-17; 5:2, 23; II Thess. 1:7-10; 2:1-8). Similarly, the references to Christ as "head" (κεφαλή) may be treated as one aspect of his lordship. These teach a general or cosmic primacy, as in Col. 2:10, and are also particularized in the church, as in Col. 1:18; 2:19; the two conceptions not being in contrast, but mutually interpenetrating. There is a similar interpenetration of thought about Christ's headship in the whole universe and in the church in Eph. 1:22-23; 4:15-16; 5:23. The envisaging of the goal of the divine purpose as the creation of a unified community of supernatural and natural beings under Christ's primacy also belongs to this line of development. The parallel with the lordship of Christ in Phil. 2:11 is close.

The precise meaning of "head" in these passages is not to be confined to the meaning "primacy in a series," which it derives from the use of κεφαλή to render the Hebrew ראש; by the time of the NT it was a commonplace in the sense of "head of state," and this meant the absolute ruler.

b. The divine sonship of Christ. It might be said that Christ's lordship was not so much an inherent capacity to effect mediation as an achievement resulting from his life, suffering, and resurrection. Having made mediation possible, he is properly addressed as Lord. The term "Son of God" more unambiguously asserts his antecedent right, and relates him primarily to God rather than to men. But its significance is not ontological, as in John. Paul uses the term with reference, not to incarnation or pre-existence, but to resurrection and redemption (Rom. 1:4; Gal. 4:4-5). The divine love motivates the Son and flows through him until a new society or kingdom (Col. 1:13) is created where men are freed from the bondage of sin. This is seen as the sacrifice of love on God's part (Rom. 8:31-39), as also on Christ's part (Gal. 2:20); and the new society which results is said to be raised to the level of sonship (Gal. 4:5). This sonship is connected with the work of the Spirit (Rom. 8:14-17; II Cor. 1:19-22; Gal. 4:6-7; Eph. 1:13-14). Perfect humanity, which is the goal of the process, comes from knowledge of the Son of God (Eph. 4:13).

c. Christ as liberator. Christ liberates men from their sins. Paul's own sensitiveness to the power of sin caused him to reflect searchingly on this aspect of the significance of Christ. We note three distinctive features in it:

a) The fact of sin is understood—in distinction to specific acts—as a sinister power, semipersonified, which has control over all men. It is more objectively conceived, and more comprehensive, than guilt, which is man's consciousness of sin; but in Paul's sense a man is sinful even before he can feel guilt. We are sinners by the simple fact of being born; guilt arises only with the development of moral sense (Rom. 5:13; 7:7-11).

b) Paul has his own peculiar understanding of the moral law or categorical imperative as exerting a thralldom over us (Rom. 7:7-23; Gal. 2:15-21; 3:18-25). Law merely defines sins; it gives no power to avoid them (Rom. 3:20). To a moral intensity and spiritual sensitiveness such as Paul's this only aggravated the moral demand.

c) Connected with sin, as punishment or inevitable consequence, is death (Rom. 5:12-14, 21; 6:16-23; cf. Jas. 1:15). Christ's deliverance from sin includes deliverance from death. To the modern mind this may seem illogical, but it must be remembered that in the Bible death is not simply a biological fact; it means separation from God. *See* DEATH.

But Christ brings deliverance, in view of all these aspects of the problem. He broke the power, loosed the strangle hold, of sin. This was a fact of experience for Paul before it was taken up into his theology (Rom. 7:24–8:4). That experience was one of release, of a new freedom which arises from being in a right relationship with God, and which may without arrogance be called divine sonship (Rom. 8:12-17; II Cor. 3:17; Gal. 1:4; 2:15-20; 3:23–4:7; 4:21–5:1). This freedom includes freedom from death (Rom. 5:17-21; 6:20–7:6; 8:11). Christ's resurrection was evidence of this (Rom. 6:4-11; I Cor. 15:12-26). Paul makes the point that Christ, having actually faced death, now offers the same immunity from it to his worshipers. A later Paulinist says Christ abolished death (II Tim. 1:10; cf. Acts 2:24; Heb. 2:9-14).

The notion of Christ's overcoming Satan is firmly embedded in NT Christology, and is prominent among NT suggestions as to how he effected mediation. It appears in the Synoptic gospels in the accounts of exorcisms. In Paul it is seen in Rom. 8:37-39; I Cor. 2:8; 15:24; Gal. 4:8-9; Col. 2:14-15. This mythological language expresses the conviction that the malign forces which affect human life were drawn to issue by Christ and deprived of their power to frustrate the divine purpose.

Explanation of how Christ secured his benefits for mankind followed other lines too. In Rom. 3:21-25 the thought is of the expiatory power of his death, on the analogy of OT sacrifice which was believed to restore the relationship broken by sin.

But for Paul the significance of Christ's death did not depend only on comparison with sacrificial animals. It demonstrated how unreservedly he entered into the consequences of human sin, as indicated in the bold hyperbole of II Cor. 5:21: God "made him to be sin who knew no sin." Christ identified himself with sinful humanity to the extent of sharing the curse which the Mosaic law pronounces upon its transgressors (Gal. 3:10-13). The meaning here apparently is that Christ took the sinful entail upon himself and, as it were, absorbed it, thus exhausting the "curse." Again, the Cross shows the length to which Christ went in conforming to the will of God —i.e., in moral obedience such as man could never render to God (Phil. 2:7-8). And this is not simply his own achievement, for which he is exalted (vss. 10-11), but it inspires the same quality of life in his worshipers while still on earth (vss. 1-5). These worshipers will ultimately follow their Redeemer in his upward path to the heavenly regions where he belongs and is exalted as Lord, and where they belong too (Phil. 3:20).

d. Christ as reconciler. The new status of freedom and sonship is reconciliation with God (II Cor. 5:18-21; Eph. 2:12-18; Col. 1:13-14). Paul's reflection on human sinfulness, in the light of the biblical teaching about the divine righteousness and holiness, necessarily implied that there is a state of alienation

(ἔχθρα, "hostility, enmity") between man and God (Rom. 5:1-11). But Christ's self-offering unto death (Rom. 5:6; Phil. 2:7-8) meant divine initiative toward overcoming that situation. It imparted righteousness to men ("justified by his blood" [Rom. 5:9], a phrase that needs Rom. 3:21-26 for its elucidation). It is positively a righteous act (Rom. 5:18), and a signal example of divine grace (Rom. 5:20-21).

e. Christ as second Adam. Further, Christ is the second Adam, the new representative man. This is clearly implied in Rom. 5:12-21; I Cor. 15:22, 45-49; supporting passages are Rom. 8:1-2, 10-11, 29; 12:4-5. Ancient ideals of primeval man and modern ideas of ideal man offer only partial parallels, for Paul's thought is strongly Hebraic and corporate. Modern individualistic thinking has to make special efforts to recognize the inclusive and representative nature of this conception. The parallelism between Christ and Adam is not that of two individuals, but each is a typical and representative figure. Adam stands for actual, sinful, mortal humanity; and Christ stands for humanity re-created (II Cor. 5:17), united in veneration for him (what Paul calls faith), capable of fulfilling the moral law, destined for perfection and eternal life. A Paulinist developed this thought into the conception of Christ controlling the moral evolution of mankind (or at least the church) toward a final unity with all other spiritual beings, a unity unattainable in conditions of ordinary human life (Adam), but of which Christ is architect and "head" (Eph. 1:10, 19-23; 4:13-16). A middle term in this development of thought is Paul's own application of headship to Christ in Col. 1:15-20; 2:9-15; 3:11.

f. Cosmic Christology. This cosmic Christology of Col. 1:15-17 owes something to the hypostatic speculation about wisdom referred to *above* (§ B8*a;* cf. I Cor. 1:24, 30). The meaning is that man depends, not on any other spiritual authority or principality (cf. 2:20), not even on what the Jews called wisdom, but on Christ alone, both for his physical existence and for his proper development as a spiritual being. Christ is the supreme agent, or mediator, of God in creation and redemption.

The use of the wisdom or Logos concept makes it possible to deal with mediation in the sense of the relation of a transcendent God to the material world. In the NT, although the major attention is directed to Christ's significance in relation to human sin, his relation to the whole cosmos is also recognized—in other words, his cosmological as well as his soteriological significance (for this, in addition to Col. 1:15-17, see Rom. 8:18-25; I Cor. 8:6; and also, outside Paul, John 1:1-5; Heb. 1:2). To isolate soteriology from cosmology, as Marcion was to do a century later, in reaction to the cosmological speculations of Gnosticism, was to make it meaningless. But the NT is proof against this, for it conceives the redemptive activity of Christ as extending to the natural world as well as to man. And this is not merely a daring speculation of Paul's in his argument against Colossian Gnosticism. It is the implicit logic of the Christian belief in God as creator and redeemer. The divine concern is for the totality of the universe, and mediation can have no lesser scope.

4. John. *a. Christ as revealer (Logos).* In the Johannine presentation Jesus mediates between man and God by bringing the true revelation. It is a more intellectualist conception than that of Paul or I Peter or the early church generally. The superiority of Christ is strongly emphasized, as compared with other mediators or revealers of divine truth—e.g., Moses (1:17; 5:45-47; 6:31-58; 9:28-33); Abraham (8:56-58); John the Baptist (1:6-8, 15, 30; 3:30; 5:36). The stress on the uniqueness of Christ is carried sometimes to the point of denying progressive revelation (1:18; 6:46; 10:7-10; 14:6; 18:37). This dogmatic intransigency is not altogether peculiar to John, for we find similar affirmations elsewhere in the NT—e.g., Acts 4:12; Col. 2:9-10.

The Johannine Prologue introduces the thought of mediation in terms of the Logos, whose characteristic function it is. Its essential being is the thought of God, but its outreach is to the world and to mankind. It brought the world and human life into existence, and in this setting its crowning work is performed—namely, the illumination of life, the transformation of mere existence into true life, life of grace and truth, which has affinity with the life of God. In order to achieve this the Logos concentrated itself in a particular human life. Then at last it was possible for those who are in the flesh to behold the glory of God, to receive grace and truth, to "know" God. God, through his Logos, in Christ, had made this possible; mediation was complete.

The decisive point in this divinely controlled process is the Incarnation, rather than the Passion or Resurrection. This is a particular feature of the Johannine theology; but it keeps in conformity with NT theology as a whole by its doctrine of the Passion as the special "hour" when the glory of the Father and of Christ is to be revealed (7:30; 12:33; 13:1; 17:1). Moreover, the Good Shepherd has come, not simply to gather his flock, but to lay down his life for them (10:15-18; cf. 11:50-53).

b. Christ as Son of God and Son of man. At the end of the Prologue, when the thought becomes more concrete and personal, "Logos" gives way to "Son," and it is mainly as Son of God that Christ appears in the pages of this gospel. The Prologue reminds us that the author understands sonship in terms of Logos. The traditional terms "Messiah" and "Son of man" are also used, as roughly equivalent to "Son of God" and as requiring no further explanation. For "Messiah," cf. 1:41-49; 4:25; 7:31; 10:1-30 (in the light of Ezek. 34); 11:27; 12:12-15; 18:33-37 ("King," as 1:49; 19:19-22); 20:31. For "Son of man," cf. 5:27; 6:27, where the idea is the conventional apocalyptic one. But in 1:51; 3:13-14; 6:62; 8:23, 28; 12:34 the title has a different connotation, and expresses the Hellenistic idea of an archetypal man who belongs to the divine realm but descends into this world conveying revelation; his return makes it possible for recipients of the revelation to ascend also, leaving the earthly sphere of evil and attaining new life in the supernatural realm. There is thus a parallel in John to the conception of the "Son of man" as a corporate entity of the saints, and to the Pauline thought of Christ as the Adam who re-creates humanity. "Son of man" in this sense is the perfect mediator between heaven and earth.

For "Son of God," cf. 3:16-18, 35-36; 5:17-27; 10:30-38; 14:10-13, 28; 17:1-3. John has kept the Synop-

tic title, but stresses the relationship with the Father in its ontological aspect as well as in its aspect of obedience to the Father's will. This goes beyond the Hebraic sense of "Son of God" as meaning "people of God," or "special representative of God." It makes clear Christ's right to effect mediation between man and God, and defines his relationship with God more precisely than was done in the earlier Christian tradition.

c. Christ as Lamb of God. In 1:29 Jesus is called the "Lamb of God, who takes away the sin of the world." The term "sin" does not figure prominently in the Gospel of John. The First Letter is somewhat closer to the rest of the NT when it declares Christ to be the expiation for sins, as in Rom. 3:25 (cf. I John 1:8–2:2; 4:10). It even affirms the possibility of sinlessness for those who abide in Christ. But in the gospel there is the theme of a parallel development of faith and unbelief, and sin must be defined in reference to it. The fundamental sin is refusal to believe in Christ (16:9).

d. Discipleship: the divine society. The benefits arising from the Incarnation are mainly described throughout this gospel in terms of life or eternal life (3:15-16; 5:21-26; 6:35-40; 10:28; etc.). The contrast between this higher life and ordinary existence or physical needs is made clear in 4:10-14, 31-34. It is the nourishment of man's spirit (6:32-35, 47-58); it is the reception of Christ's teaching (6:68); it is communion with God in true worship and petitionary prayer (4:21-24; 14:14; 15:7, 16; 16:23-24); it is knowing God (17:3); and, of course, it endures beyond death (14:1-6; 17:24). Its chief mark in outward conduct is love (13:34-35; 15:12-14); this is dealt with in more detail in I John (see especially 4:7-21).

Those who receive these benefits have come out of darkness into light, and belong no more to the world —i.e., the mass of mankind apart from Christ (10:26-27; 17:16). They can appreciate the wonder of the Shepherd's concern for them which impelled him to lay down his life for them (10:1-18). Their status is that of children of God (1:12-13), for their response to Christ is a kind of rebirth. Their relationship is not only with one another and with Christ, but also with the Father. For knowledge of him is the highest life, and Christ's mission was to make this knowledge possible (17:3). The ultimate goal is his presence, and the purpose of Christ's death is to pioneer the way thither (14:1-7). He alone mediates knowledge of God and communion with God (15:9-16; 17:6-19; 20:17). After his withdrawal from the earthly scene his presence with his disciples is still available, for the Spirit of truth will be their counselor (14:16-17, 26; 15:26-27). This he has arranged with the Father on their behalf as the continuing manifestation of himself and as a bond with the Father which neither death nor all the hatred of the world can break. Thus the ultimate goal is this ideal community in God, secure beyond time and evil; and it was made possible through the incarnation of the eternal Logos in Jesus of Nazareth.

5. Hebrews. *a. The finality of Christ's work.* The Letter to the Hebrews opens with the statement that God's self-communication in Christ is more complete than in previous revelations. By nature Christ was better equipped to do this, being the agent of creation and superior to angels. The terminology shows that the author is influenced by Hellenistic-Jewish speculation about the agency of wisdom and the Logos. Christ's work is described summarily as "purification of sins." Elsewhere it is "eternal redemption" (9:12; cf. 5:9)—i.e., of eternal effectiveness, as contrasted with the rites of OT sacrifice, which needed to be repeated. What Christ achieved was "once for all," complete and final (cf. 7:25; 10:11-14). There is an element of Platonism in this use of the adjective "eternal" (cf. 9:15; 13:20); it implies that Christ belongs to the realm of perfect archetypes, where all have this eternal or ideal quality.

b. The perfect sacrifice. The significance of Christ's saving work is brought out by reference to the Hebrew sacrificial system and priesthood. It is argued that this system was imperfect, a mere adumbration (8:5) of how man's moral need is to be met. This need is not for outward purification, but for purification of the conscience (9:13-14). It is then claimed that Christ's ministry is effectual just here. He is the "surety" (ἔγγυος, "guarantor"; 7:22) and "mediator" (μεσίτης; 8:6) of a superior covenant. Israel's refractoriness had annulled the old covenant, and the most discerning prophets had visualized a new covenant—i.e., a relationship between man and God founded on a more perfect understanding of God's ways. This new covenant is now in being, as a result of Christ's life and death. His blood was the sacrificial blood necessary, according to Jewish ideas, for the inauguration of a covenant (9:22). His willingness to pour out his lifeblood is the perfect obedience which divine justice requires of men but had received neither from the first Adam nor from any of his posterity (5:8; 10:5-10; 12:2).

The logic here is not simply that Christ's death is declared to have the efficacy which the slaying of animals was reputed to have in the sacrificial rituals of the ancient world. It rises above this analogy in the confidence that there is no limit to what God can do with a life of perfect obedience culminating in death voluntarily accepted. At one point in history this offering was made, and the Christian conviction is that God, who accepted the offering, makes it fruitful for all who attach themselves to Christ by faith.

c. The perfect priest. Interwoven with this argument is the conception of Christ as high priest. The Jewish high priest entered the inner sanctuary of the temple, the holy of holies, once a year on the Day of Atonement (Lev. 16:2, 17). That holy place signified the presence of God, and it was realized that man, as man—i.e., as sinner—was not fit to approach God. The seriousness with which this was recognized is a mark of the superiority of Hebrew to pagan religion: the Hebrews felt that only the holiest of men, their high priest, might venture to enter the divine presence, and he only once in the year. The affirmation of our letter is that Christ has entered God's presence in heaven itself on behalf of men (9:24; 10:20; the temple veil seems to be compared alternatively to the sky and to Christ's body, rent open as he hung bleeding on the cross). In entering heaven he has returned to his rightful dignity, but he has done so representatively for us, after his human experience, which, as it were, earned him a family of brethren (2:11-12),

whom he now presents to his heavenly Father. In a different metaphor, he has pioneered man's approach to God. He is our forerunner (6:20) or pioneer (2:10; 10:19-20). He has secured this both by his personal qualities and by his actual achievement in his earthly life (2:9-18; 7:25-27). Men need no longer feel that their sin unfits them for fellowship with God. By his continued agency and intercession they may draw near to God (7:25), with confidence (4:16).

Subordinate ideas to be noted are: (*a*) that of Christ as example, arising out of his self-identification with man (2:9-18; 5:8-9; 12:2); (*b*) that of victory over death and the devil (2:14-15).

6. I Peter. In I Peter, Christ's achievement as Savior is illuminated in three passages: (*a*) 1:19 compares the Cross for its efficacy with the lamb of sacrifice, as in Rom. 3:25; Hebrews. No material means can raise human life from futility (1:18), but only sacrificial suffering, and this was his destiny from eternity (1:20). (*b*) Christ's innocence and exemplary quality are stressed, and also the vicarious nature of his sacrifice, in 2:21-24. (*c*) 3:19-20 enlarges the vicariousness of his death to include former generations. The "spirits in prison" are probably to be taken as referring to departed souls in Hades (Sheol). The thought, then, is that in the interval between his death and resurrection Christ visited Sheol and proclaimed his victory over sin and death. This is mythological in form, but expresses the conviction that the salvation Christ offers is available not only for the generation contemporary with his earthly life, and all subsequent generations to whom the gospel may be preached, but to past generations as well. This conception of the scope of salvation is impressive. Christ's work has significance for the whole of mankind, from Adam to the end of history.

7. Revelation. Revelation presupposes as general background a world situation degenerating not simply from bad to worse but from corruption to chaos. The fall of Rome is imminent and will be the prelude to a final outburst of evil when good will be in conflict with the worst that evil can perpetrate; not merely with the beast—i.e., Rome—symbolizing human tyranny, but with the dragon—i.e., demonic evil (19:11-20:10). Revelation therefore offers no doctrine of mediation but the assurance that in spite of appearances God is in control, evil will be done away with, and ideal conditions will be ultimately created (21:1-4).

There are many references to Christ, most of which are rooted in the primitive Christian kerygma, but they are isolated. E.g., Christ is "the first-born of the dead, and the ruler of kings on earth" (1:5); he has authority over Death and Hades (1:18) and over the churches on earth (chs. 2–3); he is victor (3:21; 12:10).

He is referred to twenty-nine times as the "Lamb who was slain" (5:6-13, etc.). He is Son of God (2:18; 3:5) and Word of God (19:13). His second coming is mentioned (1:7; 3:3; 19:11-16). Most impressive of all, his loving self-sacrifice, which freed men from their sins and created a new kingdom or priesthood, is recorded (1:5-6; 5:9-10). But although these elements of the faith are retained, they are not integrated into the general pattern, and the characteristic logic of this book is that the decisive act for man's salvation is still future, and God rather than Christ will be the actor, Christ's function being to preside over a millennial reign with the martyrs (20:4-6), after he has inflicted the divine wrath on the sinful of all nations (19:11-21).

D. *SUMMARY.* The NT has a compact answer to questions concerning mediation, and its neatest formulation comes from a writer who gives us no sustained argument but has a rare facility for pregnant phrase: "There is one God, and there is one mediator between God and men, the man Christ Jesus, who gave himself as a ransom for all" (I Tim. 2:5-6). This sounds more like the quotation of a primitive creed than theological reflection, but it expresses the heart of the matter.

The lines of development in thought upon this problem converge upon Christ. By this is meant no mechanical fulfilment of OT conceptions, but the affirmation, repeated with varying emphasis throughout the NT, that the ideals of prophet, priest, and king were realized in Christ, and that he was the living embodiment of what the OT knew as the word of God and the wisdom of God; the Spirit of God descended upon him, guided his ministry, and was the means of his continued presence among men after his physical presence was withdrawn. As the one who in the daily experience of his disciples had made God a Father real and near, he could not but be proclaimed as Messiah and Son of God; for had not the kingly rule of God come upon them through his teaching and acts? The enigma of a Messiah crucified (I Cor. 1:23) had passed from inexplicable tragedy to the glorious conviction that his death was that vicarious suffering of God's truest servant which Isaiah had discerned as destined to forward the divine purpose and cause many to be accounted righteous (Isa. 53:10-11).

This was no peculiar theologoumenon of Paul; it was the common testimony. As the Johannine author testifies: "He is the expiation for our sins, and not for ours only but also for the sins of the whole world" (I John 2:2), and: "No one has ever seen God; the only Son, who is in the bosom of the Father, he has made him known" (John 1:18).

The lesser minds also in their own idiom affirm the uniqueness of Christ as mediator and revealer over against all other religious leaders. Consider Acts 4:12, from a writer who made no claim to be a theologian, quoting from an early source: "There is salvation in no one else, for there is no other name under heaven given among men by which we must be saved."

MEDICINE. While comparatively little appears in the earlier biblical writings on the care of the sick, it must be remembered that the Hebrews shared with other peoples of the ancient Near East the tradition of a priesthood trained and equipped to cope with a wide variety of ailments. In the Pentateuch the priest and the midwife were held responsible for communal health, and it was not until the period of the monarchy that physicians as separate individuals put in an appearance, which contrasts markedly with what is known of earlier civilizations.

1. The priest-physician in antiquity. ***a. Mesopotamia.*** In ancient Mesopotamia two distinct classes of exorcist priests were responsible for the prevention or control of disease. The intensely superstitious Mesopotamians regarded illness as the result of attack by malignant demons, and therefore the services of competent exorcists were always in demand. As in all ancient civilizations, the priesthood monopolized education, and the study of medicine was no exception.

20. Seal of a Sumerian physician, Ur-Lugal-edinna

Patients were often treated in the precincts of temples or shrines by a variety of means, which invariably included an incantation. Herbs such as caper, garlic, rue, and the mandrake had magical qualities assigned to them, while others like castor oil were used empirically in Babylonian medicine.* The Code of Hammurabi gave proper professional status to the doctor and laid down the conditions under which he could pursue his vocation. A variety of extant cuneiform tablets have to do with therapeutics, and testify to the remarkable development of empirical medicine in Mesopotamia. Fig. MED 20.

b. Egypt. The ancient Egyptian priesthood had its medical branch from an early period, one of the most celebrated pioneers of empirical therapy being Imhotep. The medical traditions of Egypt have been preserved in part in a number of medical and surgical papyri which have survived. These documents show that in Egypt, as in Mesopotamia, magico-religious considerations occupied a dominant place in any estimate of diseased conditions. Illness was held to result from the activity of evil spirits, which could only be counteracted most effectively by magic. In consequence the Egyptian priest-physicians employed magical rites for diseases of the eyes, gynecological disorders, burns, injuries, and many other pathological conditions. Herbs and animal substances were used empirically, but generally needed the assistance of an incantation to be most effective. Only one surgical papyrus is free from obvious magical influences, and even this has a number of incantations written on the verso. The "physicians" of Gen. 50:2 were the embalmers, whose work constituted an important specialty, and whose rituals and techniques have been preserved, notably by Herodotus (II.86). Like other medical specialists in ancient Egypt, they formed one branch of the priesthood. Fig. MED 21.

21. Hes-Re, the chief of dentists and physicians, an Egyptian medical specialist (*ca.* 3000 B.C.)

c. Israel. The medical principles of the early Hebrews, as enshrined in the Pentateuch, represented a notable advance upon contemporary theories of disease in that they repudiated magic completely, and sought to consider disease either from an empirical

standpoint or else in terms of the personal spiritual relationship existing between the sufferer and his God. The principles of personal and social hygiene contained in the medical sections of Leviticus are unique in antiquity as rational assessments of pathology. The responsibility for propagating and enforcing these enactments rested with the priests, to whom guidance was given on the question of how certain diseases were to be treated, notably LEPROSY.

The first reference to physicians outside the Pentateuchal writings is in II Chr. 16:12, which speaks rather disparagingly of those to whom Asa resorted at the end of his life (*see* DISEASE). The Hebrew רפה originally meant "one who repairs," "one who sews together," and seems to have been used of the tending of wounds and injuries. Since God was the acknowledged Supreme Healer (Exod. 15:26), the physicians of the Monarchy can have been little more than practicing apothecaries or herbalists. The reference in Jer. 8:22 which associates physicians with therapeutic substances (*see* BALM) indicates that this state of affairs continued in Israel. The presence of a physician gave some hope of relief from sickness, while his medicaments included the aromatic antiseptic resins and gums popular at that time.

The prestige of the physician appears to have increased considerably by the time Ecclesiasticus was written (second century B.C.), for he is described in quite different terms. While God is still the Healer, he has committed gifts of healing to men and has provided medicines for the cure of sicknesses. But the person who sins against the Lord must also be expected to behave arrogantly in the presence of a physician (Ecclus. 38:1-15).

Jesus mentioned physicians occasionally in his teaching, quoting popular proverbs about them (Matt. 9:12; Luke 4:23), and indicating that they were generally fairly competent. Periodically, however, they were confronted with a situation with which they were unable to cope (Mark 5:26), when they resorted to a succession of therapeutic expedients without avail. Luke is spoken of as the "beloved physician" (Col. 4:14), and his writings are notable for the accurate recording of the healing ministry of Jesus. His special use of medical terms which occur occasionally in the writings of nonmedical authors shows beyond reasonable doubt that he was trained in the Greek medical tradition.

2. Medical functions of priests and prophets. The medical responsibilities of the early Hebrew priests were closely connected with their religious duties. The book of Leviticus contains seven forms of purification, in which medical, as well as religious, considerations are involved. They are: puerperal (ch. 12), leprous (ch. 13), venereal (15:2-15), spermatorrheal (15:16-18), concubital (15:18), menstrual (15:19-30), and cadaveric (21:1-3). The "jealousy ordeal" (Num. 5:11-31) included the administration of a special potion mixed by the priest. The dramatic ritual and suggestibility of the whole procedure are reminiscent of the forms of treatment undertaken by the Babylonian priest-physicians in the second millennium B.C. This account is the only biblical one which mentions the oral administration of potions or medicines.

The art of the perfumer (Exod. 30:35) was employed for purposes other than the purely medicinal, although the substances used, such as myrrh, frankincense, balm, aloes, cassia, cinnamon, and other aromatic vegetable products, were widely used in folk medicine (*see* PERFUME). The OT contains no reference to the use of the well-known oriental narcotics, though they may have been imported along with other commodities.

Part of the prophetic office included prognostication of sickness, as with Nathan (II Sam. 12:14), Elijah (I Kings 17:17; II Kings 1:4), Ahijah (I Kings 14:4), and Elisha (II Kings 5:3; 8:7). Elisha exhibited unusual medical abilities in neutralizing the poisonous herbs (II Kings 4:41) and in purifying the waters of Jericho (II Kings 2:20-21), as well as participating in the cure of Naaman (II Kings 5:3-14) and the son of the Shunammite (II Kings 4:18-37). An important instance of prophetic prognosis and treatment relates to the BOIL of Hezekiah (II Kings 20:1-7), which constitutes the only prescription proper in the OT. Wounds and putrefying sores were treated with a variety of medicaments including balm and oil (Isa. 1:6). Most of the resinous gums were antiseptic and astringent in nature, making them suitable for emollient dressings. While there are grounds for believing that fractures were commonly left untreated at an early period (cf. Lev. 21:19), the reference in Ezek. 30:21 indicates that subsequently attempts were made to reduce fractures. Ezekiel makes no mention of splints such as were common in Egypt, though the use of the bandage (KJV "roller") would probably imply some such procedure.

In the apocryphal period, the place of medicines in the treatment of sicknesses was dignified in proportion to the increased stature of the physician. Medicines were regarded as natural products, and therefore beneficial to mankind. The prudent would submit themselves to the skill of the apothecary, according to Ben Sirach (Ecclus. 38:1-15), and derive advantage from the medical gifts of the physician. But it appears from the Talmud that contemporary practitioners advised patients to wear amulets, indulge in magical exercises of various kinds, and resort to therapeutic procedures of extremely questionable value. Something of this sort may have befallen the woman with an issue of blood (Mark 5:25).

3. Medical treatments in the NT. The NT has very little indeed to say about medical treatment, and such references as occur appear in an incidental manner. The Good Samaritan rendered effective first aid (Luke 10:34) by applying antiseptic and soothing dressings to the unfortunate victim of an assault. The anointing of Luke 7:37-38 was more of a cosmetic technique than a specifically therapeutic one. This practice was one of several connected with the preparation of a corpse for burial (Luke 23:56). The anointing with spittle (John 9:6) was of a symbolic nature, and as employed by Jesus was not strictly a therapeutic procedure.

The administration of sour wine mixed with gall and myrrh to those being crucified (Mark 15:23) was an act of charity intended to lessen the sufferings of the victims. But unless the potion contained some such narcotic as opium, its effect on the crucified persons would be negligible, since myrrh is only slightly sedative.

The kindly counsel of Paul to Timothy (I Tim. 5:

23) is typical of folk medicine in all ages. Probably Timothy was suffering from flatulent dyspepsia, the discomfort of which would be relieved temporarily by alcohol. However, there seem to be good reasons for believing that the gastric condition was only a part of a larger pathological pattern ("frequent ailments"), which was probably psychosomatic in nature. The anointing with oil in the name of God was symbolic rather than therapeutic, and intimately associated with the "prayer of faith."

4. Surgery. The only surgical operation mentioned in the Bible is CIRCUMCISION.* While this procedure was known among other peoples, notably the Egyptians, who regarded it as the hallmark of a civilized upbringing, it never claimed the quasi-religious nature that it had among the Jews. While Abraham was the first to submit to it according to OT records, the rite is almost certainly far older than the Hebrew patriarchs. The Semites of the Bronze and Iron Ages still used the obsolete flint knives for the operation, which would indicate something of the antiquity of the rite itself. Resection of the prepuce was performed on all male Israelite children on the eighth day after birth (Lev. 12:3), and also upon household slaves (Gen. 17:11). Among the Hebrews its religious significance was paramount, and it was never regarded primarily as a hygienic or prophylactic measure. Fig. CIR 29.

What might be classed as a minor surgical procedure was the boring of the servant's ear by means of an awl (Exod. 21:6) used in the stitching of hides and skins. This rite established the relationship between master and servant by which the latter covenanted to serve the former for life; and it was of a religio-social, rather than a medical, character.

5. Surgical disease and accident. There are comparatively few references in the Bible to surgical disease as such (*see* DISEASE). In Exod. 21:18-19 the person who injures or maims another in a quarrel is to be held responsible for the complete restoration to health of the injured man, and for compensating him for the loss of his working time. To what extent such injuries were treated by the priests is unknown, but attempts may have been made in later times to reduce and bandage fractures (Ezek. 30:21).

The hunchback and the dwarf were *ipso facto* disqualified from the priesthood. These two categories probably covered all forms of physical assymetry, but whereas the dwarf might not necessarily have been deformed (physiological dwarf), the hunchback was invariably the victim of caries and destruction of the spinal vertebrae. Spinal kyphosis appears to have been fairly common in ancient Egypt.

The woman who had had a "spirit of infirmity" for eighteen years (*see* DISEASE) and who could attend the synagogue although she could not straighten herself fully (Luke 13:11) was probably suffering from spondylitis deformans. This is an arthritic condition of the spine which results in a rigid kyphosis and allows little free spinal movement.

A further instance of surgical accident may be seen in the case of Malchus, whose right ear was cut off (John 18:10). No doubt, Peter aimed the sword at the head of the high priest's servant with the intention of doing more serious damage, but in the event only the pinna was severed. If complete separation from the adjacent tissues took place, the healing which ensued was strictly miraculous (cf. Luke 22:51), since neither ancient nor modern surgery would avail under such circumstances.

6. Obstetrics. Some of the most primitive references to biblical medicine are to obstetrics. In fact, the midwife was the first public-health worker to be mentioned in scripture, and she occupied an important position in the community. This is of significance when it is remembered that oriental women as a whole were discouraged from engaging in public duties. The midwives seem to have formed a regular professional guild or class, and the names of the two head midwives in Egypt (Exod. 1:15) have been preserved for posterity; this fact further attests to the importance of their status in the community.

The decree of Pharaoh (Exod. 1:16) appears to have been an obvious violation of their professional ethics, as well as constituting a grossly inhuman act. The reason which they subsequently adduced for disregarding this injunction was that precipitate labor had invariably taken place before the midwife arrived to supervise the confinement. It would appear that the Hebrew midwives gave professional care to the Egyptian women also, since they were able to compare their relative performances during parturition. The confinements seem to have been conducted with the mother supported on the low seat or birthstool, a device which is still in use among Egyptian fellahin.

In two confinements the mother died after giving a symbolic name to her offspring. Rachel suffered a fatal dystocia (Gen. 35:16-19), which may have been due to some obstruction in the birth canal or to uterine anergia (maternal dystocia). Some idea of the hardship which a woman could experience in childbirth may be seen in the name "son of my sorrow," which Rachel gave her son just before her death. The wife of Phinehas (I Sam. 4:19-22) was about to undergo confinement when tragic news reached her. The resultant shock precipitated labor, and after the child was delivered, she became comatose and died.

Two instances of the birth of twins are recorded in Genesis. Rebekah (Gen. 25:21-26) experienced considerable fetal agitation during her pregnancy. When Esau was born, he was still covered with the lanugo, a downy growth which appears on the fetus from the fourth month of gestation, but which has normally disappeared by full term. The birth of Jacob followed almost immediately after the delivery of Esau.

An unusual and difficult condition existed in the case of Tamar (Gen. 38:27-30), who was with child by her father-in-law. The twins were apparently locked, and one of them was presenting transversely. A prolapsed arm was suitably marked by the midwife, who seems to have performed some sort of turning operation, with the result that the other twin was born first. Then his brother was delivered, apparently by spontaneous evolution. A perineal laceration appears to have been indicated by the symbolic name given to one of the twins, Perez ("breach"). This difficult obstetrical situation was seemingly handled with great competence by the attending midwife, who was evidently a woman of considerable skill and resource.

Elderly primiparas, or women who are pregnant for the first time at a later period in life, include Sarah

(Gen. 21:2), the wife of Manoah (Judg. 13:24), Hannah (I Sam. 1:20), and Elizabeth (Luke 1:36).

The postnatal procedures mentioned in scripture (cf. Ezek. 16:4-5) include dividing of the umbilical cord, washing of the infant, and the removal of the uterine sebacious material (*vernix caseosa*) by means of salt. The newborn infant was then "swaddled" by being placed diagonally on a square of cloth, the ends of which were then folded over the body and the feet and held in position by strips of material (swaddling bands) passed around the outside of the bundle. A dusting powder of myrtle leaves was used to prevent chafing, and the baby was frequently rubbed with oil. "Swaddling" was continued until the baby was at least six months old.

7. Medical folklore in the Bible. Some examples of popular medical folklore as found in the Bible may receive brief notice. When Jacob desired to increase his own share of Laban's flocks (Gen. 30:31), he resorted to a device based on the age-old concept of maternal impressions. Although Laban had promised him the black and speckled offspring in the flocks, he had removed the male speckled animals so as to render the increase of that variety impossible. But Jacob took boughs of trees, peeled away sections of the bark at random to produce a dappled effect, and placed them near the feeding troughs where the ewes could see them at impregnation and when eating. By this means he hoped that the speckled appearance of the branches would impress itself upon the pregnant ewes and influence the physical appearance of the fetus. Even to the present, some persons attribute harelip in a baby to a prenatal encounter by the mother with a rabbit or hare. In actual fact, such deficiencies are congenital, and governed by the genes rather than by visual impressions retained by the unconscious mind.

The use of mandrakes by Leah (Gen. 30:14-16), who was anxious to resume bearing children after a period of sterility, points to popular superstition concerning the plant *Mandragora officinarum*. In antiquity it had wide repute as a magical charm to offset sterility and promote venery and fertility, hence the desire of both Rachel and Leah to make use of the root which Reuben had found. Whatever general effect it may have had probably resulted from psychological suggestion, with consequent alteration of endocrinal secretions, rather than the aphrodisiac qualities of the plant itself. *See* MANDRAKE.

In extreme old age David (I Kings 1:1-4) was provided with a maiden, in the belief that by his drawing heat from her body and breathing her breath, his own life would be prolonged. It is also possible that the king's potency was being tested in accordance with the magico-ritual understanding of the royal function. *See* KING.

The opinion, widespread in all ages, that the moon could exert an injurious influence on the minds of people, is also reflected in scripture. One of the psalms (121:6) assures that the moon will not harm by night, thus precluding the incidence of insanity by this particular means. The words "lunatic" and "moon-struck," along with the Greek σεληνιαζόμενος (Matt. 4:24) and σεληνιάζεται (Matt. 17:15), have perpetuated the tradition that people can be affected mentally by lunar phases.

An interpolation in the KJV of John 5 (vs. 4, omitted in the RSV text) preserves a popular explanation of the troubling of the waters in the pool of Beth-zatha. This comment, which is not found in the earliest Greek MSS, is an explanatory gloss which ascribed the healing virtues of the pool to specifically supernatural agencies. Holy wells and springs of this kind can be found in a great many countries, and invariably their alleged healing powers can be explained satisfactorily along rational lines. The agitation of the water in the pool of Beth-zatha may have been caused by the liberation of underground pockets of natural gas. The tradition of healing by immersion in the waters may have been perpetuated by the periodic cure of certain varieties of psychosomatic pathology.

MEEDA. KJV Apoc. form of MEHIDA.

MEEKNESS. A translation of πραύτης, and a KJV translation of ענוה (Ps. 45:4; Zeph. 2:3 [RSV "humility"]).

The adjective "meek" is found a number of times as a translation of ענו, the primary meaning of which is "poor," "needy" (Deut. 15:11; *see* POOR). From this there is developed the idea of "weak," "oppressed by the rich and powerful" (cf. Amos 2:7); Israel oppressed by wicked nations (Isa. 14:32); or the pious in Israel oppressed by their wicked compatriots (Ps. 10:17). Thus it came about that the word was used to express the attitude of the truly religious person, as opposed to the rich and arrogant, who, relying upon themselves or upon secular alliances, were defiant toward God and oppressive toward those weaker than themselves. "Meekness" is the opposite of pride, which in turn is basically an attempted reliance upon the self, and the root of sin. The variety of connotations of the word is shown by the different translations of it in the RSV—"oppressed" (Ps. 76:9), "downtrodden" (Ps. 147:6). "Meekness," therefore, in the OT is used to describe primarily the proper attitude of complete dependence upon God, and secondarily the attitude shown toward others by one who is "meek toward God."

The ordinary translation of ענו in the LXX is πραύς, which is found four times in the NT, translated always in the KJV by "meek" and in the RSV by "meek" (Matt. 5:5), "humble" (Matt. 21:5), "gentle" (Matt. 11:29; I Pet. 3:4). Matt. 5:5 shows most clearly the connection with its OT background; "Blessed are the meek, for they shall inherit the earth," comes directly from Ps. 37:11. In contrast to

those who rebel against God and are insolent to man, and whom the Lord will destroy, are the meek, who take a proper view of themselves in relation to God and hence to man; these are they who shall possess the kingdom of God. Matt. 21:5 is a quotation from Zech. 9:9; and in Matt. 11:29 πραύς is paired with ταπεινός, which also has a long history of use in the OT (*cf.* HUMILITY). In I Pet. 3:4 it is used with "quiet" to describe what should be the attitude of a Christian woman, a "gentle and quiet spirit" in contrast to mere "outward adorning."

There are eleven occurrences of the cognate noun, πραύτης, all of them outside the Gospels. In II Cor. 10:1 it is used of Christ: "I entreat you, by the meekness and gentleness of Christ" (cf. Matt. 11:29 above; also Phil. 2:8: "humbled himself"). In all other examples it is a virtue enjoined upon Christians. Jas. 1:21; 3:13 may have something of the flavor of the OT usage; but in the other cases, although the word has been used by pagan writers in an ethical sense, it has acquired distinctly Christian overtones. Aristotle had said that "meekness" was the mean between "irascibility" (ὀργιλότης) and "sluggishness" (ἀοργησία), "and he finds it worthy of praise, more because by it a man retains his own equanimity and composure than for any nobler reason" (Trench, *Synonyms of the NT*). The RSV translates πραύτης by "meekness" when it is a question of one's inner attitude, and by "gentleness" when it is a matter of dealing with others; and in Tit. 3:2 "perfect courtesy" well brings out the meaning.

Rich though the word has become through the long history of its use in both Jewish and pagan connections, its full meaning in the Christian tradition comes out only as seen in its portrayal of a quality in Christ (Matt. 11:29; II Cor. 10:1) which Christians are to emulate and share (Phil. 2:5).

24. The Plain of Esdraelon with the mound of Megiddo at the left center, and below it the Arab village of el-Lejjun

the Carmel Range that projects into the Plain of Esdraelon from the SW. It is located approximately twenty miles S-SE of Haifa and eleven miles N-NW of Jenin; less than one mile to the S is the village el-Lejjun (derived from Latin *Legio*, "Legion"), the site of a Roman encampment. Figs. MEG 22-23, 24.

A more strategic site than Megiddo is difficult to find. From its summit can be seen the entire breadth of the Plain of Esdraelon to the hills of Galilee on the N, and much of its length along Mount Carmel on the W to where the W extension of the Galilee hills hides the Mediterranean from view, and eastward toward Mount Gilboa and Little Hermon, between which is the watershed where the plain drops away to the Jordan Valley, with the Transjordan hills beyond. Across the plain and to the right of Little Hermon rises Mount Tabor. Two important ancient routes intersected just E of the mound: one linked Egypt with the Fertile Crescent; the other linked central and E Palestine with the Phoenician coast. The former followed the coast of Palestine through Philistia and the Plain of Sharon, passed through the Carmel Range by way of Wadi 'Arah, which runs along the E side of Megiddo, and then crossed the Plain of Esdraelon to Syria and Mesopotamia. Since the Wadi 'Arah is the best pass through the Carmel chain, and since Megiddo guarded its N entrance, possession of the site permitted absolute control of this route. During Roman times, when Megiddo was no longer occupied, the Romans exercised similar control over this pass by stationing troops at Legio. The second route followed the central N-S ridge of Palestine to Jenin, led along the N side of the Carmel Range by Taanach and Megiddo to the Plain of Acre, and northward to Phoenicia. Since this route also skirted Megiddo, it too was subject to control from the site. Because of its strategic location, Megiddo was the scene of many battles; the prize to the victor was domination of the city itself, and of the routes which it controlled.

2. Excavation. The first excavations at Megiddo (1903-5) were conducted by G. Schumacher for the Deutschen Orient-Gesellschaft. A large N-S trench across the middle of the mound, an extensive area on the E side, and a number of soundings and probe trenches were dug during these campaigns. Schumacher's excavations on the mound revealed eight

25. Air view of the Oriental Institute expedition house and mound at Megiddo. The deep trenches are from the earlier Schumacher excavations.

strata, ranging in date from MB II (from the nineteenth century) to the Persian period. Fig. MEG 25.

Nothing more was done at Megiddo until 1925, when the Oriental Institute of the University of Chicago organized the Megiddo Expedition, the largest ever to work in Palestine. The excavations, which continued until 1939, were successively directed by C. S. Fisher (1925-27), P. L. O. Guy (1927-29), and Gordon Loud (1935-39). Excavation was begun on the lower E slope of the mound to provide an area for dumping debris, and a number of tombs were brought to light in this area. On the mound itself, the top five strata in the SE section (area C) were cleared. In 1929 the entire mound was purchased, with a view to excavating it completely from top to bottom. The five strata previously cleared in area C were then systematically removed in all other areas of the summit. Later the plan to excavate the whole mound had to be abandoned, and work was concentrated in several areas (A and B on the S side, E on the SW side, and D on the N side). When the complete excavation of these areas proved impossible, it was decided to dig several smaller areas in different parts of the site to bedrock

Courtesy of the Oriental Institute, the University of Chicago

26. Completed excavations in one of the areas at Megiddo

(areas AA and DD on the N side, BB on the E side,* and CC on the S side), in order to recover a complete cultural history of the site. Only in area BB did the excavators reach bedrock; here a total of twenty strata—several with more than one phase—were distinguished, covering more than 3,500 years, from early Chalcolithic (i.e., the early fourth millennium) to the Persian period, with only a few occupational gaps. Fig. MEG 26.

More recently (1960), a sounding was conducted by Y. Yadin on the NE side of the mound to investigate problems of stratigraphy of the Solomonic period.

3. History. The primary source for the history of the site is the information gleaned from archaeological excavation. Supplementing this source are a number of literary documents in which Megiddo is mentioned, including Egyptian and Assyrian texts, the Tell el-Amarna Tablets, and the Bible.

a. From the first settlement through the Early Bronze Age. The earliest occupation of the site, stratum XX, was founded on bedrock. Only a small area of this stratum has been exposed, and no over-all view of the occupation can be given. Architectural remains consist of a few circular walls and a series of holes cut in bedrock.* Prominent among the objects are flint implements, including sickle blades, scrapers, and javelin heads. The pottery is mixed: some of it belongs to the Early Chalcolithic period, proving that Megiddo came into being in the early fourth millennium B.C.; the remainder belongs to the following Chalcolithic phases, terminating *ca.* 3200 B.C. Stratum XIX, dated *ca.* the thirty-second or thirty-first century B.C., by examples of band-slip and gray burnished pottery, is also represented by fragmentary remains and includes at least two phases. The most noteworthy structure is a rectangular shrine with an altar against the back wall opposite the entrance.* The following occupation, stratum XVIII, belongs to EB II (*ca.* 2900-2600) and features the largest city wall yet found at the site; it is nearly twenty-six feet thick—including a buttressing wall—and is preserved to a height of more than thirteen feet. Strata XVII and XVI—dated early in EB III (*ca.* 2600-2300)—contain better-preserved buildings than earlier strata. Of special interest is an enormous round altar, the finest yet discovered in Palestine (Figs. ALT 20; MEG 27). In the debris surrounding its base were found a great quantity of animal bones, which indicate animal sacrifice. With the end of stratum XVI, the site was unoccupied for at least two centuries. Figs. WAL 2; TEM 41.

Courtesy of the Oriental Institute, the University of Chicago

27. Burnt-offering altar at Megiddo, as rebuilt in Stratum XVI

Little is known about the inhabitants of Megiddo during this period. Skeletal remains from Chalcolithic and EB tombs found on the E slope of the mound indicate that the inhabitants were of medium stature with long, narrow heads (dolichocephalic), characteristically Mediterranean in type. Animal bones discovered in the tombs and on the mound prove that the ass, large and small ox, roe deer, pig, dog or jackal, and several species of sheep and goats were known in Chalcolithic and EB times; gazelle, lion, and bear were also known in Chalcolithic times.

b. The Middle Bronze Age. This period is fully represented at Megiddo by five strata, XV to X, several of which include more than one phase. The first of these, stratum XV, belongs to MB I and IIA, covering the twenty-first to the early nineteenth centuries. The great altar of strata XVII and XVI continued to be used during this occupation, but was now associated with three shrines or temples, each consisting of an altar room, porch, and side chamber (*see* TEMPLES § 2*a*).* To this stratum probably belongs the statuette of Thut-hotep—a high official at Hermapolis under Sesostris III—which was found reused in a stratum VII wall. Whether it indicates Egyptian control of or simply friendly relations with Megiddo is unknown, although the former is probable. Fig. ARC 51.

Stratum XIV includes two phases, which belong to the nineteenth and eighteenth centuries. One of the three temples of stratum XV survived, but was radically modified. Carved reliefs in ivory, and bronze figurines, axes, and adzes first appear in this stratum. The following occupation, stratum XIII, also consists of two phases, which belong to the eighteenth century. This city was protected by a mud-brick wall nearly five feet thick, and an exceptionally strong L-shaped gateway built of mud brick on the N side of the mound (area AA). Noteworthy among the finds were the first HYKSOS scarabs, presaging Hyksos ascendancy in Palestine. These scarabs are exceedingly common in strata XII-X, indicating that these strata were contemporary with the major period of Hyksos dominance.

During stratum XII (*ca.* eighteenth–early seventeenth centuries), the earlier (stratum XIII*) city wall continued in use, but a buttressing wall was added to its outer face. Within the city several well-preserved large houses were discovered, each consisting of a central court enclosed on two or three sides by single rows of rooms. In this and the following two strata (XI and X), a number of stone-built tombs containing multiple burials were found inside the city—an unusual custom in Palestine. Equipment in the tombs included a quantity of bone inlays used to decorate small wooden funerary boxes, in addition

to the usual deposits of pottery, jewelry, and implements. In the next occupation, stratum XI (seventeenth century), a group of even larger houses was built over the remains of the strata XIII-XII city wall. A new city wall, slightly more than three feet thick, was built with small buttresses on the inner face and a sloping glacis against its outer face; the latter is a characteristic feature of the Hyksos period. In stratum X (late seventeenth–early sixteenth centuries) many of the earlier stratum XI buildings continued in use, but with repairs and additions. Most of the objects are similar to those of strata XIII-XI, but a number of new pottery forms—which become common in LB—appear for the first time, proving that the Middle Bronze period at Megiddo was drawing to a close. Fig. ARC 55.

28. Skeleton of a child, along with jugs, found in a burial jar at Megiddo (Middle Bronze II)

During this period Megiddo was a prosperous city, as shown both by the architectural remains and by the fine objects recovered. But it enjoyed little peace; the number of strata and phases of strata in this period point to repeated destruction. The tombs of the early part of the period (MB I) were predominantly of the shaft type; during MB II some of these were reused, and other types—e.g., jar burials* and stone-built tombs (*see above*)—became common (Fig. MEG 28). From skeletal remains, it appears that the population was changing; the inhabitants were still of medium stature, but were sturdier and had broader skulls, approaching the Alpine type; this type predominates throughout later occupations. Fig. TOM 67.

c. The Late Bronze Age. With the expulsion of the Hyksos from Egypt, *ca.* 1550 B.C., and the Egyptian conquest of Palestine that followed, Megiddo once again came under Egyptian domination; it remained a city-state in the Asiatic empire of Egypt throughout the Late Bronze Age. Three strata belong to this period: IX, VIII, and VII. The plans and arrangements of the buildings of these strata generally follow those of stratum X, though with minor modifications. A good example is the palace just inside the city gate in area AA; its basic plan and orientation are the same through strata X-VII, with only minor alterations of plan, and construction of new floors during these occupations. Stratum IX (*ca.* 1550-1468) is particularly noted for its excellent examples of bichrome pottery. This fabric belongs exclusively to LB I, and examples of it have been found in Palestine, Syria, Egypt, and Cyprus (Pl. XX). This occupation was destroyed by the great Egyptian king Thut-mose III (*ca.* 1490-1436), after defeating a coalition of Syro-Palestinian princes, led by the king of Kadesh, at Megiddo. The account of this battle is vividly told by Thut-mose' scribes on the Armant Stele and in the Annals of Karnak. After this disaster Megiddo probably lay in ruins for several decades.

The next occupation, stratum VIII (fourteenth century), features a number of important structures.

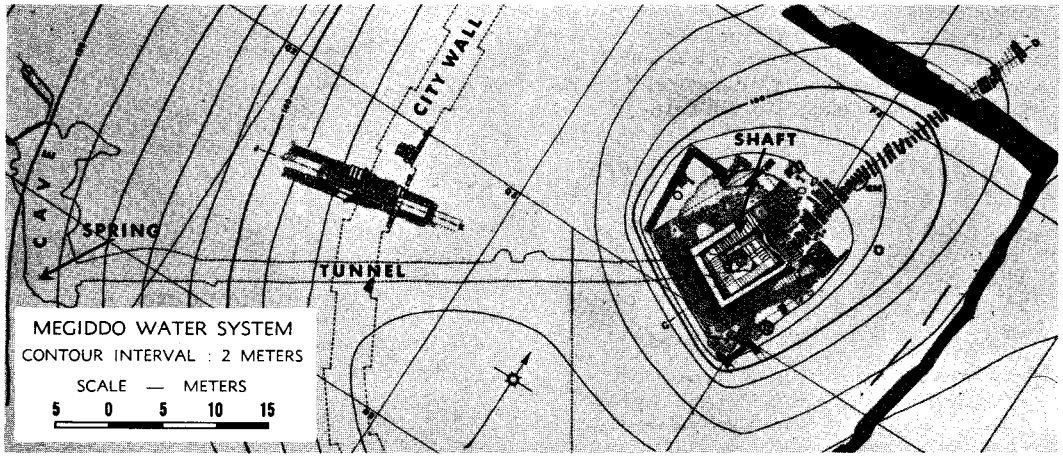
29. Excavations at Megiddo, showing the temple of Stratum VIII

The gateway of the city (area AA), which may have earlier phases in stratum IX or X, consisted of a narrow passage flanked by three pairs of piers, access to which was gained by means of a paved road on the NE slope of the mound.* During this or the following period (VIIB), a new temple (Figs. MEG 29; TEM 45) was built over the remains of the earlier altar and shrines; this area seems to have been considered sacred during all Canaanite occupations. The temple was rectangular in plan and contained one large room. Its entrance on the N was guarded by two large towers (*see* TEMPLES § 2*a*). Beneath the floor of one of the palace rooms a treasure hoard of gold and ivory objects was found, including an ivory wand decorated with incised animal and human figures on one side and an Egyptian text on the other. These attest to the wealth of Megiddo at this time. This occupation is contemporary with the Amarna Age in Egypt, during which Egyptian control over its Asiatic empire was weak and ineffective (*see* TELL EL-AMARNA). Among the letters from the city-states of Palestine to the Egyptian capital are a number from Prince Biridiya of Megiddo (spelled "Magidda" or "Makida"). In these letters Biridiya describes his loyalty to the Egyptian throne and accuses the princes of other city-states of treachery and failure to assume their obligations. Altogether these letters vividly portray the chaotic political conditions of this period. To about this time perhaps belongs a fragment of a clay tablet containing part of the Gilgamesh Epic, which



Courtesy of the Oriental Institute, the University of Chicago

30. Plans of the Megiddo water system

was found at the site by a shepherd in 1955. Fig. ARC 55.

Stratum VII, covering the thirteenth century and the first three quarters of the twelfth, consists of two phases, the first of which was violently destroyed. The second phase properly belongs to the beginning of the Iron Age, but for purposes of stratigraphic continuity, it is included in the Late Bronze period. The city represented by this phase was rebuilt immediately along the lines of VIIB and VIII, with only minor modifications. The city gate remains the same except for the laying of new pavement. The temple was rebuilt—probably during this phase—with walls of ashlar and a lime plaster floor; otherwise it was virtually identical with the earlier structure. The palace was also slightly altered in plan, especially by the addition of a three-room treasury below ground level. It contained a great quantity of beautiful ivory objects carved in relief or incised, including especially a model pen case inscribed with the name of Ramses III and a small box decorated with lions and sphinxes,* together with many other valuable objects such as gold jewelry, semiprecious stones, and alabaster jars (Figs. ART 70; BAN 18-19; IVO 18-19, 21; *see also* IVORY). It was probably in this period that the great water system was dug in area E, in order to assure a water supply inside the city during siege. It consisted of a deep vertical shaft cut through earlier occupational debris and bedrock, and a long, horizontal, rock-hewn tunnel leading from the shaft to a spring in a cave at the foot of the mound; water flowed from the cave through the tunnel to the bottom of the shaft. This water system continued in use for centuries, with periodic cleaning and minor alterations (Figs. MEG 30; WAT 7; *see also* WATER WORKS § 3). The discovery of a bronze statue base of Ramses VI under a VIIB wall proves that this occupation was under Egyptian control.* Megiddo is also mentioned among other Syro-Palestinian towns in the Papyrus Anastasi, a letter written by an Egyptian official in the late thirteenth century B.C. Fig. MEG 31.

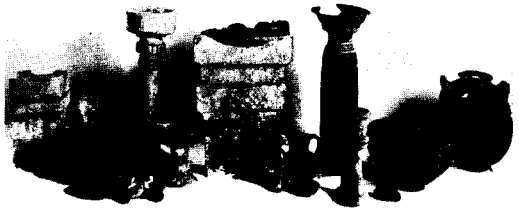
Courtesy of the Oriental Institute, the University of Chicago

31. Bronze statue base of Ramses VI, discovered at Megiddo

During this occupation the Israelites invaded Palestine. Megiddo lay in the territory allotted to the tribe of Manasseh (Josh. 17:11; I Chr. 7:29). In spite of the historical summary in Josh. 12:21—according to which Joshua and the children of Israel defeated the king of this city—the Israelites were unable to occupy Megiddo at this time (Judg. 1:27), because the Canaanite inhabitants were equipped with superior weapons such as iron chariots (see Josh. 17:16).

d. The Iron Age. Stratum VII was followed by a period during which Megiddo was unoccupied. It was during this occupational gap that the battle between Barak and the Canaanite Sisera took place at Taanach, by the waters of Megiddo, as told by Deborah (Judg. 5:19). The next occupation, stratum VI, covers the first half of the eleventh century and consists of two phases. The building tradition that persisted throughout LB is now broken, and the structures of this occupation bear no resemblance to those of earlier periods. During the first phase the town was probably unprotected, having neither a wall nor a city gate. But in the second phase (VIA) a new gateway was constructed, of which only the approach remains; the fortress gate itself was destroyed by the builders of the VA-IVB gateway (*see below*). Just W of the city gate, new houses were built on totally different lines from the earlier palaces. To this period also belongs the third and last phase of the Canaanite temple—as shown by its pottery—suggesting that the inhabitants were still Canaanites. Noteworthy objects are a bronze statuette of a seated man (or deity) overlaid with gold,* a fragment of a

rectangular shrine of clay, a hoard of silver jewelry in cloth bags, and a fragment of an ivory cup carved with scenes in relief. This stratum was largely destroyed by a great fire that baked many of the mud-brick walls of the buildings. Fig. ART 64.



Courtesy of the Oriental Institute, the University of Chicago

32. Cult objects from the Solomonic stratum at Megiddo, including two horned incense altars and three cylindrical incense stands

After a decade or two, the site was again occupied, probably by Israelites during the reign of Saul (*ca.* 1020-1000 B.C.). The remains of the buildings of this stratum (VB) are fragmentary—having been largely destroyed by the builders of VA-IVB—but enough is preserved to show that in both plan and orientation they differed from those of preceding occupations. An exception is the VIA gateway, which probably continued in use, though with minor additions. Of interest among the objects found are a number of pieces of Cypriote pottery, proving that trade with Cyprus—which had been going on throughout LB and Iron I—continued during this period; a bronze statuette; and a small proto-Ionic CAPITAL—the earliest example known in the ancient Near East. *See* ARCHITECTURE. Fig. MEG 32.

This stratum, which came to an end in the second quarter of the tenth century, covered the reigns of Saul (*ca.* 1020-1000) and David (*ca.* 1000-961). Since it is inconceivable that David would have left any Palestinian stronghold or fortress in Canaanite hands while pursuing his program of conquest, it can be assumed that Megiddo was an Israelite city at this time. A number of lines of evidence indicate that this occupation gradually gave way to stratum VA-IVB during the early years of the reign of Solomon (*ca.* 961-923) and possibly during the last years of David. In the transition, the VB inhabitants were evicted, and their homes were torn down as each new VA-IVB structure was built.

The next stratum is called VA-IVB, because the buildings that were assigned by the excavators to separate phases VA and IVB actually belong to one occupation. During this occupation Solomon transformed Megiddo from an urban center into a royal chariot city (I Kings 9:15, 19). Although it has been generally believed that all the stable complexes at Megiddo were built by Solomon, Yadin's excavation proved that at least the N stables belong to stratum IVA (*see below*). The S stable, however, exhibits a slightly different plan and finer workmanship than the N stable, and was almost certainly constructed by Solomon. It contained several units, each consisting of a paved central aisle flanked by two rows of paved stalls, which were equipped with tie posts and mangers. Outside was an enclosed exercise yard with a water trough in the center.* Two large residences,

35. One of two large residences from Stratum IV at Megiddo, near which several proto-Ionic pilaster capitals were discovered

one in the S* and one in the N, were also found. One of these probably served as the residence of Baana, one of the twelve district officers appointed by Solomon (I Kings 4:12). Near these buildings several proto-Ionic pilaster capitals were discovered (Figs. CAP 8; MEG 35). Just W of the city gate was a series of smaller buildings, presumably houses, which contained, in addition to a quantity of pottery, a number of cult objects such as altars and incense burners. The city was protected by a casemate wall, traces of which are preserved along the NE edge of the mound, and a new fortress gate, consisting of a paved passage flanked by four pairs of piers. A paved road approached the gate at a sharp angle from the E and was protected by a second gateway consisting of two piers. Figs. MEG 33, 34, 36-37; ARC 53.

I. This occupation was brought to an end by Shishak of Egypt, in the course of his Palestinian campaign *ca.* 918. Although the Bible describes only his attack on Judah (I Kings 14:25-26; II Chr. 12:2-9), the discovery of a stele at Megiddo bearing Shishak's name (Fig. SHI 53), and the appearance of Megiddo in Shishak's list of conquered Syro-Palestinian towns on the Bubastite Portal at Karnak, prove that Megiddo fell at this time. Only a few buildings and the casemate fortifications were destroyed in this attack. Three stables (Figs. STA 78-80) were built in the NE area of the site, probably by Ahab, who is reported, in the annals of Shalmaneser III, to have had two thousand chariots. These stables were separated from one another by paved streets which led to another exercise yard with two large bins, probably for the storage of fodder. Together with the S stable, which seems to have survived the Shishak raid and to have been repaired and remodeled in this period, they provided accommodation for approximately 450 horses. A new city wall, solidly built with offsets and slightly more than nine feet thick, and a new gateway, consisting of a central passage flanked by three pairs of piers, were also constructed. It was during this period that Ahaziah king of Judah died in Megiddo (II Kings 9:27) from wounds inflicted by Jehu at the beginning of Jehu's revolution in Israel (*ca.* 842). Although the destruction of this occupation is not specifically mentioned in any source, probably it can be attributed to Hazael king of Syria, who devastated Israel *ca.* 815 (II Kings 13:3-7).

Whether stratum III began immediately after the destruction of IVA or during the reign of Jeroboam II (*ca.* 786-746), after a lapse of several decades, cannot be determined. In this period Megiddo once again became a city of houses and shops, and no longer served as a royal chariot city. It was well planned throughout; buildings were similarly oriented and laid out in blocks bounded by parallel streets. The VA-IVB city wall and gate approach still protected the city, but a new fortress gate was built, reusing in part the foundations of the earlier gate. Unlike its predecessor, this gate was designed with only two pairs of piers flanking the passageway. A noteworthy feature of this stratum was a circular grain storage pit more than twenty-one feet deep, thirty-five feet in diameter at the top tapering to *ca.* twenty-one feet in diameter at the bottom, with an estimated capacity of *ca.* 12,800 bushels (Fig. GRA 37). One of the most interesting finds was a seal, inscribed with two lines of Hebrew: "(belonging) to Shema, servant of Jeroboam" (Fig. SEA 35, no. 20); it probably belonged to an officer of King Jeroboam II. This occupation was destroyed in 733 by the Assyrians under Tiglath-pileser III, only a few years before the collapse of the N kingdom of Israel.

The city was soon rebuilt and became the capital of an Assyrian province under an Assyrian governor. One of the governors was a certain Ishtu-Adadaninu, who ruled Megiddo (spelled "Magidu[nu]" in Assyrian) in the year 679. During this occupation, stratum II, the city was without an encircling wall. The general layout of the town remained the same as in stratum III, though it was more highly developed. A large building with walls 6½-8 feet thick, and with rooms on three or possibly four sides of a central court, probably served as the fortified residence of the governor. This occupation was destroyed by Neco of Egypt in 609, after he defeated and killed Josiah of Judah at the Battle of Megiddo (II Kings 23:29-30; II Chr. 35:20-24).

Soon after this battle the site was reoccupied. Like stratum II, this occupation (stratum I) was largely residential and lacked a protective city wall. The last biblical reference to Megiddo (Zech. 12:11) probably belongs to this period or slightly later. Here mourning in Jerusalem is compared to mourning in the plain of Megiddo. This may refer specifically to mourning for Josiah, or in a more general sense to mourning for all who had lost their lives in the historic battles that were fought near the city. With the end of stratum I, probably in the early fourth century, occupation of Megiddo ceased.

38. Roman-period tomb at Megiddo, with cover slabs removed

Among the remains of stratum I and in the cemetery area on the SE slope of the mound, a number

of graves of the Roman period were discovered.* At the time, there was a large Roman community S of the mound in the vicinity of the modern village el-Lejjun, and it was probably the inhabitants of this settlement who used the site as a burial ground. Fig. MEG 38.

MEGIDDO, PLAIN OF [בקעת מגדון] (Zech. 12:11); KJV VALLEY OF MEGIDDON mə gĭd'ən. That portion of the Valley of Jezreel in the vicinity of Megiddo; a place of great mourning. The reference in Zechariah may allude to the death of Josiah (see II Chr. 35:22), or to all who died on this historic battlefield. G. W. Van Beek

MEGIDDO, WATERS OF [מי מגדו]. A perennial stream near Megiddo; probably Wadi el-Lejjun, the scene of the battle of Sisera and Barak (Judg. 5:19).

MEGILLOTH mĭ gĭl'ŏth. The plural form of *megillah* (מגלה), meaning "scroll [of papyrus]" (Jer. 36: 28-29; Ezek. 3:1-3; etc.). "The five *megilloth*" were each read on an annual festival: Song of Songs (Passover), Ruth (Pentecost), Lamentations (the ninth of Ab), Ecclesiastes (Tabernacles), and Esther (Purim). R. H. Pfeiffer

MEHETABEL mĭ hĕt'ə bĕl [מהיטבאל, God does good]. **1.** The wife of Hadar (Hadad), a king of Edom (Gen. 36:39; I Chr. 1:50).

2. An ancestor of Shemaiah, a false prophet, who was hired by Tobiah and Sanballat to intimidate Nehemiah (Neh. 6:10). M. Newman

MEHIDA mĭ hī'də [מחידא, *possibly for* מחירא, bought (as slave); Μαουδά (Ezra 2:52), Μεειδά (Neh. 7:54)]; KJV Apoc. MEEDA mē ē'də. Eponym of a family of Nethinim, or temple servants (Ezra 2:52; Neh. 7: 54; I Esd. 5:32).

Bibliography. W. Rudolph, *Esra und Nehemia* (1949), p. 12. B. T. Dahlberg

MEHIR mē'hər [מחיר] (I Chr. 4:11). A descendant of Judah.

MEHOLATHITE mĭ hō'lə thīt [מחלתי]. Descriptive adjective of Adriel, who was the husband of Merab daughter of Saul (I Sam. 18:19; II Sam. 21:8); he was the son of Barzillai. The name denotes an inhabitant of Abel-Meholah and may indicate that Saul contracted this alliance with a chief of this important Gileadite city in order to strengthen his rule. S. Cohen

MEHUJAEL mĭ hū'jĭ əl [מחויאל, מחייאל; LXX Μαιηλ] (Gen. 4:18). Son of Irad; J counterpart to P's "Mahalalel."

MEHUMAN mĭ hū'mən [מהומן] (Esth. 1:10). One of the seven eunuchs who served King Ahasuerus as chamberlain.

Bibliography. L. B. Paton, *Esther*, ICC (1908), pp. 67, 148.

MEHUNIM, MEHUNIMS. KJV forms of Meunim, Meunites.

ME-JARKON mē jär'kŏn [מי הירקון, waters of the Jarkon (pale green, *perhaps the color of the water*)] (Josh. 19:46). Part of the territory of Dan; the name probably does not refer to a place but rather to a watercourse, very possibly the Nahr el-'Auja, which flows into the Mediterranean 3¾ miles N of Joppa (modern Tell Aviv). The Nahr el-'Auja rises at Ras el-'Ain, some ten miles inland, and is one of five perennially flowing streams draining the Plain of Sharon and the Judeo-Samaritan highland beyond. It flows to the sea first through swampy land and then through a deep channel.

The Mishnaic term *Mê-Pîga* ("the Jarkon") reflects the Hellenistic city of Pegae at Ras el-'Ain, the Aphek of an earlier day. After Herod's founding of Antipatris in 9 B.C., the Jarkon became the "River of Antipatris," which the Arabs after the Muslim conquest adopted as the Nahr Abi Futrus. In the Middle Ages, Arab historians and geographers began using the modern name, Nahr el-'Auja ("the winding river").

1. Name
2. In the OT
   a. Gen. 14
   b. Ps. 110
3. In the NT
Bibliography

1. Name. Traditionally interpreted "king of righteousness" (Heb. 7:2), this name actually represents a good, ancient Canaanite formation, parallel to OT ADONI-ZEDEK and ABIMELECH; Akkadian *Milki-ilu* (*cf.* OT MALCHIEL) and *Ili-milku* (*cf.* OT ELIMELECH); and Ugaritic *mlkn'm* (*cf.* OT ABINOAM), *'ilmlk,* and *ṣdq'il* (*cf.* OT ZEDEKIAH). The proper translation is uncertain but is usually given as (*a*) "The (my) king is Zedek" (a deity), or (*b*) "Milki [a deity] is righteous" or "The (my) king is righteous(ness)."

2. In the OT. Historically Melchizedek was probably a Canaanite king of pre-Israelite Jerusalem (*see below*), as was ADONI-ZEDEK. He is mentioned in two OT passages. In Gen. 14:18-20 Melchizedek prepares a (cultic) meal for Abram (Abraham), blesses him in the name of God Most High, and receives his tithe. In Ps. 110:4 he is the representative priest in whose succession the Davidic king is ordained.

a. Gen. 14. Literarily the Melchizedek pericope (vss. 18-20) now lies embedded in two larger units, of which, however, it furnishes the high point. The larger includes the entire present chapter, which brings Abram into conflict with a league of powerful Eastern kings (*see* AMRAPHEL; ARIOCH); the smaller (vss. 17-24) leads the king of Sodom out to meet the victorious Abram (*see* ABRAHAM). What the setting and function of the ancient Melchizedek tradition may have been, is, accordingly, difficult to determine. Certainly it is odd to find the Canaanite cultus presented in so favorable a position vis-à-vis the religion of Israel. But Melchizedek's position gives the key; for the chapter, in its present form being late, is best seen against the background of the Israelite monarchy.

First, Melchizedek is recognized as "king of Salem" (*shālēm*), which was identified with Jerusalem (as Ps. 76:2—H 76:3 and Targ. and Dead Sea Genesis Apocryphon on Gen. 14:18 indicate; *see* SALEM; JERUSALEM § 1). Second, he is "priest of God Most High" (אל עליון); this is quite probably an appellation of the high god worshiped by the Canaanites in pre-Israelite Jerusalem (*see* GOD, OT). Clearly he is presented as the sacral king, exercising both royal and priestly authority in the city later to become Israel's holy capital. By virtue of his unique office Melchizedek towers over all the other important people in this crowded chapter. To him only, Abram submits himself (vs. 20*b*).

b. Ps. 110. The figure of Melchizedek as sacral king is here associated with the Davidic messiah. Now Melchizedek appears as a prototype of the Davidic king, who is also Yahweh's adopted son (Ps. 2:7) and anointed prince (Pss. 18:50—H 18:51; 132:17). As ideal king, the "son of David" establishes righteousness (צדק [same as *"-zedek"*]) and peace (שלום [cognate with SALEM]; Pss. 72:1-7; 99:4). As ideal priest, he heads Israel's worship (II Sam. 6; I Chr. 13; 15–16) and mediates between his people and God (I Kings 8; Ps. 132:9-10). Since this priesthood is eternal (Ps. 110:4*a*), it transcends the Aaronic (Levitical) order. *See* MESSIAH (JEWISH); PRIESTS AND LEVITES §§ D2*a-b*.

3. In the NT. Melchizedek is mentioned only in Hebrews (5:6, 10; 6:20; 7:1, 10-11, 15, 17). A major theme of this letter is the superiority of Christ above all creatures and the pre-eminence of his mediatorial office over all earthly ministries (*see* HEBREWS, LETTER TO THE, § 4*b*); and the OT Melchizedek tradition is offered as part of its scriptural proof. Christ is designated "high priest after the order of Melchizedek" (5:5-10; 6:20; cf. 7:21; Ps. 110:4). Being both king of righteousness and peace and a unique (without parents or kin) and eternal (without beginning or end) priest (though never "high priest"), Melchizedek resembles the Son of God (7:1-3). Since Melchizedek himself was greater than the patriarch Abraham (vss. 4-10) and the priest Aaron (vss. 11-17), he is the "type" of Christ, whose royal, holy high priesthood transcends all human orders (vss. 23-28; 8:1–10:18).

MELITO, PSEUDO-, NARRATIVE OF mĕl'ĭ tō. A Latin narrative of the ASSUMPTION OF THE VIRGIN.

MELKON mĕl'kŏn. Alternately: **MELCHIOR** mĕl'kĭ ôr. In late tradition, one of the Magi (Matt. 2:1-12). Many curious and purely imaginative traditions arose to amplify the terse canonical account. In the increasingly common form of the tradition which limited the number of the Magi to three (on the basis of the three gifts mentioned in Matthew), Melkon is regularly pictured as the king of Persia, and occasionally as the brother of his two associates: Gaspar, a king of India, and Balthasar, a king of Arabia. In the very prolix account in the Armenian Gospel of the Infancy (*see* APOCRYPHA, NT) Melkon delivers to the infant Jesus, along with the traditional gifts, a letter to Adam, written and sealed by God, and long stored in the archives of the kings of Persia. In the West he is commemorated as a saint, most commonly together with Gaspar and Balthasar, on

January 6; in the East, on December 25. Among others of the utterly irresponsible legends which have attached themselves to the three is that identifying them with Shem, Ham, and Japheth. Less grotesque fancy sees them receiving baptism at the hands of Thomas and acting as missionaries in Persia. They are often styled the Three Kings of Cologne, from one form of the medieval legend, which recounts that their bodies were brought by the Empress Helena (mother of Constantine) to Constantinople, and thence were transferred by Eustorgius to Milan, and subsequently by the Emperor Henry to Cologne.

M. S. ENSLIN

MELONS [אבטחים, *'abhaṭṭiḥîm;* Arab. *baṭîḫ*]. A fruit, common in Egypt, for which the Israelites longed when in the wilderness (Num. 11:5). The word is probably generic, referring to several kinds of melons, *Cucumis melo* L. (muskmelon; *cf.* FLORA § A3*e*) and *Citrullus vulgaris* Schrad. (watermelon), common in N Egypt.

See also CUCUMBER; FLORA § A3*d*.

J. C. TREVER

MELZAR měl'zär. KJV translation of מלצר (Dan. 1:11, 16; RSV correctly "the steward"). The word occurs each time with the definite article (המלצר) and is not a proper name.

MEM měm (Heb. mām) [מ, *m* (*Mēm*)]. The thirteenth letter of the Hebrew ALPHABET as it is placed in the KJV at the head of the thirteenth section of the acrostic psalm, Ps. 119, where each verse of this section of the psalm begins with this letter.

MEMBERS. A term of importance only in the NT (μέλη), where it is used, not only of the organs of the body, and inclusively of the body as a whole (e.g., Matt. 5:29; Rom. 6:13; 7:23; 12:4; I Cor. 12:12; Jas. 3:6; 4:1), but also of the members of the church (e.g., Rom. 12:5; I Cor. 12:27; Eph. 4:25; 5:30)—two uses not so divergent as they may appear, since the church might be looked upon as the body of Christ. For a striking instance of the association of the two ideas, see I Cor. 6:15, where our "bodies" are described as "members" of Christ. Although the idea of "members" is present in I Cor. 6:5; Eph. 2:19; 3:6 (see RSV), the Greek word is not found.

See also CHURCH, IDEA OF; BODY OF CHRIST.

J. KNOX

MEMMIUS, QUINTUS kwĭn'təs měm'ĭ əs [Κοίντος Μέμμιος] (II Macc. 11:34). A Roman envoy who, with Titus Manius, is reported to have brought a letter to the Jewish people; these *legati Romanorum* (Vulg.) are otherwise unknown to history, and some infer that the incident of the letter is a fabrication.

J. C. SWAIM

MEMORIAL, MEMORY [זכר, to remember, *and nominal forms;* μιμνήσκομαι]. In addition to the words translated thus, "memorial" or "memory" is implied by (*a*) such phrases as "record," "be mindful," "come to mind" (lit., "rise up"; e.g., Jer. 3:16; Ezek. 14:3; etc.), "remind" (i.e., "cause to remember"), and "reminder"; (*b*) certain examples of the use of the verb "to visit" (e.g., I Sam. 15:2; Pss. 80:14; 106:4; Hos. 8:13=9:9=Jer. 14:10, where "visit" either parallels or approaches "remember" in meaning); (*c*) the words for "forgetting" (e.g., Isa. 17:10) and their synonyms.

Some of the older Bible dictionaries did not include a study of "memory," but the act of memory plays a significant role in the Bible and in all life. Recent writers have tended to emphasize that the biblical memory is not merely theoretical—i.e., the recalling of an objective memory image—but that it recalls conditions and determines the behavior of him who remembers. But to a certain extent this is true also of the most intimate, personal, and religious memories of modern man. It is as well to know that for the Hebrew the recollection of the past means that what is recalled becomes a present reality, which in turn controls the will. Various shades of meaning may also be discovered in the Hebrew usage. Besides (*a*) "remember, call to mind" (cf. Isa. 65:17; Jer. 3:16), used basically of the recollection of past events, there is (*b*) "remember" almost in the sense of "know" (Gen. 31:50; Judg. 9:2). In Isa. 47:7 "remember their end" could also be translated by "know" or even "anticipate." And there are: (*c*) Jer. 17:2, where "remember" is almost "delight in"; Acts 10:31, where remembered alms are parallel to prayers that are heard; and lastly, (*d*) "remember" appears to mean "commemorate" in Esth. 9:28, "commemorated" or "addressed" in Exod. 3:15, and "affirm" in Ps. 78:35.

1. God as subject of the verb. God remembers such people as Noah, Abraham, Rachel, Hannah. Then he also remembers or will remember "my covenant" (Gen. 9:15; Exod. 2:24; 6:5; Lev. 26:42; Ezek. 16:60); or he is ever mindful of his covenant (I Chr. 16:15; Pss. 105:8; 111:5); his steadfast love (Ps. 98:3); his holy promise (105:42). He does not remember (Isa. 43:25; Jer. 31:34) or does remember (Jer. 14:10) sins, evil works (Hos. 7:2), iniquity (Hos. 8:13; 9:9; Rev. 16:19; 18:5). He remembers that Israel is dust (Ps. 78:39), or he remembers Israel's low estate (136:23). He is mindful of man (Ps. 8:4) and of Israel (115:12), but he remembers the dead no more (88:5). He causes his name to be remembered at sanctuaries (Exod. 20:24), and likewise his works (Ps. 111:4). In John 14:26 the Holy Spirit is to create remembrance of Jesus Christ and his words in the disciples.

2. Israel and Israelites as the subject of the verb. God, like Moses, David, Nehemiah, seeks to stir up Israel to remember. God bids Israel remember the sabbath day (Exod. 20:8; Mal. 4:4); or to remember to keep the commandments (Num. 15:39; cf. Ps. 103:18); or to remember (Isa. 46:8-9) or not to remember (Isa. 43:18) the former things. Israel's remembrance figures prominently in Deuteronomy and Psalms, and probably a cultic explanation is essential to both. In Deuteronomy, Moses bids Israel remember (*a*) God (8:18; also Ps. 42:6; Eccl. 12:1; Isa. 57:11; 64:5; Jer. 51:50; Ezek. 6:9; Zech. 10:9; cf. Judg. 8:34; Neh. 4:14); (*b*) the deeds of God (Deut. 7:18; cf. I Chr. 16:12; Pss. 77:5, 11; 105:5; 106:7; 119:55 [name]), including the Exodus (Deut. 11:3; cf. Exod. 14:31); (*c*) the desert journey (Deut. 8:2; cf. 24:9);

(*d*) the days of old (Deut. 32:7; cf. Pss. 77:5; 143:5; Ezek. 16:43); (*e*) that they were once slaves in Egypt (Deut. 15:15; 16:12; 24:18, 22), for such memories will instruct them how to regard and treat resident aliens in their own midst; (*f*) Amalek (Deut. 25:17, 19; cf. Exod. 17:14). Consideration of the "memory" passages in Deuteronomy suggests that the mode of the remembrance was preaching or sacred recital in the sanctuaries, and it is so prominent as to amount to a Deuteronomic presentation of remembrance.

It may also be said that Moses bids Israel remember their fare in Egypt (Num. 11:5); Joshua (1:13) reminds certain tribes of Moses' word. Nehemiah reproaches Israel that they were not mindful of God's mercies (Neh. 9:17). Individuals use the formula "remember" in pleas of various kinds—e.g., Abigail to David (I Sam. 25:31); Shimei to David (II Sam. 19:19); Jehu to Bidkar (II Kings 9:25); etc. A remembrancer or recorder appears among David's officials (II Sam. 8:16; 20:24; cf. II Kings 18:18, etc.).

3. In prayer and intercession. The appeal to God to remember is, of course, a frequent formula of prayers, as these references show: Samson (Judg. 16:28); Hannah (I Sam. 1:11); Solomon (II Chr. 6:42); Hezekiah (II Kings 20:3); Nehemiah (Neh. 1:8 and frequently); Habakkuk (3:2); Job (Job 7:7, etc.). Jeremiah petitions God to remember his covenant (Jer. 14:21) and poignantly: "Remember me and visit me" (15:15; cf. 18:20). Similarly Israel prays to God in these terms (Lam. 3:19; 5:1). Such passages prepare us for the place of remembrance in the prayers of the psalmists. They ask God to remember not the sins of youth but rather to remember his people (Ps. 25:7; cf. 79:8; 106:4), or to be mindful of his mercy and of his steadfast love (Ps. 25:6). They pray that God will remember the scoffers (74:18, 22), or will remember his word (119:49). The formula of remembrance is also characteristic of the language of intercession. Thus Moses intercedes for Israel by asking God to remember Israel's three patriarchs (Exod. 32:13; Deut. 9:27). The psalmists pray that God will remember (*a*) their king (Pss. 20:3; 89:47, 50; 132:1); (*b*) Israel (Ps. 74:2); (*c*) Mount Zion (74:2); (*d*) the day of Jerusalem against Edom (137:7). The intercessors are, of course, priests, and perhaps the high priest himself.

The role of remembrance in the Psalms points to an important principle of the religious life. The psalmist says:

> My soul is cast down within me,
> therefore I remember thee (Ps. 42:6; cf. Jonah 2:7; II Pet. 1:12-15; 3:1).

Remembrance is revival for the downcast. It is the means whereby spiritual vitality and joy in God are re-created. Earlier in Ps. 42 the psalmist, as he pours out his soul, remembers his place in the festal procession. Indeed, he was the marshal of the procession, and he recalls the noise, the people, and the festival. Memory revives faith. In turn, in the cultic ceremonies themselves Israel remembers her ancient story, the works of God, his marvelous deeds in times past. Thus cult is sacred memory becoming sacred reality and life for the participants. The bearing of all this on the role of remembrance in the words for the institution of the Lord's Supper (Luke 22:19; I Cor. 11:24-25) is clear. Through the elements Christians are to remember Jesus Christ, but it follows from this meal that the presence of Christ is not merely remembered, but becomes a real presence through the remembrance. Their remembrances thus are the medium for the holy reality of Jesus Christ, and in this holy reality the life of the spirit is quickened and revived. Remembrance in religion always means revival. Thus in II Tim. 1:6 spiritual gifts are revived through the laying on of hands.

A different aspect of the matter is seen in those passages where God is invited to remember, or things are done to serve as a reminder to God. In Second Isaiah, God bids Israel remind him of any case she may have (Isa. 43:26). Similarly trumpets are to be sounded at the time of battle, that God may remember Israel and that victory may be ensured (Num. 10:9). The same principle is extended to various types of sacrifices over which trumpets are to be blown so that the sacrifices shall serve Israel for a remembrance before God (Num. 10:10). In this latter passage the Hebrew word for "remembrance" means a memorial or reminder to God, and it is attached to various objects. In Num. 10:10 it refers to trumpets; in Exod. 17:14 to a book (cf. Esth. 6:1; Mal. 3:16); in Exod. 28:12 to stories of remembrance (cf. 28:29; 39:7); in 30:16 to atonement money. All these objects are memorials—they are the things in which the memory or the name or the meaning is enshrined; and when presented to God, they serve to remind God of the people concerned. In other references the memorial is a reminder to Israel (Exod. 12:14; Num. 16:40—H 17:5; Josh. 4:7; Zech. 6:14; etc.). Similarly the אזכרה, "memorial offering," is P's word for that portion of various sacrifices and incenses burned before the Lord. The memorial portion thus bears the offerer into the presence of God. Through the memorial offering the worshiper is presented to God. In Isa. 62:6 Jerusalem's watchmen fulfil this role. They are not to cease putting the Lord in remembrance until he restores Jerusalem.

In the NT, apart from the memorial features connected with the Last Supper, there is little to mention. There is the recollection of OT events (Luke 17:32) or OT passages (Heb. 8:12). There is remembrance of fellow Christians (Col. 4:18), especially in prayers (Eph. 1:16; II Tim. 1:3; Philem. 1:4), and of Jesus Christ (II Tim. 2:8). The recollection of the words and events of Jesus (Matt. 16:9; Luke 24:6; John 15:20; Acts 20:35; Rev. 3:3; cf. Matt. 26:75, etc.) obviously represent the early stages in the formation and transmission of the gospel tradition. No doubt, short creedal statements like "Jesus is Lord" and I Tim. 3:16 were memorized and sung by the early Christians. "Tomb" (Mark 15:46; Luke 23:53; cf. Acts 7:16; Rev. 11:9) in Greek is the sign or place of remembrance.

In Acts 10:4 prayers and alms are a memorial before God. This verse thus suggests a sacrificial nuance, but it is highly improbable that there is any sacrificial intention with a godward reference in "Do this in memory of me" in the Last Supper.

G. HENTON DAVIES

MEMPHIS mĕm'fĭs [נף, *Nōph;* מף, *Mōph* (Hos. 9:6); LXX Μέμφις]. A city located *ca.* thirteen miles S of modern Cairo on the W side of the Nile; the chief city of Lower (N) Egypt during most of that country's early history.

1. Name
2. History
3. Archaeological significance
4. Religious significance

Bibliography

1. Name. According to native tradition, the city was founded by Menes, the first ruler of a united Egypt in the First Dynasty (*ca.* 2800 B.C.). The Egyptian name of the city, *Mn-nfr*, which appears in Hebrew as *Mōph* and (by a dissimilation of the initial labial) *Nōph*, dates from the Sixth Dynasty and is originally the name of the pyramid of Pepi I, which was constructed in the city's environs at that time (*ca.* 2300 B.C.). While there is some dispute over the meaning of the name, it most probably should be translated "The goodness [of Pepi I] endures" or similarly. Another, less widely accepted interpretation is "the good port (or station)," as suggested by

From *Atlas of the Bible* (Thomas Nelson & Sons Limited)

39. Palm trees at Memphis where once stood the palaces of the Pharaohs of the Old Empire

Plutarch (*De Iside et Osiride* 20). Extrabiblical attestations of the name include Assyrian *Mempi, Mimpi* from the Annals of Ashurbanipal, and the Coptic forms *Membi, Memfi*, etc. It is interesting to note that the sacred name of Memphis, Egyptian *Ḥ(w)t-kꜣ-Ptḥ*, "the house of the Ka of Ptah," written in the cuneiform of Tell el-Amarna as *Ḥi-ku-up-taḥ*, is the forerunner of Greek Αἴγυπτος and thence of the modern designation Egypt.

Fig. MEM 39.

2. History. One of Egypt's oldest cities, Memphis rose gradually in political importance during the Thinite Period (First and Second Dynasties), and, following a shift of power during the latter part of the Second Dynasty, became the capital of Egypt at the beginning of the Third Dynasty, the most significant ruler of which was Djoser. The city apparently enjoyed unrivaled political supremacy until the close of the Fifth Dynasty, at which time the ruling power at Memphis became feeble and was eclipsed by various minor local dynasties during the first intermediate period (*ca.* 2190-2052). When Egypt was again unified by the pharaohs of the Eleventh Dynasty, THEBES replaced Memphis as the capital, and from this time on, Memphis never again achieved its former political importance. For a short time, however, during the second intermediate period (*ca.* 1750-1570) Memphis was the capital of the HYKSOS ruler Salatis, but was replaced shortly thereafter by Avaris-Tanis in the Delta. Memphis figures prominently in the accounts of Piankhi, a Nubian king who *ca.* 720 B.C. marched victoriously through Egypt to the Delta but after a short reign retired to his Nubian capital, Napata. His account of the capture of Memphis is a high point of the narrative and demonstrates the important position still held by that city. Memphis was captured by Esarhaddon during the retreat of Taharka (Twenty-fifth Dynasty, *ca.* 715-663) before the invading Assyrian forces, but is mentioned again as being recaptured by Tanutamun. The latter's victory was brief, however, for he was driven southward again by reinforced Assyrian troops. Memphis remained in Assyrian hands until Psamtik, the first king of the Saite Dynasty (663-525), shook off the restraint of Asian rule and Egypt entered the period known as the Saite restoration.

What remains of Memphis today gives little indication of the glorious past the city enjoyed. Its fall was gradual, however, and due first to the founding of Alexandria shortly after the conquest of Egypt by Alexander the Great in 332 B.C. Strabo (17.1.32) mentions explicitly that Memphis was second to Alexandria in population. Much later, in A.D. 638, Old Cairo was founded by the Arab conquerors, and the ruins of Memphis, which until that time had been quite extensive, were exploited for building materials to the extent that even the temple of Ptah, which seems to have been one of the few stable elements of the city, whose position shifted repeatedly because of different concentrations of building activity, was dilapidated beyond recognition. Nothing survives to indicate the splendor of this its principal architectural monument, enlarged and elaborated by successive dynasties of pharaohs.

3. Archaeological significance. The prominent position held by Memphis during Egyptian history is perhaps most forcibly attested by the major pyramid fields in its immediate vicinity on the west bank of the Nile. Among the most important of these are (*a*) Abusir, the location of the Fifth Dynasty pyramids of Sahure and his successors; (*b*) Dahshur, where the famous "bent" pyramid of Sneferu (Third Dynasty), as well as the less imposing tombs of several Twelfth Dynasty kings, were built; (*c*) Gizeh, the site of the world-famous trio of pyramids constructed by the Fourth Dynasty rulers Cheops, Chefren, and Mycerinus; and (*d*) Sakkarah, where were built the once magnificent step pyramid of Djoser (Third Dynasty); the Fifth and Sixth Dynasty pyramids of Userkaf, Teti, Pepi I, Pepi II, and Merenre, whose burial chambers have yielded to modern scholars the invaluable Pyramid Texts; and numerous great tombs of the First Dynasty, the re-

cent excavations of which have added immensely to our knowledge of the earliest phases of dynastic history and material culture. It is possible that Hosea was mindful of these splendid monuments of Egypt's buried glory when, in speaking of the fate of Israel's unfaithful, he declared (9:6):

> Behold, they are going to Assyria;
> Egypt shall gather them,
> Memphis shall bury them.

4. Religious significance. Memphis rivaled HELIOPOLIS as a center of religious activity. The local theology is well known to us through the famous document commonly called the *Denkmal memphitischer Theologie*, which is preserved in an inscribed copy on black granite, the execution of which was ordered by Shabaka, founder of the Twenty-fifth Dynasty. The Memphite system reckons Ptah as the oldest of the gods and creator of mankind. His dominant position in the local pantheon is reflected also in the sacred name of the city, as cited above. Ptah was identified by the Greeks with Hephaestus and is so mentioned by Herodotus (II.99), who states that Menes constructed in Memphis the great and most noteworthy temple to that god. Ptah was also worshiped in the form of APIS and like the latter was closely associated with OSIRIS as the god of the dead. Worship of numerous other deities was centered at Memphis; among the most important of these were native gods such as Sokaris (whose name survives in the place name Sakkarah), Osiris, Suchos, as well as foreign gods like Baal, Kadesh, and especially Astarte.

MEMPHITIC VERSION mĕm fĭt'ĭk. An obsolete designation of the Bohairic (Coptic) Version of the Bible. *See* VERSIONS, ANCIENT, § 5.

MEMUCAN mĭ mōō'kən [ממוכן] (Esth. 1:14, 16, 21). One of the seven princes of Persia and Media at the court of King Ahasuerus, who were consulted for their legal knowledge. Their names are Persian.

MENAHEM mĕn'ə hĕm [מנחם, comforter]. King of Israel *ca.* 745-738 B.C.; son of Gadi. He succeeded to the throne through the assassination of Shallum.

The root of the name is נחם, here found in the *pi'el* participle. It is used of one who comforts over the death of a relative, or it is perhaps the name given to a child who takes the place of another child who has died. In Assyrian inscriptions it appears as *Me-ni-ḫi-im-me; Mi-in-ḫi-im-mu* (cf. also Μανεεμος).

After the death of the powerful Jeroboam II (*ca.* 746) chaotic conditions prevailed in the N kingdom. Jeroboam's son Zechariah followed him on the throne but was murdered by Shallum the son of Jabesh, after a brief reign lasting six months (II Kings 15:8-10). Shallum in his turn was assassinated by Menahem after reigning only one month (vss. 13-14; Hos. 7:7*b;* 8:4*a*).

Menahem belonged to Tirzah, the former capital city. It seems clear that at the time of the murder of Zechariah there was more than one aspirant to the throne. Shallum was the leader of one party, Menahem of another. This may serve to throw some light on the very difficult verse (II Kings 15:16): "At that time Menahem sacked Tappuah and all who were in it and its territory from Tirzah on; because they did not open it to him, therefore he sacked it, and he ripped up all the women in it who were with child." For "Tappuah" the MT reads here "Tiphsah." Earlier exegetes identified Tiphsah with the well-known Tiphshah-Thapsacus on the Euphrates (cf. I Kings 4:24—H 5:4); but such an identification is not possible. The view now commonly accepted is that, instead of "Tiphsah," "Tappuah" should be read—the reading of the Lucian MS of the LXX. Tappuah has been identified with the modern Sheikh Abu Zarad, a few miles S of Shechem. This identification, however, cannot be accepted as certain, and the alteration is perhaps unnecessary. The reference may be to Tiphsah, located some six miles SW of Shechem. The most reasonable explanation of Menahem's atrocities against this city, after he had captured it, is that it had supported Shallum and refused to surrender to his murderer.

Menahem is said to have reigned for ten years (II Kings 15:17), but the date of his death is uncertain. He seems to have been still alive in 738, when he paid tribute to Tiglath-pileser III. Thereafter no further mention is made of him. Because of this uncertainty it seems best to assume that he died very soon afterward. The chronology of this period is very complicated, but recent investigation of the events which occurred in the first years of Tiglath-pileser's reign, based on Assyrian records, has thrown considerable light on this question.

If the Azriau Ia-ú-da-a-a- named in the Assyrian Annals is correctly identified with Azariah (Uzziah) of Judah—an identification which is quite convincing—a synchronism has been established for Tiglath-pileser and Azariah. The two reigns must have overlapped, at least in part. Tiglath-pileser also claims to have received heavy tribute from Me-ni-ḫi-im-me-al Sa-me-ri-na-a—i.e., Menahem of Samaria. This helps to establish a further point of reference. The dates of Tiglath-pileser's reign have been established from Assyrian sources, *ca.* 745-727.

The older view considered 738 as the year of Tiglath-pileser's expedition mentioned in the Assyrian inscriptions, and consequently the year when Menahem of Samaria paid tribute to him. This date speaks against the equation of Azriau with Azariah. It has now, however, been shown that Tiglath-pileser led an expedition against Syria, *ca.* 743-742. The campaign that followed lasted six years and was the beginning of his conquest of the whole Syro-Palestinian territory. This date enables us to identify Azriau and Azariah of Judah, and to give at least an approximate date for Azariah's death. It is not necessary, however, also to assume that at this time Menahem paid tribute to Tiglath-pileser, and that he died soon thereafter. Menahem may very well have paid tribute both in 743-742 and in 738. The datum mentioned in II Kings 15:19 must have occurred at the

latter date, in view of the clear statement of vs. 20*b*: "So the king of Assyria turned back, and did not stay there in the land." This seems to be confirmed by the evidence of the inscriptions which indicate that Tiglath-pileser did not return to the west until his tenth year—i.e., 736—and did not appear in Israel until his twelfth year—i.e., 734.

The outstanding event of Menahem's reign was the supremacy of Assyrian power in the West. This is confirmed in detail from Assyrian sources. The writer of Kings records that "Pul the king of Assyria came against the land; and Menahem gave Pul a thousand talents of silver, that he might help him to confirm his hold of the royal power" (II Kings 15:19). The picture becomes clearer if the reading of the LXX is adopted, which transfers "all his days" (vs. 18) to the beginning of vs. 19 and reads "in his days." This verse contains two points of special importance:

a) The first is the reference to Pul as the name of the king of Assyria. On the basis of I Chr. 5:26 it was quite naturally assumed by older commentators that Pul and Tiglath-pileser were two distinct and separate kings of Assyria, both of whom conquered Israel. It is now clear, however, that Pul and Tiglath-pileser are two names for one and the same Assyrian ruler. When Tiglath-pileser III of Assyria took the throne of Babylon in 729, he assumed the name Pūlu. This is the form of the name given in the Babylonian King List. Other forms of the name are given as Πωρου in the Ptolemaic Canon and Φουλος in Eusebius. Thus the identification of the two names is certain.

An alternative explanation of the names has been advanced—that Pul was his personal name, Tiglath-pileser his throne name. The suggestion is interesting in the light of the similar practice found in the case of certain of the kings of Judah.

b) The second point is the words: "that he might help him to confirm his hold of the royal power." The implication is that Menahem sat uneasily on the throne of Israel, and that his position was far from secure. It is even possible that Menahem had obtained the throne by buying Assyrian support (cf. Hos. 5:13).

In his annals Tiglath-pileser records the receiving of tribute from various nations of the West—Menahem of Samaria, Rezin of Damascus, Hiram of Tyre, Sibittibi'li of Byblos, etc. A fragmentary text adds further details about Menahem. He was overwhelmed like a snowstorm and fled like a bird, alone, and bowed to the feet of his conqueror, who returned him to his place and imposed tribute upon him. Tiglath-pileser also claims that all the inhabitants of Israel "and their possessions I led to Assyria." No confirmation of this is found in the biblical sources. Kings records the amount of tribute as a "thousand talents of silver." Menahem secured this sum by levying a poll tax of fifty shekels on every wealthy Israelite (II Kings 15:20). It has been calculated that this represents a figure of *ca.* sixty thousand men who were in a position to pay. This is an interesting commentary on the financial position existing in the land and sheds light on the violent denunciations of the contemporary prophets, Amos and Hosea, against the excesses of the wealthy.

It is noteworthy that alone of the last six kings of Israel is it recorded that Menahem died a peaceful death and slept with his fathers (II Kings 15:22).

MENAN. KJV form of Menna.

MENE, MENE, TEKEL, AND PARSIN mē'nĭ, tē'kəl, tĕk'əl, pär'sĭn; KJV MENE, MENE, TEKEL, UPHARSIN ū fär'sĭn. The enigmatic inscription recorded in Dan. 5:25.

1. Text. MT מנא מנא תקל ופרסין, m^{e}nê m^{e}nê t^{e}qēl ûphārsîn; LXX (5:1 chapter summary) Μανη φαρες θεκελ; Theod. 5:25 Μανη, θεκελ, φαρες; Jos. Antiq. X.xi.3; and Vulg. *mane, thecel, phares,* agree with Theod. Some scholars think the three-word text of the versions is original and omit the second *m^{e}nê* as dittography. Similarly, *upharsin* is often corrected to *p^{e}rēs*. But Eissfeldt retains the MT on the grounds that in this kind of explication we have to recognize not *Auslegung* (exegesis) but *Einlegung* (eisegesis). He substantiates this by reference to the explication of the dream in ch. 2 and by parallels from the Habakkuk Pesher from Qumran. In *Einlegung* the explanation often slightly adapts the text to the desired meaning, and the words actually commented upon are not identical with the text as given. In this view, the versions, wishing to make the wording fit more closely the explanation given in 5:27-28, have altered the text, which the MT gives more faithfully. As we shall see below, there are good grounds for accepting Eissfeldt's contention.

2. Interpretation. The debate turns on the question whether the author of Daniel has coined his own phrase or whether he has employed an already popular proverbial saying. (For discussion of the author's dependence on traditional materials, *see* Daniel.) If the saying was already current, then Eissfeldt's contention noted above is greatly strengthened, and we must reckon with two elements: the original saying and its meaning, and the fresh meaning given to it in Daniel's exposition.

The inscription appeared upon the wall, written by a detached hand. Whether we are to understand that the characters of the inscription baffled the "Chaldeans" or whether it employed a normal script is not clear. Probably we are to think of an (unvocalized) Aramaic script, and the puzzle was so to vocalize it (by pronunciation) that the words could be construed into a meaningful sentence or phrase. If the saying were proverbial, the reading should have baffled none, but this kind of realism is not to be expected in Daniel. Presuming that it was currently a proverb and that we must retain the MT text, we may proceed as follows: the three words of the inscription refer to weights and their equivalent monetary values. "Mene" (Aramaic מנא = Hebrew מנה) is the mina; "Tekel" (Aramaic תקל = Hebrew שקל) is the shekel; and "Upharsin," of which the "u" is simply the copulative "and," is *p^{e}rēs* in the plural, meaning

"halves." The word has been found on half-mina weights and occurs in the Talmud in the sense of a half mina, but Eissfeldt successfully contends that it simply means "half" and gets its meaning as half mina simply from the context. Here then it is to be taken as half shekel, and there is no need to rearrange the order, as the LXX does. Thus we get "mina, shekel, and half shekels." The use of these WEIGHTS not only to designate monetary values but also to express estimates of character (cf. Hebrew כבוד, GLORY, in the sense of "soul, person," and Latin *gravis* used of a man) is found in the Talmud. To what then did this proverbial saying, "A mina, a mina, a shekel, half shekels," refer? Presumably to any situation of family degeneration (cf. the Lancashire proverb "From clogs to boots and boots to clogs"—i.e., family wealth is gained and lost again in four generations). Probably the Jews applied it to the occupants of the Neo-Babylonian throne: Nebuchadnezzar is the mina, Evil-merodach is the shekel, and Nabonidus and Belshazzar are the half shekels. Why is *mn'* repeated? Either because the saying was adapted to some succession of four kings, including Nabonidus and his crown-prince, Belshazzar, as one, or because it was made to conform to the four-kingdom pattern also featured in Dan. 2; 7 (*see* DANIEL § 2*e*). Or, again, perhaps the first *mn'* was to be differently pointed (*mᵉnâ'* instead of *mᵉnê'*) and read: "He has weighed: a mina, a shekel, and half shekels." In any case, it was probably used to suggest the answer to the question: "What is the worth of the kings of Babylon?" The answer is that God has weighed them and found them to be steadily losing weight. There is, however, another way of accounting for the plural *ûphārsîn,* which suggests that when the Neo-Babylonian kingdom fell, the old riddle was pressed into further use by using the assonance between *pārās* (Persia) and *pᵉrēs* to imply that while Nebuchadnezzar was worth a mina, the Persians were worth only half shekels; and if the double nature of the Medo-Persian kingdom were in mind, we may take the term as dual and say that the riddle maintained that the Medes and Persians together were worth only one sixtieth of the great Chaldean. What is past often seems so much preferable to what is present.

So much for the ancient riddle. The use to which Daniel put it is in little doubt. By punning on the three terms used, he brings out of the riddle an oracle of doom. He changes *mn'* to the *lamedh-he* root and vocalizes it as *mᵉnâh* ("he numbered")—God has checked over the number of the days of your kingdom and has found that the allotted figure has been reached; *tql* he vocalizes as *tᵉqal* ("he weighed")—God has weighed Belshazzar and has found him to be underweight and has therefore condemned him on this account; *prs* he vocalizes as *pᵉras* ("he divided")—God has already divided up your kingdom and given it to the Medes and the Persians. We might try something of the same wordplay in English if the phrase "Stones, pounds, quarters," were current among us as a proverb indicating that great men have lesser sons and even lesser grandsons. Then a modern Daniel could have explained it as: "Stone—you are to be stoned to death; pound—your power will be pounded to pieces; quarter—your kingdom has been quartered and distributed among others." That Daniel's exposition alters the form of the words somewhat is in full accord with Jewish exegetical practice as illustrated by Eissfeldt in the article mentioned above.

Since we can thus fully account for the form of words given in Dan. 5:25 MT, there is no need to emend them to the form given in the versions; to adopt their reading would be only to follow them in correcting an error which never existed.

MENELAUS mĕn'ə lā'əs [Μενέλαος = Heb. MENAHEM]. An unscrupulous and usurping high priest, in the reign of Antiochus Epiphanes. He was probably the leader of the Tobiads, the Jerusalem supporters of the Seleucids. The high priest Jason sent him to Antioch in 171 B.C. to take the tribute which Jason had promised, but Menelaus himself offered Antiochus a heavier tribute, and was therefore allowed to supplant Jason (II Macc. 4:23 ff). Jason had to flee, but Menelaus did not pay the tribute he had promised and was summoned before Antiochus. The king was away from Antioch when Menelaus arrived, and the latter thereupon took advantage of the occasion for a little more bribery. According to II Maccabees, the veracity of which is not above reproach, he had stolen some vessels from the temple; and by presenting these to Andronicus, who was acting as deputy for Antiochus, Menelaus completely gained his sympathy. He persuaded Andronicus to assassinate the pious ex-high priest Onias III (*see* ONIAS 3), who was tricked out of his place of refuge at Daphne, because Onias was doing his best to make the sacrilege of Menelaus public. Greeks and Jews alike were appalled by this murder, and reported the matter to Antiochus. Andronicus paid for this with his life, but Menelaus emerged unscathed. Back in Jerusalem the brother and deputy of Menelaus, Lysimachus, had caused a riot by his sacrilege in the temple and been killed by the mob. A deputation complaining of Menelaus was sent by the Jews to Antiochus at Tyre. But meanwhile Menelaus had not neglected his gift; and by bribing an influential courtier, Ptolemy Dorymenes, to put in a word to the king, Menelaus obtained both his own acquittal and the execution of the hostile witnesses. At this point the usurped Jason appeared once more, probably at the head of the Oniads, attacking Jerusalem while Antiochus was absent in Egypt. He caused Menelaus to flee for refuge, but Antiochus took a serious view of the attack and massacred the inhabitants of Jerusalem, plundering the temple with the help of the scoundrel Menelaus. He and the Tobiads were thus restored to power for a time, but he was not high priest when the temple was cleansed (165-164). He reappears in 162 in the reign of Eupator, whom he did not succeed in winning over so easily. The king was warned by the Syrian chancellor LYSIAS of the true nature of the man, and he

brought about his execution by having him thrown into a tower of ashes, according to one account (II Macc. 13:3-8).

N. TURNER

MENESTHEUS mĭ nĕs'thĭ əs [Μενεσθεύς] (II Macc. 4:4). The father of Apollonius, the governor of Coele-Syria and Phoenicia.

Bibliography. S. Tedesche and S. Zeitlin, *I Maccabees* (1950), p. 73; *II Maccabees* (1954), p. 151.

MENI mə nē' [מני, *from* מנה, to count, apportion]. With Gad, a deity or genius of good luck worshiped by Jewish apostates probably in the postexilic period (Isa. 65:11). Manat is known from the Quran (Surah 53.20) as a deity worshiped in Arabia before Islam. The name is found, possibly in a plural form, in Nabatean inscriptions from the Hejaz. The Arab association is interesting in view of Edomite or Arab penetration of Palestine in the postexilic period, to which Isa. 65:11 probably refers (*see* DESTINY 1).

Bibliography. G. A. Cooke, *A Textbook of North Semitic Inscriptions* (1903), pp. 217-23.

J. GRAY

MENNA mĕn'ə [Μεννά] (Luke 3:31); KJV MENAN mē'nən [Μαϊνάν]. An ancestor of Jesus.

***MENORAH** mə nôr'ə [מנורה, *from* נור, light]. The Hebrew *menōrâ* might refer to any lampstand; but as it is used in the OT, it is a technical term for the seven-branched LAMPSTAND (KJV "candlestick") of the tabernacle and the temple, and the lampstand in Zechariah's vision (Zech. 4:2, 11). L. E. TOOMBS

MENSTRUATION. *See* CLEAN AND UNCLEAN.

MENUHOTH mə nōō'hŏth [מנחות, resting places] (I Chr. 2:52); KJV MANAHETHITES măn'ə-hĕth'ĭts. An unknown family, unless "Manahathites" (המנחתי) be read, in which case they would be the other half of the MANAHATHITES of vs. 54, who are of the clan of Salma, living S of Jerusalem, around Bethlehem, while those of vs. 52 are of the clan of Shobal, living NW of Jerusalem, toward Kiriath-jearim.

V. R. GOLD

MEONENIM, PLAIN OF mē ŏn'ə nĭm. KJV translation of אלון מעוננים (RSV DIVINERS' OAK).

MEONOTHAI mē ŏn'ə thī [מעונתי] (I Chr. 4:13-14). Son of Othniel, a Judahite, and the father of Ophrah.

MEPHAATH mĕf'ĭ ăth [מיפעת, מפעת, מופעת]. A town given to the tribe of Reuben (Josh. 13:18), assigned to the MERARITES (Josh. 21:37; I Chr. 6:79—H 6:64; *see* LEVITICAL CITIES). In Jeremiah's time it was possessed by Moab (Jer. 48:21). It is perhaps modern Jawah, *ca.* six miles S of Amman. This place name is common in S Arabia. E. D. GROHMAN

MEPHIBOSHETH mĭ fĭb'ə shĕth [מפיבשת, he who scatters shame, *or* from the mouth of shame].

1. Jonathan's son, to whom David granted generous concessions out of respect for his father's friendship. The original name of this scion of the house of Saul may be presumed to have been MERIBBAAL (I Chr. 8:34).

Mephibosheth was five years old when the fateful news of his father's death in Mount Gilboa reached the household of Saul. Fleeing in panic lest the prince share a similar fate, the nurse of Mephibosheth let the child fall from her arms and permanently crippled his two feet (II Sam. 4:4).

When his uncle Ishbaal was assassinated, the youthful Mephibosheth was, no doubt, the presumptive heir to the throne of Saul, but he never pressed his claim, contenting himself in those troublous days with the relative security he found in the home of his benefactor, Machir the son of Ammiel, a powerful Transjordanian noble. When Mephibosheth was finally summoned to the royal court, David gave evidence of his good will by granting to him all the property of the house of Saul, committing it to the custody of Ziba, the steward of Saul, while Mephibosheth himself he invested as a permanent member of the king's board (II Sam. 9).

All went well with Mephibosheth until the rebellion of Absalom, when his unavoidable detention in Jerusalem, which was maliciously caused by Ziba, was slanderously misrepresented by the latter to be an endeavor to secure the throne for himself. This studied duplicity was perpetrated when Ziba brought generous supplies to David, as he fled from Jerusalem. Moved by this evident token of solicitous concern and beguiled by the deceit of Ziba, David ordered that all the possessions of Mephibosheth be transferred to Ziba (II Sam. 16:1-4).

When David had crushed the rebellion of Absalom, Mephibosheth went down to meet the returning king at the Jordan and betrayed visibly, with untrimmed beard and unwashed clothes, his deep grief at the misfortune David had suffered. Sternly accosted by the king as to the reason why he abode in Jerusalem, Mephibosheth exposed the ruse of Ziba and presented movingly his firm loyalty and profound gratitude for David's singular kindness. No doubt persuaded of Mephibosheth's integrity but thankful for the timely supplies he had received of Ziba, David decided that Mephibosheth should share equally with Ziba in the lands of Saul. With an altruism reminiscent of his father, Mephibosheth replied, "Oh, let him take it all, since my lord the king has come safely home" (II Sam. 19:30; cf. vss. 24-29).

Because of the oath Jonathan and David had sworn together (II Sam. 21:7; I Sam. 20:12-17), Mephibosheth was spared the tragic death which befell seven of the sons of Saul at the hands of the Gibeonites.

Mephibosheth had a son named Mica (II Sam. 9:12), from whom a well-known family in Israel was descended (I Chr. 8:35; 9:41).

2. A son of Saul by his concubine Rizpah, daughter of Aiah. With his brother, Armoni, and the five sons of Merab, daughter of Saul, Mephibosheth was delivered by David to the Gibeonites to be hanged before Yahweh in order to expiate the guilt incurred when Saul violated an ancient oath by slaughtering

the Gibeonites (Josh. 9:15 ff; II Sam. 21:1-9)—which guilt was oracularly interpreted to be the cause of the existing famine. The mother of Mephibosheth stationed herself by the seven corpses, guarding them from molestation until the rain fell, which was believed to indicate the passing of the divine wrath. Their remains were then gathered and interred by the order of David, presumably in the tomb of their grandfather Kish in Zela (II Sam. 21:10-14).

E. R. DALGLISH

MERAB mĭr'ăb [מרב, *probably from* רבב, become many, much]. The elder daughter of Saul (I Sam. 14: 49). Saul promised her to David, to spur him on to reckless valor in the wars with the Philistines, so that he would be killed. Merab was actually given, however, to Adriel the Meholathite, and her younger sister, Michal, became the wife of David (I Sam. 18: 17-27). When David later had seven of the sons of Saul put to death in order to appease the Gibeonites, the five sons of Merab were probably among them (II Sam. 21:8; two Hebrew MSS, one LXX, and the Syr. are probably correct in reading "Merab" at this point; other Hebrew MSS read "Michal").

D. HARVEY

MERAIAH mĭ rā'yə [מריה, *probably from* אמריה, Yahu has promised; *see* AMARIAH] (Neh. 12:12). Head of a priestly family, the sons of Seraiah, in the time of the high priest Joiakim.

MERAIOTH mĭ rā'yŏth [מריות, *hypocoristic for* obstinate, rebellious; Apoc. Μαραιώθ, Μαρερώθ]; KJV Apoc. MEREMOTH mĕr'ə mŏth (I Esd. 8:2; RSV omits the name with Codex B); MARIMOTH măr'ĭ mŏth (II Esd. 1:2—G 7:3). **1.** A priest descended from Aaron (I Chr. 6:6-7, 52—H 5:32-33; 6:37). The same individual is probably referred to in I Chr. 9:11; Neh. 11:11, in spite of divergences between the two genealogies. The Chronicler represents him as an ancestor of Ezra the scribe (Ezra 7:3; I Esd. 8:2 KJV; II Esd. 1:2—G 7:3).

2. A priestly house in the postexilic period (Neh. 12:15); perhaps descended from the foregoing, unless the name here is an error for "MEREMOTH," which occupies the corresponding position in the list of Neh. 12:3.

B. T. DAHLBERG

MERAN mĭr'ăn. KJV form of MERRAN.

MERARI mĭ râr'ī [מררי, *probably* bitterness, gall, *from* מרר, be bitter; *cf.* Arab. *mirratun;* LXX Μεραρι]. **1.** Third son of Levi, and younger brother of Gershon and Kohath (Gen. 46:11; Exod. 6:16; Num. 3:17; I Chr. 6:1—H 5:27; 6:16—H 6:1; 23:6). Through his sons, Mahli and Mushi (Exod. 6:19; Num. 3:20; I Chr. 6:19—H 6:4; 23:21; 24:26), were descended the MERARITES.

2. The father of Judith (Jth. 8:1; 16:7—G 16:6).

L. HICKS

MERARITES mĭ râr'īts [בני מררי (*usually*), *twice* משפחות מררי, *once* המררי]. A significant Levitical family, descended from MERARI 1. All information about the person and the family comes through either the Priestly writer (*see* PENTATEUCH § A5) or the Chronicler (*see* CHRONICLES, I AND II, § 4) and falls into the periods of the Exodus and Conquest, the Monarchy, and the Restoration.

1. During the Exodus and Conquest. When the TABERNACLE was constructed in the wilderness, the three chief Levitical families—the Gershonites, the Kohathites, and the Merarites—were stationed around it and charged with its care and transit. The Merarites, divided into the families of the Mahlites and the Mushites, numbered 6,200 males from one month upward (Num. 3:33-34), and 3,200 from thirty years old up to fifty (4:42-45). Their station was on the N side of the tabernacle; and their "appointed charge" was the care of the less important items: the frames, bars, pillars, bases of the tabernacle, and their accessories; also the pillars of the court with their bases, pegs, and cords (3:35*b*-37; cf. 4:29-33). For transporting this equipment they received four wagons and eight oxen (7:8; cf. 10:17).

At the occupation of Palestine the Merarite families were allotted twelve cities from the tribes of Reuben, Gad, and Zebulun, including a "city of refuge" (Josh. 21:7, 34-40; cf. I Chr. 6:63, 77-81—H 6:48, 62-66).

2. During the Monarchy. When David "prepared a place for the ark of God, and pitched a tent for it," he gathered 220 Merarites, under Asaiah as chief (I Chr. 15:6), to bring the ark up into Jerusalem. Then Ethan was appointed to represent them in the cultic music (vss. 17, 19; *see* MUSICAL INSTRUMENTS § B1*b*). Moreover, certain Merarites served as doorkeepers (26:10, 19). *See* DOORKEEPER; TEMPLE, JERUSALEM, § A1.

In 725 B.C., when HEZEKIAH called upon the Levites to purify Judah's cultic practices, Kish and Azariah represented the Merarites (II Chr. 29:12). Similarly, when JOSIAH undertook to repair the temple in 621, the Merarites Jahath and Obadiah were among the supervising Levites (34:12).

3. After the Exile. In the postexilic period SHEREBIAH, of the Mahlite family, and other Merarites assisted Ezra as temple ministers (Ezra 8:18-19; cf. I Esd. 8:47-48—G 8:46-47). *See* EZRA AND NEHEMIAH, BOOKS OF, § 3*d*.

L. HICKS

MERATHAIM mĕr'ə thā'əm [מרתים] (Jer. 50:21). A region in S Babylonia, near the mouth of the Tigris and Euphrates, perhaps the *nār mārratu* of the inscriptions. Here it is used as a play on the word "to be rebellious" (מרה), in a dual form to accentuate the meaning. Thus Babylon's name is "twofold rebel."

J. MUILENBURG

MERCHANT [כנעני, סחר, רכל; ἔμπορος]. The Babylonians, Arameans, Canaanites, Phoenicians, and Greeks were all great merchants. The Israelites were not a great merchant nation in biblical times. The word "Canaanite" (כנעני, כנען) became a popular term for "merchant" or "trader" (Prov. 31:24; Hos. 12:7; etc.). The merchants thus designated were perhaps originally traders only of purple dye and purple dyed wool.

The merchant sometimes went from house to house like a peddler (Neh. 13:16). He visited farmers and made purchases of homespun (Prov. 31:24). The merchants' traveling about is reflected in the Hebrew

roots (סחר, רכל, תור), all meaning "go about" or "turn." The Greek ἔμπορος was a traveling merchant (Matt. 13:45), as distinct from a purely local peddler (κάπηλος). The merchant brought his goods to the bazaar and set up shop (Neh. 3:31; 13:19 ff; cf. I Kings 20:34). Markets were very noisy (Matt. 11:16). There were some women merchants.

Merchants traveled far to pick up their merchandise: ivory and gold from Africa, silk and amber from Asia, incense and spices from Arabia and India, lumber from Syria, etc. Khans or caravansaries were established for the merchants on the overland routes. Storehouses are known in the Bible (Gen. 41:49; I Kings 10:28). Jacob's sons traded in Egypt (Gen. 43:11). The greatest expansion of Israel was under Solomon (I Kings 9:26-27; 10:28). During the Exile many Jews became wealthy merchants. They returned rich (Neh. 5:1-13). Merchant princes are mentioned in Isa. 23:8. Merchant guilds helped Nehemiah rebuild the walls of Jerusalem (Neh. 3:8, 31-32).

Many business documents have been found by archaeologists at Mari and Nuzi which illustrate some of the customs of the ancient Semitic merchants. Mosaic law and the Hammurabi Code regulated weights and measures (Deut. 25:14). Seals were often used to ratify deeds. Receipts were often written on ostraca. Ben Sirach warns against cheating (Ecclus. 26:28; 37:12; 42:5). Philo reports on regulations in the Alexandrine markets. After the fall of Jerusalem to the Romans in A.D. 70 some rabbis still supported themselves by merchant activities.

See also TRADE AND COMMERCE; CHAPMAN.

C. U. WOLF

MERCURIUS mər kyo͝or′ĭ əs. KJV translation of Ἑρμῆς (RSV HERMES 1) in Acts 14:12. Mercurius, in English more frequently called Mercury, was the Latin name (from *merces*, "commerce") for the Olympian god Hermes.

F. W. BEARE

MERCY, MERCIFUL; COMPASSION; PITY. The meaning of "mercy" in the Bible is extremely varied. When applied to God or to Jesus Christ, it can denote an inner feeling of sympathy or love which is expressed outwardly in helping action; it can mean an affection or yearning similar to that of a parent for his child; it can signify simply forgiveness. Generally, however, it denotes the divine love, manifested in saving acts of grace, which God holds for his covenant people. Human mercy, on the other hand, is usually a consideration, manifested in outward works, for the condition and needs of one's fellow men. However, the demands of such consideration are often defined by a communal relationship.

1. Terminology
2. In the OT
   a. God's mercy
   b. Man's mercy
3. In the NT
   a. The mercy of Jesus Christ
   b. God's mercy
   c. Man's mercy

1. Terminology. The vocabulary of mercy in the Bible is rich, and no one word in the original languages can be said to have only one possibility of translation. The most frequently employed verb in the Hebrew is רחם, "to have compassion"; רחמים forms the noun "compassion," and רחום the adjective "compassionate." However, חנן, "to show favor," "to be gracious"; חמל, "to spare," "to have compassion"; and חוס, "to pity," "to look upon with compassion," are often used. חמלה is twice nominally employed, both times of the mercy of Yahweh (Gen. 19:16; Isa. 63:9). The KJV frequently translates חסד "mercy." However, the RSV consistently renders חסד "steadfast love" (*see* LOVE for the meaning of this important biblical term).

In the NT, ἐλεέω, "to have mercy on," is the usual verb; ἔλεος forms the noun "mercy," and ἐλεήμων the adjective "merciful." However, οἰκτείρω, "to pity," "to have compassion on," with its noun, οἰκτιρμός, and the adjective, οἰκτίρμων, are also used, as are σπλαγχνίζομαι, "to be moved with compassion," with its noun, σπλάγχνον, and συμπαθέω, "to sympathize with."

2. In the OT. ***a. God's mercy.*** It has often been pointed out that one Hebrew word for "mercy" or "compassion," רחמים, derives from the stem רחם, meaning "womb," and that its original meaning was brotherly or motherly feeling—i.e., the feeling of those born from the same womb or the love of a mother for her child. Thus Yahweh's mercy has been defined in terms of such familial love, and some OT passages support this reasoning: in Ps. 103:13; Isa. 63:15-16; Jer. 31:20, Yahweh is a father to Israel (cf. Hos. 11); in Isa. 49:15 a mother; in Isa. 54:4-8 a husband (cf. Hos. 1–3). As such, the Lord welcomes his sinful child or wife back to him with overflowing yearning and love and forgiveness.

It is a mistake, however, to define Yahweh's mercy only in terms of such familial affection, more of one to view it solely as an inward feeling. God's mercy in the OT, like his faithfulness, his steadfast love, his righteousness, his judgments (cf. Hos. 2:19), represents his continual regard for the covenant which he has established with his chosen people, Israel (cf. Exod. 33:19; Isa. 63:9). Not once is God's mercy granted to those outside the covenant relationship. Further, although mercy signifies, more than the other terms listed above, an affection or love within the divine person (cf. II Chr. 36:15), it is never described in the OT apart from its concrete manifestation in some outward act by Yahweh within history. It is, in general, a loving act of Yahweh by which he faithfully maintains his covenant relationship with his chosen people.

Thus God's mercy could be manifested in many different ways: in forgiveness, whereby individual or nation was restored to relationship with him (Deut. 13:17; II Sam. 24:14; II Kings 13:23; Pss. 25:6; 40:11; 51:1; 79:8; 103:4; Isa. 54:8; 55:7; Lam. 3:32; Dan. 9:9, 18; Hos. 1:6-7; Joel 2:18; Mic. 7:19; Hab. 3:2; Zech. 1:12, 16); in his deliverance of his chosen ones from their enemies (Neh. 9:27-28; Pss. 25:6; 40:11; 69:16; 79:8; Isa. 30:18; Jer. 42:12); in the fulfilment of his promise (Deut. 13:17; Jer. 33:26); in his gathering of his exiled people and the restoration of them to their land (Deut. 30:3; Isa. 14:1; 49:13; Jer. 12:15; Ezek. 39:25); in his provision for them in the wilderness (Neh. 9:19; Isa. 49:10); in his restora-

tion of them to communion with himself (II Kings 13:23; Hos. 2:19, 23). Whatever the specific act, it was outward proof of the fact that Yahweh, who had chosen Israel and covenanted with her, continued to love her, to provide for her, and to protect her from harm (cf. Exod. 33:19; Isa. 54:10). Yahweh's mercy was his fulfilment of his covenant obligations, not out of duty but out of love.

Israel therefore could appeal to Yahweh's mercy for help in any situation (Pss. 51:1; 57:1; 79:8; 86:16; 123:2; Isa. 33:2; Dan. 9:18), not because she was righteous and not because she herself had any right to do so (cf. Dan. 9:18), but because she had been given the guarantee of God's faithfulness to her in his gift of the covenant. Israel's claim to Yahweh's mercy was wholly dependent on his primary, covenantal initiative. Unless God had first chosen Israel, Israel had no reason to expect anything from God. But because he had so chosen, Israel raised her voice to the Lord, whom she knew in faith to be "merciful and gracious, slow to anger, and abounding in steadfast love" (Exod. 34:6; Neh. 9:17; Pss. 86:15; 103:8; 145:8; Joel 2:13; Jonah 4:2). Indeed, Israel knew that among the good things of the End, when history reached its climax and finish, there would be found the mercy of God (Isa. 14:1; 49:13; 54:7; Jer. 12:15; 33:26; Ezek. 39:25; Zech. 1:16). Mercy became part of the eschatological hope.

There are some passages in the OT in which God's mercy seems to consist merely in a consideration for the conditions and needs of man. These are those in which the Hebrew employs the verb חמל (Job 27:22; Lam. 2:17, 21; 3:43; Zech. 11:6) or חוס (Jer. 13:14; Ezek. 7:4; 5:11; 7:9; 8:18; 9:10; 24:14) in connection with the judgment of Yahweh upon his sinful people. In such cases the Lord is said to have no more pity for his chosen ones, destroying them mercilessly. However, the full meaning of such passages can, again, only be seen in the context of the covenant relationship.

b. Man's mercy. The mercy of man in the OT consists often in a consideration for the condition and needs of his fellow man, although it is usually the absence of such mercy which is noted. Thus the conqueror in warfare rarely shows consideration for the helplessness of the defeated or captive enemy (Deut. 7:2, 16; Jer. 6:23; 21:7), though sometimes the Lord intervenes to inspire mercy for the loser (I Kings 8:50; II Chr. 30:9; Ps. 106:46; Jer. 42:12). There is, too, no judicial pity wasted on the idolater (Deut. 13:8), the murderer (Deut. 19:13), or the false witness (Deut. 19:21). However, some such as Nehemiah (1:11), Daniel (1:9), and Saul (I Sam. 23:21) find unexpected consideration from those upon whom they are dependent for life or prosperity.

Beyond such manifestations of humanity, or lack of them, there is a structure of communal relationship within the OT which governs the limits and demands of mercy. The closest ties which the Hebrew knew were those of the family. Within the family circle, mercy—help, love, consideration of need—was not only expected; it was a duty. Where a family was, there was mercy. Where mercy was lacking, the familial ties were gone. Thus mercy was to be rendered to the brother (Amos 1:11; Zech. 7:9). Next in importance was the tribe or the community. The neighbor and the friend were deserving of help and consideration (Job 19:21; Prov. 21:10). And finally there were those who were dependent on the community—the children, the aged, the poor, the fatherless, the widows. These had special claim to mercy, because without communal concern and aid they were helpless and destitute (Ps. 72:13; Ezek. 16:5; cf. Zech. 7:9-10; Exod. 2:6). Thus one of the worst characteristics of the armed conqueror was his lack of consideration for these poor and needy (II Chr. 36:17; Isa. 13:18; 47:6). Man's mercy in the OT, like God's, is understood in the context of a relationship. And the human relationship then becomes part of the relationship to God. To truly love God, one must also love one's neighbor. Mercy given to man was homage rendered to the Lord.

3. In the NT. ***a. The mercy of Jesus Christ.*** In the gospels, those who are sick or suffering repeatedly appeal to Jesus for mercy (Matt. 9:27; 15:22; 17:15; 20:30-34; Mark 5:19; 9:22; 10:47; Luke 17:13; 18:38), and such appeals are naturally understood as cries for succor or healing. Thus Jesus' mercy is understood first in this sense. To have mercy—and here the verb ἐλεέω is used—means to render aid.

When describing Jesus' reaction to such need, however, the NT uses the verb σπλαγχνίζομαι, literally "to be moved in one's bowels." The Greek poets from Aeschylus down regarded the bowels as the seat of violent passions such as anger and love, but the Hebrews regarded them as the center of the tenderer affections, especially of kindness, benevolence, and pity. The bowels were for them equivalent to our heart as the seat of compassion. When Jesus was confronted with human need, the NT therefore says he was moved in his bowels—i.e., he had pity and compassion (Matt. 9:36; 14:14; 20:34; 15:32= Mark 8:2; Mark 1:41; 6:34; Luke 7:13). In this sense mercy is an inner feeling. Nevertheless, it is worthy of note that such feeling in Jesus always gave rise to an outward act of succor. His pity led him to heal the blind (Matt. 20:34), to cleanse the leper (Mark 1:41), to teach the ignorant (Mark 6:34), to raise the dead (Luke 7:13), to feed the hungry (Matt. 15:32; Mark 8:2). Jesus willed man, as man, with all his sins and shortcomings, to be whole. His compassion led him to grant man such wholeness.

In the Letter to the Hebrews the mercy of Jesus Christ is thought of as his forgiveness (2:17; 4:6), while twice in the NT it is defined in eschatological terms (II Tim. 1:16, 18; Jude 21). In the latter passages, Christ's mercy consists of the gift of eternal life to true Christians at the time of his return to judgment (cf. I Pet. 1:3).

b. God's mercy. The OT understanding of God's mercy is very often carried over, without alteration, into the NT. Thus God's loving faithfulness to his covenant people is specifically emphasized in the opening chapter of Luke (vss. 50, 54, 72, 78) and in passages such as I Pet. 2:10, which recalls to mind Hos. 2:23. Again, Paul's great argument of Rom. 9 reflects the same Hebraic background, and certainly the OT understanding of mercy is to be seen in the benedictions of Gal. 6:16; I Tim. 1:2; II John 3; Jude 2. Indeed, the NT's use of the term "mercy" is fully comprehended only in the light of the OT (cf. Rom. 15:9), and such verses as Matt. 5:7; Rom. 12:1; Eph.

2:4; Jas. 5:11; I Pet. 1:3, take on new meaning in such light. God's chosen people Israel had become the church, but God's loving faithfulness to them remained the same.

As in the OT, God's mercy could be manifested in many different ways. To the barren Elizabeth it came in the gift of a child in her old age (Luke 1:58), to the ailing Epaphroditus in healing (Phil. 2:27), to the persecutor Saul in forgiveness and a new life (I Tim. 1:13; cf. I Cor. 7:25) and the rigors of the Christian ministry (II Cor. 4:1). Primarily, however, God's mercy was made manifest in his gift of salvation through Jesus Christ (Rom. 9:23; 11:30-32; 12:1; Eph. 2:4). In Christ, God's covenant with his own was given its final, loving, and perfect confirmation, a seal unbreakable by any power (Rom. 8:38-39), a deed and a promise for all eternity. And in this light, too, mercy in the NT must always be understood.

c. Man's mercy. Again the OT understanding of mercy is to be found. The term is used generally to designate a consideration for one's fellow men, manifested in acts of aid and relief (Matt. 18:27; Luke 10:37; 16:24; Rom. 12:8; Phil. 2:1; Col. 3:12; Heb. 10:34; Jas. 3:17; I John 3:17). But there is, especially in the Gospel of Matthew, perhaps the most Hebraic of the gospels, also the thought of the compassion and mercy which one member of the covenant community owes to another (Matt. 9:13; 12:7; 23:23; cf. 5:7). Members of a community, no matter who they be—scribes, Pharisees, tax collectors, sinners—are to give love and aid and comfort to one another. This is their communal obligation. Indeed, this is part and parcel of their faith. As God loves them, they are to love one another. They are to be merciful as God is merciful (Luke 6:36; cf. Matt. 5:7). E. R. ACHTEMEIER

MERCY SEAT [כפרת, *from* כפר, cover; LXX *usually* ἱλαστήριον; Vulg. *propitiatorium; properly,* propitiating thing *or* means of propitiation] (only in P: sixteen times in Exod. 25–31; 35–40; Lev. 16:2, 13-15; Num. 7:89; I Chr. 28:11). A slab of specially refined gold on top of P's ark of the testimony (*see* TABERNACLE), 2½ by 1½ cubits (approximately half yards). It was not a lid or covering to the ark, but the support (thickness unknown) of the two cherubim, which formed one piece with it and the base above, which was the tabernacling PRESENCE (cf. "footstool" in I Chr. 28:2; Pss. 99:5; 132:7). It was sprinkled with blood on the Day of Atonement. The noun is derived from the *Piel,* one of the active tenses in Hebrew, and so the feminine noun is active, "she who wipes out." Hence, like the cognate Arabic *kafarat,* the words mean "propitiation, instrument of propitiation." The Greek is best taken in this sense in Rom. 3:25 (RSV "expiation"). G. HENTON DAVIES

MERED mĭr′ĕd [מרד, rebel] (I Chr. 4:17-18). A Judahite with two wives, one the daughter of "Pharaoh," one a Jewess. Whether "Pharaoh" indicates marriage into Egyptian royalty is uncertain. However, only the Egyptian wife is named.

E. R. ACHTEMEIER

MEREMOTH mĕr′ə mŏth [מרמות; Apoc. Μαρεμώθ]. **1.** A priest who returned with Zerubbabel from the Exile (Neh. 12:3).

2. A priest of the time of Ezra and Nehemiah. His family was at first unable to prove its priestly lineage (Ezra 2:61; as sons of Hakkoz, cf. Neh. 3:4), but was later recognized and allowed to participate in the receipt of the temple vessels (Ezra 8:33), the rebuilding of the wall of Jerusalem (a double assignment; Neh. 3:4, 21), and the covenant renewal (10:5). "Meremoth" should also be read in place of "MERAIOTH" (as the Greek and Syr. versions show) in Neh. 12:15.

3. Son of Bani; a layman in the list of those whom Ezra required to give up their foreign wives (Ezra 10:36). J. M. WARD

MERENPTAH mĕr′ən ptä′. Variant spelling of MER-NE-PTAH.

MERES mĭr′ēz [מרס] (Esth. 1:14). One of the "seven princes of Persia and Media" who ranked next after King Ahasuerus in authority within the kingdom.

Bibliography. L. B. Paton, *Esther,* ICC (1908), pp. 68, 152-53.

MERIBAH mĕr′ə bə [מריבה, *from* ריב, to strive, contend]. The name of two different stations of the Israelites in the wilderness. The word occurs by itself in Exod. 17:7; Ps. 95:8, mentioned with Massah (*see* MASSAH AND MERIBAH). In Num. 20:13; Deut. 33:8 (mentioned with Massah); Pss. 81:7—H 81:8; 106:32 there occurs the expression "waters of Meribah" (מי מריבה; in Ps. 106:32 KJV "waters of strife"). In two of these occurrences (Num. 20:13; Ps. 106:32) the expression refers to the rebellious attitude of the people toward Yahweh. In Deut. 32:51; Ezek. 47:19; 48:28 the phrase used is "the waters of Meribath-Kadesh." According to Deut. 33:8, the faithfulness of the tribe of Levi was tested by Yahweh at Massah-Meribah; and in Ps. 81:7—H 81:8, Yahweh tested the people at the waters of Meribah. In all these cases the reference is to the waters which came from the rock when it was struck by Moses (Exod. 17:1-7; Num. 20:10-13).

The problem of the exact locality in the above two narratives is difficult to resolve. In the former the Israelites are said to be at REPHIDIM, and the rock is at HOREB; while in the latter account, they are in the Wilderness of Zin (*see* ZIN, WILDERNESS OF) in KADESH. The references to the latter locality (Num. 27:12-14; Deut. 32:51; Ezek. 47:19; 48:28) are clear, while the others allude to the experience at Meribah without localizing it more precisely; and still others (Deut. 8:15; Pss. 78:15, 20; 105:41; 114:8; Isa. 48:21) make only an allusion to the waters flowing from the rock. J. L. MIHELIC

MERIBATH-KADESH mĕr′ə băth kā′dĭsh [מריבת קדש]; KJV MERIBAH-KADESH —bə—. Alternate name of KADESH-BARNEA. *See also* MERIBAH.

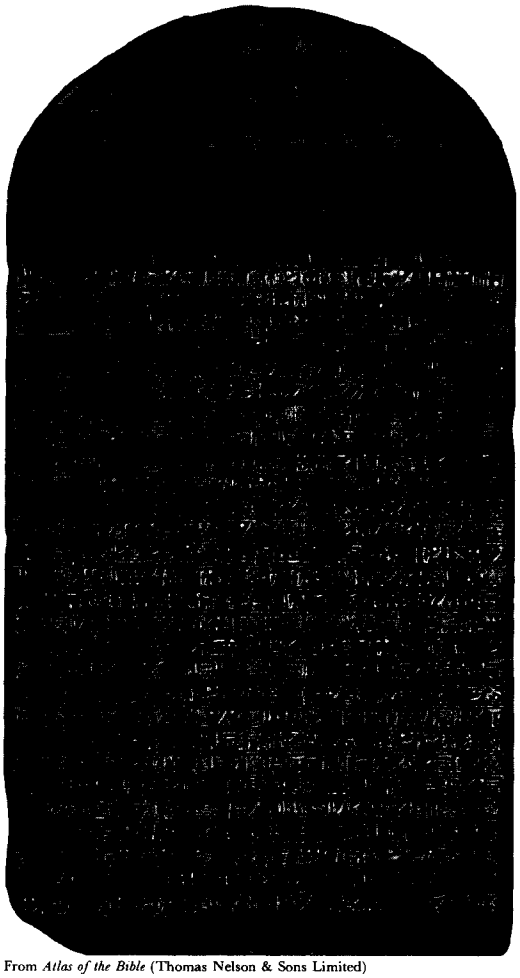
MERIBBAAL mĕr′ə bāl [מריבעל]. The original name of MEPHIBOSHETH 1. The original form of this name was "Meribaal." Names compounded with "Baal" were not uncommon in the early monarchical period, but after the struggle with the Baal cult in

the ninth century B.C., it would seem that "Meribaal" ("man/hero of Baal," or "loved by Baal") was changed into "Meribbaal" ("opponent of Baal" [so Rudolph; cf. Judg. 6:31]), which was subsequently disguised as "Mephibosheth" ("he who scatters shame," or "from the mouth of shame"). Similar mutations are seen in "Jerubbosheth" from "Jerubbaal," in "Ishbosheth" from "Ishbaal," and in "Eliada" from "Baaliada" (MT "Beeliada").

E. R. DALGLISH

MER-NE-PTAH mĕr'nĕp tä' [Egyp. *mr-n-ptḥ,* the beloved of (the god of Memphis) Ptah]. A pharaoh of the Nineteenth Dynasty (*ca.* 1224-1214 B.C.).

Mer-ne-Ptah is often taken to be the Pharaoh of the Exodus, because his father, Ramses II, is the traditional Pharaoh of the Oppression. There is no specific Egyptian evidence in support of the tradition. Indeed, a poetical composition of Mer-ne-Ptah's fifth year, the "Israel Stele," associates the people Israel with the inhabitants of Canaan, allowing no time for a forty-years' wandering. Fig. MER 40.



From *Atlas of the Bible* (Thomas Nelson & Sons Limited)

40. The "Israel" stele of Mer-ne-Ptah (1224-1214 B.C.), showing Mut on the extreme left, Horus on the extreme right, and the double figure of Amon giving a sickle-shaped sword to the king; while above Amon's helmet is the sun disk

Mer-ne-Ptah had to defend his NW frontier against an invasion of Libyans, Achaeans, and others. His name may be retained in a Canaanite place name NEPHTOAH.

J. A. WILSON

MERODACH mĕr'ə dăk, mĭ rō'— [מרודך, Heb. *version of* MARDUK]. The name of the god of Babylon, cited in apposition to his title BEL in Jer. 50:2, and used in the theophoric names Merodach-baladan (II Kings 20:12; Isa. 39:1) and Evil-merodach (II Kings 25:27; Jer. 52:31).

MERODACH-BALADAN mĕr'ə dăk băl'ə dən, mĭ-rō'— [מרדך בלאדן (Isa. 39:1), בלאדין (Isa. A 39:1); Akkad. *Marduk-apal-iddin,* Marduk has given a son]; KJV BERODACH-BALADAN bĕr'ə—, bĭ-rō'— [בראדך בלאדן] in II Kings 20:12. Ruler of the Chaldean tribe Bīt-Yakin, and twice king of Babylon (721-710 and 704 B.C.).

Merodach-baladan, who claimed to be of royal descent and mentioned King Erība-Marduk (782-762) of the Eighth Dynasty of Babylon as a forefather, appears first in the inscriptions of Tiglath-pileser III as king of the Sea Country. At that time he, together with the rulers of the other Chaldean tribes, paid homage to the Assyrian king. Under the rule of Sargon II, Merodach-baladan succeeded in making himself king of Babylon, after having obtained powerful military aid from Elam. When Sargon met the Elamite army at Dēr, Merodach-baladan conveniently came too late for the battle, but he enjoyed the consequences of its indecisive outcome. Since Sargon was not able to mount another attack until 710, Merodach-baladan could rule in peace in Babylon. Even when the Assyrian king succeeded in taking Babylon and making himself king there, he was unable to oust Merodach-baladan from his tribal realm in Bīt-Yakin. Merodach-baladan was even reinstated by Sargon. He appears again under Sennacherib, when he ousted Marduk-zākir-šumi, whom the inhabitants of Babylon had made their king in 703. Through his new allies, the Arabs, he tried to incite the Assyrian vassals in the W to rebellion. He sent a letter to this effect to Hezekiah of Judah (II Kings 20:12 ff). Of course, he had—as did all the rebels in Babylonia—to rely on Elam for armed support, although he must have known how unstable and unreliable the royal rule was in that country. This time Merodach-baladan's reign in Babylonia was very short, because Sennacherib reacted immediately and took Babylon, from which Merodach-baladan retreated into his homeland. Relentlessly pursued by the Assyrians, Merodach-baladan had to look for asylum in Elam, which was, of course, granted to him. After a short return to Bīt-Yakin, he had to take refuge in Elam once more, and his throne in Babylon was occupied by Sennacherib's son Ashurnadinshumi. When the intrigues kept up by the Chaldean refugees along the Elamite coast of the Persian Gulf continued to foment rebellions in

S Babylonia, Sennacherib attacked these coastal cities in a sea-borne invasion and destroyed them, without, however, mentioning Merodach-baladan, who must have died before 692; but his son Nabushumishkun was taken prisoner by Sennacherib in the Battle of Halulê.

The tenacious struggle of this tribal chieftain against Assyrian influence in Babylonia, his clever use of Elamite ambitions, and the scope of his political planning must inspire admiration. In spite of his misfortunes, which made him fail where Nabopolassar succeeded because of the collapse of Assyria, he kept returning from exile to fight not only the Assyrian kings but also the large cities of Babylonia, which had no sympathy for the proud tribal lords, who hampered trade and communications and constantly had to be bribed. A. L. OPPENHEIM

MEROM, WATERS OF mĭr′əm [מי מרום]. A wadi in Upper Galilee, where Joshua defeated a coalition of Canaanites. Several locations for the Waters of Merom have been proposed. From the Middle Ages to recent times, the Waters of Merom were generally identified with Lake Huleh, but the marshy terrain of this area does not satisfy the topography implicit in the military action described in Josh. 11:1-9. Another suggested site is the wadi N of Jebel Marun, located *ca.* ten miles N-NW of Safed. The similarity of the modern name to the LXX Μαρών for Merom and the suitable topography of this district make this identification attractive, but no ancient remains have been reported in this area. The most probable site of Merom is the village of Meiron, situated on the lower slopes of Jebel Jermaq, approximately four miles W-NW of Safed. This site is located on the main E-W route through Upper Galilee; while this route was not so important as the routes in the Valley of Jezreel, it was of considerable local significance, because it made this region accessible. Surface explorations have shown that Meiron was occupied in the LB, Iron I, Hellenistic-Roman, Byzantine, and Islamic periods. Since the Conquest took place at the end of LB, this site admirably fits the archaeological requirements of the Joshua narrative. On the E slopes of the mountain are the remains of a synagogue of the late second or early third century A.D., and in the vicinity of the village are many rock-cut tombs, where according to tradition a number of well-known rabbis, including Hillel, Shammai, and Simeon ben Johai of the first and second centuries A.D., are buried.

Below Meiron and along the S foot of the mountain is a valley known as Wadi Meiron, which carries water from a large perennial spring nearby. This wadi runs eastward and then turns southward, where it becomes known as Wadi el-Tawahin. In its southward course it is joined by another wadi running southward from near Safed, and in this area it is called Wadi 'Amud. Changing course to the SE, the wadi emerges from the mountains, crosses the plain S of Chinnereth, and empties into the Sea of Galilee. It is with the upper reaches of this wadi, in the vicinity of the village of Meiron, that the Waters of Merom are probably to be identified. This area, with its rugged hills and wadies, was well suited to the form of combat which the Israelites used successfully.

Merom first appears in historical records in the Karnak list of towns captured by Thut-mose III in the fifteenth century B.C.; it is number twelve in this list and is spelled *mrm* in Egyptian. Merom is also included among the towns Ramses II claimed to have destroyed in the thirteenth century B.C. In the latter part of that century it was at the Waters of Merom that a confederation of Canaanites, under the leadership of Jabin, king of Hazor, assembled to do battle with Israel, and was put to rout when the Israelites, led by Joshua, attacked suddenly.

MERONOTHITE mĭ rŏn′ə thīt [מרנתי] (I Chr. 27:30; Neh. 3:7). A title given to Jehdeiah and Jadon from Meronoth, near Gibeah. The exact location of Meronoth is unknown.

MEROZ mĭr′ŏz [מרוז] (Judg. 5:23). A town condemned in the Song of Deborah, because of the failure of its inhabitants to participate in the battle against Sisera. The exact location of the town is unknown, although numerous sites have been proposed. One suggested site is Khirbet Marus, situated approximately three miles NW of Hazor, but there is nothing in the poem which can be construed to support a location so far from the scene of battle. Nor is it likely that "Meroz" is a mistake for "Madon" (Josh. 12:19) or "Merom" (11:5). On the other hand, it is possible that "Meroz" is a corrupt reading of "Meron," one element of the double name Shimron-meron (12:20). The latter is perhaps to be identified with Semuniyeh, a mound on the edge of the Valley of Jezreel, N of Megiddo. In any case, Meroz was probably located in or near the Valley of Jezreel.

MERRAN mĕr′ən [Μέρραν] (Bar. 3:23); KJV MERAN. A place name, derived by an error in transliteration from MIDIAN.

MERUTH. KJV Apoc. form of IMMER.

MESALOTH mĕs′ə lŏth [Μαισαλωθ, Μεσσαλωθ] (I Macc. 9:2); KJV MASALOTH măs′—. A place in Arbela taken by Bacchides and Alcimus in their march on Judah. Its location is unknown.

MESECH. KJV form of MESHECH 1 in Ps. 120:5.

MESHA mē′shə [מישא (*in* 1-2 *below*), משא (*in* 3 *below*)]. **1.** A Benjaminite in Moab (I Chr. 8:9).

2. KJV form of MARESHAH in I Chr. 2:42.
E. R. ACHTEMEIER

3. One of the limits of the territory of the Joktanites (Gen. 10:30). It is apparently the same as the MASSA of the Ishmaelite group (Gen. 25:14;

Prov. 31:1). The Assyrian records mention a district called Mash, in the region of Jebel Shamar in the N part of Arabia; this is probably the same as the Maciya of the Naqs-i-Rustam inscription of Darius I of Persia. Hence "Mesha" should be vocalized as "Massa" and is to be located on the line between the head of the Gulf of Aqaba and the Persian Gulf.

See also MESHA KING OF MOAB. S. COHEN

MESHA KING OF MOAB mō'ăb [מישע (MT), משע (Moabite Stone), salvation *or* succor; *an abbreviation of* Chemosh is salvation(?)]. Ninth-century-B.C. ruler of the Moabites who rebelled against Israel. In II Kings 3:4 he is called a נקד, or owner of a breed of sheep called in Arabic *naqad*—a breed noted for the quality of its wool (cf. Amos 1:1). In Ugaritic the phrase "chief of the *nqdm*" appears as an honorific title.

During the reign of Omri, MOAB was under Israelite control, and apparently paid an enormous annual tribute to the Israelite king (II Kings 3:4; the MT lacks "annually," though the iterative sense of the Hebrew verb suggests it; cf. Isa. 6:1). According to II Kings 3:5, Mesha rebelled against the overlordship of Israel after the death of Omri's son and successor, Ahab. However, the MOABITE STONE, which Mesha himself erected to commemorate the rebellion, claims that the revolt took place in the middle of the reign of Omri's "son," forty years after Omri had begun his oppression of Moab. The two dates may be reconciled if we take "son" to mean "grandson" (cf. 8:26, where the daughter of Ahab [vs. 18] is called "daughter of Omri"). A date toward the end of the rule of the Omrides is also indicated by the reference to forty years, since the house of Omri retained control of the N kingdom for only thirty-five years.

Mesha began his revolt by seizing the towns of Ataroth, Nebo (Khirbet el-Mekhaiyet), and Jahaz, which was the base of Israel's operations against the Moabites. He then appears to have protected his N frontier by the erection of the fortress towns of Medeba, Beth-diblathen, and Baal-meon. Joram, king of Israel, determined to reconquer the lost territory, sought the aid of Jehoshaphat, king of Judah. The allies, together with Judah's tributary kingdom Edom, invaded Moab from the S, thereby avoiding the strongly fortified N frontier and the danger of an attack in the rear by the Arameans. A counterattack by the Moabites was beaten off, and the allies advanced to Kir-hareseth, which they besieged. After an abortive attempt on the part of Mesha to escape to the king of Aram (II Kings 3:26, reading "Aram" for "Edom"), the Moabite king sacrificed his eldest son to CHEMOSH. The Israelites, frightened of the consequences to themselves of Mesha's act, raised the siege (vss. 6-27; into the account of the invasion has been woven a miracle story from the Elisha cycle).

Mesha also describes himself as a constructor of cities and the builder of a highway, which would seem to indicate that Moab enjoyed a fair amount of prosperity during his reign. However, archaeological exploration indicates that during this period Moabite culture suffered a decline. Probably Moab was unable to recover from the material destruction wrought by the allied invasion.

MESHACH. *See* SHADRACH, MESHACH, ABEDNEGO.

MESHECH mē'shĕk [משך]; KJV MESECH mē'sĕk in Ps. 120:5. **1.** A people and country in Asia Minor; the name occurs among the sons of Japheth (Gen. 10:2; I Chr. 1:5) with Gomer, Javan, Tubal, and others. Merchants from Javan, Tubal, and Meshech trade in copper vessels (Ezek. 27:13). The association with Tubal is most frequent (Ezek. 32:26; 38:2-3; 39:1). The combined evidence

41. Sangarios River in the foreground, with two city mounds of Gordion in the distance, and a Phrygian tumulus (burial mound) at the right

fits the identification of Meshech as the Mushki (*Muški*) of Assyrian sources and the Μόσχοι of the Greek tradition, both equally involved with TUBAL (Tabal); GOMER (Cimmerians); and JAVAN (Ionians). Fig. MES 41.

The Mushki first appear *ca.* 1100 B.C. in Assyrian texts of Tiglath-pileser I, who defeated five of their kings with twenty thousand men in the land of Kutmuhi E of the Euphrates. This conflict seems the result of migrations by tribes which had been active in the destruction of the Hittite Empire.

The most extensive historical references to Mushki belong to the time of Sargon (722-705). One of his major adversaries in Asia Minor is King Mita of Mushki. The chronology of the various conflicts is as follows: In 717 Pisiris, king of Carchemish, was punished in spite of his alliance with Mita. In 715 Sargon took three cities which Mita had conquered in Que (Cilicia). In 713 Ambaris of Tabal, who had shifted his allegiance from Sargon to Mita, was stripped of his power. The Assyrians then consolidated their border against Mushki by the building of three fortresses, Usi, Usian, and Uargin, sites possibly to be identified S of the Halys River. In 709 the Assyrian governor of Que made a successful raid against Mita and the land of Mushki. He captured two of Mita's fortresses and forced Mita into submission in the form of an offer of services and tribute (Annals 72 ff, 119 ff, 194 ff, 445 ff).

The relations of Mita to King Rusa of Urartu (Ararat) were mostly friendly. Both kings were allies

of Ambaris of Tabal against Sargon (Annals 199-200).

The name Mita occurs in a Hittite text of the late thirteenth century as that of a disloyal vassal in the Armenian highlands (KUB XXIII, 72); and Mita, as well as Mushki, may stand for an oriental component in the population of Asia Minor. On the other hand, the eighth-century Mita of Mushki is undoubtedly to be identified with Midas of the Greek tradition. In the Greek tradition Midas is the king of Phrygia who ruled earlier than Gyges of Lydia. He dedicated a throne at Delphi (Herodotus I.14) and died in 696/5 B.C. in the destruction of his empire by the Cimmerians (Eusebius). His name occurs as Mida(s) on the Phrygian rock façade at Yazilikaya (Friedrich 1).

The discrepancy in nomenclature (Mushki, Phrygians) seems to be due to the mixed nature of the population under Midas' rule. The Greeks knew the immigrant Thracian element best, which was Western and near them (Herodotus VII.73). The Assyrians were familiar with the Mushki who were geographically and perhaps originally oriental (these Mushki to the Greeks are a minor tribe, Μόσχοι, associated with Τιβαρηνοί—Tabaleans; Herodotus III. 94; VII.78). Both ethnic elements, Phrygians and Mushki, must have been strongly represented in the kingdom of Mita. Mita's capital was situated in the W at Gordion, well out of reach of the Assyrian troops, but it was destroyed violently by the Cimmerians. Archaeological evidence gathered from royal burials at Gordion confirms the connections with Urartu and Assyria and proves the excellence of Phrygian metallurgy (cf. Ezek. 27:13).

Gurney, "Mita of Pahhuwa," *AAA*, 28 (1948), 32-47; A. Goetze, *Kleinasien* (Kulturgeschichte des alten Orients III.1 (1957), pp. 201-6.

2. An otherwise unknown Aramean tribe (I Chr. 1:17; MASH in the parallel passage, Gen. 10:23).

M. J. MELLINK

MESHELEMIAH mĭ shĕl'ə mī'ə [משלמיה (I Chr. 9:21), משלמיהו (I Chr. 26:1-2, 9), Yahu is recompense]. A Levite, son of Kore; gatekeeper in the sanctuary. In I Chr. 26:14 he is called Shelemiah, which is a shortened form of this name; and the name SHALLUM, another form, may refer to the same individual in I Chr. 9:17, 19, 31; Ezra 2:42.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), pp. 31, 145. B. T. DAHLBERG

MESHEZABEL mĭ shĕz'ə bĕl [משיזבאל, God delivers; *cf.* Aram. שיזב]; KJV MESHEZABEEL —bēl. **1.** Ancestor of one of those who helped repair the wall of Jerusalem under Nehemiah (Neh. 3:4).

2. One of the "chiefs of the people" signatory to the covenant of Ezra (Neh. 10:21).

3. A man of Judah; father of a certain Pethahiah (Neh. 11:24). B. T. DAHLBERG

MESHILLEMOTH mĭ shĭl'ə mŏth [משלמות]. Alternately: MESHILLEMITH —mĭth (I Chr. 9:12). **1.** A priest, son of Immer (Neh. 11:13). The identification is made on the basis of the genealogies and MS evidence.

2. An Ephraimite who apparently was from a leading family of the tribe (II Chr. 28:12).

E. R. ACHTEMEIER

MESHOBAB mĭ shō'băb [משובב] (I Chr. 4:34). A Simeonite, a prince, who with his tribal compatriots found prosperity in a now uncertain region of Judah.

MESHULLAM mĭ shŏŏl'əm [משלם; Apoc. Μεσολλαμ]; KJV Apoc.: MOSOLLAM mō sŏl'əm; MOSOLLAMON mō sŏl'ə mən; OLAMUS ŏl'ə məs. **1.** Grandfather of Shaphan (II Kings 22:3).

2. One of the sons of Zerubbabel (I Chr. 3:19).

3. A Gadite who dwelt in Bashan (I Chr. 5:13).

4. Son of Elpaal (I Chr. 8:17).

5. The father of Sallu (I Chr. 9:7).

6. Son of Shephatiah (I Chr. 9:8).

7. A member of an important family of priests; son of Zadok, and the father of Hilkiah (I Chr. 9:11). For the history of this family and its connection with the religious life of Israel, *see* ZADOK THE PRIEST.

8. Another priest of the Zadokite family (I Chr. 9:12).

9. A Kohathite, one of the overseers of the temple repairs made during the reign of King Josiah (II Chr. 34:12). For the history of the religious reform in which such repairs resulted, *see* JOSIAH.

10. In Ezra 8:16, the name given to one of the "leading men" whom Ezra sent to procure a Levite to join the company of exiles returning to Jerusalem. He is also mentioned in I Esd. 8:44; 9:14. Assuming that the same individual is meant, it is reported in Ezra 10:15 that he opposed the course of action laid out by Ezra and the company of returned exiles regarding mixed marriages. The reason for such opposition would be clear if we could assume that Meshullam, the son of Bani, mentioned in Ezra 10: 29; I Esd. 9:30, is the same individual mentioned in Ezra 8:16; 10:15: he himself had married a foreign wife and was loath to give her up.

11. Son of Berechiah, and one of those who helped repair the wall of Jerusalem (Neh. 3:4, 30). The marriage of his daughter to Jehohanan is mentioned in Neh. 6:18.

12. Son of Besodeiah, and one of those who helped repair the Old Gate of Jerusalem after the return from exile (Neh. 3:6).

13. One of those who stood at Ezra's left hand during the ceremony of the reading of the Law before the people in the seventh month of the year (Neh. 8:4). The position taken by Meshullam here is reminiscent of the place of honor afforded leading men in the ceremony of the third- and second-century-B.C. synagogues.

14. A priest who set his seal to the covenant made between the people and God after the return from the Exile (Neh. 10:7).

15. A chief of the people, signatory to the covenant made between the people and God after the return from the Exile (Neh. 10:20).

16. Head of a priestly house in the time of the high priest Joiakim (Neh. 12:13).

17. Head of another priestly house in the time of the high priest Joiakim (Neh. 12:16).

18. A gatekeeper who guarded the storehouses of the gates in the days of Joiakim (Neh. 12:25; *see also* MESHELEMIAH).

19. One of those who participated in the procession which was held during the dedication of the rebuilt wall of Jerusalem (Neh. 12:33). According to the text he was a prince in Judah.

E. R. ACHTEMEIER

MESHULLEMETH mĭ shŏŏl′ə měth [משלמת, *from* שלם, restitution (for child lost through death)] (II Kings 21:19). The wife of Manasseh, king of Judah; the mother of Amon.

MESOBAITE. KJV form of MEZOBAITE.

MESOPOTAMIA měs′ə pə tā′mĭ ə [ארם נהרים, Aram-naharaim (*see superscription of* Ps. 60—H 60:2); Μεσοποταμία]. Strictly speaking, the land between the Tigris and Euphrates rivers. Politically and culturally, the borders of Mesopotamia varied in the long course of the land's history. At various times, expansion to the E into Elam and Media, and N into what is now Turkish territory, and from the NW into Canaan and Egypt, made of Mesopotamia the most influential common source of both Hebrew and Greek civilizations. The cultural pioneers of Mesopotamia were the Sumerians, who established the foundations of their literate civilization *ca.* 3000 B.C. They and their Semitic successors (the Akkadians) fostered a well-regulated economy with written records under law. Sumer (as S Babylonia is called) lacked mineral resources, and yet Sumerian civilization excelled, from the start, in the arts of metallurgy and stonework. Accordingly, foreign trade was fostered at quite distant points to secure raw materials and to exchange processed goods. Mesopotamian merchants, under royal sponsorship and protection, spread their native traditions of economy, law, and literature. The Mesopotamian contribution was a major part of the legacy that the Hebrews inherited upon settling in Canaan. While the Hebrews transcended this heritage in many ways (notably in religion, literature, and historiography), they fell below its standards in others (notably in economics and law). In Canaan, where the Mesopotamian merchants were the creditors exacting interest from the native debtors, the Hebrews reacted by outlawing interest collected by Hebrews from Hebrews.

The Hebrews were linked repeatedly with Mesopotamia throughout their history. The patriarchs hailed from the HARAN sector of PADDAN-ARAM in the far N (see Gen. 11:31–12:4; 24:10; 28:6 ff). In the time of the judges a Mesopotamian king subjugated Israel (Judg. 3:8). The Ammonites hired Mesopotamian chariots and horsemen in their war against David (I Chr. 19:6; cf. superscription of Ps. 60). During the Divided Monarchy the Assyrians deported many of the Israelites and Judeans to various parts of Mesopotamia; and Nebuchadnezzar of Babylon continued the process. The Exile shifted the center of gravity in Jewish life to Babylonia, where a large part of the OT was written, and where postbiblical Judaism was destined to produce its greatest rabbinic monument: the Babylonian Talmud. There were residents of Mesopotamia at Jerusalem on the day of Pentecost (Acts 2:9). Stephen referred to Abraham's living in Mesopotamia before he lived in Haran (Acts 7:2).

MESSENGER [מלאך, *from* לאך, send (LXX ἄγγελος); NT ἄγγελος, ἀπόστολος; Apoc. ἄγγελος, πρεσβύτης]. Alternately: ENVOY; ANGEL; KJV AMBASSADOR. One who is sent with a message. He may carry messages of private (Gen. 32:3, 6; Num. 24:12; I Kings 19:2; etc.) or public (Num. 20:14; Deut. 2:26; Judg. 6:35; I Sam. 16:19; II Sam. 2:5; II Kings 16:7; etc.) interest. He may be part of the royal messenger service of ancient kingdoms and so a COURIER. He may proclaim the triumphal entry of a conqueror or some other public decree as a HERALD.

The Hebrew word may be used for a PROPHET sent by God with a message to his people (II Chr. 36:15-16; Isa. 42:19; 44:26; Hag. 1:13). It may refer to the priest (Eccl. 5:6; Mal. 2:7; *see* PRIESTS AND

LEVITES). Such a one will announce the advent of the DAY OF THE LORD (Mal. 3:1). The anger of a king is said to be a messenger of death (Prov. 16:14). The messenger may bring evil news or cause destruction (Ps. 78:49 ["angel"]; Prov. 13:17). In the majority of OT passages this word is used for "ANGEL," the heavenly messenger from God to man.

So in the NT, ἄγγελος is the messenger—i.e., angel—of God. In pagan literature this word is used for the messenger of the gods. But he may be an envoy sent by man to prepare the way (Gen. 32:4 LXX; Jth. 1:11; I Macc. 1:44; Luke 7:24; 9:52). Thus the forerunner of the Messiah is designated a messenger (Matt. 11:10; Mark 1:2; Luke 7:27; cf. Mal. 3:1). Joshua's scouts are so designated (Jas. 2:25).

Also in the NT ἀπόστολος is the delegate, envoy, or AMBASSADOR, and the word is so used of the prophets and the apostles (John 13:16 ["he who is sent"]; II Cor. 8:23; Phil. 2:25; etc.). *See* APOSTLE.

C. U. WOLF

***MESSIAH, JEWISH** mə sī'ə [Μεσσίας, *from* Aram. משיחא = Heb. משיח]. In the biblical final expectation, the designation of the God-appointed king of the end of time; literally, the "anointed one."

In the OT the ruling king of Israel was generally called the "anointed of Yahweh" (*see* KING), as investigation of the terminology (§ 1 *below*) shows. If the name has been transferred to the ideal king of the future (*see* ESCHATOLOGY OF THE OT), then it is to be expected, as a matter of course, that this eschatological hope will exhibit connections with the OT (and ancient Near Eastern) conception of a king, even if not all of its individual features can be traced back to it (*see* § 2 *below*). In the history of the OT expectation of the future (*see* § 3 *below*), as also in the late Jewish eschatology (*see* § 4 *below*), the messianic hope by no means plays a dominant role everywhere, even in those areas where it is verified at all. One is, therefore, not justified in using the concept "messianic" synonymously with the more general concept "eschatological," although for the Christian theology of fulfilment in Christ the messianic expectation naturally dominates all other eschatological expectations. On the other hand, however, in spite of the connections between the messianic expectation and the OT or ancient Near Eastern ideology of a king, one should not as yet apply the concepts "messianic" and "messianism" to the blessings which are expected from the present king, but should reserve them for the expectations of a king which are truly of an eschatological character (i.e., directed toward a new, different kind of future).

Bibliography

1. Terminology. The expression "the anointed one" was by no means applied only to the figure of the king of the last days. On the contrary, we often find a messianic expectation even when the title of Messiah is lacking or is replaced by another name (e.g., BRANCH; SON OF MAN).

a. The "anointed one" in the OT. The word משיח, "anointed," derived from the verb משח, "to anoint," occurs thirty-nine times in the OT. It designates primarily and in most cases the king of Israel or of Judah who ruled at that time (twenty-nine times; in II Sam. 1:21 the text should be emended); once it is applied to CYRUS of Persia (Isa. 45:1). In postexilic writings it is sometimes applied to the high priest, who has inherited certain functions of the king (Lev. 4:3, 5, 16; 6:22—H 6:15; Dan. 9:25-26; *see* PRIESTS AND LEVITES), and finally, once probably to the patriarchs who were regarded as prophets (Ps. 105:15 = I Chr. 16:22). The basic form of the title "the LORD's anointed" (of Saul: I Sam. 24:6, 10—H 24:7, 11; 26:9, 11, 16, 23; II Sam. 1:14, 16; of David: II Sam. 19:21—H 19:22; of Zedekiah, the last king of Judah: Lam. 4:20), appears in varied ways, according to the context, as "mine anointed" (of the Davidic king: I Sam. 2:35; Ps. 132:17), "thine anointed" (of the Davidic king: Pss. 84:9—H 84:10; 89:38, 51—H 89:39, 52; 132:10; Hab. 3:13; of Solomon: II Chr. 6:42), "his anointed" (of Saul: I Sam. 12:3, 5; of the king to be designated by Samuel: I Sam. 16:6; of David: II Sam. 22:51 = Ps. 18:50—H 18:51; of a king or descendant of David who is not more precisely designated: I Sam. 2:10; Ps. 2:2; 20:6—H 20:7; 28:8), once also as the "anointed of the God of Jacob" (of David: II Sam. 23:1). These expressions point to the intimate connection between Yahweh and the king. Such a connection is guaranteed by the anointing and finds expression in the inviolability of the king (I Sam. 24; 26; II Sam. 1:14, 16; 19:21—H 19:22) and his endowment with the spirit of Yahweh (I Sam. 16:13). *See* ANOINT.

Although in Lam. 4:20 the anointed one, probably in imitation of the custom of foreign courts, is once extravagantly called the "breath of our nostrils"—i.e., the one who transmits the life-giving power of God—nevertheless, one cannot discern in any of the passages mentioned a specifically messianic meaning of the title. This is also true of Isa. 45:1, where Yahweh addresses Cyrus as "his anointed." While some scholars already see here the *terminus technicus* for the ultimate king of the world—a title which was first commonly used in late Judaism—transferred to the king of the Persians, others correctly regard the expression as a special title of honor, fashioned to express the lofty position of God's chosen instrument.

b. The "anointed one" in the NT and in the late Jewish literature. Only in NT times is there evidence

of the "anointed one" (משיח; Aram. משיחא; χριστός) as one of the various designations for the eschatological king. In the NT the Grecized Aramaic form Μεσσίας is found only in John 1:41; 4:25, in both instances followed by the Greek translation; elsewhere the translation is always used (*see* CHRIST). The title is not found in the Apoc. nor in the Mishna (except for Soṭ. 9.15). On the other hand, it is found in the Qumran literature (1QS IX.11; 1QSa II.11 ff; CDC XII.23; XIV.19; XIX.10; XX.1; 4Q Patriarchal Blessings I.3), in individual works of the Pseudep. (Pss. Sol. 17:32; 18:5, 7; Enoch 48:10; 52:4; II Esd. 7:28-29; 12:32; II Bar. 39:7; 40:1; 70:9; 72:2), as well as in old Jewish prayers or in the literature of the Targums and the Talmud.

2. Origin and nature of the Messiah expectation. As a single and subordinate line within the OT eschatology (*see* ESCHATOLOGY OF THE OT) the OT Messiah, like OT eschatology, has no real counterpart in the ancient Near Eastern milieu. Its source must, therefore, be sought within the OT faith. To be sure, many of the concepts which are a part of the picture of the Messiah are also to be found in the intellectual world of the Babylonians, the Egyptians, and other cultures of the Near East. But in these cases they lack the specifically Israelitic projection toward the final goal of history.

The Messiah expectation is, in the first place, linked with the well-developed world of ideas which surrounded the historic Davidic kingship. In addition, however, mythological ideas of an original man as king of paradise also seem to play a part in it. The development of this Messiah expectation is not left to free fancy but is always directly related to the expected full revelation of Yahweh.

a. King and Messiah. The Israelitic kingship (*see* KING) did not attain central significance for religion, as was the case in many ancient Near Eastern nations, because it was established only at a comparatively late date and for entirely secular and political reasons. However, kept under constant criticism by the belief in Yahweh, this institution, thanks to the exceptional rule of DAVID, also won a place for itself in religion and became the foundation for the Messiah expectation. Two points of departure should be observed here: (*a*) The kingdom of David obtained its religious legitimation by the so-called Nathan prophecy (II Sam. 7; cf. 23:1-7). In it the dynasty of David was promised eternal existence (II Sam. 7:16, 29; 23:5; cf. Pss. 89:3-4, 29-37—H 89:4-5, 30-38; 132:11-12), and the son-father relationship with all its blessings (II Sam. 7:14; Ps. 2:7) was promised between any particular king of the house of David and Yahweh. Taking the place of the mythological legitimation found in Egypt or Mesopotamia, is the view of the Davidic kingdom as a new pledge of redemption by Yahweh, within the already-existing Yahweh-Israel COVENANT (II Sam. 7:10-11: "my people Israel"; 23:3*a*: "God of Israel," "Rock of Israel"). As the covenant with Abraham, according to the Yahwist, aims at the goal of redemption (Gen. 12:1-3), so the covenant with David, especially when the great promise had no outlook for adequate fulfilment in the present, was gradually adjusted to an eschatological fulfilment. (*b*) Various forms and phrases of the so-called court style, which served to glorify the king, were taken over from the world surrounding Israel, with its various forms of sacred kingship, perhaps also from the pre-Davidic kingship of Jerusalem (Gen. 14:18; Ps. 110:4; *see* MELCHIZEDEK)—however, in such a way that the actual deification of the king was eliminated by the belief in Yahweh. Especially in the royal PSALMS (Pss. 2; 18; 20; 21; 45; 72; 101; 110; 132) extravagant statements are heaped upon the king. He is Yahweh's adopted son (2:7). He provides for law and justice in the land (72:1-4, 12-14) and secures for his people the blessings of God (72:6-7, 16). He defeats all enemies (21:8-12—H 21:9-13) and will rule forever (21:4—H 21:5; 72:5) over the whole world (2:8; 72:8-11). This kingly ideology in the royal psalms, with its prototypes and parallels in the ancient Orient, must by no means be interpreted yet as messianic eschatological, although, naturally, the fact that the ideal (which was, after all, largely unfulfilled in the present) was transferred again and again, from one king to another, presupposes a certain eschatologically adjusted attitude. However, as soon as the expectations which were cherished in relation to the empirical king were transferred to an eschatological king, it was from this complex of ideas concerning the ideal king that the belief in a Messiah was formally nurtured. Hence it is not surprising that the royal psalms came to be interpreted in later times as thoroughly messianic (Ps. 2 in Acts 4:25 ff; 13:33; Heb. 1:5; 5:5).

b. Original man and the Messiah. In the Messiah expectation of Isaiah and Micah occur features which cannot be traced back directly to the kingly ideal—e.g., the origin of the Messiah in primitive times (Mic. 5:2—H 5:1); his mysterious birth (Isa. 7:14; Mic. 5:3—H 5:2); milk and honey, known elsewhere as food for the gods (Isa. 7:15); the peace of paradise (Isa. 11:6-8). Also Jacob's blessing of Judah, which probably dates from the time of David (Gen. 49:8-12), with its difficult-to-interpret promise of a ruler from Judah (vs. 10; *see* SHILOH; *see also* § 3*a below*), seems to promise the restoration of the conditions of paradise. The unifying element among these scattered traces has been presumed to be the mystical figure of original man or the king of paradise. Motifs based on this figure can also be found elsewhere in the OT (Job 15:7-8; Ezek. 28:12 ff; cf. Ps. 8:5-8—H 8:6-9; *see* PARADISE). It is, therefore, not easy to decide whether we may infer from this the existence of an expectation of a savior, which would be anterior to, and independent of, the Davidic kingship. In any case, the idea of the original man and king of paradise, which in itself does not show any eschatological features, may well have enriched the expectations of a Davidic Messiah by all kinds of features. More evident in late Jewish eschatology are the influences of the oriental-Hellenistic idea of the original man (Anthropos) on the expectation of a SON OF MAN, who must be distinguished from the Messiah.

c. Yahweh and Messiah. In the eschatology of the OT the coming of Yahweh to complete his dominion through judgment and salvation is the central content (*see* ESCHATOLOGY OF THE OT § 1). What is the relation of this to the coming of the Messiah ("comes" in Gen. 49:10; Zech. 9:9; "come forth" in

Isa. 11:1; Mic. 5:2—H 5:1; "be born" in Isa. 7:14; 9:6—H 9:5; "raise up" in Jer. 23:5; "set up" in Ezek. 34:23), who, as a sort of double of Yahweh, will perform all the functions of a ruler (unlimited authority over the nations in Gen. 49:10; Isa. 9:7—H 9:6; Mic. 5:4—H 5:3; Zech. 9:10; judgeship in Isa. 11:3-5; Jer. 23:5; bringer of peace and prosperity in Gen. 49:11-12; Isa. 11:6-9; Jer. 23:6; Mic. 5:4—H 5:3; Zech. 9:10)? What is said of Yahweh in Zech. 2:10 ff—H 2:14 ff is applied to the Messiah-king in Zech. 9:9-10; and very similar phraseology is used here. At first sight the waiting for the special figure of an ultimate king seems to have no proper place alongside the hope for the unlimited dominion of Yahweh. There are also prophetic passages which seem to exclude the reign of any king but Yahweh (Isa. 24:23; Obad. 21; Zeph. 3:15; Zech. 14:9). However, we must understand clearly that in OT expectations of the future the Messiah always plays only a subordinate role. Whenever he is mentioned at all, he is more of a symbol (Gen. 49:11-12; Isa. 7:14 ["God with us"]) and a gift (Isa. 9:6—H 9:5) of the time of salvation ushered in by Yahweh himself (Isa. 9:3-5—H 9:2-4; Jer. 23:1-4; Ezek. 34:20-23; Zech. 9:8). In the OT—different, e.g., from the late Jewish eschatology—the effecting of the change is not really the task of the Messiah. He is the representative and instrument of Yahweh (Jer. 23:5-6; Ezek. 34:23; Mic. 5:4—H 5:3: "in the strength of the LORD, in the majesty of the name of the LORD his God"), bearer of the spirit of Yahweh (Isa. 11:2). As in the figure of the ANGEL of Yahweh (e.g., Gen. 16), which at one time is Yahweh's messenger, at another his double, so we may probably also recognize in the figure of the Messiah the dynamic will of the OT God to reveal himself and to be personally present with his own, without, however, losing his supernatural character or destroying man by his unveiled presence (Exod. 33:20). The problems of NT Christology announce themselves here already.

3. The messianic expectation in the OT. In connection with several passages there is controversy as to whether the text has a messianic significance or not. Frequently, e.g., the re-establishment of the monarchy or a change on the throne is promised although no mention of a real messianic king is made (Jer. 30:21; Ezek. 17:22-24; 21:32; Amos 9:11). In the following, only the unambiguous and the more important texts are to be discussed.

a. Gen. 49:10-12; Num. 24:17. In Jacob's blessing of Judah (Gen. 49:8-12) the supremacy of the tribe of Judah, which was actually historically achieved by the kingship of David, seems to be taken for granted (vss. 8, 10*a*). The promise: "until שילה comes . . . , and to him shall be the obedience of the peoples," clearly goes beyond the condition attained under David ("until . . . comes") and must refer to a new messianic ruler in a new era of paradisaical fruitfulness. Unfortunately, however, the decisive word cannot be interpreted with certainty (*see* SHILOH), so that this ancient messianic promise, which probably still dates from the tenth century, remains quite unclear.

Probably also from the time of David is the second Yahwist prophecy of BALAAM in Num. 24:15-19, with its promise of a warlike king:

> I see him, but not now;
> I behold him, but not nigh:
> a star shall come forth out of Jacob,
> and a scepter [or comet] shall rise out of Israel;
> it shall crush the forehead of Moab,
> and break down all the sons of Sheth.

Since this is probably not a genuine prophecy, but an imitation oracle in honor of David, and since only warlike successes, but no creation of essentially new conditions, are foretold, the passage is not to be regarded as messianic. The question is, however, whether such a *vaticinium ex eventu* existing in a clearly marked form does not permit us to infer older prototypes of genuinely messianic oracles.

b. Isaiah. For a discussion of the difficult Immanuel prophecy in Isa. 7:10-17, *see* IMMANUEL. If the messianic interpretation of the Immanuel symbol is correct, Isaiah, in the political crisis of the so-called Syrian-Ephraimitic War (734/733) predicts for the faithless King Ahaz the impending birth of the Messiah—as a sign of punishment upon Ahaz and Judah, but also as a symbol of salvation for the faithful remnant. In Isa. 9:1-7—H 8:23-9:6; 11:1-9 the messianic expectation is fully developed. The so-called Christmas promise dates from the time between 732 and 722, when the territories mentioned in 9:1—H 8:23 had already become an Assyrian province. Vss. 2-5—H 1-4 laud the impending liberation of these regions, which according to vss. 6-7—H 5-6 would coincide with the crowning of a new (messianic) king of the house of David. The birth or begetting in vs. 6—H 5 is, according to Ps. 2:7, to be regarded as the adoption of the king by Yahweh as he began his reign; then follow the investiture and the conferring of the coronation titles

> Wonderful Counselor, Mighty God,
> Everlasting Father, Prince of Peace,

in which the foundation and program of the eternal messianic reign in justice and peace are defined. The title of king is appropriately avoided, because of the opposition between the Messiah and the empiric kingship. The prophecy in Isa. 11:1-9 begins with the metaphor of the Messiah shoot, which will come forth from the stump of Jesse (vs. 1), the present ruling house of David which is to be destroyed. The Messiah is related to the house of David as the REMNANT (*see also* ESCHATOLOGY OF THE OT § 2*d*) is related to the nation. The new type of messianic ruler (vss. 2-5) is distinguished by the fact that the spirit of Yahweh will abide in him as a permanent force. The relationship of the messianic king to Yahweh is determined by the spirit of acknowledgment (being concerned about the will of God; *see* KNOWLEDGE) and the fear of Yahweh (reverential fear and loving obedience; *see* FEAR § 2*e*); for his subjects he is the just judge, who helps the poor and humble obtain justice and destroys the godless. The description of the ruler is followed by that of his realm (vss. 6-9); it is a paradiselike realm of peace in which animals get along well with one another and men commit no evil.

c. Micah. The expectation of a Messiah in Micah presents strong affinities with that of Isaiah (Mic. 5:2-5*a*—H 5:1-4*a*). The origin and birth of the Messiah are mentioned with mysterious intimations. On

the one hand, he is a descendant of David; he does not, however, come from Jerusalem, but constitutes a new beginning from David's kinsmen the Ephrathites (I Sam. 17:12; *see* EPHRATHAH), as whose dwelling place Bethlehem was added. On the other hand, the one "who is to be the ruler in Israel" is also one

> whose origin is from old,
> from ancient days.

Does this refer to the distant old days of Jesse and David, or did ideas of the coming again of the original man have influence here after all? With his mysterious birth the present distress will come to an end:

> Then the rest of his brethren shall return
> to the people of Israel (vs. 3—H 2).

This need not refer to the return of the exiled to their home, so that Micah's prophecy would have to be denied, but may just as well refer to the restoration of the kingdom of David, which had been split up since the death of Solomon and especially since the Assyrian annexations. Vs. 4—H 3 pictures the reign of the Messiah as a representative of Yahweh in his universal kingdom:

> And he shall stand and feed his flock in the strength of the LORD,
> in the majesty of the name of the LORD his God.
> And they shall dwell secure, for now he shall be great
> to the ends of the earth.

Probably vs. 5*a*—H 4*a* in the translation "And he will be LORD of peace" also belongs to it.

d. Jeremiah. In Jeremiah's picture of the future the Messiah expectation is not prominent. The new representative from the line of David in Jer. 23:5-6 is contrasted by the designation "righteous Branch" (probably tying in with Isa. 11:1; later *terminus technicus* for the Messiah; cf. Zech. 3:8; 6:12; *see* BRANCH) and also by the title of honor "Yahweh is our justice" with the present king, Zedekiah, whose name likewise contains the element "justice" (*see* ZEDEKIAH 4). All supernatural wondrous features are lacking in the kingly ideal. As a wise and just king, appointed by Yahweh (the title of king is not avoided here), he provides for the welfare and safety of Israel. The national political hopes have become very modest.

e. Ezekiel. As in Jeremiah, the Messiah image in Ezekiel is rather faint. Passages 17:22-24; 21:25-27—H 21:30-32 are not productive and can also be applied to a nonmessianic ruler. On the other hand, 34:23-24; 37:22, 24-25, promise that Yahweh, after he himself has brought about the change and has brought the reunited people back to Palestine, will appoint his shepherd, his servant David, over them: "I will set up over them one shepherd, my servant David, and he shall feed them: he shall feed them and be their shepherd. And I, the LORD, will be their God, and my servant David shall be prince [נשיא] among them; I, the LORD, have spoken" (34:23-24). Only a little is said about the blessings derived from the reign of the Messiah. His reign does not extend beyond Israel, aside from the fact that the peoples "shall know that I, the LORD their God, am with them, and that they, the house of Israel, are my people" (34:30; cf. 37:28). It is clear that the Messiah is only *one* gift of the time of salvation, among others; as "servant"—i.e., minister—he is overshadowed completely by Yahweh. In 34:23-24 the title "king" is avoided. Ezekiel uses only the term "prince," which, according to the testimony of the LXX, should probably be used in 37:22, 24, instead of "king." Also to be noted is the eschatological statement in 37:25: "David my servant shall be their prince *for ever,*" which should not be rationalistically turned about by a collective interpretation of "David my servant" to mean an uninterrupted dynasty.

f. Deutero-Isaiah. As in Amos, Zephaniah, and other prophets, we find in Deutero-Isaiah (Isa. 40–55) no expectation of a Messiah. Yahweh himself is the king at the time of salvation (52:7). On the other hand, the prophet has cognizance of various instruments which God uses to achieve his plan of salvation. As in the case of Jeremiah's "Nebuchadnezzar, the king of Babylon, my servant" (Jer. 27:6), so in Deutero-Isaiah the historic person of CYRUS has become the executor of an eschatological mission:

> who says of Cyrus, "He is my shepherd,
> and he shall fulfil all my purpose"
> (44:28).

In 45:1 Yahweh even addresses him as "his anointed." Nevertheless, he is not a messianic king of the end of days (*see* § 1*a above*), since in the case of the earlier prophets Yahweh himself brings about the change before the Messiah begins his reign, while here Cyrus appears merely as the politico-military forerunner of salvation in the service of Yahweh. Even the Suffering Servant of God, with his prophetic and soteriological mission, cannot be regarded as a messianic king, even if he has probably acquired certain kingly features (*see* SERVANT OF THE LORD). He, like the figure of the SON OF MAN, was brought into synthesis with the figure of the Messiah only in NT times or in the person of Jesus.

g. Haggai and Zechariah. Toward the end of the year 520 B.C., Haggai announced to the governor of the community of Jerusalem, who was appointed by the Persians, that Yahweh would bring about a great revolution in the immediate future (Hag. 2:21). The nation's instruments of military power would disappear (vs. 22). "On that day, says the LORD of hosts, I will take you, O Zerubbabel my servant, the son of Shealtiel, says the LORD, and make you like a signet ring; for I have chosen you, says the LORD of hosts" (vs. 23). As "servant" and as "signet ring"—i.e., as God's governor (cf. Jer. 22:24; *see* SIGNET)—the descendant of David, Zerubbabel, will be the messianic ruler of the last days. Here, then, the coming of the Messiah is no longer awaited, but only his enthronement. A similar imminent messianic hope is found with a contemporary of Haggai, the prophet Zechariah. In the passage Zech. 6:9-14 the prophet, according to the presumedly original text, was (in a symbolic act) to crown as the coming Messiah, not the high priest Joshua, but Zerubbabel. The title "BRANCH" (cf. Jer. 23:5) has here already become a messianic name of honor. When the fulfilment of the promise did not materialize, the wording was changed secondarily so that the high priest Joshua was to receive the crown as a sign that the Messiah would come (in the future). The unfulfilled

imminent expectation of the Messiah thus became here again the expectation of a future Messiah.

h. Deutero-Zechariah. A last direct evidence of the messianic expectation in the OT is found in the supplement to the book of Zechariah, in the passage which is difficult to date but is probably rather late, Zech. 9:9-10. After the cry of the herald:

> Rejoice greatly, O daughter of Zion!
> Shout aloud, O daughter of Jerusalem!
> Lo, your king comes to you,

the Messiah is pictured as a humble king of peace:

> Triumphant and victorious is he,
> humble and riding on an ass,
> on a colt the foal of an ass.

The ass, originally the royal mount (Gen. 49:11), is now, in contrast to the horse, the symbol for the king's love of peace:

> He [LXX; Hebrew "I"] will cut off the chariot from Ephraim
> and the war horse from Jerusalem;
> and the battle bow shall be cut off,
> and he shall command peace to the nations.

His world-wide dominion is expressed in the traditional formula of Ps. 72:8. The most varied elements of earlier prophetic expectations are here once more combined into an impressive Messiah image.

4. The messianic expectation in late Judaism. From the confusing abundance of views on the coming of an ultimate ruler in the late Jewish period of the first century B.C., we can pick out only a few of the more important points. The penetration of the apocalyptic dualism, with its separation between this life and the life beyond, the present and the coming aeon (*see* APOCALYPTICISM; ESCHATOLOGY OF THE APOCRYPHA AND THE PSEUDEPIGRAPHA), also had a far-reaching influence on the messianic hope. The figure of the "SON OF MAN" (Dan. 7; Enoch 37–71; II Esdras; II Baruch) was, moreover, in accord with the otherworldly, universal tendencies, as that of a pre-existent, heavenly angelic being who, at the end of time, will appear at the side of God as judge of the world. In contrast to this, the Messiah born on earth from the line of David, who in the time of salvation will lead the people of Israel to power and rule them brilliantly, always remained a more mundane nationalistic expectation. But the two conceptions have influenced each other in many ways. In addition to these, however, there also emerge a number of other figures of the final days; mention is made of a Levitic Messiah (Test. Levi 18), a Messiah ben Joseph, a Messiah ben Ephraim. Only the older, more worldly nationalistic expectation of a Davidic Messiah, through the late Jewish literature, will be traced here.

a. Sources. In some works the messianic expectation is lacking completely, as, e.g., in Daniel, in the Apoc. (I and II Maccabees; Tobit; Judith; Baruch; Ecclesiasticus; Wisdom of Solomon), in some of the Pseudep. (Jubilees; Assumption of Moses; Ethiopian Enoch 1–36; Slavonic Enoch), in the Mishna, and in Philo. In other works the idea of the Son of man or a combination of the Messiah and the Son of man is dominant (Enoch 37–71; II Esdras; II Baruch). The most detailed picture of the Davidic king is drawn in Pss. Sol. 17:21 ff; 18:6-9), with considerable use of OT passages. Information on the Messiah doctrine(s) of the Qumran sect (*see* DEAD SEA SCROLLS; ESSENES) is given in some rather obscure passages such as 1QS IX.10-11; 1QSa II.11 ff; CDC XII.23; XIV.19; XIX.10-11; XX.1; cf. also CDC VII.18 ff; 1QSb V.20-29; 1QM V.1; also fragments from 4Q. The Messiah is often mentioned in late Jewish prayers—e.g.: "The Shoot of David do Thou cause to shoot forth speedily" (Eighteen Benedictions). The Targums and Talmudic literature are another main source. Not only the actual messianic prophecies but also other passages are given messianic interpretation—e.g., Gen. 3:15; the bridegroom in the Song of Solomon; in a peculiar reinterpretation, also the servant of God of Isa. 53. Also of some significance for the messianic faith of the masses, finally, were the "false messiahs" about whose rebellions Flavius Josephus tells (cf. Acts 5:36-37). Simon bar Cocheba ("Son of a Star") regarded himself in the Jewish uprising of 132-35 as the "star of Jacob" proclaimed in Num. 24:17, and he was greeted as Messiah by Rabbi Akiba.

b. Person and work of the Messiah. A systematic theory of the Messiah cannot be ascertained from the various sources, with their frequently divergent teachings. A picture which is not yet very far removed from the OT expectations is given in the PSALMS OF SOLOMON. The king and son of David has the task of purging Jerusalem of the heathen and destroying the godless (17:21-25). Then he will establish the realm of holy people; strangers are not admitted (vss. 26-29). The subjugated heathen come from afar to Jerusalem to see her glory and bring back the scattered members of the nation (vss. 30-31). The just, wise, strong, and sinless king depends on God alone; he introduces a blessed era (vss. 32 ff; 18:6-9). Here as also elsewhere (II Esd. 12:31-34; II Bar. 40:1-2) it is clear that the Messiah plays a considerably more active role in the deliverance of Israel and the subjugation of the enemies than in the OT.

Concerning the time of the coming of the Messiah, the most divergent opinions were current. The apocalyptic writers attempted to calculate the duration of the world era; according to others, no one but God knows the day and hour. He will come when the wickedness of the world has reached its peak, when the "messianic woes" (war, pestilence, famine, dissolution of all order) have come. According to certain rabbis, penitence and obedience to the law will hasten his coming, while sin and impenitence delay it; but other authorities deny that the coming of the Messiah depends upon the penitence of Israel. The concept of a forerunner of the Messiah (Elijah, Moses, Enoch, the "prophet") plays an important role. Most widespread was the belief that Elijah would return to prepare Israel for the coming of the Messiah (Mal. 4:5-6—H 3:23-24; Ecclus. 48:10; Luke 4:25; etc.; *see* ELIJAH 1). It was also taught that the Messiah was already present unrecognized, but concealed still because of the sins of Israel.

When the Messiah comes, he will destroy the hostile world power (under the name of Gog and Magog, Rome, Babylon, Edom) and establish on Zion his glorious kingdom, which is essentially limited to Israel. The struggle against the Antimessiah or Antichrist, the resurrection of the dead, and the general last judgment over the good and the

wicked do not belong in his sphere of duty. These ideas belong to the more recent, more transcendental and cosmic, universalistically directed line of apocalyptic thought, in which the decisive deeds at the beginning of the new aeon are reserved for God himself or the otherworldly Son of man. Between this new, transcendental expectation and the old, more worldly and nationalistic hope for a messianic kingdom, there exists a real conflict of feeling. A partial adjustment between the two was finally arrived at by thinking of the messianic kingdom as the end of the present aeon. It was to endure for a limited time (forty, four hundred, one thousand, two thousand years are mentioned) and then be followed by the new aeon. At the end of this interval (*see* MILLENNIUM) the Messiah was to die and be resurrected with his own in the new aeon. II Esd. 7:28-29 reads: "My son the Messiah shall be revealed with those who are with him, and those who remain shall rejoice four hundred years. And after these years my son the Messiah shall die, and all who draw human breath" (cf. also II Bar. 30:1; 40:3; 74:2). The rabbis make a distinction between the "days of the Messiah," which belong to the present aeon, and the world of the future.

As a result of extensive messianic interpretation of OT passages in late Judaism, the messianic king could also, from time to time, acquire all kinds of prophetic traits. A Messiah who suffers and dies as a substitute for all men in the NT sense was unknown in Judaism. To be sure, there is evidence for suffering *or* for death of the Messiah, but not for a Messiah who suffers *and* dies. In addition to the already-mentioned view of the dying of the Messiah at the end of the passing world age, it should also be mentioned that—e.g., on the basis of passages such as Zech. 12:10—one could also speak of a dying Messiah ben Joseph. The suffering of the Messiah is connected with his effort in establishing the messianic kingdom; or with the fact that all the just must suffer; or, finally, with the fact that before he reveals himself and is publicly recognized, he must lead a hidden and despised existence. The ideas of Isa. 53 did not affect the Messiah image, although the Servant of God has now and then been considered messianic. In the Targ. of Isa. 53 the text is transformed: "Then shall the glory of all the kingdoms be despised and come to an end; they shall be infirm and sick even as a man of sorrows and as one destined for sicknesses, and as when the presence of the Shekinah was withdrawn from us, they shall be despised and of no account. Then he shall pray on behalf of our transgressions and our iniquities shall be pardoned for his sake, though we were accounted smitten, stricken from before the Lord, and afflicted. But he shall build the sanctuary that was polluted because of our transgressions and given up because of our iniquities; and by his teaching shall his peace be multiplied upon us, and by our devotion to his words our transgressions shall be forgiven us . . . . He was praying, and he was answered, and before he opened his mouth he was accepted; the mighty ones of the peoples shall he deliver up like a lamb to the slaughter, and as a ewe that before her shearers is dumb, and there shall be none before him opening his mouth or speaking a word . . . . And he shall deliver the wicked unto Gehinnam, and those that are rich in possessions which they have obtained by violence unto the death of destruction, that those who commit sin may not be established, nor speak deceits with their mouth." (Vss. 3-5, 7, 9.)[1]

E. JENNI

MESSIAH (TITLE FOR JESUS). *See* CHRIST.

MESSOS, APOCALYPSE OF mĕs'ɔs. A Gnostic work in Coptic, discovered at Chenoboskion in 1946 (*see* APOCRYPHA, NT). It is thought to be one of the five apocalypses which Plotinus is reported by Porphyry to have combatted. This document suggests

[1] J. F. Stenning, ed. and trans., *The Targum of Isaiah* (Oxford: The Clarendon Press, 1949).

that Messos, long an uncertain figure, was neither Moses nor some mystic mediator nor a holy place, but a Gnostic seer or prophet. M. S. ENSLIN

*METALLURGY. The metals known and used in ancient Palestine were gold, silver, copper, lead, tin, and iron. The art of working gold and copper goes back into remote antiquity and was probably discovered in more than one place independently. Although the earliest metal objects so far discovered are of copper (or of meteoric iron), there are reasons for believing that gold was the first metal to be utilized by man. It occurs in the form of glittering yellow particles which attract attention; unlike copper, it does not require to be smelted from ore, and it is soft enough so that it can be easily worked. Hence it was early used for the making of simple ornaments.

7. Prophetic references to smelting
Bibliography

1. The origin of copperworking. The discovery that metallic copper can be produced by the simple process of heating malachite ore in a wood or charcoal fire was probably made accidentally when someone built a fire on or against rocks containing malachite. The use of copper does not appear suddenly in Egypt; on the contrary, it is possible to trace a gradual evolution from the simple to the complex in the forms of the copper objects produced. This fact indicates that the art of working copper was an indigenous development in that country and not an importation from outside, although the theory of an Asiatic, more specifically an Anatolian, origin has its advocates (*see bibliography*). However, the presence of ancient copper mines and slag heaps in Anatolia, the Caucasus, and N Iran shows that the metallurgical art was known and practiced in these areas also in ancient times.

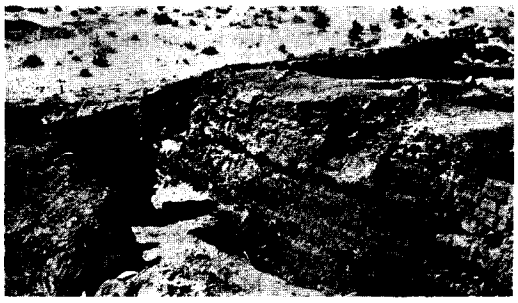
The inhabitants of the E side of the Wadi Arabah (*see* ARABAH) probably learned the arts of mining and metalworking from the Egyptians. A natural route of transmission is formed by the existence of Egyptian copper mines in Sinai (*see bibliography*). The Hebrews, in turn, seem to have learned these arts from the Transjordanians (*see bibliography*).

2. Tubal-cain. Hebrew tradition associates the beginnings of metallurgy with a figure called TUBAL-CAIN (Gen. 4:22). The unusual compound name and the fact that its bearer is made to be the first worker in two different metals, copper and iron, which, as we know, were introduced at widely different periods of time (*see* COPPER; IRON), suggest that we are faced with a telescoping of two different traditions, one of which traced the invention of copperworking (and perhaps ironworking as well) to Cain, and another which traced the introduction of ironworking to TUBAL. The Cain of the tradition is almost certainly to be regarded as a personification of the Kenite tribe, or as the eponym of this tribe. Since "Cain" (*qayin*) in Arabic means "smith," it is highly likely that the Kenites were engaged in the exploitation of the copper and iron deposits of the Arabah (*see* MINING) and that they derived their name from their occupation. Associated with the Kenites were the Kenizzites (*see* KENAZ), who, according to I Chr. 4:13-14, lived in the Valley of Smiths (GE-HARASHIM). It was not until after the Israelites came into contact with the Kenites and Moses had taken a second wife in the person of the daughter of Hobab the Kenite (as is implied by the references to Hobab as Moses' father-in-law in Num. 10:29; Judg. 4:11) that Moses "made a bronze [or rather, copper] serpent, and set it on a pole" (Num. 21:9). The position of the story of this incident in the narrative supports the view that the Israelites learned the art of metalworking from the Kenites.

3. Smelting sites in the Arabah. It is very probable that a metal industry flourished at Feinan (PUNON) as early as 2000 B.C. (*see* MINING). But the period of most intense activity was the Iron I Age (1200-900), as is attested by the presence, along the edge of the Arabah, of a considerable number of mining and smelting camps littered with sherds of the Iron I-II periods. Heaps of slag and small smelting furnaces leave no doubt as to the character of the remains. The largest center was at Mene'iyyeh, on the W side of the Arabah and *ca.* twenty-one miles from the head of the Gulf. Khirbet en-Nahas, *ca.* fifty-two miles farther N, on the E side of the wadi, was the center of another important mining and smelting area, which included Khirbet el-Gheweibeh and Khirbet el-Jariyeh.

4. Smelting methods. The ore was probably first broken into small pieces, then placed in the smelting furnace on top of a bed of charcoal. A few of the smelting furnaces are still standing. One at Khirbet el-Jariyeh is roughly circular in form and measures from 8½ to 9½ feet in diameter. Another, of square pattern, measures nearly 9 feet to the side. A furnace at Khirbet en-Nahas exhibits two compartments, one above the other. The fuel employed was charcoal, obtained from the neighboring wooded hills of Mount Seir. There is no evidence of the use of bellows to supply a forced draft. The melted copper would collect in a mass at the bottom of the furnace, from which it would be removed and broken up into chunks for further treatment. The use of such primitive means meant that a good deal of metal was not extracted from the ore, as examination of the slag shows. Furthermore, the copper produced in this way would be rather spongy and would require considerable hammering in order to consolidate it and free it from impurities.

5. The great smelter at Tell el-Kheleifeh. Glueck's excavation, in 1938-40, of Tell el-Kheleifeh at the S end of the Wadi Arabah (*see* EZION-GEBER) uncovered the largest copper smelter to be found in the whole of the Arabah or, for that matter, in the whole of the ancient Near East. The archaeological evidence shows that it was built in the tenth century B.C.; hence it seems reasonable to attribute it to Solomon, who, as we know, showed considerable interest in the head of the Gulf of Aqabah (cf. I Kings 9:26-28; 10:22). The smelter, in its earliest form, com-



Courtesy of Nelson Glueck

43. Smelter at Ezion-geber with a double row of flues

prised three large rooms and three smaller ones. The brick walls, which had been *ca.* thirteen feet high, were pierced by two rows of flues. Glueck believes that the lower flues, located *ca.* four feet above the hearth bottom, were designed to permit gases forming in one chamber to pass into the next and preheat its contents. The upper flues, which connected with a system of air channels inside the walls, were intended to supply a draft. The smelter was oriented so that the strong wind which blows almost constantly down the Arabah from the N would enter the upper row of flues, thus making the use of bellows unnecessary. Fig. MET 43.

The smelter stood in the middle of a fortified rectangle against whose inner face was a line of rooms, possibly workshops where copper articles were manufactured. Copper objects found on the site included fishhooks, arrowheads, spear points, fibulae, and fragments of utensils and tools. The presence of some iron objects has suggested that the smelter may have been used occasionally for treating iron ore.

In the course of time the flues and air channels became choked with sand, and some other means of supplying a draft must have been devised. The archaeological evidence indicates that the smelter continued to function, at least intermittently, down to the fifth century B.C. (*see bibliography*). The fact that as late as A.D. 1800 world production of copper amounted to only ten thousand tons is a warning, however, against envisaging a miniature Pittsburgh at the head of the Gulf in biblical times. The exact relationship of the Tell el-Kheleifeh smelter to the smaller, contemporary smelters at Mene'iyyeh and Khirbet en-Nahas is not certain, but it seems probable that at the large smelter the copper was subjected to further heating and refining. The presence of a number of pottery crucibles, each with a capacity of *ca.* fourteen cubic feet, suggests that this was the case. W. F. Albright has suggested that the Phoenician word for such a smelter or refinery was *tarshîsh*.

6. Metallurgical centers. In Palestine itself a number of small smelting furnaces have been discovered in the course of excavation, some of which were used for the treatment of copper and some for the treatment of iron. At Tell Jemmeh, Petrie found four such furnaces (*Gerar* [1928], pp. 14-18); E. Grant found two at Ain Shems (*Rumeileh* [1934], pp. 20, 42, Pl. XII*a*). Others have been discovered at Ai (cf. *RB*, XXXVIII [1929], 96; XLVI [1937], 254) and at Tell Qasile near Tell Aviv (*IEJ*, I [1950], 74-75).

44. Metal implements, from Megiddo: (1-4) iron knife blades (sickles?); (5-15) bronze chisels; (16-19) iron chisels; (20) iron axe; (21) bronze goad(?)

All these furnaces date from the Early Iron Age. One of the furnaces at Tell Jemmeh had flues on both sides, which were so aligned as to take advantage of the prevailing westerly wind. Others, no doubt, relied on bellows (Hebrew *mappûaḥ;* cf. Jer. 6:29) or blowpipes. A portable bellows appears in the early-nineteenth-century-B.C. wall painting in the tomb of Khnum-hotep III at Beni-hasan in Upper Egypt, showing a group of Asiatics (Fig. JOS 29). Blowpipes, and open stone molds which could be used for making a variety of tools and weapons at the same time, are well illustrated. Fig. MET 44.

7. Prophetic references to smelting. The spectacle of smiths at work suggested various ideas to the minds of the prophets. Ezekiel sees in the hot smelting furnaces, operated by bellows or blowpipes, the kind of treatment which God will accord wicked Israel: "I will put you in [the furnace] . . . and blow upon you with the fire of my wrath, and you shall be melted in the midst of it" (22:20-21). Isaiah uses the smelting process as a figure of speech for the manner in which God will remove from Zion her base elements:

> [I] will smelt away your dross as with lye
> and remove all your alloy (1:25).

Jeremiah, on the other hand, conceives of God's attempt to purge Israel of dross as futile:

> The bellows blow fiercely,
> the lead is consumed by the fire;
> in vain the refining goes on,
> for the wicked are not removed.

Refuse silver they are called,
for the LORD has rejected them
(6:29-30).

METERUS. KJV form of BAITERUS.

METHEGH-AMMAH mē'thĕg ăm'ə [מתג האמה]; KJV METHEG-AMMAH. A phrase of uncertain meaning in II Sam. 8:1. The KJV and the RSV interpret it as the name of a place of the Philistines taken by David. The ASV translates "the bridle of the mother city"; the Amer. Trans. "the control of the metropolis." The parallel in I Chr. 18:1 has "Gath and its villages." It is not certain whether I Chronicles has the right reading or only incorporates a later guess. W. F. STINESPRING

METHUSAEL. KJV form of METHUSHAEL.

METHUSELAH mĭ thōō'zə lə [מתושלח, *often* man of the javelin, *but perhaps* man (worshiper) of (the deity) Šelaḥ; *cf.* Old Akkad. *Sumu-Ea,* Old Babylonian *Šumu-Šīn,* Amarna *mutu-ba'al,* Ugar. *mtb'l,* Heb. פְּנוּאֵל, בְּתוּאֵל; Μαθουσάλα]; KJV NT MATHUSALA mə—. Sethite patriarch (Gen. 5:21-22, 25-27; I Chr. 1:3; Luke 3:37); P counterpart to Cainite Methushael.

Bibliography. M. Tsevat, "The Canaanite God Šälaḥ," *Vetus Testamentum,* IV (1954), 41-49. L. HICKS

METHUSHAEL mĭ thōō'shĭ əl [מתושאל, *often* man of God, *as if* Akkad. **mutu-ša-ili, but highly questionable;* LXX Μαθουσαλα] (Gen. 4:18); KJV METHUSAEL —sĭ əl. Cainite patriarch; J counterpart to Methuselah.

MEUNIM mĭ ū´ nĭm, **MEUNITES**—nīts [34-10-15-6-17-14, *plural of the gentilic of Ma'ân*]; KJV MEHUNIMS—hū´nĭmz (II Chr. 26:7); MEHUNIM (Ezra 2:50); MEANI mē ā´ nī (I Esd. 5:31). An Arab tribe centered about the town of Ma'an, twelve miles SE of Petra; perhaps the same as the Maonites (Judg. 10:12; *see* MAON 3). Some of them, with the Ammonites and the Moabites, launched a raid into Judah which got as far as En-gedi before Jehoshaphat (*ca.* 873–849) heard of it. He raised a force to counterattack in the wilderness E of Tekoa at the ascent of Ziz. The forces of the coalition were routed (II Chr. 20:1-23). The reference to Mount Seir (vss. 22-23) is to the direction from which they came, not to the Edomites, who were not involved in this raid. The homeland of the Meunim lay to the E of the line of Edomite border fortresses protecting the E frontier of Edom from invasion from the desert.

That the Meunim continued to be troublesome is suggested by the note that Uzziah (*ca.* 783-742) had to subdue them (II Chr. 26:7). The implication of the context is that they now lived in S Judah. In the list of returnees from the Exile, Meunim are listed among the Nethinim, the temple servants (Ezra 2:50; Neh. 7:52). During the century or so after Uzziah, it appears that the Meunim, or at least some of them, were assimilated into the Judahite community; possibly, at the outset, they were prisoners of war.

The Meunim are probably not the same as the Mineans (cf. LXX).

"Meunim" in I Chr. 4:41 is probably a scribal error and should be read "their dwellings." In II Chr. 20:1 the RSV reads "Meunites" for Hebrew "Ammonites," in the light of 26:7.

Bibliography. W. F. Albright, "Egypt and the Early History of the Negeb," *JPOS,* 4 (1924), 147-48; W. Rudolf, *Chronikbücher,* HAT, 21 (1955). V. R. GOLD

MEZAHAB mĕz'ə hăb [מי זהב, waters of gold] (Gen. 36:39; I Chr. 1:50). The father of Matred, and the grandfather of Mehetabel, who was the wife of Hadar (Hadad), a king of Edom. Since the name sounds more like a place than a person, it has been plausibly proposed to read מן די זהב for בת מי זהב, making Matred a male resident of the Dizahab mentioned in Deut. 1:1. M. NEWMAN

MEZOBAITE mĭ zō'bĭ īt [מצביה] (I Chr. 11:47); KJV MESOBAITE. The title given to Jaasiel of David's army. The text is dubious and perhaps should read "Mizzobah" (מצבה).

MEZUZAH mə zōō'zə [מזוזה]. The Hebrew word usually translated "doorpost" or "post." It is virtually suppressed in the translation "doors" in Prov. 8:34, and in I Kings 7:5 is usually replaced by the word for "windows" (so LXX, RSV).

The word is used of doorposts of a local sanctuary (Exod. 12:7, 22-23; Deut. 6:9; 11:20), though these references are sometimes taken to mean a dwelling house. A dwelling house is presupposed in Prov. 8:34; Ezek. 43:8. Likewise in Judg. 16:3 the reference is to the city gates. Otherwise the gates of the temple are meant: e.g., Shiloh (I Sam. 1:9), Solomon's temple (I Kings 6:33), Ezekiel's temple (Ezek. 41:21; 43:8; 45:19).

Like the threshold, the doorposts were sacred and were used for blood sprinkling (Exod. 12:7, 22-23, etc.) and for the attachment of passages of scripture (Deut. 6:9; 11:20). The figurative interpretation of these latter passages is doubtful. Probably at first doorposts shared the holiness of the threshold; later the custom grew up of attaching scriptures to the doorposts. Lastly, *Mezuzah* came to mean the container of such scriptures attached to the doorposts.

See also THRESHOLD; PHYLACTERIES.

G. HENTON DAVIES

MIAMIN. KJV form of MIJAMIN.

MIBHAR mīb'här [מִבְחָר] (I Chr. 11:38). Son of Hagri (KJV Haggeri); included by the Chronicler among the Mighty Men of David known as the "Thirty." However, in the parallel catalogue the words "Mibhar the son of Hagri" are read "of Zobah, Bani the Gadite" (II Sam. 23:36), which, though not free from difficulties, appears to be the original reading. E. R. DALGLISH

MIBSAM mīb'săm [מִבְשָׂם]. **1.** A son of Ishmael, and hence the name of an Arabian group (Gen. 25:13; I Chr. 1:29). Its location is unknown.

2. A descendant of Simeon (I Chr. 4:25), the father of Mishma. S. COHEN

MIBZAR mīb'zär [מִבְצָר, fortification] (Gen. 36:42; I Chr. 1:53). An Edomite clan chief. Eusebius identifies the name with Μαβσαρά in N Edom; others suggest Bozrah (cf. Gen. 36:33; Amos 1:12: בצרה).

MICA mī'kə [מִיכָא, who is like E(l)] (II Sam. 9:12; I Chr. 9:15; Neh. 10:11—H 10:12; 11:22); KJV MICAH, MICAIAH, MICHA. Alternately: MICAH [מִילָה] (I Chr. 8:34-35; 9:40-41; 11:17); MICAIAH mĭ kā'yə, mī— [מִילְיָה, who is like Yahu] (Neh. 12:35). **1.** A son of Mephibosheth, and grandson of Jonathan son of Saul. Mica no doubt shared the fortunes of his father as a recipient of the generosity of David for the sake of Jonathan, as well as the subsequent penalization by David because of the duplicity of Ziba (II Sam. 9:12; cf. 19:24-29). He appears to have become the progenitor of a well-known family in Israel and the father of four sons (I Chr. 8:34-35; 9:40-41).

2. An Asaphite, son of Zichri (I Chr. 9:15; Zaccur in Neh. 12:35; Zabdi in 11:17); the father of Mattaniah, who was in charge of the songs of thanksgiving in the postexilic worship (Neh. 11:17; 12:8). Mica's descendants include Uzzi, who was the later overseer of the Levites in Jerusalem (11:22), and Zechariah, who was a trumpeter in the thanksgiving processional at the rededication of the walls of Jerusalem in the days of Nehemiah (12:35).

3. One of the Levites who set their seals to the covenant made in the time of Nehemiah (Neh. 10:11—H 10:12). E. R. DALGLISH

MICAH mī'kə [מִיכָה, מִיכָא, *abbreviated forms of* מִיכָיְהוּ, who is like Yahu?]. **1.** The Ephraimite in the ancient Yahwistic narrative of Judg. 17–18, a postexilic addition to the Deuteronomic edition of the book of Judges. According to the story, Micah's mother has made for him from two hundred pieces of silver a graven image and a molten image, to be set up as a shrine, along with ephod and teraphim, in his house. The priest of the shrine is one of Micah's sons. A better priest is soon found, however, in the person of a young Levite from Bethlehem in Judah, who, after the offer of wages, clothing, board, and room, is installed in Micah's house as a permanent spiritual "father." But five Danites seeking a territory for their tribe learn of the Levite's presence, and upon returning to Ephraim with six hundred armed men, they persuade the Levite to accompany them to Laish, where they ultimately establish their home. With them they take also Micah's ephod and teraphim and graven image. Micah protests this action, but is helpless in the face of superior strength and returns home empty-handed. His graven image becomes a shrine in the city of Dan.

2. A descendant of Reuben (I Chr. 5:5).

3. The son of Meribbaal (*see* MEPHIBOSHETH; I Chr. 8:34-35; 9:40-41). He is called Mica (KJV "Micha") in II Sam. 9:12.

4. A Levite who lived during the last days of David (I Chr. 23:20; 24:24-25).

5. The father of Abdon (II Chr. 34:20). The same person is called Micaiah in the parallel passage, II Kings 22:12. E. R. ACHTEMEIER

***MICAH THE PROPHET** [מִיכָה, *abbreviated form of* מִיכָיְהוּ, Who is like Yah? (Jer. 26:18); LXX Μειχαίας]. A Judean prophet, contemporary of Isaiah (end of eighth century B.C.). The book of Micah is the sixth in the collection of the Twelve.

Bibliography

A. *HOME AND DATE.* According to the superscription, the prophet came from a town named Moresheth, or Mareshah (1:1, 14-15; cf. Jer. 26:18), probably MORESHETH-GATH, near the old Philistine town of Gath (LXX κληρονομίας Γεθ; 1:14). It has been identified with Tell el-Menshiyeh, near 'Araq el-Menshiyeh, *ca.* 6½ miles W of Beit Jibrin and 7½ miles SW of Tell ej-Judeideh. The prophet lived, therefore, in a small village of the Shephelah or the low foothills of SW Palestine halfway between Jerusalem and Gaza, near the Judean stronghold of Lachish and close to the Philistine cities. The nature of the prophet's home and its location may help to explain two of the prominent features of his message: (*a*) Micah loved poor farmers and shepherds and felt that these humble country people were the backbone of the nation (3:2-4); (*b*) he observed international affairs in a way which was not exceptional for a dweller of a village placed on the route of foreigner invasions.

A chronological note (1:1) indicates that Micah received the "word of Yahweh" during the reign of Jotham (*ca.* 750-735), Ahaz (*ca.* 735-715), and Hezekiah (*ca.* 715-687). If the editor of the book is right, Micah's activities began a long time before the fall of Samaria (721) and continued for many years, running simultaneously with that of Isaiah in Jerusalem.

Tekoa, where Amos had been reared, lay only

17½ miles E of Moresheth, and the influence of Amos' thoughts upon Micah as he grew into young manhood was probably great (cf. Mic. 2:6 with Amos 2:12; 5:11; 7:10-11). It is almost certain that Micah of the countryside was familiar with the cry for justice that was characteristic of Amos. It is also likely that he had often been in Jerusalem in the days when Isaiah was preaching there. According to Jer. 26, Micah had preached in Jerusalem so forcibly that he, like Isaiah, had influenced Hezekiah and had led him to inaugurate a reform which later inspired the Deuteronomic reform of Josiah (Jer. 26: 16-19).

B. ***MINISTRY.*** **1. The doom of Samaria.** It was to Samaria, the capital of the kingdom of Israel, that Micah turned early in his prophetic ministry. All eyes were on Samaria. Thus far it had withstood the shock of the Assyrian invasion of Israel, but Assyria was ruthless and strong, and Israel's future was most uncertain. The prophet was well aware that Samaria could not long hold out against Assyrian attack. Micah sought to awaken the capital to the fact of its imminent destruction:

> I will make Samaria a heap [of ruins] in the open country,
> a place for planting vineyards;
> and I will pour down her stones into the valley,
> and uncover her foundations (1:6).

The capital city was besieged and captured by Sargon (721 B.C.). The majority of its population (close to thirty thousand people) was taken captive, and in its place were brought in captives from other regions which the Assyrians had mastered (II Kings 17:24-34).

2. Warnings to Judah. Micah took the occasion to appeal to his fellow Judeans, that they might take a lesson from Samaria's collapse. He resorted to symbolic prophecy to awaken his people to the degenerating influences of the fertility rites. Naked and barefoot like a slave, he went at an impulse from Yahweh and lamented—as do the people in their wailings—over the sins of the N and their corrupting influence pouring into Judah:

> For this I will lament and wail;
> I will go stripped and naked;
> . . . . . .
> For her wound is incurable;
> and it has come to Judah,
> it has reached to the gate of my people
> (1:8-9).

When at length the Assyrians withdrew from invading the SHEPHELAH without having invaded the hill country of Judah, and indeed without having aroused any of the Judean people to serious thought or earnest repentance, Yahweh spoke a message of lament, for his people would soon know the galling experience of a foreign yoke (2:3-5, 11).

Suddenly, however, into the situation came an eschatological vision: Yahweh's people and their king passing on before them in dignity and triumph, and Yahweh at their head (2:12-13).

3. The Judean rulers. The prophet then turned to the aristocracy of Judah. Are they worthy to lead? Have they really any right to be called "rulers of the house of Israel," when they constantly hate what is good and love what is evil (3:1-2*a*)? Are they sensitive to the responsibility of a leadership that truly serves?

With the official prophets of his time Micah dealt sharply, for they gauged the quality of their revelation by what the people paid them. He said to them:

> Therefore it shall be night to you, without vision,
> and darkness to you, without divination.
> The sun shall go down upon the prophets,
> and the day shall be black over them (3:6).

Tragic indeed is the time when the seer does not see and when he whose calling it is to declare: "Thus saith the LORD," has to cover his lips in embarrassed chagrin, "for there is no answer from God." The channels of divine disclosure are clogged.

4. The prophet's inspiration. Micah has been criticizing those who belong to the same high calling as that to which he belonged. What he saw of the prophets, taken as a whole, was to him a cause of heart-searching as to his own inner spirit. He did not find the task of prophesying easy, and it touched him to the quick to see among his high calling of spokesmanship for God and for human duty, as illumined by the divine spirit, men who were in it for what they could get out of it. The word of God so lived in his own person and made upon him such a powerful demand of utterance that he could not stand to see about him in the office of prophet superficial time-servers. It is in this mood—not in that of self-congratulation—that he gives us now, in contrast, a glimpse of his own soul. He was aware that Yahweh had laid his hand upon him.

> As for me, I am filled with power,
> with the Spirit of the LORD,
> and with justice and might,
> to declare to Jacob his transgression
> and to Israel his sin (3:8).

Micah was constantly learning as he worked at the searching calling of prophecy. He now was at the point of leaving the quiet countryside of Moresheth-gath to go to Jerusalem, Judah's capital city and spiritual center.

5. The doom of Jerusalem. Did Micah see Isaiah in Jerusalem? Did he hear him speak? Or did Isaiah, brilliant and dedicated Jerusalem spokesman for God, hear his colleague from the countryside of Moresheth-gath? It was clear to Micah that the capital city of Jerusalem was in reality the chief source of licentious and corrupt living. And it was plain to him that as Jerusalem went, so went the nation.

> What is the sin of the house of Judah?
> Is it not Jerusalem? (1:5.)

It was most likely his first direct contact with the political and spiritual leaders. The civil officials were criminal profiteers. The judges' hands were itchy for bribes. The priests so manipulated the priestly oracle as to enrich themselves. The prophets had become infected with a materialistic motivation of their sacred calling as the Lord's spokesmen. It is reasonable to believe that 3:9-11*a* was Micah's first utterance in Jerusalem and most likely at the temple.

Micah's country background made all the more clear to him the sense of responsibility that should characterize these heads and rulers, these spiritual guides. Boldly, the prophet predicted the destruction

of the capital and even the downfall of the temple (3:12).

C. ***THE BOOK.*** Like the Isaianic collection, the book which bears the name of Micah appears to be composite. Chs. 1–3 (with the exception of 2:12-13) contain exclusively threats of doom; chs. 4–5 contain promises; 6:1–7:6 contains threats of doom, and 7:7-20 promises. It would seem that the final editor, whose task it was to bring the various oracles of the prophet before a reading public, balanced the two phases of prophecy, oracles of doom and gracious promises.

Contemporary scholars believe that the genuine oracles of Micah are to be found chiefly in the first three chapters of his book, while chs. 4–7 contain two later anthologies (chs. 4–5; 6–7) which may include one or two oracles of the eighth-century prophet.

1. Oracles of messianic hope (chs. 4-5). This booklet of comfort opens with the poem on universal peace (4:1-4) which is found also in Isaiah (2:2-4). It contains the apostrophe to Bethlehem as the birthplace of the Messiah to come (5:2-4). There is no apparent thread connecting the various pieces of this anthology, and many hypotheses have been proposed in attempts to remove the contradictions. The date of one part of the collection is at least later than the Battle of Carchemish (605), since it presents Babylon as the place of exile (4:10). The poems which follow (4:11-13; 5:7-9) suggest the nationalistic eschatology of the Ezekiel school (chs. 38–39).

2. Prophetic threats and promises (chs. 6–7). The last section is constituted by the juxtaposition of four independent poems:

a. Yahweh's controversy (6:1-8). This dramatic dialogue, of high literary quality, raises a central question in the religious life, whether of nations or of individuals; shows the alternative answers that Judah has made to it historically; and then in climactic fashion gives a prophetic answer in one of the noblest utterances of holy scripture. It has been suggestively called the Magna Charta of prophetic religion.

The picturesque setting of the piece is that of a lawsuit between Yahweh, party of the first part, and Judah, party of the second part. The poet chose a time for this utterance when the Judean leaders in great numbers were present in the temple. The opening utterance (6:1*a*) presents the debate as "the word" which Yahweh is speaking to Israel. The debate grew out of the questioning on the part of Israel of Yahweh's real leadership and concern for his people. The prophet, in Yahweh's name, calls Israel to attention. Israel is to plead its case before the Lord (6:1-2).

Yahweh opens the debate, recalling how he has brought Israel out of Egypt, from bondage into freedom, sending before them great leaders—Moses, Aaron, and Miriam, three significant leaders, all from one dedicated family (6:3-4). He recalls that when Israel was actually entering Canaan, the Moabite king Balak commanded Balaam, the Moabite seer, to curse the Israelites as they were in the process of invading Canaan, for he was overcome with fear of them. But Balaam the seer refused to curse them. Said he:

> How can I curse whom God has not cursed?
> How can I denounce whom the LORD has not denounced?
> (Num. 23:8).

The prophet then (Mic. 6:4-5) recalls to Israel, as among the saving acts of the Lord, his redemption of them from Egyptian bondage, his sending before them great leaders—Moses, Aaron, and Miriam—and the refusal of the Moabite seer to curse the invading Israelites. Shittim (vs. 5) was the last camp of the Israelites on the march toward Canaan before they crossed the Jordan River, and Gilgal was the place of their first encampment after they had crossed. "From Shittim to Gilgal" represents the sustaining help of God which made this epochal crossing possible.

The prophet asks at last: When I come before Yahweh to bow myself before God on high, *what shall I bring?* The prophet himself provides an answer:

> He has showed you, O man, what is good;
> and what does Yahweh require of you
> but to do justice, and to love kindness,
> and to walk humbly with your God?
> (vs. 8).

The pathetic accent of the divine questioning (vs. 3) contrasts sharply with the tone which prevails in the rest of the book, and it shows marked affinity with the styles of Hosea, Deuteronomy, and Jeremiah. A deep anxiety prompts the people's cultic uncertainty (vss. 6-7). Reference to human sacrifices (vs. 7*b*) may point to the time of Manasseh (687-642; II Kings 21:1-18), although the reign of Ahaz (735-715 B.C.) should not be excluded (II Kings 16:3). Critical opinion concerning the date and authorship of this poem is divided, and several scholars ascribe it to Micah. The prophetic answer which it offers (vs. 8*b*) summarizes the preaching of Amos (righteousness), Hosea (steadfast love), and Isaiah (humility and faith).

b. Warnings against Samaria (6:9-16). This poem may originate from Micah, since it is directed against the leaders of a corrupt city (vs. 9) and allusions are found in it to Omri and Ahab (vs. 16). Its language, however, points to a later age.

c. A lament on a corrupt people (7:1-6). This dirge may come from Micah. It is written in the first person, and it deplores the absence of a single godly man in the land of Judah.

d. A psalm of hope (7:7-20). The last piece of the book is a song of trust in which the poet experiences his hope in the God of his salvation (vs. 7*b*). Affinities with Habakkuk; Ps. 137; Isa. 40–66 indicate an exilic date.

E. A. LESLIE

MICAIAH mī kāy'yə, mī— [מיכיהו, מיכיה, מיכה, who is like Yahu?]; KJV MICHAIAH for all except 3 *below.* Alternately: MICAH mī'kə (II Chr. 34:20); MICA (Neh. 11:17, 22); KJV MICHA in Neh. 11:17, 22. **1.** The mother of Abijah king of Judah; daughter of Uriel of Gibeah (II Chr. 13:2). The name Micaiah appears to be a corruption of MAACAH (10).

2. A prince under the reign of Jehoshaphat of Judah (II Chr. 17:7). He was sent by the king, together with other princes, into the cities of Judah to teach the law of the Lord.

3. Son of Imlah; a prophet during the reign of Ahab of Israel (I Kings 22:8-28; II Chr. 18:7-27).

Ahab, in an attempt to recapture Ramoth-gilead, planned a military attack on the Syrians of Damascus. In consultation of the divine will, Ahab summoned four hundred prophets who prophesied favorably in regard to the king's undertaking. One prophet, Micaiah the son of Imlah, was not called upon, for he was *persona non grata* with Ahab because his prophecies were never favorable to the king. But at the request of Jehoshaphat the king of Judah, who was an ally of Ahab, a messenger was dispatched for Micaiah. The messenger tempted Micaiah to conformism and suggested that he give a favorable answer to the king's inquiry. Micaiah, imitating the four hundred prophets, repeated their favorable oracle, but the king was suspicious of the veracity of the oracle and adjured him to speak the truth. Then the prophet gave a prophecy of doom and announced that he saw the defeated army of Israel as sheep without a shepherd. In support of his minority voice, Micaiah then reported his vision of the court of the Lord. He said he saw the Lord sitting upon his heavenly throne with all the hosts of heaven standing before him. The Lord asked the heavenly host who would volunteer to entice Ahab to attack Ramoth-gilead. One of the spirits then offered himself to be a lying spirit in the mouth of all the prophets of Ahab. Hearing this discreditation of the favorable oracle of the four hundred prophets, Zedekiah, one of the prophets, denounced Micaiah and smote him on the cheek. Finally, Micaiah was put in prison at the command of the king, to await the king's return; but when he was led away to prison, he still prophesied doom to Ahab, who actually died in the battle of Ramoth-gilead.

This short episode, preserved from the life of this ninth-century prophet, is significant in three aspects: One of these is the fact that, in the ninth century B.C., the Lord was pictured as a heavenly king in the midst of his court, surrounded with ministering spirits. This concept is indicative of the monotheistic implications of primitive Yahwism.

The second aspect that is apparent is that the strict monistic outlook of the primitive Yahwism regarded the Lord as the source of all happenings, including the evil ones. The destruction of Ahab is decreed by the Lord and completed by the instrumental role of a spirit of the heavenly court. This "lying spirit" had not yet the distinguished role of the adversary (*see* SATAN), but he is represented as merely one of the spirits.

The third aspect is that the supernatural origin of prophecy in general is maintained, and there is a clear distinction between the inspiration by the "lying spirit" and by the "Spirit of the LORD." This distinction leads to the problem of true and false prophets, which is one of the most difficult questions of the whole OT.

4. The father of Achbor (II Kings 22:12; II Chr. 34:20).

5. A contemporary of Jeremiah, son of Gemariah and grandson of Shaphan. After hearing the words of Jeremiah read by Baruch in the temple on a fast day in the fifth year of Jehoiakim, he reported them to the princes (Jer. 36:11-13).

6. Great-great-grandfather of Zechariah, a priest in the time of Nehemiah (Neh. 11:17, 22; 12:35).

7. One of the priests in the time of Nehemiah (Neh. 12:41). He was in the group of priests who blew the trumpet in the festal procession which dedicated the rebuilt walls of Jerusalem.

MICHA. KJV form of MICAH 3 in II Sam. 9:12 and of Mica (*see* MICAIAH 6) in Neh. 11:17, 22.

MICHAEL mī'kəl [מיכאל, who is like God? Μιχάηλ]. An Asherite, father of one of the men sent by Moses to spy out the promised land (Num. 13:13).

2. A Gadite otherwise unknown to us (I Chr. 5:13).

3. Another Gadite (I Chr. 5:14).

4. One of the forebears of Asaph; a Levitical singer (I Chr. 6:40).

5. One of the sons of Izrahiah of the tribe of Issachar (I Chr. 7:3).

6. A Benjaminite (I Chr. 8:16).

7. One of the men of the tribe of Manasseh who deserted to David at Ziklag (I Chr. 12:20). He had

been a "chief of thousands" in Manasseh and was made a commander in David's army.

8. The father of Omri of Issachar (I Chr. 27:18).

9. One of the sons of King Jehoshaphat of Judah (II Chr. 21:2). He was slain by his brother Jehoram upon the latter's ascension to the throne.

10. The father of Zebadiah, one of those who went up from Babylonia with Ezra in the reign of King Artaxerxes (Ezra 8:8). E. R. ACHTEMEIER

11. A celestial prince, or archangel.

A product of the elaborate angelology that developed during the Hellenistic period of Jewish history, Michael is mentioned but three times in the OT and only twice in the NT. References to him are, however, not infrequent in the deuterocanonical scriptures and in later Jewish and Christian writings.

Michael is portrayed as the patron angel of Israel (Dan. 12:1; Jub. 1:29; 2:1; Enoch 20:5; Test. Levi 5:6). He champions God's people against the rival angel of the Persians (Dan. 10:13, 20) and will lead the celestial hosts in the final battle against the forces of evil (12:1), variously represented as Belial, Gog and Magog, or—perhaps under the influence of the Iranian legend of Aži Dahak—the primordial Dragon (Rev. 12:7). In later rabbinic literature, he is depicted analogously as the vindicator of Israel against Edom—i.e., Rome (Exodus Rabbah 18.5). In this capacity, Michael is styled "general" or "chief captain" (II Enoch 22:6; 33:10), and his name is emblazoned on the escutcheon of one of the four divisions ("towers"; cf. Latin *turris*) of the troops of God (1QM IX.14-16). In medieval Christian art he is often furnished with the heraldic device of a banner hung from a cross.

Michael's championship of Israel is, however, not always so bellicose. He appears also as the people's intercessor before God (Test. Dan 6:2; Ascension of Isa. 9:23 [Latin]; cf. also Apocalypse of Paul 42; Pesîqtâ Rabbathî 44), characterized by his charity and forbearance (Enoch 40:9).

In Dan. 12:1 it is said of Michael that when he ultimately rises against the wicked, "your people shall be delivered, every one whose name shall be found written in the book." This bred the notion that he was also a recording angel (Ascension of Isa. 9:22-23 [Latin]). As the heavenly "librarian," however, he was likewise the custodian of other wondrous scriptures. Thus, he served as the intermediary between God and Moses at the giving of the law on Mount Sinai (Greek Apocalypse of Moses; Jub. 1:27; 2:1; Ascension of Isa. 11:21; Herm. Sim. VIII.3.3; Palestinian Targum, Exod. 24:1; cf. Acts 7:38; Deuteronomy Rabbah 11.10); and he is also the guardian of the magical formulas by which heaven and earth are established (cf. Enoch 60:12). Fragments of an Aramaic work beginning: "Words of the book which Michael rehearsed unto the angels," have been recovered among the Dead Sea scriptures; and a later Hebrew composition, entitled the Book of Elijah, purports to record apocalyptic secrets revealed to the prophet by this angel.

In Jude 9 allusion is made to a dispute between Michael and the devil about the body of Moses. According to Origen and other ancient authorities, this was related in the pseudepigraphic Assumption of Moses, but it is not to be found in the incomplete Latin text of that work that has come down to us. There are, however, sundry indications of such a story in later rabbinic literature (e.g., Deuteronomy Rabbah 10.11; Midrash Peṭîrath Môšeh, in Jellinek, *Bêth Ha-Midrash,* VI, 75; cf. L. Ginzberg, *Legends of the Jews* [1938], VI, 159). Michael similarly acts as a psychopompos in the Testament of Abraham (ch. 19). He opens the paradisal gate to the righteous (Ethiopian Apocalypse of Bar. 9:5; so too in a Sephardic funeral chant, *see bibliography*); and in a Syriac History of the Blessed Virgin, he reveals Mary's body in the clouds. *See bibliography.*

Michael is one of the specially privileged "angels of the presence" who stand beside the throne of God (Enoch 9:1; 40:2; 90:22; Sibylline Oracles 2:15; Palestinian Targum, Deut. 34:6; Targ. Job 25:2). The number of these is variously given, but Michael is usually associated with Gabriel and Raphael. Indeed, it is to be noted that he sometimes discharges functions elsewhere attributed to the former. Thus, in later Arabic tradition, it is Gabriel, not Michael, who reveals the heavenly scripture (i.e., the nuclear Koran) to God's prophet; and, whereas it is usually Gabriel who sounds the Last Trump, in a medieval Jewish midrash (*Ôthôth Ha-Mašîaḥ,* "Signs of the Messiah," in Jellinek, *Bêth Ha-Midrash,* II, 61-62), this role is assigned to Michael.

MICHAH. KJV form of MICAH in I Chr. 23:20; 24:24-25.

MICHAIAH. KJV alternate form of MICAIAH.

MICHAL mī'kəl [מיכל, *probably shortened form of* מיכאל, *from* מי, כ and אל, who is like God? *cf.* MICAIAH]. The younger daughter of Saul (I Sam. 14:49). Saul learned that she loved David and offered her to David, making the bride price a hundred dead Philistines, and hoping in this way to entice David to his death (18:20-25). David, however, was successful in the ordeal, won great popularity, married Michal, and aroused Saul's jealousy still more. Finally, when Saul sent messengers to kill David, Michal contrived his escape (19:11-17). Saul then gave Michal to Paltiel son of Laish (I Sam. 25:44; II Sam. 3:15). Later, when David made his treaty with Abner, one of the terms of the agreement was that Michal should be returned to him. This was done, much to the grief of Paltiel (II Sam. 3:13-16). When David brought the ark to Jerusalem, and performed the wild dancing associated with the Canaanite cult as part of the ceremony, Michal rebuked him. David apparently retaliated by giving her "no child to the day of her death" (6:16-23).

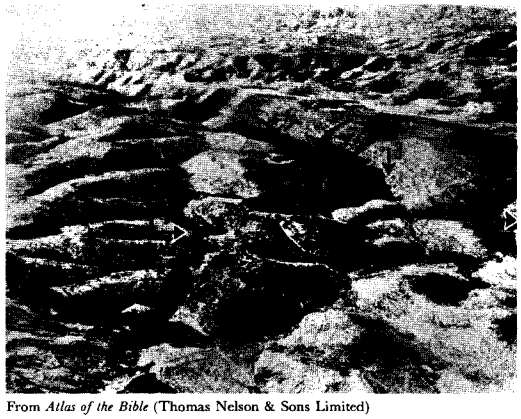
The reference to Michal in most MSS of II Sam. 21:8 is probably an error for Merab (so RSV), Michal's older sister and wife of Adriel.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 144. D. HARVEY

MICHEAS mī'kĭ əs. KJV Apoc. form of MICAH.

MICHMASH mĭk'măsh [מכמש, *mikhmāś, mikhmash* (I Sam. 13:2 ff; 14:5, 31; Neh. 11:31; Isa. 10:28); Μαχμάς (I Macc. 9:73), KJV MACHMAS măk'măs]; MICHMAS mĭk'măs [מכמס, *mikhmās,* hidden(?) (Ezra 2:27; Neh. 7:31)]. A city of Benjamin in the mountains *ca.* seven miles NE of Jerusalem.

1. Location. The ancient name is preserved in Mukhmas, a village located *ca.* seven miles NE of Jerusalem on a hill *ca.* two thousand feet above sea



From *Atlas of the Bible* (Thomas Nelson & Sons Limited)

45. In the background lies the desert of Judah, while in the foreground Michmash (1) lies to the left and Geba (2) to the right of the pass between them (3).

level, N of the rugged Wadi es-Suwenit, the narrow pass leading from the Jordan Valley to the hills of Ephraim.* According to I Sam. 14:4, two rocky crags named BOZEZ and SENEH were in the vicinity of Michmash. Fig. MIC 45.

2. History. Michmash first appears in biblical history in connection with the description of the military struggles against the Philistines on the part of Saul and Jonathan (I Sam. 13–14). This description is based, for the most part, on an intimate knowledge of the geographical features of the Michmash area, and the terrain was an important factor in the military strategy. The distribution of three thousand men between Michmash, where Saul was in charge, and GEBA under Jonathan (I Sam. 13:2-3; most commentators read "Geba" in both verses), placed the Israelites in a mountain area where the superiority of Philistine numbers and equipment would be at a disadvantage. Control of Michmash and the pass would keep open lines of communication between Saul's forces in the Jordan Valley and those in the hills of Ephraim.

The record of the conflict which follows seems to be based upon a conflation of early and late sources, thus explaining the occupation of Michmash by the Philistines without a clear statement of Saul's withdrawal from the place, although it may be implied in vs. 4. Philistine strength in Michmash is probably greatly exaggerated in vs. 5, which is usually taken to be from a late source. The figure of three thousand chariots (see LXX, Syr.) in vs. 5 seems large in view of the fact that in more favorable terrain the Egyptians operated with six hundred chariots (Exod. 14:7) and the Canaanites with nine hundred (Judg. 4:3). The complete rout of the Philistines came when Jonathan, with his armor-bearer, succeeded in scaling a mountain at Michmash and killing the sentries, and Saul's forces were quick to take advantage of the panic which ensued in the Philistine camp (I Sam. 14:5, 31).

Isaiah, in a poem which envisages an attack on Jerusalem, pictures the enemy storing his baggage at Michmash (Isa. 10:28). The attacker is most likely Assyria or a Syro-Ephraimite army. Isaiah's authorship of the poem is doubted by some on the basis of stylistic considerations. The usual interpretation is that heavy equipment would be left at Michmash to make the force mobile enough to ascend the mountains to Jerusalem. Some scholars have doubted that any force would make an attack on Jerusalem from this direction. Michmash appears in a list of Israelites returning from Babylonia. In Ezra 2:27; Neh. 7:31 the men of Michmash (Michmas) are numbered as 122. The occupation of the city by returning exiles is further attested in Neh. 11:31-36 by a reference to it, along with Aija, Bethel, Anathoth, and other nearby places, in the territory of Benjamin at the time of Nehemiah.

In the Maccabean period Michmash was the place of Jonathan's residence following the withdrawal of Bacchides to Antioch (I Macc. 9:73). The statement that he began to judge the people there has been taken as indicating that Jonathan set up in Michmash a government in opposition to that in Jerusalem, which had come under the influence of the Hellenistic forces from Syria. See also Jos. Antiq. XIII.i.6.

Bibliography. W. F. Albright, "The Assyrian March on Jerusalem," *AASOR,* IV (1922-23), 134-40. W. L. REED

MICHMETHATH mĭk'mə thăth [מכמתת] (Josh. 16:6; 17:7); KJV MICHMETHAH —thə. A place said to be near Shechem and on the border of Ephraim and Manasseh. A problem exists by reason of the statements in Josh. 16:6 that Michmethath is on the N boundary of Ephraim; and in 17:7 that Michmethath is E of Shechem and on a border of Manasseh, which, if E of Shechem, would not be contiguous with the N boundary of Ephraim. It is probable that the text has been disturbed and that the editors were uncertain as to the location of the place. Two possible sites for Michmethath have been proposed: Khirbet Makhneh el-Foqa, located on a hill *ca.* five miles SE of Shechem and W of the road from Jerusalem; and Khirbet Juleijil, E of Shechem.

MICHRI mĭk'rī [מכרי] (I Chr. 9:8). A descendant of Benjamin; otherwise unknown to us.

MICHTAM. KJV form of MIKTAM.

MIDDIN mĭd'ən [מדין] (Josh. 15:61). A village of Judah in the "wilderness" district. The LXX reading, Μαδών (Madon), is probably correct. It is identified with modern Khirbet Abu Tabaq in el-Buqe'ah (the Valley of Achor).

Bibliography. F. M. Cross, Jr., and J. T. Milik, "Explorations in the Judaean Buqê'ah," *BASOR*, 142 (1956), 5-17; F. M. Cross, Jr., "A Footnote to Biblical History," *BA*, 19 (1956), 12-17. V. R. GOLD

MIDIAN mĭd'ĭ ən [מדין]; **MIDIANITE(S)** mĭd'ĭ ə nīts [מדינים (Gen. 37:28; Num. 25:17; 31:2); מדיני (Num. 10:29)].

1. Origin and territory
2. The "land of Midian"
3. Earliest history
4. Theory of a Midianite Sinai-Horeb
5. War with Midian in the Plains of Moab
6. The Midianite invasion
7. Later history of Midian
Bibliography

1. Origin and territory. According to biblical tradition, Midian was one of the sons of KETURAH, Abraham's third wife (Gen. 25:2; I Chr. 1:32). Through their eponymous ancestor, the Midianites are thus acknowledged to have traced their origin from the father of the Hebrews, thereby tacitly implying kinship with the Hebrews themselves. Geographically, however, the territories assigned to Midian and Israel were clearly separate, for while Abraham was still living, he is said to have sent away the "sons of his concubines," among whom Midian was reckoned, "eastward to the east country" (Gen. 25:6); and at the beginning of the eleventh century B.C. we find the Midianites still associated with the People of the East (*see* EAST, PEOPLE OF THE; Judg. 6:3, 33; 7:12)—i.e., in the Syro-Arabian Desert. The territory over which the nomadic Midianites wandered, however, never seems to have had clearly demarked boundaries. Moreover, its limits appear to have fluctuated considerably at different periods.

2. The "land of Midian." The "land of Midian" appears in the early thirteenth century B.C. as a definite geographical entity (Exod. 2:15). Most scholars are agreed in defining this as a tract of land in NW Arabia on the E shore of the Gulf of 'Aqabah. In this same region Ptolemy (*Geography* VI.7, 27) cites a city which he calls Μοδίανα, located directly on the coast, and another Μαδίανα, situated farther inland, approximately twenty-six miles from the Gulf (modern el-Bed'). The latter would seem to correspond with the Μαδιάμ of Eusebius (*Onomastica* 136.31, ed. Lagarde) and the Μαδιάν of Josephus (Antiq. II.xi.1), as well as with the Madyan of the Arab writers. The nomadism of the Midianites, however, is clearly attested in the OT, where we find them radiating from 'Aqabah to penetrate W into Sinai (Num. 10:29), N into Moab (Gen. 36:35; I Chr. 1:46) and the reaches of the Syrian Desert E of Moab and Ammon (Judg. 7:25; 8:18-19), and finally into the E Jordan Valley (Num. 25:6-7; 31:2-3; Josh. 13:21) and Canaan (Judg. 6:1-6, 33; 7:1).

3. Earliest history. Before the thirteenth century B.C., little is known of the Midianites. They first emerge in the biblical story of Joseph, where they are characterized as "traders" (סחרים), who sold Joseph to the Ishmaelites "for twenty shekels of silver" (Gen. 37:28). The interpretation of the narrative at this point is difficult, and many scholars consider the account to be conflate, representing the skilful fusing of two traditions, one which told of the selling of Joseph to a caravan of ISHMAELITES and another which related the "kidnaping" of Joseph by Midianites. It is not impossible that in the original tradition the Ishmaelites and Midianites were identified through the stylistic device of parallelism (cf. Judg. 8:24), a literary phenomenon well attested in written sources from the second millennium B.C. (*see* JOSEPH SON OF JACOB § 2*d*). It must be remembered, however, that the Midianites and Ishmaelites are usually distinguished in the OT, in respect to both genealogical relationships and sphere of operation.

Moses, prior to the Exodus, had fled to the "land of Midian" (Exod. 2:15), where he was befriended by Jethro, priest of Midian. According to a persistent Israelite tradition, Moses' father-in-law was a Kenite (Judg. 1:16; 4:11). This has led many scholars to maintain that the metalworking KENITES were actually a clan of Midianites, or at least closely associated with them. Archaeological investigation has shown that in the Early Iron Age, Midian was much richer in copper ores than either Sinai or Edom. It is not unexpected that the Midianites would take advantage of this source of economic prosperity. Midian at this time was occupied by seminomadic tribes linked by ties of commerce and industry with Egypt and Canaan. The Midianites (or Kenites) among whom Moses lived are also described as a pastoral people, tending their flocks, and thus were at least partly nomadic in character. In addition, they were well acquainted with the trade routes leading from the S to the N (cf. Exod. 18:5; Num. 10:29-31). All this forms a striking contrast to the picture of camel nomads, as the Midianites are portrayed at the beginning of the eleventh century. *See* § 6 *below*.

4. Theory of a Midianite Sinai-Horeb. While Moses was still living in the land of Midian, he made a journey "to the west side of the wilderness [אחר המדבר], and came to Horeb, the mountain of God," where he experienced a divine theophany (Exod. 3:1-2). It is not specified that Mount Horeb was located in the land of Midian, but a number of scholars have so interpreted it, pointing out that some of the most ancient biblical traditions referring to the desert regions in which the Hebrews wandered (cf. Deut. 33:2; Judg. 5:4-5; Hab. 3:3) call for a site which more appropriately fits the land of Midian than the more traditional Sinai Peninsula (*see* SINAI, MOUNT). However, a careful study of the relevant biblical passages points to an area, not in the land of Midian proper, but farther N in the Arabah W of Edom (but cf. Hab. 3:7).

5. War with Midian in the Plains of Moab. The "elders of Midian" near the end of the Exodus period became associated with the Moabites in a venture to expel the Israelites from the Plains of Moab, the territory E of the Jordan opposite Jericho (Num. 22:4, 7). The precise relationship between Moab and Midian at this time is not known, but apparently some Midianite clans had been permitted to live peacefully in the land of Moab. Following the Israelite conquest of the Amorites, the Midianites and Israelites seem to have had conflicting interests (Num. 22:4). Thus the king of Moab secured Midian's co-operation in hiring the N Syrian diviner BALAAM, whose effort to impair the Israelites by

magical means eventually came to naught. While the Israelites paused for a time in the Plains of Moab, one of the Israelites married a Midianite woman (Num. 25:6-7; *see* COZBI). The story seems to be composed of various fragmentary elements, the details of which are not always clear, but the conclusion drawn in vs. 17 would seem to imply that the association of the Midianites and the Israelites had given rise to some hostility between the two peoples, not only because there had been an Israelite-Midianite intermarriage, but also because the Israelites had been seduced into Midianite pagan worship (if this is, indeed, what vs. 18 means). The idolatry was blamed on the treacherous counsel of Balaam (31:16)—a tradition which persisted into NT times (cf. Rev. 2:14). These episodes led to a war of vindication, which God commanded Moses to carry out against Midian (Num. 31:1-12; Josh. 13:21). The Midianites were defeated, including the so-called five "kings" of Midian, whose personal names are curiously preserved in the biblical record. The Midianite cities and encampments were burned and pillaged, and the women and children taken captive. Moses was angry because the Israelites had kept alive the women who had led them to practice idolatry. Thus all Midianite women except virgins were slain, along with all their male children.

6. The Midianite invasion. *Ca.* 1100 B.C. the first known camel nomads irrupted into Palestine in the form of a Midianite razzia. As far as we now know, the Midianites were among the first to make effective use of the recently domesticated CAMEL, thereby increasing considerably their nomadic mobility and swift striking power. Surging forth from the Wadi Sirhan to the Hauran, the initial impact of the Midianite invasion caused consternation in W Palestine, forcing the Israelites to seek refuge in the hill country, while the ruthless invaders, abetted by the Amalekites and the People of the East, penetrated as far as Gaza, pillaging both crops and cattle for a period of seven years (Judg. 6:1-6). These devastating raids were finally repulsed by Gideon, with the help of men of Ephraim who captured two of the Midianite princes, Oreb and Zeeb (Judg. 7:24-25). Gideon pursued a remnant of the fleeing nomads across the Jordan as far as their original habitat at Karkor in the Wadi Sirhan (8:10), where he captured the two kings of Midian, Zebah and Zalmunna, and dispersed their armies (vs. 12). The war with Midian in the days of Hadad king of Edom, who is said to have defeated Midian in the country of Moab (Gen. 36:35; I Chr. 1:46), should be reckoned as a part of this movement. In any event, the Midianites were thoroughly routed, never again to threaten the peace and stability of Palestine (Judg. 8:28). Gideon's decisive victory was to be long remembered both by the prophets and by the psalmist (Ps. 83:9, 11—H 83:10, 12; Isa. 9:4; 10:26; 60:6; Hab. 3:7).

7. Later history of Midian. Although the Bible records nothing further after the eleventh century B.C. about Midianite history, two of the descendants of Midian may appear in the Assyrian texts. In the Annals of Tiglath-pileser III (*ca.* 732) a tribe known as the Haiappu is mentioned as bearing tribute of gold, silver, camels, and all kinds of spices as a sign of submission to the Assyrian monarch. The Haiappu are identified with biblical EPHAH, the first-named son of Midian listed in Gen. 25:4, which has the same basic consonants. In the following Assyrian record the name Haiappu comes immediately after that of the Sabeans. In Isa. 60:6, where the "camels of Midian" are mentioned, both Ephah and Sheba appear in conjunction. The name Haiappu may survive at Ghuwafa, SW of Tebuk in NW Arabia. Finally, in a report of Sargon's campaign in 715 B.C., the Haiappu again appear.

***MIDRASH** mĭd'răsh [מדרש, *from root* to search, to investigate, *hence* to expound]. The name given to that exegesis of the Bible which emanated from the rabbinic schools in ancient Palestine. Its aim was to elucidate the meaning of the text of the Holy Writ, to penetrate into its inner significance, to deduce from it new laws and principles, and to establish by reference to it authentic religious and ethical doctrines. There are two types of midrash: HALACHAH, which deals with the legal parts of the Bible; and HAGGADAH (הגדה, "narration"), which deals with the nonlegal parts, and is hence homiletical. In the domain of Haggadah Midrash left its deep impress on the Bible itself. Thus we find passages in Chronicles which are midrashic glosses, supplementing in many details the narratives in the book of Kings. There is also a Midrash to the book of Kings mentioned in II Chr. 24:27, while reference to the Midrash of Iddo the prophet is made in 13:22. Midrash was also employed by Ezra in his public reading of the Law at the memorable convocation in the year 444 B.C., and by successive generations of teachers who followed him. *See* TALMUD.

This mass of accumulated midrashic material, with numerous adaptations and expansions, was arranged in separate collections which constitute the extensive midrashic literature, of varying age, provenance, and character, presented in the form of commentaries on different books of the Bible. The earliest of these collections are the Halachic Midrashim compiled *ca.* the middle of the second Christian century: the Mekilta of Exodus, the Sifra on Leviticus, and the Sifre on Numbers and Deuteronomy. Of the Haggadic Midrashim the earliest is the Midrash on Genesis, going back in its larger part to the third century. Of a later date are the Midrashim on the other books of the Pentateuch, and on the Song of Songs, Lamentations, Ecclesiastes, Ruth, and Esther, which together with the Midrash on Genesis make up the Midrash Rabbah, the most popular of midrashic works. Other Midrashim of a later date include the Yalkut Shimeoni, a kind of midrashic thesaurus on the whole of the OT (compiled probably in the first half of the

thirteenth century); the Pesiḳtha Rabbathi (probably compiled in the eighth century), containing special discourses for special sabbaths and festivals; and the ethical midrash Tanna debe Eliyyahu (probably compiled in the second half of the tenth century), the universal humanism of which is reflected in its utterance: "I call heaven and earth to witness that whether a person be a Jew or non-Jew, bondman or bondwoman, according to the deed he performs the Holy Spirit rests on him."

I. Epstein

MIDWIFE [מילדת, one who brings to birth, *from* ילד, to bear, bring forth]. A woman who assists the delivery of a child. The most extensive reference to women serving in this capacity is found in the first chapter of Exodus. Here two Hebrew midwives named Shiphrah and Puah serve the Hebrew women with the help of a Birthstool. They are ordered to destroy all the male infants that are born to Hebrew women. Because of their refusal to do this, they are rewarded by the God of Israel with families. There may be a suggestion here that barren women with no families acted as midwives.

Although not specifically named as midwives, on two occasions women who probably assisted at a birth are mentioned. When Ruth's child was born, women from the community were present to congratulate the grandmother and to name the child (Ruth 4:14, 17). They may well have helped deliver the infant. When the wife of Phinehas was about to give birth, she had pains suddenly and was on the point of death, when the women who were attending her consoled her by saying: "Fear not, for you have borne a son" (I Sam. 4:20). Helping with a delivery, they ascertained the sex of the child as quickly as possible.

O. J. Baab

MIGDAL-EL mĭg'dəl ĕl' [מגדל אל, fortress tower of El] (Josh. 19:38). A fortified town in the territory allotted to Naphtali. The site is unknown, but according to context, it must have been located in Upper Galilee, in the vicinity of Iron.

MIGDAL-GAD mĭg'dəl găd' [מגדל-גד, tower of Gad] (Josh. 15:37). A village of Judah in the Shephelah district of Lachish; probably to be identified with Khirbet el-Mejdeleh, five miles S of Beit Jibrin (Eleutheropolis), near ed-Dawa'imeh.

MIGDOL mĭg'dŏl [מגדול, מגדל *in* Jer. 46:14; LXX Μάγδωλον]. A town or city in Lower Egypt mentioned in the OT in three different contexts: (*a*) as a place on the route of the Exodus near Pi-hahiroth, Baal-zephon, and the sea; (*b*) by Jeremiah (44:1; 46:14) as a residence of the Jews in Egypt, along with Memphis and Tahpanhes; and (*c*) by Ezekiel (29:10; 30:6) as a place in N Egypt contrasted with Syene in the extreme S. It is not certain that these three places are to be identified with one another, but there is no direct evidence to the contrary. The name Migdol is Semitic and means "tower" or "fortress." The word appears in Egyptian as a borrowing, both as a common noun meaning "fortress" and as the proper name of various military stations on the NE frontier. A similarly named Egyptian city, *Ma-ag-da-lí*, is mentioned in Tell el-Amarna Letter 234:29, but the context does not specify its location.

The exact identification of the exodus sites in Egypt is difficult because neither the biblical narrative nor contemporary Egyptian sources provide sufficient information. The Migdol of the Exodus may be located with certainty in the E Delta. Papyrus Anastasi V.19 mentions a Migdol of Seti I in the vicinity of Tjeku, and if the identification of the latter place with Succoth (modern Tell el-Maskhutah) is accepted, the equation of this Migdol with that of the Exodus is possible. An alternative identification of Migdol in general is with the Magdolo of the Antonine Itinerary, roughly midway between Pelusium and Sele and equated tentatively with modern Tell el-Her. The latter location suits the Migdol of Jeremiah and Ezekiel better than that of the Exodus account, but the choice rests with the total picture of the route outlined in Exodus rather than with any single detail.

MIGHTY MEN [גבורים]. The designation accorded to proud, bold, and strong heroes. It is applied to legendary heroes of the dim, mythical past (Gen. 6:4) and also to heroic contemporaries (II Sam. 17:10). It refers to foreigners (Josh. 10:2) as well as to Israelites (II Sam. 17:8), but it is also a technical term for the mercenaries and warriors of David. This host of mercenaries included the Cherethites and the Pelethites (I Kings 1:38) and the Gittites (II Sam. 15:18), and were led by Joab (II Sam. 10:7) and Benaiah (I Kings 1:10). The heroic exploits of the "three mighty men" of David and those of "the thirty" were preserved in biblical records (II Sam. 23:8-39).

S. Szikszai

MIGHTY WORKS. *See* Signs and Wonders; Miracle.

MIGRON mĭg'rŏn [מגרון]. A town of Benjamin, at some distance from Gibeah, where Saul sat under a pomegranate tree to observe the movements of the invading Philistines (I Sam. 14:2). It is also mentioned in Isaiah's account of the march of the Assyrian army upon Jerusalem as the place where its baggage train halted (Isa. 10:28). In the first passage Migron is obviously S of the pass of Michmash, while in the latter it is located N of it. Albright, reconstructing the passage in Isaiah, has therefore proposed to transfer the positions of Michmash and Migron, so as to bring the latter next to Geba, which would agree with the passage in I Samuel; Geba would then be the lodging place of the Assyrian army after its first day's march, while the baggage train would be encamped at Migron. The site has not been identified.

MIJAMIN mĭj'ə mĭn [מִנְיָמִן, מִימִין, *contraction of* מִנְיָמִן, MINIAMIN; Apoc. Μεαμίμ, Μειαμείν, Μειμίν]; KJV MIAMIN mī'ə mĭn in Ezra 10:25; Neh. 12:5. A name that has been found in Neo-Babylonian and Persian business documents and is therefore probably not to be equated with בִּנְיָמִין (Benjamin), in spite of the fact that the Syr. of Ezra 10:25 reads the latter in place of Mijamin.

1. A priest of David's time (I Chr. 24:9), the supposed ancestor of a postexilic priestly family.

2. A layman, son of Parosh, who was among those required by Ezra to put away their foreign wives (Ezra 10:25).

3. A priest who "set his seal" to the covenant under Ezra (Neh. 10:7).

4. A priest who accompanied Zerubbabel in the return from the Exile (Neh. 12:5). J. M. WARD

MIKLOTH mĭk'lŏth [מִקְלוֹת]. **1.** One of the descendants of the Benjaminite Jeiel, who resided at Gibeon, and the father of Shimeah (I Chr. 8:32; cf. 9:37-38). In I Chr. 8:31 the words "and Mikloth" should doubtless be restored, in conformity with I Chr. 9:37.

2. The chief officer who served under Dodai, the officer in charge of the Davidic militia for the second month (I Chr. 27:4 RSV mg.). However, the text is undoubtedly corrupt, and the words "and his division and Mikloth the chief officer" are best omitted.

E. R. DALGLISH

MIKNEIAH mĭk nē'yə [מִקְנֵיָהוּ, Yahu acquires, *or* Yahu creates] (I Chr. 15:18, 21). A Levite of the second rank; one of the leaders with lyres appointed by David. The omission of his name from the similar list in I Chr. 16:5 may indicate that it is secondary here.

Bibliography. P. Humbert, "*Qana* en hébreu biblique," *Festschrift Alfred Bertholet* (1950), pp. 259-66.

R. W. CORNEY

MIKTAM mĭk'təm [מִכְתָּם, *see below*]; KJV MICHTAM. The heading of Pss. 16; 56–60; and probably of the hymn in Isa. 38:9. The etymology of the word is uncertain (LXX στηλογραφία). Luther (*Güldenes Kleinod*) combined it with כֶּתֶם, "gold"; Mowinckel (and others) with Akkadian *katâmu*, "to cover" (cf. *naktamu*, "covering"), "to expiate." "Miktam" would then be a "psalm of covering the sin, of expiation."

See also MUSIC.

Bibliography. S. Mowinckel, *Psalmenstudien*, IV (1922), 4-5.

J. HEMPEL

MILALAI mĭl'ə lī [מִלַּלַי] (Neh. 12:36). One of the musicians taking part in the dedication of Nehemiah's wall. The name is lacking in the Greek and may be an error due to dittography (cf. the following name, Gilalai).

MILCAH mĭl'kə [מִלְכָּה, queen; *cf.* Akkad. *malkatu*, princess, *a title of the Babylonian goddess Ishtar*]. **1.** A daughter of Haran, Abram's brother, who became the wife of Nahor, also Abram's brother (Gen. 11:29 J), and bore him eight sons (22:20-23 J). Through her son Bethuel she was the grandmother of Rebekah (24:15, 24, 47, J).

2. One of the five daughters of Zelophehad who through Moses received the family inheritance in W Manasseh after the death of their father (Num. 26: 33; 27:1; 36:11; Josh. 17:3). The names of the daughters seem originally to have been the names of Canaanite towns, but the location of Milcah is unknown. M. NEWMAN

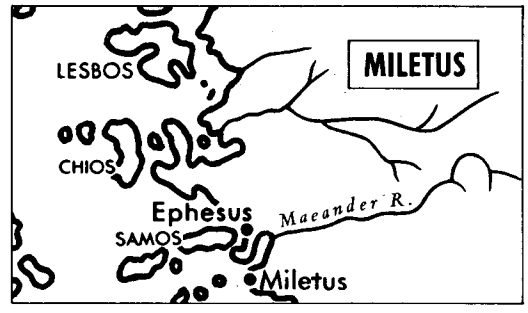
MILCOM mĭl'kəm [מִלְכוֹם]. Hebrew distortion of the name of the national god of Ammon. *See* MOLECH.

MILDEW [יֵרָקוֹן, yellow, pale]. It is uncertain if a plant blight is intended by this word. It is always associated with שִׁדָּפוֹן, "withering" of crops (RSV "blight"; KJV "blasting"; I Kings 8:37; Amos 4:9; cf. Gen. 41:6) as divine punishment, and apparently is connected with the blowing of hot, dry wind of sirocco (Deut. 28:22-24). *See* EAST WIND; PALESTINE, CLIMATE OF. R. B. Y. SCOTT

MILE [μίλιον] (Matt. 5:41). The Roman mile, which was a little shorter than the American mile. *See* WEIGHTS AND MEASURES § D4*e*.

***MILETUS** mī lē'təs [Μίλητος] (Acts 20:15,17; II Tim. 4:20). A prominent Greek harbor city on the W coast of Asia Minor.

Miletus, a city with a pre-Greek name, was presumably founded in prehistoric times to serve as a safe station for coastal shipping. It was located on a promontory projecting from the S shore of the Latmian Gulf, which served as the estuary of the Maeander River. Miletus had four harbors, a location sheltered but favorable to commerce, and enough local supplies to support a sizable population.



The geological situation in the Latmian Gulf was subject to constant change because of the accumulation of silt by the Maeander. Whereas anciently the gulf cut deep into the coast with the island of Lade sheltering the W side of Miletus, the modern coastline has been closed in front of an inland lake. The harbors are filled in, the course of the river has shifted, and the ruins of Miletus are now five miles from the coast. This change began to be detrimental to shipping in late Roman times; but in the days of Paul's visit the port was still active and prominent.

Miletus was first colonized by Cretans of the period of Minoan expansion, later to be taken over by Mycenean Greeks and made into a fortified outpost in the fourteenth century B.C. It may well be identical with Millawanda, referred to in Hittite texts

as a coastal town in W Anatolia. Although destroyed in disturbances *ca.* 1200 B.C., Miletus was perhaps never abandoned by the Greeks but reinforced by Ionian immigrants. It emerged as the leading center of Ionian naval enterprise in the seventh century B.C. Its ships carried colonists to the far shores of the Black Sea and Egypt, accumulating new resources for the prosperous mother city. Some rivalry with the Lydian kingdom arose, without affecting the sea power of Miletus. The city came to a favorable understanding with the Persians after 546 B.C.

The commercial expansion of early Miletus was matched by her artistic and intellectual importance. Famous philosophers (Thales, Anaximander, Anaximenes) were Milesians. The city was among the first to mint coins. Its best sculpture and architecture were produced for the oracle temple of Apollo at Didyma, some ten miles S of Miletus. The sacred road connecting town and sanctuary was partly lined with statues.

The Ionian revolt against the Persians put an end to this phase of prosperity. Miletus was involved in its beginning (499 B.C.) and fell a victim to its unfortunate ending in 494. The city was captured by the Persians, its inhabitants killed or deported as slaves, the temple in Didyma plundered and burned.

After the Persian defeat at Mykala (479 B.C.), Miletus was liberated and rebuilt along modern lines by the town-planner Hippodamus, a Milesian, who laid out the regular pattern preserved in the later city. Miletus joined the Delian League, fell to Persia after the intrigues against Athens at the end of the fifth century, and was for some time under control of such Carian dynasts as Maussollos (377-353).

Alexander captured Miletus in 334 B.C. The city became free again but had to cope with the interest in its naval base by various competing Hellenistic rulers. This period marks the revival of grandiose city architecture in Miletus, and several of the Hellenistic monarchs sponsored monumental building projects.

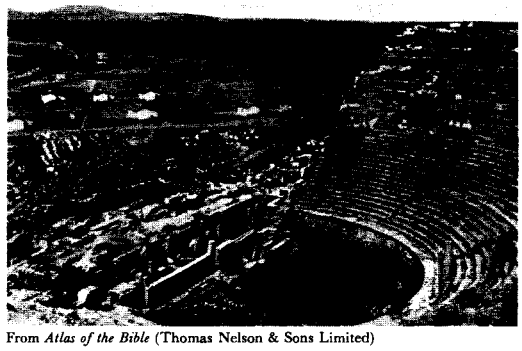
Courtesy of Ahmet Dönmez

46. The Roman remains of the ancient city of Miletus

The period of the Roman Empire meant increased prosperity and trade for Miletus. The emperors were benevolent recipients of honors and dedicators of buildings; and private citizens added their gifts. The late first and second centuries A.D. saw great architectural activities.* The threat of decline came from the silting-up of the harbor rather than from a lack of local enterprise. The size of the city shrank, and the Byzantine town was no more than a small citadel. Fig. MIL 46.

When Paul visited Miletus, it was the natural stopping place en route from Lesbos, Chios, Samos to the S, and near enough to Ephesus for the elders of the church to be called in for consultation (Acts 20:15-17). The message to Ephesus would have been sent across the gulf to Priene and from there by road to Ephesus.

The reference in II Tim. 4:20 seems to mention another visit to Miletus.



From *Atlas of the Bible* (Thomas Nelson & Sons Limited)

47. Miletus: the theater in the foreground and the harbor in the background

In the first century A.D., Miletus had not yet reached the climax of its architectural embellishment. Even in this period, however, the city was remarkable for the elaborate but regular layout of its public buildings. It had two market places built of colonnades combined at right angles, creating vast open spaces as well as magazines and shops. A council house stood between the two markets, not a simple covered theater but a building with a lavish exterior and colonnaded court. This complex was essentially Hellenistic, as was the large theater overlooking one of the harbors.* In Roman times such display pieces as the triple gateway to the S market were added. Fig. MIL 47.

At Didyma the temple of Apollo was being rebuilt during Hellenistic and Roman times. Never finished, it yet became one of the largest and most magnificent Ionic shrines, unique in design because of the peculiar nature of its oracle cult.

Miletus was excavated by a German expedition 1899-1914, again in 1938 and 1955.

M. J. MELLINK

MILK. Milk products were among the staples of the diet in biblical times (Ecclus. 39:26), but fresh milk was not commonly drunk.* Rather, it was made into CHEESE and CURDS; thus "in that day" there will be a sufficiency of curds because of the abundance of milk (Isa. 7:22; cf. Prov. 30:33). Goat's milk (Prov. 27:27) was the most widely used; however, we also read of "milk from the flock" (Deut. 32:14; I Cor. 9:7) and human milk (Isa. 28:9). Milk was kept in skins (Judg. 4:19) and offered to a guest (Gen. 18:8; Judg. 5:25). Figs. COW 51; MIL 48-49.

The most common use of the term "milk" is figurative: (*a*) for abundance (Deut. 32:14), including that of the eschatological age (Isa. 55:1; Joel 3:18—

Courtesy of James B. Pritchard

48. Cylinder seal showing a man milking a goat from behind; from Early Dynastic III (*ca.* 2700 B.C.)

49. Mesopotamian cattle scenes from a First Dynasty temple at al-'Ubaid (*ca.* 2700 B.C.)

H 4:18); (*b*) for whiteness of teeth (Gen. 49:12) or skin (Lam. 4:7); (*c*) for Israel's vindication (Isa. 60:16; she will drink the milk of the nations); (*d*) for the excellencies of a loved one (Song of S. 4:11; 5:12); (*e*) for the rudiments of teaching (I Cor. 3:2; Heb. 5:12-13); and (*f*) for unfalsified Christian doctrine (I Pet. 2:2).

The common phrase "a land flowing with milk and honey" (Exod. 3:8; Num. 13:27; Deut. 6:3; Jer. 11:5; Ecclus. 46:8; Bar. 1:20; etc., descriptive of Canaan; Num. 16:13, of Goshen) may have a mythological origin, but more probably it refers to the fertility of the land as seen from the viewpoint of those wandering in the wilderness. The prohibition against boiling a kid in its mother's milk (Exod. 23:19; 34:26; Deut. 14:21) is most probably directed against Canaanite sacrificial practices; a reference to such a custom is found in Text 52:14 from Ras Shamra. *See* UGARIT.

MILL, MILLSTONE. A machine consisting of two stones used for grinding grain into flour. רחים, a dual form, is the more common, generic term for the hand mill, which is of two types. One consists of one stone more or less rectangular in shape and usually slightly concave, with one end a little thicker than the other. A good example found at Megiddo measured *ca.* thirty inches in length. The archaeologist refers to this stone as a saddle quern. The upper or grinding stone is flat on one side and elliptical on the other and is much smaller, usually the length being about equal to the width of the lower stone and the width of it just enough to be easily grasped by the hands. The grinding was done by pushing the upper, smaller stone back and forth on the larger stone, upon which the grain was placed. Probably not much grain could be ground at one time in such a mill as this, but this mill was the only one in use down to Hellenistic times. Fig. MIL 50.

The second type of hand mill consists of two round stones. The lower stone is convex on the top, while the upper stone is concave so as to fit snugly over the lower stone. Some examples of this type have a hole in the center of the top stone, through which the grain was poured. This type of mill became common in the Hellenistic period and onward, and variations of it are frequently seen today. The stones of both types of hand mills were commonly of black basalt, which is hard and porous, thus providing a constantly rough surface of many cutting edges.

Both these types of mills were used in the home and were operated by the women of the household; this was their daily chore, for which they arose early in the morning. In a household where there were maidservants or slaves, the task of grinding would undoubtedly fall to them (Exod. 11:5; Isa. 47:2).

50. Statuette of a woman grinding grain with a millstone, from Gizeh; Fifth Dynasty, Old Kingdom (*ca.* 2500-2350 B.C.)

Likewise captives often found themselves burdened with the task of operating the mill (Judg. 16:21; Jer. 52:11 LXX).

פלח רכב is the term used for the upper millstone (Judg. 9:53; II Sam. 11:21), while פלח תחתם is used for the lower millstone (Job 41:24—H 41:16).

Large community mills in which a heavy stone shaped like a wheel was rolled around on a large, heavy, round lower stone by an animal also existed in ancient times. מחון may be the term used for this type of mill (Lam. 5:13). The large animal- or water-operated mill is today called in Arabic *ṭaḥûbun*. In Greek this type of mill is known by the term μύλος ὀνικός (Matt. 18:6; Mark 9:42).

Since the hand mill was absolutely necessary, the law prohibited the taking of either the mill as a whole or the upper millstone in pledge for a debt, since this would deprive the family of the equipment necessary

for making flour, out of which bread, the basic item in the daily diet, was made.

The upper millstone was an effective weapon, as in the case of the death of Abimelech (Judg. 9:53). No doubt, the sound of the grinding in the early morning was a very familiar one in the cities and villages of Palestine. When it was no longer heard, this was a sign of complete desolation (Jer. 25:10; Rev. 18:22).

H. N. RICHARDSON

MILLENNIUM [Lat. *mille,* thousand, *plus annus,* year]. Strictly speaking, the thousand-year reign of Jesus Christ with certain resurrected martyrs, and with them alone, which is to occur following his second advent as an interregnum between this present, evil, temporal age under Satan and the future, righteous eternal age under God, as described all too briefly in Rev. 20:4-6. This passage, brief though it is, has had a great deal of influence upon Christian thinking. Furthermore, it has been misinterpreted as a rule, for few have taken it literally in its historic context. First of all, coming out of the persecution by the Romans, the passage limits the enjoyment of the millennium to a special group, those who had died as martyrs because they had refused to worship the Roman emperor-gods (the beast), and to them alone. They, and no one else, are restored to life in the first resurrection for this reward. Secondly, the author was convinced that the millennium would be established very soon after his prediction, 3½ years, in all probability. Consequently, if the prediction had been fulfilled, the millennium would have begun *ca.* A.D. 100 and would have ended *ca.* 1100. Failure to take the author literally has caused the millennium to be a subject for almost endless speculation.

1. Jewish sources. The messianic interval as presented in Revelation is apparently traceable to earlier Jewish thinking in which the prophetic ideal of a messianic kingdom was combined with the apocalyptic hope. Certainly, a messianic interim is not an essential element of apocalypticism; as evidence for this, there is no messianic reign in such typical apocalypses as Isa. 24–27; Daniel; the Assumption of Moses; and the Apocalypse of Abraham. In fact, there is no mention of a messiah in the first three.

An interim period without a messiah is presented in the source of I Enoch 91:12-17; 93, known as the Apocalypse of Weeks. Past history is divided into seven uneven "weeks" of time, beginning with the birth of Enoch and ending with the degenerate time of the author of this apocalyptic fragment, possibly before the Maccabean period. These seven weeks will be followed by three more: the eighth a period of righteousness, the ninth a time in which the world will be marked for destruction, and the tenth a week in which the angels will be judged. This will all be followed by an eternity of weeks in a new heaven. There is no messiah in this scheme, hence no messianic interim; however, the inclusion of a messiah within this pattern could be made rather readily.

A somewhat similar eschatological chronology, and likewise without a messiah, is provided in II Enoch 32:3-33:1. This present world age is to consist of seven days of a thousand years each. The seventh, a millennial day of rest, will be followed by an eternal eighth day. The seventh day is not a messianic reign, for no messiah is mentioned. However, it would be easy to adapt this scheme to the messianic millennium, as was done in early Christian sources.

In II Bar. 39-40 a messianic kingdom, which is to follow the destruction of four world kingdoms (the last one is Rome), is to endure until this world of corruption is ended. However, this may not be a good parallel, since the passage in which it is found is not unquestionably apocalyptic.

The closest parallel in a Jewish work no later in date than Revelation is in II Esd. 5:2-7:4. First, this evil and degenerate age is to be brought to an end by God himself. Next, the messiah, who apparently had no other function, will appear and reign for four hundred years with those who have gone to heaven without tasting death (Enoch, Elijah, possibly others as well) and with the righteous on earth who have survived the woes of the last times. After the four-hundred-year interim of rejoicing, the messiah, his work finished, will die, together with all who have human breath. This will be followed by a general resurrection and judgment, and the new age under God. That this pattern of belief was current in later Judaism, at least, is noted by Hippolytus (first half of the third century), who states that the Jews believe that following a battle with the nations a warrior-messiah will gather the Jews into Jerusalem and reign over them. Another war, in which the messiah will be killed, will ensue, to be followed by the termination of this universe, the establishment of a new age, a general resurrection, and a judgment, with recompense to all according to their deeds. Also, certain Christian opponents of millennialism stigmatized it as Jewish.

The closest Jewish parallel to the eschatology of Revelation is in the Neo-Hebraic Apocalypse of Elijah, written *ca.* 261 but based on earlier sources. An antimessiah, it predicts, is to wage a series of devastating wars, but in time the messiah will appear with angels of destruction to destroy the nations. With this present evil age ended, the messiah will rule in Jerusalem with the righteous Jews for forty years, which will be a period of great plenty. At its close God (*sic*) will raise Gog and Magog against the holy city, but they and their armies will be destroyed. A resurrection and judgment follow; the wicked will be sent to a fiery pit, but the righteous will dwell in the new age with God in a new Garden of Eden and in a heavenly Jerusalem come down to earth.

This work is thoroughly Jewish throughout, showing no dependence upon Revelation despite close similarities. Quite likely the authors of both (as well as Lactantius in his *Divine Institutes* VII) have followed a common apocalyptic tradition. The basic pattern is the same; the differences (such as the forty-year duration of the kingdom) are minor.

2. Christian sources. Turning to the Christian sources, strangely enough we can find no allusion, even, in the NT to a messianic interregnum outside of Revelation, except in I Cor. 15:23-28 (cf. Col. 1:

13), not even in adventist passages like Mark 13 (and parallels); I Thess. 4:13-18; II Thess. 2:1-12: II Pet. 3:1-12. Paul in the Corinthians reference states briefly that with Christ's second coming there will be a resurrection, and that he will rule until all the cosmic enemies, including death, are abolished. Then he will turn all things over to God (cf. Col. 1: 13: "the kingdom of his beloved Son"). The Ascension of Isaiah in its present form is a Christian work from about the time of Revelation. In 4.1-18 it is promised that Christ in his return from heaven with his angelic armies will defeat the antichrist Beliar and will drag him and his armies to Gehenna. Then he will give rest or refreshment (for an unspecified period of time) to the still living godly, who have execrated Beliar, along with the saints in heaven who will descend. After this messianic interim all will leave their bodies and ascend to heaven.

Bar. 15 (first part of the second century) is more specific concerning the time. As in II Enoch, there are seven days of a thousand years each. Everything will be completed in six days; then the Son will return, destroying the time of the wicked one and judging the godless. After changing the sun, moon, and stars, he will rest on the seventh day. This implies a messianic interim reign of a thousand years.

The millennial hope became quite popular in the next few centuries, with the term "chiliasm" used to denote a belief in a materialistic concept of the millennium with sensuous delights and pleasures. Among the second-century believers in the millennial reign, some more chiliastic than others, were Cerinthus, Papias, Justin Martyr, Irenaeus, Tertullian, and Montanus, with Hippolytus and Lactantius in the following century.

Justin Martyr said that many Christians accepted the doctrine, which he supported by OT prophecy and Rev. 20:4-5 (written by John the apostle). However, he frankly admitted that many pious Christians rejected it. Cerinthus is said to have depicted the future kingdom of Christ as providing sensual pleasures: eating, drinking, and marriage festivities. Papias ascribed to Jesus a prophecy of a marvelously productive earth, in terms similar to a messianic promise in II Bar. 29 (Iren. Her. V.33).

Lactantius is even more detailed. The heavenly bodies will give more light during the interim reign of Christ; the earth will produce food of its own accord; the mountains will drip with honey; there will be streams of wine and milk; all animals and birds will live in peace (*Divine Institutes* VII.24).

As Justin remarked, there were many Christians who rejected millennialism; their rejection was in some measure due to crass materialistic expectations of other Christians; some, for no evident reason, ignored the doctrine. E.g., the Didache, an early Christian manual, concludes with an apocalyptic passage predicting the reign of the antichrist and the second coming of the Lord on the clouds, but without any mention of the messianic reign.

Origen allegorized the millennium: Christ will not establish a physical kingdom; instead, he has a spiritual one in which he instructs all those capable of receiving him, reigning in them until he has subjected them to the Father (*On First Things* II.1; III.6). The Eastern church tended, in fact, to reject Revelation, along with a materialistic millennial hope.

Augustine also allegorized Revelation. There is to be no actual second advent of Christ before the final judgment, for his coming occurs continually in the church and its members. The first resurrection is figurative, symbolizing the change in the status of people as they die to sin and rise to a new life. The thousand-year reign of Christ on earth actually began with Jesus himself, for it is the Christian church wherein the saints reign (*City of God* XX.6-7).

The millennial hope, however, never died out in the Western church; indeed, from time to time it became quite prominent in one form or another. It was emphasized in the Reformation period by reformers and by some Anabaptists. The scholarly Bengel in his commentary in 1740 fixed the beginning of the millennium at 1836. Irvingites, Mormons, Millerites (Seventh Day Adventists), and Russellites (Jehovah's Witnesses) are among the more modern popular movements that stress, not only adventism, but some form of millennialism as well. Not only is it a basic tenet of a number of the more fundamentalistic denominations and sects, but it is also accepted in one way or another by an untold number of members of other denominations as well. Some Christians are premillennialists, believing that Christ will come before the millennium; others are postmillennialists, placing the Advent after the interim; still others, like Origen and Augustine, allegorize or spiritualize the concept. Consequently, understanding of its original meaning for the author of Revelation, the probable background for his views, and the early history of the doctrine are of great importance. *See also* APOCALYPTICISM.

M. RIST

MILLET [דחן, *dōḥan;* Akkad. *duḫnu;* Arab. *dukhn;* κέγχρος]. The smallest of grass seeds cultivated for food. A poor quality of bread is made from its flour, though it is more commonly mixed with other grains. דחן is included with other grains mixed together to make a symbolic bread for Ezekiel's dramatization of the siege of Jerusalem (Ezek. 4:9). The Syr. of Ezek. 27:17 uses "millet" for the puzzling PANNAG, but *see* FIG. The Douay Version, following the LXX and the Vulg., mistakenly uses "millet" for *nismān* in Isa. 28:25 (RSV "proper place").

Post and Löw favor the identification of *dōḥan* with sorghum (*Sorghum vulgare* Pers.), the *durra* of the Arabs, but most others prefer the equally common *Panicum miliacum* L., millet. The Hebrew may refer to several similar seeds.

See also GRAIN; FLORA § A1*d*.

J. C. TREVER

MILLO mĭl'ō [מלוא, *from* מלא, to fill; *cf.* Assyrian *mulû,* terrasse]. **1.** The name of an element of fortification of the city of David (*see* DAVID, CITY OF). It is mentioned in connection with the constructions which David undertook after the conquest of Jeru-

salem (II Sam. 5:9; I Chr. 11:8). The construction of the Millo is formally attributed to Solomon in I Kings 9:15, 24; 11:27. It is referred to as the "house of Millo" (בית מלא) in the account of the death of Joash (II Kings 12:20—H 12:21). The location of the Millo to the NW of the city of David, while plausible, remains unproved. The etymology suggests a structure built on an artificial platform of stamped earth. *See* JERUSALEM § 5*b*.

Bibliography. H. Vincent, *Jérusalem Antique* (1912), pp. 171-82; J. Simons, *Jerusalem in the OT* (1952), pp. 131-37.

2. The proper name of a quarter in the city of SHECHEM (Judg. 9:6, 20), in the expression בית מלוא, "Beth-millo" (RSV), "house of Millo" (KJV).

G. A. BARROIS

MILLSTONE. One of two stones which together made up the hand mill used in the home for grinding grain into flour. *See* MILL.

MINCING [טפף, to go like a little child (טף) —*i.e.*, to trip along]. An affectedly nice or elegant manner of walking, acting, or speaking. The word is used in Isa. 3:16 of the haughty daughters of Zion. Perhaps the phrase in which it is used should be read "tripping along as they go."

H. G. MAY

MIND. A word used in the English Bible to translate a considerable number of Hebrew and Greek words of various meanings, none of which has precisely the same connotations as the English word, although all of them certainly include the idea of the human capacity for rational thinking. The translator's chief difficulty is that the Bible is the product of the Hebraic mind, which had no real interest in psychological analysis and no conception of the division of the human personality into separate organs or faculties, each governing some particular phase of man's psychic activity. Feeling, thinking, planning, and willing were all conceived to be functions of the entire personality, so that the conception of "the mind" as the special seat or organ of reflective thinking as distinguished, e.g., from the heart as the seat of the emotions would have been, for the Hebrews, almost unintelligible.

While the vocabulary of the NT, at first glance, seems more precise than that of the OT, and includes a number of words which had already acquired a technical psychological sense in the works of the Greek philosophers and, in some instances, an equally technical but different sense in pagan religious thinkers of mystical tendencies, it seems clear that these words are used quite loosely by the NT writers, who were under the influence of LXX usage and whose thinking was largely set in Hebraic categories, so that the meaning of the words must be determined rather by context than by history or etymology.

One word commonly translated "mind" in the English OT is לב or לבב, properly HEART, which does not refer, as in English usage, to the center of man's emotional life, but rather to the inmost center of his entire personality, the hidden part of his being, in which take place all those activities—affective, volitional, and intellectual—which finally determine the direction of his external acts. The word is translated "mind" in passages where the emphasis seems to be especially on the heart as the seat of recollection (Isa. 65:17; Jer. 3:16) or purpose (Num. 16:28 KJV; Jer. 19:5). The translators of the LXX appear already to have caught this nuance of the word, since in a number of places they have preferred to translate לב or לבב by νοῦς ("mind") rather than by the more usual καρδία, although their practice in this respect follows no obvious pattern of logic or consistency. Since the words נפש ("soul") and רוח ("spirit") can similarly be used to designate the deepest part of man, though in a dynamic rather than merely local sense, they also are occasionally translated "mind" in the English versions, as in Gen. 23:8 KJV; I Sam. 2:35; II Kings 9:15 (נפש); and in Gen. 26:35 KJV; Ezek. 11:5 (רוח). In one familiar passage, Isa. 26:3, the underlying Hebrew word is יצר, more commonly translated IMAGINATION. In all these passages where the English word "mind" appears and the idea of thinking obviously occupies an important place, it is primarily thinking related to action, either recalled from the past or planned for the future. The idea of pure, disinterested thinking for its own sake is alien to the Hebrew mentality.

The Greek word νοῦς, which in the NT occurs almost exclusively in the writings of Paul and in the Pastoral letters (the only exceptions being Luke 24:45; Rev. 13:18; 17:9), is the exact equivalent of "mind" in Greek philosophical usage, but is used by Paul in a less technical sense which is closer to that of ancient popular Greek. Plato's view of the human person as divided into three parts, of which the νοῦς is the highest, e.g., is largely irrelevant for understanding the Pauline use of the term.

For Paul the "mind" is the thinking, reasoning, reflective, and purposing aspect of man's consciousness. It is a purely human element, part of man's nature as such, which makes it possible for him to comprehend the revelation of God and to act accordingly. It is, therefore, *potentially* a designation for his higher nature as opposed to the FLESH; which is frequently a name for the lower nature; but it is also capable of being corrupted (Rom. 1:28; Col. 2:18; I Tim. 6:5) and so diverted from its true end (Rom. 1:28). Fortunately it is also capable of recovery and renewal (Rom. 12:2). Although the mind in Pauline thought is the means whereby men apprehend God's truth, it is never confused with SPIRIT in the theological sense, the divinely infused instrument or agent by which man is brought into direct relationship to God. Indeed, in I Cor. 14:15 "the mind" is set in sharp, and not at all unfavorable, contrast to "the spirit." The only passage in which the two concepts might possibly seem to be confused is I Cor. 2:16 ("We have the mind of Christ"), where the context shows that "mind" means "spirit"; but Paul's unusual usage here is entirely determined by his quotation from the LXX (Isa. 40:13) in which the Greek translators, contrary to their normal rule, inexplicably rendered the Hebrew רוח by νοῦς. According to Bultmann's elaborate and subtle analysis, "the mind" in Pauline thought means the whole of the self conceived as the subject of its thinking, feeling, and judging, whereas the BODY is the same self regarded as the object of these activities. It is true, in any

event, that for Paul, as for the rest of the Bible, "mind" in some sense includes the whole man and can, in fact, often be taken as practically equivalent to "character" (Rom. 1:28; 11:34; II Tim. 3:8).

Three other words, etymologically related to νοῦς, are also sometimes translated "mind." Διάνοια, which often has in classical Greek the sense of "thinking" or "reflecting" and is, therefore, more specifically an intellectual concept than νοῦς, is the word which underlies the familiar "You shall love the Lord your God . . . with all your mind" in Matt. 22:37 and its parallels. Twice the word νόημα, which properly means "thought," is rendered "mind" by metonymy (II Cor. 3:14; 4:4). The KJV, in the same way, uses "mind" as a translation of ἔννοια in I Pet. 4:1, although the RSV more accurately translates "thought." The English versions also use "mind" to translate φρόνημα (in Rom. 8:7, 27) and, rarely, ψυχή ("soul"; Acts 14:2; 15:24; Phil. 1:27; Heb. 12:3 KJV); πνεῦμα ("spirit") in occasional idiomatic use (II Cor. 2:13; 7:13); καρδία ("heart"; Rom. 1:21); and νεφρὸς (KIDNEY; Rev. 2:23). In addition to those passages where "mind" translates an original noun, there are several where it is used to render a verb or verb phrase. Most notable of these is Phil. 2:5: "Let this mind be in you which was also" (KJV), where the Greek τοῦτο φρονεῖτε ἐν ὑμῖν ὃ καὶ can hardly be translated literally into grammatical English. The verb in this passage, φρονέω, is ordinarily translated by some such phrase as "to set the mind on" (Rom. 8:5) or "be minded" (Phil. 3:15). In similar fashion σωφρονέω, which in Tit. 2:6 is translated "control oneself," appears in Mark 5:15; Luke 8:35 as "to be in one's right mind."

MINEANS mĭ nē′ənz. A Semitic people of S Arabia; possibly to be identified with the MEUNIM. The Minean kingdom, known as Ma'in, was centered in the Jof, a region in the NE corner of modern Yemen, approximately fifty miles NW of Marib. In antiquity, intensive cultivation of the soil and control of the major caravan route (*see* SABEANS) supported a number of cities in this area. The ancient capital of Ma'in was Qarnaw, modern Ma'in.

Recent discoveries have discredited the old "high" chronology which placed the Mineans in the second millennium B.C. (*see also* SABEANS), and have shown that Ma'in was founded by the kings of Hadhramaut (*see* HAZARMAVETH) *ca.* 400 B.C. Ma'in expanded rapidly, and by the second century B.C. its territory reached far to the N to include DEDAN. During this period it overshadowed its neighbor Saba. *Ca.* the middle of the first century B.C., Ma'in lost its independence through conquest by Qataban. There have been no archaeological excavations in this area.

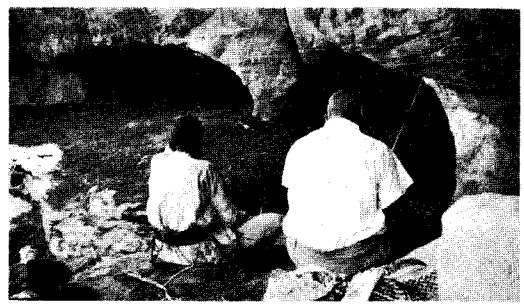
MINING. The absence of any special word for "mine" or "mining" in biblical Hebrew indicates that mining was not an occupation with which the Hebrews were very familiar. In Job 28:1 the word מוצא, "mine" (KJV "vein"), occurs as a designation of the place from which silver may be obtained, but the word means simply "source." In the Siloam Inscription (*see* SILOAM) the word used for tunneling operations is נקבה (used in the OT of "boring" a hole; cf. II Kings 12:9, etc.), miners are called חצבם (the root of which is used in the OT for "hewing out" cisterns; cf. Deut. 6:11; Jer. 2:13), and a miner's pick is called a גרזן. However, the author of Job is familiar with mining operations to the extent that he knows that they are carried on in out-of-the-way places: "They open shafts in a valley away from where men live" (28:4). They "search out . . . the ore in gloom and deep darkness" (vs. 3).

1. Copper mines. Copper ore, principally malachite, occurs on both sides of the Wadi Arabah (*see* ARABAH), and especially in the tributary wadis entering it from the E. Some veins in the sandstone are quite rich, containing up to forty per cent of metal.



Courtesy of Nelson Glueck

51. The entrance to Umm el-'Amad, looking N

The deposits seem to be connected geologically with similar deposits in the Peninsula of Sinai. The Sinai mines were among the main sources from which Egypt obtained her supply of copper in early times and were worked intermittently from predynastic times down to the Twentieth Dynasty. The exploitation of the deposits in the Arabah began later, since the earliest sedentary occupation in the Arabah, at PUNON, dates only from *ca.* 2200-1800 B.C. Doubtless it was the interest shown by the Egyptians in the Sinai deposits which awakened the interest of the inhabitants of Mount Seir in the copper deposits along their own W border. The mine which was worked by the inhabitants of Punon seems to have been the one now called Umm el-'Amad, located *ca.* 5½ miles to the SE. The mine owes its name, meaning "Mother of Pillars," to the rock pillars left

by the ancient miners to support the roof. Fig. MIN 51.

During the Iron I-II Age (1200-600 B.C.) there was an intensive exploitation of the copper deposits of the Arabah, as is attested by the remains of mining and smelting camps, littered with Iron I-II sherds. It is highly likely that this exploitation was carried on, in the first instance, by the Kenites, who, according to Num. 24:21, had their center at Sela (modern Sil'?), not far from the copper mines. (For the tradition which associates the beginnings of metallurgy with Tubal-cain, *see* METALLURGY.) It was doubtless from the Kenites that the Hebrews learned the arts of mining and smelting. The establishment of a Hebrew monarchy led to rivalry with the Edomite kings for the control of the mineral resources of the Arabah; and this, together with the desire to secure access to the Gulf of Aqabah, was probably the chief cause of the wars between Judah and Edom from the time of David to that of Jehoshaphat, and from Amaziah to Ahaz. See EDOM.

The most important mining center in the N part of the Arabah was at Khirbet en-Nahas ("Copper Ruin"), approximately 16½ miles S of the Dead Sea and near the extensive ore deposits of the wadis Gheweibeh and Jariyeh. Its identification with Irnahash ("Copper City") of I Chr. 4:12 has been suggested. In the S Arabah the largest mining center was at Mene'iyyeh, which lies on the W side of the Arabah, *ca.* 22 miles from the head of the Gulf. Glueck reports the presence here of huge deposits of copper ore. The intense summer heat in the Arabah, combined with the scarcity of water (except at Feinan), makes it highly likely that the mining operations were carried on only during the rainy season. That slave labor was employed is suggested by the presence of large, walled enclosures at the two main camps mentioned above. These enclosures must date from the period of the Hebrew monarchy, for it is very improbable that the Kenites possessed sufficient political power to employ slaves on the scale suggested by the size of the enclosures.

2. Iron mines. The presence of a certain amount of iron slag at the mining and smelting camps along the Arabah is evidence that iron ore, as well as copper, was discovered and mined there during the Iron Age. The exact site of the iron mines is, however, uncertain. A considerable deposit of iron ore is known to exist in the Wadi es-Sabrah, *ca.* 4⅓ miles SE of Petra, but it does not seem to have been worked until the Nabatean period.

Smelting furnaces discovered near 'Ajlun in N Transjordan (Gilead) are believed to be of medieval date, but the iron mine not far away at Magharat Warda, between the Nahr Zerqa (Jabbok) and the Wadi Rajib, may have been worked in ancient times. The tradition (Deut. 3:11) that Og, king of Bashan, possessed a "bed" (ערש) of iron points to the working of this mine, or some other in N Transjordan, as early as the time of Moses, or earlier. (Among the Transjordanians the word ערש may well have had the meaning "throne," as does Arabic *'arš*, in which case we are reminded of the iron throne which was presented to one of the pre-Hittite kings of Asia Minor, Anittas [*cf.* the work of O. R. Gurney in the *bibliography; see* BEDSTEAD].) By the time Deut. 3:11 was composed, Og's ערש was identified with some megalithic monument at Rabbah (modern er-Rabbah) in S Transjordan. The fact that a Gileadite of the time of David bore the name BARZILLAI ("Iron-Man") also suggests an early connection of Gilead with ironworking. The assertion of the author of Deuteronomy (put into the mouth of Moses) that the Promised Land was one "whose stones are iron, and out of whose hills you can dig copper" (8:9), points to a belief that the working of iron, as well as of copper, went back to the Mosaic period.

MINISTER IN THE OT. "Minister" translates משרת, the *Pi'el* participle of שרת, "to minister, serve," a verb that is used to describe service that is not menial. For menial service the root עבד, "to work, serve," is used; though this word is also used of service in worship which is not menial. In the LXX the verb שרת appears almost exclusively as λειτουργεῖν. Other words are the verb λατρέυειν (Num. 16:9; Ezek. 20:32, of priestly function) and the noun θεράπων (lit., "devoted caretaker"), which is used of Joshua in Exod. 33:11. The Aramaic verb פלח, "pay reverence to, serve God," occurs in Dan. 3:12, 14, 17-18, etc., in participial form and in Ezra 7:24 of the servants of the house of God.

Joshua is Moses' minister and deputy and as such serves Moses as his personal attendant and as his deputy in religious duty (cf. Exod. 24:13; 33:11 [E]; Num. 11:28 [J]; Josh. 1:1 [D]), just as Elisha personally attended Elijah (I Kings 19:21). Solomon's domestic attendants were among the features of his court that so astonished the Queen of Sheba (cf. I Kings 10:5, 11; II Chr. 9:4). The verb is also used of higher domestic service, as in the case of Joseph (Gen. 39:4; 40:4); of Elisha's chief servant (II Kings 4:43); and of royal domestics (Esth. 2:2; 6:3; cf. Abishag in I Kings 1:4, 15). These examples show the personal and intimate character of the service. In Ps. 103:21 the hosts of the Lord—i.e., the heavenly company of the angels, God's personal attendants—are named his ministers, and in 104:4 flames of fire are also his ministers (but see the Commentaries for this verse). Isa. 61:6 shows an interesting parallelism between "priests" and "ministers," but both terms are used of Israelites in general in the messianic age. There is an approach in this prophecy, which has been identified by some scholars as a fifth Servant Song, to the idea of the universal priesthood and ministry—i.e., to the ministry of each of God's children, as distinct from the ministry of all believers in a corporate body. As such they will share in the riches and favors of the Gentiles (cf. 56:6; 60:10).

This prophetic parallelism of "priest" and "minister" is grounded in the fact that "minister" often occurs of specifically religious duties and in connection with the priests. Thus Jer. 33:21 (and cf. the strange phrase in the Hebrew of 33:22) identifies the Levites, the priests, as "my ministers." Ezekiel, too,

permits Levites to be ministers in Yahweh's sanctuary (44:11; 45:5), but the real ministers are the priests, the ministers of the sanctuary, who come near to minister to Yahweh—i.e., the Zadokite priests (44:11). In Joel priests are described as the ministers of the altar, and ministers of God, and as such they weep and make intercession between the porch and the altar (Joel 1:9, 13; 2:17). Similarly the verb is used (*a*) of religious duties in the sanctuary (cf. Exod. 28:43); (*b*) of Levites with various accusatives, including Aaronic priests (Num. 3:6; 8:26), the Lord (I Chr. 15:2; II Chr. 29:11), etc.; (*c*) of Zadokite priests in Ezekiel (42:14, etc.); (*d*) of Aaronic priests (Exod. 28:35, etc. [P]). Ezekiel also uses the verb once (20:32) of the idolatrous worship of wood and stone.

A comparison of the participle and the ordinary verb in their general and cultic usages shows that the ministry described is both personal and devoted. The emphasis on personal attendance in the general usage of the word must be carried over to the understanding of the close personal attendance of the priests on Yahweh. Similarly the emphasis on religious devotion in the priestly usage of the word must figure in the understanding of the devoted ministry of attendants in the general sense.

G. HENTON DAVIES

MINISTRY, CHRISTIAN. Few subjects in the history of the church have received such disputed interpretations as the origin and development of the ministry. The differences of interpreters stem in part from the meager, and apparently contradictory, notices on the subject in the NT and early patristic sources. To a greater degree, however, they are the result of conflicting theological views respecting the nature of the church, and the necessity or expediency of certain forms of ministry for the essential constitution of the church, both in its inner organic unity and in its outer historic structure. Involved in these disputes have been questions concerning the several sources of ministerial authority, the manner of selection and ordination of ministers, and the transmission of ministerial authority to succeeding generations of the church's ongoing life and mission.

These issues are not entirely modern in origin. Many are reflected in the apostolic and postapostolic writings. E.g., Paul was often engaged in defense of his own apostolic commission and authority. At an early date the primitive church found itself faced with the necessity of providing criteria for judging between true and false prophets and teachers. The letters of Clement and Ignatius reveal serious divisions among the Christians of the postapostolic generation regarding the position and prerogatives of the episcopate.

Bibliography

1. Jesus and the ministry. Any consideration of the origin of the Christian ministry must of necessity begin with the intention and action of Jesus, since all ministries of the Christian churches claim to be ministries of Christ. Two characteristics of Jesus' teaching about ministry are noteworthy, with regard both to himself and to his disciples. One is represented by the word "to send" (ἀποστέλλειν), the other by the word "to serve" (διακονεῖν). In many passages of the gospels, Jesus describes himself as "sent" upon his mission by the Father (Matt. 15:24; Mark 9:37; Luke 9:48; John 3:17; 5:36; 6:29, 57; 7:29; 8:42; 11:42; 17:3, 8, 18, 21, 23, 25; 20:21). The same theme occurs in several of the parables, notably that of the wicked husbandmen (Mark 12:1 ff and parallels).

Similarly, in turn, Jesus "sent" forth the Twelve (Matt. 10:5, 10; Mark 3:14; 6:7; Luke 9:2; John 4:38) and the Seventy (Luke 10:1), with the pronouncement that whoever received them also received him who "sent" them (Matt. 10:40), in the same manner that those who received Christ received the Father who "sent" him (Mark 9:37; cf. Luke 10:16; John 17:8, 25). Underlying all these sayings is the meaning that those who are thus sent are especially chosen by the divine will for their mission, and they bear the authority of him who sent them forth.

Jesus also emphasized the quality of "serving" as a fundamental characteristic of such a ministry. Again, he pointed to himself as the model and example. "I am among you as one who serves" (Luke 22:27; cf. John 13:13-15). Greatness in the ministry is accounted, not in outward rank, but in proportion to service (Matt. 20:25-28; Mark 10:42-45; Luke 22:24-27). And only for service is there promise of great reward. "If any one serves me, he must follow me; and where I am, there shall my servant be also; if any one serves me, the Father will honor him" (John 12:26).

A more difficult problem concerns the question whether Jesus' outlook was purely eschatological, in his expectation of the imminent coming of the kingdom of God as the climax of his own mission, or whether he foresaw an interim period, of whatever span of time, between his ascension and his second advent and hence provided some kind of organization for his disciples during the interval. There is no indication in the gospels that Jesus formally repudiated—despite his trenchant criticism of their leader-

ship and character—the hierarchies of Judaism established in Sanhedrin, temple, and synagogue. He was himself subject to their ministrations, and counseled his followers to be likewise (cf. Matt. 23:3).

2. The Twelve and the Seven. It is true that Jesus selected from his followers, upon his own authority and for the purpose of fulfilling his divinely predestined ministry, the TWELVE. The number was symbolic of the twelve tribes that constituted the Israel of God (cf. Rev. 21:14). To them he gave particular training and a definite commission to assist and extend his work of preaching and healing among the people (Mark 3:13 ff and parallels; cf. John 6:70). And to the Twelve he gave a promise that they should sit enthroned with him in the coming judgment upon Israel (Matt. 19:28; Luke 22:30).

If these passages stood alone in the gospel narratives, the case would be clear that the Twelve were chosen by Jesus solely for a ministry during his earthly career and at the eschatological judgment. But the resurrection narratives contain a definite commission by the risen Lord to the eleven witnesses (Judas having defected) to carry the gospel to the whole world (Luke 24:46-48; Acts 1:8), with authority to baptize (Matt. 28:19) and to remit sins (John 20:23). Such a commission implies, at the least, the formation and governance of a specific historical community of Christian disciples.

The resurrection commission, it is true, was not exclusively granted to the Twelve, but to a wider number of "apostles" (*see* § 3 *below*); and it is probable that the narratives of the Resurrection reflect in some degree the ex-post-facto experience of the early church. But the intention of Jesus for a ministry of the Twelve to the community of his disciples after the close of his earthly life finds support in the promise to Peter of a peculiar position of leadership (Matt. 16:18; cf. Luke 22:32), and in the command to repeat the Supper of the Lord (Luke 22:19; I Cor. 11:24-25; *see* LAST SUPPER). The critic who rules out the historical authenticity of all these passages lays himself open to the charge of manipulating the evidence in the interest of preconceived theories.

In any event, the evidence of Acts 1–6 presents the Twelve (with Matthias in the place of Judas), under the leadership of Peter, in charge of both the missionary propaganda of the church and the liturgical, teaching, and disciplinary activities of its corporate life.

At an early stage in the church's growth, it became advisable for the Twelve to delegate a pastoral responsibility for the Hellenist widows to a group of seven disciples. These men were chosen by the entire community of believers on the basis of their character, wisdom, and evident endowment with the Holy Spirit. The Twelve ordained them with prayer and the laying on of hands. The author of Acts possibly viewed this ordination of the SEVEN as the institution of the ministerial order of DEACON. Yet he does not use the noun "deacon" to designate them, though he employs the verb διακονεῖν ("to serve") to describe their function of ministering charity from the "tables" of the church. In his brief accounts of their ministry, however, he portrays them as preachers, similar to the Twelve; and in a later passage (21:8) he denotes one of them, Philip, as an EVANGELIST. The selection and ordination of the Seven may well have been a singular act in the life of the early church, called forth by a particular need at a given time. But it may well have served as a model of later differentiations of ordained ministries in the church. For the qualifications of office, and the means of selection and conferral of ministerial authority, in the case of the Seven, were adopted for other and similar ordinations.

3. James and the apostles. Following upon the narrative of the Seven, the author of Acts abandons the use of the term "Twelve" to describe the leaders of the church in Jerusalem, and thenceforward employs the word "APOSTLE." With ch. 15, the governing group are named "apostles and elders," over whom there presides, not Peter, but James the Lord's brother. This transition in leadership is in no place explained by the author of Acts, nor do we find any clues to the change in the letters of Paul. The latter mentions the Twelve once (I Cor. 15:5), in connection with the resurrection appearances. Otherwise Paul speaks only of "apostles" at Jerusalem, including James (Gal. 1:17, 19; cf. 2:9, where James, Cephas, and John are called "pillars"). In general, Luke-Acts employs the terms "Twelve" and "apostles" synonymously—the chief exceptions being Acts 14:4, 14. It is obvious from Paul's own vigorous defense of his claim to be an apostle, and his use of the term for others besides the Twelve, that the word "apostle" denoted a wider circle of leaders than the Twelve (cf. Rom. 16:7; I Cor. 15:7; Gal. 1:19). By Paul's definition, an apostle was a witness of the Resurrection who had received a commission to preach the gospel directly from the risen Lord (cf. I Cor. 9:1 ff), and the same view is implied in Acts (1:21-22).

The ministry of James, apostles, and elders in the mother church of Jerusalem was unique of its kind, and presented a Christian counterpart to the Jewish SANHEDRIN under the leadership of the high priest, with much the same dignity and, doubtless, with claims to much of the same prerogatives among Christian believers. Besides immediate oversight of the spiritual and material needs of the local congregation in Jerusalem, this group exercised a general supervision over the churches of Judea, and certain of its more orthodox Jewish members conceived of it as a final authority for the whole church. It was this council that determined, in consultation with Paul and Barnabas, the conditions of Christian communion between Jewish and Gentile Christians (Acts 15; Gal. 2), thus exercising a supreme judicial and disciplinary prerogative. Some of its emissaries attempted to control the behavior of Jewish Christians in churches far afield (cf. Gal. 2:12), but any such interference in mission churches outside Judea was stoutly resisted by Paul, though Paul himself was not unsubmissive to its directives when he was a visitor in Jerusalem (cf. Acts 21:18 ff).

The leadership of James (*see* JAMES 5) over the Jerusalem church was due not merely to his apostolic dignity and the reputation of his character and piety, but in large measure to a dynastic principle. As the nearest male relative of the Messiah, he was his personal representative on earth until Christ's return. Streeter described the situation as a "caliphate." After James's death, the headship of the church in Jerusa-

lem continued to be held by members of Jesus' family until, apparently, the line died out with Simeon in the early years of the second century. To describe James, in the usage of later generations, as the first "bishop" of Jerusalem is anachronistic; nor can his rule be termed as absolutely monarchical, since he appears in all fundamental decisions to have acted only in counsel with the other apostles and elders. It is possible, however, that the ordering of the church in Jerusalem in the earliest days may have served in some way as a model for the later emergence throughout the church of the monarchical episcopate.

The apostles, by virtue of their singular commission to evangelize, were traveling missionaries and founders of churches. Jerusalem was not of necessity a base of operation for all of them. There may be some significance in the fact that at the time of Paul's last visit to Jerusalem he found no apostles (Acts 21:18). We know very little of the labors of most of the apostles, other than Paul. Their authority in the churches that they founded, if we may judge from Paul's claims, was absolute, they being final arbiters in all questions of worship, discipline, and doctrine. Obviously, the force of this authority was tempered by the personal abilities and the powers of persuasion of the individual apostle himself. In larger communities, where several apostles carried on missionary activity, there were bound to be conflicts of loyalty and party divisions. We do not know, however, how such churches as those of Ephesus, Corinth, or Rome —to name but a few of the more distinguished that claimed more than one apostolic founder—achieved organic unity about a commonly accepted ministry.

4. Origin of elders. The NT does not record the original institution of elders (or presbyters) in the church; but it is obvious that the office was modeled upon the Jewish eldership, both of the Jerusalem Sanhedrin and of the local presbyteries found in all organized Jewish communities. Acts 14:23 informs us that Paul and Barnabas ordained elders in the churches they founded on their missionary journey in Asia Minor. One may infer from this that it was a customary procedure of the apostles to provide their churches with responsible leaders who would have oversight of the churches during their absence and advise them of any difficult or special problems.

The elders would be chosen from the wiser and more experienced members of the community, usually but not necessarily "old" men. Vacancies, when no longer supplied by the apostles, would be filled by cooptation, with ordination to office by prayer and the laying on of hands of the apostle (if present) and the entire presbyterial group (cf. I Tim. 4:14). So much may be assumed by analogy with the Jewish prototype, but the NT evidence is very scant.

It is even more difficult to determine the exact ministerial duties of the elders in apostolic times. The office is not once mentioned in the genuine letters of Paul, and the evidence of the later NT writings of the postapostolic age must be used with caution in view of the more developed concept of the office. The word "elder" has been taken by some critics to be more of a description of status and dignity than of a specific ministerial order. But if the analogy of Jewish elders may be used, the Christian elders must have had at least some responsibilities of a judicial nature, both in the interpretation of permissible doctrine and usage and in the discipline of offenders against the church's faith and ethic. Such responsibility would imply some kind of pastoral ministry (cf. Jas. 5:14), and at least, in the absence of other qualified persons, a capacity to lead the church's worship. *See* ELDER IN THE NT.

5. Prophets and teachers. Highly regarded in the life of the primitive church were the ministries of prophets and teachers. There is no hint that these were in any way ordained men. Their ministry rested upon recognition in the church of their immediately inspired character. Their model was Christ himself. Jesus was taken by many of the people to be a prophet (Mark 8:28 and parallels; Luke 7:16; 24:19; John 4:19; 6:14; 7:40; 9:17), and he accepted the role of prophet (Matt. 23:37; Mark 6:4 and parallels; Luke 13:33-34; John 4:44). He was commonly addressed, even by his enemies, as "rabbi" or "teacher" (Matt. 26:25, 49; Mark 9:5; 10:51; 11:21; 14:45; John 1:49; 3:2; 4:31; 6:25; 9:2; 11:8; etc.). Both prophets and teachers were well known in Judaism, though prophecy had become virtually extinct until suddenly revived by John the Baptist and Jesus.

The prominence of prophets and prophesying in the early church stemmed in large degree from the fervor of religious experience and in particular from the possession by the church of the Holy Spirit, whose outpouring on the believers was a sign of the dawn of the age to come (cf. Acts 2:17 ff). Paul's ranking of prophets and teachers immediately after apostles, in the order of spiritual gifts (I Cor. 12:28; cf. Rom. 12:6; Eph. 4:11), was probably not a singular opinion of his own.

Prophets and teachers were not permanently attached to one community, but wandered from place to place as prompted by the Spirit. In Acts we meet a few of them by name: Agabus, a Judean, prophesying at Antioch (11:28) and Caesarea (21:10); Judas and Silas, who accompanied Paul and Barnabas from Jerusalem to Antioch (15:32)—the latter of whom (Silas) was later associated with Paul in missionary labors in Asia Minor and Greece. Prophetic inspiration—as in Judaism—was not confined to men. The four unmarried daughters of Philip were prophetesses (Acts 21:9). After some time spent with their father in Caesarea, they later moved with him to Asia Minor, where they settled in Hierapolis (Euseb. Hist. III.31.3-4; V.24.2).

In Acts 13:1-3 a primitive tradition informs us that for a time the church in Antioch was actually led by a group of prophets and teachers who presided over the worship and directed, through inspiration by the Spirit, its missionary ventures. How typical this situation may have been in Gentile mission churches, we cannot say. But the custom appears to have continued in many places in Syria into the second century, if we may trust the Didache (11-15), which portrays Christian congregations without a settled ministry and dependent upon wandering prophets and teachers. Even as late as the latter part of the second century, the challenge to episcopal authority presented by the new prophecy of Montanism reveals the strength of prophetic leadership in the primitive tradition of the church.

6. Other charismatic ministries. The earliest Christians highly esteemed "spiritual gifts" quite

apart from any ecclesiastical rank or office held by those who possessed them. In all his extant correspondence Paul has little to say about official ministries, other than that of an apostle, though he is not unmindful of the obedience and love owed to those who labor and lead and admonish his congregations "in the Lord" (I Cor. 16:15-16; I Thess. 5:12). Unruly elements were not lacking in his churches, and Paul was enough of an authoritarian himself to appreciate a strong hand of discipline and a sound voice of instruction. But to Paul, ministry in the church was primarily a function or a grace, not an office. It was an exercise by each and every member of the church of his own charism of the Spirit to the edification of all (Rom. 12:6-8; I Cor. 7:7; 12:4-11, 28-31; cf. I Pet. 4:11; I Clem. 38:1; Did. 1:5). Even apostleship was to Paul a "spiritual gift"; and it is as charism that he describes to the Roman Christians his projected apostolic visitation (Rom. 1:11). These gifts were not severally exclusive; a Christian might possess one or many. Nor were they of equal value. Paul certainly thought prophesying of more worth than speaking in tongues. And he would have placed the gifts of grace—faith, hope, charity—above all others. His famous "hymn to charity" as the "more excellent way" follows immediately upon his discussion of the greater charisms (I Cor. 12:31). *See* SPIRITUAL GIFTS.

The difficulties inherent in reliance upon charismatic ministries were always apparent. They had to be tested, both as to their genuineness and as to their edifying effect. Yet such tests, if not purely subjective, ran the risk of "quenching the Spirit" (cf. I Cor. 12:3, 14; I Thess. 5:19-21). Jesus had warned his disciples of the coming of false prophets (Matt. 24:24; Mark 13:22), and the warning, as repeated in the traditions peculiar to Matthew (7:15; 24:11), reflects a real problem in the time the first gospel was written. To his chagrin, Paul acknowledged that the uninhibited exercise of charisms, as at Corinth, was more conducive to disorder than to edification. In the literature of the postapostolic age, references to false prophets and teachers become cumulative (e.g., I Tim. 4:1; 6:3-5; II Tim. 4:3; II Pet. 2:1; I John 4:1; Polyc. Phil. 7:2). The directions given in the Didache for testing them, though they strike the modern reader with mild amusement, were no less a real attempt to give objective criteria of judgment.

On the other hand, the esteem of charisms had a lasting effect upon the church's concept of an ordained ministry. For whatever the office to which a man was called and commissioned by the laying on of hands, it was demanded that evidence be forthcoming that he had received a charism appropriate to his particular ministerial order. So I Clem. 42:4 affirms that the apostles "appointed their firstfruits, after testing them by the Spirit, as bishops and deacons." In the Pastorals, Timothy is reminded of the charisma "which was given you by prophetic utterance when the elders laid their hands upon you" (I Tim. 4:14; cf. II Tim. 1:6). The oldest ordination prayers extant, those in Hippolytus' *Apostolic Tradition,* pray God to "pour forth the power that is from Thee of the princely Spirit" and to "grant the spirit of grace."

7. Bishops, elders, and deacons. The most difficult problem in the history of the development of the Christian ministry has to do with the transition from the varied ministries of the apostolic age to the threefold orders of bishops, elders (or presbyters), and deacons that were universally established and recognized in the church by the time of Ignatius and Polycarp (*ca.* A.D. 120). The principal questions debated are: (*a*) the relation of bishops and elders—whether they were originally the same, and, if not, how they were distinguished one from the other; (*b*) the emergence of a single, monarchical bishop as the head of each Christian community; and (*c*) the means of selection and ordination of these orders. For more detailed discussion of these problems, *see* BISHOP; DEACON; ELDER IN THE NT.

a. Jewish prototypes. There is no question about the derivation of the order of elders from the Jewish presbyterate (*see* § 4 *above*). But the terms for "bishop" (ἐπίσκοπος, "overseer") and "deacon" (διάκονος, "servant") are not found in Jewish sources to denote cultic or governmental offices of any kind. In view of the close association of bishops and deacons with the church's worship, it has frequently been suggested that Jewish prototypes of these ministries existed in the two officials of the synagogue who exercised somewhat analogous functions. The ruler of a synagogue (ἀρχισυνάγωγος; cf. Mark 5:22 ff; Luke 8:49; 13:14; Acts 13:15; 18:8, 17; *see* SYNAGOGUE), normally elected for life, presided in the synagogue worship and served as general arbiter of synagogue affairs in much the same way that the Christian bishop acted in the corporate religious life of the churches. The ruler had a helper, the hazzan (ὑπερέτης; cf. Luke 4:20), who performed lesser duties, ranging from that of caretaker of the synagogue building to that of schoolteacher for the children.

Since the earliest Christian churches were initially gathered from synagogue congregations, it is reasonable to suppose that an organization developed in the church comparable to that found in Jewish congregations. The principal objection to such a theory—apart from its failure to explain the origin of the terms "bishop" and "deacon"—is the fact that bishops and deacons were sacramental ministers, and were also engaged in a greater degree of pastoral and charitable duties than is indicated by the sources with regard to the synagogue officials.

The finds of the DEAD SEA SCROLLS have brought to the fore some discussion of the possible influence of the Qumran and similar "Essene" communities upon the organization and ministry of the early church. The Manual of Discipline, e.g., divides the community into ranks of priests, elders, and people. A council of fifteen—three priests and twelve laymen—has special charge of expounding the law and administering discipline. (One is inevitably reminded here of the Twelve and the three "pillars" of the Jerusalem church; cf. Gal. 2:9). There is also an overseer (מבקר) who supervises the new members and looks after the finances of the community. Scholarly research on these new materials has not advanced sufficiently to date, however, to justify any positive conclusions respecting the relation of these groups to primitive Christianity; but the parallels of organization should not be ignored by students of Christian origins.

b. Gentile prototypes. The terms "bishop" and "deacon," denoting officers of pagan cults and asso-

ciations, are frequently found in Greek inscriptions from all parts of the Mediterranean world. But it is difficult to determine their precise meaning in these contexts. In central Syria, especially, the title *episkopos* occurs in both sacral and civil lists, always with something of its primary meaning of "overseer"; but it describes not only directors, curators, and cashiers, but also supervisors of provisions and buildings. The word "deacon" is much less frequent; often it denotes waiters in some cult association. The total evidence is not weighty enough to demand a secular or pagan derivation for Christian use of these titles. It only shows that the terms were known and flexible enough to admit of varying connotations depending upon the specific community that employed them.

c. In Paul and Acts. In no place does Paul mention elders; but in the address of Phil. 1:1 he singles out "bishops and deacons" for particular greeting. Both the KJV and the RSV translate the terms thus, though it has been disputed whether the words here have so technical a sense. But Philippians is a letter of thanks for charitable assistance sent the apostle during his imprisonment. It would be natural, therefore, for Paul to mention those who were especially charged with its supervision and service.

Paul also uses the word translated "deacon" in other letters in a more general sense of "servant" or "helper" in the work of evangelism. Thus he uses the term of Christ (Rom. 15:8; Gal. 2:17); of himself and other missionaries (I Cor. 3:5; II Cor. 3:6; 6:4; 11:15, 23; Col. 1:23, 25; cf. Eph. 3:7); of helpers such as Timothy (I Thess. 3:2), Tychicus (Col. 4:7; cf. Eph. 6:21), and Epaphras (Col. 1:7); and also of civil magistrates as "God's servants" (Rom. 13:4). In one place (Rom. 16:1), Paul may have used the term technically of a deaconess.

With the reference of Phil. 1:1 is often associated the speech of Paul to the Ephesian elders related in Acts 20:17 ff, in the course of which Paul addresses them as *episkopoi* (vs. 28; RSV "guardians"; KJV "overseers"). The speeches of Acts are probably compositions of the author, and therefore represent the outlook of his own generation. The interpretation of this passage is particularly problematic, however; for some have taken it to mean an original identity of bishops and elders, while others claim that in this instance the elders addressed were but a select group of men with specifically episcopal responsibilities. Still others (as the translators of the KJV and the RSV) maintain that *episkopoi* has in this context only a general, not a technical, sense.

d. The postapostolic age. Similar ambiguities surround other scattered notices in the later NT books. In I Pet. 5:1 ff, the author, reputedly an apostle, but describing himself also as an elder, exhorts his fellow elders to "exercise oversight" (ἐπισκοποῦντες) in their care of God's flock. But the context shows that elders are here distinguished from younger members, and may therefore mean no more than "older" men, upon whom leadership and responsibility in the church must fall. The same writer also uses ἐπίσκοπος of Christ (2:25; RSV "Guardian"; KJV "Bishop").

Little can be established from the single reference to elders in Jas. 5:14, or from the much-disputed figure who styles himself "the elder" in the addresses of II and III John. Whether the latter was the apostle John, or another John—a disciple of apostolic dignity, a monarchical bishop, or an elder of repute, or merely an old man of experience and authority—cannot be determined from the ambiguous traditions that have developed about his personage.

The evidence of the PASTORAL LETTERS would be more helpful if these letters could be dated and placed with greater security; for they provide the clearest testimony in the NT to the developed norm of a threefold hierarchy. Qualifications for all three orders are listed in Tit. 1:5-9; I Tim. 3:1-13, but with the curious circumstance that deacons are not mentioned in the former passage, nor elders in the latter. Moreover, the abrupt transition in Tit. 1:7 from the discussion of elders to that of bishops is awkward, and has suggested to some critics possible interpolation. I Tim. 4:14 contains, too, a reference to ordination by the laying on of hands of the elders; but it is uncertain whether Timothy himself is the ordinand, or whether his name merely stands for some bishop or elder to whom the letter was actually addressed. Thus, while the Pastorals provide reference to the three ministerial orders, in an apparently distinguishable form, they do not clarify with precision their respective relationship or means of transmission.

The DIDACHE is likewise a document of disputed date. Concerned with the uncertain quality of charismatic ministries, the author advises the churches to appoint "bishops and deacons worthy of the Lord, meek men and not lovers of money, truthful and tested, for they also minister to you the 'liturgy' of prophets and teachers" (15:1). No mention is made of elders. The context shows that bishops and deacons are especially responsible for worship, and also, presumably, for the offerings of the people. The qualifications for these offices are much the same as those enumerated in the Pastoral letters. Nothing is said, however, as to how these ministries are to be appointed and ordained.

The letter of the Roman church to the church in Corinth, *ca.* A.D. 95, known as the First Epistle of Clement (*see* CLEMENT, EPISTLE OF), is concerned particularly with the deposition by the Corinthians of their bishops and deacons and the factional disputes caused thereby. The writer believes (see especially 42-44) these ministries were not only divinely ordered and prophesied in the OT, but were also established by specific regulation of the apostles and continued through other "approved" and "eminent" men who succeeded to the ministry of the apostles. He condemns, therefore, the removal from office of those who have "blamelessly and holily offered the sacrifices" (i.e., the Eucharist). And, says he, "blessed are the elders who have finished their course before now . . . for they have no fear lest anyone shall remove them from their appointed office."

It is by no means clear whether the author of I Clement employs "elders" in this passage in a technical sense, as synonymous with "bishops" and "deacons," or whether he is thinking merely of men of a past and older generation. The passage is also patient of an interpretation which distinguishes elders in general from elders that have an appointed office —namely, the bishops and deacons who offer the Eucharistic gifts.

Thus none of the surviving documents of the post-apostolic age provides sufficient material to explain the emergence of the threefold, clearly distinguishable orders of bishop, elders, and deacons that stand out so clearly from the letters of IGNATIUS, the martyr-bishop of Antioch, which were written before A.D. 117 (*see also* BISHOP). Not only does Ignatius make the elders, no less than the deacons, subordinate to the bishop; but he is the first clear witness to the "monarchical" episcopate—i.e., the custom of a single bishop's presiding as authoritative leader over the entire Christian community in any one city or place. Ignatius does not speak in any passage, however, of ordination or ministerial succession.

8. The monarchical episcopate. Two theories, each with variations of detail, generally claim the allegiance of scholars in explaining the significance of the data outlined in the previous section. One is the classic hypothesis of Lightfoot, that originally "bishops" and "elders" were synonymous terms, but that the episcopate arose out of the presbyterate by "elevation" into a distinct and higher order. Harnack, who held this view, stressed the distinction between the universal ministries of apostle, prophet, and teacher, and the local ministries of bishops-elders and deacons. Streeter saw in some instances evidence of a mediate stage of a collegiate episcopate before the monarchical system was firmly established.

The other theory maintains an original distinction of the two orders of bishop and elder, without denying that bishops may also have been numbered among the presbyterate. But not all elders were bishops. The bishops were "appointed elders," specifically ordained for liturgical, pastoral, and economic functions, in which the deacons assisted them. There may have been one or more bishops in the earliest communities, depending upon their size and number of congregations. But in any event, the office of bishop was always distinct, and its origin goes back to apostolic appointment of those who, being tested by the Spirit, manifested the appropriate charism for the office. The elders enjoyed a position of honor, not of ministerial office. But with the rise of the monarchical episcopate, elders had delegated to them by the bishops certain ministerial functions of a liturgical and pastoral nature. This theory, developed by Sohm and Lowrie, is thus the opposite of the other: the episcopate did not arise by elevation out of the presbyterate; but the presbyterate as an order of ministry and not merely a title of honor came into being by delegation from the episcopate.

Neither of these theories solves, however, the obscure problem of ordination and succession. The sources are too scanty to allow positive statements. The apostles may very well have ordained the first bishops and elders; or they may have been ordained by prophets and teachers, or any other "eminent" leaders. It is even possible that some of the early bishops were placed in their office by popular acclamation. Similarly, the succession of ministers from one generation to the other might have been maintained by bishops or by elders, or by both together, with or without the assistance of prophets and other charismatics. It is only at the turn of the third century, in the work of Hippolytus, that the first clear notice survives of what was then viewed as "apostolic tradition" in the matter of ordination—namely, bishops were ordained by other bishops; elders were ordained by a bishop with the assistance of other elders; deacons were ordained by a bishop alone.

9. Apostolic succession. The concept of regular succession to office and ministry was not unknown to Judaism, being associated both with the eldership and with the rabbinate, and, in a different way, with the idea of a succession of prophets raised up by God for his people. But the Jews did not make a doctrine out of succession, or stress the need of an uninterrupted series of ordinations by the laying on of hands. The early Christians of apostolic times could hardly have had much interest in the matter, however, in view of their eschatological hope of the early return of the Lord from heaven. It was the tension of threatened schism and the rise of heretical teaching in the postapostolic age that brought to the fore concern for an identifiable succession of leaders who could claim authority to speak for the faith and order imparted to the church by its original founders and the disciples of the Lord.

The first explicit description of a ministerial succession from the apostles occurs in the Letter of Clement, cited above. But the same idea is implicit in the Pastoral letters, with their emphasis upon a regular appointment of ministers who will teach sound doctrine and manifest exemplary character. Crystallization of the doctrine of apostolic succession, borne by the church's episcopate, came into clear focus only in the latter half of the second century. It was a reaction to the claim of Gnostic heretics to possess an esoteric teaching handed down to them in secret succession from the apostles. Orthodox leaders, notably Irenaeus (Her. III.3-4), countered this claim by an appeal to the open teaching of the true, apostolic faith maintained by the bishops who had succeeded the apostles in the government of the chief churches. Not only Irenaeus, but others also drew up lists of names of bishops who had thus succeeded one another uninterruptedly. The interest of these orthodox fathers was not as yet involved in the question of ordination. They were concerned solely with identifying a series of ministers who had guarded the apostolic doctrine. Similarly, with the outbreak of the Montanist schism, church leaders and theologians such as Hippolytus drew up lists of orthodox prophets from apostolic times to counter the claims of the new prophets of Montanist inspiration. Only in later times, when the bishops themselves, who were the supposed guardians of the apostolic faith, were in disagreement as to that faith, did the doctrine of apostolic succession necessarily undergo a change of emphasis, and a greater concern develop with respect to the agents and the manner of ordination.

M. H. SHEPHERD, JR.

MINNI mĭn'ī [מנּי] (Jer. 51:27). A people and a state, to be located in the area directly S of Lake Urmia.

In the only place where it is mentioned in the OT, the kingdom of Minni, together with the kingdoms of Ararat and Ashkenaz, is summoned by Yahweh to destroy the wicked Babylon. As Ararat is the same as Urarṭu of the Assyrian cuneiform sources, the name of a region to be located S of Lake Van; and as Ashkenaz corresponds to Ašguzaya, Iškuzaya (applied to the people later known as Scythians) in the Assyrian sources, which often refer to the people thus designated in connection with the Urarteans; it seems logical to locate the Minni of the OT in the same general area and to connect them with the Manneans, who are regularly mentioned along with the Urarteans in the historical inscriptions of the late Assyrian kings. The cuneiform *Mannaya* (or *Mannay*), a gentilic formation from *Man* or *Manna*, corresponds to the OT *Minnī*, in view of the phonetic change *a*>*i*, well known in Hebrew (as in the case of the form attested in cuneiform as *Ḫatti*, which changes to *Ḥittīm* in Hebrew). The attested history of the Manneans begins with the reign of the Assyrian king Shalmaneser III (858-824 B.C.) and continues until the end of the Assyrian Empire. A connection between the Manneans-Minni and "Minyas in Armenia" mentioned in Jos. Antiq. I.iii.6 must be rejected, because these names cannot be associated in accordance with phonetic principles. For an article concerning the exact area occupied by the Manneans in Assyrian times, *see bibliography*.

MINNITH mĭn'ĭth [מנּית] (Judg. 11:33). One of the "twenty cities" involved in Jephthah's military conquest of the Ammonites (Judg. 11:29-33). The precise location is unknown, although it must have been situated in the general area W and S of Rabbah-ammon (modern Amman) in E Palestine. In Eusebius *Onomastica* (140.3; ed. Lagarde), it is identified with a village some four Roman miles NE of Heshbon which still bore the name Μαανιθ. Several contemporary antiquity sites have been suggested, among them Khirbet Hanizeh (or Khirbet umm el-Hanafish), halfway between Heshbon and el-Yadudeh.

MINSTRELSY. *See* MUSIC.

MINT [ἡδύοσμον, *lit.*, sweet odor]. A sweet-smelling herb, the leaves and stems of which contain an aromatic oil which is used in medicine and food-seasoning. Mint is referred to in Matt. 23:23 (=Luke 11:42) in connection with Jesus' criticism of the Pharisees, who required the tithing even of mint, DILL, and CUMMIN (cf. Luke 11:42: mint, RUE, and every herb; cf. also Deut. 14:22-23), but had "neglected the weightier matters of the law, justice and mercy and faith" (cf. Mic. 6:8).

Several species of mint (*Mentha*) are found growing wild in the Holy Land, in moist places, especially along banks of streams. *Mentha longifolia* L. (commonly called "horse mint") is the more common variety today.

52. Mint

Mint apparently was included with those herbs used as BITTER HERBS (Exod. 12:8; Num. 9:11) with the Pascal lamb, according to the Jewish Talmud (Pes. 2.6).

MIPHKAD, GATE. KJV translation of שער המפקד (RSV MUSTER GATE).

***MIRACLE.** An event, whether natural or supernatural, in which one sees an act or revelation of God.

Did the miracles of the Bible occur? If so, how are

we to interpret them? Do all the miracles of the Bible have the same degree of authenticity? What do history, science, philosophy, literature, and theology have to say about miracles? What are we to believe about miracles in other cultures and religions? Did miracles cease at the end of the biblical period? What was the attitude of the prophets and Jesus toward miracles? Are miracles an essential element of Christian faith? Is our universe controlled by laws to which there are no exceptions? What should be one's attitude toward the possibility of miracles in the world today?

1. Terminology. ***a. In translation.*** Translators of the Bible have had no little difficulty in rendering the various words which carry the idea of "miracle." The KJV uses the word "miracle" no fewer than thirty-seven times. Five of these are in the OT, and thirty-two in the NT. The ASV has apparently eliminated the word from the OT, but uses it eight times in the NT. The RSV has reinstated it at least six times in the OT, but uses it only seven times in the NT. Goodspeed's NT has apparently not used the word "miracle" at all.

Other words frequently used in English versions are "sign," "wonder," "work," and "mighty work." Translators tend to avoid "portent" and "prodigy," but the RSV has used "portent" seven times. Goodspeed introduces this term in Acts 2:22; Heb. 2:4. Among the words used in Jerome's Latin Vulg. are *signum, virtus, ostentum, mirabilium, portentum, prodigium,* and *miraculum* (Isa. 29:14). Another English word which frequently occurs in the context of "miracle" is "judgment," as an act of God (I Chr. 16:12; Ps. 105:5). This catalogue is by no means an exhaustive list of words used by the translators, but it shows something of the variety of words which have been employed. Behind this variety of words lie the different ideas in the original languages, but also the uncertainties of translators as to the nature of miracle.

This tendency to avoid the word "miracle" has been unfortunate. Most of the other terms used are in themselves neutral. They acquire the connotation of the supernatural only from the context. The words "sign" and "wonder" are used so frequently in our ordinary language that they do not in themselves carry any definite overtone of the supernatural. The only word in our idiom which is unequivocal on this point is "miracle." It ought to be used more often in translations. In this particular, the KJV is superior to all its successors. Other related terms which could be used to good advantage are "portent" and "prodigy." They fit well in many contexts of the Bible and at the same time immediately relate the biblical material to similar phenomena in other literatures.

b. In the OT. The two Hebrew words most commonly used for "miracle" occur in Deut. 13:1, as translated by the RSV: "If a prophet arises among you, or a dreamer of dreams, and gives you a sign or a wonder. . . ." The word for "sign" here is אות, and for "wonder," מופת. The LXX reproduces אות as σημεῖον, "sign," and מופת as τέρας, "wonder." The Vulg. uses *signum* and *portentum.* אות is derived from a verb which means to make a sign or mark on an object to identify it. The noun is used with the meaning of "sign," "pledge," or "token" in such passages as Gen. 1:14, where the sun and moon are signs of day, night, and seasons; Exod. 12:13, where blood is a sign of the Passover; Josh. 4:6, where memorial stones are signs; Gen. 17:10, where circumcision is a sign of the covenant; Num. 2:2, where the word means a military standard. But in such contexts as those in which we are interested, it means an omen, portent, prodigy, or miracle, which is an expression of divine intention and power. It is a sign of the supernatural, an event or act which, to those who behold it, reveals something about God.

The derivation of מופת is uncertain, but it means "wonder," "sign," "portent," or "miracle." It is a special display of God's power, as in the case of Moses and Aaron in Egypt, or by a false prophet (Deut. 13:1-3). Along with אות, it is applied to the effects of a curse in Deut. 28:46. Also it can be a sign or token of a future event; or it may designate a person who serves as a symbol or sign. The Greek word τέρας, used by the LXX to translate it, is the ultimate source of our word "terror."

Another Hebrew word for "miracle" is פלא, which means something beyond one's power to do or to understand. It appears in Exod. 15:11 referring to wonders of the Exodus; but in Ps. 89:5-6, it means wonders of the natural world. A closely related word is נפלאות. It also means the wonderful acts of

God. In Exod. 3:20; Judg. 6:13, it refers to events of the Exodus. But in Job 5:9 it includes rainfall, which God sends upon earth and fields. These two words are frequently rendered in the LXX by θαυμάσια, "marvels"; and in the Vulg. by *mirabilia*, "marvels." They occur often in poetry and mean portents and prodigies, providential control of history, or wonders of God in natural phenomena. אות and מופת, "sign" and "wonder," are so closely related to each other that we should not attempt to differentiate them sharply. In Exod. 4:8, where God has shown Moses how to perform certain wonders, he uses the word אות to designate the wonders. Yet in 4:21, with reference to the same wonders, he says מופת. This shows that the words can be used as synonyms with approximately the same meaning. They were bound together so closely that they entered into a standard idiom, אתות ומופתים, "signs and wonders." In this form the idiom occurs in Deuteronomy alone some nine times (4:34; 6:22; 7:19; 13:1; 26:8; 28:46; 29:3; 34:11). It is used also in Exod. 7:3; Neh. 9:10; Ps. 105:27; Isa. 8:18; Jer. 32:20; and in the Aramaic of Dan. 3:32-33; 6:27. This shows how closely the two words were related to each other and how they were used together to express the idea of miracle. The LXX in turn uses a standard Greek idiom to reproduce this Hebrew expression. It says σημεῖα καὶ τέρατα, "signs and wonders." We know also that the LXX is not merely reproducing Hebrew idiom, because this Greek idiom is used by Hellenistic writers. It occurs in Wisd. Sol. 8:8; 10:16; Jos. Antiq. XX.viii.6; War *Pref.* 11; Philo *Moses* I.95; Plutarch *Alexander* 75; Polybius III.112; Aelian *Variae Historiae* XII.17. *See* SIGNS AND WONDERS.

c. In the NT. This widespread usage interests us especially when we observe that the idiom σημεῖα καὶ τέρατα, "signs and wonders," is often used in the NT in precisely the same sense. One encounters it in Matt. 24:24; Mark 13:22; John 4:48; Acts 2:43; 4:30; 5:12; 6:8; 7:36; 8:13; 14:3; 15:12; Rom. 15:19; II Cor. 12:12; II Thess. 2:9; Heb. 2:4. These passages demonstrate that σημεῖα καὶ τέρατα was a common idiom for NT writers, one which they had taken over from the Greek of the Hellenistic period, on the one hand, but from the LXX, on the other, which had used the idiom to translate the Hebrew אתות ומופתים. The idiom shows a common interest in portents and prodigies among the Hebrews, early Christians, and the Greek world generally.

Along with σημεῖον and τέρας, "sign" and "wonder," the NT often uses δύναμις, "power." This means the power of God, of the Holy Spirit, or of Jesus. But by metonymy, in Mark 14:62 it is used as a name for God. In a similar way, metonymy makes it possible also to designate with this word the act performed. Mark 5:30 relates that when Jesus performed a healing he felt power go out from him. But in Mark 6:5, where it is said that Jesus was unable to perform any miracle because of unbelief, δύναμις means the miracle itself. It also has this meaning in 9:39. Mark 6:2 speaks of the δυμάμεις performed by the hands of Jesus. Paul mentions his power to work δυνάμεις in Gal. 3:5. In Rom. 15:19; II Thess. 2:9; Heb. 2:4, δύναμις appears to have entered into an idiom with σημεῖα and τέρατα as a general expression for "miracles." Yet a writer like John could limit himself almost exclusively to one word for "miracle." He preferred σημεῖον, "sign." This occurs in John 2:11, 18, 23; 3:2; 4:54; 6:2, 14, 26, 30; 7:31; 9:16; 10:41; 11:47; 12:18, 37; 20:30. On the other hand, to show that he was familiar with the standard idiom for miracles, in 4:48 he used σημεῖα καὶ τέρατα, "signs and wonders." *See* JOHN, GOSPEL OF.

A similar preference for σημεῖον is evident also in Revelation, where it occurs in 12:1, 3; 13:13, 14; 15:1; 16:4; 19:20. Here the σημεῖα ("signs") are performed by the red dragon, the beast, the seven angels, demons, the false prophet, etc. *See* REVELATION, BOOK OF.

But ἔργον, "work," is also used with the specialized meaning of "miracle." Matt. 11:2 states that when John, who was in prison, heard of τὰ ἔργα, "the works" (RSV "deeds"), of Jesus, he sent his disciples to ask him whether he was the one to come. But it is the Gospel of John again which shows the greatest preference for this term. It occurs in 5:20, 36; 7:3; 10:38; 14:11, 12; 15:24.

Thus the NT writers had at their disposal σημεῖον, "sign"; τέρας, "wonder"; δύναμις, "power"; and ἔργον, "work," when they wished to say "miracle." Each of these words has an element of uniqueness in its meaning. Σημεῖον points to something beyond itself; τέρας indicates the reaction of awe or terror; δύναμις refers to the power which performs the act; ἔργον refers to the act itself. Both δύναμις and ἔργον are metonyms. In the former, the act is designated on the basis of the power which causes it; in the latter it is designated on the basis of the action which produces it; or it is the work which is worked. It is clear, however, that these distinctions were not always maintained, and that in a general sense the four words were used as synonyms. While they can be translated as "sign," "wonder," "power," and "work" —and such renderings are useful in some contexts— all these English terms are predominantly neutral. They lack the strength necessary to carry the full meaning of the supernatural which is involved. The only word adequate for this is "miracle." *See* SIGNS IN THE NT.

2. Definitions. ***a. Presuppositions.*** A clear and useful definition of miracle can be formulated only from a consciously limited point of view. One who gives a definition, in order to make intelligible what he means, must state the principles on the basis of which his definition is formulated. A definition is only as valid as its presuppositions. If one starts with an assumption that miracles are impossible, he has already excluded the basis on which a definition could be worked out. It is just as necessary to state the presupposition with which one operates as it is to put down a foundation before building a house. Nor should one ever forget, or be allowed to forget, the assumption which is inevitably implicit in his definition. The issue is joined only in the presupposition, and must be decided there.

The argument over the possibility of miracles and the effort to define miracle have consumed much time and energy, yet these are secondary questions. The primary question, and in a sense the only real question, in religion, is God. If one believes in God, that God creates the universe, sustains it, and controls it, most of the difficulties of miracle have thereby been

dealt with. One who believes in God will believe in the possibility of miracles. On the other hand, he will admit that his belief in miracles results from his belief in God and in God's continuing control of the world. This faith is assumed herein.

On the other hand, one's view of miracle is related to his concept of what we call the natural world. It is not unusual to encounter the belief that the world is controlled by universal laws which are unalterable, that there are no exceptions whatever to the workings of these laws. Such laws are regarded as mathematical descriptions of chains of causality which are expressed in all the processes of nature. Whatever occurs is said to be in harmony with some natural law. Every event is the result of a cause or a group of causes. These causes operate in a mechanistic and inexorable fashion. Now, if miracle were defined as a violation of natural law taken in this sense, one would be forced to conclude that no miracle has happened or could happen.

b. Spinoza. This is the view which was held by Benedict Spinoza, who in a sense has voiced the doubt of miracles felt by the modern world. Most of the skeptical views have been mere variations of the position of Spinoza. His view that a miracle is à violation of natural law is the concept most frequently encountered in our time. In the course of his argument in the pamphlet entitled *A Theological-Political Treatise,* he first states this inclusive mechanistic concept of the world, and then proceeds to show that the miracles of the Bible were events which happened according to natural law. Of course, Spinoza believed in God, but one might almost say that he worshiped the universe. Although he formally denied the possibility of miracles, since he believed that natural laws are inexorable, the universe itself with all its wonderful processes was essentially a miracle for him. Spinoza never ceased to wonder at the marvelous things of the natural world. So his reverence for the processes revealed by chemistry, physics, biology, and the other sciences took the place of awe with respect to miracles in traditional religion; and one must recognize that Spinoza expressed the feeling of a large segment of mankind. Indeed, there is something of Spinoza in all of us. His view shows how it is possible for one to retain a feeling of deep reverence although he doubts the occurrence of some of the miraculous events related in the Bible. We must not forget to do justice to his contribution to our understanding of religion. He has shown many persons how to retain faith in spite of mechanistic views. Naturalism in theology is deeply indebted to Spinoza.

c. Hume. David Hume is no less well known than Spinoza for his skepticism as regards miracles. This view pervades his philosophical writings in general, but he gave it most pointed expression in his "Essay on Miracles." He also assumes that "miracle is a violation of the laws of nature," and reasons that "as a firm and unalterable experience has established these laws, the proof against a miracle, from the very nature of the fact, is as entire as any argument from experience can possibly be imagined." But in this same essay, in his effort to demonstrate that faith cannot be based on reason, he shows that rational investigation of evidence as to whether an event has occurred can at best lead to no more than probability. This is a sound conclusion. But this line of reasoning shows that the laws of nature on which he depends for his rejection of miracles can be no more than matters of statistical probability. So his argument against miracles as a possibility is inadequate. Yet Hume's logic, with its negative conclusion, has a valuable result for theology. Its demonstration of the limitations of reason shows that faith must not depend too much on reason for its validity. This is an insight which was well known to biblical writers. In his negative way, Hume assists theology to get back on a biblical basis. So we are indebted to him for reminding us that religion lives by faith. He succeeds in showing that miracles cannot be validated by historical research and that Christian theology cannot be based solely on reason. What Hume did was to demonstrate the bankruptcy of a theology which attempts to equate faith with historical information, scientific facts, or philosophical speculation. This was a contribution of great value.

d. The unknown. Another approach, followed by numerous writers, retains the concept of a natural order but holds that a miracle is simply a phenomenon produced by the operation of a natural law which we do not know, or which, if we did know, we could not employ. Thus a miracle is a purely natural event. Only from our point of view, it might be regarded as a supernatural event, since we are ignorant of its natural cause. This approach limits miracle to phenomena occurring in those areas of the natural order which science has not yet investigated. In other words, miracles occur only in those aspects of the universe which we do not yet understand. It is assumed that when science has finally mastered those areas of existence, as presumably it will, all miracles will become just as intelligible as other events which we have understood all along. This approach is theoretically possible, but it should be kept in mind that it eliminates the supernatural from miracles, so that in the end miracles tend to become just like all other natural events, with no more significance for religion.

On the other hand, that there is probably much truth in this position does not need to be denied. It is entirely possible that some of the episodes related as miracles in the Scriptures were so regarded only because the people of that time did not understand the natural processes of their world. There has been a tendency on the part of man to associate things which he could not understand with the supernatural. But this type of reasoning tends to eliminate God from the world. Such a definition of miracle is based on a naturalistic approach which would have been acceptable to either Spinoza or Hume. While it may seem to lend a hand in dealing with certain miracle stories, in the end it leaves faith with an unanswered question. *See* SCIENCE.

e. The absurd. Not many persons would state the definition of miracle in terms of the famous epigrams of Tertullian: "It is to be believed absolutely, because it is absurd; . . . it is certain, because it is impossible" (*On the Body of Christ* 5). Yet one must understand Tertullian's statement in its context. For one thing, an epigram, in order to achieve picturesqueness, usually states a half-truth, which can be misleading. But Tertullian was thinking of the birth, death, and resurrection of God's Son, which appear

incomprehensible to reason. He assumes the fact of revelation, and his words should be interpreted on the basis of this assumption. As a scientific or philosophical statement, they are unsound. But they have the virtue of recognizing that there are elements in truth which are beyond discursive reason. While Tertullian does not make this explicit, he realizes that rational thought is based on presuppositions which in themselves are not achieved by reason. In this sense his statement is profoundly true, and worth keeping in mind when one attempts to define miracle.

f. Not contrary to nature. Replying to those who doubted miracles of scripture in his time, Augustine was concerned especially with the concept of nature. In *The City of God* XXI.8 he considers the charge of skeptics that biblical miracles are contrary to nature. On the one hand, he says that miracles are not contrary to nature, for nature is nothing but the will of God with reference to any particular object. It is an error to say that a portent is contrary to nature when it occurs according to the will of God, who causes it. Nature, therefore, according to Augustine, must include, not merely the observed order of things about us, but also whatever God does in the universe. The natural is identified with the will of God. If one assumes the existence of God as creator and ruler of the world, there is no necessary problem connected with miracles. On the other hand, Augustine questions the rigid and inexorable character of the order and laws of nature. By pointing to numerous phenomena known in his time which, he thought, did not conform to the order of nature, his approach to the question anticipated the modern view. Scientists are not so confident today of the absoluteness of nature's laws. They readily admit that the laws to a considerable extent are an imposition of abstract principles upon phenomena which in themselves are not necessarily as orderly as logical inference from the laws might appear to indicate.

g. Outside the order of nature. Thomas Aquinas bases his discussion of miracles on Augustine, but his conception of nature appears to be more rigid. He deals with the question in his *Summa Theologica* I.cx.4; I.cxiv.4; II.ii.178.1-2. Unlike Augustine, he says that a miracle is something that occurs outside the order of nature (*aliqua fiunt praeter ordinem totius naturae creatae*). A miracle is therefore not a violation of nature.

But since we do not know all of the order of created nature, in our ignorance we may call something a miracle which really is not. As only God can operate outside the order of nature, only God can perform a miracle. Thomas' concern in this connection is to deny that angels, demons, magicians, etc., can work miracles—a possibility which Augustine seems to allow. His reasoning is that since all these beings are themselves creatures, they are within the order of nature, and so cannot operate outside it. Therefore they cannot work miracles.

h. Essential miracles. René Descartes showed something of the modern attitude toward the definition of miracle when he said: "The Lord performed three miracles: creation, freedom of will and the Incarnation." In these words he deals with the definition of miracle in its essential terms. What he is saying is that the essence of miracle is God, and that there are three real manifestations of God in our universe. The first is creation itself; the second is the freedom of man's will; and the third is the manifestation of God in Christ. These are essential items of Christian faith. Once they are accepted, one is in a position to use discrimination in his evaluation of events reported as miracles.

i. Providence. It is an error, however, to think of miracles only in terms of violations of the order of nature or as happenings outside the order of nature. It may well be that miracles could and do in some cases fit into one or the other of these categories. One has no right to say that God could not operate contrary to the usual processes of nature, or outside them. But to limit miracles to such cases is to overlook the mysterious character of the natural processes. The doctrine of creation involves miracles not only in the sense that God created the universe with all its forms at some time in the past. It means also that he is continuously in the process of creation.

God is like a dynamo which generates electricity that keeps a current going to all the motors, machines, and light globes throughout all the system supplied by the power plant. But we must not be misled by this simple analogy to think of God merely in terms of the physical energy of the world. The analogy must apply also to life in all its forms, to mind, and to all aspects of truth, goodness, and beauty. Paul must have had this in mind when he said in Acts 17:28: "In him we live and move and have our being." In other words, the doctrine of creation involves also the concept of providence. The two are inseparable. Providence must not be thought of merely as something outside, or contrary to, processes of nature. It applies to these processes themselves. Spinoza was right in emphasizing this aspect of the manifestation of God in the world.

j. Mutation, atomic nucleus, and free will. In our time we are in a better position to implement the insight of Descartes. We not only have before us the facts of creation as he knew them. The advance of biological science has revealed the phenomenon of mutation, which is one of the genuine marvels of our universe. The biologist can tell us something of the chromosomes and genes in the cell, but he cannot explain the origin of the new form of life which he calls a mutant, which becomes the first in a new series called a species. Here, it seems, one can see the actual process of creation at work. It may be that in time science will be able to give a complete description of mutation, but such a description is not an explanation.

Another great achievement is the exploration of the atom and the release of atomic energy. We are amazed by the discovery, however, that the electrical particles which constitute the nucleus of the atom do not conform to any known pattern of order and regularity. One might say, therefore, that in the mutant and in the nucleus of the atom we encounter phenomena of discontinuity which transcend what has been considered the order of nature. Yet it would probably be accurate to say that, in some way which we do not understand, both the mutation of biological forms and the strange operation within the atom, each in its own mysterious way, somehow

are included in the order of nature. In a profound sense, therefore, nature itself is a miracle.

Not the least of miracles is the freedom of man's will. This is illustrated in his use of the materials and forces of nature. Man's intelligence enables him to analyze both his own needs and desires and the things of nature. Then he is able to create things for his own use which do not exist in nature. A man who cannot cross the seas by his own natural strength builds a ship; one who cannot fly builds an airplane; and so man constructs automobiles, radios, and all the instruments and machines with which we are familiar. These things are examples of the freedom of man's will, by means of which he goes outside the order of nature to make things for his use and enjoyment.

This same freedom of will is also evident in man's recognition of good and evil, and in the moral choices which he is continually making. Descartes was right in recognizing the freedom of man's will as one of the truly great miracles. It is something outside the mechanistic order of nature. Yet it is not outside nature if we think of nature as all of that which comes from God. It is God who gives man intelligence and freedom of will. In this way God makes it possible for man to have a moral character. This is what the Bible means when it says that man is made in the image of God.

3. The Bible and the laws of nature. As is clear from § 2 *above*, the main difficulty that modern persons feel as they consider the question of miracle arises from the way in which miracle is defined. That is to say, the problem of miracles faced in our time is faced with respect to a particular definition of miracle. The definition that is almost universally held is that a miracle is a violation of the laws of nature. It is against miracle so defined that many persons feel they must rebel. We have seen that the laws of nature are not so absolute as they were once thought to be, so that even in the framework of these laws there is still theoretically a place for miracle. At the same time, after we have stated this possibility of error, we must acknowledge that there is a generally observed order of nature and that the usual phenomena of the world occur according to this order. So it is difficult for a person who is familiar with this orderly aspect of the world to accept any event which is reported to be in violation of it. This is a problem the theologian must face with both sympathy and realism.

a. The biblical view. We can find help in dealing with this problem by going back to the Bible itself. Here we discover that the people of the Bible never faced a problem of miracle. The reason for this is that the problem as we know it has been formulated in terms of a philosophy that has arisen since biblical times. It is a problem for persons who have been trained in philosophy and science. In other words, it is a philosophical problem. The people of the Bible, however, were not familiar with science in our sense of the word, or with philosophy. The Bible has some very great writers, but one will not find there a Plato, an Aristotle, a Newton, or an Einstein.

b. Philosophy and science. The essential element of philosophy and science is their humanistic character. They are achievements of the unaided human mind. Philosophy and science are what the human mind by means of its own powers can achieve by way of understanding our world. They are secular enterprises, proceeding on the assumption that man himself discovers the truth. As man learns about his world, he interprets and generalizes his finds in terms of principles or laws which are universal; and so he arrives at the concept of the laws of nature. This is a process which—in our culture, at any rate—began with the ancient Greeks. It has continued down to the present time and flowered into the achievements of the sciences. The entire enterprise is centered in man. *See* SCIENCE.

c. Revelation. Biblical thought, on the other hand, proceeds on the assumption that knowledge comes from God. Instead of reason, it uses the concept of revelation. Biblical people regard the world as God's creation and under his control. True wisdom is conceived in terms of life in fellowship with God, who makes himself known to man and enables man to live a good life by giving him commandments to keep. The great enterprise of biblical people, therefore, is religion. The meaning and purpose of life are found in God. The wise men of the Bible are priests, prophets, and sages. (The sage comes nearer to the philosophic ideal than either of the others.) Toward the end of the OT period they began to produce what we know as the wisdom literature. This includes such books as Job, Proverbs, Ecclesiastes, and the Wisdom of Solomon. In some places these writings deal realistically and profoundly with the problems of life, but never in merely secular, philosophical terms. They retain the general background of faith and revelation. *See* REVELATION.

d. The laws of nature. Biblical culture never developed the concept of universal laws of nature. In the OT proper there is no word for "nature." One comes upon it first in the apocryphal writings, in which affinities with Greek culture begin to appear. In Wisd. Sol. 7:20 there is a reference to the natures of animals. In IV Macc. 5:7 Antiochus pleads with an old Jew to save his life by eating the "delicious meat of a pig which is a gift of nature." There are numerous casual references to nature in the NT. In Rom. 1:26 Paul refers to certain sexual acts as being against nature. According to Rom. 11:24, the grafting of the wild olive into the tame is against nature. In 2:14-15 Gentiles may know the works of the moral law by nature. Paul argues in I Cor. 11:14 that nature teaches men and women how to wear their hair. Paul's statements no doubt show the incipient stages of theological development among early Christians. From his Stoic contemporaries he had absorbed the idea of living in harmony with nature.

Yet in none of these passages in the Bible do we encounter the concept of nature on the grand scale. Certainly it is never thought of in the rationalistic, secular sense of philosophy and science. Nowhere would one find the idea of universal laws of nature which are autonomous and inexorable. The Stoic idea that all men are by nature children of God appears in Luke 3:38; Acts 17:28, whereas the usual idea in the Bible is that men are sons of God only by faith. The Stoic concept of the rational Logos

which pervades all the universe is clearly reflected in Heb. 4:12-13. But these stray affinities with Greek thought do not represent general philosophical thinking in the biblical writers. They are only intimations of what is to come later as Christian theology comes to its maturity.

It is clear, therefore, that even the most powerful minds among biblical people never faced the problem of miracle as it has been stated in our philosophical tradition. They could not have understood Spinoza and Hume. The reason for this is not that they lacked the intellectual power, but that their thought moved on the basis of a different presupposition. As was stated above, a definition can be understood only in terms of its presupposition. This applies also to questions and problems. Our scientific tradition first arrived at a concept of the world which is secular in nature. It ignored the biblical presupposition, which is that the ground of all being is God. Once modern thought, however, had formulated its secular, essentially atheistic philosophy of the world, it then stated its criticism of miracles on this basis. If one has first accepted the secular philosophy, obviously he faces a problem of miracle which may be insoluble. Philosophers have made the problem more difficult than it actually is. They have made an unbiblical approach to a biblical question; and the problem becomes less difficult if we state it in terms of the stories found in biblical records and on the basis of presuppositions of biblical faith.

4. Miracles of nature. Instead, then, of looking for what are labeled as signs, wonders, portents, prodigies, or miracles, let us examine the miraculous quality of existence itself.

First of all is the creation of the world. What Hebrews believed about the origin of the world is picturesquely summarized by the P writer of Gen. 1:1–2:3 (*see* PENTATEUCH). The story is told again in a somewhat different way by the J writer of Gen. 2:4–3:24. In order to appreciate these stories properly, we should try to think ourselves back to a time when no connected ideas of creation had been achieved by the Hebrew people. But they lived in a world basically not so different from our own—earth, sea, sky, people, and animals. The ancestors of the Hebrews looked out upon that world with amazement and wonder; they felt a sense of awe and reverence; in and through all the bewildering phenomena about them they sensed the existence of the Reality which is the source and ground of all being. They were conscious of something in their hearts which they believed was the revelation of God. Through those objects of the external world God was speaking to them. This sense of revelation is the primordial fact of religion. Those early people saw the world about them as a continuing miracle.

In Ps. 8:3 a poet sings:

> When I look at thy heavens, the work of thy fingers,
> the moon and the stars which thou hast established . . . .

Another, in the Nineteenth Psalm, hears the heavens telling the glory of God and the firmament proclaiming his handiwork. The prophet Amos in 4:13 speaks of the One

> who forms the mountains, and creates the wind,
> and declares to man what is his thought;
> who makes the morning darkness,
> and treads on the heights of the earth.

The author of Isa. 40:26, as he attempts to revive hope in discouraged exiles, points to the stars of the night sky and says:

> Lift up your eyes on high and see:
> who created these?
> He who brings out their host by number,
> calling them all by name;
> by the greatness of his might,
> and because he is strong in power
> not one is missing.

No more beautiful poem of nature has ever been written than Ps. 65:6-13, where God establishes the mountains, stills the roaring seas, controls day and night, waters the earth with rain, and causes the crops of fields and pastures to come to maturity.

Special acts of God are seen in eclipses (Joel 2:30-31; Matt. 27:45), storms (Exod. 14:21; 15:10), earthquakes (Judg. 5:4-5; Matt. 27:51), volcanic activity (Exod. 19:16-18), growth of agriculture (Hos. 2:8), and the lilies of the field (Matt. 6:28-29).

This concept of nature runs all through the Bible. It is one of the most profound expressions of the revelation of God. The world of nature to biblical people never loses its miraculous character. The importance of this insight is recognized by Paul in Rom. 1:19-20. He says that because of this universal revelation no man can plead ignorance of God as an excuse for immoral conduct. This element of biblical thought shows that a miracle is not necessarily an event outside nature or in violation of its laws, but is any occurrence whatever which arouses a feeling of awe, amazement, terror, or wonder, and causes the one who beholds it to see, not merely the phenomenon of nature, but God, whose being it expresses. The secular thought of the modern period tends to deprive man of this source of his faith.

5. Miracles in human life. Biblical faith also presents human life in terms of miracle. In Gen. 2:4-24, J tells how God shaped man's body out of the earth and then breathed into his nostrils the breath of life. As man was unhappy in the vast solitude, the Lord made the animals one by one in an effort to overcome man's loneliness. When they proved inadequate, the Lord put man to sleep, took out one of his ribs, and made it into a woman to be his companion. In this way J explains why it is that a man leaves his own parents and enters into a lifelong companionship with his wife. P, on the other hand, in Gen. 1:27, in his more sophisticated way, says that God created man in his own image. At the same time he made man both male and female, or husband and wife. Marriage, therefore, belongs to human life by the divine fact of creation. Biblical writers never cease to be amazed at the wonder of marriage. Prov. 18:22 says that a wife is a favor of the Lord; 30:18-19 expresses the incomprehensible mystery of love; 31:10-31 marvels at the energy and wisdom of a good wife; Song of S. 8:6-7 knows the deadly jealousy which lurks in love and also its priceless quality; Eph. 5:21-33 uses the wonder of marriage to express the deepest miracle of the Christian life.

No less marvelous is the moral life. While P ex-

plains this by saying that man is created in the image of God, J resorts to allegory. Man eats of the tree of knowledge of good and evil, and so his conscience is born. The way to understand this allegory is to realize that every man who ever lived is Adam and every woman is Eve. Each of us recapitulates the story. Prov. 20:27 recognizes the wonder of conscience as the lamp of the Lord. Jer. 31:31-34 tells of a new covenant when God's law will be written in the conscience of every man. Paul in Rom. 2:15 refers to the moral law which is stamped in the heart. This insight of biblical writers arises from their recognition that there is something about the knowledge of good and evil and the freedom of the will which transcends determinism and mechanism and finds its explanation only in God.

Miracle was seen also in the conception of a child. Eve received Seth from the Lord (Gen. 4:25); the Lord gave Isaac to Abraham and Sarah in their great old age (Gen. 17:15-21), twins to Rebekah (Gen. 25:21), a son to the barren Rachel (Gen. 30: 22), a son to Ruth and Boaz (Ruth 4:13), Samuel to his desolate mother, Hannah (I Sam. 1:19), John to the barren and elderly Elizabeth and Zechariah (Luke 1:7-13), and Jesus to Mary and Joseph (Matt. 1:20; Luke 1:26-31).

The Lord's providence for those who are faithful to him continues throughout life. This belief in God's constant care stands out as a dominant theme in all the stories of the patriarchs in Genesis, but it appears also throughout both OT and NT. The religion of the Bible would be incomprehensible without it. How impoverished would be the faith of the Bible without the Twenty-third Psalm, or the Ninety-first, or the words of Jesus about anxiety in Matt. 6:25-34, or the confidence of Paul in Rom. 8!

The specifically religious experiences of life are all thought of in the sense of miracle. There is, of course, no real differentiation between the religious qualities of different areas of experience according to the Bible. Yet there are certain experiences which stand out. The prophets' are typical. These men believed that their messages came directly from God. According to Amos 1:1, the prophet delivers a message he has seen. To "see" in this sense means to have a religious vision, in which, by insight, or intuition, or faith, one comes to an understanding of what God wants him to say or do. Amos says in 7: 15 that the Lord took him from behind the flock. Exod. 3:2 ff relates how Moses had his first prophetic vision in the presence of a shrub which burned without being consumed. He was in the wild solitude of a mountain. Isa. 6, on the other hand, describes a vision which came to Isaiah in the temple. Ezek. 1: 4-28 tells a story of the prophet's vision as he heard the roar of wind and watched lightning flashes and swiftly changing forms of a rain cloud on a summer day.

In the Bible prayer always has a miraculous character. There are numberless passages in which prayer is presented as an interview between a man and God, where all the dialogue that took place between them is recorded. This reflects the realism of their experience of prayer and the genuine possibility of communion with God. Such a concept is the basis of worship wherever it is presented, either in the OT or in the NT. The Christian idea is the worship of a resurrected and living Christ, not of one who belongs only to antiquity, but of one who is eternally alive and present wherever his disciples gather to worship, or wherever an individual turns to him in faith.

The concepts of vision, revelation, and inspiration are characteristic of biblical religion. They always have a miraculous nature. The miracle is not one which one reads about in a book, but one which is experienced in the heart. In this way one discovers the constant miracle of the religious life.

6. Miracles in national history. According to Gen. 12:1-6, the miraculous hand of God appears first in Hebrew history when the Lord tells Abram to leave Haran and migrate to Canaan. The divine control of Hebrew history is continuous from that date. The exodus from Egypt and the conquest of Canaan are presented in the Bible as notable examples of the miraculous control of history. So are the first struggles toward national unity in Judges; the rise of the nation under Saul and David; the division of the kingdom at the death of Solomon (I Kings 11: 11); the destruction of Israel by Assyria in 721 B.C. (II Kings 17:18), of Judah by Babylon in 586 B.C. (II Kings 24:2-4); the victory of the Maccabeans in 165 B.C. (Dan. 7:13-14; I Macc. 3:18-19; 4:10, 24, 55; 16:3); and the destruction of Jerusalem by the Romans in A.D. 70. Josephus (War VI.v) gives a list of seven portents and prodigies which had foretold this catastrophe.

The divine control of history was stated clearly by Amos *ca.* 760 B.C. It applies not only to the Hebrews. His book begins with a cycle of seven oracles about Damascus, Gaza, Tyre, Edom, Ammon, Moab, and Judah. Then he concentrates his attention on Israel, about whom he is mainly concerned. Moreover, according to Amos 9:7, God's call of Israel is not unique. He has also called the Ethiopians, Philistines, and Syrians. This faith of Amos was shared by all his great successors among the prophets. It is stated in Dan. 4:31-32 by a voice from heaven to Nebuchadnezzar, who has been given the mind of a beast because of his sins. The voice says to the king that his affliction will continue "until you have learned that the Most High rules the kingdom of men and gives it to whom he will"—a view shared by Paul in Rom. 13:1.

If one is to avoid intellectual confusion, however, it must be noted that this view of history is an intuition of faith. It is not a fact of history in the sense that historical research can either prove it or disprove it.

7. Miracles of healing. The cure of illness was often considered miraculous in both the OT and the NT. Records of this type cluster about Elijah, Elisha, Jesus, his first disciples, and the apostles Peter and Paul. They are attested for the patristic period by Justin (Dial. LXXXV; II Apol. VI, VIII), Minucius Felix (Octavius XXVII), Origen (Against Celsus II. 33), and Augustine (City of God XXII.8); and miracles of healing continue to be reported in both Roman Catholic, Eastern Orthodox, and Protestant circles down to our own time.

These reports ought to be set in the context of records of miraculous cures in other cultures of both

ancient and modern times. Religious healing was well known in the Hellenistic world. The Greek god Asclepius (Roman "Aesculapius") was devoted to the cure of disease. His temples were the hospitals of the ancient Greek world. Both Pausanias (II.xxvii.3) and Strabo (VIII.374) mention testimonials inscribed on the walls of the shrine at Epidaurus recording cures. Archaeologists have recovered some of these inscriptions (P. Cavvadias, *Fouilles D'Epidaure* [1893], I, 24 ff.), and also some from the temple of Aesculapius at Rome (*Corpus Inscriptionum Graecarum,* vol. III, p. 804, no. 5980). Cures are mentioned in *The Lover of Lies* by Lucian of Samosata, and also in *The Life of Apollonius of Tyana* by Philostratus. Such reports of divine healing from many parts of the world make it probable that in some cases, at least, cures were effected in the names of divine beings. It goes without saying, however, that in this area one must be on guard against legends.

Our primary concern is with the biblical records, which report miraculous cures of various diseases, and there are a few instances of raising the dead. From a theological point of view, it is possible that God could perform all these miracles if he chose to do it. From the point of view of history, however, which does not make the theological assumption, one can feel certain only of healings which can be confirmed by medical science of our time. It is probable that many of the reported cures of the Bible fall into this category, and that they occurred essentially as they are recorded. The most certain of these are the cases of driving out demons. Verification of this type of healing is possible when we recognize that what biblical writers call demon possession is called mental illness today. Psychiatrists are now able to recognize with reasonable certainty the following types of mental illness in the biblical records: (*a*) the manic-depressive psychosis, illustrated by King Saul (I Sam. 16:14 ff) and by the man of Gerasa (Mark 5:1-20); (*b*) epilepsy (Mark 9:17-27); (*c*) hysteria (Mark 1:23-26; Acts 16:16-18). It appears probable that various other psychoses were encountered in cases of mental illness referred to in the Bible, but they are not described fully enough to allow identification. On the basis of purely historical criteria, we may accept the cures of mental illness essentially as they are reported. But we have no way of knowing whether the cures were permanent, as no further records of them have survived.

That some other diseases were healed by faith is also probable. It is well known that real faith contributes to good health and the healing of disease. Faith is an aid even in organic disease, but medical science would say that it has limits in this respect. So far as we know, faith cannot restore missing eyeballs or amputated limbs. On the other hand, in the area of diseases which are psychogenic in origin the healing value of faith can scarcely be overemphasized. This is the area in which many of the psychoses occur. That Jesus and other persons of the Bible performed cures of other types must be allowed as a possibility, but we are not able to verify them at the present time.

8. Miracles and literary forms. One of the main reasons for the problem of miracles is the monolithic view of the Scriptures which has characterized traditional interpretation. This view fails to recognize that the Bible is a literature composed of various types of writing. The first obligation of the interpreter is to recognize the type or form of writing with which he is dealing in any particular case. The Bible was first of all the literature of an ancient people. It was produced in the course of no less than a thousand years. It covers the life of the Hebrews from the time when they lived as nomads to the rise of their nation, the period of the monarchy, the division of the kingdom, the fall of both kingdoms, the Exile, the struggles to return and rebuild the nation, domination by foreign powers, and final destruction in A.D. 70 by the Romans. The NT continues the story with the life of Jesus, the origin of Christianity, and its spread throughout the Mediterranean world. The Bible comprises the literary masterpieces of that long period. It is somewhat parallel to an anthology of English literature from Caedmon and Chaucer to the present time. It contains early ballads, historical records, law codes, prophets, psalms, wisdom literature, short stories, parables, letters, apocalypses, myths, legends, and possibly other types of writing.

a. Saga. The story of Samson in Judges is a saga. Samson is parallel to the Greek Hercules. His deeds should be interpreted in this light. The truth of the saga is that it presents the agelong struggle between Hebrews and Philistines, a conflict which was never resolved. It brought only tragedy to both peoples. Samson represents the Hebrews who waste the power which God has given them.

b. Short story. Jonah is a short story which has been misunderstood because of the fish episode. It is a satire on Hebrew nationalism and sets forth God's love for all nations. The incident of the fish is irrelevant to the main point. It was used by the writer as a convention to get his story read. He drew the motif from folklore. There are parallel stories in various cultures of a man's being swallowed by a beast of some kind and finally surviving.

c. Apocalypse. The book of Daniel is a collection of stories in the form of an apocalypse (*see* APOCALYPTICISM). These stories are fiction, although they deal in most cases with a historical person, Daniel. They are best understood as allegorical expressions of faith in the providence of God for his people. They urge the Jews to be faithful to their religion in opposition to the Syrians, who are attempting to destroy it *ca.* 165 B.C. (*see* DANIEL). The Revelation to John is similar to Daniel. It also is a work of religious fiction. Its purpose is to encourage loyalty in early Christians as they face Roman persecution. *See* REVELATION, BOOK OF.

d. Myth. The Garden of Eden is a myth. It gives a picture of human nature. Adam and Eve are everyman and everywoman, and the serpent is the voice of temptation which each of us knows in his heart. The story is a profound study of the moral life. Gen. 9:8-17 gives the myth of the rainbow, and 11:1-9 presents the myth of languages. *See* MYTH.

e. Legend. The plagues in Egypt and other wonders which accompanied the Exodus and the conquest of Canaan are thinly veiled natural phenomena which Hebrews saw as acts of God. *See* LEGEND.

f. Poetry. Some miracle stories have a poetic origin. The episode about the sun's standing still in

Josh. 10:12-14 is of this type. What the author writes down in prose is a misconstruction of the poem he has just quoted (*see* POETRY). It is possible that this approach applies also to the VIRGIN BIRTH, which occurs in Matt. 1:18-25; Luke 1:26-38, and is based on Isa. 7:14 in Greek. The withering of a fig tree in Mark 11:12-14, which is out of character for Jesus, appears to be a misinterpretation of one of his poetic sayings.

g. Portents. The list of portents which Mark 15:33-38 says occurred while Jesus was on the cross mentions only an eclipse of the sun and the rending of the veil of the temple, but Matt. 27:51-53 inserts an earthquake, rending of rocks, rising of saints, and their appearance in the city. These portents are parallel to prodigies which Josephus lists in his War VI.v in connection with the destruction of the temple in A.D. 70 and to similar events reported by numerous Greek and Roman writers. They are dependent partly on OT passages, such as Joel 2:30-31, which announces portents to precede the day of the Lord. *See* SIGNS AND WONDERS.

h. Parables. In some cases miracles are used as parables. This is true especially in the Gospel of John. *See* JOHN, GOSPEL OF; *see also* § 9 *below*.

i. Cult stories. Belief in the resurrection of Jesus is based on statements of those who testified that he appeared to them alive. The oldest record is I Cor. 15:1-8. The Christian story has literary parallels in cult narratives of Osiris, Attis, Adonis, and Persephone, who symbolize the death and resurrection of vegetation in autumn and spring. Important differences, however, are that Jesus was a historical person and that belief in his resurrection is based on testimony of eyewitnesses. *See* RESURRECTION IN THE NT.

9. Miracles versus prodigies. As we have seen, the word "miracle" is a flexible term which may include phenomena of many kinds, such as acts of God in creation, processes of nature, spiritual elements and experiences of human personality, or spectacular phenomena believed to be either outside the processes of nature or in violation of them. This last type is usually designated as a sign (*see* SIGNS AND WONDERS), portent, or prodigy. It is evident, therefore, that a prodigy must be a miracle, but a miracle is not necessarily a prodigy.

The religion of the Bible is based on the concept of miracle throughout, but it is not always based on prodigies. The truly great persons of the Bible almost never make use of a prodigy. Prodigies are most frequent in those sections of the Bible which have a popular character. Of this type are the records of the Exodus, of the conquest of Canaan, of the prophets Elijah and Elisha, and some of the gospel material —e.g., the infancy stories and the lists of portents which occurred when Jesus died. The first part of Acts is also of this popular character.

Great prophets like Amos, Hosea, and Isaiah, who have left autographic records, did not rely on portents and prodigies. They depended on miracles of the other type. The same is true of Paul. While he makes numerous references to miracles in his letters, he does not exploit them as portents. He depends on miracles of other kinds as the basis of Christian faith.

Opposition to the use of portents and prodigies is evident also in Jesus. In the temptation story of Matt. 4:1-11, where Satan challenges Jesus to turn stones into bread or to leap from a pinnacle of the temple, Jesus declines. He refuses to base his claims on prodigies. When the Pharisees, according to Mark 8:11-12, ask Jesus to give them a sign from heaven, he sighs deeply and then says that no sign will be given. This is the first stage of this particular tradition. The second stage comes from the Q document, as preserved in Matt. 16:4; Luke 11:29. Here Jesus says that no sign will be given except the sign of Jonah, and it is clear from what follows in Luke that the sign of Jonah was his preaching to Nineveh. But this tradition continues its development and appears in its third stage in Matt. 12:39-40, where Matthew has inserted into the Q tradition the three days and nights of Jonah in the belly of the whale. So, he has Jesus say, the Son of man will be three days and nights in the heart of the earth. The third stage of the tradition is in conflict with what Jesus himself had said about a sign from heaven. It shows what happened to this tradition as it was carried along in popular circles.

One notes also Jesus' refusal to allow his miracles of healing to be treated as prodigies. It was his custom to charge those whom he healed not to say anything about what had happened. This is shown in Mark 1:25, 34, 44; 3:12; 5:43; 8:26. While he performed numerous miracles, they were done out of compassion for persons in need. He healed their diseases because he loved them, but he was unwilling to have his deeds exploited as prodigies.

It is true, however, that other persons, including the disciples, soon began to regard the miracles of Jesus as portents and prodigies. In places the gospels exhibit this interest characteristic of popular circles of both the ancient and the modern world. The Gospel of John appears at first reading to be a notable example of this interest. It presents a series of seven spectacular miracles of Jesus. Each of them is usually called a sign, and the author comes to his culmination in 20:30 by saying that Jesus did many other signs which are not written in his book, but that those which he has recorded are for the purpose of producing faith in Jesus as God's son. However, a careful study of the Fourth Gospel shows that even this author is not primarily interested in prodigies in the popular sense. One discovers that these seven prodigies are in fact used as allegories of Christian truth. They replace parables which are so prominent in the Synoptic gospels but are lacking here. *See* JOHN, GOSPEL OF.

10. Miracles and faith. Christianity is a historical religion. It has its setting in a context of real events. Historical research can establish that many of these events occurred. Yet because of its naturalistic presupposition, research can never demonstrate that an event is an act of God. It assumes that any event with which it deals has a naturalistic explanation. This is not to say that historians are necessarily unbelievers, but the method with which they deal is limited to the natural order. Only faith is able to apprehend the hand of God in an event. Revelation is a fact of faith but not a fact of historical information. A fact of faith is not the kind of fact with which historical research can deal. It can neither be

proved nor be disproved by it. As God and faith are beyond the naturalistic order, research is unable to give us information about them. An ordinary event as apprehended by faith may be a miracle. Historical research assumes that the same event is neutral, colorless, naturalistic, secular. Faith must challenge this assumption with its deeper intuition. At the same time, the believer as a natural man does not forget the question which reason asks. Faith has to accept the doubt which it transcends.

One should keep in mind that a miracle is any event, whether natural or supernatural, in which one sees a revelation of God. Whether a miracle is outside the laws of nature or a violation of them is essentially irrelevant for faith. It is evident in many ways that religious faith is grounded in the sense and possibility of miracle. Faith is man's response to his apprehension of God's revelation. But faith must not be equated with historical, scientific, or philosophical information. It is not an achievement of the intellect alone. Hume demonstrated that whoever attempts to base faith solely on reason will land in skepticism. There is something of the skeptic in every man. Reason always challenges faith with the threat of unbelief.

How faith comes is a mystery. Some find it by reading the Scriptures; others, in a sermon, or the liturgy, or the sacraments; or it may come from the contemplation of nature, or the wonders in human life. Faith is contagious; it passes in strange ways from one person to another; but whenever it comes, one knows it; one feels the miracle within oneself. The outcome of the debate over whether certain miracles of the Scriptures occurred can never provide the real answer to man's religious question. While such miracle stories are not unimportant as expressions of ancient faith, they are subordinate to the miracle which occurs in one's own life when he is born of the Spirit of God.

Blaise Pascal was right when he said the heart has reasons which the mind does not understand. This is the meaning of Paul's words in I Cor. 1:22-25, where he condemns Jews who seek after prodigies and Greeks who are in search of wisdom, and then affirms that the gospel, while it appears to be foolishness, is in fact the redeeming power of God. Paul himself never ceases to wonder about the nature of faith, but the nearest that he is able to come to its secret is to say in Eph. 2:8 that it is a gift of God.

S. V. McCasland

MIRIAM mĭr'ĭ əm [מרים, *see* 1 *below*]. **1.** The daughter of Jochebed, and the sister of Moses and Aaron. Although not mentioned by name, she is presented in the E document as watching after the basket into which the infant Moses had been put and fetching his mother as a nurse (Exod. 2:4, 7-8). She is also remembered as a "prophetess" in connection with her song of victory on the occasion of the crossing of the Sea of Reeds (15:20-21); the song is one of the earliest fragments of Hebrew poetry (*see* Poetry, Hebrew, § G6). But she was also involved in, if not the leader of, the rebellion against Moses when he married a Cushite woman. Along with Aaron, she claimed to be an oracle of Yahweh. But Yahweh heard their boasts and rebuked them; Miriam was struck with leprosy, but Moses interceded for her, and she was healed after a quarantine period of seven days (Num. 12). She is not mentioned again until the occasion of her death and burial at Kadesh (20:1). In later times she was remembered both as a leader sent by Yahweh (Mic. 6:4) and as an example to Israel in cases of leprosy (Deut. 24:9). Later Jewish legends present her as the eldest of the three children, as a wife of Caleb, and as a prophetess who foretold the birth of Moses as a savior. Jerome says that her tomb was exhibited close to Petra. *See* Sela 1.

The name Miriam has been variously interpreted. The rabbis understood it to mean "bitterness," while Jerome proposed "star of the sea." Modern interpretations are: (*a*) "plump one," from the root מרא III; (*b*) "the wished-for child," from Arabic *marām;* (*c*) "one who loves or is loved by Yahweh," from Egyptian *mer,* "love"; and (*d*) simply "the beloved," from the same Egyptian word. The LXX has Μαριάμ, which is NT Greek for Mary. The name was common in NT times; Josephus mentions six women with the name Mariamne, among them the second and third wives of Herod.

2. A relative of Shammai and Ishbah (I Chr. 4:17). The KJV follows the MT and does not give either the mother or the father; the RSV inserts a sentence from vs. 18 and makes Miriam a son or daughter of Mered and Bithiah. The text of the LXX is also corrupt.

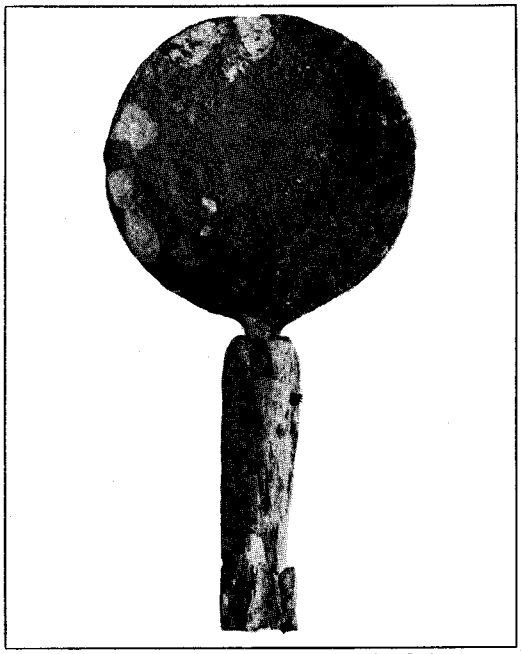
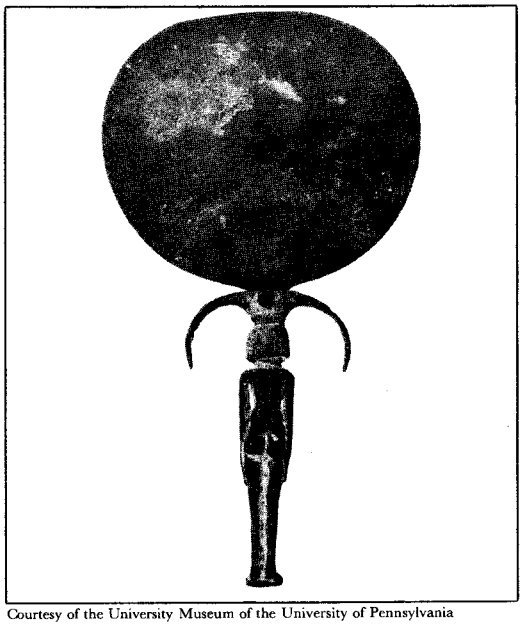
MIRMAH mûr'mə [מרמה] (I Chr. 8:10). A Benjaminite, one of the seven sons of Shaharaim by his wife Hodesh.

MIRROR [מראה, ראי, *from* ראה, to see; ἐσόπτρον]. Ancient mirrors were made of polished metal, as is suggested by Exod. 38:8; the laver of the tabernacle was made by melting the bronze mirrors of the women who "ministered at the door of the tent of meeting." Job 37:18 compares the sky to a "molten mirror," obviously of metal. Glass mirrors were not available until late Roman times. Hence the rendering of the Hebrew and Greek words for mirror by "looking glass" (KJV) is an archaeological anachronism, and the "molten looking glass" of Job 37:18 KJV is doubly erroneous. For the same reasons, the translation of the Hebrew גלינים by "glasses" (Isa. 3:



Courtesy of the Palestine Archaeological Museum, Jerusalem, Jordan

53. Palestinian bronze mirror from 'Athlit (fifth century B.C.)



Courtesy of the University Museum of the University of Pennsylvania

54. Bronze mirror with bone handle; from Abydos, Egypt

23 KJV) is also to be rejected. These objects, which according to context are articles of women's apparel, might indeed be mirrors, but then they are not of glass; and if they are made of glass, then they are not mirrors, but glass beads and trinkets. The RSV rendering, "garments of gauze," is highly hypothetical. The etymology suggests something shiny or transparent, but does not lead to more precise conclusions.

Mirrors were considered at first as highly valuable objects. They are mentioned often among the presents which kings and princes made to one another. Thus the documents of TELL EL-AMARNA refer to a gift of thirty-two mirrors of polished bronze from Egypt by Amenophis IV to Burraburiash and of a silver mirror by the Hittite king. Figs. COS 47, 49; MIR 53-54.

One may not necessarily infer from Exod. 38:8 that the women bearing mirrors, who stood watch at the entrance of the tabernacle, were fulfilling recognized functions in the official worship. A text of I Sam. 2:22 refers to similar persons as actually engaged in prostitution at the gates of the temple at Shiloh. At any rate, there is no reason why the mirrors of Exod. 38:8 should be classified among utensils designated for the worship of Yahweh.

By reason of the relative luxury brought in by the all-pervading Hellenistic culture, the use of mirrors became widespread, and ceased to be the privilege of court ladies or of high-rank prostitutes.

Specimens of bronze mirrors have been found in Palestine in the course of excavations, most of the time together with miscellaneous jewelry and articles of women's apparel. They are circular in shape, sometimes of one piece, but more frequently with a handle of wood or ivory, or without a handle at all. A bronze mirror from Tell el-'Ajjul near Gaza, the handle of which is shaped like a lotus flower, is probably an Egyptian import from the Eighteenth Dynasty. The greater number of mirrors found in Palestine and Syria range from the postexilic period to the Roman times. The ornamentation of their handles, showing engraved dots and circles, volutes, etc., belongs to the composite art of the Mediterranean seaboard, characterized by the fusion of Egyptian, Mesopotamian, Aegean, and Anatolian traditions. The unpolished face of the mirrors was usually bare. One Hellenistic specimen from Gezer, however, had its back side adorned with a cluster of grapes in relief.

MISACH mīs'ăk. Douay Version form of MESHACH.

MISAEL. KJV Apoc. form of MISHAEL.

MISCARRIAGE. *See* UNTIMELY BIRTH.

MISGAB mīs'găb. KJV translation of המשגב (lit., "the height"), as a Moabite place name, in Jer. 48:1. The RSV treats the word as a common noun and translates "the fortress."

MISHAEL mĭsh'ĭ əl [מישאל, *possibly* who is what God is?; Apoc. Μισαήλ]; KJV Apoc. MISAEL mĭs'—. **1.** A Levite, son of Uzziel and cousin of Aaron (Exod. 6:22), who with his brother Elzaphan was obliged by Moses to dispose of the bodies of Nadab and Abihu, who had desecrated the altar of the Lord (Lev. 10:4; cf. vss. 1-3).

2. One of those who stood beside Ezra during the public reading of the law (Neh. 8:4; I Esd. 9:44).

3. One of Daniel's three friends (Dan. 1:6-7, 11, 19; 2:17; Song Thr. Ch. 66; I Macc. 2:59; IV Macc. 16:3, 21; 18:12); surnamed by the Babylonians Meshach (Dan. 1:7; *see* SHADRACH, MESHACH, ABEDNEGO).

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 249. B. T. DAHLBERG

MISHAL mī'shəl [משאל] (Josh. 19:26; 21:30); KJV MISHEAL mĭsh'ĭ əl. Alternately: MASHAL mā'shəl [משל] (I Chr. 6:74—H 6:59). A Levitical town on the border of Asher. Mishal is no. 39 (Egyptian *msh'r*) in the list of towns conquered by Thut-mose III. Its exact location is unknown. G. W. VAN BEEK

MISHAM mī'shăm [משעם] (I Chr. 8:12). A Benjaminite; one of those who built Ono and Lod.

MISHEAL. KJV form of MISHAL.

MISHMA mĭsh'mə [משמע]. **1.** A son of Ishmael, and hence the name of an Arabian people (Gen. 25:14; I Chr. 1:30). A Jebel Mishma is given on some maps, between Teima and Jebel Shamar, but the reading is uncertain.

2. A descendant of Simeon, and son of Mibsam (I Chr. 4:25). The presence of the two names Mibsam and Mishma here, as well as in the Ishmaelite genealogy, may indicate that the two were Arabian tribes that had become affiliated with Simeon in the course of the latter's expansion southward (vss. 38-43).

S. COHEN

MISHMANNAH mĭsh măn'ə [משמנה] (I Chr. 12:10—H 12:11). One of the famed Gadite warriors who joined the proscribed followers of David at Ziklag; he subsequently became an officer in David's army.

MISHNA mĭsh'nə [משנה, *from* שנה, *shānâ,* repeat]. A term used generally to denote the body of Jewish law transmitted orally, as distinct from *mikrâ* (מקרא), denoting the law transmitted by written documents (scripture) and learned by reading. More specifically, the term "Mishna" denotes the collection of oral laws compiled by Rabbi Judah the Prince (born in the year 135 of the Christian era). The Mishna is divided into six orders (סדרים, *Sᵉdharîm*), which in turn are grouped into sixty-three treatises, or tractates (מסכתות, *Massekhtôth*), embracing the whole of the Jewish religio-legal system as taught in the schools of Palestine up to the time of its compiler.

See also TALMUD.

I. EPSTEIN

MISHRAITES mĭsh'rī īts [משרעי] (I Chr. 2:53). One of the families of Kiriath-jearim, from whom came the Zorathites and the Eshtaolites.

MISPAR mĭs'pär [מספר; Apoc. 'Ασφαράσος] (Ezra 2:2; I Esd. 5:8); KJV MIZPAR mĭz'—; KJV Apoc. ASPHARASUS ăs făr'ə səs. Alternately: MISPERETH mĭs'pə rĕth [מספרת (*feminine*)] (Neh. 7:7). One of those who returned with Zerubbabel from the Exile.

MISREPHOTH-MAIM mĭz'rə fŏth mā'əm [משרפות מים, *see below*] (Josh. 11:8; 13:6). A place in the neighborhood of Sidon; now called 'Ain Mesherfi, where there are warm springs. Some scholars think the place is identical with Khirbet el-Musheirefeh, where ruins have been found, but 'Ain Mesherfi seems more likely.

The name may mean "lime-burning at the water." Joshua pursued the Canaanites, defeated at the waters of Merom, as far as Misrephoth-maim, on the boundary of the Sidonians. A. S. KAPELRUD

MISSIONS. The sending of representatives of a deity for the purpose of conveying a message or carrying out a task. In a larger sense, activities of a religious community dedicated to the propagation of its faith in other communities.

From time immemorial, messengers have traveled back and forth between peoples, bearing messages and performing acts as empowered representatives of their senders. Though such messengers are most frequently attested as representatives of kings, we hear in the Mari Letters also of a message delivered by a functionary of a god of Aleppo (indirectly) to the king of Mari, in a neighboring state. So far as is known, there was little deliberate attempt in antiquity (before the Hellenistic period) to convert people from one religion to another except in the framework of political and military action, though the Mari letter mentioned above was intended to impose religious (cultic) obligations upon the king of Mari. Assyrian imperialism certainly had close ties with religion, and resulted in certain religious obligations being imposed upon their vassals (II Kings 16:10-16). The attempt of the "heretic king" Akh-en-Aton of Egypt to impose a new religion upon his land was also closely connected with political concerns.

There is impressive evidence for the wide diffusion of certain religious cults, even though it is frequently unknown precisely how this diffusion took place. Egyptian gods were worshiped at Byblos in Phoenicia perhaps before the First Dynasty of Egypt. Deities of the Third Dynasty of Ur were worshiped at Haran in N Syria, and at Qatna in central Syria, long after Ur fell. Canaanite deities had temples and considerable popularity in Egypt during the New Empire, and in the same period the Mitannian king perhaps deserves credit for devising the simplest form of missionary activity: he sent the goddess Ishtar of Nineveh herself to Egypt in order to receive the honor due her from the pharaoh; and we hear the same thing had taken place in the preceding generation. The Philistines seem to have taken over a god (Dagon) who is first attested a thousand years earlier in E Syria, and the Canaanite Baal in many cases was the storm-god Hadad, who also seems to have originated in the same region. The diffusion of worship of certain gods and goddesses thus is well known long before there is any direct evidence of missionary activities in the modern (i.e., since Alexander the Great) sense of the term. This kind of transplanting of religions is closely tied up with diffusion of other

cultural features, and may very well have been a direct result of migrations of peoples as well. It is probable that certain temples enjoyed a sort of international prestige in particular types of activities such as law, omenology, healing, and the like, on account of highly specialized priestly traditions.

It is not, therefore, surprising that examples of such religious diffusion are to be found in the Bible. According to the historical narratives, Canaanite deities were received in Israelite cities from the time of the judges on. Ahab and Athaliah evidently established the cult of the Tyrian Baal (Melqart) as the (or an) official state religion (I Kings 16:31-32; II Kings 11:18) of Israel and Judah respectively. The king of Moab sent to N Syria for the diviner Balaam (Num. 22), just as the king of Cyprus sent to Egypt for a specialist in divining by the flight of birds (if this is the correct interpretation of Amarna Letter No. 35:26, Knudtzon). The king of Damascus sent an officer, Naaman, to the king of Israel to be healed of leprosy (II Kings 5). The prophet Elijah received a commission to anoint Hazael king of Damascus (I Kings 19:15).

In addition to this type of propagation of particular religious traditions and techniques carried, so to speak, by political, economic, and personal concerns, there is some reason to believe that the OT faith was at the beginning an active missionary religion. Josh. 24 seems to present a narrative of a message to those outside the religious community urging them to transfer their religious loyalty to Yahweh, God of Israel. Though the problem of the identification of Yahweh with the "god of the fathers" is difficult, it may well have been that Moses' mission to the Hebrews (=people without a political status) in Egypt was essentially a transference of religious loyalty. Finally, the historical difficulty, if not impossibility, of accounting for the large population of the twelve tribes even before the monarchy (possibly a quarter of a million), makes it necessary to assume that a considerable part of the population of Palestine was converted to Yahwism during the Conquest, since it is biologically impossible that they all should have been lineal descendants of the group who emerged from Egyptian slave-labor camps under the leadership of Moses.

After the initial formation of the twelve-tribe federation, there seems to have been little further expansion. Whether the empire of David resulted in any diffusion of Yahwistic traditions in foreign lands is completely unknown; it is also not at all certain that obligations to Yahweh were imposed upon non-Israelite peoples. (Does Ps. 2 possibly reflect some such pattern of thought?)

Though the prophets occasionally addressed oracles of Yahweh to foreign NATIONS from Amos on, the first direct statements of conversion of foreign peoples comes, surprisingly enough, from the time of the Exile. Isa. 56:3 presupposes that foreigners had been converted, and the same prophet contemplates future wholesale acknowledgment of the God of Jacob by pagan lands (45:14; 49:6; 55:5; 60:6, 10-14). Political and economic implications are present even here, but, interestingly enough, they are the result, not the cause, of religious attachment to Yahweh. The book of Jonah also presupposes a missionary activity to a foreign people, and it is hard not to take this as based upon some sort of known activity on the part of the religious community of exilic or postexilic times.

The missionary activities of Judaism also are well attested, and evidently had considerable success in the Hellenistic period. Jesus refers to them in Matt. 23:15, and proselytes (*see* PROSELYTE) are mentioned in Acts 2:11; 6:5; 13:43. The Qumran community, on the other hand, may not have sought out converts, though it is difficult to believe that they exercised no initiative in this direction during the two centuries of their existence.

The extent to which early Christianity followed previous Jewish customs and patterns in its mission to non-Jews cannot be determined with certainty. Though the term "APOSTLE" corresponds linguistically to late Hebrew שליח, the differences historically are too great to regard these plentipotentiaries of rabbinic Judaism as the historical model for the Christian apostles. Rather, the prophets of the OT seem to correspond much more closely to the early Christian conception of their function. Jesus himself, in the gospel narratives, is "sent" with a message (Matt. 15:24; Luke 4:18), as is John the Baptist (Matt. 11:10). Jesus, in turn, sends out the Twelve with power (Matt. 10), and the Seventy (Luke 10:1-20).

Regardless of the historical problem of the antecedents of the apostolic function, there can be no doubt that the Christian community from the very beginnings regarded the proclamation of the message of the GOSPEL to all peoples as a most important aspect of its religious obligation. That mission was soon separated (if not from the very beginnings) from the process of diffusing particularistic Jewish cultural and religious features, but, on the other hand, early Christianity could not entirely identify itself with Hellenistic-Roman culture (Gal. 3:28). The church had to depend upon religious motivations, for it was not a high-prestige group (I Cor. 1:26-30; 2:1-5; 4:9-13).

Though the book of Acts gives much information about missionary journeys of those scattered after the death of Stephen (8:4), of Peter (ch. 10), of Barnabas (11:22), and of others (11:19-20), little is known in detail about the beginnings of the churches in Damascus, Lydda, Antioch, and Rome. There can be little doubt that the persecution following the martyrdom of Stephen directly resulted in more widespread missionary activities, and very soon these activities were directed to non-Jewish peoples as well as Jews (Acts 10:28-29; 11:19-20). Paul's mission to the GENTILES is thus the continuation on a wider scale of that which had begun at the time of his conversion.

MIST [אד (Gen. 2:6; Job 36:27; KJV VAPOR), *probably* a subterranean stream of water, flood; *cf.* Akkad. *edû,* flood, waves, swell, *a loan word from* Sumer.; נשאים (Jer. 10:13; 51:16; KJV VAPORS), fog *or* clouds, *from verb* to lift up; ענן (Isa. 44:22; Hos. 13:3, KJV CLOUD); ἀτμίς (Jas. 4:14; KJV VAPOR); ἀχλύς (Acts 13:11), mistiness which darkens the vision of the blind]. In Gen. 2:6 אד refers to the water which was essential to God's creation of organic life. The creation story beginning in Gen. 2:4*a* reflects a background in the flood-valley culture of Mesopotamia; this is suggested in part by the origin of אד (*'êdh*) in the Akkadian *edû,* which indicates an underground source of fresh water. In a Sumerian-Akkadian vocabulary it is associated with *butuqtum,* meaning "break-through" of the subterranean water, and *mēlu,* "flood" or "ground flow." Job 36:27 suggests a Palestinian adaptation of this idea, in that here God distils rain from the mist which rises from the earth. God's creative power is attested by the waters in the heavens, the wind in his storehouses, and the "mist" which he causes to come up "from the ends of the earth" (cf. Jer. 10:13; 51:16). The other occurrences of "mist" noted above are figurative.

***MITANNI** mĭ tăn'nē. An important kingdom in N Mesopotamia during the Amarna Age (fifteenth-fourteenth centuries B.C.). While the main stratum of its population was Hurrian (*see* HORITES), and its monarchs occasionally used Hurrian as a language for royal correspondence, the Mitannian aristocracy were Indo-Iranian warlords in control of horse-drawn chariotry. At the height of Egyptian power under Thut-mose III (*ca.* 1502-1448 B.C.), the Euphrates River was the border between Mitanni and the Egyptian Empire. Thereafter, Mitanni princesses entered the royal Egyptian harems and achieved great influence in Pharaonic circles.

The importance of Mitanni in the Bible world is not so much political as cultural. The Hurrians (who were a major ethnic element throughout the Near East during the second millennium B.C.) exerted considerable influence outside the Mitannian borders, and the ruler of Jebusite Jerusalem bears the Hurrian title האורנה (the *iwirne*), "the chief, ruler," in II Sam. 24:16. *See* ARAUNAH.

MITE. *See* MONEY, COINS, § 3*c*.

MITHKAH mĭth'kə [מתקה] (Num. 33:28-29); KJV MITHCAH. One of the wilderness stations of the Israelites after Hazeroth. The location is unknown.

MITHNITE mĭth'nīt [מתני] (I Chr. 11:43). A title applied to Joshaphat, one of David's army. The text is questioned.

MITHREDATH mĭth'rə dăth [מתרדת, *from Pers.,* gift of Mithra (the deity)]; Apoc. MITHRIDATES mĭth'rə dā'tēz [Μιθραδάτης, Μιθριδάτης]. **1.** The treasurer under Cyrus king of Persia who delivered the temple vessels to Sheshbazzar to be returned to Jerusalem (Ezra 1:8; I Esd. 2:11). I Esd. 4:57 attributes the return of the vessels to Darius.

2. A Syrian officer in the reign of Artaxerxes II who was among those opposing the rebuilding of Jerusalem (Ezra 4:7; I Esd. 2:16).

MITRE. KJV word for certain types of headdress. *See* TURBAN.

MITYLENE mĭt'ə lē'nĭ [Μιτυλήνη] (Acts 20:14). The chief city of the Aegean island of Lesbos off the SE coast of Asia Minor, on the route of Paul's third journey.

Liberated in 479 B.C. by the Greeks from the domination of Persia, the city joined the Delian Confederacy, but was brought to the verge of destruction as a result of two secessions from the league. For a time it was a vassal city of Lysander the Spartan, but in the fourth century B.C. an alliance with the Attic League and Athens was renewed. Freed by Alexander, it passed under successive rules of the Ptolemies and the Seleucids. It became a popular holiday resort for Roman leaders and suffered severe punishment for the support given by its citizens to the revolt of the Pontic king Mithridates. The city's acropolis and walls were stormed and destroyed in 80 B.C. by the Romans in reprisal for a revolt over taxation; but freedom was restored by Pompey, who found asylum here from Julius Caesar. The city continued to be a favorite residence for influential Romans, regaining its freedom after losing it for a time under Vespasian. It was devastated by an earthquake in A.D. 151-52. During the Middle Ages the name of the city was applied to the island as a whole.

In the return to Syria from Achaia (Acts 20:2; presumably Corinth), Paul and his companions sailed from the W coast port of Assos to Mitylene, departing the following day toward Chios and Samos, and stopping overnight at each until Miletus was reached.

MIXED MULTITUDE [ערב רב; *cf.* אספסף, rabble; LXX ἐπίμικτος *for both words*] (Exod. 12:38). A heterogeneous group of camp followers who joined the Hebrews in the exodus from Egypt. The Hebrew term is used elsewhere to designate "those of foreign descent" attached to Judah (Neh. 13:3), Egypt (Jer. 25:20; "foreign folk"), and Babylon (50:37; "foreign troops"), and in Jer. 25:24 the "mixed tribes" of the desert.

See also NATIONS; FOREIGNERS. E. J. HAMLIN

MIZAR mī'zär [מצער, littleness] (Ps. 42:6—H 42:7). A mountain mentioned in connection with the region of the Jordan and Hermon. Since this whole psalm contains allusions to the sources of the Jordan near Dan, Mizar is apparently some locality in the neighborhood. On the other hand, the word may be merely an adjective, used to contrast the majestic Hermon with the "smallest" mountain. The site is unidentified. S. COHEN

MIZPAH, MIZPEH mĭz'pə [מצפה]. The name of several towns in Palestine and neighboring lands; usually spelled "Mizpah," but also "Mizpeh." The former spelling always appears with the definite article except in Hos. 5:1; the latter spelling has the article (Josh. 15:38; 18:26), but more often is in construct relation, as in "Mizpeh of Moab" (I Sam. 22:3) or "Mizpeh of Gilead (Judg. 11:29). The word is derived from צפה, "to look out," "to spy," or "to watch"; hence the meaning "watchtower" or "outlook point" (II Chr. 20:24; Isa. 21:8). In several instances the LXX translates the name as a common noun, as in Judg. 10:17; 11:29 (ἡ σκοπία). It is not surprising that the name should be applied to many places or that the verbal root should be reflected in other names like Zephath (Judg. 1:17), Ramathaim-zophim (I Sam. 1:1), or Zophim (Num. 23:14). The Greek text gives a number of forms for the word: Μασσηφά (Judg. 11:11, 34); Μασφέ (Neh. 3:19); Μασφά (II Chr. 16:6); Μασσώχ (Josh. 11:8); Μασσηφάθ (II Kings 25:23; but Μασσηφα in vs. 25, A). In the familiar context of Jacob's covenant with Laban it has ἡ ὅρασις.

1. Mizpeh of Gilead (מצפה גלעד; Gen. 31:49; Judg. 10:17; 11:11, 29, 34; Hos. 5:1[?]). While the topographical clues are meager in the Genesis context and rather obscure in Judges, it is clear in the former that Jacob is moving S toward the "mountain of Gilead" (Gen. 31:21, 25; הר הגלעד; RSV "hill country") and only later crosses the Jabbok. Many proposals have been made for the identification of the site: Ramoth-gilead; Suf, a locality near Jerash (Conder); and especially Jebel Jel'ad (De Vaux, Kraeling). Glueck is doubtless correct, however, in insisting upon a region in N Gilead, both for the scene of the covenant in Genesis and for Jephthah's home and base of operations.

After a bitter quarrel concerning Jacob's flight from Paddan-aram, Laban proposed a covenant between them (Gen. 31:43-55). The event was solemnized by the erection of a pillar (*maṣṣēbâ*) and by a heap of stones. The word *maṣṣēbâ* has fallen out of the text in vs. 49, because of its similarity with "Mizpah," and is correctly supplied by the RSV (for מצפה the Samar. reads מצבה). The two covenant makers called the cairn the "heap of witness," Laban in his native Aramaic, Jacob in Hebrew (גל עד). But the pillar was named Mizpah (i.e., "Watchpost"), in memory of Jacob's words: "Yahweh watch between you and me, when we are absent one from the other." The story is plainly etiological, and the words probably become the *hieros logos* of a sanctuary.

At the time of Jephthah the Ammonites mobilized their forces in order to drive out the Israelites from Gilead (Judg. 11). The Israelites pleaded with Jephthah to be their leader against the foe. The Israelites were encamped at Mizpah, and there they entered into a bond with Jephthah, sealed significantly with the words: "Yahweh will be witness between us" (בינותינו; lit., "hearer between us"; Judg. 11:10; cf. Gen. 31:44, 48, 52). The cultic language is clear, notably in vs. 11: "Jephthah spoke all his words before Yahweh at Mizpah." The Spirit of Yahweh fell on him, and under its power he passed through Gilead and Manasseh and on to Mizpah. When he returned to his home at Mizpah, he was greeted by his daughter and was compelled to fulfil his terrible vow by sacrificing her. Hos. 5:1 may well refer to this Mizpah of Gilead.

2. The land of Mizpah (ארץ המצפה; Josh. 11:3); the valley of Mizpeh (בקעת מצפה; vs. 8). A region to the N of Palestine. After defeating Jabin king of Hazor and his allies by the waters of Merom (*see* MEROM, WATERS OF), the Israelites under Joshua chased them as far as Great Sidon and Misrephoth-maim and eastward as far as the valley of Mizpeh.

In the list of northern peoples the Hivites are described as living "under Hermon in the land of Mizpah." This land cannot be far from the "waters of Merom," probably Wadi Marun N-NW of the Lake of Galilee, E of "Great Sidon" and Misrephoth-maim (Josh. 11:8). It may be the plain along the lower Wadi et-Tem or in the region of modern Banias.

3. Mizpeh of Judah (המצפה; Josh. 15:38). One of the cities assigned to the tribe of Judah in the settlement of the land; located in the Shephelah, and often identified with Tell es-Safieh. Eusebius and Jerome refer to a place by that name in this region (Euseb. Onom. Μασφα).

4. Mizpeh of Moab (מצפה מואב; I Sam. 22:3). The location of the site is unknown. It has sometimes been identified with Kir-Moab (Kerak; *see* KIR 1). Musil (*Moab*, pp. 270 ff) assigns it to a conspicuous height, Ruzm el-Mesrife, to the W-SW of Madeba. It was at Mizpeh of Moab that David delivered his parents into the custody of the Moabite king when Saul was pursuing him.

5. Mizpah of Benjamin (המצפה; Josh. 18:26; I Sam. 7:5-7, 11-12, 16; 10:17; I Kings 15:22=II Chr. 16:6; II Kings 25:23, 25; Neh. 3:7, 15, 19; Jer. 40:6, 8, 10, 12-13, 15; 41:1, 3, 6, 10, 14, 16; I Macc. 3:46). A city of Benjamin on the border between Judah and Israel. This is the most important of all the OT references to Mizpah.

The site of Mizpah of Benjamin is one of the most

controversial of Palestinian topography. It has been most frequently identified with Nebi Samwil the lofty and impressive height some five miles to the N of Jerusalem. Its association with the prophet Samuel has naturally been a strong argument in its favor (cf. I Sam. 7; 10:17), and the tradition obviously reaches deep into the past. It has received the support of Edward Robinson (*Biblical Researches* [1856], I, 575), F. Buhl, Rudolf Kittel, G. A. Smith originally, and W. F. Albright. The chief competitor to Nebi Samwil has been the ancient mound of Tell en-Nasbeh, *ca.* eight miles to the N of Jerusalem, on the highway to Samaria, the "great road" often referred to in the OT. To the S are Gibeah (Tell el-Ful) and Ramah (er-Ram); to the W, Gibeon (el-Jib); to the N-NE, Beeroth and Bethel. It is situated on top of a large, rounded limestone hill with sharp declivities on all sides, although the N decline is less precipitate. It, too, has been identified with Mizpah by many scholars, notably Raboisson, Dalman, Alt originally, Vincent, and W. F. Badè. The excavation of the tell by W. F. Badè from 1926 to 1935 has strengthened the case for Tell en-Nasbeh, although the arguments in its favor cannot be said to be coercive (*see* CITY § B2*a-f*). W. F. Albright believes it to be the site of ATAROTH-ADDAR.

The archaeological remains uncovered at Tell en-Nasbeh fit the history of Mizpah recounted in the OT very closely, its termini being from the beginning of the Iron Age, *ca.* 1200 B.C., into the Persian Age or even Hellenistic times. The area within the walls was *ca.* seven acres. The walls were the most impressive of any Palestinian mound exposed up to that time, with a probable height of some thirty-five to forty feet and a breadth of fifteen to twenty feet. The great gate facing the N contained a large court, and in it were benches upon which the elders doubtless sat to adjudicate disputes. All this suggests that it was a place of some importance, in all likelihood the boundary fortress between Judah and Israel. If so, it comports well with the biblical representation of Mizpah. Nebi Samwil has never been thoroughly excavated, but such remains as have been recovered nearly all come from a much later period. Nevertheless, it must be considered as a possibility for Mizpah of Benjamin.

A critical scrutiny of the relevant texts in which Mizpah of Benjamin is mentioned reveals the striking fact that in one set of passages it is the place of prayer and worship for all Israel (Judg. 20–21; I Sam. 7; 10:17-27), while in another (I Kings 15:22= II Chr. 16:6; II Kings 25:23, 25) its importance is chiefly military and political. Logically there is no reason why Mizpah should not have been both, as Jerusalem was from the time of David. But it has long been recognized that the passages which refer to Mizpah as a center for worship bear many signs of lateness and have little claim to historicity, not only because of their language and style but also because of the way they contradict contiguous passages which are indisputably reliable. But whence then does this representation of Mizpah as a place of worship come? There can be little doubt that the period following the fall of Judah in 597 B.C., after the city and the temple were destroyed, provides us with precisely the proper temporal and social milieu. The increasing stress upon prayer which we find in the prophecies of Jeremiah and the cultic interests of Ezekiel found expression in the exilic community; and Mizpah, which became the capital of the Babylonian province, also became the center of worship. Mizpah took the place of Jerusalem as both a political and a religious center. The tragic associations of the fall of state and temple now clustered about the community which sought to perpetuate their ancient traditions, the venerable cult, and the teachings of the prophets.

Mizpah appears for the first time in the list of cities assigned to the tribe of Benjamin after the Conquest (Josh. 18:21-28). The list is doubtless early, though not so early as the period of settlement. The first historical reference of great importance comes in the context of the boundary wars between Judah and Israel in the years following the disruption of the United Monarchy (I Kings 15:16-22). Baasha king of Israel, of the tribe of Issachar, eager to secure his S border against invasion from Judah, undertook to block the N approach to Jerusalem by building a fortress at Ramah. Asa king of Judah retaliated by making an alliance with Ben-hadad, king of Aram, who forthwith invaded Israel's N provinces, with the result that Baasha was compelled to give up his fortification of Ramah. Asa, in turn, countered Baasha's aggressive acts by fortifying Geba and Mizpah with the stones and timber from Ramah. Baasha's penetration of Judah violated the natural frontiers between the two lands, while Asa's counterthrust succeeded in placing fortresses at two strategic locations.

Mizpah again emerges as an important center after the fall of Jerusalem, when it became the capital of the Babylonian province. Gedaliah, the grandson of Shaphan, who had figured so largely in the reformation of 621, was appointed governor. Here he gathered his weak band of followers and sought to inspire them with hope and courage. The prophet Jeremiah, released from prison, joined his countrymen. But the times were chaotic and harsh. Through Ammonite intrigue, Ishmael fell upon Gedaliah and murdered him, and later "all the Jews who were with Gedaliah at Mizpah, and the Chaldean soldiers who happened to be there" (Jer. 41:3). The next day a procession of eighty men from Shechem, Shiloh, and Samaria, on their way to bring offerings to the house of Yahweh in Jerusalem, were waylaid by Ishmael, and most of them were slain and cast into a cistern. The signal of revolt had been raised, and Ishmael was forced to flee to the land of Ammon, with Johanan ben Kareah and his followers in hot pursuit. They were overtaken "by the great waters that are at Gibeon," and Ishmael and most of his companions were killed. What happened to Mizpah in the succeeding months and years we do not know; the period is one of the most obscure in Jewish history. There are those who believe that it continued on even into the Persian age. If so, we may understand how it came to achieve the reputation as a great center for prayer and worship, reflected in I Macc. 3:44-46.

Bibliography. The literature on Mizpah is extensive, but is best represented in the following journals: *PJB, JPOS, ZDPV,*

BASOR, and *RB*. The succinct summaries in Grollenberg's Atlas and especially in F.-M. Abel, *Géographie de la Palestine* (1933), are valuable. The following are among the most important discussions in the history of the subject: Raboisson, *Les Maspeh* (1897). E. Baumann, "Die Lage von Mizpa in Benjamin," *ZDPV*, 34 (1911), 119-37. A. Alt, "Mizpa in Benjamin," *PJB*, 6 (1910), 46; 21 (1925), 129-30. G. Dalman, Annual reports in *PJB*, 7 (1911); 21 (1925). W. F. Albright, "Mizpah and Beeroth," *AASOR*, vol. IV (1922/23), Appendix I, pp. 90-112. H. L. Vincent, *RB* (1924), pp. 637-38. A. Jirku, "Wo lag Gib'on?" *JPOS*, 8 (1928), 187-90. W. F. Badè, "The Seal of Jaazaniah," *ZAW*, 12 N.F. (1933), 50 ff. J. Muilenburg in C. C. McCown, *Tell en-Naṣbeh* (2 vols.; 1947); "Mizpah of Benjamin," *Studia Theologica*, vol. VIII (1955).

J. MUILENBURG

MIZPAR. KJV form of MISPAR.

MIZPEH. Alternative form of MIZPAH.

MIZRAIM mĭz'rĭ əm [מצרים, Ugar. *mṣr;* Akkad. *Muṣur, Muṣru, Miṣir*]. Mentioned as one of the sons of Ham in Gen. 10:6, 13 KJV (RSV EGYPT). This is the regular Hebrew word for Egypt, more technically transliterated *miṣrayim,* which occurs in many passages (Gen. 12:10; 13:10; 25:18; 47:20; etc.). It is possible that in a few instances (I Kings 10:28; II Kings 7:6; II Chr. 1:16-17) it refers, not to Egypt, but to the land Musri, mentioned in nonbiblical records—e.g., in the annals of Shalmaneser III (858-824 B.C.). He reports that he got "camels whose backs were doubled" as tribute from Musri. This reference to the Bactrian camel indicates that Musri was located in Asia. Also Tiglath-pileser III (744-727) and Sargon II (721-705) mentioned a Musru. So did also Sennacherib (704-681) and Esarhaddon (680-669), but both they and Sargon speak about Musru and Musri in a way which indicates that they mean Egypt. The name could probably be used with different meanings, because the basic meaning of it is "march," and it could thus be used about several kinds of "border country," whether they were found in Asia Minor or in Egypt.

In I Kings 10:28 the Hebrew word *miṣrayim,* is mentioned together with Kue (RSV) as a place which exported horses to Solomon. KUE, or Que, or Qewe, is an ancient name of Cilicia, and there is reason to suppose that Mizraim here means a land in Asia Minor.

A. S. KAPELRUD

MIZZAH mĭz'ə [מזה; LXX Μοζέ, Μοχέ] (Gen. 36: 13, 17; I Chr. 1:37). An Edomite clan chief (אלוף מזה, perhaps "clan chief of Mizzah"); the last of the four sons of REUEL 1.

MNASON nā'sən [Μνάσων] (Acts 21:16). A Christian with whom Paul lodged on his final visit to Jerusalem. This is a common Greek name, occurring among Romans as Nason, and among Jews as Jason. The Greek text of Acts makes it difficult to determine whether Mnason lived in Jerusalem (implied by the oldest MSS) or in a village between Caesarea and Jerusalem (implied by the Western text). Both types of text agree in affirming (*a*) that he was from Cyprus and (*b*) that he was an early disciple. Some commentators interpret the word "early" to mean that Mnason was one of the original disciples, although not one of the Twelve. More plausibly, he was an early convert.

Bibliography. R. J. Knowling, *Expositor's Greek Testament,* II (4th ed., 1910), 447, includes a full discussion of the textual problem. For further conjectures about Mnason, see F. J. Foakes-Jackson and K. Lake, *Beginnings of Christianity*, pt. I, vol. IV (1933), p. 270.

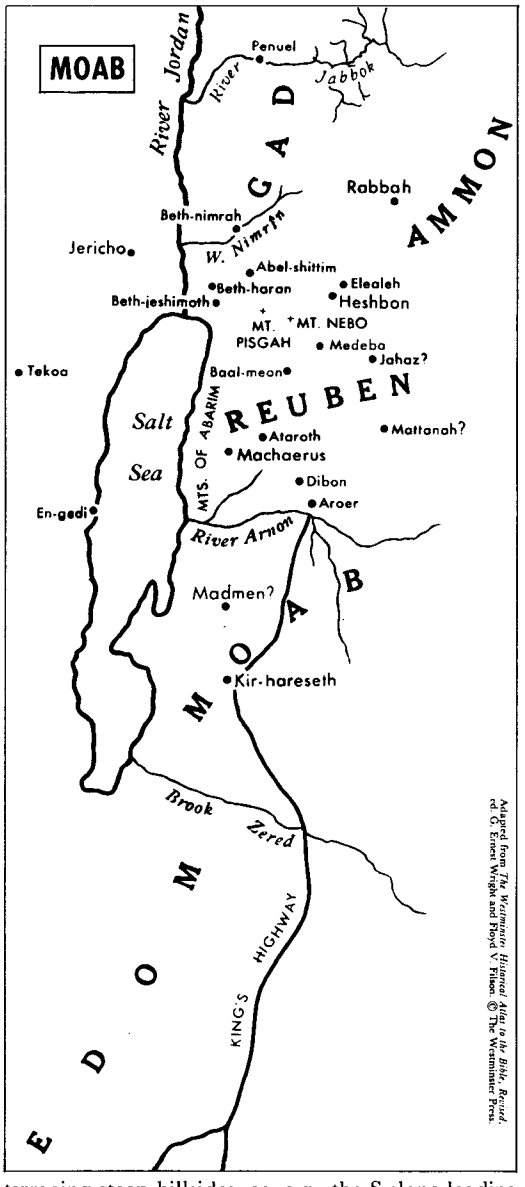
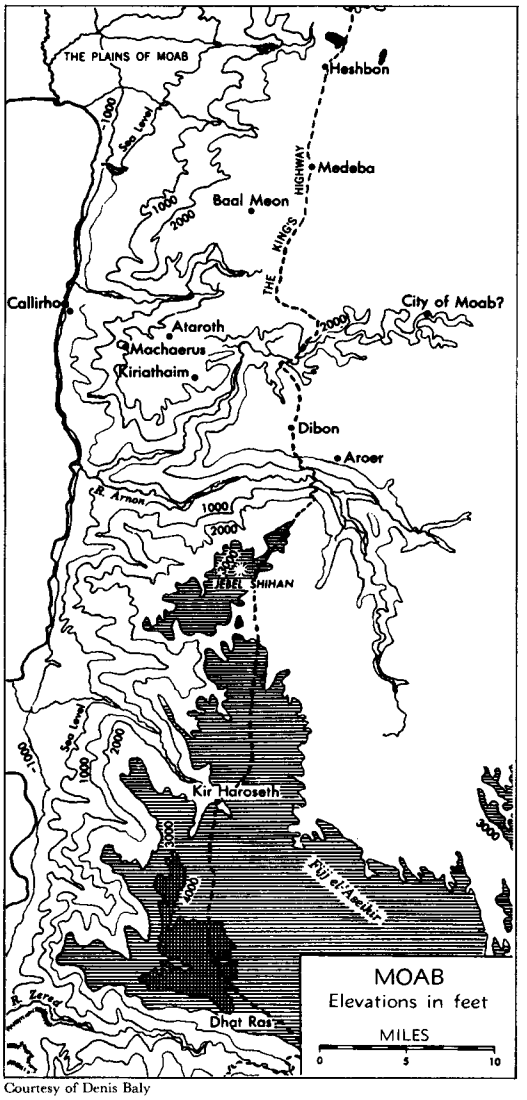
Bibliography

1. Name and origin. According to Gen. 19:30-38, the ancestor of the Moabites was Moab, son of Lot and of the older of his two daughters, born in the hills above Zoar, apparently in S Moab. No etymology of "Moab" is given in MT. However, after "[she] called his name Moab," the LXX adds: "saying, from my father," as if the MT had originally included לאמר מאבי. Possibly the LXX reflects the original text, since an etymology for "Moab" would correspond to the name Ben-ammi in vs. 38. No other mention is made of this ancestor of the Moabites, and elsewhere in the Bible, "Moab" indicates either the land or the people.

2. Geography. Essentially, Moab consisted of the high, gently rolling plateau immediately E of the Dead Sea, *ca.* 3,000 feet above sea level, and therefore *ca.* 4,300 feet above the Dead Sea itself. The extreme N-S extent of Moab was *ca.* sixty miles, but in times of weakness the N section was lost, and the remaining distance was *ca.* thirty-five miles. The E-W extent was *ca.* twenty-five miles—of course, not all cultivable land, since this distance includes the steep descent to the Dead Sea on the W, and since the land becomes increasingly dry to the E. The rather narrow N-S strip is well watered and produces fine crops of grain. In periods of heavy occupation, cultivation was undertaken in every square foot of land possible, even to the extent of





Courtesy of Denis Baly

terracing steep hillsides, as, e.g., the S slope leading down to the Wadi Hesa. Everywhere there are sheep, as there were when Mesha was royal sheepmaster to the king of Israel (*see* § 3*g below*). The flocks move E into the Syrian Desert during the rich season of spring and return W in the drought of summer.

On the W the descent from the plateau to the Dead Sea is very steep, and there is no continuous route of travel along the shore, since tall cliffs frequently rise directly from the sea. At intervals the mountains are cut by narrow gorges, through which flow the streams from the plateau. The largest of these is the River Arnon (now called the Wadi Mojib), entering the Dead Sea just N of its mid-point. *Ca.* two thirds of the way S along the shore, a broad peninsula, called the Lisan ("tongue"), extends into the sea. It reaches to within three miles of the W shore, and it was formerly possible to ford the strait. The Lisan itself is unproductive, but the small plain lying at the foot of the plateau is watered by the Wadi Kerak and other streams, and is agriculturally useful. There are also several small watered deltas.

The Wadi Hesa (probably the biblical Brook Zered; *see* ZERED, BROOK) forms a very definite S boundary for Moab. Its N bank was well fortified by Moab, and its S bank by Edom (*see* § 3*c below*). Except on rare occasions (*see* § 3*g below*), the border was not transgressed by Moab or Edom. Through most of its course the Wadi Hesa flows through a great canyon with very high and steep banks, which contributed to the strength of the boundary. E.g., the SW corner of the plateau is more than 2,500 feet above the stream in the chasm below; at the ford of the King's Highway at Aineh, *ca.* seventeen miles upstream from the outlet of the wadi, there is still a steep climb of over 1,500 feet up to the plateau. Farther E, of course, the valley becomes more shallow and more easily crossed.

The E boundary of Moab was less definitely

marked. The land gradually becomes too dry for practical occupation, but there is no precise point where this stage is reached. It depends on small variations of climate, pressure of population, efficiency in the use of water, and other factors. Many of the E border fortresses were located in areas beyond the limit of cultivation. *See* § 3*c below*.

The N border of Moab fluctuated greatly with Moab's changing fortunes. What may be called the original border, or the ideal border, may be identified approximately with a line including the Wadi Hesban, and Qasr el-Al and Khirbet er-Rufaiseh E of the wadi, a line which would be *ca.* four or five miles N of the Dead Sea. However (*see* § 3 *below*), Moab's border varied at different times between this line and that of the tremendous chasm of the River Arnon, *ca.* twenty-five miles farther S.

A rather individual area was the "Plains of Moab," a rich and comparatively well-watered district along the River Jordan, stretching from the Dead Sea N to the Wadi Nimrin, a distance of *ca.* eight miles. Several perennial streams flow through the area from the E hills, including the wadis Nimrin, Kefrein, and Rameh. Several important cities were also located here (*see* SHITTIM 1; BETH-HARAM;

56. The mountains of Moab from the E shore of the Dead Sea

BETH-JESHIMOTH; BETH-NIMRAH). The area figures often in Israelite history, especially in the period of the Exodus. Presumably Moab possessed this area early in its political history, since it was already called the "Plains of Moab" when the Amorite king Sihon dispossessed Moab S to the Arnon.

Of course, an estimate of the population of Moab can be made only with the greatest caution. Judging from the intensity of cultivation, Nelson Glueck has suggested a possible figure of 450,000 for all of Transjordan in Iron Age I-II, which might allow an estimate of about 100,000-150,000 for Moab. However, this is merely a rough estimate. Fig. MOA 56.

3. History. ***a. Prebiblical.*** The most conspicuous prebiblical remains are the numerous fields of dolmens and menhirs scattered here and there in Moab and throughout Transjordan. A dolmen is a structure of massive stone slabs which form the walls and roof of a chamber or series of chambers, often buried under a tumulus of earth or stones. The dolmens are probably imitations of the houses in which people lived. A menhir is a great standing stone; often several are set up in a row or circle. In Moab these monuments stem from the Neolithic Age, dating *ca.* 6000-4500 B.C. Individual stones often weigh several tons.

E.g., Khirbet Iskander is a site *ca.* 13½ miles E of the Dead Sea, on the N bank of the Wadi Wala.

58. Menhir at Khirbet Iskander

The E section of the site is dotted with menhir circles and large standing or fallen menhirs.* The circles range from 5 to 18 feet in diameter, with individual menhirs averaging 5½ by 1½ by 1 feet, excluding the portion sunk in the soil. One large fallen menhir is 13 feet long, 4¼ feet wide at its base, and tapers to 2 1/10 feet at its top. Figs. MOA 57-58.

An unusually extensive dolmen field exists along the S slope of the valley of Wadi Jideid, *ca.* two miles S of Mount Nebo. In an area of *ca.* two square miles, 162 dolmens have been examined. Of one of many in good condition, the capstone measured 8½ by 8 feet; the S side stone was 8½ by 3½ by 1¾ feet; two N side stones were 3 by 5 and 5 by 7 feet, each 2 feet thick. *See* DOLMENS.

b. Early Bronze Age IV–Middle Bronze Age I (twenty-third through twentieth centuries B.C.). At the end of the Early Bronze Age there was an intensive sedentary occupation in Moab, as in all of Transjordan. Large, firmly established farming communities represent a highly advanced civilization. Most of the sites are strongly walled, and usually are built on an eminence easy to defend. In many instances large fields of from three to ten acres or more were walled in and cultivated, although intensive cultivation was carried on outside the walls as well. There seems to have been political disunity, the fortifications being directed as much against neighbors as against foreign enemies. The sites were generally near a spring or perennial stream to provide water. The inhabitants used much excellent, although rather coarse, handmade pottery, showing no substantial differences from contemporary pottery in W Palestine.

Careful use was made of water and land. E.g., there are three EB IV–MB I sites on the S slope leading down from the Moabite Plateau to the Wadi Hesa: el-Aineh, Khirbet Umm Sedeirah, and Khirbet Serareh. Agricultural communities could survive here only under the pressure of dire necessity, when every available bit of land was being used.

Khirbet Iskander (*see* § 3*a above*) is a typical EB IV–MB I site. It is a large, low, completely destroyed mound, with its S side reaching to the very edge of the N bank of the Wadi Wala. The W section of the site, located on a rise, is enclosed by the remnants of a strong wall, measuring *ca.* 500 feet square, with traces of large square towers at each corner and near the middle of each wall. The best preserved wall measures *ca.* 5.6 feet thick. Clear foundation remains of houses are against the inside faces of the walls.

At this time, there was a well-defined N-S trade route through central Transjordan—practically the same route that has been used in all subsequent ages up to the present. When an army led by Chedorlaomer moved down this route as far as El-paran in Edom (Gen. 14:5-7), it was able to conquer the fortified sites one by one. Apparently no united defensive attempt was made. This defeat may have contributed to the disappearance of the EMIM, a group of the REPHAIM said to have lived in Moab before the Moabites (Deut. 2:10-11).

This sedentary civilization in Moab and S Transjordan generally ended *ca.* the twentieth century B.C. From the River Jabbok S there is a gap from before 1900 to after 1300, during which the area was peopled almost exclusively by nomads, who left no pottery trace of their sojourn. The reason for the break lies, not in climatic change, but rather in political and economic factors. The Amorite movement (*see* AMORITES) in Mesopotamia seems to have been of great influence. There was increasing pressure by Amorite nomads in the Fertile Crescent between 2200 and 2000, when it also penetrated into Egypt. The effective settlement of the Amorite nomads in Mesopotamia did not begin until after the fall of the third dynasty of Ur, *ca.* 1950. However, in Moab, the inhabitants continued a nomadic life until the thirteenth century. This Amorite nomadism was not as mobile as was later Arab nomadism, since effective domestication of the camel did not come until the latter part of the second millennium B.C. The Amorites were dependent on pasturage for their herds of cattle, sheep, goats, and asses. Many of the details of the situation in Moab from *ca.* 1900 remain obscure, but the general picture of nomadic occupation is clear.

c. The rise of the Iron Age civilization. The long period without sedentary occupation in S Transjordan closed at the very end of the Late Bronze Age in the thirteenth century B.C. The nomads who had held the land since *ca.* 1900 settled down, and the kingdom of Moab arose, as well as the kingdoms of Edom and Ammon, and those of the "Amorite" kings Sihon and Og. From the topographical lists of Rameses II (1290-1224) at Luxor comes the first mention of Moab in extrabiblical sources (*ANET* 343). In Num. 24:17, Moab occurs parallel to the expression "the sons of Sheth" (בני שת). Sheth (שת) is an archaic tribal name. The Egyptian texts from the nineteenth century mention a nomadic people of the same name, the Shutu (*Šwtw*), somewhere in Palestine (*ANET* 329). Upper and Lower Shutu both have princes, and may roughly correspond to later Ammon and Moab. At any rate, nomads such as these began to settle down in the thirteenth century, presumably passing through a seminomadic stage before becoming fully sedentary. At the time that the Israelites passed through Transjordan, the Moabites probably exhibited a mixture of seminomadic and sendentary culture, feeling strong attachment to their territory and bitter resentment toward any encroachment upon it.

The Iron Age kingdom of Moab was defended by a very strong system of fortresses. Several guarded the S border, where the plateau descends to the Wadi Hesa. The KING'S HIGHWAY crossed the Wadi Hesa *ca.* seventeen miles E of its outlet into the Dead Sea. This pass was important for communication and trade, and the springs of Aineh watered a fertile area nearby. To guard the area was the fortress el-Medeiyineh, situated on an almost impregnable, high hill. The walls of the fortress form an irregular rectangle, measuring *ca.* 128 by 200 by 206 by 206 feet, with an additional enclosed section on the E. When the King's Highway reached the top of the slope, it had perforce to go around a long rock outspur. On the spur was a second fortress, el-Akuzeh. The entire spur, *ca.* 750 by 45 feet, was walled, and it was cut off from the rest of the ridge by a deep and wide moat. There were towers at each end and in the middle.

Guarding the SW corner of Moab was a strong walled fortress, Dhubab, *ca.* 550 yards below the SW corner of the plateau. Not far N and lower on the slope was Khaneq en-Nasara. And on a completely isolated hill on the plateau proper was Medinet er-Ras, where a great wall 6½ feet thick enclosed an area *ca.* 475 by 55 feet. At the S end of the site was a very strong fortress. Medinet er-Ras completed the S fortifications and began those guarding the descent to the Dead Sea on the W edge of Moab.

To guard against invasion from the desert, the E border of Moab was guarded even more strongly than the S border. The southernmost and key fortress on the E border was Mahaiy, on the fairly flat top of a high steep hill, *ca.* 1600 feet long and 400-800

feet wide. A great outer wall surrounded the hilltop, and there was a strong watchtower on a small rise within the fortress. Mahaiy commanded a clear view of the desert areas to the E and the NE, and also dominated the slope down to the Wadi Hesa. No large group could invade Moab from the SE without coming into range of Mahaiy.

N of Mahaiy was a carefully worked-out and well-integrated system of fortresses, many within sight of one another. There were large fortresses similar to those described above and also smaller blockhouses to supplement them. E.g., almost four miles N-NW of Mahaiy is the large fortress of Medeibi. *Ca.* two miles N-NW of Medeibi is the blockhouse of el-Mahri.* It is well built, measuring 52 by 66 feet, with walls 4½ feet thick. At one corner the wall is still fourteen courses high, totaling 16 feet. On almost every rise in the entire district are the remains of a

60. Wall of a Moabite border fortress, at Qasr Abu el-Kharaq

large or small watchtower or police post, many from the Iron Age. The line of fortification continues N along the entire E border of Moab. In the important area of the Arnon there are several strong fortresses located in inhospitable areas near which there was probably never any habitation or cultivation. Their garrisons must have been provisioned from outside and their water drawn from their own cisterns. Figs. MOA 59-60.

Since the N boundary of Moab fluctuated more than the E and the S, the border defenses are not so clear. Furthermore, the interior of Moab did not rely for protection solely on the border fortresses. Practically every site throughout the land consisted of a great fortress or a strong blockhouse. Sometimes it consisted of a strong central structure about which the dwellings of the inhabitants clustered, all within a great fortification wall. The land was cultivated outside the strongholds, and the inhabitants returned every night. As in EB, all available land was cultivated to supply the needs of a dense population.

An important difference between the Iron Age culture and that of EB involved water. In EB, sites were generally located near springs or perennial streams. However, by the Iron Age the technique of constructing water-tight cisterns by the use of plaster made with slaked lime had been developed. This allowed settlement in areas away from natural water sources, dependent on the storing of rain for their water supply. Often cisterns were located on the top or sides of the hill on which a settlement was built; sometimes they were inside or around the buildings themselves. Many were hewn directly from the natural rock. In the Moabite Stone, Mesha stated (*ca.* 830 B.C.) that there was no cistern inside the town at Qarhoh. Therefore, he commanded all the people that each should make for himself a cistern in his house. From the contents of the Moabite Stone, Qarhoh seems to be identical with DIBON, Mesha's capital. Possibly Qarhoh may be a common noun, meaning "its citadel." In the topographical lists of Ramses II at Karnak and of Ramses III at Medinet Habu, the same word, *q-r-h,* is mentioned. Additional evidence for the identification of Qarhoh with Dibon is provided by the fact that no fewer than sixty-seven cisterns have been catalogued on the N mound of modern Dhiban, and thirty more on the sides of the surrounding wadi.

61. Stele from Balu'ah in Moab

In 1930 a stele was discovered at Balu'ah, *ca.* fifteen miles N of Kir-hareseth. Its inscription is too worn to be read, but it seems to date in the latter part of the Early Bronze Age. However, the relief on the stele seems to be secondary, dating to *ca.* the twelfth or eleventh century B.C. The figure on the left is a god, wearing the crown of Upper and Lower Egypt; that on the right is a goddess. The central

figure is a suppliant, standing with upraised hands before the god. Fig. MOA 61.

Whereas there was no distinguishable difference between the EB pottery of E and W Palestine, there are enough peculiarities in the early Iron Age to put the Transjordan pottery in a class of its own. Part of the distinctiveness of this pottery, particularly in Moab and Edom, may be attributed to influences coming S from Syria along the King's Highway. In this period the orientation of Transjordan was to the N and the S—i.e., to Syria and Arabia—rather than to W Palestine. The pottery attests a high civilization, with potters skilled in ceramic craft and having high artistic sense.

We find, therefore, that the Iron Age civilization in Moab, as elsewhere in Transjordan, was no less developed than that in W Palestine. Judged by houses, fortresses, cisterns, agriculture, pottery, commercial activities, density of population, political organization, Moab was a highly advanced kingdom.

d. The period of the Exodus (thirteenth century B.C.). After the episode discussed in 1, Moab came on the biblical scene next at the time of the Exodus. It was the first stage of the Iron Age kingdom that we have just discussed which the Israelites encountered in Moab. Shortly before the Israelite arrival in Transjordan, Sihon, a king of the Amorites, had defeated the previous king of Moab (Num. 21:26) and appropriated the N section of Moabite territory as far S as the Arnon. We do not know the precise extent of Moab before Sihon's conquest, but it must have reached far enough N to include the Plains of Moab, NE of the Dead Sea, since this area had already received its name. At any rate, after his victory over Moab, Sihon ruled the territory from the Jabbok to the Arnon, and was commonly known as king of Heshbon. The song in Num. 21:27-30 seems to refer to this Amorite conquest of Moab.

It is difficult to trace the precise course of events as the Israelites moved through Transjordan on their way to the Promised Land. The chief passages from which we derive our information about Israel's dealings with Moab are the accounts in Num. 21–33, Moses' words in Deut. 2:8-37, and Jephthah's message to the king of the Ammonites in Judg. 11:12-28. In Num. 21:10, the Israelites have detoured around Edom and encamped at Oboth. Then they encamped at Iye-abarim, "in the wilderness which is opposite Moab, toward the sunrise," and next in the Valley of Zered. They crossed the Arnon, and after a further series of encampments (cf. Num. 21:10-20; 33:41-49) the Israelites arrived at the "valley lying in the region of Moab by the top of Pisgah which looks down upon the desert" (Num. 21:20), which may correspond to the encampment "in the mountains of Abarim, before Nebo" (Num. 33:47).

Next, Num. 21 relates the Israelite victories over the two Amorite kings Sihon and Og. We would have expected these conflicts to have taken place before the Israelites moved W from the wilderness toward Canaan, not after they had reached their encampment by Nebo. According to Jephthah's message in Judg. 11:17, the kings of Edom and Moab refused to let the Israelites pass through their lands, although we are told that the Moabites who live in Ar later sold the Israelites provisions (Deut. 2:29). After the refusal, Israel journeyed around Edom and Moab, and used the victories over Sihon and Og to gain access to Canaan.

According to Deut. 2:9, the Israelites had been forbidden to contend with Moab in battle, because God had "given Ar to the sons of Lot for a possession." In Deut. 23:3-6, no Moabite (or Ammonite) may "enter the assembly of the LORD; even to the tenth generation . . . ," because they did not meet Israel with bread and water on the way, and because they hired Balaam to curse Israel. Yet exclusion to the tenth generation is not permanent separation. This provision and the order to refrain from battle with Moab illustrate the fact that Moab and Israel are always felt to be related peoples, as understood in the light of common ancestry. However, according to Josh. 24:9, Balak the king of Moab "arose and fought against Israel"; of such a conflict we know nothing more.

The Israelites then proceeded down to their encampment in the Plains of Moab, across the Jordan from Jericho (Num. 22:1 ff). Moab was in great fear of Israel because of the defeat of the Amorites. The king of Moab, Balak, the son of Zippor, sent messengers to Balaam, son of Beor, at Pethor by the Euphrates, asking him to come and curse Israel (Num. 22-24). After some complications, Balaam acquiesced, but the result was a blessing upon Israel instead of a curse.

While Israel was encamped at Shittim in the Plains of Moab, the people entered into illicit relations with Moabite women. The latter invited the Israelites to the sacrifices of their gods, and Israel "yoked himself to Baal of Peor" (Num. 25:3). Also involved in the situation were the Midianites. God's anger was kindled; the offenders were slain, and a plague came upon Israel in punishment.

The tribes of Reuben and Gad were attracted by the territory in Transjordan, including the N section of Moab which the Israelites had taken from Sihon (Num. 32). They possessed many cattle and saw that it would be good grazing land, so they asked for their territorial assignment there, rather than W of the Jordan. After arranging that their men of war should assist the rest of Israel W of the Jordan, the assignment was made. Many former Moabite cities were rebuilt by the tribes of Gad and Reuben (Num. 32:34-38).

At the close of the Israelite stay in the Plains of Moab, Joshua was commissioned as Moses' successor, and Moses ascended Mount Nebo to view the land and then to die (Num. 27:12-23; Deut. 32:48-52; 34:1-8). Moses was buried "in the valley in the land of Moab opposite Beth-peor," and the Israelites mourned for him thirty days. Joshua sent the two spies to Jericho and received their report (Josh. 1–2). The Israelites moved from Shittim to the Jordan, encamped three days, and then passed on to their conquest of Canaan (Josh. 3:1 ff).

e. The period of the Israelite judges. At least for a time in the period of the Israelite judges, Moab must have regained most, if not all, of its N territory. In Judg. 3:12-30 we have the account of the "judge" Ehud. Eglon, king of Moab, allied himself with the

Ammonites and the Amalekites, and they took the "city of palms" (i.e., Jericho). The Moabites must first have pushed N from the River Arnon the approximately twenty-five miles to the N end of the Dead Sea, and probably several miles farther. This corresponds well with the general picture of Israelite weakness and disunity in the time of the judges. For eighteen years the Israelites are said to have served Eglon. Perhaps this was the occasion for Samuel's reminder that God had sold Israel into the hand of the king of Moab (I Sam. 12:9). Then there arose a deliverer, Ehud, a Benjaminite, who assassinated Eglon. Moabite territorial control seemed to end at the "sculptured stones near Gilgal" (Judg. 3:19, 26), although we do not know what they were. At the fords of the Jordan, which the Moabites were compelled to cross in retreat, the Israelites killed "about ten thousand of the Moabites" (vs. 29), so Moab was subdued and the land of Israel had rest for eighty years (vs. 30). However, there was no Israelite invasion E of the Jordan into Moab proper. The defeat was simply of Moab's occupying forces.

The events in the book of Ruth are said to have taken place "in the days when the judges ruled" (Ruth 1:1). Unfortunately, no precise geographical data are given as to where in Moab Elimelech's family settled, although certainly the N section would be reached first. After ten years, Naomi returned to Bethlehem, accompanied by her daughter-in-law Ruth, who became the wife of Boaz and the great-grandmother of King David. This story, with its easy travel between Moab and Israel, and the lack of hostility in either land toward foreigners from the other, illustrates the friendly relations that must have existed from time to time between the two peoples.

In a time of Ammonite oppression of Israel, Jephthah, a Gileadite, arose to deliver Israel (Judg. 10:17–12:7). In his message to the Ammonites, Jephthah denied that Israel had taken away the land of the Ammonites or of the Moabites at the time of the Exodus. He recounted Israel's journey around Edom and Moab, and the defeat of the Amorite king Sihon. He argued that Israel had been left in peace for "three hundred years" in the area of Heshbon, and of Aroer, and along the banks of the Arnon, so the Ammonites should not be making war against Israel now on this account. Jephthah's words to the contrary, much of this N area of Moab had been regained by the Moabites, allied at least for a time with the Ammonites and the Amalekites, at the time of Ehud (*see above*). At any rate, Jephthah's arguments were unsuccessful, and the Ammonites were subdued by force.

Some inferences can be drawn from incidental information in Judges. Judg. 10:6 tells of the Israelites' serving many foreign gods of surrounding nations, including "the gods of Sidon, the gods of Moab, the gods of the Ammonites," and others. In Judg. 6–8, the Midianites, the Amalekites, and the people of the East are said to have oppressed Israel. They raided in great numbers, using the recently domesticated camel. In 6:33 they are said to have crossed the Jordan and encamped in the Valley of Jezreel, before Gideon's great victory. Whether or not this particular raid had struck Moab before crossing the Jordan, it seems likely that Moab suffered from similar invasions from time to time, giving us a clearer understanding of the occasion for the strong border defenses described in § 3*c above*.

***f. The period of the United Monarchy* (ca. *1020*–ca. *922*).** The time of the United Monarchy in Israel, beginning just before the end of the eleventh century, was a time of Israelite strength and domination in Transjordan, and in Moab in particular. The first major event of Saul's kingship was the victory over Nahash the Ammonite, who was besieging Jabesh-gilead, a little more than thirty miles N of N Moab. Saul's successes covered Transjordan, including victories over Moab, the Ammonites, Edom, and even the kings of Zobah in the NE (I Sam. 14:47). We do not know whether this was an extension of his victory over Nahash or whether it was a separate campaign, fitted in between encounters with the Philistines.

While David was a fugitive from Saul, he is said to have gone to Mizpeh of Moab and entrusted his parents to the king of Moab (I Sam. 22:3-5). The Moabite king would probably sympathize with David's flight from Saul, and possibly would be favorably inclined toward David because of his Moabite great-grandmother, Ruth. Perhaps Ithmah the Moabite, who is listed as one of David's mighty men (I Chr. 11:46), became attached to him at this time.

At the beginning of David's reign there was civil war between David's followers in the S and those of a surviving son of Saul, Ish-bosheth, in the N and the E (II Sam. 2–4). Ish-bosheth's headquarters were at Mahanaim, in Transjordan, which was also later to serve as refuge for David in his conflict with Absalom (II Sam. 17:24, 27). Most likely Moab took advantage of the temporary Israelite weakness to reassert its independence. It may be as a result of some such action that David defeated Moab (II Sam. 8:2; I Chr. 18:2). We are told that he measured them with a line, putting two lines to death and sparing one line, presumably of the men captured in battle. The gold and silver spoil from Moab, with that from other nations, was dedicated to the Lord (II Chr. 18:11). Most likely it was the fact that Moab was already under Israelite domination that caused the Ammonites to look to the Syrians for help against Israel (II Sam. 10:6 ff), rather than to Moab or farther S to Edom. Also during David's reign, Benaiah the son of Jehoiada smote two warriors of Moab (II Sam. 23:20; I Chr. 11:22; RSV "ariels"; KJV "lionlike men"; the meaning of "ariel" is known from Egyptian transcriptions).

In Solomon's time Israel presumably maintained its domination over Moab. The seventh of Solomon's twelve administrative districts (I Kings 4:13-14) was administered from Mahanaim, and it probably extended S along the Dead Sea to include at least part of N Moab. Solomon provided places of worship for the gods of the nations of his many wives, including the building of a "high place for Chemosh the abomination of Moab" (I Kings 11:7); apparently Solomon himself engaged in the worship of the foreign gods (vs. 33).

***g. The period from Israelite division to the beginning of Moab's Assyrian vassalship* (ca. *922*–ca. *735*).** This is the most important period in the history of Moab. After the division of the United Monarchy in 922,

Moab probably continued for a time under the domination of the N kingdom. As Jeroboam is said to have "built Penuel" (I Kings 12:25) on the Jabbok, Israel seems to have maintained its strength for a time in Transjordan. The administrative districts set up by Solomon seem to have been preserved, since I Kings 20:14-15, 17, 19, speaks of their governors, and the ostraca of Samaria (*ca.* 778-770) reflect the same structure (*see* INSCRIPTIONS § 3). N Moab, then, probably continued to be included in the district of Mahanaim.

Probably early in the ninth century, Moab attempted to assert its independence of Israel and regain its territory N of the River Arnon. Success was short-lived, for soon after Omri ascended the Israelite throne (*ca.* 876), he "occupied the land of Medeba," and Israel remained there in his time and half the time of his son, forty years (Moabite Stone). Omri's "son" is apparently his grandson, Joram, so Israel maintained its control over Moab through most of the Omride dynasty. At the Battle of Karkar (Karkara) in 853, the Assyrian Shalmaneser III was faced by a coalition including Aram, Israel, and Ammon (*ANET* 278-79). However, neither Moab nor Edom was mentioned, and this confirms the fact that they were not independent.

Shortly thereafter, war broke out between Aram and Israel. In an attempt, with the help of Jehoshaphat of Judah, to recover Ramoth-gilead in Transjordan, Ahab was killed (I Kings 22:1-40; II Chr. 18). Meanwhile, the Moabites, the Ammonites, and some Meunites invaded Judah from the S (II Chr. 20:1 ff). Very possibly the Aramean Ben-hadad instigated the attack, hoping to relieve the pressure of Israel against the Aramean penetration. Furthermore, Jehoshaphat was attempting to reopen sea trade with South Arabia (I Kings 22:48-49; II Chr. 20:35-37), which would mean serious competition for the overland caravan route along the King's Highway through Transjordan. At any rate, before Jehoshaphat realized the danger, the allies had penetrated as far as En-gedi on the W shore of the Dead Sea, possibly crossing the Dead Sea from Moab at the ford between the Lisan and the W shore. As a result of Jehoshaphat's prayer (II Chr. 20:6-12), the Lord "set an ambush" against the allies as they came up the ascent of Ziz, near Tekoa, and they were routed. The allies turned against each other, and the invasion came to a disastrous end.

Nevertheless, successful rebellion by Moab was shortly to come. For some time before the death of Ahab, the "king" of Moab had been Mesha, a sheep raiser. "He had to deliver annually to the king of Israel a hundred thousand lambs, and the wool of a hundred thousand rams" (II Kings 3:4). There exists an Ugaritic parallel to the term "sheep raiser" (בקר), in which an individual is known as "chief priest, chief shepherd" (*rb khnm rb nḳdm*). Thus, Mesha occupied the official position under Ahab of Israel of royal sheepmaster, like "chief butler," "chief baker," in Gen. 40:2.

After the death of King Ahab of Israel, Mesha rebelled (II Kings 3:5 ff). Joram of Israel, Jehoshaphat of Judah, and the king of Edom marched against Moab "by the way of the wilderness of Edom" (II Kings 3:8), apparently in 849 B.C., since only for this year did Joram and Jehoshaphat rule simultaneously. They made a circuitous march of seven days, through waterless country (II Kings 3:9). As was seen in § 3*c above*, the strong defense system along Moab's S border and the deep chasm of the Wadi Hesa were good reasons for their going out of their way to attack Moab from the E. Yet here also there were strong defenses, including the powerful fortress of Mahaiy (*see* § 3*c above*). The night before the battle, the dry stream bed separating the forces was filled with water, coming from the E. Early in the morning the Moabites saw the sun reflected in the water, thought the allies must have fallen out and slaughtered one another, rushed headlong to the attack, and were slaughtered by the Israelites. Moab fled, pursued by the Israelites, who destroyed the cities, threw stones on the good land, stopped the springs, felled the trees, and shut up Mesha in Kir-hareseth. Mesha with seven hundred swordsmen tried to break through opposite the king of Edom, but could not. Then as a last resort, Mesha took his eldest son and offered him as a burnt offering upon the wall, apparently raising such superstitious fear in the hearts of the besiegers that they raised the siege and gave up the invasion (II Kings 3:27). According to Mesha, the house of Omri was defeated, and "Israel perished forever!"

In his inscription, Mesha described his further victories. He regained the land of Medeba, which Omri had taken. He took the land of Ataroth from the men of Gad. (The tribe of Reuben is not mentioned on the Moabite Stone.) Nebo was taken in a battle continuing from the break of dawn until noon; seven thousand Israelites were reportedly slain. Thus the Moabites gained their complete independence from Israel and regained much of their old N territory. After his victories, Mesha engaged in fortifying various cities, providing water supplies, and executing other public works, in part at least by the use of Israelite captives (line 25). The Ammonites had already regained their independence, and Edom also successfully rebelled against Judah (II Kings 8: 20-22), so that by the death of Joram of Judah in 842, all three Transjordan states were independent.

Throughout most of the remaining ninth century, Israel was very weak, and Aram was the dominant power in Syria-Palestine. The Arameans under Hazael overran Transjordan as far S as the Arnon (II Kings 10:33). Possibly Moab welcomed Aram as an ally against Israel, freeing the King's Highway from Israelite domination. Moab may have become an autonomous vassal of Aram, although we have no direct evidence of this.

However, *ca.* 806, Hazael died. The Assyrians, under Adad-nirari III, moved W, subdued Aram, and imposed a heavy tribute. Also mentioned as paying tribute are Tyre, Sidon, Philistia, Israel, and Edom, but it does not seem that Assyria actually invaded Palestine or tried to conquer all the former Aramean territory (*ANET* 281-82). Moab probably kept intact the territory it had regained under Mesha. Shortly after Joash became king of Israel (*ca.* 801), we are told that "bands of Moabites used to invade the land in the spring of the year" (II

Kings 13:20). This seems to imply that the territory to the N end of the Dead Sea was under Moabite control, so that the marauding bands would have access to Israel.

Yet, from about the beginning of the eighth century, Moab began to decline. In Moab there is a scarcity of pottery remains from the latter half of the Iron II period. In spite of Mesha's success in the N, perhaps Moab never fully recovered from the destruction wrought by Joram and Jehoshaphat in the S. Many of the cities they destroyed were probably never rebuilt. Contributing to Moab's decline was the successful campaign of Amaziah of Judah against Edom (II Kings 14:7), giving Judah control of the South Arabian commercial trade, diverting it from the King's Highway in Transjordan. Israel took leadership from Judah with Joash's defeat of Amaziah (II Kings 14:11-14; II Chr. 25:21-24), but Moab was not further affected until the reign of Uzziah (*ca.* 783-742).

Uzziah strengthened Judah's hold on the N-S trade by rebuilding the port of Elath (II Kings 14:22). He imposed tribute on Ammon (II Chr. 26:8), probably after the death of Jeroboam II (*ca.* 746), since Jeroboam II had restored at least part of Transjordan to Israelite sovereignty (II Kings 14:25). When Uzziah exacted tribute from Ammon, he must also have subjected Moab, thereby giving Judah control of Ammon, Moab, and Edom. Ammon (but not Moab) rebelled soon after Uzziah's death (*ca.* 742), but Jotham subdued Ammon and imposed a large tribute (II Chr. 27:5). From time to time, after *ca.* 750, parts of S Gilead and N Moab seem often to have been in Ammonite hands. Since Uzziah and Jotham imposed tribute on Ammon, we infer that Ammon had grown W and SW so as to be within reach of Judah. However, the Palestine scene was now to be changed very greatly by the return of the Assyrians. Whereas up to this point the most common direction from which danger had come to Moab was the W, now in the closing days danger was to come from the NE.

***h. The period from Assyrian vassalship to Moab's end as a state* (ca. *735*–ca. *600*).** The period of Assyrian weakness that began with the death of Adadnirari III (*ca.* 783) continued until the accession of Tiglath-pileser III (*ca.* 745). After success elsewhere, by 738 Tiglath-pileser was in Palestine-Syria, and received tribute from Menahem of Israel (II Kings 15:19-20; also mentioned in Tiglath-pileser's annals) and other kings of the area. When Ahaz took the throne of Judah (*ca.* 735), he found himself under attack from Aram and Israel in the N, Edom in the S, and the Philistines in the W. Ahaz sent tribute and asked Tiglath-pileser for aid. In 733, Tiglath-pileser's army swept over N Israel, Philistia, and Transjordan. He took captive the Reubenites, Gadites, and half-Manasseh (I Chr. 5:26); created the new Assyrian province of Gal'azu (Gilead); and received tribute from various kings, including Salamanu of Moab, Jehoahaz of Judah, and those of Edom and Ammon. Direct Assyrian control may have extended S to the Arnon, and the Transjordan states became vassals of Assyria (*ANET* 282-84).

Presumably, as time went on, Moab continued to pay tribute to Assyria. Israel fell to Sargon II in 722/1. Azuru, king of Ashdod, tried to muster a coalition of Philistia, Judah, Edom, and Moab, with the support of Pir'u (Pharaoh Bocchoris) of Egypt. In 711, Sargon defeated Ashdod and made it an Assyrian province, but the allies seem to have withdrawn in time, since Sargon mentions having subjugated only Ashdod (*ANET* 286-87).

After Sargon's death, Sennacherib took the Assyrian throne (*ca.* 704). In 701, Sennacherib moved W to put down a general rebellion. He conquered Judah, blockaded Jerusalem, and received tribute from Hezekiah. Ammon, Moab (whose king was Kammusunadbi), and Edom also paid tribute, whether or not they were involved in the rebellion (*ANET* 287-88).

From a letter, apparently written to king Esarhaddon (681-669), we learn that Moab paid him a tribute of one mina of gold (=1/60 of a talent). Moab's weakness is seen in this small tribute, only half that of Ammon (two minas) and about equal to that of Judah (ten minas of silver). Also in Esarhaddon's time, Musuri king of Moab is mentioned in a list of twenty-two kings (including those of Judah, Edom, and Ammon) who were compelled to provide building materials for the royal palace at Nineveh (*ANET* 291).

Under Ashurbanipal (669–*ca.* 630), Assyria reached its climax of prestige and wealth. However, during the civil war between Ashurbanipal and his brother Shamash-shum-ukin (652-648), the Arabs flooded E Syria and Palestine, including Moab. One of the Arab chiefs, Ammuladi, king of Kedar, was captured by Kamashallay(?) of Moab, whose name seems also to be recorded on a cylinder seal. Kamashallay, acting as a vassal of Ashurbanipal, sent Ammuladi in bonds to Nineveh (*ANET* 298). However, this catastrophe of the Arab invasion spelled the end of Moab as a strong autonomous state. It continued to exist for a generation or two, but in a greatly weakened condition.

The dirge on the fate of Moab contained in Isa. 15–16; Jer. 48 probably refers to the events of this catastrophe, *ca.* 650 B.C. The Arabs seem to have swept over Moab from the N, attacking Heshbon and Elealeh first and then pushing S. Fugitives seem to have fled from them in a southerly direction (cf. Isa. 15:5, 7; 16:1 ff; Jer. 48:4-6, 28, 34, 45). The desert raiders may have come in from the E between Ammon and Moab; been repelled by the strong line of fortresses protecting the Ammonite capital, Rabbah; and then swung S through Moab, finding the Moabite strongholds more vulnerable (Jer. 48:1, 18, 41).

During the reign of Josiah (*ca.* 640-609), Zephaniah's oracle (2:8-11) was pronounced against Moab and the Ammonites in reaction to their taunts of the Israelites. Ammon at this time was relatively strong, but Moab definitely of little importance. Jehoiakim (609-598) became a vassal of Nebuchadnezzar the Babylonian, who had also made raids against the Arabs in Transjordan. When Jehoiakim rebelled against Nebuchadnezzar, bands of Chaldeans, Syrians, Moabites, and Ammonites raided Judah in punishment (II Kings 24:2). As late as 598 we hear of a king reigning in Moab (Jer. 27:3). At the time of the destruction of Jerusalem, many fled to Moab,

Ammon, and Edom, some returning when Gedaliah was appointed governor (Jer. 40:11-12).

Archaeological exploration has shown that Moab was largely depopulated from *ca.* the beginning of the sixth century, and in many sites from *ca.* the eighth century. From the sixth century on, nomads wandered through the land until political and economic factors made sedentary life possible again in the last centuries B.C.

i. Later events. After several centuries without sedentary occupation, almost all of what had been Moab (as far N as the N end of the Dead Sea) was settled by the NABATEANS. Heavy as the settlement had been in earlier periods, the Nabatean population at its height was perhaps twice as intensive. Even more efficient use was made of water; even more difficult land was put under cultivation. Practically all the defense posts and fortresses were reused or strengthened, and others were built. The Nabateans flourished from the first century B.C. through the first century A.D., almost all of the Nabatean kingdom being incorporated into a Roman province by Trajan in A.D. 106. Occupation continued to be heavy in the Roman and Byzantine periods.

During the twelfth century, the Crusaders built a magnificent castle at Kerak (*see* KIR-HARESETH), where Mesha sacrificed his son to drive off the Israelite invaders.

4. Religion. The Moabite Stone says much about the attitude of the Moabites toward their national deity, CHEMOSH. Mesha speaks of his father's having "made this high place for Chemosh in Qarhoh" (Dibon; *see* § 3*c above*). It is because Chemosh was angry at his land that Omri was able to humble Moab. That Chemosh dwelt in Medeba in Mesha's time signifies Moab's recapture of that city (lines 8-9; some scholars read "restored"). All the people of Ataroth were slain as a sacrifice for Chemosh. At the command of Chemosh, Nebo was taken from

62. Head of a Semitic king or deity

Israel, and its population was slain for the god Ashtar-Chemosh. The king of Israel was driven out of Jahaz before Mesha by Chemosh. Fig. MOA 62.

"Chemosh" was a common element in Moabite names. We have mentioned Kammusunadbi (Chemosh-nadab) and Kamashallay (Chemosh-hallay). According to the Moabite Stone, Mesha's father's name, although damaged, was a compound with "Chemosh." From seals we find the names כמשיחי (Chemosh-yeḥi) and כמשצדק (Chemosh-ṣedeq).

However, Chemosh should not be pictured in purely Moabite terms. Once in the Moabite Stone he is mentioned as Ashtar-Chemosh (עשתר כמש), being identified with Ashtar, the Canaanite god of the morning star. The winged sun disk occurs several times as a motif on seals in connection with names formed with "Chemosh." Also, in the Babylonian vocabularies of the second millennium, Chemosh (Kammush) appears as a name of Nergal, the lord of the City of the Underworld. So Chemosh must be considered in the light of the general Semitic pantheon.

Small pottery figurines found at various places in Moab contribute to our knowledge. As was also true of the Canaanites, the gods and goddesses of fertility were prominent in Moab (*see* FERTILITY CULTS).* Near Mount Nebo and near Kerak have been found figurines of fertility goddesses holding loaves of bread or some other sacred object.* Heads of similar figurines were found at el-Medeiyineh and Balu'ah, one with the prong for attaching it to the body still intact.* Figurines of animals or of animals with riders have also been found. An additional find at el-Medeiyineh

E. D. GROHMAN

MOABITE STONE. A stela of black basalt measuring forty-four by twenty-eight by fourteen inches, found at Dhiban (OT DIBON) in Transjordan and containing an inscription of MESHA, king of Moab, in which he recounts his victory over Israel.

1. Discovery
2. Language
3. Historical significance
4. Translation
Bibliography

1. Discovery. Although the stela was first shown in 1868 to F. A. Klein, a Prussian missionary, the French orientalist Clermont-Ganneau had already been apprised of its existence and was able subsequently to obtain a copy of some lines and a squeeze of the inscription. Shortly after this the natives, suspecting the value of the antiquity, smashed it into several fragments, hoping thereby to dispose of each piece separately and thus command a higher price. Most of the fragments were eventually acquired by the Louvre, where, with the aid of Clermont-Ganneau's squeeze, they were reassembled, so that the stone as at present exhibited is a combination of original pieces and plaster restorations of the remainder. Fig. MOA 66.

66. The Moabite Stone, stele of Mesha king of Moab

2. Language. This stela is the only major inscription in Moabite, a language or dialect very closely related to Hebrew. Epigraphically, the forms of the letters are of importance in illustrating the development of Canaanite writing in the latter half of the ninth century B.C. The language shares with Hebrew such characteristic features as the "*waw* consecutive," the relative particle אשר, and the accusative particle את. It differs from Hebrew, however, in contracting all diphthongs *ay* and *aw* to *ê* and *ô* respectively, in exhibiting a masculine plural and dual termination in *n* rather than *m,* in preserving the *ipht'al* theme of the verb, and in employing a feminine ending *-t* in place of *-at,* as in *št* (=*šatt*) for OT *šānâ* (<*šanatu*), "year."

3. Historical significance. The inscription is dedicated to the god CHEMOSH in thankfulness for a Moabite victory over the Israelites. The account opens (line 5) with Chemosh' anger against his people and the resultant punishment of Moab by Israelite domination under Omri. This supplements the OT account in I Kings 16 by supplying the informa-

tion that Omri was responsible for the conquest of N Moab. Lines 6-7 then describe how, on the accession of Omri's son to the throne of Israel, the latter determined to continue the subjection of Moab, but that Mesha succeeded in breaking the Israelite yoke so that Israel "completely perished for ever."

According to II Kings 1:1; 3:5, Moab took advantage of the confusion following the death of Ahab to revolt. Mesha's account states (lines 7-8) that Omri had gained control of the territory about Medeba and that Israel held it for a period of forty years during his reign and half that of his son. Since Omri reigned twelve years (I Kings 16:23) and Ahab twenty-two (vs. 29), the combined reign and half reign would be only twenty-three years. If, however, the בנה of line 8 refers to Omri's grandson (for "son" meaning "grandson" cf. Gen. 29:5) Jehoram, who reigned for twelve years (II Kings 3:1) after the short one-year reign of his brother Ahaziah, then the combined years of Omri, Ahab, and Ahaziah and one half the years of Jehoram's reign would total forty-one.

According to II Kings 3:4-27 it was Jehoram who set out to crush the rebellious Moabites, allied with Jehoshaphat of Judah and the Edomite king, and encouraged by the prophet Elisha. Although they carried all before them, they were finally forced to retire when Mesha, in the utmost extremity, offered his eldest son as a sacrifice to Chemosh. There is no reference to this in the Moabite Stone. On the other hand, there is no reference in the OT to the Moabite victory which forms the theme of the stela. Mesha's gloating allusion to the complete destruction of Israel may refer, not only to his military success, but also to the overthrow of the Omrid dynasty by Jehu in 841 B.C.

Certain facts of interest for the religion of the period also emerge. The OT custom of the חרם or BAN was likewise observed in Moab (line 17). Just as Israel's victory was due to Yahweh (II Kings 3:18), so Moab owed hers to Chemosh (line 4; cf. Judg. 11:24). Lines 14-18 mention a Yahweh sanctuary in the city of Nebo, although the OT gives no indication of this.

4. Translation. (1) It was I, Mesha son of Chemosh-[. . .], king of Moab, the (2) Dibonite, who, when my father had ruled over Moab for thirty years, ruled (3) after my father and made this high place for Chemosh in Qericho as a h[igh place(?) of] (4) victory, because he delivered me from all the kings[? or vicissitudes?], and because he let me triumph over all my foes. Omri, (5) king of Israel, oppressed Moab for a long time, because Chemosh was angry at his land. (6) His son succeeded him, and he too said, "I will oppress Moab!" It was in my time that he said [this], (7) but I triumphed over him and his dynasty, Israel having completely perished for ever. When Omri took possession of all [the re]gion (8) of Medeba [cf. Josh. 13:9], he inhabited it during his time and half the time of his son [or grandson]—forty years. (9) Chemosh restored it in my time, so that I built Baal-meon [cf. Num. 32:38], made the reservoir in it and built (10) Kiriathaim [cf. Josh. 13:19]. Now the men of Gad had always lived in the region of Ataroth [cf. Num. 32:34], so the king of (11) Israel built Ataroth for them. I fought against the city, captured it and slew all the people of (12) the city as satisfaction for Chemosh and Moab. Bringing Ariel [cf. II Sam. 23:20; or the altar hearth of (cf. Ezek. 43:15-16)] its DWD back from there, I (13) dragged him [or it] before Chemosh in Kerioth [cf. Jer. 48:24]. In it I settled men of Sharon and men of (14) Maharith. Then Chemosh said to me, "Go, capture Nebo [cf. Num. 32:38] from Israel!" (15) So I went by night and fought against it from break of dawn till noon. I (16) captured it, slaying all of [it]—seven thousand men, boys, women, [girls], (17) and female slaves, for I had put it under the ban for Ashtar-Chemosh. Taking from there the (18) accoutrements of Yahweh, I dragged them before Chemosh. Now the king of Israel had built (19) Jahaz [cf. Josh. 13:18] where he stayed when he fought against me, but Chemosh drove him out before me. (20) From Moab I took two hundred men, its very best, brought them against Jahaz and captured it, (21) in order to add it to Dibon. It was I who built Qericho, the wall of the two honeycombs [i.e., the two mounds honeycombed with cisterns (suggestion of F. V. Winnett); or forests?] and the wall of (22) the citadel; I who built its gates; I who built its towers; I (23) who built a palace; I who made the retaining walls of the reservoir [for the wa]ter[? or spring?] inside (24) the city. Since there was no cistern inside the city at Qericho, I said to all the people, "Each of you (25) make himself a cistern in his house!" It was I who cut the beams[?] for Qericho, using (26) Israelite captives; I who rebuilt Aroer [cf. Josh. 13:16]; I who made the highway in the Arnon [valley; cf. Num. 21:13]; (27) I who built Beth-bamoth [cf. Josh. 13:17?], because it was razed; I who rebuilt Bezer [cf. Josh. 20:8], because it was in ruins, (28) using fifty men of Dibon, since all Dibon is obedient to me. It was I who reigned (29) . . . in the cities which I added to the land; I who rebuilt (30) . . . [Mede]ba and Beth-diblathaim [cf. Jer. 48:22]. As for Beth-baal-meon [cf. Josh. 13:17], I brought there the fin[est (31) of the oxen and the best of] the sheep of the land. As for Horonaim [cf. Isa. 15:5], there settled in it . . . (32) . . . Chemosh said to me, "Go down, fight against Horonaim!" So I went down, [fought (33) against the city and captured it.] Chemosh [resto]red it in my time . . . (34) . . . .

R. J. WILLIAMS

MOADIAH mō′ə dī′ə [מועדיה, Yahu promises] (Neh. 12:17). A priestly family of the time of Joiakim. *See* MAADIAH.

MOAT [חרוץ; Akkad. *ḫarīṣu*] (Dan. 9:25); KJV WALL. A ditch or trench surrounding the walls of a fortress or city for purposes of protection; a detail of the rebuilt city of Jerusalem.

MOCHMUR mŏk′mər [Μοχμούρ] (Jth. 7:18). A brook SE of DOTHAIM. Possibly it is identical with Wadi Makhfuriyeh, S of Nablus. The OL reads *Machur;* the Vulg. omits the name.

P. WINTER

MOCK. *See* SCOFFER.

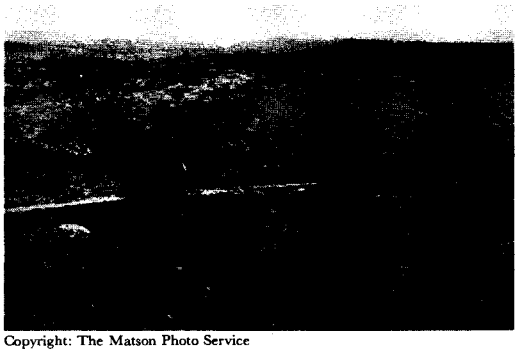
MODEIN mō'dēn [Μοδεΐν=מודעין, declarers]; KJV MODIN mō'dĭn. The home and burial place of the early Maccabean leaders (*see* HASMONEANS). In both late Jewish and early Christian sources, Modein is variously indicated as a village or a city. Certain rabbinic writings, and also Jerome's Vulg. throughout, name the place Mount Modein (*in monte Modin*). It is most probable that this nomenclature has local physiographic significance.

1. Location
2. History
3. The Hasmonean mausoleum
4. The man from Modein

Bibliography

1. Location. Modern Ras Medieh undoubtedly marks the site of the Hasmonean Modein. All available evidence—and there is a great deal of it—so demonstrates. Included are intertestamental descriptions of Modein-based battles, rabbinic and Talmudic specifications of distance from Jerusalem, nearness to Lydda emphasized in major Palestinian Onomastica, and the placement of Modein on the Medaba Map.

These miscellaneous data are doubly paralleled and confirmed by two sequences of evidence, linguistic and archaeological, in the form of place names and artifacts here localized and demonstrating habitation on the site. Such synchronized data are available for main periods from Hellenistic times on.



Copyright: The Matson Photo Service

67. Area around Modein

Ras Medieh is a typical Palestinian tell in the midst of the Shephelah, standing some seven hundred feet high. It is located above the ancient Jerusalem-Jaffa road, almost equidistant between Lower Bethhoron and Lydda. The modern village of Medieh nestles at its base.

Fig. MOD 67.

2. History. Modein is most famed because here in 167 B.C. the aged priest Mattathias, a descendant of Hasmon, dramatically incited his fellow townsmen and his sons to revolt against the attempt of Antiochus IV Epiphanes to force religious and cultural Hellenization onto Jewish life in Palestine. The story of that revolt, narrated earlier in I Macc. 2:1-28, and retold by Josephus in Antiq. XII.vi.2, continues to be one of the great religio-national classics of Jewish literature. The immediate result, won in fairly brief time, was the firm establishment of Jewish liberty, religious and civil, achieved under Hasmonean leadership, and maintained within the framework of the "Second Jewish Commonwealth."

In this struggle Modein itself was repeatedly the field base for well-directed actions against invading armies (I Macc. 16:4-10; II Macc. 13:14-17). It served excellently for this purpose; for it was handily defensible, and it overlooked one of the main invasion routes into the Judean uplands.

In view of Jewish family customs, it was most natural for Modein to get lasting repute as the burial place of the heroic group of early Hasmonean leaders. Three times over, I Maccabees narrates—and Josephus reiterates—accounts of local burial and national mourning for Mattathias himself, and for one and another of his valiant sons (I Macc. 2:70; 9:18-21; 13:25-26; Jos. Antiq. XII.vi.4; XII.xi.2; XIII.vi.6).

3. The Hasmonean mausoleum. Simon "the Guide," who outlived his four brothers, erected a monumental family sepulchre at Modein, which was a pre-eminent memorial of that period. The descriptions of it in I Maccabees (13:27-30) and the Antiquities (XIII.211-12) are so vivid and detailed as to enable its reconstruction with considerable confidence. It was characterized by seven pyramids, memorializing the parents and their five sons. Colonnades with panoplies and ships' prows in the intercolumniations were also featured. Elements indigenous and Egyptian and Hellenistic were thus strikingly synthesized. It was a prototype for the sturdy Herodian memorials known from Jerusalem and elsewhere. *See* TOMB.

Apparently it was an astonishingly permanent structure. The Onomastica of Eusebius and of Jerome recorded familiarity with it in the fourth and the fifth centuries respectively. The current consensus is that it was constructed on the very summit of the Ras itself.

4. The man from Modein. It is all but forgotten that Modein made distinctive and personal contribution to the elaboration and summarization of normative Judaism. Rabbi Eleazar was the teacher, native to Modein, who did this. He was known simply as the Modiite (*ha-Modi*); and he was quoted with evident esteem in Aboth and Mishna and the Talmuds. The beginning and the ending of his teaching career were his association with Rabbi Gamaliel II, the Nasi at Jamnia, and his execution on the order of Bar Cocheba himself in 135, on a false suspicion of treason. His dictum quoted in Ab. 3.12 is accepted as a typical analysis of religious heresy from the viewpoint of rabbinic Judaism, of which he was a loyal and a skilful exponent.

MOETH. Apoc. name of NOADIAH 1.

MOLADAH mŏl'ə də [מולדה, generation]. A city of Simeon in the S of Judah, not far from Beer-sheba

(Josh. 15:26; 19:2). The name indicates that it was a shrine whither women came to pray for children. Since one of the descendants of Jerahmeel bore the name Molid (I Chr. 2:29), it has been suggested that Moladah was a part of the Jerahmeelite settlement, which is known to have been in the S of Judah (I Sam. 27:10). In the postexilic period Moladah was one of the towns resettled by the returning Jews (Neh. 11:26). Later on, the Edomites occupied the region, and so it is probably the same as the fortified town of Malatha, where Herod Agrippa I, in retirement at the time of his disgrace, was dissuaded from suicide by his wife, Cypros (Jos. Antiq. XVIII.6.2). The site is unknown. S. COHEN

MOLDING [זר, wreath, border]; KJV CROWN. The decorative ledge of gold around the ark of the covenant (Exod. 25:11; 37:2), the table (25:24-25; 37:11-12), and the incense altar (30:3-4; 37:26-27). In form it was likely either a rope molding or a projecting flat surface with simple floral decoration. Judging by ridges on known stone altars from antiquity, its position was part way up on the side of the structure, although it may have been at or near the upper edge.

See ALTAR; ARK OF THE COVENANT; TABERNACLE.
L. E. TOOMBS

MOLDY; KJV MOULDY. The translation of נקדים in Josh. 9:5, 12 (only the plural form is used in the OT; CAKES in I Kings 14:3 [KJV CRACKNELS]).

MOLE [חפרפרה (Isa. 2:20, *emended text*), *possibly* digger, *from* חפר, to dig; KJV תנשמת (Lev. 11:30; RSV CHAMELEON)]. Any of several small insect-eating mammals of the family Talpidae, the true mole being of the genus Talpa. Both Tristram and Bodenheimer agree that the mole, like the shrew (Soricidae), has never been found in Palestine.

It is surmised that חפרפרה designates the great mole rat (*Spalax typhlus*). This animal, of molelike appearance, six to nine inches long, is a member of a small family of Old World rodents adapted to a purely subterranean life, whose little earth hills testify to its assiduous tunneling in search of bulbs and roots (cf. the postbiblical Hebrew אשות). With respect to Isa. 2:20 it must be observed that the mole-rat and the bat do not have the same habitat, though each moves in a world of darkness.

MOLECH, MOLOCH mō'lĕk, —lŏk [*the deliberate misvocalization of the name of a pagan god, the consonants,* מלך, king, *being retained and the vowels of* בשת, shame, *used; cf.* ASHTORETH]. A deity to whom human sacrifice was made, particularly in the Valley of Hinnom, which bounds Jerusalem on the SW (II Kings 23:10; Jer. 32:35), at a site known as Topheth, which probably means "firepit" as in Syriac. The deity is associated with Ammon in I Kings 11:7, and is here identical with MILCOM, the national god of Ammon. This is not the proper name of the deity, but a title—"the king"—as is suggested probably in the oracles against Ammon in Amos 1:15; Jer. 49:1, 3, which read "their king," rendered "Milcom" by the LXX. Jer. 49:3 mentions "his priests and his princes" in parallelism with "their king" (RSV "Milcom"), so that it is beyond doubt that "king" here is the title of the god. The LXX generally bears this view out in Lev. 18:21; 20:2-5 (*see below*); Jer. 32:35. The form "Moloch," used by the LXX here and in II Kings 23:10, is interesting in view of the discovery by G. Dossin of a god Muluk in the tablets from Mari on the mid-Euphrates (date *ca.* 1700 B.C.). This is an abstract form, a verbal noun, and may be rendered "kingship." In spite of the LXX "Moloch," however, which is actually used only twice, it seems more likely that the god of the Ammonites was named by his title "the king"—Malik with the final afformative *m,* which is used with the force of a definite article.

Eissfeldt thinks that in the phrase "to sacrifice, or pass a child through the fire לְמֹלֶךְ," the last word means, not "to Molech," but "as a votive offering." This view is based on the significance of the phrase in Punic inscriptions *ca.* 400-150 B.C., the vocalization of מלך being known from the Latin of bilingual inscriptions as *molc,* denoting a sacrifice made to confirm or acquit a vow. In view of this evidence the significance of לְמֹלֶךְ in the stereotyped phrase cited *above,* as in Lev. 18:21; 20:3-5; II Kings 23:10; Jer. 32:35, must remain an open question. In I Kings 11:7, however, "Molech" is visualized definitely as the national god of Ammon.

From Jephthah's reply to the Ammonites (Judg. 11:24) it is apparent that the national god of Ammon was identical with CHEMOSH, the national god of Moab. From the compound divine name Athtar-Chemosh, by which the national god of Moab is named in the inscription of Mesha, it appears that the proper name of the god was Athtar—both Chemosh and Milcom being his local titles. Athtar is well known in Arabian mythology as the Venus Star. From the Ras Shamra texts we see that the morning and evening star might be thought of as twins, SHAHAR and SHALEM. From the name of the city we may reasonably infer that the cult of Shalem, and conceivably also of his twin Shahar, was practiced at Jerusalem in pre-Israelite times, so that when Solomon built high places for Chemosh of Moab and Molech of Ammon, probably on the Mount of Olives, he was establishing local varieties of a cult already practiced at Jerusalem.

Apart from general references to Molech in Jer. 49:1, 3, and perhaps Amos 1:15, or to his cult in I Kings 11:7, 33; Zeph. 1:5, the rest of the references to Molech are associated with human sacrifice (Lev. 20:2-5), specifically by making one's children pass through the fire (Lev. 18:21; II Kings 23:10; Jer. 32:35). There Molech is not associated with Ammon, and the view of Eissfeldt (*see above*) is feasible.

Human sacrifice in Israel is first explicitly attested under Ahaz in Judah (II Kings 16:3) and in Israel under Hoshea (II Kings 17:17); and, though Molech is not named, the parallel passage in II Chr. 28:3 adds that the scene of this abomination was the Valley of the Son of Hinnom, specifically Tophet, which is associated with Molech in Jer. 32:35. Apart from the sacrifice of the son of Mesha of Moab (II Kings 3:27), which would naturally be made to Chemosh, the national god of Moab, whom we have

identified with Molech, human sacrifice was made by the Assyrian military colonists in Samaria after 722 B.C. Here the gods so honored are given as Adrammelech and Anammelech. The first of these may have been Molech, actually Malik—Adrammelech means "the lordship of the King"—and Anammelech may be a case of the syncretism of the local god Molech and Anu, the supreme sky-god of Mesopotamian religion.

In spite of the reformation of Hezekiah, which does not mention the cult of Molech, this cult survived until the time of Josiah, when Zephaniah condemned it (Zeph. 1:5). This passage, associating the worship of Milcom ("their king") with the cult of the host of heaven, supports our contention that Molech was primarily an astral deity. In the account of Josiah's reformation the scene of human sacrifices, Tophet in the Valley of Hinnom, was desecrated (II Kings 23:10), and the sanctuaries of Milcom and Chemosh (the Ammonite and Moabite manifestations of the god Athtar), which had survived from the time of Solomon, were destroyed.

MOLOCH. *See* MOLECH.

MOLTEN IMAGE [מסכה, נסיך, נסך, *all from* נסך, to cast, to pour]. The appearance of these words in the OT reflects the common practice among ancient peoples of making representations of deity for use in worship (*see* IDOL; GRAVEN IMAGE). Molten images were made by pouring molten gold, silver, iron, or bronze over a prepared form or into a mold (Lev. 19:4; Deut. 27:15; Isa. 40:18-20). The prohibition of IDOLATRY in the Ten Commandments implies that Israelites were exposed to this practice. Small bronze images of Baal or Resheph or other deities have been found in the excavations, on occasion overlaid with gold. Silver and gold figurines are also known, as well as cast bronze animal figurines. Although no representations of Yahweh have been found, instances of the use of molten and other types of images or cult objects in Israel are attested by the stories of the golden calf (Exod. 32; *see* CALF, GOLDEN) and Micah's idols (Judg. 17–18), and by prophetic denunciations (e.g., Isa. 30:22; 40:19; Hos. 13:2). It is also possible that some Israelites made use of Canaanite images in their worship of Yahweh.

MONEY BOX [γλωσσόκομον] (John 12:6; 13:29); KJV BAG. A small receptacle. The term is used in reference to the apostles' receptacle for their funds.

MONEY, COINS. Movable objects which are generally accepted as means of barter or evalution. The modern conception of money developed:

a) from barter—i.e., exchange of superfluous objects for desirable ones or delivering of objects of daily use or products for duties, taxes, or tributes;

b) from exchange of metal (gold, silver, copper, iron) for desirable objects or payment of duties;

c) from the use of minted metal of fixed weight and purity as means of exchange or payment.

Although this development took place chronologically, the several phases existed also simultaneously, so that, e.g., we find pure barter at periods when minted money was long in use.

The accounts of the Bible on money transactions are best understood if we keep in mind these three phases of development, as in the following discussion.

1. Barter
2. Exchange of metal for objects or duties
3. Use of minted metal
   a. In the OT period
   b. In the intertestamental period
   c. In the NT period
4. Jewish numismatics

Bibliography

1. Barter. The primitive economy sufficed on its own products, but a steady growth of the community soon multiplied its demands. The peculiarities of the geographical situation and the specialization of the handicraft eventually made a mutual exchange of products necessary. Barter was therefore generally practiced. The most important movable possession of the primitive man—his cattle—became the accepted means of evaluation. This is proved by the Latin word for "money," *pecunia* (*pecus*="cattle"), and the Hebrew מקנה (*miqnê*), which stands for "cattle" (Gen. 13:2; 31:18; etc.) or "purchase" (17:12-13; 23:18). Smaller objects suitable for barter were sheep, asses, goats, but also corn, oil, and wine. The religious practice of the period, which made cattle the most important offering to the gods, also weighed heavily in favor of making animals the most common currency of barter. The great herds which thus accumulated at the holy places could not be consumed by the priests but were traded for other goods. Thus the temples became the oldest places of commerce, the celebration of offerings the first fairs.

The Bible gives us many examples of barter at this period. King Solomon paid Hiram with wheat and olive oil for his help with the erection of the temple (I Kings 5:11). The tribute of King Mesha of Moab consisted of lambs and rams (II Kings 3:4). The Israelites were taxed for the court of the king with grain, wine (I Sam. 8:15), wheat, barley, oil, sheep (Ezek. 45:13-16).

2. Exchange of metal for objects or duties. Exchanging objects (cattle, wheat, etc.) proved unsatis-

factory because of their fluctuating value and because of their inconvenient size. As civilization grew to be more and more based on metals, metals became dominant as fixed and easily transportable means of evaluation. Everybody needed copper, the most important material for the manufacturing of weapons and of agricultural implements which were much more durable and therefore more economical than stone implements. A man who had copper had no difficulty whatsoever in trading it for whatever he wanted. Silver and gold were used for larger transactions. Abimelech gave to Abraham "a thousand (pieces of) silver" (Gen. 20:16). The Midianites paid for Joseph "twenty (shekels of) silver" (37:28). Micah gave to his mother "eleven hundred (pieces of) silver" (Judg. 17:2). Here the translator has added "pieces" or "shekels." The original has only כסף (*keseph*), "silver." This must have meant pieces of silver of now unknown weight.

The estimation of the value by eye was likely to be uncertain. Therefore, uniformly shaped pieces of metal were molded in the form of ingots, bars, tongues; heads of animals, or bracelets. The bracelets could be worn as ornaments. So the spoil of the Midianites (Num. 31:50) consisted of "articles of gold, armlets and bracelets, signet rings, earrings, and beads," objects which were not only of ornamental use but also convenient articles of barter. This practice persists today among primitives who use strings of coins as adornment or wear their property in the form of gold bracelets and other valuable and tradable finery. The forms of these pieces of metal were probably normed and represented an accepted value (or weight), so that buying and selling could be accomplished with their help. Achan reported to Joshua that among the spoil of Jericho was a "bar of gold" (Hebrew "tongue of gold"; Josh. 7:21). The servant of Abraham gave Rebekah "a gold ring weighing a half shekel, and two bracelets for her arms weighing ten gold shekels" (Gen. 24:22). The children of Jacob purchased corn in Egypt with annular currency. Their money is described as "bundles of money"—i.e., it could be gathered together and bound with strings (42:35; *see* WEIGHTS AND MEASURES § B1). We read in Deut. 14:25 of the money which was intended for the sanctuary: "Bind up the money in your hand, and go to the place." This tying up is understandable only if this currency had the form of rings. Each of the brethren and sisters of Job gave him a "ring of gold." These rings represented money, since otherwise not everyone would have given him the same present (Job 42:11). At Gezer two pieces of gold in the forms of a circle and a tongue were excavated, the only examples yet found (*see* No. 1 in § 5 *below*). This scarcity is explainable because gold and silver were rare in these periods, and because the gold was subject to continuous remelting into more contemporary forms till it was at last struck into coins.

But even these shaped and perhaps normed pieces of metal were no reliable means of evaluation. They could be assured only after ascertaining their exact weight. The weighing system of the Bible was taken over from the Sumero-Babylonian method (*see* WEIGHTS AND MEASURES § B2). It is based on the shekel, which at first meant the object to be weighed, but later was used in the sense of "balance" or "weight." The weight of the shekel was *ca.* 11.5 grams silver (*ca.* .4 ounce). Silver was much more common than gold, and became therefore the real medium of evaluation. Thus the Hebrew word for "silver" (כסף, *keseph*) later meant plainly "money" (as *argentum* in Latin and *argent* in French). The necessary amount of silver was weighed in front of the dealer. Therefore, it is said of the purchase of the Machpelah cave by Abraham: "Abraham weighed out for Ephron the silver . . . , four hundred shekels of silver, according to the weights current among the merchants" (Gen. 23:16). Jeremiah bought in Anathoth the field of his uncle's son and "weighed out the money to him, seventeen shekels of silver" (Jer. 32:9).

The value of the shekel cannot be calculated simply by summing up the amount of silver and comparing it with modern silver prices. Such a calculation would give an entirely misleading picture, because we would equal the purchasing power of today with that of biblical times, which was quite different. Our only reliable help is the biblical account itself. It was possible then to buy a ram for 2 shekels (*ca.* 23 grams of silver; Lev. 5:15), a homer of barley (*ca.* 370 liters or 11 bushels; or, by the reckoning suggested in WEIGHTS AND MEASURES § C4*a*, 134 liters or 3.8 bushels) for 50 shekels (Lev. 27:16), or a measure (סאה, *seah; ca.* 12:5 liters or *ca.* 1.5 pecks; *see* WEIGHTS AND MEASURES § C4*f*) of fine meal for a shekel, or two measures of barley (*ca.* 25 liters or 3 pecks) for a shekel (II Kings 7:16). Though the weight of the shekel differed during various periods, it is possible to guess approximately which quantities of silver passed from hand to hand in the described transactions. We will not be far wrong if we assume that a shekel had 11.5 grams of silver, a mina (50 shekels) 575 grams, and a talent (60 minas) 34,500 grams. *See* WEIGHTS AND MEASURES §§ B2, 4*g*.

The continual weighing and examination of the purity of the metal took up much time and naturally enticed cheating. The weights consisted mostly of pieces of bronze or iron or dressed stones which never had been gauged. So the Bible warns: "You shall not have in your bag two kinds of weights [Hebrew 'a stone and a stone'], a large and a small . . . . A full and just weight [Hebrew 'stone'] you shall have" (Deut. 25:13, 15).

> A false balance is an abomination to the LORD,
> but a just weight [Hebrew "stone"] is his delight
> (Prov. 11:1; cf. 20:10).

Also, Amos (8:5) mentions tricks used in weighing.

In order to find a remedy, the authorities (kings) gauged and stamped the weights, which were then declared sacred:

> A just balance and scales are the LORD'S;
> all the weights in the bag are his work
> (Prov. 16:11).

The next logical step was to stamp directly on the tongues, bars, or bracelets to be bargained with, in order to guarantee their right value, as stamps or seals are used on documents to guarantee their genuineness.

3. Use of minted metal. The further development was a piece of metal whose weight and purity were ascertained by a stamp—i.e., a coin. This was a tremendous success. Now it was no longer necessary to examine the purity of the metal and the accuracy of the weight, although fraud was still possible. We know of great numbers of antique coins which were forged, struck from inferior metal, and were coated with silver. Frequently antique coins display a deep cut by a sharp instrument which shows that somebody wanted to investigate if the metal was real silver. Furthermore, the edges of the coins were not marked in antiquity—this is an invention of the eighteenth century A.D.—so that it was easy to cut off parts. As protection against this practice, one had to weigh the coins again in order to get full value.

a. In the OT period. The ingenious invention of coins, which has not been superseded—either in the shape or in the character of the coins—does not go back farther than the seventh century B.C. It is assumed that it took place simultaneously in Aegina in Greece and in Lydia in Asia Minor. We know, therefore, that the Israelites could not have become acquainted with the first coins before the Babylonian exile. When the Bible refers to money in an earlier period, it must be understood as bars, ingots, bracelets, etc., stamped or unstamped, from one of the phases of the preliminary development.

In the Bible the first money is mentioned in Ezra 2:69. When returning from the Exile, the Jews donated for the erection of the temple "sixty-one thousand darics of gold, five thousand mines of silver." Today the explanation is generally accepted that "darics" (דרכמונים, *darkᵉmônîm*) meant the Persian gold coin *dareikos*. This name is derived from King Darius I (521-486 B.C.). These coins are of pure gold (8.424 grams) and illustrate a very early phase of coinage. They are oval and have only a deep incuse of varying form on the reverse (*see* No. 2 in § 5 *below*). Nevertheless, the account of Ezra makes clear that the greatest part of the offerings was uncoined silver and gold. This shows that at this period (fifth century B.C.) still not enough coins were current, and the demand was covered only partially. Likewise we read that Ezra carried with him for the temple "twenty bowls of gold worth a thousand darics" (Ezra 8:27). Darics are similarly mentioned in Neh. 7:70-72. The fact that these gold coins were already called darics at the time of King Cyrus (550-530 B.C.)—i.e., well before the reign of King Darius, who presumably gave them this name, leads to the assumption that this term is probably of a much earlier date. We find an explanation in an older Assyrian denomination (*see* DARIC), but most probably the term "daric" is best accounted for when we assume that the author of the book Ezra, who lived in the fifth century B.C., habitually called every current gold coin "daric," and therefore also used this name for the coins which Ezra brought with him. The same interpretation is indicated for the mentioning of darics at the time of King David (I Chr. 29:7).

It is probable that the mint for these darics was at first in Sardis and was taken over by the Persians after the conquest, because only at that time were the experience and skilled craftsmen available.

On the other hand, it seems that, at least in the W part of the Persian Empire, the Greek silver coinage was most current. The oldest Greek coin was found in an excavation in Shechem in 1956, dated from the sixth century B.C. and originating from N Greece. More current were the tetradrachmas of Athens in the fifth century B.C. The intensive trade connection between Greece and Asia Minor and the Phoenician towns in the N of Palestine made these coins an international currency. This also explains their frequent discovery at excavations in Palestine (*see* No. 3 in § 5 *below*). The Athenian tetradrachma was far more developed, having both obverse and reverse dies, while the darics have only obverse dies.

Courtesy of the Trustees of the British Museum

68. Coin with inscription YHD (*Yehud,* Judah) in the British Museum (from Gaza? fourth century B.C.)

It is proved that there was a local mint already in the Persian province יהד (*Yᵉhûdh*)—i.e., Jehud—in the fourth century B.C. From Ezra 5:1, 8; 7:14; Dan. 2:25; 5:13 it is ascertained that *Yᵉhûdh* was the official name for Judea (*see* Nos. 4-5 in § 5 *below*). It is clearly to be observed that these coins are conceived in pure Greek style, and that No. 4 is an imitation of the tetradrachma of Athens. All show the inscription "יהד." As they are of silver, they must have been issued with permission of the Persian commanding officer or satrap. Only a few specimens are known to exist, which indicates that they were struck in small numbers or during a short period. Fig. MON 68.

After Alexander's conquest of the Persian Empire the unified coinage of the new empire was valid for Palestine. The current coins were the gold stater and the silver tetradrachma (*see* No. 6 in § 5 *below*). The nearest mints were Acre and Sidon. But the great traffic in the unified world, together with the many movements of troops, brought tetradrachmas from various mints into the country. The Bible does not provide any clues for this period; consequently these coins are not mentioned. But it is proved by excavations and finds in Palestine that the above currency and the following coins of the Ptolemies were circulating abundantly.

The Ptolemies, the heirs of Alexander, added more mints (Gaza, Jaffa, Tyre), but the style of the coin type did not change much. *See* No. 7 in § 5 *below*.

b. In the intertestamental period. The control of the Ptolemies over Judea expired in 198 B.C., when they were overrun by the Seleucids (*see* No. 8 in § 5 *below*).* The books of the Maccabees describe how the latter tried to suppress the ancient religion of the Jews in the attempt to force Hellenism upon them. In 167 B.C. the Maccabees led their people in the revolt against this suppression. After much trouble, victories, and defeats they forced the Seleucids into granting them some sort of independence. In 139 B.C., when Antiochus VII (Euergetes) started to fight against the usurper Trypho for the supremacy of the Seleucid Empire, he tried to win over Simon the Maccabee as an ally, and wrote him a letter offering him his friendship and guaranteeing him the independence of his country. He bestowed on him the right of coinage: "I permit you to mint your own coinage as money for your country" (I Macc. 15:6). But after the consolidation of his reign, following the successful war against his rival, he rejected the Jewish auxiliary troops which were sent to him (138 B.C.), canceled all former promises, and forced Simon to pay tribute. This quick change from an independent state to one subject to tribute did not allow for sufficient time to start issuing coins. When in 135 B.C. John Hyrcanus followed his father as ruler, Antiochus brought the rest of the autonomy to an end. He conquered Jerusalem and forced him into complete subjugation (134 B.C.). In 132/31 Antiochus struck his own coins in Jerusalem which bore his name and confirmed his rule. *See* No. 9 in § 5 *below*. Fig. SEL 37.

The fight of the descendants of Antiochus after his death in 129 B.C. weakened the power of the Seleucids to such a degree that John Hyrcanus declared his independence simultaneously with others. As a sign of his sovereignty he started to mint his own coins with the inscription: "Johanan the high priest and the community [*ḥebher*] of the Jews" (*ca.* 111/10 B.C.). These are the first real Jewish coins, and all assumptions of a probable previous coinage ascribed to Simon the Maccabee must be disregarded.

John Hyrcanus I accomplished what Simon could not do. He had sufficient time on his hands, and he certainly needed it, because neither a mint nor skilled craftsmen were available. It is even unlikely that there existed skilled Jewish diesinkers in other Gentile mints. The Second Commandment: "You shall not make yourself a graven image" (Exod. 20: 4), did not allow a Jew to engrave the head of the king or the emperor, which was an indispensable part of the obverse of ancient coins. Thus, on account of lack of experience, the first Jewish coins could only be extremely modest, quite unlike the coins of the contemporary Eastern world, which, guided by experienced Greek artists, could look back on hundreds of years of tradition. The obverse of these first Jewish coins displayed inside a wreath the inscription mentioned above. For the lettering the ancient Jewish script was chosen. The Dead Sea Scrolls indicate more use of this Paleo-Hebrew script than has been formerly supposed. To the Jews it probably seemed the best suitable script for coins, in part because it was well known to them from the Sidonian and Tyrian currency. From now on it remained traditionally in use on all later Jewish issues, with the exception of the coins of the Herodian rulers. The title of high priest for John Hyrcanus I does not seem strange if we consider that the Jewish state in the postexilic period was a hierarchy with the high priest as its leader. The Maccabees as princes had also the hereditary title of high priest. For the reverse of the coins a double "horn of abundance" (cornucopia) and a poppy head were chosen, both symbols of plenty and fertility, originating in Greek myths and frequently employed on Seleucid coins. Here it should signify the prosperity of the reign of John Hyrcanus I. It shows that the concept of the first Jewish coinage leaned heavily on the contemporary currency, although the design was deviating intentionally from all known types. *See* No. 10 in § 5.

The denomination of this and the following coins is to be understood as the second smallest unit (פרוטה, *perûṭâ;* διλεπτον). In the meantime the Seleucids continued to mint silver coinage, which was struck by the Phoenician cities at their order. This money was the recognized currency in Palestine. To issue silver coins was the acknowledged and sole privilege of full autonomy. If the Maccabees had started to strike silver of their own, it might have been interpreted as an open revolt, which could have led to an unnecessary complication of the involved situation.

John Hyrcanus I started striking his own coins only in 111/110 B.C. The coins of his son and successor Judas Aristobulus (106/105 B.C.) are few, consonant with his short-lived rule. The coin type remains the same. The inscription reads: "Jehuda, the high priest and the community [*ḥebher*] of the Jews." After his untimely death his brother Alexander Janneus (105-78 B.C.) took over the reign and the office as a high priest. This pugnacious and active Maccabee enlarged the boundaries of the country in the course of victories and defeats, and used for the first time the title "king" on his coinage. There are essentially three types of coins. No. 10 (§ 5 *below*), which has "Jonathan" in the place of "Johanan," continues the tradition of the very first coin type. No. 11 is certainly an imitation of the coin of Antiochus VII (*cf.* No. 9) minted in Jerusalem. There exists an old controversy whether the design on the obverse of No. 12 should be interpreted as a star or a wheel (sun-wheel), but recently it has been assumed that it should be understood as a star. None of the contemporary coins displays a star of this peculiar form, so that it remains guesswork where this symbol comes from and what allegorical significance it has. It is believed that the anchor was chosen by Alexander Janneus as his special symbol because he added several harbors (Raphia, Jaffa, Dora) to his kingdom. The Greek inscription on his anchor coins indicates that it was intended to circulate among his non-Jewish subjects and his neighbors. His successor, John Hyrcanus II (67 and 63-40 B.C.), was a weak man, who continually fought with his brother for the rulership. He was forced by his brother Aristobulus II to abdicate, and was restored again by Pompeius, but only as a high priest. The sons of Aristobulus contended with him for this office, too, till he lost his importance entirely when Julius Caesar in 47 B.C. appointed Herod as procurator of Judea. There is a

dispute as to which coins were issued by John Hyrcanus I and which by John Hyrcanus II, as both have struck coins identical in type and in legend as well. The last of the Maccabees, Antigonus (Mattathias; 40-37 B.C.), fought desperately for his throne. Immediately after he conquered Jerusalem with the help of the Parthians, he demonstrated his new power with his own coinage. As a consequence of this hurry, all these coins are carelessly minted; the alloy contains much lead, and they are therefore badly preserved. His most remarkable coin is the one showing the seven-branched lampstand. This is the very first representation of the sacred lampstand from the temple, which is known to us from its classical depiction on the arch of Titus in Rome (*see* No. 13 in § 5 *below*). Most of his other coins are repetitions of the issues of his predecessors (wreath with inscription and cornucopias). *See* No. 14 in § 5 *below*.

All these coins, except No. 12*a*, are to be regarded as dileptons (in the NT, κοδράντης; in Hebrew, פרוטה, *pᵉrûṭâ*).

c. In the NT period. Herod I (36-4 B.C.) was appointed king in Judea by the Romans. With him we enter the period of the NT. His whole nature was Hellenistic. He founded towns in Greek style, sponsored the building of Gentile temples and prize fights in the Roman manner. But this did not prevent him from considering the feeling of his Jewish subjects when minting coins. These either showed the old symbols (anchor, cornucopias) or, in case of new designs, did at least not offend the population. His rebuilding of the temple in Jerusalem is largely regarded as an attempt to acquire the sympathy of the Jews. But each impulse of good will thus created was forfeited again by his unsurpassed cruelty, which did not stop at his own family. His coins are the first Jewish coins bearing dates (*see* Nos. 15-17 in § 5 *below*). The inscription is Greek only. The symbols of Nos. 15-16 are intentionally derived from Greek models. On No. 17 the symbols are the same as on coins of John Hyrcanus, Alexander Janneus, and Aristobulus.

Archelaus (4 B.C.–A.D. 6), son of Herod I, was confirmed by Augustus as ethnarch for Judea, Samaria, and Idumea only. The title "king," therefore, does not appear on his coins. He, too, considered the feelings of his Jewish subjects when he issued new coins, and kept to neutral symbols (*see* Nos. 18-19 in § 5 *below*). He competed in cruelty with his father. When Joseph "heard that Archelaus reigned over Judea in place of his father Herod, he was afraid" (Matt. 2: 22). Augustus exiled him after ten years of cruel reign, on account of the general discontent. The government of the land was then taken over by Roman procurators.

His brother Herod Antipas (4 B.C.–A.D. 39) became tetrarch of Galilee and Perea. In atrocity, despotism, and treachery he equaled his father. Jesus compared him to a fox (Luke 13:32). He put to death John the Baptist (Matt. 14:3-12; Mark 6:17-29; Luke 9:9). Jesus was sent to him by Pilate for examination. In A.D. 18 Herod Antipas founded Tiberias in honor of the Emperor Tiberius, made it his capital, and chose it as his mint (*see* No. 20 in § 5 *below*). Caligula finally sent him into exile.

Philip (4 B.C.–A.D. 34) was the last son of Herod and tetrarch of Trachonitis, Paneas, etc., an essentially non-Jewish region. He was the first ruler who dared to set aside the commandment: "You shall not make yourself a graven image," which had been strictly adhered to till then, and he endeavored to put the head of the Roman emperor on his coins (*see* No. 21 in § 5 *below*). As all of them probably were minted in Paneas, we may assume that the building on the reverse is the temple his father had built there in honor of Augustus (Luke 3:1).

Herod Agrippa I (37-44), with the help of the Emperor Caius Caligula, unified the small districts which were ruled by his predecessors, so that he could call himself on his coins "great king, friend of Caesar." He was the first to put his own portrait on his coins. An unsolved numismatic problem remains (*see* No. 22 in § 5 *below*). Till recently the object on the obverse had been explained as an umbrella, a mark of distinction of an oriental ruler. But numismatic scholars did not accept this interpretation wholeheartedly. No other coin with an umbrella design was elsewhere known. Other theories and interpretations were developed, none of which gave a satisfactory explanation. The three ears of corn on the reverse of the coin signify plenty and wealth. The Bible reports about Herod Agrippa that "he killed James the brother of John with the sword" (Acts 12:1-4). He also put Peter in prison. One of his coins (No. 23 in § 5 *below*) was minted in Caesarea in connection with the great prize fights during which he suddenly fell ill and died (vss. 21-23).

Herod Agrippa II (50-100) was the last ruling descendant of the house of Herod. The greatest part of his provinces consisted of non-Jewish districts. Neither his regency nor his coins show any connection with the Bible.

During the reign of the Idumean princes part after part of the real power was taken over by Rome. The first procurator who ruled from Caesarea was sent by Augustus in the year 6, right after Archelaus was exiled. These procurators were continually changed by the emperors. According to imperial orders they minted copper coins, which remained the small currency of the country till 58/59. Their issue was interrupted only during the reign of Agrippa I. These coins are found in abundance in Palestine. All the procurators conformed with the tradition introduced by the Maccabees and refrained from issuing designs or coin types which might have offended Jewish feelings—i.e., portraits or figures of gods. So their issues differed completely from the customary Roman coinage. They show symbols of the country (palms, vine leaves), or products of the country in the form of containers of wine or oil or cornucopias, which stand for plenty and wealth. They were inscribed with the name or the title of Caesar and with the year of his reign. The denomination equaled the Roman quadrans or the Greek dilepton, forming the small currency during the time of the NT. *See* Nos. 24-26 in § 5 *below*.

Two coins which were struck by Pontius Pilate differ from the other issues. The first shows a simplum (ladle) and the second a lituus (curved staff or wand). Both these objects were well-known

emblems of Roman priests. Pontius Pilate had been an augur himself before he took over the reign of Judea, and Tiberius was a great disciple of the augurian trend. It was thought that Pilate chose these symbols in honor of Tiberius, as well as for a sign of his own dignity; but this interpretation, which was accepted until now, seems to be no longer valid. Recent coin finds show a date which points unmistakably to the predecessor of Pontius Pilate, Valerius Gratus, which proves that Pontius Pilate did not create this coin type himself, but only took it over. *See* Nos. 27-28 in § 5 *below*.

In the NT we find many different coin names. It would be interesting to establish which sort of money went through the hands of Jesus and his disciples. This seems not too difficult a task, considering that the coins of this period are all well known to us, but nevertheless there arise some difficulties:

a) In the first century A.D. various coins were current in the country. In addition to the procurators, the cities of Caesarea and Ascalon minted bronze, and the coins of the Phoenician cities (mostly Tyre and Sidon) were brought through the trade routes. Additionally, Roman copper and silver coins flooded the country through troop movements and commerce; and further, there was the imperial coinage of this region, which was minted in Antiochia. Accordingly, we meet with bronze coins from various parts of the Empire and silver coins from Rome, Antiochia, Tyre, Alexandria, and Caesarea in Cappadocia.

b) We do not know the denomination of the bronze coins because it is indicated on none of them, and we must be careful in drawing conclusions from their size and weight, as these were not constant.

c) The translator of the Greek text (especially of the KJV) rendered the problem still more difficult, inasmuch as he used the same word for different Greek designations. Further, in order to make comparisons possible for the reader, he tried to substitute modern specifications ("penny," "farthing," "mite") for the ancient coin names, so that we are forced to go back to the original.

Notwithstanding these difficulties, we know in many of the cases to which coin the Bible is referring. The most frequently mentioned coin is the denarius (δηνάριον), which is translated "penny" in the KJV. It was the most current silver coin in the first century and was mainly minted in Rome under the supervision of the emperor. In the East the right of coinage was given only to Antiochia and Caesarea in Cappadocia. The denarius was used to pay the troops and quickly superseded all Greek silver coins of the same value. One denarius was the daily wage of a laborer (Matt. 20:9-10, 13), and it was used to pay tribute to the emperor. When it was suggested that Jesus had enticed the people to withhold these taxes, he asked for the money which was used to pay tribute. They brought him a denar, and he pointed out the portrait and the name of the emperor and retorted: "Render therefore to Caesar the things that are Caesar's" (Matt. 22:21), and explained that money that belongs to the emperor should be given to him (*see* No. 29 in § 5 *below*). This "civil tribute" (Matt. 22:19: τὸ νόμισμα τοῦ κήνσου, "money for the tax," KJV "tribute money"; Mark 12:14: κῆνσος, "taxes," KJV "tribute"; Luke 20:22; 23:2: φόρος, "tribute") was the duty the Jews had to deliver to Rome after Judea lost its independence (after A.D. 70). Subsequent to the destruction of the temple by Vespasian, all Jews under Roman rule had to pay two drachmas per head to the temple of Jupiter Capitolinus. This tribute was abolished by Nerva but reinstalled by Hadrian after the suppression of the War of Bar Cocheba. This tax consisted purposely of the same sum each Jew had formerly been bound to pay as annual sacred tribute (Matt. 17:24: τὰ δίδραχμα, "half-shekel," KJV "tribute money") to his own temple. This duty had been—according to Exod. 30:13, 16; 38:26—half a shekel or two drachmas, which are approximately two denars. In the Roman period the shekel or didrachma was no longer current, so that the payment was in denars.

Matt. 26:15 refers to another sort of silver coin, where it is said that the high priest paid to Judas Iscariot thirty pieces of silver (ἀργύρια) for the betrayal of the Lord. According to Exod. 21:32, thirty shekels were the compensation which had to be paid for a servant who was accidentally slain (cf. Matt. 27:6: "blood money," KJV "price of blood"). This parallel leads to the assumption that the coins paid to Judas were thirty shekels which were coined in Tyre, or their equivalent—thirty tetradrachmas of Antiochia. Nos. 30-31 in § 5 *below* show specimens of the coins which must have been in Judas' hands.

In Matt. 28:12 we meet with the expression "a sum of money" (KJV "large money"), with which the guards of the holy sepulchre were bribed. Small money was the regular denar. With "large money" they must have had in mind shekels or tetradrachmas, the only large silver coins in circulation.

In Mark 12:42 a small coin is mentioned which is called in the KJV "mite." The poor widow cast in the treasury "two mites, which make a farthing" (RSV "two copper coins, which make a penny"). For better understanding the translator used here the names of small contemporary copper coins. The original reads: λέπτον and κοδράντης. The λέπτον corresponds to the smallest Greek copper coin, whereas κοδράντης is the Greek name for the smallest Roman copper coin: quadrans (=two leptons or a dilepton). We have therefore to regard the regular copper coins depicted in Nos. 10-12, 17-19, 22, 24-28 (§ 5 *below*), as dilepton (Hebrew *perûṭâ*) with a weight of *ca.* 1.5-3.0 grams. Different from them in weight and size and sometimes also in careless execution was the lepton (the mite), which was the smallest denomination (a half quadrans, a half *perûṭâ;* No. 12*a*), weight *ca.* 0.5-1.0 gram. Such a lepton was the gift of the widow. The smallness of this donation was especially pointed out by Jesus.

4. Jewish numismatics. For the treasury of the temple only Jewish coins were fit to be donated—i.e., coins with symbols which did not offend the religious feelings of the Jews. This means that only coins of Hyrcanus, Alexander, Janneus, Herod, and the procurators, as mentioned before, could be used, all of them of copper. It can be assumed that this currency was still circulating at that period or could at least be obtained from the money-changers in the temple. But we must conclude from the presence of coined silver in the temple treasury that it must have

been necessary to depart from the rules of the law, because there was no current money which fulfilled its strict conditions. We know that Tyrian shekels were preferably accepted (*see* No. 31 in § 5 *below*), not because the image of the god Heracles-Melqart was less offensive to the law than the portraits of other gods or rulers, but because experience had shown that these coins had the best content of silver.

It was the praxis of the Roman emperors to shift the procurators in Palestine after some years, so that they could not enrich themselves excessively during their government. But with each new official came a new extortioner. The last of them was Gessius Florus (64-66), who was offendingly unscrupulous in his ways of extracting money from the unhappy population. If extortion did not work, he used robbery. He stirred the controversy between Greeks and Jews in order to get more bribes. But when his officials were impudent enough to demand a great sum out of the temple treasury, even the quietest citizen could not be restrained any more, and an open revolt broke out. After some preliminary victories over the few Roman troops, the latter retreated and the greatest part of the country was liberated from its tormentors. Now the Jews believed that the hour of freedom of Zion had finally come, and they set up their own government. As one of the manifestations of independence they issued their own money, and this time they struck silver. In the Roman Empire this was the exclusive privilege of the emperor, and to infringe upon it was a challenge to the entire Roman authority. The minting of silver shekels in the first war of independence has therefore to be regarded, from the Roman point of view, as a very grave revolutionary act. It was a remarkable innovation; they were the first Jewish silver coins ever to have been minted. The whole workshop of a mint (die-cutting, metal-casting, etc.) had to be created anew, because a hundred years had passed since the last issuing of Jewish coins. As for the designs—this new and consciously national coinage must have rejected each sort of strange prototype influenced from the Gentile world. We must therefore assume that the devices used were generally known and accepted Jewish symbols. The main object must have been to stress the liberation of Zion, and we must therefore take it that the symbols used were connected with the most important Jewish institution—the religion and the temple service in Jerusalem. Accordingly, we must regard the cup on the obverse of the silver shekel (*see* No. 32 in § 5 *below*) as a prominent and familiar temple implement. The symbols represented on the other coins are connected with feasts of pilgrimage, which assembled the whole Jewish people in Jerusalem for the service. So we may assume that this cup belongs to the paraphernalia of those celebrations too. This leads to the conjecture that we have here the golden "omer" vessel into which an offering of barley, the first fruit of the land, was measured for the temple on the second day of Passover. The swinging of this cup during the temple service was seen by everybody and must have been a significant and impressive ceremony. The reverse of the shekel shows a bunch of pomegranates with three buds, which must have been a popular symbol too, the more so as it is one of the seven celebrated fruits of the country (Deut. 8:8). It was used as an ornament on the JACHIN AND BOAZ columns of the temple (I Kings 7:18, 20), and was depicted on the vestment of the high priest (Exod. 39:24-26). Its numerous seeds made the fruit a symbol of fertility.

The shekel had the same weight (14 grams) as the Tyrian shekel or the tetradrachma of Antioch, and was given a similar value in order to supplant the foreign currency. The necessary silver probably came out of the temple treasury. The writing is in the ancient Hebrew script. We have shekels and half shekels from the first to the fifth year (66-70).

In the second and third years of the war of independence bronze coins were added which displayed an amphora on one side (wine or oil container) and a vine leaf with tendril on the other side (*see* No. 33 in § 5 *below*). Vine belongs to the distinguished fruits of the country (Deut. 8:8). The source of the cultivation is traced back to Noah (Gen. 9:20), and it was a drink offering in the temple (Lev. 23:13; Num. 15: 5, 7). Isaiah compares Israel to a vineyard (Isa. 5: 1 ff; Jer. 2:21; Ezek. 19:10: Hos. 10:1), and vine is a symbol for blessing and fecundity (Ps. 128:3; Hos. 14:7). The custom of blessing wine and bread became a ceremony at each Jewish feast, and was taken over by the Christians at the Holy Communion.

From the fourth year of the war of independence we have half-, quarter-, and eighth-shekels, all of bronze. Perhaps it had become necessary to close the gap between the silver shekels and the small currency. It is also possible that the decision to mint tokens of bronze was due to the exhaustion of the silver treasury of the temple in the fourth year of minting. The bronze coins (*see* No. 34 in § 5 *below*) show on the obverse two lulabs (a palm branch, myrtle, and willow tied together) and between them the ethrog (citron), all symbols of the Feast of Tabernacles (see Lev. 23:40). During the celebration the lulab was to be held in the right hand and the ethrog in the left. The reverse of the coin shows two baskets filled with fruits under a palm tree (see Deut. 26:2). The baskets on these coins indicate the offerings to the temple at the "feast of first fruits" (Pentecost). The palm tree as a coin motif is already familiar to us from coins of Herod Antipas and the procurators. Walls, doors, and columns of the temple were adorned with palm motifs (I Kings 6:29, 32; 7:36; Ezek. 40:16-17; 41:18-19). It became the symbol of Judea because it was said to grow there more abundantly than in all other sections of Palestine.

We have seen now how the tendency of all coins of the first war of independence points unmistakably to the temple service, offerings, and celebrations which all Jews were bound to attend in yearly pilgrimages. The devices depicted were familiar to them in connection with their visits in Jerusalem. They were chosen to point out their all-uniting bond, the service to the God of Israel.

Rome razed Jerusalem to the ground; an imperium stood against the smallest nation. Notwithstanding this inequality in power, the victor immortalized his success with an arch of triumph in Rome and with the issue of new coins, bearing the inscription *Judaea*

capta. This coin—so far removed from Jewish religion—seems to illustrate the words of Isaiah:

> Your men shall fall by the sword
> and your mighty men in battle.
> And her gates shall lament and mourn;
> ravaged, she shall sit upon the ground
> (Isa. 3:25-26).

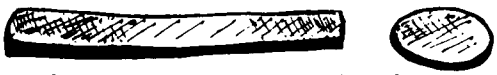
It seems that the victor could not escape the impression of the Judean landscape. Again the palm is used on this coin in a central position. *See* No. 35 in § 5 *below*.

The flame of revolution never died in Judea. It was kindled by the expectation of the Messiah, who would rebuild the Holy City and the destroyed temple and expel the hated oppressors. It was stirred by the intention of Hadrian to re-create the city as a Roman colony, "Aelia Capitolina," and excited by his plan to erect a temple dedicated to Jupiter on the place of the Holy of Holies. In 132-35 Judea was aroused to the second war of independence. Simultaneously with the expulsion of their enemies, they again started minting silver and bronze coins as a sign of their regained sovereignty. But this time they lacked the raw material which had been supplied by the temple treasury in the first war. This supply had been plundered thoroughly by the Romans after the conquest of Titus. The Jews had no choice now but to use the current coinage and stamp their own symbols on the foreign devices. We can well imagine their feelings of satisfaction when the hated portraits of their oppressors vanished under the die and their own symbols were re-created. All circulating Tyrian and Syrian tetradrachmas, Roman denars, and bronze coins were thus overstruck. This was sometimes hurriedly done, so that traces of the former coinage remained visible. This proved a great help for the numismatic scholars, who only thus could date these coins with certainty. The aim of the second war of independence was to rebuild the Holy City and revive the temple service. In this light we have to interpret the symbols on the coins. First of all, the coin designs of the first war of independence were repeated: palm, grape, vine, and vine leaf. We read the name of Eleazar, the priest who seemed to have been associated in rule with Simon (Bar Cocheba), who was the military commander of the war and whose name is constantly found on the coins of this period. Dated coins exist only from the first and second years. It must be assumed that the coins with the inscription "Redemption of Jerusalem" were struck in the last year of the war, when Jerusalem seems to have already been lost to the Romans, and instead of the manifestation of freedom the hope for freedom is expressed.

The tetradrachma (*see* No. 36 in § 5 *below*) has on the obverse a temple with four columns and within a shrine with shelves and two scrolls of the Law, or—in another opinion—only a door. Most scholars see in this design a representation of the Holy of Holies. The reason is that on Gentile coins the statue of a god takes the central place inside a temple, so it is plausible that the most holy object in Jewish ritual—namely, the scrolls of the Law—should here be depicted. We must not take the design of the temple as an actual reminiscence of what it had looked like. More than sixty years had passed since its destruction, so we cannot expect either that the memory of its construction still lingered on or that laymen had more than a very vague conception of the Holy of the Holies. The reverses show lulab and ethrog, which we have met already on the bronze coins of the first war. On the denars (*see* Nos. 37-41 in § 5 *below*) we find lyres, trumpets, amphorae, grapes, and palm branches. The trumpets correspond to a description of Flavius Josephus (Antiq. II.xii.6). A representation in relief is to be seen on the arch of triumph of Titus in Rome, where they are carried beside the seven-branched lampstand as remarkable pieces of the spoil. Flavius Josephus traces these trumpets back to Moses. In ancient times they were sounded for assembling the people or as a signal of departure, at the celebration of feasts and at similar occasions. During the period of the temple they were used at the Feast of Tabernacles when praying for rain, and during the water libation, as we learn from the Talmud. The lyre is represented in two manners, either chelys-shaped or in the form of a cithara with three strings. These are the lyres and harps which are many times mentioned in the Bible (II Sam. 6:5; I Chr. 13:8; 15:28; Ps. 150:3). They were the priestly instruments of praise and rejoicing (I Chr. 25:1-7; cf. II Chr. 5:13). The palm branch had already been used on coins of the procurators. The continuous repetition of this motif points to a general knowledge of its significance and use. It was an important part of the lulab which was used in the ritual of the Feast of Tabernacles; it signified peace (I Macc. 13:37) and symbolized dignity, honor (II Macc. 14:4), and prosperity (Ps. 92:12-13). Grapes are always depicted in clusters. Not only was wine an important product of the country; it also belonged to the temple ceremonial (cf. vine leaf on coins of the first war of independence). The one-handled jug with a narrow neck was used at the Feast of Tabernacles for water libation, with the purpose of inducing rain. In a solemn procession water was drawn in a golden vessel at the fountain of Siloah, and was then brought to the temple and poured on the altar. The palm branch, which is depicted on the side of the amphora, was used on each festive occasion. On these coins Bar Cocheba wanted to symbolize that the re-erection of the temple and the restoration of the water libation would result in well-timed rainfall. Belated rainfall, deplored by the population, was said to have been the rule since the destruction of the temple. On the bronze coins (*see* Nos. 42-43 in § 5 *below*) most of the motifs of the silver coins are repeated, with the addition of a two-handled amphora. Wine and water for libation were not the only liquids used in the ritual. Much oil was necessary for the meal offerings, breads, and foremost for the menorah, for which purest oil was demanded (Exod. 27:20). We must conclude that the amphora on these coins was also a part of the temple service, and it is most probable that it was an oil container for the menorah, or lampstand.

The Bar Cocheba war brought the last and most handsome flowers of Jewish numismatics. Its symbols have a close contact with the former worship in the temple, and are standing, therefore, still under the full influence of the Bible.

5. Illustrations.



1. Tongue and circle of gold from Gezer

(R. A. S. Macalister, *Gezer II*, p. 259, fig. 405; used by permission of the Palestine Exploration Fund)

2. Persian daric, gold, 8.424 grams

Obv. King kneeling, in left hand a bow, in right a spear.

Rev. Irregular incuse square.

3. Athenian tetradrachma, silver, 17.5 grams maximum

Obv. Head of Athena, helmeted.

Rev. Incuse square, owl within it, behind it olive spray and small decrescent moon; inscription: AΘE (Athens).

4. Silver

Obv. Bearded male head, with turbanlike headdress.

Rev. Owl, a fleur-de-lis-shaped flower to the left; in field: יהד (Judea).

5. Silver

Rev. Male divinity seated on a winged wheel; on his extended left hand, a hawk; above, inscription: יהד (Judea); to the right, a bald-headed mask.

6. Silver, 14.5 grams

Obv. Head of young Herakles, wearing lion skin.

Rev. Zeus seated on throne, his left hand grasping top of scepter, on his extended right hand an eagle; inscription: ΒΑΣΙΛΕΩΣ ΑΛΕΞΑΝΔΡΟΥ (King Alexander).

7. Silver, 13-14 grams

Obv. Head of Ptolemy I, diademed.

Rev. Eagle standing on thunderbolt; left, in field; club and monogram; inscription: ΠΤΟΛΕΜΑΙΟΥ ΒΑΣΙΛΕΩΣ (King Ptolemy).

8. Silver, 16-17 grams

Obv. Head of Antiochus IV.

Rev. Zeus seated on throne, left hand resting on scepter, Nike on extended right hand; inscription: ΒΑΣΙΛΕΩΣ ΑΝΤΙΟΧΟΥ ΘΕΟΥ ΕΠΙΦΑΝΟΥΣ (King Antiochus, magnificent god, or god who manifests himself).

9. Bronze

Obv. Lily.

Rev. Anchor; inscription: ΒΑΣΙΛΕΩΣ ΑΝΤΙΟΧΟΥ ΕΥΕΡΓΕΤΟΥ (King Antiochus, benefactor); date: ΑΠΡ=132/31 B.C.

10. Bronze

Obv. Inscription: יהוחנן הכהן הגדל וחבר היהדים (Johanan the high priest and the community of the Jews).

Rev. Double cornucopia, a poppy head within.

11. Bronze

Obv. Half-opened flower; inscription: יהונתן המלך (Jonathan, the king).

Rev. Anchor within a circle; inscription: ΒΑΣΙ-ΛΕΩΣ ΑΛΕΞΑΝΔΡΟΥ (King Alexander).

12*a*. Dilepton (Hebrew *pᵉrûṭâ*), bronze, 1.5–3.0 grams

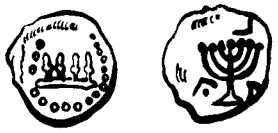
Obv. Within the intermediate spaces of rays of a star, an inscription: יהונתן המלך (Jonathan, the king).

Rev. Anchor; inscription: ΒΑΣΙΛΕΩΣ ΑΛΕΞΑΝ-ΔΡΟΥ (King Alexander).

12*b*. Lepton, bronze, 0.5–1.0 gram

Obv. Same as 12*a*, without inscription.

Rev. Same as 12*a*, without inscription.



13. Bronze

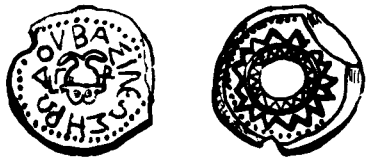
Obv. Uncertain object.

Rev. The seven-branched candlestick; inscription: ΒΑCΙΛ ΑΝΤΙΓ (King Antigonus).

14. Bronze

Obv. Wreath of ivy; inscription: [ΒΑCΙΛ]ΕΩC ΑΝΤΙΓ[ΟΝΟΥ] (King Antigonus).

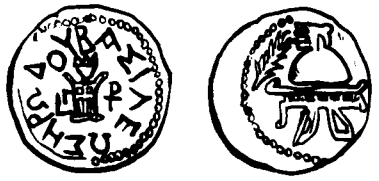
Rev. Double cornucopia; inscription: מתתיה הכהן הגדל וחבר היהודים (Mattathias the high priest and the community of the Jews).



15. Bronze

Obv. Helmet with crest and cheek piece; inscription: ΒΑΣΙΛΕΩΣ ΗΡΩΔΟΥ (King Herod); date and monogram as in No. 15.

Rev. Circular shield, surrounded by a wavy line.



16. Bronze

Obv. Tripod with bowl; in field right, monogram: ⅄ ; left, date: ΓΙ (year 3); inscription: ΒΑΣΙ-ΛΕΩΣ ΗΡΩΔΟΥ (King Herod).

Rev. Thymiaterium (incense burner) between two palm branches.

17. Bronze

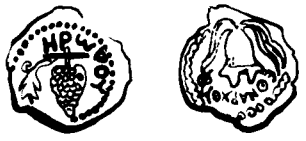
Obv. Anchor; inscription: ΒΑCΙ ΗΡΩΔ (King Herod).

Rev. Double cornucopia with caduceus between horns.

18. Bronze

Obv. Anchor; inscription: ΗΡΩ[ΔΟΥ] (Herod).

Rev. Within wreath, an inscription: ΕΘΝΑ (Ethnarch).



19. Bronze

Obv. Bunch of grapes with leaf; inscription: ΗΡΩΔΟΥ (Herod).

Rev. Helmet with cheek pieces and double crest; left, small caduceus; below, inscription: ΕΘΝΑΡΧΟΥ (Ethnarch).

20. Bronze

Obv. Palm branch; in field, date: ΛΓ (33=A.D. 29/30); inscription: ΗΡΩΔΟΥ ΤΕΤΡΑΡΧΟΥ (Herod, Tetrarch).

Rev. Within wreath, an inscription: ΤΙΒΕ ΡΙΑC (Tiberias).

21. Bronze

Obv. Head of Tiberius; inscription: [CEB]ACTW [KA]ICAPI (Caesar Augustus).
Rev. Tetrastyle temple; inscription: ΦΙΛΙΠΠΟΥ TET[PAPXOY] (Philip, Tetrarch); date: LIB (12=A.D. 8/9).

22. Bronze

Obv. Umbrella with fringe (?); inscription: BACI-ΛEWC AΓPIΠA (King Agrippa).
Rev. Three ears of corn; date: LS (6=A.D. 42/43).

23. Bronze

Obv. Head of Agrippa I; inscription: BACIΛEVC MEΓAC AΓPIΠΠAC ΦIΛOKAICAP (Great King Agrippa, friend of Caesar).
Rev. Female figure holding rudder and palm branch; inscription: KAICAPIA H ΠPOC [CEBACTΩ ΛIMENI] (Caesarea at the harbor Sebastos).

24. Bronze

Obv. Ear of corn; inscription: KAICAPOC (Caesar).
Rev. Palm tree with two bunches of fruit; date: L ΛΓ (33=A.D. 5/6).

25. Bronze

Obv. Vine leaf; inscription: TIBEP (Tiberius).
Rev. Cantharus (wine jug); date: L Δ (4=A.D. 17/18); inscription: KAICAP (Caesar).

26. Bronze

Obv. Palm branch; date: L E (5=A.D. 58/59); inscription: KAICAPOC (Caesar).
Rev. Within a wreath, an inscription: NEPWNOC (Nero).

27. Bronze

Obv. Simplum (ladle); inscription: TIBEPIOY KAICAPOC (Tiberius Caesar); date: L IS (16=A.D. 29/30).
Rev. Three ears bound together; inscription: IOYΛIA KAICAPOC (Julia Caesar).

28. Bronze

Obv. Lituus; inscription: TIBEPIOY KAICAPOC (Tiberius Caesar).
Rev. Within a wreath, the date: L IZ (17=A.D. 30/31).

29. Roman denar, silver; tribute money

Obv. Head of Tiberius; inscription: TI CAESAR DIVI AUG F AUGUSTUS (Tiberius Caesar, son of the divine Augustus, Augustus).
Rev. Pax seated, holding branch; inscription: PONTIF MAXIM (High priest).

30. Syrian tetradrachma, silver

Obv. Head of Augustus; inscription: KAIΣAPOΣ ΣEBAΣTOΣ (Caesar, Augustus).
Rev. Tyche of Antiochia; at her feet, the river-god Orontes; inscription: ANTIOXEΩN MHTPO-ΠOΛEΩΣ (Capital of the Antiochian); date: ΔN (54; after Pharsalus), ϡ Λ (36 after Actium=A.D. 5).

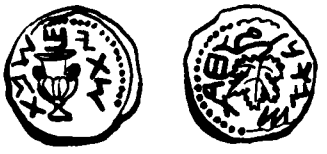
Obv. Head of Melqart-Herakles.
Rev. Eagle, palm branch over right shoulder; in

field, date: PNB (152=A.D. 26/27); inscription: ΤΥΡΟΥ ΙΕΡ[ΑΣ ΚΑΙ ΑΣΥ]ΛΟΥ (Tyre, sanctuary and asylum).

32. Silver

Obv. Cup, above date: א (1 year); inscription: שקל ישראל (Shekel of Israel).
Rev. Bunch of pomegranate with three buds; inscription: ירושלם קדשה (Jerusalem the Holy).



33. Bronze

Obv. Amphora; inscription: שנת שתים (Year 2).
Rev. Vine branch with leaf and tendril; inscription: חרות ציון (Deliverance of Zion).

34. Bronze

Obv. Ethrog between two lulabs; inscription: שנת ארבע חצי (Year 4½).
Rev. Palm tree between two baskets filled with fruits; inscription: לגאלת ציון (For the redemption of Zion).

35. Bronze

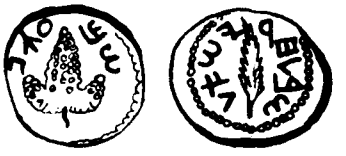
Obv. Head of Vespasian; inscription: IMPerator CAESar VESPASIAN AUGustus Pontifex Maximus TRibunicia Potestas Pater Patriae COnSul III.
Rev. Palm tree; on the left, a Jew standing, his hands tied behind his back, behind him a shield; on the right, a Jewess seated on a cuirass, weeping; inscription: JUDAEA CAPTA, in exergue: S. C. *(Senatus consulto:* With permission of the Senate).

36. Tetradrachma of the Bar Cocheba War, silver, 14 grams

Obv. Temple with four columns, within a shrine with shelves and two scrolls of the Law; inscription: ירושלם (Jerusalem).
Rev. Lulab and ethrob; inscription: שב לחר[ות] ישראל (Second year of the freedom of Israel).

37. Denar, silver

Obv. Within wreath, an inscription: שמעון (Simon).
Rev. Two trumpets; inscription: לחרות ירושלם (For the freedom of Jerusalem).



38. Denar, silver

Obv. Bunch of grapes; inscription: שמעון (Simon).
Rev. Palm branch; inscription: שב לחר[ות] ישׁ[ר]אל (Second year of the freedom of Israel).

39. Denar, silver

Rev. Lyre (chelys-shaped) with three strings; inscription: שב לחר[ות] ישאל (Second year of the freedom of Israel).

40. Denar, silver

Rev. Lyre (cithara); inscription: לחר[ות] [י]רשלם (For the freedom of Jerusalem).

41. Denar, silver

Rev. Jug with palm branch to the right; inscription same as in No. 40.

42. Bronze

Obv. Palm tree with two branches of fruit; inscription: שמעון (Simon).

Rev. Vine leaf; inscription: לחרות ירושלם (For the freedom of Jerusalem).

43. Bronze

Obv. Within a wreath, an inscription: שמעון (Simon).

Rev. Two-handled amphora; inscription: [לחר]ות שב ישראל (Second year of the freedom of Israel).

H. HAMBURGER

MONEY-CHANGER [κολλυβιστής, κερματιστής; שולחני, one who sits at a table, *like* Greek τραπεζίτης]. The term applied to those who in ancient times served many of the functions of the modern banker. Among their services was the exchange of the currency of one country or province for that of another, and of small coins for those of larger denomination. For such services they collected a small fee, called in Greek κόλλυβος; this term was also adopted in Hebrew and Aramaic.

The half-shekel offering imposed by scripture (Exod. 30:11 ff) on every adult male had to be paid, according to the ruling current in NT times, in Tyrian silver coins. The assistance of the money-changers was essential if the people were to discharge properly this universally recognized obligation. Accordingly the Mishna (Shek. 1.3) reports that the tables of the money-changers were set up in the provinces on the fifteenth day of Adar (a month before the Passover) to facilitate regional collections. Ten days later, when pilgrims would be arriving in growing numbers from foreign countries, the money-changers transferred their operation to the temple courts.

The first activity of Jesus after his triumphal entry into Jerusalem is reported to have been the "cleansing of the temple" (Matt. 21:12 ff; Mark 11:15 ff; Luke 19:45 ff—the briefest version; John 2:13 ff). On this occasion he drove out of the temple those who traded in animals or birds for sacrifice, overthrew the tables of the money-changers, and according to Mark forbade anyone to carry a vessel through the temple areas. And alluding to Jer. 7:11, he accused the objects of his wrath of turning the temple into a den of robbers.

Although the "money-changers in the temple" have become a familiar symbol of the sordid, especially of the profaning of religion by commercialism, the real meaning of this episode is by no means certain. Jesus paid the half-shekel tax for himself and Peter (Matt. 17:24 ff) and enjoined the healed leper to bring the prescribed offering (Matt. 8:4; Mark 1:44; Luke 5:14). Evidently he was not opposed to the maintenance of the temple and its sacrificial system. His objection to carrying a vessel through the temple (Mark 11:16) is further proof of his regard for the sanctity of the place, and is in full accord with the Pharisaic injunction against using the temple area as a short cut (M. Ber. 9.5). Why then did he object to an arrangement which enabled worshipers more easily to make their contribution to the support of the temple?

The most plausible explanation is that he regarded the charge made by the money-changers as excessive. Contemporary Jewish sources, it is true, do not confirm this suggestion directly; according to the tradition of the majority, the charge was a twenty-fourth of a shekel. (In fact, only one of the scholars whose views are reported held that the money-changers retained this profit for themselves. The others state that the entire transaction was under temple auspices, and that the income was devoted to the public welfare: see M. Shek. 1.7; Tosef. Shek. 1.8.)

But we do have accounts of profiteering in the sale of sacrificial doves. On one occasion, the Mishna reports, the price of doves rose to an outrageous figure. Thereupon Simeon the son of Gamaliel, who had succeeded his father as leader of the Pharisees, modified the law so as to reduce the number of mandatory sacrifices—and the price of doves soon dropped sharply (Ker. 1.7).

This episode reflects the bitter hostility of the people and their Pharisaic representatives toward the venal priesthood who, in the last days of the Second Temple, obtained or retained the higher positions only by bribing or otherwise conciliating the Roman rulers.

It seems probable that the ire of Jesus against the money-changers derived from some incident, not directly reported, in which the temple authorities had tried to increase their gains by excessive charges —or at least from a widespread belief among the plain folk of the province that such exploitation was going on.

***MONOTHEISM** mŏn'ə thē ĭz'em. *See* GOD, OT VIEW OF, § D6.

MONSTER [תנין] (Jer. 51:34); KJV DRAGON. *See* SEA MONSTER.

MONTH. *See* CALENDAR § 3.

MONUMENT. The tombstone or grave marker (ציון) of the man of God which Josiah permitted to stand when other tombs at Bethel were being defiled (II Kings 23:17; KJV "title"). The word also designated a signpost or temporary marker for a grave (Ezek. 39:15; "sign") and a road marker on a highway (Jer. 31:21; "waymark"). The word יד (lit., "hand") is translated "monument" in I Sam. 15:12; II Sam. 18:18; I Chr. 18:3; Isa. 56:5 (cf. Matt. 23:29), where the contexts suggest memorial standing stones or pillars. The KJV renders נצורים as "monuments" (RSV "secret places") where the term seems to refer to places or structures associated with tombs (Isa. 65:4).

MOON. The moon is mentioned thirty-four times in the OT and nine times in the NT, as well as in several passages of the Apoc. and the Pseudep. References to it occur especially in cosmogonic and eschatological contexts, but there are also divers allusions to the heathen worship of it and to popular legends and customs associated with it. Occasionally, too, it is introduced as a symbol of permanence.

5. The moon in biblical folklore
6. The moon in idiomatic expressions
Bibliography

1. Terminology. The usual Hebrew term for "moon" is ירח, a word common to all the Semitic languages and seemingly connected with the verb ארח, "journey, travel," in reference to the progress of the luminary across the sky. An alternative, but purely poetic, designation is לבנה, "White Lady" (Song of S. 6:10; Isa. 24:23; 30:26), used always as a parallel to חמה, "hot one," a fanciful term for the sun.

The new moon is called חדש, "renewal"; and the full moon, כסא (Job 26:9; Ps. 81:3—H 81:4; Prov. 7:20). The latter corresponds to the Akkadian *kuse'u,* "headgear, crown," and bears reference to the idea, well attested in Mesopotamian literature, that at the plenilune the moon wears a hat or crown.

In Enoch 78:2 the names of the moon are given as: Asônjâ, Eblâ, Benâsê, and Erâe. The complex *Labenaserraë* clearly conceals לבנה, כסא, ירח; but what underlies *asonyaeb* (patently corrupt) is obscure.

2. The moon in cosmogony and eschatology. The moon was fashioned and placed in the firmament on the fourth day of creation, to illumine the night and regulate the seasons. Its light is represented as independent of the sun, and its movement as controlled entirely by the external will of God (Gen. 1: 14-19; Pss. 104:19; 136:9; Ecclus. 43:6-8). At the end of the present era, when all things revert to primordial chaos, the moon will be darkened (Isa. 13:10; Joel 2:10; Matt. 24:29; Mark 13:24), or turn to blood (Joel 2:31—H 3:4; Rev. 6:12), or shine abnormally by day (II Esd. 5:4 [where read, perhaps, *in die jugiter* for *in die ter* of the MSS]). Eventually, however, on God's day of triumph, it will shine again and thenceforth never wane (Isa. 60:20).

A fanciful, astronomical description of the moon and its movements is given in Enoch 78.

3. Cult and worship of the moon. As among all the Semitic peoples, the worship of the moon figured prominently in the early pagan cults of Palestine and Syria, where it was regarded as a male deity, most commonly known as Yaraḥ. Sacrifices to him are prescribed in the temple tariffs from Ras Shamra-Ugarit (1.14; 5.11, 14), where reference is also made to a special offering "on the day of the new moon" (3.48; *bym ḥdt*); while the popularity of his cult among the W Semites in general is attested by the occurrence of such personal names as Abdu-Eraḥ, "servant of the Moon-god"; Zimri-Eraḥ, "the Moon-god is a protection"; and Yantin-Eraḥ, "the Moon-god gives," in documents from Mari and other sites. Under the name of Śahar (cf. Aramaic *sahᵃrâ;* S Arabic name of goddess Ś-h-r, "moon"), his worship is attested also at Hamath and Nerab, in Syria, in the seventh century B.C. (*ANET* 502*a*).

Nor was it only among the Semites of Canaan and Amurru that the moon was adored. The corresponding deity, Kusuḥ, is likewise mentioned in Hurrian (Horite) texts from Ugarit (4.16); and the extent to which the Semites were subjected to such foreign influence may be gauged from the fact that an adaptation (or direct translation?) of a Hurrian myth dealing with the marriage of the moon-god figures among the poetical texts from that site. *See bibliography.*

The city of Jericho (ירחו) was named for the ancient moon-god. On the other hand, the oft-repeated statement that Sinai and the Wilderness of Sin derive their names from that of the Mesopotamian moon-god Sin must now be discounted, for there is no evidence that that particular name was ever used in Canaan or by the Semitic nomads of Palestine.

The worship of the moon, as of other heavenly bodies, was forbidden in the religion of Yahweh, as impugning the uniqueness of that deity (Deut. 4:19; 17:3); and there is no sound reason for supposing that this prohibition was but a late innovation, however late may be the literary redaction of the code in which it is now found embodied. The ancient pagan cult was, however, adopted officially in Judah by the apostatic king Manasseh (687-641 B.C.; II Kings 21: 3, 5), and was maintained by other rulers and by the populace in general (Jer. 8:2), though it was formally proscribed in 621 B.C. by Josiah (II Kings 23:5). A feature of this cult was the worship of the moon on roof tops (Jer. 19:13; Zeph. 1:5); and it seems also to have been a popular custom to salute it reverently as it "sailed in beauty" (cf. Job 31:26-27).

4. The moon in the calendar. The standard calendar in Israel was lunar, and the major seasonal festivals of spring and fall—viz., Pesaḥ ("Passover")

and 'Āsîph ("Ingathering")—commenced at full moon. At new moon, trumpets were blown (Num. 10:10; Ps. 81:3—H 81:4)—originally, no doubt, as a means of scaring demons believed to be especially rampant in the "dark o' the moon." Special offerings were also prescribed for this occasion (Num. 28:11-15). At full moon, persons traveling on business returned home, if possible (Prov. 7:20). This probably reflects the widespread notion that the waning moon, and especially the night when it begins to wane, is unpropitious for the conduct of affairs.

On the theory that the sabbath was originally the full moon, *see* SABBATH.

5. The moon in biblical folklore. Two items of popular lore relating to the moon are mentioned in the OT:

a) When Yahweh took to the warpath, the moon, like the sun, could be halted in its course (Hab. 3:11); and this was believed actually to have happened in the days of Joshua, when the Israelites engaged their enemies at Gibeon (Josh. 10:12). *See* SUN.

b) The moon could exert a baleful influence and "strike" a man (Ps. 121:6), rendering him "lunatic." This fairly universal superstition appears also in the NT (Matt. 4:24; 17:15).

6. The moon in idiomatic expressions. Like the sun, the moon was regarded as a symbol of permanence (Pss. 72:5; 89:37—H 89:38—an idea well attested also in Akkadian literature).

Quite obscure is the meaning of the expression "output of the moons" (גרש ירחים; RSV "rich yield of the months") in Deut. 33:14, where it stands parallel to "choicest fruits of the sun." According to some (e.g., LXX, Targ. Onqelos, Palestinian Targ.), the plural form of the word indicates that it really means "lunar months," in which case the reference will be to seasonal crops and fruits (so RSV). According to others, the allusion is to dew, which was often regarded in antiquity as an efflux of the moon.

MOOSSIAS; KJV MOOSIAS. Apoc. forms of MAASEIAH 15.

MORASTHITE môr'əs thīt. KJV translation of מורשתי (RSV "of Moresheth") in Jer. 26:18; Mic. 1:1. *See* MORESHETH.

MORDECAI môr'də kī [מרדכי = Akkad. *Marduk, name of the chief Babylonian deity*]; KJV Apoc. MARDOCHEUS mär'də kē'əs [Μαρδοχαῖος]. **1.** One of those whose names head the list of Jewish exiles returned from Babylon to Jerusalem with Zerubbabel (Ezra 2:2; cf. Neh. 7:7; I Esd. 5:8).

2. The Jewish hero of the book of Esther. He and Esther, his cousin and ward, who became queen to the Persian king Ahasuerus, triumphed over the evil plotting of Haman, vizier of the king. Haman would have destroyed not only Mordecai but all Jews in the Persian Empire (Esth. 2:5–10:3).

Scholars consider the story of Esther to be fictitious and the persons within it scarcely historical (*see bibliography and* ESTHER, BOOK OF), although it is the author's purpose to write as if he were narrating history. Thus Ahasuerus is believed to represent the Persian king Xerxes I (*ca.* 486-465 B.C.), and Mordecai is probably meant to be identified with the Mordecai of Ezra 2:2 (*see* 1 *above*). But Esth. 2:6 declares that Mordecai had been taken into Babylonian exile with King Jeconiah (JEHOIACHIN)—i.e., in the first deportation *ca.* 597 B.C. This raises serious historical problems, since for Mordecai then to be flourishing in the reign of Xerxes I, he would have to be well over a hundred years old. The writer clearly telescopes history. Of more interest as an indication of the writer's point of view is the genealogy of Mordecai, on the one hand, which makes him a descendant of Kish, ancestor of King Saul (Esth. 2:5), and the ancestry of Mordecai's enemy Haman, on the other hand, which makes the latter a descendant of Agag, king of the Amalekites (3:1)—recalling the victory of Saul over Agag (*ca.* 1020 B.C.; cf. I Sam. 15:1-9, 17-33), and in general the lasting enmity between the Amalekites and Israel. In the Jewish synagogue today the Torah reading for Purim, the feast which celebrates the tradition of Esther and Mordecai, is Exod. 17:8-16, which concludes with the words: "The LORD will have war with Amalek from generation to generation" (vs. 16). It would seem that in the ancient writer's view the contest between the Jewish Diaspora and Haman was part of a continuing struggle.

On the other hand, that Mordecai's name is the equivalent of Marduk, the name of the Babylonian deity, and that Esther's name is the equivalent of Ishtar the goddess, has led interpreters of the story to find in the book of Esther a thinly veiled Babylonian or other pagan myth describing a cosmic conflict having to do originally with the cycle of the seasons. That the story of Esther takes its plot and motifs to a certain extent from some pagan festival with which the Jews of the Dispersion were acquainted is not improbable (*see bibliography*), but it has been here historicized and made subservient to Jewish interpretations of history.

In this regard, reference must be made to a single undated cuneiform document from the Persian period, found at Borsippa (*see bibliography*), which refers to a certain Marduka who was a finance officer of some sort in the Persian court at Susa during the reign of Xerxes I. While a connection between such an individual and the Mordecai of the book of Esther is in no sense established, the possibility of such a historical event as is related in Esther actually forming a factual nucleus to the book cannot be dismissed out of hand.

It remains finally to mention that II Macc. 15:36, concluding an account of the defeat of the Syrian armies of Nicanor by Judas Maccabeus, declares that "Nicanor's day" is to be celebrated on the day before "Mordecai's day"—i.e., the first day of the two-day feast of Purim. From this passage it has been conjectured that the Purim festival and the story of Mordecai and Esther were devised in the beginning to celebrate and commemorate the victory of Judas Maccabeus over the Syrians (*ca.* 161 B.C.; *see bibliog-*

raphy). This explanation is not impossible, although it has not received general acceptance among biblical scholars.

Jewish tradition, beginning with the apocryphal Additions to the Book of Esther (*see* ESTHER, APOCRYPHAL) and continuing in the rabbinical literature, has built a wealth of legend, supported by fanciful biblical exegesis, about the already largely legendary figure of Mordecai found in the canonical book. *See bibliography.*

B. T. DAHLBERG

MOREH môr'ə [מורה, מרה, place of instruction or divination(?), *or* teacher(?)]. **1.** The site of the "oak of Moreh" (אלון מורה; KJV "plain of Moreh" is incorrect), a sacred tree in the vicinity of Shechem. Here Abraham encamped and built an altar to Yahweh, who had appeared to him (Gen. 12:6-8). It is evident that this was an old Canaanite place of worship. The fact that Abraham is not reported as having planted the oak of Moreh (see Gen. 21:33, where he is said to have planted a tamarisk tree in Beer-sheba) suggests that the place of theophany at Shechem was Canaanite prior to its visitation by the patriarchs. Jacob hid the foreign gods (teraphim) under the oak which was near Shechem (Gen. 35:4). In Deut. 11:30 the oak of Moreh is mentioned in designating the location of nearby Mount Ebal and Mount Gerizim and the land of the Canaanites, which the Israelites would possess. At Shechem, Joshua took a great stone "and set it up there under the oak in the sanctuary of the LORD" (Josh. 24:26).

The Diviners' Oak at Shechem in Judg. 9:37 (cf. the "oak of the pillar" at Shechem in vs. 6) is probably to be identified with the oak of Moreh. A connection between Moreh and MORIAH is improbable.

2. A hill near which the Midianites encamped in the valley (Judg. 7:1). This was the Valley of Jezreel, and the hill of Moreh may be identified with the hill now called Jebel Dahi across the valley from Mount Gilboa. It was probably called the hill of Moreh because a sanctuary where divination was practiced was located on it.

Some scholars have held that the hill of Moreh was located in the vicinity of Shechem; but if the camps of the Hebrews and the Midians had been established near Shechem, it is more probable that Mount Gerizim or Mount Ebal, rather than the hill of Moreh, would have been mentioned to identify their locations.

W. L. REED

MORESHETH môr'ə shĕth [מורשת גת, possession of Gath]. The home of the prophet Micah (Jer. 26:18; Mic. 1:1), and one of the cities mentioned in the wordplay section of Micah's prophecy (Mic. 1:14).

The ancient site of Moresheth is identified with modern Tell ej-Judeideh, a site occupying a strategic location *ca.* 1⅔ miles N of Beit Jibrin (Eleutheropolis). Pseudo-Epiphanius says that Micah was buried in his home near the cemetery of the Anakites, in the vicinity of Eleutheropolis. Eusebius and Jerome locate Moresheth (N)E of Eleutheropolis. The Map of Madeba shows a vignette NE of Eleutheropolis with the note: "Morasthi, from which the prophet Micah came," and nearby a small church, possibly dedicated to Micah, though the note is broken here. The Byzantine name of the place, Birathsatia ("castle of Satia") or Chariasati ("village of Satia"), appears in the references by Sozomen (fifth century A.D.) and Peter the Deacon.

Tell ej-Judeideh was abandoned at the end of the Bronze Age and not reoccupied until during the closing centuries of the monarchy (*ca.* 750). A half mile S, Khirbet Es'id, first successor to the old Moresheth and settled in Iron I (1200-900), retains a name reminiscent of Chariasati. An ancient necropolis, just to the S, apparently dates from Seleucid times. Khirbet el-Basal, a short distance to the N of Khirbet Es'id, is the later successor to Moresheth after its second abandonment. Here, in the Byzantine village, are the foundations of a church, possibly the one pictured on the Madeba Map.

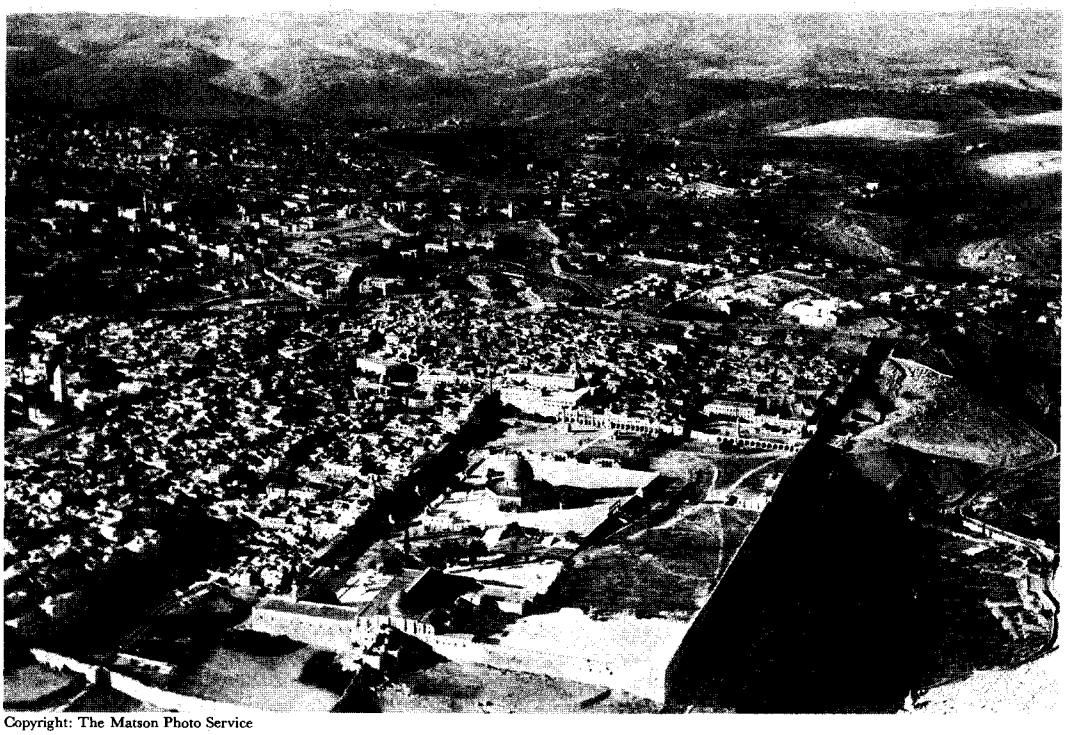
V. R. GOLD

MORIAH mō rī'ə [המריה *with the article*]. **1.** The "land of Moriah" (ארץ המריה) is mentioned in Gen. 22:2 as a mountainous district, at a three-days' journey from Beer-sheba. The location is otherwise unspecified. Abraham was directed by God to offer Isaac in sacrifice on one of the mountains of that region, but was prevented from consummating the sacrifice by a direct intervention of the angel of the Lord. The narrator concludes the episode by recording popular etymologies of the name, allegedly derived from the radical ראה, "to see" or "to provide," and explained as follows (Gen. 22:14): "The LORD will provide" (KJV "Jehovah-jireh," meaning "Jehovah shall see"), or "On the mount of the LORD it shall be provided" (KJV ". . . seen"). The Vulg. has interpreted "land of Moriah" as "land of the vision" (*in terram visionis*), in general conformity with the Hebrew tradition. The expression "land of Moriah" is replaced in the LXX by "the hill country" (εἰς τὴν γῆν τὴν ὑψηλήν) and in the Syr. by "the land of the Amorite." The reading of the Samar. המוראה suggests a possible relation of Moriah to the oak of MOREH (*see* MOREH 1), as if seeking to locate the sacrifice of Isaac in the vicinity of SHECHEM and Mount Gerizim (*see* GERIZIM, MOUNT).

2. Mount Moriah (הר המריה) is the rocky hilltop of Jerusalem N of the city of David, where Solomon built the temple (II Chr. 3:1). The same text specifies that this was the place which David had chosen, and purchased from Ornan the Jebusite (*see* ARAUNAH). Since the name Moriah appears nowhere else in the texts relative to the topography of Jerusalem, there is good reason to suspect that the author of Chronicles intended to ascribe an early origin to the royal



Copyright: The Matson Photo Service

69. Air view of Mount Moriah, which became the site for Solomon's temple, and where today the Muslim "Dome of the Rock" is located

sanctuary, by identifying the unnamed hilltop formerly used as a threshing floor with the mountain in the land of Moriah, where Abraham had made ready to sacrifice his son. This identification is explicit in Josephus (Antiq. I.xiii.224, 226; VII.xiii.333) as well as in the Book of the Jubilees (18:13), and in rabbinical literature. It was accepted without discussion by Jerome (*Hebrew Questions on Gen.* 22.2; *on Jer.* 26.4), and it has influenced the Muslim folklore of the Dome of the Rock, in which the *maqam el-Khalil,* "Abraham's place," is shown to the pilgrims.

MORNING STAR [φωσφόρος] (II Pet. 1:19); KJV DAY-STAR. The Venus-star, heralding the DAWN.

MORTAL SIN [ἁμαρτία πρὸς θάνατον]. Literally, sin or sinning (which leads) to death. The expression occurs in the NT only in I John 5:16-17 (four times). John distinguishes between sin which is mortal and sin which is not mortal, both kinds being committed only by those who are not "born of God" (5:18). By "mortal sin" John may have meant sin which by its nature excluded the sinner from the church—as, e.g., hating a Christian brother (3:15); or he may have meant denying that Jesus is of God (4:3). Intercession for these is not exhorted. (Cf. Heb. 6:4-6; 10:26-31; 12:15-17.) *See* SIN, SINNERS.

B. H. THROCKMORTON, JR.

MORTAR. 1. מכתש מדכה. A vessel in which substances are crushed with a pestle. The most common use of the mortar and pestle was in the preparation of grain, either in husking or in grinding into flour, but it was also employed in crushing herbs (medicinal mortars); in the preparation of COSMETICS and dye pigments; and in other processes in which materials such as spices had to be reduced to fine grains or powder. In some cases a channel cut through the rim of the vessel functions as a drain and indicates that the mortar and pestle were also used in the preparation of small quantities of certain liquids—e.g., oil.

MANNA was pounded in a mortar (מדכה) and also ground by millstones. "Mortar" (מכתש) and "pestle" (עלי) are used figuratively in Prov. 27:22. מכתש, *makhtēsh,* is used descriptively of a "hollow place" (the shape of a mortar) in Judg. 15:19 and as a place name in Zeph. 1:11 (KJV "Maktesh"; *see* MORTAR, THE).

Mortars are most often made of basalt (lava) because of its roughness and hardness, although limestone is also used, especially in the case of cosmetic mortars or palettes. The shape of the mortar varies from the simple cylindrical block with a concave depression on top to elaborate footed and decorated types; they are sometimes made in imitation of ceramic forms. In form the footed mortar is not easily distinguished from the BRAZIER.

The pestle was normally an elongated cylindrical or conical (occasionally oval) tool made to be grasped in the hand; the head was shaped to correspond to the curvature of the mortar with which it was used.

2. חמר. A building material. Generally mortar was of clay, for which the same Hebrew word is used. Its basic meaning is "red." The binding mortar was of the same material as bricks, generally mixed with straw and applied while damp and soft. The Israelites in Egypt were compelled to work in both mortar and brick (Exod. 1:14). The foe from the N is to "trample on rulers as on mortar, as the potter treads the clay" (Isa. 41:25). In Nah. 3:14 there is a reference to treading mortar in connection with the brick mold. The builders of the tower of Babel had brick for stone and bitumen (KJV "slime") for mortar (Gen. 11:3).

Another word, עפר, which means "dust," is translated "mortar" in the KJV (RSV better PLASTER; Lev. 14:42, 45).

In the proverbial "untempered mortar" (Ezek. 13:10-11, 14) the translation "mortar" for תפל is conjectural and italicized in the KJV; the word means something weak or insipid (RSV WHITEWASH). Evidently the reference is to covering the wall with something that would not harden sufficiently to resist a shower. Mortar was not always used in building a wall. Excavations have uncovered many walls with stones so accurately cut that they hold together without other binding.

MORTAR, THE [מכתש, *makhtēsh*] (Zeph. 1:11); KJV MAKTESH măk'tĕsh. The quarter of Jerusalem in which the silver traders and the silversmiths conducted their business under the reign of Josiah. It is mentioned in connection with the Mishneh, or SECOND QUARTER, and with the FISH GATE. It has been tentatively identified with the upper course of the Valley of the Tyropoeon (*see* JERUSALEM § 6*d*); this is a plausible, yet unproven, localization.

Bibliography. J. Simons, *Jerusalem in the OT* (1952), p. 52, note 2.

G. A. BARROIS

MORTGAGE [ערב, take on pledge, give in pledge, exchange] (Neh. 5:3; cf. Gen. 43:9; 44:32; Ezra 9:2; Ps. 106:35; Prov. 6:1; 11:15; 14:10; 17:18; 20:16; 24:21; 27:13; Isa. 36:8 [cf. II Kings 18:23]; 38:14; Jer. 30:21; etc.).

The word "mortgage" is used only once in the Bible, as a verb in a passage depicting the internal economic conditions in Judah in the time of Nehemiah and Ezra (see Neh. 5:1-13). Several charges were made by the poor against their wealthy Jewish brethren; among these is the complaint that it was necessary for the poor to mortgage their fields and houses during the famine in order to buy food. They were also obliged to borrow money in order to pay taxes (vs. 4).

H. F. BECK

MOSAIC PAVEMENT [רצפה]. While the Hebrew word, from רצף, "fit together," may mean simply "pavement" (so KJV), the context in Esth. 1:6 clearly shows that it refers to the mosaic pavement at SUSA.

MOSERAH mō′ zə rə [מוסרה] (Deut. 10:6); KJV MOSERA. Alternately: MOSEROTH —rŏth [מסרות] (Num. 33:30-31). A stopping place of the Israelites in the wilderness after they left Beeroth Bene-jaakan. According to this account, Aaron died at Moserah and was buried there, and his son Eleazar became a priest in his stead. This is a variant tradition of the death and burial of Aaron. According to Num. 33:38, he died at Mount Hor. Moreover, in vs. 30 we have a different order of itinerary: the Israelites came to Bene-jaakan after they had left Moseroth.

The locality is unknown.

J. L. MIHELIC

***MOSES** mō′zĭz, —zəs [משה, *see below*]. Leader of the Hebrew tribes in their exodus from Egypt and during their consolidation prior to the invasion of Canaan.

The exodus from Egypt is the creative center of the OT. In countless ways the literature of Israel reveals the magnetic power of this event for generations far removed from it in time.

> When Israel went forth from Egypt,
> the house of Jacob from a people of strange language,
> Judah became his sanctuary,
> Israel his dominion. (Ps. 114:1-2.)

The Exodus is the hour of Israel's birth as a people. It is this moment which remains decisive even when the family tree is traced back through the ancestors, Abraham, Isaac, and Jacob, whose lives God orders in anticipation of the deliverance from Egypt. The Exodus also maintains its creative priority over the circumstances of Israel's life in Canaan. The OT does not consistently attempt to conceal the significant changes Israel undergoes on account of its situation in Canaan. The defining marks of Israel's identity, the delineation of common responsibility and destiny, the ethnic complexion of the Israelite folk, and the forms for ordering its varied life, all change with time and circumstance. Yet, throughout the centuries of Israelite life which the OT mirrors, the Exodus remains the symbol by which subsequent events are interpreted. It persists as the judge and corrective of this newness. Witness to this can be found in the OT in narrative, poetry, legal formulation, cultic rubric, prophetic oracle, and eschatological rhapsody.

1. Historicity. The link between Moses and Israel's emergence from Egypt is such an intimate one in the biblical narrative that it seems almost impossible to question its authenticity. However, when the connection between Moses and the birth of Israel is examined more closely, two seemingly contradictory things appear. These call for investigation.

a. Biblical evidence. Moses appears, first of all, to dominate the exodus traditions. The magnetic power of the man attracts attention from every strand of biblical material, early or late, which sets its story in the exodus period. The great variety of roles which this same material ascribes to Moses is an equally impressive phenomenon. He performs almost every function attached to the offices and callings that were subsequently known in Israel (important exceptions were kingship and priesthood). He represents in germinal form the whole future life of Israel. Condensed into this one man are the figures of prophet, priest, judge (a foreshadowing of the king), lawgiver, intercessor, victor, exile, fugitive, shepherd, guide, healer, miracle-worker, man of God, and rebel. Moses does not merely assist at the birth of Israel; in him Israel is born. So in closest parallelism it can be affirmed that God

> made known his ways to Moses,
> his acts to the people of Israel
> (Ps. 103:7).

And yet a second observation must be made about Moses. In the oldest reference to the exodus event now contained in the OT, Moses is not mentioned. It is only Yahweh's triumph that is to be celebrated after Israel has escaped from the Egyptians:

> Sing to Yahweh, for he has triumphed gloriously;
> the horse and his rider he has thrown into the sea
> (Exod. 15:21).

Similarly, Israel's ancient creedal recital of the mighty deeds of God makes no mention of Moses in connection with the deliverance from Egypt (Deut. 26:5-9). In the biblical material outside the Hexateuch, the attention paid to Moses is almost equally slim. Among the pre-exilic prophets only Jeremiah (15:1) and possibly Micah (6:4) give his name, although Hosea alludes to him (12:13—H 12:14). Later prophetic material sees no significant increase. Moses' name does occur somewhat more frequently in Kings, Chronicles, and Psalms—a development probably due to the influence of the Deuteronomic picture of Moses as the lawgiver.

Since such large blocks of the OT pass over Moses in silence, suspicion is raised about the historicity of this mighty figure. He looms large in the Pentateuch, but perhaps his dominant position there results from the piety of later generations of Israelites. If they have not actually created the figure of the nation's founder, perhaps they have magnified his importance and pictured him in such a way as to derive sanction for their own practices and values.

Yet the infrequent mention of Moses outside the Pentateuch may be due to forces of a very different sort. The cult of heroic personalities is unable to gain a foothold in Israel's faith. Since Yahweh is the primary actor in every event, it is to him, and not to his human agent, that faith is attached once the event has occurred. Human agency is not insignificant in the OT understanding of God's ways, but no historical or human pattern can dictate the future.

Hosea may allude to Moses long after the latter's day, but he calls him a prophet, because the authentic prophet is the one who points away from himself to the divine word and deed. "By a prophet Yahweh brought Israel up from Egypt" (Hos. 12:13—H 12:14). Consequently, the failure of the oldest literary fragments in the Pentateuch to mention Moses is not strong evidence of his nonhistoricity. If Moses is not named in the old creedal statement of Deut. 26:5-9, neither is anyone else.

The resurgence of interest in Moses, apparent in the D and P literature, indicates an attempt to recover Israel's earlier dynamic in the face of the impending collapse of the Judean state. In some sense, it is as if the mission of Moses had not been fulfilled and hence demands a recasting of his work and witness in fresh garb. This development is akin to the OT's attitude about prophets. The name of a prophet is rarely mentioned after the period of his active min-

istry. If a prophet's word is fulfilled, his role is concluded. It was only because his word about Jerusalem had remained unfulfilled, that Micah was mentioned a hundred years after his time in defense of Jeremiah (Jer. 26:18). In the OT, frequency of citation is not by itself an indication either of historicity or of significance.

b. Analysis of Pentateuchal traditions. Another method for investigating the historicity of Moses employs analysis of the history of the traditions in which he figures. The exodus and wilderness traditions, in which Moses is now a principal character, appear to consist of four large themes: the exodus from Egypt, the revelation at Sinai, the wandering in the wilderness, and the entrance into the Promised Land. The biblical story of Moses proceeds through these themes, and the ability to reconstruct his career obviously depends upon the interlocking movement of events from theme to theme. It has been long recognized, however, that the theme "the revelation at Sinai" shows evidence of only a very loose connection with the other themes. It appears as an excursus, interrupting the narrative at the end of Exod. 18 and allowing it to resume in Num. 10:29.

Recently a more radical thesis has been advanced about the history of the Pentateuchal themes. It has been argued that originally there was no integral connection between any of them. Their present form, in which Moses is the great unifying figure found in them all, is held to be secondary. Moses has become the link binding these once-unrelated thematic episodes into a narrative sequence. This obviously means that the framework of Moses' career, moving from Egypt to the mountains of Transjordan, cannot be considered historical. The historicity of Moses as a person—in a minimal sense—has not been denied, but it has been held that the only reliable datum about his life is the tradition of his death and burial at a Transjordanian site (Deut. 34:6). Beginning with this meager information, the Israelite tradition has clothed Moses with a substantial history and, in creating him, has created the present Pentateuchal narrative sequence. *See* PENTATEUCH.

c. Appraisal. One of the fundamental supports for the hypothesis just described is the conclusion that the Pentateuchal themes were, in fact, originally separate cycles of tradition, complete in themselves. This analysis is far from established, however. The theme "the revelation at Sinai" is, indeed, absent from Deut. 26:5-9, the creedal recitation of Yahweh's mighty deeds. But the other themes—exodus, wandering, land—are already united there. Furthermore, the omission of Sinai from this recitation is probably explained by the suggestion that the creedal formula was recited in a ceremony of covenant renewal—i.e., in a setting where the Sinai theme was presented liturgically rather than narratively. Figs. SIN 63-64.

The most serious objection to any nihilistic view of the work of Moses is the difficulty it creates for understanding early Israelite history in Palestine. The Song of Deborah (*ca.* 1125 B.C.) indicates that common action was undertaken by several Israelite tribes approximately a century after the invasion of Canaan (Judg. 5). This concerted action is motivated by common allegiance to Yahweh, in whose cause the tribes are bound together as the "people of Yahweh." Without the prior activity of Moses it becomes quite difficult to give an effective explanation of this Israelite tribal "confederacy." If analysis of the Pentateuchal themes leaves the traditions of pre-Palestinian Israel dismembered, then they describe only disjointed episodes involving unconnected groups of people coming together in the land of Canaan. What brought them together with such swiftness and distinctiveness as the Song of Deborah reveals is then hard to discover.

Moreover, if credence is to be denied the general biblical framework of Moses' career, the task of explaining why and how later generations created such a person becomes a formidable one. Moses is a central figure in both the J and the E narratives and, presumably, also in the earlier, common tradition upon which both narratives apparently drew. A common tradition of this sort must have been in existence by the beginning of the Israelite monarchy (*ca.* 1020 B.C.), if not earlier. This means that one must explain the entrance within a span of not more than two hundred years of "Israelitish" elements into Canaan, the emergence of Israel as a self-conscious and effective entity, and the expansion of Moses into the unquestioned position of founder and leader of all Israel. No one can prove, of course, that such a development could not have occurred without the Moses whom the Pentateuch pictures. But it is easily possible to consider the biblical account of Mosaic leadership a more credible explanation of Israel's early period in Palestine than any other available thesis.

2. Background. The only source of information for the life and work of Moses is the Bible. Archaeological evidence may confirm the essential credibility of biblical events to which Moses is related, such as the enslavement of Hebrews in Egypt and the assault upon Canaan. But it affords no specific confirmation of either the existence or the work of Moses. Within the Bible some retrospective deductions about Moses' influence may be drawn from the faith and practices of post-Mosaic Israel, but hope of reconstructing any coherent career of Moses depends mainly upon the oldest versions of Israel's traditions related by the Yahwist and Elohist historians. Although Deuteronomic and Priestly accounts add details to the picture, they are of more significance in indicating the impact of Mosaic religion upon their respective circumstances.

a. Nativity story. The story of Moses' birth employs folklore to introduce the future deliverer (Exod. 2). Folkloristic themes suggest dimensions of meaning and mystery for which the reader should be alert. Appropriate portents, e.g., announce a man of extraordinary powers and suggest an ominous future. In spite of its own edict, the Egyptian throne gives shelter to the powerless infant who will one day humiliate it and face it with death. Such themes do not need to be originally Israelite. The story of the baby set afloat in a basket of bulrushes, e.g., resembles the birth story of Sargon of Agade (*see* SARGON 1), who was rescued from the Euphrates and became, in his adulthood, the founder of the great Babylonian city-state of Akkad. Moses is thus introduced in imagery common to ancient Near Eastern expectations of extraordinary achievement and deliverance.

b. Levite ancestry. The connection of Moses' ancestry with the house of Levi (Exod. 2:1) may reflect tendencies of another sort. The contradiction between Exod. 2:1-2, where Moses appears as the first-born of his parents, and references implying that Miriam and Aaron are older than he (cf. Exod. 2:7; 6:20; 7:7; Num. 26:59), suggests the possibility that Moses' Levite connection is not original. If not, it would have originated with interests eager to attach Moses to a priestly family. Although Moses performs sacerdotal functions, he is not pictured in the bulk of the traditions primarily or exclusively as a priest. Priestly actions are undertaken by others—by Aaron and the Levites (Exod. 32:5, 29), and by young men, apparently laymen, who offer the sacrifices at the ratification of the covenant (24:5).

c. Egyptian influence. The tradition of Moses' connection with Egyptian circles seems authentic, however. His name is apparently the old perfective of the Egyptian verb "to be born," which is frequently combined with divine titles to form personal names, as in Ra-meses. The derivation attributed to Pharaoh's daughter: "She named him Moses, . . . 'Because I drew him out of the water' " (Exod. 2:10), represents popular etymology based upon assonance. The use of names of Egyptian derivation like Phinehas, Hophni, and Merari (probably also Aaron and Miriam) for several generations in Levitical genealogies (Exod. 6:16, 25; I Sam. 1:3) is additional evidence of Egyptian connection, although not certain proof that either Moses or the Levites have an Egyptian background. Apart from the birth story, there is no indication of Moses' connection with the Egyptian court. No reference is made to it in Moses' negotiations with Pharaoh, although the absence of a language barrier between the two might have been understood against this feature of the narrative. Attempts to connect Moses with the learning of Egypt and the religious reform of the so-called monotheistic pharaoh, AKH-EN-ATON, have not been noticeably successful (cf. Acts 7:22). Egyptian influences of many sorts may have touched Moses, but the evidence is not available to establish or refute such connection. What is certain is that Moses' awesome energy and power stem from another source.

d. Midianite influence. Moses' connection with MIDIAN is well attested. Tradition is not likely to have invented such involvement in view of the later hostility between Israelites and Midianites (cf. Judg. 6:2; Isa. 9:4—H 9:3). Tradition pictures Moses as finding refuge in Midian after fleeing from Egypt. Here he also finds employment as a shepherd, and Zipporah, daughter of Jethro, becomes his wife (Exod. 2:15–3:1). Zipporah is perhaps to be identified with the "Cushite woman," whom Moses marries according to another narrative (Num. 12:1).

Whether Moses and Mosaic Yahwism are more deeply indebted to Jethro, the "priest of Midian," for cultic and cultural instruction and forms is a question long debated. One aspect of the question involves the possible origin of the divine name Yahweh among the Kenite clan to which Jethro belonged (*see* GOD, NAMES OF; JETHRO). Apart from this highly specialized problem, it is likely that in its earliest days, as all through its history, Israel borrowed both cultic and cultural forms from its environment in order to express its life as the community of Yahweh.

3. Mission. The account which Israel preserves of its founder's call reveals a perspective about itself and its own vocation (Exod. 3–4). Moses is called to bring a people to Yahweh, and this mission which thus constitutes him Yahweh's servant also constitutes the people whom he serves. In this regard, the limited character of the task assigned to Moses appears to be a crucial feature in his call. He is called to engage himself at the outset of Israel's life only, not to make himself the enduring center of that life. No timeless significance is to be attached to his person. No words of his are to be transmitted as the sacred lore about God. Moses is to bring the sons of Israel out of Egypt under a sign that points them to the future; the guarantee of God's presence is simply that "when you have brought forth the people out of Egypt, you shall serve God upon this mountain" (Exod. 3:12). The religion with which Moses is to be involved will be able to survive without him (although it may also rediscover him), just as the entrance into the Promised Land will occur without his presence or direction (Deut. 34:4). Israel is thus free to meet the future instructed, but not shackled, by the past.

a. Commissioning. Moses does not volunteer to be the liberator of Israel. Although he appears in the vicinity of Mount Sinai as a sequel to his concern for the oppressed Hebrews in Egypt (Exod. 2:11-15), little else suggests him to be a firebrand in the cause of liberty. Nor is Moses a man of unusual piety. He does not come to the "mountain of God" (Exod. 3:1) as a religious exercise. He stumbles unsuspectingly upon what proves to be a holy place, and he does this in the course of his duties as a shepherd. Perhaps the mountain was already a shrine of the Kenites. This seems unlikely, however, in view of Moses' failure to mention his experience there when he requests leave from Jethro to return to Egypt (Exod. 4:18). In short, Moses is drafted for his job.

Moses is certainly no *tabula rasa* prior to the encounter with Yahweh at the burning bush. What turns him into a man of destiny, however, is the convergence of a concrete, historical task and the new knowledge of God which grasps him. This galvanizes the extraordinary and diverse powers of the man in an endeavor which will henceforth dominate him utterly. He is a man set apart under God's election and endowment, charismatically empowered, for a particular task in a moment of time. He can misconstrue his calling as though it were a summons to eloquence, which he lacks (Exod. 4:10). But in fact his calling is to obey Him in whose purposes Moses' inability will prove adequate: "Now therefore go, and I will be with your mouth and teach you what you shall speak" (vs. 12).

Yahweh's disclosure of himself to Moses is portrayed through the magnificent symbols of the burning bush, the holy ground, and the divine name. In revealing himself, what Yahweh discloses is that he is involved in the plight of the Hebrews in Egypt and that he intends to act in this setting. This is tantamount, in the biblical idiom, to communicating one's name or character, and explicit disclosure of the divine name climaxes Yahweh's meeting with Moses

(*see* NAME). Both the E and the P historians indicate that the proper divine name Yahweh was not known prior to its disclosure to Moses, although, in effect, it was Yahweh whom the patriarchs knew under another name (Exod. 3:13-15; 6:2-3). J makes this latter identification explicit by employing the name Yahweh from earliest times (Gen. 4:26). The significance of the divine name for the story of Moses, however, is not to be judged in terms of its novelty. The name does not conceal esoteric religious information but proclaims a God who has openly declared his intention to act in the affairs of Egypt. What Moses has to convey to his kinsmen in Egypt, therefore, is not secret learning about divine mysteries, but the character of the times in which they live. Since God is the primary actor in human events, to read the times aright will be to disclose him.

Whatever the previous history of the name Yahweh may have been, its derivation from the verb הוה in Exod. 3:14 (*see* GOD, NAMES OF) underscores the intensive and enduring nature of Yahweh's presence in the events of every age. "But I will be with you" (vs. 12), is the dynamic explication of Yahweh's name and also the promise which fashions Israel's destiny from beginning to end (cf. the elaboration of this theme in Isa. 43:1-13).

The Priestly account of the call of Moses is placed after Moses' return to Egypt (Exod. 6:2–7:13). It serves as divine reassurance after Moses' initial audience with the Pharaoh has failed. The theme of God's action in the historical situation is still present, although the Exodus is now viewed as a less epochal divine disclosure. For P it is the covenant God made with the patriarchs which warrants his present action in Egypt (Exod. 2:24). For P the role of the priest at the founding of the nation is also of great interest. Hence, Aaron stands alongside Moses and executes the word which the latter has received from God (7:2). But as genealogy testifies, it is now Aaron's descendants, not Moses', who constitute the living continuation of the Levite line and the current extension of the work of Moses (6:25).

b. Task in Egypt. Moses is sent from Sinai to Egypt. He is to interpret what occurred to him at Sinai in its impact upon those who are in Egypt, Egyptian as well as Hebrew. He is the mediator who bears what has happened to himself to the people for whom it has happened. He is singled out in such extraordinary fashion that no one else is like him. But all this occurs so that Yahweh may create a community of his own from a motley group, bearing almost no marks of communal identity.

Thus, Moses' task is defined by the scope of Yahweh's intention. It involves more than religious instruction, for ideas alone do not create a community. It involves leading a group into and through a common experience that will be new and perilous. This experience will then have to be given enduring form in the social, economic, legal, and cultic structures necessary for communal living in the world. And although these structures may be formally patterned upon those of Israel's neighbors, they must also be able to bear the meaning appropriate to a community created by a unique historical experience.

The initial task of Moses is to win the allegiance of the "mixed multitude" (Exod. 12:38) in Egypt and to devise a strategy for their departure. The biblical account of Moses' efforts is cast in highly dramatic form, for the ultimate protagonists are Yahweh and Pharaoh. Behind Pharaoh is arrayed the entire power of the Egyptian state, marshaled in its magicians and armies as well as in its embodiment of divinity, the crown. Although the gods of Egypt are mentioned only once as Yahweh's opponents (vs. 12), their power is at stake in the contest. It underlies the occult arts of the magicians of Egypt, as well as the presumptuous arrogance of the Pharaoh, who means to show that there is none like himself in all the earth (5:2; 9:16-17).

Moses is equipped with extraordinary powers which are intended to validate him before his people and win Pharaoh's compliance with the divine order: "Let my people go, that they may hold a feast to me in the wilderness" (Exod. 4:30–5:1). The essentially dramatic and symbolic character of the Mosaic signs and plagues is indicated by their failure to carry conviction (*see* PLAGUES OF EGYPT). They are schematized in the seesaw battle between faith and doubt, obedience and defiance; and their ability to persuade can give way before Israel's doubts or Pharaoh's obstinacy (8:15—H 8:11; 14:11-12).

From these stories it is impossible, then, to reconstruct the methods by which Moses rallied his people and accomplished their departure from Egypt. The Israelites are pictured as murmuring frequently against his leadership (Exod. 14:11-12; 16:3; Num. 11:4-5), but against this view must be set prophetic traditions which picture the exodus period as the time of Israel's fidelity (Jer. 2:1-3; Hos. 9:10*a-b*). The account of tension between Moses and his people may have been colored by the tension between prophet and people characteristic of a later time. This may also be true of the P representation that the people initially did not trust Moses (Exod. 6:9), a view contrary to that in the older J source (3:18; 4:31).

Tendencies to explain Moses' power by categorizing him as an exhibitionist wonder-worker, adept in the secrets of magic, do not succeed. The power wielded by Moses in the plague stories or in the war against Amalek (Exod. 17) or in the erection of the brazen serpent (Num. 21:9) is not glorified as fundamental to his mission. The strength of the man—not to mention his weakness—is too diversified to allow such a development. He cannot be explained as a wizard. He is unable to alter circumstances at will. His followers can disbelieve him and even struggle with him for power (Num. 12; 16). He dies without setting foot on the land which is the goal of his labors. And quite appropriately, his grave is unknown and cannot be made into a cultic site (Deut. 34:6). Thus, although the account of how Moses rallies his people may be illuminated by features of magic provenance, it cannot be explained by them.

The negotiations between Moses and the Pharaoh must be judged in similar fashion. Since Yahweh claims obedience from every aspect of his world, the throne of Egypt, as well as men and nature, must bow before him. In order to accomplish his purposes, he will do as he wills with what he has made, "that you may know that the earth is the LORD'S" (Exod. 9:29). As long as Pharaoh's consent to the demands

of Moses is given with reservations or may be revoked, the issue between him and Moses can never be concluded. Yahweh demands total surrender from the world, as he will from his covenant people (20:3), and the scenes at Pharaoh's court are described accordingly.

Consequently, there is little in the biblical narrative upon which to reconstruct Moses' strategy in Egypt. In itself the tradition that the Pharaoh granted audiences to the Israelite leader is not implausible. If the Exodus (*see* EXODUS, ROUTE OF) is to be dated in the early thirteenth century B.C., as much evidence now suggests, the Egyptian dynasty involved would be that of the Ramessides (Nineteenth Dynasty, *ca.* 1308-1216), who are known to have permitted appeals to the royal court from their slaves. In the same period the Egyptian capital was relocated in the Delta area at Avaris, the vicinity of the Hebrew settlement (Gen. 46:28-34; Exod. 2:5-10; *see* GOSHEN; EGYPT). Hence such features of the biblical story as Moses' movements between the palace and the Hebrew enclave or the labor of the Hebrew slaves on the Ramesside building projects in the Delta (Exod. 1:11) would be possible.

c. Passover. Israel's departure from Egypt is preceded, in the biblical account, by rites of cultic character (Exod. 12:1–13:16). The roots of later Israelite observances—PASSOVER AND FEAST OF UNLEAVENED BREAD, and dedication of the FIRST-BORN—are here planted in the soil of the exodus deliverance. From the complex cluster of ideas and rites connecting these observances with the Exodus, it is apparent that they are adaptations of heterogeneous, pre-Israelite practices. Borrowed from a sharply different interpretation of man's existence, in which they once commemorated the recurrent features of nature, they have been reinterpreted to celebrate a uniquely revealing and redeeming moment of history. Now they assert that Yahweh has taken possession of his people. Whether Moses is to be connected with such reinterpretation may be an open question, but scarcely more can be said than that it would be appropriate to his work as interpreter of his people's experience in word and form. Interpretation of these observances is not unalterably fixed in any period of the OT, although the essential testimony to Israel's origin in the divine deliverance from Egypt remains unchanged. The impact of Moses upon Israel's self-understanding did not lead to canonization of the earliest forms of the exodus traditions.

d. Crossing the sea. Historical and literary analysis pinpoints the Israelites' crossing of the Sea of Reeds (*yam sûph*) as the catalytic moment in the experience of deliverance (Exod. 14:15-22). Just as the immediate reaction is to interpret the event as Yahweh's triumphant action (15:21), so considered reflection will necessitate interpreting all existence in its light (cf. Ps. 114; Isa. 51:9-11). In giving life to his people, Yahweh has asserted the subordination of nature and history to his ultimate purposes. Israel's future interpreters must view the life of man, situated at the juncture of nature and history, from this controlling perspective.

This critical moment is one in which the undisputed lordship of God can be shared with no one, not even Moses. The watchword which Moses proclaims asserts this: "Fear not, stand firm, and see the salvation of the LORD, which he will work for you today" (Exod. 14:13). Subsequent embellishments of what appears to be the earliest prose form of the story (vss. 15, 19*a*, 21*a*β-*b*α, 22*a*) seek to heighten the significance of Moses as well as the scope of the wonder (cf. vss. 16, 22, 26). Yet Moses' chief responsibility seems to be to maneuver the Israelites into a position between the Egyptians and the sea from which only Yahweh's aid can extricate them (vss. 1-4). The crossing of the sea does not glorify Mosaic strategy, therefore, but divine sufficiency. Yahweh alone is adequate to deliver his people. *See* RED SEA.

e. Life in the wilderness. A similar perspective colors the narrative of Israel's years in the wilderness (Exod. 15:22–18:27; Num. 10:29–31:54). Details of geography, logistics, and history are subordinate to the dominant concern with Yahweh's possession and nurture of his people. Framing the great core of dramatic and legal material now centered upon Israel's stay at Mount Sinai (Exod. 19:1–Num. 10:28) is a series of episodes recounting Israel's experiences in the wilderness. The narrative describes the struggle to survive—efforts to find water and food, to discover the way, to hold an oasis, to preserve unity and order within the ranks, to escape annihilation by foes. Clearly, Yahweh's deliverance of Israel at the Sea of Reeds has not transformed the harsh conditions of life in the Sinaitic Peninsula. But Yahweh is represented as involved in his people's struggle, preserving their life while at the same time testing their resolve to live as the people whom he has borne "on eagles' wings and brought" to himself (Exod. 19:4).

From whatever subsequent period they date, the biblical narratives of the Mosaic era are primarily concerned with the ultimate issue of Yahweh's mastery of men and events for his own purposes. Yet this does not lead to a caricature of either men or events. God chooses to give meaning to history, not to abrogate it. So the biblical account of Mosaic leadership during the wilderness years affords glimpses of Moses' character and tactics while also depicting the chief protagonist in the drama, Yahweh. Indeed, a rich and varied picture of Mosaic leadership is drawn.

On the one hand, Moses appears in radical self-denial as intercessor for his people (Exod. 32:30-33); on the other, in quick-tempered chafing under the burden of their care (Num. 11:10-15). "Turn from thy fierce wrath, and repent of this evil against thy people," as Moses implores Yahweh (Exod. 32:12), is a request very different in substance, although not in boldness, from: "Did I conceive all this people? Did I bring them forth, that thou shouldst say to me, 'Carry them in your bosom, as a nurse carries the sucking child . . . ?' " (Num. 11:12).

Again, while Moses appears to be only incidental to the provision of quail and manna (Exod. 16:12 P) and at most only an executor of Yahweh's directions in obtaining water (15:22-25 J; 17:5-6 E), he acts independently on other occasions. He himself makes the decision to accept his father-in-law's proposal for accelerating judicial processes (18:13-27). The strategy in the battle against Amalek is devised without divine instruction: "Moses said to Joshua, 'Choose for us men, and go out, fight with Amalek;

tomorrow I will stand on the top of the hill with the rod of God in my hand' " (17:9). However, the posture assumed by Moses, the outstretched hands, and the rod of God are intended as evidence of the present power of God, apparent only to faith.

Many of the wilderness episodes appear to have occurred in or near Kadesh-barnea (Num. 13:26; *see* KADESH), an oasis somewhere SW of the Dead Sea. The battle with the Amalekites may well have been a struggle for possession of this oasis (Exod. 17:8-16). The persistent enmity between Israelites and Amalekites (cf. I Sam. 15) may stem in part from this critical struggle for survival. It is also probable that Moses sought to consolidate his leadership of the people during a long stay at Kadesh. Apart from the recurring theme that hardship causes Israel to disbelieve the promises of God and to revolt against Moses' authority, several pointed attacks upon his authority appear to have been launched at Kadesh. Miriam and Aaron seek to undermine the position of their brother, ostensibly because of his marriage, but actually because of their claim to prophetic office: "Has Yahweh indeed spoken only through Moses? Has he not spoken through us also?" (Num. 12:2). DATHAN and Abiram allege that Moses' failure to gain the promised "land flowing with milk and honey" has been compounded by his own pretensions as to princely authority (16: 12-15 JE). The ill-fated revolt of KORAH, now interwoven in the narrative of Dathan and Abiram's agitation, is motivated by a charge of more priestly cast —namely, that Moses and Aaron have claimed superior sacerdotal status and denied that "all the congregation are holy" (16:1*a*, 3-11, P).

Separatist tensions and power struggles within the emerging wilderness community certainly seem credible. The task at hand was an enormous one. A community had been created almost out of nothing by a radically reorienting event. The endeavor to articulate its implications and to subject inherited and traditional forms of life to these implications was as demanding as the job was boundless. Little wonder that many chafed under a redemption that made slave rations in Egypt seem preferable to the desert fare of freemen. Little wonder that there were rival interpretations and definitions of what Israel was. Indeed, the fundamental problems in this early period were those that would engage the OT community throughout its entire life.

That all was not strife and contention in the wilderness, however, is suggested by the consecration of the seventy-two elders to aid Moses in bearing the burden of the people (Num. 11:16-30). They receive a share in the same energizing spirit which rests upon Moses in an incomparable manner. Just how far Moses is from wanting to assert totalitarian claims to authority is indicated by his exclamation: "Would that all Yahweh's people were prophets, that Yahweh would put his spirit upon them!" (vs. 29). Many scholars, however, believe that this story reflects a later situation (cf. Gen. 46; Num. 26).

It has been suggested that the formative role of Kadesh in the early life of Israel is considerably more extensive than is now indicated by the biblical narratives. One thesis would recognize in Kadesh a pre-Mosaic cult and legal center, under the direction of Aaron and Miriam. Marah, where Yahweh made a "statute and an ordinance" for Israel (Exod. 15:25), is perhaps to be equated with Kadesh (cf. Exod. 15: 22-27 with 17:1-7; Num. 20:1-3, 13). This would then identify Kadesh as a center for proclaiming and administering law. If Aaron and Miriam are Kadesh figures, their quarrel with Moses about his marriage (Num. 12) may conceal a deeper struggle in which they were dispossessed and supplanted by Moses as proprietor and priest of the center.

Undoubtedly, Israel's stay at Kadesh provided more than a respite from the rigors of the Sinaitic Peninsula. If Jethro's visit with his son-in-law is to be located at Kadesh (Exod. 18), it would be here that Israel adopted certain judicial forms proposed by Jethro (vss. 13-27). What is apparently implied is that Midianite-Kenite judicial institutions were imitated by Moses, thus introducing into Israel a lay judiciary and a distinctive method, perhaps the sacred lot, for obtaining instruction directly from God. Since Jethro is acknowledged as the "priest of Midian," his competence would extend also to cultic as well as legal matters, and it would be natural to assume Israelite indebtedness at this point to Midianite-Kenite forms. Jethro appears to act as priest on this occasion, which the biblical account now depicts as a kind of family reunion, although some obscurity is created by the statement that Jethro "took" (not "offered," as in the RSV) "a burnt offering and sacrifices to God" (Exod. 18:12). Whether or not the ensuing notice: "Aaron came with all the elders of Israel to eat bread with Moses' father-in-law before God" (vs. 12), implies that Jethro was inducting them into the cult of Yahweh depends upon the conclusion drawn about Jethro's connection with the origin of Yahwism in Israel. *See* JETHRO.

Two other features of Israel's wilderness encampment connected with Moses deserve attention: the tent and the ARK OF THE COVENANT. The tent, pitched outside the camp, is a tent of meeting between Yahweh and Moses, and in this proper sense it is a cult object that pertains to Moses alone (Exod. 33:7-11 E). The divine presence is manifested at the tent, not because the Deity maintains uninterrupted residence there, but because he graciously wills to approach Moses there. The descending PILLAR OF CLOUD AND FIRE announces the advent of the God who wills to let himself be consulted, but who, in effect, must also be sought while he may be found (cf. Num. 11:24-25; 12:5-8). As a cult symbol of the presence of the holy God of Sinai, who does not abandon his people when they depart from that mountain, the tent is appropriate to Mosaic Yahwism.

The suitability of the ark to the wilderness period has been more contested. Admittedly, it figures extensively in Israel's settlement in Canaan until David removes it to Jerusalem (cf. II Sam. 4–6). It appears to have been a symbol especially adapted to affirming God's presence with his people in times of military conflict and struggle for survival. As such it need not have been out of place as a wilderness shrine. One of the oldest OT fragments connects it with such a setting: "Whenever the ark set out, Moses said, 'Arise, O Yahweh, and let thy enemies be scattered; and let them that hate thee flee before thee.' And when it rested, he said, 'Return, O Yahweh, to the

ten thousand thousands of Israel' " (Num. 10:35-36). If the ark originally represented a portable throne upon which Yahweh was conceived as invisibly enthroned, its power as a symbol in both the wilderness and conquest periods is understandable.

The wilderness shrine of the P historians, the tabernacle (Exod. 25), incorporates elements from both tent and ark traditions. Features borrowed from the Davidic tabernacle (II Sam. 6:17) and the Solomonic temple have also been used to describe this imaginary construction, but its theological significance for P lies in the combination of emphases from the two ancient wilderness traditions. The tent, ancient symbol of God's gracious descent into the midst of his people, now houses the ark, ancient symbol of God's continuing presence with his people. The ark, set within P's tabernacle and provided with the "mercy seat on the top" (Exod. 25:21), is now made to witness to man's dependence on the redemptive mercy of God, mediated in Israel's cultic establishment. Thus, the original witness of the tent of meeting to God's transcendent majesty finds an echo in the priestly theology. *See* TABERNACLE.

f. Revelation at Mount Sinai. Since Moses has been pre-eminently the man of the law in Jewish and Christian tradition, it appears incongruous at first that uncertainty should exist about the exact scope and character of legal material attributable to him. It is, however, highly significant that the actual role of Moses in Israel's emergent years did not stultify future legal, cultic, or social developments. From the fundamental beginning made through his agency, further wrestling with the will and guidance of the living God could be expected. Variations in the transmission of the law, adaptations of it to new circumstances, and existence of multiple forms of the Decalogue testify that this did happen. Declaration and interpretation of the divine will remained alive in Israel's legal and prophetic movements.

The vitality of Israel's legal heritage makes a chronological reconstruction of its manifestations difficult. Amendments, additions, rearrangements, and codifications took place without regard to the niceties associated with modern jurisprudence. The cluster of material now attached to the revelation at Mount Sinai is diverse in date, structure, and content. Its literary connections are largely with the Priestly Pentateuchal material, including Exod. 25–31; 35–40; Leviticus; Num. 1–10:28, speaking generally. JE material is found in Exod. 19–24; 32–34. Since Deuteronomic legal formulation is cast as an exhortation to those about to enter Canaan, its locale is not Sinai but Transjordan.

The form in which OT legal matter is now found reflects conditions of an agricultural society, settled in Canaan (e.g., Exod. 22:5-6—H 22:4-5). This does not imply that such a code as the "Covenant Code" (Exod. 20:23–23:19 E) originated entirely in post-Mosaic Israel. Legal traditions are long-lived and, in the case of Israel's legal formulations, reach back into the exodus period, as well as into the common legal heritage of the Semitic world (*see* LAW IN THE OT). The age of a tradition, legal or otherwise, is not established by the date when it was reduced to writing.

Efforts to isolate legal material of Mosaic origin are closely related to attempted reconstructions of Mosaic Yahwism, in which the Sinaitic covenant is central. The way in which the covenant relationship is conceived determines the kind of legal material which can be credited to Moses. However, questions about the connection of the Sinai theme with the other themes of the exodus and wilderness traditions have been indicated above (*see* § 1*b*). If the story of Israel at Sinai originally existed as a separate tradition, unconnected with its present context, serious question would be raised about the part Moses plays in the story. It might be supposed that he was imported into the Sinai narrative from an original connection with the Exodus. Or, on the other hand, the apparent disjunction between the Sinai theme and the other Pentateuchal themes may be due to the history of the respective traditions rather than to the events which underlie them. That is to say, the attachment of Moses to both groups of events would be original, but the traditions would have developed in their several, separate ways as determined by later cultic and cultural forces. It should be noted, however, that the exodus and Sinai themes are already linked in the Decalogue. The initial words spoken by the divine lawgiver are: "I am the LORD your God, who brought you out of the land of Egypt" (Exod. 20:2). *See* § 1*c above*.

Thus, the revelation at Mount Sinai confirms and climaxes the deliverance from Egypt. The dynamic exodus event is given enduring significance in the dynamic covenant relationship—a mutual, albeit unequal, commitment between Yahweh and Israel. "You have seen what I did to the Egyptians," says Yahweh, "and how I bore you on eagles' wings and brought you to myself. Now therefore, if you will obey my voice and keep my covenant, you shall be my own possession among all peoples; for all the earth is mine, and you shall be to me a kingdom of priests and a holy nation" (Exod. 19:4-6*a* J or E). The earth-shattering implications of dependence upon a deliverer who is holy are now dramatically portrayed. Even Mount Sinai trembles when "the LORD descends upon it in fire" in order to meet his people. The appropriate response which God seeks from his people, however, is not cowering fright, but free and vigorous obedience. As Moses interprets God's engagement with his people, "God has come to prove you, and that the fear of him may be before your eyes, that you may not sin" (20:20). In the present ordering of the biblical material the solemn ceremony of sealing the covenant (ch. 24) takes place only after God's will has been proclaimed in the law (chs. 20–23). Having promised obedience to this will, the people as a whole are bound to their covenant Lord in the power of sacrificial blood (24:6-8). Since the covenant is made with all Israel and not with individuals or groups, the nation's existence is thus grounded in him and governed by him. *See* COVENANT.

In the Sinai narrative the characteristic mark of Mosaic Yahwism is apparent: the intensely personal, dynamic will of the holy God, who claims exclusive allegiance from all areas of life. His will is formulated in two general types of law found in the Pentateuch (*see* LAW IN THE OT). The type which occurs more frequently formulates requirements conditionally, describing specific penalties for specific actions (cf.

Exod. 21:26-27). The casuistic formula employed is part of the common Semitic legal heritage. The other type of law states the divine requirement unconditionally: "You shall not utter a false report" (23:1). The Decalogue is of this latter type, and probably in its original form contained only pithy, unconditional commands, such as: "You shall have no other gods before me" (20:3).

The origin of unconditional law must lie in Israel's unique encounter with the divine lawgiver as holy, personal will. Moses, the interpreter of this encounter, may be responsible for the creation of this kind of legal formulation. The DECALOGUE of Exod. 20 in its original, brief form could thus come from Moses himself, although there are significant difficulties for this view.

The tables of the law with which Moses is provided in the context of the golden-calf story do not come into consideration at this point. Presumably they would include more than a compact decalogue, being inscribed on both sides and thus necessitating Moses' unexpectedly long stay on the mountain (Exod. 32:1, 15). The so-called "ritual decalogue" of Exod. 34:14-26 is not a likely repository of Mosaic legislation either. It reflects conditions of an agricultural society and is, in fact, a probable fragment of the J "Covenant Code" rather than a decalogue.

What stands out clearly, however, in all the Sinai narratives is that it is Moses who proclaims Yahweh as the God of uncontainable energy and passion, a "jealous God" (Exod. 34:14), who wills in grace and in judgment to be Lord. Without expressing itself in abstract terms about the existence or nonexistence of other gods, Mosaic Yahwism knows a God from whose demands no power in heaven or earth can provide an escape (*see* MONOTHEISM). It was this witness which the prophets recovered in later centuries, and with which they laid open their society before the claims of the living God. The power with which Moses stamped such witness upon biblical faith is the incomparable work he accomplished in the history of Yahweh's people.

4. OT summary. The biblical material itself acknowledges the incomparable position of Moses in very interesting ways. He is unique not only among his contemporaries but also among his successors. Post-Mosaic developments can be referred to him and set under the prestige of his name as in Deuteronomic and Priestly circles (*see* PENTATEUCH). But no imitator or rival appears in the history of Israel. Perhaps King David comes closest to being such—a fact that suggests the fateful character of the Davidic monarchy for OT faith.

The failure of Israel to create a "Mosaic type" of man or office is all the more striking when set against the Pentateuchal picture of Moses' incomparability. This is depicted in terms of intimacy and immediacy of relation to God. It is Moses who as a servant is entrusted by God with all his house. This servantship is one, not of servility, but of confidence and freest exchange between lord and servant. "With him I speak mouth to mouth, clearly, and not in dark speech; and he beholds the form of Yahweh" (Num. 12:7-8; cf. Isa. 50:4-5). The conversation is "face to face," the kind of stance in which "a man speaks to his friend" and does not dissimulate or conceal anything (Exod. 33:11). And even if Moses' request to be shown Yahweh's glory must be denied, the divine name is proclaimed to him. He is thereby set in relation to the deepest mystery of the Deity, who declares his name to mean: "I will be gracious to whom I will be gracious, and will show mercy on whom I will show mercy" (vs. 19). But the intimacy of relation to God which sets Moses apart is not a human or religious capacity, capable of imitation. "There has not arisen a prophet since in Israel like Moses, whom the LORD knew face to face" (Deut. 34:10). "Moses did not know that the skin of his face shone because he had been talking with God" (Exod. 34:29).

The absence of imitators of Moses is probably due to the same forces which prevent any characterization of him as a demigod. Moses must finally stand together with all the personages of the OT under a common judgment: there is no perfectly obedient man in Israel. Moses can be exalted in the story of the golden calf to the position of mediator between God and people. The renewal of the covenant with faithless Israel takes place in him, and he offers to set his life in place of those whose disobedience has made their life forfeit (Exod. 32:32; 34:9). Yet, just as his position as mediator confirms the distance between God and man, so his own career finally sets him on the side of men (cf. 32:33). The "epitaph" which concludes that career underscores the "not yet" of every human attainment when compared with the promises of God: "And the LORD said to him, 'This is the land of which I swore. . . . I have let you see it with your eyes, but you shall not go over there" (Deut. 34:4). Fig. NEB 10.

5. Moses in postbiblical Judaism. Those tendencies to glorify Moses which the OT appears to have resisted make themselves felt in the Judaism of the late pre-Christian and early post-Christian centuries. Because of the centrality of Torah (law) in late Judaism, Moses is easily the most significant figure in the history of the Jews, and he is exalted in both Hellenistic and Palestinian Judaism.

a. Hellenistic Judaism. Moses is praised as the greatest of men, the benefactor of mankind in his role as the father of learning and skills. Truth in Egyptian religion and in Greek philosophy has come from the Mosaic fountainhead. For Philo the Alexandrian Jew of the first century A.D., Moses is the epitome of ideal humanity, reconciler and mediator between God and man, and revealer of the changeless law which existed with God before the creation of the world. Hellenistic Judaism views Moses in terms of its own ideals as a superhuman figure, a divine man (θεῖος ἀνήρ).

b. Palestinian Judaism. A more restrained extension of the significance of Moses takes place in Palestinian Judaism. More characteristically biblical patterns are employed, portraying Moses as mediator of the divine word, servant of God set apart by marks of patience and humility, and the recipient of the complete and final revelation of God. All scripture is but reiteration of this revelation, and the prophets can be subordinated to Moses to the extent of asserting that he spoke their words in addition to his own. The body of unwritten law, cultivated so diligently by the Pharisees, is also derived from Moses. The

twofold law, written and unwritten, is revealed to him in its entirety, and some of the unwritten law is called "Mosaic rule of law from Sinai." Through ordination the spirit of Moses is transmitted to the scribes in unbroken succession. Moses thus becomes Israel's teacher in a supreme sense. *See* LAW IN FIRST-CENTURY JUDAISM.

Several pseudepigraphical works are ascribed to Moses in Palestinian Judaism (*see* PSEUDEPIGRAPHA). Generally, they represent Moses as the recipient of revelation that unveils the future. To him God discloses all events and the final hour. Concern is also shown with the biblical tradition of Moses' death. The dominant interpretation of the tradition is that Moses died but that his corpse did not decay. There is, however, another view, that Moses was bodily translated into heaven. In the former view it is considered necessary that Moses should have died and been buried in the wilderness. Only through the atoning efficacy of his death and burial would the wilderness generation rise from the dead and be allowed entrance into the Promised Land.

The biblical tradition that God would raise up for his people a prophet like Moses (Deut. 18:15-18) is variously interpreted in Judaism. Although the passage is applied in rabbinic literature to the post-Mosaic succession of prophets, it may also have received a messianic interpretation in Judaism, as it did among the Samaritans. In the literature of the Qumran sect the "prophet to come" appears as one of the eschatological figures of the messianic age, along with the priestly and the royal messiahs. Apart from the Deuteronomic reference, there is a general tendency in both rabbinic and Qumran literature to relate Moses and the messianic age: "As the first redeemer [Moses], so the last redeemer [the Messiah]." Indeed, the Qumran community retreated to the wilderness in preparation for the new, eschatological exodus and renewal of God's elect community. In many features, then, the messianic age is conceived after the pattern of the age of Moses.

6. Moses in the NT. In the NT the most frequently mentioned OT figure is Moses. The NT picture of Moses corresponds more closely to the restrained characterization of the OT than to the later developments of Judaism, although some new features are added to the Pentateuchal tradition. Instead of the stammering and reluctant figure of Exod. 4, Moses is pictured as "mighty in his words and deeds" and versed in "all the wisdom of the Egyptians" (Acts 7:22), and now he receives the law through the mediation of angels (vs. 38).

Moses appears in the NT in many of his OT roles, but he is dominantly the lawgiver (Matt. 8:4; Mark 7:10; John 1:17). The designation "Moses" may by itself refer to the law of Moses (Mark 7:10; Luke 16:29; II Cor. 3:15). Although the ultimate fulfilment of every iota and dot of the law may be asserted (Matt. 5:18), Jesus appeals beyond the Mosaic law on divorce to the absolute criterion of God's will and action (Mark 10:2-9).

As a prophet, Moses speaks of the coming of the Messiah and his suffering (Luke 24:25-27; Acts 3:22). The appearance of Moses together with Elijah at the transfiguration of Jesus suggests the witness of the Law and the Prophets that the Messiah must suffer (Matt. 17:1-8; Mark 9:2-8; Luke 9:28-36). The location of the transfiguration story between the first two predictions of the Passion indicates that this is at least a significant function of the story (cf. Luke 9:31).

It is not only as lawgiver and prophet, however, that Moses concerns the NT. Quite apart from any single aspect of his work, his entire career and the history in which he is involved are taken to be patterns of life under the new covenant. The nativity story of Jesus reveals the Mosaic theme of the infant deliverer snatched from the evil designs of an earthly tyrant (Matt. 2:13-18). The appearance of John the Baptist in the wilderness, in fulfilment of the prophecy of Isa. 40:3, anticipates a final deliverance patterned after the Mosaic one (Matt. 3:1-4). The proclamation of the new law from the mountain (Matt. 5:1) presents Jesus as the living voice from Sinai, the authoritative interpreter of the will of God (cf. Mark 10:2-9), as he is also mediator of the new covenant (Mark 14:24).

The Mosaic era may also offer a kind of obverse pattern for the new. The old "dispensation of condemnation" is far exceeded in splendor by the new "dispensation of righteousness." The distinguishing mark of the latter is the presence of the Spirit in the community, creating a ministry in the Spirit. In contrast to the veil of Moses, the new community beholds the glory of the Lord with unveiled face and is "being changed into his likeness from one degree of glory to another; for this comes from the Lord who is the Spirit" (II Cor. 3). The counterbalancing of Moses and Christ is especially pronounced in Hebrews. Moses was a faithful servant in God's house; Christ is a son (Heb. 3:5-6). Moses was able to seal the covenant only with the blood of calves and goats; Christ is the mediator of a new covenant sealed in his own blood (Heb. 9:11-22). The contrast between Moses and Christ is also underscored in John's Gospel. The distinction that "the law was given through Moses; grace and truth came through Jesus Christ" (John 1:17), is perhaps meant in a supplementary, not antithetical, sense. Although no claim is made that the manna in the wilderness was given by Moses, a sharp contrast is implied between Moses, who did not give bread from heaven, and Jesus, who is the "bread of life" (John 6:30-35).

In another sense the NT has described the first Moses from the perspective of the second Moses. The pre-eminence of the Cross has led to emphasis upon Moses as a suffering figure. He prefers abuse for Christ to the treasures of Egypt, and ill-treatment shared with God's people to the "fleeting pleasures of sin" (Heb. 11:23-28). He knows the anguish of rejection by those very people for whose sake he has been sent (Acts 7:25, 39).

In the NT, Christ and Moses, church and Israel, are inseparably linked to one another, declaring the unity and the distinction within the one story of God's mighty deeds of salvation.

MOSES, ASSUMPTION OF. A Jewish pseudepigraph, extant in a Latin version from a defective sixth-century MS and probably representing the combination of two earlier works, the Testament of Moses and the Assumption of Moses. The combined work might better be entitled the Testament of Moses, for it does not contain any reference to the assumption of Moses (save for an obvious interpolation in 10:12). In fact, it is stated repeatedly that Moses was to die in a normal manner (1:15; 10:12-14; 11:8) and be buried.

That a (real) Assumption (Ascension) of Moses once existed is attested by Origen, who writes that Jude 9, which refers to a dispute between Michael and the devil for Moses' body, was taken from a little treatise entitled the Ascension of Moses (*On the Principles* III.2.1; cf. *Homily on Joshua* II.1). Somewhat earlier Clement of Alexandria in his *Comments on the Epistle of Jude* relates Jude 9 to the assumption of Moses (cf. *Stromata* VI.5: "Moses is with the angels," and I.23: "He had a third name in heaven, after his ascension"). The appearance of Moses with Elijah on the Mount of Transfiguration (Mark 9:4 and parallels) and the probable identification of the two heavenly witnesses of Rev. 11:3 ff as Moses and Elijah testify to the early currency of the legend among Christians, if not to the existence of the book itself. The circulation of the tradition, at least among the Jews, is indicated by the rabbinic denial that neither Moses nor Elijah had ascended to heaven (*Dukkah* 5*a*).

Both a Testament of Moses and an Assumption of Moses are included in lists of apocryphal books. The section 3:10-13 of our text, which may be assigned to the Testament, was possibly a source for II Bar. 84:2-5, written *ca.* A.D. 100.

It is conjectured that the two works were combined at an early date. Jude (125-50) not only reflects use of the Assumption in vs. 9, but vs. 16 may be a conflation of 7:7, 9; 5:5, which is in the Testament. When the two works were combined, they may have been given the title of one, the Assumption of Moses. The otherwise puzzling interpolation in 10:12 of the word "assumption" ("For there shall be my death and assumption"; orig. tr.) may indicate that the missing conclusion of our text contained an account of Moses' assumption.

Bibliography

1. Contents. Moses, as death approaches, is represented as giving a charge to Joshua (similar to one of the Testaments of the Twelve Patriarchs) in which he briefly predicts the future of Israel to the consummation at the end of days, which will be marked by a time of repentance. First, the people will possess the land (Canaan) which had been promised them, and will be ruled over by their chiefs (judges) and kings. The kingdom will be divided, and then they will be taken captive by a king from the East (Nebuchadnezzar) and live in exile seventy-seven years. One of their number (Daniel) will offer up a prayer for God's mercy. A compassionate king (Cyrus) will send them back to their own land. Some will return, but the ten tribes will stay with the Gentiles. Then will come a day of reckoning under evil kings (the Seleucids); certain of the priests will turn to strange gods (the Hellenizing high priests, Jason and Menelaus). Strangely enough, there is no mention here of the Maccabees; but their successors, evil priest-kings (the Hasmoneans), are predicted, along with their successor, an arrogant king who is not a priest (Herod). His reign of thirty-four years will be longer than that of any of his sons. Next, a mighty king from the West will conquer them, burn part of the temple, and crucify some (Varus, governor of Syria, who quelled a revolt in 4 B.C.).

From here on, the identification of persons and events is quite uncertain; apparently the writer has begun to predict (in Moses' name) events beyond his own time. Thus, unidentified impious rulers who claim to be righteous will reign. Then great vengeance and wrath such as have not been on the land before will come upon the Jews (cf. Dan. 12:1), and a king of the kings of the earth will persecute and torture them. A Levite, with the curious name Taxo, will refuse to transgress the laws of God, but will fast with his seven sons, and then will go into a cave to await death. By doing this they may expect to be avenged in the sight of the Lord.

This period of persecution is followed by the only apocalyptic section in the book, a poem of ten stanzas of three lines each. The devil, it is predicted, who is the ruler of this world, will be brought to his end by an angel (Michael), and sorrow will be no more. By implication, he is the cause of the persecution. God himself will intervene directly to avenge his children. There will be great earthquakes; the sun will be darkened; the moon will turn into blood; the courses of the stars will be disturbed; and water will disappear from the sea and the rivers. God will also destroy the idols of the Gentiles. Israel will then mount upon the wings and neck of the eagle (i.e., Rome). Next, God will exalt Israel to the heaven where he himself dwells, and Israel will look down on her adversaries on earth (Gehenna?) and rejoice.

All this, Joshua is told, will be consummated 1,750 years (250 weeks of years) after Moses' death (*ca.* A.D. 75-107). Joshua is grieved upon hearing these predictions, but Moses assures him that all will be worked out according to God's providence. (The text breaks off in the middle of a sentence.)

2. Special problems. ***a. Text.*** The Latin text is both incomplete and corrupt; the translators have depended upon a number of emendations. The conclusion, as we have seen, is missing. The Latin is from a Greek text, which in turn is probably based upon a Hebrew (or Aramaic) original. No text, except fragments, of the Ascension mentioned by Origen has survived.

b. Date. If the work was a source for II Baruch, then its date is no later than the end of the first century A.D. This is supported by the calculation that the consummation would occur 1,750 years after the death of Moses, or *ca.* 75-107. However, earlier limits than this may be set. It was predicted that Herod's reign of 34 years would be longer than that of any of his sons. This is actually in error; Archelaus, it is true, had a short rule, being deposed in A.D. 6; but Philip reigned 37 years and Antipas 43. Apparently the work was composed before the reigns of his sons exceeded that of Herod's, or before A.D. 30. If so, it was written during Jesus' lifetime.

c. Author. The author was quite likely a Palestinian Jew, loyal to God, to Israel, to the temple, to the law (written rather than oral), and to the memory of Moses, his great hero. There is no evidence that he was a Sadducee; unlike the Zealots, although he hated Roman rule, he did not advocate revolt; his interest in the temple is enough to preclude his having been an Essene. He has been termed a "quietistic" Pharisee, but his apocalypticism seems to indicate that he was not a Pharisee. In other words, he was an apocalyptic Jew who may have had no affiliation with any formal group.

d. Taxo. The mysteriously unique name Taxo has been considered by some to be a cipher. It has been resolved to Eleazar, a martyr of the Maccabean period; and to Mattathias, the father of the Maccabees and progenitor of the Hasmoneans. According to one suggestion, Taxo was some contemporary of the author's who cannot be identified. Could it be, however, that Taxo is symbolic, that he and his sons typify the faithful, loyal Jews who will endure with patience the persecutions that are to precede the coming of the end of this age? If this is so, then Charles's theory that the Taxo section (chs. 8–9) reflects the Maccabean period and should be placed just before the mention of the Hasmoneans in ch. 6 is unnecessary.

e. Moses. Moses was ordained from the foundation of the world to be the mediator of the covenant for Israel, God's chosen people, for whom the world was created. As a prophet he knows the future without having it revealed to him by an angel or through a trip to heaven. No place will be suitable for his burial; all the world will be his sepulchre.

f. Eschatology. The apocalyptic hope is evidently based on Dan. 12:1 ff. There will be a time of vengeance such as the world has never seen. There is no Messiah; instead, an angel (Michael) will overthrow the devil (possibly identified with Antiochus in 8:1?), and God will punish the Gentiles. As in Daniel, the righteous will enjoy an astral immortality (their future home is not to be on earth), and the wicked persecutors will dwell in Gehenna.

M. Rist

MOSOLLAM, MOSOLLAMON. KJV Apoc. forms of Meshullam.

MOST HIGH. The usual translation of the Hebrew name Elyon (עליון, "the Exalted One"), an ancient West Semitic name for El (God), the heavenly father of the gods. The name was appropriated by Israel and redefined according to the Yahweh faith (Pss. 21:7—H 21:8; 46:4—H 46:5; 47:2—H 47:3; 91:1; etc.). It appears in Greek in the NT as ὕψιστος (e.g., Acts 7:48). *See* God, Names of, § C2*b*. B. W. Anderson

MOST HOLY PLACE [קדש קדשים, קדש הקדשים, holy of holies]. A phrase designating, first, the innermost room of the tabernacle (Exod. 26:34). It was partitioned from the rest of the tabernacle by a veil, bearing the figures of cherubim. Inside was the ark of testimony (*see* Ark of the Covenant), on which was the Mercy Seat. According to priestly law, in this room the high priest made yearly atonement for the people (Lev. 16). *See* Atonement; Atonement, Day of; Tabernacle.

The phrase "most holy place" is applied also to the innermost room of the Jerusalem temple, sometimes called "Debir." The room was a cube of twenty cubits (*ca.* thirty feet) in each dimension (I Kings 6:16), and it contained two olivewood cherubim whose wings reached from wall to wall. At the dedication of the temple the ark of the covenant was brought into the most holy place (I Kings 8:6; II Chr. 5:7) through doors of olivewood, later apparently replaced by curtains (*see* Veil of the Temple). In Hebrews, the inner shrine, sometimes called the "Holy Place," is a symbol of the redemption wrought by Christ (cf. Heb. 9:11-28; 10:19-20).

The place where Aaronic priests were to eat the offerings reserved from the fire was also called a most holy place (Num. 18:10), as was the portion of land to be allotted for residence to the Zadokite priests (Ezek. 48:12). The "most holy place" in Dan. 9:24 is ambiguous; the reference to an "anointed one" in vs. 25 may mean that קדש קדשים should be read "most holy one" (KJV "Most Holy"). E. M. Good

MOTE. KJV translation of κάρφος (RSV Speck) in Matt. 7:3-5; Luke 6:41-42. "Mote," which formerly had the meaning "straw," appeared in Wyclif's Version, based on the Vulg. *festuca,* "straw" or "twig."

MOTH [עש, consumer, waster; Akkad. *ašašu,* fish moth, *uššu,* grief; Arab. *'uth,* to be thin, weak; Syr. *'ša';* Ethio. *'eṣē;* σής]. The clothes moth, an insect (order Lepidoptera), whose Palestinian representative is *Tineola biselliella.* Eggs are laid in wool or furs, upon which the larvae then feed, often causing irreparable damage. This destructive quality is referred to in Ps. 39:11—H 39:12; Isa. 50:9; 51:8; Hos. 5:12; Matt. 6:19-20; Luke 12:33. Job 4:19; 27:18 (RSV "spider's web," with LXX, Syr.) compare the moth or his house to the inadequacy or frailty of man. Job 13:28 compares ungodly man, and Jas. 5:2 (σητόβρωτος) compares riches, to worthless, "moth-eaten" garments.

MOTHER. *See* FAMILY; WOMAN.

MOTHER-IN-LAW. *See* FAMILY.

MOTHER-OF-PEARL [דר; Arab. *dur*]; KJV WHITE. Part of the material in the mosaic pavement at Susa (Esth. 1:6).

MOUND, SIEGE [סללה; χάραξ]. A temporary structure built outside the wall or rampart of a city or fortress in order to lay siege to it. The siege mound (סללה) is mentioned with דיק ("siege wall" in Ezek. 4:2; 17:17; "siege tower" in 21:22), but the difference between them is not clear (*see* WAR, METHODS OF, § 8). Upon the siege mound a siege tower would be erected, or a siege engine would be driven from which to hurl arrows and stones and attack the ramparts or scale the wall.

Joab used siege mounds to beleaguer the little town of Abel of Beth-maacah, in which Sheba the son of Bichri, who had rebelled against David, had taken refuge (II Sam. 20:15). It is said that Sennacherib had to withdraw from Jerusalem before he had built a siege mound against it (II Kings 19:32; Isa. 37:33).

Both Jeremiah (6:6) and Ezekiel (4:2; 17:17; 21:22—H 21:27) speak threateningly of the siege mounds with which the Babylonians will besiege Jerusalem (cf. Isa. 29:3). Jesus, too, prophetically warns Jerusalem of the siege mound ("bank"; KJV "trench") which will be cast up against her by invading armies (Luke 19:43). J. A. SANDERS

***MOUNT, MOUNTAIN.** The translation of several words used in the Bible. *See also* HILL, HILL COUNTRY; MOUND (SIEGE) § 2.

The usual words translated "mountain" are הר (Gen. 12:8; 14:10; Exod. 19:3; Josh. 15:8; Judg. 5:5; Isa. 2:2) and ὄρος (Matt. 4:8; Mark 5:5; I Cor. 13:2). Where context and geographical data make such translations appropriate, the RSV renders הר as "Mount" (Lev. 7:38; Deut. 27:4); rarely, "mount" (II Kings 23:16; Isa. 16:1), "mountain" (I Sam. 17:3; I Kings 11:7), "hill" (Judg. 16:3; II Kings 1:9), and "hill country" (I Kings 12:25; II Chr. 19:4). The KJV usually renders הר as "mount" or "mountain," but occasionally "hill" (Judg. 16:3; I Kings 11:7).

Other words for "mount" or "mountain" are: הרר, usually plural (Gen. 14:6; Num. 23:7; Deut. 33:15); מצב (Isa. 29:3; KJV "mount"; RSV correctly "towers"); סללה (Jer. 6:6 [KJV "mount"; RSV correctly "siege mound"]; Ezek. 4:2 [KJV "mount"; RSV "mound"]); Aramaic טור, טורא (Dan. 2:35, 45).

The mountains or hills of Bible lands include two "ridges," one W of the Jordan Rift, composing the elevated terrain in Galilee, Samaria, and Judah; the other E of the Jordan, extending from Mount Hermon through Gilead, Ammon, Moab, and Edom. In comparison with mountains in Europe and America, these are not high, although their proximity to the Mediterranean Sea and the Dead Sea (*ca.* 1,300 feet below sea level) adds to their impressive appearance. The following figures in feet indicate elevations of famous mounts: EBAL, 3,084; GERIZIM, 2,890; GILBOA, 1,630; HERMON, 9,230; NEBO, 2,630; TABOR, 1,930; SINAI (Jebel Musa), 7,500. Other biblical mountains include the mountains of ABARIM, the mountains of ARARAT, and the following mounts: CARMEL; EPHRON; HALAK; HOR; JEARIM; MORIAH; OLIVES; Perazim (*see* BAAL-PERAZIM); SEIR; SHEPHER; ZALMON; ZEMARAIM; ZION. The highest peak in Cisjordan is Jebel Jermaq (3,973 feet). For the geologic formation of the mountains in Palestine, *see* PALESTINE, GEOLOGY OF. For topographical aspects, *see* PALESTINE, GEOGRAPHY OF.

Mountains are mentioned as places of worship (Exod. 19:20; Deut. 12:2); part of God's creation (Ps. 104:8); features of geographical boundaries (Josh. 15:8); places of ambush (Judg. 9:25); scenes of military combat (I Sam. 23:26); the habitat of goats (Ps. 104:18) and birds (I Sam. 26:20; Ps. 11:1—H 11:2); places of refuge (Judg. 6:2) and spiritual retreat (I Kings 19:8). Mountains are often mentioned figuratively in referring to stability (Ps. 30:7—H 30:8), obstacles (Zech. 4:7; Matt. 17:20), and God's power over nature (Ps. 97:5). W. L. REED

MOUNT OF ASSEMBLY [הר מועד]; KJV MOUNT OF THE CONGREGATION. In a mythological description (Isa. 14:12-15) Babylon is likened to the ill-fated DAY STAR (הילל), son of DAWN (שחר), who attempted to scale the heights of heaven and "sit on the mount of assembly [of the gods] in the far north" (cf. Ps. 82; Ezek. 28:11-19).

See also SHAHAR; MYTH. C. R. NORTH

MOUNT OF CONGREGATION. *See* MOUNT OF ASSEMBLY.

MOUNT OF OLIVES. *See* OLIVES, MOUNT OF.

MOUNTAIN-SHEEP [זמר] (Deut. 14:5); KJV CHAMOIS. The זמר (*zemer*) cannot be identified (cf. LXX καμηλοπάρδαλις, "giraffe"). It can only be described as a reasonable supposition that the animal is a species of wild sheep. Wild sheep are still known in the Mediterranean area (*Ovis musimon* of Corsica and Sardinia; *Ovis orientalis* of Armenia and Persia; *Ammotragus lervia* of North Africa), and it is probable that they were found in or near biblical Palestine. *See* CHAMOIS. W. S. MCCULLOUGH

MOURNING. Lamentation and other funerary rites were as imperative a duty as burial, and their absence was considered a grave misfortune (I Kings 14:13; Job 27:15; Jer. 16:4, 6; 22:18; 25:33; 34:5). All who were affected by mourning participated in the lamenting (I Sam. 25:1; 28:3; II Sam. 1:12; 3:31; I Kings 13:29-30; Jer. 16:5; 22:18), first of all the members of the family (Gen. 23:2; 50:10; II Sam. 11:26; Ezek. 24:16). The Hebrew term for this act is ספד, whose original meaning, kept in Syriac, evokes the gesture of striking oneself. The substantive מספד means a shrill cry or wail, as is apparent from the association of ספד with הילל (Jer. 4:8; 49:3; Joel 1:13; Mic. 1:8). To this cry were added exclamations of grief: הו or הוי (Amos 5:16); more commonly, הוי אחי, הוי אחות—i.e., "Ah! my brother," "Ah! my sister" (cf. I Kings 13:30; Jer. 22:18); הוי אדון, when the lamenting was for a king (Jer. 22:18; 34:5). These laments were not left to the inspiration of grief, but were determined by ritual. In describing a מספד for a god who dies and comes to life again, the prophet

Zechariah insists on the orderliness which must govern ceremonies of this kind (12:11-14). Likewise tears were to be shed ritually and only at the proper moment (Mal. 2:13; Matt. 11:17; Luke 7:32). Lamentation began immediately following death (Gen. 23:2), in the very presence of the corpse, as the NT still shows (Matt. 9:23; Mark 5:38). It was continued on the way to the tomb and around the tomb itself, but did not end with burial. In general, mourning lasted seven days (Gen. 50:10; I Sam. 31:13; I Chr. 10:12; Jth. 16:24; Ecclus. 22:12). For Moses and Aaron it lasted thirty days (Num. 20:29; Deut. 34:8), and for Jacob seventy days, according to the Egyptian custom (Gen. 50:3). On account of the stability of funeral customs, it is possible to supplement biblical information by studying the funeral lament as it is practiced in the Orient today. Dalman, Kahle, Littmann, Musil, Wetzstein, Jahnow, and Cramer have collected important documentation which may be consulted with profit (*see bibliography*).

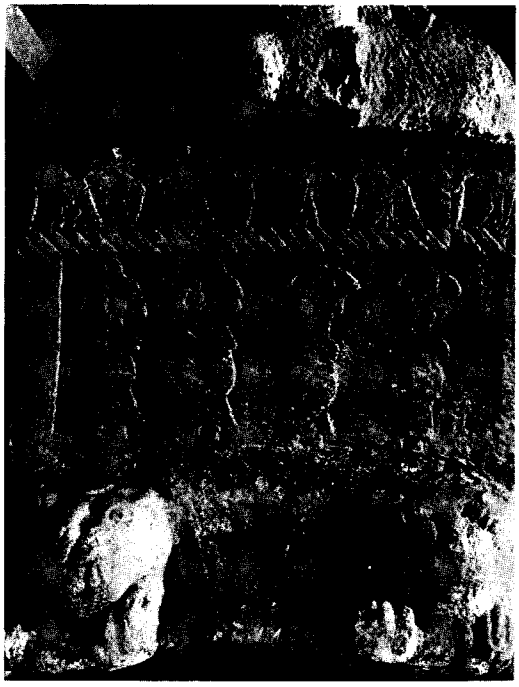
71. Women and girls mourning for the deceased; from a tomb at Thebes (fourteenth century B.C.)



Courtesy of James B. Pritchard

72. Four women mourners on the sarcophagus of King Ahiram of Byblos (tenth century B.C.)

The predominance of the ritual aspect over the psychological led to giving a very important place to professional mourners (II Chr. 35:25; Eccl. 12:5; Jer. 9:17 ff—H 9:16 ff; Ezek. 27:32; Amos 5:16). Women had the chief role. They are called שרות, "singing women" (II Chr. 35:25); מקוננות, "mourning women" (Jer. 9:17—H 9:16); and also חכמות, "cunning women" (Jer. 9:17 KJV—H 9:16). This suggests that not only was a certain technique expected of them, but also more or less magical knowledge and gifts, the secrets of which were handed down from generation to generation (Jer. 9:20—H 9:19). The predominance of women may be explained by their greater emotivity and sensitivity. Professional mourners were paid, and frequently showed themselves very jealous of their prerogatives (cf. Matt. 9:24). Figs. MOU 71-72.

These mourners not only uttered cries, but also composed poems, whose length was proportionate to the importance of the dead person. The OT has preserved several funeral elegies, sung for the dead or for persons or groups considered as such. Among the former may be cited the elegies of David for Saul and Jonathan (II Sam. 1:18-27) and for Abner (II Sam. 3:33-34). The lamentations of Jeremiah and the satirical laments for Babylon, Tyre, and Egypt may be mentioned as examples of the latter type (Isa. 14:4-21; Ezek. 27:2 ff; 32:2-16). Except for the great part of irony in the prophetic elegies for foreign peoples, all these compositions follow a similar scheme in both content and form. Taking as an example the elegy of David for Saul and Jonathan (the depth and expressiveness of which could hardly have been equaled in ordinary compositions), we may distinguish three essential themes in the lament:

a) The main theme is the eulogy of the dead. This eulogy generally exceeds historical truth: the dead person is always handsome, strong, and good; his family origins are stressed (Ezek. 19:2, 10), as is his valor in war (II Sam. 1:27; Ezek. 32:27); and his human value is unique and incomparable (II Sam. 1:19; Isa. 14:10; Ezek. 27:32). It is important that the name of the dead be uttered (II Sam. 1:26; 3:33—H 3:34; Ezek. 19:2 ff; 26:17 ff; 27:3 ff; 28:12 ff; 32:2 ff).

b) The second theme is the lament, generally introduced by the words איך or איכה—"how?" or "what?"—suitable for bringing into relief the tragic aspect of the demise. The lament is particularly passionate in cases of violent death, and it is often transformed into a demand for vengeance or a curse upon the enemy (II Sam. 1:21—H 1:22). The rejoicing that the particular death may have caused is stigmatized (II Sam. 1:20—H 1:29; Lam. 1:3, 7, 21; 2:15 ff). Past splendor and prosperity are contrasted with present misery, e.g., in Lam. 1 and in the images of the fallen star (Isa. 14:12), the captive lion (Ezek. 19:8), and the felled cedar (Ezek. 31:10). The dreariness of existence in Sheol is frequently contrasted with life on earth.

c) The third theme is consolation. The good memory left by the dead person, the posterity that will perpetuate his name, and the fact that the

funeral duties have been correctly performed attenuate the sorrow of those who remain behind.

The lament for Judas Maccabee, in re-employing the terms of the lamentation for Saul and Jonathan, furnishes proof of the stability of the form (I Macc. 9:21).

The elegy—in Hebrew, קינה, a word which probably means an artful composition—employs a verse whose second part is always shorter than the first. This limping rhythm is not restricted to the elegy (e.g., Ps. 136; Isa. 1:10 ff; 40:9 ff; Jonah 2:3 ff; and even the Song of Songs), but if it is not exclusively used for the funeral lament, it nonetheless expresses better than other rhythms the feelings of sadness and despair. It is interesting to note the occurrence of the same rhythm in Ugaritic in a passage where the god El laments the death of Baal:

> Dead is Alyin Baal,
> Perished is the Prince, Lord of Earth
> (Gordon, p. 42; *ANET* 140).

Certain indications seem to point to a dialogue form of the lament. The recurrent refrain is taken up by the choir—e.g.: "How are the mighty fallen!" (II Sam. 1:19, 25, 27); "Go down, and be laid with the uncircumcised" (Ezek. 32:19 ff); "Alas! alas! thou great city" (Rev. 18:10 ff). One may also recall the words of Jesus: "We wailed, and you did not mourn" (Matt. 11:17).

The lament was accompanied by musical instruments. The flute was the preferred instrument of mourning because of the succession of high and deep tones (Jer. 48:36). It is true that the same instrument is also used in happy circumstances (I Kings 1: 40; Isa. 5:12; 30:29). Josephus speaks of the flute players at a time of mourning (War III.ix.5), and the Mishna specifies that even for the poorest burial there must be at least two flutes and a wailing woman (Keth. IV.4), which seems to conform to the usage described in the NT (Matt. 9:23).

Both the מספד and the קינה were entirely profane; God's name was never pronounced, not even at a time when a relationship between death and the cult of Yahweh was acknowledged (cf. II Sam. 1:14 ff with II Sam. 1:19 ff; and II Sam. 3:28, 39, with II Sam. 3:33 ff). It must not be concluded from this that the dead man was deified. The lamentation for the gods, which was an important element of the fertility cults (cf. Judg. 11:30-40), bears only a formal analogy with the rites of mourning. The dead person was only a human being whose life had value purely in terms of the way it had been lived and not in terms of what it was destined to become. The advent of more positive beliefs in an afterlife was to give a new orientation to the lament, diminishing its importance considerably.

E. JACOB

MOUSE [עכבר; *cf.* Jewish Aram. עכברא; Syr. *'ûqbrâ*]. Any one of a large number of rodents of the family Muridae. The true mice and rats belong to the genus Mus, the mice being the smaller.

In Lev. 11:29 the mouse is stated to be unclean, עכבר probably being a general term to cover all varieties of rats, mice, and related animals; Tristram identified no fewer than twenty-three members of this group in nineteenth-century Palestine (*NHB* 122).

Isa. 66:17 seemingly refers to a non-Yahwistic cultic practice in which mice were eaten. The rodent in question may have been the jerboa, the common hamster, the dormouse, or the large sand rat, the flesh of all of which is edible (cf. *NHB* 122). Maimonides preserves the tradition that the Harranians sacrificed field mice.

The reference in I Sam. 6:5 to "mice that ravage the land" (cf. vss. 4, 11, 18) may point to a local variety of vole (*microtus*), a rodent which when numerous can cause great havoc to agriculture. Whether, as is sometimes assumed, the vole in this case was also the carrier of an epidemic disease (I Sam. 5:6, 9, 11-12; 6:3-4) is problematical.

MOUTH [פה; Assyrian *pû;* Aram. פם; חך *in* Job 20: 13; Prov. 8:7; *etc.;* στόμα]. The word is used extensively and with the following principal connotations in the OT and the NT:

a) The organ of eating and drinking (Judg. 7:6; I Sam. 14:26-27). Figuratively, that which finds things sweet (Job 20:12; Ps. 119:103); the mouth of the earth, which swallows up (Gen. 4:11; Num. 16: 30, 32); and Sheol (Isa. 5:14; cf. Ps. 69:15—H 69:16).

b) An external organ (II Kings 4:34; Prov. 30:20), used for kissing (I Kings 19:18; Job 31:27; Song of S. 1:2) and for mocking (Job 16:10; Ps. 35:21; Isa. 57:4).

c) Much more often, the organ of speech (Gen. 45: 12; Deut. 32:1; II Sam. 1:16; Matt. 5:2; 12:34; 13:35) and of laughter (Job 8:21; Ps. 126:2), as the mouth of God, which proclaims (Isa. 1:20; 40:5; Jer. 9:12—H 9:11; Matt. 4:4); the mouth of animals which speak (Gen. 8:11; Num. 22:28; Isa. 10:14; Rev. 12: 16; 13:2); and with reference to human foes under the figures of ravenous beasts (Ps. 22:21—H 22:22; Ezek. 34:10).

d) The mouth of God, from which fire comes forth (II Sam. 22:9=Ps. 18:8—H 18:9).

e) The opening or orifice of a well (Gen. 29:2-3, 8, 10), of a cave (Josh. 10:18, 22, 27), of an abyss (Jer. 48:28), of Sheol (Ps. 141:7), of a sack (Gen. 42: 27-28; 44:1-2, 8).

פה is used in combination with various prepositions: אל פי, "according to the measure of," "in accordance with" (Josh. 15:13; 17:4); כפי, "according to the command, or mouth, of," "in proportion to" (Lev. 25:52; Num. 6:21; also as a conjunction in Zech. 2:4; Mal. 2:9); לפי, "according to" or "as" (Gen. 47:12; Exod. 12:4); על פי, "according to the command, or mouth, of," "in accordance with" (Gen. 45:21; Exod. 17:1; Lev. 27:8). H. F. BECK

MOWING [גזז, to shear or cut; גז *usually means* fleece] (Amos 7:1). The reference to the "king's mowings" (גזי המלך) in Amos 7:1 is to the first growth cut as taxes to support the ruler. Cf. the reference to "mown grass" left lying on the ground in Ps. 72:6.

H. N. RICHARDSON

MOZA mō′zə [מוצא]. **1.** A descendant of Judah, born of the concubine of Caleb (I Chr. 2:46).

2. A descendant of Saul; son of Zimri; father of Binea (I Chr. 8:36-37; 9:42-43).

MOZAH mō′zə [המצה] (Josh. 18:26). A city in Benjamin, mentioned after Chephirah. Its name is stamped on the handles of vessels excavated at Jericho and Tell en-Nasbeh, showing that it was a royal pottery. After the Great War Against Rome (A.D. 66-73), Vespasian settled eight hundred soldiers there, giving it the name Colonia Emmaus. This is confirmed by the Jerusalem Talmud (Suk. IV.5), which states that Mozah was the place where willows were gathered for the Feast of Sukkoth and that it was the same as Koloniya. The site is at or near the Arab village of Qaluniya, four miles NW of Jerusalem on the road to Tel Aviv. S. COHEN

W slope of Mount Carmel, approximately eleven miles S of the N promontory of the mountain, and two miles from the Mediterranean Sea. Flanking the mouth of the valley are two limestone bluffs; in the S one are four caves, Mugharet el-Wad ("cave of the valley"), Mugharet ej-Jamal ("cave of the camel"), et-Tabun ("the oven"), and Mugharet es-Skhul ("cave of the kids"; Fig. MUG 74). From 1929-34, these caves were excavated by Dorothy A. E. Garrod and Theodore D. McCown for the British School of Archaeology in Jerusalem and the American School of Prehistoric Research. With the exception of Mugharet ej-Jamal, which was practically empty, each cave contained the stratified remains of several Stone Age cultures. Fig. MUG 75.

These excavations firmly established the Stone Age chronology of Palestine through the discovery of a long and apparently continuous series of flint industries* from Tayacian (Early Paleolithic) to Natufian (Mesolithic). With this sequence of cultures, it was possible to relate the previously known isolated Stone Age deposits of Palestine, and to make detailed comparisons between the Stone Age cultures of Palestine and those of Europe and Africa. Important light was also shed on the development of early man. In Mugharet es-Skhul—in an early Levalloiso-Mousterian deposit—a number of skeletons were found which show characteristics of both paleanthropic man (*Homo neanderthalensis*) and neanthropic man (*Homo sapiens*), suggesting that a mixture of these races took place in Palestine (Fig. MUG 76). In addition, much was learned about the characteristic fauna of the different periods from the bones found in the cave deposits. The study of the

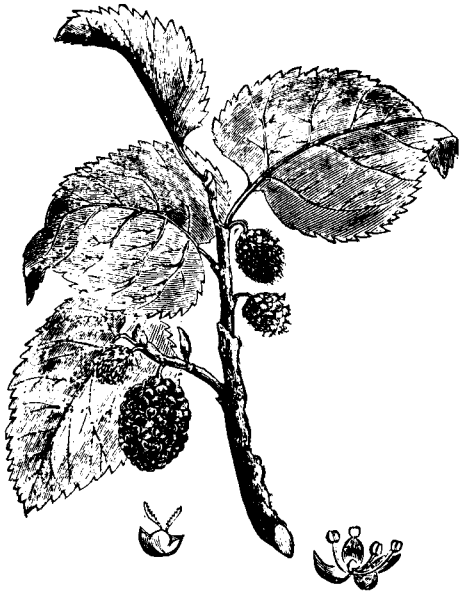
MULBERRY TREES. The KJV translates בכא (*bākhâ*) "mulberry" in II Sam. 5:23-24; I Chr. 14:14-15 (RSV BALSAM). Reference to the fruit of the mulberry (*Morus nigra* L.) is found in I Macc. 6:34 (μόρον), where the blood-red juice was used to incite the elephants of Antiochus' army during the battles against the Maccabees. In Luke 17:6, Jesus refers to this tree, here called συκάμινος (*see* SYCAMINE), in a parable concerning faith.

The black (or red) mulberry, *Morus nigra* L., is common in Palestine, and its juicy fruit is highly prized. The white mulberry (*Morus alba* L.), so necessary for the silkworm industry of the Orient, was apparently not introduced into Palestine until postbiblical times.



77. Mulberry

MULE [פרד, פרדה, *possibly* separated one; KJV רכש (Esth. 8:10, 14; RSV "swift horse"), ימם (Gen. 36:24; RSV "hot springs"; "adder" *in* L. Koehler, *Lexicon*)]. A quadruped, the hybrid offspring of an ass and a horse, properly of a male ass and a mare; the product of a she-ass and a stallion is a hinny.

Mules first appear in the OT only in the time of David (II Sam. 13:29), the reason doubtless being the comparative rarity of the horse among the Hebrews and their neighbors prior to 1000 B.C. Since the law against the crossbreeding of animals (Lev. 19:19) was generally observed, any mules the Hebrews possessed must have been obtained from Gentiles. Tyre imported horses and mules from Beth-togarmah (possibly in Armenia or N Syria), and Phoenicia may therefore have been one of the sources of the mules used in Israel (Ezek. 27:14). On later Jewish conventions regarding mules, see M. Kil. 1.6; 8.4-5.

78. Mules used in threshing grain, from Saqqarah tomb, Old Kingdom (3200-2475 B.C.)

Mules, controlled by bit and bridle (Ps. 32:9), are first mentioned as riding animals, but all the references indicate that they were used as such principally by the court and the aristocracy (II Sam. 13:29; 18:9; I Kings 10:25; 18:5). They were also employed as burden-bearers (II Kings 5:17; I Chr. 12:40; cf. Jos. Life XXVI.26 [127]). In the animal resources of the post-exilic Judean community, recorded in Ezra 2:66-67, the number of mules is given as 245; the horses, camels, and asses were much more numerous.

MUPPIM mŭp'ĭm [מפים; LXX Μαμφιν] (Gen. 46:21). Son of Benjamin. Elsewhere the name exhibits different forms. *See* SHEPHUPHAM.

MURATORIAN FRAGMENT myŏŏr'ə tôr'ĭ ən. A fragment of a corrupt Latin MS, named for its discoverer, L. A. Muratori (in 1740), and comprising the greater part of a list of the Christian writings accepted as canonical by someone probably at Rome near the end of the second century. The document has great importance in the history of the NT canon. *See* CANON OF THE NT. J. KNOX

MURDER. *See* CRIMES AND PUNISHMENTS § C2*a*.

MURMUR [לון לין, רגן; γογγύζω (GRUMBLE *in* Matt. 20:11; I Cor. 10:10), διαγογγύζω]; MURMURING [תלנות; γογγυσμός]. To express dissatisfaction or anger by subdued, often inarticulate, and always resentful complaint.

MURRAIN mûr'ĭn. KJV translation of דבר (Exod. 9:3; LXX θάνατος; RSV PLAGUE), referring to an infectious disease affecting animals.

MUSHI mōō'shī [מושי, משי]; MUSHITES —shīts. One of four or five families of Levite priests located around Hebron sometime between Deborah and David (Num. 26:58*a*, an ancient genealogy, possibly redacted by the addition of "Mahlites" and rearrangement). In P and Chronicles, Mushi was the second son of Merari and the eponym of one of the two divisions of Levites descended from Merari (Exod. 6:19; Num. 3:20, 33; I Chr. 6:19, 47; 23:21, 23; 24:26, 30).

***MUSIC.** The concept of art as a de luxe commodity of life, a concept of our time, was utterly alien to the ancient world. Then music was an organic part of daily life, linked with a thousand bonds to all human concerns, from birth to death. All the biblical references to music must be understood from this perspective. Moreover, as the narrative portions of the OT cover a long span of history, it is but natural that music, its forms, and its functions have undergone significant changes in the course of these many centuries.

A. ***THE EVIDENCE.*** **1. General usage and function of music.** As in most cultures, the first biblical reference links music with a mythical personage, "Jubal, who was the father of all those who play the lyre and pipe" (Gen. 4:21). The name is related to the Hebrew word for "ram" (*yôbhēl*). Jubal's brother was Jabal, the first cattle-breeder; his half brother Tubal-cain, the first smith; his half sister Na'amah, whose name signifies beauty. The parallel with Aphrodite, Hephaestos, and Dionysos, has been recognized early.

The main functions of music in the early times of biblical history were social merrymaking, martial noisemaking, magic incantation, and worship. Merrymaking in particular was the main function of music during the age of patriarchs and judges (e.g., Gen. 31:27; Exod. 32:17-18; Judg. 11:34-35), sometimes even licentiously practiced (e.g., Isa. 23:16).

Often the music barely exceeded the level of organized noisemaking, especially when the purpose was to terrorize the enemy, as in Exod. 32:17-18; Judg. 7:18-20. Other manifestations of functional music are the mocking song (Job 30:9) and the "working songs" of harvesters (Isa. 16:10; Jer. 48:33) or of well-diggers (Num. 21:17). All this, however, alludes to distinctly popular, nonartistic singing and playing; no professionals are as yet mentioned. When Amos (6:5) caustically chastised the *nouveaux riches* and their "artistic" extravagances, he stressed for the first time the age-old feud between the professional and the dilettante (orig. tr.):

> They chant idle songs to the sound of the harp
> And fancy to play their instruments like David.

Indeed, not before David's time do professional musicians appear in the Bible. From where did they come? Considering the apparent connection of professional musicians with the institution of monarchy, we must bear in mind that in the neighboring countries, Egypt and Assyria, the professional musician was an old and familiar figure. It seems that the midrash alludes to an ancient tradition when it relates that King Solomon's Egyptian wife, daughter of the Pharaoh, carried in her dowry a thousand foreign instruments. Yet an instrument is of no use without a musician able to play it. Hence, we may assume that the systematic import and subsequent training of professional musicians took place in the era of David and Solomon.

Before the establishment of the kingdom under Saul, it was the women who, as in every young civilization, played a major part in the performance of music. Such figures as Miriam, Deborah, Jephthah's daughter, and the women hailing the young hero David (I Sam. 18:6-7) have become almost archetypes of female musicians. Characteristic of all these cases is the familiar picture of a female chorus, dancing and singing, accompanied by frenzied drum-beating. This is a scene known to the entire Near East, and not even the severe rule of Islam could wholly suppress this age-old practice. Remnants of these choruses of dancing women are still extant in isolated Jewish communities, such as Yemen on the island of Djerba, of whose chants we possess a penetrating study by Robert Lachmann (*see bibliography*): "The women's songs have preserved, to some extent, the qualities of uninfluenced chant: they belong to the group of tunes directed by

motoric impulse (as in dance or occupational songs). . . . In the isolated Jewish communities of the Near East the women accompany their songs on frame-drums or cymbals which they beat with their hands." These observations read as if they expounded the women's songs of biblical times. But no, they refer to present-day conditions in North Africa and Arabia.

With the emergence of professional musicians, active in the temple and the royal courts, the women's songs dwindled to insignificance. Henceforth, trained singers and instrumentalists were considered functionaries of high rank. This development is certainly connected with the religious and secular centralization of Israel in Jerusalem in the years 950-850 B.C. The tabulation in Table 1 will illustrate this.

three or four levels in the OT: in the frenzied songs of the professional prophets (I Sam. 10:5-6); in the early numinous ordinances of the P Code in Leviticus and Numbers, and, eventually, in the organized songs, chants, and psalms of the temple and of the professional Levitic musicians. The OT retains vestiges of the magic use of music, which antedates most of the biblical narratives by many centuries. The collapse of Jericho's wall, after the ritual sounding of the ram's horns, is mythologically akin to the Greek legend of Amphion of Thebes, whose lyre-playing moved the stones to rebuild the broken wall (cf. Homer *Odyssey* XI.260 ff). Basically apotropaic functions accounted for the bells on the robe of the high priest (Exod. 28:34-35), and also for the *shôphār* and trumpet blowing at the time of the New Moon

Table 1

Function	Scriptural Passage
Family parties	Gen. 31:27 (farewell party for Jacob) Luke 15:25 (home-coming party for prodigal son)
Acclamation of heroes	Judg. 11:34 (welcome of Jephthah) I Sam. 18:6 (triumph of David)
King's enthronement and martial music	Judg. 7:18-20 I Kings 1:39-40 II Kings 11:14 II Chr. 13:14 II Chr. 20:28
Harem and court music	II Sam. 19:35 (Barzillai's refusal of David's invitation: "Can I still listen to the voice of singing men and singing women?" Josephus adds here "which delights those who live with kings" [Antiq. VII.xi.4]) Eccl. 2:8 (as if said by Solomon: "I got singers, both men and women, and many concubines, man's delight")
Banquet and feast	Isa. 5:12 Isa. 24:8-9
Occupational songs	Num. 21:17 Judg. 9:27 Isa. 16:10 Jer. 31:4-5, 7; 48:33
Dirges and laments	II Sam. 1:17-18 II Chr. 35:25 Matt. 9:23 The customary wailing women
Magic-apotropaic incantations, etc.	Exod. 28:35 Josh. 6:4-20 I Sam. 16:6 ff II Kings 3:15

2. Music in worship. There is but one step from a musical incantation to religious music. In the Bible, apotropaic practices are perfectly compatible with monotheistic worship. Thus, cultic music appears on and similar occasions. To the same concept belongs the story of David's soothing Saul with music (I Sam. 16:16-23). This anecdote and that of Elisha's prophetic inspiration restored by minstrelsy (II Kings

3:15) reveal the importance of the "ethos doctrine" of music, a conception common to all nations of the ancient world, even though its systematic formulation was achieved by the Pythagoreans.

It is difficult to ascertain when liturgical music became a regular institution in Israel; for the report of II Chr. 7, which credits King David with the organization of temple music, was written many centuries after David. The earlier historical accounts, especially in II Samuel, do not mention organized temple music. There, David appears as a talented singer, player, and composer. The famous passages II Sam. 6:14-15, where "David danced before the LORD with all his might," bear little resemblance to the stately ceremony reported at the same occasion in I Chr. 15.

It is important to bear in mind that all music of the temple, regardless of the period, was nothing but an accessory to its sacrificial ritual. Without sacrifice the music loses its *raison d'être*. What was the inherent connection between the sacrifice and its accompanying music? This is still an unsolved puzzle. It is possible to compare a banquet for honored guests, whereby quantities of burned meat, incense, and music were offered, to a sacred meal for a still anthropomorphically conceived deity, whose prestige demanded sacrifice, incense, praise, as well as musical entertainment. Whatever the original function of sacrificial music, it was forbidden immediately after the destruction of the temple in A.D. 70. Nor do we know all the details of the temple's musical practice. This lack of continuous information is not a simple consequence of Jerusalem's destruction by the Roman legions, for the Jewish tradition has in most other points survived that disaster intact. There is ample reason to believe that the Levites refused to divulge their "trade secrets" and took them to their graves.

3. Extrabiblical sources. The music of the temple has been a subject of fascination to many authors, to whom it became almost a romantic image. It was considered an unattainable aim to create music that could match it in grandeur. The Jews consider themselves a particularly musical people, as we learn from their literature. Indeed, there is external evidence to affirm this strange belief. An Assyrian bas-relief's inscription praises the victory of King Sennacherib over King Hezekiah and relates the latter's ransom and tribute. It consisted, aside from precious metals, of Judean musicians, male and female. In Ps. 137 we read that the Babylonians demanded from their Hebrew prisoners "songs of Zion." To ask for musicians as tribute and to show interest in the folk music of a vanquished enemy was unusual indeed. During the Hellenistic era, the geographer Strabo praises the singing girls from Palestine as the most musical in the world. Obviously the apocryphal Acts of Thomas speaks of such a maiden: The apostle had just landed in India and was somewhat homesick; "then a piper stood over him and played at his head for a long time: now this piper girl was by race a Hebrew." The testimonies to the temple's musical glories, whether they come from the nostalgic pen of a Josephus or from the poisonously anti-Jewish one of John Chrysostom, say essentially the same as the Wisdom of Solomon (18:9): "Our fathers already led the sacred songs of praise" (orig. tr.).

B. *INTERPRETATION OF MUSICAL REFERENCES.* 1. Terminology. For instruments and their names, *see* MUSICAL INSTRUMENTS.

The enigmatic musical superscriptions which occur mainly at the opening of psalms constitute a real musical terminology, which, however, is almost unintelligible to us. Many of these headings must have been obscure at the time when the LXX was written—i.e., during the existence of the temple. This fact admits two possibilities: either the original meaning of these musical terms was then generally forgotten, or, on account of the continuous tradition of the temple, it was still understood, but as a secret closely guarded by the priestly caste. Naturally, the rabbinical translators of the LXX were not privy to these priestly arcana. As an analogous obscurity prevails in the realm of sacrificial procedure, the second possibility seems more likely.

Close examination of the Hebrew texts reveals three categories of psalm headings:

a) Titles, such as "A Psalm [מזמור, *Mizmôr*] of the Sons of Korah. A Song [שיר]" (Ps. 87), or "A *Maskîl* [משכיל] of Asaph" (Ps. 78). To this group belong the terms *Mizmôr* (from *zimmer*, "to play, sing"); *Maskîl* (from *haskēl*, "to reason, meditate," perhaps "A Meditation"); *Mikhtām* (מכתם; etymology unknown; LXX στηλογραφία, "inscription, engraving"; Pss. 16; 56-60); Song of Ascent or Degrees (שיר המעלות; LXX ᾠδὴ τῶν ἀναβαθμῶν; Vulg. *Cantus graduum; see below*).

b) Remarks concerning a type or kind of performance. To this category belong a group of nouns, usually with a preposition such as "with," "upon," etc. They seem to refer to accompanying instruments, as in Ps. 5: "for the flutes" (נחילות), *'alāmôth* (עלמות), perhaps "flutingly" (cf. ἔλυμος, "small flute or pipe"); others interpret it "in the style of maiden" —e.g., in high tones (cf. עלמה, *'almâ*, "young woman"). The following two terms suggest a musical mode or melodic pattern: *Sheminîth* (שמינית; Pss. 6; 12), which indicates the eighth mode. The older interpretation which connected it with the octave (שמונה, "eight") is untenable, as the division of the octave into eight tones was unknown to the ancient Hebrews. The RSV translation of *neghinôth* (נגינות), "stringed instruments," does not fully cover the significance of the term (Pss. 4; 6; 54-55; 61; 67; 76). This is obvious in Ps. 69:12—H 69:13, where *neghînôth* stands for a song, and a drunkard's song at that! The interpretation "melodic pattern" has been widely accepted. In this sense it is used as a marginal gloss, which later became part of the text, in Hab. 3:19. *'Al mahalath* (etymology obscure, perhaps related to מחלה, "dance, roundel") seems to indicate a choreographic direction in Ps. 88, where it is coupled with *le'annôth*, indicating a responsorial or antiphonal performance by two groups. *Shiggāyôn*, plural *shighyōnôth* (שגיון, from שגה, "to go astray, err"), is used in Ps. 7; Hab. 3:1. Perhaps the interpretation "tumultuous dithyramb" approximates the true meaning; it certainly would suit the form and content of Hab. 3. This chapter indicates also the intimate connection between prophecy, temple service, and music. *Higgayôn* (הגיון, from הגה, "to murmur, meditate, whisper") seems to occur in a twofold meaning: as "meditation, thoughtful reflection,"

in Ps. 19:14, and in a strictly musical sense as in Pss. 9:16—H 9:17; 92:3. There, it seems to indicate the murmuring glissando of the low strings as a kind of accompaniment.

c) Cue words. The majority of psalm headings consist of "cue words," which suggest the *incipits* of songs popular at the times of the psalmists. This practice of setting new words to an old tune (contrafacts) is common to the hymnology of every age.

Thus occur *'al-'ayyéleth hash-sháḥar* ("Hind of the Dawn"; Ps. 22); *'al-tashḥēth* ("Do Not Destroy"; Pss. 57–59; 75); *'al-yônath 'élem rᵉḥōqîm* ("Dove on Far-off Terebinths"; Ps. 56); *'al-mûth-labbēn,* which should probably read *'al-'ᵃlāmôth labbēn* ("Upon Maiden," "To the Son"; Ps. 9); *'al-shōshannîm* ("Upon the Lilies"; Ps. 45); *'al-shûshan 'ēdhûth* ("The Lily of the Testimony"[?]; Ps. 60). All these songs are long forgotten, and their melodies lost forever. Special mention should be made of the "Destroy Not" incipit of Pss. 57–59; 75. It has sometimes been construed as an allusion to the new wine or to a vintage song (on account of Isa. 65:8). Of the four psalms that bear this heading, only one uses wine in its imagery. The content of these psalms, however, suggests that their heading did not at all refer to music, but to a common idea—viz., the curse of the wicked and the plea for salvation. *'Al-hag-gittîth* ("In the Fashion of Gath"[?]; Pss. 8; 81; 84) has no clear meaning, and its etymology is controversial. Some scholars derive it from a word for "wine press" and attribute to these psalms the gay spirit of the wine harvest.

The famous heading *Shîr ham-ma'ᵃlôth* ("Song of Ascent"; LXX ᾠδὴ τῶν ἀναβαθμῶν; Vulg. *cantus graduum;* Pss. 120–34) admits several interpretations. According to the rabbinic (and patristic) explanation, these fifteen psalms were sung by the Levites standing on the fifteen steps between the court of the women and that of the Israelites. The more recent interpretation, "Pilgrimage Song," which alludes to the pilgrims' ascending the high city of Jerusalem at the occasion of the three "pilgrimage festivals," has now been generally accepted. It is interesting to note that the musical term "gradual" stems directly from the rabbinic-patristic translation "Song of Steps," *cantus graduum.*

d) *Selāh* (סלה; LXX διάψαλμα; "interlude"). This is probably a direction for the conductor that now a signal of the cymbals should interrupt the even flow of chant. Probably *Selah* was originally a marginal gloss, which in the course of centuries has crept into the text. It occurs seventy-one times in thirty-nine psalms and in Hab. 3:3, 9, 13. Most expressive is the combination *Higgāyôn Selāh* in Ps. 9:16, indicating the end of the main thought by a soft whispering of strings, followed by a clash of cymbals.

e) *Lam-mᵉnaṣṣēᵃḥ,* "To the choirmaster" (למנצח > √נצח, "to excel, to lead, to conquer," LXX εἰς τὸ τέλος [?]; Aq. τῷ νικοποιῷ; Symm. ἐπινίκιος; Vulg. *victori*). It occurs fifty-five times in Psalms and in Hab. 3:19. It seems to suggest a person's title or office, because in Ps. 39:1 Jeduthun is mentioned as "leader." Yet, the translation "choirmaster" is alien to ancient tradition. The fact that the Thrice-Holy (Isa. 6:3) is called ὕμνος ἐπινίκιος ("triumphal hymn"), following Aq. and Symm., even in the earliest Christian liturgies, seems to suggest either the title "head of musicians" or "master of ceremonies" or else the character of psalms with this heading, which perhaps implies "to the triumphator" or "triumph-maker."

2. Forms and structures. In the surprisingly large Hebrew vocabulary of music, the terms for vocal music outnumber by far the purely instrumental ones. The various forms or types of songs all have designations of their own; thus, the formal structure of chant in biblical times is not as enigmatic to us as some of the psalm headings or references to instrumental performance. All chant was inseparably bound to the word, and the word has remained with us.

A certain distinction is made in the OT between a spontaneous hymn, inspired by a specific occasion, a more or less popular song, and a liturgical composition or chant. The songs of Deborah or of Moses are clearly designated as inspired hymns (שיר). Rabbinic as well as patristic authors have numbered and collected these canticles, and were well aware of their special status. The same holds true of the Psalms (תהלים), which held a preferred position in the liturgy of the temple. Imitations of psalms were widespread and popular, from the apocryphal Odes of Solomon to the Hymns of Thanksgiving in the Dead Sea Scrolls. In comparison with these highly developed and artistic forms, only a few of the popular ditties have come down to us, as profane sprinklings in an otherwise theocratic text (e.g., Lamech's song [Gen. 4:23-24], or the well song [Num. 21:14-18], or the chants of the harvesters).

Of all the songs, it is the Psalms which display most clearly their musical structure. There is ample evidence, both in scriptural and in rabbinical sources, that the art of singing was diligently cultivated, especially in the temple. I Chr. 25 not only relates the initial organization of the temple singers, but uses in its terminology the words "trained in song" (מלמדי־שיר) and "skilful" (מבין). The Talmud even hints that lack of correct singing annulled the value of the sacrifice (B. 'Arak. 11*a*). The musical training of a Levitical singer took at least five years of intensive preparation (B. Hullin 24*a*).

Under such circumstances, all exegetes of scripture, beginning with the church fathers and rabbis, felt obligated to expound and explain every biblical statement, however obscure, which refers to the musical part of the temple's liturgy. As all chant depended upon the relation between word and tone, the textual structure of the Psalms is of eminent importance for all investigations of ancient Hebrew chant.

It may not be amiss to remind the student that the musical structure today called psalmody was certainly not the original practice of psalm-rendering. For it presupposes a strictly systematized rendition, whereby each verse is sung, or recited, according to a rigid formula. Yet the very diversified headings of the psalms seem to preclude a uniform psalmody and with it the assumption that the chant of primitive Christianity was a direct heritage of the temple.

Nonetheless, there are indications or "stage directions" in the text of psalms, which reflect their prac-

tice of performance in the Second Temple. Some of these directions are heeded even today. They are:

a) The formal doxologies at the end of each of the five books of the Psalter, with their responsorial acclamations (41:13—H 41:14; 72:19; 89:52—H 89:53; 106:48; Ps. 150 as a whole).

b) The strophic structure of some psalms—e.g., Ps. 29, where the expression "voice of the LORD" occurs seven times, or Ps. 119 with its eightfold alphabetic stanzas.

c) The frequent appearance of refrains, as in Pss. 118:1-4, 29; 136; also the recurrent acclamations "Blessed" (אשרי) or "Hallelujah."

By far the most unifying feature of the Psalter is its poetic parallelism, which expresses every verse in two "rhymes of thought," be they analogous or antithetical (*see* POETRY, HEBREW). This well-known poetic device suggests a corresponding musical rendition—in fact, a musical dichotomy. This dichotomy may be implemented by responsorial performance or by antiphonal musical parallelism.

Four forms of music, born of the genius of the psalmists, have become the outstanding patterns of synagogal and ecclesiastical chant: (*a*) plain psalmody (e.g., Ps. 46:1); (*b*) response (e.g., Ps. 67:1-2); (*c*) antiphony (e.g., Ps. 103:20-22) rendered as antiphonal song:

Bless Yahweh, O you his angels,
you mighty ones who do his word,
hearkening to the voice of his word!
Bless Yahweh, all his hosts,
his ministers that do his will!
Bless Yahweh, all his works,
in all places of his dominion.
Bless Yahweh, O my soul!

(*d*) litany with refrain (e.g., Ps. 80:2-3, 6-7, 18-19):

Stir up thy might,
and come to save us!
Restore us, O God;
let thy face shine, that we may be saved!
. . . . . .
Thou dost make us the scorn of our neighbors;
and our enemies laugh among themselves.
Restore us, O God of hosts;
let thy face shine, that we may be saved!
. . . . . .
Give us life, and we will call on thy name!
Restore us, O Yahweh, God of hosts!
let thy face shine, that we may be saved!

These closely knit poetic structures were intended for solemn and well-organized musical representation. Both synagogue and church have made full use of these music-inviting forms. The Hymns of Thanksgiving of the Dead Sea Scrolls elaborate on these archetypes, and much of Eastern Christian liturgies consists of paraphrases of such structures.

3. Practice and performance. This is perhaps the most obscure of all the problems which concern the music of the Bible. The concept of nonfunctional art, which the West has taken for granted for the last two hundred years, is alien to the ancient Orient. Even the loftiest psalm, a truly spiritual creation of music or literature, served a more or less definable purpose. The functions of music were: merrymaking, dance, minstrelsy, lament, accompaniment of exalted prophetic utterances, mnemonics, magic, theurgy, working songs, military signals and calls, and, of course, the liturgical chant of the temple and synagogue. Naturally, the musical practices were as different as were the respective functions.

The Bible itself provides us with but scant technical details, and they pertain almost exclusively to religious music. All the other functions, mentioned above, are also to be found in the Bible, but mostly in the form of laws, narratives, or anecdotal incidents (e.g., the concept of the apotropaic power of music in Exod. 28:33; 39:25-26; I Sam. 16:14-23; 19:9). Postbiblical Jewish sources, such as Josephus and the tannaitic descriptions, must be read with caution; they were written after the destruction of the temple, mostly by laymen (not Levites), and naturally glorify the temple music. Apocryphal writings tell us little about the subject of music; and the Hellenistic authors take interest in it only toward the end of the second century A.D., when the relation between Judaism and Christianity intrigued their curiosity. In view of the dearth of documents, the student of ancient music must consider these late sources no less than those of the old Mesopotamian, especially Aramean and Akkadian, cultures.

In the following examination a distinction is made between folk music and that of professional musicians. The former designation refers chiefly to mass-singing, ditties, acclamations, etc.; professional musicians emerged in Israel about the time of David and Solomon. From then on, we have abundant historical evidence of the role which the professional musicians played in the organization of the temple ritual.

a. Popular songs. The biblical literature describes these songs almost invariably as spontaneous outbursts of excited or exalted masses. Granted that the editors of our final text may have smoothed the language and its rhythm, there is no reason to doubt the original spontaneity of such musical transports. Here, the testimonies of neighboring civilizations are of little value, as they concern chiefly the music of courts or temples, which in Sumer, Babylon, and Canaan was then in the hands of professional priest-musicians. We have only a few remarks of Herodotus about Egyptian practices, which were similar to those of ancient Hebrew popular singing. He refers to the "lament for Linos," also to women's chants in processions of the cult of Osiris and the Diana of Bubastis (Hist. II.60;79; also Plutarch *De Iside* 17). In Phoenicia and Syria almost all popular music reflected the worship of Ishtar, the goddess of fertility. Thus, popular song was usually a prelude to sexual orgies in honor of the goddess, led and organized by her thousands of hierodules.

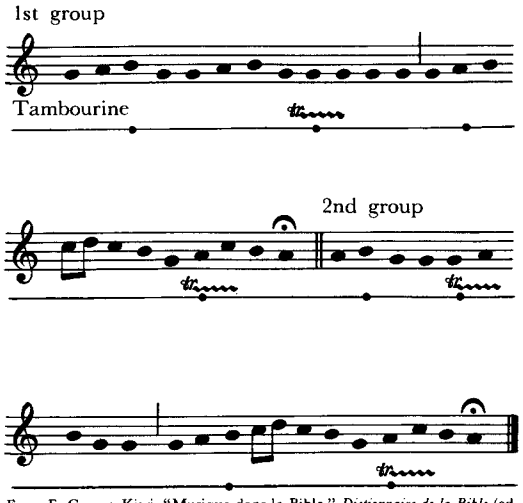
Israel's early popular singing resembled those practices closely in performance but differed radically in its intent. The two lost books "The Wars of the Lord" (ספר מלחמת ה; cf. Num. 21:14) and "The Book of *Yashar*" (ספר הישר; cf. II Sam. 1:18, perhaps even a mistake for ספר השיר) seem to have contained a collection of texts of popular songs. Expressly to the latter book belonged the famous lament of David for Saul and Jonathan. The crucial passage here demands that "it should be taught to the people of Judah" (II Sam. 1:18). The quotation of the "Wars of the Lord" might give us a faint inkling of the kind of singing then in vogue.

There is no doubt that some of the Hebrew texts approximate the metric principle of isosyllabism (equal number of syllables per *stichos*). Accordingly, this system could be imitated in English as follows (Num. 21:14-18 orig. tr.):

Line	Syllables
Wahab which is in Suphah	7
And valleys of Arnon.	6
And descents of its brooks	6
That turn to the seat of Ar	7
And leans on Moab's border.	7
And thence to the well;	5
[This is the well where the Lord said to Moses]	
"Gather the people	5
I'll give them water."	5
Then did Israel sing	6
This song did it sing:	5
Spring up, well, sing to it!	6
Well, which the princes dug,	6
Which nobles of the people delved,	7
With their scepters and staves.	6

Such short lines of five to seven syllables are usually sung upon one and the same melodic phrase; this kind of rendition is even today an archetype of Near Eastern chant. If such phrases are accompanied by tambourines or light percussion instruments, the result may have resembled an antiphony of Yemenite Jewish women (Example 1):

Example 1



From E. Gerson-Kiwi, "Musique dans la Bible," *Dictionnaire de la Bible* (ed. Pirot; Supplément, 1955); by permission of Letouzey et Ané, Paris

Other typical folk songs are laments or acclamations, as they appear, e.g., in I Sam. 17:7; I Kings 12:16 (in mocking fashion); Jer. 9:19-20. In the same way ditties were chanted, almost like our nursery rhymes; they also display the characteristic sequence of accents: 3/2 or 4/3. According to Budde, this rhythmic arrangement is typical of the *Qinah* (dirge), but this is a somewhat disputed theory. Be that as it may, this arrangement was probably reflected in their melodies. It is possible that regular accentual patterns like 3/2 or 4/3 had stereotype melodies, so-called contrafacts, which could be adjusted to any text that fitted the number of beats. Example 2 illustrates this practice.

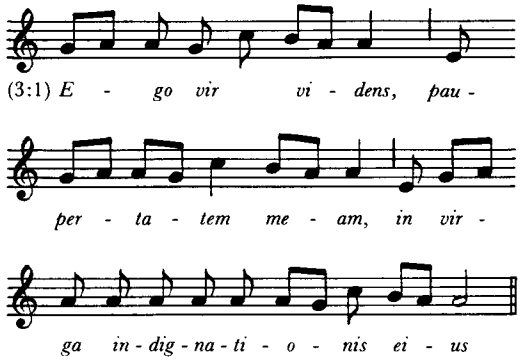
Example 2

Yemenite Mode of Penitence and Lamentations

(Idelsohn)

Gregorian Mode of Lamentation

(after O. Fleischer and P. Wagner)



By permission of Breitkopf & Härtel, Leipzig

Other expressions of popular singing are the working songs, of which the early rabbinic literature speaks with contempt. Furthermore, there are riddles, as in Judg. 14:14, with the accentual pattern 3/3, somewhat like

> From the eáter came sómething to éat.
> From the stróng came sómething swéet.

Here, words and tune must have formed a close unity. Military calls or signals, such as Num. 10:35, must be imagined sung to a strictly rhythmical tune in keeping with the beats of the text (in Hebrew). The stressed words rhyme:

Qu-mā Ya-ha-wé, wə-ya-phú-ṣu *ə-yə-ṿé-kha*, vəyanú-su *məsa-né-kha mipanékha*.

To a related category belong the remnants of bardic songs, such as the well-known "Song of Lamech" (Gen. 4:23-24). Here, the rhythmic scheme approximates metrical poetry.

b. Professional liturgical music. Widespread is the naïve notion which assumes for the temple in Jerusalem a never-changing, inflexible musical tradition. There is a lack of technical information in our sources; its cause is the deliberate silence of the priests, which is, however slightly, lifted but once, by Josephus, himself a priest. Only in one passage he discloses one of the internal "stage secrets" of the priest's performance: "The King, with the suffrages of those that came into the synhedrion, granted the singers (Levites) this privilege, that they may lay aside their former garments, and wear such a linen

as they desired; and as a part of this tribe (of the Levites) ministered in the Temple, he also permitted them to learn those hymns as they had besought him for. Now all this was contrary to the laws of our country. Whenever these laws were transgressed, we have never been able to avoid the punishment of such transgressions" (Antiq. XX.ix.6).

Whether or not one pays attention to Josephus' gloomy *vaticinium ex eventu,* the fact emerges that the Levites studied—i.e., memorized—text and music of "new hymns." What these new hymns were, we do not know; but that a change in the musical repertoire was nothing unheard of, is proved by the repeated exhortation: "Sing to the Lord a new song!"

The rendition of longer canticles or psalms must have been strophic, as without any such repetition (and, of course, without notation) it was not possible to keep together the vocal and instrumental ensemble. The instrumental accompaniment was probably heterophonic—i.e., it reproduced the vocal line in an instrumental unison with slight melismatic deviations. The instruments were used independently only for signaling purposes (cymbal strokes, trumpet calls, etc.).

According to the Talmud, during the existence of the temple there was a distinction made between certain archetypes of Levitical songs. This statement must be treated with great caution, as the Talmud idealizes a priori everything pertaining to the temple. At the same time, we know from the Talmud itself that hardly 150 years after the temple's destruction the great rabbis could not, and did not, agree on the performance of the most popular group of Psalms, the Hallel (Soṭ. 30*b*). With this reservation, the passages concerning the archetypes of song are here briefly extracted (Giṭ. 7*a*).

The solemn, straightforward type of the *shîrâ* (שירה) applies to poetic texts on festive occasions.

The exuberant, probably melismatic chant of praise, *hālîlâ* (הלילא), is suitable for high festivals.

The syllabic psalmody *zimra* (זמרא) is appropriate for the study of the Mishna or the plain reading of the Psalms. Perhaps it denoted also a primitive type of scriptural cantillation.

Every melody (נעימה) has its own prosody (מעם) and pitch (הגבה קול), which must be observed (Midrash *Canticum Rabba* 8.12).

These archetypes of performance constituted the usual temple ritual. Yet, there was one annual event which served as pretext for all kinds of extravagances in music and dance. Again, we must, to a certain extent, rely upon the Talmudic description, which, however, in this case is confirmed by passages of early rabbinic literature and extensive descriptions by Josephus. This, the merriest of all the festivals, was the "Feast of Drawing Water" (שמחת בית השואבה). It was the most joyous and the most musical of the temple's festivities. Its description in the Mishna text opens with the significant words: "Whosoever has not seen the joy of the House of Water-Drawing has never seen real joy in his life" (M. Suk. 5.1). After the preparations, which occupied the entire afternoon of the first day of Tabernacles, the "men of good deeds" began to dance before the people in the temple court with burning torches. The Levites, having stationed themselves upon the fifteen steps leading from the women's court to the Inner Court, took up their harps, lyres, cymbals, trumpets, pipes, flutes, clarinets, etc., all instruments greatly augmented in number, and intoned the fifteen "Songs of Ascent." Thus, the night passed in dancing, singing, and general merrymaking. At the sound of the first cockcrow, the priests intoned the triple blast תקיעה, תרועה, תקיעה upon their ritual trumpets. These signals ended the general frolicking, and the crowd ranged itself into an orderly procession to the well of Siloah.

Today, this music and dance festival is understood as the one remnant of old Canaanite fertility rituals, which, in the monotheistic pseudomorphosis of the temple ceremonies, was to ensure an abundant crop of plants, animals, and even human beings.

This was perhaps the only occasion where popular music-making was allowed to mix with the otherwise sternly guarded prerogative of Levitical music. Consequently, secular, superstitious, even popular licentious elements were here introduced in the pure performance of the temple's liturgical music.

4. Character of biblical music. Considering the rather fantastic notions which have been proposed in the past, the following examination distinguishes between documentary evidence, working hypotheses, and personal opinions.

We have no technical evidence concerning the details of popular and secular song in Israel; but with regard to temple music, there are certain historical facts which lend themselves at least to musicological interpretation. They concern (*a*) the problem of continuity and unity of the Jewish musical tradition, (*b*) certain remnants of ancient Jewish music in the plain chant of Judaism and Christianity, and (*c*) the melodic archetypes of ancient Jewish chant.

a. Continuity and unity of Jewish musical tradition. Among modern musicologists, we encounter rather different attitudes toward this problem. L. Saminsky denies any continuity of musical tradition since the destruction of the second temple. He does not, however, support his thesis with any factual evidence. He is inclined to ascribe all resemblances of Jewish and Christian chant to Jewish borrowings. The crucial case of the Yemenite Jews, whose music shows conspicuous identities with the oldest strata of Gregorian chant, yet who never came in contact with any of the churches, is ignored. An opposite view is held by J. Yasser, who, in his various publications, assumes a rigid and strict adherence to ancient tradition. But, being a cautious scholar, he is aware of the fact that the farther back we are able to trace a melody, the more the number of its notes diminishes.

A moderate line is held by Curt Sachs, who has adduced historic documents to prove the continuity of musical tradition in Judaism. The most important agency for the preservation of musical tradition was the institution of the *ma'ᵃmādhôth* (מעמדות), the "bystanders" in the temple, lay delegations from all parts of Palestine. During the last century of the temple's existence, the Pharisees (rabbis) succeeded in establishing a synagogue in the very area of the temple. This synagogue, a democratic institution within the

hierarchical confines of the temple, was the renowned "Hall of Stones" or "Solomon's Hall" of the NT. There, the bystanders were instructed in the chants of the sanctuary by outstanding Levites. We know the names of two of these Levitical instructors for the laymen: Rabbi Joshua ben Ḥananya and Rabbi Eliezer ben Hyrcanus ('Arak. 11*b*). Rabbi Joshua, a disciple of Rabbi Johanan ben Zakkai, assisted his master in preserving as much as possible of the temple's ritual customs for the academy of Jabne (Suk. 53*a*). He and his contemporaries formed a strong link in the chain of tradition at a most critical time.

Aside from these historical circumstances, the manifold and conspicuous resemblances of melodic archetypes in ancient Hebrew tradition with old strata of Christian plain chant, impel us to assume a common source for such similarities. Whether this source was the temple or the contemporary synagogue remains problematical.

b. Remnants of ancient Hebrew songs in plain chant of church and synagogue. Already some of the church fathers have insisted that the church be considered the *heres de facto* and *de jure* of temple and ancient synagogue. Ambrose and some of his contemporaries went so far as to claim for the church a direct Jewish legacy in ritual and chant. On the Jewish side, Manuello of Rome, a contemporary of Dante, wrote the caustic distich:

> What has the science of music to say to the Christians?
> "Stolen, yea stolen was I" from the Hebrews' own land!

(The second *stichos* is, in the original Hebrew, a sardonic quotation of Gen. 40:15.)

The first serious examination of the interrelation between Christian and Hebrew chant was made by Padre Martini, young Mozart's benevolent teacher, in his *Storia della Musica*. Martini arrives at the cautious conclusion that there are undeniable resemblances, but because of the dearth of primary Jewish and Christian sources it is in most cases impossible to state who lent and who borrowed.

A hundred years after Martini, the Jewish composer and writer Samuel Naumbourg (1815-80) published his *Recueil de chants religieux des Israélites* (1874), which opens with an intuitive study on the sources of Hebrew musical tradition. He compares some characteristic archetypes of Gregorian chant with their Hebrew counterparts and comes to the conclusion that both are based upon a common source. He refrains, however, from speculating further and concludes by emphasizing the main differences of Gregorian and Hebrew plain chant.

It was the French musicologist Amédée Gastoué who, through historical, paleographical, and musical methods, gave the first conclusive proof of the ancient relationship of Jewish and Christian chant. Shortly thereafter, A. Z. Idelsohn, the foremost Jewish musicologist of his generation, demonstrated the close connection of certain melodic archetypes of the Yemenite tradition with the oldest strata of Gregorian chant. This was a significant discovery, as the Yemenites had left Palestine at the time of incipient Christianity and had never been in contact with any of the churches. The outstanding scholar Peter Wagner took up the cue in his Gregorian research and discovered important Jewish roots in the chant of the early church. With the works of these three scholars a solid foundation was laid; and yet, the methodology of their comparisons leaves much to be desired in cogent reasoning, on account of a principal uncertainty concerning the "case histories" of most synagogal or Gregorian tunes.

Egon Wellesz, the protagonist of Byzantine chant, added new evidence to the problem of Jewish-Christian musical interrelation, specializing in the liturgical chant of the Eastern churches.

By abandoning the method of comparing individual tunes with one another, and by replacing the single melody by archetypes or structural prototypes, one is able to base his research upon the methods of comparative liturgy and comparative musicology.

c. Development of research in ancient Jewish chant. The judicious scholars of Renaissance and Reformation broke with the medieval tradition of a mystic temple. Parallel with the increasingly critical interpretation of scripture went a growing understanding of music as it occurs in the Bible. Johannes Reuchlin's evaluation and notation of Jewish scriptural cantillation heralded a new attitude toward the music of the ancient Near East. The two subsequent centuries produced such scholars as the Jesuit Athanasius Kircher, the theologians Père Mersenne, G. Bartolocci, A. Pfeiffer, the renowned Abbot Gerbert, all of whom occupied themselves with Hebrew music in general and that of the temple in particular. They limited themselves, however, to the study of texts and documents and overlooked the possibility that the Near East of their own times might have preserved traces of ancient Semitic music. *See* MASORETIC ACCENTS.

This idea was championed, in word and deed, by G. A. Villoteau (1759-1839), who participated in Napoleon's expedition to Egypt and the Near East. There he investigated at first hand, and with incredible industry but inadequate equipment, the music of Syria and Egypt. He devoted a special chapter to the musical traditions of the Jews in Egypt and Palestine. His learned disquisitions are contained in the monumental volumes of the government-commissioned *Description de l'Égypte*. Though many of his findings and conclusions have been superseded during the subsequent years, some of his fundamental statements and the basic principles of his approach remain landmarks of comparative musicology. He pointed out what he considered the indigenous elements of all Semitic and Egyptian music and analyzed them in detail.

Modern research utilized the newly excavated treasures of cuneiform libraries. The triad of linguistics, history of culture, and comparative musicology has produced some startling new discoveries. Many ancient musical instruments from Ur, Kara-Tepe, from ancient Mesopotamia, and Egypt were brought to light, and most recently the soil of Israel has yielded a few of its musical relics. Entire or fragmentary liturgies of Sumer, Akkad, Egypt, Ugarit, have been reconstructed and published. Finally, concerted efforts have been made to compare the most ancient melodic elements of the Near East and to establish criteria for their age and provenance.

Thanks to the efforts of many scholars, we may, with a certain amount of certainty, set down the following characteristics of ancient Hebrew music:

a) The general nature of its melos is diatonic and tetrachordal.

b) Hebrew music inclines to crystallizing stereotyped melodic patterns, which were established in a set of fairly defined modes.

c) Each of these musical modes was believed to possess an ethos of its own, which corresponded to the four elements, the four humors of the human body, and the four seasons of the year.

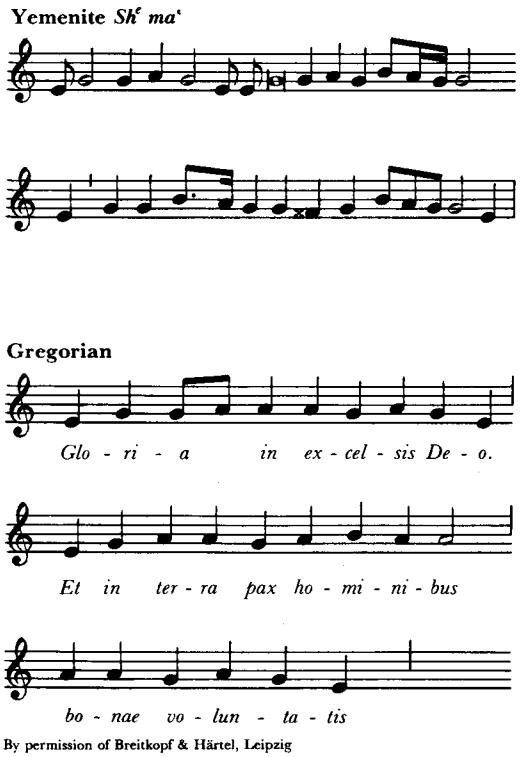
d) Clement of Alexandria has left to us a general description of the psalmody of Egyptian Jewry, which, according to Philo, was shaped in conformity with the chant of Palestinian Jewry. Plutarch gives an exact analysis of the mode mentioned by Clement, the so-called *Tropos Spondeiakos*. In accordance with these sources, the mode may be reconstructed as in Example 3:

Example 3

(According to Clement of Alexandria *The Pedagogue*, II.4; Plutarch *De musica*)

Indeed, melodies based upon this mode can be found in Gregorian, Armenian, Byzantine, and Hebrew chant. *See* Example 4.

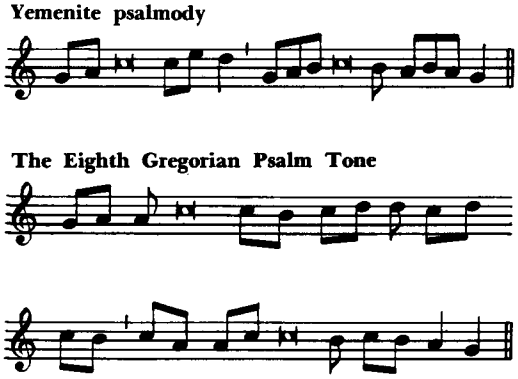
Example 4



By permission of Breitkopf & Härtel, Leipzig

e) Certain psalmodic formulas and cadences occur in Yemenite as well as in the oldest strata of Gregorian chant. Their common source must be Palestinian, as the Yemenites, after their emigration from Judea, did not come into contact again with organized Christianity. *See* Example 5.

Example 5



Example 6

From E. Gerson-Kiwi, "Musique dans la Bible," *Dictionnaire de la Bible* (ed. Pirot; Supplément, 1955); by permission of Letouzey et Ané, Paris

f) Ancient Hebrew music did not make the distinction between composer and performer; every singer composed, or rather improvised, his songs upon the motifs which belonged to the treasury of common folk songs and were familiar to all his listeners. He was more a compounder of well-known motifs than an original composer. The idea of "originality" is unknown to Semitic musicians even up to this day.

g) The chant of ancient Hebrews was rhythmical, but probably free of fixed meter. Perhaps the only exceptions were the dancing songs of women, usually accompanied by percussion instruments. *See* Example 6 *above*.

C. ***MUSIC IN THE NT AND IN THE RABBINIC ERA.*** The books of the NT, clearly destined for the practical activities of the incipient church, are, from a historical point of view, limited to a short period. They encompass the span of seventy years before the destruction of the temple; geographically, they address themselves to the world of Hellenism. Moreover, neither the gospels nor the epistolary literature display any particular interest in the ritual and the liturgy of the temple. It might even be said that the apostles considered the institution of the temple as a panel for religious disputation at best, as a seat of corruption at worst. They all came from the synagogue and were at home there. They had no use for hierarchical traditions and were, in this respect at least, in accord with the Pharisees, opposed to the ruling class of the Sadducees, who dominated the temple. Indeed, all evidence points to the chant and music of the primitive church as practically identical with the customs and traditions of the synagogue.

Aside from the customary music of temple and synagogue, the books of the NT speak of music mainly as an integral part of the daily life of Palestine and the Hellenistic communities. This statement admits of one important exception: the book of Revelation, whose eschatological visions contain a great deal of exalted musical imagery (*see below*). As far as the references to musical activity in the other books of the NT are concerned, they may be easily listed. *See* Table 2.

Table 2				
Religious or liturgical chant	**Obsequies**	**Prophetic passages**	**Merrymaking**	**Metaphorical usage of musical terms**
Matt. 26:30 Mark 14:26 Acts 16:25 I Cor. 14:15 I Cor. 14:26 Eph. 5:19 Col. 3:16 Heb. 2:12 Jas. 5:13	Matt. 9:23	Matt. 24:31 I Cor. 15:52 I Thess. 4:16 Heb. 12:19	Luke 15:25	Matt. 6:2 Matt. 11:17 Luke 7:32 I Cor. 13:1 I Cor. 14:7-8

This tabulation of relatively few passages contains a rather disproportionate number of metaphorical sentences, where music or its instruments are not to be understood literally, but are used as similes or rhetorical figures. The most celebrated of these poetical passages is Paul's glorification of love in I Cor. 13. He opens this dithyrambic praise of *agape* with a startling metaphor: "If I speak in the tongues of men and of angels, but have not love, I am a noisy gong or a clanging cymbal." This passage cannot be fully understood without some knowledge of the attitude toward music taken by Pharisaic Jewry. Explicitly stated here is the primacy of vocal performance over any instrumental music. Implicit is the contempt of all instrumental music, and the emphatic disparagement of "gong" (χαλκός) and cymbals, two of the temple's percussion instruments. This sentiment was vastly different from the Gentile attitude, which favored these instruments. Paul, however, denounced their usage on account of their role in the mystery cults, and thus reflected the views of the orthodox Pharisees as well as some ideas of Philo's philosophy.

Paul, himself a "Pharisee of the Pharisees," shared fully these views; in all his exhortations, he speaks only of "psalms and hymns and spiritual songs" (Eph. 5:19; Col. 3:16). The terminology of this phrase is still somewhat controversial, especially with regard to the term "spiritual songs" (ᾠδαὶ πνευματικαί). Whether he understood by this expression the musical form of glossolalia, a kind of wordless hymn, then much in vogue in Judaism, is at least problematical. Occasionally Paul even speaks of an instrument, but like the DSS, he uses it only for metaphorical or rhetoric purposes (as the "bugle," σαλπίγξ, in I Cor. 14:8). In general, however, he considers all musical instruments "lifeless" or "soulless" (ἄψυχα; vs. 7). His attitude toward women in the ecclesia is exactly that of an orthodox Pharisee. The dictum "The women should keep silence in the churches" (vs. 34) has its parallel in the rabbinic principle "The voice of a woman leads to licentiousness" (T.B. Ber. 24*a*).

Music, both vocal and instrumental, plays an exceptional, highly exalted role in some of the apocalyptic writings, especially in Revelation, the Mithra liturgies, Jewish apocalypses, and even in the Judeo-Christian Pseudo-Clementine liturgy (Apostolic Constitutions). To these and similar compilations there must now be added the Dead Sea Scroll of the War of the Children of Light and the Children of Darkness. In some of these visions the actual experience or the idealized image of the temple seems to have set the pattern, from which the author's imagination took its cue—e.g., the harps and trumpets

with the Hallelujah singing of the angels (Revelation). In other cases, as in the Hymns of Thanksgiving (*Hôdhayôth* in the Dead Sea Scrolls), we are confronted with a number of references to music which are, as in some Paulinic passages, mere rhetorical devices—e.g.:

> They roared abuse of me
> To the play of the lyre
> And in mocking-songs uttered their sneers
> (ch. V, orig. tr.).
>
> But suddenly I saw
> That there was no distress
> To tear me with pain.
> I played then my harp
> With sounds of redemption,
> My lyre to joyful strains,
> Yea, I blew the pipe and the flute
> In ceaseless praise
> (ch. XI, orig. tr.).

Such allegorizing passages contain the nucleuses of the later substance, and perhaps the presage of the future trends of Christian music. The first three centuries of the church witnessed many controversies; some of them concerned themselves directly with music. The most important of these issues were: (*a*) organized versus spontaneous praying and singing; (*b*) scriptural versus extrascriptural poems; (*c*) fusion with Hellenistic music; (*d*) vocal versus instrumental music; (*e*) the rise of monasticism and its influence upon ecclesiastical chant.

1. Organized versus spontaneous praying and singing. The best examples of this long-lasting controversy, whose results affected all church music, are offered by the various doxologies of the first three Christian centuries. If we define a doxology as a praise of God in the third person with emphasis upon his infinity, the church had, during its first centuries, developed a great number of spontaneous and highly individualized doxologies. Such passages are, e.g.: Rom. 11:36; II Cor. 11:31; Phil. 4:20; I Tim. 1:17, all patterned after the Hebrew models in the Psalter. When the pressure of Arian heresy threatened the unity of the church, the "standardized" lesser doxology *Gloria Patri,* etc., was introduced (cf. Cassian *De Instit. Coenob.* II.8, in *Patrologia Latina,* vol. 49, col. 94), and finally ratified at the second synod of Vaison in 529. *See* DOXOLOGY.

The musical consequences of this process of standardization are obvious: organized prayer and chant gain a decided victory over spontaneous worship. Besides, Western chant tends more and more toward codification and systematization, certainly to a larger degree than that reached by the liturgical chant of the Eastern churches. In spite of all these divergences the oldest strata of Gregorian and synagogue plain chant have retained certain common elements in ancient doxological chants. *See* Example 7.

2. Scriptural versus extrascriptural poems. Already at the end of the second century the Byzantine, Syrian, and later the Armenian church showed a marked preference for new, nonscriptural hymns, despite all warnings by the catholic authorities. Even Canon 59 of the Council of Laodicea (360-81), which expressly prohibited nonscriptural texts, was constantly circumvented and openly violated, as the

Example 7

Yemenite

Gregorian

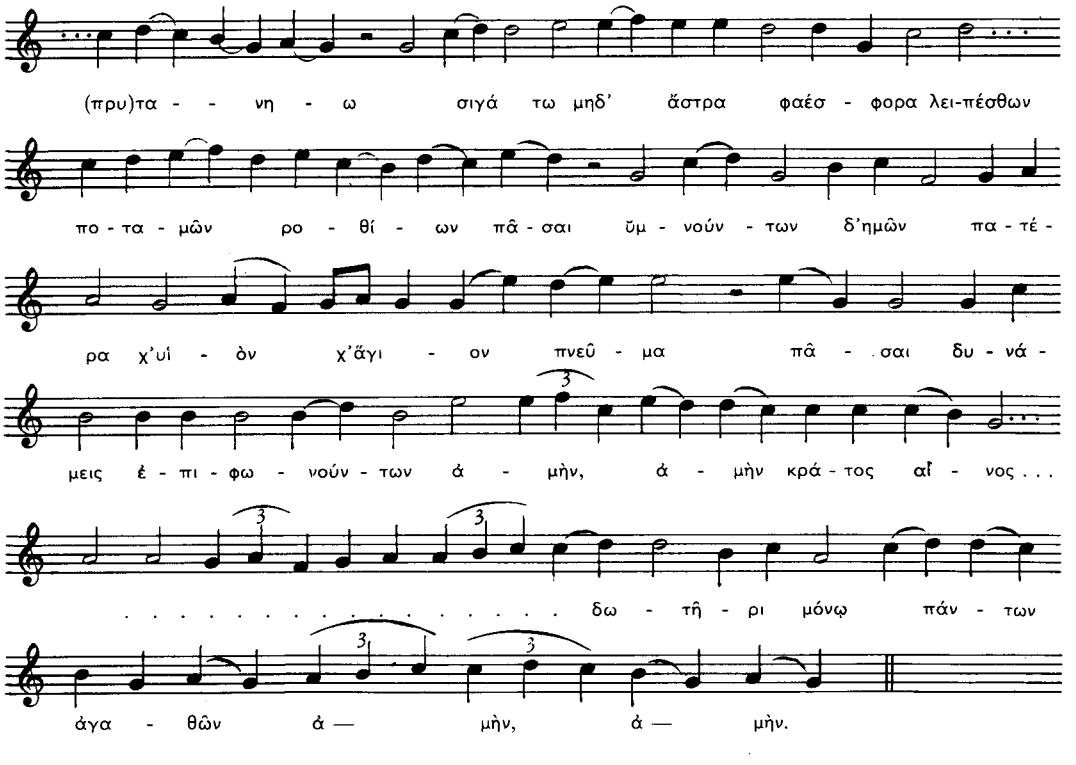
enormous hymn literature of the Eastern churches demonstrates. The fact that, e.g., the Maronite or Uniate Armenian churches came under Roman jurisdiction did in no way diminish the quantity of free hymns in their liturgies. Such inclinations are obviously remnants of ethnic, possibly pagan, predilections, which no doctrine, however strict, could eliminate. Musically speaking, this results in the relatively larger number of metrical tunes in the Eastern tradition in comparison with the Latin ritual. The West remained conservative, faithful to scripture, and admitted rather late (seventh to eighth century) metrical Latin hymns to its official liturgy.

3. Fusion with Hellenistic music. Another important factor in the formation and expansion of early Christian music was its Gentile wing, which brought the Palestinian-Syrian tradition into close contact with the Hellenized world. According to some scholars, the passage Phil. 2:6-12 might perhaps be understood as a free poetic outburst. If their view is correct, we must consider it the first perceptible deviation from spirit and structure of Hebrew poetry. There is no parallelism, not even a trace of lines similar to each other in length or in the number of accentuated syllables. If such a piece was ever sung, which is doubtful, it could not have been performed in the manner of traditional Jewish psalmody or like a canticle.

An instructive example of the synthesis of Hellenistic and Jewish chant is presented by the melos of the Oxyrhynchus Hymn, the oldest notated Christian hymn. This composition seems to be typical of Christian chant outside Palestine, in the second and third centuries A.D. In Example 8 (*see below*) its best transcription (by R. Wagner) is given, together with a translation (original). The scriptural influence upon this composition is undeniable. The allusion to Pss. 93:3-4; 148:4 (the waters praising God); Ps. 19:1-2 (the heavens and stars) and to similar biblical passages seems obvious. The closing doxology is added in strictly orthodox fashion. Hellenistic chant, as we know from its remnants, limited itself to a strictly syllabic relation of word and tone. Thus, one syllable corresponded to one and only one tone, a principle which naturally excludes any melismatic, nonsyllablic motifs. The Oxyrhynchus Hymn breaks with this principle, especially in the four Amens, which are placed at the end of verses. Thus, the Semitic element of so-called "punctuating melismata"

Example 8

The Hymn



The Four Amens

Translation

". . . all splendid creations of God . . . must not keep silent, nor shall the light-bearing stars remain behind. . . . All waves of thundering streams shall praise our Father and Son, and Holy Ghost, all powers shall join in: Amen, Amen! Rule and Praise (and Glory) to the sole Giver of all Good. Amen, Amen."

has entered into a basically Hellenistic structure. A Hebrew heritage, the melismatic formulas, is recognizable in a hymn of the Gentile church; yet we must not overlook the most important type of Hebrew chant—i.e., psalmody, which directly influenced the ecclesiastical music. According to available patristic writings, the introduction of psalmody into the ancient Greek and Roman world came like a revolutionary event. Writers unfamiliar with psalmody found it strange—e.g., Pliny the Younger, Clement of Alexandria, Socrates, and Diodor of Tarsus. All these writers were either pagans or Gentile Christians. No such wonderment can be found in the writings of the apostles or fathers with Hebrew-Aramaic background. Paul refers to psalmody as to something quite familiar to him.

4. Vocal versus instrumental music. The superiority of vocal over instrumental music was a general tenet of Christian aesthetics, although the degree of hostility to instrumental performances varied in different places, at different times. This attitude seems to run parallel to the rabbinic prohibition of instrumental music, but the underlying reasons were by no means identical. For the short span of Israel's prosperity under the first Hasmoneans, instrumental music was particularly popular at banquets. However the Pharisees might have felt about the temple orchestra, which was exclusively in Sadducean hands, banquet music was welcome in their houses. Maxims of etiquette and deportment refer to secular music—e.g., the adhortations of Ben Sirach (Ecclus. 32:3-6 orig. tr.):

> Do not disturb the musicians!
> Where there is music,
> Do not pour out speech
> And do not be importunate in showing thy wisdom.
> Like a ruby shines in its golden setting,
> So is the musician's ensemble at a banquet of wine.
> As the precious emerald in a golden frame
> So adorn melodies of musicians a feast of wine.
> (Listen in silence
> And thy modesty will be rewarded by good will.)

This urbane attitude vanished under the unceasing pressure of Pharisaic puritanism, especially in the realm of liturgical music. While Paul's contempt of musical instruments was based upon the Pharisaic

view (*see* § C *above*), the later Christian authorities had much more cogent reasons for their antagonism against all instrumental music. The pagan theater and circus, with their licentious female musicians, attracted vast masses of Gentile Christians, who were accustomed to these spectacles. The wild vigils of martyr's anniversaries; the various, only slightly camouflaged, popular festivals, disguised as memorial days of saints, were the occasions when instrumental music was taken for granted. The church needed three centuries of severe legislation to eradicate at least the worst of these orgiastic customs.

5. Rise of monasticism and its influence upon ecclesiastical chant. The most decisive steps in the development of Christian chant were taken under the aegis and championship of early monasticism. Through the Dead Sea Scrolls we know today that both concept and practice of monastic life grew directly out of dissident Jewish sects during the last two centuries of the Second Jewish Commonwealth. From the very beginning, even during its Jewish phase, monasticism cultivated choral singing as an integral part of its observance (cf. Manual of Discipline and Hymns of Thanksgiving). A later historiographer of the church, Eusebius, was aware of the musical predilections of the old ascetic sects in Judaism. In fact, he excerpted Philo's description of the ritual of the Alexandrinian Therapeutes, which he likened to the Christian practice of his own time (four centuries later): "The men and the women rise, each group forming a choir, and sing thanksgiving hymns to God the Redeemer" (Hist. II.17).

The majority of Christian monks in Egypt and Palestine championed organized choral chant, often in the face of a sternly opposed authority. When all historical circumstances are taken into account, there can be no doubt that the tremendous expansion and refinement of Christian chant before Pope Gregory was due to the intensive and continuous musical activities of the monks. The musical endeavors of the monastic orders came to fruition in the West, however, and deteriorated in the Near East. This paradoxical fact is probably due to the specific musical traditions and predilections of the various, recently Christianized nations of the East. Perhaps Augustine may be considered the pivotal figure in this development. By birth and inclination a Semite, he was won over to Western culture and views in the field of music (cf. his *De Musica*). He was the last exponent of a uniform musical tradition within the church. Soon after his death, the regional-ethnic forces of Gentile Christianity caused the split in the liturgico-musical development of the Eastern and Western churches. While the former remained essentially stagnant in liturgical chant, the latter became the main agent in the gigantic development of Western music.

MUSICAL INSTRUMENTS. Many books of the OT and some of the NT refer in detail to musical instruments. From the time of the earliest exegetes—i.e., rabbis and church fathers—the instruments of the temple and, later, quite generally all musical instruments mentioned in scripture became a subject of curiosity, research, and often of unfounded hypotheses and illusions.

Bibliography

A. ***SOURCES.*** Our sources belong to two main categories: (*a*) written or printed documents and (*b*) archaeological findings.

The first category consists of three components: the Bible and its translations; rabbinic and patristic literature; and descriptions transmitted by Roman or Greek authors. While the Bible is reliable, its substance is meager and its terminology unclear and apparently extremely sparse in its few explanations. Rabbinic and patristic literature should be used only with great caution; while the texts deal mainly with the music of the temple—in an idealizing fashion—they were written at least 150 years after the temple's destruction. Many, if not all, of them rely upon hearsay. Roman and Greek descriptions also demand prudent evaluation, though for different reasons. To Josephus, who had been born into the priestly class, everything connected with the temple was *ipso facto* admirable. To the early church fathers, much of the temple's ritual was either holy or suspect, especially to Epiphanius and John Chrysostom. Of Gentile Hellenistic authors we have only some rather fantastic remarks on Jewish civilization (cf. Diogenes Laertius, Plutarch).

The archaeological evidence consists of pictorial representations of temple instruments or discoveries of musical instruments in Palestine and the neighboring countries. To the first category belong the famous relief on the Arch of Titus in Rome and the coins, issued by Hasmonean kings and Bar Cocheba, on which lyre and trumpet are depicted. Richer are the findings of archaeological excavations. Of Palestinian instruments the following were discovered: the mouthpiece of a חליל (by N. Glueck; *see* § B2*b below*), several bone flutes (by E. Garstang), and a trumpet made of a large sea shell (by Y. Yadin). Many instruments were discovered in or near Ur, at Lake Mari, etc., and there is abundant pictorial representation in reliefs, sculptures, and pictures of Sumerian, Babylonian, Hittite, Mittani, and Egyptian musical instruments.

B. ***CLASSIFICATION.*** In accordance with C. Sachs's generally recognized method we distinguish idiophones, aerophones, membranophones, and chordophones. To the idiophones (the instrument's own material produces the tone) belong: bells, castanets, rattler-sistrum, triangle (tabret), cymbals, and certain chimes. Aerophones (air is directly vibrated) are: flute, horn, trumpet, oboe, clarinet, pipe, ram's horn (*shôphār*), bugle, bagpipe, and the puzzling, erroneously named sackbut. Membranophones (the tone is produced by vibrating membranes) are: tambourine, timbrel, and drum. Chordophones (strings produce the tone) are: harp, lute, lyre, sambuke, cittern, dulcimer, psaltery, and viol.

1. Idiophones. ***a. Bells.*** There are two types of bells mentioned. פעמנים (from פעם, "to strike, push") were used as apotropaic protective instruments fastened to the hem of the high priest's robe (Exod. 28:33; 39:25-26). These bells, presumably without clapper, alternated with pomegranates; both were made of pure gold. By striking against one another at every movement of the priest, they produced a jingling sound, which had the function of chasing away the evil spirits from under the threshold of the holy of holies when the high priest entered it. Their apotropaic value was still understood by the early rabbis, and there are many analogous phenomena known in anthropology.

מצלת (from צלל, "to rattle, jingle"; properly "jingle bells") are mentioned only in Zech. 14:20, as ornaments or amulets of horses. These bells were shaped like little metal disks and fastened to the bridles or breast straps of the horses (cf. Targ.; M. Par. 12.8).

b. Cymbals. Cymbals (מצלתים, צלצלים; κύμβαλα) occur in three slightly different forms of the same archetype: (*a*) The word מצלתים clearly represents a pair of cymbals, as indicated by the dual form of the Hebrew. They were used only by men, perhaps even only by priests. All thirteen references to them accentuate their ritual or ecstatic function. Their main usage seems to have been priestly; they accompany mostly instruments such as the trumpets (Ezra 3:10), the sacerdotal lyre (I Chr. 25:1; Neh. 12:27), and the "instruments for sacred song" (I Chr. 16:42). (*b*) The second type are the צלצלים, which have been interpreted as either cymbals or even castanets (I Chr. 16:5). "Castanets" can hardly be accepted, inasmuch as the LXX uses here the term κυμβάλοις ἀναφωνῶν, perhaps "cymbals of shouting" (or proclamation). This rendering corresponds to the account of the Talmud (M. Tam. 7, 3; b'Arak. 11*b*), where the cymbal (צלצל) is understood as a purely signaling instrument, in contradistinction to the מצלתים, which team up with lyres and trumpets. Castanets could never have functioned as signal instruments in so spacious and public a location as the temple. (*c*) The צלצלים are qualified in Ps. 150:5 as צלצלי שמע and צלצלי תרוע. According to C. Sachs, the distinction refers both to the shape of the instruments and to the way they were held, horizontally* or vertically.* As the psalm passage cannot be applied to the temple ritual, the "sounding and loud clashing cymbals" had a truly musical function and were not just signaling instruments. Sachs's hypothesis therefore becomes plausible. Figs. MUS 79, 80.

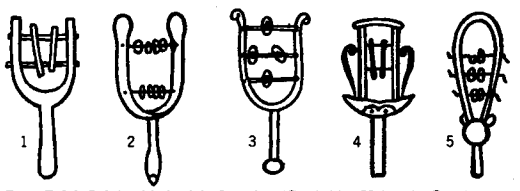
80. Vertical cymbals (Assyria)

c. Rattler-sistrum. The מנענעים (from נוע, "to quiver, to be shaken"; RSV "castanet," KJV "cornet") is mentioned only once (II Sam. 6:5). The LXX has κύμβαλα, the Vulg. correctly *sistra*. This interpretation is demanded both by the etymology of the name and by the instrument's use, as a noise-maker for joyous and sad occasions. The Mishna knows it (M. Kel. 16.7) as one of the wailing women's instruments. It served, exactly as in Egypt, the emotional extremes of jubilation and deep mourning. The oldest sistrums were found in Ur, Kish, and in Sumerian excavations; the instrument has come from Mesopotamia via Palestine to Egypt. Fig. MUS 81.

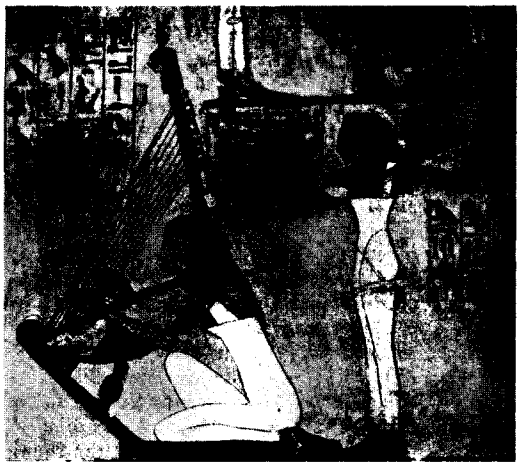
Paul may have reference to cymbals in I Cor. 13:1 (χαλκός, "copper"; KJV "brass," RSV "gong").



From F. W. Galpin, *Music of the Sumerians* (Cambridge University Press)

81. Sistrums or noisemakers: (1) "spur shaped" from Egypt (twenty-second century B.C.); (2) Georgian (Transcaucasian); (3) Abyssinian; (4) "temple shaped" (Ancient Egypt); (5) "stirrup shaped" (Ancient Egypt)

d. Gong. The χαλκός (I Cor. 13:1; KJV BRASS) is known in the rabbinic literature as אירום (Aramaic), a bronce-gong, which was a characteristic instrument for weddings and similar joyous occasions; in its smaller form it appeared as a kind of hand bell (M. Soṭ. 9, 14). In the famous passage in I Corinthians, Paul seems to allude to *erus* and *ṣilṣelim.*



82. Painting from an Eighteenth Dynasty (*ca.* 1570-1310 B.C.) tomb in Egypt, showing girls playing the harp and lute

2. Aerophones. ***a. Flute, pipe.*** "Flute" and "pipe" are used to translate several words. All pipes and flutes belong to the category of orgiastic-dionysiac instruments which served wild joy as well as ecstatic lament.

The RSV uses "pipe" for עוגב (from עגב, "to love passionately"; KJV "organ"), which occurs four times in the OT and is always translated in the Targumim as אבובא (*aboba*), "shrill pipe or flute." The עוגב was apparently a secular instrument and is never listed in the temple orchestra; only in Ps. 150:4 is it mentioned in a religious (but not ritual) function. Its ethos was not blameless at all, as we see from Genesis Rabbah 50: "The angels said to Lot: 'There are players of the עוגב in the country,

Courtesy of the University Museum of the University of Pennsylvania

83. A silver flute from Ur

hence it ought to be destroyed.' " Its rabbinical identification with the *aboba,* the flute of the notorious Syrian *bayaderes* (cf. Horace *Satires* I.2), emphasizes the erotic element which already the Hebrew name suggests. As both the LXX and the Vulg. translate עוגב with ὄργανον=*organum* in Ps. 150:4, "organ" has become a popular, though erroneous, interpretation. Fig. MUS 83.

משרקיתא (from שרק, "to whistle"; LXX συρισμός; "pipe"; KJV "flute") occurs four times in the Aramaic portions of Daniel; a similar expression (שרקות in Judg. 5:16) indicates the shepherd's piping for his flock. The instrument, made of reeds, wood, or bones, was as primitive as its tone was coarse. As in Theod., this pipe was generally identified with the *syrinx* (cf. the root שרק), or "Pan's pipe." It was not considered fit for liturgical purposes.

b. Clarinet. חליל (KJV "pipe") is translated "flute" in I Sam. 10:5; Isa. 5:12; 30:29; Jer. 48:36. The proper translation of חליל (from חלל, "to pierce"; LXX αὐλός; Akkadian *ḫalḫallatu,* "double pipes"), often erroneously called "flute" or "oboe," is "clarinet." Αὐλός (I Cor. 14:7), "flute" in the RSV, is "pipe" in the KJV. This was the most popular of woodwinds in the Near East. Its Greek counterpart is noted in Matt. 9:23; 11:17; Luke 7:32; I Cor. 14:7; Rev. 18:22. The instrument was no flute or oboe, but a primitive clarinet. Since Nelson Glueck's happy discovery of the mouthpiece of a חליל near Aqaba, we know that it was practically identical with the αὐλος. The proper translation of the Hebrew term would be *shawm* (cf. French *chalumet* and Latin *calamus*), which Raši has already used. The ambiguity of the term חליל was already known to the rabbis. States Rabbi Obadya: "Many kinds of musical instruments were there, but because the sound of the חליל was more audible than the rest, all of them are called by its name" (M. Suk. 5.1).

Long before Israel's existence, we find in Akkadian tablets the word *ḫalḫallatu* for "double clarinet," and we have many ancient representations of this instrument.* As the עוגב, so served also the חליל to express extreme joy as well as deep mourning. Its liturgical function is dubious, to say the least. According to rabbinic literature, the days were limited

Courtesy of the Trustees of the British Museum

84. King's private band of clarinets and harps at Susa, paying homage to King Ashurbanipal of Assyria

to twelve, or maximally eighteen, when the חליל was to be played before the altar (M. 'Arak. 2.3). Fig. MUS 84.

Extremely popular for secular purposes, the חליל was played at weddings, banquets, and funerals. At funerals it served as accompaniment to the customary wailing women; this is the meaning of Matt. 9:23. The chief characteristics of the חליל were: popularity, juxtaposition with hand drum and lyre, expression of extreme emotionalism, and symbolic meaning of fertility and resurrection.

c. Horn. The "horn" (קרן; κέρας; Latin *cornu;* Aramaic קרנא) was a wind instrument made of horn, wood, or metal. In the Hebrew form it is mentioned but twice (Josh. 6:5; I Chr. 25:5 [see KJV]), but as Aramaic קרנא it occurs in Dan. 3:5, 7, 10, 15 (KJV "cornet"). It seems to stand for any kind of horn and/or tuba. Apparently the horn in its primitive form was popular in Canaan before the time of Joshua, as it is mentioned in the Tell el-Amarna correspondence. Tusratta, king of Mitanni, sent (1380 B.C.) to the Pharaoh Amenophis III, his prospective son-in-law, a list of his daughter's dowry, wherein horns are mentioned.

d. Trumpet. A number of words are translated "trumpet." יובל (from יובל, "ram, ram's horn"; LXX σαλπίγξ), which occurs by itself only in Exod. 19:13, is coupled with שופר (*shôphār;* frequently translated "trumpet"; *see* § B2*e below*) in vs. 16. The יובל, as the *shôphār*, was strictly a signaling instrument. The other meaning of יובל, that of "jubilee," originated from the—possibly totemistic—use of the instrument (Lev. 25:9 ff). Its function in the Dead Sea Scrolls (War Scroll) is clearly patterned after Josh. 6.

חצוצרה is translated "trumpet" in Hos. 5:8, as is תקע in Ezek. 7:14. The חצוצרה (perhaps onomatopoetic, "to shatter"; LXX σαλπίγξ; Vulg. *tuba*) was the instrument of the priests par excellence. Its function is similar to, but not quite identical with, that of the שופר (*shôphār; see* § B2*e below*). Trumpets were used in pairs from the very beginning (Num. 10:1-10); their number increased from 2 to 120 at special occasions; sometimes even more were employed, especially at the Feast of Drawing Water. *See* MUSIC.

These instruments were made of metal (bronze, copper, silver, gold), bones, and shell. The tone of the trumpet must have been high and shrill, as the sounding air column was not quite two feet in length. To facilitate the blowing, mouthpieces were added, as we see in the trumpets depicted on the Hasmonean coins or on the famous Arch of Titus.* As the instruments were straight, they could produce some natural overtones. The question whether or not the pitch of the trumpet could be regulated accurately was long controversial (in spite of II Chr. 5:12, where 120 trumpets sounded in unison). This question was settled when the Dead Sea Scroll of the War of the Sons of Light and the Sons of Darkness was discov-

87. Ancient trumpets: (1) Egyptian trumpet (*ca.* 1200 B.C.); (2) Hittite trumpet (*ca.* 1000 B.C.)

ered and examined. Therein, the trumpets were assigned a number of complicated signals, which implied their ability of blowing legato, staccato, and trills, and tonguing, all in unison, not "simultaneously," but "as with one mouth." Moreover, these apocalyptical trumpets bear different names: trumpets of assembly, of battle, of the slain, of ambush, etc. In general, they were used to terrorize the enemy into panic (cf. Gideon's use of trumpets in Judg. 7:19-20). Their function was, for all practical purposes, identical with that of the trumpets of Revelation. In the temple the signals of the trumpet introduced every ceremony and every sacrifice. Figs. MUS 85-86, 87.

e. **Shôphār.** The שופר (from Akkadian *šapparu*, "wild ibex"; LXX σαλπίγξ or κερατίνη; Vulg. *buccina* or *cornu*) was the Jewish ritual instrument par excellence. The term is translated "ram's horn" or (erroneously) "trumpet," also "cornet" (KJV) and "horn" (I Chr. 15:28; II Chr. 15:14; Hos. 5:8).

The שופר is by far the most frequently named biblical instrument. It is called σάλπιγξ in the NT (usually "trumpet," but "bugle" in I Cor. 14:8; throughout the book of Revelation the seven apocalyptic trumpets appear to be שופרות).

88. A bas relief from Carchemish showing four military musicians playing a *shôphār* and drum (ninth-eighth century B.C.?)

According to Josh. 6:4, 6, 8, 13, the *shôphār* was a ram's horn, but in the second temple the horns of the ibex or the antelope were used.* The synagogue, however, uses the ram's horn exclusively as a memorial of the ram which replaced Isaac as sacrificial animal (Gen. 22, which is read on New Year's Day just before the *shôphār* ritual). How close to the surface lay still magic or totemistic conceptions may be seen in the prohibition of using a cow's horn instead of the *shôphār* for the temple's signals. The Talmud (R.H. 26*a*) indicates that a cow's horn or similar substitutes might seriously impair the spiritual affinity of the signal instrument with the sacrificial beast. (Cows were not sacrificed!) Fig. MUS 88.

All the various usages of the *shôphār* can be viewed under one category: that of a signaling instrument. It sounded all signals in war and peace; it announced the new moon, the beginning of the sabbath, the death of a notable; it warned of approaching danger; it heralded excommunication; it was instrumental in exorcisms and magic healing.

In its strictly ritual usage it carried the cries of the multitude to God. At special occasions he himself or his angels may sound the *shôphār* (Isa. 27:13; Zech. 9:14; Rev. 8:2, 6, 12; 9:1-13; cf. also the *Tuba mirum* of *Dies irae*). It is hardly possible to consider the *shôphār* a musical instrument. It can produce just the first two harmonic overtones, and these only approximately. Rarely does it appear together with other instruments, especially at solemn occasions of cultic significance, such as a transfer of the ark (II Sam. 6) or a procession with the entire staff of the temple (I Chr. 15:28; II Chr. 15:14). Only in Ps. 150:3 is it mentioned with most of the other really musical instruments. Hence, we must conclude that the function of the *shôphār* was to make noise—be it of earthly or of eschatological character—but not to make music. After the destruction of the temple and the general banishment of all instrumental music, the *shôphār* alone survived, just because it was *not* a musical instrument.

In the early rabbinic literature *shôphār* and "trumpet" (חצוצרה) were frequently confused. The nonchalance of this usage was an aspect of the studied indifference to all things artistic by the puritanical rabbis; it also reflects their efforts to attain in the world of the synagogue similarity with the

institutions of the temple (B. Soṭ. 43*a;* Shab. 36*a*). Jerome, who equates the *shôphār* with the Roman *buccina,* is likewise mistaken, for the *buccina* was a trombone made of metal. Such confusions do not occur in the OT or the Dead Sea Scrolls. Both sets of documents state that only the trumpets, never the שופרות, should be blown "as with one voice"—i.e., "in unison" (cf. II Chr. 5:13; War Scroll). Passages such as Num. 10:2, 8; 31:6 accentuate the Aaronide's privilege of sounding the trumpet, whereas the *shôphār* was normally used by Levites.

Tradition has conveyed to us only three kinds of signals with their descriptions:

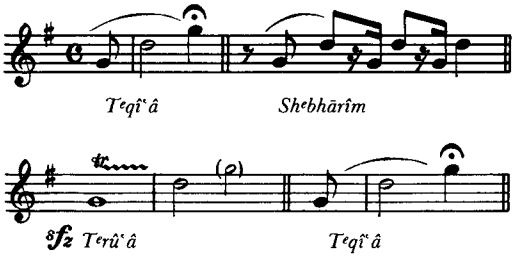
a) תקיעה ("to push, hit");

b) תרועה ("to make noise, alarm");

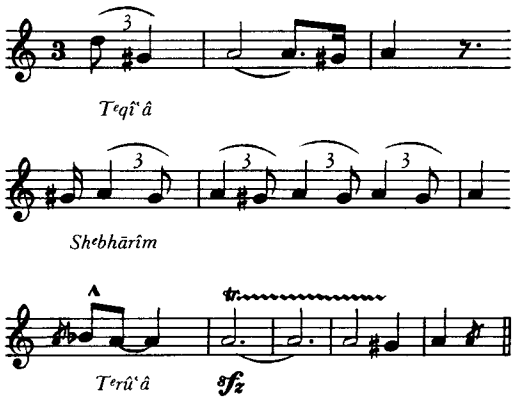
c) שברים ("to break," indicating a staccato or tremolo sound). In musical notation these signals would appear as in Example 1.

Example 1

Signals in Occidental Tradition (German Jews)
(After Abraham Baer)



Oriental Jews:



From E. Gerson-Kiwi, "Musique dans la Bible," *Dictionnaire de la Bible* (ed. Pirot; Supplément, 1955); by permission of Letouzey et Ané, Paris

According to rabbinic interpretation, the first signal, תקיעה, was for gathering or assembly; the second and third were danger or alarm calls. From the Dead Sea Scrolls we learn, however, that these were by no means the only signals known to the Hebrews. *See* § B2*d above.*

3. Membranophones. The תף (from onomatopoetic stem תפף; cf. τύμπανον; Arabic *duff*), translated "timbrel" and "tambourine" (KJV "timbrel" and "tabret"), was a typical women's instrument. It is mentioned seventeen times in the OT; thus it must have been very popular. Although it occurs in the Psalter and in religious hymns (Exod. 15; Jer. 31:4), it was not permitted in the temple. Its function in the Bible was restricted to secular or religious frolicking, cultic dances, or processions (e.g., II Sam. 6:5; I Chr. 13:8; Ps. 68:25—H 68:26). Its absence in the temple ritual was possibly due to the strong female symbolism, which always accompanied the tambourine, and which made its use so popular at all fertility rites. The תף was carried and beaten by hand; in archaic times it may have been a tambourine with two membranes, with pieces of bronze inserted in the rim and shaken by hand. Remnants of such instruments have been discovered in Mesopotamia.

4. Chordophones. ***a. Lyre.*** Two terms are translated "lyre" (KJV "harp"). The כנור (perhaps from Persian-Arabic *kunnâr,* "lute," or from the root meaning "lotus plant"; LXX κίθαρα [see I Cor. 14:7; Rev. 5:8; 14:2; 15:2], κινύρα [see I Macc. 4:54; KJV "harp"], ψαλτήριον; Vulg. *lyra, cithara, psalterium*) was the instrument of David and the Levites, considered the noblest instrument of all. It was used in a sacred milieu as well as in a secular one (cf. Isa. 23:16: in the hand of a harlot). In the temple never fewer than nine lyres were in use (M. Arakh. 2.5), but their number could be increased ad libitum.

The number of the strings of the כנור varies and is, according to most reports, dependent upon cosmological and other symbols; the minimum is three, the maximum twelve. Figurative representations of the lyre on Assyrian reliefs, Mesopotamian paintings, and Jewish coins show an enigmatic and curious re-

90. A horizontal harp of ten strings, from an Egyptian tomb (*ca.* 1000 B.C.)

semblance to Cretan-Minoan instruments. In Mesopotamia and the E shore of the Mediterranean the lyre dates back to prehistoric times.

The כנור was played with the fingers or with a plectrum, as S. Krauss has shown. Being the instrument of the aristocracy, it often was made of silver or ivory, embellished by the craftsmanship of great artists, as, e.g., the golden lyre of Ur, only one of many such examples of precious artistry and material. Fig. UR 17.

The earliest Semitic representation of the כנור has been found in the famous tomb of the Beni-Hasan of the twentieth century B.C. Later forms tend to perfect the symmetry of the artistic framework of the lyre.

The Aramaic קיתרס (LXX κίθαρα; KJV "harp"), found only in Dan. 3:5, 7, 10, 15, was a strictly secular instrument for merrymaking, and it fits well into the picture of Nebuchadnezzar's banquet. It probably must be identified with one of the many Asiatic variants of the classic Greek κίθαρα.

Figs. MUS 89-90.

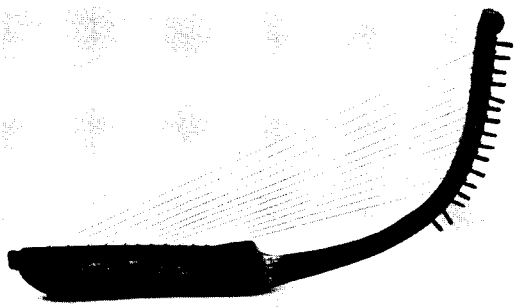
b. Trigon. Another type of lyre was the Aramaic שבכא (LXX σαμβυκή; Vulg. *sambŭca*), which appears only in Dan. 3:5, 7, 10, 15, and is translated "trigon" (KJV "sackbut"). We must rely upon the etymology of the name to determine its identification, as we have no representation from authentic sources. According to some linguists, its root may be שבע, "seven" (cf. Akkadian *sabîtu,* "seven-stringed lyre"). As "sambuke" the instrument was well known, though of ill repute, as that of vulgar musicians and harlots (Macrobius *Satires* III.14.7), and Plato forbade it altogether (*Republic* III.399*d*). Athenaeus (*Deipnosophists* 634*a*) mentions the sambuke as resembling a ship and ladder joined together; an instrument exactly fitting this description has been excavated in Ur (*see* the work of V. Christian in the *bibliography*). It belonged, however, not to the instruments of Israel, but to the Babylonian orchestra.

c. Lute. The שלישים (from שלש, "three," referring to triangular form or to the three strings of the instrument; LXX κύμβαλα; Vulg. *sistra;* KJV-RSV "instrument of music"), which occurs in I Sam. 18:6, is interpreted as "lute" by some. Other suggestions are "triangle" and "hand drum" (Gressmann), "cymbals" (Sachs). Not being a temple instrument, it was, like the tambourine, usually played by women. Its name corresponds with the Akkadian *šalaštu,* which, according to Galpin, was a *"tambour* with a long neck like the lute." Fig. MUS 82.

d. Harp. The identification of the נבל (LXX ψαλτήριον, νάβλα, ὄργανον; Vulg. *psalterium, nablium, lyra, cithara, vas psalmi;* KJV alternately "psaltery," "viol") is not absolutely certain. It was a stringed instrument, for Josephus testifies to its twelve strings (Antiq. VII.xii.3). By way of elimination, the most probable interpretation seems to be "harp," although "cittern" and "lyre" (not "lute," as in Pss. 92:3; 150:3) cannot be excluded altogether. Fig. MUS 84.

The נבל occurs frequently in the OT; as the Greek equivalent of "lyre" and "harp," it plays a significant part in the image of the "heavenly Jerusalem" in Revelation (especially 14:2-3, where we encounter in the description the conspicuous Hebraism "κιθαρῳδῶν κιθαριζόντων ἐν ταῖς κιθάραις αὐτῶν"). The נבל is mainly an instrument of religious or liturgical character; only three passages mention it in a purely secular function (Isa. 5:12; 14:11; Amos 5:23).

Not unlike the lyre, the harp was an instrument of the aristocratic hierarchy, and therefore often made of precious woods and metals (e.g., I Kings 10:12; II Chr. 9:11). No pictorial representation of a נבל has come down to us, and we must depend upon the findings of instruments from neighboring countries.



Courtesy of the Metropolitan Museum of Art

91. Egyptian wooden harp (restored), Eighteenth Dynasty (*ca.* 1570-1310 B.C.)

The harp was the favorite instrument of the Egyptians and generally well known in the ancient Near East. If we equate the Egyptian harp with the נבל, as some scholars suggest, it approximated a cithara-harp with ten to twenty strings, up to four yards high, and was mostly played without a plectrum.* In the temple there were never fewer than two harps, rarely more than six (M. Arakh. 2.3). The harp is a typical men's instrument; as such it belongs, with the lyre and the *shôphār,* to the Levitical orchestra. Fig. MUS 91.

The פסנתרין (LXX ψαλτήριον; KJV "psaltery"), also translated "harp," was the old dulcimer, the Persian-Arabic *santir.* The word occurs only in Dan. 3:5, 7, 10, 15. Although the name hints at the foreign provenance of the instrument, its occurrence is amply ascertained for the entire area of the E Mediterranean since the first millennium B.C. In Greece, the psaltery was a kind of cittern and is so understood in medieval Islamic culture. We find it first on Assyrian reliefs, where it consists of a two-foot-long, one-foot-wide resonator over which ten strings are drawn. The strings are struck with a little rod; consequently we behold a veritable dulcimer-Hackbrett.

The medieval Arabic *santir* was built on similar

From *Atlas of the Bible* (Thomas Nelson & Sons Limited)

92. The blind harper of Leiden, from a temple of Hatshepsut at Karnak; Amarna period (*ca.* 1400-1350 B.C.)

lines; this instrument was still played in the nineteenth century, according to Villoteau exclusively by Arabic Jews. The *santir* is probably identical with the instrument עשור (LXX ἐν δεκαχόρδῳ ψαλτηρίῳ; with Jerome, *Psalterium decachordum*), which is, of course, the so-called "ten-string."

Fig. MUS 92.

5. Spurious terms. ***a. "Bagpipe."*** This term (KJV "dulcimer") is an erroneous translation and misunderstanding of the Greek συμφωνία as it occurs in Dan. 3:5, 10, 15 (for סומפוניא). Both the error and the true meaning were known to Jerome. The misunderstanding originated in Spain through Isidor, who interpreted συμφωνία as either a drum or a bagpipe, in the Near East through Saadya Gaon.

Since Galpin's and Sachs's explanations, we are fairly sure that סומפוניא, always the last term on the list of the Babylonian orchestra, was not an instrument but referred to the ensemble playing of all the instruments mentioned individually before.

b. "Sackbut," "viol," and "cornet." These are fanciful mistranslations of the earlier English versions. The sackbut was some kind of trombone, which did not exist in biblical times (RSV uses "trigon"); the same holds true, *mutatis mutandis*, for the viol (RSV "harp") and the cornet (RSV "horn").

6. Collective terms. ***a. "Stringed instruments."*** The term מנים (LXX χόρδαι; Vulg. *chordae*) occurs twice (Pss. 45:8—H 45:9; 150:4), but only the reference in Ps. 150:4 ("strings") is clear. Here the stringed instruments are used together with secular instruments, such as תף and עוגב, whereas the preceding and parallel vs. 3 lists only the priestly instruments. The implication is that all the world, priest and layman alike, shall praise the Lord! This is the only time that all the priestly and most of the secular instruments are mentioned together in a religious but nonliturgical hymn.

b. "Instruments of music." The use of such terms as נגינה, כלי שיר, נבל, and זמרא (the last-named only in Dan. 3:5, 7, 10, 15) indicates emphatically the predominant place of stringed instruments in biblical music, for all the passages in which these terms appear refer to harps or lyres, in contrast to other priestly instruments such as trumpets or cymbals (e.g., I Chr. 16:42; II Chr. 5:13; cf. II Chr. 7:6; Amos 6:5).

MUSTARD [σίναπι]. A sizable annual plant with very small seeds, probably *Brassica nigra* (L.) Koch (also called *Sinapis nigra* L.). The word appears only in the sayings of Jesus, in his parable of the mustard seed (Matt. 13:31; Mark 4:31; Luke 13:19) and in his simile concerning faith (Matt. 17:20; Luke 17:6 Q). In the parable the emphasis is upon the growth of the kingdom (or the spread of the gospel?) from small beginnings to the large, world-embracing events of the future, similar to the tiny mustard seed which grows so rapidly into a large plant. In the other saying the power of faith is likened to the commonly observed possibilities intrinsic within the tiny mustard seed.

Much debate has raged over the literal implications of the parable, which make the common mustard unsuitable for the illustration, even though the Greek clearly refers to it. We know now that the

93. Mustard

orchid seed, not the mustard seed, is the smallest. The mustard does not grow to tree size, for it is an annual plant. Though fast-growing, it could not be suitable for nesting birds in the early spring. In a parable, however, one expects some literary license to emphasize the point.

If the text must be rendered "make nests in its branches" (so RSV), the exaggeration would be immediately apparent to even the common man. Botanists avoid this problem by insisting that the verb translated "make nests" means only "settle upon" or "light upon" (cf. Amer. Trans. "roost"), referring only to small birds. The apparent allusion to Dan. 4:11-12, 20-21, seems to support the RSV translation, in which case the only solution is to take the expression as hyperbole (cf. Matt. 17:20).

MUTILATION. Physical mutilation of the bodies of man and beasts was not common in biblical times, because of a belief in the sacredness of life (*see* FAUNA; LIFE; MAN, NATURE OF, IN THE OT; MAN, NATURE OF, IN THE NT). Physical defects disqualified a priest from serving at the altar; among those named in the Holiness Code is a "mutilated face" (Lev. 21:18; KJV "flat nose"; חרם occurs only in this passage, where the context does not make clear whether the particular disfigurement was congenital, accidental, or the result of self-mutilation). It was forbidden to sacrifice animals that were "mutilated" (חרוץ; Lev. 22:22; KJV "maimed") or had suffered "mutilation" (מישחתה; vs. 25; KJV "corruption"). *See* SACRIFICE AND OFFERINGS.

However, self-mutilation is reported concerning the prophets of Baal, who "cut themselves after their custom with swords and lances, until the blood gushed out upon them" (I Kings 18:28). The Hebrew prophets condemned the practice of self-mutilation (Jer. 47:5; Hos. 7:14; *see* GASH), and Jeremiah appears to have recognized it as a sign of mourning among the people of Shechem, Shiloh, and Samaria (41:5), and Moab (48:37). Mutilation of the bodies of enemies in time of war must have been common, as evidenced by the reports that Adoni-bezek cut off the thumbs and great toes of his enemies and suffered the same fate himself (Judg. 1:6-7); the Philistines gouged out Samson's eyes (16:21); the Ammonites threatened to gouge out the right eyes of all the men of Jabesh (I Sam. 11:2); the murderers of Ish-bosheth had their hands cut off, probably after death (II Sam. 4:12); Nebuchadnezzar threatened his servants that they would be torn limb from limb (Dan. 2:5). For a discussion of mutilation involved in the punishment of criminals, *see* CRIMES AND PUNISHMENTS.

Paul, in two curious passages, seems to have thought of CIRCUMCISION as mutilation. He warned against "those who mutilate the flesh" (τὴν κατατομήν; Phil. 3:2; KJV "the concision"), and expressed the wish that the troublemakers among the Galatians "would mutilate themselves" (ἀποκόψονται; Gal. 5:12; here the reference may be to the practice of emasculation, common in the Cybele-Attis cult, but by implication, to circumcision also).

W. L. REED

MUZZLE [חסם; φιμόω]. According to Deut. 25:4, it was illegal to put a muzzle on an ox while he was treading out grain on the threshing floor. The law is peculiar to Deuteronomy and is commonly regarded as a reflection of the humanity which is characteristic of that code. The prohibition was twice cited by Paul (I Cor. 9:9; I Tim. 5:18), who used it to illustrate the principle that "the laborer deserves his wages."

Jewish commentators, including Rashi, have suggested that the law applied to any animal doing work in connection with the production of foodstuffs. And yet it may be worth considering to what extent the ox received this treatment as a result of the fact that he was held in high regard in Israel, as in many surrounding cultures. He was a symbol of strength and fertility. However heretically in the minds of later generations, the golden calf had been at least emblematic of Yahwism in the kingdom under Jeroboam and his successors (I Kings 12:28 ff; II Kings 10:29; II Chr. 13:8), just as it had been to some of their ancestors in the wilderness (Exod. 32:1 ff). The fact

that oxen were used extensively in sacrificial rites in Israel (Num. 7:87-88; II Sam. 24:22; II Chr. 5:6; 7:5; etc.) may also be of some significance in this regard. H. F. BECK

MYNDOS mĭn'dəs [Μύνδος]; KJV MYNDUS. A city on the coast of Caria in Asia, noted for silver mines; the modern Gumushli. A letter is alleged to have been sent here, and to other cities and islands, including SICYON; DELOS; and COS, from the Roman consul Lucius to the benefit of the Jews, in 139 B.C. (I Macc. 15:23). If this is so, Myndos had some independence, and it would also have possessed a Jewish colony—the Jews being attracted probably by the commercial prospects of the silver trade. Myndos never achieved great importance. N. TURNER

MYRA mī'rə [τὰ Μύρα]. An important city of LYCIA; one of the six largest and most influential cities in the long-existing confederation of Lycian cities. Myra proper was situated on the River Andracus, *ca.* 2½ miles from the sea. Its port, with a good harbor, was Andriaca; but common usage included the port town in Myra. Under the Roman Empire, Myra was made the capital of the separate province of Lycia. The ruins at Dèmbre, the modern name of the site, include a large theater, many tombs, and inscriptions.

Acts 27:2-6 attests the importance of Myra for sea travel. At Caesarea in Palestine the centurion charged with taking Paul and other prisoners to Rome put them on a ship of ADRAMYTTIUM, a port of NW Asia Minor. The ship sailed N to Sidon, continued N past the E end of Cyprus and then W along the S coast of Asia Minor to Myra. Here the centurion took passage with his prisoners on an Alexandrian grain ship which had crossed from Egypt to Myra and planned to work its way W from there to Rome. In the E Mediterranean the prevailing winds were from the W, and grain ships regularly followed this route. Frequent sailing service between Lycia and Egypt, developed when the Ptolemies ruled Lycia, continued under Roman control.

In Acts 21:1, Codex D and some other authorities add the words "and Myra" after "Patara." Such a succession of stops was possible, but the limited evidence for the addition leaves doubt whether it is original. The Acts of Paul and Thecla have a legendary story of the preaching of Paul at Myra. In reality, nothing is known of the presence of Christianity in Myra in the first century. Nicholas, bishop of Myra under Constantine, became the patron saint of sailors, replacing a pagan deity at whose shrine sailors had earlier worshiped.

F. V. FILSON

MYRIAD [μυριάς]. Literally, ten thousand. Sometimes it signifies more generally "countless" or "numberless." In the RSV the Greek word is transliterated as "myriads" in Jude 14; Rev. 5:11; but in Luke 12:1; Acts 19:19; 21:20; Heb. 12:22; Rev. 9:16 it is translated differently.

B. H. THROCKMORTON, JR.

MYRRH mûr [לט, *lōṭ;* מר, מור, *môr;* Ugar. *mr;* Akkad. *murru;* Arab. *murr;* נשק, *nēšeq* (KJV ARMOUR, HARNESS); σμύρνα]. Fragrant substances derived from the exudation of various shrubs and trees.

While most translations have "myrrh" in Gen. 37:25; 43:11, the word (לט) is identified by many scholars with the fragrant gum of a species of *Cistus* (commonly called "rockrose"), the ladanum (not "laudanum"!) of ancient trade (Akkadian *ladunu,* Arabic *ladan*). Zohary (*see* FLORA § A7*j*) takes it to be the resin of *Commiphora opobalsamum* (L.) Engl. (*see* SPICES). It was an item of trade carried from Gilead to Egypt by the Ishmaelites (Gen. 37:25); and was one of the "choice fruits of the land" which Jacob had his sons carry to Joseph in Egypt (43:11).

Myrrh (מור, *môr;* σμύρνα) was the fragrant resin of *Commiphora myrrha* (Nees) Engl., found mostly in S Arabia. Apparently it was available in liquid (cf. Exod. 30:23; Song of S. 5:5, 13; "oil" in Esth. 2:12) as well as solid forms. That it was prized as early as the second millennium B.C. is clear from the Ras Shamra documents ("pitcher of oil of myrrh"; Ugar. 12:2, 8, 15; 120:15) and its apparent use in Egyptian embalming (cf. Herodotus II.86).

Myrrh was an important ingredient of the sacred anointing oil (Exod. 30:23). As an important ingredient of perfumes, it was used for beauty treatment (Esth. 2:12; cf. Song of S. 5:5) and for scenting clothing (Ps. 45:8; Prov. 7:17; Song of S. 1:13; 3:6), and appears in poetic symbolism (Song of S. 4:6, 14; 5:1, 13; Ecclus. 24:15). It was among the gifts given to the infant Jesus (Matt. 2:11). Jesus was offered "wine mingled with myrrh" (as an anodyne; Mark 15:23). Myrrh and aloes were brought by Nicodemus for Jesus' burial (John 19:39; cf. "spices" in Mark 16:1; Luke 24:1).

נשק (I Kings 10:25=II Chr. 9:24; KJV "armour," "harness") normally means "armor"; but here the LXX has στακτή, on the basis of which the RSV

Courtesy of Winifred Walker

94. Myrrh (*Commiphora myrrha*)

uses "myrrh." The next word is ובשמים *ûbhᵉsāmîm* ("and spices"), which is a good co-ordinate to "myrrh." It was therefore probably among the gifts given to Solomon.

The RSV translates μύρον "myrrh" in Rev. 18:13, but "ointment" (KJV) or "perfume" (Amer. Trans.) would be more accurate.

MYRTLE [הדס, *hᵃdhas*]. A leafy shrub, *Myrtus communis* L. Myrtle branches were included with other leafy branches for covering the booths at the Feast of Succoth (Neh. 8:15; cf. Lev. 23:40 and numerous references in the Talmud; *see* BOOTHS, FEAST OF). Myrtle growing in the wilderness and "instead of the brier" is part of the eschatological symbolism of Second Isaiah (Isa. 41:19; 55:13). An angel appeared to Zechariah in a vision of a man standing among myrtle bushes (not trees!) with horses (Zech. 1:8, 10-11).

The other name of Esther was HADASSAH (הדסה), the feminine form of the Hebrew word for "myrtle" (Esth. 2:7).

MYSIA mĭsh'ĭ ə [Μυσία]. The NW region of Asia Minor. Its extent varied considerably with different writers, but the boundaries generally set were the Aegean Sea on the W, the Hellespont and Propontis on the N, Bithynia and Phrygia on the E, and Lydia on the S. The E border was in the vicinity of Mount Olympus; the S border included Pergamum in Mysia. The region was not so fertile and prosperous as some other parts of Asia Minor. While the Mysians had a history reaching back to Homeric times—Troy was in the region later called Mysia—and enjoyed tribal freedom at times, the people of Mysia were never a definite or influential nation. In 133 B.C. the region was made a part of the Roman province of Asia. Mysian cities which appear in the NT are Alexandria Troas, Assos, Adramyttium, and Pergamum.

Acts 16:6-11 tells of Paul's first visit to Mysia. He had revisited Derbe, Lystra, Iconium, and, no doubt, "Pisidian" Antioch, and had been turned aside from preaching in the province of Asia. He had gone northward until "opposite Mysia" (κατὰ τὴν Μυσίαν), on its E side. Here, perhaps at Dorylaeum, where the roads parted, Paul and his companions at first intended to go N into Bithynia, where Greek cities were located, especially on the coast of the Euxine Sea. In some way they were turned from this plan by the "Spirit of Jesus." "So, passing by Mysia," without making it a field of intensive missionary preaching, they came to the port of Troas, where Paul received a specific call to preach in Macedonia. While this leaves no room for extensive mission work in Troas, possibly he won a few converts on this first visit. Paul later found an open door there (II Cor. 2:12), and still later visited Christians there and perhaps also at Assos (Acts 20:5-14).

MYSTERY. 1. Terminology. Μυστήριον (whether or not derived, as used to be said, from μυέω, "to close [the eyes]") seems to be in its earliest known occurrences a genuinely Greek religious term, denoting (generally in the plural) secret rites or the implements or teaching connected with them. Eventually it came, perhaps through metaphorical use, to mean more generally a secret of any sort, not necessarily religious.

Whether owing to chance or not, there was a similar Hebrew root, סתר, "to hide," yielding the noun מסתרים, "hidden things or secrets"; and inevitably, when the Greek word was transliterated into Semitic letters, the two were approximated. But the fact remains that the genuinely Hebrew word was not an exact equivalent of the Greek one, the Greek word having religious associations which the Hebrew did not so obviously possess; and it was perhaps not until biblical Greek adopted the word μυστήριον that the biblical vocabulary possessed a word meaning a "religious secret." Not that, even in the Bible, this word invariably has a religious connotation. In the wisdom literature it is sometimes used simply in connection with the sin of divulging secrets (e.g., Ecclus. 22:22; 27:16-17, 21). But, once it was in the Bible, it became especially a vehicle for conveying ideas peculiar to the biblical conception of revelation. In the Latin Bible, *sacramentum,* "an oath," which had associations with initiatory rites, is occasionally used for μυστήριον.

2. OT usage. In the Greek OT, μυστήριον occurs mostly in the books written in Greek or with lost or only fragmentary Hebrew originals—viz., Tob. 12:7, 11; Jth. 2:2; Wisd. Sol. 2:22; 6:22; 14:15, 23; Ecclus. 3:18 (some MSS only, derived from the [extant] Hebrew of vs. 20, סוד, "[secret] counsel"); 22:22; 27:16-17, 21; II Macc. 13:21. But in Dan. 2:18-19, 27-30, 47 (twice), it is used by the LXX for רז, which is said to be a Persian loan word meaning "a secret" (it occurs also in the Dead Sea Scrolls). The Aramaic participle מסתרתא, meaning "the hidden things," in Dan. 2:22 is rendered, not by μυστήριον, but by σκοτεινά (LXX), ἀπόκρυφα (Θ). Μυστήριον occurs in other Greek versions as follows:

a) Theod.: Dan. 2 (as above); 4:9—H 4:6, where the LXX is not extant (=רז, "again"); Job 15:8; Ps. 24:14—H 25:14; Prov. 20:19 (all=סוד, "[secret] counsel"); Isa. 24:16 (twice=רזי, *rāzî,* said to mean "leanness" or "wasting," and, if so, mistaken [possibly even by the Massoretes] for *rāz,* "secret").

b) Symm.: Isa. 24:16 (as above); Prov. 11:13 (=סוד).

c) Quinta: Ps. 24:14—H 25:14 (as above).

In these passages the LXX renders the Hebrew (or Aramaic) variously, if at all. Note that μυστήριον in Rev. 10:7 appears to represent סוד in Amos 3:7 (where the LXX has παιδεία, "instruction").

In several of the above occurrences, the word relates simply to ordinary "human" secrets. The RSV in the canonical books gives the following renderings: "mystery" in Dan. 2; 4; "council" in Job 15:8; "friendship" in Ps. 25:14; "secrets" in Prov. 11:13; 20:19; "I pine away" in Isa. 24:16 (רזי־לי). For

the Pseudep. and the Dead Sea Scrolls, see R. E. Brown (*bibliography*).

3. NT usage. In the NT the word is used exclusively in religious senses, which may be broadly classified as follows:

a) That closely connected (by a strange paradox) with REVELATION—viz., a divine plan, concealed from all except the recipients of revelation, or concealed until God's good time; or, in other words, a divine secret indeed, but one designed by God to be revealed: an "open secret" in some sense. The word used thus is almost equivalent to the Christian gospel. The following passages may be classed here:

Mark 4:11 (=Matt. 13:11; Luke 8:10). Those who have come to Jesus to ask the meaning of the parables are told that, whereas for those who are outside, everything is done "in parables," they, by contrast, have been "given the secret of the kingdom of God" (Mark 4:11). Matthew and Luke have: "given to know the secrets." (For the difference [the latter perhaps an accommodation to ecclesiastical interests], see the commentaries.) In Mark the meaning would appear to be that the secret being revealed to this inner circle is that, in some sense, Jesus himself in his ministry is to be identified with the kingdom of God. A revelation is in process of being given: the μυστήριον is being divulged.

Rom. 11:25: "Lest you be wise in your own conceits, I want you to understand this mystery, brethren: a hardening has come upon part of Israel, until the full number of the Gentiles come in." Here the mystery is a special aspect of the divine evangelic plan, as Paul sees it—the partial eclipse of Israel until the Gentiles are won. (Possibly this passage should be included in *b below*.)

Rom. 16:25-26: "the mystery which was kept secret for long ages but is now disclosed and through the prophetic writings is made known to all nations." The Pauline authorship and the meaning of the "prophetic writings" are disputed; but in general, this is a perfect example of the sense of the word "mystery" now being illustrated.

I Cor. 2:1, a variant reading for μαρτύριον, "testimony" (see RSV mg.). If "mystery" is here read, it must mean simply the gospel, the subject of the apostle's proclamation. This, at any rate, is clear in 2:7: "We impart a secret and hidden wisdom of God [θεοῦ σοφίαν ἐν μυστηρίῳ], which God decreed before the ages for our glorification." So in 4:1, the apostles are "stewards of the mysteries of God."

In Ephesians the mystery is, in particular, that aspect of God's evangelic plan which consists of the unification of the universe, including Jew and Gentile: "the mystery of his will, according to his purpose which he set forth in Christ as a plan for the fulness of time, to unite all things in him, things in heaven and things on earth" (Eph. 1:9-10); "the mystery was made known to me by revelation, . . . the plan of the mystery hidden for ages in God who created all things; that through the church the manifold wisdom of God might now be made known to the principalities and powers in the heavenly places" (3:3 [cf. vs. 4], 9-10). In Eph. 6:19 (cf. Col. 4:3) it is again simply the gospel.

In Col. 1:26-27; 2:2, the divine secret, long hidden but now divulged, seems to be boldly identified with Christ himself. But in 1:26-27 the expression seems, in fact, to be very close to the Ephesians idea: the mystery is "Christ in you" (i.e., the Gentiles), the "hope of glory"; i.e., it is that Christ is among the Gentiles no less than the Jews.

Once again, in I Tim. 3:9, 16, the "mystery of the faith" or "of our religion" seems to be simply the gospel.

So, too, in Rev. 10:7, the "mystery of God, as he announced to his servants the prophets," is to be fulfilled. It is the divine plan which is ultimately to be completed.

Finally, perhaps it is right to include here also the "mystery of lawlessness" (II Thess. 2:7), if this means a kind of satanic parody of God's mystery, a sort of demonic gospel. This is Satan's "plan," which has to be worked out before it can be ultimately destroyed and dispatched by Jesus at his coming (vs. 8).

In most of these instances, it is noticeable that "mystery" is coupled with words of manifesting and divulging. *See* REVELATION.

b) Another sense seems to be closer to a more private, exclusive, less generally to-be-divulged "secret," although it is still a religious secret.

It is possible that Rom. 11:25 (*above*) should fall here, as a special revelation given to the apostle.

At any rate, in I Cor. 13:2 it is something special; for it is useless even to "understand all mysteries" (i.e., to have reached an exceptionally high degree of religious insight), unless one also has love.

In I Cor. 14:2 the man who utters unintelligible sounds under the stress of religious experience "utters mysteries in the Spirit."

And in I Cor. 15:51, "Lo! I tell you a mystery" introduces what seems to be a special revelation about the coming of the Lord.

c) In Eph. 5:32 the phrase "This is a great mystery, and I take it to mean Christ and the church" appears to apply to the exegesis of the passage from Gen. 2:24 cited in the preceding verse. Mystery may thus signify the "inner meaning" of a passage whose more obvious and literal sense is something other. If so, here is an anticipation of the long history of "mystical" exegesis. Near to the same sense, in that case, may be Rev. 1:20: "As for the mystery of the seven stars . . . , the seven stars are the angels," and 17:5: "On her forehead was written a name of mystery: 'Babylon the great.' "

4. Conclusions. Thus, from its early pagan religious use in allusion to the Greek mystery cults, the word "mystery" moved, in nonbiblical usage, to a general, secular usage in the sense merely of "secret" (though in later pagan usage it is found again in the cultic context); but it was taken up by the literature of revealed religion for a special meaning in connection with God's "open secret," his revelation; and Christianity in particular used it to epitomize the gospel—hidden for long ages, to be divulged in the Incarnation, and even then hidden from all except those who used their ears to hear and their eyes to see. And, in a secondary degree, Christianity used it for special secrets divulged by God to chosen vessels, or for the inner meaning behind a phrase or a symbol. The way is thus prepared for the postbiblical usage in application to the sacraments. The Vulg.,

which renders most of the occurrences in Dan. 2 and in the NT by *mysteria,* occasionally uses *sacramentum* —viz., in Dan. 2:18, 30, 47 (second occurrence); 4:6; Tob. 12:7; Wisd. Sol. 2:22; 6:24 (*sic*); Eph. 1:9; 3:3, 9; 5:32; Col. 1:27; I Tim. 3:16; Rev. 1:20. The word perhaps offered a bridge from the sense associated with the oath of initiation to the sacramental connotation.

MYTH, MYTHOLOGY. In the narrower sense, a myth is a story about gods or other superhuman beings, or one told to account for a custom, institution, or natural phenomenon. In the broader sense, myth is that expression of the creative imagination which interprets the real in terms of the ideal, punctual events in terms of continuous situations. *See bibliography* § 1.

A. ***ANCIENT NEAR EASTERN MYTH IN THE BIBLE.*** Thanks to the rediscovery, in recent times, of considerable portions of Mesopotamian, Egyptian, Hittite, and Canaanite literature, it is now possible to recognize in the Bible several traces of ancient Near Eastern mythology. These appear in three main forms: (*a*) direct parallels; (*b*) allusions; and (*c*) survivals in figurative expressions. In all cases, they are accommodated to the religion of Israel by boldly transferring to Yahweh the heroic feats of the older, pagan gods. *See bibliography* § 2.

1. Direct parallels. Direct parallels to ancient Near Eastern myths are represented principally by (*a*) the fight of Yahweh against the Dragon; (*b*) the stories of Creation and Paradise; and (*c*) the tale of the Deluge.

a. The story of the Dragon. This story, pieced together from scattered passages in the prophetic and poetic books of the OT, tells how Yahweh primordially fought a monster variously termed Leviathan—i.e., "Coiled One, Wriggly" (Job 3:8; Ps. 74:14; Isa. 27:1); Rahab, "Arrogant" or "Rager" (Job 9:13; 26:12-13; Ps. 89:10; Isa. 30:7; 51:9-10); Tannîn—i.e., "Dragon" (Job 7:12; Ps. 74:13; Isa. 27:1; 51:9); Yam—i.e., "Sea" (Job 7:12; Ps. 74:13; Isa. 51:10; Hab. 3:8); or Nahar, "River, Stream" (Ps. 93; Hab. 3:8). The monster had several heads (Ps. 74:13-14); even the gods were alarmed by it (Job 41:25—H 41:17), but eventually Yahweh overcame it by hacking it to pieces (Isa. 51:9 [1QIs^a "smiting" it, as in Job 26:12]), transpiercing it (Job 26:13; Ps. 89:10; Isa. 51:9), crushing it (Ps. 89:10), or bludgeoning its heads (Ps. 74:13-14), at the same time discomfiting its allies (Job 9:13). According to another version, however, he merely kept it under restraint (Job 7:12), and it is destined, at the end of the present world, to break loose and renew the fight, though abortively (Job 3:8; Isa. 27:1; cf. II Esd. 6:52; II Bar. 3:8; Palestinian Targ. Num. 9:21-27; Shab. 30*b;* Sanh. 97*b;* Keth. 111*b;* Mandean Ginza, pp. 298, 419, trans. Lidzbarski).

All this is simply the Hebrew version of the story told in the Ugaritic Myth of Baal concerning the victory of that god over the draconic Yam (alias Nahar), the genius of sea and rivers; and this in turn finds further parallels in: (*a*) the Mesopotamian tale (Enuma Eliš) of Marduk's combat with Tiamat; (*b*) the Hittite tale of the conflict between the storm-god and the dragon Illuyankas (*Keilschrifttexte aus Boghazköi* III.7; *Keilschrifturkunden aus Boghazköi* XII.66; XVII.5-6; cf. *ANET* 125-26); (*c*) the Sumerian myth of Ninurta's triumph over the monster Asag; (*d*) the Egyptian myth of Re's fight against 'Apep (Book of the Dead XXXIX); and (*e*) Horus of Behdet's against "the Caitiff"; and (*f*) the Phoenician story of the primordial battle between Zas (i.e., Baal) and Ophion (cf. ὄφις, "serpent"), to which allusion is made by Apollonius Rhodius (*Argonautica* I.503 ff), Maximus Tyrius (*Dissertationes* XXIX), and Celsus (Origen *Contra Celsum* VI.42, etc.; cf. also Milton, *Paradise Lost,* book X, lines 570-72). Moreover, the story is portrayed on rock sculptures at Malatiyeh and Karatepe and likewise on many Mesopotamian cylinder seals. It also possesses more remote analogues in the Iranian tale of the rout of Aži Dahaka (Yasht 19.38-44; Bundahish 29.9), the Vedic tale of the subjugation of Vṛtra by Indra (Rig Veda I.32), the Greek tale of Zeus's fight with Typhon (Hesiod *Theogony* 820 ff; Aeschylus *Prometheus Vinctus* 351 ff), and, of course, the familiar legend of Saint George and the Dragon (located near Laodicea, in Syria!).

The parallels cover not only broad theme but also specific details. Thus, in the Ugaritic myth, there is likewise mention of Leviathan (*Ltn;* I*AB, i.1) and Tannîn (*Tnn;* I AB, vi.13), as also of Yam and Nahar (AB, *passim*), and the monster is called by the very same epithets as are applied to it in Isa. 27:

1—viz., "evasive" (ברח) and "crooked" (עקלתון). There too it is said to possess several (lit., seven) heads (I*AB, i.2-3), while six-headed and seven-headed dragons are not unknown to Mesopotamian literature (cf. E. Ebeling, *Keilschrifttexte aux Assur religiösen Inhalts* no. 6) and art (seal from Tell Asmar in the Oriental Institute, Chicago). In the sister versions, the dragon likewise affrights the gods: Ninurta at first flees from Asag, Anu from Tiamat (Enuma Eliš II.81-82), Indra from Vṛtra (Satapatha Brahmaṇa, I Khaṇḍa, 6 Adh., 4 Br.), and the gods in general before Typhon (Apollodorus *Bibliotheca,* I.6.3). Furthermore, the fate of the monster is portrayed in the same way as in the Bible. In Egyptian sources, it is likewise said to have been "sword-pierced" (*m d ś*) or transfixed by a harpoon; while in the Ugaritic version it is smitten on the head (III AB, 24) or "between the eyes" (III AB, 21, 25). Lastly, the idea that it was merely held captive, but destined again to break loose, features prominently in the Iranian version and is also presupposed in the Greek myth of Typhon.

The myth was probably designed in the first place to symbolize the annual subjugation of the swollen rivers and winter floods; both the Mesopotamian and Hittite versions were in fact recited at seasonal festivals—viz., at the feasts of Akîtu and Puruli respectively.

b. Creation and Paradise. These stories likewise hew close to ancient Near Eastern myth.

The notion that man was formed out of dust or clay (Gen. 2:7; cf. Job 33:6) occurs already in the Babylonian myth of Atraḫasis (*ANET* 99-100) and in other Mesopotamian texts (*Die Keilinschriften und das Alte Testament,* 3rd ed., p. 506); while among the Egyptians, he was said to have been fashioned by the potter-god, Khnum. *See* COSMOGONY § B2.

Similarly, the idea that man was formed to tend the garden of God (Gen. 2:15) accords with the statement in an ancient Assyrian myth (*Keilschrifttexte aus Assur religiösen Inhalts,* I, no. 4) that he was created to "carry the basket and seed-bag, direct the course of the runnels, water the soil, cause plants and green things to grow."

The concept of the tree of life is likewise a mythological relic, to which the scriptural writer has given a new turn. Mesopotamian glyptic often portrays a scene in which a king draws life and strength by touching a sacred tree, while Egyptian sculptures likewise show the pharaoh beside a sacred tree in the company of divine beings who promise him countless years, etc. Similarly, too, in the Celtic paradise of Avalon, gods and men partook of the life-giving nuts of the hazel tree. *See bibliography* § 3*a*.

Lastly, the cherubs (griffins) posted at the entrance to Eden (Gen. 3:24) doubtless derive from the familiar mythological dragons who guard the magic tree or the hidden treasure. *See bibliography* § 3*b*.

c. The Deluge. That the biblical story of the Deluge is dependent on earlier Mesopotamian myth is apparent from its affinities with similar stories in the Epic of Gilgamesh (*ANET* 93-94) and the Legend of Atraḫasis (*ANET* 104-6). There, too, an ark is built (Gilgamesh XI.24, 28-31; Atraḫasis X.7-12) and sealed with bitumen (Gen. 6:14; Gilgamesh XI.54, 65-66); the hero's family and livestock are placed in it (Gen. 6:19-20; 7:2-3, 7-9; Gilgamesh XI.27, 84-86; Atraḫasis C.6-10); the Flood comes both from above and from below (Gen. 7:11; 8:2; Gilgamesh XI.98, 102; Atraḫasis II.29-30; III.44-46); birds are dispatched (Gen. 8:6-12; Gilgamesh XI. 145-55); the ark grounds on a remote mountain (Gen. 8:4; Gilgamesh XI.140), and egress from it is followed by a sacrifice which the deity savors (Gen. 8: 20-21; Gilgamesh XI.156-61).

To be sure, the OT writers sometimes manipulate time-honored myths to fit their own outlook. Thus, while they take over from the Mesopotamians the idea that man was molded out of clay, they represent his function as that of ruling creation (Gen. 1:27; Ps. 8:6-9), not, as did the Babylonians, of performing menial chores for the gods. Similarly, while they retain the conception of a divine bow hung in the sky, they identify it with the rainbow and not, as did the Babylonians, with a constellation; and they take it to be a sign of God's promise not to send another flood (Gen. 9:12-15), rather than, as in other cultures, his victorious weapon hung in the sky as a warning to future upstarts. In the same vein, too, the Canaanite plague-god Resheph is accommodated to Israelite monotheism by being made a mere attendant upon Yahweh (Hab. 3:5), and even then he is more of a poetic figure of speech than a full-fledged deity.

2. Allusions. ***a. The revolt of the gods.*** Familiar throughout the ancient Near East was the story of a primordial revolt in heaven. This forms the central theme, e.g., both of the Mesopotamian Epic of Creation (Enuma Eliš) and of the Hittite myth of Kumarpi (*ANET* 120); and it is probable that it was also one of the major elements in the Ugaritic Poem of Baal. Moreover, it has well-known classical analogues in the revolt of Zeus against Kronos, and of the giant Titans against Zeus. OT allusions to this myth may be recognized in (*a*) Ps. 82:6-7, which speaks of a sentence of mortality and discomfiture imposed by Yahweh on certain upstart minor gods, or celestial beings, and (*b*) Isa. 14:12-25, where the arrogant king of Tyre is likened to a certain celestial character named Hêlal (LXX ἑωσφόρος; Vulg. *Lucifer;* RSV "Day Star"), who was eventually thrust down to the nether world. Moreover, it may be suggested that there is a further reference to it in Judg. 5:13*b*, where the defeat of the Philistines is portrayed in words which may perhaps be rendered: "Then was Yahweh's army [עם] marching, [this time] for me, against the Giants [עם יהוה ירד לי בגבורים]!"

Another version of the tale, which depicts the offense of the heavenly beings as that of consorting with human women, is related briefly in Gen. 6:1-4 and not infrequently in later, pseudepigraphic literature (e.g., Enoch 6:6; Jub. 4:15; Zadokite Document, A II.18; Genesis Apocryphon 1).

b. Star myths. The Israelites seem also to have inherited a number of star myths, for in Job 38:31-32 allusion is made to (*a*) the chains (מענדות; so read for MT מעדנות, which the KJV renders "sweet influences"!) which bind together the cluster of the Pleiades (כימה; cf. Akkadian *kimtu,* "cluster, group, family"); (*b*) the cords of Orion, which are evidently his "belt"; and (*c*) the Great Bear and her "children," which recall the Latin Septentriones (i.e., "seven oxen") and the Egyptian "seven cows following the

bull" as designations of the stars which accompany that constellation. Moreover, the Hebrew name of Orion—כסיל, "Fool"—seemingly implies a myth involving the widespread popular association of giants with dunderheads. *See fully* ARCTURUS; ORION; PLEIADES.

c. Hero myths. Traces of ancient Hebrew hero myths may be detected in the reference (Gen. 5:24) to Enoch, who "walked with God; and he was not, for God took him," and to Nimrod, the mighty (or giant) huntsman (10:8-9). Furthermore, the occasional use of the name David to denote the future messianic king (Jer. 30:9; Ezek. 34:23-24; 37:24; Hos. 3:5) probably reflects a version of the widespread myth that great national heroes (e.g., Arthur of Britain, Friedrich Barbarossa) do not die, but will return to their peoples in the hour of need. *See bibliography* § 3*c*.

The fact that Enoch is said to have lived 365 years (Gen. 5:23) has suggested to some scholars that elements of a sun myth may have been grafted upon the folk tale of that ancestral sage. Such mythological traits have been recognized also in the story of Samson (cf. שמש, "sun"). Here, however, caution is in order. It is quite unnecessary, e.g., to explain the shearing of Samson's locks as symbolizing the curtailment of the sun's rays at dusk, for the motif that a man's strength lies in his hair is, in fact, widespread in folk tale and is often associated with heroes who possess no solar traits whatsoever. Moreover, the equivalent of Hebrew Samson occurs as an ordinary proper name at Ugarit and elsewhere. *See bibliography* § 3*d*.

d. Myth in riddles? Further allusions to traditional myths are perhaps furnished by Prov. 30:4, where a number of riddles are propounded as examples of that "knowledge about divine beings" (דעת קדשים)—i.e., hagiology—of which the author professes himself ignorant. Thus, the question: "Who has ascended to heaven and come down?" may allude to Etana, who, in the familiar Mesopotamian story (*ANET* 114-18), aspired thither on the back of an eagle, only to fall into the sea. Similarly, the question: "Who has gathered the wind in his fists [LXX 'bosom']?" may refer to some ancient Near Eastern analogue of Aeolus (cf. *Odyssey* X.1-76); and "Who has established all the ends of the earth?" to some counterpart of Atlas, or of the Hittite-Hurrian Upelluri (*ANET* 112), who supported the world on his shoulders.

e. The dying and reviving god. Apart from these more or less overt allusions, attempts have been made to detect in the OT traces of the ancient Near Eastern myth of the dying and reviving god (i.e., Tammuz, Osiris, Adonis), who allegedly suffered an annual passion and resurrection, or slept in the nether world during the dry summer, to wake with the return of vegetation. It has been claimed that this figure underlies (*a*) the Suffering Servant of Isa. 53, and (*b*) the psalmists' several appeals to Yahweh to "wake" (Pss. 35:23; 44:23—H 44:24; 59:4—H 59:5); that the Song of Songs is an adapted version of ritual chants used in the cult of the divine lovers Ishtar and Tammuz, and that Hosea's imagery of Yahweh's marriage to Israel is inspired by the myth and ritual of the "sacred marriage" between a god and a goddess as a means of ensuring fertility.

All these theories, however, must be treated with caution. The Suffering Servant may be derived more plausibly from the misshapen man or condemned felon (e.g., the *bêl ḫiṭṭi* of the Babylonian Akîtu ceremonies [*Vorderasiatische Abteilung, Thontafelsammlung* 9555, rev. 10-11]) and the φαρμακός in Greece, who sometimes served as a human scapegoat at ancient seasonal festivals and the scourging of whom was believed to bring health and fertility to the community as a whole. Moreover, the similarities with the Tammuz texts are, at best, vague and superficial. Similarly, the invocations to Yahweh to "wake" are more probably connected with a common ancient practice of waking the god every morning. This has therefore nothing to do with an identification of the Hebrew god with Tammuz.

All love songs everywhere are bound to sound alike, and those of the Ishtar-Tammuz cult would necessarily imitate the type of thing familiar to their human worshipers. The similarity, therefore, proves nothing; and, as a matter of fact, even closer affinity exists with ancient Egyptian erotic poetry (*ANET* 467-68) and even with the chants of modern primitive peoples.

The marriage of Yahweh and Israel in Hosea symbolizes only a tie of affection and loyalty (חסד), and is not represented as a means of ensuring fecundity. It is simply another expression of the basic covenantal relationship (ברית), and finds its counterpart in the constant use of the term "go a-whoring" (זנה) in the sense of "commit apostasy" (e.g., Exod. 34:15-16; Isa. 57:3; RSV "play the harlot").

It should be observed also that the very existence of an ancient Near Eastern myth revolving around the theme of a god who annually dies and revives has recently been called into question, for it would now appear that the story of Tammuz really ran on somewhat different lines. *See bibliography* §§ 3*e-g*.

f. The wondrous child. A further vestige of ancient myth has been recognized in the famous prophecy of Isa. 7:14: "A virgin [עלמה] shall conceive and bear a son," and in Isaiah's subsequent description (9:6-7) of an infant prodigy destined to wield sovereignty and bring eternal peace. This has been linked, with great probability, to the fairly widespread ancient myths—familiar especially from the Iranian lore of the Saoshyant (Savior) and from Vergil's Fourth Eclogue—of the virgin-born hero and of the Miraculous Child who is to usher in the New Age. *See bibliography* § 3*h*.

3. Myth in figurative expressions. Poetic imagery is everywhere a rich repository of traditional myth, and such reminiscences of more ancient popular lore are not wanting in the Bible. A few examples are:

a. Thunder. Thunder is the voice of God (II Sam. 22:14, etc.), as in the Ugaritic texts (II AB, v.8, vii. 29-35; I Aqhat, i.46), the Tell el-Amarna Letters (147.14-15), and frequently in Mesopotamian literature and elsewhere. *See bibliography* § 3*i*.

b. Wind. The wind is winged (II Sam. 22:11; Ps. 104:3; Hos. 4:19), as in the Mesopotamian myth of Adapa (*ANET* 101), the Sumerian wind-eagle (IM. DUGUD and IM.GIG), and as in the widespread belief that storms are caused by the flapping of the wings of a giant bird. *See bibliography* § 3*j*.

*c. **Sun.*** The sun, too, is said in Mal. 4:2—H 3:20 to be winged—a notion which harks back to the familiar Near Eastern "winged solar disk," so often portrayed in Egyptian and Mesopotamian art, as also among the Hittites and Hurrians, and on monuments from Susa. *See bibliography* § 3*k*.

*d. **The mountain of the north.*** In Isa. 14:13 the gods are said to hold assembly on a mountain in the north; and in Ps. 48:2, Zion is apostrophized as this mountain. So in the Ugaritic myths, the gods convene in the "recesses of the north" (*ṣrrt Ṣpn*)—a concept which recurs in Mesopotamian, Egyptian, Indic, and Iranian mythology and is mentioned also in the book of Enoch (24:3; 25:1). Often, indeed, the abode of the supreme god is celestially located, in pagan myths, near the North Star. *See bibliography* § 3*l*.

*e. **The land flowing with milk and honey.*** The familiar description of the Promised Land as one "flowing with milk and honey" portrays it, in mythological terms, as an earthly paradise, for honey is a medium of immortality, and rivers of milk and honey are a common feature of that blissful realm. Rivers of milk also characterize the future Golden Age (Joel 3:18). *See bibliography* § 3*m*.

*f. **The Book of Fate.*** In Ps. 139:15-16, mention is made of a book kept by God in which a man's days are prescribed before his birth. Somewhat similarly, the Hittites believed that certain goddesses called "the Inscribers [*Gulses*]"—analogous to the Schreiberinnen and Norns of Teutonic folklore, the Fata Scribunda mentioned by Tertullian (*De anima* C.39), and the Roman Parcae—inscribed the course of men's lives (*Keilschrifturkunden aus Boghazköi* XII 85, rev. 5 ff; XXXIII 118, 17-19; XXXIV 53, ii.14, etc.); while a Punic inscription of the third-second century B.C. appears to allude to the gods' recording a man's name and mark "from the beginning." *See bibliography* § 3*n*.

*g. **Demons.*** There are also in the OT sundry references to such demonic figures of ancient mythology as LILITH, the night hag (Isa. 34:14), and RESHEPH, the Canaanite god of pestilence. The latter is described as accompanying Yahweh on his warlike sorties (Hab. 3:5), and his "sons"—i.e., the plague demons—as hovering in the air (Job 5:7). *See* DEMON.

*h. **Obscured allusions.*** Lastly, it may be noted that our increasing knowledge of ancient Near Eastern mythology has enabled us to recover in the OT certain allusions previously concealed beneath popular distortions of language or the inevitable errors of scribes. Thus, in Ps. 68:4, where the God of Israel is described as רכב ערבות—i.e., "[he] who rides through the deserts"—it is now possible to recognize a distortion of the more ancient *Rkb 'rpt*, "[he] who rides upon the clouds," a common designation of Baal in the Ugaritic myths. Similarly, from the unintelligible words of Hos. 8:6: "For *from Israel* [מישראל], and he —a workman made him, and he is no god," we can now restore, by mere regrouping of the letters, an effective gibe at the chief god of the Canaanites, called by his standard Ugaritic name—viz.: "For *who is El, the Bull* [מי שר אל]? He is one whom a workman made, and he is no god!"

4. Myth in history and apocalypse. Another type of mythological allusion is represented by the tendency of OT writers to portray historical events in language reminiscent of traditional myths, thereby envisaging them as the punctual realizations of ideal situations. Thus, in the song celebrating the crossing of the Red Sea (Exod. 15), the safe passage of Israel is depicted as Yahweh's leading his people to the mountain of his inheritance (i.e., estate), where, in a permanent abode (מכון) upreared by his own hands, he will reign forever (vss. 17-18). In this we may see an allusion to what is said of Baal in the Ugaritic myth of his victory over Yam; thereby he acquires eternal kingship (III AB, A 7-10), ensconcing himself in a palace on Mount Ṣapân, described as the mount of his inheritance (V AB, C 28-29). Similarly, in the Mesopotamian myth, Marduk is enthroned in the newly built shrine of Esagila, after routing Tiamat and her allies (Enuma Eliš, iv.14, 28; vi.50-72).

This tendency appears especially in apocalyptic passages where, in accordance with the developing notion that history is a cyclic rather than a linear process (*see* COSMOGONY), the future Golden Age is frequently portrayed as a repetition of primordial or primeval events recorded in traditional myth and saga. Thus, both in the Pseudep. and in Revelation, the eventual "renewal of the world" will involve a renewed combat against the Dragon and against the rebellious forces of Satan or Belial; while in Deutero-Isaiah, the restoration of Israel from exile is depicted as a duplication of its former redemption from Egypt and of its passage through the wilderness to the Promised Land.

5. Date of the mythological passages. Most of the mythological passages of the OT occur in books usually dated during or after the Babylonian exile. It was therefore held by nineteenth-century scholars that such material was picked up by the Jews in the course of their captivity. In the light of more recent discoveries, however, this view is untenable. Not only do the Ras Shamra Texts show clearly that much of it goes back to indigenous Canaanite sources, but there is also abundant evidence that as early as the second millennium B.C. the myths of the various ancient Near Eastern peoples circulated freely beyond their native borders. We have, e.g., both Hittite and Hurrian versions of the Mesopotamian Epic of Gilgamesh, and an Egyptian version of the Canaanite myth of Baal (*ANET* 17-18); while a fragment of the former has been found in the Palestinian city of Megiddo, and of the Mesopotamian myths of Adapa and of Nergal and Ereshkigal among the Tell el-Amarna Tablets.

As to why this mythological heritage is more evident in the later than in the earlier portions of the Hebrew scriptures, two explanations have been advanced. According to W. F. Albright (*see bibliography*), this was due to a general archaistic trend which swept the Near East in the seventh and sixth centuries B.C. and which is represented especially by the archaeological activities of Ashurbanipal (669-633) and Nabonidus (556-539) in Mesopotamia, and by the literary and architectural styles effected by the Saite kings (Twenty-sixth Dynasty, 660-625) in Egypt. In Israel, it found expression especially in the

work of the Deuteronomists, and was doubtless continued through the desire of the Jews, both during the Exile and in the ensuing troubled period, to recapture the glories of the past. On the other hand, according to J. Morgenstern (*see bibliography*), the ancient pagan myths were adopted and adapted by the Jews of the Restoration in a deliberate effort to proselytize the "heathen" and to give the ancestral faith a more universal or cosmopolitan complexion. To these theories may be added the further consideration that mythological material is everywhere more naturally embodied in poetry than in other forms of literature; and OT poetry just happens to be mainly of this later date. *See bibliography* § 4.

B. ***MYTH AND RITUAL.*** Modern anthropological studies have shown that myths are commonly recited among primitive peoples at seasonal festivals, to explain and validate an accompanying ritual. This discovery has inspired the theory that several of the literary myths that have come down to us from antiquity may represent refined and sophisticated versions of such more primitive compositions, and that their successive incidents may reflect, basically, the sequence of elements in a seasonal rite. The theory has been applied, e.g., to the elucidation of Greek tragedy and comedy, to certain hymns of the Rig Veda, to the Elder Edda, and even to early Chinese festal chants. In the field of ancient Near Eastern literature, it has been proposed that the Ugaritic myth of Baal is basically the counterpart of a ritual pantomime (*sacer ludus*) enacting the seasonal conflicts between rain, subterranean waters, and aridity, and that it was originally designed for an autumnal festival inaugurating the wet season. A similar explanation would apply to the Mesopotamian Epic of Creation (Enuma Eliš) and to the Hittite myth of Illuyankas (*ANET* 124-25), both of which celebrate the victory of the primary god over a dragon and both of which were, in fact, recited at seasonal festivals.

Along the same lines, it has been suggested that some of the OT psalms may really be mythological chants designed for the New Year celebration. Those, e.g., which begin: "Yahweh has become king" (RSV "The Lord reigns") may have accompanied a ritual pantomime enacting the annual victory of that god over the floods and the powers of chaos, and his subsequent installation, like Baal or Marduk, as king of the earth. Some psalms (e.g., Pss. 29; 93) might even be blatant adaptations of earlier Canaanite hymns.

In appraising this hypothesis, however, it is important to draw a much sharper distinction between the ultimate origin of a literary genre and that of a particular composition. While it is plausible enough that certain types of literature were conditioned in the first place by the exigencies of rituals for which they were designed, these types may well have survived as fossilized literary conventions long after the rituals themselves had died out. Accordingly, it no more follows that an OT psalm celebrating Yahweh's defeat of the Dragon or his subsequent enthronement actually accompanied a ritual ceremony than that every performance of the children's game of blindman's buff actually involves the selection of a victim for human sacrifice—the rite to which folklorists have traced it! In other words, we must distinguish between myth which survives in poetry, and myth which survives in ritual.

A word should be said also concerning the fundamental relationship of myth and ritual. This has been variously formulated. According to some scholars, the myth is simply a later explanation of the rite; according to others, the opposite is the case and rites were essentially enactments of myths. The truth would seem to be, however, that neither is actually an offshoot of the other; rather are they the "long-shot" and "close-up" views of the same thing. Ritual presents a situation in its immediate, myth in its ideal, terms. When, e.g., the king is ceremonially deposed and subsequently reinstated in primitive rituals, this represents and epitomizes the seasonal demise and revival of his actual community; but in the corresponding myth, it will be portrayed in ideal terms as the death and resurrection (or withdrawal and restoration) of a durative, preterpunctual god. Similarly, when the king takes a sacred bride as an immediate measure to promote fecundity, he merely punctualizes an ideal fertilizing "marriage in heaven."

C. ***MYTHOLOGY IN BIBLICAL EXEGESIS.*** It has been pointed out by Ernst Cassirer that myth issues from an activity of the human mind or psyche distinct from, and independent of, that which produces philosophy or speculative thought, and that its most natural medium is artistic fancy. Accordingly, we must expect to find in biblical poetry a constant undercurrent of mythopoeic imagery, suggestion, and association. Furthermore, the comparative study of folk literature has shown that traditional sagas tend likewise to be tinged with mythological coloration, historical persons (e.g., Arthur of Britain) and events being thus assimilated to ideal, mythic characters and situations.

A growing awareness of this fact has led several modern scholars (notably those of the so-called "Scandinavian school") to construe diverse utterances of the OT prophets in a mythic rather than a solely historical context—to see, e.g., in reference to the expulsion of enemies to the desert an allusion to the fate meted out to the rebels against God in some ancient myth. It may be objected, however, that this method of interpretation fails to distinguish properly between metaphor and literary borrowing. The figures and images used in poetry may indeed be the same as those which are more elaborately worked out in literary myths, but this does not mean that wherever they are employed, they are necessarily taken over from such myths. A poet might say, e.g., that a man's fortunes have been eclipsed, but this does not imply specific identification of him with the hero of a standard solar or lunar myth! Once again, the common mainspring of poetry and myth must be recognized; the former does not have to be derived from the latter.

Equally precarious is the older tendency to apply comprehensive theories of mythology to the stories of the OT—e.g., to construe them as the detritus of solar, lunar, astral, vegetation, or "world-cycle" myths, or to see in the patriarchal and monarchical

narratives mere historicizations of standard mythic heroes like Gilgamesh or Heracles. In the first place, such theories all too often assume that the same astral figures were recognized everywhere—which is simply not true—and that, even when they were, the same myths were told about them. Secondly, these comprehensive systems are themselves little more than armchair constructions of ancient and primitive data, for there is often no assurance that the myths which are cited for comparative purposes actually bore to those who invented and recited them the interpretations imposed on them by nineteenth-century anthropologists. Lastly, many of the parallels adduced from primitive cultures turn out to be anything but primitive, being really mere distortions of Bible stories told by missionaries, or (conversely) native tales transmogrified by missionary rapporteurs!

It is well known that the NT stories of the Virgin Birth and of the death and resurrection of Jesus possess parallels in ancient religious mythologies—e.g., in what is told about the Saoshyant in Iranian lore and about so-called "dying and reviving gods" in classical sources. For liberal Christians this has posed a perplexing problem, commonly resolved along one of two main lines. Either (*a*) the unique historicity of the gospel narratives is held to be quite independent of mere mythological analogues; or (*b*) an attempt is made to strip the character and identity of Jesus of all "mythic" traits and to validate his mission solely by his human experience and the ethical qualities of his teachings.

In considering this problem, however, one should bear in mind that events of the past can, in general, be religiously significant and relevant in the present only insofar as they are lifted out of the specific contexts of their occurrence and taken as symbols of continuing, universal situations. And to effect such a translation from the punctual to the ideal is precisely the function of myth. Myth, therefore, is, in the last analysis, the supreme vehicle of the Word, as indeed of all religion—the element which gives them eternal life and pertinence. The exodus of the Israelites from Egypt, e.g., would be for the modern Jew no more than an antiquarian datum, were it not transfigured by myth into a symbol of his people's continuous experience, an evidence of God's continuous design and providence, and an exemplification of all men's continuous progress out of their Egypts, forward to their Sinais, and thence, through trial in the wilderness, to the entry of their children into their inheritance. By the same token, the story of Jesus becomes religiously significant to a Christian only when the man of Nazareth is regarded as incarnating and "punctualizing" an ideal, durative figure, variously represented, in terms of traditional mythology, as the Son of God, the Son of man, or the Christ (Messiah), and as symbolizing the constant role of God in man—traduced, yet triumphant. Such religious significance is in no way impaired because it is conveyed through antique symbols, born of other and less sophisticated times. For if the Bible is the Word of God, it is a word just as much as it is of God; it must speak perforce in the idiom of its day and age, and the Spirit must assume the calculated risk that it may at times be smothered by the mortal clay into which it is breathed. "In many and various ways God spoke of old to our fathers"; and in articulating his message, he has, indeed, often chosen "what is foolish in the world, to shame the wise." *See bibliography* § 5.

***MYTH IN THE NT** [ὁ μῦθος]. An invented story, fable, tale, legend (I Tim. 1:4; 4:7; II Tim. 4:4; Tit. 1:14; II Pet. 1:16). The term carries with it the classical Greek significance (since Pindar and Herodotus)—i.e., the opposite of LOGOS or truth. The Vulg. translates the term with *fabula*. In the LXX it does not appear. The obvious NT understanding is that myth is to be rejected as a form of dangerous or foreign teaching, even a form of HERESY.

Modern historians of religion use the word as a technical term for that literary form which tells about otherworldly things in this-worldly concepts. Thus myth expresses truth in a hidden or indirect language, not in an open and direct way. Therefore, it cannot be objectified. It is agreed among NT scholars that earliest Christianity used myth and mythological patterns in its writings. Yet there is no consensus on how far one must, or is permitted to, go with this definition, and there is the open question concerning how to interpret myth in order to preserve the deeper truth in it.

Bibliography

1. The cosmological conception of the NT. In general, this is carried over from the Jewish tradition. It reflects the concept of antiquity and presupposes the COSMOGONY of the OT: a tripartite world consisting of heaven above, hell beneath, and earth between. In other words, the conception of the universe is not scientific but mythological. Such is pagan in its design, though transformed through Israel's introduction of monotheism (cf. Mark 9:48; Luke 16:23 ff). While Greek and Jewish mythology gave detailed descriptions of the world of Hades and of the place of death, the NT writers are restrained. The same is true for heaven and eternal life. As Satan and demons are at home in Hades or Gehenna, God is enthroned in heaven with the risen Christ and surrounded by angels (Mark 8:38; 10:37; 13:27; 14:62; Acts 7:55). Only Revelation (*see* REVELATION, BOOK OF), perhaps because it uses Jewish sources, gives a fanciful design of an otherworldly city (cf. Rev. 4; 21:1–22:5). In order to recognize the difference from later times, one may compare with the Shepherd of Hermas (*see* HERMAS), Vis. III, Sim. IX.

The earth also is scarcely seen in the NT in mythological terms, and a nature mythology is lacking. The primary interest is in man, living between divine and demonic forces (*see* DEMON), open to and threatened by the world above and beneath. This is the point where mythical patterns often are used. Angels are God's servants and proclaim coming events (Matt. 1:20; 2:13; Luke 1; 2) or act as God's hand (Matt. 28:2-3) or interpret the questions of the present (Matt. 28:5 ff). They punish the disobedient man (Acts 12:23) and protect the obedient believers in Christ (Matt. 12:7 ff). On the other side there are demons under the leadership of Satan, tempting man and often regarded as the cause of sickness. Thus the healing miracles of Christ are understood as his victory over Satan and demons and as proving his divine power. Sinners and unbelievers alike are in the bondage of Satan (I Cor. 5:5; 10:20-21; 11:10; etc.) and even Peter, after his confession, "You are the Christ" (Matt. 16:16), when he tried to hinder Jesus' way to Golgotha, must hear the words: "Get behind me, Satan!" (Matt. 16:23).

The question is how far this cosmic mythology expresses a cosmological dualism or is taken up only as the common picture-language of the age. The historical origin of cosmological dualism seems to be the Iranian myth, which enters Judaism not later than the second century B.C. How far it has been transformed into an ethical dualism or preserved its cosmological basis is still an open question and is connected with an adequate understanding of the DEAD SEA SCROLLS. In early Christian literature one feature is obvious in spite of all mythology: God is the creator and only designer of the universe and its history (cf. Matt. 7; Rom. 9–11; etc.). Nothing happens or will happen without his omnipotent will. Combined with this OT monotheism, which expresses itself in the pattern of prophecy and fulfilment and the acting of God in the election and rejection of men, is the Jewish belief that history leads to a goal designed and planned by God. Thus we must conclude that the cosmic mythology of the NT is used as a means of common language and does not demand a metaphysically dualistic conception of its meaning.

2. The eschatological myth. Here the problem becomes most crucial, because Iranian and Jewish traditions come together. When we read in Matt. 24:19 ff: "Immediately after the tribulation of those days the sun will be darkened, and the moon will not give its light, and the stars will fall from heaven, and the powers of the heavens will be shaken; . . . and they will see the Son of man coming on the clouds of heaven with power and great glory," we have a combination of Iranian astrology and Jewish mythology and a picture used since earliest Christian times (cf. I Thess. 4:16-17). No doubt, earliest Christianity believed in the actual and factual occurrences of this prophecy.

The problem of myth and mythology is whether or not the point of eschatology is inherently bound to its mythological setting. There can be no question as to whether Jesus proclaimed the kingdom of God as coming (cf. Matt. 6:10; Mark 1:15; etc.). Albert Schweitzer's thesis that this was an error of Jesus which must be eliminated has been answered by NT theologians in the following way: The point of the proclamation of the kingdom of God is not the mythological frame but the religious truth that God arrives out of the future and will establish his reign. "How" we describe this reign of God is of minor significance—the "that," and not the "how," is the kerygmatic truth. Whether there is a postponement of the eschatological event, whether Jesus erred or

not, is without theological importance. The truth of God's coming action is decisive. Not only the Synoptic gospels, but also Paul, the letters of Peter, Hebrews, and—not the least—the book of Revelation, set forth the myth. A cosmic drama is expected. Since the change of aeons (*see* TIME) has already taken place, the Antichrist soon will come, and apocalyptic signs are present or just around the corner. The eternal reign is at hand. The human reckoning of its arrival as a result of this-worldly development, Jesus explicitly rejects (Luke 17:20-21). Yet there are pictures of its future appearance as when Jesus refers to a heavenly meal (Matt. 8:11; Luke 14:15; often taken up in the paintings of Roman catacombs), or when Paul speaks of the believers who will participate in the final act of judgment (I Cor. 6:2), or when he gives the sequence of eschatological occurrences in I Thess. 4. All mythological patterns include, of course, an idea of history and a specific idea of God.

3. The christological myth. This developed after the crucifixion and resurrection of Jesus. In order to explain the significance of this event, earliest Christianity took up a great variety of designs. The faith in Jesus as the Messiah and Son of God, as redeemer and coming judge of the world, led to the pictures of his supernatural birth (Matt. 1; Luke 2), to the empty-tomb stories, to the idea of a DESCENT INTO HADES (I Pet. 3:19). The main intention is to demonstrate Jesus' cosmic and universal role. NT Christology shows a plurality of interpretations, though it seems to be rather difficult to determine a clear historical development. On the one hand, Jesus appears as the adopted Son (at his baptism [Mark 1:9 ff]; after or together with his resurrection [Rom. 1:3 ff]). On the other hand, his pre-existence is affirmed (Phil. 2:6 ff), and he participated in God's creation of the world (Heb. 1:2). OT prophecies are projected into the life of Jesus, and oriental and Gnostic speculations are related to it. In Rev. 12 we have a complete mythical picture of the Christ event. Wonders are changed into miracles in order to prove the divinity of the historical Jesus.

The question has often been discussed whether Jesus of Nazareth is a historical person at all or simply a mythical figure. Today there is agreement that we have Christian and non-Christian sources enough to reject the doubts of Jesus' historicity. On the other hand, nonhistorical features were added to his life, so that an increasing tendency can be seen to emphasize the supernatural and miraculous aspects.

4. Demythologizing. The widespread mythology of the NT creates difficulties in teaching and preaching. Theological responsibility forbids the method of merely eliminating all those passages which we regard as bound to a prescientific concept of a tripartite world. Thus the German scholar Rudolf Bultmann in a very influential paper published in 1941 demanded "demythologizing" or, what means the same in positive terms, "existentialist interpretation."

a. Problem and program. The problem may be defined by the question: How can we preserve the theological essence of the Christian faith—i.e., that God acted with men in and through Christ Jesus—without demanding the acknowledgment of the mythological pattern of its biblical presentation? Can we retain the deeper truth of the resurrection of Jesus as Christ without taking the emptiness of the tomb as a historical fact; the truth of Jesus as Son of God without acknowledging the virgin birth; the truth of the coming kingdom of God without taking literally the apocalyptic panorama of the "Son of man" returning "on the clouds"? Should not we stress the stumbling-block character of the gospel where it belongs—i.e., in the proclamation of Christ Jesus as the crucified and risen Lord—yet not establish obstacles where a time-bound language is mythologically conditioned?

The program of demythologizing starts with the insight that all mythology expresses a truth, though in an obsolete way. It is impossible and meaningless to sanction the preaching or dogmatizing of the mythological elements of the Bible: impossible because the concept of the universe has radically changed since the first century, and no modern man can honestly believe in the world of spirits above and below; meaningless because most of the mythical elements of our NT are pagan in their origin and not an inherent part of the Christian message. In order to lay bare the deeper truth and to overcome the literal misunderstanding, a consistent method must be used. The task is a hermeneutical one. *See* INTERPRETATION.

The method of an "existentialist interpretation" presupposes that the mythologies do not have their very point in that which they tell in objective and anthropomorphic terms about God or otherworldliness, but in the specific self-understanding of man. It confesses itself in the form of time-bound clothes and must be rediscovered by interpretation. The leading question in dealing with myth must be: What is principally said about man's existence before God, of man's self-understanding in the midst of this world and history?

Three questions are often raised against this approach: (*a*) Do we not artificially modernize and thus falsify the NT message by interpreting myth? Answer: All interpretations throughout history are the result of a personal dialogue with the texts. The involved existence of an interpreter can never be excluded; he participates in the problem of his sources and tries to understand it for his own situation. Furthermore, the NT not only permits but demands the interpretation of myth and begins this task itself. The demand is obvious when we take seriously the often contradicting mythical designs. With the Synoptic writers and Revelation, e.g., we find an imminent eschatological expectation. Yet with Paul (e.g., II Cor. 6:2) and especially with John (e.g., John 5:24-25; 11:25-26; 12:31) there is a transformation of it which stresses the "now," the present "kairos." The futuristic, apocalyptic end drama is widely replaced by the conviction that every moment contains the possibility of being the eschatological one in our crisis before God. The same is the case with christological diversities in which only a consistent method of interpretation can overcome the plurality of pictures and overlapping titles that are rooted in different traditions.

b) Can we ever dismiss the mythical language and

symbolic pictures as a vehicle of religious thought? Is not myth a cipher, making transparent that which in its essence is transcendent? Answer: Demythologizing does not intend to eliminate the mythopoetical language, but to clarify the kerygmatic content of myth by a defined terminology and by a consistent method. Symbols are needed; yet they must be understood as symbols and not misunderstood as fundamental definitions.

c) Since myth is conceived as worldly speech about nonworldly things and as an objective presentation of a non-objectifiable transcendence, how can demythologizing preserve the proclamation that God acted with man in Christ Jesus? Is not the speaking of an action coming from God, concrete in Jesus, necessarily mythological? Answer: The speaking of God as acting with man is neither symbolic nor mythological, but means an objective fact, though perceived by faith only. Yet it involves analogy, thinking of the God-man relationship in terms analogous to the relation between a human "I" and "thou." We express by this way of speaking that God is a reality outside our own selves, outside any faith in his absolute being, although he reveals his being only in a personal revelation, encountered in faith.

b. Critical evaluation. Bultmann's approach and program of demythologizing is the result of an uncompromising biblical criticism. It takes up the heritage of a theological liberalism at the beginning of the twentieth century and the basic ideas of the "theology of crisis," but leads beyond the positions of both by avoiding their shortcomings. The primary intention is hermeneutical and combines with it a missionary aim—namely, to set forth the existential content of the NT Kerygma (*see* PREACHING) for modern man. While earlier attempts demythologized by allegorical or typological exegesis—thus forcing the texts—and others escaped the difficulties by means of elimination or arbitrary selection, here a consistent interpretation is used.

The critics of a more fundamentalistic background reject demythologizing by saying that the objectivity of sacred facts (virgin birth, miracles, empty tomb, and physical resurrection) is dissolved in subjectivity. They disregard the hermeneutical problem which is involved in all exegetical work. Critics of a strictly liberal or unitarian background say that the demythologizing approach is not radical enough, since the kerygma is never touched, and that consistent remythologizing should be demanded. They overlook that there must be a theological presupposition, given in the event of Christ Jesus as such, which is needed in order to preserve faith as "the one faith."

One may question the actual theological results of Bultmann's demythologizing in its details, which he presents in outline. Yet his statement of the problem and even his program provide a fruitful stimulation for exegesis as well as for a preaching of the Bible.

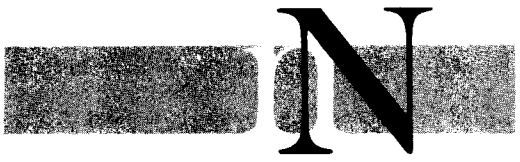
E. DINKLER

MYTILENE. Classical and modern form of NT MITYLENE.



NAAM nā'əm [נעם] (I Chr. 4:15). One of the descendants of Caleb, son of Jephunneh, of the tribe of Judah.

NAAMAH nā'ə mə [נעמה, pleasant, delightful, sweet]. **1.** Sister of Tubal-cain (Gen. 4:22). *See* LAMECH 1.

2. Ammonitess wife of Solomon; mother of Rehoboam (I Kings 14:21 [LXX A Νααμα; LXX B Μααχαμ], 31 [cf. LXX B]; II Chr. 12:13). *See* REHOBOAM. L. HICKS

3. A village of Judah in the Shephelah district of Lachish (Josh. 15:41). Though the name lingers on in 'Araq Na'aman, the modern location is probably at the nearby Khirbet Farad, between Timnah and Eltekeh. V. R. GOLD

NAAMAN nā'ə mən [נעמן, pleasantness]; NAAMITES —mīts. The name occurs in an Ugaritic genealogy, and the word *n'm* is a common term for "charm" or "loveliness" and an epithet of heroes in that language. The reference in Isa. 17:10 to the fertility-cult practice of planting PLEASANT PLANTS (נטעי נעמנים) suggests that the name may have been an epithet of ADONIS.

1. An obscure Benjaminite (Gen. 46:21; I Chr. 8:4, 7), the eponymous ancestor of the Naamites (Num. 26:40).

2. Commander of the army of the king of Aram (Syria) who was cured of leprosy by the prophet Elisha (II Kings 5). The kingdom was that of Damascus (vs. 12) and the king probably Ben-hadad II (*ca.* 850 B.C.; 8:7). The name of the Israelite king in the account (5:5-8) is unknown, and it is impossible to date the story precisely.

The exact nature of Naaman's leprosy is not known, since the biblical term covers several types of disease and even household mold or mildew (Lev. 13–14; *see* LEPROSY). It must not have been highly contagious, since neither he nor Gehazi, upon whom the blight subsequently fell (II Kings 5:27; 8:4), was isolated from society. There is a curious mixture of motifs surrounding the disease and its occasions in this story. Naaman was reported leprous without the disease being interpreted as a punishment for moral evil; while the transfer of the malady to Gehazi, under the power of Elisha, was the retribution for his designing greed. No moral responsibility was laid upon Naaman as the concomitant of his new-found health. He was led, however, to confess spontaneously his faith in the God of Israel, by whose power his cure was effected, as an exclusive loyalty, albeit qualified somewhat by the demand of court etiquette that he give lip service to his Syrian national god (5:18).

The interplay of motives and attitudes is rich and vivid throughout the account. The general's Israelite maidservant took compassion upon him in his distress, even though she was a war captive (5:2). She seemed interested only in his cure. Elisha, however, was concerned primarily to demonstrate his own power as a prophet of Yahweh (5:8). Once healed, Naaman seemed preoccupied simply with the grateful desire to acknowledge the sole godhead of Yahweh (vss. 15, 17). His unquestioning gratitude, of which Gehazi took advantage, is in marked contrast to the Israelite king's suspicion (vs. 7*b*). Gehazi surprises us in the sequel (8:5) by extolling the powers of the prophet who cursed him with leprosy.

A strange blend of the universal and the local characterizes Naaman's conception of God. On the one hand, he swore that he would worship only the Lord, who alone is God (5:15-17); but, on the other hand, he apparently believed that sacrifice to Yahweh could be offered only on Israelite soil. He therefore took the two mules' burden of earth back to Syria with him (vs. 17). The idea that Yahweh was God of the whole cosmos but administered some historical affairs through the agency of members of a heavenly court seems to have been current in the period of the Israelite monarchy (cf. Deut. 32:8-9 LXX; I Kings 22:19-22; Ps. 82). The gods of the nations were probably identified by many with these lesser heavenly beings.

The kind of international hospitality in medicine that is illustrated here was apparently common in the ancient world. Ramses II of Egypt offered medical aid to a Hittite princess, and a physician and exorcist were sent from Babylon to the Hittite king Hattushil (*ca.* 1275 B.C.), according to documents found in the modern era.

It has frequently been held that the reply of the Israelite king to Naaman's request: "Am I God, to kill and to make alive, that this man sends word to me to cure a man of his leprosy?" (II Kings 5:7), is evidence of a belief in the divinity of kings in ancient Israel, here modified by a later editor. Such an interpretation strains the text. The healing, or, indeed, life-giving (cf. 4:32-37), power of Elisha was not considered a mark of his divinity. Therefore, the king's exclamation was implicitly an oversimplification of the current belief. He might better have exclaimed: "Am I God, or a prophet of God . . . ?" Greater powers, of a superhuman sort, were attributed to prophets in Israel than to kings.

Parallels between the healing miracles of Jesus and those of Elijah and Elisha have often been drawn (*see* MIRACLE). Naaman's cure was alluded to by Jesus as an example of God's gracious concern for the non-Israelite (Luke 4:27).

NAAMATHITE nā'ə mə thīt [נעמתי]. A resident of Na'ameh, perhaps Djebel-el-Na'ameh, in NW Arabia. The term is used in the OT only of Zophar (Job 2:11; 11:1; 20:1; 42:9), one of the friends of Job.

NAARAH nā'ə rə [נערה, girl]; KJV NAARATH —răth in Josh. 16:7. Alternately: NAARAN —răn [נערן] (I Chr. 7:28). **1.** One of the two wives of Ashhur, a man of Judah (I Chr. 4:5-6).

B. T. DAHLBERG

2. A city on the E border of Ephraim, not far N of Jericho (Josh. 16:7), the first city of Benjamin. It lay in the fertile plain near the Jordan, one of the most densely populated regions of Canaan. It is the Naara of Josephus (Antiq. XVII.xiii.1). In Roman times it was called Noaran, and there is a reference in the Midrash to the proverbial hostility between its inhabitants and those of Jericho. Eusebius calls it Noarath and states that it was five Roman miles N of Jericho.

The site of Naarah has generally been considered to be at or near 'Ain Duq, at the foot of the mountains NE of Jericho. In 1918, during World War I, a shellburst opened up a buried synagogue, which was excavated by the École Biblique et Archéologique Française of Jerusalem in 1921. It was apparently built in the fourth or fifth century A.D. and has a fine mosaic floor with a zodiac, an ark of the Law, and other figures. N. Glueck (*see bibliography*), however, notes that no early remains have been found at this spot and suggests instead Khirbet el-'Ayash, near the Wadi el-'Auja, which is definitely as early as the Israelite period and more nearly five miles from Jericho than 'Ain Duq is.

Bibliography. N. Glueck, *AASOR*, vols. XXV-XXVIII, pt. 1 (1939), pp. 412-13. S. COHEN

NAARAI nā'ə rī [נערי] (I Chr. 11:37). Son of Ezbai, and one of the members of the company of Davidic Mighty Men known as the "Thirty." In the parallel catalogue he is called Paarai the Arbite (II Sam. 23:35).

NAASHON. KJV alternate form of NAHSHON.

NAASSON. KJV NT form of NAHSHON.

NAATHUS nā'ə thəs [Λάθος (B), Νααθος (A)] (I Esd. 9:31). One of the sons of Addi who put away his foreign wife and children; possibly a variant form of ADNA in the parallel Ezra 10:30.

C. T. FRITSCH

NABAL nā'bəl [נבל, fool, churl]. A wealthy Calebite. His rude treatment of David's demand for provisions as a compensation for the protection his flocks had received would have spelled disaster had it not been for the astuteness of his wife, Abigail, who took it upon herself to propitiate David with generous supplies (I Sam. 25).

Nabal resided in Maon but pastured his large flocks of sheep and goats in Carmel (now el-Kurmul) on the edge of the wilderness of Judah. As he was celebrating the shearing of his sheep, David, whose band of followers appears to have protected the flocks of Nabal from the predatory raids of the Bedouins, sent ten of his men to collect "payment" for this service. Nabal not only categorically refused to give the messengers anything, but also grievously insulted David and his followers. Taking four hundred of his men with him to avenge this effrontery, David was met by Abigail, who by ample stores of food, as well as by graciousness of manner and personal charm, dissuaded David from his contemplated revenge. Her husband, she said, was incorrigibly insensible; indeed, Nabal ("churl") was his name, and churlishness (נבלה) was with him (i.e., his nature; I Sam. 25:25). When Nabal was informed of his wife's action on the morrow after his nocturnal debauch, he suffered a stroke and died within ten days. Shortly thereafter David took Abigail for his wife (I Sam. 27:3; 30:5; II Sam. 2:2; 3:3). E. R. DALGLISH

NABARIAH năb'ə rī'ə [Ναβαρίας; Vulg. *Nabadias*] (I Esd. 9:44); KJV NABARIAS —əs. One of those standing upon Ezra's left hand as "he read aloud in the open square." J. C. SWAIM

NABATEANS năb'ə tē'ənz [Ναβαταῖοι] (I Macc. 5:25; 9:35); KJV NABATHITES năb'ə thīts. An Arab people playing an important role in the history of Palestine and the neighboring countries in the last centuries B.C. and the first A.D. They are not mentioned by name in the OT or the NT, but Paul relates that he barely escaped arrest in Damascus on the orders of the governor of King Aretas IV (II Cor. 11:32; a somewhat different version of this event is in Acts 9:23-25); in another place (Gal. 1:17) he speaks of journeying into Arabia before returning to Damascus, by which is meant, not the Arabian Peninsula, but the territory of the Nabateans.

Up until modern times the only information about the Nabateans came from the works of such ancient writers as Diodorus Siculus, Strabo, and Pliny the Elder, which have proved to be inaccurate in many respects, and the notices of wars between them and the Jews given in the works of Josephus. It was not until 1812 that Burckhardt succeeded in reaching and describing the wonders of Petra, the Nabatean capital in the biblical Edom. In subsequent years considerable progress was made in the deciphering of the Nabatean inscriptions, which are mostly of a funerary or votive nature. It was not until the 1930's and after, however, that a thoroughgoing archaeological survey of the Nabatean territory yielded much more definite information as to the Nabatean civilization and the extent of their kingdom.

1. History. The early history of the Nabateans is comparatively unknown. Attempts to identify them with the Ishmaelitic group of NEBAIOTH have generally been rejected on the ground that this name is spelled with a *Tau* (ת) and that of the Nabateans with a *Ṭeth* (ט). The original home of the Nabateans was in NW Arabia, as can be seen by the fact that their remains are found as far as El-Heger (Medain Salih), *ca.* 250 miles SE of Petra. From there they came, perhaps as early as the sixth century B.C., to occupy the territory of the Edomites, who were pushed up into the S of Judah; it is not known whether this came about by armed conquest or as a

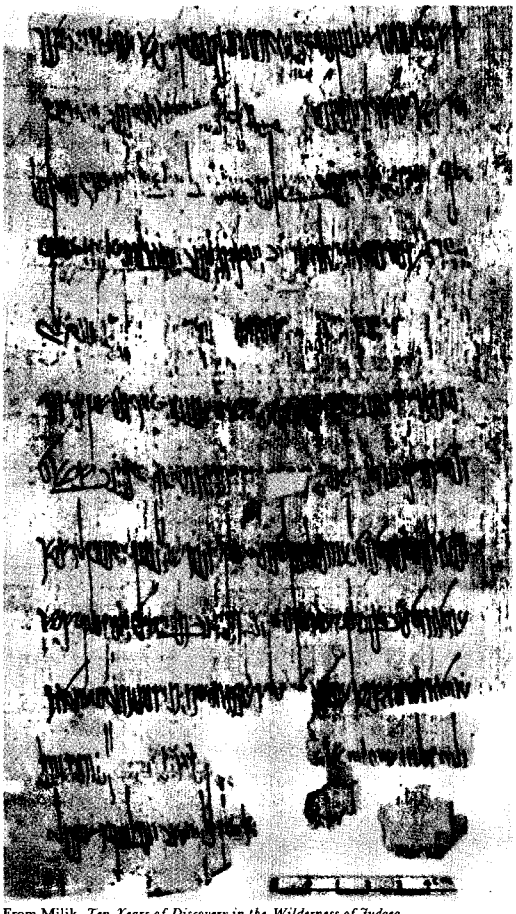
result of steady infiltration. By the fourth century B.C., as is seen by archaeological evidence, they had settled all of Edom and Moab and had occupied the Wadi el-Arabah and the S part of the Negeb. They took over in these territories the fortress system of the original peoples and extended it to the S and the E, and in the succeeding centuries they built such strongholds as Abde, Kurnub, and Sbeita in the Negeb region. At first they were nominally subject to Persian rule, but they gradually attained an independent position, which they retained after the conquest of Alexander the Great (333 B.C.).

The first definite date in Nabatean history is 169 B.C., when Jason, one of the contenders for the office of Jewish high priest, vainly sought sanctuary with Aretas, the "tyrant" of the Nabateans (II Macc. 5: 8). A second Aretas is mentioned as reigning in 96 and trying to intervene in the dynastic wars of Syria (Jos. Antiq. XIII.xiii.3). From that time on, the names of the Nabatean kings and the probable time of their reigns are known: Obodas I (95-87); Rabel I (*ca.* 87); Aretas III (87?-62); Obodas II (62-47); Malichus I (47-30); Obodas III (30-9); Aretas IV (9 B.C.–A.D. 40); Malichus II (40-70); Rabel II (70-106). During the greater part of this period there were wars between the Nabateans and the Jews; for though at first the former helped the latter in their struggle against the common Syrian enemy, later territorial and economic rivalry soon brought the two peoples into conflict. One war, indeed, was caused by Herod Antipas' divorce from the daughter of the Nabatean king in order to marry his niece and sister-in-law, Herodias (Jos. Antiq. XVIII.v.1). The fortunes of these wars swayed to and fro, but the general result was that the Nabateans established themselves in the N part of Transjordan, to the E of the Jewish Perea and the Greek Decapolis. In 85 B.C., Aretas III was summoned by the citizens of the free city of Damascus to rule over them, and the Nabateans may have remained in power until 65, when Pompey occupied the city. *Ca.* A.D. 37, Caligula again gave the city to the Nabateans, and they remained there till the beginning of the reign of Nero, *ca.* 54. Thus the Nabatean kingdom consisted of a N and a S part; the S part, limited on the N by a line drawn E to W through Medeba and on the E by Bayir Wells, was thickly settled by the Nabateans; the N part had merely Nabatean governors. The connection between the two was the Wadi Sirhan, in the desert E of Palestine, a trade route under Nabatean control.

After the death of Rabel II in 106, Trajan annexed all the Nabatean kingdom, probably to secure his S flank in his projected war against the Parthians. From that time on, the Nabateans ceased as an independent nation, though their prosperity continued for a while; it is even possible that Philip the Arab, Roman emperor from 244 to 249, was a Nabatean, as he was born in Bostra in the Hauran. In the course of time, however, the loss of independence and the disasters which befell the Roman Empire had their effect; the Nabateans lost their identity and disappeared among the other inhabitants of the country.

2. Civilization. Before their entrance into Palestine the Nabateans were a typically Arab group, living in tents, traveling about on camels, and getting their subsistence from dates and the flesh of animals. With their entrance into the territories of Edom and Moab, their life changed. They inherited the trade routes of the Edomites, and their caravans now traversed the country from Arabia to the SE, to Damascus to the N, and to Gaza and Alexandria to the W, whence they were transshipped as far as Asia Minor and Italy. The most important source of their prosperity, however, was their intense devotion to agriculture. They utilized every source of water supply, building dams and cisterns to store up the water in the wadis and from the rains; they were so successful that the population in the areas settled by them was the greatest at any time in history. They reached out into the stretches of the Negeb that before their time had been but thinly populated, and filled them with settlements; in fact, the roads which they made through that area were just as much to connect their cities as to facilitate trade. They continued to work the copper and iron mines of the Edomites, and formed port cities at Aila on the Gulf of Aqabah, and at Negra (Agra) and Leuké Komé (Hauara) on the Red Sea.

Their language must originally have been a form of Arabic, but the inscriptions, which come from the



From Milik, *Ten Years of Discovery in the Wilderness of Judaea* (London: SCM Press, 1959; U.S.A.: Alec R. Allenson Inc.)

1. Earliest known Nabatean papyrus, a deed about property titles (*ca.* A.D. 100)

latter period of the kingdom, are written in Aramaic, which had become the universal tongue of Palestine, which shows that they learned to use it as their native language; while the fact that some of the inscriptions are partly in Aramaic and partly in Greek indicates that many were familiar with the Koiné that was widespread after the conquest of Alexander. The alphabet that they used in their Aramaic inscriptions is a distinctive one; it has letters similar to those of ancient Hebrew, but made almost rectangular and connected frequently by ligatures at their bottom lines; it is thus an intermediate stage between the uncial square Hebrew-Aramaic character and the cursive writing of the later Arabs. A number of Nabatean papyri of the first century A.D. have been found in the Qumran neighborhood, revealing for the first time the written form of their script. They appear to be contracts and indicate that at that time Nabateans and Jews were living closely together. Fig. NAB 1.

The religion of the Nabateans took the same course as that of the early Israelites in that it added to its own deities those of the countries they conquered. Their supreme god was always Dushara (דושרא); others were Allat, the Arabian mother-goddess, Ara, and several others. In the course of time they began also to worship Hadad, the storm-god; Atargatis, the fish-goddess;* and Gad, the god of luck. Later, in the syncretism of the times, they began to identify their gods with those of the Greeks: Dushara with Dionysius or Zeus, Hadad with Zeus, Gad with Tyche.* The kings, beginning with Obodas I, were regularly deified, like the Ptolemies; like the latter, they tended to marry their sisters, whose portraits are found frequently with theirs on coins. Figs. NAB 2, 3.

In addition to being clever traders and skilled agriculturists, the Nabateans were fine artists. Their pottery, remarkably thin and beautifully decorated, surpasses any in Palestine before their time. Their statuary, with its well-cut reliefs in plant designs, and especially their tombs cut out of the solid rock at PETRA and other places, bear witness to the skill of their sculptors.* Though they have left behind them no literature, the genius of the Nabateans is demonstrated by the engineering feats and the artistic remains that still attest to the high degree of their civilization. Figs. NAB 4, 5.

Bibliography. There are no books that give the complete story of the Nabateans. J. Cantineau, *Le Nabatéen* (1930-32); A. Kemmerer, *Pétra et la Nabatène* (1929), supply the information known in their time. Later archaeological information is found in N. Glueck, *The Other Side of the Jordan* (1940), pp. 158-200; and throughout his "Explorations in Eastern Palestine," *AASOR,* vol. XIV (1934); vol. XV (1935); vols. XVIII-XIX (1939); vols. XXV-XXVIII (1951). S. COHEN

NABONIDUS năb'ə nī'dəs [Lat. *form of* Ναβουνάϊδος, Λαβύνητος, *etc.;* Akkad. *Nabû-na'id,* Nabû is

awe-inspiring]. The last king of Babylon (555-539 B.C.).

Although a variety of historical sources cover the reign of Nabonidus, very little more than the most salient facts is known, and the key to a real understanding of the unusual happenings of this final phase of Babylonian history is still lacking. Not only Herodotus but also Xenophon (*Cyropaedia*) and Josephus (*Antiquities*) discuss the events leading to the fall of Babylon to the Persians. There are also two passages from the lost work of the late Babylonian historian Berossus, who wrote in Greek on that subject—not to speak of the book of Daniel—which reflect this critical period in many ways. As to cuneiform sources, we have a number of quite unique documents which in themselves bespeak the extraordinary personality of Nabonidus. Apart from conventional foundation documents referring to the rebuilding of sanctuaries, etc., and from about sixty very broken lines in a chronicle, we have three texts that describe the background and activities of Nabonidus from widely differing viewpoints. These are, first, a basalt stela which contains his own report on his rise to kingship and which has been termed, not without reason, an apologia; then a memorial inscription coming from Harran in Upper Syria, in which his mother tells the story of her life; and, lastly, a damaged tablet that contains a political poem directed against Nabonidus and which is very revealing as to the political situation during the last days of Babylon before the conquest by Cyrus. It should be noted, furthermore, that a new stela has recently been found in the ruins of a mosque near Harran, in which were used stones taken from the temple of Sin erected by Nabonidus. Its text deepens, rather than solves, the mystery surrounding him. Under circumstances to which Nabonidus himself referred in his autobiographical inscription only cursorily and with obvious reluctance, when he was a military commander, in his sixties, he was made king of Babylon. We do not know what political forces brought Nabonidus to the throne, thus terminating the short reigns of the three successors of Nebuchadnezzar II: his son Evil-merodach (561-559), his son-in-law Neriglissar (559-555), and his grandson Labashi-Marduk (555).

Nabonidus was a native of Harran, where his father and mother seem to have been high Assyrian officials, and his sympathies in the crucial question of Assyrian policy toward Babylonia were clearly on the pro-Babylonian side, as references to Sennacherib as the destroyer of Babylon and to the conquest of the Assyrian Empire by the Medes, in the just-mentioned text, indicate. Nabonidus soon after his accession left his capital for the W; in fact, he was absent from the New Year's Festival for nearly ten years—a fact which the chronicle marks every year with resentful consistency. His sojourn in the W was taken up by minor military operations in Syria (Hamat); the rebuilding of the sanctuary of Sin in Harran, upon which his building inscriptions dwell with special care; a short stay in the Anti-Lebanon, where the king fell sick for some time; and the advance against and conquest of Adummu and the oasis city of Tema' in NW Arabia. For reasons still unknown, Nabonidus made the latter city the center of his activities in Arabia, and he stayed there for many years, visiting the larger towns, among them even Jatrib, later Medina (see Harran stela). Explanations of this long stay in Arabia, ranging from sentimental reasons to considerations of international policies, have been offered, but for none can any proof be found. The interest of all the rulers of the new Chaldean dynasty in the Phoenician cities and in overland trade, which became more evident of late, suggests an explanation in that direction. The fact that Nabonidus made his son Belshazzar ruler of Babylon and commander of the main part of the army when departing westward indicates that he was guided by careful planning rather than by spontaneous decisions. The length of the absence is perhaps even more startling than the travelings of a Babylonian king along the caravan roads of W Arabia.

Very little is known about the situation in Babylon. Some kind of understanding which seems to have existed between Nabonidus and Cyrus at the beginning of his reign must have come to an end when the latter defeated his most powerful enemy, Astyages the Median. With the subsequent defeat of Croesus and the fall of Sardis (546 B.C.), Cyrus became the most powerful king of the ancient Near East, and Babylon was in mortal danger. We know from the chronicle that Nabonidus did eventually return to Babylon, but the cuneiform sources are silent about the years between the fall of Sardis and the actual attack of Cyrus on Opis and Sippar (538); for this we have only Greek sources, which are not very reliable. In some desperate last move, Nabonidus seems to have attempted to bring all the images from the temples of Babylonia into the capital, but the chronicle stresses that the images of Borsippa, Cutha, and Sippar did not come. After the fall of Opis, Ugbaru, the governor of Gutium, with the Persian army entered Sippar and Babylon without a fight. While Nabonidus fled, Cyrus entered occupied Babylon to the jubilation of the population. It should be kept in mind that the chronicle itself, as well as the so-called Cylinder of Cyrus, not to speak of the poem against Nabonidus, is definitely pro-Persian and must be assumed to be a distorted report on the entire reign of Nabonidus. The reasons given for this strange attitude are somewhat too obviously religious to be fully acceptable. Nabonidus, whose religious sympathies seem clearly to have been favorable to the cult of Sin in its older and quite antiquated forms, is consistently represented as an impious innovator with sacrilegious intent, to be contrasted with Cyrus, who was praised for his piety and tolerance. Still, the large number of building inscriptions, inscribed bricks, etc., of Nabonidus demonstrate that he was as concerned with the traditional care of sacred sites as any other king of the last dynasty, and that such work went on in the sanctuaries of Babylonia in spite of the absence of the king. It is quite possible that Nabonidus was steeped in the tradition of the Assyrian concept of kingship and that this caused friction in Babylonia, where the king had traditionally no part in the religious activities of the great sanctuaries; or that his personal piety, which speaks out from many of his inscriptions, set him at odds with the formalized religion of his kingdom. The reinauguration of the office of an *entu* (high priestess) of Sin in Ur, for which he rebuilt a special

sanctuary in the temple and in which he installed his own daughter, may represent only one example of his attitude toward established cults.

It should be finally mentioned that his unprecedented absence from his capital, as well as other still undetermined unconventional acts of Nabonidus, gave rise to the legend of a mad king of Babylonia, which is reflected in Dan. 4 (although transferred to Nebuchadnezzar) and in a Hebrew literary work of which some small fragments have been found in Qumran.

A. L. OPPENHEIM

NABOPOLASSAR năb'ə pə lăs'ər [Akkad. *Nabû-apal-uṣur,* Nabû protect the son!]. King of Babylon (626-605 B.C.); first king of the Chaldean Dynasty; father of Nebuchadrezzar II. Of the twenty regnal years of Nabopolassar, all but the years 4-9 are mentioned in the several tablets containing the chronicle of the Neo-Babylonian period. Nabopolassar seems to have been a Babylonian general of the Assyrian king Sinsharishkun. He rebelled in the very year in which the latter succeeded his father, Ashurbanipal. After an unsuccessful siege of Nippur, which was held by its Assyrian garrison, Nabopolassar had to retreat toward Uruk; but he was soon able to enter Babylon, whose inhabitants had just defeated an Assyrian contingent marching against them. After Nabopolassar had become king of Babylon and another Assyrian attack had failed to reach even Sippar, he began to take the large cities one by one, Nippur in 622, Uruk in 623. In his tenth year we find Nabopolassar advancing along the Euphrates River, where Assyrian control was clearly on the wane. He still was rather wary of any encounter with Assyrian troops, but it can be gleaned even from the terse remarks of the chronicle that the military potential of Nabopolassar's army was increasing. An attack on Asshur, the old capital of Assyria, in 615 failed. In 614 Asshur fell to the Medes, but the army of Nabopolassar—intentionally or not—came too late for the battle. On that occasion he met the king of the Medes, Cyaxares, and established an alliance with him, which turned out to be of great political importance. The Medes apparently left the remnants of the Assyrian Empire to Nabopolassar, while they were to take the spoils of Nineveh. It is possible that a marriage between Nabopolassar's son Nebuchadrezzar and the daughter of the king of the Medes was to seal this alliance, which proved a boon to the new Babylonian Empire. Without fear of any attack from the mountain tribes, Nabopolassar could now compel all the former vassals of Assyria, as far as Palestine and Cilicia, to pay tribute to him. The next year (612) saw the fall of Nineveh, in which Nabopolassar fought side by side with his ally. In the annual campaigns of the next years Nabopolassar succeeded in dislodging the leftovers of the Assyrian army from Harran and in preventing their efforts and their Egyptian allies' efforts to regain that city. Then the Babylonian king directed his attention to the N, to keep the inhabitants of the foothills of the Zagros Range from moving into the fertile plain, now without Assyrian military protection. In 606 Nabopolassar again took up the Euphrates front, where the Egyptian hold on Carchemish posed a threat to the entire Western part of his newly won empire. There Babylonia met with success only when Nebuchadrezzar, the crown prince, acting for his ailing father, achieved the conquest of Carchemish and drove the Egyptian army back home in the year of the death of his father (605).

In his inscriptions Nabopolassar represents himself as a pious man who rose from low status to kingship, but he refers with pride to his victory over Assyria.

NABOTH nā'bŏth [נבות, *perhaps from a stem cognate of* Arab. *nabata,* to sprout]. Owner of a vineyard in Jezreel adjacent to the country palace of king Ahab (I Kings 21). Ahab sought to extend his estate by purchasing the vineyard, but Naboth refused because of his obligation to maintain the land as a family inheritance. Jezebel, Ahab's queen, deplored the king's pouting meekness in this encounter and proceeded to secure the land for him by devious means. Naboth was stoned to death on a false conviction of blasphemy brought by a court under Jezebel's control (vss. 8-14). The prophet Elijah condemned Ahab for this crime (vss. 17-20*a*), prophesying that the king would die at the place of Naboth's death.

Jehu interpreted his killing of Joram, son of Ahab, as the fulfilment of Elijah's oracle (II Kings 9:21-26). This event took place outside Jezreel. Most commentators believe that I Kings 21:20*b*-29 is a late editorial addition to the account of Elijah's curse of Ahab, through which the initial malediction (vss. 17-19) and the ultimate facts of the fall of Ahab's house (II Kings 9-10) were made to correspond.

Some interpreters have held that Ahab had a collateral right of inheritance to Naboth's vineyard, which he could legally exercise after the owner's death. There is no evidence, however, to contravene the view that the land was appropriated for the crown by simple royal confiscation. Elijah was surely correct in denouncing a double crime (I Kings 21:19).

J. M. WARD

NABUCHODONOSOR năb'ə kō dŏn'ə sôr. Douay Version form of NEBUCHADNEZZAR.

NACHON. KJV form of NACON.

NACHOR. KJV form of NAHOR in Josh. 24:2; Luke 3:34.

NACON nā'kŏn [נכון] (II Sam. 6:6); KJV NACHON. The owner of a threshing floor near which Uzzah was smitten of God, during the transfer of the ark of the covenant from Baale-judah (Kiriath-jearim) to Jerusalem. The parallel passage

in I Chr. 13:9 reads "Chidon" instead of "Nacon." The place was called subsequently PEREZ-UZZAH.

G. A. BARROIS

NADAB nā′dăb [נדב, (Yahweh is) willing *or* liberal; *an abbreviation of* נדבאל *or* (ו)נדביה; Apoc. Ναοβάς]; KJV Apoc NASBAS năz′bəs in Tob. 11:19; AMAN ā′mən in Tob. 14:10. **1.** Eldest of the four sons of Aaron (Exod. 6:23; Num. 3:2; I Chr. 6:3—H 5:29); always associated with Abihu, Aaron's second son.

With Moses and Aaron, Abihu, and seventy of the elders of Israel, Nadab took part in the ceremony of the ratification of the covenant at Mount Sinai (Exod. 24:1, 9 ff). This account belongs to the J source.

Afterward he became a priest (Exod. 28:1). Later tradition repudiated both Nadab and Abihu because they "offered unholy fire before the LORD" (Lev. 10:1; Num. 3:4). As a result they were consumed by fire (Lev. 10:1-7; Num. 26:61). The expression "offered unholy fire" occurs only in connection with this event, and probably means that Nadab and Abihu offered what was contrary to the express command of God. The nature of the actual offense, however, remains obscure. An old tradition explains the story on the ground that they offered unholy fire while under the influence of wine, but such an explanation is very unlikely. The source of this tradition is almost certainly the command in Lev. 10:9 forbidding Aaron and his sons to drink wine or strong drink when they went into the tent of meeting. Both brothers died without offspring (Num. 3:4; I Chr. 24:2).

2. A Judahite of the family of Hezron; descendant of Tamar, daughter-in-law of Judah (I Chr. 2:28, 30).

3. A Benjaminite, son of Jeiel and Maacah; brother of Kish, who was the father of King Saul (I Chr. 8:30; 9:36).

H. B. MACLEAN

4. King of Israel *ca.* 901-900 B.C.; son and successor of Jeroboam I; murdered by Baasha.

He is said to have reigned for two years (I Kings 15:25); but if he began to reign in Asa's second year (vs. 25), and Baasha succeeded him in Asa's third year (vs. 33), it is clear that he can have occupied the throne for only one year and part of a year.

The only noteworthy event recorded for his reign was the siege of GIBBETHON by the Israelites (I Kings 15:27). This was a Philistine city in the territory formerly occupied by the Danites (Josh. 19:40-46). It has not been identified with certainty but may be the modern Tell el-Melat, W of Gezer. No reason is given for Nadab's attack on this city, but from the Israelite point of view its capture must have been considered important, for it was again the object of attack in the reigns of Elah and Zimri (I Kings 16:15). In the course of the siege a revolt broke out in the army, led by Baasha. This resulted in Nadab's death and the extermination of the house of Jeroboam (15:29). The prophecy of Ahijah the Shilonite had been fulfilled (14:10-11).

Nadab's murder after such a short reign indicated how unstable was the political situation in the N kingdom. The usual notice of burial is lacking in the case of Nadab, presumably because of his assassination. The reference to his capital is likewise omitted.

5. Nephew of Ahikar. When Tobias returned with Sarah, his bride, Nadab and his uncle came to the marriage ceremony, which "was celebrated for seven days with great festivity" (Tob. 11:18-19).

Though the texts contain many variations in the name (e.g., Ναβάς, Nabal, Laban), all of them difficult to account for, Nadab is now thought to be identical with the Nadab of Tob. 14:10-11. There Tobit, as part of his dying counsel, bids his son remember "what Nadab did to Ahikar who had reared him, how he brought him from light into darkness, and with what he repaid him. But Ahikar was saved, and the other received repayment as he himself went down into the darkness. Ahikar gave alms and escaped the deathtrap which Nadab had set for him; but Nadab fell into the trap and perished."

In each of the above instances, A and other MSS read "Aman" ('Αμάν), making it apparently a reference to Haman, the villain of Esther, and Mordecai.

Bibliography. J. R. Harris, *The Story of Ahikar* (1898), pp. xxix, xiv.

J. C. SWAIM

NADABATH năd′ə băth [Ναδαβαθ] (I Macc. 9:37); KJV NADABATHA nə dăb′ə thə. Revenging the capture and execution of their brother John by the Jambrites, a Nabatean tribe, Jonathan and Simon Maccabeus ambushed a tribal wedding procession traveling from the bride's home at Nadabath to Medeba. This Transjordan city may be the Nabatha mentioned in Jos. Antiq. XIII.i.4, the ancient Nebo, NW of Medeba in the region still called en-Neba. It has also been identified with the modern Khirbet et-Teim, *ca.* 1.2 miles S of Medeba.

Bibliography. N. Glueck, *Explorations in Eastern Palestine*, I, *AASOR*, XIV (1933-34), 33.

E. W. SAUNDERS

NAGGAI năg′ī [Ναγγαί] (Luke 3:25); KJV NAGGE —ī. An ancestor of Jesus.

NAHALAL nā′ə lăl [נהלל]; KJV NAHALLAL nə hăl′əl in Josh. 19:15. Alternately: NAHALOL nā′ə lŏl (Judg. 1:30). A Levitical town in Zebulun (Josh. 19:15; 21:35), from which Zebulun was unable to expel the Canaanite inhabitants (Judg. 1:30). Although its exact location is unknown, it is perhaps to be identified with Tell en-Nahl, a small mound with evidence of occupation in the LB and Iron I periods, situated N of the Kishon River near the S end of the Plain of Acco.

Bibliography. W. F. Albright, "Contributions to the Historical Geography of Palestine," *AASOR*, 2-3 (1923), 26; "Bronze Age Mounds of Northern Palestine and the Hauran . . . ," *BASOR*, 19 (1925), 10.

G. W. VAN BEEK

NAHALIEL nə hā′lĭ əl [נחליאל, torrent valley of God, *or perhaps* God is my inheritance] (Num. 21:19). A stopping place of the Israelites in Transjordan between Mattanah and Bamoth. If it is a torrent valley, it might be the Wadi Zerqa Ma'in, which enters the Dead Sea between the Arnon and Mount Nebo. Another possibility is the Wadi Wala, an important N tributary of the Arnon. If Nahaliel is a particular town, its precise location is unknown.

E. D. GROHMAN

NAHALLAL; NAHALOL. *See* NAHALAL.

NAHAM nā'hăm [נחם] (I Chr. 4:19). The brother-in-law of Hodiah of Judah (MS evidence supports the RSV against the KJV, which takes Hodiah as the name of Naham's sister).

NAHAMANI nā'ə mā'nī [נחמני, *hypocoristic for* נחמיה, Yahu has comforted] (Neh. 7:7). One of those who returned from the Exile with Zerubbabel (cf. I Esd. 5:8, which reads "Bigvai"; KJV "Enenius" [Ενήνιος]; the name is lacking in Ezra 2:2).

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), pp. 39, 175. B. T. DAHLBERG

NAHARAI nā'ə rī [נחרי] (II Sam. 23:37; I Chr. 11:39); KJV NAHARI in II Sam. 23:37. One of the company of the Mighty Men of David known as the "Thirty"; the armor-bearer of Joab. He was from the city of Beeroth.

NAHASH nā'hăsh [נחש, serpent; *or* Akkad. *nuḫšu*, magnificence]. **1.** Ruler of the seminomadic Ammonites. His attack on Jabesh-gilead and subsequent defeat by the troops which Saul had collected to come to the aid of the besieged town was the occasion of Israel's accepting Saul as king (I Sam. 11:1-11). The attack by Nahash did not have as its primary purpose the extortion of tribute. Nahash coveted the honor which would accrue to him if he could inflict a shameful mutilation on his enemy. Hence he allowed the inhabitants of Jabesh-gilead to send for aid; for the more numerous the enemy, the greater the share of honor their defeat would bring. In this case Nahash miscalculated the size of the force Israel could send in response to the plea from the men of Jabesh-gilead, and the Ammonites suffered a stunning defeat. The fact that Saul was a mutual enemy may account for the friendship between Nahash and David (II Sam. 10:2).

Two of Nahash' sons, Hanun (II Sam. 10:1) and Shobi (17:27), appear to have ruled the Ammonites after him, the latter as David's viceroy.

2. II Sam. 17:25 mentions "Abigal the daughter of Nahash, sister of Zeruiah." It is not clear whether "sister of Zeruiah" refers to Abigal or to Nahash. If the latter, Nahash must be a woman's name. If the former, Nahash may be the Ammonite ruler. According to I Chr. 2:16, Abigail was David's sister, though David's father was not Nahash but Jesse. If I Chr. 2:16 is reliable, then the relationship between Abigail and David would be traced through their mother, as was the custom in the beena marriage, where children were considered to belong to the family of the mother and not the father. This relationship between Abigail and David might be another reason for the friendship between Nahash and David.

On the other hand, it is possible that "daughter of Nahash" is a textual corruption, with "Nahash" an insertion from the following verse, and that we should read "daughter of Jesse" (so LXX L).

R. W. CORNEY

NAHATH nā'hăth [נחת, *usually* descent (נחת) *or* rest, quietness (נוח), *but possibly* pure, clear; *cf.* Arab. *naḥtun*]. **1.** An Edomite clan chief (אלוף נחת, perhaps "clan chief of Nahath"; Gen. 36:17 [LXX Νάχοθ, Νάχωρ]); first son of Reuel (Gen. 36:13 [LXX Νάχοθ, Νάχομ]; I Chr. 1:37 [Νάχεθ, Νάχες]).

2. A Levite, grandson of the Kohathite Elkanah (I Chr. 6:26—H 6:11 [LXX Νάαθ, Καΐναθ]); probably same as Toah (תוח) in 6:34—H 6:19 and Tohu (תחו) in I Sam. 1:1.

3. OVERSEER in the time of Hezekiah (II Chr. 31:13 [LXX Νάεθ, Μάεθ]). L. HICKS

NAHBI nä'bī [נחבי, hidden(?), *or* timid(?)] (Num. 13:14). A member of the tribe of Naphtali sent to spy out the land of Canaan; son of Vophsi.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 229.

NAHOR nā'hôr [נחור, *apparently from* Assyrian *place name Til-Naḫiri*, the mound of Naḫuru; *cf. Naḫaran, Niḫaru, Niḫaran, in* Old Assyrian *texts, and Nuḫuru in an inscription of Asshurbanipal;* Ναχωρ]; KJV NACHOR nā'kôr in Josh. 24:2; Luke 3:34. **1.** Son of Serug, of the line of Shem (Gen. 11:22-25; I Chr. 1:26; Luke 3:34); father of Terah, and grandfather of Abraham. After the birth of Terah in his twenty-ninth year, Nahor lived 119 years longer and had other children.

2. Son of Terah, and brother of Abraham and Haran (Gen. 11:26; Josh. 24:2). He married Milcah, daughter of Haran and sister of Iscah, and she bore him eight sons (Gen. 11:29; 22:20-22).

The relations of this Nahor serve to link the Hebrew patriarchs both vertically and horizontally with other peoples of the ancient Near East. The genealogy of Shem, like that of Seth (Gen. 5:6-32), to which it is related, comes to a climax with three brothers (11:27), whose appearance delineates a further rank of the human family leading more immediately to the Israelites themselves. This particular Semitic genealogy focuses attention upon the family of Abraham as the principal group. Nevertheless, the Israelites neither forgot nor denied their ancient relationship with other Semites; and the Nahorite genealogy in Gen. 22:20-24 embodies traditions concerning them. If the names there have the function of eponyms, this unit would present Abraham's brother Nahor as the progenitor of twelve kindred tribes, thus similar to Ishmael (25:13-16) and Jacob (35:22*b*; 49). The larger group, listing the sons of Nahor's wife, would relate the Israelites to the Aramean tribes who dwelt to the E and NE of Palestine; the smaller group, listing the sons of his concubine, to the Arameans who dwelt primarily in the region between Damascus and Kadesh. Being the offspring of the concubine, this latter group may represent hybrid or alien stock. *See* ARAMEANS.

In concluding the covenant at MIZPAH, Jacob swore by the "God of Abraham"—or more specifically, the "Fear [perhaps 'Kinsman'] of his father Isaac" (פחד אביו יצחק); and Laban, by the "God of Nahor," perhaps a patriarchal patron deity. Indications of the same type of worship of the family deity —the God with whom one's father had associated

himself—are found in Old Assyrian cuneiform texts (Cappadocian correspondence) and the Mari Tablets, which are roughly contemporary with Israel's patriarchal age. *See* GOD, OT VIEW OF.

3. A city mentioned in Gen. 24:10. The reference may be either to a city called Nahor itself or to a city of the Hebrew (Aramean?) patriarch bearing this name (2 *above*). *Naḥur* occurs frequently in the Mari Texts (*see* MARI) as a city situated E of the upper Baliḥ River, and in Middle Assyrian documents. Although close by Haran (cf. Gen. 29:4-5), the city of Nahor is not identical with it but is probably to be located to the S or the E.

See also ARAM-NAHARAIM; HARAN 4.

Albright, *From the Stone Age to Christianity* (2nd ed., 1946), pp. 179-89; J. P. Hyatt, "Yahweh as 'The God of My Father,'" *Vetus Testamentum,* vol. V (1955). L. HICKS

NAHSHON nā'shŏn [נחשון, little(?) serpent; Ναασσών]; KJV NAASHON nā ăsh'ən in Exod. 6:23; KJV NT NAASSON nā ăs'sən. Leader of Judah; son of Amminadab (Num. 1:7; 2:3; 7:12, 17; 10:14); one of twelve tribal chiefs (*see* PRINCE) or deputies who assisted Moses in taking a census of Israel and in other tasks in the wilderness. In Exod. 6:23, Nahshon is identified as a brother-in-law of Aaron, who married his sister Elisheba. His ancestry is traced to Perez, son of Judah and Tamar (I Chr. 2:4-10); while among his own descendants are named Boaz, his grandson, and King David (Ruth 4:20-22). Nahshon is included in the NT genealogies as an ancestor of Jesus Christ (Matt. 1: 4; Luke 3:32).

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), pp. 229-30. R. F. JOHNSON

NAHUM nā'əm [נחום; Ναούμ]; KJV NT NAUM.

1. *See* NAHUM, BOOK OF.

2. An ancestor of Jesus (Luke 3:25).

NAHUM, BOOK OF. The seventh book of the collection of the Twelve Prophets. Nothing is known about the prophet except his name, which means "comfort," "compassion" (cf. Isa. 57:18), and the place of his birth—ELKOSH, a town in SW Judah, in the region where the tribe of Simeon had settled, close to the Philistine and Egyptian borders, between Beit Jibrin and Gaza. (G. Nestle in *PEQ* [1879], pp. 136-38, identifies it with Kessijeh, a little SW of Beit Jibrin. U. Cassuto, however, in *Giornale della Società Asiatica Italiana* [1914], pp. 291 ff, identifies it with Umm Lagish, halfway between Beit Jibrin and Gaza; cf. R. H. Pfeiffer, *HTR,* 27 [1932], 282. This latter locality fits the evidence from Epiphanius.)

Bibliography

1. Date. The *terminus post quem* for the composition of the book of Nahum is the fall of Thebes to Assyria *ca.* 663 B.C. (Nah. 3:8). The fall of the Assyrian capital, NINEVEH, in 612 is the *terminus ante quem* in the view of those scholars who regard the book as looking forward to the destruction of this long-time center of oppression. Those who regard the book as composed after the event agree that the chief portion must be dated immediately thereafter. Some have suggested that most of the book was composed in anticipation and additions were made afterward.

In 625 the Chaldean NABOPOLASSAR founded the Neo-Babylonian state, which was destined to be the leading power in the Middle East for nearly three quarters of a century. He soon brought all Babylonia solidly under his control, then mobilized his forces against Assyria (see British Museum Tablet No. 21,901 in C. J. Gadd, *The Fall of Nineveh,* 1923). Marching up the Euphrates to Qablinu, he inflicted on the Assyrian army a decisive defeat. Meanwhile the Medes began attacking from the east. In 614 they took and sacked the major Assyrian city of Asshur, and Nabopolassar made an alliance with their king. Together the Medes and Chaldeans continued their attacks, until at length mighty Nineveh itself fell. The collapse of this imperial capital marked the end of an epoch, and its reverberations were felt throughout the then-known world.

2. Nature of the book. It is most likely that Nahum was himself a temple prophet. According to some scholars, he "historified" elements from the myth of Creation. He identified a historical enemy with the cosmic adversaries who had been conquered at the beginning of the world and whose fight was re-enacted in the New Year Festival. In any case, the book has the character of a prophetic curse pronounced against the enemy. It also expresses gratitude for the anticipated freedom from tyranny. To curse such an enemy, the very incarnation of Evil, is a way of professing loyalty to God.

3. The acrostic poem (1:2-10). After the superscription (1:1), there begins an alphabetic, acrostic hymn which describes a theophany. It extends at least through vs. 9. Each of the separate lines respectively begins with a different letter of the Hebrew alphabet, taken in order from א, the first letter, to כ, the fourteenth letter. Eissfeldt, by a slight transposition of lines, secures also a ם line in vs. 10, beginning with the word סבואים. There have been various attempts on the part of scholars to recover what many have thought was intended by the original author to be a complete acrostic poem, reaching as far as Nah. 2:3 or 2:4, but such attempts have produced no conclusive results. It is best to view the acrostic poem as ending with the ם strophe, which carries the acrostic through the first half (א to ם) of the Hebrew alphabet. Such procedure is also the case with the liturgical poetry of medieval Judaism.

4. Promise and threat (1:11-15). In 1:1-13; 2:1, 3, is contained a message of promise for Judah, but in 1:10-11(14?); 2:2 we have the beginning of a threat directed against Nineveh, which continues in 2:4-14.

The word of promise has to do with the destruction of the oppressing power and the consequent re-

covery of Israel (1:1-13; 2:1, 3). The oppressing power is clearly Nineveh.

Yahweh, "slow to anger and of great might," takes vengeance on his enemies (1:2-3). In whirlwind and storm he comes, drying up sea and rivers. Fertile pastureland, such as Bashan, dense forests that cover Mount Carmel, tree sprouts of Lebanon's majestic cedars, wither before him. Streams of lava from volcanic mountains pour down the mountainsides. All nature reacts as in terrified awe to its Creator.

The prophet is sensitive to the divine fury poured out like fire. Who can stand before it? Not even mighty Nineveh—such is his inference—can stand before God's righteous wrath (vs. 6*b*).

The prophet's thought suddenly turns, in vivid contrast, to the blessing on the part of this mighty Lord, of those who take refuge in him (vs. 7); to them he is a "stronghold in the day of trouble." But the enemies he will annihilate (vs. 9), just as fire consumes crackling thorns. Yahweh has used Assyria to discipline his people, but now his disciplinary use of Assyria is a thing of the past. He will break the Assyrian yoke (vs. 13) from upon Israel. The Lord of all the earth speaks his mighty threat in vss. 12-14 against and directly to Nineveh:

> No more shall your name be perpetuated;
> . . . . . .
> I will make your grave, for you are vile.

Then Nahum sings a song of triumph (vs. 15). It is a beautiful word lifted up centuries later in another context by the Deutero-Isaiah in Isa. 52:7:

> Behold, on the mountains the feet of him
> who brings good tidings,
> who proclaims peace! (Nah. 1:15).

And Nahum summons Judah, rejoicing in glad release, to observe her festivals and to fulfil her vows (vs. 15*b*). God is on the point of restoring the majesty of Israel (2:2).

5. The destruction of Nineveh (chs. 2-3). Diodorus and Xenophon tell how Nineveh was destroyed as the result of an exceptional rising of the Tigris. In Nah. 2:6, 8—H 2:7, 9, this is vividly pictured:

> The gates of the canals are opened,
> and the palace melts away [i.e., in dismay].
> . . . . . .
> Nineveh is like a pool of water,
> its waters in tumult (orig. tr.).

We read in 2:9-13 how the conquerors of Nineveh leap upon the fabulous spoil of that great city and carry it off in vast quantities. Nineveh used to be like a den of lions, but now it becomes a mass of corpses. The once great kingdom falls in ruin (3:7), sacked by her conquerors just as mighty Thebes (*No Amon*), chief city of Egypt and of the world, was sacked a half century before.

Nineveh's fortress capitulates to the rapacious Chaldeans and Medes, who devour it as first-ripe figs are devoured by hungry men. Her defenders are effeminate and traitorous. And her king perishes in the fire he himself kindled (Nah. 3:12-13; Diodorus II.27).

The destruction of Nineveh is the cause of well-nigh universal rejoicing. The city falls because it deserves to fall. Its "shepherds" are drowsy; its "nobles" are asleep. Moreover, its fall is irrevocable. There is no healing for Assyria's hurt (3:18-19).

The liturgy ends in the mood of irony. Let Nineveh try to recover, shaping many bricks for her destroyed walls and cementing them with mortar. Let it multiply warriors like locusts. It can never recover. Nineveh's rulers have been asleep, and severe are the consequences. And every neighboring nation which has felt Nineveh's brutal heel glories in its fall.

6. Literary and religious value. Nahum's poetic genius ranks with the highest in the Hebrew Bible. He sketches scenes of warfare with a vivid sense of the picturesque or horrible detail—e.g., the cavalry and chariotry charge (2:3-5), the panic of the queen's servants (vs. 7).

Many commentators have noted that Nahum is different from the other literary prophets of the OT, since he concerns himself not with national corruption but with the defeat of a hated oppressor. He is animated by an intense faith in Yahweh, the universal judge, whose jealousy and avenging wrath will not fail to destroy the guilty. The prophet shows also the importance of a dedicated leadership and the ultimate failure of injustice in a national policy.

NAIDUS nā′ə dəs. *See* BENAIAH 9.

NAIL. 1. צִפֹּרֶן, Aramaic טִפַּר (Deut. 21:12; Dan. 4:33—H 4:30). Covering of a finger or toe (in Dan. 7:19 "claw" of a beast). A captive woman, brought to the home of a Hebrew, had to shave her head, pare her nails, and go through a month's mourning before she could be accepted as his wife.

2. מסמר; ἦλος. A carpenter's nail. Isa. 41:7; Jer. 10:4 speak of nails to hold household idols in place. I Chr. 22:3 tells how David stored quantities of iron for nails for the temple gates, and II Chr. 3:9 refers to gold nails used in the inner sanctuary.

Nails have been found in excavations at most biblical sites, though not in great numbers. The earliest nails are of bronze. Later the larger nails were mostly of iron, while smaller ones continued to be made of bronze. Nails found, many with wood still adhering to them, run pretty much the range of size and shape of modern nails, except for our smaller sizes. Some are long—iron spikes found at Samaria were 7-9 inches; some are short—1-1½ inches. Some have small, squared heads; others have broad, flat-domed heads. Most have squared shanks rather than round, and taper more gradually to a point than modern nails.

Two short, bronze nails from Tell Abu Hawam (near Acre), dated in the thirteenth century B.C., had broad, flat-domed heads, covered with gold foil. These, and similar, silver-sheeted nail heads from Nuzi, are surely ornamental nails and may suggest what the gold nails used in the temple were like.

John 20:25 ff refers to the prints of the nails used to fasten Jesus to the cross. Large iron spikes, 5-7 inches long, have been found in several excavations around Jerusalem in the Roman levels of *ca.* the first to the third centuries A.D.

3. Translation of the verb προσηλόω. Col. 2:14 states that God canceled the bond which stood against us, nailing it to the cross. Some have explained this reference by supposing a custom of nailing up a copy of a decree in a public place when it was declared null and void. There is no actual evidence of such a custom.

4. KJV alternate translation of יתד. *See* PEG.

NAIN nān [Ναΐν, *perhaps from* נעים, pleasant, delightful] (Luke 7:11). A town of SW Galilee mentioned in the Bible only in connection with the raising of a widow's son.

1. Location. The place can hardly be the same as that of a city called Nain which Josephus mentions, for he speaks of it as along the border of Idumea (War IV.ix.4-5). The location of the Nain of the gospel is hardly in doubt, for the name survives in the modern Arab village of Nein, a site which fits the biblical evidence. This identification has the support of most scholars.

Nein lies on the lower slope of the NW side of Nebi Dahi, a hill between Gilboa and Tabor. In OT times it was known as the hill of Moreh (Judg. 7:1), and has also been called Little Hermon. The site is *ca.* two miles SW of Endor. Its position agrees approximately with the statement of Jerome, who places it two miles S of Tabor and near Endor (*De Situ et Nom. Loc. Hebr.* 255). The village is *ca.* five miles SE of Nazareth and *ca.* twenty-five miles or a day's journey from Capernaum (cf. Luke 7:11 RSV mg.).

2. Description. The town of Nein has a fine view of the Plain of Esdraelon, which may explain the origin of the name in its Hebrew form of Naim נעים; *see above*). Not only is the view pleasant, but a spring makes possible attractive groves of olives and figs. There is a midrash which explains that the description of the land of Issachar as the "land [that] was pleasant" (Gen. 49:15) is a reference to the village of Naim (Midrash Rabbah Ber. XCVIII.12).

The village of Nein now consists of a few houses and *ca.* two hundred inhabitants, but there are ruins which indicate that it was once a town of some importance. Outside and above the village to the SE are tombs and caves in the rock of the hillside. In the Middle Ages the intended grave of the young man and the home of his mother were shown to the faithful (Petri Diaconi, *ca.* A.D. 1137; Migne, *Patrologiae Latina,* CLXXIII, 1127). Today there is a small Franciscan church on the site of a medieval church. Nearby are the ruins of another shrine.

It was near the village of Nain that Jesus and his disciples met the funeral procession of the only son of a widow as it was coming out. The setting of the miracle of the raising of the son was near the gate of the village (Luke 7:11-16).

D. C. PELLETT

NAIOTH nā'yŏth [נויות, dwellings(?)]. A name designating the common dwelling place (precinct or special structure) of a prophetic fraternity in Ramah under the leadership of Samuel (I Sam. 19:18-24). Here David fled for refuge from the jealous wrath of Saul (vss. 18-19); here Saul and his messengers sought him, but were seized with prophetic frenzy (vss. 20-24); and from here David fled for his rendezvous with Jonathan, soon thereafter to become captain of a refugee band (20:1; 22:1-2).

The etymological background of the name Naioth is quite obscure. Though it is possible that it may have denoted "dwelling," the derivation of such a meaning is quite precarious. The context, however, is rather suggestive, for, since Naioth is repeatedly described as being "in Ramah" (I Sam. 19:19, 22-23), a separate place name is apparently not intended. On the other hand, the reference to residence there (vs. 18), the prevalence of prophetic activity (vs. 20), and the protection of the supernatural (vss. 20-24) bespeak the presence of a sanctuary with appropriate accommodations—perhaps associated with the high place and hall where Saul had previously been the guest of Samuel (I Kings 9:19, 22-25). In this connection, the possibility of a settlement or coenobium of the prophets, patterned after the one under the supervision of Elisha near the Jordan, has been suggested (II Kings 6:1-7). In support of such a possibility, the Targ. renders for "Naioth": "house of instruction," suggesting the further possibility of a sort of prophetic school.

W. H. MORTON

***NAME.** In biblical thought a name is not a mere label of identification; it is an expression of the essential nature of its bearer. A man's name reveals his character. Adam was able to give names to beasts and birds (Gen. 2:20) because, as Milton says, he

understood their nature (*Paradise Lost,* bk. VIII, ll. 352-53). This was a concept shared by the peoples of the ancient world. Hence to know the name of God is to know God as he has revealed himself (Ps. 9:10). The full disclosure of his nature and character is given in Jesus Christ, who has manifested his name (John 17:6, 26).

Bibliography

A. *TERMINOLOGY.* The word "name" and associated words ("fame," "renown," "memory," "memorial," "remembrance") occur over 800 times in the English versions of the OT and some 180 times in those of the NT. For the most part they render into English two Hebrew words, one Aramaic word, and one Greek word.

1. In biblical Hebrew. The common Hebrew term for "name" is the noun שם (*shēm*). Its Aramaic equivalent, *shum,* occurs only in the books of Ezra and Daniel, in which it is found eleven times. The derivation of שם, which is an ancient term, is uncertain and obscure. It may be derived from the root שמה, "to be high," and hence have the primary meaning of "monument" or "memorial" (cf. Gen. 11:4; II Sam. 8:13; Isa. 55:13 ["memorial"]; 56:5 ["a monument and a name"]). This would imply the sense of "majesty" and "excellence" (Ps. 54:1). Another possible derivation is from the root ושם (Arabic *wshm*), "to brand or mark," in which case the original meaning would be "sign" or "token." שם is also translated "renown" in Gen. 6:4; Num. 16:2 KJV; "fame" in I Chr. 14:17; and "well-known" in Num. 16:2.

A lesser-used term is the noun זכר (*zēker;* lit., "remembrance" or "memorial"; *see* MEMORIAL)—derived from the verb *zākar,* "to remember." זכר is translated "name" in Pss. 30:4—H 30:5; 97:12; 102:12; Hos. 12:5—H 12:6. It is used as a parallel to שם in Exod. 3:15; Job 18:17; Ps. 135:13; Prov. 10:7; Isa. 26:8 (לשמך ולזכרך is rendered "thy memorial name"), and it has a closely related meaning in Ps. 145:7 ("fame"); Eccl. 9:5 ("memory"); Hos. 14:7—H 14:8 ("fragrance"; KJV "scent").

2. In LXX Greek. The LXX translators render the Hebrew שם and its Aramaic equivalent *shum* by the Greek ὄνομα, which is the common Greek term for "name." The other Hebrew word, זכר, when used in this sense, is rendered by μνήμη (Pss. 30:4—H 30:5; 97:12; 145:7; Prov. 10:7; Eccl. 9:5), μνημόσυνον (Exod. 3:15; Job 18:17; Pss. 102:12; 135:13; Hos. 12:5), and μνεία (Isa. 26:8).

3. In NT Greek. In the NT the noun ὄνομα, "name," in addition to being used as a distinguishing term, has meanings foreign to classical usage which can be traced to its use in the LXX as translating the Hebrew word שם. As a result of this Hebraistic influence, ὄνομα in the NT has acquired much of the content and associations of the Hebrew term. Thus it is used, e.g., for the rank associated with a prophet (Matt. 10:41), the authority or power of someone on whose behalf another acts (Matt. 21:9; Acts 3:6; 4:7), and the revealed character of God (John 17:6, 11). In Acts 1:15; Rev. 3:4; 11:13, the plural ὀνόματα has the meaning of "persons" (cf. שמות [Num. 1:2, 18, 20; 3:40, 43; 26:53]).

B. *NAME IN THE OT.* The uses of the word "name" in the OT are all related to the central conception of name as denoting essential being. This applies with regard to both man and God.

1. Name and existence. In Hebrew as in Babylonian thought, name is inextricably bound up with existence. Nothing exists unless it has a name. "Whatever has come to be has already been named" (Eccl. 6:10*a*). Its essence is concentrated in its name (cf. Gen. 27:36). Hence the act of creation is not complete until all creatures have received a name (Gen. 2:18-23). The Creator of the heavenly host, in bringing them into being, calls them all by name (Isa. 40:26). Personal existence is regarded as continuing posthumously in the name which is perpetuated by a man's descendants. To cut off a name, therefore, is to end the existence of its bearer (I Sam. 24:21; II Kings 14:27; Job 18:17; Ps. 83:4; Isa. 14:22; Zeph. 1:4). God's promise that his people's name shall remain is a pledge of their continuing existence (Isa. 56:5; 66:22).

2. Name and personality. The name in the OT is the essence of personality, the expression of innermost being. Esau says of his unscrupulous brother: "Is he not rightly named Jacob? For he has supplanted me these two times" (Gen. 27:36; *see* JACOB; *see also* § C2*a below*). As such, a name is regarded as possessing an inherent power which exercises a constraint upon its bearer: he must conform to his essential nature as expressed in his name. Thus Abigail makes excuse for her husband: "As his name is, so is he; Nabal [fool] is his name, and folly is with him"

(I Sam. 25:25; *see* NABAL). Hence a change of name accompanies a change in character. The changing of the patriarch's name from Jacob to Israel indicates a change in the personality of the man himself (Gen. 32:28). *See* JACOB.

To speak or act in someone's name is to act as the representative of that person and hence to participate in his authority (I Sam. 17:45; 25:5, 9; I Kings 21:8; Esth. 2:22; 3:12; 8:8, 10; Jer. 29:25). Similarly, to be called by a person's name (lit., "to call a name upon") implies ownership by the person. Whatever is so called comes under the authority and the protection of the one whose name is called upon it. Joab warns David that if he, and not David, completes the conquest of Rabbah, the city will be called by Joab's name—i.e., he will claim authority over it (II Sam. 12:28). Isaiah foresees that Jerusalem will be so depopulated that seven women will urge one man: "Only let us be called by your name," so that they may enjoy the protection of being owned by a husband (Isa. 4:1).

This is the secular application of a phrase which has frequently a religious significance. That which is called by Yahweh's name is his possession and therefore comes under both his authority and his protection (Deut. 28:10; II Chr. 7:14; Isa. 43:7; 63:19; 65:1; Dan. 9:18-19).

3. Name and reputation. When the character and achievements of a person become widely known, he gains a reputation. This is, as it were, an extension of his personality; it is his name writ large. Hence "name" comes also to mean "renown," "glory," "fame." E.g., the builders of the Tower of Babel seek a reputation through the magnitude of their work: "Let us make a name for ourselves" (Gen. 11:4). Abraham is promised renown if he obeys the divine command: "I will bless you, and make your name great" (Gen. 12:2). David wins a name for himself through his military exploits (I Sam. 18:30; II Sam. 8:13). Thus in Prov. 22:1; Eccl. 7:1 "name" by itself (the word is unqualified in the original) means a good reputation, which is of supreme worth. Conversely, men of bad reputation are said to be nameless (Job 30:8; בלי שם ["disreputable"; KJV "base"]).

4. Name and revelation. When used of God, "name" in the OT has a revelatory content. The name of God means primarily his revealed nature and character—the Savior God as he has manifested himself and desires to be known by man. For the Hebrew, God is both transcendent and immanent. He is the hidden God, dwelling in the high and lofty place in light unapproachable; nevertheless, he comes into saving relations with men. The gap between the Deity as ontologically remote and as dynamically near is bridged in OT thought by various related conceptions of the manifestation of God—his ANGEL; his FACE; his GLORY; his "name." Of these the name is the most comprehensive and significant. As expressing essential nature, it implies the most complete divine self-disclosure, while the identification of name and person safeguards the unity of God.

a. The being of God. The name of God is frequently used as a synonym for God himself, particularly in the postexilic period. As such it is the object of fear (Deut. 28:58; Ps. 61:5—H 61:6), of love (Pss. 5:11—H 5:12; 69:36—H 69:37; 119:132; Isa. 56:6), of blessing (Job 1:21; Pss. 96:2—H 96:3; 103:1), of thanks (I Chr. 16:35; Ps. 54:6), and especially of praise (II Sam. 22:50; Pss. 7:17; 9:2; 18:49—H 18:50). To know the name of God is to know God himself as he is revealed (Pss. 9:10—H 9:11; 91:14; Isa. 52:6; cf. 64:2; Jer. 48:17). In Lev. 24:11 "the Name" alone is used to denote God. This, however, is the only instance in the OT of a usage which became popular in the late Hellenistic period (*see* § D *below*) and may be due to a copyist rather than to the original writer. (In Lev. 24:16 read "name of the LORD" with LXX and Vulg.; but cf. Deut. 28:58.)

b. The hidden God. On two occasions in the OT the divine name is withheld. The mysterious being who wrestles with Jacob at Jabbok withholds his name (Gen. 32:29), as does also the "angel" who appears to Manoah and his wife (Judg. 13:18). It has been customary to explain this in terms of primitive ideas regarding the power which resides in the name—to know a person's name is to have power over the person; to disclose a name is to surrender that in which the power of the personality resides. But such explanations are inadequate and take no account of the theological significance of these stories. What we have here is an attempt to express the Hebrew awareness that the *deus revelatus* is also the *deus absconditus*. Common to both stories is the theme of perseverance. Jacob must persevere in his attempt to triumph over his weakness of character and win a spiritual blessing, without knowing whom he is encountering. Through his inward struggle, so powerfully dramatized in this story of his tenacious wrestling, he receives the divine blessing, becomes a new man, and is given a new name: "Perseverer with God" (*see* ISRAEL, NAME AND ASSOCIATIONS). But only when the encounter is ended does he realize that he has been face to face with God (Gen. 32:30).

In the same way, although to a lesser degree, Manoah and his wife must persevere in their attempt to know the divine will for their son whose birth has been foretold, without knowing the supernatural nature of the one with whom they are speaking. Only afterward are they constrained to say: "We have seen God" (Judg. 13:22).

In both cases the name is withheld—the divine self-manifestation is veiled until the recipient, by his resolve and importunity, has shown that he is fit to receive it. The encounter is a discipline and a test: "To him that hath shall be given." In the actual moment of visitation, God is hidden; only in retrospect does the *deus absconditus* become the *deus revelatus*.

c. "For his name's sake." God's name is great (Ps. 76:1—H 76:2; Jer. 10:6; 44:26), glorious (Deut. 28:58; cf. 32:3), and majestic (Ps. 8:1—H 8:2); it is also holy (Lev. 20:3; 22:32; I Chr. 16:10, 35; 29:16; Pss. 33:21; 103:1; 105:3; 106:47; 145:21; Isa. 57:15; Ezek. 20:39; 36:20-22; 39:7, 25; 43:7-8; Amos 2:7; *see* HOLINESS), and he is concerned for it (Ezek. 36:21) and jealous of it (20:9, 14, 22; 39:7, 25). When God acts for his name's sake, he is acting in accordance with his revealed character and to uphold the honor of his revelation, which has been staked upon his elect people, Israel. Since God has chosen to accomplish his redemptive purpose for mankind through

the election of Israel, he will not allow the nation to be destroyed (I Sam. 12:22; Ps. 23:3; Isa. 48:9, 11; Ezek. 20:9, 14, 44; 36:22-23). This is the ground upon which appeal is frequently made to him (Pss. 25:11; 31:3—H 31:4; 143:11; Jer. 14:7, 21).

d. Revelation and response. When the people to whom this revelation has been given behave in a way which is contrary to the revealed character of God and as a result suffer dishonor, his name is profaned (Ezek. 36:20-21; Amos 2:7) or defiled (Ezek. 43:8) or reviled (Ps. 74:10, 18) or despised (Isa. 52:5).

On the other hand, the divine self-manifestation evokes from those who recognize it the response of worship. This is the meaning of the expression "call upon" (lit., "call with") the name of God (e.g., Gen. 4:26; 12:8; 13:4; 21:33; 26:25; II Kings 5:11; Pss. 75:1; 79:6 = Jer. 10:25; Isa. 65:1). To call upon the name of God is to invoke him on the basis of his revealed nature and character. The same phrase is used in a slightly different sense, and with reference to both Yahweh and the Tyrian Baal, in Elijah's contest with the prophets of Baal on Mount Carmel (I Kings 18:24-26; cf. vss. 36-37). Here it refers to a specific appeal to each of the deities to display his power.

The declaration of Zech. 14:9: "The LORD will be one and his name one," is also to be understood in terms of the principle of revelation and response. God's unity, which is already a reality, will ultimately be acknowledged by all men (cf. Isa. 56:6-7). And in Isa. 48:9, the parallel clause: "for the sake of my praise," suggests that "name" may be used here in the transferred sense of the worship called forth by the divine self-disclosure.

e. Theological development. In the early OT literature, "the name" is applied to temporary manifestations of Yahweh. The name of God said to be "in" the angel who leads and guards Israel in the wilderness signifies that during this limited period he acts as God's representative or plenipotentiary (Exod. 23:20-21; cf. 33:14). The implication is that when the wilderness wanderings are over, he will return to Yahweh. In Canaan altars are to be built and sacrifice offered wherever God causes his name to be remembered (Exod. 20:24 [KJV "records" his name]). From the way in which this law was observed, it is clear that such a place was the scene of a temporary self-disclosure of God. Altars were, in fact, built in places hallowed by some special indication of the divine presence—a theophany or a great deliverance (Gen. 12:7; 22:9; 26:24-25; Judg. 6:11-24; I Sam. 14:31-35). This is what is meant, therefore, by God's causing his name to be remembered. Indeed, the prophet Isaiah speaks of the name itself in terms of a theophany: it "comes from far, burning with his anger, and in thick rising smoke" (Isa. 30:27; cf. 59:19).

Deuteronomy, however, envisages a permanent manifestation of the divine presence at Jerusalem: there God causes his name to dwell (Deut. 12:5, 11). Thus in the writings of the Deuteronomic school the name becomes a symbol of faith in a *deus revelatus*. Jerusalem is the city where God has chosen to put his name (I Kings 11:36; cf. Isa. 18:7 [probably postexilic]). The temple is built as a habitation for the name of God (II Sam. 7:13; II Chr. 20:8), and in it his name dwells (I Kings 9:3; Ps. 74:7). Yahweh's own dwelling place is still in the heavens; but his presence is manifested on the earth through the quasi-independent entity of his name, which is nevertheless one with him (I Kings 8:27-30). In this way the antinomy between the transcendence of God and his abiding presence with his people is resolved by a virtual hypostatizing of his name. It is the instrument through which he comes to man's aid and prospers his way (Pss. 54:1—H 54:3; 89:24—H 89:25).

This theological development of the name of God is to some extent paralleled by the personification of his wisdom (Prov. 8) and of his creative word (Gen. 1:1-27; cf. John 1:1-14). With the latter it has a particular affinity, since in the OT a name is to a person as a word is to a thought. Its full significance is apparent only in the light of its consummation, when the name of God is manifested by him who is the Word made flesh (John 17:6-26).

C. *HEBREW PROPER NAMES.* Hebrew proper names may be classified in several different ways. They may be considered in two main groups according to whether their formation is simple or compound. Simple names consist of only one element, which is essentially an epithet—e.g., Jacob = "supplanter"; Nabal = "fool." Compound names have more than one element, and, while some are epithets (e.g., Obadiah = "servant of Yahweh"), most form a sentence (e.g., Elijah = "my God is Yahweh"; Nathaniel = "God has given"). Almost all compound names have a religious significance; simple names frequently have not.

Another classification is on the basis of origin. The name of a place, e.g., may reflect its physical features or some characteristic of its inhabitants; or it may be named after some animal or plant. A person's name may derive from circumstances attending his birth, or some physical characteristic, or some aspiration of his parents; or he also may bear the name of an animal or plant. On the other hand, he may be merely named after some kinsman or distinguished person of the past.

The most obvious division, however, is between the two main groups of place names and personal names, to which must be added a third category—the divine names.

1. Place names. Place names are, on the whole, more obscure and ambiguous than are the names of persons. For the most part, they are also more ancient. It seems, however, that the two are sometimes related—personal names, in some instances, are derived from names of places and place names, on other occasions, from names of persons.

a. Pre-Israelitish, Greek, and Latin. Many of the place names in Palestine are older than the Israelite conquest of the land. While, therefore, they may be for the most part Semitic, they originated with some branch of the Semites other than the Hebrew invaders. Most of them would seem to be of Canaanite origin, but there are isolated names, like Ziklag, which are clearly non-Semitic. Place names, therefore, do not necessarily offer evidence of Israelite beliefs and practices.

Direct evidence of the preconquest existence of over thirty OT place names is afforded by the lists

of Thut-mose III, Seti I, and Ramses II (probably the Pharaoh of the Oppression) and by the Tell el-Amarna Tablets. The list of the conquests of Thut-mose III (1501-1448 B.C.) in his Karnak Inscription dated 1494 B.C. mentions twenty-one Palestinian towns including Gath, Gaza, Joppa, and Migdal. In the other Egyptian lists of Seti I (1314-1292 B.C.) and Ramses II (1292-1225 B.C.) are the names of Beth-anath, Luz, and Secu, and of two other towns which may possibly be Jabneh and Heres. A further ten names, including Aijalon, Jerusalem, Lachish, and Megiddo, occur in the Tell el-Amarna Tablets (fourteenth century B.C.).

Greek and Latin names are confined to the Apoc. (e.g., Σκυθῶν πόλις [Jth. 3:10; cf. Judg. 1:27 LXX]) and the NT (e.g., Antipatris [Acts 23:31]; Caesarea [Matt. 16:13]; Ptolemaïs [Acts 21:7]).

b. From local characteristics. Outstanding characteristics of the locality, whether permanent physical features or changing social and religious customs, account for many place names. Some names refer to physical features—e.g., Giba, Gibiah, Gibeon="hill"; Shechem="shoulder of a hill," or a ridge; Ramah, Ramoth, Rumah="height"; Sela="the cliff"; Beth-emek="house of the valley"; Lebanon is derived from the root meaning "white" and probably refers to the white cliffs. Other names are derived from climate, water supply, and soil—e.g., Zion="waterless"; Horeb and Jabesh="dry"; Beer="well"; En="spring"; Abel="meadow"; Argob="rich soil"; Carmel="garden land."

Variable characteristics such as size, produce, occupation, give rise to yet other names—e.g., Rabbah="large"; Zoar="small"; Gath="wine press"; Bethlehem="house of bread"; En-mishpat="spring of judgment" (i.e., a place for the settling of disputes); Bezer, Bozrah="a fortified place." Such names, of course, only correspond with the local characteristics of the time in which the particular name was given.

This applies also to a number of compound names which express religious beliefs and customs—e.g., Beth-shemesh, "house or temple of the sun," and Beth-anath, "house or temple of Anath," indicate the worship there, at some indefinite past date, of these deities. Similarly, Sin and Sinai bear the name of the Babylonian moon-god Sin. Bethel means "house of God" and Penuel "face of God." Names which are compounded with Baal (="owner") are abbreviations. In their present form they are, strictly speaking, titles of deities rather than place names—e.g., Baal-tamar="owner of the palm-tree," and Baal-hazor="owner of the village." These, however, are abbreviations of Beth-baal-tamar, meaning "house [or temple] of the owner of the palm tree," and Beth-baal-hazor, meaning "house [or temple] of the owner of the village." Sometimes the "baal" instead of the "beth" is omitted in the abbreviation, thus giving rise to three variant forms of the name—e.g., Beth-baal-meon ("house of the owner of the town of Meon"; Josh. 13:17)=Baal-meon (Ezek. 25:9)=Beth-meon (Jer. 48:23).

c. From animals and plants. Some thirty-three Palestinian towns bear the names of animals. Such names are not uniformly distributed but occur almost entirely in the S, only four being found N of Shechem. Their origin has been attributed to a totemistic stage either in early Hebrew society or among some of the S Canaanite peoples, but they do not necessarily demand such an interpretation, which assumes that they have been derived from the names of clans.

Some towns have the names of wild animals—e.g., Aijalon="stag"; Arad="wild ass"; Laish, Labaoth="lion"; Ophra, Ephron="gazelle." Others are named after domestic animals—e.g., En-gedi="fountain of the kid"; Eglon="calf" (cf. En-eglaim="fountain of the calves"); Hazor-susah="village of the horse"; Parah="cow"; Telaim="lambs." The names of birds occur—e.g., Beth-hoglah="house [or place] of the partridge"; Etam="birds of prey." Reptile and insect names are also found—e.g., Ir-nahash="city of the serpent"; Humtah="lizard"; Akrabbim="scorpions"; Zorah="cricket."

The names of trees and plants, or compound words containing them, occur frequently as place names. The apple tree (תפוח) gives its name to Tappuah, Beth-tappuah, and En-tappuah; the palm tree (תמר) to Tamar, Baal-tamar, and Hazazon-tamar. Dilan means "cucumber." Atad and Shamir bear the names of different kinds of thorn bushes. Grape clusters account for the name of the Valley of Eshcol and balsam trees for that of the Valley of Baca.

2. Names of persons. In early OT times a child was usually named by the mother—perhaps a relic of a primitive matriarchate (Gen. 4:1, 25; 16:11; 19:37-38; 29:32-35; 30;6, 8, 11, 13, 18, 20-21, 24; 35:18; 38:4-5; Judg. 13:24; I Sam. 1:20; I Chr. 4:9; 7:16). The name, however, could be altered by the father (Gen. 35:18) and was, indeed, frequently given also by him (Gen. 4:26; 5:3, 28-29; 16:15; 17:19; 21:3; 41:51-52; Exod. 2:22; Judg. 8:31; I Chr. 7:23; Job 42:14; Hos. 1:4, 6, 9; cf. Isa. 7:3). In exceptional circumstances a child might receive his name from someone other than the parents (Exod. 2:10; Ruth 4:17; II Sam. 12:25). It seems that the name was given at birth or shortly after. Only in NT times do we find the giving of the name associated with CIRCUMCISION on the eighth day after birth (Luke 1:59; 2:21).

There is a marked difference in the way personal names were regarded before and after the Exile. In the early period a child was given a particular name because of its intrinsic significance. After the fifth century B.C., however, it became customary to name a child after some relative, especially the grandfather. Along with this practice went the revival of distinguished names of the past and the adoption of certain foreign names—Persian, Greek, and Roman. Early personal names are usually simple; later ones are compound.

a. From circumstances and characteristics. In the early period the name was vitally and indefeasibly related, in some way or other, to the personality of the child. It frequently signified some circumstance attending his birth. Thus at the birth of Rebekah's twins, the hand of the younger was holding the heel of the elder, as if trying to hold him back. The younger was therefore called Jacob—i.e., "one who takes by the heel," meaning "supplanter" (Gen. 25:26). Rachel, dying in childbirth, gave to her son the name Ben-oni—i.e., "son of my sorrow" (Gen. 35:18). The defeat of Israel by the Philistines, involving

the capture of the ark and the death of Eli and Phinehas, prompted the dying wife of the latter to call her son Ichabod—i.e., "Inglorious," saying: "The glory has departed from Israel" (I Sam. 4:21).

Sometimes the name indicated some personal characteristic of the child. Esau, meaning "hairy," was so called because of his appearance at birth (Gen. 25:25). The head of a family of returning exiles must have been a very tiny baby, because he was named Hakkatan, meaning "the small one" (Ezra 8:12). The father of an Israelite captain at the time of the Exile was evidently lacking in hair when born, since his name was Kareah, meaning "bald" (II Kings 25:23).

Personal names frequently express the parents' gratitude to God for a child, or their aspirations concerning him. Thus Leah says at the birth of her fourth son: "This time I will praise the LORD," and calls the boy Judah, which means "praised." In this connection a name is often given for reasons of assonance rather than etymology—e.g., Hannah's child is called Samuel, which actually means "name of God," because the name Samuel recalls the sound of the Hebrew phrase meaning "asked of God" (I Sam. 1:20; cf. Gen. 5:29; 32:28; Judg. 6:32; I Chr. 4:9). A common name like Obadiah, meaning "worshiper, or servant, of Yahweh," obviously records the parents' wish concerning the child.

The children of a prophet are sometimes given symbolic names which epitomize his oracles. Isaiah's doctrine of the remnant finds expression in the name of his son Shear-jashub, which means "A remnant shall return" (Isa. 7:3). The formidable name of his other son, Maher-shalal-hashbaz, meaning "The spoil speeds, the prey hastens," signifies the speedy destruction of Rezin and Pekah by the Assyrian king (Isa. 8:3). Hosea's eldest son is called after the city of Jezreel as a token of the prophet's condemnation of the massacre of Ahab's family there (Hos. 1:4). The names of his daughter, Lo-ruhamah, meaning "Not pitied," and second son, Lo-ammi, meaning "Not my people," express Hosea's conviction that Israel had forfeited all claim to God's mercy and protection (1:6-8).

b. From animals and plants. Altogether a hundred names of animals are used as proper names in the OT. Most of these, however, occur as the names of places, clans, or foreign individuals. Only twenty-two are the names of Hebrew individuals, and all these are pre-exilic—e.g., Aiah = "vulture"; Caleb = "dog"; Deborah = "bee"; Jonah = "dove"; Rachel = "ewe"; Zibiah = "gazelle"; Zimri = "mountain sheep."

A strong argument for a totemistic origin of such names is their recrudescence in the time of Josiah, when the names which occur are those of unclean animals—Achbor = "mouse"; Huldah = "weasel"; Shaphan = "rock badger." The explanation offered is that superstitious practices derived from primitive totemism were revived in the religious syncretism of Manasseh's reign. Hence children were given the names of animals which were sacred according to these ancient beliefs although unclean in the Israelite code (cf. Isa. 66:17; Ezek. 8:10). As with animal place names, however, the derivation of these personal names is not necessarily totemistic. They may be accounted for in terms of natural poetry. People living in the open air would quite naturally name their children after beasts or birds—as do the Arabs—especially if such an animal name expressed qualities which the child seemed to possess, or which they desired it to have.

Personal names which are the names of trees or plants are less frequent—e.g., Elah, Elon = "oak" or "terebinth"; Tamar = "palm tree"; Hadassah = "myrtle"; Rimmon = "pomegranate"; Susanna (apocryphal Additions to Daniel and NT) = "lily."

c. Compound. Whereas in early times personal names are simple, there is an increasing tendency, especially in the seventh century B.C., to use compound names which state a fact or express a wish. Early compound names, although less numerous, are more varied and do not, for the most part, consist of sentences, as do the later ones. Some, which denote kinship, are compounds with Ab(i) = "father," Ah(i) = "brother," and Am(mi) = "kinsman"—e.g., Abigail, Ahihud, Ammiel. Each of these forms, however, occurs fewer than twenty-five times, and they all became obsolete before the Exile.

Less frequent are names denoting dominion which contain the words Melech = "king," Adoni = "lord," and Baal = "owner"—e.g., Abimelech, Adonijah, Merib-baal. Melech, Adoni, and Baal do not appear to have been used by the Hebrews as proper names, either of Yahweh or of some other deity, but as appellatives—i.e., they are descriptive titles of Yahweh. These forms would seem to have come into use after the settlement in Canaan, and they ceased to be used after the Exile.

The most numerous compounds are those containing the divine names El and Yah. Compounds with El are extremely ancient and, indeed, are common to all Semitic languages. Out of some 135 mentioned in the OT, 22 are the names of places or foreigners, and the remaining 113 are personal Hebrew names—e.g., Elijah, Elimelech, Ishmael, Nathaniel. Names compounded with Yah number over 150 and are almost entirely personal or family names—e.g., Jehoram, Jehoahaz, Adonijah, Obadiah. In the earliest period they are infrequent and are confined to certain circles and families. But they increase rapidly from the time of David onward, displacing almost all other compounds except those containing El. There is also a significant change in the positions of El and Yah in verbal compounds. In the early period they stand, for the most part, at the beginning of the names, but they come to stand increasingly at the end. This change of position in a verbal compound has the effect of moving the emphasis from the subject to the predicate. The earlier compounds are essentially assertions about El or Yah as opposed—implicitly, at least—to other deities. But as the ethical monotheism of prophetic teaching permeates the popular consciousness, it becomes unnecessary to emphasize the subject, since the one God is behind all actions. And so the emphasis falls on the divine activity expressed by the name.

d. Divine. A variety of names for God are found in the OT. They are all used here with reference to the one God of Israel, but some of them may have denoted separate and distinct deities at an earlier time. *See* GOD, NAMES OF.

D. ***NAME IN THE APOC. AND THE PSEUDEP.*** In the literature of the Apoc. and the Pseudep.

the term "name" has the same meaning and uses as in the OT. Personal existence continues in the name (Ecclus. 44:14; 46:12). It denotes reputation (Tob. 3:15; Ecclus. 40:19; 41:12-13). The name of God is frequently a synonym for God himself (Wisd. Sol. 10:20; Ecclus. 39:35; Song Thr. Ch. 3, 30; Enoch 39:13). God's protection is claimed for the people and temple over which his name has been called (Bar. 2:15, 26; I Macc. 7:37). In exile God's name is invoked (Bar. 3:7). We find also "the Name" used as a substitute for the divine name Yahweh (e.g., Ecclus. 23:10; cf. Wisd. Sol. 14:21).

E. ***NAME IN THE NT.*** Apart from having at times a more general sense, "name" is used in the NT in ways which are both parallel and complementary to its OT usage. With the name of God there is now linked the name of Jesus Christ, who declares it and so "fulfils" the OT revelation.

1. Distinguishing term. In the NT the term "name" is frequently used in the ordinary sense merely as a means of distinguishing one person or thing from another. The shepherd "calls his own sheep by name" (John 10:3). Gallio dismisses the accusation brought against Paul by the Jews of Corinth as a "matter of questions about words and names and your own law" (Acts 18:15). The writer of III John bids the recipient greet the friends "by name" (III John 14 KJV [κατ' ὄνομα]). The names of Christians are in the book of life (Phil. 4:3; cf. Rev. 3:5; 13:8; 17:8). In the book of Revelation the heavenly Jerusalem has inscribed on its gates the names of the twelve tribes of the sons of Israel (Rev. 21:12) and on the foundation of its walls the twelve names of the twelve apostles of the Lamb (vs. 14).

The term is used extensively in the same way to introduce personal proper names, such as those of the twelve apostles (Matt. 10:2), the parents of John the Baptist (Luke 1:5), the mother of Jesus and her betrothed husband (Luke 1:27), and the false prophet of Paphos (Acts 13:6; cf. Matt. 27:32; Mark 5:22; Luke 2:25; 24:18; John 1:6; 18:10; Acts 28:7; Rev. 9:11).

2. Name and personality. The characteristic NT usage of "name," however, links it very closely with personality, as in the OT. Hence the choosing of a child's name was a matter of great importance. This is evident in Luke's account of the naming of John the Baptist (Luke 1:13, 59-63). Joseph is charged by the angel to call the son whom Mary shall bear "Jesus"—the Greek form of the Hebrew name Joshua, meaning "Deliverer" or "Savior," "for he will save his people from their sins" (Matt. 1:21; cf. Luke 1:31). The author of Matthew's Gospel sees in this the fulfilment of Isaiah's prophecy concerning the birth of a child called Emmanuel, which means, as he points out, "God with us" (Matt. 1:22-23).

As in the OT, a change in character or status is accompanied by a change of name. After his great confession at Caesarea Philippi, Simon is renamed Peter, "rock man" (Matt. 16:17-18; cf. Mark 3:16; Luke 6:14). Sometimes such a change takes the form of the addition of another name to denote some characteristic of personality. Thus James and John, because of their fiery disposition, are surnamed BOANERGES, meaning, as Mark explains, "sons of thunder" (Mark 3:17; cf. Luke 9:51-56). When Saul of Tarsus enters upon his missionary vocation to the Gentile world, his name is appropriately changed from the Hebrew form, Saul, to the Roman, Paul (Acts 13:9).

Another example of the typically Hebraistic linking of name with personality may be seen in the question put by the Sanhedrin to Peter and John after the healing of the lame man: "By what power or by what name did you do this?" (Acts 4:7). The meaning of the last clause is: As whose representative? or, By whose authority? Similarly, to receive a prophet "in the name of a prophet" (Matt. 10:41 KJV) means "in his capacity as a prophet"—i.e., as Moffatt, Phillips, and the RSV translate it: "because he is a prophet."

3. Name and reputation. The use of "name" as denoting "renown" or "fame" is rare in the NT. Indeed, there are only four instances of it. King Herod heard of the reputation of Jesus: His "name had become known" (Mark 6:14; KJV "His name was spread abroad"). The disciples are warned that because of their association with Jesus, they will lose their reputation: men will cast out their name as evil (Luke 6:22). Because of his humility and obedience unto death, Christ has been given the highest glory and renown: "God has highly exalted him and bestowed on him the name which is above every name" (Phil. 2:9). The church in Sardis has a false reputation: "You have the name of being alive, and you are dead" (Rev. 3:1).

4. The name of God. This is mentioned some forty times in the NT. In fifteen places it occurs in a quotation from the OT (Matt. 12:21; 21:9; 23:39; Mark 11:9-10; Luke 13:35; 19:38; John 12:13; Acts 2:21; 15:17; Rom. 2:24; 9:17; 10:13; 15:9; Heb. 2:12), and at other times it is referred to in phraseology reminiscent of the OT (e.g., Matt. 6:9; John 17:6, 26). Everywhere it is used in the OT sense of the revealed nature and character of the Savior God.

As in the OT, the name of God is frequently used as a synonym for God himself. It is the object of worship (Heb. 13:15), of fear (Rev. 11:18), and of love (Heb. 6:10 KJV). It is holy (Luke 1:49), and the divine fatherhood manifested to men is to be hallowed (Matt. 6:9 = Luke 11:2). The name must not be defamed (I Tim. 6:1).

The prophets spoke in the name of the Lord—i.e., with divine authority (Jas. 5:10)—and, in accordance with OT prophecy, God has visited the Gentiles to take out of them a people for his name—i.e., for his own possession (Acts 15:14-18). Christ's claim to have come in his Father's name means as the Father's representative (John 5:43). His works done in that name bear witness to the Father's authority, which he shares (10:25). In him there has been given to men the complete revelation of the divine nature: he has manifested and declared the name of God (12:28; 17:6, 26).

5. The name of Christ. The distinctive feature of NT usage is the way in which the name of Jesus is either substituted for, or placed alongside, the name of God. Phrases which are used in the OT of the name of God are applied in the NT to the name of Jesus. Thus prophesying or speaking in the name of God becomes prophesying or speaking in the name of Jesus (e.g., Matt. 7:22; Acts 4:17-18; 5:40; 9:29;

cf. Deut. 18:22; I Chr. 21:19; Jer. 20:9; Dan. 9:6). The old Israel is called by the name of God (II Chr. 7:14), the new Israel by the name of Christ (Jas. 2:7; cf. Acts 11:26). Believing in the name of Jesus (John 1:12; I John 3:23) corresponds to trusting in the name of God (Ps. 33:21; Isa. 50:10). Calling on the name of God (Gen. 13:4; Ps. 105:1; etc.) is paralleled by calling on the name of Christ (Acts 9:14, 21; I Cor. 1:2; cf. Acts 2:21; I Pet. 1:17). That is to say, worship is offered to Christ as to God.

Just as in the OT the name of God is a synonym for God himself, so also in the NT the name of Jesus is a synonymous term for Jesus himself (John 1:12; 2:23; 3:18; I John 3:23; 5:13). It epitomizes his personality as known.

a. Belief in the name. The expression "to believe in the name of Jesus" is restricted to the Johannine writings, where it occurs five times (John 1:12; 2:23; 3:18; I John 3:23; 5:13). There is no foundation for the theory that in these and similar references to the name there is an assimilation of the use of the name of Jesus to ancient magic. This theory fails to take account of the influence of OT thought, with its immeasurably higher ideas, on Jesus and his disciples; it is obviously inapplicable to many passages in which the name occurs (e.g., Matt. 18:5); and it is incongruous with the general use which the NT writers make of this concept. In the foreground of the Fourth Gospel there is the idea of a mystical faith-union between the believer and Christ (*see* FAITH), and a significant feature of this gospel is the alternation of the phrases "to believe in the name of Jesus" and "to believe in Jesus" (e.g., John 3:18), which clearly mean the same thing. Belief in his name is linked with the discernment of the significance of his miracles as "signs" of the Messiah (John 2:23) and with salvation unto eternal life (3:16-18). It corresponds to "receiving" him (1:12) and, as an obligation associated with loving one another, is the command of God (I John 3:23). Believing in the name of Jesus, therefore, involves an acceptance of Jesus himself as Messiah and Savior, and of the obligation to show forth his love.

b. Baptism in the name. This is mentioned five times in the NT (Matt. 28:19; Acts 2:38; 8:16; 10:48; 19:5) along with the parallel phrase "baptized into Christ" (Rom. 6:3; Gal. 3:27). The use of three different Greek prepositions, however, gives shades of meaning which are absent from the English versions. In Acts 10:48 the preposition is ἐν, which has the force of the Hebrew ב and conveys the idea of acting on the authority of another. Peter commands Cornelius and his company to be baptized on the authority of Jesus Christ. The preposition ἐπι in Acts 2:38 gives the sense of resting upon, or being devoted to, the person of Christ. Here the appeal is to receive baptism on the ground of the hearers' faith: in being baptized they repose their trust in Christ. In the three remaining passages another preposition, εἰς, is used. This is equivalent to the Hebrew ל in the sense of "with regard to." The Christians at Samaria (Acts 8:16) and the disciples at Ephesus (19:5) receive baptism as the outward symbol of union with Christ. This would seem to be the meaning also of the commission of the risen Christ (Matt. 28:19). The trinitarian formula is generally seen as a later expansion.

c. Acting in the name. There is no reason to believe that in NT times the name of Jesus was used in any magical way as a "theurgic formula"—a view based largely on evidence from early Christian fathers which is to be attributed to the influence of Greek superstition. Some itinerant exorcists certainly attempted to use the name in this way, but with unhappy results (see Acts 19:13-16). When interpreting the NT, it is rather to the Hebraic ideas and influence of the OT that we must look.

In considering the various actions "in the name of Jesus" of which the NT writers speak—preaching, healing, exorcism, etc.—the force of the Greek prepositions, as influenced by their use in the LXX, must once again be taken into account. The same three prepositions, in addition to the simple dative case, are used. The most frequent is ἐν (ב), usually denoting participation in authority. It is used in this sense in passages relating to the casting out of demons (Mark 9:38 = Luke 9:49; Mark 16:17; Luke 10:17; Acts 16:18) and in the account of the healing of the lame man by Peter and John (Acts 3:6), of Paul's judgment concerning the case of incest in the Corinthian church (I Cor. 5:4), and of his command to the Thessalonians (II Thess. 3:6). In each case "in the name" of Christ means acting on his behalf, by his authority. The phrase is probably to be understood in this sense in Jas. 5:14—the elders of the church, as participating in the authority of Christ, are to anoint the sick. Here, however, "in the name" could also mean "by invoking the name"—i.e., while calling upon Christ. In Acts 9:27, 29, ἐν reflects a peculiar instrumental use of the Hebrew ב (cf. קרא בשם [Exod. 33:19; 34:5]), so that Paul's preaching boldly in the name of Jesus means his proclamation of Christ. A still different sense of ἐν is found in the Johannine sayings regarding prayer in the name of Jesus (John 14:14; 15:16; 16:23-24, 26). Here it is associated with the mystical faith-union concept of the Fourth Gospel, to which reference has been made, and has the meaning of being rooted in Christ. Hence prayer in his name is prayer that is prompted by the mind of Christ and in accordance with his character. In Mark 9:41 the giving of a cup of water ἐν ὀνόματι (KJV "in [my] name") is explained as meaning because the recipient belongs to Christ.

In another group of passages, confined to the Synoptic gospels and the Acts, the preposition ἐπι is used. This also represents ב but has the sense of relying upon. Thus to receive a child in the name of Christ (Matt. 18:5 = Mark 9:37 = Luke 9:48) is to receive him upon the ground of devotion to Christ—i.e., for Christ's sake. Those who shall come in Christ's name (Matt. 24:5 = Mark 13:6 = Luke 21:8) will come claiming the authority which properly belongs only to him—i.e., they will claim to be the Messiah. Preaching, teaching, and healing in the name of Christ (Luke 24:47; Acts 3:16; 4:17-18; 5:28, 40) are all carried out in reliance upon his messianic authority, to which appeal is made.

In only one instance is the preposition εἰς (ל) used in this connection (Matt. 18:20). To be gathered together in Christ's name means here that Christians are assembled with their minds directed toward him. He is the reason for their assembling, and it is his will that they seek to know. In such an assembly the

name is made manifest: Christ himself is present with his people.

The use of the simple dative case in Matt. 7:22 conveys the idea of acting by the power of Christ's name—i.e., by invoking his authority.

d. Persecution for the name. In all except one of the references to Christ's followers' being hated or persecuted for his name's sake, "name" means Christ himself (Matt. 10:22; 24:9; Mark 13:13; Luke 21:12, 17; Acts 9:16; 21:13). The exception is Acts 5:41, where "the Name" (like "the Way" [*see* WAY]; Acts 9:2; 19:9) is a technical term for the Christian faith. Hence to suffer for the Name means to suffer as a Christian. The only other instance of this usage in the NT is in III John 7, where reference is made to brethren who have gone forth "for the sake of the Name" (ERV-ASV).

R. ABBA

NANEA nə nē′ə [Ναναία]. A temple in Persia despoiled by Antiochus IV (I Macc. 6:2). It is called by Josephus (War LXVI; Antiq. XII.ix.1) and Polybius (31.4) the Temple Artemis. In it were the golden shields and arms of Alexander the Great. The inhabitants arose against Antiochus when he sought to plunder this temple, and he returned with great distress to Syria ("Babylon"). The Syrian goddess Nanea is Nana of the Babylonians and is identified by Appian (*Syrian Wars* 66) with Aphrodite of the Greeks and Venus of the Romans.

II Macc. 1:13-18 relates that when the king arrived in Persia with a strong army, he was defeated by the guile of the priests. On the pretext that he intended to marry the goddess, he came into the temple to claim its treasury as dowry. The priests had displayed the treasures but shut the temple gates after Antiochus had entered. From a secret opening in the ceiling they hurled stones at the king and struck him down, decapitated him, and threw his head out to those waiting outside.

Some scholars believe the incident refers to Antiochus III, who lost his life when he sought to plunder the temple of Bilus in the Elymean hills (Strabo 16.1.18). Others regard this as being Antiochus Sidetes VII, who was killed in his campaign against the Parthians in 129 B.C. (Appian *Syrian Wars* 68).

J. GRAY

NAOMI nā ō′mĭ [נעמי, my joy, my pleasant one; *cf.* Ugar. *n'm,* be pleasant, lovely; *probably a feminine form of Naaman*]. One of the leading characters in the book of Ruth. In a time of famine Elimelech of Bethlehem, his wife Naomi, and their two sons sought refuge in Moab. Here the sons married, and Elimelech and both sons later died. Naomi resolved to return to Bethlehem in Judah, and urged her two Moabite daughters-in-law to go back to their own families. One, Orpah, eventually yielded to her entreaty. The other, Ruth, declared her devotion to her mother-in-law (1:16-17), and accompanied her to Bethlehem. On their arrival, at the beginning of the barley harvest, Naomi contrasted the meaning of her name with the bitterness of her lot, and asked to be called Mara, "bitter" (1:20-21).

Ruth, going out to glean in the fields, happened to come to the field of Boaz, and attracted his favorable attention (2:5, 10-16). When Naomi learned this, she encouraged Ruth to remain with Boaz' maidens, since he was a kinsman of Elimelech. Later Naomi sent her daughter-in-law to find Boaz where he was spending the night at the threshing floor, and to ask his protection as next-of-kin. Boaz accepted the request, redeemed the property of Elimelech, and married Ruth. Their child was hailed as a "son . . . born to Naomi" (4:17). The line of Elimelech was thus preserved, and Naomi's heroic perseverance was splendidly rewarded.

D. HARVEY

NAPHATH-DOR nā′făth dôr′ [נפת דור (Josh. 12:23; KJV COAST OF DOR), נפת דאר (I Kings 4:11; KJV REGION OF DOR)]. Alternately: NAPHATH [נפת] (Josh. 17:11; KJV COUNTRIES); NAPHOTH-DOR nā′fŏth dôr′ [נפות דור] (Josh. 11:2; KJV BORDERS OF DOR). A city or region identical with or adjacent to DOR. The term "Naphath" probably refers to the coastal plain in the vicinity of Dor.

W. L. REED

NAPHISH nā′fĭsh [נפיש]; KJV NEPHISH nē′— in I Chr. 5:19. The eleventh of Ishmael's twelve sons (Gen. 25:15; I Chr. 1:31), also designated "twelve princes [נשיאים] according to their tribes" (Gen. 25:16), perhaps indicating their position in a sacral institution (cf. Gen. 22:20-24; Num. 1:5-16; 13:4-15; 34:17-28); located in NW Arabia. The tribe was subdued by the Israelite Transjordan tribes (I Chr. 5:19 [LXX Ναφισαιων, Ναφεισαδαιων]).

NAPHISI. KJV Apoc. form of NEPHISIM.

NAPHOTH-DOR. Alternate form of NAPHATH-DOR.

NAPHTALI năf′tə lī [נפתלי, *presumably originally the name of a place or region; folk etymology derivation in* Gen. 30:8 *from* פתל, to wind, to twist]. The sixth son

of Jacob, and the *heros eponymos* of the tribe of Naphtali. Jacob's second son by Rachel's maid Bilhah, and the full brother of Dan (Gen. 30:6-8), Naphtali is usually mentioned along with Dan in the lists of the sons (Gen. 35:25; 46:24; Exod. 1:4). In I Chr. 2:2 the two are probably separated by Joseph and Benjamin only inadvertently.

The special relationship of the tribe to Dan, which is expressed in the genealogy of the sons of Jacob, is easy to understand because of their geographical proximity in Galilee. The relationship of Dan to the Rachel group, which is also indicated there, is understandable in the light of Dan's original sojourn in the region SW of the Ephraimite territory, but it is not immediately in the case of Naphtali. Naphtali's territory, which according to the old description of the boundaries consisted of a broad strip parallel to the Jordan from Lake Huleh to the S end of the Lake of Gennesaret (Josh. 19:32-39), is separated from the Rachel group by the Leah tribes of Issachar and Zebulun. It could be conjectured that Naphtali, like Dan, migrated there northward after an initial settlement in central Palestine. The alternative assumption is just as valid—namely, that the Naphtali group had already separated from the main group of Rachel at the time of the crossing of the Jordan, which presumably took place at the more northerly fords. Coming into the upper valley of the Jordan and up the E slope of the Galilean Mountains, it came into the territory of the city of Hazor, whose king in the Amarna period, like Labaja of Shechem, had apparently been able to extend his rule beyond the compass of a normal city-state at the expense of the neighboring cities. In any case, the king of Hazor occupied a leading position among the Canaanites even at the time of the Israelites (Josh. 11:10; Judg. 4:2). It is quite conceivable that Naphtali had to make so many concessions to the Canaanites that the tribe was henceforth valued only as half-caste. The name of the tribe, which was taken from the region and probably is not of Semitic origin, may be proof of this. One may add to this the notation in the "negative inventory of possessions" that the Naphtalites "dwelt among the Canaanites, the inhabitants of the land" (Judg. 1:33). A Naphtalite tradition from the period of the occupation of land seems to be concealed in the description of the battle at the Waters of Merom, which has been expanded into a description of the conquest of the N half of Palestine (Josh. 10). Otherwise the earliest sources have not much to report concerning the tribe, which was unimportant as a result of its peripheral location. In the Blessing of Jacob, Naphtali as the last of the Galilean tribes gets a somewhat gloomy comment; it is compared to an unleashed hind, and this probably suggests the danger of its impulsive strength (Gen. 49:21). The Naphtali saying in the Blessing of Moses is essentially religious in content, but it speaks, too, of possession of the sea—i.e., the Sea of Chinnereth. The designation of the "Southland," which follows, scarcely takes its point of orientation from the sea. In that case it would refer to a part of the Jordan Valley S of the sea. But as this area belonged to Issachar, it more probably designates a pre-Israelite center of power N of the Sea of Chinnereth, probably Hazor. If this is the region actually meant by "Southland," then it would follow that the "Northland," still farther N, did not come into Naphtali's possession. As a matter of fact, the towns Abel-beth-maacah (Abil el-qamh) and Ijon (Tell Dibbin), which were later Israelite, seem not to have been included in the old system of border descriptions in the book of Joshua. They are mentioned for the first time at a late date: Abel, not until the time of David (II Sam. 20:14-15); Ijon, four generations later (I Kings 15:20). Both seem to have been settled relatively late by Israelites and then perhaps by others who immigrated from farther S, so that for a while a gap separated Naphtali and Dan. The Song of Deborah lauds Naphtali because of its death-defying action for the freedom of Israel (Judg. 5:18). The leader of the amphictyonic levy came from Naphtali (4:6, 10). Under Gideon, Naphtali proved its loyalty to the amphictyony by participation in the expulsion of the Midianites (Judg. 6:35; 7:23).

In the period of the kings Naphtali constituted a separate region in Solomon's arrangement of districts (I Kings 4:15). Solomon's brass-founder, Hiram, was Naphtalite on his mother's side (7:14). Under Baasha the territory of Naphtali suffered under the invasion of the Arameans allied with Asa (15:20; apparently Ijon and Abel-beth-maacah, even as Dan, are not reckoned to Naphtali, and only the fourth one in the list, "all Chinnereth," is included in "all the land of Naphtali"). Finally, Naphtali is found in a comment on an extract from the annals which described the route of Tiglath-pileser III, in the war which ended with the incorporation of Galilee and the land E of the Jordan into the Assyrian provincial system (II Kings 15:29; II Chr. 16:4). Isaiah alludes to the same event (Isa. 9:1—H 8:23), and his oracle has influenced Ps. 68:27—H 68:28.

The later literature mentions Naphtali almost exclusively in statistical contexts—primarily, of course, the P stratum of the Pentateuch. Here, except for the list of scouts (Num. 13:14), Naphtali always stands at the end (1:15, 42-43; 2:29; 7:78; 10:27; 26: 48-50; 34:28). In the Deuteronomic historical work, Naphtali appears in the lists of the Levite cities (Josh. 21:6, 32; I Chr. 6:62—H 6:61) and the cities of refuge (Josh. 20:7), in Deut. 27:13 at the end of the group uttering the curse, and in 34:2 in a geographical survey which goes from N to S. In the apportionment of the land in Ezek. 48:3, Naphtali receives the third strip in the N, next to Dan and Asher, while Issachar and Zebulun are forced to emigrate to the S. In vs. 34 the last gate is given the name of Naphtali. Only in the lists of the Chronicler is Naphtali never ranked at the end (I Chr. 12:35; 27:19), not even in I Chr. 7:13. Otherwise "Naphtali" serves as a designation of the N in I Chr. 12:40; II Chr. 34:6.

In the NT, in addition to the quotation in Matt. 4:13, 15, Naphtali appears in the fifth position in the list of the sealed (Rev. 7:6).

For the territory of Naphtali, *see* TRIBES, TERRITORIES OF, § D5. *See* the bibliography under ASHER.

K. ELLIGER

NAPHTHA năf'thə [νάφθα] (Song of Thr. Ch. 23). An inflammable substance. This is referred to as

"nephthar" (KJV "naphthar") in II Macc. 1:36. There the term is interpreted as meaning "purification" and is associated symbolically with the purification of the temple (cf. Num. 31:23). Strabo (16.1, 15) speaks of a liquid "which they call naphtha; if it is brought near fire it catches the fire." The etymology of the word is obscure.

NAPHTHAR. KJV form of NEPHTHAR.

NAPHTUHIM năf'tə hĭm [נפתחים; LXX Νεφθαλιιμ]. An unidentified ethnic group.

The Naphtuhim are mentioned only in the ethnographic lists of Gen. 10:13; I Chr. 1:11, where they are placed between the LEHABIM and the PATHRUSIM. Although we have no reason to believe that these lists are arranged according to an accurate geographical pattern, the identification of the Lehabim as Libyans and the Pathrusim as the inhabitants of Upper Egypt has led scholars to find in the term "Naphtuhim" a reference to the residents of the Egyptian Delta. None of the suggestions posed to date is without difficulties, but among the more likely correct is that of W. Spiegelberg (*see bibliography*)—namely, that "Naphtuhim" = Egyptian **na-patōḥ + -îm*, where the Egyptian word is a plausible, but conjectured, late form for "those of the Delta."

Bibliography. W. Spiegelberg, "נפתחים (Gen. X,13)," *OLZ*, 9 (1906), 276-79. T. O. LAMBDIN

NAPKIN [σουδάριον, *from* Lat. *sudarium,* a cloth for wiping away perspiration, a handkerchief]. Alternately: CLOTH, HANDKERCHIEF. A small cloth. In Luke 19:20 it refers to the small cloth in which the one-talented man concealed his pound for safekeeping against the day of reckoning. In John 11:44 ("cloth") it is the cloth wrapped around the face of the dead. According to John 20:7, Jesus' face had been bound with a napkin which, after the Resurrection, was found in a place by itself. In Acts 19:12 ("handkerchief") the word doubtless refers to the small sweat-cloth handkerchiefs which had come into contact with Paul and were thus thought to possess some of the healing power of the apostle which could be transmitted through them to the sick.

J. M. MYERS

NARCISSUS när sĭs'əs [Νάρκισσος] (Rom. 16:11). The head of a household (including family and slaves), some of whom were Christians. The most famous bearer of this name was the freedman of the Emperor Claudius (A.D. 41-54), but it is quite unlikely that his household is meant here.

F. W. GINGRICH

NARD närd [נרד, *nērd, loan word from* Sanskrit *via* Pers.; νάρδος]. A costly fragrant ointment prepared from the roots and hairy stems of an aromatic Indian herb, *Nardostachys jatamansi* (Wall.) D. C. (also known as *Valeriana jatamansi* Wall.). In the OT it appears in the Song of Solomon as a perfume giving fragrance to the king's couch (1:12) and as one of several fragrant spices listed symbolically in praise of the bride (4:13-14). The expression translated "pure nard" in the RSV and "spikenard" in the KJV (νάρδος πιστική) in Mark 14:3; John 12:3 (cf.

6. Nard

Matt. 26:6-13; Luke 7:36-50) designates the costly ointment which the woman used to anoint Jesus when he visited Bethany. The obscure πιστική has been variously translated "pure," "genuine," "liquid," and traditionally "spike" (cf. Vulg. *spicatus* —i.e., the spikelike form of the root and lower stem of the young plant). *See also* FLORA § A7*k;* OINTMENT; SPICE.

NASBAS. KJV form of NADAB 5.

NASH PAPYRUS năsh pə pī'rəs. A pre-Christian papyrus containing the Decalogue (Exod. 20:2-17 or Deut. 5:6-21) and the Shema (Deut. 6:4-5).

The Nash Papyrus, first published in 1903 by S. A. Cooke, was purchased from a native Egyptian dealer by W. L. Nash, then secretary of the Society of Biblical Archaeology. The papyrus is of unknown provenance, although allegedly from the Faiyum, and consists of a single sheet, not from a scroll, apparently used for teaching or lectionary purposes. The text itself does not correspond exactly to the MT or to the LXX but stands closer to LXX A than to B. The writing may be assigned to somewhere in the Maccabean period, between 165 and 37 B.C., on the basis of the paleography, for which the Aramaic papyri from fifth-century Egypt provide a *terminus post quem* and the Herodian inscriptions a *terminus ante quem.*

NASITH. KJV Apoc. form of NEZIAH.

NASOR nā'sôr. KJV Apoc. form of HAZOR.

NATHAN nā'thən [נתן, gift; Ναθάν]. **1.** A son of David. He was David's third son born in Jerusalem (II Sam. 5:14; I Chr. 14:4). His mother's name was Bathshua, and thus he was an elder brother of Solomon (I Chr. 3:5). His descendants, as a subordinate branch of the Davidic family, appear, together with the latter, in the "Day of the LORD" apocalypse of the book of Zechariah (12:12). Jesus' genealogy is traced through this son of David in the Gospel According to Luke (3:31).

2. A prophet contemporary with David. He appears three times at the scene of the events of the Davidic court. The first time he was consulted by David (David had just finished the building of his palace) concerning the king's plans to erect a temple for the Lord. At first, Nathan approved the king's plans, but later he revealed to David the divine word which prohibited the building of a sanctuary but promised the establishment of the Davidic dynasty forever (II Sam. 7:1-17).

When David committed adultery with Bathsheba and murdered Uriah, her husband, Nathan presented a fictive legal case to David in which a rich man took away the only lamb of a poor man. When the enraged David announced that the rich man deserved to die, Nathan courageously confronted the royal murderer with his own crime (II Sam. 12:1-15).

In Solomon's succession to the throne of David, Nathan, together with Solomon's mother, Bathsheba, played an important role (cf. II Sam. 12:25). When Nathan was told that Adonijah, the elder brother of Solomon, had attempted to seize the royal throne, he sent Bathsheba to the senile David to ask him to fulfil his promise to make Solomon his successor; and later he, himself, went to the aged king to confirm her words. This plot of Bathsheba and Nathan was successful, for David ordered Nathan and Zadok the priest to anoint Solomon to be king over Israel on that very day (I Kings 1:5-48).

The Chronicler maintains that Nathan wrote chronicles on the acts of David (I Chr. 29:29) and of Solomon (II Chr. 9:29) and played a role in the development of temple music (29:25).

Apparently Nathan was a court prophet who had an intensive interest in the Davidic dynasty. This fact has prompted some scholars to deny the historicity of his denunciation of David. However, association with the court of David did not necessarily mean the servility of the prophet.

3. A man of Zobah; father of Igal, who was one of the thirty Mighty Men of David (II Sam. 23:36); and in the Chronicler's list of the heroes (I Chr. 11:38) he is the brother of Joel.

4. Father of two sons: Azariah, a chief officer of Solomon; and Zabud, a priest and the king's friend (I Kings 4:5). He is possibly identical with 1 or 2 *above*.

5. A descendant of the patriarch Judah, in the clan of Jerahmeel; son of Attai, and father of Zabad (I Chr. 2:36).

6. One of the leading men in the group of returnees, who was, along with a delegation, sent by Ezra to Iddo in Casiphia to ask for servants for the house of God (Ezra 8:16). He is probably identical with one of the returnees named Nathan who pledged that he would divorce his wife, since she was of foreign origin (10:39).

NATHANAEL nə thăn'ī əl [Ναθαναήλ = נתנאל, God has given; *see also* NETHANEL]. **1.** A priest required by Ezra to dismiss his foreign wife (I Esd. 9:22).

2. An ancestor of Judith (Jth. 8:1).

3. KJV Apoc. form of NETHANEL 7-8.

4. A guileless Israelite whom Jesus called to become a disciple and witness of his future glory (John 1:45-51).

Nathanael, from Cana in Galilee (John 21:2), was brought to Jesus by Philip, who had come to believe in Jesus' messiahship (1:45). Nathanael's initial skepticism concerning Jesus' right to this dignity (vs. 46) was overcome by a personal experience in which Jesus' knowledge of "what was in man" (2:25) deeply impressed him.

By describing Nathanael as a true, guileless Israelite (1:47), Jesus meant, not that he was sinless, but that he was utterly sincere, enlightened, and completely dedicated to God. Evidence for this judgment had come from Jesus' observing his actions under a fig tree (vs. 48). Fig and olive trees and grapevines offered rabbis suitable places for study and teaching of the law. Was Nathanael reading in the Scriptures, meditating, praying, and repenting when Jesus first saw him? Such activity would indicate clearly that he was an Israelite at heart, not merely in outward appearance.

Jesus' response to Nathanael's confession of faith contains an allusion to Jacob's experience at Bethel (Gen. 28:12). He says in effect, "If you follow me, you will become conscious that where I and my disciples are is the very presence of God, the veritable doorway to heaven."

Nathanael is not mentioned in the other gospels. The fact that his name occurs alongside those of important apostles (John 1:35-51; 21:2) has led many to equate him with persons appearing in the Synoptics (Bartholomew, Matthew, James the son of Alphaeus, John the son of Zebedee, Simon the Cananaean), the most favored identification being BARTHOLOMEW.

Whoever he was, Nathanael serves in the Fourth Gospel as a symbol of the pious, God-fearing Israelite who, good as he is, stands incomplete, and who must be willing to pass beyond his intellectual difficulties concerning Jesus into saving faith in him.

Bauer, *Das Johannesevangelium* (3 *Aufl.;* 1933), pp. 41-43; U. Holzmeister, "Nathanael fuitne idem ac S. Bartholomaeus apostolus?" *Bibl.,* XXI (1940), 28-39. E. P. BLAIR

NATHANIAS. KJV form of NETHANIAH 5.

NATHAN-MELECH nā'thən mĕl'ĭk [נתן־מלך, the king has given, *or* Melech (a god) has given]. A

EUNUCH or chamberlain under King Josiah near whose quarters the sacrificial horses for sun-worship, which was purged by Josiah, were kept (II Kings 23:11). The title designated both high (25:19) and low (I Kings 22:9) officers and is identical with Assyrian and Babylonian usage (cf. II Kings 18:17: Rabsaris, "chief eunuch"). It is possible, though unlikely, that the name Nathan-melech is theophorous. *See* MOLECH.

J. M. WARD

NATIONALITY. The concept of nationality, in the sense in which the term will be employed here, with special reference to the ancient Near East, is the state or quality of a people living in a given territory and bound together by a more or less common language, common traditions, history, customs, government, and often a common religion, and possessing a greater sense of common interest and interrelation than exists between them and other peoples.

In the Bible, especially concerning Israel, the term usually has a religious connotation, distinguishing those who worshiped Yahweh from those who served other gods. It often has strong geographical as well as ethnological significance (Deut. 32:8-9; cf. Acts 17:26-27).

Nationality became symbolized, in the political sense, by monarchy. E.g., when Israel aspired to become a nation, the desire was for a king that they might be "like all the nations" (I Sam. 8:5). Nationality frequently took the form of nationalism, or even of exclusivism. Yet with the mingling of peoples there came at times an ephemeral sense of interdependence, as typified in what has been called the "first internationalism" in the ancient Near East from *ca.* the fifteenth to the thirteenth centuries B.C.

1. Nationality in the ancient Near East. In the two largest areas of the ancient Near East, Egypt and Mesopotamia—excluding Palestine—the principal terms of our definition were met.

a. In Egypt. We cannot speak of actual nationality in EGYPT until the beginning of the dynastic period, although it may have been present in germ before that time. The Egyptians, being somewhat isolated from neighboring peoples, drew a distinction between themselves as "men" and other peoples as "humans"—to us a distinction without a difference, but to the Egyptians it meant that other peoples were in some manner inferior beings. When an alien, however, came to live permanently in Egypt, learned the language, followed the customs of the land, etc., he might ultimately be accepted as a member of the nation, whatever his race or color. E.g., Joseph, an alien, could even rise to a position of distinction (Gen. 41:40 ff).

b. In Mesopotamia. In the earliest historical periods Mesopotamia was made up of city-states, constantly warring and absorbing one another. To be sure, strong kings arose whose subjects gave these rulers their complete loyalty, which might presume some degree of nationality, but it was impermanent at best. The real beginnings of nationality belong, perhaps, to the periods of Sargon of Akkad in the twenty-fourth century B.C., and of the first dynasty of Babylon (Hammurabi's time) in the eighteenth century B.C. Thus a pattern was set for the two dominant nations, Assyria and Babylonia, each of which fostered a high degree of national feeling (*see* ASSYRIA AND BABYLONIA; SARGON 1; HAMMURABI). These two nations had much in common in their cultural heritage, so they could live in peaceful coexistence, but frequently tensions between them led to open warfare.

2. Terminology of nationality in the Bible. The word "nationality" does not appear in English versions, but there are several words, variously translated in these versions, which express the idea of nationality.

a. In biblical Hebrew. The most common Hebrew word for "nation" is עַם, denoting usually, not invariably, the nation Israel as the "people of God" (Judg. 20:2; II Sam. 14:13) or "people of Yahweh" (II Sam. 1:12; Ezek. 36:20). Other nations were designated usually by גּוֹי (Isa. 34:1*a*). Occasionally the word לְאֹם was employed to refer to other nations (Isa. 34:1*b*). A very common name for the nation—long familiar to readers of the KJV—was "children of Israel" (RSV usually "people of Israel"; Jer. 16:14).

b. In LXX Greek. The LXX translators usually rendered the common Hebrew word עַם by the Greek λαός (Isa. 10:22; Jer. 7:12). They employed the Greek ἔθνος for the Hebrew גּוֹי (Isa. 42:1; Jer. 16:19). For Hebrew לְאֹם they vacillated between ἔθνος (Hab. 2:13*c*) and ἄρχοντες, "rulers" (Isa. 41:1).

c. In NT Greek. The uses of λαός and ἔθνος follow much the same pattern as in the LXX: λαός used of the Jews (Luke 21:23; Heb. 11:25); of the Christians (Acts 18:10; I Pet. 2:10); ἔθνος of the Gentiles or other nations (Matt. 10:18; Rom. 15:9-10). In a few cases the latter term is used of the Jewish nation (Acts 10:22; 26:4).

3. Nationality in the OT. Most of the books of the OT have a strong interest in nationality, not so much in the political sense as in the social and religious sense. The first place we meet the idea of nationality is in the table of nations in Gen. 10, in which the Priestly writer (10:1-7, 20, 22-23) says all nations were descended from Noah's three sons. In Gen. 11:1-9, however, the J document attributes the division of mankind into separate language groups to the divine displeasure at their overweening pride in having built themselves a "city and a tower" to "make a name" for themselves "lest we be scattered"

(11:4). Thus, they felt, they would possess power for achievement which would make them self-sufficient. In the one case we have the origin of separate nationalities in natural kinship, divinely sanctioned; in the other, they came about in consequence of the arrogance of men.

a. In Israel. The first point at which Israel is named is Gen. 32:28—H 32:29, where Jacob's name is changed to Israel (*see* ISRAEL, HISTORY OF). But this is not the real beginning of nationality for the people Israel. We cannot truly speak of nationality as concerns ancient Israel until the establishment of the amphictyony (an association of tribes for protection of and worship at a particular shrine) at the common religious center of Shiloh (Judg. 18:31*b;* 21: 19; I Sam. 1:3; 2:14*b;* 4:3*b*-4). Yet—and here interpreters differ—nationality may have been germinally present in the Mosaic age (*see* MOSES; COVENANT), was developed in the confederation of tribes during the conquest and settlement of Canaan, and was consummated at the time of the founding of the monarchy under Saul (I Sam. 11:15).

b. Israel an elect nation. The Israelite nation came to regard itself as the chosen people of Yahweh, its God (Deut. 7:6; I Kings 3:8; Jer. 13:11; *see* ELECTION).

The J writer had traced the idea of election as a central doctrine as far back as Abraham (Gen. 12: 1-3: *see* ABRAHAM; PATRIARCHS), and continued the theme in the PENTATEUCH. This theme was carried through the subsequent history by succeeding writers. Israel was constantly reminded of its nationality as the "people of God"—a phrase often repeated, either directly (Judg. 20:2; II Sam. 5:2;) or indirectly as "my, thy, his people" (II Sam. 5:2; Pss. 14:7; 47:9).

The covenant at Sinai (Exod. 19:5-6) was usually looked upon as the seal of the divine choice, making Israel more than a political state; indeed, it was a religious community. The covenant was conditioned upon the nation's remaining faithful to her God. The prophets often denounced the nation and threatened calamity or destruction—loss of nationality—for breaking the covenant (Jer. 11:3-4, 8-11; Hos. 8:1-3; cf. Jer. 15:6-7; Ezek. 16:59-60). Yet always there was hope that the nation would repent and be restored.

c. Future of Israel's nationality. In view of the Israelite belief in the "everlasting" nature of the covenant (cf. Ezek. 16:60, etc.) it was inconceivable that her nationality should ever perish. The prophets nurtured this hope even in the darkest times. It was not a shallow optimism on their part, but based upon a trust in the mercy and forgiveness of the God of the covenant (Deut. 7:9) if the people remained faithful or repented when they had sinned against him. This hope of survival of nationality took several forms at various times in the history of Israel. Some passages predict that the whole nation will survive (Deut. 30:3-5; Hos. 2:14-15, 23; 14:1-7). Many postexilic interpolations express a similar idea (Isa. 11:12; Amos 9:14-15; Zeph. 3:20). Other apparently authentic passages, written at a time of impending or actual calamity, cling to the hope that a REMNANT will remain faithful or repent and survive (Isa. 1:9; 10:20-22; Amos 5:15). Certain late interpolated passages contemplate a messianic king (*see* MESSIAH), usually of Davidic lineage, who will in the future become ruler of the restored nation (Isa. 32:1-5; Jer. 33:14-17; Mic. 5:2-4). Still other late passages speak of the nations coming to acknowledge Israel's God (Isa. 2:2-4; 66:23; Zech. 14:16) or of the wealth of nations flowing to enrich Israel (Isa. 60:5, 11; cf. 45: 14; Hag. 2:6-8). Additional late eschatological passages (*see* ESCHATOLOGY OF THE OT) look for a coming destruction of other nations or their harmlessness to Israel (Isa. 17:9; cf. 60:12; Jer. 30:10-11; Ezek. 28:24).

The most magnanimous hope for the enduring survival of Israel—and this would include other nations also—was that of Second Isaiah (Isa. 40–55), the prophet of the Exile, who hoped for a reconstitution of the nation in the homeland. This writer sounded a call for more than restoration of his own nation, for Israel, as the SERVANT OF THE LORD, is to "bring forth justice to the nations" (42:1) and to be a "light to the nations" (49:6). Israel, in short, is to bear responsibility for other peoples, far beyond her care for her own nationality and the harboring of her own national faith (cf. Ruth 1:22; 4:17-22; Jonah 4:11).

The actual history of succeeding periods did not bear out this burgeoning hope. Israel lost her political nationality under the subjection of the Babylonians, the Persians, and the Greeks. Yet through it all she maintained her status as a religious community, a holy nation, or people (Exod. 19:6; Deut. 26:19; cf. Lev. 20:26). In the time of Nehemiah and Ezra this meant a type of THEOCRACY with a strong sense of "peoplehood" and a stressing of purity of blood, prohibition of intermarriage with people of other nationalities, and strict obedience to the law. Following the Greek period came a century of religious, then political, freedom under the HASMONEAN kings. Then occurred the Roman conquest, marking once more for the Jews a cessation of political independence. But still for them nationality—of the religious kind—persisted.

4. Nationality in the Apoc. and the Pseudep. The OT book of Daniel attests the Jewish struggle for religious and political independence, as is true also of the apocryphal book of I Maccabees. The period was marked by a new sense of nationality, which is eloquently shown by I Macc. 3:59. The spirit of patriotism, marked by religious zeal, was kept alive by the book of Judith (11:10; 16:17-18). Again, the OT book of Esther, a secular work, introduced the feast of Purim and called for vengeance against the enemies of the Jews (4:14; 9:1-19). The Additions to Esther (apocryphal), supplying the religious element lacking in OT Esther, reveals also a high feeling for nationality (10:8-12; cf. 11:9). Even Ecclesiasticus (ch. 50), though a wisdom writing, carries a note, rare in such works, of nationalistic sentiment, urging that certain aspects of the national faith were beneficial in maintaining the separateness of the Jewish nation. Wisd. Sol. 6:1-5 states that the dominion of the kings of the nations derives from God (the God of Israel), and he shall punish them for not acknowledging this God (cf. Enoch 46:5). Jub. 22:12-20; 30:7-14 defend Jewish nationality by permitting no interrelations (intermarriage, interdining) with Gentiles. An opposing view is held by Test.

Benj. 1-6; 9:2; 10:5—showing a friendly attitude toward the Gentiles, for they too may be saved.

5. Nationality in the NT. The NT contains certain emphases on nationality similar to, and others differing from, those in the OT. The earliest followers of Jesus were Jews living under Roman rule, so they could not assert political nationality. But Jewish nationality in the religious sense remained strong. Many of the Jews who opposed Jesus, especially those of the official parties, did so on at least two grounds: either because in his teaching Jesus seemed to be thrusting aside many of the religious requirements of the national life, or because in proclaiming himself "King of the Jews" he was subverting Roman power (Mark 15:12, 26; cf. Luke 23:1-3). When the Christian movement actively reached out toward non-Jews, the problem changed, for here it came into conflict with imperial Roman claims which had their own implications of political (and religious?) nationality. But there is in the NT no hint of the organization of a Christian state, or any evidence of a sense of nationality on the part of the Christians, as there was in Judaism (*see* MAN AND SOCIETY).

a. Jesus' attitude toward nationality. Jesus himself was a Jew by nationality and never forswore it. In his teaching, while he minimized some of the legalistic aspects of the national religion, he centered his emphasis upon the spiritual core of the prophetic faith. What little Jesus may have said that had any bearing upon nationality would have had to do with the Roman state. He avoided political complications in his teaching, for he was concerned with man's relation to God and to his fellow men, and not to the Roman political order. Evidences of the nonpolitical character of his ministry are many (Luke 20:20-26; John 18:33-36; cf. Matt. 4:1-10). Yet, paradoxically, he was condemned to death as a revolutionist (Mark 15:26, 32*a*), owing in part to his accusers' distortion of the tribute saying (Luke 23:2). On the basis of this saying (Luke 20:21-25) it appears that Jesus accepted the state as belonging to the present world and as entitled to receive from its subjects the taxes necessary to its existence. Elsewhere we find that Jesus did not think of the state as the final form of society, in view of the end time (Mark 1:15; cf. Matt. 8:29; Greek *kairós*), which was to see the ushering in of the KINGDOM OF GOD. The kingdom of God was already being fulfilled (Matt. 12:28; Luke 17:20-21), and it is to come in its fulness in the future (Mark 14:25; Luke 13:29-30; *see* ESCHATOLOGY OF THE NT). Jesus appears definitely to have rejected the method of the ZEALOT to use force or the sword against the Roman state to re-establish Jewish political nationality (Matt. 26:52*b;* cf. 11:12).

b. Paul's attitude toward nationality. Paul enjoyed dual nationality, one political and one racial and spiritual, both of which he esteemed. He was a Roman citizen (Acts 22:25-28; 23:27; *see* PAUL), and he was of Jewish lineage and religion (Acts 21:39; 23:3; Phil. 3:3-6). This dual nationality sometimes proved advantageous to him during his missionary career.

The *locus classicus* for Paul's pronouncement on the Roman state is Rom. 13:1-2, often interpreted as calling for unconditional obedience of all subjects because the state is a divinely ordained institution. But if this passage is read in its context and considered with other verses in this chapter and in the light of at least one other passage (I Cor. 6:1-6), it may be seen that Paul took a position somewhat similar to that of Jesus. To Paul also the state is a necessary institution in this world (cf. I Cor. 6:3*b*), ordained of God (Rom. 13:1-2, 4), entitled to receive taxes (vss. 6-7; cf. Matt. 22:21); but in view of the end time (vs. 11), it is impermanent. Similar to Jesus' attitude but more explicit in this instance, is Paul's in viewing the state with critical judgment. His Roman nationality did not prevent him from being critical of Roman courts of law (I Cor. 6:1-6) and advising Christians to avoid civil lawsuits. Christians are changed men (vs. 11), and therefore they are not to bring their grievances to the courts to be judged by "unrighteous" (vs. 1) and "unbelievers" (vs. 6).

Paul shows in the final analysis that his gospel and the Christian movement transcend nationality (Rom. 1:16; 3:29; Gal. 3:26-28; Col. 3:11; cf. Rom. 11:11-15).

c. Other NT writers' attitudes toward nationality. In the book of the REVELATION the Roman Empire is called a "beast" (13:1-10). The term is not one that Paul would have used, but this book was written in a time of persecution of Christians by the Roman overlords, and this is the kind of imagery commonly employed by apocalypses to designate the persecuting power (cf. Dan. 7:3-6). Yet even while condemning the state, the book does not summon its Christian readers to revolt. Instead it advocates passive resistance, endurance, and faithfulness (13:10; cf. 2:10, 26), since the final victory and the destruction of the Roman state rests with God. At the same time the author sees a "new Jerusalem," by whose light the nations shall walk and the "kings of the earth shall bring their glory into it" (21:2, 24-26; cf. 7:9-10; 22:2). Allowing for the kind of imagery used here—partly borrowed from Isa. 60:11—it is uncertain whether these eschatological passages foresee the destruction or the survival of nationality.

Four other passages in the NT, most of them written probably to people facing or anticipating persecution, treat of Christian attitudes toward the Roman state. I Pet. 2:13-17; Tit. 3:1 offer much the same counsel to Christian readers as Paul did in Rom. 13:1-2. Heb. 10:32-39; I Pet. 3:13-17 (cf. 4:12-14) call for the Christians to manifest confidence, endurance, and faith in the presence of trials that have come or may come to them from the state. In any case, they know that everything will be resolved for them soon (Heb. 11:36-37; cf. I Pet. 1:6-7, 13).

One final passage, I Tim. 2:1-6 (cf. 4:10), advises Christians to pray "for all men, for kings and all who are in high positions," and states that God "desires all men to be saved and to come to the knowledge of the truth." This exhibits an attitude of magnanimity and universality similar to that which we observed in Paul and in the message of Second Isaiah. Nationality was thus transcended at certain points in both the OT and the NT.

NATIONS. In the biblical drama there are three dramatis personae: God, the nations, and Israel. The nations are the matrix of Israel's life, and the *raison d'être* of her whole history and calling. In the table of nations in Gen. 10 there are over seventy different ethnic groups mentioned, among which are the ancestors of the Hebrews. It includes the whole of mankind as known by the author, divided roughly into racial groups. It is unique in ancient literature. This interest in the nations accurately reflects the biblical emphasis on HISTORY as the vehicle of revelation and the nations as the object of God's redeeming purpose. Such preoccupation with history cannot be found in any other sacred literature of the world.

After the first period of world prehistory as presented in the Bible, which ends with the Flood, mankind makes a new start with Noah and differentiates into families, languages, lands, and nations (Gen. 10: 5, 20, 31). Each of these categories reveals the particularities of mankind from which arise the infinite varieties of social, political, cultural, and religious expressions which form the fabric of the life and history of mankind. From the very beginning the Bible takes these particularities seriously, and all through it they form the problem of Israel's life and the object of her mission, until, at the end, "a great multitude which no man could number, from every nation, from all tribes and peoples and tongues," stands before the throne of the Lamb (Rev. 7:9).

Bibliography

1. Terminology. ***a. In the OT.*** There are three Hebrew words used more or less synonymously to refer to the nations; each of these may be used in the singular to refer to a particular nation, including the Hebrew nation.

עַמִּים (cf. Ugaritic *'m*, "clan"; Vulg. *populi* or *nationes;* LXX ἔθνη or λαοί), "peoples." The original meaning of the word places stress on kinship as the basis of the group, though the limits may be a clan, a city, or a nation. In the singular it is the word most often used to refer to Israel as the עַם of Yahweh. In this case the LXX translates λαός. The LXX uses ἔθνη for the plural in the Pentateuch, Joshua, and Judges; elsewhere both ἔθνη and λαοί are used.

גּוֹיִם (Akkadian loan word from West Semitic, *ga'u*, "gang" or "group" [e.g., of workmen]; Vulg. *gentes;* LXX ἔθνη), "nations"; KJV alternately "heathen." This word stresses political and social rather than kinship bonds.

לְאֻמִּים (cf. Akkadian *li'mmu*, "thousand"; Ugaritic *l'm*, "people"; Vulg. *populi;* LXX ἔθνη), "peoples"; KJV (incorrectly) "the people." According to I. Mendelsohn, this term originally meant a city which could produce a thousand soldiers in time of war. The word is often used in the prophetic books and the Psalms in parallel with גּוֹיִם.

b. In the NT. The main term used in the NT is ἔθνη (Vulg. *gentes*), taken from LXX usage. It is translated "nations" thirty-seven times, "Gentiles" eighty-nine times, "heathen" three times, "pagans" twice.

"Gentiles" is used when the reference is interpreted to be to the non-Jewish nations in contrast to the Jews (Luke 21:24; Acts 9:15; I Cor. 1:23), or in contrast to followers of Christ (Matt. 6:7, 32; 10:5; 20:19; Eph. 2:11-12). "Nations" is used when the reference is interpreted as to all nations including the Jews (Matt. 24:9, 14; Mark 11:17; Rev. 7:9; etc.). Exceptions to be noted are Acts 13:19; 14:16; Gal. 3:8.

The NT uses λαοί, "peoples," in the plural only eight times, four of which are in parallel to ἔθνη, indicating Semitic style or LXX quotation (Luke 2:31; Acts 4:25, 27; Rom. 15:11), and four in Revelation in a formula with "nations, tongues, and tribes," reminiscent of Gen. 10; Dan. 3:4, 7; etc.

2. The holy people among the nations. Israel understood her origin to lie, not in her own soil or in a common ancestor, but among the nations, through the calling of and covenant with Yahweh. This is expressed in terms of generations in the early chapters of Genesis where the ancestry of Abraham is gradually differentiated from the sons of Noah, through the Semitic peoples of Mesopotamia and Arabia. In terms of ethnic origin, records show major sources among the Arameans (Deut. 26:5), Hittites, and Amorites (Ezek. 16:3), with elements being added in the early years from Egypt (Gen. 41:50; Lev. 24:10), the Kenites (Exod. 18:11; Num. 10:29 ff; Judg. 1:16; 4:11), Gibeonites (Josh. 9:3 ff), and others (*see* PROSELYTE for a list of Israelite aliens [גֵּרִים] who were gradually assimilated). The MIXED MULTITUDE (Exod. 12:38) that went up from Egypt with the Hebrews also testifies to the heterogeneous nature of early Israel. To these we should add the Palestinian HABIRU, who joined the Israelites at Shechem (Josh. 24), and the CANAANITES (I Sam. 7:14).

We find the same understanding of origins in the NT. Jesus' common ancestry with all the nations of men is asserted in the Lukan genealogy (Luke 3:36-38); while in terms of geography, the new people of God is formed from all nations and peoples of the Roman Empire.

3. The nations in "patriarchal" theology. ***a. Mission to the nations.*** The Yahwist historian has so arranged his material that the scattering and mutual alienation of the nations of mankind (Gen. 11:1-9) is immediately followed by Yahweh's call of Abraham (12:1-3). Following the picture of the nations living under a curse, the new nation (גּוֹי) is chosen to receive blessing and to be the means of the spread of this blessing to all nations: "By you all the families of the earth will bless themselves" (vs. 3). The re-

flexive form of the verb serves to underline the fact that in this motif, the nations will not merge their identity in a common humanity, but each will receive the particular blessing fitted to its character and destiny, like the particular blessings received by the sons (tribes) of Jacob (Gen. 49; Deut. 33; *see* BLESSINGS AND CURSINGS). The meaning of the covenant blessing is summarized in Deut. 28:1-14. It is this kind of blessing which is to spread to all the nations, according to this promise to Abraham. It implies universal peace, so that the well-being of one may not be at the expense of the others (cf. Mic. 4:1-4), and likewise the establishment of a covenant relationship between Yahweh and the nations as the normative ordering of their national lives in blessing.

The importance of this motif for the Yahwist is underscored by its fivefold repetition in Genesis (12:3; 18:18; 22:18; 26:4; 28:14; cf. the threefold repetition of the curse, Gen. 12:3; 27:29; Num. 24:9; cf. the Elohist version of the Joseph cycle, when "all the earth came to Joseph to buy grain"; 41:57).

The COVENANT word to Moses as the representative of Israel fits well into this motif (Exod. 19:3-6). Yahweh makes a nation (גוי) out of all the peoples to be a kingdom of priests for the whole earth. The association of the priest (*see* PRIESTS AND LEVITES) with the giving of torah and the cultic blessing gives the connection of the vocation of Israel with her mission to the nations as found in the J tradition of Abraham.

The motif comes to the surface again in the royal theology at the climax of a coronation hymn (Ps. 72:17):

> May men bless themselves by him [the king],
> all nations call him blessed!

The blessing received by God's nation would spread through her king to the nations of the earth, according to this hymn. We find the same idea in a harvest hymn (Ps. 67) where Yahweh's blessing of Israel involves the faith that this blessing must extend to the peoples at the end of the earth, though Israel's role in the process is not clear. The internationalism of Solomon's reign is seen in the prayer of Solomon that Yahweh will answer the petitions of the foreigner who prays toward the temple. This foreigner would then become by implication the bearer of Israel's blessing to his nation, so that, in time, "all the peoples of the earth" might know the name of Yahweh (I Kings 8:41-43).

The collapse of the royal theology as an interpretation of Israel's mission to the nations is seen in the use of the motif by Jeremiah, just before the end of the monarchy. If Israel will truly return to Yahweh, says Jeremiah,

> Then nations shall bless themselves in him
> [i.e., in Yahweh, not the king],
> and in him shall they glory (Jer. 4:2).

This conditional promise, however, comes at the penultimate climax of the poem (3:1–4:4), while the closing note is one of doom for the nation, including the kingship.

When Israel shares the curse of the nations (Gen. 11:1-9) by being herself scattered among them, a new interpretation of her vocation is given by Deutero-Isaiah. The picture is now held up of the humble servant going out to the nations with תורה and משפט, for which the nations eagerly wait (Isa. 42:1-4; cf. 51:4-5), as instruments of blessing. Light and covenant, opening of eyes for the blind, release for captives, are parts of the blessing which the servant brings (Isa. 42:7; 49:9; cf. 61:1). Thus Israel appears as the bearer of the great invitation to the peoples to turn to Yahweh for salvation (i.e., blessing; Isa. 45:22).

In the postexilic literature is found the prophecy that the blessing will one day be restored to Israel as at first (Zech. 8:13), and it will be so powerful that it will spread to her ancient enemies and oppressors, Assyria and Egypt (Isa. 19:24-25). The book of Jonah reveals a similar spirit in urging Israel to carry the word of God's judgment and mercy to Nineveh. Finally there is the recurrence of the royal theology in the prophecy of the messianic king who will command the blessing of peace upon the nations (Zech. 9:9-10).

Although this motif becomes fainter and fainter in the postexilic and postcanonical period, its persistence is seen in the review of Israel's history by Ben Sirach. Abraham's faith resulted in God's assurance "that the nations would be blessed through his posterity" (Ecclus. 44:21).

In the NT there appears a consciousness that the promise made to Abraham is now being fulfilled. The evangelists compile their narratives with this emphasis in mind. In the words of Simeon, Jesus is described as a "light for revelation to the nations" (RSV "Gentiles"; Luke 2:32). The early days of his life are placed, not in Israel, but among the nations —i.e., in Egypt (Matt. 2:15). He begins his ministry, not in Bethlehem or Jerusalem, but in "Galilee of the nations" (RSV "Gentiles"; Matt. 4:15). During his ministry there, many come from the neighboring peoples to him (Mark 3:8). Later he makes a journey into Tyre and Sidon, beyond the borders of the Jewish population. On this trip he exorcises the demon in a Phoenician girl whose mother recognizes him as the giver of the bread of life (Matt. 15:21-28; Mark 7:24-30), cures a deaf mute in the Decapolis (Mark 7:31-37; cf. Matt. 15:29-31) and feeds the four thousand in the wilderness (Matt. 15:32-39; Mark 8:1-10). Subsequently he heals the servant of a centurion, with commendatory words for the faith of this man from the nations (Matt. 8:5-13; Luke 7:1-10; cf. John 4:46-54, where this healing is taken as one of the great signs of Jesus' power), and a demoniac in Gerasa, whom he sends as a missionary of God's grace to his own people (Mark 5:19-20). The mission of the Seventy, recorded in Luke 10:1 ff, is intended to be to the nations. Jesus gives his disciples the mission of the servant as the light and salt of the world (Matt. 5:13-14; cf. Isa. 42:6; 49:6; and on the fact that salt may imply covenant, cf. Num. 18:19; II Chr. 13:5). His triumphal entry into Jerusalem revealed him as the messianic king who will bring the blessings of peace unto the nations (Matt. 21:5; cf. Zech. 9:9-10).

The early Christians knew that the risen Christ had sent them to the nations (Matt. 28:19-20; Mark 16:15; Luke 24:47; Acts 1:8) on a mission which is in a line with the eschatological signs of the earthly ministry of Jesus, the prophecies of Deutero-Isaiah,

the royal (messianic) theology, the Sinai covenant, and the ancient promise to Abraham.

Paul found the purpose of the death of Christ to be that "in Christ Jesus the blessing of Abraham might come upon the nations" (RSV "Gentiles"; Gal. 3:14; cf. vs. 8). However, this fulfilment of the promise to Abraham in Christ brought Israel to a crisis, for it implied the end of her national aspirations. According to Jesus the nations themselves will judge Israel for her hardness of heart (Matt. 12:41-42). Peter quotes the promise to Abraham to encourage the Jews to take up their mission to the nations (Acts 3:25-26), and Paul quotes Isa. 49:6 as a judgment on the Jews for refusing to see their mission (Acts 13:47). Christ was meant to be a light to both the Jews and the nations; but since the Jews reject the light, the apostles turn to the nations (Acts 13:46; 18:6; 28:28). Paul finally concludes that it is in the providence of God that the very disobedience of Israel after the flesh should mean that the blessing would reach the nations through Christ (Rom. 11:11-12).

The last appearance of the mission of Israel to the nations is seen in Revelation, where in the midst of world catastrophe and the martyrdom of Christians there is an "angel flying in midheaven, with an eternal gospel to proclaim to those who dwell on earth, to every nation and tribe and tongue and people" (Rev. 14:6). It is the invitation of God in the style of Deutero-Isaiah: "Fear God and give him glory, for the hour of judgment has come" (vs. 7; cf. Isa. 45:22).

b. Goal of the nations' pilgrimage. If the J tradition of Genesis shows us the spread of the blessing of Yahweh to the nations through Israel's mission, the P tradition anticipates a reverse movement. In Gen. 17:3-8 the following promises are made to Abraham by El Shaddai: "I have made you the father of a multitude of nations. . . . I will establish my covenant between me and you and your descendants after you . . . , to be God to you . . . . I will give to you, and to your descendants after you, . . . all the land of Canaan." Here the "multitude of nations" (המון גוים) is parallel with the "descendants" of Abraham, who will inherit the covenant and the land of Canaan. Thus Canaan is seen as the gathering place for the nations and peoples as sons of Abraham and worshipers of El Shaddai.

The promise is repeated with variations twice to Jacob by Isaac (Gen. 28:3) and El Shaddai (35:11-12). Here the term קהל גוים is used, suggesting a religious assembly or CONGREGATION. Jacob passes on the same blessing to Joseph (48:4) with the words קהל עמים, and in the E tradition Jacob gives it to Ephraim (48:19), with the words מלא־הגוים.

The late date of the P narrative in written form should not be taken as an indication that this tradition is late. At the climax of an enthronement hymn of the monarchy stands the assertion:

> The princes of the peoples gather
> as the people of the God of Abraham
> (Ps. 47:9—H 47:10).

In Ps. 68, the procession of the tribes of Israel to the temple is suddenly joined by kings and people from Egypt and Ethiopia and the kingdoms of the earth, bearing gifts for the temple and singing praises to God. In both cases, cultic gatherings at the temple are seen as anticipations of the gathering of the nations and peoples of the earth to the shrine of Israel's God, who is over the nations.

In their hymns Israel called on "kings of the earth" to praise the name of Yahweh (Ps. 148:11-12; cf. 113; 117), while in their laments the deliverance of the sufferer prompts the worshiper to hope that one day

> All the nations thou hast made shall come
> and bow down before thee, O Lord
> (Ps. 86:9, quoted in Rev. 15:4;
> cf. Pss. 22:27-28—H 22:28-29;
> 102:18-22—H 102:19-23).

Although it does not occur elsewhere in the P tradition, the motif becomes most prominent in the exilic and postexilic eschatological prophecies. In Deutero-Isaiah we see the descendants of Israel returning from exile to Zion, in contexts which indicate that both the Diaspora Jews and the "survivors of the nations" are reckoned among these descendants (Isa. 44:1-5; 45:22-25; 49:12-20; 53:10). When, as a result of the suffering and mission of the Servant, the peoples at the ends of the earth are waiting for Yahweh's rule, then their survivors join themselves to Israel to converge on Jerusalem (55:5).

In later passages the motif appears in greater detail (*see* ESCHATOLOGY OF THE OT). Those from all the languages of the nations join the returning Jews (Zech. 8:21-23), and the alienation of Babel is removed when Yahweh gives them a pure speech so that they may call on his name (Zeph. 3:9). Kings lead their nations (Isa. 60:3, 11) in a great procession which extends "from sea to sea and from mountain to mountain" (Mic. 7:12), bringing the wealth of seas and nations on camels (Isa. 60:5-6), driving before them animals for sacrifice, and carrying the sons and daughters of Israel in their arms (vs. 4). They join themselves to Yahweh and become his people (Zech. 2:11) and go up every year to the Feast of Tabernacles in Jerusalem (14:16).

The object of the pilgrimage is the world sanctuary at Zion, which shall become a house of prayer for all nations (Isa. 56:7; cf. Mark 11:17). Zion is the navel of the earth (Ezek. 5:5; 38:12), the throne of Yahweh (Jer. 3:17), and the world mountain symbolizing the supremacy of Yahweh over all the nations and their gods (Ps. 99:9; Isa. 2:2-4=Mic. 4:1-4; Isa. 66:20; Dan. 2:35): Then Zion will be called the birthplace of the nations (Ps. 87).

The eschatological pilgrimage will be climaxed by a great "festal banquet on Mount Zion," when Yahweh will invite "all peoples" and "remove the veil" that has alienated the nations from him, "destroy death," and "take away the reproach of his people" (Isa. 25:6-8). Thus do the nations become sons of Abraham and inherit Canaan as their land.

The Jewish mission to the nations in later postexilic times (*see* PROSELYTE) belongs properly to this motif. For the object of the mission was to make Jews of the people of the nations, to bring them to worship God at Jerusalem. It was also closely linked with Jewish nationalism and legalism. This was behind Jesus' severe condemnation of the proselyte movement (Matt. 23:15).

In the NT John the Baptist begins his preaching with a rebuke to the Jewish nationalists. Sons of Abraham are not confined to Israel according to the flesh (Matt. 3:9). Jesus spoke of a new temple (Mark 14:58) to be the universal sanctuary for the nations, and this lies behind his cleansing of the court of the Gentiles of the old temple (Mark 11:15-18). Jerusalem is the city on the hill, whose glory cannot be hidden, as the signal for the eschatological pilgrimage (Matt. 5:14; cf. Isa. 60:1-3). There will be a gathering of all nations before the throne of the King (Matt. 25:32), and the righteous among the nations (i.e., the sons of Abraham) will receive their inheritance in the kingdom of God.

In Acts, the joy of Jewish Christians at the response of the nations is a foretaste of the joy of the kingdom. The very purpose of Christ's becoming a servant to the Jews was that the nations might glorify God for his mercy (Rom. 15:7-13). It is possible that Paul saw the offering of the nations for the Jerusalem community as a kind of anticipation of the offering to be brought to Zion in the final age (Rom. 15:16, 25-27; cf. Isa. 60:5). Paul, indeed, sees the promise made to Abraham fulfilled in the justification of the nations by faith (Rom. 4:13-18).

The eschatological pilgrimage appears finally in Revelation. Those who have conquered the beast sing praises to the "King of the nations" (RSV mg.), with the prophecy that "all nations shall come and worship thee" (Rev. 15:1-4). After the seven bowls of wrath have been poured out and Satan finally destroyed, kings and nations come to the new Jerusalem with the "glory and the honor of the nations" to walk in the light of the glory of God, which is shed by the Lamb, who is the lamp, giving light to all that are in the house (Rev. 21:22-26).

c. Rule over the nations. Isaac blesses Jacob with the words:

> Let peoples serve you,
> and nations bow down to you
> (Gen. 27:29 J).

Jacob's blessing on Judah was that peoples would be obedient to a king from that tribe (49:10 J). In the oracle of Balaam, Israel is likened to a wild ox devouring the nations who are his adversaries (Num. 24:8 JE), while in Moses' blessing Joseph is seen as a bull pushing the peoples with his horns to the אפסי (Akkadian *'apsu*, "primordial abyss") surrounding the inhabited earth (i.e., the "ends of the earth"; Deut. 33:17 JE). According to Exod. 19:6, Israel is chosen for a vocation of kingship as well as priesthood, and the covenant blessing to obedient Israel in Deuteronomy is that "you shall rule over many nations, but they shall not rule over you" (Deut. 15:6).

As might be expected, this motif is prominent in the royal theology. Like the kings of other nations, the Israelite kings had to save their people from the enemies round about her (I Sam. 9:16; 10:1). The picture of success over enemies, cringing foreigners, slave peoples (Ps. 18:37-45—H 18:38-46), is not unique; nor is the claim to rule the whole earth different from that of the kings of Mesopotamia or Egypt. With the Israelites as with other peoples, the KING was adopted as "Son of God" at his coronation (Ps. 2:7). Thus as the regent of the God of the whole earth, and the champion of Israel his people, the king had the right to rule over the nations. In effect, this meant the ideal of an Israelite empire modeled after that of David, but stretching "from sea to sea, and from the River to the ends of the earth" (Ps. 72:8)—i.e., the whole inhabited world. This concept was like that of the great world powers, from whom it doubtless originally came.

But with Israel there was always the qualifying idea which arose at least as early as the monarchy itself, that the nations are not ultimately enemies to be crushed, but creatures of God meant for blessing. Israel, through her king, was thus meant to fulfil God's purpose among the nations of the world. Hence Ps. 72, which tells of the world rule of the Israelite king, ends with the Abrahamic blessing, while the meaning of "heritage" in Ps. 2:8 must be defined in terms of the family of Abraham's descendants (*see above*).

In the exilic period the motif of dominion over the nations is subordinated to that of the servant who suffers at the hands of the nations and is despised by rulers. However, in the eschatological time, kings and rulers will bow down to Israel and serve the servant (Isa. 14:1; 49:7, 22-23; 60:10-14; 61:5). Peoples come to rebuild Jerusalem as the servants of Israel, and bring the wealth of nations as tribute to her (Isa. 60:1-3, 10-18) because of the glory of God on Israel.

In the postexilic period the royal theology is applied to the Messiah, whose rule will extend "from sea to sea, and from the River to the ends of the earth" (Zech. 9:10). The dominion of Israel over the nations is most clearly expressed in Daniel. The stone "cut out by no human hands," which breaks the image into powder and then becomes a great mountain to fill the whole earth (Dan. 2:34-35), is God's kingdom, "which shall never be destroyed, nor shall its sovereignty be left to another people" (vs. 44). In another vision, the Son of man, who is identified with the "saints of the Most High," is given dominion, glory, and kingdom,

> that all peoples, nations, and languages
> should serve him;
> his dominion is an everlasting dominion,
> which shall not pass away
> (Dan. 7:14; cf. vss. 18, 26-27).

In the NT, Jesus assumes the role of the servant, and teaches his disciples not to try to "exercise authority" like the nations (Mark 10:42-45). Yet the Triumphal Entry is a kind of momentary unveiling of the future king of Zech. 9:9-10, who would rule the whole inhabited earth. The disciples ask seats at his side when he comes in glory (Mark 10:37). He appoints thrones for the Twelve to judge the tribes of Israel (i.e., the sons of Abraham; Luke 22:30). Paul reminds the Corinthian Christians that they (the saints) will rule the world (I Cor. 6:2).

Thus there is the anticipated fulfilment of the promises made to the patriarchs and to Israel, and repeated in Daniel. By his death, Christ

> ransom[ed] men for God
> from every tribe and tongue and people and nation,
> and hast made them a kingdom and priests to our God,
> and they shall reign on earth (Rev. 5:9-10).

In the midst of persecution comes the promise that to everyone who "conquers and who keeps [Christ's] works until the end," Christ will give "power over the nations, and he shall rule them with a rod of iron" (2:26-27).

At the PAROUSIA, Christ himself will come to take up his reign over the nations (Rom. 15:12), and the reign of his saints on earth with him will begin (Rev. 20:6; *see* MILLENNIUM). Although many features of Revelation agree with Jewish apocalyptic speculation of the time (*see* APOCALYPTICISM), the kingdom of the Lamb is established through suffering, and the reign of the saints as manifest on earth is expressed through self-sacrifice and service.

4. The nations in the "exodus" theology. ***a. As enemies.*** In the OT this motif is seen in three aspects corresponding to the historical periods of Israel's life.

a) The holy war. This aspect is uppermost in the period of the exodus from Egypt and the conquest of Canaan. The major facts are the defeat of the Egyptian power by Yahweh (Exod. 15:21) and the defeat of the inhabitants of Canaan (3:8). These events are retold throughout Israel's history (I Chr. 17:21; Pss. 44:2—H 44:3; 78:53-55; 80:8—H 80:9; 135:10; Acts 7:45; 13:19). In this period Israel was led by Yahweh into battle, and the holy war was just as much a part of their sacred obligation as cultic worship (*see* WAR, IDEAS OF). The outcome lay entirely with Yahweh, while the warrior's duty was simply to fight in his power against the enemy's superior numbers and armament.

b) The chastisement of Israel. The ideology of the holy war continues through David's reign; and, though after that it loses its sacral character, the role of the nations as enemies of Yahweh and his anointed is retained in the royal theology (Pss. 2; 18; 47; 110; 144; 147).

The prophets, however, gave a new dimension to Israel's understanding of the nations as her enemies. In the prophetic teachings, Israel's role in the holy war is reversed. Instead of following Yahweh into war, she becomes the victim of the attacks of her enemies by express appointment of Yahweh as his judgment on his people. She will suffer the fate of any conquered enemy in time of war—desolation, death, disease, and slavery.

Yet the picture is not completely consistent. For the nations themselves were under God's righteous judgment (Isa. 10:8-14; Amos 1-2). The "multitude of all the nations" who made up the Assyrian army gathered against Jerusalem in the days of Hezekiah would not succeed (Isa. 29:7-8), and Yahweh was about to "sift the nations with the sieve of destruction" (30:27-28).

It is in this category that many of the oracles against the foreign nations belong. They deal in general with God's judgment on the nations for their pride and violence, and are related to Amos 1:3–2:4. We may group them here for convenience, though they come from different periods. They include Egypt (Isa. 19:1-15; Jer. 46; Ezek. 29–32), Ethiopia (Isa. 18), Elam (Jer. 49:34-39), Babylon (Isa. 13; 14:3-23; 21:1-10; Jer. 50:1–51:58), Kedar (Jer. 49:28-33), Philistia (Isa. 14:28-32; Jer. 47; Ezek. 25:15-17), Edom (Isa. 34; Ezek. 25:12-14), Moab (Isa. 15–16; Jer. 48; Ezek. 25:8-11), Ammon (Jer. 49:1-6; Ezek. 25:1-7), Tyre (Ezek. 26:1–28:19), and Sidon (Ezek. 28:20-26).

In the later years of the monarchy, confidence in Yahweh's ultimate protection in spite of historical disaster was shaken. Habakkuk asked: "Is he [i.e, Babylon] to keep on . . . mercilessly slaying nations for ever?" (Hab. 1:17). Jeremiah saw the cruel and merciless people from the N country and asked Yahweh to destroy the "nations that know thee not" (Jer. 10:25). However, knowing the corruption within his own nation, Jeremiah could not ask for protection. He urged submission to the yoke of Nebuchadrezzar as the just judgment of Yahweh (27:12-15). But the nation was not ready for it. Judah was despoiled by Babylon. In the words of Lamentations:

> She dwells now among the nations,
> but finds no resting place
> (Lam. 1:3).

c) The vindication of Israel. After the fall of Jerusalem the nations appear mainly as oppressors and plunderers of Israel (Isa. 41:11-12; 42:23-25). The holy war against the nations has now become a holy suffering at the hands of and for the sake of the nations (50:4-6; 53:1-9). However, such humiliation is not to last forever. The tormentors of Israel will disappear before the victories of Cyrus (41:11-12). The despised slave will be exalted (49:7, 23; 52:13). Instead of being a vessel of no purpose (Hos. 8:8), the very purpose (חפץ, "will") of Yahweh will prosper in his hand (Isa. 53:10) after his intercession and sacrificial death for his enemies (vs. 12; cf. 52:15).

In the postexilic literature the holy-war motif appears again, but this time Israel no longer plays an active role. In the new exodus, Yahweh will overthrow the nations (Hag. 2:7), cast down those who have scattered Judah (Zech. 1:21), make the plunderers plunder for Israel (Zech. 2:8-9), and trample the people in anger (Isa. 63:6). Jerusalem herself will be a cup of reeling to all peoples (Obad. 16; Zech. 12:2).

In the early apocalyptic literature (Isa. 24–27; Ezek. 38–39; Joel 3—H 4; Zech. 9–14; *see* APOCALYPTICISM) the enmity of the nations toward Israel grows in intensity until the climactic struggle at Mount Zion, where Yahweh both summons them and punishes them for their violence on Israel. The author of Daniel sees this final struggle taking place in the persecution under Antiochus Epiphanes. This literature shows us the extreme enmity between the Jews and the nations, and the cry for revenge and vindication by direct intervention of God, born of intense suffering and faith in God. There is thus a complete polarization between Israel and the nations in contrast to the situation in earlier periods, so that the word גוים, ἔθνη ("nations" or "Gentiles"), becomes a technical term for the non-Jews as enemies and aliens. Yet the retention of the term is a significant link with the earlier tradition with its emphasis on the mission of Israel to the nations.

Yet there are, even in apocalyptic literature, hints that some among the nations will be saved in the final day, if they call on the name of Yahweh (Joel 3:12), and that there is a polarization within Israel as well as between Israel and the nations

(Zech. 14:14). The latter theme is developed fully in late apocalyptic literature where the punishment of the apostate Jews is described in vividly graphic terms.

In the NT, Israel is seen to exist among the nations as enemies. Now, however, the line is not between Jews and nations but between the Christian community and the nations. The Son of man will be handed over to the nations (Matt. 20:19; Mark 10:33; Luke 18:32), but also to "men" (Matt. 17:22; Mark 9:31; Luke 9:44), and rejected by the Jewish leaders (Matt. 16:21; Mark 8:31; Luke 9:22) and by "this generation" (Luke 17:25). Thus all nations, including the Jews, are at enmity with him, and his disciples will suffer a like fate (Matt. 24:9; cf. 10:7-18; John 15:18-20).

The alliance of Jew and Gentile against the followers of Jesus is a prominent theme of Acts (12:1-5; 14:2; 16:10-24; cf. II Cor. 11:26). The fulfilment of Ps. 2:1-2 is seen by the early church when "both Herod and Pontius Pilate, with the nations [RSV 'Gentiles'] and the peoples of Israel" gathered against God's Anointed (Acts 4:24-30). The promise of the risen Christ to Paul was to deliver him both from the people (Jews) and from the nations (Acts 26:17).

Suffering at the hands of the nations is a prominent theme in I Peter and Revelation, where the Roman persecutions are beginning to be felt. The nations play a large part in the apocalyptic drama in Revelation, as the enemies of God. They trample the Holy City for forty-two months (Rev. 11:2; cf. Luke 21:24). However, the time has come to destroy the destroyers (Rev. 11:18), so the mighty Babylon (Rome), who made the nations drunk (14:8; 18:3, 23; cf. Jer. 51:7), will be broken, and the nations will be defeated (16:19). Satan, deceiver of the nations, will be bound (20:3) during the reign of the saints, then released to deceive the nations at the four corners of the earth, so that the great apocalyptic battle takes place before the "camp of the saints" and the "beloved city" (20:7-9). In the end they are destroyed, Satan is cast into the lake of fire, and the dead are raised for judgment. This is the end of the nations as enemies of God and the prelude for the healing of the nations (*see above*).

b. As temptations. The first two commandments of the Decalogue define the nations, not as enemies, but as temptations for Israel. Her mission among the nations exposed her to these temptations, while her character as a holy nation demanded that she give her exclusive loyalty to Yahweh in cult and in social life. The ways of her neighbors were attractive to Israel—their fertility cult (cf. I Kings 14:24; II Kings 17:10; *see* FERTILITY CULTS), their occult arts (Deut. 18:9-14; Isa. 8:19), their sacral kingship (Deut. 17:14; I Kings 8:5;) and royal splendor (I Kings 4:22-26), their cultural achievements (I Kings 6-7), military power (Isa. 30:1-5; 31:1-3; Jer. 2:18; Hos. 8:9-10), and aristocracy (Amos 3:14–4:3; Mic. 2:1-2) all exercised a fascination on her. There was also the pressure of the overlord to adopt the imperial cult (II Kings 16:10-18).

The danger to which Israel was exposed in her life in Canaan is expressed repeatedly in Deuteronomy (6:14; 12:2, 30; 13:7; 18:9, 14; 29:16-18; cf. Josh. 23:7, 12; Judg. 2:12), and the fear of contamination lies behind the command to exterminate the peoples of the cities which she is to attack (Deut. 20:16).

The mystery of the great systems of idolatry in the presence of the God of the nations was not a subject of much speculation on the part of the Hebrews. However, in Deuteronomy they are seen as a kind of interim concession by Yahweh, who allotted the nations the sun, moon, and stars to worship (Deut. 4:19; cf. LXX of Deut. 32:8; Acts 14:16-17). Jeremiah even implies a certain praise of the loyalty of the nations to their gods, which is in contrast to Israel's faithlessness to her own God (Jer. 2:11), while in Mal. 1:11 it is said that Yahweh's name is great among the nations.

It is also important to note that cultural borrowing from the nations is not in every case condemned in itself. Hymns to Baal could be changed to Yahwist hymns while retaining literary form and style (e.g., Ps. 29). Myths from Mesopotamia could be so converted as to express the Hebrew understanding of God and man as sharply opposed to the Mesopotamian view. One stratum of early tradition makes no criticism of the kingship (I Sam. 9:1–10:16), which is fully accepted by Israel, and later, forms the basis for messianic prophecy. The agricultural festivals which were borrowed from Canaan are transformed by Israel, and the prophets' criticism is only of their corruption. Cultic practices in use in the temples of the nations could be adapted for Israelite priestly purposes as long as they did not threaten loyalty of the nation to Yahweh. The same is true of the LAW and WISDOM, where there was much in the way of borrowing. In all such borrowing, Israel's ideal response should be:

> For all the peoples walk
> each in the name of its god,
> but we will walk in the name of Yahweh our God
> for ever and ever (Mic. 4:5).

However, the prophetic and historical literature gives ample evidence that the strain imposed by such existence was too great. In the intense struggle in which prophets, nomadic idealists (*see* RECHABITES; NAZIRITES), and reforming kings all tried to recall her to faithfulness, Israel met defeat after defeat from inner corruption rather than outward attack, and the end result was her destruction as a nation. The Deuteronomist historians are careful to document the record (I Kings 11:2; 14:24; II Kings 16:3; 17:8, 11, 15; 21:2, 9; cf. I Chr. 5:25; 16:26; Ps. 106:34-37; Jer. 9:26; Hos. 7:8). The prophets denounce Israel as a faithless wife turned harlot (Jer. 5:7-8), and the reflection of a psalmist summarizes the whole of Israelite history to the Exile:

> They mingled with the nations
> and learned to do as they did
> (Ps. 106:35).

In the Exile, Israel reacts in two different manners to the temptation of the nations. First there is a revulsion from the ways of the nations among whom she had been cast. "What is in your mind shall never happen—the thought, 'Let us be like the nations, like the tribes of the countries, and worship wood and stone' " (Ezek. 20:32). The Exile was, according to Ezekiel, a shock to call Israel to repentance. Yahweh would then restore Israel as a holy people and thus

vindicate his own holiness in the eyes of the nations (36:23).

According to Deutero-Isaiah, the temptation for Israel in exile is to renounce her faith in the purpose of the Lord of history, to give up to despair, or to adopt a historically irrelevant or simply nationalistic religion like that of the nations. Israel is not to manifest the holiness of God by withdrawing from the nations, but by going to them to proclaim his Lordship (Isa. 52:7); their gods are discredited. While she does this, she is to keep free from defilement (vs. 11) and in the face of suffering maintain her faith in her vindicator (50:8).

In the postexilic period, Israel's effort to maintain her cultural identity without political power led to her virtual separation from the peoples in order to exclude their "pollutions" and immoral practices (Lev. 18:24; Ezra 6:21; 9:1-2, 11, 14; 10:2; Neh. 10: 28, 30-31). Contact with the surrounding nations, and especially intermarriage with them, posed a threat to the very existence of the people of God. Her emphasis on law and holiness enabled her to maintain her separate existence and gave the Hasidim the will to resist forcible Hellenization under the Seleucids. "Be it known to you, O king, that we will not serve your gods or worship the golden image which you have set up." (Dan. 3:18.)

On the other side there was considerable borrowing from Iranian and Hellenistic cosmic speculation and philosophy, while a party favoring accommodation with Hellenism grew up under the leadership of the priestly group (I Macc. 1:1-15; II Macc. 4:10-14).

The temptations posed by the nations in the NT are seen in the descriptions of their way of life as over against that of the people of God. They salute their brethren only (Matt. 5:47), pray loudly in public places (6:7), and seek after material things (6:32; Luke 12:30). They are "darkened in their understanding, alienated from the life of God because of the ignorance that is in them, due to their hardness of heart" (Eph. 4:18; cf. Col. 1:21; I Thess. 4:5; I Pet. 4:3), led astray by speculation (Col. 2:8), given up to immorality (I Cor. 5:1, where "pagans" is the translation; cf. Rom. 1:26-32), idolaters (I Cor. 10: 20 ["pagans"]; 12:2 ["heathen"]; cf. Rom. 1:23). To "learn Christ" was to put off the old nature, that of the nations, and put on the new, that of Christ, which was "created after the likeness of God in true righteousness and holiness" (Eph. 4:20-24).

On the other hand, this separation from the nations was not a withdrawal from them. Jesus mixed freely with the irreligious people of his day, including harlots and tax collectors. The risen Christ sent his disciples (Matt. 28:19; Acts 1:8) and his church (Acts 10:1-43) out among the nations to mingle with them, to proclaim and serve in their midst. Paul became "all things to all men" (I Cor. 9:22), and Peter implied a conversation with the nations in counseling his readers to "be prepared to make a defense to any one who calls you to account for the hope that is in you" (I Pet. 3:15).

In Revelation, the community of saints is composed of those who have resisted the temptation under persecution to worship the emperor (Rev. 13: 4, 14-17; 14:9-12; 15:2), and who have not been deceived by the sorcery of Babylon (18:23). In the final destruction of Babylon and Satan, the temptation of the nations for Israel is removed, and all nations walk with Israel in the light of the Lamb (21:24).

c. As observers. When God brought Israel out of Egypt with mighty signs and wonders, the nations were looking on in fear (Exod. 15:14). In the biblical drama they are cast in the role of witnesses, for Israel is the primary locus of God's redeeming activity among the nations, and they will be able to behold his salvation in the saved people. They will hear God's word as Israel carries it to them, and they will understand God's way when they see suffering love in Israel and the true Israelite.

The nations are pictured as fearing Yahweh because of his power, displayed in Israel (Exod. 15:14; Josh. 4:24; Pss. 77:14—H 77:15; 98:2-3), or as fearing Israel because of Yahweh's power (Deut. 2:25; 28:10; I Chr. 14:17; Neh. 6:16).

On the other hand, they witness the wisdom and understanding of Israel (Deut. 4:6-7; 28:10) especially in the person of Solomon, Israel's great sage (I Kings 4:31, 34; 10:6-8; cf. also the wisdom psalm which Israel addresses to all peoples, Ps. 49:1—H 49:2; cf. Isa. 49:1).

Yahweh's motive for redeeming Israel is that the nations may know his power and name (I Kings 8: 60; Ps. 67). Moreover, his acts are motivated in part on the basis of what the nations will think. Moses appeals for mercy with the words: "Now if thou dost kill this people as one man, then the nations who have heard thy fame will say, 'Because the LORD was not able to bring this people into the land which he swore to give them . . .' " (Num. 14:15-16). In Ezekiel the chief motive for the restoration of Israel is that Yahweh's name might not be "profaned" among the nations (Ezek. 20:9, 14, 41; 36:23, 36; 37:28).

Therefore, the nations and peoples of the earth are exhorted to praise the God of Israel for his deliverance of his people and, by implication, his deliverance of all who turn to him (Deut. 32:43; Pss. 47:1—H 47:2; 66:4-12—H 66:5-11; 68:32—H 68:33; 96:7-9=I Chr. 16:27-28; Pss. 117:1; 148:11; Jer. 31:7), or it is said that they do now or will in the future praise Yahweh (Pss. 46:10—H 46:11; 97:6) and that they will behold his glory on Jerusalem (Isa. 60:2; Jer. 33:9) or his vindication of his people (Isa. 52:10; 61: 11; 62:2, 10-11; Mic. 7:16). For this reason Israel herself declares Yahweh's praise among the nations for them to hear and know him (Pss. 9:11—H 9:12; 18:49-50—H 18:50-51=II Sam. 22:50-51; Pss. 57: 9—H 57:10=108:3—H 108:4; 96:3, 10).

When Yahweh is about to judge his people for their unfaithfulness, he summons the peoples as witnesses and explains the reasons for his action (Mic. 1:2; cf. Jer. 6:18). In the midst of a controversy with his people, Yahweh suddenly says:

> Ask among the nations,
> who has heard the like of this?
> (Jer. 18:13; cf. 2:10).

The nations observe the fate of Israel as a result of her disloyalty to her God, and use her name for a curse word or a joke among themselves instead of the blessing she was meant to be (Deut. 28:37; I

Kings 9:7 = II Chr. 7:20; Neh. 5:9; Ps. 44:13-14; Jer. 22:8; 26:6; 29:18; 44:8; Ezek. 5:14-15; 20:48; 22:4; Joel 2:17; Mic. 6:16).

In Deutero-Isaiah, Yahweh calls his servant to the attention of the nations twice with the dramatic word: "Behold!" The first time is at the close of the trial of the nations (Isa. 41:1–42:4), when the gods have been discredited and the nations fasten their gaze on the servant people. The second is in 52:13, where the nations fix their eyes on the exalted Servant, whom they had so misunderstood:

> for that which has not been told them they shall see,
> and that which they have not heard they shall understand (vs. 15).

Their reaction is to shut their mouths in silent surprise and respect (Isa. 52:15; cf. Mic. 7:16), and then they give their testimony in Isa. 53:1-9:

> But he was wounded for our transgressions,
> he was bruised for our iniquities;
> upon him was the chastisement that made us whole,
> and with his stripes we are healed (vs. 5).

In the NT the salvation of God has been prepared "in the presence of all peoples" (Luke 2:31). The setting for Jesus' early ministry is "Galilee of the nations" (RSV "Gentiles"), in plain sight of those who "sat in darkness" (Matt. 4:15-16; cf. Isa. 9:1—H 8:23). In Phoenicia and Transjordan, as well as in Galilee, the peoples join the "lost sheep of the house of Israel" in gathering about him (Matt. 4:24; Mark 3:7; Luke 6:17). When he was dying on the Cross, Matthew reports the soldiers there watching him, one of them exclaiming at the end: "This was a son of God!" (Matt. 27:36, 54).

The early Christians were aware that they were living under the gaze of the nations. "Maintain good conduct," says Peter, "among the nations [RSV 'Gentiles'], so that in case they speak against you as wrongdoers, they may see your good deeds and glorify God on the day of visitation" (I Pet. 2:12; cf. Matt. 5:16). Their suffering at the end of history would be under the gaze of the "men from the peoples and tribes and tongues and nations," who gaze on the dead bodies of the two witnesses whom they have killed (Rev. 11:1-3, 7-9). Later, the witnesses are raised, and "in the sight of their foes" (vs. 12) they ascend to heaven.

5. The nations in "exile" theology. Israel is often pictured as God's flock (Ps. 100:3) under his care and that of his shepherds. Micaiah Ben Imlah saw the army of Israel in defeat as a flock scattered on the mountains, like sheep that have no shepherd (I Kings 22:17). The threat to scatter Israel for her disobedience originated in the wilderness, almost at the moment God had been gathering her from the slavery of Egypt (Ps. 106:27), although the covenant curse (Deut. 4:27-28; 28:36-37, 62-68; Jer. 9:16; Ezek. 4:13; 12:15; cf. Pss. 44:11, 22; 106:41; Zech. 7:14) is not without a promise to gather a repentant remnant (Deut. 4:29-31; 30:1-4).

In Gen. 11:1-9, mankind is scattered abroad in division and alienation from one another, but Israel is gathered from among them in Abraham and at the Exodus. In the midst of the curse of scattering, there is the blessing of gathering. At the destruction of

At the destruction of Samaria and Jerusalem, Israel receives the same curse as the nations and is scattered among them. However, there is a difference. For the scattered people is still the covenant people. The scattering is interpreted by the exilic prophets in two ways. The first is repentance: "They shall know that I am Yahweh, when I disperse them among the nations and scatter them through the countries" (Ezek. 12:15). The second is that of witness, seen negatively by Ezekiel: "that they may confess all their abominations among the nations" (vs. 16), and positively by Deutero-Isaiah. The silent suffering of the sheep led to slaughter among the nations, with no shepherd to save them (Isa. 53:7; cf. Ps. 44:11), is redemptive, and part of the purpose of God (Isa. 53:10). The curse ("smitten by God" [vs. 4]) is changed into a blessing ("we are healed" [vs. 5]). The nations who like sheep are scattered ("gone astray" [vs. 6]) behold the silent suffering of the Lamb led to the slaughter as a bearing of their iniquities (vss. 6, 11). And so the scattering of judgment is reinterpreted as the scattering of mission.

Jesus saw the people as sheep without a shepherd (Matt. 9:36), and felt himself with a special mission to the scattered (lost) sheep of Israel (Matt. 10:6; 15:24; cf. I Pet. 2:25, where the life of the nations is seen as that of scattered sheep, reminiscent of Gen. 11:1-9; Isa. 53:6). He scattered his disciples as sheep among wolves when he sent them out to proclaim the kingdom of God (Matt. 10:16). At the death of Jesus, the disciples will be scattered in tribulation (John 16:32-33), but this must be associated with the scattering of mission among the nations (Matt. 28:19). Persecution in Jerusalem after the martyrdom of Stephen results in the scattering of the Christians in tribulation and mission throughout the region of Judea and Samaria (Acts 8:1).

The companion motif to scattering is gathering. Jeremiah sends out the word to all nations that "he who scattered Israel will gather him." He will keep Israel as a shepherd keeps his flock, with tenderness and love (Jer. 31:10; cf. Isa. 40:11; 54:7; Ezek. 11:14-21; 20:34; 28:25; 34:11-16, 28-29; Zech. 10:8-12).

The postexilic community understood its own gathering as a foretaste of the final gathering (Neh. 5:8, 17), and the prayer for the gathering of the scattered flock of Israel has been a petition on the lips of the Jews ever since (Ps. 106:47).

In Matt. 25:32 ff, the picture of the gathering of the scattered flock is extended to the nations, for whose gathering Jesus dies (John 10:16; 11:51-52; cf. Heb. 13:20; I Pet. 2:25).

Thus, the purpose of God is fulfilled as Israel is scattered in tribulation and mission among the nations, then gathered symbolically in worship and praise from the nations, bringing with them the sons of the kingdom in anticipation of the final gathering of every nation before the throne of the Lamb (Rev. 7:9), to join the marriage supper of the Lamb (19:9) and partake of the fruit of the tree of life and its leaves, which are "for the healing of the nations" (22:2).

NATURAL HISTORY. *See* FAUNA; FLORA.

NATURE, NATURAL PHENOMENA. *See* WORLD.

NAUM. KJV form of NAHUM 2.

NAVE. 1. היכל (lit., "temple, palace," from Sumerian *E.GAL;* Akkadian *ekallu,* "great house"), the main room of the temple, between the vestibule and the inner room (I Kings 6 *passim;* 7:50 [KJV "temple"]; II Chr. 3:4-5, 13; 4:22 [KJV "house"]; Ezek. 41 *passim* [KJV "temple"]). *See* TEMPLE, JERUSALEM.

2. KJV translation of גב (I Kings 7:33), a block or center of a wheel through which the axle passes. This was a detail of the wheels of the stands of bronze in the temple. The reference is more probably to the rim (so RSV) of the wheels. E. M. GOOD

3. KJV Apoc. form of NUN.

NAVEL STRING [שׁר] (Ezek. 16:4; FLESH in Prov. 3:8; RSV mg.-KJV NAVEL). The mention of an uncut navel string was Ezekiel's dramatic way of reminding his people that their very survival was an act of mercy on the part of God (16:1-14). Israel, the foundling child, was heathen by parentage (vs. 3); she did not receive even the most elementary medical attention at her birth (vs. 4: "Your navel string was not cut"); and she was shortly discarded upon the open field, presumably to die of exposure (vs. 5; cf. 33:27; for the suggestion that female infants were sometimes buried alive among the ancient Arabs, see the Qur'an 81:8). God found and loved and cared for this abandoned child.

Vs. 4 suggests the simple duties of a midwife. Then, as among modern Arab peasants, these included the cutting of the navel cord (for indications of the importance of the navel and the belly muscles, see Job 40:16; Prov. 3:8 RSV mg); rubbing the child with salt, water, and oil; and wrapping him in swaddling cloths for seven days.

NAZARENE năz'ə rēn. A NT term used almost exclusively as an appellation of Jesus (as to Acts 24:5, *see below*). Two forms occur in the Greek text: Ναζαρηνός and Ναζωραῖος. Mark prefers the first; Matthew, John, and Luke, the second (Luke 4:34; 24:19 derive from older tradition). Yet there is no noticeable difference in meaning. In the view of the NT authors this appellation is connected with Jesus' origin from Nazareth (Matt. 2:23; the prophecy here alluded to can hardly be identified; see the Commentaries); consequently it is synonymous with the expression "the one from Nazareth" (ὁ ἀπὸ Ναζαρέθ; Matt. 21:11; Mark 1:9; John 1:45; Acts 10:38). Figs. NAZ 7-8.

Such a derivation, however, presents a problem with regard to the unusual spelling of the second form, Ναζωραῖος. To be sure, in Aramaic it is not philologically impossible, as many scholars assume, to relate the term to "Nazareth" (Aramaic נצרת): the difficult ω could stand for an unaccented, indistinct vowel. The transcription of צ with ζ is attested elsewhere; and besides, the spelling of Jesus' home town varies in the tradition (*see* NARAZETH), so that no fixed rules can be set up for building the adjectival derivative. The Syriac equivalent for both Greek forms is *nāṣᵉrājā;* in this form the word was later carried over as a designation for the Christians into Arabic-Mohammedan, Armenian, and Persian usage. Notwithstanding these considerations, it remains unexplained how in Greek the unusual form Ναζωραῖος could maintain its position so consistently alongside the simpler form Ναζαρηνός, which was, after all, available. Furthermore, according to Acts 24:5, not only Jesus, but also the Christians were called Ναζωραῖοι; it would certainly be unusual if they were referred to as "people from Nazareth."

Now in Acts 24:5, and on the tongue of a Jew, reference is made to the *sect* of Nazarenes (ἡ τῶν Ναζωραίων αἵρεσις); and elsewhere the term appears outside the Christian community as a Jewish term of abuse for the Christians (נוצרים in the Talmud; Ta'an. 27*b*, or in the famous twelfth section of the Eighteen Benedictions according to the Palestinian Recension; see further Tert. Marcion IV.3; Jerome Commentary on Isa. 5:18 and *passim*). This makes it probable that originally, prior to the connection with the name of the locality Nazareth, the term was the name of a Jewish sect or heresy, derived from the root נצר, "observe," and meaning "observant," "devotee," a term later used of the Christians (see Celsus in Origen *Against Celsus* 7.8). M. Lidzbarski added support to this thesis especially by pointing to the self-designation of the Mandeans, a pre-Christian Gnostic sect which often called itself נצוראיא. It is, of course, possible that we have to do here simply with the self-designation of a Jewish Christian group united with the Mandeans; it was precisely heretical Jewish Christian groups which perpetuated the ancient designation of Christians as Ναζωραῖοι, according to patristic allusions (Epiphanius Panar. I, Haer. 29,6; Jerome Commentary on Isa. 11:1). However, Epiphanius lays particular emphasis upon a distinction between Jewish Christian Ναζωραῖοι and a pre-Christian Jewish sect of Νασαραῖοι (Panar. I, Haer. 18). If such a sect really did exist, then we have in its name "observants" the basic term which has been preserved as נוצרים for Jesus and the Christians, as Ναζωραῖοι (=Nazoraei) for the Jewish Christians, and as נצוראיא for the Mandeans.

NAZARENES, GOSPEL OF THE [Ναζαρηνοί]. An Aramaic Targ. of the canonical Gospel of Matthew, current in the second century in Aramaic-speaking N Syria. Endless confusion has been caused by Jerome's utterly unwarranted claim to have translated this "Gospel According to the Hebrews . . . which Origen often uses," which has suggested that this Aramaic gospel was not only the original form of the canonical Matthew but to be identified with the actually very different Gospel According to the Hebrews (*see* HEBREWS, GOSPEL ACCORDING TO THE). Jerome seems to have first heard of this Aramaic Targ. from Apollinaris, who used it heavily in his own commentaries and appears to have believed it to be the original form of the gospel. Jerome's many citations from this "gospel which the Nazarenes use" are apparently largely from the commentaries of Apollinaris. At the time he was writing his *History* (*ca.* 325), Eusebius appears to have known this gospel only by hearsay (Hist. V.10.3-4); later, in the *Theophany*, he has come to know it at first hand, apparently in the eight-year interval having obtained a copy of it for the library at Caesarea. It was apparently this copy which Jerome subsequently saw for the first time and thereafter insisted that he had for the first time translated into Greek and Latin. In addition to taking material from Apollinaris, who had actually used this Aramaic Targ., Jerome also made free use of extracts from Origen, which passages the latter scholar had cited from the totally different Gospel According to the Hebrews. The researches of A. Schmidtke and B. W. Bacon have done much to untangle the confusion so largely caused by Jerome's unscrupulous claims and misstatements, and to suggest that most of the citations from Jerome, which are now conveniently collected by M. R. James (*see bibliography*), as stemming from the Gospel According to the Hebrews are more safely to be ascribed to this quite different Aramaic Gospel of the Nazarenes, which appears to have been quite as complete as the canonical Matthew, containing, as it did, the infancy chapters, and to have had frequent variant readings and embellishments—as, e.g., the man with the withered hand was a mason; it was not the veil but the lintel of the temple, of wondrous size, which fell at the time of the Crucifixion; Jesus' reply to his mother's suggestion that they go to John for baptism; the reply of the rich man, who scratched his head in perplexed displeasure at Jesus' word that he demonstrate his love for his poor neighbor. Many variants are now preserved as marginal readings, with the rubric τὸ Ἰουδαϊκόν (i.e., "the Hebrew gospel") in the so-called Zion MSS, which were apparently made in Jerusalem in the late fourth or fifth century.

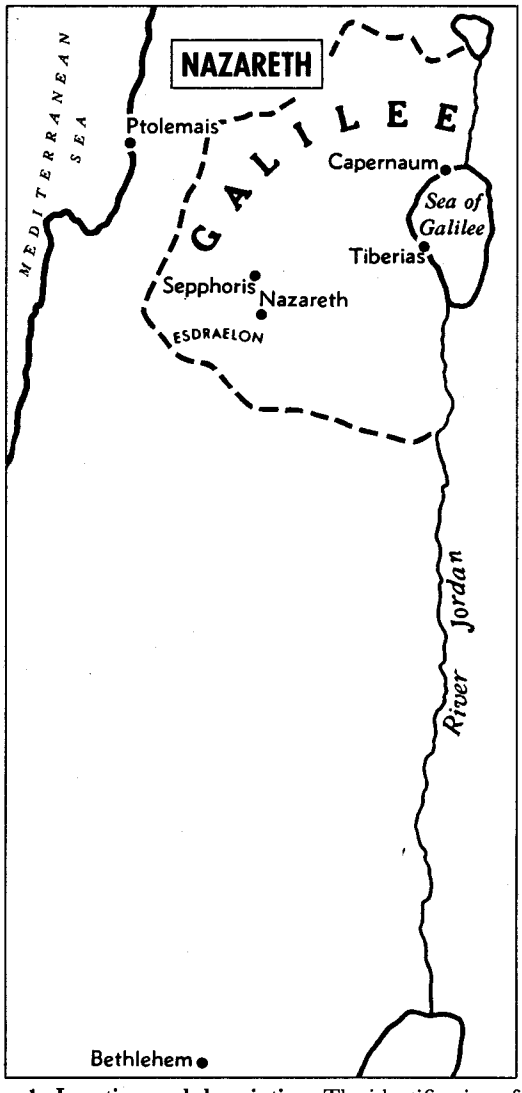
NAZARETH năz′ə rĭth [Ναζαρέτ, Ναζαρέθ (*the best attested of the many variants*), *probably from* נצר, guard place, watchtower, *or* נצר, sprout, shoot (*so* Matt. 2:23), *in spite of the difficulty of the transliteration of* צ *by* ζ *which occurs elsewhere in* Gr. *and which here may be due to the false analogy of* Ναζιραῖος (Nazirite); *above etymology supported by* Syr. *Nâṣrat*, Arab. *Nâṣirah*]. A village of Lower Galilee; home of Joseph, Mary, and Jesus.



1. Location and description. The identification of the site of the ancient village with the modern Nazareth (*see above*) is generally accepted. Questions have arisen because there is no mention of Nazareth in the OT, the Talmud, the Midrash, or Josephus. This is understandable if it was an insignificant village (cf. John 1:46). Aside from the NT, the earliest evi-

dence for Nazareth is from Julius Africanus (A.D. 170-240), as cited by Eusebius (Hist. I.7.6-12), but there is no suggestion that it had just been founded and was not in existence before the birth of Jesus. This location is confirmed by the *Onomasticon* (Jerome *De Situ et Nom. Loc. Hebr.* 255).

Nazareth lies to the N of the Plain of Esdraelon in a valley or basin open only to the S. The village is on the sides of a hill facing to the E and the SE. It is *ca.* fifteen miles from the Sea of Galilee and *ca.* twenty miles from the Mediterranean. The altitude is *ca.* 1,300 feet above sea level. The altitude and the protected position make for a moderate climate. The climate and the rainfall are favorable to vegetation, but the town has always been handicapped by possessing only one spring which must be supplemented by cisterns.

7. Nazareth set within the hills of Galilee

From *Atlas of the Bible* (Thomas Nelson & Sons Limited)

8. A street in Nazareth

The ancient village seems to have extended farther up the hill, judging by the few remains to be seen (cf. Luke 4:29). In Jesus' day it was a small village, secluded, and not on any main highway, although it was near Sepphoris, an important city which was just S of the main road from Tiberias to Ptolemaïs.

Although various traditional holy places are shown as connected with the gospel accounts, the only one which may be authentic and go back to the time of Jesus is Mary's well. Other shrines are at the Church of the Annunciation, the House of Joseph, the Synagogue Church, the Mensa Christi (Table of Christ), the Church of Gabriel, and the Maronite Church of the Precipice.

Figs. NAZ 7-8.

2. In the NT. Nazareth is first mentioned as the home of Joseph and Mary at the time of the Annunciation (Luke 1:26). From there they set out for Bethlehem, and to it they returned after the birth of Jesus (Matt. 2:23; Luke 2:4). As a boy Jesus continued to live there with his parents (Luke 2:39, 51). He left Nazareth to go to be baptized by John (Mark 1:9). When Philip spoke to Nathanael and referred to Jesus as from Nazareth, Nathanael replied: "Can anything good come out of Nazareth?" (John 1:45-46). This implies that the village was insignificant, which is supported by the absence of references to it in ancient non-Christian sources. *See* § 1 *above.*

No reason is given as to why Jesus left Nazareth to dwell in Capernaum (Matt. 4:13). Only once is it specifically said that Jesus returned to Nazareth "where he had been brought up" (Luke 4:16; cf. Matt. 13:54; Mark 6:1). The only other occurrences of the noun form, and which speak of Jesus as from Nazareth, are in the account of the Triumphal Entry (Matt. 21:11) and in Peter's sermon before Cornelius (Acts 10:38).

There are many passages in which Jesus is identified as "the Nazarene" (RSV "of Nazareth"; e.g., Mark 1:24; 10:47; John 18:5, 7; Acts 2:22; 3:6). Only once are Jesus' followers referred to as "the Nazarenes" (Acts 24:5). Although there has been much discussion as to the significance of "NAZARENE," the most common and the most probable interpretation is that in the NT the word means "of Nazareth," as is specifically stated in Matt. 2:23.

3. Later history. Nazareth did not become an important Christian shrine until the reign of Constantine (A.D. 324-37). According to Epiphanius, before Constantine only Jews were permitted to live there (*Adv. Haer.* XXX.136). The first mention of a church built there is by Arculf (670). Nazareth suffered much persecution and destruction under the Muslim conquest (*ca.* 700). It regained its freedom and importance during the Crusades and was made the seat of a bishop (*ca.* 1108). Although it was captured by Saladin in 1187, it was retaken by Frederick II in 1229. During the Crusades its churches were rebuilt, but at the end Nazareth was captured and finally destroyed in 1291 by the Mamluke Beybars. Under the Turks it continued to be unimportant, but the modern resurgence of Nazareth as a Christian shrine and city began in 1620 when the Franciscans were granted permission to establish themselves there as the guardians of the holy places. Nazareth was cap-

tured by the British in 1918. Modern Nazareth has an estimated population of nearly twenty thousand. It is an important city in its district and is the largest Christian city in Israel.

Lake, *The Beginnings of Christianity*, I (1942), 426-32; E. G. Kraeling, *Bible Atlas* (1956), pp. 358-59.

D. C. PELLETT

NAZIRITE năz'ə rīt [נזיר, one consecrated, devoted, separated, *from* נזר, to consecrate (*cf.* נדר, to vow); LXX ναζιραῖον, ναζιρ, ναζιραῖος, ναζιραῖοι, *words derived from* εὔχομαι (to vow) *and* ἁγίαζω (to consecrate)]. One who marks his status of special sanctity or his vow of self-dedication by letting his hair grow and abstaining from wine and strong drink.

Historically the Nazirite was a sacred person. In later times he acquired his special status by a vow he made himself, but in the beginning he was a charismatic by virtue of a mysterious divine endowment and/or the vow of his mother. In a Nazirite's status the motif of consecration predominated. He was a devotee who separated himself, or found himself "separate," *to* God (Num. 6:2, 6-8, 12; Judg. 13: 5, 7; 16:17). The consecration is not an ascetic separation but an expression of loyalty to God in which forms of abstinence are illustrative rather than constitutive.

References to Nazirites span all of OT history and extend into the early Christian period. At first the commitment was spontaneous and lifelong, expressing the charismatic gifts of the individual. Later the institution was standardized and regulated by law, so that any person who made a vow to observe a specified pattern of conduct could become a Nazirite for a temporary period. Thus the Nazirite was no longer primarily a sacred person because of a special endowment, but a person vowed to perform a sacred duty. The transformation was probably very gradual. It seems to have gained momentum in the era of the later monarchy; but, for want of adequate materials, it is not possible to document its progress in detail. Eventually, because of the transformation, the offering at the termination of the vow became the most important part of a Nazirite's dedication.

1. The Nazirite as a sacred person. In early Israel the holy man played a very large role. This was also true in the non-Israelite Near East (and elsewhere); what is unique in the OT is its theocentric way of understanding him. Holy men were under the power of the Spirit of the Lord. Holiness was manifest in psychic and physical forms rather than in ethical qualities. Invariably, spontaneity, expressed in ecstasy and enthusiasm, characterized these sacred persons. Early prophets and warriors were of this order. Saul and the prophets he joined (I Sam. 10: 9-13) played an involuntary, spontaneous role. Likewise, when he heard of the siege of Jabesh, Saul was brought to holy fury by the "spirit of God," so that he became a warrior (11:5-11). The early Nazirite seems to have been a holy person in this sense. He stood in a peculiar relation to God by virtue of the gifts at his disposal.

There are many affinities between the Nazirite and the warrior. Samson, who is called a Nazirite, was a holy warrior much like Saul. The "Spirit of the LORD" (Judg. 14:19, etc.) gave him special physical power. He was a charismatic figure with long hair. War in early Israel was a holy enterprise, and while on active duty the warrior was in a state of sanctity marked by a special pattern of conduct (Deut. 23:9-14; I Sam. 21:4-6; II Sam. 11:11-12). The Naziriteship of Joseph (Gen. 49:26; Deut. 33: 16) in relation to the other tribes may rest on the military prowess of that tribe in Israel's early history in Canaan. Princes may have been Nazirites (Lam. 4:7) in the sense that they were warrior chieftains.

Amos mentions the prophet and the Nazirite together as persons with a special vocation whose role has been frustrated (2:11-12). God had called both; beyond this we lack evidence to describe the relation between the two. Samuel was a prophet and a Nazirite, to be sure. But Samuel was also a priest and one for whom residence in a holy place had displaced the ecstatic sanctity of prophet and warrior. His hair was uncut (I Sam. 1:11), which may not have been true of priests later (Lev. 21:10); and the LXX adds that he abstained from wine (I Sam. 1:11). Like the early Nazirite, Samuel was a lifelong devotee. In many ways he was the figure who served as the bridge by means of which the transformation of the Nazirite from a spontaneous devotee with special gifts to a man under a voluntary vow completed by an offering was facilitated.

2. The law of the Nazirite. All the prescriptions in the Pentateuch concerning the Nazirite are found in Num. 6. This law indicates that the charismatic aspects were subsiding in favor of a standardized communal control. It assumes that a man or woman became a Nazirite by a voluntary vow for a specified term (vss. 2, 5). The Rechabites (Jer. 35), who exhibit many of the features of the Nazirite, combined the voluntary vow with a hereditary and lifelong commitment. But with the exception of their founder, they were not charismatics. Amos said God "raised up" (2:11-12) Nazirites. Samson was so designated by the angel, and Samuel lived under his mother's vow (I Sam. 9–11). The law makes no provision for such; we cannot even be certain that this type still continued. The reference in Amos makes improbable the suggestion of some that charismatics did not originally bear the title Nazirite but that it was applied to them by later writers.

In the law of his consecration the Nazirite was bound by three provisions that became marks of his sanctity: (*a*) he must avoid wine, strong drink, and all "that is produced by the grapevine" (Num. 6:4); (*b*) for the duration of his separation his hair might not be cut; and (*c*) he must avoid the presence of the dead, even of his parents. It seems doubtful that all these were observed by the older Nazirites. As noted, Samuel's abstinence from wine is mentioned only in the LXX. Samson's mother reportedly did abstain, but this may be a later interpretation; in any case it is unlikely that Samson did so (Judg. 13:4; 14:10). The practice of avoiding the presence of the dead is never mentioned in the older accounts. In its strictness it places the Nazirite in the same sphere of sanctity as the high priest (Lev. 21:11), ahead of the

other priests (vss. 1-10). This provision may be evidence of an accommodation to the role of the priesthood in the law of the Nazirite.

The practice of not cutting the hair is present throughout. But it must be noted that, while in the earlier Nazirite the main thing is the lifelong growth of the hair, in the law of Num. 6 the focus is upon the cutting and offering of the hair at the completion of the vow (vs. 18). Like blood, hair symbolized the life of a person. Hair offerings as a form of self-dedication were common in the ancient Semitic cultus and elsewhere. Though crowded by the offerings of Israel's own cultus in Num. 6, the hair is still put on the fire; and the Mishna calls it an offering (Naz. 4.7). Further, it provides that in the case of one whose vow has miscarried (6.9-12), the hair must be buried rather than put on the altar fire (Ter. 7.4). In the case of a permanent Nazirite such as Samson, the hair is not a symbol of a person's life but of the charismatic divine power with which he is endowed. While this function of the hair also has pre-Israelite roots, the meaning is very different. We must conclude that the law prescribed for the Nazirite had drawn on and assimilated a wide range of antecedent forms. Likewise, abstinence from wine is often explained as nomadic reaction against the social patterns of agricultural Canaan. But in many cults, and also in Israel (Lev. 10:8-9), the priest performing his ministry avoided wine. The sources for the provisions in the law of the Nazirite were numerous and complex.

3. Later developments. The duration of a Nazirite's consecration was normally indicated at the time he made his vow. The Mishna says that it is to be for thirty days if such specification is lacking (Naz. 1.3). The brevity indicates that, increasingly, the offerings became more important than the status itself. In time it became a virtuous act for non-Nazirites to assume the expenses for the one who was and for whom the cost of release was burdensome (I Macc. 3:50; Jos. Antiq. XIX.vi.1; Acts 21:24). Aside from the fact that the days of his consecration had to be repeated in full, the real burden incurred by a Nazirite polluted by the dead (cf. Num. 6:9-12; 19:11 ff) was the cost of the additional sacrifices. Gentiles could not become Nazirites (Naz. 9.1), but women and slaves could, though under certain circumstances a father or husband could void a woman's vow, and this seems to have occurred mainly for economic reasons (cf. Num. 30).

There are many elements of similarity between the Nazirite's vow in its later stages and the vow of Ihrâm made by Muslim pilgrims. In both, the abstinences are preparatory to the fulfilment in the offering, which is to take place at a specified place and includes the cutting of the hair. In both, remnants of very ancient ritual forms, descriptive of a sacred state indicated by spontaneous charismatic gifts, have been recast to serve as rules governing the performance of a sacred duty.

NEAH nē'ə [נעה] (Josh. 19:13). A border town in Zebulun. The site is unknown.

NEAPOLIS nē ăp'ə lĭs [ἡ Νέα πόλις *or* Νεάπολις] (Acts 16:11). The seaport of PHILIPPI.

Neapolis is mentioned as a city in Thrace in an Athenian tribute list of the fifth century B.C. (*see bibliography*). In 188 B.C. it was visited by the army of the Roman consul Gnaeus Manlius Volso (Livy XXX.41). In 42 B.C., when Brutus and Cassius were camped at Philippi, they had their depot on the island of Thasos, a hundred stadia distant; and their triremes were anchored at Neapolis, at a distance of seventy stadia, as Appian (*Civil Wars* IV.106) narrates.

In Byzantine times Neapolis was called Christoupolis, and it is the modern Greek town of Kavalla. The distance from Kavalla to Philippi is ten miles, which corresponds to the seventy stadia indicated by Appian. Archaeological discoveries at Kavalla include vestiges of a Hellenic village, with a structure of the fourth or fifth century B.C. identified as the sanctuary of the goddess Parthenos, otherwise known as the chief deity of Neapolis. Latin inscriptions show

J. FINEGAN

NEARIAH nē′ə rī′ə [נעריה, *possibly* Yahu's young man, *or a corrupted gentilic from* נער—*i.e.*, a Nearite]. **1.** A remote descendant of David (I Chr. 3:22-23).

2. A Simeonite commander of Hezekiah's time who destroyed the remnant of the Amalekites (I Chr. 4:42).

J. M. WARD

NEBAI nē′bī [נובי (*Kethibh*), ניבי (*Qere*)]. One of the chiefs of the people signatory to the covenant of Ezra (Neh. 10:19—H 10:20).

NEBAIOTH nĭ bā′yŏth [נבית]; KJV NEBAJOTH —jŏth in Genesis. The eldest son of Ishmael, and brother of Kedar (Gen. 25:13; 28:9; 36:3; I Chr. 1: 29); which means that there were clans of this name among the Ishmaelite Arabs. Both the Kedar and the Nebaioth Arabs were famous for sheep raising (Isa. 60:7). The Nebaioth Arabs are apparently identical with the *Nabaiati,* who are mentioned by Tiglath-pileser III in the eighth century B.C.; Ashurbanipal defeated and took booty from the *Nabaiati* and the *Qidri* (Kedar; *ANET* 298-300), and Pliny refers to the Nabatei and the Cedrei in his *Natural History.* Some scholars have sought to identify the Nebaioth with the NABATEANS of the sixth century B.C. and later; but the fact that the former is written with the Hebrew letter "tau" and the latter with a "teth" makes this equation very unlikely.

S. COHEN

NEBALLAT nĭ băl′ət [נבלט] (Neh. 11:34). A town in the hills overlooking the SE end of the Plain of Sharon and settled by Benjaminites following the restoration from exile; modern Beit Nebala, four miles E of Lod and nearly two miles N of Hadid. The name may preserve the memory of Nabu-uballit, presumably an Assyrian governor of Samaria in the seventh century B.C.

Bibliography. W. F. Albright, *AASOR,* vol. IV (1924), p. 106, note 15.

W. H. MORTON

NEBAT nē′băt [נבט] (I Kings 11:26, etc.). The father of King Jeroboam I. The name, common in S Arabic, is not identical with Naboth, as some suppose.

NEBO nē′bō [נבו, *transliteration of* Akkad. *nabu, from a verbal root meaning* to announce; *in* 2-3 *below,* a height, *or perhaps connected with the god* Nabu]. **1.** A Babylonian deity mentioned by Isaiah in his taunt song on the downfall of Babylon and her gods. He was specifically associated with Borsippa (modern Birs Nimrud) and was regarded as the son of MARDUK. His image and that of Marduk were together carried in the sacred procession in the spring New Year Festival at Babylon, hence the point in the association of the two in Isa. 46:1. Nebo was specifically associated with writing and speech; he was a Mesopotamian Mercury, though in his cult center his province included nature—he was originally a water deity. His cult was particularly popular during the Neo-Babylonian period (612-538 B.C.); his name appeared as an element in the names of three of the last six kings, Nabopolassar, Nebuchadrezzar, and Nabonidus.

Bibliography. W. Muss-Arnolt, *A Concise Dictionary of the Assyrian Language* (1905), pp. 632-34; E. Dhorme, *Les Religions de Babylonie et d'Assyrie* (1945), pp. 150-56.

J. GRAY

2. A city in Moab, requested by the tribes of Reuben and Gad as good grazing land (Num. 32:3) and rebuilt by the Reubenites (vs. 38), mentioned in connection with Bela among the descendants of Reuben (I Chr. 5:8). The MOABITE STONE, lines 14-18, records its capture by the Moabite king Mesha: "And Chemosh said to me, 'Go, take Nebo from Israel!' So I went by night and fought against it from the break of dawn until noon, taking it and slaying all, seven thousand men, boys, women, girls, and maid-servants, for I had devoted them to destruction for (the god) Ashtar-Chemosh. And I took from there the [. . .] of Yahweh, dragging them before Chemosh." Needless to say, Mesha's estimate of seven thousand killed is greatly exaggerated. Nebo is also mentioned in the oracles against Moab (Isa. 15: 2; Jer. 48:1, 22).

Eusebius located Nebo eight Roman miles S of Heshbon. The most likely identification is Khirbet Mekhayyet, *ca.* five miles SW of Heshbon. Large quantities of Moabite Iron Age I-II (twelfth until beginning of sixth century B.C.) pottery were found. The fortress is built on an outspur and isolated by a moat. At one end are remains of a Byzantine church with a beautiful mosaic floor.

See also NEBO, MOUNT.

Bibliography. N. Glueck, *Explorations in Eastern Palestine,* II, AASOR, XV (1934-35), 110-11.

3. A town mentioned just after Bethel and Ai in the lists of repatriated Israelites (Ezra 2:29; Neh. 7:33). In Nehemiah it is called "the other Nebo" (נבו אחר), probably to distinguish it from 2 above. By some, this Nebo is identified with Nob (Neh. 11:32; Isa. 10:32). The site in question may be modern Nuba, NW of Beth-zur and *ca.* fifteen miles SW of Jerusalem.

E. D. GROHMAN

NEBO, MOUNT [הר נבו, mountain of the height, *or perhaps* mountain of (the god) Nabu]. A mountain of the Abarim range opposite Jericho, *ca.* twelve miles E of the mouth of the Jordan River. One of the Israelite stopping places was "in the mountains of Abarim, before Nebo" (Num. 33:47). After Moses' song in Deut. 32, he was commanded to "ascend this mountain to the Abarim, Mount Nebo, which is in the land of Moab, opposite Jericho" (vs. 49). There he was to view the land of Canaan and to die on the mountain. After Moses' final blessing of the

people in Deut. 33, he "went up from the plains of Moab to Mount Nebo, to the top of Pisgah, which is opposite Jericho. And the LORD showed him all the land. Gilead as far as Dan, all Naphtali, the land of Ephraim and Manasseh, all the land of Judah as far as the Western Sea, the Negeb, and the Plain, that is, the valley of Jericho the city of palm trees, as far as Zoar" (34:1-3).

In OT times Mount Nebo changed hands several times. Shortly before the Israelite conquest, the Amorite king Sihon had taken the territory N of the River Arnon, including Mount Nebo, from Moab (Num. 21:26-30). In turn, the Israelites captured it from Sihon (vss. 23-32), and to this area Balak king of Moab brought Balaam to curse the Israelites (23: 14, 28). The territory was assigned to the tribes of Reuben and Gad (ch. 32). In the time of the judges, Eglon king of Moab was in possession of Jericho, and so must also have possessed Mount Nebo (Judg. 3:12-30). King David subdued Moab (II Sam. 8:2, 12), so at least by his time Mount Nebo was again Israelite. King Mesha of Moab rebelled against Israel and reconquered territory that would include Mount Nebo (*see* MOABITE STONE; for the further vicissitudes of the area, *see* MOAB §§ 3*g-h*). Moab ceased its independent existence toward the end of the seventh century B.C.

Mount Nebo is probably modern Jebel en-Neba, its altitude being *ca.* 2,740 feet above the level of the Mediterranean, and so *ca.* 4,030 feet above the Dead Sea. Seen from the E, Mount Nebo is just a spur of the Moabite Plateau; however, it is a noteworthy mountain, seen from the Plains of Moab just W of its foot. The peak of Jebel en-Neba is separated by a saddle from Ras es-Siyaghah, a slightly lower summit just to the NW, which may well be the "top of Pisgah" from which Moses viewed the Promised Land. *See* PISGAH, MOUNT.

As indicated by Deut. 34:1-3, Mount Nebo, and especially Ras es-Siyaghah, commands a magnificent view to the N, W, and SW. To the N and the NE is the fertile plateau of Transjordan. Far to the N, under favorable conditions can be seen snow-capped Mount Hermon. As the eye moves S, there can be seen Tabor, Ebal, and Gerizim, the heights of Judah and Benjamin, the ridge stretching to the S on which lie Bethlehem and Hebron, the Dead Sea as far as Engedi. Directly below is the Valley of the Jordan. The Mediterranean cannot be seen because of the mountains intervening.

Near Mount Nebo a number of Iron Age I-II (twelfth to the beginning of the sixth centuries B.C.) and one Early Bronze IV–Middle Bronze I (twenty-third through twentieth centuries B.C.) sites have been found. Immediately below Ras es-Siyaghah to the NE are the strongly flowing waters of the 'Ayun Musa ("springs of Moses"). In the Moabite period the springs were well guarded by a strong fortress on top of a steep hill. It was once surrounded by a strong wall and cut off from the broken plateau by a dry moat. Large quantities of Iron Age I-II potsherds have been found. *Ca.* two miles SE of Ras es-Siyaghah is Khirbet Mekhayyet, probably the ancient town of Nebo (*see* NEBO 2). *Ca.* three miles below Mount Nebo to the W, on the plain stretching to the Dead Sea, is Rujm el-Heri, a small site surrounded by a wall, where Iron Age I-II Moabite sherds were found. *Ca.* three miles NE of Ras es-Siyaghah is Khirbet Qurn el-Kibsh, a great wall having enclosed an area of *ca.* 935 by 310 feet. Large quantities of Early Bronze IV–Middle Bronze I sherds were found. Thus in the area of Mount Nebo, as in the rest of Moab, there was a sedentary occupation in Early Bronze IV–Middle Bronze I, followed by a nonsendentary period down to the thirteenth century, during which roaming Bedouins left no remains. Another sedentary period in Iron Age I-II, tapering off toward the end of Iron II (seventh century B.C.), was followed by a nonsedentary period down to the Nabatean period, beginning *ca.* the third century B.C.

NEBUCHADREZZAR nĕb'ə kəd rĕz'ər, nĕb'yōō— [נבוכדראצר; Akkad. *Nabû-kudurri-uṣur,* Nabu protect my boundary stone]. Alternately: NEBUCHADNEZZAR nĕb'ə kəd nĕz'ər, nĕb'yōō— [נבוכדנאצר; LXX Ναβουχοδονοσόρ]; KJV Apoc. NABUCHODONOSAR năb'ə kə dŏn'ə sär; NABUCHODONOSOR —sôr. King of Babylonia 605-562 B.C.; son of NABOPOLASSAR, and father of EVIL-MERODACH.

The salient historical features of the rule of Nebuchadrezzar have been known for quite some time, but only the chronicles published by D. J. Wiseman (*see bibliography*) have allowed us a real insight into the political concepts that governed the activities of this king.* The new texts show Nebuchadrezzar, a Babylonian, acting in every respect as would an Assyrian king. He conducted annual campaigns to collect the tribute that would be forthcoming under the pressure of the presence of a well-equipped army. His planning was on a wide and international scale, and he punished the defeated enemy as cruelly as

any Assyrian king would have done. Of the forty-three years of his reign, only the first ten are well known; for the balance we have but little evidence, and that of a kind which does not shed any light on the domestic situation. Two minor rebellions during his first ten years should be pointed out, if only to illustrate the existence of internal tensions which the historical sources of that period do not reflect. Even while he was still crown prince, Nebuchadrezzar had been in command of a Babylonian army; and when the health of his father began to fail after a campaign along the Euphrates against the Egyptians encamped at Carchemish, Nebuchadrezzar was sent out as commander-in-chief to the same front. His victory at Carchemish over the forces of Pharaoh Neco II (605) brought all of Syria and Palestine to its knees. He pursued the beaten Egyptians as far as the frontiers of their country, without entering the little kingdom of Judah (II Kings 24:7). Jehoiakim of Judah submitted to the victor. Nebuchadrezzar then had to leave in haste for Babylon, after having received news of the death of his father; but he soon returned as king and, with his army, collected tribute, which was rendered quickly enough because of the presence of the army and the impression made by the victory just won. In each of the following years, Nebuchadrezzar appeared with his army to conquer recalcitrant cities, such as Ashkelon, until, in 601, he fought a battle with Egyptian troops, from which he emerged just short of being defeated. The Egyptians, under Pharaoh Hophra, reconquered Gaza, and their influence was definitely increasing, especially in Jerusalem, in spite of the constant warnings of the prophet Jeremiah. According to Josephus, Jehoiakim still paid his tribute to Nebuchadrezzar, who appeared in 599 with newly strengthened troops, ready again to assert the supremacy of Babylonia over Egypt in that region. Nebuchadrezzar concerned himself on this occasion mainly with the Arabs to the E of Syria and Palestine, who lost not only their herds but also their images to Nebuchadrezzar. At the end of the year 598, Nebuchadrezzar started out from Babylon, this time quite clearly ready to attack the kingdom of Judah. He laid siege to what the Chronicler calls the "city of Judah," where in the meantime JEHOIACHIN had succeeded to his father's throne. On the fifteenth and sixteenth of March, 597, the city was captured and had to pay heavy tribute and to accept a new king of Nebuchadrezzar's choosing, Zedekiah. Jehoiachin lived in exile in Babylon, as we know from administrative texts dated from the tenth to the thirty-fifth year of Nebuchadrezzar. Of the next three years of Nebuchadrezzar we know that he continued his campaigns in Syria, with the exception of his ninth year, when he went to the region beyond the Tigris against Elam. Fig. JEH 10.

In the last thirty-three years of Nebuchadrezzar's reign fall the following events, which, however, cannot be clearly dated from cuneiform sources: the siege of Tyre, which, according to Josephus, lasted thirteen years; the second siege and destruction of Jerusalem in 586; his intervention in a border arrangement between the Medes and the Lydians at the Halys River in Asia Minor; and a campaign against Pharaoh Amasis, the successor of Hophra, in Nebuchadrezzar's thirty-seventh year—i.e., in 567.

Nebuchadrezzar had the great advantage over all Assyrian kings in having as ally the Medes—he was married to Amyitis, daughter of the king of the Medes—which secured the frontiers of his empire to the N and the NW. Much of the tribute collected on his campaigns went into the decoration of the temples he built in Babylon and other cities, into the immense fortification of the capital, and into his palace. The famous "hanging gardens" cannot be identified among the impressive ruins of Babylon. The reference in Dan. 4 to the madness of Nebuchadrezzar may refer to Nabonidus, whose unconventional acts as king provoked much opposition and may well have earned him the reputation of insanity.

NEBUSHAZBAN nĕb'ə shăz'băn [נבושזבן; Akkad. *Nabû-šūzibanni,* Nabû save me!] (Jer. 39:13). The chief eunuch of Nebuchadrezzar; mentioned among the "princes of the king of Babylon."

NEBUZARADAN nĕb'ə zə rā'dən [נבוזראדן; Akkad. *Nabû-zēr-iddin,* Nabû has given offspring] (II Kings 25:8, etc.). A high court official of Nebuchadrezzar. He destroyed the temple, the palace, and the houses of Jerusalem with fire and tore down the walls of the city. He reappeared four years later to deport more people (Jer. 52:30). His official title is given as "chief cook or butcher," but it should be noted that such a designation of a court official is unknown in Babylonia. A. L. OPPENHEIM

NECHO, NECHOH. KJV forms of NECO.

NECK, STIFF. *See* STIFF-NECKED.

NECKLACE [ענק; רביד, RSV *emendation in* II Chr. 3:16 *for* MT דביר, inner sanctuary]; KJV CHAIN. *See* JEWELS AND PRECIOUS STONES.

NECO nē'kō [נכו, נכה; Assyrian *Nikū;* Egyp. *Nk'w;* LXX Νεχαώ; Herodotus Νεκῶς]; KJV NECHO (II Chronicles); PHARAOH-NECHO (Jer. 46:2); PHARAOH-NECHOH (II Kings). A pharaoh (609-594 B.C.) of the Twenty-sixth Dynasty, who slew King Josiah and installed Jehoiakim in place of Jehoahaz (II Kings 23:29-35).

In 671 B.C. the Assyrian king Esarhaddon invaded Egypt and took Memphis, sending the Ethiopian pharaoh TIRHAKAH in flight to the S. Esarhaddon confirmed in rule a number of Delta princes, among them a certain Neco of Saïs and Memphis. Later a son of this Neco, Psammetichus I (663-609), claimed the rule of all Egypt and founded the Twenty-sixth Dynasty, with the capital at Saïs. The new dynasty was supported by Assyrian patronage and by the employment of Lydian and Ionian mercenaries.

A second Neco succeeded his father in 609, three years after the fall of Nineveh. The situation seemed ripe for the enlargement of Egyptian power, before the newly powerful Babylonian state had the opportunity to move into Syria and Palestine. Neco cap-

tured Gaza and Ashkelon, to establish entry bases into Palestine (Jer. 47:1, 5). He then moved N along the Philistine Plain and the Plain of Sharon, intending to make a juncture with the remnants of the Assyrian army near Carchemish on the Euphrates. At the Megiddo pass through the Carmel Range, Josiah of Judah attempted to withstand Neco's Greek mercenaries and was killed for his boldness (II Kings 23:29; II Chr. 35:20-24). When the people of Jerusalem chose another anti-Egyptian king, Jehoahaz, Neco brusquely haled the new ruler N to the Egyptian camp at Riblah, deposed him, and imposed a crushing fine upon the land of Judah. Jehoahaz was sent to Egypt, to end his years in captivity; and Neco appointed Eliakim king of Judah, changing his name to Jehoiakim (II Kings 23:33-35). Thus Egypt broke the independent power of Judah and gained a vassal at Jerusalem.

For a few years Neco enjoyed success in Asia. A fragment of a monument of his has been found at Sidon, and a letter written in Aramaic—probably from the ruler of Ashkelon and probably to Neco—shows another Palestinian vassal. With the remnants of the Assyrian army and with his own Anatolian and Aegean mercenaries, he was able to fortify Carchemish, cross the Euphrates, and threaten the rising power of Nabopolassar of Babylon. However, in 605 B.C., Nabopolassar sent his son Nebuchadrezzar N, and Neco suffered a crushing defeat at Carchemish (II Kings 24:7; Jer. 46:2). The pharaoh retreated hastily into Egypt. Nebuchadrezzar pursued him as far as the River of Egypt, but was called back home by his father's death. In 601-600, Nebuchadrezzar again fought at the Egyptian frontier, with heavy losses on both sides. Neco had learned a hard lesson and did not again venture out of Egypt. It was a dozen years before Egypt, under Hophra, again intervened actively in Asiatic politics.

For other events in Neco's reign our chief sources are classical, rather than Egyptian. However, since the first such source, Herodotus, visited Egypt only a few generations after Neco's reign, the tradition was relatively recent. At great cost of life, Neco tried to push a canal through the Wadi Tumilat from the Nile to the Red Sea. The project was not achieved, and was left to the Persian Darius to finish. The tradition that Neco sent out sailors to circumnavigate Africa is also insistent and accords with the mercantile curiosity of the day (Herodotus II.158; IV.42; Diodorus I.33).

NECODAN. KJV Apoc. form of Nekoda 2.

NECROMANCY. Divination by means of communication with spirits of the dead. *See* Familiar Spirit; Divination.

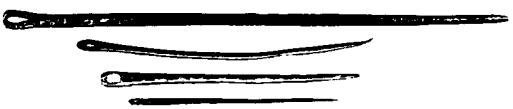
NECTAR [נפת, *lit.,* dropping juice, flowing honey, comb; *in full,* נפת צופים (Ps. 19:10—H 19:11)] (Song of S. 4:11). Alternately: HONEY (Prov. 5:3); HONEYCOMB (Prov. 16:24). The sweet fluid secreted by the nectaries of plants; the principal source of the honey of bees, by which it is collected. H. F. Beck

NEDABIAH nĕd'ə bī'ə [נדביה, Yahu has impelled] (I Chr. 3:18). A son of Jeconiah (Jehoiachin).

NEEDLE [ῥαφίς, βελόνη] (Matt. 19:24; Mark 10:25; Luke 18:25). An instrument for sewing with leather thong or thread. Needles have been found at most excavations in the Near East, from earliest to latest periods. Earliest examples, dating from the sixth millennium B.C., are of bone, usually flat strips tapering in width from base to tip and perforated at the wider end by boring from both sides. A number of bone needles, blunt at both ends, were found at Megiddo from the fourth millennium, and are identified as shuttle needles for weaving.

In the OT period bone needles were rarer and bronze needles more common. Most of these were made by flattening one end slightly and perforating it, the result being much like modern needles. Some, however, were made by looping the head end and bending it in tightly in such a way that it would not catch on the cloth. Sizes also approximate those of modern needles. At Tell en-Nasbeh they ranged from *ca.* 1½ to 5½ inches—i.e., from a small sewing needle to a large darning needle, in our terms. Fig. NEE 11.

In the NT period bronze needles continued to predominate, but bone needles are found and some very fine examples of ivory needles as well.



Courtesy of the American Schools of Oriental Research

11. Bronze needles from Mizpeh (Tell en-Nasbeh)

Jesus used the figure of the impossibility of a camel's going through the eye of a needle, to teach the difficulty of a rich man's entering the kingdom of God. Some late Greek MSS and other versions read κάμιλος ("cable, rope") for κάμηλος ("camel"), apparently to lessen the harshness of the saying. A much later interpretation made the saying refer to a postulated small gate called the "Needle's Eye," through which a camel would go with difficulty. Neither interpretation is justified. S. V. Fawcett

NEEDLEWORK. *See* Embroidery.

NEEMIAS. KJV Apoc. alternate form of Nehemiah 3.

NEESINGS. Archaic term used as KJV translation of עטישה (RSV SNEEZINGS) in Job 41:18—H 41:10.

NEGEB, THE nĕg'ĕb [הנגב, the dry land]. One of the main regions of Canaan, comprised in an inverted triangle, with one side along the Wadi el-Arabah; another near the Sinai Peninsula, from the Gulf of Aqabah to the vicinity of Gaza; and its base a somewhat irregular line from the coast to the Dead Sea a little N of Beer-sheba. As it lay to the S of the hill

country of W Palestine, the word has come to mean "south," and it is sometimes difficult to determine in biblical passages whether the district or the direction is denoted. Thus in Gen. 12:9; 13:1 the term is correctly rendered by "the Negeb" (so RSV), while the KJV incorrectly translated it as "the SOUTH."

Despite the fact that the name Negeb indicates a region which has considerably less rain than the rest of the country, the district was never a desert in prebiblical or biblical times. This may be partly due to the fact that in those times vegetation which helped hold the moisture in the soil was more abundant, and that this has been lost by the neglect of more modern times. Nelson Glueck, in his explorations in the region from 1952 on, found hundreds of sites of former settlements, indicating that the region was frequently well populated and an important area.

Evidences have been discovered of the presence of settlements as far back as Paleolithic times, and even more so in the Neolithic (seventh-fifth millenniums B.C.), Chalcolithic (fifth millennium to thirty-second century), and Early Bronze (thirty-second–twenty-first centuries) periods. A large number of these settlements were found along the main highways of the region: a N-S route continuing the water-parting route of the hills to the N through Beer-sheba and Kadesh-barnea ('Ain el-Qudeirat) down to the Sinai Peninsula and on to Egypt; and routes from Beer-sheba and Kadesh-barnea to Kurnub connecting with the Wadi el-Arabah route. There was a very extensive period of settlement in the Middle Bronze I age (twenty-first–nineteenth centuries), the latter part of which was the age of Abraham. When the latter journeyed in the Negeb on his way to and from Egypt (Gen. 12:9–13:1), he was thus able to find numerous cities and places of pasturage for his very large retinue of servants and animals.

This abundant settlement disappeared at the end of the period, possibly as a result of the invasion of Chedorlaomer and his allies, which swept across the "country of the Amalekites" as far as Kadesh-barnea (Gen. 14:7). Since this was a raid and not a conquest, it probably created an intentional desolation, tearing down the houses and filling up the wells. This may explain why Hagar, deprived of these familiar landmarks, lost her way below Beer-sheba (21:14); and why the patriarchs no longer journeyed into the further Negeb, but remained in the untouched areas, such as Gerar, Beer-sheba, and Hebron.

The Israelites appeared in the region after the Exodus and their fruitless attempt to storm the land of Canaan from Kadesh-barnea (Num. 14:44-45; Deut. 1:44); the route they followed was probably the old N-S route through the Negeb. It was not until many years later that the tribes of Judah and Simeon came down from the N and, after conquering the hill country, began to push into the Amalekite region of the Negeb. At that time the area was devoted to the raising of sheep and goats rather than to farming, though the Amalekites had at least one city, with Agag as king, which was destroyed by Saul (I Sam. 15). A little later, at the time when David settled in the region, there is mention (27:10; 30:14, 29) of separate districts of the Negeb: the Negeb of the Cherethites, near Ziklag; the Negeb of Judah, around Beer-sheba, occupied principally by the tribe of Simeon; the Negeb of the Calebites, near Hebron; the Negeb of the Jerahmeelites; and the Negeb of the Kenizzites (LXX; superior to the MT "Kenites"). All these were later incorporated by David into the kingdom of Judah.

In the times after David conquered Edom and got possession of the Arabah, and particularly after Solomon began his commercial and industrial expansion in that region, the settlement of the Negeb came into its own. Numerous fortresses and settlements all over the region during Iron Age II (900-600 B.C.) testify to the expansion of the Israelites to the S. The tribe of Simeon in particular enlarged its territory, spreading over the region near Gerar (I Chr. 4:39-40, where "Gerar" is to be read instead of "Gedor") and annihilating the last of the Amalekites and other aborigines of the area (vss. 41-43).

12. The Negeb: interior of the "Great Cauldron," or Jebel Hathira

After the fall of the Judean state and the deportation of its people from 597 on, the N part of the Negeb was occupied by the Edomites and formed part of their kingdom of Idumea; the central and S parts were later occupied by the expanding population of the Nabateans. The latter not only settled in the previously occupied sites but also created new ones of their own; they built along the routes of the Negeb such large cities as Abde, Kurnub, Sbeita, Auja, and Elusa, which were prosperous for centuries. They practiced there their customary skill in water conservation; they built dams, dug cisterns, and created terraces to hold in every bit of moisture. As a result, under their rule the Negeb soil showed its underlying fertility, and the region became once more a place for farming as well as for animal raising, while caravans of camels crossed it in every direction. This was the state of the Negeb all through NT times, and it was only the devastations of war and neglect that, centuries later, caused it to be regarded as a desert. Fig. NEG 12.

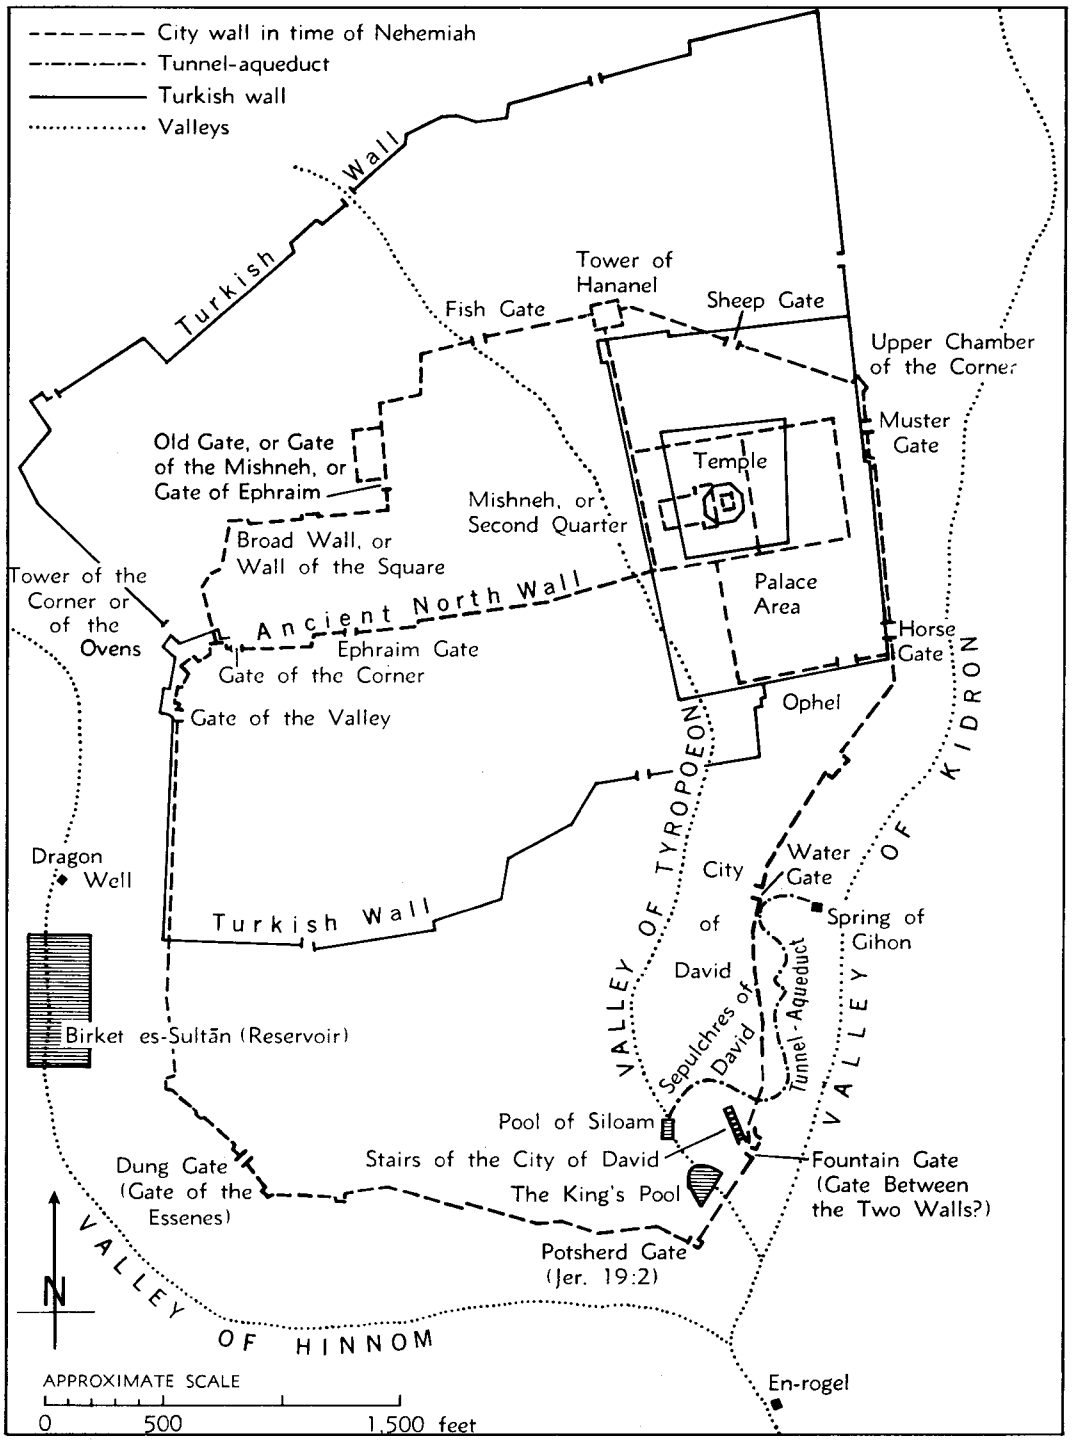
NEGINAH, NEGINOTH nĕg'ĭ nə, —nŏth. *See* MUSIC.

NEHELAM nĭ hĕl'əm; KJV NEHELAMITE —ə mīt. A translation of הנחלמי ("of Nehelam"; KJV "the Nehelamite"; Jer. 29:24, 31-32). The name, referring to Shemaiah, one of the false

prophets whom Jeremiah rebuked, may be that of an unknown locality, his home. The LXX B reads Αιλαμείτην. However, Nehelam might be a family name. On the other hand, some scholars regard it as a play on the word חלום, "dreamer," and so "dreamer" (cf. Jer 23:25, 32); but this is less probable. J. MUILENBURG

NEHEMIAH nē'ə mī'ə [נחמיה, Yahu has comforted; Νεεμία]; KJV Apoc. NEHEMIAS —əs (I Esd. 5:8);



G. A. Barrois

13. Jerusalem in the time of Nehemiah

NEEMIAS (II Macc. 1:18-36; 2:13; Ecclus. 49:13). **1.** One of those whose names head the list of exiles returned from Babylon with Sheshbazzar in 538 B.C. (Ezra 2:2; Neh. 7:7; I Esd. 5:8).

2. Son of Azbuk, and "ruler of half the district of Beth-zur"; one of those who aided Nehemiah governor of Judah in rebuilding the wall of Jerusalem in 444 B.C. (Neh. 3:16). B. T. DAHLBERG

3. Son of Hacaliah; cupbearer of Artaxerxes I king of Persia (465-424 B.C.). Upon receiving the news of the said plight of the Jews in Jerusalem from his kinsman Hanani in 444, Nehemiah became ill with grief and was allowed by his king to go to Jerusalem as governor (Neh. 1:1–2:8). Arrived at Jerusalem, he made a secret inspection of the ruined city walls (2:9-16).* His decision to rebuild them provoked the scorn of Sanballat and Tobiah (2:17-20), but in spite of the opposition of the enemies the walls were rebuilt by devoted Jews (chs. 3–4). Serving unselfishly as governor, Nehemiah corrected some of the worst economic hardships (ch. 5). In spite of the plots of his enemies (6:1-14), Nehemiah completed the building of the walls (vss. 15-19) and set guards at the gates of Jerusalem (7:1-3). Alarmed by the smallness of Jerusalem's population (7:4-73*a*), Nehemiah ordered one out of ten Jews to live in the capital (11:1-2); the list of the inhabitants of Jerusalem is given in Neh. 11:3-19, and of other inhabitants of Judea in vss. 20-36. These lists may have been added by the Chronicler to the memoirs of Nehemiah, as well as the account of the dedication of the walls of Jerusalem (12:27-43) and of the list of the collectors of offerings due to the clergy (vss. 44-47). In 432 B.C., on his second visit to Jerusalem, Nehemiah drove Tobiah out from the temple (13:4-9), and enforced the payments due to the Levites (vss. 10-14) and the observance of the sabbath (vss. 15-22). In his effort to abolish mixed marriages (13:23-27), Nehemiah drove out a grandson of the high priest who had married a daughter of Sanballat (vss. 28-29). Nehemiah closes his memoirs begging God to remember his efforts to enforce the divine law (13:30-31). Fig. NEH 13. *See also* Map II under JERUSALEM.

Nehemiah, in contrast with Ezra, was a successful man of action. Through his energy, unselfishness, and cleverness he brought new life to the dying Jewish community in Jerusalem. He strengthened it physically through the new city walls, socially by helping the needy, and nationally by enforcing the law of Moses. Cf. also II Macc. 1:18-36; 2:13; Ecclus. 49:13.

Possibly Nehemiah is one of the "three of those sheep" signified in Enoch 89:72 who rebuilt Jerusalem and the temple (cf. Ezra 2:2). The Apoc. wrongly intrudes his name in I Esd. 5:40 for the "governor" of Ezra 2:63.

NEHEMIAH, BOOK OF. *See* EZRA AND NEHEMIAH, BOOKS OF.

NEHEMIAS. KJV Apoc. form of NEHEMIAH.

NEHILOTH nē'ə lŏth. *See* MUSIC.

NEHUM nē'hŭm [נחום] (Neh. 7:7). One of those whose names head the list of exiles returned from Babylon. The parallel list in Ezra 2:2 (cf. I Esd. 5:8) has REHUM (רחום); the latter is probably the correct form and the former a copyist's error.

NEHUSHTA nĭ hŏŏsh'tə [נחשתא, *probably* serpent (*cf. the name* Nahash), *or* bronze, strong as brass] (II Kings 24:8). The wife of Jehoiakim king of Judah, and the mother of Jehoiachin. She and Jehoiachin, together with other leading citizens, were taken into exile to Babylon by Nebuchadrezzar in the first deportation in 597 B.C. (II Kings 24:12, 15).

D. HARVEY

NEHUSHTAN nĭ hŏŏsh'tən [נחשתן] (II Kings 18:4). The bronze snake destroyed by King Hezekiah in his campaign to purify Hebrew worship. The record of this act is surprisingly brief for so important an act of reformation. It is apparent that the writer believed that the object destroyed by Hezekiah was the actual image fashioned by Moses in the wilderness (Num. 21:8-9). He notes also that its destruction was accompanied by the removal of the high places and symbols associated with the Baal religion and the hated symbol of ASHERAH.

It has been assumed by some scholars that the name Nehushtan was given to it by Hezekiah in contempt—"a thing of brass" (actually copper or bronze). The name is markedly close to the Hebrew נחושה, "bronze"; and there may have been a play upon words, a pattern delightful to Hebrew orators. It is more probable that the RSV is correct in rendering: "It was called Nehushtan," and that this had long been the name of the object.

It is probable that Nehushtan was the name of a deity, perhaps the snake-god, associated with a form of Baalism. This is supported by the fact that the mother of King Jehoiakim was named Nehushta (II Kings 24:8). She would scarcely have been named after a metal, but may have been named in honor of a nature deity.

Tensions between the prophetic party, protagonists for the Yahweh religion, and the adherents of Baalism are notable throughout much of biblical history. King Hezekiah gave his support to the cause of Yahwism. The snake was a hated symbol of Canaan's Baal religion. W. G. WILLIAMS

NEIEL nē ī'əl [נעיאל] (Josh. 19:27). A border town in Asher. It is probably to be identified with Khirbet Ya'nin, a site located on the E edge of the Plain of Acco, with LB and Iron I remains.

Bibliography. A. Saarisalo, "Topographical Researches in Galilee," *JPOS*, 9 (1929), 38. G. W. VAN BEEK

NEIGHBOR [רע, friend, companion, *from* רעה, to pasture (*cf.* רעה, shepherd); *in a weaker sense*, fellow citizen *or simply* another person with whom one stands in a reciprocal relationship; קרוב, near one; שכן, inhabitant, dweller; עמית, associate, relative, fellow; γείτων, fellow countryman, one who lives nearby; περίοικος, one dwelling nearby; ὁ πλησίον (*an adverb*, near, *used as a noun*), the one near or close to].

1. In the OT. "Neighbor" in the OT generally denotes a fellow member of the people of the cove-

nant; it is therefore similar to "brother" (Lev. 25:25, probably 35-36, 39, 47; Deut. 15:2-3, 7, 9, 11-12; 17:15; 19:18-19; 22:1-4; 23:7, 19-20; Neh. 5:1 ff; Jer. 34:8, 17). This fellowship among the covenant people involved the assumption of moral obligations and the guarantee of certain rights for each member. Evidences of this sense of moral obligation toward one's neighbor are particularly clear in Exod. 20 (especially vss. 16-17 = Deut. 5:20-21; see also Exod. 22; Deut. 15; 19; 22:1-4; 27:17 ff); this obligation is categorically enjoined in Lev. 19:18: "You shall love your neighbor as yourself," an injunction which is quoted with hearty approval in the NT (Matt. 19:19; 22:39; Mark 12:31, 33; Luke 10:27; Rom. 13:9; Gal. 5:14; Jas. 2:8).

2. OT legislation concerning neighborly relations. In OT thought, relations among neighbors were subject to the law (Exod. 20:16-17), and care was urged so that these relationships should be properly maintained (22:5-15, 25-27; cf. Lev. 6:2 ff; 19:9-18; 25:13-17, 25-28, 35 ff). According to the law a man who has hurt his neighbor has done an evil thing, and "as he has done it shall be done to him" (Lev. 24:19-20, 22; Deut. 19:11-13; cf. Deut. 27:24; I Kings 8:31-32 = II Chr. 6:22); it is as though he had hurt his brother (Deut. 15:2; Jer. 34:9, 17; etc.). Cities of refuge were established in Israel so that if a man should unintentionally kill his neighbor, he might escape and so save his life (Deut. 4:41-43; 19:1-14; Josh. 20). This relationship of a man with his neighbor in Israel was subject to the law because the relationship had been established by God himself (Job 16:21). Conversely, moral disintegration and national catastrophe follow when men deny the rights of their neighbors and when neighbors disregard their reciprocal obligations. Men lie and slander their neighbors and so incur the divine wrath (Pss. 12:2; 101:5; cf. Prov. 11:9, 12; 14:21; 21:10; 25:18; 26:18-19). These circumstances will be widespread in the evil days which precede the day of the Lord's judgment (Isa. 3:5; Jer. 9:4-9; Mic. 7:5-6; cf. Jer. 19:9). The individual's treatment of his neighbor and his neighbor's wife is a prominent criterion in Ezekiel's distinction between the righteous and the sinful man (ch. 18; cf. ch. 22).

In the age of the New Covenant which Jeremiah envisaged, the law will be written upon men's hearts, and they will live together in peace (31:34); Zechariah envisaged an equally blissful state, when "every one . . . will invite his neighbor under his vine and under his fig tree" (3:10).

Throughout the OT one of the fears of the Israelite was that he should fall onto bad times and so become a subject of derision and scorn among his neighbors, whether Israelite or foreign (Job *passim;* Pss. 44:13; 79:4; 80:6; 89:41; etc.). The terrible pathos of the sorrows of captive Zion is underscored in Lamentations by the observation that the Lord has made Jacob's neighbors become his foes (1:17).

3. In the NT. In the NT, where the injunction from Lev. 19:18 is repeated with approval, the most important definition of the theological meaning of "neighbor" is presented in the parable of the Good Samaritan (Luke 10:25-37). Superficially the parable suggests that Jesus would have his followers recognize their neighbors as those in need of services, as individuals to whom assistance would be helpful and to whom it therefore should be offered. But actually Jesus did not use the parable in order to suggest that the man in need was the neighbor; rather, it was the man who had compassion who "proved neighbor to the man who fell among the robbers" (vs. 36). The ancient interpretation which viewed the Good Samaritan as a portrait of Christ himself properly proclaimed that he was the compassionate neighbor. For the Christian it follows that when the individual stops "desiring to justify himself" (vs. 29), and sees in Christ the compassionate neighbor, the individual then becomes the recipient of God's love; it then becomes possible for the individual to love God and his neighbors. In the same Christian terms it further becomes the obligation of the followers of Christ to serve as compassionate neighbors in the world, whence Jesus' directive to the lawyer (vs. 37). In this christological setting one's neighbors are those of his fellow beings who come forth in a variety of ways to do him good, whether by offering services to him or by confronting him with their own desperate need and so involving him with Christ in the fellowship of suffering humanity (cf. Matt. 25:31-46).

Jesus extends the term "neighbor" until it is essentially coextensive with "mankind." This wider interpretation belongs to the term in the rest of the NT. Both Paul (Rom. 13:9) and James (Jas. 2:8) regarded the commandment: "You shall love your neighbor as yourself," as the royal law and, in a sense, the summary of all law.

NEKEB nĕk′ĕb. KJV translation of הנקב ("tunnel, shaft, mine") in Josh. 19:33. If it is a town, it may be located at el-Bossa. However, it is almost certainly part of the place name ADAMI-NEKEB (so RSV).

Bibliography. F.-M. Abel, *Géographie de la Palestine,* II (1938), 398. G. W. VAN BEEK

NEKODA nĭ kō′də [נקודא]; KJV NECODAN —dən in I Esd. 5:37; NOEBA nō ē′bə in I Esd. 5:31. **1.** Eponym of some temple servants who returned to Jerusalem after the Exile (Ezra 2:48 = Neh. 7:50; I Esd. 5:31; II Esd. 17:50).

2. Eponym of some returned exiles who were unable to prove their Israelitic descent (Ezra 2:60 = Neh. 7:62; I Esd. 5:37). E. R. ACHTEMEIER

NEMUEL nĕm′yōō əl [נמואל]; NEMUELITES —ə līts. **1.** A Simeonite; head of the Nemuelites (Num. 26:12; I Chr. 4:24); called Jemuel in Gen. 46:10; Exod. 6:15.

2. A Reubenite; brother of Dathan and Abiram (Num. 26:9).

NEOLITHIC AGE nē′ə lĭth′ĭk. The second cultural stage, marked by the domestication of plants

and animals, permitting settled communities, and by the technique of grinding as well as chipping stone implements. *See* PREHISTORY.

NEPHEG nē′fĕg [נֶפֶג]. **1.** A Levite; son of Izhar, and brother of Korah and Zichri (Exod. 6:21).

2. One of the sons of David who were born at Jerusalem (II Sam. 5:15; I Chr. 3:7; 14:6).

NEPHI nĕf′ī. KJV form of NAPHTHA.

NEPHILIM nĕf′ə lĭm [נְפִלִים] (Gen. 6:4; Num. 13:33); KJV GIANTS. The exact meaning of the word is uncertain; it is therefore left untranslated. Although the word is rendered "giants" in the KJV, it should not be confused with the more widely used Hebrew words for "giant"—רָפָא, רְפָה, and רְפָאִים.

In Gen. 6:1-4 we have a fragmentary narrative which purports to show that in the early history of the race the sons of God chose wives from among the daughters of men. From these unnatural unions a race of giants arose who represented a union of the divine spirit and human flesh. They were probably regarded as being intermediate between the divine and the human orders; and vs. 3 would seem to suggest, however obscurely, that they introduced an element of confusion into the world. Even though these Nephilim are referred to only once again in the OT (Num. 13:33), the tradition of such a race survived into historic times in Israel (Deut. 1:28; 2:10; and the various references to the REPHAIM cited above). We seem to have in this tradition the Hebraic version of a theme common in many ancient literatures, according to which men of great stature inhabited the earth in very early times, and in which marriages between supernatural beings and mortals were common. The myth in Gen. 6:1-4 therefore seems to serve an etiological purpose.

There is no clear basis for the long-standing interpretation that this passage is an introduction to the story of the Flood. That story does not allude to any such Nephilim, and the mere position of the fragment does not support the widespread inference. We are, as suggested, free to infer from vs. 3 that these Nephilim introduced some disorder into the world, and Jewish tradition commonly regards the Nephilim as the fallen or inferior ones. (Various other traditions have grown up in this connection. Adam, Eve, Seth, and Enoch are often designated as the sons of God whose children are the Nephilim. It is sometimes suggested that certain of the wives of Noah's sons were from this race and so bore giants after the Flood; or that certain giants escaped the Flood, thus accounting for the survival of these superhuman beings in later Hebraic tradition.) In the main, however, no sin is imputed to mankind for these marriages, and the blame is put, at least by inference, upon the Nephilim.

The reference to the Nephilim (of which J is the commonly accepted source) has been abridged so drastically that no real continuity holds the verses of the fragment together. Probably such an abridgment resulted from the writer's or a later editor's distaste for the mythological character of the narrative—he included these verses as an attempt to account for the origins of the Nephilim, about whom stories and beliefs continued to be popular. It is probable that the legend of the Nephilim was considerably more popular in the Hebrew tradition than the treatment of it by the editors of the Hexateuch would indicate. Vs. 4 clearly suggests that the existence of Nephilim was not restricted to the remote period mentioned in vs. 1. In Ezekiel's description of the nether world (ch. 32) we may have further allusions to these "fallen mighty men of old" (vs. 27).

NEPHIS nē′fĭs. KJV Apoc. form of MAGBISH.

NEPHISH. KJV form of NAPHISH in I Chr. 5:19.

NEPHISIM nĭ fī′sĭm [נְפִיסִים (*Kethibh*); Apoc. Ναφισί] (Ezra 2:50; I Esd. 5:31); KJV NEPHUSIM —fū′— [נְפוּסִים (*Qere*)]; KJV Apoc. NAPHISI năf′ĭ sī. Alternately: NEPHUSHESIM nĭ fōōsh′ə sĭm [נְפוּשְׁסִים (*Kethibh*)] (Neh. 7:52); KJV NEPHISHESIM —fĭsh′— [נְפִישְׁסִים (*Qere*)].

Eponym of a family of Nethinim, or temple servants, listed among the exiles returned from Babylon; possibly related to the NAPHISH Ishmaelites (*see bibliography*). The form in Neh. 7:52 probably represents a superimposition of one variant spelling on another, the one with *sh*, the other with *s*.

Bibliography. L. W. Batten, *Ezra and Nehemiah,* ICC (1913), p. 89; R. A. Bowman, Exegesis of Ezra, *IB,* III (1954), 584.

B. T. DAHLBERG

NEPHTALI nĕf′tə lī. Douay Version form of NAPHTALI.

NEPHTHALI —thə lī. KJV Apoc. form of NAPHTALI; Kedesh Naphtali (*see* KEDESH 2).

NEPHTHALIM —lĭm. KJV NT form of NAPHTALI.

NEPHTHAR nĕf′thär [νεφθάρ] (II Macc. 1:36); KJV NAPHTHAR năf′—. A term of obscure etymology. *See* NAPHTHA.

NEPHTOAH nĕf tō′ə [נֶפְתּוֹחַ]. A place name, used only in the phrase "Waters of Nephtoah" (Josh. 15:9; 18:15). It is generally identified with modern Lifta with its spring, *ca.* three miles NW of Jerusalem. Other identifications have been proposed, particularly Atam, S of Bethlehem; but the nearness to KIRIATH-JEARIM fits Lifta.

Some scholars emend to read "waters of Merenptah" (מֵי נֶפְתּוֹחַ for נֶפְתּוֹחַ). *See* MER-NE-PTAH.

O. R. SELLERS

NEPHUSHESIM, NEPHUSIM. *See* NEPHISIM.

NER nûr [נֵר, light]. A Benjaminite whose son Abner was the commander of the army under Saul (I Sam.

26:5, 14, etc.). Although nothing is known of the life of Ner beyond the mere mention of his name, it is of importance to determine his relationship to the house of Saul. Some have considered Ner the uncle of Saul and the brother of Kish (e.g., Jos. Antiq. VI.vi.6). To arrive at this conclusion, it is necessary to interpret the antecedent of the words "Saul's uncle" in I Sam. 14:50 as Ner, to emend the following verse to read "sons of Abiel" instead of "son of Abiel," and to replace the first occurrence of Kish in I Chr. 8:33 (=I Chr. 9:39) with Abner. Support is sought for this interpretation in I Chr. 9:36, where a Kish is presented as a brother of Ner. However, the verses immediately following appear to demand two persons bearing the name Kish: one who is the brother of Ner, and one who is the son of Ner. Moreover, the change suggested in I Chr. 8:33 is simply foreign to the purpose of the Chronicler, which is to present the genealogy of the house of Saul.

On the other hand, if Ner is considered to be the grandfather of Saul and the father of Kish and Abner, no textual emendation is necessary except perhaps to insert "the son of Ner" immediately after the name Kish in I Sam. 9:1. The Benjaminite genealogy of the relationship of Ner to the house of Saul is then self-consistent (cf. also I Sam. 10:14-15).

E. R. DALGLISH

NERAIAH. Apoc. form of NERIAH.

NEREUS nĭr′o͞os, nĭr′ĭ əs [Νηρεύς]. A Christian who receives a greeting, together with his sister, who remains nameless, in Rom. 16:15. It has been conjectured that Philologus and Julia were the parents of Nereus, his sister, and Olympas, all mentioned in the same verse; the order of names supports this.

Nereus in Greek mythology was the wise old man of the sea, father of fifty daughters known as Nereids. It may seem strange that a Christian should bear and retain the name of a pagan divinity, but the same thing is true of Phoebe in vs. 1 and Hermes in vs. 14.

F. W. GINGRICH

NERGAL nûr′găl [*probably Ne-uru-gal,* the lord of the great city]. A Mesopotamian god whose name occurs in II Kings 17:30 and in a theophoric name Nergal-sharezer (Jer. 39:3, 13).

Nergal was a god worshiped by the military colonists settled by the Assyrians in the province of Samaria after the final collapse of Israel in 722 B.C., particularly by those of Cutha, of which he was the city god. Originally he was associated with fire and the heat of the sun, and then with war, hunting, and disasters which destroyed men en masse. The consort of Ereshkigal, mistress of Hell, he had as his cult animal the lion. One of his titles is "lord of weapons and the bow" (cf. "RESHEPH of the arrows" among the W Semites).

Bibliography. M. Jastrow, *The Religion of Babylonia and Assyria* (1898), pp. 65-68; W. Muss-Arnolt, *A Concise Dictionary of the Assyrian Language* (1905), pp. 726-27; E. Dhorme, *Les Religions de Babylonie et d'Assyrie* (1945), pp. 38-44.

J. GRAY

NERGAL-SHAREZER nûr′găl shə rē′zər [נרגל שר־אצר; Akkad. *Nergal-šar-uṣur,* Nergal protect the king!] (Jer. 39:3, 13). Rabmag, official of Nebuchadrezzar, mentioned among the "princes of the king of Babylon."

Possibly he is identical with King Neriglissar (559-556 B.C.), who was, according to Berosus, a son-in-law of Nebuchadrezzar, whose son Evil-merodach he killed in a rebellion. Of Neriglissar nothing is known besides a report on a campaign of his deep into Cilicia, which is described with unusual detail in a new fragment of the Babylonian Chronicle. It occurred in his third and last year. He was the son of a private citizen, and his name appears in legal texts, as do those of Nabonidus and Belshazzar.

Bibliography. D. J. Wiseman, *Chronicles of the Chaldaean Kings* (1956), pp. 37 ff.

A. L. OPPENHEIM

NERI nĭr′ī [Νηρί=נר, lamp] (Luke 3:27). An ancestor of Jesus.

NERIAH nĭ rī′ə [נריה, Yahu is light]. Alternately: NERAIAH nĭ rā′yə [Νηρίας] (Bar. 1:1); KJV NERIAS nĭ rī′əs. A Judean whose two sons served Jeremiah: Baruch as amanuensis (Jer. 32:12; 36:4; etc.), and Seraiah as bearer of the prophet's oracles against Babylon (51:59).

NERO nē′rō. Nero Claudius Caesar, successor of CLAUDIUS as Roman emperor (54-68). His mother, Agrippina, was the great-granddaughter of Augustus, sister of Caligula, and niece and later (49) wife of Claudius. To her and her previous husband, L. Domitius Ahenobarbus, the child Nero was born in 37. In 50 Agrippina persuaded Claudius to adopt Nero as guardian of his son and heir, Britannicus. Four years later Claudius died, probably poisoned by his wife, and Nero, hailed as emperor by the praetorian guard at her instigation, was confirmed by the Senate. In 55 Britannicus was murdered. Nero's empire was governed for him by his mother, by his tutor Seneca, and by Burrus, the praetorian prefect. In 59, weary of restraint and encouraged by his tutor and his mistress Poppea, Nero had his mother put to death. Three years later Burrus died, Seneca retired, and Nero divorced his wife in order to marry Poppea.

He was now free to turn to chariot races, shows of various kinds, and a promiscuous search for pleasure. He was genuinely enthusiastic about Greek poetry and music, but unfortunately he lacked talent. And his heavy expenses, including the costs of a successful war in Britain and a stalemate in Armenia,

14. Profile of Nero on Roman coin

led to the confiscation of estates (including those of the six largest landowners in Africa) and the depreciation of the currency. Both gold and silver coins were reduced in weight. Fig. NER 14.

On July 19, 64, a disastrous fire broke out in the city of Rome. It destroyed nearly a quarter of the city, and after the catastrophe public prayers were offered to the underworld deities, and propitiatory offerings were made to all the gods. A rumor persisted that Nero had ordered the fire started in order to provide space for his building operations, and he diverted attention from himself by finding scapegoats among "those whom, hated for their crimes, the mob called Chrestians" (Tac. Ann. XV.44). Tacitus does not specify these crimes except by referring to Christian superstition and inhumanity. The first to be arrested confessed either incendiarism or Christianity (it is not clear which accusation is involved), and then accused others, who were convicted "not so much for the crime of incendiarism as for hatred of the human race." They were afflicted with cruel and unusual punishments; some were clad in animal skins and attacked by dogs; others were crucified and burned in Nero's gardens, W of the Tiber. The emperor himself, with his usual dramatic flair, dressed as a charioteer and mingled with the crowds, sometimes mounting a chariot to drive through them. The result of his "savagery" was that doubts as to the Christians' guilt arose among the people. Seneca, who knew Nero well, had already warned him against this trait in his character, and was to refer to it again when he died as Nero's victim.

It is probable that the apostles Peter and Paul were put to death in this persecution, for the letter of Clement of Rome, written a generation later, indicates that both perished then. In this letter we read of the "noble examples of our own generation" —Peter and Paul, both presumably martyrs at Rome. "With these men was gathered a great multitude of the elect"; Tacitus also speaks of a "great multitude." "Women were persecuted as Danaids and Dircae"; here there are allusions to the mythological plays of which Nero was so fond. In Greek mythology the daughters of Danaus (Danaids) were given as prizes in a gymnastic contest, and Dirce was put to death by being tied to a wild bull. Clement is describing the persecution at Rome under Nero, and his account supplements that of Tacitus.

Two years later, the ex-consul Petus Thrasea was put to death for criticizing the emperor, while revolt broke out in Judea when the daily sacrifices for the emperor were suspended. On the other hand, Tiridates, king of Armenia and a Mithraic priest, came with his attendant Magi to reverence the emperor, addressing him as "master" and saying: "I have come to you my god, worshipping you as I worship Mithra" (Dio Cassius *History* LXIII.5). In return Nero confirmed Tiridates' rule over Armenia. This event may help explain oriental beliefs in Nero's survival of death.

The emperor then went on an extended tour of Greece (67-68); he won eighteen hundred crowns in various contests and proclaimed an imaginary "freedom for Greece" at Corinth, where he had the praetorian guards try to complete a canal through the Isthmus. The political situation, however, steadily grew worse. Nero demanded and received the suicides of a successful general and of two governors in Germany, but in the spring of 68 revolt broke out in Gaul, Spain, and Africa. The emperor returned to Rome but had to flee; he committed suicide on June 9. A year of anarchy followed. Galba, governor in Spain; Otho, friend of Nero and previous husband of Poppea; and Vitellius, a general in Spain, came to power in rapid succession. Stability was restored only when VESPASIAN became emperor.

Since the Senate had already declared Nero an enemy of the state, there was no question of his deification. His memory was detested by the aristocracy as well as by the Christians, who came to believe that he was responsible for all the imperial legislation against them. On the other hand, there were many who believed that he had not really died but would return, perhaps from the East. In the year 69 a pseudo-Nero arose in Asia and Achaea, anticipating Parthian aid, but he was soon caught and put to death. In 88 another pretender in Asia declared that he was Nero and that he had been in hiding; he was able to escape to the Parthians, but only temporarily. As late as the early second century, Dio Chrysostom (*Orations* XXI.10) says that "most men believe that Nero is still alive." The same belief was held by some Jewish-Christian apocalyptic writers (*Sibylline Oracles* IV.119; V.363; VIII.70). And the return of Nero may be symbolically mentioned in Rev. 13:3, 12 ("Its mortal wound was healed").

As far as Nero's relation to the Christian church is concerned, it is a fact that he persecuted Christians at Rome; it is also a fact that later Christian writers (e.g., Melito and Tertullian) believed that in the first century only he and Domitian persecuted the church. It is by no means so certain that an edict of Nero (*Institutum Neronianum,* as Tertullian calls it) actually served as the legal basis for later persecutions. Tertullian's evidence is ambiguous. In another connection he mentions no special law but speaks of Christians as condemned on grounds of sacrilege, enmity toward the state, and treason (*maiestas*). If there was such a law, passages from a few Christian writers suggest that it read: "It is not lawful for Christians to exist." But the very sporadic nature of later persecutions suggests that there was no such law. Furthermore, according to Tacitus the crime for which Christians were put to death was arson. He hints at other charges, but the penalty of being burned alive suggests that arson was the main point. We may also suspect the efforts of Christian writers to make the unpopular Nero and Domitian scapegoats for a policy of persecution which we know was followed by "good" emperors such as Trajan and Marcus Aurelius.

The reign of Nero, together with the subsequent fall of Jerusalem, strongly influenced the Christian church. In the first place, Nero deprived the church of some of its chief links with the earliest times and made necessary the preservation of apostolic memories in writing. It is likely that the Gospel of Mark is a product of Nero's reign. In the second place, it became evident that persecution and the fall of Jerusalem were not signs of the immediate end of the world, and a process of "rethinking apocalyptic" was intensified. Under these circumstances there was also

an increased concern for the continuity of the church and of its ministry, as well as for the significance of martyrdom.

At the same time, there was now a relatively clear distinction between Judaism and Christianity. Before the Jewish Revolt began, the Christians of Jerusalem left the city for Pella, across the Jordan. And it has been suspected, though without evidence, that Nero chose Christians rather than Jews as his scapegoats because of the influence of Poppea, who, according to Josephus, was interested in Judaism. It was now hard to view Christianity as a Jewish sect.

R. M. GRANT

NEST. The word used to translate קֵן in certain OT passages. The verbal form from the same root, קנן, "to make a nest," is used also in several OT passages. Usually the reference is to birds and their nests, though at times it is to a temporary abiding place for a human being.

The word translated "nests" in the parallel passages Matt. 8:20; Luke 9:58, κατασκήνωσις, means literally "to put down a tent." S. A. CARTLEDGE

NET. A fabric of twine or cord, woven into meshes and used for catching fish, birds, and other animals.

1. Terminology
2. Cord nets
   a. Antiquity, general use, and materials
   b. Fishing
   c. Fowling
   d. Wild animals

15. Limestone stele from Telloh, showing the enemies of Eannatum, king of Lagash, snared in a net (middle third millennium)

3. Metal netting
4. Figurative use of "net"

1. Terminology. "Net" and similar terms are used to translate a number of Hebrew and Greek words. In the OT, מכמר (*makhmōr* in Ps. 141:10; *mikhmār* in Isa. 51:20) and מכמרת (*mikhmōreth* in Isa. 19:8; *mikhmereth* [SEINE; KJV DRAG] in Hab. 1:15-16) are probably from Akkadian *kamâru,* "press down, overpower" (noun *kamaru,* "net, snare"). מצודה (*meṣôdhâ* in Eccl. 9:12; *meṣûdhâ* [SNARE] in Ezek. 12:13; 17:20) and מצוד (Eccl. 7:26; SNARES) are from צוד, "to hunt." The KJV translates חרם "net" in Ezek. 32:3 (RSV DRAGNET; from חרם, "to slit"). Words similar to "net" are: רשת (מעשה רשת), "network" (Exod. 27:4; 38:4), from ירש, "subdue, take possession of"; שבכה, "network," "pitfall" (KJV variously "snare," "wreath," "wreathen work"; cf. Arabic *šabaka,* "be interwoven"). Words translated "net" in the NT are: αμφίβληστρον (Matt. 4:18), from ἀμφιβάλλω, "throw (or put) around"; δίκτυον, from δικεῖν, second aorist "throw, cast"; and σαγήνη (Matt. 13·47).

2. Cord nets. ***a. Antiquity, general use, and materials.*** Cord and rope making is one of the oldest human skills, and nets made from such cordage have been traced back to the Mesolithic period. The graphic and literary sources from both Egypt and Western Asia, as well as the biblical references, make it clear that all the commoner uses of the net were well known in the world of the biblical writers. The principal materials used for the cording were flax, hemp, palm fiber, and papyrus.

In the OT the precise difference between a net and a snare is not always clear, for some snares must in fact have been concealed nets.

b. Fishing. While the biblical data do not permit definitive conclusions, it seems probable that fishing nets were mostly of two kinds. One was a hand casting net, cone-shaped with leads around its wide mouth to pull it below the surface of the water (Matt. 4:18-21; Mark 1:16-19; etc.). The second was a seine or large draw net, its head supported by floats and its foot fitted with sinkers; it was often hauled ashore in a wide semicircle (Isa. 19:8; Ezek. 26:5, 14; 47:10; cf. 32:3 ["dragnet"]; Matt. 13:47). *See ANEP* 112-13. *See also* FISHING.

c. Fowling. Fowling nets are referred to in Prov. 1:17; Hos. 7:11-12, but we can only conjecture how they were operated. In the art of ancient Egypt a large clapnet for securing waterfowl in a pond or marsh is occasionally pictured. It was pulled shut by five men. *See* FOWLER. Fig. FOW 22.

d. Wild animals. Either a fleeing animal would be overtaken and a net thrown over it, or animals would be driven into an ambush in which nets were concealed (Isa. 51:20; Ezek. 19:8). *See* HUNTING.

3. Metal netting. According to Exod. 27:4-5; 38:4, a grille ("net" or "network") of bronze went around the altar of the temple. In Exod. 35:16; 38:5, 30; 39:39, this is called a "grating," מכבר, of bronze.

The OT informs us (I Kings 7:17-20, etc.; cf. Jos. Antiq. VIII.iii.4) that the two pillars, Jachin and Boaz, which stood at the entrance to the temple, had some bronze "network" as part of the decoration of their capitals. *See* JACHIN AND BOAZ.

4. Figurative use of "net." In the OT, but nowhere in the NT, the net serves frequently as a figure of speech. It is used to designate the Lord's chastisement of Israel (Ps. 66:11; Lam. 1:13; Hos. 7:12), of Zedekiah (Ezek. 12:13), of Job (Job 19:6), and of Egypt (Ezek. 32:3). It represents the plots or snares of Israel's leaders (Hos. 5:1) and of the enemies of the psalmists (Pss. 9:15—H 9:16; 31:4—H 31:5; 35:7-8; 57:6—H 57:7; 140:5—H 140:6; 141:10), man's exploitation of man (Ps. 10:9; Mic. 7:2; Hab. 1:15-17), and something akin to fate (Job 18:8; Ps. 25:15; Eccl. 9:12) or to an evil end (Job 18:8; "pitfall"). In Prov. 29:5 it typifies the wiles of the flatterer, and in Eccl. 7:26 the seductiveness of a woman. The meaning of Hab. 1:16 ("He sacrifices to his net") is obscure, as also of Prov. 12:12 KJV ("the net of evil men"). Fig. NET 15 represents enemies contained in a net. W. S. MCCULLOUGH

NETAIM nĭ tā′əm [נטעים, plantings] (I Chr. 4:23). A place in Judah where some royal potters lived. The site is unknown.

NETHANEL nĭ thăn′əl [נתנאל, God gives; Apoc. Ναθαναήλ, Ναθανάηλος]; KJV NETHANEEL —ĭ əl; KJV Apoc. NATHANAEL nə thăn′ĭ əl. **1.** A leading chief of Issachar; son of Zuar (Num. 1:8); commander of 54,400 men (2:5; 10:15). He took part in the dedication of the altar of the tabernacle (7:18-23).

2. The fourth son of Jesse, and a brother of David (I Chr. 2:14).

3. A priest who was to blow the trumpets before the ark (I Chr. 15:24).

4. One of the princes of Judah sent out by King Jehoshaphat to instruct all the cities of Judah in the "book of the law of the LORD" (II Chr. 17:7-9).

5. A Levite; the father of Shemaiah (I Chr. 24:6).

6. A Levite; son of Obed-edom, a gatekeeper in the temple (I Chr. 26:4).

7. A Levite; brother of Conaniah, and one of those chief Levites who contributed to the Passover offering in the time of Josiah (II Chr. 35:9; I Esd. 1:9).

8. Son of Pashhur; one of the priests who had married a foreign wife while in exile (Ezra 10:22; I Esd. 9:22). He is perhaps identical with 10 *below.*

9. Head of the priestly house of Jedaiah in the days of the high priest Joiakim (Neh. 12:21).

10. A priest who took part in the dedication of the rebuilt wall of Jerusalem (Neh. 12:36). He is perhaps identical with 8 *above.* E. R. ACHTEMEIER

NETHANIAH nĕth′ə nī′ə [נתניה, נתניהו, Y gives]; KJV Apoc. NATHANIAS năth′ə nī′əs. **1.** The father of Jehudi (Jer. 36:14).

2. The father of Ishmael, murderer of Gedaliah (II Kings 25:23, 25; Jer. 40:8, 14-15; 41).

3. A Levite sent by King Jehoshaphat to teach the law of the Lord throughout Judah (II Chr. 17:8).

4. A Levite, and one of the sons of Asaph whom David set apart to prophesy with lyres and harps and cymbals (I Chr. 25:2, 12). E. R. ACHTEMEIER

5. A layman who divorced his foreign wife and children in Ezra's reform (I Esd. 9:34; equivalent to NATHAN [6] in Ezra 10:39).

NETHER WORLD. *See* DEAD, ABODE OF, § 3*d.*

NETHINIM nĕth'ə nĭm [נתינים, those given (*i.e., to the service of the sanctuary*), *from* נתן; *Kethibh* הנתונים *in* Ezra 8:17; LXX οἱ δεδομένοι; Josephus ἱερόδουλοι, sacred slaves]. The lists in Ezra-Nehemiah portray five clerical orders among the returned exiles: priests, Levites, singers, porters, and Nethinim (RSV "temple servants"; KJV "Nethinims")—i.e., persons appointed for the lowest menial tasks of the temple (cf. Ezra 2:36, 40-43; Neh. 10:28).

Very little is known of temple slaves in the pre-exilic period. Moses is said to have taken one of every fifty captive Midianites and beasts and given them to the Levites (Num. 31:30, 47). Josh. 9:27 relates how Joshua punished the wily Gibeonites for their ruse by making them hewers of wood and water carriers for the congregation and for Yahweh's altar. Ezra 8:20 mentions the temple servants or slaves whom David and his princes had given to the Levites. Ezra 2:58 likewise mentions Solomon's servants. It is the descendants of these earlier temple slaves who now appear in the lists of the returned exiles (Ezra 2:43-54; Neh. 7:46-56). 392 Nethinim and the descendants of Solomon's servants accompanied Zerubbabel to Jerusalem in 538 B.C. Later, either in 458 (Artaxerxes I) or in 398 (Artaxerxes II), Ezra came to Jerusalem, and 220 Nethinim were sent with him to swell his company. These and 38 Levites came from a Jewish colony at Casiphia (Ezra 8:16-20).

It is noteworthy that the lists show:

a) The Nethinim were organized under family heads. The Ezra list gives thirty-five families and ten families of Solomon's servants. The Nehemiah list gives thirty-two families; and in 11:21 it is stated that two chiefs, Ziha and Gishpa, were in charge of the whole company (cf. Ezra 2:43). These are all mentioned by name (Ezra 2:43 ff; for the phrase, cf. I Chr. 12:31; 16:41; etc.), and this suggests lists or even family registers.

b) The Nethinim were largely of foreign extraction. Thus the pre-exilic evidence above quoted, the evidence also concerning Solomon's servants, and the foreign names in the present lists tend to confirm the traditional view that the Nethinim were descended from prisoners of war—i.e., alien peoples. Hence arose the denunciation of Ezekiel (44:6-7) that Israel had delegated the care of the temple to uncircumcised foreigners.

c) Solomon's servants are mentioned next after the Nethinim. Their functions then were similar, even if they belonged to a slightly lower order. In Ezra 2:55 (=Neh. 7:57) the children of Solomon's servants (i.e., slaves) are distinguished from the Nethinim, and are separately classified in their families; but generally they are included as Nethinim.

1. Status. The Nethinim, though unmentioned in the Pentateuch, were the lowest class of temple servants and were "given" for service to the priests. Though they are carefully distinguished from Levites (e.g., lists above and I Chr. 9:2), they nevertheless were considered to belong to the congregation (Neh. 10:28). Like the other listed classes, they clung to the congregation and participated in the covenant and its accompanying curse to observe God's law in respect of mixed marriages, sabbathkeeping, etc. Likewise Ezra 7:24 shows that they shared in the privileges of the priests and Levites in tax exemption.

Later Jewish traditions in the Talmud (cf. Yeb. 2.4; Kid. 4.1) mention Nethinim with contempt and forbid the marriage of Jews and Nethinim. This latter prohibition is, of course, one of the articles of the covenant actually embraced by the Nethinim (Neh. 10:29 ff), so the Talmud tradition probably represents that view of the origin of the Nethinim which connected them with Gibeonites and other Canaanite captives. So far from the Talmud tradition's being true for the Persian period, it is likely that the lot and status of the Nethinim showed a progressive improvement. This would be inevitable if the Nethinim maintained their vows not to marry non-Jews. Thus Levites are described as Nethinim for Aaron, and this usage reveals a growing respectability for the term (cf. Num. 3:9; 18:6 [P]; I Chr. 6:48; I Esd. 1:3).

2. Residence. From Neh. 3:26 it seems clear that a good proportion, at least, of the Nethinim dwelt in *Ophel*—i.e., in their own quarter on the S extension of the temple hill. They were near the water gate, which led to the virgin's spring, and this location may well be significant for their duties. For from here they had easy access both to water and to the temple. Neh. 3:31 ascribes a residence to the Nethinim on the wall probably NE of the precincts of the temple, possibly a residence for more important Nethinim. Ezra 2:70 (=Neh. 7:73) indicates that Nethinim lived in other cities as well, and these were probably Levitical cities.

G. HENTON DAVIES

NETOPHAH nĭ tō'fə [נטפה, dropping; Νετέβας]; NETOPHATHITES —thīts. A town in the hill country of Judah, closely associated with Bethlehem (I Chr. 2:54; Ezra 2:21-22; Neh. 7:26). Two of David's Mighty Men, Maharai and Heleb, were natives of the site (II Sam. 23:28-29; I Chr. 11:30) and were commanders for the tenth and twelfth of the king's twelve monthly military divisions (I Chr. 27:13, 15).

A certain Netophathite, Seraiah the son of Tanhumeth, was among the captains of the scattered Judean forces which loyally gathered about Gedaliah, the puppet governor of Judea, subsequent to the fall of Jerusalem to the Babylonians in 587 B.C. (II Kings 25:23; Jer. 40:8-9).

Fifty-six men who counted Netophah their ancestral home were among those who returned with Zerubbabel from the Babylonian captivity (Ezra 2:22; Neh. 7:26; cf. I Esd. 5:18). Levites, also, who were returnees from the Captivity took up residence in the "villages of the Netophathites" (I Chr. 9:16), including certain "sons of the singers" among them who assembled in Jerusalem on the occasion of the dedication of the wall of the city (Neh. 12:27-28).

The ancient town of Netophah is probably represented by the ruin presently called Khirbet Bedd Faluh. The site occupies the spur of a ridge formed by the conjunction of two valleys *ca.* 3½ miles SE of Bethlehem and in the vicinity of Herodium. In the same general area is the spring called 'Ain en-Natuf, which preserves the ancient name of the district of Netophah with but slight change.

W. H. MORTON

NETTLE [חרול, *ḥārûl;* קמוש, *qimmôś*]. An annual wild plant of the genus *Urtica,* noted for its stinging toxic effect when touched. At least four species are common in Bible lands, particularly *Urtica pilulifera* L.

Many scholars conclude that the meaning of חרול is generic, referring to scrub brush that grows up over neglected fields (cf. Amer. Trans. use of "scrub" and "weeds"). The word is used in a description of men reduced to the lowest state of poverty (Job 30: 7), the weeds which occupy the field of a lazy man (Prov. 24:31), a land "possessed by nettles and salt pits" (Zeph. 2:9). Many different weeds might fit these contexts. Royle's theory that חרול refers to the wild mustard, *Brassica nigra* (L.) Koch (or *Sinapis arvensis* L.), is worthy of consideration. The Mishnaic Hebrew חרדל and Arabic *khardal* for "mustard" might have derived from the OT word.

The second word above (קמוש) is more generally agreed to be the word for "nettle." It appears in Prov. 24:31 (RSV "thorns") parallel to חרול, which argues against translating both words "nettle." Describing a lazy man's field, the passage might refer to nettles and wild mustard, two weeds which are commonly seen even today in neglected fields. Nettles growing over deserted ruins dramatize the destruction and desolation (Isa. 34:13; Hos. 9:6).

J. C. TREVER

NETWORK. 1. רשת (Exod. 27:4-5; 38:4). A bronze grating on the altar of burnt offering before the tabernacle. *See* GRATE.

2. שבכה (I Kings 7:18, 20, 41-42; II Kings 25:17; II Chr. 4:12-13; Jer. 52:22-23; KJV NET). Bronze latticed work on the capitals of the two pillars, JACHIN AND BOAZ, in Solomon's temple. I Kings 7: 17-18 describes the network as covering the capitals themselves (cf. II Kings 25:17). I Kings 7:41-42 describes the network as covering the bowls (גלת) of the capitals (cf. II Chr. 4:12-13). A "rounded projection" (בטן; KJV "belly") also figures in I Kings 7:20, being close beside the network. This may be the bowl of I Kings 7:41-42. The network may have been a grill of bronze covering the sides of huge lamp bowls on the pillars and serving as material upon which the pomegranates which adorned them were fastened. I Kings 7:20 indicates that the network had two hundred bronze pomegranates in two rows around it, though Jer. 52:23 knows of only one hundred pomegranates, four being placed at the cardinal points and the other ninety-six filling the remaining space in a row (and cf. II Chr. 3:16). The precise relationship of the network, the bowl, and the CAPITAL remains uncertain.

E. M. GOOD

NEW. The translation of חדש; καινός; νέος.

The common word for "new" in the NT is καινός, but occasionally νέος is used. It has generally been held that καινός means "new" in reference to character, whereas νέος means "new" in reference to time ("young, recent"). This distinction is sometimes apparent, but it cannot be pressed in every case. It is not supported by the evidence of the papyri, and in the NT it is difficult to see any distinction, e.g., between the "new man" or "new nature" in Eph. 2:15; 4:24 (καινός) and in Col. 3:10 (νέος). The NT also uses πρόσφατος ("newly manifested") of the "new" way to God opened up by Christ (Heb. 10:20; in the LXX this word appears, e.g., in Eccl. 1:9: "nothing new under the sun"); and ἄγναφος ("unlaundered, unshrunk") of "new" cloth (Mark 2:21 = Matt. 9:16 KJV).

The most significant OT occurrences of the concept of "newness" are connected (*a*) with the beginning of the month, year, etc. (*see* CALENDAR; FEASTS AND FASTS; NEW MOON; NEW YEAR); and (*b*) by analogy with these, with the new age to come, the day of the Lord, when he will perform a "new thing" (Isa. 43:19; cf. Jer. 31:22), make "a new covenant" with his people (Jer. 31:31 ff; cf. Ezek. 34:25; 37:26), implant a new heart and a new spirit within them (Ezek. 11:19; 18:31; 36:26), call them by a new name (Isa. 62:2), and create new heavens and a new earth (Isa. 65:17; cf. 66:22). This consummation is fittingly celebrated by a new song (Ps. 96:1; 98:1; cf. Isa. 42: 10, where the return from exile heralds the new age).

In the NT these ideas are taken up and applied to the kingdom of God introduced by Christ. His hearers recognized in his ministry a "new teaching" (Mark 1:27); he himself compared his ministry to "new wine," which requires "fresh skins" (Mark 2: 22). The new age which dawns with his ministry is the "regeneration" (Matt. 19:28 KJV; RSV "the new world"); those who are "created in Christ Jesus" (Eph. 2:10) constitute a "new creation" (II Cor. 5:17; cf. Gal. 6:15); for them "the old has passed away, behold, the new has come" (II Cor. 5:17). By the new birth which they receive through faith-union with Christ, they inherit the promise of a new heart and spirit foretold by Ezekiel; with them Jeremiah's "new covenant" is ratified (Heb. 8:8 ff)—a covenant sealed by their Lord's self-sacrifice (I Cor. 11:25)—and the "newness of life" (Rom. 6:4) which they henceforth enjoy is expressed sacramentally by baptism. In them the "new nature" or "new man" is formed, whether we think of their personal life (Eph. 4:24; Col. 3:10) or their communal life in Christ (Eph. 2:15). This new man is, by implication, Christ himself (cf. Gal. 4:19, and the references to the "second Adam"); Ignatius speaks explicitly of the "new man Jesus Christ" (Ign. Eph. 20:1). From Christ his people receive a "new name" (Rev. 2:17; 3:12), which is his own name (Rev. 22:4); and a "new commandment" (John 13:34), which is the old commandment of love (I John 2:7 ff), filled with a deeper and fresher meaning by its re-enactment and fulfilment by Jesus.

No wonder, then, that they celebrate his redemptive act by singing a new song, even as the people of Israel sang a new song to the Lord to celebrate the wonders of his delivering power and to hail his coming to judge the world in righteousness. The "new song" which saints and angels sing in heaven is the song sung by the church militant here on earth:

> Worthy art thou . . . ,
> for thou wast slain and by thy blood didst ransom
> men for God
> . . . . . .
> and hast made them a kingdom and priests to our God,
> and they shall reign on earth (Rev. 5:9-10; cf. 14:3).

Here and now the people of Christ have as their spiritual mother the "Jerusalem above" (Gal. 4:26); but the day will come when that heavenly city, "new Jerusalem" (Rev. 21:2), will come down to earth. An OT prophet had drawn the blueprint of a new Jerusalem for the new commonwealth which would take shape with Israel's return from exile (Ezek. 40:1 ff), and others had elaborated the details of his vision, as we now know from fragmentary documents found at Qumran; but in Rev. 21:2 ff this vision is taken up afresh and used to portray the day when "the dwelling of God is with men," when "the former things have passed away" and the declaration is made from the throne of God: "Behold, I make all things new" (an apocalyptic version of what is expressed as an inward experience in II Cor. 5:17). Thus a new meaning, in terms of NT fulfilment, is given to the words in which the prophet announced an earlier redemption:

> Behold, the former things have come to pass,
> and new things I now declare (Isa. 42:9);

and his picture of new heavens and a new earth (65:17) is realized in a completely new order, "in which righteousness dwells" (II Pet. 3:13; cf. Rev. 21:1). *See also* NEW EARTH; NEW JERUSALEM; REGENERATION.

Bibliography. R. A. Harrisville, "The Concept of Newness in the NT," *JBL*, LXXIV (1955), 69-79. F. F. BRUCE

NEW BIRTH. A concept which may be seen in a number of biblical expressions. "Born anew" occurs in I Pet. 1:3, 23, for ἀναγεννᾶν and in John 3:3, 7, for γεννᾶν ἄνωθεν to designate REGENERATION. In I Pet. 2:2 "newborn" translates ἀρτιγέννητος (lit., "recently born"). A term for "newness" (*see* NEW) is not actually present in these expressions for "rebirth." Yet "newness" of life, as an OT concept (Ps. 51:10; Ezek. 11:19; 18:31; 36:26) and an idea inherent in the NT eschatological outlook, does occur in some NT designations for regeneration:

a) "Renewal": ἀνακαίνωσις (Rom. 12:2; Tit. 3:5).

b) "Renew": ἀνακαινίζειν (Heb. 6:6; "restore" in vs. 4); ἀνανεοῦσθαι (Eph. 4:23); and, as a continuing process, ἀνακαινοῦσθαι (II Cor. 4:16; Col. 3:10).

c) "New creation" (KJV "new creature"): καινὴ κτίσις (II Cor. 5:17; Gal. 6:15).

d) "New nature" (KJV "new man"): νέος (ἄνθρωπος) (Col. 3:10); καινὸς ἄνθρωπος (Eph. 2:15 ["new man"]; 4:24). *See also* NEW MAN.

e) "Newness": καινότης (of life in Rom. 6:4; of spirit in 7:6).

Bibliography. A. von Harnack, "Die Terminologie der Wiedergeburt und verwandter Erlebnisse in der ältesten Kirche," *Texte und Untersuchungen*, vol. XLII, no. 3 (1918), especially pp. 101-3. J. M. ROBINSON

NEW EARTH, NEW HEAVEN [οὐρανὸν καινὸν καὶ γῆν καινήν]. The phrase used to impart the idea of a new creation, a part of John's theodicy in Rev. 21:1. This concept is a derivative from Isa. 65:17; 66:22 (cf. also I Enoch 45:4-5; II Esd. 7:75; II Bar. 32:6; II Pet. 3:13). Like Paul, the apocalyptist saw the former creation judged unworthy because of the "futility" which it shared with man in his sin (Rom. 8:19 ff; Rev. 20:11; cf. Gen. 3:17 ff; Eccl. 1:2).

Stauffer, *NT Theology* (trans. from 5th German ed. by John Marsh; 1955), ch. 58: "The New Created Order," pp. 225-28; cf. J. W. Bowman, *The Drama of the Book of Revelation* (1955), pp. 146-47. J. W. BOWMAN

NEW GATE (Jer. 26:10). A gate of the TEMPLE of Jerusalem. The Hebrew text, probably corrupted, reads שער יהוה החדש. A likely emendation would be שער בית יהוה החדש, "New Gate of the house of the LORD" (so RSV). The exact location is unknown. G. A. BARROIS

NEW JERUSALEM [τῆς καινῆς Ἱερουσαλήμ (Rev. 3:12); τὴν πόλιν τὴν ἁγίαν Ἱερουσαλὴμ καινήν (21:2; cf. vs. 10)]. The capital city of God's new creation (21:1). The conception is found in the OT and in later Jewish literature (cf. Isa. 54; 60; Ezek. 40; 48; II Esd. 10:27; II Bar. 4:3; Test. Dan 5:12), as also in the NT (Gal. 4:26-27; Phil. 3:20; Heb. 12:22). The description of this city in Rev. 21:2 as one like a "bride adorned for her husband" makes certain its identification with the church, the true people of God (cf. Isa. 61:10; Hos. 1–3; Eph. 5:25 ff; Heb. 11:10).

Bibliography. See the Commentaries listed in the bibliography under REVELATION, BOOK OF. J. W. BOWMAN

NEW MAN [νέος (ἄνθρωπος) Col. 3:10 KJV; RSV NEW NATURE); καινὸς ἄνθρωπος (Eph. 2:15; 4:24 KJV; RSV NEW NATURE)]. The exalted, cosmic Christ, the church his body, and thus man's true self. The christological title "the new man Jesus Christ" (Ign. Eph. 20:1) developed beyond the titles SON OF MAN, the "last Adam" (I Cor. 15:45), the "second man" (I Cor. 15:47; *see* SECOND ADAM), and the "perfect man" (Eph. 4:13 KJV; Ign. Smyr. 4:2), on the basis of the common concept of a "primal man": The cosmic reconciliation effected by Christ at his exaltation (Eph. 2:14; 4:8 ff; *see* ASCENSION) created "one new man" (2:15) or "one body" (vs. 16), which the church is equipped by the "one Spirit" (vs. 18; 4:3 ff) to realize ("build up"; Eph. 4:12 ff). Since the Christian imperative is thus rooted in the kerygmatic indicative, ethical exhortation takes the pattern: "Put on the new nature" (Eph. 4:24; Col. 3:10; cf. Epistle to Diognetus 2.1), just as, on a simpler christological level, one "put on Christ" (Rom. 13:14; Gal. 3:27). In this "new nature" man reaches his true destiny of the image of God (Eph. 4:24; Col. 3:10; cf. Rom. 8:29), so that the term is not only christological, but, like the term "Christ" itself (Rom. 8:10; Gal. 2:20; Phil. 1:21; Col. 3:3-4), also designates man's true self (cf. the "inner man" [II Cor. 4:16; Eph. 3:16-17]; and *see* REGENERATION), and points to the goal of Col. 1:28: "every man mature in Christ."

Bibliography. A. von Harnack, "Die Terminologie der Wiedergeburt und verwandter Erlebnisse in der ältesten Kirche," *TU*, vol. XLII, no. 3 (1918), especially pp. 135-38; H. Schlier, "Der himmlische Anthropos," *Christus und die Kirche im Epheserbrief* (1930), pp. 27-37. J. M. ROBINSON

NEW MOON [חדש(ה), (the) new one, month (*see* CALENDAR); ראש חדש, beginning (first) of the month (cf. Num. 10:10; 28:11); LXX νεομηνία *or* νουμηνία (Jth. 8:6)]. The festal religious observance of the first

day of the month as indicated by the appearance of the new moon.

Israel's communal and religious life has centrally been based on a lunar calendar. In its notation on Exod. 12:2 the Mekilta states that "the nations" reckon by the sun, but Israel by the moon. The feasts of PASSOVER and BOOTHS were not set simply by the general lunar calculation, but on the basis of the appearance of the new moon of the month in which they occurred, PENTECOST depending on Passover in this respect. Easter and the Christian Pentecost still reflect this pattern. The earliest and only significant exception to this order of the religious year in Israel was the sabbath, which was separate from the lunar cycles and occurred every seventh day. Though it is impossible to document this fully, it seems probable that the sabbath was originally also part of this natural cycle of time, related to the phases of the moon, and that, following its separation, the Feast of the New Moon continued as a separate observance.

The observance of the New Moon was similar to sabbath observance in many ways. There was rest from work (Amos 8:5); the day was characterized by rejoicing (Hos. 2:11), and fasting and mourning were suspended (Jth. 8:6). In the worship of the temple special sacrifices were prescribed. These were even somewhat greater than those for the sabbath (cf. Num. 28:9-15), and the ceremonies were proclaimed with trumpets (Num. 10:10; Ps. 81:3). Formal festal eating seems to have formed part of the observance. It seems that the New Moon of especially significant months was particularly sacred (cf. I Sam. 20:6; Aq. Sym. on Ps. 81:3—H 81:4); the New Moon of the seventh month was especially important (Lev. 23:24; Neh. 8:2), probably because it once may have marked the beginning of the year. The New Moon seems to have been the appropriate time to consult a prophet (II Kings 4:23), and Ezekiel often records his visions as granted on the first day (26:1; 29:17; 31:1; 32:1; cf. Isa. 47:13; Hag. 1:1, of Babylonian seers).

In postexilic Judaism the importance of the New Moon feast apparently increased. Ezra read the law to the people at a New Moon (Neh. 8:2). In Isa. 66: 22-23 the New Moon is coupled with sabbath in an eschatological pronouncement about the worship of "all flesh" in Jerusalem, and it is a significant fact that all historic Jewish rites for the announcement of the New Moon, made on the preceding sabbath, contain a prayer of eschatological content. The rationale for the observance was God's creation of the moon as a "sign" of the unbreakable covenant with Israel, the "times" of whose cultus it decreed (Ps. 104:19; Ecclus. 43:6-8). This eschatological meaning in the context of the covenant was linked with an emphasis upon God as Creator of time, illustrated in the formula of Blessing of the New Moon: "Praised art thou, LORD, that renewest the months" (Ber. 13*d*). Though the observance of New Moon was not continued in the Christian church, this was not for a want of awareness of the comprehensive significance attached to it in Judaism (Col. 2:16-17; cf. 1:16-17).

Before the dates of the New Moon were set by a fixed calendar, they were determined each month by actual observation. Following the destruction of the temple, it was a function of the supreme rabbinic council thus to designate the date. The special Torah reading for the day is Num. 28:1-15. Ps. 104 is also read, and the festal character of the observance is indicated by the chanting of the HALLEL. Since the sixteenth century the day preceding a New Moon has been a fast day, often called a little yom kippur.

***NEW YEAR** [ראש השנה, *lit.* Head of the Year]. Naturally each of the several calendars employed by Israel during the biblical period of its history (*see* CALENDAR) had its own specific New Year's Day. The earliest, the pentecontad calendar (*see* SABBATH), was distinctly agricultural in character, directly associated with the successive stages of the annual crop. Its New Year's Day was, quite appropriately, the day of cutting the first sheaf of the new crop. This followed immediately upon and climaxed the seven-day *Maṣṣôth* Festival (*see* PASSOVER AND FEAST OF UNLEAVENED BREAD). During this festival, observed during the closing week of the old year, all that remained of the crop of that year, the embodiment of the god of vegetation for that year, had to be eaten, and what could not be eaten had to be destroyed completely, usually by burning. Under no condition might any of the old crop remain when the cutting of the new crop was begun. The god of vegetation of the old year must be dead and vanished before his successor, the god of the new year, could appear. Probably the cutting of the first sheaf of the new crop symbolized the birth, from the womb of Mother Earth, of the god of vegetation of the new year.

Of the ceremonial observance of this New Year's Day of the pentecontad calendar we know relatively little. This calendar itself, with all its various institutions and sacred days, was employed originally by the Canaanites and was borrowed from them by the Israelite newcomers in the land.

There is abundant evidence that the rebellion of Absalom (*see* ABSALOM 1) and his attempt to wrest the crown from DAVID were timed for the *Maṣṣôth* Festival and the ensuing New Year's Day, and this with good reason. On the first day of the festival the

king of Jerusalem, in this instance David, led a solemn procession forth from the city, across the Kidron Brook, and up the Mount of Olives to the sanctuary at its summit (II Sam. 15:32). According to some scholars, the king was mourning in part (cf. vs. 30) for the dead god of vegetation. But in far larger measure the king was himself enacting the role of the god of the annual crop. In the folklore of Jerusalem the Mount of Olives was thought to cover the exit from, and therefore to be in the realm of the king of, the nether world. This was accordingly the deity who was worshiped on the summit of the Mount. There, nominally in the custody of the god of the nether world, the king, still playing the role of the dead vegetation god of the old year, would normally abide during the seven days of the *Maṣṣôth* Festival. Then upon the eighth day, the New Year's Day, just at sunrise, the very moment of the inauguration of the new year, the Mount of Olives was thought to split asunder, thus laying bare the exit from the nether world, and through this opening the god of vegetation, resurrected or born anew, would ascend into this world of life above and, still embodied in the person of the king, would return in solemn procession from the realm of death, back across the Kidron Brook to Jerusalem, the god to his sanctuary and the king to his palace. There, still early upon this New Year's Day morning, the שופר (*šôphār*), "ram's horn," would be blown. At its sound the king would solemnly ascend or reascend the throne (II Sam. 15:10; I Kings 1:34-35, 39; II Kings 9:13); and thus the new year would be formally inaugurated.

These two ceremonies, the blowing of the ram's horn and the formal ascension or reascension of the throne by the king, coupled with the promptly ensuing exodus of the people to their fields, there to cut ceremonially the first sheaf of the new crop, were the distinctive ritual acts of the New Year's Day of the pentecontad calendar. Also this New Year's Day was one of the three festal occasions in the year when the maidens of each community would go out to dance in the vineyards, there to be seized and taken as wives by the men of the community, waiting in hiding for this purpose (Gen. 34:1 ff; Exod. 15:20-21; Judg. 21:19-23; Jos. Antiq. V.ii.12; M. Ta'an. IV.8).

In response to evolving political, economic, and social conditions in Israel and the consequent need for a new calendar, one of wider range and more universal character, Solomon finally adopted the solar calendar of his Tyrian neighbors and allies as the official calendar for Israel (*see* YEAR). The year of this calendar was, of course, specifically solar. Solomon set its New Year's Day upon the day of the autumnal equinox, in the month of Etanim, the first month of the year of his calendar (cf. Targ. to I Kings 8:2), although the seventh month according to later reckoning. The exact incidence of this equinoctial day could be determined quite accurately, for on this day the first rays of the sun, rising over the Mount of Olives, shone on a straight line through the outer, E gate of the temple, tightly sealed throughout the remainder of the year, but opened on this one day for just this particular ceremony, then onward across the E temple court and over the great altar therein, then across the porch and through the doors of the temple, between the two brazen pillars which stood there on each side of the doorway, and on down the long axis of the temple into the *dᵉbhîr*, the sacred recess, at its W end. This meaningful ceremony, in all its significant details, inaugurated the new year. Deviation of the first rays of the sun from this line to the extent that they no longer passed between the two brazen pillars and into the temple proper would indicate that a day must be added to the year, thus making it a leap year. The coming of the first rays of the rising, equinoctial sun, the *kᵉbhôdh Yahweh*, the "radiance of Yahweh," as they were called, into the temple upon this day symbolized the entrance into his sanctuary of Yahweh, conceived of as the resurrected sun-god, entering upon his annual course through the heavens.

There in the temple, in fiery, radiant form, surrounded by his heavenly host, Yahweh held court and passed judgment and determined fates for nations and for men for the new year just commencing (I Kings 22:19-23; Job. 1:6-12; 2:1-7; Ps. 82; Isa. 6; Zech. 3:1-7). Moreover, there is considerable evidence that at the very commencement of the seven-day Festival of Ingathering (*see* BOOTHS, FEAST OF), which Solomon had appropriated from the earlier, pentecontad calendar, but the time of celebration of which he had shifted so that it would mark the final seven days of the solar year, and so immediately precede the New Year's Day, the sacred fire upon the altar was extinguished. Then seven days later, upon the solar New Year's Day, this sacred fire was rekindled from the rays of the rising, equinoctial sun, as they passed over the altar, or perhaps over the unkindled censer which the king, or eventually the high priest, held aloft at this decisive moment. Furthermore, several authorities maintain (*see bibliography*) that the king of Judah, clothed in radiant garb, enacted the role of the resurrected sun-god, rising from the nether world through the sundered Mount of Olives, which was split apart just at sunrise of this day, and returning in radiant glory to his sanctuary and his people (II Kings 15:5; 16:15; II Chr. 26:16-21; Zech. 14:4-5; cf. Jos. Antiq. IX.x.4; XIV.viii.2).

Closely linked with this vivid and meaningful ceremony upon this solar New Year's Day was the formal ascension or reascension of his throne by the king, and the heralding of this act and also the official inauguration of the new year by the ancient rite of blowing the *šôphār*. For this reason the years of the reigns of the kings of Judah were regularly reckoned from the first New Year's Day after actual succession to the kingship, the day of each king's first ceremonial throne-ascension.

In the course of the seventh century B.C. the Assyrian system of designating the months of this solar calendar by number, commencing with the month of the vernal equinox, rather than by their former Tyrian names, was introduced. Now the New Year's Day fell upon the tenth of the seventh month (Ezek. 40:1; cf. Lev. 16:29; 25:8-10). Upon this day, still as of old, the maidens would go out to dance in the vineyards. Upon this day too the dedication of Solomon's temple reached its culmination (I Kings 8: 10-11, 65), and also, according to one late tradition,

Aaron and his sons were consecrated as priests and the tabernacle-sanctuary was dedicated (Lev. 9:1–10:2). In the postexilic period, so long as the second temple stood (516-485 B.C.), the solar calendar continued in official use. The "anointed priest" (Lev. 4:3, 5, 16; 6:15), as his meaningful title indicates, replaced the king in the ancient, solar ritual of the New Year's Day (Zech. 3:1-7). A number of the Psalms, notably 47 (note vss. 6, 9); 81 (note vss. 4-5); 98 (note vss. 5-9), which are unmistakably the literary products of this period, reflect the persistent New Year's Day ceremonies of the rising, equinoctial sun, the coming of its first rays into the temple, the blowing of the *šôphār,* and with all this the throne-ascension of Yahweh, during this brief period regarded as Israel's true and only king.

In the mixed calendar current in Judah during the Exile (*see* YEAR) and again in the period following immediately upon the destruction of the second temple in 485 B.C., and apparently employed continuously thereafter by various Jewish sects for their own distinctive time-reckoning and religious practice, the New Year's Day seems to have been observed upon I/1 (cf. Exod. 12:2; 40:2 [both passages from P2]; Ezra 6:14-22).

Finally, in the last quarter of the fifth century B.C., after the erection of the third temple by Ezra and the religious and social reforms inaugurated by him and Nehemiah, in the lunar calendar then adopted, recorded in the Priestly Code (*see* YEAR), the New Year's Day was formally transferred from the tenth to the first day of the seventh month (Lev. 23: 24-25; Num. 29:1-6). With this went hand in hand the transfer of the heralding of the new year by the blowing of the *šôphār* and the traditional, but now merely symbolic, reascension of the divine throne by Yahweh in his role as the sole, universal King. Still today in the ritual of Judaism for the New Year's Day the blowing of the *šôphār* is the distinctive ceremony, while the throne-reascension of the Deity in his role as world-ruler is one of its major themes. Despite this transfer of dates, however, VII/10, the ancient New Year's Day, continued to be observed as a day of especial sanctity by the people at large, and this so generally that, probably as a concession to popular demand by the priestly authorities, it was reinstituted as a day of particular sanctity (Lev. 16; 23:27-32; Num. 29:7-11), as the Day of Atonement (*see* ATONEMENT, DAY OF). As such, and, in fact, even as it had been from remotest times, as the supremely sacred day of the religious year it has persisted in Jewish ceremonial practice to the present. A faint reminiscence of the original character of the day may be noted in the ceremony of *Ne'îlāh,* or "Closing [of the Gate—i.e., the E gate of the temple]," and of the blowing of the *šôphār* as the concluding ritual procedures, nominally performed just at sunset, of the day.

NEZIB nē'zĭb [נציב, pillar, garrison] (Josh. 15:43). A village of Judah in the Shephelah district of Libnah-Mareshah; identified with modern Khirbet Beit Nesib, E of Lachish, *ca.* two miles from Khirbet Qila (KEILAH).

NIBHAZ nĭb'hăz [נבחז] (II Kings 17:31). A deity worshiped by Syrian colonists from Iwwa settled by the Assyrians in Samaria after 722 B.C. As in the case of TARTAK, no such Mesopotamian deity is known, and an Elamite origin has been conjectured. This is unlikely, since the worshipers are Syrian. More probably "Nibhaz" is a corruption in the early text, or possibly a wilful Jewish distortion of *miẓbēaḥ* ("altar"), such as is known to have been deified and so the object of worship. An analogy to the deification of the altar is the deification of the house of God (*bēth 'ēl*), attested in the Aramaic papyri from Elephantine.

NICANOR nī kā'nər [Νικάνωρ, conqueror]. **1.** A general of Antiochus Epiphanes; son of Patroclus, according to II Macc. 8:9; a friend of the king, according to I Macc. 3:38. He was certainly an enemy to the Jews. He was one of the three generals who in 166 B.C. were sent by the regent Lysias to put down the revolt of Judas Maccabeus. Nicanor may have been in command of the two other generals, Gorgias and Ptolemy; he occupies the prominent place in the narrative of II Maccabees, but Gorgias does so in that of I Maccabees. In this campaign Judas Maccabeus was gloriously successful, and through his spectacular victory was able to convince the Syrian king, as well as his own people, that he was the man to seek terms which would lead to the cleansing of the temple in Jerusalem and of the Jewish religion in general, and to the restoration of the services.

The course of events seems to have been as follows: Nicanor and the invading forces took up positions at Emmaus, within a few miles of Jerusalem, but received such an onslaught at the hands of Judas that all was confusion, and the Syrian generals fled from Judea into Philistia. The writer of II Maccabees has added the embellishment that Nicanor fled to

Antioch in disguise (II Macc. 8:34-36), and it does appear that for a time the Syrians were powerless against Judas. Nicanor's fortunes revived, however, when after Lysias' death Demetrius made him governor of Judea and sent him there well equipped. Here II Maccabees does not agree with I Maccabees. According to the latter, by a trick which failed Nicanor tried to capture Judas, and the only result was a battle at Capharsalama in which Nicanor sustained great losses but may have inflicted still more on Judas. The Jewish champion did not trust the wily Syrian and kept out of the way when Nicanor sought peace. In the ensuing battle at Adasa and Beth-horon in March, 161 B.C., Nicanor had received reinforcements, but they did not save his army or himself. He himself was slain in the early stages, his body was retrieved from the field, and was badly mutilated and exposed in Jerusalem in 160.

This renowned victory over the Syrians was afterward celebrated annually, on the thirteenth of March (Adar), as "Nicanor's Day." On this triumphant note the author of II Maccabees closes his history.

N. TURNER

2. One of the SEVEN chosen to administer the daily distribution of food in the Jerusalem church (Acts 6:1-6).

NICODEMUS nĭk'ə dē'məs [Νικόδημος, conqueror of the people]. A Jewish leader who appears in the Fourth Gospel as a questioner of Jesus, and later as a secret follower.

The name Nicodemus was common among both Greeks and Jews in the NT period, but appears in the Bible only as the name of a member of the Jewish SANHEDRIN who came at night to talk with Jesus (John 3:1 ff). He was not only a "ruler of the Jews," but a teacher as well (vs. 2). In fact, the presence of the definite article in the Greek text of John's Gospel—"*the* teacher"—points to his pre-eminence as a teacher, and therefore as one who should have known the truth about God and his people. But the course of his conversation with Jesus shows that he did not understand the basic truths about the kingdom of God. Nicodemus was a Pharisee, and as such should have had interest in and knowledge about the coming of the kingdom, but Jesus' answers to his questions are more provocative than explanatory, and make him appear as a symbol of Israel's spiritual blindness. Some commentators have identified Nicodemus with a man of that name (also called Buni) mentioned in the rabbinic writings, who was living at the time of the destruction of Jerusalem in A.D. 70, but it seems unlikely that a man who was a ruler at the time of Jesus would still have been alive and active in 70.

In keeping with John's practice of using words with double meanings, the detail that Nicodemus came "by night" to see Jesus points both to the fact that Nicodemus and other Jewish leaders associated with Jesus only in secret (John 19:38), and to the darkness of understanding out of which Nicodemus asked his questions. In regard to his lack of understanding, John uses Nicodemus here as a symbol of the Jewish nation as a whole, who—according to John's estimate—are blind to the truth of God (John 1:11; 3:19; 9:39-41). Nicodemus, therefore, represents the Jewish inquirer who, though he does not yet believe fully, seeks fuller understanding of the meaning of Jesus.

Nicodemus' cautious sympathy with Jesus is attested in John 7:50-52, where the inclination on the part of Jewish officialdom to condemn Jesus is called into question, on the grounds that they have not heard at first hand what he teaches. The final mention of Nicodemus occurs in 19:39, where it is reported that he joined with JOSEPH OF ARIMATHEA in preparing the body of Jesus for burial. Nicodemus, who must have been a man of considerable wealth, provided a huge amount of spices—myrrh and aloes—to be placed between the folds of the linen cloth in which the body of Jesus was wrapped for burial. Even this act of devotion was carried out in secrecy, "for fear of the Jews" (vs. 38).

NICODEMUS, GOSPEL OF. A title ascribed since the fourteenth century to the Acts of Pilate. *See* PILATE, ACTS OF.

NICOLAITANS nĭk'ə lā'ə tənz [Νικολαΐτης] (Rev. 2:6, 15). Followers of a Nicolaus. Their works and teaching in the churches of EPHESUS and of PERGAMUM are condemned by John. Since the same practice and teaching of immorality and of idolatry appear in the church of Thyatira, the Nicolaitans, though not named, were probably present also in this church (Rev. 2:20-25). Thus three out of the seven churches to whom John wrote were afflicted with this heretical sect. In Ephesus their deeds were hated by the church and by Christ; in Pergamum there were some who held their doctrine; in Thyatira the woman Jezebel, self-styled a prophetess, was tolerated and allowed to teach and to beguile Christ's servants. The name JEZEBEL, from the infamous Phoenician queen of Ahab, is chosen to typify this kind of leadership.

John conveys Christ's messages to the seven churches. The Ephesians are commended (Rev. 2:6). At Pergamum censure is due; unless the church there repents, it will face the coming of Christ, who with the sword of his mouth (2:16; cf. 1:16; 19:15) will war against the Nicolaitans. The Thyatirans, who refused the teaching of Jezebel, receive no other burden (cf. Acts 15:28), but must hold fast to what they have until Christ comes. Jezebel, who refused repentance, will be thrown into sickness; her followers will suffer great tribulation, while her children will be struck dead (Rev. 2:20-25).

Nothing is confidently known about the Nicolaitans beyond John's references to them. Their works are hated, but not described, in the letter to Ephesus. In Pergamum their teaching is held in like manner to those who held the teaching of BALAAM (Num. 25:1-2; 31:16; II Pet. 2:15; Jude 11). In early OT days Balaam had taught Balak, the Moabite king, to cause the Israelites to fall into fornication and idolatry. These same sins were taught and practiced

by the Nicolaitans. Food sacrificed to idols (cf. I Cor. 8) referred not only to actual offerings but also to the remainder left on hand for home or market place, after the pagan gods had received their share. To eat this food might influence a Christian to return to idolatry. Pagan feasts thus might foster immorality, which is understood literally as licentiousness, or possibly in an allegorical way as unfaithfulness to God. Since the eighteenth century there has been some support for the attempt to identify Balaamites and Nicolaitans by a rough etymology (Νικᾶ-λαόν= בלע עם), but this claim is questioned or rejected by many. At THYATIRA followers of Jezebel claim to know the deep things of Satan. Perhaps John quotes an actual claim or contrasts sarcastically the knowledge of Satan with the true depths of knowledge of God (cf. I Cor. 2:10). This claim to special knowledge of deep mysteries marks the incipient GNOSTICISM which flourished a century later (Iren. Her. II.2.2). The Nicolaitans may be taken to be a heretical sect, who retained pagan practices like idolatry and immorality contrary to the thought and the conduct required in Christian churches. The Christian could not avoid in daily life his contacts with heathen culture. But a deep cleft separated church and world, and at Thyatira the prophetess who taught indulgence was not to be tolerated.

Irenaeus asserts (Her. I.26.3; III.11.1) that the Nicolaitans were heretical followers of NICOLAUS, the proselyte from Antioch, one of the Seven appointed by apostles in Jerusalem (Acts 6:5). This assumes that Nicolaus fell from the faith. Hippolytus supports Irenaeus and adds that Nicolaus departed from correct doctrine (*Philosophoumena* VII.36). There is much dispute whether this is fact or inference. Tertullian reports the lust and the luxury of the Nicolaitans, cites evidence from Revelation, and adds that there was another sort of Nicolaitans, a satanic sect, called the Gaian heresy (Tert. Marcion I.29; Presc. Her. 33; de Pudic. 19). Clement of Alexandria knows of followers of Nicolaus, "lascivious goats," who perverted his saying that it was necessary to abuse the flesh (*Stromata* II.20; III.24). Some orthodox Christians thus honored rigorous asceticism. Clement undertakes to show that Nicolaus was a true ascetic and that the later, immoral Nicolaitans were not his followers, though they claimed him as their teacher. In the fourth century Eusebius indirectly supports Clement by stating that the Nicolaitans arose for a brief time but soon became extinct (Euseb. Hist. III.29). Later their name flourished as a designation for heretics.

This division of opinion about whether the Nicolaitans of Revelation had any connection with Nicolaus of Antioch, and about whether they continued as a sect, remains to the present time. But the weight of recent scholarship supports the view (*a*) that we know little about Nicolaus, the proselyte, and nothing about his relationship to the Nicolaitans; (*b*) that we know only the information about the Nicolaitans in Revelation, with no certain connection between them and later sects of similar name.

D. M. BECK

NICOLAUS nĭk'ə lā'əs [Νικόλαος, conqueror of the people] (Acts 6:5); KJV NICOLAS nĭk'ə ləs. One of the SEVEN appointed by the church at Jerusalem to preside over the distribution of food and common goods. He is described as "a PROSELYTE of Antioch," which raises the question as to whether or not the others of the Seven—all of whom bear Greek names—were also proselytes. The fact that their names are Greek proves nothing, since Jews in Palestine, as well as in other regions of the Roman Empire, often gave Greek names to their children. Josephus reports that in Antioch there were large numbers of Greeks who attached themselves to the Jewish worship. Apparently it was among proselytes like Nicolaus that Christianity caught hold so rapidly in Antioch. Nicolaus was believed by some of the early church fathers to have apostatized from the true faith and become the founder of a heretical sect called the NICOLAITANS (Rev. 2:6).

H. C. KEE

NICOPOLIS nĭ kŏp'ə lĭs [ἡ Νικόπολις] (Tit. 3:12). Probably the city of this name in Epirus in NW Greece.

The name Nicopolis, meaning "city of victory," was bestowed upon many ancient towns. In order to determine the place probably indicated in Tit. 3:12, it is necessary to find a city of that name which was in the region of Paul's known travels, in existence in his lifetime, and likely to be thought of as a location in which it would be desirable to spend the winter. The Nicopolis built by Pompey in Lesser Armenia (Strabo XII.555) and that founded by Augustus near Alexandria, Egypt (Jos. War IV.xi.5), were too far distant to come into consideration. Nicopolis on the Nestos River on the border between Thrace and Macedonia (Ptolemy III.11) was founded by Trajan and thus, like several other cities of the same name, dated from a time after Paul. The Nicopolis in Bithynia (Pliny Nat. Hist. V.150) would hardly be chosen as a wintering place, nor would the one in NE Cilicia (Strabo XIV.676), to which either Tarsus or Antioch would seem preferable.

The most likely place, therefore, is that which is also otherwise the best known, Nicopolis in Epirus. This city was founded by Octavian to celebrate his decisive victory over Mark Antony in the naval battle of Actium (31 B.C.) and was located on the very site of his own camp, which was on the N side of the entrance to the Sinus Ambracicus or Gulf of Arta. Herod the Great interested himself in the city, and Josephus (Antiq. XVI.v.3) states that he built most of the public buildings there. Later Nicopolis was

famed as the residence of the philosopher Epictetus, who moved there after being expelled from Rome by Domitian in A.D. 89 (Aulus Gellius *Attic Nights* XV.xi.5). While Tacitus (Ann. II.liii) calls Nicopolis an Achaian town, Epictetus (Arrian's *Discourses* of Epictetus III.iv.1) and Ptolemy (*Geography* III.13) refer to it as in Epirus.

In Codex Alexandrinus an added note at the end of the Letter to Titus states that the letter was "written from Nicopolis," but this is presumably nothing more than an inference from 3:12 and an incorrect one at that, for Nicopolis is spoken of "there."

Bibliography. T. Zahn, *Einleitung in das Neue Testament,* I (1897), 434-35; F. Schober, "Nikopolis," *Pauly-Wissowa,* vol. XVII, pt. i (1936), cols. 511-18. J. FINEGAN

NIGER nī′gər [Νίγερ, *from* Lat., black] (Acts 13:1). The surname of Symeon, one of the group of prophets and teachers in the church at ANTIOCH. It has been conjectured that he was the SIMON (8) of Cyrene mentioned in the gospels (Mark 15:21 and parallels).
H. C. KEE

NIGHT [לילה, ליל, Aram. לילי; *inexactly* חשך (Job 26:10 KJV); נשף (Isa. 5:11 KJV; 21:4 KJV; 59:10 KJV); ערב (Gen. 49:27 KJV; Lev. 6:20 KJV; Job 7:4; Ps. 30:5—H 30:6); νύξ]. Alternately: DARKNESS (Job 26:10); EVEN (Gen. 49:27); EVENING (Lev. 6:20; Isa. 5:11); TWILIGHT (Isa. 21:4; 59:10). The dark period from sunset to sunrise.

For the Hebrews the night was contrasted to the day as darkness is to LIGHT; hence the expression "day and night" (יום ולילה; Gen. 8:22; cf. Ps. 1:2, etc.), and the mode of counting time by days and nights (Gen. 7:4, 12; Exod. 24:18; I Kings 19:8; etc.; *see* DAY 1). References to the night occur more than two hundred times in the OT. The beginning of the night was called "evening" (ערב), and its end "dawn" (שחר), while the "twilight" (נשף) was the time of semidarkness following the sunset and preceding the dawn. The Hebrews spoke of "midnight" (Exod. 11:4; 12:29; I Kings 3:20), and divided the night into watches (Ps. 90:4; Lam. 2:19; cf. Ps. 130:6; Isa. 21:11-12), of which there were three in the later Jewish system and four according to the Greco-Roman reckoning.

A particular night might receive a special significance from a notable event of circumstance. Thus there were nights of feasting (Isa. 30:29), of suffering and sorrow (Job 7:3, etc.), of sudden assault (Isa. 15:1), etc. The night is the symbol of blessing in Isa. 16:3, but the symbol of calamity in Mic. 3:6. Particularly for Job, the night is a time of dread and anxiety (cf. 4:12 ff; 24:14; 35:10; 36:20). DREAMS, so important a vehicle of divine revelation in both the OT and the NT, are associated with the night (cf. Dan. 7:2, etc.). There is little evidence in the OT of belief in the night as a time of demonic activity, as in later Judaism (however, *see* LILITH).

The NT employs νύξ in contrast to ἡμέρα ("day") in a manner similar to the OT usage (cf. Mark 5:5, etc.). By Jesus' time the night was divided into hours (*see* HOUR; Luke 12:39, etc.) and into watches. Mark 13:35 names the four night watches: the "evening" (ὀψέ), "midnight" (μεσονύκτιον), "cockcrowing" (ἀλεκτοροφωνίας), and "morning" (πρωΐ).

Night assumes an ominous symbolical importance in John 9:4 (cf. 11:10), where it becomes equivalent to death, the end of opportunity for work. In Rom. 13:12 night is the dark time of evil, which will soon disappear before the daybreak of salvation. The contrast between night and day, as opposite spiritual principles, is made especially sharp in I Thess. 5:5-7. All these passages evince a radical moral antithesis best illuminated by the strikingly similar views of the Qumran sect appearing in some of the Dead Sea Scrolls. According to certain late apocalyptic writings, night is to be done away with as the symbol of evil and sorrow (Zech. 14:7; Rev. 21:25; 22:5; II Enoch 65:9).
S. J. DE VRIES

NIGHT HAG. A common, but incorrect, translation of Hebrew "LILITH" (לילית), the name of a female demon mentioned in Isa. 34:14. The rendering is based on the assumption that the name is connected with *lāyil,* "night." Actually, however, it derives (through Akkadian *lilîtu*) from the Sumerian *lil,* "air," and is a popular contraction of *kiskil-lil-la,* "air(-borne) maiden," a common designation of the *succuba,* a special type of female demon.
See fully DEMON § A4*a*. T. H. GASTER

NIGHTHAWK [תחמס, *perhaps* violent one; LXX γλαῦξ, little owl; Vulg. *noctua,* owl; Targ. (Onq.) ציצא, night hawk] (Lev. 11:16; Deut. 14:15). By "nighthawk" presumably the English translators mean the night jar (genus Caprimulgus of the order Caprimulgiformes), of which *ca.* ninety-five species are known. These rather small birds, whose food consists entirely of insects, fly about in the early evening, making a peculiar clapping noise seemingly with their wings. Tristram observed three species in Palestine in the nineteenth century.

The identity of the unclean bird תחמס is uncertain. It is improbable, however, that it is a night jar. The latter is not raptorial, nor in the biblical period is it likely to have been readily caught or to have been a probable article of food. Tristram, following the LXX and the Vulg., favors identifying the bird in question with the barn owl (*Tyto alba*); both Bodenheimer (*see* FAUNA § B2) and G. R. Driver (*see bibliography*) also prefer one of the owls.

Bibliography. G. R. Driver, *PEQ* (1955), p. 13.
W. S. MCCULLOUGH

NIGHT MONSTER. *See* DEMON §§ A4*a, f.*

NILE nīl [יאור, יאר]. The river which flows in an irregular course nearly 3,500 miles in length from the highland regions of East Central Africa to the Mediterranean. The watershed of the river is estimated to be over 1,000,000 square miles in area and includes a large territory with extremely heavy rainfall. At Khartum, just S of the sixth cataract, two branches known as the White Nile and the Blue Nile unite to form the Nile itself, which is then joined by only one other important tributary, the Atbara or Bahr el-Aswad, on its northerly course. The White Nile may be reckoned as originating at Lake Victoria in Uganda and Tanganyika but is augmented by a vast and complex system of tributaries before its confluence with the Blue Nile; the name of the river

Courtesy of the Arab Information Center, New York

16. The Nile River near Cairo

changes several times, however, as one journeys toward this remote source. The Blue Nile rises in the Gojam Highlands of Abyssinia in the region S of Lake Tsana. Between Khartum and Wadi Halfa to the N the Nile is roughly in the shape of an "s"; it is in this section of the river that the series of rapids known as the cataracts (sixth to second) are located. The first cataract, the most northerly, is at Assuan, ancient SYENE. At the apex of the Delta, just N of modern Cairo, the Nile divides into two main branches, the Rosetta and the Damietta, whereby it flows into the Mediterranean. Fig. NIL 16.

The steady flow of the river, so devoid of tributaries in its N half, is assured by the system of lakes and areas of repose in the vicinity of lakes Victoria, Albert, and Albert Edward in the S. Excessive seasonal rainfall at the headwaters of the E affluents, the Blue Nile and the Atbara, results in an annual inundation of the river valley in Egypt, the occurrence of which was the mainstay of ancient Egyptian agriculture, both for the water thus supplied and for the rich alluvium carried down by the river. At Assuan the Nile reaches its minimal level at the end of May, rises steadily during July and August, and attains its maximum at the beginning of September. The measurement of the height of the river was of the greatest importance in antiquity; the most important measure, or Nilometer, was located on the island of Elephantine at Assuan, with others at Philae, Edfu, and Esna.

In spite of the numerous suggestions which have been offered, the origin of the Greek word Νεῖλος remains obscure. The most ancient name of the river in Egypt itself was *ḥ'py,* which also served as the designation of the Nile god. By the Middle Kingdom, however, the word *itrw,* at first meaning simply "river," had become the name of the river par excellence and continued as the ordinary appellation of the Nile down to the Greco-Roman period. This word, under a slightly modified form, was taken into Hebrew as a loan word and appears as יאר. Extrabiblical attestations of the name include the Assyrian transcription *ya-ru-'-ú* in the Annals of Ashurbanipal and Coptic *yero,* both of which reflect the compound form *itrw* '³, "the great river," commonly used in the later periods. Hebrew יאר is employed in both the singular and the plural as the name of the Nile; it is generally assumed that the use of the plural refers to the several branches of the river which coursed through the Delta to the sea. In two instances, however (Job 28:10; Isa. 33:21), the plural יארים seems to mean, not the Nile, but streams or rivers in general.

The absolutely vital role which the Nile played in the agricultural life of the ancient Egyptian led very early to the personification of the river in the Nile-god Hapi. The annual inundation was greeted with both official and popular celebrations; we find lyrical references to the occasion as early as the Pyramid Texts, where we read: "The god's offerings descend, the face of men is bright, and the heart of the gods rejoices." The most famous of the hymns preserved for us is known as the "Adoration of the Nile" and survives in copies from the Nineteenth

17. The Nile Valley seen from the cliffs by Medinet Habu; to the lower right can be seen within the enclosure the temple of Ramses III (1195-1164 B.C.) and other buildings.

Dynasty and later. Corresponding to his function as provider, Hapi is pictured as bringing offerings of food and drink to other deities, thus symbolizing the abundance provided by the river itself. This association is further represented by a portrayal of physical corpulence, especially in the breasts, which has led some scholars to interpret the figure as bisexual, thus emphasizing the self-generative fruitfulness of the Nile. Hapi never attained a strong position in the Egyptian pantheon; this was due partly to the gradual identification of Osiris, a much more important deity, as the lord of the inundation. The crocodile-god Sobek was also celebrated as the bringer of the annual flood. Fig. NIL 17.

The exact locations and names of the Delta branches of the Nile in antiquity remain a vexing issue, important not only for the geography of the Delta in general but also for the solution of certain problems in the topology of the Exodus. Because the courses of the Delta branches were constantly changing, we cannot assume that the information available from one period reflects the same geographical situation existing at another. In Ramesside times the three principal courses were known as (*a*) the Great River, corresponding in name to the Μέγας Ποταμός of Ptolemy, but more probably to be identified with the Sebennytic branch of classical times; (*b*) the Water of Prē', the easternmost branch, possibly the same as the later Bubastic (also Pelusian) River; and (*c*) the Western River, which may be equated with the later

Canopic mouth. Other names are attested in both Egyptian and classical texts, but the precise equations to be made between these and the names mentioned here must await further evidence.

NIMRAH. Alternate form of BETH-NIMRAH.

NIMRIM, THE WATERS OF nĭm'rĭm [מי נמרים, *perhaps* waters of leopards]. Waters in Moab which are said to have become desolate, in oracles against Moab (Isa. 15:6; Jer. 48:34). Apparently they supported cultivation, since Isaiah continues:

> The grass is withered, the new growth fails,
> the verdure is no more.

Some would identify the Waters of Nimrim with the Wadi en-Numeirah, a small stream flowing into the E side of the Dead Sea, *ca.* 8½ miles from its S end. There are traces of former cultivation in the area. If this location is correct, the Waters of Nimrim would have been one of the streams watering the area of Sodom and its sister cities before their destruction.

Others would identify the Waters of Nimrim with the Wadi Nimrin, which flows into the Jordan from the E, *ca.* 8 miles N of the Dead Sea. The land in the area of the Wadi Nimrin is fertile and very productive when irrigated, as it has been from earliest historical times. The Plains of Moab, where the Israelites encamped before crossing the Jordan, stretch southward from the Wadi Nimrin to the NE end of the Dead Sea.

NIMROD nĭm'rŏd [נמרד, נמרוד, *see* § 1 *below;* LXX Νεβρωδ].

1. Etymology and identification. The etymology of the name Nimrod is quite uncertain. If originally Hebrew, which is highly improbable, then it is apparently from מרד, "to rebel." Even as a foreign word, it could bring this meaning to the Hebrew reader's mind. However, it is probably Mesopotamian in origin. The name most frequently suggested as its source is Ninurta, though this is not without philological difficulty or opposition.

If the form "Ninurta" is accepted and assumed to refer strictly to a god, it would point to the Babylonian deity Ninurta, a war-god who is also called "the Arrow, the mighty hero," and whose cult assumed widespread importance in Mesopotamia during the late second millennium B.C. If it refers to a historical person, the Assyrian king Tukulti-Ninurta I (*ca.* 1246-1206 B.C.) is an attractive choice, for he was the first Assyrian monarch to rule over all Babylonia (cf. Gen. 10:10). According to Speiser, he served also as prototype for the composite Greek hero Ninus, associated with Nineveh. If, however, the Cushite origin of "Nimrod" (vss. 6, 8*a*) is maintained, the Egyptian monarch Amenophis III (1411-1375) would be suitable according to von Rad.

Regardless of origin, Nimrod must have become a figure of legendary proportions in the ancient Near East, whose story was extremely fluid. It was adopted by, and adapted to, many phases of ancient culture, lived on in medieval chronicles, and is still reflected in the *Nimrûd* of place names in Mesopotamia today.

2. In the OT. Nimrod appears only at Gen. 10:8-12; I Chr. 1:10; Mic. 5:6—H 5:5.

Nimrod son of Cush (I Chr. 1:10, perhaps here indicating the Kassites or Cosseans [Akkadian *Kaššu*], who conquered the Babylonians in the second millennium B.C.), was the first to become a mighty hero (גבור) on the earth. He was so renowned as a great hunter (גבור ציד, "mighty in the chase") that the expression "like Nimrod a mighty hunter before Yahweh" became proverbial (Gen. 10:8-9). "Before Yahweh" (לפני יהוה) may here be equivalent to "on the earth" or perhaps a conscious addition by the Yahwist to Hebraize this pagan tradition.

Nimrod was famed also for his kingdom in Mesopotamia. Its principal cities were Babel (Babylon), Erech, Accad, and CALNEH (so MT, LXX, Targ., Vulg., KJV; but cf. Samar., Pesh., and RSV) in the land of SHINAR (vs. 10). Further, he was closely associated with Asshur (for the word order of vs. 11*a*, cf. KJV with RSV) and Nineveh (vss. 11-12), so that Assyria is once called the "land of Nimrod" (Mic. 5:6—H 5:5). *See* ASSYRIA AND BABYLONIA § C3.

The appearance of a Nimrod story in the OT may be due not only to its immense popularity but also to the Yahwist's frequent use of ancient material for his cultural and ethnic etiologies. Here it helps him account for the origin of the great Assyro-Babylonian civilization.

NIMSHI nĭm'shī [נמשי]. Grandfather (according to II Kings 9:2, 14, which is probably original) or father (according to I Kings 19:16; II Kings 9:20; II Chr. 22:7) of King Jehu. The name has been found on an ostracon from Samaria.

NINEVEH nĭn'ə və [נינוה; LXX Νινευή] (Gen. 10:11-12; II Kings 19:36=Isa. 37:37; Jonah 1:2; 3:2, 3-7; 4:11; Nah. 1:1; 2:8; 3:7); MEN OF NINEVEH Νινευιται (Matt. 12:41; Luke 11:30, 32); KJV NINEVITES nĭn'ə vīts. One of the oldest and greatest cities of Mesopotamia, capital of Assyria at its height, but since its fall in 612 B.C. a symbol of Assyria's utter collapse.

1. Location. The city was situated on the E side of the Tigris, directly across the river from the site of modern Mosul. The ruins of Nineveh are marked primarily by two large mounds, Quyunjiq and Nebi Yunus, and are surrounded by an almost regular rectangle of walls nearly eight miles in circumference.* The area enclosed was thus exceptionally large, but it must have loomed ever so much larger in the hearsay accounts of outsiders; according to Jonah 3:3, it took "three days' journey" to cover it. Fig. NIN 18.

Nebi Yunus ("the prophet Jonah"), though much the more compact of the two mounds, is almost entirely out of reach of excavators because of its mod-

ern village, its cemetery, its mosque, and its "Jonah's tomb." Quyunjiq, on the other hand, which is twice the size of Nebi Yunus, was an abandoned ruin already in the days of Xenophon, and was to attract little active interest until the age of modern archaeology. Excavations on this site were begun by the French in 1842, under P. E. Botta, and were continued intermittently by the British until 1932. Fig. NIN 19.

2. Name and history. The *Ninua* of cuneiform sources goes back to an earlier form, *Ninuwa,* which is still found at Mari and would seem to underlie the received biblical writing. The name itself appears to be of Hurrian origin. In addition to the syllabic spelling, the cuneiform texts also use a pseudologographic form, *Ninā,* a sign representing an enclosure with a fish inside. This particular variant must have given rise to considerable popular speculation, which in turn left its mark on more than one subsequent tradition. Another line of folk interpretation is found in Greek writers who call the city *Nînos,* after the legendary hero by that name whose eponymous role was influenced by accidental similarity in sound. Nevertheless, the very interest of outsiders in the background of Nineveh is indirect proof of the reputation and importance of the city itself.

The earliest occupation of Nineveh dates back to remote prehistoric times. Among the older historical witnesses, there is an inscription which was left in the city by the celebrated Naram-Sin of the Dynasty of Akkad; and the place is named in the Prologue of the Code of Hammurabi as the site of a famous temple of Ishtar. Statues of Ishtar of Nineveh were sent by Mitannian kings to Egyptian rulers as gifts worthy of exceptional attention. And extensive building activities in Nineveh are recorded repeatedly by kings of the Middle Assyrian period.

The city reached the height of its fame at the turn of the eighth century, when Sennacherib made Nineveh the capital of a steadily expanding Assyrian Empire. When Assyria held sway over Egypt, under Esarhaddon and Ashurbanipal, Nineveh had no rival anywhere in the world. Yet the end was only decades away. In 612 B.C. the city fell to the combined forces of the Babylonians and the Medes; its proud temples and palaces and engineering wonders soon crumbled and were forgotten. Only the great library that Ashurbanipal had assembled was to be reactivated, some twenty-five centuries later, thus furnishing the essential clue to the intellectual and spiritual treasures of the long-lived civilization of Mesopotamia.

3. Nineveh and the Bible. The earliest biblical mention of Nineveh is found in Gen. 10:11, where the place is listed together with other major Mesopotamian centers founded by Nimrod. The next verse speaks of "Resen between Nineveh and Calah; that is the great city." The same description is applied to Nineveh in Jonah (1:2; 3:3; 4:11). It is very doubtful, however, whether it was intended for that city in the present instance; the word order suggests Calah, which antedated Nineveh as the capital of Assyria. It is clear, nevertheless, that the fame of Nineveh had already spread to Israel in time to be reflected in the J document. A more tangible historical reference is given in the parallel passages II Kings 19:36; Isa. 37:37, which record Nineveh as the place that witnessed the assassination of Sennacherib by his sons.

The end of Nineveh is proclaimed by two contemporary biblical prophets, Zephaniah and Nahum. The former does so incidentally, but the entire record of the latter's prophecy is entitled "an oracle concerning Nineveh." Nahum's poem manages to evoke from a great distance, yet with all the impact of an eyewitness, and with unexcelled imagery and power, an event that was one of the major junctures

in world history. The only comparable work in Assyrian literature is the Epic of Tukulti-Ninurta I, which deals with the struggle between Babylonia and Assyria in the late thirteenth century.

Another biblical work which centers on Nineveh is the book of Jonah. This time, however, historical facts are reshaped so as to serve the purposes of an unforgettable moral lesson. Such literary touches as the "king of Nineveh" (3:6) or the "three days'" circuit of the city's walls (3:3), among others, could scarcely ever have been mistaken for authentic data. Yet in his own way Jonah, too, tells of the glory that was once Nineveh. The Ninevites, the inhabitants of Nineveh, to whom Jonah preached, would arise at the Last Judgment to condemn the generation of Jesus, according to Matt. 12:41; Luke 11:30, 32.

NIPHIS nī'fĭs. An Apoc. form of MAGBISH.

NIPPUR nĭ pŏŏr'. A city *ca.* 100 miles S of Baghdad. It was founded by the "Ubaid" people (*see* SUMER) *ca.* 4000 B.C. From the early third millennium B.C. to the days of Hammurabi, Nippur was Sumer's undisputed religious and cultural center. It wielded no political power and was never the seat of a Sumerian dynasty. But because of some still unknown momentous historical developments, the Sumerians came to adopt the credo that Nippur's tutelary deity, Enlil, was the chief of the Sumerian pantheon and the monarch of the entire universe. The rulers of Sumer, no matter where their capital, found it indispensable, therefore, to have Enlil "legitimize" their royal authority; and Enlil's temple at Nippur, the *Ekur,* "mountain house," became Sumer's leading shrine. According to a later tradition, it was Enmebaraggesi, the last ruler but one of the "Etana" dynasty of Kish, who first built Enlil's temple at Nippur. Following him, practically all the rulers of Sumer made sure that they either built or rebuilt parts of it. By the time of Hammurabi, Nippur had yielded to Babylon as a religious and cultural center, but it continued to be an important city down to Parthian times. Fig. NIP 20.

Nippur was the seat of Sumer's most important *edubba,* "academy" (see *Sumer*). In the myths and hymns composed and redacted in this *edubba,* Nippur and its leading deities, Enlil, his wife Ninlil, and his son Ninurta, played a large role. According to one literary document, Enlil sent the barbaric Guti to devastate Sumer because Naram-Sin had plundered Nippur and desecrated the *Ekur.* The destruction of Nippur itself is vividly described in a specially composed lamentation which also eulogizes its delivery and restoration by Ishme-Dagan (*ca.* 1900 B.C.).

Excavations conducted in Nippur by American expeditions in 1890, 1893-96, 1899-1900, 1948, and every other year from 1949 through 1958, laid bare parts of the *Ekur,* and its ziggurat; a small temple dedicated to an unknown deity; a large temple dedicated to the goddess Inanna; and the houses of the

NISAN nī′zăn [ניסן; Νισαν]. The first month of the Hebrew CALENDAR, Akkadian *nisānu* (March-April). It was called ABIB before the Exile.

NISROCH nĭz′rŏk [נסרוך] (II Kings 19:37; Isa. 37:38). A deity worshiped by Sennacherib; in his temple Sennacherib was killed.

The name is quite unknown in our sources for Mesopotamian religion, and is probably a corruption by Hebrew scribes. If the corruption was unintentional and made while the records were still in the proto-Hebraic script, the original reading may have been either "Nusku" or "Marduk," the former being nearer the later script of the MT. The LXX readings Ἐσδρὰχ, Ἐσθρὰχ, and Ἀσρὰχ do not elucidate the matter, since they offer no alternative to the real difficulty, the last three consonants of the MT.

Regarding the identity of Nisroch with Marduk, the city-god of Babylon, it has been suggested, on inadequate evidence, that Sennacherib was assassinated there. Such information, however, as is extant suggests that the king was murdered at Nineveh, and evidence has been adduced that the cult of Marduk was transplanted there from Babylon.

Nusku, the fire-god, was the son of Sin, the moon-god, and his consort Ningal. Nusku was regarded as an intermediary between the great gods and men, and is so mentioned in Assyrian inscriptions. His cult, though native to S Mesopotamia, was practiced also in the N, especially at Harran and in its vicinity, and is attested in the period of Assyrian ascendancy to which II Kings 19 refers. Hence Nisroch should probably be identified with Nusku.

NOAH nō′ə [נח, *Nōªḥ;* LXX *and* NT Νῶε; *see below*]. Alternately: NOE. Survivor, with his family, of the FLOOD; and discoverer of the art of making wine. He is considered everywhere in the Bible, apart from Gen. 9:20-29, only as the hero of the Flood (Isa. 54:9; Matt. 24:37-38; Luke 17:26-27), an exemplary righteous man (Ezek. 14:14, 20; I Pet. 3:20; II Pet. 2:5), who, with his family, was preserved from annihilation because of his faith in God and his obedience to the divine command (Heb. 11:7). It is possible, however, that the connection of Noah with the Deluge, as the Hebrew counterpart to the Babylonian Utnapishtim (*see* FLOOD § 3*c*), is not original but was made in Syria-Palestine for a figure who entered the area originally as a gardener. *See* § 2 *below.*

1. The biblical data. The son of LAMECH, ninth descendant of ADAM through SETH, Noah was born 126 years after the death of Adam. His birth was the first after Adam's death, and he thus becomes the second father of mankind after all other descendants of Adam have been destroyed. He has been called the "bringer of the new age, who rescued mankind from the return to chaos in the deluge, a messianic figure" (Jeremias 120).

The reason Lamech gives for naming his son Noah is that "out of the ground which Yahweh has cursed this one shall bring us relief from our work and from the toil of our hands" (Gen. 5:29*b*). Noah lived five hundred years before he "became the father of SHEM, HAM, and JAPHETH" (vs. 32). He himself was a "righteous man, blameless in his generation" (Gen. 6:9; cf. II Pet. 2:5) at a time when the world was "corrupt in God's sight" (Gen. 6:11). Therefore, when God determined to destroy "man and beast and creeping things and birds of the air" (vs. 7) from

the earth, "Noah found favor in the eyes of the LORD" (vs. 8). God announced to him his determination "to make an end of all flesh," to "destroy them with the earth" (vs. 13), and ordered Noah to build an ARK of gopher wood—i.e., "some resinous wood" (Skinner), equipped with cells and covered "inside and out with pitch" (vs. 14); for the catastrophe was to be a world-wide deluge (vs. 17). Noah obeyed the command (6:22; 7:5) and, together with his family and the living creatures taken by him into the ark, was saved from annihilation. The Flood occurred "in the six hundredth year of Noah's life" (7:11); and one year later, "in the six hundredth and first year, in the first month, the first day of the month, the waters were dried from off the earth" (8:13). Noah, however, awaited God's command to disembark (vs. 15) and finally stepped onto dry ground seven weeks later (vs. 14), "in the second month, on the twenty-seventh day of the month."

After Noah had attended to the disembarkation of every creature in the ark, he "took of every clean animal and of every clean bird" and offered to God an enormous sacrifice of propitiation (vs. 20). God accepted the worship and determined that he would "never again curse the ground because of man" (vs. 21), for the evil of man cannot be cured by his wholesale destruction. Therefore, the alternation of the seasons would never again be disturbed by any catastrophe like the Flood. Then Noah, as the second father of mankind, received the same injunction which God had given to Adam: "Be fruitful and multiply, and fill the earth" (9:1*b*), and in addition the prohibition from eating blood (vs. 4) and from committing murder (vss. 5-6). As a sign of his promise not to destroy man again by a flood, God adopted the rainbow (vss. 8-17). Thus from Noah and his three sons (and Canaan) "the whole earth was peopled" (vs. 19).

Noah is also referred to (J) as the "first tiller of the soil" (9:20)—a strange contrast to 3:23. The best rendering of 9:20 is that of Skinner: "Noah the husbandman was the first who planted a vineyard"; but even this translation does not obviate the difficulty of referring to Noah as *the* husbandman, as though he were a gardener of some reputation, if not also the inventor of agriculture. The emphasis in the narrative, however, is on Noah's discovery of the culture of the vine and the consequences of "immoderate indulgence in its fruit." In his drunkenness he "uncovered himself in his tent" (vs. 21; RSV "lay uncovered" does not convey the force of the Hebrew) and was found in that state by his second(?) son, HAM, who told his brothers (vs. 22). Shem and Japheth then took a garment and entered the tent, walking backward in order not to see the shame of their father, and covered his nakedness (vs. 23). When Noah recovered and learned what had happened, he cursed CANAAN with slavery and blessed Shem and Japheth (vss. 24-27).

Noah lived after the Flood 350 years and died at the ripe old age of 950 years (9:28-29). The story of the generations of Noah (6:9) is concluded with a formula reminiscent of Gen. 5. *See* CHRONOLOGY OF THE OT.

2. Noah the gardener. The Noah of Gen. 9:20-27 almost certainly belongs to a tradition different from that of the blameless hero of the Flood. The two stories bear no intrinsic relation to each other and can be harmonized only with difficulty. Suspicion that a character other than the hero of the Flood is meant is aroused at vs. 20 by the reference to Noah as *the* man of the ground—i.e., *the* farmer—as though he were well known, not as the builder of the ark, but rather as the gardener par excellence. Further, Noah's sons are represented (vss. 22-24) as minors rather than as the married men of the flood story. In addition, the offender in vs. 24 is the youngest son of Noah, who is named in vs. 25 Canaan (not Ham) and whose brothers are Shem and Japheth. The attribution of the evil deed to "Ham, the father of Canaan" (vs. 22), along with the notice "Ham was the father of Canaan" (vs. 18*b*), is more than likely an attempt to harmonize the two accounts, to help bridge the hiatus between vs. 18 and vs. 20. Two chronologies apparently have been harmonized, one which gives Noah's sons as Shem, Ham, and Japheth, and one which lists them as Shem, Japheth, and Canaan. Moreover, the incident also breaks the connection between 9:19 and 10:1 and must therefore be an interpolation from another (older) source, which, if it knew the flood story, did not know Noah as its hero. Finally, the obvious allusion to 5:29 makes it probable that the story belongs somewhere within the J tradition, even though it did not form a part of the J narrative of the Flood. The incident may be part of a third source (J^1). *Cf.* FLOOD § 2*a*.

The story is clearly a culture myth describing the discovery of wine. It presupposes a state of transition from nomadic to agricultural life. Noah and his two sons Shem and Japheth are tent dwellers (vss. 21, 27); but Noah, no longer a nomad, has advanced beyond the simplest forms of agriculture to the more specialized, complicated art of vine cultivation. That the result of this occupation can be degrading is illustrated by the acts of Noah and Canaan. There appears in this story the same nomadic mistrust of and hostility toward settled agricultural life as that which exists in the story of Cain and Abel (4:1-16). Here Semitic contempt for the refinements of Canaanite civilization is summed up in Noah's curse of his youngest son (vs. 25).

3. The name Noah. The combination in Gen. 5:29 of the name Noah with the verb נחם (*pi'el*), "to comfort," "to cheer," is a late, fanciful interpretive derivation. The verse seems to have been misplaced from 9:20. Not only does ינחמנו make no sense in its present context with reference to Noah's role in the Deluge, but its meaning is also forced, when with obvious reference to wine Lamech remarks: "This one shall bring us relief from our work and from the toil of our hands" (5:29*b*). The *pi'el* נחם means "to comfort," "to dispel sorrow." Even Jer. 16:7, which refers to the "cup of consolation," does not refer so much to the properties of wine as to a mourning custom. Both Rabbi Johanan and Rabbi Simeon ben Lakish remarked that in Gen. 5:29*b* name and etymology do not correspond. "Either he named him *Nōaḥ* from *yənîḥēnû* or *Naḥmān* from *yənaḥəmēnû*" (Berakoth Rabba, Genesis, section 25, quoted by I. Goldziher, 208). Either an emendation of *yənaḥəmēnû* to *yənîḥēnû* (agrees with LXX διαναπαύσει),

"He will cause us to rest," is necessary, or the name Noah must be emended to Naham. The first alternative is preferable.

The LXX rendering indicates that the form *yənaḥəmēnû* did not enter the MT until the late Jewish period. It has been suggested that Gen. 5:29 preserves the "nucleus of a perhaps more extended birth-legend of Noah," which perhaps is found in the pseudepigraph Enoch 106. According to this theory, the infant Noah would be identified with the infant sun-god whose birth is associated with the winter solstice. The Canaanite or early Hebrew farmer would then "regard the solstice as ushering in his season of rest after the toil of spring, summer and autumn." The flood story, therefore, appears to have been a cult legend used in connection with a seasonal festival.

But even if the original biblical etymology connected the name Noah with the Hebrew root *nûᵃḥ*, little is won for the meaning and origin of the name. All etymologies of ancient names are, of course, uncertain, but some tentative theories must nevertheless be propounded in the light of the evidence. Originally the name was thought to derive from Assyrian *nâxu, inûx,* "to rest," but this derivation was given up when it was learned that Akkadian *x* and Hebrew *ḥ* do not represent the same consonant. Another suggested connection was with Old Babylonian *nuḫiya,* but this is an Akkadian diminutive of a name formed from the element *nūḫ,* which does not correspond vocalically with Noah. Two suggestions have received scholarly support: (*a*) that Noah is derived from a stem נחח, which in Arabic gives the word *naḥaḥe,* "liberality," "generosity"; and (*b*) that it is connected with the Akkadian element *nâḫ*. The discovery of the Akkadian names *Nāḫ-ilum* and *Muutnaḫa,* combinations with *Nâḫ,* make some connection of Noah with *Nâḫ* seem probable, for the change from Akkadian *Nâḫ* to Canaanite-Hebraic *Nōᵃḥ* is easily possible. *Nâḫ* is apparently a divine name. The name Noah, therefore, may be theophoric and the personage represented by the name pre-Israelite in origin.

If the Akkadian derivation for Noah be correct, a multitude of unanswerable questions are raised: Was *Nâḫ* in Mesopotamia originally a god or only a secondarily deified figure? Was he native to Mesopotamia, or was he brought there by invaders of the nineteenth-eighteenth centuries? Was he already known in connection with the flood story in the Mari region? In what role did he enter Syrian-Palestinian cultural tradition? Was he brought into Mesopotamia directly by the invaders of the nineteenth-eighteenth centuries, or was he mediated by them from Lower Mesopotamia? Did he come as a god or as a human figure? Did he already have some connection with the Flood at his first appearance in the Syrian-Palestinian area? These queries rightly focus scholarly attention on the problem of the Babylonian sources for most of the early stories of Genesis, which were mediated to the Hebrews through the Amorites and proto-Arameans of the Upper Euphrates region. The original Noah, therefore, may have had nothing to do with the flood tradition but was a gardener associated with the discovery of wine, as in Gen. 9:20-27. With this occupation the suggested biblical etymology of his name would agree; he is no longer a wanderer but is settled, at rest, an agriculturalist.

NOAH (DAUGHTER OF ZELOPHEHAD) nō'ə [נעה, *probably a place name*]. One of the five daughters of Zelophehad who asked for and received an inheritance, although their father was dead and they had no brothers (Num. 26:33; 27:1-11; 36:10-12; Josh. 17:3-6).

NOAH, APOCALYPSE OF. A pseudepigraphal writing mentioned by name in Jub. 10:13; 21:10; more properly, BOOK OF NOAH. Portions of it have been identified in Jub. 7:20-39; 10:1-17; Enoch 6-11; 39:1-2*a;* 54:7-55:2; 60; 65:1-69:25; 106; 107(?). Some fragments, corresponding to I Enoch 8:4-9:3; 106:1, have appeared among the DEAD SEA SCROLLS. The book is obviously earlier than JUBILEES, which may have been written *ca.* the middle of the second century B.C.

The extant fragments show a special interest in the legend of the fallen angels who introduced evil into the world when they had intercourse with the daughters of men (cf. Gen. 6:1 ff), and with the terrible punishments awaiting them. Through their demoralization of mankind they are held responsible for the Deluge. The fragments also contain a description of the marvelous events connected with the birth of Noah, a remarkable child, and also relate his death. In addition, a messianic kingdom is predicted.

On the basis of the fragmentary evidence the writing is not an apocalypse in the strict sense of the term (*see* APOCALYPTICISM). The title given in Jub. 10:13, the "Book of Noah," is preferable to the modern designation.

NO-AMON nō ăm'ən [נא אמון] (Nah. 3:8 RSV mg). A fuller form of No, the Hebrew name, from Egyptian, of THEBES.

NOB nōb [נב]. A town in Benjamin.

1. History. Ahimelech the priest was in charge of the sanctuary which had been at Shiloh (I Sam. 14:3) and evidently was moved to Nob after the destruction of Shiloh (Jer. 7:14). Under Ahimelech was a large body of priests caring for sacred objects, including holy vessels, the "bread of the Presence," the ephod, and Goliath's sword. David on his flight from Saul came to Nob and, pretending to be on a secret mission from the king, persuaded Ahimelech to give him sacred bread and Goliath's sword (I Sam. 21:1-9). When this was reported to Saul by Doeg the Edomite, who had been present at David's

visit to Nob, Saul in his anger summoned Ahimelech and all his father's house, the priests who were at Nob, and ordered them slain. The servants of the king refused to lay hands on the priests; so Saul told Doeg to carry out the order. Consequently Doeg killed eighty-five persons "who wore the linen ephod" and put to the sword the city of Nob—men, women, children, and animals. Only one son of Ahimelech, Abiathar, escaped, and he fled to David (I Sam. 22:9-23).

2. Location. That Nob was in Benjamin and near Anathoth is shown in the list of postexilic inhabited cities (Neh. 11:31-32). Another mention of Nob is in Isa. 10:27*b*-32, where the prophet tells of the imminent approach of the Assyrian. After discomfiting the cities of Benjamin, including Michmash, Geba, Gibeah, and Anathoth,

> This very day he will halt at Nob,
> he will shake his fist
> at the mount of the daughter of Zion,
> the hill of Jerusalem.

Thus it would seem that Nob is between Anathoth and Jerusalem and sufficiently high to command a view of the holy hill. Some have considered that this Nob is different from the Nob which contained the sanctuary, but the present prevailing view favors considering the two identical. A most likely location is Mount Scopus, the hill a little less than a mile NE of the ancient city. Titus camped there when he was approaching Jerusalem. Another possibility is Qu'meh, a low hill *ca.* a mile N of Scopus. It has the advantage of being nearer Gibeah, while Mount Scopus is a more likely location for one shaking his fist at Jerusalem. There is no satisfactory etymological explanation of the name Nob, nor is there as yet any archaeological evidence of its location.

O. R. SELLERS

NOBAH nō'bə [נבח]. **1.** Apparently a chieftain of the tribe of Manasseh; conqueror of KENATH during the Israelite conquest of Canaan (Num. 32:42). The account of the Manassite conquest of Gilead in Num. 32:39-42 appears to be a fragment, unrelated to its present context but similar to the account given in Judg. 1 of independent action by various Israelite tribes in the conquest of Canaan. Thus, Nobah's capture of Kenath and its villages forms part of the Manassite tribe's occupation of GILEAD. Num. 32:40 is an editorial attempt to reconcile the independent action of the Manassite clans with the preceding account of Moses' efforts to secure united Israelite action against Canaan. R. F. JOHNSON

2. A town in Gilead (Num. 32:42); formerly KENATH; named for its conqueror (*see* 1 *above*).

3. A town in the E of Gilead, near Jogbehah; Gideon made a circuit around the two towns in order to surprise the Midianites at Karkor (Judg. 8:10-11). The site is unknown. S. COHEN

NOBLE [אדיר, majestic (one); גדול, great; חורים; נגיד, leader, ruler, prince; נדיב, generous, princely, willing (one); נכבד, honored (one); פרתמים, *loan word from* Old Pers.; קר, cool of spirit, self-possessed; Aram. יקירא, honorable, difficult; εὐγενής, wellborn; εὐγενής ἄνθρωπος, a wellborn man, nobleman; καλός, beautiful, pleasing, honest, goodly; τιμή, (to, unto) honor]. A word descriptive of persons of illustrious deeds or otherwise distinguished for skill or genius; of persons of high birth, rank, title, or exalted position (Judg. 5:13; Ezra 4:10; Esth. 6:9; Prov. 17:26; I Cor. 1:26); of persons having high moral qualities and ideals who are recognized for their moral dignity and superiority (Ps. 16:3; Isa. 32:5, 8; Acts 17:11); of persons or things which are grand or stately in appearance, splendid in proportions, or very useful; generally, anything having qualities of a very high order (Ezek. 17:8, 23: a noble vine or tree, because productive; I Tim. 3:1: a noble task; Luke 21:5: noble stones and offerings).

The primitive meaning of חורים, the most common Hebrew noun for "nobleman," is "freed man" or "freeman," whence one of the connotations attaching to the idea of the nobility in the late period. The idea of the root (חרר), which is common to several Semitic languages, is "to become free, to set free" (in contrast to עבד, "to work, to serve"). *See* FREEDOM; FREEWILL OFFERING.

A nobleman freely supports and defends his community. He has a generous (נדיב) heart (Exod. 35:5, 22; II Chr. 29:31; cf. Num. 21:18; I Chr. 28:21). Thus, the repentant psalmist asks God to uphold him with a "free spirit" (רוח נדיבה; Ps. 51:12 KJV—H 51:14)—i.e., a "willing" (so RSV) or "noble" spirit.

H. F. BECK

NOD nŏd [נוד wandering]. A country E of Eden where Cain went and dwelt (Gen. 4:16). Possibly the name represents a play on words, a place of wandering for the condemned wanderer. Some have suggested that the words "east of Eden" are a gloss, added in order to attach the story to the Eden narrative of Gen. 3. D. M. C. ENGLERT

NODAB nō'dăb [נודב] (I Chr. 5:19). A Hagrite people mentioned in connection with Jetur and Napish as waging war against the Israelite tribes of Transjordan. Since Jetur, Napish, and Kedemah are mentioned together as the sons of Ishmael, the son of Hagar (Gen. 25:15; I Chr. 1:31), it is obvious that Kedemah and Nodab are different names for the same people, and it is even possible that one name may have arisen as a textual corruption of the other. The name Nodab is preserved in that of the village Nudebe in the Hauran. S. COHEN

NOE. KJV NT form of NOAH.

NOEBA. KJV Apoc. form of NEKODA.

NOEMI nō'ə mī. Douay Version form of NAOMI.

NOGAH nō'gə [נגה] (I Chr. 3:7; 14:6). One of the sons of David who were born at Jerusalem. Since the name is missing in the parallel list (II Sam. 5:15), some scholars are of the opinion that it is a dittographic corruption of the following name, NEPHEG (2), and consequently has erroneously been included in the lists of the Chronicler. E. R. DALGLISH

NOHAH nō'hə [נוחה]. The fourth born of Benjamin, according to I Chr. 8:2 (but cf. Gen. 46:21).

*NOMADISM. A way of life in which a people have no permanent home or dwelling, but move from place to place seeking game or pasture. It is the repeated shifting of a people's habitat to find sustenance. It is not, therefore, unrestricted or aimless wandering but is focused around centers or in a certain directional pattern. Even in the wilderness of Judea the Ta'amira tribe has a generally defined territory. Climate, topography, and technological advance determine the type of nomadism. All types are found in all periods of history. The nomad is respected by more sedentary neighbors, despite his seeming POVERTY. His skill, strength, and stamina cause fear even among people with more advanced weapons.

Bibliography

1. Types of nomadism. There are three significantly different types of nomadism found in all parts of the world and in all periods of history.

a. Hunting and collecting. The hunting and collecting nomads are made up of separate bands (*see* BAND), who rarely assembled together as tribes (*see* TRIBE) for some religious ceremonies. The size of the band depends on the changing food supply as well as the size of available territory. There is little surplus and no developed division of labor. Poverty is more prevalent than wealth, although all members of the band are relatively equal. Therefore, society is generally democratic, with all heads of families (*see* ELDER) vested with authority in the tribal council. Marriage is usually endogamous, although marriage by capture is not unknown. Individuals seldom join another tribe. The recognition of family hunting, fishing, and collecting rights is sometimes made within the larger tribal territory. Some of these bands may become pastoral nomads, but this is not a simple, direct evolutionary pattern, as commonly supposed.

b. Pastoral. The pastoral nomads follow a consistent pattern of grazing, regulated by the season and the type of herd or flock. The sheep and goat herders of modern Palestine and the ancient ass nomad traveled slowly, seeking pasture. The camel and horse nomad, the Bedouin in Arabia, can rapidly cover the length and breadth of the country. Wealth is in the herd. Territory is defined and is the property of specific families. Some families become wealthy, but all have a greater security than the hunting nomad. Milk and young animals are the major food supplies. Skin and hair are the source for clothing, tents, water bottles, etc. The same democratic practice prevails, but the voice of the wealthier elder is more likely to carry the day. The division of labor is on the sex basis, with men usually doing the herding and the women preparing hides and goatskins and erecting tents. Marriage is either exogamous or endogamous. Such tribes may settle down briefly for a season and raise a crop, but they do not build permanent structures. Eventually some may infiltrate or settle down on the edge of the territory and become agriculturists.

c. Agricultural. Agricultural nomads stay in one spot until the crop has exhausted the land. They then move on to new fertile territory, and the process is repeated. Perhaps these should not be considered real nomads.

2. Camel and ass nomadism. Most present-day Bedouins are camel nomads who also possess the horse. It is a fallacy of nineteenth-century scholarship to believe that the modern nomad is a pattern of the patriarch, and that his customs and religion can be projected back without any other supporting evidence into the pre-exodus period. The CAMEL is mentioned in several stories of the patriarchs (Gen. 24:64; 31:34), but, according to many authorities, these are anachronistic references, since the Midianites *ca.* the twelfth century B.C. are probably the first true camel nomads. It was apparently at this time that the camel was domesticated. This true camel nomadism is not reflected in the patriarchal stories. Nevertheless, despite the introduction of the camel and the horse, ass nomadism continues to the present day and does not necessarily fit into an evolutionary hypothesis. Similarly the excavations at Jericho and Ghassul show that well-developed cities go back far into Neolithic times, and a pattern of cultural development within the historical period of the Bible is not a simple line from nomad to agriculturist. Nomadism and strict moralism are by no means a first stage in the evolution of Israel. The patriarchs seem to be typical ass nomads, as depicted in Egypt under the descent of the Beni-hasan tribe. It is interesting to note the Beni Hamor ("sons of the ass") at Shechem (Gen. 34:2 ff). The ass was sacrificed by the Amorites in Mari, where many other patriarchal customs are paralleled. The ass was not necessarily a humble beast but was in that period ridden by kings and deities (Zech. 9:9). *See* UGARIT.

3. Nomadism in the ancient Near East. Nomads are erupting into the centers of civilization at the beginning of our records. By the end of the fourth millennium B.C., Semitic nomads are infiltrating Sumer. A large group of Akkadians settled down in the middle of the third millennium. Amorite nomads appear in the Fertile Crescent at the beginning of the second millennium. The pressure of nomads on settled communities is reflected in many of the documents from MARI. These documents also show how a group of nomads adapted themselves to a previously established culture. Some think the HYKSOS and the HABIRU also reflect Semitic nomadic movements. The Arameans came into the picture about the middle of the second millennium. At the time of the Conquest camel-riding Midianites appear in the E. At about this same time Edom and Moab settle down.

In addition to these Semitic nomads there are eruptions of others from the steppes to the N. The Hurrians, Hittites, and later the Medes and still

later the Parthians perhaps reflect this same pattern of conquest and renewal in the ancient Near East. *See* ISRAEL, HISTORY OF.

4. Nomadism in the Bible. ***a. The patriarchal period.*** JABAL, a descendant of Cain, is the father of nomads, described as possessing cattle and dwelling in tents (Gen. 4:20), although Abel seems to represent this ideal over against Cain. The patriarchs are pictured as ass nomads. Abraham moved his tent from place to place (Gen. 13:3, 5, 18; 20:1; etc.; cf. Heb. 11:9). He possessed cattle (Gen. 12:16—the reference to camels may be anachronistic). He had grazing rights established with Lot (Gen. 13:8 ff). His tent may have been divided into two, with the wife behind the curtain in her quarter (Gen. 18:9-10).

The Ishmaelites are throughout the OT and even in modern times related genealogically to the Arab nomads (Gen. 37:25; Isa. 21:13). The prophecy of Ishmael's future suggests this nomadic life (Gen. 16:11; vs. 12 sees him as a "wild ass," and it is interesting that modern Syrians sometimes use a similar epithet to describe the Bedouins). The place names and encampments of the Ishmaelites support this identification with the Arabs (Gen. 25:13-18). It is significant that under David, an Ishmaelite is in charge of the camels (I Chr. 27:30). The Ishmaelites are linked with the Edomites among the enemies of Israel (Ps. 83:6).

The story of Isaac involves nothing that is not consonant with this seminomadic state. He settles down for a season and raises grain, then moves on (Gen. 26:12). The ass is important in this history (Gen. 22:3; 24:35; 30:43; 32:5). The fear of vengeance is strong, as in the contrast in the figures of the striving brothers, Jacob and Esau, the reputed ancestors of the Israelites and the Edomites.

Jacob's return from Laban is described almost like the movement of a small tribe of nomads with its several tents (Gen. 31:33). The descent of Jacob's family seeking provender from Joseph in Egypt is paralleled by many similar events in Egypt, such as that of the Beni-hasan (Gen. 42; cf. Gen. 46:34; 47:4). Joseph's dream indicates the seminomadic state of his family (Gen. 37:5 ff).

The Kenites and the Midianites seem to be tent-dwelling nomads (Judg. 5:24; 6:4-5). The eruption of camel-riding Midianites is verified in nonbiblical records, as is the settling of the Edomites in their territory. In Egypt the Israelites lived in the area frequented by nomads and seminomads (*see* GOSHEN, EGYPT). Moses takes refuge among a pastoral nomadic tribe (Exod. 2:15 ff), and tends sheep (Exod. 3:1 ff). The promise of a land flowing with milk and honey is calculated to appeal not only to slaves but also to such nomads whose traditions were on a mere sustenance level. In the wilderness wandering, Israel was again a seminomadic people moving with their cattle from oasis to oasis (Num. 33:1 ff; cf. Num. 10:31). The TABERNACLE can be appropriate only as a shrine for people with such a nomadic tradition. The tribal organization also suited tent dwellers more than city people (Num. 1:52, etc.).

b. After the Conquest. In the Conquest as described in Joshua and Judges there are elements of ass nomadism (Josh. 15:18 [cf. water in vs. 19]; Judg. 10:4; 12:14; etc.). Some of Israel remained in tents and were shepherds long after the settlement (Deut. 5:30; II Sam. 20:1; I Kings 12:16). Nabal's wealth is reckoned like that of a nomad, in terms of sheep and goats (I Sam. 25:2). The nomadic origin of Israel could not be forgotten. Imagery from the tent is in the poetic and prophetic books (Pss. 78:55; 104:2; Song of S. 1:5, 8; Isa. 33:20; 40:22; Jer. 10:20; etc.). The Rechabites (*see* RECHAB) only intensified this traditional nomadic ideal (Jer. 35:6 ff; *see below*). All the prophets championed this nomadic ideal against the seductiveness and idolatry of urban society. The memory is clearly confessed when it is declared: "A wandering Aramean was my father" (Deut. 26:5). Some even think the word HEBREW may mean "wanderer" (Gen. 14:13).

In the later books the nomads are located in the E (Jer. 49:29) and in the desert (Jer. 25:24). They are possibly already called Arabs (Isa. 13:20). They give tribute to Jehoshaphat of rams and goats (II Chr. 17:11). The story of Job has features from both the nomadic and a settled background (Job 1:3, 14, 17, 19; 6:18-19).

c. Conflict with the sown and the settled. Throughout history the conflict between the desert and the sown, between nomads and city dwellers, has continued. The clash is intensified whenever drought brings on a scarcity of game or pasture. The nomad raids the agricultural settlements for food. The boundary of desert and sown is fluid and fluctuates frequently. The nomad acquires foreign wives by capture and is perhaps influenced by his latest acquisition to abandon some of his nomadic traditions and ideals. For some reason the nomadic tribe which seeks to conquer an agricultural society usually prevails, as Israel did over Canaan, or the Amorites over Mari. Thus political leadership may go to the nomads, and there is an ethical stratification of society.

The Near East saw many raids, infiltrations, and conquests of settled communities by nomadic and seminomadic tribes. This conflict reaches back into the very first chapters of the Bible, when murder is committed by one whose posterity largely represents urbanized society (Gen. 4:8, 17). The tower of Babylon (Gen. 11) and Sodom and Gomorrah (Gen. 13:12-13; 18–19) indicate the same distrust of city life. Jacob and Esau renew the rivalry of Abel and Cain (Gen. 25:27 ff). The Israelites themselves raided, conquered, and opposed the remnants of Canaanite civilization, but were in turn harassed by Midianites, Moabites, Ammonites, etc. Not until the settlement did Israel practice much agriculture or viniculture. There was within Israel a conflict between those who became urbanized or Canaanized and those who lived as seminomads with flocks, holding strongly to their nomadic ideals. The God of the nomads is in conflict with the gods of the Canaanites.

d. The nomadic ideal. The prophets from Nathan to Elijah tried to keep the nomadic ideal alive. It reached its zenith in the Rechabites. Some scholars believe the tradition of JOHN THE BAPTIST and Qumran represents the same retreat from the temptations of urban society. For development of this idea, *see* the work of John Flight in the *bibliography*.

Since pastoral nomads do not practice viniculture, wine is considered an evil (Jer. 35:7, 9). The Rechabites (vss. 6, 8) and modern Muslims do not

drink wine. Perhaps the stories of Noah (Gen. 9: 21 ff) and Lot (19:30 ff) reflect this aversion to strong drink (Lev. 10:9; Deut. 32:32; etc.). The NAZIRITE also abstains (I Sam. 1:15; Luke 1:15).

A certain type of moralism, strictly enforced, characterizes the nomad in all periods of history. The Rechabites urge that all symbols of pagan civilization be overthrown and that Israel return to living in tents as the only proper dwelling for God's people (Jer. 35:9-10).

The democratic ideal is most strong in Israel. It is reflected in the laws of the covenant and especially in the Deuteronomistic concept of history and its judgment on the kings. It reaches its epitome in the antimonarchic speech of Samuel (I Sam. 8:10 ff) and in his apologia (12:1 ff). But the action of Gideon (Judg. 8:23) and the parable of the trees (Judg. 9:8 ff) have the same attitude.

e. Miscellaneous customs. Outside the Bible, the Beni-hasan give a clear picture of the Semitic ass nomad. The tribe had about thirty-seven families. They wore woolen tunics, and sandals; and they used the composite bow, throw sticks, and javelins for weapons. It is obvious that these nomads used their herds for everything from dwelling place to bottle. Tents were made of goat hair; tunics, of wool; sandals, of leather; bottles, of goatskin (cf. Mark 2: 22 [KJV "bottles"; RSV "skins"]). The flat tent and the pole of the modern Arab nomad may perpetuate the tent of the early Israelite (Isa. 33:20). Grazing ground was arranged by custom and agreement.

Vengeance is characteristic of nomadic society and is perhaps reflected in the "eye for eye, tooth for tooth" (Exod. 21:24; Lev. 24:20; although this law sets a limitation for vengeance). Vengeance is not merely getting even with the enemy, but is a method of repairing the breach in one's own organization. Lamech's Song is a clear song of vengeance (Gen. 4:23-24).

In direct contrast, hospitality is also traditional in nomadic society (Heb. 13:2; cf. Gen. 18:1 ff; *see* SOJOURNER). This custom was horribly broken in Sisera's murder by Jael (Judg. 4:17 ff).

NON nŏn. KJV form of NUN in I Chr. 7:27.

NOPH nŏf. KJV translation of נף; a dissimilated form of Moph, the Hebrew name of MEMPHIS.

NOPHAH nō'fə [נפח] (Num. 21:30 KJV; RSV mg.). A town of Moab, mentioned in the poem about the exploits of Sihon king of the Amorites. The text is doubtful; the RSV, comparing the LXX and the Samar., reads *nuppaḥ 'ēsh*, "fire spread," for *nōphaḥ 'aṣher*, "Nophah which," by omission of a single consonant. S. COHEN

NORTH. *See* ORIENTATION.

NORTH COUNTRY, THE [ארץ צפון, land of the north]. A name applied by the prophets to the country of any invader of Palestine that approached from the N. Since Palestine was a land bridge in the ancient world, with the Mediterranean Sea to its W and the Syro-Arabian Desert to the E, its principal international highways ran N and S. Egypt lay to the S, and all the other great powers (Assyria, Babylonia, Syrians, and the non-Semitic folk of Anatolia, the Caucasus region, Media, Persia, and Elam) had access to Palestine from the N. "North country" could thus refer also to E lands (Isa. 41:25).

For those Hebrews who accepted the Canaanite concept that the mountain of the gods lay far to the N (Ps. 48:2-3; Isa. 14:13-14), and who believed that manifestations of their own god, Yahweh, likewise came from the N (Job 37:22; Ezek. 1:4), a prophet's vague and nonspecific reference to a visitation by a foe from the N might well have been interpreted as an encounter with an army of God's own avengers. Usually such an enemy was directed against Judah, but Yahweh's agents from the N country were also sent against Egypt (Jer. 46:10, 20, 24) and Philistia (47:2).

When a dominant nation menaced the Hebrews, a veiled reference by the prophet to the foe from the N country would be readily identified by the people. Often, however, historical or geographical references in the context aid in identifying the N country. Sometimes it is Assyria, together with its W provinces in Mesopotamia, by the Euphrates (Jer. 46:10; Zeph. 2:13), the place to which men of Israel had been exiled (II Kings 17:6) and from which they were expected to return (Jer. 3:12, 18; 16:15; 23:8; 31:8). It is at other times the Chaldean kingdom in Babylonia (Ezek. 26:7; Zech. 2:6-7), the kingdom of Persia (Isa. 41:25; Jer. 50:3, 9, 41), or the Seleucid kingdom of Syria (Dan. 11:6 ff).

Sometimes non-Semitic northerners are mentioned (Ezek. 38:6), but it has been demonstrated that the earlier assumption that the N foe in the book of Jeremiah is to be identified with the Scythians mentioned by Herodotus (I.103-106; IV.11), is historically improbable. Where tribes or nations of the N are differentiated from the Babylonians (Jer. 1:14-15; 25:9; 50:9, 41), they appear to be but mercenary allies or dependents in the armies of the stronger nation.

NORTHEASTER, THE. The translation of Εὐροκλύδων, Εὐροκύλων (variant readings, the former two words meaning "east wind" and "wave" and the latter two words meaning "east wind" and "north wind"), the name of a northeasterly gale wind before which Paul's ship was driven (Acts 27:14). The KJV transliterates "Euroclydon"; ASV "Euraquilo." *See* EAST WIND; PALESTINE, CLIMATE OF. R. B. Y. SCOTT

NORTHERNER [הצפוני] (Joel 2:20). A term which apparently refers to the LOCUST swarms which, con-

trary to usual circumstances, came to Jerusalem from the N (as in 1915). Having promised to restore fertility to the land, God also promised removal of the locust plague and with it the shame and economic distress which the plague had caused (vs. 19). This was probably to be done by a great wind (cf. Exod. 10:19), which would drive the locusts to their death in the desert, the Dead Sea, and the Mediterranean (a phenomenon witnessed by Jerome).

Joel's choice of the term "northerner" for the locusts must have reminded many of the earlier prophecies concerning the enemy from the N (Jer. 1:14; 13:20; Ezek. 38:6, 15; 39:2). Moreover, the word was charged with many mythological associations. *See* NORTH COUNTRY.

NOSE RING [נזמי האף, *plural, lit.*, rings of the nose] (Isa. 3:21); KJV NOSE JEWELS. The word "ring" (נזם) may designate a nose ring; cf. the gold ring presented by Abraham's servant to Rebekah at the well (Gen. 24:22, 30) and specifically said to have been placed on the nose (Gen. 24:47). Figurative reference is made to putting a ring on the nose, as a gift of the Lord to Israel, in Ezek. 16:12. *See also* RING. J. M. MYERS

NOT MY PEOPLE [לא עמי] (Hos. 1:9); KJV LO-AMMI lō ăm'ī. Symbolic name given by the prophet Hosea to his third child, a son, to indicate God's impending judgment upon Israel.

NOT PITIED [לא רחמה] (Hos. 1:6, 8); KJV LO-RUHAMAH lō'rōō hā'mə. Symbolic name given by the prophet Hosea to his second child, a daughter, to indicate God's impending judgment upon Israel.

NUMBER, NUMBERING, NUMBERS. The Hebrews do not appear to have taken any interest in theoretical mathematics, but were content to apply such arithmetical tools as they had to cope with various practical problems. That they were greatly indebted to the older and more advanced civilizations of Egypt and Mesopotamia in respect to mathematics, as well as to other aspects of culture, is abundantly clear.

Bibliography

1. Egyptian mathematics. As early as the fourth millennium B.C. the Egyptians had developed a method of writing large numbers. On a royal mace of *ca.* 3500 B.C. there is a record of 120,000 prisoners, 400,000 oxen, and 1,422,000 goats. Egyptian mathematics was based on a rigid decimal system. The units were represented by single strokes, the tens by a symbol like an inverted "u," and there were symbols for 100, 1,000, 10,000, 100,000, and 1,000,000. The Egyptians never discovered that with a decimal system ten figures could serve for all possible numbers by being arranged in the order of units, tens, hundreds, etc. To write the number 985, e.g., required five units, eight tens, and nine hundreds—twenty-two symbols instead of the minimum of three. Addition and subtraction were no problem to the Egyptians, but they had some difficulty with multiplication and division. The problem of common fractions was too much for them to cope with, so they avoided them in computation, using unit fractions wherever possible. As early as 1700 B.C. the Egyptians arrived at a method of converting common fractions into a series of decreasing unit fractions—e.g., 3/4 could be written as the unit fractions 1/2 + 1/4, or 7/8 as 1/2 + 1/4 + 1/8. The fraction 2/3, however, did not yield to this treatment. Complementary fractions—i.e., those having a numerator one less than the denominator (2/3, 3/4, 4/5, 5/6, etc.) were frequently used, and there were special terms and symbols for them. A notable accomplishment of the Egyptian mathematics was the equation of the area of a circle with a square whose sides were 8/9 of the diameter—i.e., they came very close to the value of π as 3.1605. Egyptian mathematics reached its peak of development in the second millennium B.C., and most of our knowledge of it is derived from two documents: the Moscow Papyrus, dating *ca.* 1850 B.C., which deals with some twenty-five mathematical problems; and the Rhind Mathematical Papyrus, *ca.* 1650 B.C., with some eighty-five problems. Egyptian mathematics did not advance beyond the achievements reflected in these two papyri, and for a millennium afterward there was no significant development. Although Egyptian and Sumero-Akkadian mathematics were of about equal antiquity, the Egyptian remained the more primitive. Perhaps the reason for the lag of Egyptian mathematics behind the Sumero-Akkadian is to be seen in the characteristic modes of thought of the two cultures, the Egyptian being intuitive and the Mesopotamian abstract.

2. Mesopotamian mathematics. In Mesopotamia a remarkable level was achieved in mathematics and geometry. From earliest times the Sumerians and Akkadians knew both the decimal and the duodecimal or sexagesimal systems of numeration. The Sumero-Akkadian system was essentially sexagesimal, although there are influences of the decimal system. The decimal system was a Hamito-Semitic heritage, antedating the separation of Egyptian and Semitic, as indicated by the fact that the names of some of the numbers are obviously cognate. The sexagesimal system was the contribution of the non-Semitic Sumerians. The two systems blended without difficulty, preserving the advantages of each. The duodecimal base has the notable advantage of maximum divisibility, and its use continues in our divisions of time, the degrees of a circle, the dozen, and the gross. In the cuneiform system, as in the Egyptian, unity was represented by a vertical stroke or wedge and the other units to nine by combinations of such wedges. Ten was represented by a tailless wedge and the other numbers by tens and units. The symbol

for unity was also used for sixty and as well as for any power of sixty; this occasions some difficulty for the modern interpreter of cuneiform mathematical texts. Another cause of uncertainty is that a blank space sometimes indicated zero. A special symbol for zero was not devised until the late sixth century B.C. The problem of common fractions was partially solved by converting them, wherever possible, to sexagesimal fractions—i.e., the common fraction $\frac{m}{n}$ was resolved into $m \times \frac{1}{n}$, the unit fraction then converted to its corresponding sexagesimal fraction and multiplied by m; e.g., $3/4 = 3 \times 1/4 = 3 \times 15/60 = 45/60$.

The Sumerians and Akkadians made extensive application of practical mathematics in their complex business dealings, making use of bills, receipts, and notes in their accounting. Interest, varying from twenty to thirty per cent, was charged on loans. Besides the four basic arithmetical processes, the Mesopotamian mathematicians knew how to square and to extract the root of a number. They could compute the area of a triangle, quadrangle, and trapezium, and the volume of solid figures. They were acquainted with the Pythagorean theorem and the relation of the diameter and circumference of the circle. They were able to make practical application of their knowledge in metrology and in building. They prepared tables for convenience in reckoning. The rudiments of algebra were known to them. The progress achieved by the Sumerians and Akkadians in this field, as in other areas of culture, benefited the whole of the ancient Mediterranean world, and the Hebrews were heirs to some of this knowledge through the Canaanite civilization.

3. Biblical mathematics. The OT presents considerable data on the Hebrews' use of numbers, but most of it is simple enumeration.

a. Basic operations and terminology. The Hebrews were familiar with the four basic arithmetical operations, and they had at least an elementary control of fractions. The verbs ספר and מנה are the common words for the action of counting, and the derivatives מספר and מנין the common nouns for "number." The verb פקד, "attend to, visit, muster," is used of mustering and reviewing troops, of taking census of population, and of accounting and inventory of goods, and is thus equivalent to a verb of counting; its passive participle is used to designate the persons or things counted. The verb הוסיף, "add," is sometimes applied to specific numerals (Lev. 5:16; 6:5; 22:14; 27:13, 15, 19, 27, 31; II Kings 20:6 = Isa. 38:5), but its opposite, גרע (cf. Deut. 4:2; 12:32—H 13:1) does not occur in connection with any specific numeral, nor does the term עדף, "remainder." The basic arithmetical operations are illustrated in a number of simple examples: addition, Num. 1; 26; subtraction, Gen. 18:28-33; multiplication, Lev. 25:8; Num. 7:84-86; division, Num. 31:27. More complicated operations are seen in Lev. 25:50 ff; 27:18, 23. The unit fractions, of course, presented no problem and were widely used. Since the Hebrew system was decimal, the tenths were much used, even the common fractions 2/10 and 3/10. The problem of converting mixed fractions to a common denominator was apparently avoided. In the Ugaritic epic of Keret there is a striking illustration of disregard for exactness in dealing with fractions of diverse denominators. A series of catastrophes wipe out the Keret's progeny in its entirety, but piecemeal in the proportions of 1/3, 1/4, 1/5, 1/6, and 1/7. The sum of these fractions amounts to $459/420 = 153/140 = 1\ 13/140$. The poet may have been vaguely aware of the discrepancy but hardly exercised by it, since the best mathematicians of his time would not have been able to add these fractions.

The OT use of complementary fractions (*see above*) shows the influence of Egypt and Mesopotamia. The Hebrew idiom פי שנים (lit., "two mouths") originally meant "two parts out of three," or 2/3, exactly as the Akkadian *šenē pū* or *šenē pātu,* with which it is cognate. The expression still has this original sense in Zech. 13:8. The expression quite naturally developed the sense of "a double portion" or "twice as much" (II Kings 2:9; Ecclus. 12:5; 18:32; 48:12), and it always has this meaning in the Mishna and the Talmud. In Deut. 21:17 the sense is uncertain and may designate, in the original sense of the term, ⅔ of the entire estate rather than merely a double share among the brothers. The rabbis were aware of this archaic use of fractions and applied the terms "outside" (מלבר) and "inside" (מלגו) to distinguish the two concepts of ordinal and divisional fractions—e.g., the ordinal 1/5 of 20 considers 20 as 4/5 of a unit, with the missing 1/5 to be added, while the divisional or inside 1/5 of 20 considers the 20 as the whole. Thus an outside 1/5 = an inside 1/4, and an outside 1/6 = an inside 1/5, etc.

The Egyptians also used "mouth" in the sense of "proportion" in complementary fractions, thus the hieroglyph for "r" with two strokes attached designated 2/3 and with three strokes 3/4. Akkadian *šittā qātātu* and Hebrew שתי הידות, "two hands," meant "two parts (out of three)" or 2/3, and similarly "the four hands" of Gen. 47:24 means "four fifths" (so RSV). This form of the idiom, like "two mouths," also came to mean "twice as much," so that in Gen. 43:34 "five hands," originally "five parts (out of six)" or 5/6, means "five times as much" (so RSV), and similarly nine and ten "hands" (II Sam. 19:43; Neh. 11:1; Dan. 1:20) originally meant 9/10 and 10/11.

The measurements of the molten sea in the temple, ten cubits diameter and thirty cubits circumference (I Kings 7:23), show that the value of π was known only approximately. The Mishna ('Er. I.5) also gives the value of π as three. The earliest Hebrew treatise on geometry, *Mishnat ham-Middot,* composed *ca.* A.D. 150, gives the value of π as 3 1/7. This treatise also deals with the terminology and rules of plane and solid geometry from a practical rather than theoretical standpoint. This document was doubtless the basis of the forty-nine measurements quoted by Rashi, Ibn Ezra, and others. Unfortunately, we have little or no data outside the OT to illustrate the ancient Hebrews' dealing with numbers.

b. Representation of numbers. In the OT the numerals are always spelled out, and this is true also in the Moabite Stone and the Siloam tunnel inscription. The fact that we have no evidence for the early use of symbols for numbers among the Hebrews does not necessarily mean that they did not have and use

some system of figures. At Ugarit the numerals in the literary texts are always spelled out, but in the administrative documents they are written ideographically with the Sumero-Akkadian symbols. The Old Aramaic inscriptions from Zenjirli, the Aramaic documents from Elephantine, and some Phoenician inscriptions spell out the numerals and also use figures. In the Eshmunazar Inscription the date is given both in words and in figures. On the Aramaic lion weights from Nineveh (eighth-seventh centuries B.C.) the numbers are doubly represented in words and figures. In South Arabic inscriptions also the numbers are sometimes written in full and sometimes represented by figures. In view of the fact that other peoples around them used symbols as well as the written names for the numerals, it seems altogether likely that the pre-exilic Israelites also used symbols, and most likely the same symbols and system as the Egyptians, Phoenicians, Arameans, and South Arabians.

The use of the letters of the alphabet for arithmetical figures is first found on Maccabean coins, and here also the numbers are spelled out as well. The Mishna (Shek. III.2) states that the three chests used in the second temple were marked א, ב, ג; and this device may very well have been in use for some time before the second century B.C. Traces of this system are found in Origen, in the Cambridge MS of the Mishna, in the Jerusalem Talmud, and in a Hebrew inscription from Aden in the British Museum, and it came to be the standard system for numeration in postbiblical Hebrew writing. The units are denoted by א-ט, the tens by י-צ, the first four hundred by ק-ת, five hundred to nine hundred by ת plus the symbol for the other hundreds. The thousands are indicated by the units with two dots above. For the numbers fifteen and sixteen the combinations of nine plus six and nine plus seven are used to avoid the short forms of the divine name, יה and יו.

c. Number and text criticism. Some of the numbers given in the OT are manifestly absurd, discrepant, or otherwise suspect, and the question whether some system of symbols for numerals, and what system, if any, may lie behind these suspect numbers, is a concern that possibly belongs in the area of textual criticism. In the MT of II Sam. 24:13 the number of years of famine is given as seven, while the LXX and the parallel passage in I Chr. 21:12 give three. It has been suggested that behind this discrepancy lies the confusion between the letters ג and ז. Again in Judg. 8:10 the MT has "fifteen thousand," while Josephus (Antiq. V.vi.5) gives "eighteen thousand." The supposition that the confusion of יה and יח gave rise to this discrepancy is complicated by the question of the origin of the custom of substituting טו for יה to avert profane use of a form of the ineffable name. Apparently יה was used for some time to denote "fifteen," then later the order of the letters was inverted, and finally טו, nine plus six, was substituted. The discrepancy between the MT and Josephus may indicate that "fifteen" was represented by יה in Josephus' time. Recourse to the theory that suspect numbers of the OT are due to misreadings from the system of literal notation is defensible in very few cases, although it may conceivably be the correct explanation in these few cases. For the most part, such recourse is to no avail; and in the case of the Chronicler's startling figures, which are an integral part of his work, there is no remedy except the proverbial grain of salt.

4. Rhetorical uses of numbers. The rhetorical and symbolic use of numbers is a notable feature of biblical literature and of other ancient Near Eastern literatures as well. Many of the uses to be noted here have analogues and parallels in the older literatures of the Egyptians, Sumerians, Akkadians, Canaanites, and Hittites. The Ugaritic texts in particular share with the OT some striking rhetorical and symbolic uses of numbers. Perhaps the best way to deal with this topic is to treat the various numbers more or less in order. Because of their special importance in symbolic use, separate treatments are accorded SEVEN and TWELVE.

The various uses of the number "one" in the Bible present nothing especially remarkable. Hebrew has no indefinite article, but "one" is sometimes used as its virtual equivalent (Gen. 22:13) and often as the equivalent of an indefinite pronoun "someone, anyone," "a certain man." The ordinal, ראשון, "first," is frequently used in a series, as might be expected, but the cardinal, אחד, אחת, is also used for the ordinal, notably in the P creation story (Gen. 1:5) but also in Ruth 1:4; I Sam. 1:2; and in dates (Gen. 8:5, 13; Ezra 10:16; Dan. 9:1). The use of the cardinal for the first of a series is a striking literary device, perhaps a conscious archaism, and is found also in Akkadian, Hittite, Tocharian, Greek, Latin, Middle High German, and Slavic (cf. W. Winter's article in the *bibliography*).

The number "one" is basic to the doctrine of monotheism (Deut. 6:4; Mark 12:32; I Cor. 8:6), to the Christian assertion of the unity of Christ with God (John 10:30) and the unity of the church as the body of Christ (I Cor. 12:12-14), as well as to the Judeo-Christian doctrine of marriage (Gen. 2:24; Matt. 19:5; I Cor. 6:16; Eph. 5:31).

Hebrew usage prefers concrete rather than abstract forms of expression; thus a definite number is often used when only a guess or rough approximation is intended. The number "two" is used in the sense of "a few" (Num. 9:22; I Kings 17:12), or the next higher number may be added to emphasize that the figure is only approximate (II Kings 9:32; Job 33:29; Isa. 17:6; Amos 4:8; Matt. 18:20), like the Latin *bis terque*. Similar is the expression "yesterday and the day before," meaning "formerly, a short while ago" (Gen. 31:2, 5; Exod. 5:7, 14; 21:29, 36; Deut. 4:42; 19:4, 6; Josh. 3:4; 4:18; 20:5; Ruth 2:11; I Sam. 4:7; I Chr. 11:2). Emphasis is achieved by a twofold repetition of a word (I Kings 13:2; Isa. 43:25; 65:1; Matt. 7:21; 25:11; Luke 6:46).

"Three" is even more common than "two" as the designation of a small number (Gen. 30:36; 40:10, 12; 42:17; Exod. 2:2; 3:18; 5:3; 8:27; 10:22; 15:22; Lev. 19:23; Josh. 1:11; 2:16, 22; II Sam. 24:13; I Kings 12:5; II Kings 11:5; 13:18; 20:5; I Chr. 21:12; Esth. 4:16; Isa. 16:14; 20:3; Dan. 1:5; Jonah 1:17). It is, of course, not always possible to tell whether the number is intended to be exact or only approximate. The addition of the next higher number

makes it certain that neither figure is to be taken as exact (Exod. 20:5; Deut. 5:9; Jer. 36:23; cf. *Odyssey* V.305: τρισμάκρες Δαναοὶ καὶ τετράκις, Latin *ter et quater*). Any number may be thus raised: "two or three berries . . . four or five" (Isa. 17:6); "five or six times" (II Kings 13:19). Such expressions are common in Akkadian (cf. Middle Assyrian Laws No. 24; Amarna letter 29.17, 20). Emphasis may be strengthened by triple repetition (Isa. 6:3; Jer. 7:4; 22:29; Ezek. 21:27).

The collocation of a numeral with its sequel within the same clause, either syndetically or asyndetically, is related to a similar rhetorical device in Northwest Semitic poetry in which the consecutive numbers stand in synonymous parallelism. This usage is common in Ugaritic and OT poetry and appears to be relatively rare elsewhere. The collocation of "one" and "two" is fairly common in the OT (Deut. 32:30; Job 33:14; 40:5; Jer. 3:14) but does not occur in the extant Ugaritic texts. "Two" and "three" are frequently used in this way in Ugaritic—e.g.:

> Two feasts Baal hates,
> three the Cloud Rider;
>
> He smites him twice on the pate,
> thrice on the ear;
>
> Double I will give in silver,
> treble in gold;

and in the OT (Hos. 6:2; Ecclus. 23:16; 26:28; 50:25). "Three" and "four" are juxtaposed in Prov. 30:15, 18, 29; Amos 1:3–2:6; Ecclus. 26:5, but this pair is missing in the Ugaritic texts. In Isa. 17:6 we have the combination of "two or three" paralleled by "four or five." "Five" and "six" do not occur in parallelism in the OT (II Kings 13:19 is not a case in point), nor in the Ugaritic poems. "Six" and "seven" are so used in the OT (Job 5:19; Prov. 6:16), but not in Ugaritic. "Seven" and "eight" are especially favored in the Ugaritic poems:

> Seven years let Baal fail,
> eight the Cloud Rider;
>
> (Take) with you your seven lads,
> your eight swine;
>
> El answers in the seven chambers,
> within the eight crypts;

and occur once in the OT (Mic. 5:5—H 5:4), or twice if we include Eccl. 11:2. The juxtaposition of "nine" and "ten" of Ecclus. 25:7 is not attested elsewhere in the OT or in Ugaritic. Once in the Ugaritic texts "eighty" and "ninety" are used, but this may be a scribal error for the characteristic Ugaritic use of ascending multiples of eleven:

> Sixty-six cities he takes,
> seventy-seven towns;
>
> He lies with her seventy-seven times,
> . . . eighty-eight

(cf. Gen. 4:24: "sevenfold" and "seventy-sevenfold"). Another striking numerical device of the Ugaritic myths and epics is the seven-day cycle with the enumeration of each day and its event and with the climax on the seventh day.

5. Cultic and symbolic uses of numbers. The frequency of certain numbers in connection with cultic concerns suggests that these numbers had special significance and importance of themselves, or as symbols of something deemed significant. The reasons for the special importance of some of the sacred numbers are rarely simple or obvious.

Next to the number SEVEN, the number most frequently used in connection with sacred matters is three. This number naturally suggests the idea of completeness—of beginning, middle, and end. The ancients conceived of the universe as consisting of three divisions, heaven, earth, and nether world. Gods often were grouped in triads, in relation to the three parts of the universe, or of the family—father, mother, child. Three played an important part in Egyptian cult practices, being the common number of times or periods which cult operations were repeated or continued. So it is also in the OT: certain sacrificial animals are to be three years old (Gen. 15:9); the fasts are three per year (Exod. 23:14); a three-year taboo was set on fruit (Lev. 19:23); ritual baths were required on the third and seventh days (Num. 19:12; 31:19); the times of daily prayer were three (Dan. 6:10). In many cases it is difficult to tell whether the number three has symbolic significance, or is used merely for a small round number or as a specific number with no symbolic significance. The division of a military force into three is purely a matter of strategy (Judg. 7:16; Job 1:17). In the dreams of Pharaoh's butler and baker (Gen. 40) the number three plays a special role. Periods of three days (Gen. 30:36; Exod. 3:18; 19:11), three months (Exod. 2:2), or three years (I Chr. 21:12) are common. The three times Elijah stretched himself on the widow's child (I Kings 17:21) must have had magical import. The number three was apparently important for the cities of refuge, for they were to be augmented by an additional three (Deut. 19:7, 9). Three daughters and seven sons is the ideal proportion of progeny (Job 1:2; 42:13). There are three heavenly witnesses (I John 5:8). Tripartite composition occurs in a number of striking cases without mention of the number. The formula "and God blessed" occurs three times in the P creation story (Gen. 1:22, 28; 2:3). The sanctuary had three divisions—court, holy place, and most holy place (Exod. 26:33; 27:9; I Kings 6:16-17). The blessing of Aaron (Num. 6:24-26) mentions the divine name three times and predicates three pairs of divine action. In Nah. 1:2 the divine name is repeated thrice. The Trisagion of Isa. 6:3 is only a species of superlative. The Qumran scroll here has the word "holy" only twice! The association of deity with "three" in the OT is no evidence of trinitarian doctrine; cf. the affirmations of unity and uniqueness of Deut. 6:4; Isa. 41:4; 44:6; 48:12. The "I AM" of Exod. 3:14 is expanded to cover the past, present, and future (Rev. 1:4; 4:8). The baptismal formula (Matt. 28:19) and the apostolic benediction (II Cor. 13:14) receive their threefold character from the doctrine of the Trinity. The three-day descent into Hades (Matt. 12:40) is an ancient mythological motif (cf. Ishtar's Descent into the Netherworld).

Multiples of three present nothing particularly noteworthy. There are the thirty-day month, thirty shekels (Exod. 21:32), three hundred shekels (Gen. 45:22). In I Maccabees three thousand is a frequent

figure. The figures 3,600 and 30,000 are used occasionally (Josh. 8:3; II Chr. 2:2—H 2:1).

Four is a sacred number the world over, doubtless deriving its significance primarily from the four cardinal directions. Among the ancient Egyptians four played an important part, and so also among the Mesopotamians. In the OT four often occurs in relation to the universe: the rivers of paradise (Gen. 2:10); the corners of the earth (Isa. 11:12); the winds (Jer. 49:36; Dan. 7:2; Zech. 2:6; Rev. 7:1). Four is common in the measurements and components of sacred furniture (Exod. 25–27; I Kings 7:5, 19, 27, 30-32, 34, 38; Ezek. 41–43). Four-day periods are uncommon—e.g., the term of mourning for Jephthah's daughter (Judg. 11:40). The destroyers are of four kinds (Jer. 15:3); the sore acts of judgment are four (Ezek. 14:21); four horns scatter Judah (Zech. 1:18-21); the angels of destruction are four (Rev. 9:13-15). The guardians of the throne of God are four (Ezek. 1; 10; Rev. 4:6-7; 5:6, 8, 14; 6:1; 15:7; 19:4). The throne of God is transported (Ezek. 1; 10) and guarded (Rev. 4:6, 8; 5:6, 8, 14; 6:1; 15:7; 19:4) by four creatures. Four chariots patrol the earth (Zech. 6:1-8), and four horsemen bring calamity on the earth (Rev. 6:1-8).

Of the multiples of four, the most significant as a symbolic and sacred number is forty. It is used as a round number to designate a fairly long period of time in terms of human existence or endurance. Forty years is the approximate length of a generation. Isaac and Esau married at forty (Gen. 25:20; 26:34). A man was full grown at forty (Exod. 2:11; Acts 7:23; cf. Josh. 14:7; II Sam. 2:10). The Koran 46.14 says that this is the age at which man attains to his full strength. This was the age at which Mohammed received his call and at which Abu Baqr was converted. Thrice forty was the maximum span of life (Gen. 6:3; Deut. 34:7); and twice forty was ripe old age (II Sam. 19:34-35; Ps. 90:10). The forty-year period in the wilderness (Exod. 16:35; Deut. 2:7; 8:2; 29:5; Josh. 5:6; Neh. 9:21; Ps. 95:10; Amos 2:10; 5:25) was long enough for a whole generation to die off (Num. 14:33; 32:13). The 480 years from the Exodus to the building of the temple (I Kings 6:1) is counted as twelve generations in I Chr. 6:3-8—H 5:29-34. The forty-year rules of the tribal chieftains (Judg. 3:11; 8:28; 13:1; I Sam. 4:18) represent roughly a generation, and the eighty years of Judg. 3:30 amount to two generations. The forty-year reigns of David, Solomon, and Joash (II Sam. 5:4; I Kings 2:11; 11:42 [cf. I Chr. 29:27; II Chr. 9:30]; II Chr. 24:1) are proof of divine favor. Saul's reign of forty years (cf. Acts 13:21; Jos. Antiq. VI.xiv.9) was dropped from the MT (I Sam. 13:1), as incompatible with divine disfavor. The Mesha Stela sets Israel's oppression of Moab at forty years. Forty days or years was the common duration of critical situations, of punishment, fasting, repentance, vigil (Gen. 7:4, 12, 17; 8:6; Exod. 24:18; 34:28; Num. 13:25; Deut. 9:9, 11, 18, 25; 10:10; I Sam. 17:16; I Kings 19:8; Ezek. 4:6; 29:11-13; Jonah 3:4; Matt. 4:2 [cf. Mark 1:13; Luke 4:2]; Acts 1:3). The Egyptian process of embalming took forty days (Gen. 50:3). Forty lashes (Deut. 25:3), but not more (II Cor. 11:24), was the maximum flagellation.

Other miscellaneous examples of the application of forty are Judg. 12:14 (sons); II Kings 8:9 (loads of earth); Neh. 5:15 (shekels); Ezek. 41:2; 46:22 (measurements).

In Acts 23:13, 21, "more than forty" shows the figure to be a round number for a moderately large sum. Similar uses of "forty" are common with Greek and Roman writers. In Persian the figure is often used as the equivalent of "many." The terms for "centipede" (e.g., in Persian and Turkish) attribute to the creature "forty feet."

Other multiples of four and forty are four hundred (Gen. 15:13; Judg. 21:12) and four thousand (I Sam. 4:2; Matt. 15:38; Acts 21:38). The number forty thousand is common for a very large round number (Josh. 4:13; Judg. 5:8; II Sam. 10:18; I Kings 4:26; I Chr. 12:36; I Macc. 12:41; II Macc. 5:14), and four hundred thousand for a still larger number (Jos. Antiq. VII.xiii.1).

Five as half of the basic number ten is important in the Bible (I Kings 7:39, 49; Matt. 25:2) and is often used as a small round number (Lev. 26:8; I Sam. 17:40; 21:3; II Kings 7:13; Isa. 19:18; 30:17; Matt. 14:17, 21 [=Mark 6:38, 44; Luke 9:13; John 6:9]; I Cor. 14:19; II Esd. 14:24). Five is a common figure in penalties (Exod. 22:1; Num. 3:47; 18:16) or rewards (Gen. 43:34; 45:22), as is a fifth (Lev. 5:16; 22:14). Multiples of five are common in measures (Gen. 6:15; Ezek. 40:15), in compensation (Deut. 22:29), and in administrative divisions of civil or military personnel (Exod. 18:21; Deut. 1:15). The fifty days or years of the Feast of Weeks and the Jubilee (Lev. 23:16; 25:10-11) are comprised of seven squared plus one. The multiples up to 500,000 are fairly frequent (Gen. 5:32; 11:11; Exod. 30:23-24; Josh. 8:12; Judg. 20:45; II Sam. 24:9; I Chr. 29:7; II Chr. 13:17; Esth. 9:6, 12; Ezek. 42:16-20; 45:25; 48:15; Matt. 14:21 [=Mark 6:44; Luke 9:14]; I Cor. 15:6).

The number six seldom, if ever, has symbolic or sacred meaning. The six years of Exod. 21:2 correspond to the work days of the week (Exod. 20:9). The six steps of Solomon's throne are of less symbolic significance than the twelve lions (I Kings 10:19-20). The six-cubit measuring reed of Ezekiel's vision (Ezek. 40:5; 41:8) was standard. The sixth of an ephah of Ezek. 45:13 equals half a seah (*see* WEIGHTS AND MEASURES). The six wings of the seraphim (Isa. 6:2) were functional, a pair each for purposes of reverence, modesty, and locomotion.

The numbers eight and nine have no apparent symbolic import. The eighth day for circumcision (Gen. 17:12), redemption of the first-born son (Exod. 22:29), defilement of a Nazirite (Num. 6:10), and the holy convocation (Lev. 23:36) is merely the day after the all-important period of SEVEN days. Nine is sometimes significant as one less than ten (Neh. 11:1; Luke 17:17), and ninety-nine as a hundred minus one (Matt. 18:12).

The convenience of ten as the basis of the decimal system derives obviously from the use of the fingers for simple calculations. In the Cabalistic Book of Creation (ספר יצירה) 1.13, the ten spheres are deduced from the fingers of the hand. The simplest use of ten is to denote a round or complete number, and it is frequently so used throughout the Bible (Gen. 24:10, 22; 31:7; Lev. 26:26; Num. 14:22; Josh.

22:14; Judg. 17:10; I Sam. 1:8; 17:17; II Sam. 18:11; I Kings 14:3; II Kings 5:5; 20:9-11; Neh. 5:18; Job 19:3; Eccl. 7:19; Isa. 6:13; Jer. 41:8; Zech. 8:23; II Esd. 5:46; Tob. 4:20; Matt. 25:1, 28; Luke 15:8; 19:25; Rev. 2:10). As a sacred number, ten may derive some of its significance from the fact that it is the sum of the two other especially sacred numbers, three and seven. The Ten Words (Exod. 34:1; Deut. 4:13; 10:4) may have been arranged as a mnemonic device, but the sanctity of the commandments lent itself to the number. The TITHE as a convenient fraction also became a sacred figure. Ten is much used in ritual connections. Many of the furnishings of the tabernacle and the temple were arranged or measured in tens (Exod. 26; I Kings 6–7; II Chr. 4; Ezek. 45). Ten is a prominent feature in apocalyptic symbolism (Dan. 7:7, 20, 24; Rev. 12:3; 13:1; 17:3, 7, 12, 16). In the creation story of Gen. 1 the clauses "and God said," "and God saw," "and God blessed," occur ten, seven, and three times, respectively, and it seems unlikely that this is pure accident. The LXX has "and God saw" once more (vs. 8*b*) than the MT, thus spoiling the pattern. If the LXX reading is original, the MT has altered it to conform to the sacred number. The antediluvian patriarchs are ten (Gen. 5), and the postdiluvian ten (Gen. 11:10-30). Ten times the Israelites in the wilderness put the Lord to the test (Num. 14:22), ten times Abraham was tempted (Jub. 19:8), and Augustine mentions ten persecutions (*City of God* XVIII.52).

Of multiples of ten, fifty is a common round number (Gen. 6:15; 7:24; 8:3; 18:24; Exod. 18:21; 26:5; Lev. 23:16; 25:10; 27:3; Num. 4:3; 16:2; Deut. 22:29; Josh. 7:21; II Sam. 24:24; I Kings 18:4; II Kings 1: 9-14; Ezra 8:6; Isa. 3:3; Jth. 1:2), and so also a hundred (Lev. 26:8; II Sam. 24:3; I Chr. 21:3; Prov. 17:10; Eccl. 6:3; 8:12; Matt. 19:29; Mark 10:30; Luke 8:8; Tob. 14:11; Jth. 10:17) and a thousand (Exod. 20:6; 34:7; Deut. 1:11; 7:9; 32:30; I Sam. 18:7; 21:11; 29:5; II Sam. 18:12; I Chr. 12:14; 16:15; Job 9:3; 33:23; Pss. 50:10; 84:10; 90:4; 91:7; 105:8; 119:72; Eccl. 6:6; 7:28; Isa. 30:17; 60:22 [clan]; Jer. 32:18; Amos 5:3; Mic. 6:7). The etymology of the word for "thousand" (אלף) connects it with the idea of "gregariousness," "crowd"; hence it is applied to cattle (herd) and to men (tribe, clan; Num. 1:16; Josh. 22:21, 30; Judg. 6:15; I Sam. 10:19; 23:23[?]; Isa. 60:22; Mic. 5:2—H 5:1; Zech. 12:5-6).

Multiples of a thousand are used for hyperbole: seven thousand (I Kings 19:18); ten thousand (Lev. 26:8; Deut. 32:30; I Sam. 18:7; 21:11; 29:5; Pss. 3:6; 68:17; 91:7; Song of S. 5:10; Hos. 8:12; Mic. 6:7; Wisd. Sol. 12:22); seventy thousand (II Sam. 24:15). A million (I Chr. 21:5; 22:14; II Chr. 14:9; Dan. 7:10), "thousands of ten thousands" (אלפי רבבה; Gen. 24:60), and "ten thousand times ten thousand" (רבו רבון; Dan. 7:10; cf. Enoch 40:1; Rev. 5:11) press the limits of numerical imagination. In the Ugaritic poems (Keret A 89-91) the highest number expressed is three hundred myriad (*tlt mat rbt*)—i.e., three million—and beyond this the poet can adduce only the parallels "innumerable" and "beyond reckoning" (cf. Gen. 41:49; I Chr. 22:4; Job. 5:9; 9:10; 21:33; Pss. 40:12—H 40:13; 104:25; Heb. 11:12; 12:22).

Josephus in the preface to his *Antiquities* says that Moses expressed some things enigmatically, but Josephus apparently did not understand this to apply to numbers in particular. Aristobulus the philosopher (Euseb. Prep. Evang. XIII.12-13) interpreted the number seven mystically, and Philo followed suit, elaborating the hidden wonders of the number in considerable detail (*On the Creation of the World* XXX ff). The Talmudic, Midrashic, and Cabalistic literatures developed and used for the interpretation of the Scriptures a sort of numerology called Gematria (גמטריא), a Hebraized form of γεωμετρία, which sought to discover the hidden sense of the Hebrew text through the numerical values of the letters of the alphabet. This method was recognized as the twenty-ninth of the thirty-two hermeneutical rules of Rabbi Eliezer ben Jose. A famous example is the number 318 of Gen. 14:14, which is the numerical equivalent of Eliezer (אליעזר = 1 + 30 + 10 + 70 + 7 + 200), and so the Talmud interpreted it. Christians took over this mode of exegesis, and the Epistle of Barnabas interpreted the number to refer to the crucified Christ, the three hundred being T, the cross; and the eighteen, I H, the abbreviation of Ἰησοῦς. In Gen. 49:10 the enigmatic יבא שילה has the numerical value of 358, which is also the value of the word "messiah" (משיח), hence the traditional messianic interpretation. Here this mode of interpretation has a bearing on textual criticism, since the normal spelling of Shiloh, שלה, as in the Samaritan Pentateuch, would not give the desired sum. This numerical interpretation may have influenced the copyists to spell the word with the vowel letter. In Num. 12:1 "the Cushite" has the numerical value of 735, or with variant spelling 736, which is the same as the value of "good looking" (יפת מראה), as in Gen. 12:11; hence Moses' wife was beautiful, and the Targ. Onkelos replaces the word "Cushite" by the Aramaic word for "beautiful," שפירתא. In Deut. 32 the initial letters of the first six verses are equal in numerical value to Moses' name; hence these verses are the epitome of Moses' lifework. This mode of interpretation has almost limitless possibilities and was carried to fantastic limits in the Cabalistic literature. Even in modern times such methods continue to have devotees who "discover" hidden meanings in numerical relationship all over the Bible.

The one authentic example of this sort of number game is the mysterious 666 (variant 616) of Rev. 13:18. Various interpretations have been suggested. Irenaeus took it to refer to the Roman Empire and derived the sum from Λατεῖνος (30 + 1 + 300 + 5 + 10 + 50 + 70 + 200). Other candidates are Nero and Trajan Hadrianus, both of whom can be made to add up to either 666 or 616 (נרון קסר; 50 + 200 + 6 + 50 + 100 + 60 + 200 = 666, or with omission of the final ן = 616), and טריון אנדרינום = 666, or טריון אדרינום = 616. Caligula as Γάϊος καῖσαρ comes to 616. Even the Hebrew for the "Primeval Abyss," תהום קדמוניה, which also adds up to 666, has been proposed. There can be no certainty, but Nero appears to be the most likely candidate.

***NUMBERS, BOOK OF.** The fourth book of the Pentateuch or traditional five books of Moses. It contains elements from all four of the principal Pentateuchal sources—J, E, D, and P—and its narrative is continuous with the books which precede and follow it. For a general discussion of the literary problems of these books, *see* PENTATEUCH.

See maps "Canaan: Numbers and Deuteronomy," under DEUTERONOMY, BOOK OF; "Egypt and Sinai: Exodus to Deuteronomy," under EXODUS, BOOK OF.

1. The name. The name of the book in the English Bible is derived from the Latin Vulg. *Numeri*, which is in turn a translation of the title in the Greek LXX (Ἀριθμοί). It is the only book of the Pentateuch which has had its title translated rather than merely transliterated from the Greek. Its name in the modern Hebrew Bible is במדבר, "in the wilderness," a phrase which occurs in the first verse and is perhaps a more accurate designation than the familiar English one. The name וידבר, "The Lord spoke," the opening phrase of ch. 1, was also used in antiquity and was known to Jerome and Epiphanius. The numbering of the tribes, to which the English name refers, occupies only the opening chapters (1:1–4:26) and ch. 26, and is by no means the most distinctive feature of the book.

2. Outline. Since the book has no real unity and was not composed in accordance with any logical, predetermined plan, whatever outline may be imposed upon it will have to be recognized as largely subjective and arbitrary. In general, one may say that it relates the adventures of the people of Israel from the final days at Sinai to the time when they encamped in the plains of Moab on the borders of the Promised Land. The broad sweep of the narrative, which provides the framework of the book, as of other parts of the Pentateuch, suggests a rough division into three major periods: (*a*) Israel's journey from Sinai to Canaan, culminating in an unsuccessful attempt to conquer the land from the S (chs. 1–14); (*b*) the traditional forty years of wandering "in the wilderness" (chs. 15–19?); (*c*) the final, triumphant march to the edge of the Jordan opposite Jericho (chs. 20?–36).

The geography of the book suggests a rather different and more accurate division: (*a*) events at Sinai (1:1–10:10; the beginning of this long episode having been related in Exod. 19:1); (*b*) events in the desert to the S of Palestine (10:11–20:13); and (*c*) events in Edom and Moab, E of the Dead Sea (20:14–36:13). The first of these divisions involves a period of twenty days (cf. 1:1 with 10:11); the second, a period of *ca.* thirty-eight years (cf. 10:11 with 33:38 [which dates the event recorded in 20:23-29]); the third, a period of somewhat over five months (cf. 33:38 with Deut. 1:3).

a. The narrative framework. The first section (1:1–10:10) can hardly be said to have any real narrative content, since it is entirely concerned with details of the census and other information of a purely legal or ecclesiastical character.

The second section (10:11–20:13) contains the stories of the complaints of the people about their diet and the choice of seventy elders to assist Moses in the government of the community (ch. 11); the vindication of Moses as Israel's leader in the face of Miriam and Aaron's opposition (ch. 12); the discouraging report of the spies (ch. 13); the people's unfortunate attempt to invade Canaan after their condemnation to forty years of wandering (ch. 14); the rebellion of Korah, Dathan, and Abiram—the one extended episode recorded for the "forty years" (ch. 16); and, finally, the summoning of water from the rock at Kadesh (20:1-13).

The third section (20:14–36:13) is in some ways the most important, containing as it does so many valuable fragments of ancient Hebrew poetry. The narrative begins with the refusal of the king of Edom to allow the Hebrews to pass through his realm (20:14-29); goes on to tell of the brazen serpent and Israel's defeat of Sihon the Amorite king and of Og the king of Bashan (ch. 21); and reaches its climax in the account of the triumph of Israel and her God over Balak of Moab and his seer, Balaam (chs. 22–24). Its concluding stories deal with the apostasy of the Israelites to Baal-peor (ch. 25); the second census (ch. 26); the appointment of Joshua (27:12-23); the slaughter of the Midianites (ch. 31); and the settlement of Reuben, Gad, and half of Manasseh E of the Jordan (ch. 32).

b. The legal and statistical contents. Strung out upon this thread of narrative and geography, and interspersed often without apparent logic among its episodes, are the laws and statistical summaries which are likely to be so wearisome to the ordinary reader and which, by their profusion, tend to obscure the course of the story. Thus the first section of the book records the size of the different tribes, the arrangement of the camp, and the numbers and duties of the Levites (chs. 1–4); together with laws governing the treatment of lepers and wives accused of adultery (ch. 5); the nature and fulfilment of a Nazirite vow (ch. 6); an enumeration of gifts to the sanctuary (ch. 7); directions for the ordination of Levites (ch. 8); and regulations with regard to the supplementary passover (ch. 9) and the use of the silver trumpets (10:1-10).

The second section adds to the basic narrative some laws with regard to sacrifice (ch. 15); the income of the priests and Levites (ch. 18); and purification after contact with the dead (ch. 19).

The third section contains the statistics of the second census, at the end of the forty years (ch. 26); regulations governing inheritance in the female line (27:1-11; ch. 36); a schedule of sacrifices to be offered during the course of the ecclesiastical year (chs. 28–29); casuistic decisions with regard to the validity of a woman's vows (ch. 30); a résumé of Israel's itinerary from Egypt to the plains of Moab (33:1-49); directions concerning the conquest and apportionment of the Promised Land (ch. 34); and provisions for the establishment in Canaan of Levitical cities and places of refuge for homicides (ch. 35).

*c. **Relation to other books.*** It will be evident from the above summary of contents that the material in the book is of the most heterogeneous character and that its arrangement, at least as respects the non-narrative elements, is largely fortuitous. Since any unity one may attribute to Numbers must be artificially imposed upon it, it is perhaps better not to think of it as a book so much as a more or less arbitrary division in the larger structure of the Pentateuch. Or, to express the same thought more accurately, one might say that it is the last division of the Tetrateuch (Genesis–Numbers), since its relation with the books which precede is organically much closer than with Deuteronomy, which follows.

3. Sources. The Deuteronomic element in Numbers is confined to a single small passage, 21:33-35 (=Deut. 3:1-3), whereas J, E, and P, the major sources of the Tetrateuch, are all generously represented. The principal source is P, which accounts for nearly three fourths of the book and nearly all the non-narrative portions. As in other parts of the Pentateuch, P is obviously not homogeneous, but consists of several layers of material. Gray (*Numbers*, ICC) distinguishes three in particular: P^G, the basic work embodying the history of Israel's sacred institutions; P^S, clearly later than P^G and itself coming from several hands; and P^X, matter not demonstrably later than P^G, but certainly not part of the original P document. In many cases P^X may be assumed to describe customs and institutions of great antiquity. JE in Numbers is readily distinguishable from P, but J and E cannot be so easily separated from each other, since some of the criteria available for earlier parts of the Pentateuch (in particular, that of the divine name) are only occasionally to be found. The continued existence of parallel narratives is evident, but it is usually difficult to determine which elements should be assigned to a particular source. One notable exception to this general statement is the Balaam story (chs. 22–24), in which 22:1-21, 35*b*-40, can with considerable confidence be derived from E, while 22:22-35*a* is plainly J, as is shown by the use of the name Yahweh instead of Elohim. In other sections various commentators show a wide divergence in their analysis of the JE document.

4. The narratives. While some of the legal and statistical material in the opening chapters is written in ostensibly narrative form, the true narrative of the book begins in 10:11-36, which tells of the breaking up of the camp at Sinai and the beginning of the march toward Canaan. Vss. 11-28 exhibit the typical features of the P document (the date, the concept of the cloud, the artificial disposition of the tribes, etc.), while vss. 29-36 (except for 34?) are equally characteristic of JE and pick up the thread of the JE story which was dropped at Exod. 34:28. At the end of the chapter (vss. 35-36) the JE editor has preserved two ancient battle cries associated with the movements of the ark.

Chs. 11–12 (entirely JE) have for their theme the problems which Moses faced as leader of a dissatisfied and rebellious people. The three opening verses of ch. 11 contain the fragmentary account of an incident in which Moses acted as intercessor when Israel's complaints had aroused God's anger against them. This sets the tone for the rest of the chapter, which tells the story of the people's protest against their meager diet and of the arrival of the death-bearing quails (vss. 31-34; an incident partly paralleled in Exod. 16, P); into this has been interwoven in a rather complicated way the story of the choice of seventy elders and their endowment with a portion of the spirit which rested on Moses (vss. 16-29, in the main). In ch. 12, God punishes Miriam with leprosy because she and Aaron had questioned the unique character of Moses' authority (the Cushite woman of vs. 1 seems irrelevant to the rest of the story).

The next two chapters (13–14) deal with the dispatch of spies into the Promised Land and the misadventures which followed their return. The narrative here is clearly composite and the P and JE strands can be separated without much difficulty (to P may be assigned 13:1-17*a*, 21, 25, 26*a*, 32*a*; 14:1*a*, 2, 5-7, 10, 26-39*a*). According to P, the spies went through the whole land and, with Caleb and Joshua dissenting, brought back a report that it was unproductive; in JE they go only through the Negeb as far as Hebron and report, Caleb dissenting, that the land, though productive, was populated by giants. In ch. 14, the people's petulant reaction to the spies' report is punished by their condemnation to forty years of wandering in the desert; when, in spite of this, they attempt to advance into Canaan from the S, they are defeated at Hormah.

The story of the rebellion of Korah, Dathan, and Abiram in ch. 16 is also clearly composite, as is shown by its frequent redundancies and inconsistencies. Here, actually, two quite different stories are interwoven: In the JE account Dathan and Abiram (and, in vs. 1, On), members of the tribe of Reuben, complain of Moses' arrogance in making himself the civil leader of the community, despite his failure to fulfil his promises (vss. 12-14); according to P, the revolt of Korah was in support of a doctrine of the "priesthood of all believers." It was his contention that Moses and Aaron's claims to ecclesiastical authority had no justification, since "all the congregation are holy" (vs. 3). It is generally agreed that there is now a third story (introduced by P^S), in which Korah is represented as a Levite and the dispute is said to have arisen over the claims of the Levites to equality with the priesthood. Each of the stories ends disastrously for the rebels: the party of Dathan and Abiram, with their families and possessions, is swallowed up by the earth (vss. 31-34, omitting "and

all the men that belonged to Korah" in vs. 32), while the party of Korah is consumed by fire from heaven (vs. 35). The original P story is found in vss. 1*a*, 2*b*-11, 16-24, 27*a*, 32*b*, 35-50—H 16:35–17:15; the P^s supplement is contained in vss. 7*b*-11, 16-17, 36-40—H 17:1-5.

The theme of ch. 17 is closely related to that of the Korah story in its original form. The miraculous budding of Aaron's rod is a vindication of the exclusive claims of the tribe of Levi to serve in the tabernacle.

Ch. 20 tells of the transition from the period of wilderness wanderings (concerning which there are no traditions whatever, unless the story of ch. 16 is to be placed here) to that of renewed progress toward the Promised Land when the forty years were over. The first verse, which is composite (vs. 1*a* being P; 1*b*, JE), relates the death of Miriam at Kadesh. The next incident (vss. 2-13) explains, none too clearly, why neither Moses nor Aaron was permitted to enter Canaan with the tribes. Both were guilty, it is said, of some unspecified sin of disbelief in connection with the people's demand for water at Meribah (probably identical with Kadesh), but reverence for their memory has caused the omission of the specific charge against them. The story of Aaron's death is narrated in vss. 22-29. Vss. 14-21 tell of the resumption of Israel's march toward Canaan, this time through the lands E of the Dead Sea rather than from the S. Moses requests permission for his people to pass peacefully through the territory of Edom, but, when this is refused, he leads them by a different and more circuitous route (21:4), which first takes them S in the direction of the Gulf of Aqabah.

The opening verses of ch. 21 (1-3) seem to be misplaced, since the incident they relate can hardly belong to this period. In vss. 4-11, which, along with an itinerary, include the story of the bronze serpent, the course of Israel's journey is more naturally continued; and with vs. 12 they reach the S borders of Moab in their northward travels through Transjordan. Two quotations of ancient Hebrew poetry are included in this section, which briefly tells of their passage through Moab to Mount Pisgah (vss. 13-20); the first of these is a mere fragment from the Book of the Wars of the Lord (*see* WARS OF THE LORD, BOOK OF THE) and the second a little folk song, only fancifully connected with the context, which is addressed to the waters of a newly dug well (Hebrew *be'ēr*). The remainder of the chapter (vss. 21-35), which contains another and quite enigmatic fragment of an old poem (vss. 27-30), describes victory over the Amorite king Sihon, who is said at this period to have ruled all the region between the Arnon and the Jabbok from his capital, Heshbon, and over Og, king of Bashan, who was sovereign of N Transjordan. The whole chapter is from JE, with the exception of vss. 10-11 (P), 33-35 (D; cf. Deut. 3:1-3).

In many ways the most valuable and interesting part of Numbers is chs. 22–24, which not only tell of the defeat of the Moabite king Balak by Israel, but also contain the legend of Balaam the seer and a series of undoubtedly ancient oracles which are attributed to him. Here the redundancies and contradictions of the narrative make necessary some analysis into sources, although the whole of it (with the exception of 22:1, which is from P) is derived from JE. The analysis of ch. 22 must begin with the obvious peculiarities exhibited by vss. 2-21, 35*b*-41, when compared with vss. 22-35*a*; the former of which must be assigned to E, the latter to J. Further analysis of some kind seems to be called for in parts of vss. 1-21. The oracles of chs. 23–24, together with their narrative framework, are patently derived from more than one source, although there is no general agreement as to the details of the analysis. While the antiquity of the oracles as a whole (probably tenth century B.C.) can hardly be denied, serious questions have been raised about the concluding, and contextually irrelevant, prophecies of 24:18-24. The "star . . . out of Jacob" of 24:17 almost certainly refers, by a *vaticinium ex eventu*, to David.

Ch. 25, which tells of the apostasy of the people at Shittim, can be divided between JE (vss. 1-5) and P (vss. 6-18). 27:12-23, which describes Joshua's appointment as the successor of Moses, is to be assigned to P, as is ch. 31, a late addition to the priestly document which purports to describe the extermination of the Midianites, but is actually an unhistorical midrash intended to illustrate certain legal themes such as the purification of warriors (vss. 19-24) and the method of dividing the spoil of battle (vss. 25-54).

Ch. 32, the concluding narrative of Numbers and the last to exhibit traces of the JE document, tells of the settlement of Reuben and Gad (and half of Manasseh [vs. 33]) E of the Jordan. The story is obviously composite, but attempts at analysis have not as yet produced universally acceptable results. With this story (to which must be added the account of Moses' death, in Deut. 34), the narrative of the Tetrateuch concludes, and the way is prepared for the opening scene of Israel's conquest of Canaan, as related in the beginning chapters of Joshua. The long "farewell address" of Moses in the book of Deuteronomy, with the supplementary material which follows it, interrupts the flow of the story and is obviously from a different source.

5. The laws. As previously noted, the narrative of Numbers is in many places used simply as an artificial setting for the publication of certain laws, both civil and religious, often introduced without regard for suitability of context. Without exception, these belong to P, although they may be assigned to different strata within it, and many of them are undoubtedly of high antiquity. Ignoring here certain regulations concerning the Levites, which are embedded in the statistical material of chs. 1–4, the first important collection of laws is found in chs. 5–6, which deal with leprosy and related defilements (5:1-4), contributions to be made to the priesthood in case of "breaking faith" with God (5:5-10), the procedure to be followed in the case of a wife accused of unchastity (5:11-31), and the law of the Nazirite (6:1-21). It is evident that this material is not homogeneous and that no discernible principle governs its compilation or its insertion into the present context. The primitive character of the procedure imposed upon the accused woman is sufficient guarantee of the antiquity of the present law. It provides the

classic instance of the use of the ordeal in the OT, the woman being required to drink holy water in which have been mixed dust from the sanctuary and the blotting of a curse imposed upon her by the priest. The inconsistent and repetitive account of the transaction shows that the present law has a long literary history behind it. The other important law in this section, that governing the Nazirite, deals with an ancient institution, but in its latest form, in which the vow is not taken for life, as in the case of Samson and Samuel, but only for a specified period of time.

The first three verses of ch. 8 give directions with regard to the lampstand of the tabernacle which are simply a summary repetition of material already contained in Exod. 25. The remainder of the chapter deals at length with the purification and dedication of the Levites, who are to serve the Lord in the tabernacle as surrogates for the first-born of all the people of Israel (vss. 16-18). The period of service assigned to the Levites in vss. 23-25 does not agree with the provision of 4:3; this disagreement is one of the numerous indications that the P document itself is of composite origin and has had a complex literary history.

9:1-14 provides that those who are unable to take part in the Passover because of ceremonial uncleanness may celebrate it a month later on the same date. The remainder of the chapter, which is not legal in character and is unrelated to what precedes and follows, describes the behavior of the cloud which accompanied the tabernacle during the travels of the Israelites.

10:1-10 gives directions for the blowing of the two silver trumpets, which are to be used for calling an assembly, sounding an alarm, and signaling the breakup of the camp.

The laws of ch. 15 have no relation either to the context in which they are now found or to one another. The first section (vss. 1-16) regulates the amount of meal, oil, and wine which is to accompany the animal sacrifices. The next (vss. 17-21) orders the gift to the Lord of the first part of the "coarse meal" (RSV; the precise meaning of the Hebrew word [ערסה] so translated is uncertain). Vss. 22-31 are of great importance for the clear distinction they make between unwitting offenses (vs. 24) and sins done "with a high hand" (vss. 30-31). Without a clear understanding of this distinction, the interpreter is likely to misinterpret the whole priestly system of atonement. For sins deliberately committed, no sacrifice or other atonement is possible; the sacrificial system is a gracious provision of Yahweh designed to protect those who fall into sin unwittingly. It is probable that the story of the man who gathered sticks on the sabbath (vss. 32-36) was introduced here to illustrate vividly the fate in store for those who sinned "with a high hand." The remaining verses (37-41) prescribe the wearing of tassels.

Ch. 18 is more closely related to the narrative than is ordinarily the case. It is appropriate that the stories of the rebellion of the Levites under Korah (ch. 16) and the vindication of the superiority of the Aaronic priesthood through the budding of Aaron's rod (ch. 17) should be followed by a chapter which deals with the proper functions of the Levites (18:1-7) and the income provided for the support of both priests and Levites.

Ch. 19 once again exhibits the phenomenon of complete irrelevance to context, dealing as it does with the subject of the purification of those who have become unclean through contact with a dead body. It can hardly have been a part of the original P document, although the primitive and magical character of the procedure enjoined (equaled elsewhere in Numbers only by the law of 5:11-31), involving the use of water in which have been mixed the ashes of a red heifer, perfect in form and unbroken to the yoke, is sufficient guarantee that it preserves a custom of considerable antiquity.

In distinction to the laws previously discussed, which have been of an ecclesiastical or ceremonial character, the law of 27:1-11 (which is supplemented by a further regulation in ch. 36) is of a civil nature, dealing with the inheritance of property. Ancient Hebrew law allowed only sons to inherit; the law of the levirate marriage (Deut. 25:5-10) provided an ingenious means of escape from the situation in which a man dies without male issue. The present law, which seems to be quite late, provides a more rational method of dealing with the same problem by allowing inheritance to descend in the female line. Since it was a basic principle of Hebrew jurisprudence to preserve property within the original social unit, ch. 36 provides that women who inherit property in this fashion shall, in order to prevent alienation of the property, marry only within the tribe.

Chs. 28–29 contain a schedule of the public offerings which are to be made in the tabernacle on the fixed holy days throughout the year. As a summary of the ecclesiastical calendar, it is comparable to Lev. 23. Sacrifices of a specific character are provided for the following occasions: daily (28:3-8); the sabbath (vss. 9-10); New Moon (vss. 11-15); Passover and the Feast of Unleavened Bread (vss. 16-25); Pentecost (vss. 26-31); first day of the seventh month—i.e., New Year's Day (29:1-6); Day of Atonement (29:7-11); the Feast of Tabernacles (29:12-38).

The whole of ch. 30 is occupied with a discussion of the conditions under which vows made by women are valid.

35:1-8 returns again to the subject of the Levites, so frequently treated in this book, and provides in an obviously Utopian manner for the assignment to them of forty-eight cities in the new land of Canaan. This legislation is clearly inconsistent with the principle stated in 18:24. The remainder of the chapter orders the establishment of cities of refuge to which homicides may flee until their guilt or innocence has been judicially determined. This represents a late effort to modify the unrestricted application of the *lex talionis*.

6. Statistical material. It is the large amount of purely statistical information incorporated in Numbers which makes much of it seem tedious to the modern reader. The question of the origin of this material is not easy to answer and can really be discussed only in connection with the individual examples. Some of it seems purely idealistic and unhistorical, while in other cases it seems evident that

there must be some good historical information behind it. The geographical list in 34:1-15, e.g., from whatever period it may come, will hardly have been invented *ad hoc* and may well be based upon an ancient document; even the incredible figures assigned to the tribes in chs. 1-2 and 26 may be derived from misplaced census records of a much later time; but such a list as that of the princes' offerings in ch. 7 can scarcely have any other origin than the fertile imagination of a priestly scribe.

The opening chapters of the book (1-4), which are responsible for its familiar name, contain the results of the census supposedly made at Sinai toward the end of the sojourn at the holy mount: chs. 1-2 give the numbers of the warriors by tribes, the final total amounting to 603,550 (2:32), while chs. 3-4 give the names of the priests (3:1-4) and the numbers of the Levites by families, incidentally explaining their relation to Israel, their functions as a group (3:5-13, 40-51), and the particular task reserved on the march for each of the three major divisions—Gershonites, Kohathites, and Merarites. Ch. 7 lists in detail the offerings alleged to have been made by the chief men of the tribes on the day when the tabernacle was finished and its furnishings consecrated. In ch. 26 a second census of Israel and the Levites is recorded at the end of the forty years of wandering, when the previous generation had almost entirely died out (vss. 64-65). The total this time was 601,730 (vs. 51). Ch. 33 contains a late résumé (based upon JE and P and possibly some third source) of the journeys of Israel from the departure from Egypt until their arrival at the plains of Moab opposite Jericho. Finally, ch. 34 describes the ideal boundaries of the land of Canaan (vss. 1-15), which was soon to be allotted to the tribes, and lists the names of those who were to supervise the apportionment (vss. 16-29).

7. Historical value. The question of the historical value of Numbers really belongs to the larger question of the historical reliability of the Pentateuchal narrative as a whole. The following observations, however, may be in order: The P document in Numbers can be largely disregarded, so far as history is concerned, since most of its meager narrative elements are manifestly late and artificial. The JE material is very fragmentary (when compared with the unified tradition of the Exodus) and deals chiefly with two periods: the first approach to Canaan from the S (10:11-14:45) and the second approach, forty years later, from the E (20:1-25:5). It is thought by many scholars that these two sections preserve the memory of two different invasions, made at widely separated periods by different groups of tribes, and that the two events were fused by later tradition into the single, continuous movement of a unified people. It is probable that some genuine historical memories are preserved in the place names which frequently occur in the JE narrative, but less reliance can be placed upon the incidents connected with them, some of which are merely etiological legends (e.g., 11:1-3; 21:5-9), while others are only artificially related to their present context. The JE document in Numbers is good historical evidence for the traditions of the Hebrew people in the days of the early monarchy; the value of these traditions themselves, concerned as they are with events which occurred before the rise of written history in Israel, can be determined only after rigorous analysis and careful study, and even then the results will be largely hypothetical.

8. Religious value. Along with the rest of the Pentateuch, Numbers bears witness to some of the basic convictions of Israel: that God manifests himself in history, that he demands obedience to his righteous will, and that he is able (in spite of man's incurably rebellious spirit) to accomplish his good purposes toward his people and bring them out of bondage to the Promised Land.

Furthermore, the character of Moses in this book appears in a more attractive and religiously suggestive light than it does elsewhere. In Numbers we see him, not simply as a strong-willed hero, who leads Israel out of slavery, but as a deeply compassionate human being, who sympathizes with others even in their sins and is a constant intercessor for them (11:12; 12:13; 14:19). According to 12:3 he is the "meekest" of men, although the term here hardly has its common English meaning. Some elements from this traditional picture of Moses have undoubtedly entered into the portrait of the Servant of the Lord in Second Isaiah (see also Exod. 32:30-32).

Finally, one must admit that much of Numbers—the legal and statistical portions in particular—can hardly be regarded as having any direct religious significance for the modern reader. But even these parts are valuable as a reminder that the OT story is intended to be read as history and not as myth. The ancient Hebrew mind was not mythopoeic. The laws of Numbers, e.g., are set in (and sometimes derived from) concrete historical situations; and, extravagant and unreliable as the statistics usually are, they show us how earnestly the Hebrew writers strove to clothe the bare skeleton of the narrative tradition with precise historical information. If one would understand the religion of the OT, he must first of all grasp this history-centered mentality of the people who produced it.

R. C. DENTAN

NUMENIUS nōō mē'nĭ əs [Νουμήνιος] (I Macc. 15:15). Son of Antiochus, and one of Simon the Hasmonean's ambassadors to Rome. In 141 B.C., Simon sent an embassy led by Numenius with a gift of a gold shield weighing a thousand pounds. In 139, Numenius returned with copies of letters sent by Lucius the Roman consul to the neighboring states. In it there was a declaration of friendship of the Roman people for the Jews and for the embassy sent by the high priest Simon to Rome. The neighboring states were forbidden to injure the Jewish people,

and extradition was demanded in the cases of any dissenters against Simon who had fled to their countries. Numenius also had been previously sent by Jonathan, along with Antipater son of Jason, to the Spartans to renew a pledge of brotherhood.

Some have questioned the authenticity of the document. It is recorded also by Josephus (Antiq. XIV. viii.5), who agrees in naming Lucius as Roman consul and Numenius as head of the Jewish embassy, but who dates the event in the reign of Hyrcanus II.

S. B. HOENIG

NUN (PERSON) nŭn [נון, fish; LXX Ναυή]. The father of Joshua (Exod. 33:11; Num. 11:28; 13:8, 16; Deut. 1:38; 32:44; Josh. 1:1; Judg. 2:8; I Kings 16:34; Neh. 8:17; etc.). Nothing is reported about Nun except that he was the father of Joshua and consequently a member of the tribe of Ephraim. Nun is named as the father of Hoshea (Num. 13:8, 16; Deut. 32:44 KJV) and of Jeshua (Neh. 8:17), variant forms of JOSHUA.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 230.

R. F. JOHNSON

NUN nŭn (Heb. nōōn) [נ, *n* (*Nûn*)]. The fourteenth letter of the Hebrew ALPHABET as it is placed in the KJV at the head of the fourteenth section of the acrostic psalm, Ps. 119, where each verse of this section of the psalm begins with this letter.

NUNC DIMITTIS nŭngk′ dĭ mĭt′ĭs [Lat., now lettest thou depart]. Traditional designation of the Song of Simeon (Luke 2:29-32), one of three psalms contained in the Lukan account of the nativity and infancy of Jesus (*see also* BENEDICTUS; MAGNIFICAT). The song emphasizes the universal implications of the Incarnation: it is both the "glory" of Israel and a "light" for the Gentiles (cf. Isa. 49:6; 52:10). It thus summarizes aptly the major theme of Luke's Gospel and Acts. Since the fourth century, the song has been associated with the evening Offices, with Vespers in the East, and with Compline in the West.

M. H. SHEPHERD, JR.

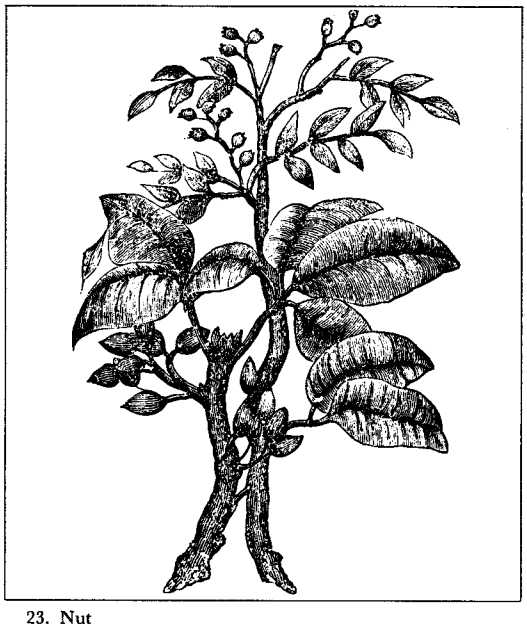
NURSE. A woman engaged to suckle or to take charge of an infant. Israelite women usually nursed their own children (Gen. 21:7; Exod. 2:7; I Sam. 1:23; I Kings 3:21; Song of S. 8:1; II Macc. 7:27). Children were nursed longer than today, perhaps up to three years of age (I Sam. 1:22-24). Weaning was a time of family jubilation (Gen. 21:8; I Sam. 1:23-24). At the fall of Jerusalem to Babylon, nursing was destroyed (Lam. 4:4; Joel 2:16).

A wet nurse (מינקת) was occasionally used. Such women had a firm place in the family circle, and honor was theirs (Gen. 24:59; II Kings 11:2). Moses' mother was hired as his wet nurse by the daughter of Pharaoh (Exod. 2:7-9). Deborah apparently remained in the family as a servant after the weaning of her charge (Gen. 35:8). In Jonathan's family the nurse (אמנת) cared for a five-year-old (II Sam. 4:4). Perhaps this is the status of Naomi, nurse to her own grandson (Ruth 4:16). In most instances the nurse seems to remain as servant (Isa. 49:23-24; cf. II Kings 11:2; II Chr. 22:11). It is probable that male tutors (perhaps eunuchs) were sometimes considered nurses (II Kings 10:1, 5). Thus it is not unnatural to call Moses "nurse" (אמן) of Israel (Num. 11:12). Paul considered himself "nurse" (τροφός) to the Thessalonians (I Thess. 2:7). In these two men the analogy may be to the early nurturing of the people of God, as well as to the gentleness of their care. *See* FAMILY.

C. U. WOLF

NUTS [אגוז, *'eghôz;* Arab. *jawz;* KJV בטנים, *boṭnîm* (RSV PISTACHIO NUTS); Akkad. *buṭnu;* Arab. *buṭm*]. The edible seeds of several species of fruit trees.

"I went down to the nut [אגוז] orchard" (Song of S. 6:11; KJV "garden of nuts") is part of a description of the springtime, perhaps with cultic significance. The generic meaning "nut" follows the LXX καρύα, which refers to various kinds of nuts, but also specifically to the walnut, *Juglans regia* L. (cf. Jos. War III.x.8, which tells of walnut trees by the Sea of Galilee). A native of Persia, the walnut tree and its Hebrew name apparently were introduced into Palestine from there. The Arabic supports this identification. *See* FLORA § A2*f*.



23. Nut

Some of the "choice fruits of the land" sent by Jacob down to Egypt included pistachio nuts (בטנים; KJV "nuts"). That pistachio nuts from the tree, *Pistacia vera* L., are intended seems quite certain. Indeed one of the "choice fruits of the land," the pistachio nut is considered a delicacy in all the Near East. Although the word may refer to nuts from other trees of the genus *Pistacia* (*see* FLORA § A2*f*), in Gen. 43:11 only the best quality would be sent by Jacob. Botanists disagree about the edible nature of the nuts from the other species. Coming mostly from Syria, the roasted nuts are readily available in the markets of Jordan. The city BETONIM (Josh. 13:26), E of the River Jordan, may have received its name from orchards of these trees there.

***NUZI** nōō'zī [*cuneiform* (city of) *Nu-zi,* or *Nu-zu-e, always in the genitive*]. A city to the E of Ashhur and a short distance W of Arrapkha, which flourished in the middle centuries of the second millennium B.C. The Nuzi Texts throw much light on the social customs of the patriarchal age, and are also a primary source on the HABIRU. The records were written in Akkadian, but the vast majority of the people of that district were HURRIANS.

1. Local data. The present site of Nuzi is Yoghlan Tepe, a mound some 150 air miles N of Baghdad and near the foothills of S Kurdistan. It was excavated in 1925-31 by a joint expedition of the American School of Oriental Research in Baghdad and Harvard University. The name Nuzi was in use during the Hurrian occupation of the city. Although attested already in the Mari Tablets (period of Hammurabi), the name is best known to us from local documents which cover the fifteenth-fourteenth centuries, at which time the whole area was a province of the kingdom of Mitanni. Since all the occurrences of the place name are in the genitive case, the underlying nominative form of this non-Akkadian word has to be conjectured. Internal linguistic evidence would seem to favor *Nuzi,* but *Nuzu* has also been advocated. The city itself declined rapidly after its conquest by the Assyrians, in the late fourteenth or early thirteenth century.

Prior to the mass Hurrian settlement, the place was occupied by a different ("Subarian") ethnic group. In the Old Akkadian period the city bore the name of Gasur. The earliest occupation goes back to prehistoric times.

24. Cuneiform tablet found at Nuzi

The cuneiform texts of the Nuzi period number several thousand. Most of them come from Nuzi itself and comprise private as well as public archives. There is, however, also a small but important collection from nearby Arrapkha (modern Kirkuk), some nine miles to the E. Together, these documents provide a vivid and many-sided commentary on the life and customs of the intrusive Hurrians, settled in an area that was peripheral to both Babylonia and Assyria. Fig. NUZ 24.

2. Bearing on the Bible. That so relatively obscure and remote a place should be of great interest to the modern student of the Bible is due mainly to chance and circumstance. Before their arrival in Palestine the patriarchs lived in the region of Haran, in the Middle Euphrates Valley, and they maintained contact with their original home for some time afterward. That region was thickly populated by Hurrians and was soon to be the focal center of Hurrian-dominated Mitanni. As social and political masters of the land, the Hurrians were bound to affect in many ways the life and habits of their Semitic neighbors, and among them the forefathers of the Hebrews. But little contemporary material has as yet come to light in that area. Nuzi, however, although far to the E, was likewise the seat of an authentic Hurrian community. Hence the results obtained at Nuzi are valid, by extension, for the W Hurrians as well. It is in this roundabout way that

25. Tablet found at Nuzi with seal impressions

the Nuzi records have a significant bearing on the patriarchal narratives of the Bible. Fig. NUZ 25.

The following are some of the many available instances of biblical concepts and practices that had long been puzzles, but can now be readily traced back to the Hurrians with the aid of the Nuzi rec-

ords: Perhaps the most impressive single example is the appropriation by Rachel of the teraphim, or "house gods," of her father, Laban (Gen. 31:19, 30). Innumerable attempts were made to account for this strange behavior. But none could come close to the mark as long as the necessary data on the family law in Laban's land had been lacking. The texts from Arrapkha and Nuzi have at last supplied the details. In special circumstances, property could pass to a daughter's husband, but only if the father had handed over his house gods to his son-in-law as a formal token that the arrangement had proper sanction. A similar instance of legalizing the irregular—but this time duly explained as such—is to be found in Ruth 3:7; this usage, too, has significant antecedents at Nuzi. It is worth noting in this context that the common Nuzi clause "to go to the gods"—for purposes of a juridical ordeal—is echoed in Exod. 21:6, and more especially in 22:8; in the latter case the noun in question is still construed as plural.

In three passages (Gen. 12:10-20; 20:2-6; 26:1-11) the wife of a patriarch is introduced as his sister, for no apparent worthy reason. The Nuzi Texts, however, demonstrate that in Hurrian society the bonds of marriage were most solemn when the wife had legally, though not necessarily through ties of blood, the simultaneous status of sister; so much so that the terms for "sister" and "wife" could be interchanged in official use under the right circumstances. Thus, in falling back on the wife-sister equation, both Abraham and Isaac were availing themselves of the strongest safeguards that the law, as they knew it, could afford them.

Nuzi marriage contracts occasionally include the statement that a given slave girl is presented outright to the new bride, exactly as is the case with Leah (Gen. 29:24) and Rachel (vs. 29). Such was evidently the accepted practice in Hurrian circles, and hence also in culturally affiliated societies. Other marriage provisions in the Nuzi Documents specify that an upper-class wife who had borne her husband no sons was expected to furnish him with a slave girl as concubine; in that case, however, the wife was entitled to treat the concubine's offspring as her own. This last provision illuminates the otherwise cryptic statement in Gen. 16:2, with its punning: "I shall obtain children by her" = "I shall be built up through her." The related law in the Code of Hammurabi (paragraph 144) offers no complete parallel; for there the wife is a priestess and is not entitled to claim the concubine's children for herself.

Lastly, in Hurrian society birthright was not so much a matter of chronological priority as of paternal decree. And such decrees were binding above all others when handed down in the form of a deathbed declaration, identified by the introductory formula: "Now that I have grown old." Against this stylized background, the ceremonial account in Gen. 27 acquires a new significance, with its opening clause (vs. 2), its solemn testatory pronouncements, and its arbitrary treatment of the birthright. Literary tradition may have obscured some of the content in the course of the intervening centuries. Indeed, the custom itself had to be outlawed (Deut. 21:16), manifestly because it was no longer suitable in the changed surroundings. But the underlying framework was preserved, enough so to be restored to its original meaning with the aid of pertinent cuneiform sources.

3. Nuzi and the Habiru. Aside from thus supplying an authentic background for various biblical passages relating to the patriarchal age, the Nuzi Tablets also help to clarify the complex problem of the HABIRU, or Hapiru. In the first place, these texts furnish a substantial number of personal names of the Habiru, and thus afford for the first time an insight into the ethnic composition of that group. The results show that a majority of the Habiru at Nuzi were of Akkadian origin; the rest bore Hurrian names, except for a few that cannot as yet be analyzed. Secondly, all the Habiru of these documents, including those with Hurrian names, were outsiders. What they have in common is not an ethnic or geographical classification but an inferior social status; their position throughout is that of underprivileged foreigners. To be sure, the Nuzi evidence is not necessarily valid for other lands and periods; the ethnic composition would certainly be subject to local variations. But the material before us bears out fully the conclusion that the term "Habiru" was largely, and perhaps from the very start, a designation for a particular class of people, and not a distinctive ethnic name.

All in all, the small city of Nuzi, although situated in an obscure peripheral area and gone from the stage of history before the time of Moses, left us resources that can still illuminate large stretches of the ancient Near East, including Palestine.

NYMPHA nĭm'fə [Νύμφα (*feminine*)]; KJV NYMPHAS —fəs [Νυμφᾶς (*masculine*). A Christian in whose house a church held its meetings, and to whom Paul sends greetings in Col. 4:15.

Since the name occurs only in the accusative, Νυμφαν, it could come from a masculine nominative Νυμφᾶς, a short form of Νυμφόδωρος, or from a feminine Νύμφα. Uncertainty in this matter dates back to a very early period, for the pronoun which follows the name is variously given in MSS as αὐτοῦ, "his" (KJV); αὐτῆς, "her" (RSV); αὐτῶν, "their" (ASV). It is impossible to decide which is right, though the feminine form has the disadvantage of being Doric for the more usual Attic Νύμφη.

OAK [אלון, *'allôn, and see below;* Akkad. *allânu;* δρῦς]. A tree noted for its great size and strength, probably *Quercus coccifera* L. ("kermes oak"), *Quercus aegilops* L. ("valonea oak"), and other species and subspecies about which there is much difference of opinion (*cf.* FLORA § A9*n*). אלון clearly means "oak" and is consistently so translated in Gen. 35:8; Isa. 2:13; 6:13; 44:14; Ezek. 27:6; Hos. 4:13; Amos 2:9; Zech. 11:2. Several other, similar Hebrew words have been translated "oak": אלון, *'ēlôn* (Gen. 12:6; 13:18; 14:13; 18:1; Deut. 11:30; Josh. 19:33; Judg. 4:11; 9:6, 37; I Sam. 10:3); אלה, *'ēlâ* (Gen. 35:4; Judg. 6:11, 19; II Sam. 18:9-10, 14; I Kings 13:14; I Chr. 10:12; Isa. 1:30; 6:13; Ezek. 6:13; Hos. 4:13); אלה, *'allâ* (Josh. 24:26); אילים, *'êlîm* (Isa. 1:29; 57:5; 61:3). The RSV mg. adds "terebinth" at Gen. 12:6; 13:18; 14:13; 18:1; Deut. 11:30. אילות is translated "oak" in Ps. 29:9 (RSV mg. and KJV "hinds").

That there was confusion even in Bible times concerning the meanings of these words is apparent from the use of *'ēlâ* in Gen. 35:4; *'allâ* in Josh. 24:26; and *'ēlôn* in Judg. 9:6—all for what was apparently the same sacred tree at Shechem! That *'êlâ* and *'allôn* refer to different trees, however, is clear from the occurrence of both words in Isa. 6:13; Hos. 4:13, where "terebinth" and "oak" are now recognized. Many scholars have come to feel that *'allôn* always meant "oak" and the other four words usually TEREBINTH. A notable exception is *'ēlâ* in II Sam. 18:9-10, 14, where the Forest of Ephraim, in which the death of Absalom occurred, seems to require an identification with *Quercus aegilops,* or some subspecies of the deciduous oaks common to the forests of Gilead.

The great oak shown SW of Hebron as Abraham's "oaks of Mamre" (Gen. 13:18; 14:13; 18:1) is a relatively recent tradition; but at Ramet el Khalil, N of Hebron, remains indicate the probable site.

The related Aramaic אילן, *'ilān,* of Dan. 4:10-26—Aram. 4:7-23 refers to an unusual "tree" of Nebuchadnezzar's dream, symbolic of the Babylonian Empire and perhaps of the mythological TREE OF LIFE (cf. Ezek. 31:3-14: "cedar"). A special (sacred?) oak outside Jerusalem is mentioned in II Bar. 6:1; 77:18; II Esd. 14:1.

OAK, DIVINER'S. *See* DIVINER'S OAK.

OAK OF THE PILLAR [אלון מצב]; KJV PLAIN OF THE PILLAR. A sacred tree at a shrine at Shechem, beside which Abimelech was crowned (Judg. 9:6). Apparently this was the tree (אלה, "oak") under which Jacob hid the gods and jewelry of his wives (Gen. 35:4) and under which Joshua set up a "great stone" as a witness to the dedication of the people to the law of the Lord (Josh. 24:26).

OAR [משוט, *mišš̄ôṭ* (Ezek. 27:6); משוט, *māš̄ôṭ* (Ezek. 27:29); שוט, *shayiṭ, lit.* rowing (Isa. 33:21); *cf.* שוט, *shôṭ,* scourge, whip; Arab. *sâṭa,* to mix, whip]. A polelike wooden implement ending with a slightly curved blade, used to propel a boat.

The oar, which seems to have been a later refinement of the paddle, perhaps due to the appreciation of the value of a fulcrum for a steering paddle, appears in Egypt at an early date. Before 2000 B.C. the larger Nile River boats were rowed by men seated on stools on the deck; one such vessel was propelled by twenty-two oars. Fig. OAR 1.

1. Limestone relief of boat with oars, carrying Syrian captives as they pay homage to the Egyptian king Sahu-Re; from mortuary temple of Sahu-Re, Fifth Dynasty (*ca.* 2500-2350 B.C.)

All the biblical references to oars and rowing relate to galleys (Isa. 33:21; Ezek. 27:6, 8, 26, 29). In Ezek. 27:6 the oars of Tyre are said to be of oak. Most galleys before the Christian era had only one tier or bank of oars. On the contentious question of the meaning of "bireme," "trireme," etc., *see* the bibliography under GALLEY. *See also* SHIPS AND SAILING. Figs. SHI 47, 50. W. S. MCCULLOUGH

OATHS. The security of a society demands that its members speak the truth in crucial situations and keep their promises in matters of serious import. The oath is an ancient and universal means of impressing this obligation on the responsible parties in an agreement or an investigation. The obligation is fortified by holy words and holy acts which create confidence and afford a sense of security that serves to hold the community together.

The oath was an important part of the cult life of the Hebrew community, as it was among other peoples. The legal procedure of which the oath was a part was closely associated with the shrines and

the priesthood, because the oath as a holy act was properly pronounced in a sacred place or administered by a holy person, in contact or connection with holy objects. Perjury and the violation of an oath were serious matters, the profanation of the name of the Lord (Lev. 19:12), which could not go unpunished (Ezek. 17:13, 16, 18-19). An oath must be kept, though to one's hurt (Ps. 15:4), and even rash oaths (Lev. 5:1-4). The covenant between Isaac and Abimelech was backed by mutual oaths at the sacred well of oaths, Beer-sheba (Gen. 26:28-31). The oath for the suspected adulteress was administered with a drink of holy water containing dust from the tabernacle floor (Num. 5:17). Jephthah, when he became chief of the Gileadites, "spoke all his words before the LORD at Mizpah" (Judg. 11:11). These words were probably promises of exploits which he swore to carry out on behalf of the people, and it is likely that both parties sealed their agreement with oaths. The old sanctuaries at Gilgal and Beth-aven were places where oaths were administered and taken (Hos. 4:15). At the time of the composition of Solomon's prayer of dedication of the temple, oaths were administered before the temple altar (I Kings 8:31-32; II Chr. 6:22-23).

The oath is validated by the invocation of a deity, which for the Israelite should be none other than "the Lord, the God of heaven and earth." The Third Commandment (Exod. 20:7) forbids the invocation of the Lord's name for evil intent, which would include a false oath, black magic, or the like. The psalmist (Ps. 16:4) declares that he will not take the name of another god on his lips. Oaths by the god Ashimah of Samaria, and heathen gods at the shrines of Dan and Beer-sheba, are condemned by Amos (8:14). The Jews of Elephantine in Egypt took oaths by the deities Anathyahu, Harambethel, and the Egyptian goddess Sati. In later time one swore by heaven, earth, Jerusalem, the temple, or one's own head. The oath by one's head, common in Arabic, was also apparently frequent in Jesus' day (Matt. 5:36). In I Chr. 12:19 the Philistines swear by their heads.

The oath is accompanied by symbolic acts. The gesture of the oath was to raise the hand toward heaven (Gen. 14:22; Deut. 32:4; Dan. 12:7 [both hands]; Rev. 10:5-6 [the right hand]). To lift the hand, therefore, means to swear, and even God swears thus (Exod. 6:8; Ezek. 20:5). It is by his right hand that the Lord swears (Isa. 62:8; cf. the Arabic oath by the right hand of Allah and the meaning "oath" for the word *yamīn*, "right hand"). In Ps. 144: 8, "whose right hand is a right hand of falsehood" refers to those who swear falsely.

The swearer may lay hold of some sacred and potent object, as the genitals of the patriarch (Gen. 24:2; 47:29). The rabbis understood the placing of the hand under the thigh as an oath by Abraham's circumcision (cf. Midrash Rabba, Palestinian Targum, and Rashi); but in view of the importance of the divine gift and attribute of fertility which the male organ symbolized, it seems unlikely that this form of oath had originally anything to do with circumcision. The later Jewish custom of taking hold of the Scriptures or phylacteries in a judicial oath furnished the model for the present-day procedure of swearing on the Bible.

Sacrifices accompanied the oath in connection with a covenant. The Hebrew idiom for making a covenant is "to cut a covenant with" someone. In Arabic the verb *qasama*, "cut," in the causative stem, *aqsama*, means "to swear," and the noun *qasam* means "oath." In the sacrifices of the covenant the animals were cut in two, and one or both parties passed between the pieces (Gen. 15:10, 17). In Jer. 34:18 those who break the covenant with the Lord are told that they will be made like the calf which they cut in two and passed between its parts. This suggests that the oath which bound the parties to a covenant may have stipulated in the conditional curse that the violator should be treated like the sacrificial animal. The Lord's covenant with Israel was conceived as having been sealed by mutual oaths, so that the promises of the covenant are referred to as things that the Lord swore to do (Gen. 24:7; 26:3; 50:24; Exod. 13:5, 11; 33:1; Num. 14:16, 30; 32:11; Deut. 1:8, 35; 6:10; etc.).

There are two varieties of oaths in the OT. The generic term שבועה designates the simpler form. The root of the word is the same as that of the number seven, and the verb "to swear" is the reciprocal verbal aspect (*Niph'al*) נשבע, which indicates that the swearer in some way enters into a relationship with the magical number seven. In the oath between Abraham and Abimelech at Beer-sheba (the well of seven, or well of the oath), Abraham set apart seven ewe lambs as a witness that he dug the well (Gen. 21:22-31). According to Herodotus (3.8), in Arab covenant oaths seven stones were smeared with blood. The second term, אלה, often translated "oath," properly means "curse." The two terms are used jointly (Num. 5:21; Neh. 10:29; Dan. 9:11). The oath for the suspected adulteress is termed the "oath of the curse," שבועת האלה (Num. 5:21). The curse is pronounced by the priest, and the woman accepts it by saying: "Amen, Amen." The terror of the curse is calculated to extract a confession from the guilty in advance of the administration of the oath, and was doubtless successful in many cases. When, e.g., Micah heard his mother's curse on the thief who had stolen her eleven hundred pieces of silver, he promptly confessed the theft (Judg. 17:2). For the suspected adulteress it was not sufficient simply to have her accept the curses by saying "Amen" to the priest's words; the curses were written down and the words washed off into the bitter water which the woman was made to drink; thus she took the poison of the curses into her body. If she were guilty, the curses would surely take effect; and if innocent, she would be immune. A fanciful example of a written curse with magical power is given in Zech. 5:1-4, where the prophet sees a vision of a large flying scroll inscribed with a comprehensive curse for every thief in the land; the scroll enters the house of the thief and the one who swears falsely by the Lord's name, and destroys the house. This vision was apparently called forth by the prophet's suspicion that there were many thieves in the land who had taken the oath of innocence falsely.

The full, unexpurgated oath includes a conditional curse intended to carry the conviction that the swearer is speaking the truth. The more serious the issue at stake, the more terrible would be the curses that are designed to enforce the oath. Because of the

fear which the curse induces, the actual content of the curse is ordinarily suppressed, leaving only an eviscerated form of the oath. A common oath formula of the OT is: "May God the Lord do so to me and more also, if" I do, or do not, thus and so (Ruth 1:17; I Sam. 3:17; 14:44; II Sam. 3:35; I Kings 2:23). This formula may be varied and made more emphatic by the swearer's pronunciation of his own name (I Sam. 20:13; 25:22; II Sam. 3:9). When this formula is used by the pagan non-Israelites Jezebel (I Kings 19:2) and Ben-hadad (I Kings 20:10), it has a polytheistic turn, with the verb in the plural: "So may the gods do to me, and more also." As God is the guardian of the oath and fulfils or nullifies the curses in accordance with justice, one may make his asseveration an oath by calling God to witness (Gen. 31:50; I Sam. 12:5; 20:23 [reading *'ēdh* instead of *'adh*]; II Cor. 1:23; Gal. 1:20; Phil. 1:8) or to watch (Gen. 31:49) or to judge (Gen. 31:53). Since the validity of the oath depends ultimately on the deity who sanctions it, the most common asseveration is: "As the LORD lives" (Judg. 8:19; I Sam. 14:39, 45; 19:6; 20:3, 21; 25:26, 34; 26:10, 16; 28:10; 29:6; etc.), to which one may add a like asseveration by the life of the persons to whom he is speaking (I Sam. 20:3; II Sam. 11:11). The Lord swears by his own life (Ezek. 17:16; Zeph. 2:9) or by himself (Gen. 22:16).

The reluctance to pronounce the full oath replete with imprecations, for fear that, even though divine agency is assumed, the words themselves might inflict harm, led to the suppression of the conditional curse and the further reduction of the formula until only a vestige of the protasis remained: "if," and "if not." With the omission of the curse in the apodosis, the positive conditional protasis becomes a negative asseveration (if I do thus and so, may I be accursed —i.e., I surely will not do it), and the negative condition becomes a positive asseveration (if I do not thus and so, may I be accursed—i.e., I surely will do it).

In a few cases we have the full form of the oath with elaboration of the curses (Num. 5:19-28; Pss. 7:4-5; 137:5-6). These are exceptional cases, where the issue is grave and the emotion is very strong. The classic example is Job's apology for his life (ch. 31), which consists of a sort of negative confession in the form of a series of oaths complete with curses, which call down on himself such calamities as loss of property, alienation of his wife, the mutilation and maiming of his body, etc. In extremity of desperation and in his anxiety to impress both God and his hearers with his sincerity and innocence, Job breaks the taboo and calls down on himself the most terrible curses he can conceive. Here we see the oath in all its force as a kind of ordeal and spiritual combat. The swearer puts his whole soul and all that he has into the oath and exerts himself to the utmost to prove his integrity. The tension is extreme, but the just man will bear up under it, while the unjust man will break under the strain. In more ancient times it is probable that the families and households of the opposing parties stood behind the principals and gave their support and placed themselves in jeopardy. In Deut. 21:1-10 the elders of the city nearest the place where a slain man is found take responsibility for the whole city and affirm the city's innocence and ignorance of the killing before the Lord.

According to the NT, Jesus' attitude toward the prevalence of the oath in everyday Jewish life resembled that of the Essenes, who, as Josephus tells us (War II.viii.6), esteemed swearing on ordinary occasions as worse than perjury. Jesus urged that all oaths be omitted (Matt. 5:34; cf. Jas. 5:12). His own use of "Amen, Amen," however, while not strictly an oath, is a solemn asseveration akin to an oath and goes beyond the simple "Yes" and "No" which he recommended (Matt. 5:37). His strictures against oaths by the temple, the temple gold, the altar, or heaven (Matt. 23:16-22) are aimed at the casuistry which attempted to classify oaths, according to degrees of validity. Nevertheless, at the trial he deferred to custom in some measure: when the high priest asked simply if he had no answer to the testimony against him, he remained silent; only when the high priest adjured him by the living God to say whether he was the Christ, did he give answer (Matt. 26:63). This is in accordance with the Mishna (Shebu. 4.13), that if one adjures another by heaven and earth, it is not binding, but if one adjures another by one of the divine names, it is binding.

Peter's denial at the trial (Matt. 26:69-75) covers all three modes of Jewish asseveration. First, he simply denied, then he denied with an oath, and lastly he invoked a curse on himself and swore that he did not know the man.

Paul uses a form of oath attested in the OT when he calls God to witness his asseveration (II Cor. 1:23; Gal. 1:20; Phil. 1:8).

Oaths had an important place among the sectarians at Qumran. An oath of strict and complete allegiance to the law was required of every candidate for membership in the order. The text of the oath is not given, but it was certainly reinforced with curses, which are several times referred to in the Manual of Discipline as the "Curses of the Covenant" (אלות הברית), and similarly in the Damascus Document.

See BLESSINGS AND CURSINGS; COVENANT; VOWS.

OBADIAH ō´bə dī´ ə [עבדיהו, עבדיה, servant of Y].

1. The chief of King Ahab's household, and a devout follower of Yahweh (I Kings 18:3-16).

2. A descendant of David (I Chr. 3:21).

3. A chief of the tribe of Issachar, and a son of Izrahiah (I Chr. 7:3).

4. A Benjaminite, son of Azel (I Chr. 8:38; 9:44).

5. A Levite who was among the first exiles to return to Jerusalem (I Chr. 9:16). He is called Abda in Neh. 11:17.

6. A Gadite chief who joined David's army and became an officer (I Chr. 12:9).

7. The father of Ishmaiah, one of the chiefs of Zebulun in the last days of David (I Chr. 27:19).

8. One of the princes whom King Jehoshaphat sent to teach the "book of law of the LORD" to the people in all the cities of Judah (II Chr. 17:7-9).

9. A Levite overseer of the temple repairs in the time of King Josiah of Judah (II Chr. 34:12). For the important religious reform which resulted from such repairs, *see* JOSIAH.

10. One of the priests who accompanied Ezra in his return to Jerusalem and who put his seal to the covenant between the people and God (Ezra 8:9; Neh. 10:5).

11. A gatekeeper who guarded the storehouses of the gates in the days of the high priest Joiakim (Neh. 12:25). E. R. ACHTEMEIER

OBADIAH, BOOK OF [עבדיה, *a common name* (cf. I Kings 18:3, 7, 16; I Chr. 27:19; II Chr. 34:12; etc.), servant of Yahweh]. A book of prophecy, the shortest in the OT and the fourth of the Book of the Twelve. It belongs to a literature of anti-Edomite polemic (Gen. 27:39-40; Ps. 137:7; Isa. 34:5 ff; 63:1-6; Ezek. 25:12-17; 35; Amos 1:11-12; Mal. 1:2-4; cf. Jer. 49: 7-22) and of Day-of-the-Lord prophecies (Isa. 2:6-22; Ezek. 7; Joel 1:15-2:11; Amos 5:18-20; Zeph. 1:7, 14-18), to which it bears numerous affinities in thought, style, and diction.

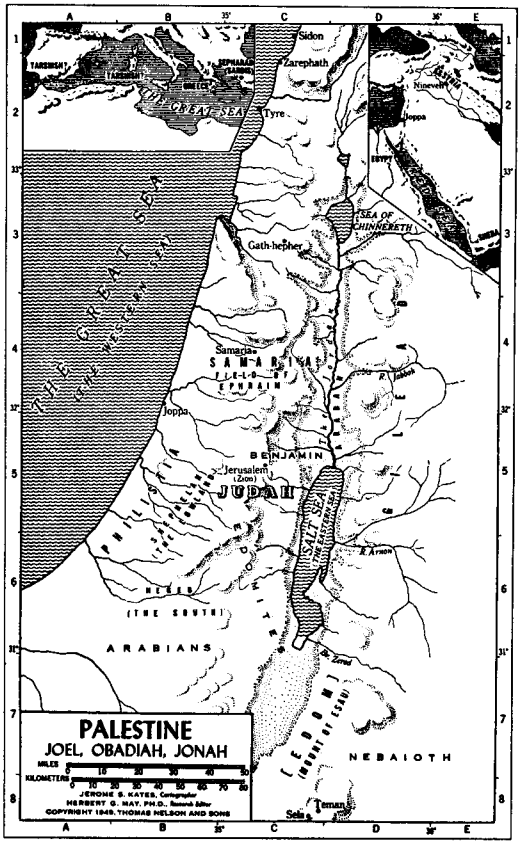
Bibliography

1. Historical setting and occasion. Israel's hatred of Edom was inveterate. The aetiological narratives of Genesis record the tensions between Jacob-Israel and Esau-Edom (Gen. 25:23; 27:39-40). From the time of the United Monarchy the control of Edom was a fixed policy of the kings of Israel and Judah. The lucrative trade from Ezion-geber (modern Tell el-Kheleifeh), the port on the Gulf of Aqabah, passed through Edomite territory, and wars, as a consequence, were not infrequent (II Sam. 8:13-14, reading אדם for ארם; I Kings 11:14-17; II Kings 14: 22; 16:5-6; II Chr. 20; 21:8-10). When Jerusalem fell in 597, Edom exploited Judah's plight, rejoiced in its fate (Lam. 4:21), "acted revengefully" against her (Ezek. 25:12), joined with the Babylonians in her destruction, and occupied the Negeb (Ezek. 35: 10). The description of Edom's behavior in Obad. 11-14 is the most definite of all the anti-Edomite oracles, and is generally held to reflect conditions after 597. The only question is whether it should refer to contiguous verses in the book; on this matter there has been considerable diversity of opinion among scholars.



2. Contents. The superscription is brief: "The vision [חזון; cf. Isa. 1:1; Nah. 1:1] of Obadiah." The oracular formula, "Thus says Lord Yahweh," is awkward in the context of the following: "We have heard," and should probably be excised (so Eissfeldt). In an ecstatic audition the prophet has heard "tidings" (reading "I have heard" with the LXX, Jer. 49:14: שמועה שמעתי) from Yahweh, and a messenger has been sent among the nations to call them to battle. *Edom delenda est.* From her lofty dwelling "in the clefts of the rock" (probably Petra, and its fortress rock Umm el-Bayyarah) she is brought down, pillaged, and plundered. "On that day" (ביום ההוא) Yahweh will destroy her wise men and mighty warriors. Teman, modern Tawilan, is five miles E of Petra. The references are certainly to the future, not to the past. The grounds for this awful fate are given in vss. 11-14, 15*b:* as Edom has done to Judah, so it shall be done to her. Vss. 15*a,* 16-21, describe the imminent coming of the Day of the Lord. The classical motif of reversal, characteristic of many such oracles, is sounded here (cf. vs. 15*b*): the house of Jacob shall possess Edom's possessions. Mount Zion will rule Mount Esau, and the kingdom will belong to Yahweh.

3. Composition and integrity. The structure of the book may be delineated as follows:

I. Superscription: vision of Obadiah concerning Edom, vs. 1*a*
II. An ecstatic audition, 1*b*
III. Edom's imminent destruction and its justification, 2-14
  A. The divine judgment on Edom, 2-10
    1. Her pride brought low, 2-4
    2. Destruction, pillage, abandonment, 5-7
    3. The day of her shame, 8-10
  B. The day of her treachery, 11-14, 15*b*
    1. Edom's aloofness when Jerusalem fell, 11
    2. Her evil gloating over Judah's distress, 12
    3. Her invasion of Jerusalem, 13
    4. Her support of the Babylonians, 14
    5. Judgment, 15*b*

IV. The Day of Yahweh, 15*a*, 16-21
A. The reversal of fate, 15*a*, 16-18
B. The lands repossessed, 19-21

Many views have been held regarding the composition of the book: (*a*) T. H. Robinson resolves it into a series of independent oracles from different times (vss. 1-5, 6-7, 8-11, 12-14, 15-16, 17-18, 19-21); (*b*) Sellin takes vss. 1-10 and vss. 11-14, 15*b*, as two separate pieces stemming from different periods; (*c*) Rudolph and Weiser support the essential integrity of the book, though with some reservation.

The issues involved in reaching a decision on the matter of composition are as follows:

a) The literary relation of Obad. 1-10 to Jer. 49: 7-22. That the two passages are parallel, there is no doubt, but the question of the priority of one over the other has been much controverted. It is now quite generally agreed that the passage in Jeremiah is secondary. While the text of the latter is admittedly superior, Obadiah is better ordered, more vigorous in style, and more closely knit.

b) The historical situation. While it is generally held that vss. 11-14 reflect conditions after 587, it is not clear that this is the background for the whole book. Many feel that vss. 15*a*, 16-21, reflect the thought of a later period. Thus the unity of Obadiah is quite generally called into question, and for the following reasons: (1) In the first major section (III) the nations are the divine instrument of judgment, in the second (IV) they are its objects; in the first section only Edom is punished, in the second the nations also, while Israel is the instrument. (2) The first section is addressed to Judah through the prophet's ecstatic audition; the second section is addressed to Edom.

But against these considerations others are to be weighed: (1) The motif of the Day persists throughout (8*a*, 11-15*a*), and the corresponding diction and imagery are present. (2) Throughout, Esau-Edom (cf. also Mount Esau [8, 9*b*]) is the central object of concern. (3) The motif of reversal is common to both (cf. 15*b*, 16-18). (4) So far as vss. 15*a*, 16-21, are concerned, the motif of possession is pervasive.

In view of all these considerations, it is hazardous to deny the possibility of an essential unity. The transition from the historical to the eschatological is by no means unparalleled; moreover, the appeal to difference in language carries little force. The books of Joel and Zephaniah are not greatly different.

4. Date. Wellhausen assigned the book to the fifth century, and many have followed him in this. He believed that the true background was to be discovered in the pressure of Arab tribes upon the Edomites and that the verbs in vss. 1-9 referred to past events. But there is no clear allusion to an Arab invasion, and the reference in the verbs is clearly to the future. While many other dates have been proposed, some of them in the pre-exilic period (Keil: 889 B.C.; Sellin: *ca.* 850 in the context of II Kings 8:20-22), others in the postexilic (Hitzig: 312), the unity of vss. 1-14, 15*b*, can be said to be established; the date would then be determined by vss. 11-14, the period shortly after 597. If the second major section, especially vss. 15*a*, 16-18, is from Obadiah, then the date is the same; if not, it is to be dated sometime later. If we hold to the essential integrity of the book, it comes from the time shortly after 587.

5. Text. The text of Obadiah has been well preserved. As a whole, the LXX is certainly inferior, but occasionally may be of help in restoring the original, as in vs. 1, where we should probably follow the LXX in reading שמעתי for the MT שמענו. In vs. 9 the final words, "by slaughter," are transferred to the beginning of vs. 10: "for the slaughter and violence." In vs. 16 the MT reads לעו (LXX ἀναβήσονται, adopted by some scholars). In vs. 21, where the MT has מושעים, "saviors," the LXX and the Syr. read: "those who have been saved." This is also accepted by many scholars as original.

J. MUILENBURG

OBAL ō′bəl [עובל] (Gen. 10:28). Alternately: EBAL ē′bəl [עיבל] (I Chr. 1:22). A son of Joktan, and hence the name of an Arabian group. The location of the tribe cannot be established with certainty. Abil is a frequent geographic name in Yemen; there is also an Ubal located between Hadeida and Sanaa, the capital of Yemen. On the other hand, the group of tribes that immediately precedes Obal—viz., Hadoram, Uzal, and Diklah—is probably to be located farther to the N, in the neighborhood of Mecca; and hence Obal may have been in this region.

S. COHEN

OBDIA. KJV Apoc. form of HABAIAH.

OBED ō′bĭd [עובד, עבד, worshiper; Ἰωβήδ]. **1.** The son of Boaz and Ruth; the father of Jesse; the grandfather of King David (Ruth 4:17, 21-22; I Chr. 2: 12). As a child, he was nursed by Naomi, and according to Matt. 1:5; Luke 3:32, he became an ancestor of Jesus Christ.

2. A Judahite (I Chr. 2:37-38).

3. One of David's Mighty Men (I Chr. 11:47).

4. A gatekeeper in Solomon's temple (I Chr. 26:7).

5. The father of Azariah, a commander in the days of Queen Athaliah of Judah (II Chr. 23:1).

E. R. ACHTEMEIER

OBED-EDOM ō′bĭd ē′dəm [עבד־אדם, עבד־אדום, servant of (the god) Edom(?); *cf.* Phoen. מלך־אדם; *or* servant of man(?), *reading 'ādhām for 'ᵃᵉdhōm*]. **1.** A Philistine from Gath residing between Kiriath-jearim and Jerusalem. It was at his house that David left the ark after the death of Uzzah. The good fortune which Obed-edom enjoyed during the three months the ark was in his house convinced David that he should bring the ark into Jerusalem, as he had originally intended (II Sam. 6:10-12; I Chr. 13:13-14; 15:25).

2. Keeper of the S gates of the temple and the storehouse (I Chr. 26:4-8, 15); probably a Korahite, since the Merarites are not mentioned until vs. 10, and vs. 19 limits the gatekeepers to these two fam-

ilies. The phrase "for God blessed him" (vs. 5) may indicate that he is to be identified with 1 *above* (cf. I Chr. 13:14).

3. A Levitical musician (I Chr. 16:5). In the list of singers in I Chr. 15:16-24 he appears as the "gatekeeper Obed-edom" (vs. 18); vs. 24 implies that he was both gatekeeper and musician. I Chr. 16:38 makes him the son of the musician Jeduthun, but gives his job as that of gatekeeper. It may be that the gatekeepers of the temple took the Philistine Obed-edom as their eponymous ancestor. Because of their involvement in the service of the temple, they would naturally be transformed into Levites (cf. II Kings 11; II Chr. 23; the foreign troops of the former passage become Levitical gatekeepers in the latter). Eventually the guild changed from gatekeepers into a guild of musicians, and this accounts for the association of Obed-edom with Jeduthun.

4. Guardian of the sacred vessels of the temple. He was taken as a hostage by Joash of Israel after his defeat of Amazaiah of Judah and the capture of Jerusalem (II Chr. 25:24; his name does not appear in the parallel account of II Kings 14:14).

OBEDIENCE. In the OT the common Hebrew word for "obedience" and its cognates is the root שמע, which literally means "hear." Translators are constantly faced with the problem of when to translate שמע by "hear" and when by "obey."

While the term is used in the OT to express such action in ordinary human relationships, it is the relationship between God and man—or more specifically God and Israel—which provides the proper context for understanding its full meaning. The basic presupposition is that God has revealed himself to Israel through his "word" or his "voice" (Gen. 27:8; Exod. 19:5; Deut. 28:12; Jer. 7:23). When God speaks, he does so through his chosen representatives, a patriarch or judge (Judg. 2:17), prophet, priest (Deut. 17:12), king (II Kings 10:6), etc. His word not only reveals what he purposes to do, but also points to that action whereby he is already fulfilling or is about to fulfil his purpose. Indeed, the one through whom God declares his word is already made participant in his action. Abraham fully understands God's word that he should sacrifice his son when, in the act of sacrificing, God acts to provide the lamb (Gen. 22:1-19). Moses fully understands God's word to lead the Israelites out of Egypt (Exod. 5) when, in the act of leading, God brings the plagues on Egypt (chs. 8 ff) and separates the waters of the sea (ch. 14). Jeremiah understands God's word of judgment on Judah as he hears the snorting horses (Jer. 8:16) God brings from the N and the false cries of "Peace, peace," when there is no peace (Jer. 6:14; 8:11).

To "hear" God's word involves a single response that can be described from three different standpoints. First, it is a word which always involves the physical sense of hearing, since God fulfils his purposes in and through human beings. Second, to understand what one hears demands that the hearer respond in faith and trust in God's word and action. Third, such response involves the hearer in obedient action to fulfil God's intention for his part in the divine action. To understand the ambiguity of the word "hear" is necessary to grasping the full meaning of the word. To really hear God's word inevitably involves one in an obedient response in action prompted by faithfulness to and faith in the God who is revealing himself in and through particular historical events. Not to respond in obedient action is tantamount to unbelief—and so the prophet chastises his people for their blind eyes and deaf ears (Isa. 6:9-10), which betray their faithlessness. The inevitable consequence of failing to hear is rebellion or disobedience. But rebellion is not just the wilful disobedience of one who has heard. Rebellion is the sign that one has not really heard, since to hear implies a faith-obedience response.

The history of Israel can be treated as the story of Israel's hearing or failure to hear God's word. In the early period of her history God speaks to Israel through appointed leaders, through whom God makes covenants—the climactic covenant being established through Moses in the giving of the law with its demands and promises. In the prophets God speaks anew to Israel, condemning her rebellion, calling her to faithful remembrance and obedient action in each new historical situation. Amos repeatedly says: "Hear this word" (3:1; 4:1; 5:1; 8:4). Jeremiah reminds his people: "But this command I gave them, 'Obey my voice, and I will be your God, and you shall be my people; and walk in all the way that I command you, that it may be well with you'" (Jer. 7:23). One of the major themes of postexilic Judaism is that Israel had failed to hear Moses and the prophets. When the returned exiles had been settled, one of the first acts of Ezra was to read the "book of the law of Moses" to all "who could hear *with understanding*" (Neh. 8:1-2). As late as the book of Daniel the relentless charge is made: "We . . . have not obeyed the voice of the LORD our God by following his laws, which he set before us by his servants the prophets" (Dan. 9:10). After the close of the prophetic period (*see* PROPHET) the Jews directed their attention increasingly to the law as the revealed word of God. There developed, then, a tendency to understand faith-obedience in moralistic and legalistic terms. *See* LAW (IN THE OT).

The NT presupposes the OT understanding of obedience. The usual term is ὑπακοή, but, again, "to hear" (ἀκούω) often means "to obey." In the characteristic word of Jesus: "He who has ears to hear, let him hear," the word "hear" bears the full meaning of שמע in the OT. He was not only asking people to hear his word in the physical sense, but that in faithful response they accept his word as a word from God and act in obedience to it. "Every one then who hears these words of mine and does them will be like a wise man who built his house upon the rock" (Matt. 7:24). As in the OT, to "hear" involved the hearer in the belief that Jesus was chosen of God to be the bearer of his word and that in his ministry God's action was already revealed. The sign that men had heard was repentance and belief in the good news of the kingdom (Mark 1:14-15). While Jesus called men to obedience to the good news of the kingdom, he did not see his message as contra-

dicting the obedience called for in the Law (Mark 10:17 ff). Nevertheless, his own understanding of God's voice led him to an interpretation of the specific demands of the law which conflicted with the interpretation of others (Mark 2:23-28; 7:1-23; 10:1-12). This meant that his word was hard to "hear," not only because of Jesus' rigorous demands, but also because it implied an immediate awareness of a revelatory word of God in Jesus' words and ministry. Only those who had received the secret of the kingdom could understand (Mark 4:11-12); others did not *really* "hear." Obedience to his words presupposed believing and trusting him in his mission.

The earliest Christian community was confident that God had spoken anew through Jesus Christ. In Acts, Peter says: "Men of Israel, hear these words" (2:22). The crucial center of the message was the death and resurrection of Jesus, who was now fully manifest as Messiah. The sign of hearing was repentance in faith (6:7). Hearing or obedience was the faith-response to the gospel, now understood as a decisive word of God spoken through the death and resurrection of Jesus. Paul refers to the response to the gospel of the Galatian Christians as "hearing with faith" (Gal. 3:2; ἐξ ἀκοῆς πίστεως). The word translated "hearing" refers both to that which is heard and to the hearing itself. Paul's apostleship to the Gentiles is for the bringing about of the "obedience to the faith" (Rom. 1:5; ὑπακοὴν πίστεως). Hearing or obedience, then, is used in the closest relationship to faith, not as two distinct acts, but as one and the same response. "Faith comes from what is heard, and what is heard comes by the preaching of Christ" (Rom. 10:17). In the NT obedience is understood as faith-response to God's word in Jesus Christ, with special emphasis on Christ's own obedience (Phil. 2:8; Heb. 5:8). Whereas Adam and all men sin and are disobedient, Christ alone was truly obedient (Rom. 5:18-21). And it is through his obedience that believers receive righteousness and eternal life (Rom. 5; Heb. 5:9). Christians are "obedient children" (I Pet. 1:14), since through faith in Christ they share in the benefits of his obedience, and also in their lives of faith they act in obedience to him (Rom. 6:16; II Cor. 10:5-6; I Pet. 1:22). The life of obedience is not primarily the submission of the will to laws, either of the Old Covenant or of the New. It is life lived in obedience to the Spirit, which has made the "hearing with faith" a possibility (Gal. 3:2-5). Believers are "sanctified by the Spirit for obedience to Jesus Christ and for sprinkling with his blood" (I Pet. 1:2). Obedience understood from the standpoint of ethical conduct is first and foremost the "fruit of the Spirit" (Gal. 5:22), which is the "fruit of righteousness" that is through Jesus Christ (Phil. 1:11 ff). "My sheep hear my voice, and I know them, and they follow me," says the Gospel of John (10:27). But they do this as the Spirit speaks (John 14:25-26; 16:12-15). It is the obedience of the "heart" that leads to righteousness (Rom. 6:16-19). Obedience, as in the OT, is both a religious and an ethical term. This is also true of disobedience, which at one and the same time refers to faithlessness and to the immoral acts which are its outward signs (Acts 19:19; Rom. 11:31; Tit. 1:16; 3:3; I Pet. 4:17).

F. W. YOUNG

OBEISANCE. In the OT, השתחוה (short form השתחו; cf. Ugaritic *tštḥwy*, from *ḥwy*), "to do/make obeisance," "to do/make homage," "to bow down," means to prostrate oneself on the ground as a gesture of worship, homage, or submission.

In the NT, this Hebrew word is normally translated by προσκυνέω, "to worship." *See* WORSHIP IN NT TIMES, CHRISTIAN.

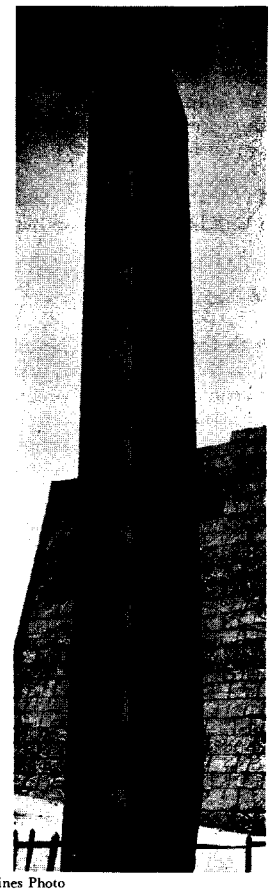
OBELISK ŏb'ə lĭsk [מצבה, pillar, standing stone] (Jer. 43:13); KJV IMAGE. Because of the context, the Hebrew word in this passage is interpreted as a reference to the obelisk, a type of sacred monument native to ancient Egypt. Figs. OBE 2; ELE 24.



Trans World Airlines Photo

2. Obelisk at a temple at Thebes, Egypt

In its normal form the obelisk is a tall, slender, four-sided stone pillar, gently tapering toward the top, which is mounted by a pyramidion. The obelisk originated in the Egyptian cult center of HELIOPOLIS and seems at first to have been associated with the principal deity, Atum-Re, the sun-god. Earlier forms of the fetish are pictured which are shorter and broader. The exact reasons for the association of this type of monument with Atum-Re are not clear, but we do at least have mention of the god's both living in and resting on the obelisk. The Egyptians called the object the *ben* or *benben* and associated it with the rays of the rising sun, perhaps merely because of the

similarity in sound to the verb *wbn,* "to rise, shine" (of the sun).

Through the constant extensions and syncretisms characteristic of Egyptian religion the obelisk assumed a variety of uses and significances beyond the original one. In the New Kingdom, e.g., the obelisk (usually in pairs) was erected with an appropriate inscription to commemorate the celebration of the king's Thirty-Year Festival. It is also found as a symbol of the moon, as well as being used for purely ornamental purposes.

Bibliography. H. Schafer, "Die Sonne auf dem Obelisk," *OLZ,* 32 (1929), 723-25; H. Bonnet, *Reallexikon der ägyptischen Religion* (1952), pp. 539-42. T. O. LAMBDIN

OBETH ō'bĕth. KJV Apoc. form of OBED.

OBIL ō'bĭl [אוביל, camel-driver; *cf.* Arab. *'abbal*] (I Chr. 27:30). An Ishmaelite who was one of the royal stewards of the property of King David and had charge of the royal camels.

OBLATION [מנחה] (I Kings 18:29, 36); KJV EVENING SACRIFICE. *See* SACRIFICE AND OFFERINGS §§ A2*b*i-ii.

OBOE. *See* MUSICAL INSTRUMENTS.

OBOTH ō'bŏth [אבת, fathers] (Num. 21:10-11; 33:43-44). A station of the wilderness wanderings of the Israelites, between Punon and Iye-abarim in Moab. It has been identified by some with 'Ain el-Weiba, not far from Feinan, the biblical Punon; but since the route of the Israelites between Punon and the borders of Moab is not known with certainty, this identification is not definite. S. COHEN

OBSOLETE TERMS. A major reason for revision of the KJV is afforded by changes in English usage.

1. Obsolete words
2. Words with obsolete meanings
   a. Words with changed meanings
   b. Words which have acquired worse or more violent meanings
   c. Words which have acquired less evil meanings or good connotations
3. Other archaic usage
4. A selected list of obsolete terms and their meanings

Bibliography

1. Obsolete words. The KJV contains some words, current in 1611, which have become archaic or obsolete. Examples are: "afore," "agone," "albeit," "all to brake," "astonied," "chapiter," "dure," "to ear," "emerods," "flowers," "folden," "to fray," "goodman," "gorget," "graff," "habergeon," "hoise," "knop," "leasing," "to list," "magnifical," "marish," "to mete," "neesing," "ouches," "ravin," "scrip," "sith," "taches," "trow," "wist," "wot." The meaning of these words may usually be inferred from the context, and they are not often misleading.

2. Words with obsolete meanings. More dangerous are the English words which are still in constant use but now convey a different meaning from that which they had in 1611 and in the KJV. These words were once accurate translations of the Hebrew and Greek scriptures; but they have so changed in meaning, or have acquired such additional meanings, that they have become ambiguous or misleading. They no longer say to the reader what the KJV translators meant them to say.

a. Words with changed meanings. "Prevent" is always used by the KJV in the obsolete sense of "be or go ahead of, precede." "I prevented the dawning of the morning" means "I rise before dawn" (Ps. 119:147). "Let" appears three times in the sense of "hinder" or "prevent" (Isa. 43:13; Rom. 1:13; II Thess. 2:6-7). "Suffer" is used sixty-nine times in the sense of "undergo" or "endure," and sixty times in the archaic sense of "let, allow, permit." "Allow" is always used in the sense of "praise, approve, accept."

By "conversation" the KJV always refers to conduct, behavior, or manner of life. Hence the injunction to "put off concerning the former conversation the old man" means "put off your old nature which belongs to your former manner of life" (Eph. 4:22), and "filthy conversation" means "licentiousness" (II Pet. 2:7). "Convenient" is applied to what is fitting and proper, rather than to what suits one's personal ease or comfort or lies near at hand (Eph. 5:4). The KJV uses "communicate" for "share" (Heb. 13:16), "evil communications" for "bad company" (I Cor. 15:33), "communed" for "discussed" (Luke 6:11), and "condescend" for "associate" (Rom. 12:16). "The darkness comprehended it not" means "The darkness has not overcome it" (John 1:5). In Rom. 8:19-23, 39, the word "creature" is employed in the sense of the "created universe"—the "whole creation," as the KJV itself translates the same Greek word in vs. 22. "Every creature of God" means "everything created by God" (I Tim. 4:4), and a "new creature" means a "new creation" (II Cor. 5:17; Gal. 6:15).

b. Words which have acquired worse or more violent meanings. Some words are used by the KJV in a good, or at least harmless, sense but now have acquired worse or more violent meanings. "Base" simply means "humble" (II Cor. 10:1), and "our vile body" means "our lowly body" (Phil. 3:21). "Demanded" means "asked" (Luke 3:14); "addicted themselves" is "devoted themselves" (I Cor. 16:15); and "unspeakable" means "inexpressible" (II Cor. 9:15). "Riot" and "rioting" refer to revelry and loose living rather than to turbulence and violence (Tit. 1:6; Rom. 13:13). The "feebleminded" are not mentally deficient, but simply "faint-hearted" (I Thess. 5:14). The word "covet" is used for earnest desire and zeal for the higher things of life, as well as for inordinate passion for its more material comforts (I Cor. 12:31). To "tempt" is sometimes used in the sense of "try" or "test," without the present implication of seeking to lead into evil (Mark 12:15).

c. Words which have acquired less evil meanings or good connotations. Some words that were used by the KJV in a bad sense have now acquired less evil meanings or even good connotations. "Debate" is listed among the characteristics of the reprobate mind (Rom. 1:29), and "emulation" among the works of the flesh (Gal. 5:20). "Delicacies" and "deliciously" are used for wanton licentiousness in Rev. 18:3, 7, 9.

To be "highminded" in 1611 was to be proud or haughty (Rom. 11:20; I Tim. 6:17; II Tim. 3:4); the term is now used for noble character and high principles, with no suggestion of unworthy pride. "Naughtiness" is really bad in the KJV; it means downright wickedness (Jas. 1:21).

Not only "anon," but also "by and by," "presently," and "out of hand" mean "immediately" in the KJV. "Discover" means to uncover, strip, lay bare. "Offend," as translation of the Greek verb σκανδαλίζω, means "cause to sin." In all but two cases, KJV uses "occupy" in the obsolete meanings of "use" and "trade with."

The "outlandish" women who led Solomon astray were simply "foreign" women (Neh. 13:26). A "peculiar people" means a people of God's own, both in Deut. 14:2; 26:18 and in Tit. 2:14; I Pet. 2:9. The word "virtue" means "power" in Luke 6:19; 8:46. A "virtuous woman" (Prov. 31:10) means a "good wife." The word "wealth" was used in the sixteenth century not only for "riches," but also in the sense of "weal, well-being, welfare." Unless this is remembered, Paul's counsel in I Cor. 10:24 looks like encouragement to theft: "Let no man seek his own, but every man another's wealth."

"Possess" in the KJV almost always has the archaic meaning "to take possession of, acquire, gain." "Tithes of all that I possess" (Luke 18:12) is properly "tithes of all that I get"—i.e., the tithe is based upon income. Paul's counsel that each should "know how to possess his vessel" means "know how to take a wife" (I Thess. 4:4).

"Take no thought" means "Do not be anxious" (Matt. 10:19). "Be careful for nothing" means "Have no anxiety about anything" (Phil. 4:6). The word "follow" once meant "imitate," but this meaning is now obsolete, and modern translations forsake "follow" in the eleven cases where the Greek calls for "imitate" or "imitators." A striking example is Heb. 13:7, where the KJV reads: "Remember them which have the rule over you, who have spoken unto you the word of God: whose faith follow, considering the end of their conversation." The RSV reads: "Remember your leaders, those who spoke to you the word of God; consider the outcome of their life, and imitate their faith."

3. Other archaic usage. More pervasive than the appearance of particular words in obsolete meanings, is the archaic usage of prepositions and indefinite pronouns, and the insertion of "manner" and "even."

The most versatile and ambiguous preposition in the KJV is "of." It is used where we would now say "by"—Jesus is said to be baptized *of* John and led *of* the Spirit into the wilderness to be tempted *of* the devil. "Which was spoken of the Lord by the prophet" (Matt. 2:15) seems to mean the prophet's word concerning the Lord; the clause is cleared of ambiguity by the ASV: "which was spoken by the Lord through the prophet," and by the RSV: "what the Lord had spoken by the prophet." "Which I have heard of God" means "which I heard from God" (John 8:40). "The zeal of thine house" is "zeal for thy house" (John 2:17). The expression "I am sick of love" (Song of S. 2:5) now implies surfeit and distaste; the Hebrew is better translated: "I am sick with love." Timothy is urged, not to "be . . . an example of the believers," but to "set the believers an example" (I Tim. 4:12). Other prepositions used in various archaic senses are "after," "against," "at," "by," "to," and "touching." In Matt. 20:31 the conjunction "because" is used in the obsolete sense of "in order that."

Indefinite pronouns, referring to any person, use the masculine form in the Greek, just as we in English often use the pronoun "he" in a general statement which includes both men and women. The KJV overdoes this masculine habit by its use of "no man" and "any man" where the meaning is "no one" or "any one." This practice limits many statements unduly, and results in occasional infelicities. In Matt. 11:27 it is said that "no man knoweth the Son, but the Father." The word "but" is ambiguous here, for it may mean that men do not know the Son but do know the Father. This is absurd. But if the meaning is that no man knows the Son except the Father, the text involves a worse absurdity by implying that the Father is a man. The Greek is perfectly clear, and the revised versions translate it clearly by using the expression "no one." The RSV translates: "No one knows the Son except the Father."

The word "manner" is used 234 times in the KJV, and in more than one third of the cases is unnecessary. There is, in these cases, no corresponding Hebrew or Greek word to call for its use, and the meaning of the text can be conveyed more directly and simply without it. "No manner of work shall be done" (Exod. 12:16) is simply "No work shall be done." "No manner of fat" is "no fat," "no manner of blood" is "no blood," and "any manner of blood" is "any blood" (Lev. 7:23, 26-27). In the gospels "all manner of disease" means "every disease" (Matt. 4:23; 10:1); "all manner of sin" is "every sin" (Matt. 12:31); "all manner of herbs" is "every herb" (Luke 11:42).

The adverb "even" is used 1,032 times in the KJV OT, and in 928 of these cases there is no corresponding word in the Hebrew text. This surprising fact is due in part to the disposition of the translators in 1611 to write "even so" for "so," "even as" for "as," and "even unto" where we should now say "to" or "up to" or "as far as." It is due chiefly, however, to their use of "even" to introduce an additional word or words intended to explain more clearly or fully some preceding word or words. The word "even" was for them a sign of equivalence or identity; it meant that the person or thing or subject referred to in what followed was the same person or thing or subject referred to in what preceded. "The men of the city, even the men of Sodom," means "the men of the city, the men of Sodom"—the same persons are meant by the two phrases (Gen. 19:4). So also "the man, even Lot," means "the man Lot" (19:9). "Jacob set up a pillar . . . , even a pillar of stone" (Gen. 35:14), has no "even" in the Hebrew. In such cases, the word "even" has a function similar to "namely" or "that is." The use of "even" in this colorless sense is now obsolete, and it has become a misleading feature of the KJV. "Even" is now used to indicate an extreme case or something not to be expected. So the reader of Gen. 10:21 is likely to·

wonder what was the matter with Shem to occasion the statement that "even to him were children born."

4. A selected list of obsolete terms and their meanings. A selected list of obsolete terms and meanings follows, with one reference for each term. Other occurrences can be located in a concordance. No attempt is here made to give a complete list of obsolete terms in the KJV. Their number is well over a thousand, and in a complete list account must be taken of a wide variety of contexts. The RSV replaces these terms with their equivalent in living English. It is not for the sake of novelty that the RSV replaces "alleging" with "proving" in Acts 17: 3; it is to restore the meaning of the Greek, the meaning which the word "alleging" had when it was used by the KJV translators, but has now lost.

Term	Reference	Meaning
abhor	I Sam. 2:17	treat with contempt

Bibliography. T. L. O. Davies, *Bible English* (1875). W. A. Wright, *The Bible Word-Book* (2nd ed., 1884), deals with 2,316 archaic or obsolete terms in the KJV and the Book of Common Prayer, and contains a bibliography of six books on Bible words which were published from 1832 to 1864. L. A. Weigle, *Bible Words That Have Changed in Meaning* (1955),

has a selected list of 857 terms, with references. L. A. Weigle, *The Living Word* (1956), was published in Edinburgh with the title *Bible Words in Living Language* (1957). R. Bridges and L. A. Weigle, *The Bible Word Book* (1960). The *Oxford English Dictionary* is an indispensable tool for the study of archaic and obsolete terms. L. A. WEIGLE

OCCUPATIONS. The word "occupation" is rare in the English versions. Joseph's brothers are coached to answer Pharaoh's inquiry about their occupation and so answer that they are "keepers of cattle" (Gen. 46:34) or "shepherds" (Gen. 47:3). The sailors ask Jonah a similar question, but he does not answer (Jonah 1:8). In Corinth, Paul stayed with those who had the same occupation (RSV "trades")—i.e., tentmakers (Acts 18:3). The guild in Ephesus consisted of those who had the same occupation—i.e., silversmiths (Acts 19:25).

Usually the English versions distinguish skilled craftsmen (*see* CRAFTS) from other workers, but, as in the NT examples above, this is not completely correct. If occupations are to be classified, the crafts engaged in by skilled craftsmen, usually freeborn laborers, should be noted first.

The occupations engaged in around the household were many and varied. Some of these were crafts, since the members of a household often produced their own necessities. Household occupations included: baking, cooking, dressmaking and all that goes with it, ropemaking, tentmaking, needlework, basketry, potterymaking, husbandry, winemaking, herding cattle, shepherding sheep, tending goats and swine, butchering, etc.

The occupations that render personal services were performed by both free and slave labor. These included: apothecary, barber, watchman, bath attendant, physician, midwife, innkeeper, nurse, money-changer, maid, servant, harlot.

The political organization and the institution of royalty afforded additional occupational opportunities, such as king, prince, ambassador, interpreter, steward, duke, butler, chamberlain, chancellor, counselor, cupbearer, deputy, eunuch, doorkeeper, elder, herald, wardrobe keeper, governor, procurator, centurion, overseer, tax collector, recorder, secretary, scribe, magistrate, judge, lawyer, minstrel, officer, quartermaster, soldier, archer, charioteer, armor-bearer, diviner, astrologer, exorcist, priest, executioner, etc. Among the religious professions were priest, prophet, sacred prostitute, diviner.

Other, miscellaneous occupations are as follows: brewer, musician, dancer, mourner, jeweler, sailor, schoolmaster, aqueduct builder, hydraulic engineer, merchant, trader, embalmer, well digger, painter, camel driver, beggar, criminal of any type, fowler, fisherman, farmer, laborer, quarryman, mason, miner, refiner.

Women engaged in many of the occupations listed above, such as basketmaking, weaving, potterymaking, and the domestic tasks. They were also bath attendants, midwives, nurses, harlots, maids, servants, judges, merchants, mourners, musicians, dancers.

As the word "job" is sometimes used in a derogatory sense when contrasted to "profession" or "vocation," so it is possible that "trade" is so used

3. Scene from the Egyptian tomb of Amen-em-het at Beni-hasan, which describes the various trades, arts, and agricultural labors of the Middle Kingdom; Twelfth Dynasty, Sen-Usert I (1971-1928 B.C.)

when Jeremiah comments on prophets and priests who "ply their trade" (Jer. 14:18). In this sense the cleansing of the temple protects it from becoming a "house of trade" (John 2:16).

Fig. OCC 3. C. U. WOLF

OCHIEL. Alternate name of JEIEL.

OCHRAN ŏk′rən [עָכְרָן, trouble(?)]; KJV OCRAN. The father of Pagiel, who was the leader of Asher in the wilderness (Num. 1:13; 2:27; 7:72, 77; 10:26).

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 253. R. F. JOHNSON

OCIDELUS ŏs′ə dē′ləs. KJV form of GEDALIAH 5.

OCINA ō sī′nə ['Οκεινά] (Jth. 2:28). A coastal place S of Tyre. It has been variously identified—e.g., with Sandalium (Iskanderun)—with localities near the Phoenician-Palestinian border. Though no definite proposition appears justifiable, the name recalls ACCO, which would geographically fit the location. P. WINTER

OCRAN. KJV form of OCHRAN.

ODED ō′dĭd [עוֹדֵד, timekeeper(?) *or* restorer]. **1.** The father of Azariah, prophet of Asa's time (II Chr. 15:1).

2. A prophet who protested Pekah's enslavement of Judahites at the time of Ahaz (II Chr. 28:8-15).

ODOLLAM ō dŏl′əm. A form of ADULLAM.

ODOMERA ŏd′ə mĭr′ə [ὀδομηρά, ὀδοαρρής] (I Macc. 9:66); KJV ODONARKES ŏd′ə när′kēz. Chief of a Bedouin clan, struck down by Jonathan the Maccabee in a raid.

ODOR [ריח, scent, fragrance, *properly* breath, *usually in the construct state as part of the technical term* ריח ניחח, soothing odor (to God), pleasing odor (of ascending

sacrifices); ὀσμή, smell, savor]; RSV usually PLEASING ODOR; KJV SWEET SAVOR. The term "pleasing odor" is used frequently in Leviticus and Numbers and often stands in apposition to such phrases as "burnt offering" and "offering by fire"; it is essentially synonymous with these phrases in the OT. Burnt offerings, whether the sacrifices of animals (Gen. 8:21; Exod. 29:15-25; Lev. 1:3-9; etc.), of vegetables and cereals (Lev. 2; 6:19-23), of libations and drink offerings (Exod. 29:41; Lev. 23:13; Num. 15:1-10, 22-26; 29), or of mixtures of various of these (Exod. 29:22-25), were a prominent part of the sacrificial system, which was central in the cultic life of post-exilic Israel. Such burnt offerings were an integral part of the morning and evening services in the temple and of the appointed feasts (Num. 28–29; cf. Lev. 23), as well as of thanksgiving (Gen. 8:21), memorial (Lev. 2:1 ff), and ordination and consecration services (Exod. 29). Burnt offerings were specified as acceptable sin, guilt, and trespass offerings (Lev. 4–6; 7:1-10), and peace offerings (Lev. 3; 7:11-36).

The essentially synonymous liturgical meaning of the terms "burnt offerings," "offerings by fire," and "pleasant odors" is made clear in such verses as Num. 28:1-2: "The Lord said to Moses, 'Command the people of Israel, and say to them, "My offering, my food for my offerings by fire, my pleasing odor, you shall take heed to offer to me in its due season." ' " Such odors were popularly understood as sustenance for deity and as being pleasing to him. Such pleasing odors would seem often to have been influential in gaining forgiveness and favor for the worshiper who offered the sacrifices through the priestly mediator. A schedule of burnt offerings which were appropriate to the appointed feasts and to the circumstances of the individual worshiper was set forth as a part of the revelation to Moses (Lev. 1–7; 23; Num. 28–29). Generally, in the OT, Israel's loyalty to the covenantal relationship was thought to be manifested in her response to the obligation of offering sacrifices. In immediate pre-exilic times Ezekiel forewarned his people of their impending downfall; among their chief sins he noted the apostasy involved in a careless offering of "pleasing odor to all their idols" (6:13; cf. 16:19). In postexilic Judaism it was a commonplace observation that Israel's future security depended upon her compliance with these cultic injunctions (e.g., Neh. 10:28-39—H 10:20-40). H. F. Beck

OFFERING. *See* Sacrifice and Offerings.

***OFFERING FOR THE SAINTS.** An offering which Paul collected for the poor of the Jerusalem church and took to that city toward the end of his career. Such voluntary help to those in need, especially to widows and orphans, was strongly emphasized in the OT and in first-century Judaism. It was particularly needed by a large proportion of the Jerusalem Christians in the apostolic age; Jerusalem was never an independent economic unit, Palestine at that time was disturbed by unrest and revolutionary tendencies, the Jerusalem church had many Galilean Christians and dependent widows to support, and persecution and famine increased the severity of the problem. The surrender of possessions by individual Christians (Acts 4:37) gave only temporary help. The church at Antioch in Syria sent a gift to aid when famine struck (11:27-30). Later, at the Council of Jerusalem, Paul agreed—though Acts says nothing of this—to "remember the poor" at Jerusalem with gifts from the Gentile churches (Gal. 2:10). For Paul such aid was not only a work of mercy but also a means by which the Jewish and Gentile Christians could be brought closer in sympathy and friendship. It is clear from Rom. 15:25-31; I Cor. 16:1-4; II Cor. 8–9 that Paul did not feel free to turn to work in the West until he had gathered a liberal collection in his Gentile churches and had taken it to Jerusalem, even though he knew that in going there he was risking his life. The seven men named in Acts 20:4 went with him to deliver the collection; Luke does not mention this fact, and in Acts 24:17 seems to refer to the gifts as only personal contributions by Paul; but the letters of Paul show that Paul and his companions brought the gifts of the Gentile churches to relieve the economic need of the Jerusalem Christians. F. V. Filson

OFFICER. A servant or minister of the king, the army, or the temple. The Hebrew and Greek words translated by "officer" are not narrowly defined. It is difficult to assign specific functions for each term except perhaps the Eunuch and the Judge. A Scribe or secretary may be an officer of the king. The leaders in synagogue and temple are officers. The military is controlled by its officers. Many subordinates to the king in palace, court, and harem are called officers—e.g., prince, steward, chamberlain, deputy, chancellor, overseer.

1. In the OT. The שטרים were subordinate officers in Israel. They may have originally been scribes or secretaries (Akkadian *šaṭâru*, "write"). They were taskmasters and overseers in Egypt (Exod. 5:6, 14). They were related to the elders in the judicial organization (Num. 11:16; Deut. 16:18; I Chr. 23:4; II Chr. 19:8; *cf.* Josephus in § 2 *below*). They conveyed orders and were adjutants in time of war (Deut. 20:5; Josh. 1:10; 3:2). They were very influential in the assembly of Israel (Deut. 29:10; 31:28; I Chr. 26:29; etc.). How they attained their position is unknown.

The שרים were most frequently princes. They were very close to the palace (Ezra 7:28). They served as leaders in the army (II Chr. 32:3; Neh. 2:9; etc.).

The שלשים were originally the leaders of a chariot group, perhaps the third man in the chariot (Exod. 14:7; 15:4). This later was broadened to include the officers of the guard (II Kings 10:25).

The concept of head man or chief is seen in both ראש and רב (Esth. 1:8; Jer. 41:1; Ezek. 23:15). In Esther it is collectively used for all the officials of the king.

The סרים was the eunuch. Originally a castrated harem attendant, he later became a confidant of the king. In some instances the term has no biological connotations (II Kings 24:12, 15).

The נצב was the appointed deputy. The officials in Edom are so called (I Kings 22:47). In Israel they seem to have been appointed by the king (I Kings 4:5; 5:16; 9:23). The term is also used collectively for all of Solomon's officers (II Chr. 8:10).

Forms of the root פקד refer to those appointed as overseers. Captains and military officers are noted in Num. 31:14; II Kings 11:15; 25:19; II Chr. 23:14; etc. In general civil government they were stationed in one area or province by the king to oversee all work (Judg. 9:28; Isa. 60:17). At times they may be deputized for special duty (Esth. 2:3). From among the priests and Levites temple officials (II Chr. 24: 11; 31:13; 35:8; Jer. 20:1; 29:26) were appointed. They were watchmen or guards in the temple (II Kings 11:18).

2. In the NT. Πράκτωρ occurs in Luke 12:58, while the parallel passage Matt. 5:25 uses the more common Greek word ὑπηρέτης, "guard of the prison." The original meaning, "under oarsman," has been lost except as a homiletic device. John uses the latter term to designate the deputies or bailiffs of the chief priests and Sanhedrin sent against Jesus (John 7:32, 45-46). They find Jesus in the garden of Gesthemane (John 18:3, 18, 22), but Jesus says that although he has such officers, they will not fight, since his kingdom is not of this world (vs. 36). They accuse Jesus in court (John 19:6). They are to be distinguished from the Roman soldiers (John 18:12). The apostles are also sought out by these representatives of the council (Acts 5:22, 26).

Paul considers himself steward or servant of God (I Cor. 4:1).

Josephus uses this Greek term for the judges appointed by Moses. A similar title was given to the clerks in Jewish courts (Jos. Antiq. IV.viii.14). In Mark 6:21, Herod includes his officers or captains (χιλίαρχος) as guests at his banquet. C. U. WOLF

OFFSET [מגרעה, *lit.*, diminished place]; KJV NARROWED REST. A ledge formed on a wall by a decrease in its width. The beams of the second and third stories of the side chambers in Solomon's temple rested on offsets, so that they would not penetrate the wall of the sacred structure (I Kings 6:6). According to the LXX, a similar arrangement pertained in Ezekiel's ideal temple, although the MT of the description is corrupt (Ezek. 41:6-7).

See also TEMPLE, JERUSALEM. L. E. TOOMBS

OG ŏg [עוג, עג]. Giant king of the land of Bashan, N of the River Jabbok, whose territory was occupied by the tribe of Manasseh (Num. 21:33; 32:33; Deut. 1:4; 3:1, 3-4, 10-11, 13; 4:47; 29:7—H 29:6; 31:4; Josh. 2:10; 9:10; 12:4; 13:12, 30-31; I Kings 4:19; Neh. 9:22; Pss. 135:11; 136:20).

Og is remembered in Israelite tradition as a legendary figure, a member of the race of giants, whose immense iron bedstead was on exhibition in Rabbath-ammon long after his death (Deut. 3:11). The bedstead was probably a dolmen of basalt blocks, a monument of the megalithic culture which gave rise to the traditions about giants in Canaan. Yet it is unlikely that information about the kingdom of Og contains no historical foundation, for it is accorded considerable attention in Deuteronomic material. The settled character of the region is stressed with its numerous fortified cities and Og's two capitals at Edrei and Ashtaroth (Josh. 12:4). During the fourteenth century B.C. city-states controlled this region, but it is possible that at some time in the next two centuries a King Og of Ashtaroth ruled the land of Bashan. The settlement of Manasseh in the region is said to follow upon a massive defeat of Og (Num. 21:35; 32:33 ff), but Israelite control of Bashan was always tenuous and disputed from time to time by the Aramean state of Damascus.

OHAD ō′hăd [אחד; *cf.* אחוד] (Gen. 46:10; Exod. 6:15). Son of Simeon. The name is lacking in the parallel lists Num. 26:12-14; I Chr. 4:24-25.

OHEL ō′hĕl [אהל, tent, *possibly* family (of God), *or* (God is) shelter; *see bibliography*] (I Chr. 3:20). A descendant of King David; perhaps a son of Meshullam, son of Zerubbabel.

Bibliography. W. F. Albright, "The Date and Personality of the Chronicler," *JBL*, XL (1921), p. 110; M. Noth, *Die israelitischen Personennamen* (1928), pp. 158-59. B. T. DAHLBERG

OHOLAH ō hō′lə [אהלה, she who has a tent]; KJV AHOLAH ə—. A name which refers to Samaria (Ezek. 23:4-5, 36, 44). Doubtless the expression has some tenuous connection with the history of the tabernacle, which was the tent of meeting in the early history of the Hebrew people.

Oholah and Oholibah are described as sisters of one mother, both of whom had scarlet careers in their dealings with neighboring lands. Oholah, who is identified with Samaria, was the elder sister (Ezek. 23:4), who played the harlot with the Assyrians, wantonly adopting both their habits and dress—a tendency which dated back to her youthful days in Egypt. As punishment Yahweh delivered this woman into the hands of the Assyrians, among whom she became a byword. This allegory was the way by which Ezekiel described the sordid history of Samaria and Jerusalem, both of whom lacked loyalty to God. The height of Assyrian syncretism was reached in the days of Manasseh after the death of Hezekiah, and it is to this era that allegorical reference is made. For such lewd conduct as idolatry and false worship Yahweh promised utter destruction. Through an allegorical figure of a scarlet woman Ezekiel drove home in yet another way the promise that God would judge. C. G. HOWIE

OHOLIAB ō hō′lĭ ăb [אהליאב, tent of the (divine) father(?)]; KJV AHOLIAB ə—. A Danite, son of Ahisamach, appointed with Bezalel to make the tabernacle and its equipment (Exod. 31:6; 35:34; 36:1-2; 38:23). The skills to be exercised by Bezalel and Oholiab in their crafts are traced to the Spirit of God.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 158. R. F. JOHNSON

OHOLIBAH ō hō′lĭ bə [אהליבה]; KJV AHOLIBAH ə—. *See* OHOLAH.

OHOLIBAMAH ō hō′lĭ băm′ə [אהליבמה, *usually* tent of the high place; *cf.* אהליאב (Exod. 31:6), אהליבה (Ezek. 23:4); Phoen. אהלבעל, אהלמלך; Sabean

אהלאל]; KJV AHOLIBAMAH ə—. **1.** Wife of Esau (Gen. 36:2, 5, 14, 18, 25) and daughter of Anah. However, her name does not appear in other lists of Esau's wives (Gen. 26:34; 28:9).

2. An Edomite clan chief (Gen. 36:41; I Chr. 1:52).

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), pp. 158-59. L. HICKS

OHRMAZD ôr′məzd. Alternately: ORMAZD; ORMUZD. Middle Persian form of AHURA-MAZDA.

OIL. Oil was considered to be one of the necessities of life in biblical times. Thus, when the rest of her food had been exhausted in a time of drought, the widow of Zarephath still had "a handful of meal in a jar, and a little oil in a cruse" (I Kings 17:12; cf. II Kings 4:2). Furthermore, oil is specifically mentioned (along with grain [KJV "corn"] and wine) as a provision placed in the royal storehouses (II Chr. 32:28; cf. II Kings 20:13; II Chr. 11:11; Isa. 39:2).

Naturally it was considered to be a gift from Yahweh. Grain, oil, and wine are expressions of his goodness (Jer. 31:12; Joel 2:19); Israel sins when she does not know that Yahweh, not Baal, has given her these things (Hos. 2:8—H 2:10). Correspondingly, grain, oil, and wine will be taken away because of the nation's disobedience (Deut. 28:51; Joel 1:10; Hag. 1:11). Nor was oil less highly valued in NT times; it is mentioned as part of the cargo of Babylon alongside gold, silver, jewels, ivory, marble, spices, wine, fine flour, etc. (Rev. 18:12-13).

Bibliography

1. Preparation. Whereas sesame oil was widely used in Mesopotamia, Palestinian oil was prepared from olives (*see* OLIVE TREE). However, in Esth. 2:12 "oil of myrrh" is mentioned as an aid to beauty. It occurs several times in inventories from Ras Shamra (*see* UGARIT), but does not seem to have been widely used in Palestine. As for the olives used in making oil, certain varieties were preferred above others. The Mishna (Men. 8.3) states that those of Tekoa are the best, followed by those of Regeb. Still other varieties are listed in Tractate Peah 7.1. The olives were harvested in September and October, and those from a good tree could be expected to yield from ten to fifteen gallons of oil each year. *See* AGRICULTURE § 3*b*.

In OT times the olives were crushed in a mortar or in a rock-hewn press; occasionally wine vats (*see* WINE § 2*a*) may also have been used for the production of oil. The olives were picked before they were quite ripe, and the best fruit was either trodden out with the feet (cf. Mic. 6:15: "You shall tread olives, but not anoint yourselves with oil") or crushed with a large stone. In the first stage the pulp was transferred to wicker baskets and gently shaken to and fro. The baskets acted as strainers, and the oil was collected in jars. The top layer was skimmed off and was called "pure" or "beaten" oil (שמן כתית). It is prescribed for the lamp that is to burn continually in the sanctuary (Exod. 27:20; Lev. 24:2) and as a constituent of the continual burnt offering (Exod. 29:40; Num. 28:5). It also formed a part of Solomon's annual payment to Hiram (I Kings 5:11—H 5:25).

In the second stage the olive pulp was heated and again put into the vat. Pressure was applied by means of a large beam, one end of which was inserted into a niche in a wall and the other weighted with stones. The resulting oil was allowed to stand until the sediment had subsided; occasionally salt was used to clarify it. For this oil the simple Hebrew term שמן is used (Greek ἔλαιον). The term יצהר is also frequent, almost always in conjunction with דגן ("grain"; KJV "corn") and תירוש (one of the words for "wine"); this is, however, probably a traditional expression and does not denote a special kind of oil. *See* WINE § 1*a*.

2. Uses. Oil was used for many purposes in biblical times. The more important of these are mentioned below:

a. Food. Curiously enough, there are relatively few references to oil as a foodstuff in the Bible, although on the basis of modern parallels it may be assumed that many foods were cooked in oil. However, we do read that on her way to the camp of Holofernes, Judith took along a flask of oil in addition to other provisions (Jth. 10:5). Furthermore, the taste of manna is compared to that of cakes baked with oil (Num. 11:8). The use of oil in sacrifices (*see* § 2*c below*) may also be taken as an indication of its use in ordinary COOKING.

b. Anointing. Perhaps the most frequent use of oil mentioned in the Bible is that of anointing. Most familiar is the custom of anointing a king (I Sam. 10:1; 16:1, 13; II Kings 9:3, 6; 11:12), a priest (Lev. 8:30), or a prophet (Isa. 61:1). Since this anointing oil was called "oil of gladness" (Ps. 45:7—H 45:8; cf. Prov. 27:9; Isa. 61:3), it may be assumed that it was a joyous occasion. The shield of a warrior was also anointed (Isa. 21:5; cf. II Sam. 1:21), probably as a symbol of dedication to Yahweh.

But anointing was not confined to holy persons. Indeed, Koheleth says that one should always have oil upon the head (Eccl. 9:8). Such oil makes the face shine (Ps. 104:15); it is to be omitted only on the occasion of mourning (II Sam. 14:2). Even when a person is fasting, he should anoint his head and wash his face (Matt. 6:17); one is as important as the other (cf. Ezek. 16:9). Such anointing is especially necessary after bathing (II Sam. 12:20; Ruth 3:3), since at that time the skin is more vulnerable to the sun. And it is also a sign of honor when an individual anoints his neighbor; a guest should be anointed when he arrives for a BANQUET (Ps. 23:5; Amos 6:6; Luke 7:46). *See* ANOINT.

c. Sacrifice. The use of oil as a part of the continual burnt offering has already been noted. In addition, all cereal offerings were to be provided with oil; the oil was either mixed with the FLOUR or spread on the WAFERS (Lev. 2:4). This practice replaced the earlier custom of making a libation of oil,

still mentioned in the patriarchal narratives (Gen. 28:18; 35:14). *See* SACRIFICE AND OFFERINGS.

d. Lamps. Of course, oil was also the chief fuel for lamps (*see* LAMP). Since the ordinary lamp was relatively small, the wise person provided himself with an adequate supply of oil (Matt. 25:3-8).

e. Medicinal. Finally, oil was widely used in healing. It had the effect of softening the wound (Isa. 1:6), but may also have been regarded as a symbol of God's protection. Thus the disciples healed by anointing (Mark 6:13), and elders are instructed to pray over the sick person and anoint him with oil (Jas. 5:14). The use of a mixture of oil and wine in healing a wound (Luke 10:34) is also attested in the Talmud (Shab. 134*a*). *See* MEDICINE.

In view of its various uses, it is natural that oil would occur in lists of exports from Palestine. Solomon's payment to Hiram has already been cited; similarly the Jews gave oil to the Sidonians and Tyrians in exchange for the cedar for the Second Temple (Ezra 3:7). The same trade may also be referred to in Ezek. 27:17, where oil is mentioned alongside wheat, olives, honey, and balm. Furthermore, oil was naturally a part of the internal commerce of the nation. Elisha advised the widow of one of the sons of the prophets to sell oil and pay her debts (II Kings 4:7), and the foolish virgins are told to replenish their supplies from a dealer (Matt. 25:9).

3. In figurative expressions. Since God provides oil for his people, its possession is a symbol of prosperity. Asher, who is to be the "favorite of his brothers," will "dip his foot in oil" (Deut. 33:24). Similarly Job longs for the day

> when my steps were washed with milk,
> and the rock poured out for me streams of oil!
> (Job 29:6).

Naturally the eschatological age will be a period of abundance:

> The threshing floors shall be full of grain,
> the vats shall overflow with wine and oil
> (Joel 2:24).

So also there are streams of honey, milk, oil, and wine in heaven (II Enoch 8:5).

Elsewhere the persuasive power of an enemy's words is compared to the softness of oil (Ps. 55:21—H 55:22); the psalmist also asks that his enemy's curses soak into his bones like oil (Ps. 109:18). The speech of a loose woman is said to be smoother than oil (Prov. 5:3).

Thus it is not surprising that the olive tree boasts that its fatness honors gods and men (Judg. 9:9). Nevertheless, "he who [inordinately] loves wine and oil will not be rich" (Prov. 21:17).

J. F. Ross

OIL TREE. KJV translation of עֵץ שֶׁמֶן, *'ēṣ šemen* (lit., "tree of OIL"), in Isa. 41:19 (RSV "olive"). The wood of this tree was used for the carved cherubim in the temple (I Kings 6:23, 31-33; "olivewood"), and its branches for the Feast of Booths (Neh. 8:15; cf. Lev. 23:40). It was included with other trees in a figure of the transformed desert (Isa. 41:19). It was mentioned poetically (in parallel with the olive) in praise of a high priest in Ecclus. 50:10 ("cypress"; cf. 24:13, where the same words were probably used in praise of wisdom).

עֵץ שֶׁמֶן is interpreted as the OLIVE TREE in the passages in Kings. In Neh. 8:15 the translation is "wild olive" (KJV "pine branches"). The variety of LXX translations alone is an indication of early confusion about the tree's identification, and the different contexts in which the references occur add to the present confusion. Strong claims have been made that it was the *zaqqûm* tree of the Arabs (*Balanites aegyptiaca* [L.] Del., found only near Jericho; *see* BALM), the WILD OLIVE (*Olea europaea,* var. *oleaster* DC.), the true oleaster (*Elaeagnus angustifolia* L.), and several species of pine (*see* FLORA § A9*m*, and so apparently the Mishna) or cypress (so LXX). It is reasonable to suppose that the Hebrew intended some tree related to the olive, either the wild olive or the oleaster or both (they are easily confused in appearance). An oil-producing conifer is also possible (*see* FLORA § A9*m*). Thus "oil tree" is probably the best translation for the present.

   g. In consecration
7. Figurative references

Bibliography

1. Terminology. Hebrew words translated "ointment" are: (*a*) שֶׁמֶן (Eccl. 7:1; 10:1; RSV "oil" in Exod. 30:25; II Kings 20:13; Ps. 133:2; Prov. 27:9, 16; Amos 6:6); (*b*) derivatives of the root רקח, *rāqāḥ,* "to prepare perfume or ointment": רֹקַח, *rōqaḥ* (Exod. 30:25 KJV; RSV does not translate); מִרְקַחַת, *mirqaḥath* (I Chr. 9:30 KJV; RSV "mixing"); מִרְקָחָה, *merqaḥah,* "pot of ointment" (Job 41:31—H 41:23); (*c*) תְּמֻרוּק (lit., "rubbings" or "cleansings"; Esth. 2:3, 9 [KJV "things for purification"], 12 [KJV "things for the purifying"]).

The Greek word translated "ointment" is μύρον (Matt. 26:7, 9, 12; Mark 14:3-4; Luke 7:37-38, 46; John 11:2; 12:3, 5; RSV "myrrh" in Rev. 18:13).

2. Contents of ointment. ***a. Oil.*** In Israel olive oil (שֶׁמֶן) was the chief base of ointments, and was itself an ointment (Deut. 28:40; *see* OIL). The surrounding nations used other bases for ointment also: in Babylonia sesame oil and animal fats; in Egypt *balanos* oil, almond oil, and animal fats.

b. Perfumes. To the olive oil various perfumes were added (*see* PERFUME § 3*c*). Sometimes a descriptive adjective with "oil" or "ointment" indicates that it was perfumed—e.g., "precious" (II Kings 20:13; Eccl. 7:1), "fragrant" (Song of S. 1:3), or "finest" (Amos 6:6).

3. Manufacture. On ointment-mixers, *see* PERFUME § 3*c*. To make ointment, the raw material was crushed, boiled in oil, and stirred. The thrashing of a crocodile in water is compared to this process in the ointment pot (Job 41:31—H 41:23). This was the method of the Egyptians, the Jews (T.B. Ker. 5*a*), and of the Greeks and Romans (Pliny Nat. Hist. XIII.7).

4. Value. The great value placed on ointments is illustrated by the fact that they were included among the treasures of King Hezekiah (II Kings 20:13) and of the Pharaoh of Egypt in the New Kingdom. Robbers broke into the tomb of Tut-ankh-Amon of Egypt especially to steal the ointments, leaving objects of gold behind. The high cost of nard (imported from distant India), with which Mary anointed Jesus (John 12:3, 5), is confirmed by Pliny (Nat. Hist. XII.42-45).

5. Containers. The oil for anointing kings was carried in a VIAL for Saul (I Sam. 10:1), in a FLASK (same Hebrew word) for Jehu (II Kings 9:1), or in a "horn" for David (I Sam. 16:1) and Solomon (I Kings 1:39). According to Matt. 26:7, the ointment with which Jesus was anointed at Bethany was in an

5. An ivory ointment flask hollowed from an elephant tusk; from Tell ed-Duweir (*ca.* 1400-1200 B.C.)

ALABASTER jar. Pliny (Nat. Hist. XIII.19) states that alabaster was the best material for ointment containers, and according to customs records in Palmyra, the best ointments were transported in such jars. Many ancient alabaster ointment jars have been found in Egypt and in Palestine. That the lids of these jars were sealed shut explains why Mary broke the vessel, probably the neck, to pour the ointment on Jesus' head. This is illustrated by the Mishna's reference (Kel. XXX.4) to a nard flask with a broken neck.

Figs. OIN 4-5.

6. Uses. ***a. As a cosmetic.*** In the dry climate of the Near East anointing is a common practice (Mic. 6:15) to prevent dessication of the skin. Ointment could be applied to the head (Matt. 6:17) or to the whole body after a bath (Ruth 3:3; II Sam. 12:20). Perfumed ointments were used by Judith before she met Holofernes (Jth. 10:13) and by Esther before approaching Ahasuerus (Esth. 2:12). Sweet ointments were also employed by men to attract the other sex (Song of S. 1:3). According to Josephus (War II.viii.3), oil was not used as a cosmetic by the Essenes.

b. In hospitality. At a banquet it was a mark of honor to anoint the head of a guest with oil (Ps. 23:5). In Luke 7:46, Jesus contrasts his host, Simon the Pharisee, who had omitted anointing his head even with ordinary oil, with the sinful woman who had anointed his feet with perfumed ointment. The heads or rabbis were sometimes anointed at Jewish weddings (T.B. Keth. 17*b*). Ancient Egyptian banquet scenes show the guests being anointed with oil and with cones of melting ointment on their heads. The rabbinic commentary Siphre on Deut. 33:24 speaks of slaves' anointing people's feet with oil. Fig. OIN 6.

6. A wall painting from a tomb at Thebes, showing Syrian tribute-bearers bringing their offerings, among which is an ointment horn by the figure at the extreme right in the upper register; from the time of Thut-mose IV (1421-1413 B.C.)

c. A sign of joy. Anointing with the oil of gladness (Ps. 45:7—H 45:9; Isa. 61:3) was a sign of rejoicing. Conversely, in times of mourning or sorrow such anointing was usually omitted (II Sam. 12:20-21; 14:2; Dan. 10:3). The rabbis forbade anointing with oil in time of mourning (T.B. M.K. 15*b*), during special fasts in time of drought (M. Ta'an. I.6), and on the Day of Atonement (M. Yom. VIII.1). Jesus, on the other hand, urged that during fasts the head be anointed as usual, to avoid outward parade of religiosity (Matt. 6:17).

d. As medicine. Oil was used as a medical ointment for wounds (Isa. 1:6; Luke 10:34) and for diseases (Jer. 8:22; Mark 6:13; Jas. 5:14). The oil applied to the cleansed leper may have had a medicinal as well as a symbolic purpose (Lev. 14:15-18, 26-29). The church of Laodicea is asked to buy eye salve (for which the city was famous) for spiritual sight (Rev. 3:18).

e. In mortuary processes. In ancient Egypt several ointments (e.g., cedar oil, myrrh, resin) were used in the elaborate process of embalming and wrapping a body. This Egyptian process was applied to Jacob (Gen. 50:2-3) and to Joseph (vs. 26). Jesus received the ointment from Mary as anointing in advance for his burial (Mark 14:8). Women followers of Jesus prepared ointments to anoint his body (Mark 16:1; Luke 23:56). The Mishna (Shab. XXIV.5) mentions the practice of anointing bodies for burial.

f. On shields. Shields were anointed with oil, probably to preserve the leather and to make the surface slick to deflect weapons (II Sam. 1:21; Isa. 21:5).

g. In consecration. Jacob consecrated the stone at Bethel by pouring oil over it (Gen. 28:18). The sacred anointing oil was used to consecrate the tabernacle and its furniture (Exod. 30:26-29).

Aaron and his sons were consecrated as priests with the sacred oil, which was not to be used for "ordinary men" (Exod. 30:30-32). Kings were anointed in Israel (*see* § 5 *above*), as in ancient Egypt. That the sacred anointing oil of the priests was also used for the kings and that this oil made in Moses' time sufficed for all subsequent history till Josiah (so T.B. Hor. 11*b*, 12*a*) is not stated in the Bible. The anointing of one prophet, Elisha, is commanded (I Kings 19:16). In I Sam. 16:13 anointing with oil is associated with empowerment by the Spirit of the Lord. *See* ANOINT.

7. **Figurative references.** In Ps. 133:2 brotherly unity is said to be as pleasant as the sacred oil. That anointing oil was used for consecration in the OT makes it an apt symbol of the Holy Spirit in the NT (I John 2:20, 27).

OLD GATE [שער הישנה] (Neh. 3:6; 12:39). A gate of Jerusalem, restored by Nehemiah; perhaps to be read "Gate of the SECOND QUARTER" (המשנה instead of הישנה). Then it might be identical with the EPHRAIM GATE in Neh. 12:39.

See map under NEHEMIAH. G. A. BARROIS

OLD LATIN VERSIONS. *See* VERSIONS, ANCIENT, § 3.

OLD TESTAMENT. In current usage, the Hebrew scriptures. The LXX, out of reverence for God, translated ברית, "[divine] covenant," with διαθήκη ("testament") instead of συνθήκη ("covenant"), which occurs only in Wisd. Sol. 12:21 in this sense. The change was made because in a covenant the two parties are of equal rank and discuss terms, while in a testament the testator is dead and decides all matters. The "old covenant" was made with Jews (II Cor. 3:14; Heb. 9:15); the "new covenant" was promised in Jer. 31:31—G 38:31 and made with Christians (I Cor. 11:25; II Cor. 3:6; Heb. 8:6-13; 10:16-17; cf. Luke 22:20; etc.). R. H. PFEIFFER

OT CHRONOLOGY. *See* CHRONOLOGY OF THE OT.

OT LANGUAGE. The language of the OT is Hebrew. Certain passages (Ezra 4:8–6:18; 7:12-26; Jer. 10:11; Dan. 2:4*b*–7:28) are in the related Aramaic language. Just as in English, however, we use such words as "piano," "contralto," "concerto," which have been borrowed from Italian, or "baptize," "deacon," "eucharist," "presbyter," which are Anglicized forms of Greek words, so in the OT are to be found Hebraized forms of words borrowed from other Near Eastern languages spoken in OT times. *See* HEBREW LANGUAGE; ARAMAIC LANGUAGE; LANGUAGES OF THE BIBLE; LANGUAGES OF THE ANCIENT NEAR EAST. A. JEFFERY

OT TEXT. *See* TEXT, OT.

OLIVE TREE [זית *zayith;* Ugar. *zt*(?); Aram. זיתא, *zêthâ;* Arab. *zaytûn;* ἐλαία]. An evergreen tree and its edible fruit, *Olea europaea* L. The importance of the olive tree to the whole Mediterranean area from very early times is witnessed by numerous references to it in ancient literature. Use of the tree and its fruit for food, fuel, light, carpentry, ointments, medicines, etc., touched almost every phase of daily life. Numerous references to the tree, its wood, fruit, and oil, in the Bible indicate in almost every case the prime importance of the olive tree (frequently associated with the vine; Exod. 23:11, etc.) to the life of ancient Israel. Fig. OLI 7.

7. Olive

Although new stock must be grafted from productive stock (cf. Rom. 11:17-24), and new trees mature very slowly, olive cultivation is simple, requiring only occasional loosening of the soil. It grows luxuriantly in the rocky soil of the Holy Land, requiring little water, and thus enduring the frequent droughts. The tree continues to produce heavily (usually every other year) for hundreds of years. Its chief enemy is the locust (Amos 4:9).

The tree may be seen everywhere in the Near East today, but is particularly prominent in the central highlands of Palestine around Hebron, Bethlehem, Jifna, and N of Nablus. Gnarled trees clinging to terraced, rocky hillsides are a common sight. In biblical times the OIL was essential for lamps (Lev. 24:2).

The production of olive oil was a major industry in biblical times, judging by the number of ancient stone olive presses still to be seen even where orchards no longer grow. A thick, vertical stone wheel, operated by a long, pivoted wooden bar, was rolled over the olives on another flat, circular stone, grooved to carry the oil to a basin at one side (Mic. 6:15).* The familiar name GETHSEMANE in the gospels

8. An ancient Palestinian olive press at work

(e.g., Mark 14:32) meant "oil press" in Aramaic. Fig. OLI 8.

In early Mesopotamian art the olive is occasionally depicted as the TREE OF LIFE, and in Gen. 8:11 the familiar story of the dove returning to Noah with an olive leaf suggests the symbolism of peace and friendship. The olive tree is depicted as a part of the glory of the Promised Land to the Hebrews poised to enter Canaan (Deut. 6:11; 8:8), but it is also included in Moses' curse upon the nation if it fails God (28:40). According to the law, some olives were to be left for the gleaners (Deut. 24:20; Isa. 17:6; cf. 24:13) during the late fall harvest.

Particularly frequent are the references to the tree in allegory, poetic imagery, and symbolism. In Jotham's fable, where the olive is the first choice for king of the trees, it answers: "Shall I leave my fatness, by which gods and men are honored . . . ?" (Judg. 9:8-9). Eliphaz eloquently describes the demise of an evil man as a shower of minute olive blossoms falling with the wind in the springtime (Job 15:33). A family blessed with many children is likened to olive shoots which spring from the roots of the old parent trees (Ps. 128:3). It is symbolic of Israel's past and future spiritual beauty (Jer. 11:16; Hos. 14:6). In Zechariah's vision (4:3, 11-12) Zerubbabel and Joshua are portrayed as olive trees (cf. Rev. 11:4) standing beside a seven-branched lampstand.

Paul's familiar allegory of the grafting of the olive trees, though revealing a lack of knowledge of horticulture, is a forceful presentation of his hope for Gentile Christianity (Rom. 11:17-24).

2. In the OT and late Judaism
3. In the NT
4. Christian and Moslem sanctuaries
Bibliography

1. Description. The Mount of Olives is part of the main range of mountains which runs N-S through central and S Palestine. It has the shape of a ridge *ca.* 2½ miles in length, the three summits of which tower high over the barren hills that slope down E toward Jericho and the Jordan Valley. To the W, the Mount of Olives overlooks Jerusalem across the deep cut of the Kidron. The first summit, to the NE of the Old City, is the highest, with an altitude of 2,963 feet above Mediterranean Sea level, according to a recent survey. It is often called Mount Scopus, although this name, which occurs in Josephus (War II.xix.4, 7; V.iv.1), properly applies to the NW extremity of the entire range, the Ras el-Mesharif, which the Nablus Road negotiates 1½ miles from the Damascus Gate.

The second summit, right opposite the Haram esh-Sherif or temple area, which it overlooks, is separated from the Scopus by a very slight depression. It is called by the Arabs "Jebel et-Tur," and is partly occupied by the village known as Kafr et-Tur. These toponyms are derived from the Syriac *Ṭūrô Qᵉdishô*, "the Holy Mountain," thus named for the miscellaneous Christian churches and memorials built in these parts. Figs. OLI 9-10.

Courtesy of Pan American World Airways

9. View of Gethsemane and the Mount of Olives, the Church of All Nations at lower left, and the Church of Magdalene right of center

The modern high road from Jerusalem to Jericho cuts the crest of the mountain between the Jebel et-Tur and the third summit, called in Arabic "Jebel Batn el-Hawa," at the foot of which the Kidron winds to the SE in the direction of the Dead Sea. This third summit, which is the lowest of the three, is located immediately above the village of Selwan, and overlooks the ancient site of Canaanite and Davidic Jerusalem, S of the temple area.

The entire mountain was named for extensive olive groves. It is called הר המשחה, "Mount of the Ointment," in the Talmud, and in modern Arabic usage Tur Zaita—i.e., Tur Olivet, an alternate to Jebel et-Tur. The olive groves today are only a fraction of what they must have been in antiquity, and the flanks of the mountain are bleak and partly occupied by modern Jewish cemeteries.

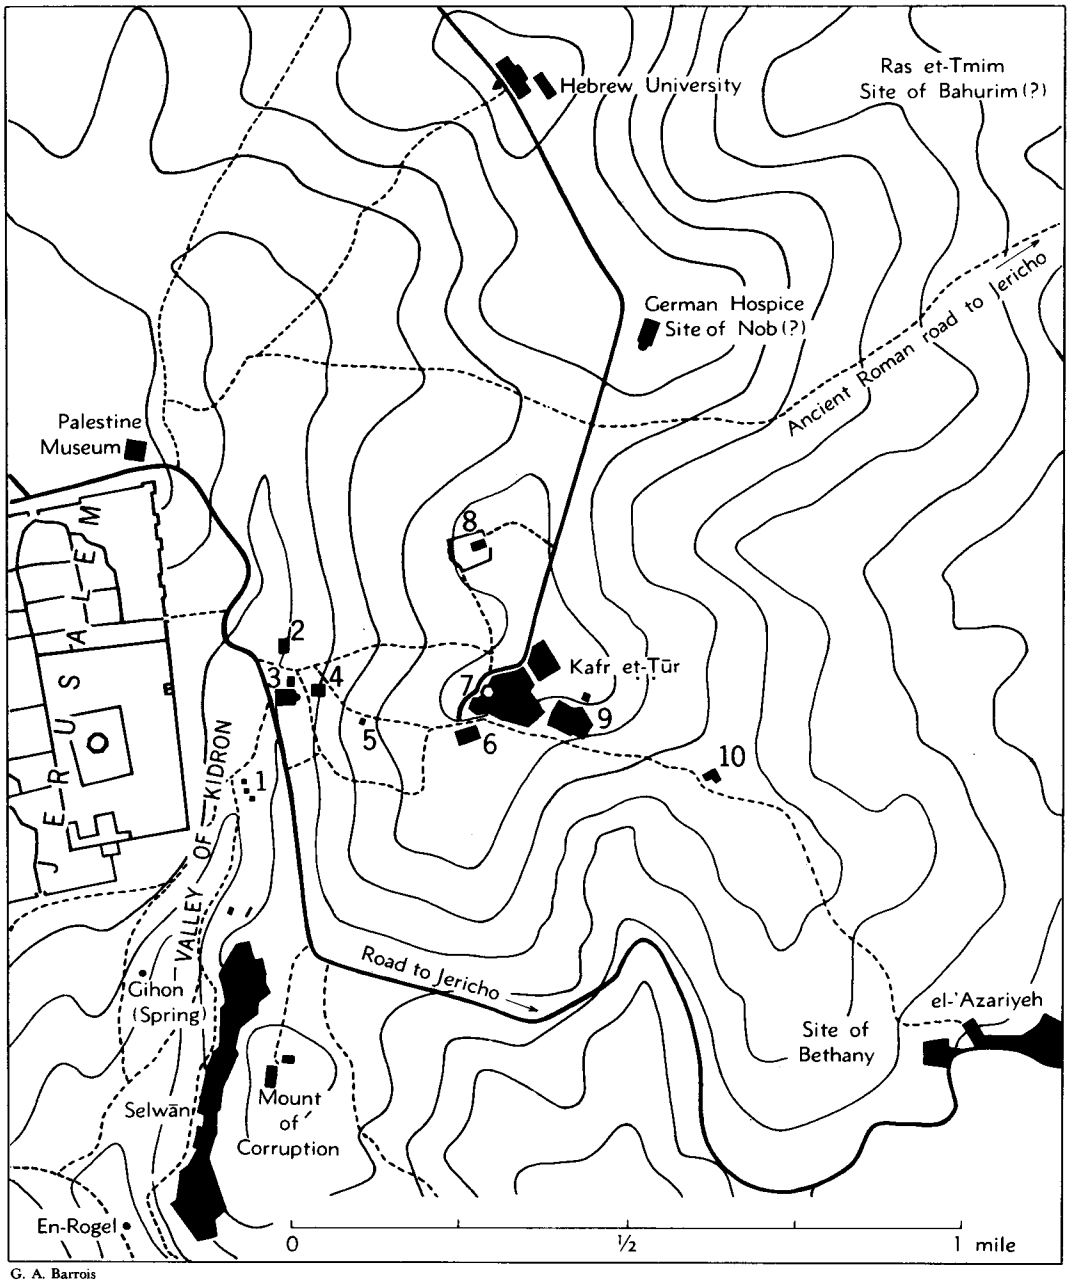
2. In the OT and late Judaism. The Mount of Olives is mentioned only twice in the OT. David, unable to stem the revolt of Absalom and forced to abandon his capital, took the path leading over the crest of the mountain, on his way to a temporary exile in Transjordan. The term used in II Sam. 15:30, מעלה, suggests a steep ascent, possibly with broad steps cut out of the rock. Toward the summit was a place of worship (II Sam. 15:32). It has been identified with the sanctuary of NOB, the location of which is most uncertain; remains of an ancient settlement discovered in 1907 while digging for the foundations of the German Hospice might be taken into consideration. Another point of David's itinerary is the village of BAHURIM (II Sam. 16:5) on the E slopes of the Mount of Olives, and tentatively identified with Ras et-Tmim, N of an ancient road leading to Jericho. Another road farther N crossed the crest of Mount Scopus in the direction of ANATHOTH.

The other reference of the OT to the Mount of Olives is found in the prophecy of Zechariah on the ruin of Jerusalem, when the mountain would split in two, prior to the day of the coming of the Lord (Zech. 14:4).

The S summit of the Mount of Olives, above the modern village of Selwan, is likely to be identical with the Mount of Corruption (*see* CORRUPTION, MOUNT OF), thus named by reference to the worship of idols introduced by the foreign wives of Solomon (II Kings 23:13). In this passage there is a probable play on the words משחית, *mash-ḥîth*, "corruption," and משחה, *mash-ḥâ*, "ointment," the latter referring to the oil from the olives grown on the mountain.

According to the Talmud, the rite of burning a red heifer to ashes for the preparation of lustral water (Num. 19:1-10) was performed on the Mount of Olives, opposite the E gate of the temple (Par. 3.6). A bridge and a path connected the temple with the mountain, on the summit of which fire signals were lighted to notify the apparition of the new moon for the computation of the months. These signals could be seen and were relayed from a second station, located on the Alexandrium, or Qarn Sartabeh, twenty-seven miles to the N-NE (R. H. 2.2).

3. In the NT. The Mount of Olives was the theater of some of the activities of Jesus during the last week of his earthly life, and is again mentioned in the book of Acts in connection with the last meeting of the disciples around their risen Lord prior to the Ascension. The name of the Mount of Olives occurs in a series of NT texts relative to the triumphal entry of Jesus into Jerusalem, six days before the Passover. It seems that Jesus and his disciples started from BETHANY, a village on the E side of the Mount of Olives, to be sought near el-'Azariyeh, presumably to the W of the modern village. They proceeded from there to BETHPHAGE, a hamlet the site of which is not known with absolute certainty. The



G. A. Barrois

10. Map of the Mount of Olives: (1) ancient Jewish tombs (two locations); (2) Tomb of Mary (church); (3) Garden and Church of Gethsemane; (4) Russian Church of St. Magdalene; (5) Chapel of the Tears of Jesus; (6) monastery of Carmelites (Eleona); (7) Ascension (mosque); (8) "Men of Galilee" (chapel); (9) Russian tower; (10) Bethphage (chapel)

Synoptic narratives imply the immediate proximity of the crest of the Mount, and Bethphage may accordingly be identified with, or localized in, the surrounds of Kefr et-Tur (Matt. 21:1; Mark 11:1). Luke adds that Jesus, coming in sight of Jerusalem, obviously from a point on the path affording a commanding view of the city, wept over it (Luke 19:41).

The prophecies of Jesus on the ruin of Jerusalem and the passing of this world were delivered on the Mount of Olives (Matt. 24:3; Mark 13:3-4; Luke 21:5 ff). They echo the words of Zech. 14:1-5, which contain a reference to the Mount itself. Matthew adds to the so-called Little Apocalypse a number of parables pointing to the duty of being watchful and ready to face the judgment (Matt. 24:32-51; ch. 25). There is no telling, however, whether they were actually pronounced on the Mount of Olives, even though contextual affinities make this not unlikely.

The Synoptics agree on the fact that, during the week preceding his arrest, Jesus, after visiting the temple by day, returned at night to the Mount of Olives. This may be inferred circumstantially from the Little Apocalypse and from the introduction to the pericope of the adulteress (which is misplaced in John 8:1-11 and should be taken rather as a tradition of the last week, perhaps originally a part of Luke); and it is formally stated by Luke 21:37. Where exactly Jesus did spend the nights, however, is not clear: either in Bethany, in the house of Simon the leper (cf. Matt. 26:6; Mark 14:3), or in the estate of GETHSEMANE, on the lower slopes of the Mount of Olives, where he "often met . . . with his disciples" (John 18:2), "as was his custom" (Luke 22:39).

The episode of the last meeting of Jesus with the disciples, after the Resurrection, when he parted from them and was lifted up, must be localized on, or in the vicinity of, the Mount of Olives, as may be inferred from Luke 24:50, which states that "he led them out as far as Bethany," and from Acts 1:12, where the disciples are depicted on their way back "from the mount called Olivet," immediately after the Ascension.

4. Christian sanctuaries. The first sanctuary in date is the basilica of the Eleona, the name of which results from the artificial addition of the Aramaic desinence *ā* to the Greek adjective ἐλαιών. It was built above a grotto in which Jesus was believed to have taught his disciples before the Crucifixion and to have met with them on the morning of the Ascension. The construction began in A.D. 325. It was destroyed in 614 by the Persians. Partial excavations conducted before the war of 1914-18 have unearthed part of the foundations and miscellaneous remains, near the monastery of the French Carmelites, on the S border of the village of Kefr et-Tur. The Eleona was replaced during the Middle Ages by a small chapel which was shown to the pilgrims as the place where Jesus allegedly taught the Lord's Prayer to his disciples. Still at a later date, the composition of the Apostles' Creed was localized nearby.

Toward 375, an octagonal church was built on the presumed site of the Ascension, on the summit of the Jebel et-Tur. It was restored by the Crusaders, but fell into the hands of the Moslems in the thirteenth century. Very little subsists today of the original construction, with the exception of the foundations of the octagon and the central shrine, which marks the exact spot where, according to popular tradition, Jesus was taken up to heaven. The shrine is adorned with medieval columns; the dome which covers it originates in a later restoration by the Muslims, who have built a minaret near the entrance, and a prayer niche (*miḥrab*) in the shrine.

The localization of Gethsemane on the lower slopes of the Mount, right opposite the so-called Golden Gate, is well founded in history and tradition. Excavations conducted before and during the war of 1914-18 have led to the discovery of two churches partly superposed. The lower, and more ancient, church, built toward the end of the fourth century, kept the memory of the prayer of Jesus in the garden. It was destroyed in 614, and its exact location had been forgotten when the Crusaders took Jerusalem and built a new church, the orientation of which differs from that of the early one. After the destruction of the medieval church in the fourteenth century, a nearby grotto was shown to the pilgrims as the place of the agony of Jesus, until a modern basilica, completed in 1924, was erected on the foundations of the fourth-century church, the mosaic pavements of which have been preserved in part in the new structure. Huge old olives are seen in the garden surrounding the basilica. Fig. GET 25.

To the N and at a lower level, a church had been built *ca.* 455 over what Jerusalem Christians regarded as the tomb of Mary, mother of Jesus. It was destroyed by the Persians. The underground church which one sees today is actually the crypt of the abbatial church of Saint Mary of Josaphat, which was built by the Crusaders and destroyed by Saladin in 1187. *See* JEHOSHAPHAT, VALLEY OF.

Since the fourteenth Christian century, the place where Jesus wept over the city is marked by a little chapel, S of the path which leads directly from Gethsemane to et-Tur. An olive grove to the NW of et-Tur has been identified in the local folklore as the place where the disciples were addressed as "men of Galilee" after the Ascension (Acts 1:11). Recent foundations, such as the Russian church of Saint Mary Magdalene, above the garden of Gethsemane, the Russian monastery on the Jebel et-Tur, and the German Hospice (Kaiserin Augusta Viktoria Stiftung) on the S end of the crest of the Scopus, have no connection with the gospel history.

G. A. BARROIS

OLYMPAS ō lĭm′pəs [Ὀλυμπᾶς, *a short form of* Olympiodorus *or some other long name compounded with* Olymp-] (Rom. 16:15). A Christian man to whom a greeting is sent. He may have been a son of Philologus and Julia, and a brother of Nereus, all of whom are mentioned in the same verse.

F. W. GINGRICH

OLYMPIAN ZEUS, TEMPLE OF ō lĭm′pĭ ən zōōs [Διὸς Ὀλύμπιος] (II Macc. 6:2); KJV TEMPLE OF JUPITER OLYMPIUS jōō′pĭ tər ō lĭm′pĭ əs. The name given to the temple of Jerusalem when it was polluted by the Greeks. The Jews were compelled "to forsake the laws of their fathers and cease to live by the laws of God."

S. B. HOENIG

OMAERUS ō mĭr′əs. KJV Apoc. form of AMRAM.

OMAR ō′mär [אומר, *cf.* אמר, אמרי, אמריה] (Gen. 36:11, 15; I Chr. 1:36). An Edomite clan chief (אלוף אומר, perhaps "clan chief of Omar"); second son of Eliphaz.

OMEGA ō mĕg′ə, ō mē′gə [ō]. The last letter of the Greek alphabet; used symbolically to indicate the end, but it never appears thus apart from its opposite, ALPHA.

OMEN. Any circumstance, fact, or event which portends good or evil; any foreboding or augury of

good or evil to come; a prophetic sign; a token significant of the nature of a future event. The word "omen" is not used in the KJV and is used only five times in the RSV: Num. 24:1 (נחשים, "omens"; KJV "enchantments"); I Kings 20:33 (ינחשו, "were watching for an omen," largely supplied in the KJV); Isa. 44:25 (אתות, "omens"; KJV "tokens"); Zech. 3:8 (אנשי מופת, "men of good omen"; KJV "men wondered at"); Phil. 1:28 (ἔνδειξις, "clear omen"; KJV "evident token"). In addition, however, את, "sign," "mark," or "token," often conveys the idea of "omen" in OT usage (Gen. 1:14; 9:12-13; 17:11; Exod. 3:12; 4:8-9, 17, 28, 30; 7:3; 8:23; 10:1-2; 12:13; 13:9, 16; 31:13, 17; etc.). Σημεῖον, "sign," "mark," "signal," or "portent," is the NT equivalent of נחש and את and almost invariably conveys the idea of "omen" (Matt. 12:38-39; 16:1, 3-4; 24:3, 24, 30; 26:48; Mark 8:11-12; 13:4, 22; 16:17, 20; Luke 2:12, 34; 11:16, 29-30; 21:7, 11, 25; John 2:18; 4:48; 6:30; 20:30; Acts 2:19, 22, 43; 4:30; 5:12; 7:36; 8:13; 14:3; Rom. 4:11; 15:19; I Cor. 1:22; 14:22; II Cor. 12:12; II Thess. 2:9; Heb. 2:4; Rev. 15:1).

The connotation of the word "omen" as a sign or portent is intended in I Kings 20:33 ("Now the men were watching for an omen"). The verb נחש means "to practice divination, to observe the omens" (Gen. 30:27; 44:5, 15). The related noun (Nöldeke and others maintain that the verb is a denominative) is used only in the story of Balaam (Num. 23:23; 24:1).

According to I Kings 20:26-34, the servants of Ben-hadad, the defeated king of Syria, now in hiding, came to Ahab of Israel in order to seek guarantees for the life of their king. Having placed their request before Ahab, they watched for an omen, possibly after the manner of diviners, but more probably as men who realize that their fate is related to that of their monarch. They await anxiously any signs of compassion from Ahab. His use of the word "brother" with reference to Ben-hadad (vs. 32) must have seemed a very good omen to them. Such searchings for omens or signs in a variety of situations, whether as the occupation of self-styled or popularly recognized diviners, of ordinary individuals, or as the preoccupation of whole generations, are frequently alluded to in both Testaments (Deut. 28:46; Josh. 2:12; 4:6; Ps. 86:17; Isa. 7:11, 14; 38:22; 55:13; Matt. 12:38-42; 16:4; 24:3; Luke 2:12; 11:14-23; John 6:14-15).

In what may be, in part, a late introduction to Balaam's third prophecy (Num. 24:1 ff), point is made of the fact that BALAAM, evidently contrary to his usual custom as a recognized curser and blesser, does not go "to meet with omens." On this occasion, having observed that the Lord means to bless Israel, and having seen that Israel is encamped before him, Balaam is taken up in a state of ecstasy; he "hears the words of God" and "sees the vision of the Almighty" (vs. 4), and becomes the spokesman for the Lord. There are now no such preparatory omens for the divine communication as he had experienced during his journey when the Lord came upon him in dreams (Num. 22:9-20) and sent an angel to waylay him and caused the ass to act strangely and then to speak (vss. 21-35). The mode of prophetic inspiration is more refined in Num. 24; nonetheless, throughout the story the foreign prophet, even though in the service of the Moabite king, refuses to speak or act except as he is directed by signs and omens from the God of Israel.

Reference is made in Isa. 44:25 to the "omens of liars," which the God of Israel is capable of frustrating. These are the omens of boasters or babblers (cf. Jer. 50:36). In the context both of the historical period and of the strophe (Isa. 44:24-28), the reference would seem to be to soothsayers, possibly the priestly ones of the Babylonian cults, who imagined that the signs of the times were revealed to them by their gods. Since the future is under the control of the God of Israel, who is the Lord of history, such devotees of foreign deities can only proclaim foolishness; they can neither know nor understand (cf. Isa. 47:1-15; Ezek. 21:21-22).

An undue concern for signs and omens seemed to Jesus of Nazareth to be prevalent in his time, and this concern may be regarded as a result of a keen interest in apocalyptic among his contemporaries.

Paul suggested to the Philippians (1:28) that if they would live so as to be worthy of the gospel of Christ, and would abide in the unity of the faith unswervingly, the very quality of their witness would be an omen to their antagonists. The implication is that such self-possession and faithfulness would be discouraging to the enemies of the Christian community. His friends at Philippi were to understand that a witness so borne is the mark of the Christian life and the sign of salvation.

OMER ō′mər [עמר] (Exod. 16:13-36). A measure equal to a tenth of an ephah, a little more than two dry quarts. *See* WEIGHTS AND MEASURES § C4*h*.

OMRI ŏm′rī [עמרי]. **1.** A Benjaminite, a son of Becher (I Chr. 7:8).

2. One of the descendants of Judah; the son of Imri (I Chr. 9:4).

3. The son of Michael, and chief officer over the tribe of Issachar in the time of King David (I Chr. 27:18). E. R. ACHTEMEIER

OMRI, KING [עמרי, worshiper of Yahweh; *cf.* Arab. *'Omar, 'Umar, from 'amara,* to live *or* to worship; *cuneiform* Ḫumri; LXX (Z)αμβρ(ε)ι]. King of Israel *ca.* 876-869 B.C.; successor of Zimri; founder of the Omride Dynasty.

The sources contain confusing and contradictory statements regarding the length of Omri's reign (I Kings 16:15, 21-22, 23, 29). If he began to reign in the thirty-first year of Asa king of Judah (vs. 23), and was succeeded by his son Ahab in the thirty-eighth year of Asa (vs. 29), it is clear that he reigned for eight years, not twelve years as stated (vs. 23). But Zimri, who reigned only seven days, came to the throne in the twenty-seventh year of Asa (vs. 15).

This would seem to indicate a period of twelve years, from Asa's twenty-seventh year to his thirty-eighth year, when Omri was in control. The confusion was due to the circumstances surrounding his becoming king.

A state of anarchy prevailed in the country following Elah's assassination by Zimri, one of his army commanders. The army in the field made Omri, the commander-in-chief, king. He moved at once to overthrow the usurper, who committed suicide in Tirzah when he saw that his cause was lost. But another aspirant to the throne appeared in the person of Tibni son of Ginath, of whom no details have been preserved. A period of civil war followed, with the people equally divided between Tibni and Omri (vs. 21). The struggle for power continued for four (five?) years and ended with Tibni's death. The Greek texts at this point add the words: "And his brother Joram (died) at the same time" (vs. 22). This addition almost certainly is historical. Only then was Omri formally acknowledged as king by the people, thereby confirming the army's choice (vs. 16). The figure of twelve years for Omri's reign was arrived at by adding the four years of civil war to the eight years of his sole rule. In reality the two periods overlapped in part.

It is to be noted that the name of Tibni's father is given, but no mention is made of Omri's father. The probable explanation is that Omri, like Zimri, was a foreigner, a non-Israelite, who had achieved his position through his own efforts and abilities. Tibni may have owed his position to the fact that he was a member of a known family in Israel.

Omri was a vigorous and capable ruler who demonstrated his ability both abroad and at home. He must be regarded as one of the greatest kings of Israel, despite the brief notice given him in Kings. The summary of his reign mentions the "might that he showed" (I Kings 16:27), but no actual details are given, apart from the civil war against Tibni. The writer of Kings was more interested in his religious policy than in his political achievements, but even here no details are given for the adverse judgment he passed on the king. He simply asserts that "Omri did what was evil in the sight of the LORD, and did more evil than all who were before him" (vs. 25).

Under Omri's strong leadership the latent power of Israel began to make itself felt. No mention is made of continuing war with Judah. It is clear that friendly relationships were established between them, cemented later by a marriage between the two royal houses. Omri succeeded in subjugating Moab and laying it under heavy tribute. The biblical narrative makes no specific reference to this conquest, but the amount of annual tribute paid to Israel and Moab's successful revolt under its King Mesha after the death of Ahab are recorded (II Kings 3:4). Fortunately, details have been preserved on the famous MOABITE STONE. These include Omri's name, and indicate that Moab endured afflictions for "many years." Moab had been independent since Solomon's time. As a result of Omri's victory much of the territory N of the River Arnon was occupied by the Israelites. Doubtless he hoped to use this newly won territory as a base of operations to recover the regions in NE Palestine which had been lost to Aram (I Kings 15:20). The sources are silent regarding any interference from Aram during this period. The probable explanation is that the relative strength of the two powers was approximately equal, so that neither was willing to attack the other. It is possible, however, that Omri achieved some success against Aram, which encouraged his son Ahab to continue the struggle for mastery.

Following in the footsteps of David and Solomon, Omri entered into an alliance with Phoenicia. This was sealed by the marriage of Ahab, Omri's eldest son, to Jezebel the daughter of Ethbaal (Ittobaal), the Sidonian king of Tyre (I Kings 16:31). This alliance was to have disastrous results for Israel, and was finally to bring about the downfall of the Omride Dynasty, but at the time it seemed to offer great advantages. It served as a check to the steadily growing power of Aram. Phoenicia was at the height of its power, and the alliance resulted in increased facilities for trade and the acquisition of considerable wealth by both countries. To this period belongs the rise of a new class in Israel—the merchant class. The wealth of these merchants stood in sharp contrast to the poverty of the majority of the people and profoundly affected the national life.

Closely allied to this change in the direction of Israel's policy came another strategic move which was to have far-reaching results for the whole future history of Israel. *Ca.* 870 Omri transferred his capital from Tirzah, where he had reigned for six years (vs. 23), to SAMARIA (the modern Sebastīyeh, *ca.* seven miles NW of Shechem). From the new capital the name Samaria came to be applied not only to the whole N kingdom but later to the Assyrian province as well. It was also the name often used by the prophet Hosea for his native country (Hos. 10:5, 7, etc.).

The reputation Omri won by his achievements is evidenced by the fact that for over a century after his death Samaria was called in the Assyrian records "House of Omri" (Ḫumri) and the land of Israel the "land of Omri." Even Jehu, who overthrew the Omride Dynasty in a blood bath, is called "son of Omri" in the black obelisk inscription of Shalmaneser III (*ca.* 842). The greatness of Omri is also exemplified by the reference in the prophet Micah (6:16) to the "statutes of Omri."

H. B. MACLEAN

ON ŏn [אוֹן, vigor (*cf.* ONAM; ONAN); *in* 1 *below*, LXX B Αυν, LXX A Αυναν; *in* 2 *below*, LXX Ων]. **1.** A Reubenite who rebelled against Moses (Num. 16:1; but cf. Commentaries).

2. The Hebrew form of the Egyptian name of HELIOPOLIS; note also AVEN (1); City of the Sun; Ir-ha-heres.

ONAM ō'nəm [אוֹנָם, vigorous; LXX Ωμαν, Ωναν]. **1.** Ancestor of a Horite subclan in Edom (Gen. 36: 23; I Chr. 1:40); fifth son of Shobal.

2. The father of a Jerahmeelite clan in Judah (I Chr. 2:26, 28); probably related to 1 *above*.

ONAN ō′nən [אונן=און, power, wealth, *plus ân; cf. personal name* אונם]. Second son of Judah and a Canaanitess (Gen. 38:4-10; 46:12; Num. 26:19; I Chr. 2:3). After the death of his older brother Er, Onan refused to accept the obligations of levirate marriage (*see* MARRIAGE § 1*g*) laid upon him both by social custom (cf. Deut. 25:5-10) and by explicit parental command (Gen. 38:8: יבם [RSV "perform the duty of a brother-in-law" preferable to KJV or LXX]). Instead, whenever he went in to her (the tenses are frequentative; G-K, §§ 112gg, 159o), he would spill his semen on the ground (so KJV and RSV; but ושחת ארצה="would spoil on the ground" —i.e., make it ineffective). For this refusal, rather than for the supposed sexual perversion bearing his name, Yahweh slew him. L. HICKS

ONESIMUS ō nĕs′ə məs ['Ονήσιμος]. The slave in whose behalf Paul wrote his letter to Philemon. He is also mentioned in the Letter to the Colossians (4:9) as accompanying Tychicus, the bearer of the letter, and is spoken of there as "one of yourselves." His story, as gathered from the Letter to Philemon, is that he was the slave of either Philemon or Archippus, that he had not only run away but had also robbed his master to do so, had become acquainted with Paul, had been converted, and had become very dear to Paul. The relationship between him and Paul has become like that of father and child (Philem. 10). Paul says that in sending him back, he is sending his "very heart." Paul wishes that he might have kept Onesimus with him in his imprisonment, because his service has been so helpful and so faithful. Here Paul plays on the name Onesimus, which in Greek means "useful." Formerly, he says, the man was useless to his master, but now he has become useful to Paul (vss. 11-12). It is Paul's faith that the freed slave will be received as a beloved brother by his former owner, and that the latter will give him up to Paul. This, Paul implies, is the Christian obligation of the owner; but he refrains from commanding that it be so, lest the exercise of authority should make the act of freeing the slave a compulsion rather than Christian brotherhood.

The story of Onesimus may be carried further if two identifications are considered legitimate to make. Is he Onesimus the bishop, who is mentioned in laudatory terms in the second-century letter of Ignatius of Antioch to the church at Ephesus? If so, we have a glowing description of his leadership, a plea to his people to live worthily because they have so noble a bishop. The same pun on the name Onesimus as appears in the Letter to Philemon occurs here. Since it is a common name for slaves, and a less than common one for a free man, it is not too bold an assumption to say that the Bishop of Ephesus might have been a slave, and if a slave, most probably the slave whose freedom for Christian service Paul was asking in his letter to Philemon. The matter of his age at *ca.* A.D. 115 is a deterrent to some in making this identification; but if Onesimus were a young lad, as is quite possible when Paul wrote the Letter to Philemon, he would be in his seventies when Ignatius wrote—a not unsuitable age for a bishop who has proved himself by his commendable service.

The other identification in question is with the ONESIPHORUS mentioned in II Tim. 1:16-18. The case for this identification is more tenuous than for the identification with the bishop of Ephesus mentioned by Ignatius. The matter of Pauline authorship for this section of the Letter to Timothy would first need to be settled. Suffice it to say that the personal messages are the most likely parts of the Pastoral letters to hold for Paul. But the matter of the different form of the name is a greater problem to some. But P. N. Harrison (*see bibliography*) points out that we are willing to accept the identification of Silas with Silvanus, of Prisca with Priscilla, and perhaps Epaphras with EPAPHRODITUS; and so he asks, Why not Onesimus and Onesiphorus? If so, we have a warm commendation of him in Paul's words: "May the Lord grant mercy to the household of Onesiphorus, for he often refreshed me; he was not ashamed of my chains, but when he arrived in Rome he searched for me eagerly and found me—may the Lord grant him to find mercy from the Lord on that Day—and you well know all the service he rendered at Ephesus" (II Tim. 1:16-18). Again at the close of the letter he comes in for mention: "Greet Prisca and Aquila, and the household of Onesiphorus" (4:19). If this identification is not accepted, and the former one is, it would seem a real coincidence that two persons of similar names were not only ministering to Paul in prison but also giving excellent community service in Ephesus. To be sure, we have assumed that the prison service mentioned in the Letter to Philemon as given by Onesimus to Paul (*see* PHILEMON, LETTER TO) was in Ephesus rather than in Rome, and here Rome is explicitly mentioned. Those who accept this identification of Onesiphorus with Onesimus must either reject the Ephesian locale for this ministry or assume that the "far more imprisonments" of II Cor. 11:23 would allow for such ministration to take place in two different imprisonments. In any event, this identifying of Onesimus with Onesiphorus is somewhat more strained than is the case with the Bishop of Ephesus mentioned by Ignatius.

Onesimus traveled with Tychicus to carry both the letter to the Colossian church and the Letter to Philemon from the imprisoned Paul to the Christians at Colossae (Col. 4:7-9). The same friends of Paul send greetings in these two letters, and in the Colossian letter their names are linked with the promise that the two of them will tell the Christians in Colossae all the news of Paul. Both Tychicus and Onesimus are cited as "beloved brothers" and are described as faithful in work. If the view of John Knox (*see bibliography*) is accepted that Archippus, the slaveowner, is at Colossae, and that Philemon, the church leader of the Lycus Valley churches, is at Laodicea, then the letters were intended to go via Laodicea to their final destination at Colossae.

Bibliography. For Knox's views about Archippus and the identification of Onesimus with the Bishop of Ephesus, see *Philemon Among the Letters of Paul* (rev. ed., 1959). For the views of P. N. Harrison on Onesimus and Onesiphorus, see "Onesimus and Philemon," *ATR*, vol. XXXII (1950).

M. E. LYMAN

ONESIPHORUS ŏn'ə sĭf'ə rəs ['Ονησίφορος, profit-bearing]. A Christian from Ephesus who is praised for his loyalty and service to Paul and to the church (II Tim. 1:16-18). "Paul" prays that the Lord will grant mercy to the household of Onesiphorus (vs. 16), asks Timothy to greet the household of Onesiphorus (4:19), and recalls Onesiphorus' past devotion to him both in Ephesus and in Rome as a prisoner. Because of the references to the household of Onesiphorus, and not to Onesiphorus personally, one infers that at the time of the writing of II Timothy, Onesiphorus was either absent from home (so Dibelius) or no longer living. If he were dead, we would have in 1:18 the earliest prayer for the dead in Christian literature. Prayer for the dead had a Jewish precedent (cf. II Macc. 12:43-45) and became a common practice in the early church (cf. Tert. *On the Soldier's Chaplet* 3, *On Monogamy* 10; Cyprian *Epistles* 57, 66; Arnobius *Against the Heathen* IV; etc.; *see bibliography*).

When Onesiphorus went to Rome, he searched out Paul in prison, no doubt having difficulty finding him who was shortly to be condemned to death. He was "not ashamed" of Paul's imprisonment, and often "refreshed" Paul—no doubt, with his presence and with his gifts. Finally, a testimony is paid to Onesiphorus for all the services he had rendered not only in Rome but also in Ephesus—probably both to Paul and to the church there; and in the light of this tribute to Onesiphorus, Timothy, a "son," is bidden to be "strong in the grace that is in Christ Jesus" (II Tim. 2:1). *See also* ONESIMUS.

Bibliography. On prayer for the dead, see A. Plummer, *Expositor's Bible* (1888). B. H. THROCKMORTON, JR.

ONIAS ō nī'əs [חוניו, חוני; 'Ονίας]. The name of several persons of priestly family in the Maccabean period.

1. Onias I, high priest in Judea (*ca.* 320-290 B.C.), the son of high priest Jaddua and father of high priest Simon I, who is called "the Just" by Josephus (Antiq. XI.viii.7; XII.iv.1). Onias I was a contemporary of the Spartan king Arius, who reigned 309-265, and he contracted an alliance with him to the effect that they were kinsmen (I Macc. 12:7 ff). The priestly family of Onias traced its lineage to Zadok, the high priest appointed by Solomon (I Kings 3:35).

Bibliography. E. Schürer, *A History of the Jewish People in the Time of Jesus Christ* (English trans.; 1891), vol. I, div. 1, p. 188.

2. Onias II, son of Simon I. His sacerdotal rule came only after that of his uncle Eleazar and the latter's uncle Manasseh, both of whom had succeeded Simon I before the son did; apparently Onias was still too young for the succession. Onias II, for politico-religious reasons, refused to pay the token tribute of twenty talents to King Ptolemy III, *ca.* 242 B.C. (Antiq. XII.iv.1). He was pro-Seleucidean and made an alliance with Seleucus II because of the economic needs of the temple. He believed that there was a greater kinship with Babylonian (Seleucid) Jewry than with the Ptolemaic Jewry. Ptolemy threatened to seize the country and parcel out the land, but Onias II persisted. His nephew Joseph (son of Tobias, the husband of Onias' sister), because of his business connections with the Egyptian court, handled the situation and thereby assumed civil leadership of the Jews, gaining temporal power over the high priesthood. Thus, by Onias II's action, the sacerdotal office was now divided; political control was relinquished, and the high priesthood henceforth retained only ecclesiastical power. This was the beginning of the high-priestly decline and the Tobiade domination in Judea. Onias II was succeeded by his son Simon II (who is also called "the Just"; Ecclus. 50).

Bibliography. S. Tedesche and S. Zeitlin, *The First Book of Maccabees* (1950), p. 5.

3. Onias III, son of Simon II and high priest in the time of Seleucus IV (*ca.* 180 B.C.). Unlike his father and his grandfather, he forsook the Seleucids and became an adherent of the Ptolemies. He felt that association with the Egyptians would be of greater advantage to Judea because of the large Jewish population in Alexandria and also because the disturbed roads to Syria prevented pilgrimages to Jerusalem. His cousins, the sons of Joseph ben Tobias, however, who had financial control of the state, sided with the Seleucids.

One of the Tobiade sons, Simon, the captain of the temple, informed King Seleucus that hidden in the temple were sums of money belonging to Hyrcanus, his half brother, who was a Ptolemaic agent. When Seleucus sent his minister Heliodorus to confiscate the money, Onias refused the latter admittance, insisting that the money belonged to widows and orphans. Heliodorus insisted but, upon entering the temple, was panic-stricken by an apparition of a rider, and he was flogged by youths. Onias prayed for Heliodorus' recovery, fearing that he would be punished as the instigator of the mischief (II Macc. 3:10 ff).

Simon, the temple captain, accused Onias, who thereupon went to Antioch to plead before King Seleucus. But the latter was assassinated by Heliodorus and was succeeded by his brother, Antiochus Epiphanes IV. Onias then fled to Egypt, where he built a rival temple in Heliopolis, called the temple of Onias (Jos. War VII.x.2; see also M. Men. 13.10). Onias' brother Joshua, called Jason, was subsequently established as high priest in Jerusalem. II Maccabees, however, depicts Onias as having been killed in Antioch when he left the asylum of Daphne (II Macc. 4:33 ff). Scholars disagree over the question whether the story of this murder is historical. It is to be assumed that the death of Onias III in Antioch was only a false rumor because of the death of the delegation protesting against Menelaus, who supported his cousin Jason. It was therefore thought that Onias, too, had been killed. Moreover, the passage in Jos. Antiq. XII.v.1, noting that this Onias was called Menelaus, is spurious.

Onias III is definitely to be regarded as the founder of the Onias temple. This temple in Heliopolis could have been built only in 169-168 B.C., when there was animosity between the Seleucids and Egyptians. It was Onias III who favored the Ptolemies and consequently received permission from Ptolemy V for the establishment of the sanctuary in Egypt. It could not be in the time of Onias IV (164-163 B.C.; *see below*), because already in 164 religious

freedom had been established, and a rival temple in Egypt was not in demand. Josephus has many discrepancies about the Onias who built the Heliopolis temple (Jos. Antiq. XX.x.1; War VII.x.2).

Bibliography. S. Zeitlin, Prolegomena, *History of the Second Jewish Commonwealth* (1933), pp. 23, 26; R. H. Pfeiffer, *History of NT Times* (1949), p. 12; S. Tedesche and S. Zeitlin, *The Second Book of Maccabees* (1954), pp. 4-5; V. Tcherikover, *Hellenistic Civilization and the Jews* (1959).

4. Onias IV, son of Onias III. Josephus (Antiq. XII.ix.7; XIII.iii.1; XX.x.1) relates that when Antiochus V killed Menelaus, giving the priesthood to Alcimus, this Onias fled to Egypt and built a rival temple (*see* 3 *above*). A Jewish military colony in Leontopolis, near Memphis, was founded by Onias IV. His sons are recognized as prominent generals under Cleopatra III, dissuading her from warfare against the Judeans. *See* ALEXANDER JANNEUS.

Josephus also says that Onias V built the temple (Antiq. XIII.x.4).

Bibliography. S. A. Hirsch, "The Temple of Onias," *Jews' College Jubilee Volume* (1925), pp. 39-80; R. H. Pfeiffer, *History of NT Times* (1954), p. 179; V. A. Tcherikover and A. Fuks, *Corpus Papyrorum Judaicarum,* I (1957), 3, 44 ff; S. Baron, *A Social and Religious History of the Jews* (1952-58), 219 and bibliography on 394, note 11.

5. Onias, known as Menelaus, one of the sons of Joseph ben Tobias and cousin (*exadelphos*) of Onias III. He obtained the high priesthood through the military force of Antiochus IV after the deposition of Joshua-Jason, his cousin, by promising greater sums. Since he could not raise the money, he went to Antioch, placing his brother Lysimachus as acting high priest. Lysimachus committed sacrilege, robbing the temple in order to obtain the funds, but was lynched. Members of the Judean *gerousia* complained to the king about Onias-Menelaus, but they were executed summarily.

J. C. TREVER

ONLY BEGOTTEN. A mistranslation in the KJV of the Greek μονογενής (RSV "only"; John 1:14, 18; 3:16, 18; Heb. 11:17; I John 4:9). Μονογενής is derived from μόνος, "single," and γένος, "kind," and means "one of a kind," "only," "unique," not "only begotten," which would be μονογέννητος. This is consistent with the LXX usage in Judg. 11:34; Pss. 22:20; 25:16; 35:17; Tob. 3:15; Wisd. Sol. 7:22; and with I Clem. XXV.2, where it is used of the phoenix. Jerome revised the translation in the Old Latin MSS from *unicus,* "only," to *unigenitus,* "only begotten," out of interest for theological dogma, not for the demands of linguistic study. In Luke 7:12; 8:42; 9:38, where no theological question is involved, the Latin *unicus* was left as the translation of μονογενής. Jerome was, no doubt, influenced by the theological orations of Gregory of Nazianzus, whom he had heard in Constantinople (379-81). Gregory's *Oration* XXIX, in discussing the eternal relation between the Father and the Son, spoke of the Father as γεννήτωρ, "begetter," and of the Son as γέννημα, "begotten."

William Tyndale (*see* VERSIONS, ENGLISH, § 3), the first to translate the NT from Greek into English, failed to correct Jerome in John 1:14, 18; Heb. 11:17; I John 4:9; but his editions of 1526 and 1534 corrected the error in John 3:16, 18, with the translation "only sonne." The KJV of 1611, under the influence of the Latin Vulg., returned to "only begotten" in John 3:16, 18.

The meaning of μονογενής in the Johannine writings has great significance for Christology. In I John the Son is declared the revealer of God (4:9) and the redeemer of men (4:10). The two ideas are elaborated in John's Gospel. The Son reveals God as the Logos (Word) becoming flesh with a "glory as of the only Son from the Father" (1:14). This relation is so important in historical revelation that John 1:18 does not hesitate to call the Son μονογενὴς θεός, "only God." The Son is proclaimed the redeemer of men, both in reference to his work as the sacrifice for sin (3:16) and in reference to his person, which is linked with believing on his name (3:18). The distinctive vocabulary of the Johannine writings reserves the term υἱος, "son," for the Son of God alone (John 1:34, 49; 3:18; 5:25; 10:36; 11:4, 27; 17:1; 19:7; 20:31; I John 1:3, 7; 3:8, 23; 4:9, 15; 5:5, 9-12, 20; II John 3), so that in a real sense Jesus is the only Son. Believers are called "children" (τέκνα; John 1:12; I John 3:1-2; 5:2). It would be awkward for John to speak of the Son as "begotten," since the word for "beget," γεννάω, is used to designate the relation between God and all his children (John 1:13; 3:3, 5-8; I John 2:29; 3:9; 4:7, 9; 5:1, 4, 18).

D. MOODY

ONO ō′nō [אונו, אנו]; KJV Apoc. ONUS ō′nəs [Ὦνους, *genitive form*]. A town of Benjamin near the S border of the Plain of Sharon some seven miles SE of Joppa. With Lod (Lydda) and Hadid, it constituted the ancestral homeland of more than 720 exiles who returned from the Babylonian captivity (Ezra 2:33; Neh. 7:37; 11:35; I Esd. 5:22) and with them also represented the westernmost settlement of the restored community.

It appears in the Karnak list of Thutmose III (*'Unu*) and is described in the Mishna ('Arak. 9.6) as a walled city since the days of Joshua. Its construction by the sons of Elpaal, descendants of Benjamin, also testifies to its importance as an early fortified town (I Chr. 8:12).

The village of Kefr 'Ana in the Wadi Musrara preserves the name of the biblical site, and the broad wadi itself was the Plain of Ono—the setting for the intrigues of Sanballat and Geshem against Nehemiah (Neh. 6:2).

W. H. MORTON

ONUS. KJV Apoc. form of ONO.

ONYCHA ŏn'ĭ kə [שחלת, nail, claw, husk, flap, *or* that which hangs loose (down); LXX ὄνυξ] (Exod. 30:34). An ingredient (probably obtained from a marine animal, most probably from the closing flaps of certain mollusks) in the mixture to be burned on the altar of incense. A corresponding verbal root in Arabic is the basis for a noun denoting the husks of wheat and barley. A related postbiblical Hebrew word, שחלים, is used as the name for garden cress.

J. C. RYLAARSDAM

ONYX. A chalcedony whose bands are milk-white alternating with black (*see also* AGATE). "Onyx" is used to translate the following stone names:

a) שהם, *šōham* (cf. Akkadian *sâmu,* "dark red"). The Vulg. renders this word "onyx" except in Job 28:16, where it reads "sardonyx." The LXX varies: in Gen. 2:12, λίθος ὁ πράσινος, "stone of leek green"; in Exod. 25:7; 35:9, λίθος σαρδίου, "carnelian" or "sardius"; in 28:9; 35:27, σμαράγδος, "emerald"; in 28:20, βηρύλλιον; in I Chr. 29:2, the transliteration σόομ. With gold and bdellium, onyx is a product of Havilah (Gen. 2:12). It is acceptable as an offering for the ephod and breastpiece (Exod. 25:7; 35:9, 27). It comprised the engraved shoulder pieces of Aaron's ephod (28:9; 39:6). It is a stone in the breastpiece of judgment (28:20; 39:13). It was building material assembled by David for the temple of Solomon (I Chr. 29:2). It was used in the evaluating of wisdom (Job 28:16).

b) ישפה, *yāšᵉphê*. In Ezek. 28:13, "beryl" is used for שהם (*above*) and "onyx" for ישפה. In Exod. 28:20, where the RSV translates "jasper," the LXX reads "onyx." It is one of the stones in the covering of the king of Tyre.

c) Σαρδόνυξ (Rev. 21:20; cf. Job 28:16 Vulg.; *see* SARDONYX), the fifth stone of the foundation of the wall of the New Jerusalem. W. E. STAPLES

OPHEL ō'fĕl [עפל]. According to etymology, a swelling, a bulge; hence, a knoll, a mound. As a common appellative it occurs in the Hebrew text of Isa. 32:14 (RSV "the hill"; KJV "the forts") and of Mic. 4:8 (RSV "hill"; KJV "stronghold"). In several instances, the term "Ophel" applies to a specific mound and becomes a proper name. This may well be the case in II Kings 5:24 MT, which refers to the Ophel of Samaria, where the house of Elisha stood; the RSV, however, reads "the hill," and the KJV "the tower." Ophel is used undoubtedly as a proper name in the inscription of Mesha, line 22: "I built QRḤH (Kerak) . . . and the wall of the Ophel." *See* MOABITE STONE.

The name Ophel was given to a quarter of ancient Jerusalem, to the fortification of which the late kings of Judah gave repeated attention (II Chr. 27:3; 33:14). After the Exile, the temple servants or NETHINIM were quartered on the Ophel, and they repaired the ramparts that lay in ruins (Neh. 3:26-27; 11:21). The topographical details contained in all these texts point to a location on the NE portion of the triangular hill on which stood the City of David (*see* DAVID, CITY OF), S of the Haram esh-Sherif, in a commanding position above the slopes of the Kidron (*see* KIDRON, BROOK). Josephus calls the same quarter Ὀφλᾶς, a Hellenized transcription of the Aramaic עפלא. He makes clear the proximity of Ophel to the temple, the S portico of which was contiguous with the city wall above the Kidron (War V.iv.2; vi.1), and he formally distinguishes Ὀφλᾶς from ἄκρα, the citadel of the Syrians in the time of the Maccabees, which he localizes on the same hill, perhaps by confusion.

Various excavations conducted on the SE hill of Jerusalem have uncovered important elements of fortifications, particularly toward the angle of the Haram esh-Sherif overlooking the Kidron, and right above Gihon (*see* GIHON, SPRING), ranging from the pre-Israelite period to the late Hellenistic. They can be regarded as the last remains of the system of ramparts and towers of the Ophel. Unfortunately, the chronological and architectural connections between structures excavated at long intervals of time and inadequately recorded remain often obscure. It should be noted that, in modern archaeological literature, the name of Ophel is sometimes given (abusively) to the entire hill, from the temple to Siloam.

See map under JERUSALEM.

OPHIR ō'fər [אופיר, אופר (Gen. 10:29), אפיר (I Kings 10:11); LXX ουφιρ, οφερ, ωφιρ, σουφιρ, σουφειρ, σωφιρ, σωφειρ, σωφηρα]. **1.** A people descended from Shem through the lineage Arpachshad, Shelah, Eber, and Joktan (Gen. 10:29; I Chr. 1:23). On the location of their territory, *see* 2 *below.*

2. A region or territory chiefly known for its production of fine gold and ALMUG trees. Ophir first appears in historical narrative during the United Monarchy as the source of the 3,000 talents of fine gold left by David for the temple (I Chr. 29:4). It was also the place from which a fleet of ships, built by Solomon at Ezion-geber and manned by Phoenicians and Israelites, brought 420 talents of gold (II Chr. 8:18 reads 450 talents), silver, almug trees, precious stones, ivory, and two kinds of monkeys (*qôphîm* and *tukkîyîm; see* FAUNA § A2*k*) to Israel (I Kings 9:28; 10:11 = II Chr. 8:18; 9:10). In the ninth century, Jehoshaphat attempted to duplicate Solomon's expeditions to Ophir, but his ships were broken up at Ezion-geber before setting sail (I Kings 22:48—H 22:49). Ophir is also mentioned in an inscription on a sherd found at Tell Qasileh, probably biblical Aphek. The inscription, which belongs to *ca.* the eighth century B.C., reads: "Gold of Ophir for [or belonging to] Beth-horon, 30 shekels." This is the first nonbiblical mention of Ophir discovered to date (Fig. OPH 11). The fame of Ophir's fine gold is also mentioned in poetic and prophetic passages as a symbol of greatest opulence (Job 22:24; 28:16; Ps. 45:9—H 45:10; Isa. 13:12).

The location of Ophir has been much disputed; it has been variously placed in India, Arabia, and Africa. Those who hold to an Indian location draw their support from the LXX reading "Sophir" with an initial "s" (*see above*); from Jerome, who once renders "Ophir" by "India" (Job 28:16); and from Josephus, who describes the destination of Solomon's

From *Journal of Near Eastern Studies*, published by the University of Chicago Press; copyright 1956 by the University of Chicago

11. Ostracon from Tell Qasile with inscription: "Gold of Ophir to Beth Horon . . . thirty shekels" (*ca.* 589/588 B.C.)

fleet as Sopher, which belongs to India (Antiq. VIII.vi.4). Basing themselves on this tradition, which goes back at least to LXX times, they identify Sophir with the city of Supara, located a few miles N of Bombay. This identification, however, is quite unlikely for several reasons. All available evidence suggests that before the first century B.C., trade between the Mediterranean lands and India was controlled by Arab and Indian merchantmen, and that Egyptian, Phoenician, and Greek fleets obtained Eastern products from middlemen in S Arabian and East African ports. Furthermore, there can be little doubt that the MT correctly preserves the name Ophir, the identification of which by Hellenistic times had been forgotten, and that the tradition identifying Ophir with Sophir = Supara was an attempt to locate this place.

Other scholars have sought to locate Ophir in the Arabian Peninsula, and virtually every coastal region from Yemen to the Persian Gulf and some inland areas have been suggested, including: Ma'afir, a territory in the extreme SW corner of Yemen; Dhofar, on the S coast; Nazwa, a site on the S slope of Jebel el-Akhdhar in Oman; Apir, a region on the Persian Gulf S of Elam; the wells at U'ayfirah, not far W of the S Tuwaiq range in central Arabia. All these proposed identifications, which are located E of the Aden Protectorates, are open to the same geographical objection that applies to the Indian identification (*see above*). The only possible part of Arabia in which Ophir might have been located is the SW corner of the peninsula, in view of the association of Ophir with Sheba (*see* SABEANS) and HAVILAH; but the one suggested identification in this area, Ma'afir, is linguistically impossible.

Two regions in Africa have been suggested as possible locations for Ophir: the ruins of Zimbabwe in Southern Rhodesia, and the East African coast in the general vicinity of Somaliland. The first of these is impossible, since the ruins of Zimbabwe date *ca.* the eighth century A.D. The second, the region of Somaliland, with a possible extension to the neighboring coast of S Arabia, is the most probable identification of Ophir as yet proposed. The products of Ophir (I Kings 9:28; 10:11) are the same as those of the Egyptian Punt, and included such characteristic African products as gold, silver, ivory, and two kinds of monkeys, the words for which in Egyptian, *qf* and *ky*, are the same as in Hebrew. It is therefore likely that Ophir and Punt were in the same general region and possibly the same place. It is certain that Punt was located in the vicinity of Somaliland, from Egyptian reliefs which portray an African culture and environment and list imported products such as myrrh trees, which in Africa grow only in this region. Thus it is quite probable that Ophir was located in this same region. The voyage to Ophir is said to have required three years, which probably meant one full year and parts of two others, according to Semitic reckoning. The fleet would leave Ezion-geber in the late autumn of one year, call at Ophir and possibly other ports en route as well during the second year, and return to Ezion-geber in the spring of the third year. Such voyages to a region no more distant than Ophir were quite possible, since we have numerous records of Egyptian voyages to Punt from the Fifth Dynasty through the period of the New Kingdom.

G. W. VAN BEEK

OPHNI ŏf'nī [עָפְנִי]. A town in the territory allotted to Benjamin (Josh. 18:24). Though the site remains unknown, its listing in company with Geba suggests the N central district of the tribal territory.

Modern Jifna, the Gophna of Josephus, is often suggested as a possible identification of the OT site. This town was located *ca.* three miles NW of Bethel and was strategically situated near the intersection of the Jerusalem-Shechem highway and the road leading up to Bethel from the Plain of Sharon. As head of one of the toparchies of Judea, Gophna was, in Josephus' day, second in importance only to Jerusalem (Jos. War III.iii.5). The suitability of this suggested location presupposes a slight northward bulge in the rather loosely delineated N boundary of Benjamin near Bethel.

Bibliography. G. A. Smith, *The Historical Geography of the Holy Land* (1904), p. 351.

W. H. MORTON

OPHRAH ŏf'rə [עָפְרָה, hind]. **1.** A son of Meonothai and descendant of Judah through Kenaz and Othniel (I Chr. 4:14).

2. One of the cities allotted to Benjamin (Josh. 18:23). Related cities in the list suggest a location in the hill country to the NE of Jerusalem. The site

is also associated with one of three raiding parties dispatched from the Philistine camp at Michmash (I Sam. 13:17-18). With Saul's forces situated to the S at Geba, one Philistine party turned westward toward Beth-horon, another eastward toward the border overlooking the wilderness, and a third in the direction of Ophrah, which must, therefore, have lain northward from Michmash.

Ophrah is probably identical with Ephron of II Chr. 13:19; Ephraim of II Sam. 13:23; John 11:54; and Aphairema of I Macc. 11:34. If so, proximity to Bethel, Baal-hazor, and the wilderness becomes an additional factor in determining its location.

Jerome equates the ancient site with the town of Ephraim and locates it five Roman miles E of Bethel. Accordingly, it is probably correctly identified with modern et-Taiyibeh, five miles N of ancient Michmash and four miles NE of Beitin (Bethel).

3. A town in the Cis-Jordan territory of Manasseh, distinguished from others of like name as the one belonging to the clan of Abiezer (Judg. 6:11, 15, 24; 8:32; cf. Josh. 17:2; I Chr. 7:18). It was Gideon's home where he both experienced the oppression of the Midianites and received the divine commission to deliver Israel from it (Judg. 6:11, 14). Here, also, he built an altar to the Lord and destroyed the local idolatrous installations (vss. 24-27). From the spoil of his triumph over Midian he made a golden ephod for Ophrah, which became an apostatizing snare both to Israel and to his own family (8:27). Here Gideon died and was buried in the family sepulchre (vs. 32); and here Abimelech, ambitious to be king, slew seventy of his brothers as possible rivals to his claim —only Jotham managed to escape (9:5).

The geographical situation of Ophrah of Abiezer remains uncertain. The only available clues to its location are the rather general ones associating the Gideon episodes with the Valley of Jezreel, the hill of Moreh, the spring of Harod, and Tabor, plus the impression that the home of Gideon was not far removed from the scene of these activities (Judg. 6:11, 33-35; 7:1; 8:18-19). Several rather widely separated sites have been suggested for its location. Among them may be mentioned et-Taiyibeh, S of Tulkarem; et-Taiyibeh, NW of Beth-shan; Ferata, W of Shechem; Silet ed-Dahr, N of Shechem; and a site NW of Megiddo. No one of them, however, has sufficient evidence in its favor to encourage confidence in its identification with Ophrah.

ORACLE [נאם (KJV SAY); משא (KJV BURDEN), *lit.*, speech, utterance, pronouncement]. An introductory formula to a divinely inspired message. These two Hebrew words are used in the prophetic literature (*see* PROPHET). For the employment of oracles in early Israel, *cf.* URIM AND THUMMIM.

I. MENDELSOHN

ORACLES, SIBYLLINE. *See* SIBYLLINE ORACLES.

ORAL TRADITION. *See* TRADITION.

ORATORY. *See* RHETORIC AND ORATORY.

ORCHARD [פרדס, *loan word from* Persian = Paradise (Song of S. 4:13; FOREST *in* Neh. 2:8; GARDEN *in* Eccl. 2:5); גנה, garden (Song of S. 6:11); זית, olive tree(s)]. Olive, pomegranate, or nut trees collectively; also, a park or GARDEN. "Fruit trees" in Neh. 9:25 suggests trees other than those mentioned above.

H. N. RICHARDSON

ORDINANCE. A frequent translation of משפט ("judgment") and חק, חקה ("statute") in English versions (*see* LAW IN THE OT).

משפט is one of the most significant OT words. It is derived from an ancient Semitic root meaning "to decide" and originally describes the decision of a local judge in cases of civil disputes. It is not unlikely that the plural, משפטים, was once a technical term for the casuistic Canaanite law, which made up a large part of Israel's legal corpus (cf. Exod. 21:1; 24:3). Derivatively, the word may mean "judgment," "justice," a "legal case," "claim," "that which is right, fitting" (hence "manner," "custom").

The words חק, חקה, are derived from a verb which means "inscribe" or "engrave," and thus "that which is fixed in writing," "decree," "statute." חק may then be used of anything which is prescribed, in the widest sense, including secular and divine law. חקה infers somewhat more narrowly "that which is due," "statute."

משפט is frequently translated "ordinance" for the KJV "judgment" when the particular law itself is intended, rather than "judgment" before the law, which the older term tends to convey to modern ears (similarly, "justice" for KJV "judgment" when the right of a person before the law is involved). חק, חקה, are normally translated "statute" when they appear parallel to other synonyms for the law.

Reminiscences of the ancient secular statutes and ordinances established for the social order are found in Gen. 47:26; I Sam. 30:25, where they are instituted by human authority (cf. I Kings 3:3; II Kings 17:8, 19; Dan. 6:7-8). Even within the cultic order, certain ordinances are instituted by men (cf. Judg. 11:39; II Chr. 8:14; 35:25).

In the theology of DEUTERONOMY a variety of etymologically distinct terms for "law" are used quite synonymously for the law of God: "statutes and ordinances" (Deut. 4:1, 5, 14; 5:1; 11:32); "statutes, commandments, ordinances, testimonies" (I Kings 2:3); "statutes, ordinances, . . . all this law" (Deut. 4:8; cf. 33:10; cf. also I Kings 8:58; 9:4; 11:33; II Kings 17:34, 37). The ordinances are grounded in the vital command of God (Deut. 4:5, 14; 5:31 ff; 6:1-2, 24-25) based upon his gracious activity (Deut. 4:32-40; 6:20; 7:6-8 [cf. 9:4-29]; 29:2-9), and therefore may not be understood in terms of mere legalism. For the Deuteronomist, all law can be summed up in the injunction to "love the Lord your God" with heart, soul, and might (Deut. 6:5; *see* SHEMA; cf. Deut. 4:29; 10:12, 16; 11:1; 30:10, 14). The purpose of obedience is clearly to keep COVENANT with God, in order that his covenant promises may be fulfilled (Deut. 7:6-16; cf. 6:2-3; 11:8-25; 30:1-10). It is not necessary at this period to think of a fixed canon of sacred law, which eventually is implied in such passages as Ezra 7:6, 10; Neh. 1:7. Several of the Psalms employ the terms "ordinance" and "statute" in a typically Deutero-

nomic way (Pss. 18:22; 19:7-10; 89:30-31; 119; 147: 19-20; see also Ezek. 5:6-7; 20:11, 13, 16; 36:27; but cf. 20:25, which is distinctly non-Deuteronomic).

In the language of the cult, כמשפט, "according to the ordinance," becomes a technical term for fulfilling the priestly prescriptions. More than "custom" or "usage" is implied, and the RSV rightly translates "ordinance" for KJV "manner" (Lev. 5:10; 9:16; Num. 29). A typically priestly term is חקת עולם, "perpetual statute, ordinance" (Exod. 12:14, 17, 24; Lev. 16:29, 31, 34; 23:41; Num. 10:8; etc.).

Koehler, *OT Theology* (English trans., 1957), pp. 201-9. J. A. WHARTON

ORDINATION, RAM OF. The animal (איל; *see* RAM) sacrificed in connection with the ordination (המלאים; lit., "that which fills" [τελειώσις], from מלא, "to be full," in some forms "fulfil," "institute," "ordain" [cf. Judg. 17:5; I Kings 13:33]; KJV CONSECRATION) of the Aaronic priesthood in Exod. 29:22 ff; Lev. 8:22 ff. *See* PRIESTS AND LEVITES; SACRIFICE AND OFFERINGS; MINISTRY.

J. A. WHARTON

ORE [אבן, *lit.,* stone]; KJV STONE. The rock from which metals are obtained. Job 28:2-3 refers to the deep mine shafts in remote valleys from which ore was obtained. *See* METALLURGY.

OREB AND ZEEB ôr′əb, zē′əb [עורב, raven; זאב, wolf]. Two Midianite princes who were captured and put to death by the Ephraimites after Gideon's surprise attack had routed their forces.

After seven years of subjugation to the devastating invasions of Arabian bands, whose recent domestication of the camel had greatly extended their predatory migrations, Gideon led his chosen followers in a successful attack against the Midianites and their allies as they encamped by the Hill of Moreh in the Valley of Jezreel (Judg. 6-7). The Ephraimites, who had been summoned by Gideon to cut off the retreat by commanding the waters to the E of the enemy, seized two Midianite princes, Oreb and Zeeb, and promptly executed them.

Each of these leaders appears to have bequeathed his name to the place where he was slain: Oreb to the rock of Oreb, and Zeeb to the wine press of Zeeb. However, it may be argued that the name of places gave rise to the names of the princes, who were perhaps not named in the original text.

The heads of these enemy leaders were presented to Gideon and constituted, in his words, such a rich war prize that the Ephraimites, who were angry because they had not been invited to participate earlier in the campaign, were completely pacified (Judg. 7:24–8:3). The execution of Oreb and Zeeb, as well as the defeat of Midian, became proverbial in the thought of Israel (Ps. 83:11—H 83:12; Isa. 9:4; 10:26). E. R. DALGLISH

OREN ôr′ən [אורן, fir tree] (I Chr. 2:25). A descendant of Judah, and one of the sons of Jerahmeel.

ORGAN. *See* MUSICAL INSTRUMENTS.

ORGIES [המון, tumult] (Jer. 3:23); KJV MULTITUDE. That "orgies on the mountains" refers to the fertility rites of the syncretistic West Semitic religions (*see* BAAL [DEITY]) of late-seventh-century Judah seems reasonable, in view of the strong revival which the local cults of this religion (practiced on the "high places" [*see* HIGH PLACE]) enjoyed during the reign of Manasseh (687-642 B.C.). Frenzied revelry, sexual license, and hysterical or "ecstatic" religious phenomena of the type associated with the cult of DIONYSUS were a part of Canaanite religion from the earliest times (*see* UGARIT), as part of the worship of various deities (e.g., Baal; Astarte; ADONIS) related to the fertility cycle. *See also* ASHTORETH; TAMMUZ; ASHERAH.

Bibliography. W. R. Smith, *The Religion of the Semites* (1914), pp. 253 ff; W. F. Albright, *From the Stone Age to Christianity* (1957), pp. 304 ff; 311 ff. J. A. WHARTON

ORIENTATION. The means of fixing direction.

1. Systems of orientation. Several methods of orientation were developed in the long history which preceded the discovery of the compass. Chief among these were: (*a*) basic direction, (*b*) local geographic, (*c*) solar, (*d*) polar orientation. The Hebrews were acquainted with the first three and used them interchangeably. It is impossible to determine which system was the earliest. All three rested ultimately upon a concept of space which conceived of spatial positions, not merely as determining neutral relationships within the universe, but as characterizing the quality of individual spaces.

2. Biblical orientation. The Hebrews divided the world into four parts and described the quarters as "corners of the earth" (כנפות הארץ in Isa. 11:12; γωνίαι in Rev. 7:1; 20:8), or as "four winds" (ארבע רוחות; Ezek. 37:9). Like many other Semitic peoples, the rising sun gave the Hebrews their basic direction. The E was called the "front" (קדם, קדמה, קדים), or the "place of dawning" (מזרח, ἀνατολή). The other directions received their corresponding designation as one faced eastward. The W was the "rear" (אחור; Joel 2:20), the N was the "left" (שמול; Gen. 14:15), and the S was the "right" (ימים; I Sam. 23:24). Directions between the cardinal points seldom appear.

With the exception of the E, the OT used the local geographic designations most frequently. The N was called צפון, from the root צפה, "look out." Most probably this was once the name of the large mountain in Syria, *dshebel 'el-'akra'*, later called Mons Casius, which was the seat of the Canaanite god Baal Zaphon (*see* ZAPHON). Frequently the direction of the N has retained traces of a mythical background (cf. Jer. 4:6 ff; Joel 2:20).

The S was called the נגב, which means the "dry country" (*see* NEGEB). Again the term דרום was used, which probably once designated a concrete geographic place before becoming a direction (S Judea; Deut. 33:23; Job 37:17; Ezek. 40:24; etc.). Finally, תימן, located in NW Edom, appeared as the S direction. *See* TEMAN.

The W was called either the "sea" (ים), to designate the Mediterranean, or frequently the "place of the setting sun" (מבוא שמש מערב).

B. S. CHILDS

ORION ō rī′ən [LXX *rendering of* MT כסיל]. A constellation of stars. The same term in other contexts has the connotation of "dullness" and "stupidity," not only as intellectual dullness but as impiety (Pss. 49:10—H 49:11; 92:6—H 92:7; 94:8). In three passages (Job 9:9; 38:31; Amos 5:8) it refers to a specific group of stars; in Isa. 13:10 the plural כסיליהם, "their constellations," is used in a more general way.

The LXX is not clear. In Amos 5:8 it attempts no translation, but merely expresses the theological import: "who made and transforms all things." In Job 9:9, followed by the Vulg., the LXX renders "that related to the evening" (therefore, the west). However, in Job 38:31 the LXX has "Orion," where the Vulg. reads "Arcturus." In the plural reference in Isa. 13:10, the MT has כוכבי השמים כסיליהם; the LXX ignores the plural, reading ἀστέρες τοῦ οὐρανοῦ καὶ ὁ Ὠρείων—i.e., "stars of heaven and Orion." Both the RSV and the KJV in this last usage read "constellations." In this sense, the term refers to no specific astral group, but to the brilliance of two or more constellations, the term being more generally employed.

The versions are helpful: the Targ. and Syr. read "giant." This may properly identify the star; even in modern times, the Arabic name for the constellation, Orion, is *al gebbar,* "the strong one"; the Syriac name is *gabbara,* modern Hebrew *gibbôr,* with the same meaning. Scholars generally agree in this identification, "the strong one," for "Orion."

A mythical allusion lies behind the name "strong one" (גבר), "foolish one" (כסיל), and the notice in Job 38:31 that Orion is bound in cords. Classical mythology represents Orion as a man of great strength who at his death was transferred to the heavens, bound to the sky, and became the constellation Orion. When this myth is adapted to Israel's faith, it is a short step from strength to foolishness. The man who is strong relies upon himself before the Lord; strong as he may be, he is subject to God. The reference of Job 38:31 may be to one who in his foolishness found himself bound by the greater power of God.

This constellation is uniquely appropriate for the myth; the configuration of stars fits the figure. Four bright stars mark the two shoulders and the two legs of what could be a gigantic warrior; a row of three bright stars, midway between the first four, suggests his belt, studded with gems, the cord by which he is confined. Another row of stars, straight down from the center of the belt, may be his sword. The cluster yields the outline of a warrior girded for battle. This makes the identification very likely. Additional support is derived from its proximity to the PLEIADES, with which it is closely associated in the texts.

Note that it is precisely biblical faith which permits derogatory language such as "stupid" concerning the stars. In the religions which surrounded Israel, the stars represented or were powers whose favor must be sought. In utilizing the myth concerning Orion, Israel confessed the sovereignty of its Lord, even over the heavenly luminaries.

ORMUZD ôr′mo͝ozd. Alternately: ORMAZD; OHRMAZD. Middle Persian form of AHURA-MAZDA.

ORNAMENT. *See* DRESS AND ORNAMENTS.

ORNAN. Alternate form of ARAUNAH.

ORPAH ôr′pə [ערפה, neck, the girl with a full mane(?), *or* rain cloud; *cf.* Akkad. *irpu,* cloud]. One of the characters in the book of Ruth. She and Ruth, both Moabite women, had married Hebrews, sojourners from Bethlehem in Judah. After their husbands died, they set out with their mother-in-law, Naomi, for Bethlehem. When Naomi had told them of the difficulties they would face, and had twice urged them to return to their own people, Orpah yielded. Her dutiful, but more ordinary, obedience contrasts with Ruth's unlimited devotion to Naomi (Ruth 1:4-14).

OSAIAS ō sā′yəs. KJV Apoc. form of JESHAIAH.

OSEA ō zē′ə. KJV Apoc. form of HOSHEA.

OSEAS ō zē′əs. KJV Apoc. form of HOSEA.

OSEE ō′zē. Douay Version form of HOSEA.

OSHEA ō shē′ə. KJV form of Hoshea in Num. 13:8, 16. The gloss in vs. 16 shows that this name refers to JOSHUA SON OF NUN.

OSIRIS ō sī′rəs. One of the principal gods of the Egyptian pantheon.

Believed by some to have been a deified leader of a prehistoric invasion of nomadic peoples into the Nile Delta from the E, Osiris became one of the most popular and important gods of ancient Egypt. He was the god of vegetation and regeneration—indeed, the most fundamental tenet of his cult was that concerning his death and resurrection. Already in the Pyramid Texts he has become a god of the dead as well, and it is with him that the deceased king is equated. United with APIS under the name Serapis (Osiris-Apis), he attained international recognition during the Greco-Roman period.

T. O. LAMBDIN

OSNAPPAR ŏs năp′ər [אסנפר] (Ezra 4:10); KJV ASNAPPER ăs—. An Assyrian king said to have brought deported foreign peoples to Samaria; often identified with Ashurbanipal, because among the peoples listed are Elamites and natives of Susa, which was destroyed by this king in *ca.* 640 B.C.

OSPREY ŏs′prĭ [עזניה; LXX ἁλιαίετος, sea-eagle, osprey; Vulg. *haliaeetos;* Targ. (Onq.) עזוא *or* עזוא, bird of prey, *possibly* black eagle] (Lev. 11:13; Deut. 14:12); KJV OSPRAY. A fairly large fish-eating hawk (*Pandion haliaëtus haliaëtus*), whose anatomy in some respects resembles that of the owls.

The identification of עזניה is uncertain, except that it is in a list of unclean birds, most of which seem to be raptorial. The context would therefore favor a bird of prey of the family Accipitridae. Tristram pointed out that while the osprey was found in Palestine in his time, such a bird, whose food consists entirely of fish, could never have been very common in that area, and he suggested that the word designates the short-toed eagle, also known as the harrier eagle (*Circaëtus gallicus gallicus*), the "most abundant of all the Eagle tribe in Palestine" (Tristram *NHB* 184). Koehler and Bodenheimer favor the Black Vulture (*Aegypius monachus* or *Vultur monachus*), which G. R. Driver also mentions, along with the Bearded Vulture (*Gypaëtus barbatus aureus*).

W. S. MCCULLOUGH

OSSIFRAGE ŏs′ə frĭj [פרס (Lev. 11:13); *cf.* פרס, to break in two, divide]. Alternately: VULTURE (Deut. 14:12). The term (meaning "bone-breaker") used in English to denote (*a*) the lammergeier, or bearded vulture (*Gypaëtus barbatus*); (*b*) the osprey (*Pandion haliaëtus*); (*c*) the giant petrel (*Macronectes giganteus,* formerly *Ossifraga gigantea*), called in some nautical circles "break-bones."

While it is impossible to offer a conclusive identification of פרס (other than that it is an unclean bird mentioned in association with birds of prey), if the word means or suggests "breaker," it would be a very apt term for the lammergeier, which has a fondness for bones and for tortoises, which it smashes open by repeated droppings from the air.

13. A variety of Palestinian ossuaries

the flesh had decayed and the tombs were being prepared for new burials. The term (from Latin *ossuarium,* "for bones") is not a biblical one, although such chests were used in biblical times. Fig. OSS 13.

It is thought that a clay ossuary in the Palestine Archaeological Museum in Jerusalem, fashioned in the form of a miniature house, was used in the Chalcolithic Age.* More common, however, were the rectangular stone chests, of which hundreds have been found in the vicinity of Jerusalem, sometimes in caves and frequently in tombs which were often constructed with small niches (*loculi*) large enough to hold a single ossuary. Dating from the early Roman period in Palestine, they vary in size from *ca.* twenty to thirty inches in length, twelve to twenty inches in width, and ten to sixteen inches in depth. Often inscribed with Hebrew, Aramaic, or Greek words, including personal names, and with rosettes or other decorations, they give evidence of care in the handling of the bones of the dead. Figs. OSS 14, 15.

16. A Middle Assyrian seal impression showing an ostrich hunt

birds, now confined to Africa and the Near East, where they live in desertlike districts or areas covered with stunted bushes. The species found in the environs of Arabia is *Struthio camelus.*

It is probable that the Hebrew words cited above designate the ostrich, although G. R. Driver contends (*see bibliography*) that בת־היענה means "owl."

Job 39:13-18 alludes to familiar features and habits of the ostrich, although some of its statements need qualification. Vs. 13 is so obscure that it is quite impossible to say whether originally there was a reference to the beauty of the ostrich plumes. Ostrich eggs are laid in the sand (vss. 14-15), but are apparently neglected only in the daytime when the sun is warm; the cock bird does most of the incubating, particularly at night. The unhatched eggs, placed in the vicinity of the incubated ones, are intended to serve as food for the young; such extra eggs may have led to the view, expressed in Lam. 4:3, that the ostrich was indifferent to its brood. The stupidity of the ostrich (Job 39:17) is most in evidence when it is being hunted and is cornered, and when it often fails to take the evasive action that would save it. But in open terrain it is very wary. Another instance of seeming witlessness is its habit of swallowing all manner of objects of no value nutritionally (cf. the etymology above, "the greedy one"), though this procedure is said to help in the trituration of food. The speed of this bird (vs. 18) is proverbial. Tristram testifies that its maximum stride is from twenty-two to twenty-eight feet, and he confirms Livingstone's calculation of a speed of twenty-six miles an hour.

Although Tristram found ostrich flesh "good and sweet" and its eggs "excellent eating like those of poultry," Israel's law declared this bird to be unclean (Lev. 11:16; Deut. 14:15). Presumably it was thus ranked because of its eating habits. While it is not raptorial, it is omnivorous, and its food includes small mammals, birds, snakes, and lizards, as well as grass, fruit, etc. Most of the other OT references associate this bird with wild creatures and uninhabited areas (Job 30:29; Isa. 13:21; 34:13; 43:20; Jer. 50:39). Its night cry, which Tristram thought to be "like the hoarse lowing of an ox in pain," is referred to in Mic. 1:8.

W. S. McCULLOUGH

OTHNI ŏth'nī [עתני] (I Chr. 26:7). A Levitic gatekeeper in the temple; a son of Shemaiah.

OTHNIEL ŏth'nĭ əl [עתניאל]. The first deliverer or judge of the Israelites mentioned in the book of Judges (3:7-11). Probably the nephew of Caleb, he became Caleb's son-in-law as his prize for capturing the city Debir (Josh. 15:15-19; Judg. 1:11-15). Othniel's rescue of Israel, from the divinely ordained oppression of its first conqueror, Cushan-rishathaim, was followed by a generation of "rest."

The name Othniel is a compound with "God" ("El") of a root whose meaning is unknown and appears elsewhere in biblical Hebrew only in the proper name Othni.

Othniel was probably the personal name of a traditional ancestor of a tribe related to that of Caleb, although the blood relationship is not clear. While "Othniel the son of Kenaz, Caleb's younger brother" (Judg. 1:13; 3:9; cf. Josh. 15:17, where "younger" is omitted in the MT), can mean that Othniel was either Caleb's son or his nephew, the latter is evidently intended. According to the Chronicler's genealogy Othniel was Caleb's nephew, for he was the son of Kenaz, and his own sons were Hathath and Meonothai (I Chr. 4:13).

Othniel is most clearly a clan or tribal name in the Chronicler's list of the organization of David's army, where one Heldai "the Netophathite, of Othniel," was to serve as supply officer for the twelfth month (I Chr. 27:15). Apparently Othniel was a younger clan, and Caleb an older, of the tribe of Kenaz or Kenizzites. Whereas tradition named the Kenizzites as being originally Edomite (Gen. 36: 11, 15, 42; I Chr. 1:36, 53), in the Chronicler's genealogies and the Joshua-Judges narratives both Caleb and Othniel are clans of the tribe of Judah. Thus Othniel is a S hero.

This fact may in part account for the preservation of the stories of Othniel and their place in the book of Judges. According to one tradition the N hero, Ephraimite Joshua, in his organized conquest had taken Debir (Josh. 10:38-39). While it is possible that Othniel's heroic deed which won him his bride was the occupation and rebuilding of the site after its destruction by Joshua's army, it is likely that this story is to account for the Judean occupancy of a city close to Hebron, a city which already belonged to the Calebites (15:13-14). That Othniel should marry a near relative, his niece or cousin, occasions no surprise (cf. Abraham and Sarah in Gen. 20:12). The dowry given the bride Achsah by her father, "the upper springs and the lower springs," may have sealed the claim of Othnielites to important sources of water supply in the Negeb claimed by Calebites of Hebron. The identification of the site of Debir or Kiriath-sepher with Tell Beit Mirsim is not undisputed.

The story of Othniel's deliverance of Israel from Cushan-rishathaim stands immediately after the Deuteronomic introduction to the heroes of the book (Judg. 2:6–3:6) as prime example of its philosophy of history (*see* JUDGES, BOOK OF, §§ C1-2). Because of the Lord's anger at their apostasy, the people suffered for eight years under "Cushan of double wickedness." But in response to their cry "the LORD raised up" the deliverer Othniel. After his victory "the land had rest" for a generation, presumably because, until Othniel died, they remained religiously faithful. Othniel is described in terms typical of the judges: he was specially raised up by the Lord; he was a charismatic leader upon whom the Lord's spirit came to meet crises; he "judged Israel"—i.e., presumably rendered case decisions and exercised general oversight; "his hand prevailed over" the oppressor; the result was "rest" for the land. *See* JUDGE.

The story of Othniel as judge may be the fiction of the Deuteronomic editor to place a Judean hero as first judge, particularly since the other judges were all northerners. There are no details in Othniel's story which have the ring of authenticity or antiquity like those in the stories of Ehud, Deborah, Gideon, etc. There is a mystery about Cushan-rishathaim. Nevertheless, Othniel was probably a historical figure who delivered, not "all Israel," but S Judean clans, from a powerful foreign ruler who swept down from the Upper Euphrates region into Judah via the S end of the Dead Sea (cf. the conquest by the four kings in the days of Abraham in Gen. 14).

C. F. KRAFT

OTHONIAH ŏth'ə nī'ə ['Οθονίας]; KJV OTHONIAS —əs. One of the priests with foreign wives mentioned in I Esd. 9:28. The corresponding name in Ezra 10:27 is MATTANIAH (10).

OUCHES [משבצות]. KJV archaism, meaning "settings for precious stones" (Exod. 28:11, 13-14, 25; 39:6, 13, 16, 18; RSV "settings"). The Hebrew word is derived from a verb meaning "to weave," and it probably therefore means a filigree setting. When it is used with זהב, "gold," the RSV reads "settings of gold filigree." H. G. MAY

OUTCAST [*various forms related to* נדח, to thrust, push away]. Most often, the Hebrew equivalents of this word are used to describe the driving out of the people of Israel by the successive waves of attack by the Near Eastern empires of Assyria and Babylonia from the eighth through the sixth centuries B.C. It is never used in the English translations to denote the "outcasts of society." *See* BLINDNESS; FATHERLESS; LEPROSY; POOR; SOJOURNER; WIDOW.

The Hebrew word in its various forms becomes a kind of *terminus technicus* for the DISPERSION of the Jews, seen as the judgment of God upon his people for their unfaithfulness. An important aspect of the OT and later Jewish eschatology is God's ingathering of the "outcasts of Israel" (cf. Ps. 147:2; Isa. 11: 12; 56:8) and their return to Jerusalem.

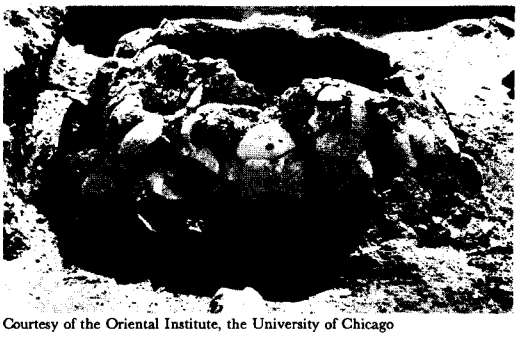
OVEN [תנור; κλίβανος]. Modern baking ovens used by Palestinian peasants do not differ much from the ovens discovered in the ruins of ancient agglomerations or represented on Egyptian and Assyrian paint-



Courtesy of the Oriental Institute, the University of Chicago

17. A typical Iron Age (*ca.* 1200-300 B.C.) oven, from Megiddo, composed of a large bell-shaped vessel of unbaked clay with numerous potsherds plastered around the outside to retain the heat

ings and reliefs. They consist in a cylindrical structure of burnt clay, two to three feet in diameter, at the bottom of which a fire is built on a floor of pebbles (Fig. OVE 17). Once the oven is adequately heated, the ashes are scooped or swept away, and flat cakes of dough are stuck against the inner wall of the oven, or laid to bake on the pebbles. Modern ovens are often sheltered in small bakehouses, erected in the yard of private houses or grouped together in a corner of the village.

The tower defending the NW angle of Jerusalem in Nehemiah's time was called מגדל התנורים, "Tower of the Ovens" (Neh. 3:11; 12:38), because the commercial bakers of the city had their ovens in this vicinity.

The usual fuel burned in the baking ovens was, and still is, dry grass (cf. Matt. 6:30; Luke 12:28), thorny desert bushes, and cakes of dung kneaded with straw and laid to dry on rocky slopes near the ovens. The reference of Ezek. 4:12 to human dung used for fuel was meant to emphasize the abject condition of the beleaguered population.

See BREAD; BAKING. For industrial ovens, *see* FURNACE; POTTER.

OVENS, TOWER OF THE [מגדל התנורים] (Neh. 3:11: 12:38); KJV TOWER OF THE FURNACES. A tower in JERUSALEM (*see* § 7*b*) restored under Nehemiah. It defended the NW angle of the city wall, close to the Corner Gate. It was named presumably for baking ovens established in the vicinity. Fig. NEH 13.

G. A. BARROIS

OVERLAY [חפה; טוח; צפה; תפש; רקע]. There are references to overlaying parts of the tabernacle of the Exodus and the temple in Jerusalem with gold, silver, or bronze. Presumably the overlaying consisted of fastening metal of appreciable thickness—more than the attachment of leaf. Many Egyptian obelisks, pillars, and statues were overlaid with gold. According to I Chr. 29:4, David contributed three thousand talents of gold and seven thousand talents of silver, equal to about sixty million dollars, for overlaying the house of God. When Sennacherib demanded three hundred talents of silver and thirty talents of gold, Hezekiah emptied the treasury of silver and provided the gold by stripping the overlay from the doors of the temple and the doorposts (II Kings 18:16).

In the tabernacle gold was used for overlaying the ark and its poles, the table and its poles, boards of the wooden structure, five pillars of acacia, the altar of incense and its poles, four pillars of acacia, and capitals of the pillars. Bronze was used to overlay the altar and its poles; silver was used for some of the capitals (Exod. 25:11–38:28).

In the temple gold was used to overlay the inner sanctuary, the inside of the house, the whole house, the altar belonging to the inner sanctuary, the cherubim, the floor, two doors of the inner sanctuary, the ivory throne, and the porch (I Kings 6:20-32; 10:18; II Chr. 3:4, 10; 9:17), while bronze was used to overlay the doors of the court of the priests (II Chr. 4:9). Overlaying idols is mentioned in Isa. 40: 19; Hab. 2:19. In I Kings 3:19 KJV a child is said to have died because his mother "overlaid it." RSV has "lay on," which is better.

See ARCHITECTURE; BRONZE; GOLD; SILVER; TABERNACLE; TEMPLE, JERUSALEM.

O. R. SELLERS

OVERSEER [נצח; פקד, פקדה (KJV "officer"); פקיד (RSV "leader" *in* Neh. 12:42; KJV "officer" *in* Gen. 41:34); KJV שטר (Prov. 6:7; RSV "officer"); KJV ἐπίσκοπος (Acts 20:28; RSV "guardian")]. A term designating several types of leaders or supervisors—e.g., the superintendent or foreman of a labor gang. In Egypt they carried long rods for punishment and were hard taskmasters (Exod. 1:11). The Israelites forgot their oppressive overseers, and under David and Solomon they also employed forced labor (II Sam. 20:24). Overseers were used in building and repairing the temple (II Chr. 2:18; 34:13, 17; LXX ἐπίσκοπος for פקיד). In a better sense, Joseph was an overseer (Gen. 39:4-5) and encouraged Pharoah to appoint other overseers for the land (41:34). The leader of the singers after the return from the Exile is called an overseer in the KJV (Neh. 12:42; RSV "leader"). Nehemiah had overseers with him (Neh. 11:9). Ants work willingly without an overseer (Prov. 6:7 KJV; RSV "officer"). The elders in Ephesus are overseers of the church (Acts 20:28 KJV; RSV "guardian"; *see* STEWARD; BISHOP).

In the titles of fifty-five psalms the word נצח occurs ("choirmaster"; KJV "chief musician").

C. U. WOLF

OWL [כוס (*see bibliography; alternately* LITTLE OWL); קפוז (*see bibliography;* Isa. 34:15; KJV GREAT OWL), *cognates in* Aram., Arab., to jump; KJV בת היענה (RSV OSTRICH), ינשוף (RSV GREAT OWL)]. Any one of a group of birds of prey of the order Strigiformes (the Strigidae family being the commonest), of from small to medium size, mostly of nocturnal habits. There are *ca.* two hundred species.

Undoubtedly owls were known in the biblical world; Tristram testifies that in his time eight varieties were found in Palestine, of which five were quite plentiful. A priori we should therefore expect

owls to be mentioned in a list of raptorial birds. There is, however, little or no evidence to support the identification of a particular species of owl with any Hebrew word in the OT. כוס may be the Little Owl (*Athene noctua lilith*), which is the commonest of all the owls which Tristram found in the Holy Land. קפוז may be the diminutive screech or scops owl (*Otus scops*), which abounds around Palestine's ruins and caves; in Isa. 34:15 it is associated with desolated Edom. The barn owl (*Tyto alba*) is said to be "as common in Palestine as in England" (Tristram), but whether it is ever referred to in the OT is uncertain.

Bibliography. On כוס, see J. B. Pritchard, ed., *ANET* (2nd ed., 1955), p. 92, col. 2, line 31. On קפוז, cf. Tristram *NHB* 227-28; C. C. Torrey, *Second Isaiah* (1928), pp. 292-94; G. R. Driver, *PEQ* (May, 1955), p. 136. W. S. McCULLOUGH

OX (PERSON) ōks [Ὦξ; Vulg. *īdox; cf.* עץ *in* Gen. 22:21] (Jth. 8:1). Descendant of Israel; father of Merari; grandfather of Judith. J. C. SWAIM

OX [אלף (*only in plural*); שור, Aram. תור (Ezra 6:9, *etc.*); בקר (*usually collective*); פר, young bull, *cf.* Ugar. *prt,* young cow; Arab. *purār,* young (of sheep, goat, cow); βοῦς, *cf.* Sanskrit *go, gaus,* ox, cow; μόσχος, young shoot, *hence* CALF; ταῦρος (*some assume a Semitic derivation, see* שור *above; others derive from* Sanskrit *sthūra,* strong, *or sthūras,* bull)]. Alternately: BULL (שור; בקר; פר; ταῦρος), KJV BULLOCK; HERD, HERDS (בקר); CALF (μόσχος); OX (μόσχος; Rev. 4:7). A domesticated horned quadruped of the genus *bos,* believed to come from *bos primigenius,* the WILD OX; especially the adult castrated male of this species. The oxen of biblical Palestine were presumably akin to those of Mesopotamia and Egypt. Figs. OX 18; CAR 15-16; FAM 2.

18. The Apadana stairway at Persepolis, showing Babylonian and Syrian tribute-bearers; time of Xerxes (486-465 B.C.); showing use of ox, camel, and horse

1. As a draught animal
2. As food
3. As a sacrificial animal
4. As a form of property
5. Decorative and symbolic uses

1. As a draught animal. Oxen pulled wagons (Num. 7:3; II Sam. 6:6), drew the plow (Deut. 22:10; I Sam. 11:5; I Kings 19:19; Job 1:14; Prov. 14:4; Isa. 30:24; Amos 6:12), and dragged the threshing sled (Deut. 25:4; cf. I Cor. 9:9). They were to be rested on the sabbath (Exod. 23:12; Deut. 5:14) and were subject to the law of firstlings (Exod. 34:19; Lev. 27:26). They usually fed on such grass as was available (Num. 22:4; Job 6:5; 40:15; Ps. 106:20; Dan. 4:25), but they also ate straw, perhaps when pasturage was poor (Isa. 11:7). An ox might be kept in a stable (Luke 13:15). Its dung could serve as fuel for cooking (Ezek. 4:15). A number of regulations pertinent to oxen (goring, injuries, theft, illegal grazing, etc.) are found in Exod. 21:28–22:15—H 22:14.

2. As food. Although the ox was a clean animal and could be eaten (Deut. 14:4), its flesh was not a common article in the diet of the Hebrews. It was only on special occasions that oxen were slaughtered (I Sam. 14:31-34; I Kings 1:19; Prov. 15:17; Isa. 22:13; Matt. 22:4), though royalty and people of importance may have had beef more frequently (I Kings 4:23—H 5:3; Neh. 5:18; Amos 6:4).

3. As a sacrificial animal. The use of oxen as sacrificial victims was well known in the ancient Near East (cf. Acts 14:13), and Israel's offerings of oxen to Yahweh therefore occasion no surprise. From Exod. 20:24 we may conclude that among the Hebrews this practice went back at least as far as the days of earth altars (cf. Lev. 3:1; 9:4; 22:23; Num. 7:88; etc.). *See* SACRIFICE AND OFFERINGS.

4. As a form of property. The possession of an ox, like that of an ass, was almost the bare minimum for existence (Job 24:3; cf. Exod. 20:17). On the other hand, herds of oxen, sheep, and goats were the mark of wealth and social position (Gen. 12:16; 32:5; II Sam. 12:2; Job 1:3; Eccl. 2:7), and were fair prey for enemies (I Sam. 15:9; 27:9; Job 1:14-15; Jer. 5:17; 49:32).

5. Decorative and symbolic uses. The molten sea of Solomon's temple rested upon the backs of twelve bronze oxen (I Kings 7:25), and the ten bronze lavers had lions, oxen, and cherubim on their panels (vs. 29). Oxen and other animals were often associated with deity in Western Asia, the ox doubtless because of its strength and the bull of the ox as a symbol of fertility (*see* CALF, GOLDEN). In Ezekiel's vision each cherub has four faces, one of which is that of an ox (1:5-10; cf. 10:14). This has influenced Rev. 4:6-11, where each of the creatures surrounding the heavenly throne has only one face, one having that of an "ox" (KJV "calf"). W. S. McCULLOUGH

OX-GOAD. *See* GOAD.

OXYRHYNCHUS SAYINGS OF JESUS ŏk′sĭ-rĭng′kəs. Four fragments of papyrus and parchment found in the rubbish mounds of Oxyrhynchus and containing several sayings attributed to Jesus.

The ancient site Oxyrhynchus (modern Behnesa), 125 miles S of Cairo and 10 miles W of the Nile, has been since 1897 a treasure chest of ancient texts of all sorts, literary and nonliterary, dating from the first to the ninth century. Eighteen volumes under the title *Oxyrhynchus Papyri* (1897-1941), edited by

Grenfell and Hunt and their successors, have made available to scholarship this amazing welter of materials from the past. Among these finds are four, all small and badly mutilated, containing sayings purporting to be from Jesus.

The first of these, Oxyrhynchus Papyrus 1—so named because it was the first item in the initial volume—was discovered in 1897. It is a fragment of the leaf of a papyrus codex (not a roll); bears the folio symbol 11 on the verso; and contains eight (seven?) sayings, of which all but one are in part decipherable. They are not part of a continuous discourse but rather appear as an unconnected series of separate sayings, each preceded by the expression "Jesus saith." While several of these sayings are distinctly similar to those in the canonical Matthew and Luke, three (2-4) are distinctly different. Two of them, as reconstructed by Evelyn White (*see bibliography*), read: "Jesus saith: If ye fast not from the world, ye shall not find the kingdom of God, and if ye keep not sabbath for the whole week, ye shall not see the Father." "Jesus saith: . . . Lift up the stone and thou shalt then find me; cleave the wood and I am there."

Oxy. P. 654, discovered in 1903, contains five words of Jesus, after a short prologue. It is a very badly preserved fragment of a papyrus roll and contains forty-two lines written on the verso of a survey list of various pieces of land. Since the entire right half of the column is lost, only the first half of each short line is decipherable, while after line 31 the beginnings of each of the remaining lines are increasingly badly marred, with the result that in the last line only two letters are preserved. Despite these extensive lacunae, various editors have attempted valiantly and, at times, perhaps a bit rashly, to fill in the gaps with conjectural restorations. Since conjectural emendation is at best highly subjective, it is not surprising that no two editors agree in their final results. Following the prologue, which Evelyn White restores to read: "These are the life-giving Sayings which Jesus spake who liveth and was seen of the Ten and of Thomas. And He said to them: Whosoever heareth these Sayings shall not taste of death," comes a word similar to one quoted by Clement of Alexandria as standing in the Gospel According to the Hebrews (*see* HEBREWS, GOSPEL ACCORDING TO THE): "Let not him that seeketh cease seeking till he find, and when he findeth he shall marvel, and having marvelled he shall reign, and having reigned he shall rest." Others of the sayings, so far as they can be restored by conjecture, appear to be expanded and reworked versions of canonical words, notably Matt. 7:7; 10:26; Luke 17:20-21, and with no marked doctrinal deviations.

Oxy. P. 655 is a broken leaf of a papyrus roll, apparently quite distinct from 654. The second column is very badly mutilated—only twenty-two letters are preserved—but appears to be a sort of free adaptation of Luke 11:52. The first column concerns the lilies of the field and is strongly reminiscent of Matt. 6:25, 28. It concludes with the surprising statement: "His disciples say unto him, When wilt thou be manifest unto us and when shall we see thee? He saith, When you have put off your raiment and are not ashamed," which is similar to the citation in Clement of Alexandria from the Gospel According to the Egyptians. *See* EGYPTIANS, GOSPEL ACCORDING TO THE.

The fourth fragment (Oxy. P. 840) was discovered in 1905. It is a parchment leaf of a Lilliputian codex, written on both sides and containing forty-five lines in a very tiny hand. E. Preuschen (*see bibliography*) plausibly conjectured that the codex was a sort of

Courtesy of the Egypt Exploration Society

19. Oxyrynchus papyrus with new "sayings of Jesus," belonging to the third century A.D.

amulet which Chrysostom (*Hom. de Statuis* XIX.4) reports women and children were accustomed to wear about their necks to keep off evil spirits. The first seven lines are apparently the conclusion of a speech by Jesus in Jerusalem to his disciples, exhorting them to avoid the example of certain wrongdoers and warning them of the penalties awaiting such in this world and the next.

Then follows an animated conversation between Jesus and a (the?) pharisaic chief priest, named Levi, regarding the proper way to achieve true purity. The priest had chided Jesus for walking with his disciples "in this holy place among these holy vessels," without first bathing and without having had his disciples wash their feet. In answer to Jesus' reply and his query as to Levi's own purity, the latter assures Jesus that he had bathed in the pool of David, descending by one set of stairs into the pool and emerging by the other. Then Jesus (styled in this fragment the Savior) assured him that this sort of bathing in waters "into which, night and day, dogs *and swine* are cast," was useless, was in fact essentially the sort of useless prettying of himself which harlots and flute girls made use of. "But I and my disciples, of whom thou sayest, that we are not washed, have been washed in living waters which came down from God out of heaven." Appraisals of this not uninteresting story have varied widely. Many, following an early criticism of it by E. Schürer (*see bibliography*), not unplausibly regard it as a far from authentic fiction produced by one utterly ignorant of Jewish practices. Jeremias, on the other hand (*see bibliography*), valiantly, but not convincingly, discounts these objections and considers it not unlikely as an accurate portrayal of an actual incident in the life of Jesus. While few have gone so far, many regard 840 and 655 as fragments of noncanonical gospels; but there has been no agreement as to which gospels. Since there seems no way of identifying the source, guesses are at best futile. While 1 and 654 have been commonly regarded as distinct, with the former perhaps a few decades earlier, Evelyn White considers them parts of the same work and with 654 preceding 1. Of course, since 1 is a leaf of a codex and 654 part of a scroll, he does not consider these two fragments parts of the same MS but rather argues that they are parts of two copies of the same collection, which collection he is strongly inclined to identify as the Gospel According to the Hebrews. Because of our so scanty exact information of these long-lost gospels and because of the extremely fragmentary condition of these tiny remains, which makes all restoration open to the danger of subjective slanting, it seems wiser not to attempt such precise identification. That they evidence a clear knowledge of and dependence upon the canonical gospels—not omitting the Gospel of John, as many critics have sought to do—can scarcely be denied. That imagination and the readiness to embroider and expand canonical stories are a more likely source for these novel touches than is "oral tradition" would seem very probable. A date in the third century for all four fragments would seem to be the most likely. Fig. OXY 19.

Bibliography. M. R. James, *The Apocryphal NT* (1924), pp. 25-32, provides a restrained survey of these four fragments from Oxyrhynchus, together with other fragments discovered elsewhere. The classic edition, as mentioned above, is B. P. Grenfell and A. S. Hunt, *Oxyrhynchus Papyri* (1897-1924). In addition, H. G. Evelyn White, *The Sayings of Jesus from Oxyrhynchus* (1920); J. Jeremias, *Unbekannte Jesusworte* (1948), will be found of value to the general reader as well as to the specialist; both provide a wealth of additional bibliographical data. See also: E. Preuschen, "Das neue Evangelienfragment von Oxyrhynchos," *ZNW*, 9 (1908), 1-11; E. Schürer, *TLZ*, 33 (1908), 170 ff. M. S. ENSLIN

OZEM ō′zəm [אצם]. **1.** The sixth son of Jesse; therefore the brother of King David (I Chr. 2:15).

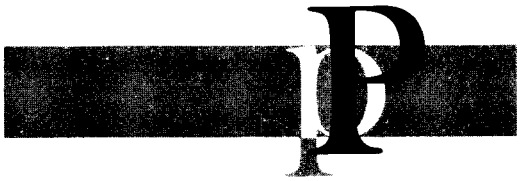
2. A descendant of Judah, and the fourth of the five sons of Jerahmeel (I Chr. 2:25).

OZIAS ō zī′əs. KJV form of UZZI 1 (II Esd. 1:2); UZZIAH 3 (Matt. 1:8-9); UZZIAH 6.

OZIEL ō′zĭ əl ['Οζιήλ; Vulg. *Oziae*]. An ancestor of Judith (Jth. 8:1).

OZNI ŏz′nī [אזני, my hearing(?)] (Num. 26:16); OZNITES —nīts. A member of the tribe of Gad, named in the second census taken by Moses in the wilderness. He is the eponymous ancestor of the "family of the Oznites."

OZORA ō zôr′ə. KJV Apoc. form of EZORA.



P. The designation of the so-called Priestly source of the PENTATEUCH. To this source are assigned most of the liturgical, genealogical, legal, and technical materials, connected by a bare minimum of narrative. The Priestly compilation is usually dated after the Captivity, in the sixth or fifth century B.C. *See* DOCUMENTS. D. N. FREEDMAN

PAARAI pā′ə rī [פַּעְרַי] (II Sam. 23:35). An Arbite who was a member of the Mighty Men of David known as the "Thirty." In the parallel list he is called Naarai the son of Ezbai (I Chr. 11:37). It is possible that the original name was Naarai the Arbite (cf. Josh. 15:52). E. R. DALGLISH

PADDAN-ARAM păd′ən âr′əm [פַּדַּן אֲרָם]; KJV PADAN-ARAM pā′dən —. Alternately: PADDAN păd′ən (Gen. 48:7); KJV PADAN pā′dən. The homeland of the patriarchs (Gen. 25:20; 28:2; cf. 48:7) in N Mesopotamia (now S central Turkey). It included the city of HARAN. In the patriarchal period (which the constantly accumulating evidence tends to place in the TELL EL-AMARNA Age), Paddan-aram had an Aramean population attached to cities, although the citizens frequently owned cattle that grazed on fairly distant ranges. Some communities there, like Ur of the Chaldees (which can no longer be identified with the Sumerian city of Ur), were devoted to foreign trade; and recently published texts exchanged between the Hittites and Ugarit indicate clearly that the Hebrew patriarchs pursued trading interests abroad in Canaan and Egypt.

The language of Paddan-aram was Aramaic (Gen. 31:47), and the members of the patriarchal family who remained there are called Aramean (e.g., Gen. 31:24). C. H. GORDON

PADDLE. KJV translation of יתד, "peg" (RSV STICK) in Deut. 23:13. The instrument, along with (cf. KJV "upon") one's weapons, was to be used to dig a hole for latrine purposes. The word "paddle" is here used in its English dialectic sense to refer to a spadelike digging instrument with a narrow blade.
H. G. MAY

PADON pā′dŏn [פָּדוֹן; Apoc. Φαδών] (Ezra 2:44; Neh. 7:41; I Esd. 5:29); KJV Apoc. PHALEAS fə lē′əs. A family of temple servants in the postexilic period. *See* NETHINIM.

PAGANS. The translation of ἔθνος in I Cor. 5:1; 10:20. *See* NATIONS.

PAGIEL pā′gĭ əl [פַּגְעִיאֵל, fortune of God(?), *or* God is entreated(?), *or less probably* God has met (his worshiper)]. Leader of Asher; son of Ochran (Num. 1:13; 2:27; 7:72, 77; 10:26). He was one of twelve tribal leaders or deputies who assisted Moses in taking a census of Israel and in other tasks in the wilderness.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 254; W. F. Albright, "Ostracon No. 6043 from Ezion-Geber," *BASOR,* LXXXII (1941), 13.
R. F. JOHNSON

PAHATH-MOAB pā′hăth mō′ăb [פַּחַת מוֹאָב, governor of Moab]; KJV Apoc. PHAATH MOAB fā′ăth — in I Esd. 5:11. An officer or ruler in Moab; evidently a Hebrew (cf. II Sam. 8:2, where Judah rules Moab under King David), whose title now designates a family or clan presumably descended from him. The latter is represented among the exiles returned from Babylon (Ezra 2:6; cf. Neh. 7:11; Ezra 8:4; I Esd. 5:11; 8:31), and several members of the clan are listed among those who had married foreign wives in the time of Ezra (Ezra 10:30; absent in I Esd. 9:31). One Hasshub, who aided Nehemiah in repairing the wall of Jerusalem, was of this clan (Neh. 10:14).

Bibliography. L. W. Batten, *Ezra and Nehemiah,* ICC (1913), p. 80. B. T. DAHLBERG

PAHLAVI pä′lə vē′; also, less correctly, PEHLEVI pā′lə vē′. The official language of the Sassanian state (*ca.* A.D. 225-651; *see* PERSIA §§ C2, D6); chronologically and geographically that variety of Middle Iranian which is the continuation of Old Persian (*see* PERSIAN, OLD) and the ancestor of New (or Modern) Persian. Etymologically the name is the regular descendant of the Old Persian word *parθava,* "Parthian."

1. Language. The written language is known from such sources as (*a*) legends on coins, seals, and intaglios; (*b*) inscriptions dating from the third and fourth centuries A.D., some of which possess parallel versions in (Middle) Parthian and Greek; (*c*) fragments of translation of the Psalms from the seventh century A.D.; (*d*) papyri; and (*e*) dipinti discovered in the synagogue in Dura-Europos on the Euphrates, to mention only the most important. The Manichean fragments found in Turfan form another highly important source. *See* MANICHEISM.

The main bulk of Pahlavi language materials is to be found, however, in what has been preserved of Sassanian literature, most of which is of a religious and theological nature (*see* PERSIA § C2). These texts are written in an alphabet of Aramaic origin. This script is ambiguous to the extent that some symbols resemble one another so much that in the cursive script they become identical. In such cases the only way to establish the correct reading is the context. Another difficulty resides in the frequent use of so-called ideograms or heterograms, a system by which

for reasons of convenience or otherwise Aramaic words are substituted in the writing for the corresponding Pahlavi terms. There exists adequate evidence to show that in reading the written text only the Pahlavi words were used. The technical term for this system of "translation" by the scribe from Pahlavi into Aramaic and by the reader of the written text from Aramaic into Pahlavi is *uzvārišn*, "understanding, interpretation." Although Aramaic is known to have been widely used during the Achaemenian Empire (521-330 B.C.) for administrative purposes, it is somewhat uncertain to which period the systematic use of the Aramaic "masks" is to be ascribed. In later times Zoroastrian scholars tried to facilitate the often puzzling sacred texts by replacing the Aramaic words by their Pahlavi counterparts in phonetic writing. This kind of "transliterated" text is called *Pāzand* or *Pārsī*.

In spite of the existence of lists in which the Aramaic and Pahlavi words are given side by side, these technical handicaps, together with the lack of reliable text editions and translations, account for slow progress in Pahlavi studies. Caution is, therefore, recommended in using the existing translations, most of which, in addition, are dated.

2. Literature. In all cases where it is at all possible to date the existing Pahlavi books it appears that they were not committed to actual writing until after the Muslim conquest of Iran in the middle of the seventh century. In matter they contain elements from different chronological periods, some as early as pre-Archaemenian times, but molded into the orthodox shape established under the Sassanians.

Of the more important religious-theological books the following deserve to be mentioned: (*a*) the so-called *Bundahishn* or, more correctly, *Zandāgāhīh*, "exposition of information (as provided by the Pahlavi version of the Avesta)," a work on cosmology, written toward the end of the Sassanian period, in which the teachings of the Avesta on the subject were brought together; (*b*) *Dēnkart*, the longest and, perhaps, most important of the Zoroastrian texts, a work of theological and philosophical subject matter including many topics of a miscellaneous nature (history of the Avesta, legendary materials on Zarathushtra), while some passages show evidence for the success of the efforts of Shapur I (A.D. 239/241–70/73) for the promotion of foreign, both Greek and Indian, science and knowledge (astronomy, astrology, medicine, physics, grammar, philosophy, etc.); (*c*) *Shkand-gumānīk vičār*, "doubt-dispelling solution," an apologetic treatise of Zoroastrian doctrines against other religions.

Of a less strictly religious tenet are: (*d*) the so-called *handarz* ("counsel") or *pand-nāmak* ("book of advice") texts, collections of practical wisdom; (*e*) *Shāyast-nē-shāyast*, "(what is) proper (and) improper," a collection of ritual regulations and customs; (*f*) *Artāy Virāf Nāmak*, the "book of Artāy Virāf," an account of Artāy Virāf's journey to the nether world and his description of heaven and hell; (*g*) texts of an apocalyptic nature, such as the *Žāmāsp Nāmak*, the "book of Žāmāsp," containing the prophecies on the end of the age of Zarathushtra as given by the wise minister Žāmāsp; (*h*) *Mādiyān ī hazār dātastān*, the "record of thousand verdicts," dealing with law and jurisprudence.

Of a secular strain are: (*i*) *Draxt ī asūrīk*, the "Assyrian [i.e., Babylonian or palm] tree," a dispute between the palm tree and the goat on the respective qualities and virtues of the two contestants; (*j*) *Husrav ut rētak*, "(king) Husrav and the page," a discussion between the Sassanian king of that name and a page on the luxuries and elegancies of Sassanian court life; (*k*) *Abyātkār ī Zarērān*, the "memorial of Zarēr," an epical story of the dealings of King Vishtāspa (*see* ZARATHUSHTRA) and his general Zarēr with their enemies; (*l*) *Kārnāmak ī Artaxshēr ī Pāpakān*, the "book of the exploits of king Artaxshēr (Ardashīr)," on the epical feats of that king (*see* PERSIA § D6*a*); (*m*) *Shahrastānīhā ī Ērān*, the "cities of Iran," a work of geographical nature.

From this incomplete survey it appears that Sassanian literary activities extended over the fields of religious and secular literature. While attempting an evaluation of its literary value and utilizing this literature for the reconstruction of a picture of Sassanian religion and civilization, it should be kept in mind that only a presumably small portion of a once vast literature has survived.

PAINT. 1. For cosmetic paint, *see* EYE PAINT; COSMETICS §§ 2, 4.

2. Liquid color applied to buildings or articles. The biblical references to paint and painting are comparatively few, perhaps because of the prohibition of image-making in the Decalogue.

In Palestine as early as the Neolithic period walls of houses in Jericho were painted, and in the Chalcolithic period designs and scenes were painted on the walls of houses in Teleilat el-Ghassul. At Megiddo in stratum VIIA (*ca.* 1200 B.C.) the mud-plaster walls of a palace court were painted, and there were traces of design in blue, green, red, yellow, black, and white. In the descriptions of Solomon's temple no painting is mentioned. In the second temple, according to the Mishna (Middoth III.1), a red line was painted around the altar of burnt offering, halfway up, to direct the sprinkling of the blood. According to Jer. 22:14, Jehoiakim decorated his palace by "painting it with vermilion" (משוח בשׁשׁר). This decoration may have been influenced by the palaces in Egypt and Assyria, which were painted within. In condemning idolatry in Jerusalem, Ezek. 8:10 tells of animals and idols "portrayed" (מחקה; lit., "carved") on the wall of a secret place in the temple. In both Egypt and Assyria animal gods were carved on the walls in bas-relief and painted. Ezek. 23:14 refers to bas-reliefs of Chaldeans "portrayed in vermilion."

The attackers of Nineveh (the Medes and Babylonians) had reddened shields (Nah. 2:3—H 2:4), either painted or, if leather, perhaps dyed.

Painting on pottery, though not mentioned in the Bible, was widely practiced in the Near East. In Palestine the painting of designs and figures on pottery became common in the Early Bronze period; rose to a climax in a bichrome painted decoration with friezes divided into panels, and with bird, fish, tree, and geometric patterns, such as found at Lachish, Megiddo, Tell el-Ajjul, and elsewhere, and belonging to the Late Bronze I period (*ca.* 1500 B.C.); and declined after the Israelite invasion. *See* POTTERY.

In passages on the folly of idolatry the Wisdom of Solomon describes making an image and "smearing it with vermilion" (καταχρίσας μίλτῳ; 13:14; RSV "giving it a coat of red paint"), and an idol spotted with various colors (15:4). In Egypt, where this book originated, most of the statues of gods in wood and softer stones were painted. In a comparison between historiography and housebuilding II Macc. 2:29 refers to painting (ζωγραφεῖν) a house with figures. IV Macc. 17:7 speaks of how moving a painting of the martyrdom of some pious Jews would be, but indicates that such painting (same root as above) would be a transgression against the law of God.

In Tulul Abu el-'Alayiq, a suburb of Jericho, the houses of the rich were painted to imitate marble, as in contemporary Pompeii. Some Galilean synagogues of the third century A.D. and the synagogue of Dura-Europos of the same period were painted with figures, but it is uncertain whether the synagogues which Jesus attended were so decorated. *See* ARCHITECTURE § 3; HOUSE.

PALACE.

1. Terminology. Though there is no Hebrew or Greek word meaning "palace" in the strict sense, the residence of a sovereign or a high dignitary, words or expressions obviously referring to such edifices are translated "palace" in the English versions. Some words translated "palace" in the KJV are translated otherwise in the RSV, while some words translated "palace" in the RSV are translated otherwise in the KJV.

The word אפדן, of Persian origin (Old Persian *apa-dāna; see* HALL § 4), meaning "armory" or "treasury," means "palace" in Akkadian and Syriac and so is taken in Dan. 11:45 KJV—אהלי אפדנו, "tabernacles of his palace" (RSV "his palatial tents"). ארמון, "high building," is translated "palace" in some passages (e.g., II Chr. 36:19; Isa. 23:13); while in others the KJV has "palace" and the RSV uses other terms, such as "citadel" (I Kings 16:18; II Kings 15:25, where KJV "palace of the king's house" is redundant), "tower" (Ps. 122:7), and "stronghold" (Isa. 34:13; Amos 1:4, 7, 10, 14). בירה, a late word designating an important building or city, is taken as "palace" in I Chr. 29:1, 19. Elsewhere, when it is translated "palace" in the KJV, it is in the RSV "castle" (Neh. 7:2) or "capital" (Ezra 6:2; Neh. 1:1; Esth. 1:2, 5; 2:3, 5; etc.; Dan. 8:2). בית, meaning "house," is translated "palace" in the KJV only in II Chr. 9:11, where בית המלך is "king's palace." Elsewhere the KJV generally translates בית by other words, such as "house," "household," "place." In the RSV where the reference is clearly to the king's house, the translation frequently is "palace" (e.g., I Kings 4:6; II Kings 10:5; II Chr. 2:1), though occasionally the RSV is satisfied with "house" (e.g., Gen. 12:15; Jer. 39:8). ביתן, from the same root, is translated "palace" (Esth. 1:5; 7:7-8). היכל (Assyrian *êkallu;* Ugaritic *hkl;* from Sumerian *e-gal,* "great house") generally means "temple," but in fifteen OT passages (e.g., I Kings 21:1; Isa. 39:7; Dan. 1:4) it is translated "palace." הרמון (Amos 4:3) is "palace" in the KJV, but merely transliterated "Harmon" in the RSV; the meaning is uncertain. טירה (Syriac *ṭiyarâ;* Arabic *ṭiwâr*), "palace" in the KJV, in the RSV is "battlement" (Song of S. 8:9) and "encampment"

(Ezek. 25:4). In the NT αὐλή, primarily meaning "court," is "palace" in Matt. 26:3; Luke 11:21. Where the KJV has "palace" in Matt. 26:58, 69; Mark 14:54, 66, the RSV has "courtyard" and in John 18:15 "court." In Mark 15:16 the KJV has "hall," and the RSV surprisingly "palace." In Phil. 1:13 πραιτώριον is "palace" in the KJV and "praetorian guard" in the RSV.

2. Foreign palaces. There are some biblical references to foreign palaces, such as the houses of Pharaoh (Gen. 12:15), Nebuchadnezzar (Dan. 1:4; 4:4), Belshazzar (Dan. 5:5), Darius (Dan. 6:18), Ahasuerus (Esth. 1:5, 8), Artaxerxes (Ezra 4:14). The commercial and political relations which Israel and Judah had with Mesopotamia and Egypt must have acquainted a number of Hebrews with the palaces of these countries. In Palestine excavations have uncovered foundations of large Bronze Age buildings, as at Tell Beit Mirsim, Lachish, and Ai, so imposing that apparently they were palaces of rulers.

3. Palaces of the Hebrew kings. Excavations at Tell el-Ful, Saul's Gibeah, show strong fortifications, but give little evidence of luxurious living quarters. David's dwelling in Jerusalem must have been imposing for its time; for it was built with cedar by carpenters and masons sent by Hiram king of Tyre, and it housed a considerable number of wives, concubines, servants, children, and guards (II Sam. 5:11-15). Solomon's palace was more elaborate, also built by Hiram's artisans and containing a large amount of cedar hewn in Lebanon. According to I Kings 7:1-12, the "House of the Forest of Lebanon" was a hundred cubits long, fifty cubits wide, and thirty cubits high (*see* HALL § 2).* The royal dwelling quarters were adjacent, and there was a separate house for one of the wives, Pharaoh's daughter. Presumably subsequent kings of Judah occupied Solomon's palace. Both David's and Solomon's palaces seem to have survived, at least in part, the destruction of Jerusalem in 587 B.C. (Neh. 3:25); but so thorough was the destruction by Titus in A.D. 70 and Hadrian in A.D. 135 that no remains of these palaces have been found. During Solomon's reign probably imposing residences were built for some of his local governors. One such building, which may be called a palace, was uncovered at Megiddo. Figs. HOU 32-33; MEG 34.

In Israel, Jeroboam and his successors must have had palaces. Zimri at the end of his seven-day reign in Tirzah died by burning the king's house over him with fire (I Kings 16:18). Zimri's conqueror and successor Omri started the building of a palace on the hill Samaria, where he founded his capital. It seems that the palace was extended by his son Ahab. Excavators have found a large number of ivory inlays from this palace, which doubtless was the "ivory house" built by Ahab (I Kings 22:39) and explains the "houses of ivory" and "beds of ivory" of Amos 3:15; 6:4 (*see* SAMARIA § 2*a*). Ahab also had a second palace in Jezreel (I Kings 21:1). The palace in Samaria, with the city, was destroyed by the army of Sargon II in 722/21 B.C.

4. Hellenistic and Roman period palaces. After the Exile the rulers in Jerusalem had special houses (Neh. 2:8). Jason the high priest, at the instigation of Antiochus Epiphanes, built a Greek gymnasium "under the citadel," presumably attached to his residence (II Macc. 4:12). The Hasmoneans, after gaining power in Palestine and coming into the high priesthood, had their palace in Jerusalem, near the temple. Simon is said to have repaired "the house" (Ecclus. 50:1).

1. General view showing the three levels of the rock on which Herod's palace was built at Masada

Herod the Great, on becoming king of the Jews, inaugurated a large program of building. In Jerusalem he erected his magnificent palace in the NW of the city with its three towers: Phasael, Hippicus, and Mariamne (*see* JERUSALEM § 10). At Jericho (Tulul Abu el-'Alayiq, a mile W of modern Jericho) he built another palace (Jos. War I.xxi.4), which on his death was burned by his former slave Simon (Jos. Antiq. XVII.x.6). Excavations in 1950-51 indicated the opulence of this, which doubtless was a winter residence. Another palace was at MASADA, on the W cliffs by the Dead Sea, where Herod took refuge in 40 B.C., when the Parthians seized Jerusalem (Fig. PAL 1). An expedition there in 1955 and 1956 showed formidable buildings with an elaborate system of cisterns.

References in the NT (Matt. 26:3, 58, 69; Mark 14:54, 66; John 18:15) make it clear that in Jesus' time the high priest, though there was a Roman governor, had a palace.

For the question of the palace used by Pilate at the trial of Jesus *see* PRAETORIUM.

PALESTINE, CLIMATE OF păl′ə stĭn. Many references in the Bible to phenomena of weather and climate can be understood more clearly in the light of modern meteorological observations and theory. Though the possibility of climatic change must be considered, the basic factors remain the same. Narratives in which weather conditions are important to the story; figures of speech which make use of weather terminology; the distinctions in translation between related terms for cloud, storm, wind, and rain gain interest as they are read against the background of elementary meteorology.

Bibliography

1. Weather and climate. The climate and weather phenomena of Palestine can be properly described and understood only in a larger meteorological context. By "climate" is meant the characteristic weather of a locality or region over a period of time, including its occasional deviations from the usual pattern. "Weather" is the condition and behavior of the atmosphere as experienced at a particular time and place, with its attendant phenomena of atmospheric pressure and humidity, heat or cold, clear or cloudy skies, wind, precipitation, and visibility. These phenomena are the product of the interaction of three principal factors: (*a*) the warming or cooling of the atmosphere by contact with the earth, or by its own vertical movement; (*b*) the presence in it of water vapor evaporated from large bodies of water, or of fine dust and salt particles picked up by the wind from land and sea; and (*c*) the restless, ceaseless movement of the air in streams and eddies. The horizontal movement of the air manifests itself as wind, and the vertical movement produces clouds and rain.

Changes of climate are measured in millenniums. Weather, on the other hand, particularly in middle latitudes, is subject to frequent and sudden changes. Local weather is profoundly affected by the movement across the surface of the globe of vast air masses, homogeneous in temperature and humidity, which circle slowly—in the Northern Hemisphere in a clockwise direction—round a center of high barometric pressure. An air mass may be cold and moist, cold and dry, warm and moist, or warm and dry, depending on its region of origin. Cold, moist air, e.g., comes to Palestine in winter from the North Atlantic, modified somewhat by its passage across the Mediterranean. Warm, dry air comes from the North African deserts in the van of spring and autumn storms. Where air masses of different characteristics meet (at a "front"), they do not mix, but clash, producing counterclockwise eddies of low pressure. These counterclockwise eddies or "cyclones" are usually accompanied by cloud, wind, and precipitation.

2. Factors in the Palestinian climate. The first factor which contributes to the climate of a particular region is its latitude, since this determines the amount of heat received directly from the sun while the sun is shining, as well as the length of the day and of the seasons. Palestine lies between 31′15″ and 33′15″ N latitude, in the same latitude as the state of Georgia. It is thus on the N margin of the subtropical zone, and, with the shift southward of the zones in winter, it is invaded by the atmospheric disturbances of the temperate zone. Hence it is a land of two seasons—a summer which is sunny, warm, and almost rainless, with moderate, regular winds, and a winter which is mild to cool, and intermittently wet and stormy. The brief transitional periods between summer and winter bring the "former and the latter rains" of the Bible, which are, in fact, but the first and last installments of the winter rains. In these periods, also, the hot, dry winds of the khamsin or sirocco raise the temperature often to its highest point in the year.

The second element to be considered is the effect of the principal currents and eddies of the global atmosphere. In summer the circulation in the E Mediterranean is sluggish, because it is midway between the monsoon low over Southern Asia and high pressure centered in the Atlantic. The steady "Etesian winds" from the NW are part of the monsoon circulation. There are no "frontal" storms, because there is no cold air to clash with the warm; and there are no convection thunderstorms, because the upper air is dry and warm. But, beginning with autumn and continuing more intensely in winter, cold maritime air pushes into the Mediterranean basin from time to time; as this clashes with the tropical air mass, eddies of low pressure are created which travel along the front between the two. The eddies create storms of wind and rain. Ahead of them the air is warm, and behind them it is cold. Sometimes cold, dry air spreading out from the winter high pressure in Central Asia is able to pass the mountain barriers to the N and sweep down over Palestine.

The third factor is the location of the country in relation to large bodies of water and large areas of land. Since the former grow cool or warm more slowly than the latter, the daily and annual range of temperature is much less in maritime than in continental climates. Palestine again is on the margin between the two. Warm, moist air covers the low coast line in summer, and the winter rains come from across the sea. But the rains do not penetrate far inland beyond the barrier of the double range of mountains which lies across their path. To the E, S, and SW are deserts of the subtropical zone, and these too affect the climate of the land. Rainfall decreases from the coast inland, and from N to S. The wilderness of Judea is itself a desert, as is the

Negeb or southland. Indeed, the inhabitants of Palestine live always precariously on the desert's edge, by the grace of God and of the sea. The proximity of the Mediterranean means more than the gift of rain; there is also the dew deposited by the moist air of summer when the land cools at nightfall, and also the sea breeze which mitigates the daytime heat.

The fourth element in climate is regional and local—the nature and covering of the terrain, its elevation and the angle of its slope, the presence or absence of lakes and large rivers, as well as irregularities of contour which modify the general air movement and give rise to local winds. Two physical features of Palestine are important in this connection: the strongly marked lines of relief running N-S, roughly at right angles to most of the rain-bearing storms, and the abrupt changes in altitude and in the nature of the terrain. The result is that striking climatic differences are found within short distances. The annual rainfall at Jerusalem averages 26.1 inches, whereas fifteen miles to the E, near the Dead Sea shore, it is only 3.4 inches, and the mean annual temperature there is 14° F. higher than at Jerusalem. The daily range of temperature is greater in the hills than in the maritime plain, and is greater still in the deep trough of the Rift Valley, because there the daily maximum is so high. The prevailing winds at Jerusalem are close to those of the general circulation, N to NW, but at Gaza they are S, and at Beersheba W. At Ezion-geber, at the head of the Gulf of Aqaba, Solomon's smelters were oriented to take advantage of a natural "chimney effect" which produces a preponderance of steady northerly winds blowing toward the Gulf.

3. The climatic regions. Five regional modifications of climate are found within the narrow confines of the land. If we include the Alpine heights of Hermon, a sixth must be added.

a. The coastal plains. Between the sea and the hilly plateau which forms the backbone of W Palestine is a series of alluvial plains which grow broader and rise higher toward the S. Here the influence of the sea is dominant. The humidity is high, and the daily and annual range of temperature is less than in the hills. Consequently the summer nights are hot, and in winter frost is rare. Rainfall near the shore is heavier than it is a few miles inland, but not so heavy as in the hill country. It also begins earlier in the autumn, and sometimes falls for brief periods with great intensity.

b. The W highlands, including Carmel. The hilly plateau, rising at points to over 3,300 feet, presents a barrier to the westerly winds, except where it is broken by the Plain of Esdraelon and the valleys of lower Galilee. In the extreme N and at Mount Carmel it almost reaches the sea. On the W slopes rainfall increases with height, so that the contours of the rainfall map follow closely those of the elevation. On the E side toward the desert the precipitation falls off sharply in the "rain shadow." It falls off, too, from N to S, from 47 inches annually in upper Galilee to 12 inches below Hebron. The temperature range is greater than in the plains, so that summer nights are not too hot, and the winter is longer and colder. The average minimum in winter at Jerusalem is 44° F., but night frosts are not uncommon, and sometimes there is snow.

c. The Rift Valley. E of the central range the land falls off sharply into the Ghor or Rift Valley. This is well below sea level for most of its length. Here the effects of topography on climate are most marked. Air from the sea which cools and gives precipitation on the W slopes is warmed and dried as it descends into the valley of the Jordan. One can observe this when fine weather clouds moving from the W fade away at the edge of the cliffs, only to re-form where the air currents rise again over the lip of the Transjordan Plateau. The lower Jordan Valley is warm in winter and unbearably hot in summer. At Jericho the normal mean maximum temperature in January is 68° F. A high of 84° F. has been recorded in January, and 114° F. in July. Even at Tiberias the comparable figures are 81° and 115°. The mean annual rainfall at Tiberias is 18 inches; a few miles S, near the river, it is 10 inches; at Jericho, 5½ inches; and at the S end of the Dead Sea, 2 inches. But heavier rains can occur, and in the wet year 1944 the rainfall at Jericho rose to 13 inches.

d. The plateau of Transjordan. Beyond the Rift Valley the plateau is in places higher than the W range; in S Edom it is considerably higher. Hence, in spite of the greater distance from the sea, there is substantial rainfall along the W margin of the plateau, equaling in Gilead and Ammon that of the W highlands opposite. In the dry year 1931-32 there was more rain in the S highlands of Moab than at Bethlehem—which throws light on the story of Ruth. Only a narrow strip of land, however, receives the rain, owing to the proximity of the desert. Between the arable land and the desert is a band of steppe country where evaporation exceeds precipitation, and the temperature range is higher.

e. The deserts. In the lower Rift Valley, in the Negeb or southland, and in the "wilderness of Judea" the surrounding subtropical deserts encroach on Palestine. The deserts are not altogether without rain, but it falls irregularly and is largely lost through evaporation. The rate of evaporation at the S end of the Dead Sea is four times that at Tel Aviv. Such vegetation as exists surrounds the rare springs, or is of a type adapted to depend on dew. The deserts are characterized also by a great daily range of temperature, because of the daytime heating of the land surface and the unhindered loss of this heat at night through radiation. Sometimes the air rises so rapidly above the hot ground in daytime that strong winds and whirling sandstorms or duststorms may result.

4. Summer. The long, rainless summer begins in May or June and lasts until September. Its features are the consistently fine weather, regular winds, daytime heat, and almost complete drought. The average maximum temperature at Tel Aviv in August is 84° F., at Ramle 88°, and at Beisan 99°. This is the "heat of the day," when men sat in their tent doors (Gen. 18:1), and a child in the harvest field might suffer sunstroke (II Kings 4:18-19). The "cool [lit., 'wind'] of the day" (Gen. 3:8) comes when the sea breeze moves in beneath the warm air rising from over the land; it reaches Jerusalem before noon,

Jericho soon afterward, and the Transjordanian Plateau by midafternoon. In summer the sky is mainly clear of clouds except for some fair-weather cumulus and strato-cumulus. In most of the country the cloud cover is less than one tenth of totality in July and August, though there is more cloud over upper Galilee. Sunshine hours may reach 98 per cent of the possible.

Rain is rare in June except in the extreme N, and is almost unheard of in July and August (cf. II Sam. 21:10). There are, however, exceptional cases of "rain in harvest" (Prov. 26:1). The summer drought is not due to any lack of moisture in the air. In fact, absolute humidity in the hill country is double that of winter, and at the coast it is nearly triple. The reason the moisture is not precipitated as rain is that there is no clash of warm and cold air masses causing frontal storms, and the warm air is normally too stable for thunderstorms to be created by convection. The humidity shows itself, however, in abundant dew formation on calm nights when the ground and surface objects cool sufficiently to condense the moisture. Dew forms on five nights out of six on the coastal plains in August and September, and similarly on the seaward slopes of Mount Carmel and the heights of Galilee. It is somewhat less in July, and in other parts of the land, but everywhere dew is important as a mitigation of the drought.

5. Winter. Winter (חרף) is pictured in the Bible as the season of rain (Lev. 26:4; Deut. 11:14; Ezra 10:9, 13; Song of S. 2:11; Isa. 4:6; John 10:23), of cold (Gen. 8:22; Ezra 10:13; Ps. 147:17; Jer. 36:22; Acts 28:2), and of stormy weather (Job. 37:9; Isa. 25:4; Acts 27:12). When the weather turned cold, the well-to-do moved into their "winter houses" (Amos 3:15), and the lazy man made the excuse that it was too cold to begin his fall plowing (Prov. 20:4), after the EARLY RAIN had softened the ground. A second word for winter, סתו, means the "rainy, stormy season" (Song of S. 2:11). Χειμών in the NT means both "winter" and "storm."

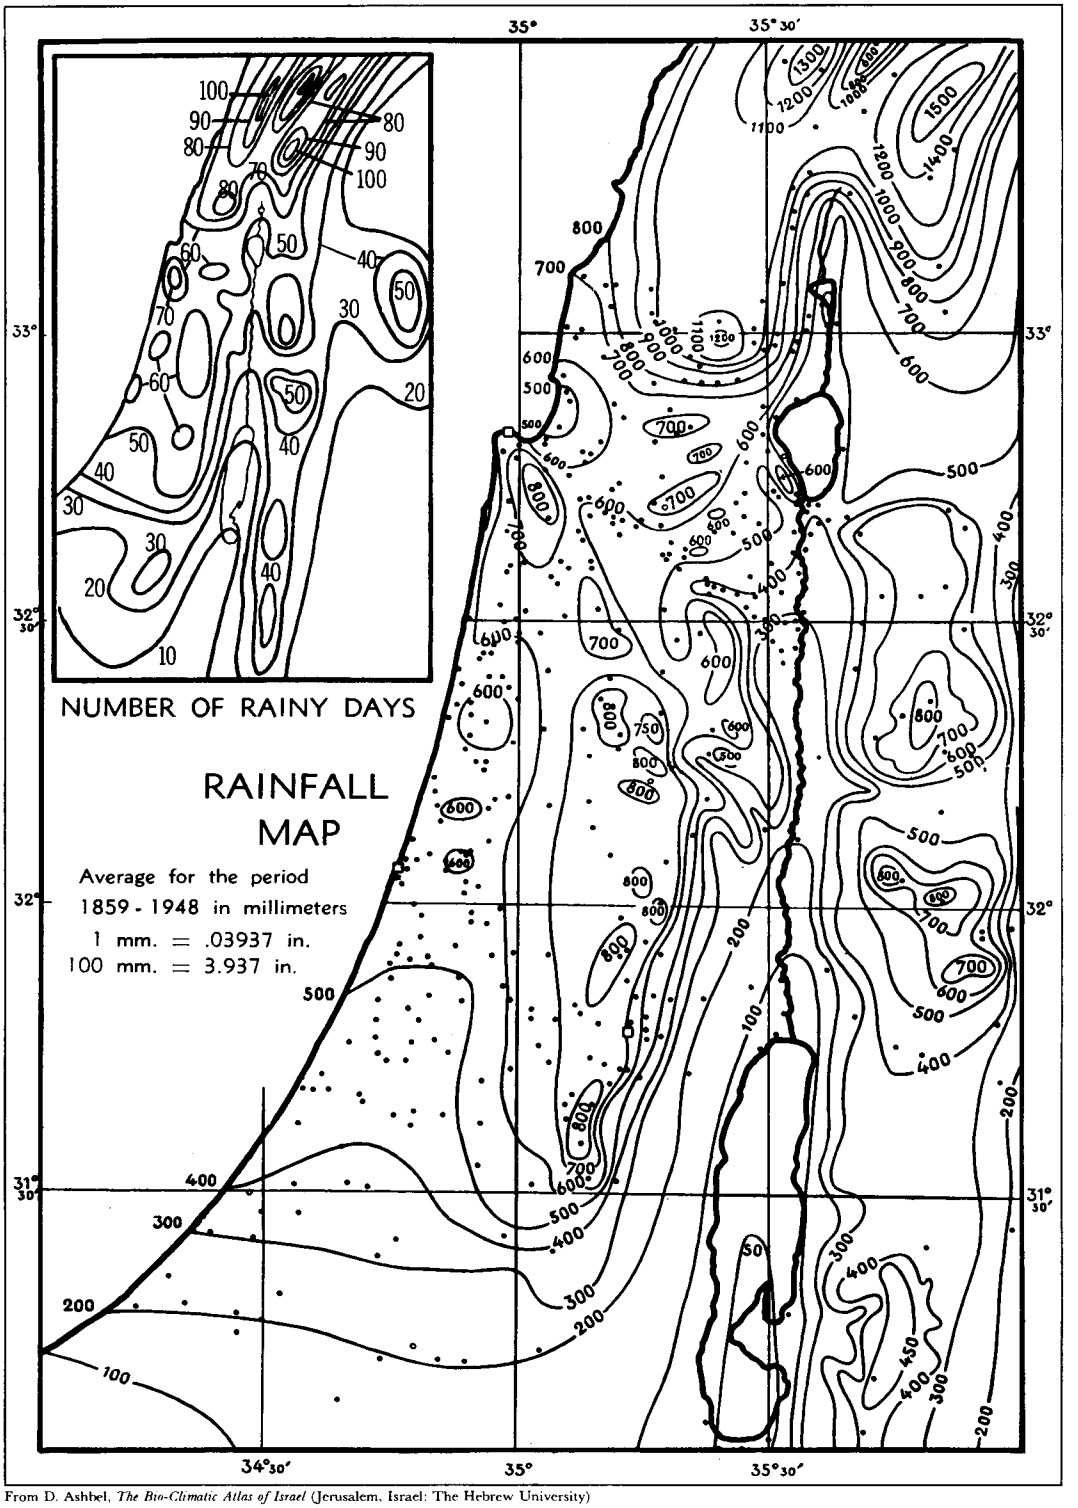
Compared with N climates, that of Palestine is not cold in winter. The cold was felt because of its contrast with the heat of daytime (Gen. 31:40) and of summer (Job 6:16-17), and because clothing and shelter were inadequate (Exod. 22:26). The mean temperature at Jerusalem drops only 3° F. in October, but in November it drops 10°, in December 8½°, and in January a further 4½°. There is frost at Jerusalem on an average .7 days in December, 2.5 days in January, and .3 days in February, but seldom on the maritime plain and never in the Jordan Rift. The mean maxima and minima for January (in degrees Fahrenheit) are 64 and 48 at Tel Aviv, 65 and 46 at Gaza, 61 and 47 at Afula in the Plain of Esdraelon, 54 and 42 at Jerusalem, 51 and 40 at Ramallah in the hill country N of Jerusalem, 65 and 50 at Tiberias, and 50 and 40 at an altitude of over 2700 feet in N Galilee. Although February is normally a little milder than January, record low temperatures have occurred in that month—29° at Gaza, 23° at Jerusalem, 18° at Afula, and 14° in upper Galilee.

Certain passages in Job (6:16; 37:9-10; 38:29-30) suggest familiarity with winter conditions more severe than that of Palestine itself, but which might be found on the higher parts of the Arabian Plateau. Snow falls at Jerusalem on only about three days a year on the average, most often in January. Occasionally there is a heavy fall—e.g., 17 inches in December,1879; 29 inches in February, 1920; and 20 inches in January, 1950 (cf. II Sam. 23:20; I Macc. 13:22). This happens when the polar maritime air of a winter depression is particularly cold and moist. The cold which comes with NE to SE winds, on the other hand, is dry, because it comes across mountains and deserts from its source in Central Asia.

The rainy season is not a time of continuous rain, but of rain alternating with bright periods. Hours of sunshine may be as much as 50 per cent of the possible. Nor are the rains regular in amount or distribution. For the period 1930-49 it rained at Jerusalem on the average three days in October, six in November, nine in December, thirteen in January, twelve in February, eight in March, four in April, and two in May. The comparable figures for Tel Aviv at the coast were three, seven, eleven, fourteen, twelve, eight, three, and one, with .7 day also in September. At Jericho it rained on one day in October, and in the following months four, five, seven, six, four, two, one. The total annual rainfall at Jericho averaged in recent years 5½ inches, compared with 26 inches at Jerusalem, 21 inches at Tel Aviv, and 25 inches at Dan. For the period 1859-1948 Ashbel's rainfall map shows over 31 inches at the highest points in the central and S hill country, at Mount Carmel, N and S of the Jabbok in Transjordan, as well as a steep rise in upper Galilee to 47 inches near Safad. These long-term-average figures, however, conceal the fact that, in addition to considerable variations from year to year, the rainfall between 1875 and 1895 was distinctly greater than it has been since *ca.* 1922.

To the differences in total rainfall in successive years and over longer periods must be added variations in distribution through the rainy season. Sometimes the precipitation is evenly distributed by months, as in the averages of rainy days quoted above. In other years the early rains of autumn may fail almost entirely, as in 1937-38, and yet the total fall be not far below the normal. Rain may be very intense for a brief period; on November 23, 1949, there was an extreme example of this when over 4½ inches, or 17 per cent of the total rain for that year, fell at Haifa in a single hour.

The fact that precipitation is barely sufficient at best, and is not dependable, explains the frequent biblical references to drought and consequent FAMINE (Gen. 41:54; I Kings 17:1; II Kings 8:1; Luke 15:14). In the years 1922-35 the annual rainfall at Jerusalem totaled only 74 per cent of the average over the last century, and several times it fell to *ca.* 50 per cent, though never less than this. The meteorological explanation of these droughts is somewhat as follows: In a winter of average or above-average rainfall the low-pressure systems with their cyclonic storms reach the E Mediterranean about once a week for several weeks in succession. These depressions may have traveled all the way from the Atlantic, but more often they have been formed in the lee of the Alps when a cold, moist wave breaks into the Mediterranean between the Alps and the



From D. Ashbel, *The Bio-Climatic Atlas of Israel* (Jerusalem, Israel: The Hebrew University)

Pyrenees. Sometimes they originate over the Mediterranean itself, when high pressure over Europe sends cold continental air to meet warm continental air from Africa. Should these two high-pressure systems, as sometime happens, become linked at their margins instead of clashing, the resulting ridge of high pres-

sure temporarily blocks the progress eastward of rain-bearing depressions. This, along with the displacement northward of the westerly upper winds in some years, is what brings drought to Palestine.

The dry year 1924-25, when rainfall was only about half the long-term average, succeeded a year when it was more normal. In the dry winter fourteen depressions reached Palestine, only seven of them in the normally rainiest months from December to March, and only five bringing cold, moist air from the Atlantic. The more normal year saw twenty-one depressions, fifteen in the months when resulting rainfall would be heaviest, and eleven bringing Atlantic air. The pattern is clear.

The two-years' drought in Elijah's time, extended in tradition to three years and a half (I Kings 18:1; Luke 4:25), could not have been complete, even though more severe than any recorded in recent times. Its duration, however, is not surprising; from 1929 to 1933 precipitation was only two thirds of normal, and in 1931-33 only 56 per cent of normal.

Fig. PAL 2.

6. The transitional periods. There are no spring and autumn seasons, properly speaking, but merely transitional periods marked by characteristic weather. The "former and the latter rain" (Jer. 5:24 KJV; RSV "autumn rain and spring rain") are the first and last showers of the rainy season of winter. After the long, dry summer, "the [rain] clouds return *with* [not *after*] the rain" (Eccl. 12:2), usually in October. About 20 per cent of the annual rainfall comes in October and November at the coast, compared with 11-15 per cent in the hill country. This early rain is especially important to prepare the ground for plowing and seeding; the late showers of April and early May (4-8 per cent of the total) help bring the crops to maturity (cf. Deut. 11:14); hence their name מלקוש, from לקש—"crops sown late." Although, as already noted, total rainfall in modern times has never fallen below about 50 per cent of normal, the early rains (יורה) may be delayed until late November or, like the מלקוש, may fail entirely (Amos. 4:7). If the thermal difference between the warm and cold air masses is not great enough, there may be clouds and wind which promise rain but fail to give it (Prov. 25:14). On the other hand, if the air aloft is cold, the moist air from the sea rises rapidly from over the warm surface of the land, and local hail and thunderstorms may follow. Even in early summer late surges of cold Atlantic air may travel as far E as Palestine and bring "rain in harvest" (Prov. 26:1), though this is rare.

The sirocco or khamsin wind (the "east wind" of the OT) is a disagreeable feature of the months April to early June, and September to November. For periods of three days to a fortnight hot and very dry winds blow from the SE quarter, with a withering effect on men and beasts and vegetation (cf. Jer. 4:11; Jonah 4:8; Luke 12:55). Although the mean maximum daily temperature is highest in August, the record maxima have been recorded in May and June in connection with the sirocco. Even in October a high of 102° F. has been recorded at Jerusalem, and 93° in November. The extreme dryness of the air makes the heat more trying; the wind is parching, and fine dust fills the air. These winds blow when depressions moving eastward along the North African coast, or which are stationary over Abyssinia, draw ahead of them air which has been descending over the Sahara Desert, and which is therefore both hot and dry. Sometimes they blow strongly enough to endanger small craft off the coast, like the "east wind" which shattered the ships of Tarshish (Ps. 48:7—H 48:8).

7. Climatic change. The eroded hills and stony desert areas of Palestine have led many to wonder how this ever could have been regarded as a "land of milk and honey." The question springs to mind: In biblical times, must not the rainfall have been greater than now? Broadly speaking, weather phenomena and climatic conditions as pictured in the Bible correspond with conditions as observed today. Evidences of ancient occupation in regions now arid may indicate only that effective measures were taken in those days to conserve in dams and cisterns what water was available. It may well be that erosion was less advanced than today, since we know that in some areas there were forests where there are none now. Even today the desert regions are not rainless; indeed, they are subject to occasional violent thunderstorms and cloudbursts, which have left their mark in the intricate drainage pattern visible from the air.

We cannot rule out the possibility of climatic fluctuations sufficient to encourage or deter sedentary occupation in marginal lands. Otherwise it is hard to account for Glueck's evidence that S Transjordan was occupied before 2000 B.C., was abandoned until the thirteenth century B.C., then occupied until *ca.* the seventh century, and again abandoned for five hundred years. There are such fluctuations on record in modern times. Since *ca.* 1885 there has been a global warming trend; glaciers have retreated, and the sea level has risen. Rainfall in Florida was 30-40 per cent greater in the decade 1928-37 than it was twenty years earlier, and the mean annual temperature in Illinois rose 3.6° F. From tree rings, varves, and other evidence, climatologists conclude that *ca.* 4000 B.C. the mean temperature in the Northern Hemisphere was 3-4° higher than today, that it declined in undulations until the sixteenth and seventeenth centuries A.D., and now is again showing an upward trend. These global variations in temperature, apparently due to changes in solar radiation, result in advances and retreats of the polar ice, with corresponding shifts in the climatic zones. It is perhaps suggestive that the earliest Neolithic walled town was built in the seventh millennium at Jericho, deep in the Jordan Rift. This would be one of the first places where the returning warmth would make life more comfortable, after the cold, wet climatic period which in this latitude accompanied the last glaciation in Europe.

8. Meteorological terminology of the Bible. If, as seems to be the fact, weather and climate in Palestine are today broadly the same as in biblical times, attention to descriptions and terminology used in the Bible may be of some value for lexicography and exegesis. Although the descriptions often are vague and the use of terms is not always consistent, meanings may be missed through failure to observe the meteorological context. God did not speak to Job from a "whirlwind" or tornado, but from a tempest

or gale (סערה). The two commonest Hebrew words for "cloud" are not synonyms, though sometimes they are used loosely; ענן refers to cloud stuff as extended rather than defined, cloud as such, a cloud mass covering the sky, overcast, stratus, mist, fog. It is cloud that covers and hides something, not cloud that gives or might be expected to give rain, which is עב. The latter is not adequately translated "thick cloud," though it usually is thick and dark. עב is a distinct cloud; hence it is pluralized, as ענן is not (with one exception). Usually it is a rain cloud, often a thundercloud, the familiar cumulo-nimbus, towering, dark, and wind-driven.

Hail can fall only from thunderclouds. Joshua's prayer for the sun to stand still *in the context of a hailstorm* (Josh. 10:11-13) was for the sun to remain hidden (cf. Hab. 3:11), so that its blazing heat would not impede pursuit of the enemy (cf. I Sam. 11:11). Again, the "strong east wind" (Exod. 14:19-28) which drove back the shallow waters of the Red Sea could have been a sirocco gale blowing into the NE quadrant of a deep depression over the Libyan Desert, bringing between the Egyptians and the Israelites a cloud (ענן) of sand and dust. With the passing of the depression, the wind would back to NW and drive the water in the opposite direction. The synoptic weather chart of the E Mediterranean for March 15, 1924, illustrates such a phenomenon precisely in the area of the Suez Canal.

Some of the principal terms used of weather phenomena may be distinguished as follows: (*a*) Rain. The general word for the falling of rain and the rain which falls is מטר in the OT and ὑετός in the NT. In Deut. 28:12; Acts 14:17, this is used of the seasonal rains; in Ezra 10:9; Acts 28:2, it is accompanied by winter cold, in I Sam. 12:17 by thunder, and in Exod. 9:34 by hail. In Prov. 28:3 it is "beating rain." The words גשם, βροχή, and ὄμβρος signify a heavy shower or downpour (Gen. 7:11-12; Matt. 7:25; Luke 12:54), especially the "former and latter rains" at the beginning and ending of the rainy season (Amos 4:7; cf. Deut. 11:14; Jas. 5:7). רביבים are spring showers (Ps. 65:10—H 65:11). שעירים may mean the drizzle from wet fogs of autumn (Deut. 32:2). שטף, "sweeping" (Nah. 1:8), and נפץ, "shattering," are epithets descriptive in particular of the rain of a desert storm (cf. Job 38:25).

b) Storm. זרם, χειμών, is a storm of wind and rain (Isa. 28:2; Matt. 16:3), sometimes accompanied by thunder, lightning, and hail (Isa. 30:30). The emphasis of the word is on the storminess which drives men to seek shelter (Job 24:8; Isa. 32:2). In Isa. 25:4 it is a "winter storm" (reading קר for קיר). Χειμών, though not זרם, comes to mean winter, the season of storms (II Tim. 4:21). The "sound of the rushing [KJV 'abundance'] of rain" (קול המון הגשם) is the sound which presages a downpour—either the sound of distant thunder or the noise of the wind (I Kings 18:41; cf. Jer. 10:13). The words סער or סערה, λαῖλαψ, refer to a squall or gale (Amos 1:14; Jonah 1:4), sometimes associated with thunder and rain (Ezek. 13:11), but not necessarily so (Luke 8:23; II Pet. 2:17). סופה also means a gale, with emphasis on the destructiveness of the wind's force. An epithet used of such a destructive wind is שואה, "devastation" (Prov. 1:27). The "scorching" or "harassing" wind (רוח זלעפות; Ps. 11:6) is the hot, dry wind of the sirocco (Gen. 41:6; Hos. 13:15); it may be a violent wind (Job 27:21; Ps. 48:7—H 48:8). The typhonic wind known as "Euroclydon" (KJV) or "the northeaster" (RSV) in Acts 27:14 was an easterly gale which followed a moderate S wind, and hence was probably a sirocco.

c) Wind directions. In Song of S. 4:16; Acts 27:13, the S wind is gentle. In Job 37:17; Luke 12:55, it brings heat. In Zech. 9:14 it is violent and accompanies a desert thunderstorm. "The north wind brings forth rain [גשם]" was a proverbial saying (Prov. 25:23); the situation referred to may have been a surge southward of polar air across the Balkans, as this has been known to result in heavy rains in March. Perhaps this is in mind when Jer. 47:2 pictures storm clouds (lit., "waters") piling up to the N of Palestine (cf. Ezek. 1:4). Paul's ship had to beat its way from Sidon to Crete against the prevailing NW winds before the storm struck (Acts 27:3-8).

d) Fine weather. The "fair weather" (εὐδία) of Matt. 16:2 means "a clear sky." In II Sam. 23:4 we read of a "cloudless morning," and in Exod. 24:10 (cf. Job 37:21) of a clear blue sky. The prolonged fine rainless weather of summer results in the drying up of pools and streams (Job 14:11).

e) Clouds. When air is cooled to its saturation point, the water vapor in it condenses into infinitesimal water droplets, which become visible as cloud. The general word for "cloud" or "mist," as already noted, is ענן. A particular cloud, עב, is composed of ענן (cf. Exod. 19:9; Job 26:8). It veils the sky (Ezek. 30:3), envelops a mountain (Exod. 19:16), covers ground and sea as mist or fog (Job 38:9; Hos. 13:3). The cloud (ענן) which rose or failed to rise from over the tabernacle (Exod. 40:36-37) was either a morning mist or an overcast, threatening sky; in any case, it was not a particular local cloud. The original distinction in Greek between νέφος, cloud in general, and νεφέλη, a particular cloud, is obscured in the LXX and the NT. The rain cloud (עב) may be a towering thundercloud (חזיז; Job 28:26), a נשיא rising above the horizon (Jer. 10:13; cf. I Kings 18:44); or it may be dark, wet-looking nimbostratus (ערפל, "murky cloud") scudding before the wind (I Kings 18:45; cf. II Pet. 2:17). In Isa. 25:5 עב seems to mean fine-weather cumulus giving temporary shade from summer heat. The "dew cloud" of Isa. 18:4 is most likely cirrus (שחק, "dust"; II Sam. 22:12), the highest cloud, thin and dusty in appearance, since dew was believed to descend imperceptibly from heaven (Prov. 3:20; Zech. 8:12).

PALESTINE, GEOGRAPHY OF. To put the subject into correct perspective, this needs to be said: Aside from the divine, there are three chief factors in human experience: the earth, the air, and humanity —geography, climate, and society. All three interact.

The earth makes climate, climate makes the earth, and history is made by all three through man's reactions to, and his use of, them.

Since the ancient Hebrews believed that God had made the earth and had chosen one particular portion of it for their home, their concept of God was formed under the influence of its geography, climate, and human relations, all of which were his work. Their "Promised Land" was both a blessing and a challenge (see Judg. 3:1-6). As interpreted by the prophets, the land, the climate, and the peoples about them, who were usually hostile, were all a part of God's plan. These three factors and their own reactions and activities together made their history what it was. The OT is the record of their response, their reactions, and their interpretations of the results.

This article is an attempt to set forth the geographical conditions with which the Hebrews had to deal. The emphasis here is upon description of the land and upon human response to its challenge. *See also* PALESTINE, CLIMATE OF; PALESTINE, GEOLOGY OF; AGRICULTURE; HISTORY; MAN, ETHNIC DIVISIONS OF; etc.

A. ***GEOGRAPHY DEFINED.*** Geography (the description of the earth), as applied to biblical interpretation, involves numerous aspects of a many-sided subject. The word has grown to include a variety of overlapping areas. Physical geography, in particular, includes the description of the terrain; its relief, or orography; its climate and resources; and especially its ecology—i.e., the relations between all organisms and their environment. The real nature of the simple biblical narratives of journeys and military campaigns is not at all clear unless the character of the terrain covered is indicated. The identification of place names of cities, mountains, rivers, springs, etc., with their proper sites is not unimportant, but is rarely discussed in this article. It is left to the notices of the individual places.

The subject of most significance for the interpretation of the biblical text and the understanding of the course of Hebrew history is "human" and "historical" geography—i.e., a people's use of the land and the effect of its various geographical features upon the life, literature, and development of the people. It is expressed in the now familiar phrase, "challenge and response." If, as the Christian believes, this is God's world, man is not "against his environment," but has the task of mastering it and using it (Gen. 1:28).

B. ***THE AREA IDENTIFIED.*** **1. Its general character and history.** Palestine belongs to the part of the Near East that, since the beginning of historical records, has been dominated by Semitic languages. Geographically the area was bounded on the N by the Amanus-Taurus Mountains, on the E by the Zagros range and the Persian Gulf, on the S by the Indian Ocean, and on the W by the Red Sea and the Mediterranean. These boundaries did not protect it but laid it open to immigration and invasion, except on the S, where, in the great Arabian steppe, lay the breeding grounds of the Semitic-speaking peoples themselves, who came to dominate and occupy it as Arabic does today. Since long before the beginning of written records, the prolific nomads of that area had spilled over into the Fertile Crescent, which arches over the steppe from the Red Sea to the Persian Gulf. Lying at the SW tip of the Crescent, with a long shore on the sea, its E border on a limitless steppe, Palestine was open to all the cultural winds that blew. Near the head of the Dead Sea, Palestine had a prehistoric, city culture, based on agriculture, at JERICHO, now the oldest city known (*ca.* 7000 B.C.; *see* ARCHAEOLOGY).

2. Designations. The word "Palestine" is derived from the name of the *Pelishtim* (I Sam. 4:1), one of the tribes of Sea Peoples who, early in the twelfth century, invaded the narrow W coastal plain by the

Mediterranean on their way to conquer and settle in Egypt (*see* PHILISTINES). Defeated by Ramses III *ca.* 1167, they settled on the Maritime Plain. Since they were vigorous and warlike, dominated the Canaanites, and also occupied the most accessible part of the land, strangers gave their name to the whole of the land. Otherwise the land had no distinctive name but was usually reckoned a part of Syria. The word does not appear in the NT. In the OT it is used, not for the whole land, but only for Philistia proper, the S seacoast plain, and only in late poetical passages (Exod. 15:14; Isa. 14:29, 31; Joel 3:4).

The common Hebrew name for the Promised Land (cf. Gen. 12:4-7; Deut. 9:28; etc.) was CANAAN. This is also chiefly the seacoast plain and appears in parallelism with "Philistia" (Exod. 15:14-15; Zeph. 2:5; cf. Num. 13:29; 14:25; but cf. 14:43, 45). Neither term belongs to Transjordan (Num. 32:32; 33:51).

3. Boundaries. Modern usage, which will be followed here, applies the term Palestine to the entire territory allotted to the "twelve tribes," and speaks of W Palestine between the Jordan and the sea, and of E Palestine, or TRANSJORDAN, between the river and the Arabian steppe.

The area specifically included in this study runs from Ras en-Naqura, the ancient Scala Tyrorum, on the coast and the foothills of Mount Hermon on the N, to the "River of Egypt" (Wadi el-'Arish) and the S end of the Dead Sea on the S. However, immediately neighboring lands will often have to be included because of common geographical features, such as continuing rivers, mountains, and plains. Moreover, the Negeb as far as Kadesh-barnea, and even Mount Sinai, on the Wadi el-'Arabah as far as the Gulf of Aqabah, belong to special periods of Hebrew tradition and history.

The familiar biblical phrase "from Dan to Beer-sheba," used of the extent of the land from N to S (Judg. 20:1; I Sam. 3:20), was unsatisfactory to some. A more detailed statement regarding the "land of Canaan in its full extent" appears in Numbers (34:1-12). Here the "entrance of Hamath" is the most northerly point. Unfortunately, neither here nor elsewhere is the phrase's exact meaning discoverable, although it often appears. It can be either the Tripoli-Homs pass S of modern Hama or the narrow gorge between the Jordan Valley and the Beqa' (Coele-Syria) on the W flank of Mount Hermon. In the latter case it is only a little N of the site of ancient Dan. Since no territory N of Dan plays any role in Hebrew history, the latter interpretation is the more reasonable, although it can hardly extend Hebrew territory more than from ten to twenty miles beyond Dan, into a region of gorges and steep mountainsides. In the S, Kadesh-barnea, some forty miles S of Beer-sheba, is included. It is to be noted that in this passage the E border is the Jordan River. In the book of Numbers (32:33-42; 34:13-15), the two tribes and the half-tribe are treated separately, and no attempt is made to mark their borders.

The upshot of a study of various passages puts the effective limits of Hebrew territory in ancient times near Dan in the N and Kadesh-barnea in the S, a distance of 190 or 200 miles in a straight line, or, to include only the really cultivable territory, from Dan to Beer-sheba, a distance of under 150-60 miles. The area W of the Jordan is usually put at a little under 6,000 square miles. Since the Hebrews rarely actually ruled the extensive territories which they claimed, in Syria, Transjordan, and along the coast (*see* TRIBES, TERRITORIES OF), their material basis, even W of the Jordan in ancient times, must be put at very much less.

In the times of the kings, the Hebrew territory E of the Jordan usually ran, at its largest, from the Yarmuk to the Arnon. Since this area rarely played any decisive role in the national history, its records are scanty, and much remains to be done in archaeological research (*see* N. Glueck in *bibliography*). The political allegiance of the various parts of the territory also changed frequently (*see* TRANSJORDAN; MOAB; GILEAD 4). The distance from the Arnon (Wadi Mojib) to Ashteroth-karnaim in Bashan, which covers the territory the Hebrews partially and intermittently occupied, is *ca.* ninety miles N and S. The width of the arable land before the steppe begins varies from twenty-five miles in the S to some sixty miles E of the Sea of Galilee. The habitable area is usually estimated at *ca.* four thousand square miles, making, with W Palestine, a total of ten thousand square miles.

Briefly stated, the N border was Syria, consisting of Tyre and Sidon on the N coast, various cities or districts in the Lebanon and Anti-Lebanon Mountains and the Beqa' on the N, and Aram, or Syria proper, on the NE. All these borders fluctuated. On the E is the Arabian steppe, inhabited from time immemorial by nomadic tribes, but claimed by no settled political administration during early OT times. On the E, SE, and S were the Ammonites, Moabites, Edomites, and later the Nabateans, who, in the fifth or fourth century B.C., settled down along with the Edomites or after them, while the Edomites moved over into the Negeb and occupied the territory of Judah up to beyond Hebron. S of Beer-sheba was the Sinaitic steppe, which had no settled administration, but like the Arabian steppe was the home of nomadic tribes, some allied with Israel (e.g., the Kenites and the Jerahmeelites), some potentially hostile Ishmaelites, Midianites, Amalekites, etc. On the SW were the Red Sea and Egypt, all along the W the Mediterranean, with various Philistine and Canaanite cities usually in control of the coastal region and its ports.

C. *CLIMATE.* A dominant role in cultural history is played by climate. To understand the historical geography of Palestine, it is necessary to bear in mind the outstanding characteristics of the Palestinian climate. Be it noted that: (*a*) Palestine is in the area of the "Mediterranean" climate, with winter rains and summer drought. (*b*) It lies on the N edge of the world-encircling Sahara belt. It may well be said that the Sahara moves in over the land each summer. (*c*) As a result of the remarkable variety in its terrain, within its narrow limits, it has a great variety of individual climatic regions: from seacoast to desert, from subarctic to subtropical (from Mount Hermon, 9,230 feet above sea level, to the surface of the Dead Sea, 1,300 feet below).

d) The SW winds from the Mediterranean bring

storms and torrential rains in winter and coolness in summer. (*e*) At the turn of the two main seasons, in May and September-October, the sirocco (*sharqiyeh*, "east wind") brings burning heat that withers crops, beasts, and men. (*f*) Locusts, mildew, and the pests of both tropical and temperate climates are a constant threat. (*g*) As in all border climates, extremes of all kinds are constantly to be expected; climate is always unusual. *See* § F1*d below*.

See PALESTINE, CLIMATE OF.

D. *GEOLOGY.* The small area of ancient Palestine is divided into an astonishing variety of land forms. A word regarding the geological history of the land (*see* PALESTINE, GEOLOGY OF) is necessary to make their nature clear. The whole Arabian Peninsula, including the Fertile Crescent and a large section of North Africa, originally constituted a single block of the earth's surface. Over most of Palestine, the lowest stratum, lying upon the basic granite, is Nubian sandstone, followed by Cenomanian limestone, Senonian chalk, Senonian chert, and Eocene limestone. These, with basalt, are the chief elements in the earth's crust and its soils. Thrust up repeatedly by pressures from different directions, and sinking again, it gradually broke apart and created the great crack in the earth that, beginning in the Amanus Mountains, becomes the strange Rift Valley at the foot of Mount Hermon, reaches 2,600 feet below sea level in the Dead Sea, and ends in Lake Nyasa in SE Africa—a long ribbon of the earth's crust dropped down to Sheol, as it were.

The rift allowed the whole W section to drop, leaving the corresponding strata on the E side higher and more fully exposed to erosion in pluvial periods. But the W section was more seriously broken and folded as it dropped, and, consequently, its terrain is much rougher than that of E Palestine. Especially W of the Jordan, complex systems of faults and flexures in the limestone strata laid the surface open to deep erosion and, through seeping water, led to the creation of fantastic caves in parts of the land. Only a relief map or carefully taken aerial photographs can give any adequate idea of the tortured terrain of W Palestine. Four types of faults appear: (*a*) the parallel faults of rift valleys; (*b*) single fault lines running N and S; (*c*) transverse (E-W) faults; and (*d*) oblique (or "hinge") faults. There are equally complicated folds, or flexures.

The tremendous seismic disturbances were in some areas accompanied by both ancient and fairly recent volcanic activity, especially in Bashan and the Hauran, which were covered with basalt and where numerous craters and cones are still visible. In Galilee NW and SW of the Lake (*see* CHORAZIN; TIBERIAS; on Nebi Dhahi, the "hill of Moreh," *see* MOREH, HILL OF) and on Mount Carmel basalt is in evidence. Also along the NE side of the Dead Sea and SE of it in Wadi el-Hesa (River Zered) basalt appears. Jebel Shihan (3,470 feet), S of the Arnon, is regarded as an extinct volcano. An extinct volcano is found also in Nebi Dhahi. The hot springs at Tiberias, Tell el-Hammeh, Callirrhoe, and other places in the Rift Valley are further, still visible evidence.

The long and complex geological history of the Near East created four chief geographic divisions within the little country of Palestine, four narrow strips running N and S. A series of cross and hinge faults divided these four again into E-W segments with minor subdivisions. The N sections on both sides of the Jordan Valley are put by Denis Baly into a "zone of greater complexity."

E. *LAND FORMS: REGIONAL STUDIES.* 1. The coastal regions. The area from Ras en-Naqura to the River of Egypt and running back to the foothills of the central mountain range presents no stern and rock-bound coast. The only major break is at the Bay of Acre (Acco), where Mount Carmel juts out to within a short distance of the water. From Beirut S, there was no good harbor according to modern standards, but Acco on its projecting point and Joppa, with its reefs at a distance from the shore, could shelter ancient ships. Reefs projecting from the shore at water level served at some points. Thus Dor, or Dora, near modern Tanturah, was a "port of call." Caesarea Stratonis was made a passable harbor by Herod the Great.* Other cities such as Ashdod, Ashkelon, and Gaza had beaches that could serve in good weather. The mouths of the little rivers that ran into the sea could serve also, but they developed sandbanks from the silt-laden Nile waters. The shore of Palestine was not favorable to traffic by sea. Figs. CAE 1; PAL 3; PAL 4.

4. Yellow daisies and red poppies on the edge of the maritime plain near Caesarea

Properly speaking, there are two divisions to the Coastal Plain, one N of Mount Carmel, the other S of it. The former, which never received a name, is narrow. Starting S of Ras en-Naqura, it widens irregularly until, back of the Bay of Acco, it runs behind a spur of the Galilean hills into the Plain of Esdraelon. The bay shore is lined with sand dunes, back of which is marsh. S of the Carmel headland, although the ridge runs SSE, the mountain presents its W face as a low precipice running southward. With the sea it forms a narrow corridor, the Plain

5. Dura harvest in August on the edge of the Philistine plain near Beth-shemesh

of 'Athlit, or Dor, two to four miles wide and twenty-four miles long, before it widens out into the Plain of Sharon and then Philistia. Fig. PAL 5.

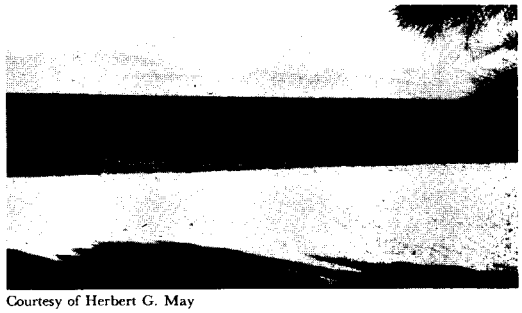
Here is a real maritime plain, chiefly alluvium and capable of intense cultivation. The N section, the Plain of Sharon, was marshy, for it was poorly drained by its small, sluggish rivers and was more famous for flowers than for crops. The S portion, the real Philistia, the most extensive level area in all Palestine, was by far the best for agriculture; but the rainfall decreases toward the S, and there are no copious springs or rivers for irrigation. Between Beer-sheba and Gaza real aridity appears.

2. The central mountain range. Actually a continuation of the Amanus-Lebanon range that begins at the NE corner of the Mediterranean Sea in what is now Turkish territory, it ends in the Sinaitic Peninsula. It is a relatively low, but rugged, range. The higher portions throughout are Cenomanian limestone, from the Litani to near Nazareth, from a little S of Beth-shan almost to Beer-sheba, and again in the S steppe. It is bordered by Senonian and Eocene limestone.

a. Galilee. Somewhere in the mountains between the Litani and Ras en-Naqura, Galilee begins. It belongs to Baly's "zone of greater complexity"—i.e., to regions so tortured by faults and flexures that they present a highly complicated geological picture and a most diversified terrain. As Josephus noted, the area is divided transversely into an Upper and a Lower Galilee. Unfortunately neither the statements of Josephus (War III.xxxv-xl[III.i]), nor those of the OT (Josh. 19:27-28), nor again geography and geology, give a clear idea of the N border. As to the W border, since the Israelites were men of the hills, it can be assumed that they lived in the mountains and left the lowlands to the Phoenicians here as Judah did to the Canaanites and the Philistines. Upper Galilee would probably have included most of the cities assigned to Asher and Naphtali (Josh. 19:24-39), except those on the coast, from a line S of the Litani River to Wadi esh-Shaghur. It marks a major fault, a sharp drop and visible scarp, which the road from Acco to Safed follows. It marks a geological border between Upper and Lower Galilee, with which Josephus' border agrees remarkably (Life 187-88[37]; War II.573-74[xix.6]; III.35-40[xii.1]).

Upper Galilee is a deeply fissured and roughly eroded tableland, with high peaks and many wadis. It has its bleak landscapes, but also its fruitful orchards and its pleasant prospects. A relatively heavy rainfall makes it a prosperous land, as mountain regions go. Possibly in the beginning Upper Galilee was heavily covered with real and scrub forest and therefore was slowly settled by the Hebrews. No important cities, either Canaanite or Hebrew, are reported except on its perimeter. This may explain its small role in recorded history.

Lower Galilee stretches from Wadi esh-Shaghur to the S foot of the Nazareth hills and of Mount Tabor and from the Acco Plain to the Jordan River, making it *ca.* sixteen miles N and S and *ca.* twenty miles E and W, *ca.* three hundred square miles in all. It is one of the most attractive and fertile parts of Palestine. With the gentle slopes of its hills covered with olive and fig trees, its open prospects, and the distant views from its rounded mountaintops, it can be rivaled—but not surpassed—only by Samaria. Fig. PAL 6.

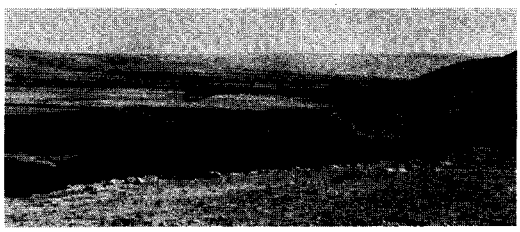


Courtesy of Herbert G. May

6. Looking across the N bay of the Gulf of Aqabah toward the modern Israeli city of Eilat

Lower Galilee's historical associations with the life of Jesus, the Jewish-Roman War, and Talmudic Judaism are almost as numerous and are as varied and dramatic as those of Judea. It benefited historically and commercially by abutting on Esdraelon, one of the most important plains in all Palestine. Though it is not a part of the central mountain range, the plain can best be discussed here, since it is central to the whole country both economically and historically.

b. The Great Plain. One of the conspicuous geological and geographical land forms of Palestine is the break-through from the Mediterranean to the Jordan between Galilee and Samaria. A series of oblique (NW-SE) fractures and folds, crossed by minor NE-SW disturbances, created the fault basin and rift valley that are given the conventional names respectively of Esdraelon and Jezreel (*see* JEZREEL 2).* Esdraelon opened out on the NW to the narrow coastal plains running N. Through the low E saddle of Mount Carmel it received the caravans from the S. Through the Jezreel rift valley, it opened the door to the Jordan Valley and the great plains and the Arabian steppe itself on the E. In the Oligocene Period an arm of the sea, which still covered the maritime plains, reached through this gap to form the inland lake that played a major role in the formation of interior Palestine. The fertile valley thus played a most important role in historical times, for it opened the way to invaders and to commerce, and



Courtesy of Chester C. McCown

7. The Valley of Jezreel (Esdraelon), looking NE from the point of Gilboa

it hopelessly divided the richest areas of Israel, Lower Galilee and Samaria. Fig. PAL 7.

c. Samaria. The Mountains of Samaria (*see* SAMARIA 2)* constitute one of the most significant areas in Hebrew history, for here the bulk of the Israelites lived, to form the strong nucleus of Israel's most promising kingdom. Samaria is a land of mountains, but it is distinguished by wide, fertile valleys. Numerous faults and flexures render the geological and geographical pattern most complex. A series of disturbances running obliquely ENE-WSW roughly divide the N and NW section (Manasseh) from the S and SE (Ephraim). The former is quite similar to Lower Galilee, the SE section somewhat like Upper Galilee; but, as a whole, Samaria is much superior in agricultural availability to any other part of Palestine. From the Plain of Sharon and Mount Carmel to the Jordan Valley, it had a most unusual diversity of terrain and climate. Figs. GER 24; EBA 2.

Its borders are impossible to determine precisely. On the N it varied by the width of the "Great Valley," on the S between Mizpah (Tell en-Nasbeh) and Bethel (Beitin). At the largest it would have measured some forty miles E and W, fifty miles N and S, making an area of two thousand square miles or more. The possession of the Great Valley added a very considerable area of high fertility. But it was a nation without defensible borders, even if Galilee be forgotten.

When Omri moved the capital from Tirzah to Samaria's beautiful hill, he kept his capital within Manasseh, but definitely committed his kingdom to a policy, not of isolation, but of communication and commerce with the outside world, for it was surrounded and crossed by easy caravan routes. He played for trade and luxury. But he laid Samaria open to attack and plunder, as the nation learned to its peril.

d. Judea. On the contrary, the "zone of relative simplicity," in which JUDEA lay, was far more prone to isolation and far less attractive economically. There is no geologically marked border between Samaria and Judea, but a gradual increase of barrenness and rocky terrain indicates the change. The much-used route beginning in the Valley of Aijalon and running up past the Beth-horons and Beeroth (el-Bireh) to Bethel and down to Jericho (a bone of contention between the two kingdoms) may serve to mark the approximate border. Geologically regarded, Judea came to an end at the S where a fault seems to run out from the S end of the Dead Sea and down Wadi Ghazzeh to the coast. The central block ended on the E at the W fault of the Jordan Valley, but politically it usually included the valley floor as far as the Jordan River and the Dead Sea. On the W it ended at the shallow valley that divided it from the so-called Shephelah. Only rarely did strong Judean monarchs extend their authority to the coast.

For gracious living, Judea has the least to offer of all the central mountain regions. The distance from Bethel to Beer-sheba is *ca.* fifty miles, the average width not twenty miles, making *ca.* one thousand square miles. The best part for farming is in the S, where the rains dwindle to twelve inches in a year. The predominating Cenomanian limestone makes rich red soil, but erosion has removed much of it from the tortured landscape. Down-faulted basins and valleys are rare. Judea was not an ideal agricultural land. Fig. PAL 8.

9. The stony mountains of Judea, with Bethlehem lying in the background

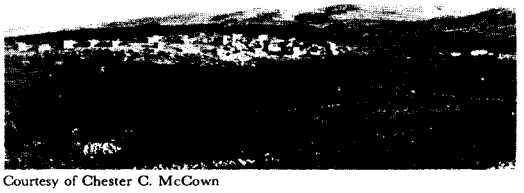
Of the main areas of W Palestine, Judea was the most isolated, the least desirable, and the easiest to defend. The Jordan Valley and the "wilderness" on the E, the Negeb on the S, the mountains on the N, and, above all, on the W mountain front a succession of narrow, stony gorges, made it almost inaccessible to any but the most determined attack. The same features sent commerce around it, not through it. Jerusalem was not well placed to become an emporium. Fig. PAL 9.

e. The Shephelah, or "Lowland." The SHEPHELAH, as George Adam Smith long ago pointed out, was not the coastal plain, but the valley and the low range of the hills that run parallel to the fault marking off the mountains of Judah from the plain. It is a band of hard Eocene limestone that begins at the Beth-horon pass and runs southward, with occasional depressions, almost to Beer-sheba. The shallow "moat" between the Shephelah hills and the Cenomanian limestone consists of Senonian chalk, which breaks down into a poor grayish soil, while the hard

Eocene limestone and the equally hard Cenomanian of the mountains weather into a rich red soil that produces excellent cereal grains (*see* PALESTINE, GEOLOGY OF). The Shephelah was a valuable asset both economically and strategically, and the rival powers of the mountains and the plain both coveted it.

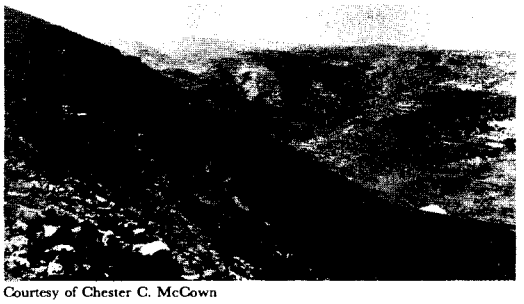
f. The wilderness **(מדבר, *midhbār*).** Judea had a unique defense on the E side: its historically noteworthy and very characteristic wilderness (*see* DESERT). It begins within a short distance E of the Mount of Olives and, at this widest point, reaches eighteen miles to the Jordan River. Its W border runs shortly E of the watershed, along the E edge of the Cenomanian limestone that makes Judea. On the N it appears E of Bethel and continues, with many irregularities, to the greater steppe-desert area of the Negeb. Geologically considered, its E border is at the precipitous cliffs formed by the W faults of the Jordan–Dead Sea Valley. Its width runs between ten and fifteen miles; its length is fifty or sixty miles. Figs. PAL 10-11; JUD 32.

The peculiar character of the wilderness is due to three facts: (*a*) it consists of easily eroded Senonian chalk; (*b*) it lies beyond the watershed and receives only the heaviest rains that rush down through its gullies and gorges to scour the soft limestone; and



Courtesy of Chester C. McCown

10. Deir Diwan toward the wilderness



Courtesy of Chester C. McCown

11. Beginnings of Wadi Qelt and the wilderness NE of Jerusalem

(*c*) the extreme folding and breaking of the limestone strata near the great fault promoted excessive erosion, while the rains easily percolated through the chalky limestone to carve it into fantastic caverns. Nowhere does "the grass wither and the flower fade" more rapidly than in such a landscape.

Biblical usage varies with the authors of the books and documents. Names are taken from the nearest tribe, town, or village: e.g., "wilderness of Judah" (Judg. 1:16: "in the Negeb near Arad"; Ps. 63, title); of Engedi (I Sam. 24:1); of Tekoa (II Chr. 20:20); of Maon (I Sam. 23:24-25); of Ziph (I Sam. 23:14-

Courtesy of Chester C. McCown

12. Near 'Ain el-Qudeirat (Hazar-addar) at the S border of Judea

15; 26:2). There are some seventeen different designations. The portion lying SE of Hebron and Ziph and N of Maon is called the *Yeshîmôn* (*see* JESHIMON 1), the "Desolation" (I Sam. 23:24). The descriptive term is applied especially to the SE corner of the area and to the *'Arᵉbhôth Mô'ābh* (Num. 21:20; 23: 28), the desolate area at the head of the Dead Sea (*see* § E3*ci below*). Fig. PAL 12.

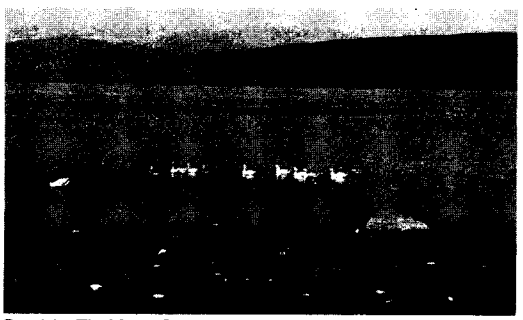
Midhbār is not DESERT, but uncultivated "pasture land, steppe," where low, sparse grass grows in spring and where there are occasional springs, wells, and cisterns, with wadis and small, level fields on which in good years wheat or barley may be successfully grown. The Beni-Ta'amirah, many of whom are now "rich" from finding MSS in their caves, have lived there precariously for generations. The area includes land that is totally uncultivable, whether from unevenness, rocks, poor soil, lack of soil, or lack of water.

g. The Negeb **(נגב, *neghebh*).** This is also "wilderness" and so has been partially described. The word, meaning "south country," was given to the land about and S of Beer-sheba. As in the Judean wilderness, there are occasional springs, wells, and pools in the N portions, which had prehistoric settlements and considerable towns in Byzantine times. It cannot be taken as demonstrated that 'Ain Qedeis was the OT Kadesh-barnea; but, with the larger springs, 'Ain Qoseimeh, and 'Ain el-Qudeirat, which are all three within a few miles of one another, a small band of nomads could have maintained themselves. The springs, it will be remembered, are specifically included in the Promised Land (*see* § B2 *above*). S of them the terrain becomes more inhospitable.

The greater part of the Negeb is a plateau 1,500-2,000 feet above sea level with peaks running up to 3,500 feet. It belongs to the same geological block as the N sections but has been subjected to different pressures and climatic conditions. There are three areas—two small, one rather large—of sand dunes SW of Beer-sheba. There is more Eocene limestone and Senonian chalk, much less Cenomanian limestone, than farther N, and the Nubian sandstone has been thrown up into view in some heavily eroded

sections. The SW winds that bring rain from the Mediterranean to lands farther N blow to the Negeb from the Sahara over Egypt. The N and S borders of the Negeb are meteorological. The Promised Land and the Negeb may be taken as ending with the three springs. The central mountain range comes to a climax in the wild mountains of the Sinaitic Peninsula, Jebel Musa, *ca.* 7,400 feet, and others up to 8,600 feet.

3. The central Rift Valley. ***a. The Upper Jordan.**** The unique and outstanding geographical feature of Palestine is the Rift Valley that splits it down the center (*see* § D *above*). The parallel faults that form the Rift Valley appear near where the most northerly point of the Promised Land lies and where the River Jordan rises. N, W, and S at the foot of Mount Hermon, springs form small streams that come together near Dan (Tell el-Qadi) and finally in the marsh called Lake Huleh, at 230 feet above sea level (not 7 feet, as some publications still report). In the next ten miles Lake Huleh drops, not 700 feet, as the old accounts reckoned it, but 925 feet, to reach



Copyright: The Matson Photo Service

13. Lake Huleh (known as Lake Semechonitis in NT period), with Mount Hermon in the background

the Sea of Galilee at 695 feet below sea level. The river flows in part through a narrow canyon. In this area the Rift Valley itself varies from some four to eight miles in width. Figs. JOR 26; PAL 13.

b. The Sea of Galilee. This sea is formed by a widening of the Rift Valley connected with cross faults that run into the hills. An overflow of lava from the volcanic area in S Syria gave the lake a hard basalt threshold and, therefore, a practically unvarying level and size (*ca.* seven by thirteen miles). While there is sufficient shore for driving around the lake except at a couple of spots, there is very little arable land. At the left of the mouth of the Jordan is a small marshy plain (el-Bateiha, site of Beth-saida). On the SE shore an attractive little plain spreads out southward. On the W side, the Plain of Gennesaret, an arc of a circle, less than four miles wide and a mile and a half deep, stirred Josephus into ecstasies over its luxuriant fertility (War III.506-21[X.8]). The hot springs just S of Tiberias, on the opposite side of the lake, and by the Yarmuk River a few miles to the E, recall the volcanic activity of the not-too-distant past. They represent a well-known health factor.

c. The Arabah. It has long been recognized that biblical writers called the main section of the Rift Valley, from the Sea of Galilee to the Dead Sea, "*the* Arabah." The term may also designate the extension of the depression S of the Dead Sea, as noted *below* (*see* § *d*).

i. Descriptive terms. The word *ʿărābhâh* (ערבה) connotes aridity, as do the words "Arab" and "Arabia." It may be doubted whether the word means "desert" in general, except in poetry, where it often stands (as in Isa. 40:3) in parallelism with *midhbār* ("pasture"). The word *midhbār* is, indeed, applied to the Arabah (II Sam. 15:28). It is to be noted, however, that "Arabah" does not in itself mean "plain." It apparently assumed this connotation only because it is so often applied to areas that are fairly level, just as the word "steppe" does. As a name it is untranslatable, but it suggests aridity and sterility. It is also called the *ʿēmeq*, "depression" (Josh. 13:19, 27), and the *biqʿâ*, "cleft, fissure" (Deut. 34:3); both words are usually translated "valley."

The Arabic words applied to it aptly describe and analyze it. The Rift Valley is called the Ghor, or "depression"—i.e., "gorge." Within the Ghor is the Zor, to which the Hebrew word *gâôn* (גאון), "jungle," corresponds. The words "Zor" and "Gaon" describe the flood plain that the Jordan has created in its meanderings through the valley floor of the Ghor. The Meander in Asia Minor can hardly equal its convolutions. The wealth and luxuriance of the entangled semitropical trees and plants that grow in it probably suggested the Hebrew *gâôn*, which means "pride, excellence, swelling." "Jungle" is a better description (Jer. 12:5; 49:19; 50:4; Zech. 11:3). The Arabic *qattara* and *qattar* describe the clay flats, often carved into remarkable shapes, which are best described as "badlands," or "slime pits." It is a slippery, or dusty, marl impregnated with lime and cannot be cultivated. Anyone caught in it by a shower finds himself trapped, perhaps for days. It is most prominent at both ends of the Dead Sea. Fig. JOR 28.

ii. The original valley floor. This varies greatly in width. Near its center, above Wadi Kufrinjeh, it narrows to some two miles. Above this point it is at its widest where its walls are broken by the breakthrough of the Great Plain from the W and the Yarmuk River from the E. Here the Zor is negligible, and there is cultivable land on both sides. Below this constriction the Zor widens and deepens. Above, there are many fords, for the Jordan is hardly more than a brook. Below, there are few. Below, the rainfall is too little to be effective and the Jordan too low in its bed to be used. At Jericho the width of the Ghor is *ca.* twelve miles.

Two important rivers feed the Jordan on the E side, the Yarmuk (not named in the Bible) and the Jabbok (Nahr ez-Zerqa).* Indeed, the Jordan flows into the larger Yarmuk. On the W side, the River Jalud (also not named in the Bible) flows in from the rift valley of Jezreel, and the stream of Wadi Farʿah comes down from Samaria; these are both smaller streams. These streams and many a wadi have dug through the valley bed or spread their fans of detritus upon it, with the result that the valley floor offers a very small cultivable area in comparison with its size. To propose a Jordan River Authority in analogy with the Tennessee Valley Authority is to compare a fruit fly to a bumblebee. It

Courtesy of Chester C. McCown

14. The Jabbok (Nahr ez-Zerqa) S of Gerasa

suggests a totally incorrect conception of ancient Palestine and the Arabah. It is equally beside the point to call the Arabah or any part of it a "garden of the LORD" (Gen. 13:10). Fig. PAL 14.

iii. Special problems and usages. Certain special sections with their designations need mention because they have led to wrong interpretations.

The invading Israelites camped in the *'Arᵉbhôth Mô'āb* while waiting to cross the Jordan (Num. 22:1; 26:3, 63; twelve times in all; elsewhere with modifications). Joshua 13:32 locates them "beyond the Jordan east of Jericho" and puts the *'Arᵉbhôth Yᵉrîḥô* (4:13; 5:10) opposite them. The generally accepted translation, "Plains of Moab" and "Plains of Jericho," is misleading as well as incorrect, for Moab has its real plains on the plateau. Only a circumlocution such as "steppes of Moab in the Arabah" can correctly convey the idea.

Another designation is the "basin of the Jordan" (כִּכַּר הַיַּרְדֵּן, *kikkar hay-yardēn*). In Genesis there are seven occurrences of the word *kikkār*, all clearly referring to some portion of the Jordan Valley that apparently can be seen from a point near Bethel (13:10-12; 19:17, 25, 28-29). The LXX translation is always περίχωρος τοῦ Ἰορδάνου (περιοίκῳ in I Kings 7:33), except where it transliterates. It does not blunder into putting a "plain" around Jerusalem (Neh. 12:28 KJV). Since *kikkār*, like *ʿᵃrābhâ* (Arabah), does not mean "plain," this term should be displaced by "basin" or "country around" (*see* § E3*civ below*). The term is extended in two passages to a little below the "narrows" in the center of the valley (II Sam. 18:23; I Kings 7:46).

iv. NT problems. Two historical problems of the NT may be briefly mentioned. One grows directly out of that of the *kikkār*. Both Luke (3:3) and Matthew (3:5) use the LXX phrase "all the region about the Jordan" in describing the ministry of John the Baptist. Luke has Jesus going "into all the Jordan basin"; Matthew has "all the Jordan basin" coming to John. Both writers apparently think the "basin" a populous area. Matthew understands the place where John baptized to belong to the wilderness of Judea. (That he preached in one place and baptized in another is absurd, particularly considering the character of the *midhbār* in E Judea.)

That John (and Jesus) may have visited the Qumran community is possible. But Luke's statement (1:80) that John was prepared for his ministry "in the wilderness areas" (ἐν ταῖς ἐρήμοις) does not prove it. The Qumran monastery was only 125 feet above the level of the Dead Sea, and the fords where John would have baptized (to escape the Zor and "badlands" [*see* § E3*ci above*]) are only eight or ten miles away; but this suggests only a possibility.

NT ἔρημος, "empty, uninhabited," which usually represents OT *midhbār*, is equally difficult to translate. In the account of John's ministry and Jesus' baptism it, of course, refers to the *'Arᵉbhôth Mô'āb*. In Galilee there are no such steppe areas. But there is—and must always have been—much uncultivated land, which served as pasture. When Jesus sought a quiet retreat, or room for the crowds that flocked to him, it was easily found within a short distance.

A careful study of the terrain suggests answers to problems of the journeys of Jesus. Jews in Galilee would naturally take one or another of the routes across the Plain of Esdraelon and through the mountains of Samaria, perhaps past Bethulia. From Capernaum, whence Jesus began his last journey to Jerusalem, the most natural route was down the Jordan Valley. He could easily visit Samaritan villages S of Beth-shan. At the mouth of Wadi Far'ah he would have come to the frontier of Judea. Crossing the Jordan at Adamah, he would have been in Perea, where there were villages at hand near the valley. Crossing the Jordan again, he would arrive at Jericho. That there were multitudes to crowd about Jesus in this brief Perean journey may be doubted (see Mark 10:1).

d. The Dead Sea and Wadi el-'Arabah. From the mouth of the Jordan to the Gulf of Aqabah, the Arabah played a relatively small part in Hebrew history, except that it separated Moab and Judah.* On the E side the cliffs descend almost perpendicularly to the water's edge, except where the Lisan, an irregular peninsula of marl, projects. On the W side in periods of low water, around the beginning of the twentieth century, it was possible to ride or walk all the way from the N to the S end, as it was possible to ford from the Lisan to the W side. S of the Lisan the water is very shallow. The water level seems to have risen a little even in recent years, and the length of the sea (forty-eight miles; width eight miles) has increased very slightly, at the expense of the Sebkha, but now has retreated again.* Practically no water from the W flowed into it. There was a small stream from Wadi Zerqa Ma'in. The River Arnon (Wadi Mojib) discharged much more through its narrow, high-walled gorge. Figs. PAL 15; DEA 6-7; ARN 60.

15. Looking eastward from Beth-shan (Tell el-Hosn) along the River Jalud across the Jordan Valley

In the part of the Rift Valley S of the Dead Sea the ancient Hebrew name for the valley is still preserved as Wadi el-'Arabah. Forbidding as it is, it has not served to divide E and W as the Jordan did. The Edomites, and after them the Nabateans, crossed it regularly with their caravan traffic. They, along with both Judeans and Israelites, exploited the copper and iron ores that were found there. Forests in the mountains on both sides provided charcoal for the fires of the smelters that were located in the valley, where the winds that blow down from the cold of Hermon to the heat of the Red Sea provided the blast furnaces. The potential supplies of ore now apparent are not sufficient for modern industry, but could doubtless give a decided advantage to the ancient kingdom that had possession of the area. Its total length is a little over one hundred miles. The wadi floor rises gradually to reach its highest point over 650 feet above sea level near Jebel er-Rishe, some 40 miles from the Gulf of Aqabah. The total length of the Rift Valley from Mount Hermon to Elath is *ca.* 260 miles.

4. Transjordan. ***a. Its general character.*** While the Transjordan tableland plays a relatively small part in biblical history, it is far from unimportant, and its physical geography is far from uninteresting. It begins on the N with Mount Hermon at 9,230 feet. The land southward lies below 4,500 feet and mainly below 2,500 feet. However, it is a high plateau, rarely falling below 1,500 feet, and that only in the Jordan rift and in a few deep canyons, such as those of the Yarmuk, Jabbok, and Arnon. After the Hauran break-through, the mountains rise again to reach over 5,000 feet in Edom.

The geology of the total area must be briefly summarized before turning to details. From Mount Hermon southward to the Gulf of Aqabah, the basic components of the land are the same as W of the Jordan rift, but erosion has uncovered different strata. There is practically no sand, but lava has covered the territory S to the Yarmuk River and S of the Jebel Druz has gone much farther.

As a result of the downward slope of the strata eastward from their high point by the Rift Valley, erosion has exposed the Nubian red sandstone in great patches from the Arnon River down to the Gulf and has even reached the underlying granite. A large core of Cenomanian limestone forms the mountains of Gilead. But farther S, below 'Amman, it becomes a narrow strip between the sandstone and an even narrower strip of Cenomanian chalk. Beyond that the steppe to the E is Senonian chert that produces an ugly desert landscape, a surface covered with thin, shiny black pebbles. The rich soil produced by Eocene limestone appears only in Edomite territory E of Maan. The most impressive mountain scenery is in the tremendous mass of peaks and gorges of variegated Nubian sandstone on both sides of the Wadi el-'Arabah from Petra to the Gulf.

b. Its main regions. The E section may be divided into seven main regions, which are marked off by physical features: (*a*) The Damascus area and the Bashan Plateau S of it, (*b*) the Hauran area opposite the Accho-Beth-shan break through the W range, (*c*) Gilead, (*d*) Ammon, (*e*) Moab, (*f*) Edom or Seir, and (*g*) "Midian."

Aram, the area about Damascus, is distinguished for its rivers and the brief richness of its green oasis and then by the forbidding blackness of the basalt that spreads from the volcanoes of el-Leja and the Druz Mountains to E Galilee.

Bashan and the Hauran, enriched by the basalt in their soil and watered by the rain clouds that blow through the gap over Esdraelon and N Samaria, could help feed the Roman Empire when peace made commerce possible. The Yarmuk River marks roughly the S border of Bashan and the Hauran and also of the spreading lava.

Gilead, like all the E regions, is difficult to define exactly, on both N and S. In OT times the territory from the Yarmuk to Wadi Hesban was from time to time included in Gilead. National and tribal boundaries were uncertain and fluctuating. But there are physical differences that define certain areas. Eighteen to twenty miles S of the Yarmuk by way of Irbid, the mountains of Gilead appear at three thousand feet above sea level. 'Ajlun is over four thousand feet, Jerash *ca.* two thousand. Between the two elevations, most of the area of Gilead N of the Wadi ez-Zerqa is to be found. Faults bordering an upthrust running NE-SW across the Rift Valley relate it geologically to Judea. It is one of the most delightful regions in all Palestine. Other cities did not have such springs as Jerash, but the hills are, in the main, rounded and tree-covered. There are small valleys with gentle contours, covered with olive trees and grapes. Transjordan grapes are famous as the best in all Palestine. Its rains average about the same as at Jerusalem, *ca.* twenty-four and even twenty-eight inches. The vast Arabian steppes begin some twenty-five to thirty miles E of the Jordan. Fig. PAL 16.

16. A spreading oak and flowering fields in N Gilead

Ammon, from its base at Rabbath-Ammon on the upper Jabbok, attempted to establish itself between Gilead and Moab. It never succeeded until the Exile, when its renegade Jewish commander, Tobiah, established a dynasty at 'Araq el-Emir. The character of the territory from the Jabbok to the Arnon changes gradually, below es-Salt and the Buqei'a more sharply, toward greater aridity and ruggedness, especially on the W side. Trees almost disappear, although small forest areas appear. All down the E side of the rift, rainfall varies with the height of the

mountains, but the erosion of the wadis at the NE shoulder of the Dead Sea, of the larger Zerqa Ma'in, Hesban, and the Kerak, not to mention many that are smaller, drove agriculture farther eastward toward the steppe.

Moab, originally between the River Arnon (Wadi Mojib) and the Brook Zered (Wadi Hesa), succeeded in passing northward, not only past the Arnon but past Wadi Hesban, and fixing its name on the Moabite steppes by the Jordan. It had an area where wheat and barley grew well, and there was ample range for sheep, goats, and camels.

Edom occupied Seir, when the Israelites entered Palestine. The area from Wadi Hesa to the Gulf is aridly picturesque beyond description. The original Edomite territory probably ran S for some sixty to seventy-five miles to the Negeb. Near Wadi el-'Arabah the Nubian sandstone, which predominates, was fantastically eroded. Petra is the most famous of its spectacles. Beyond the area the relatively level steppe stretches out endlessly, and the Edomites, as well as the Nabateans who eventually drove them across the Wadi el-'Arabah into the Negeb and S Judea, found it possible to conserve water and cultivate rather extensively. However, the wealth of both peoples came from commerce. The Edomites are of interest to the OT student because of their possible contributions to OT literature (Job; parts of Proverbs?) and to Israel's troubles.

Edom may be said to end at the Negeb, a sharp fault and scarp. Below it lies the Hasma, a wild, barren, but picturesque area of Nubian sandstone mountains lying on and often revealing the basic granite that runs to the Gulf. Here, as well as in S Edom, wild tribes such as the Midianites roamed.

F. *GEOGRAPHY AND CULTURE.* 1. Physical factors in historical problems. *a. Critical methods.* Such was and is Palestine. Any attempt to discover what use the Hebrews made of the Promised Land and the consequent character of their culture must take account of the lapse of time and the accompanying changes within the period of ancient Hebrew history and between that time and ours. Our understanding of their world and their world view is based upon their land as it now is, on what the archaeologist discovers there, and on what the historian finds in all the pertinent ancient documents, including especially the Bible. One must reckon with all the physical and cultural changes that took place in over a thousand years of biblical history and two thousand subsequent years, and with the differences between the ancient and the modern, as well as between the Orient and the Occident. How the ancients lived and what they wrote must be interpreted in the light of their perspectives. The modern traditional perspectives—e.g., medieval and modern art, religious sentiment, and, above all, the modern glamorous, spectacular cinema—must be rejected as totally falsifying the picture.

b. Physical changes and differences. Biblical geography must take account of the physical deterioration due to deforestation and defective agricultural methods, with consequent erosion, impoverishment of the soil, and loss of useful rainfall. The Hebrews from the beginning furthered the process of deforestation (Josh. 17:15-18). The increasing use of stone pillars in the Middle Iron Age indicates its progress. However, mud roofs laid on a base of reeds, bushes, and branches over wooden rafters were still in use in the first century A.D. (Mark 2:4: "They dug up the roof"; Luke 5:19: "through the tiles," introduces Hellenistic custom.)

c. Intercultural effects. As an illustration of the effects of one factor upon another, it is to be noted that deforestation not only promoted erosion of the soil but also gradually deprived the land of fuel. One useful substitute was a little thorn bush that burns fiercely but briefly. Another was the use of cow dung for fuel, which lessened the very meager store of fertilizing material for the fields. This reacted unfavorably in the total economy. Similar interactions will appear *below*.

d. Climate. **i. Regional differences.** Palestine's climate was, and is, far from unhealthful, partly because it was far from uniform. Following the geographical regions, the land may be roughly divided into six climatic zones: (*a*) the coastal plain and the Plain of Esdraelon; (*b*) the Central Mountain Range and Mount Carmel; (*c*) the Rift Valley and the Valley of Jezreel; (*d*) Transjordan as far as the Hejaz Railway; (*e*) the steppe; (*f*) the desert. The last two are not localized but appear in Transjordan, the Judean wilderness, the Negeb, and Wadi el-'Arabah.

ii. Temperature and health. In the summer the S coast might be unpleasant and the Rift Valley almost unbearable, but the mountains enjoy a strong breeze from the Mediterranean from morning till sundown. In winter snow might fall as far S as Jerusalem, but there is never extreme cold. Within a few hours' walk there is the warmth of the Arabah in winter, the coolness of the mountains in summer.

The variations in climate between valley and mountain, summer and winter, day and night, may not be sufficient to provide the maximum stimulation required by modern industry, but they were eminently suited to an economy where the population could spend most of the year without discomfort out of doors instead of within windowless and unheated stone hovels. It was both a health and an economic factor. Palestine had its diseases (*see* DISEASE), but it was a healthful land. It has always produced a vigorous, enterprising population too large for it to feed.

Within a distance of a hundred miles (Jericho to Mount Hermon) all varieties of climate from subtropical to subarctic, including a large diversity of plants, could be found, and a remarkable variety of standard adaptations to living conditions could be experienced. One reason the Bible is intelligible in nearly all parts of the earth is that it so nearly runs the gamut of the world's climates, land forms, and living conditions.

iii. Indispensable agricultural factors. Temperature is a factor of general importance to human life and health. But for agriculture in a land and culture like that of ancient Palestine, temperature, rainfall, soil, and terrain are all of fundamental importance, and no one of them can be discussed without including the others. Temperature—i.e., insolation, or sunlight—determines evaporation and thus the amount of moisture from rain or irrigation that becomes actually available for plant growth.

Soil, its consistency and chemical composition, determines what will grow and the quantity of water absorbed, as well as the amount that percolates through to subterranean pools and underground channels. Thus soil, with its underlying subsoil and rock, determines the number and value of springs and the height of water tables. Terrain, whether level, sloping, or precipitous, determines runoff and erosion, and creates marsh or well-drained land. And, of course, the composition of the rocks, with other factors, determines the availability and composition of the soil. The nature of the storms that bring rain is an important factor. Unfortunately an arid, border climate has a preponderance of tempestuous downpours that run off rapidly and carry away soil without penetrating it.

e. Cultural resources. In § E *above* an attempt has been made to describe the different regions and their general character as a basis for the development of Hebrew culture. It remains to summarize here the successes and failures of the Hebrews in their use of the Promised Land.

i. Agriculture. The basis of their economy was AGRICULTURE. As already indicated, the choice of Palestine condemned them to hard work and poverty. They had the last area on the narrow point of the Fertile Crescent in which a settled agricultural economy was possible. The geological and geographical reasons for the poverty of Palestine are evident. Low rainfall and aridity (evaporation) due to the sun's heat are combined with lack of level arable land. Of necessity fields were commonly small, and they were covered with lumps of limestone. The stones could be used as walls. But large, half-protruding slabs of underlying limestone strata, the "rocky ground, where it had not much soil" (Mark 4:5), ruin many an acre. Sloping wadis and hillsides had to be terraced with infinite and constantly repeated labor.

Their agricultural methods were of the crudest kind. The little plow drawn by diminutive oxen—both plow and oxen were suited in size to the fields—barely scratched the ground, and common custom probably was to sow the seed broadcast on fallowed ground and then plow it under. The results equaled the labor. After the First World War the average yield of wheat was nine bushels per acre, when, as experiment discovered, forty were possible with modern methods. The ancient Israelites knew nothing of selected seeds, careful fertilization, and deep plowing. Fortunately the limestone itself partially refertilized the fields, or the results would have been worse.

Grain, however, was exported from E Palestine and was also grown successfully, if not abundantly, on the W side. Vineyards and olives gave the most valuable crops. It is generally believed that the destruction of vineyards by alcohol-hating Muslims has contributed to the present low agricultural level of Muslim Palestine. But Palestine never could have become rich and prosperous on its agriculture. It is a miracle that its peasants, after paying taxes to palace and temple, were able to live.

ii. Pastoral. A large proportion of Palestine was condemned by nature to serve as range land for sheep, goats, cattle, and camels. The extent and value of the pastoral side of Hebrew land use is difficult to estimate. We learn of vast flocks and herds owned by Nabal, who was "very rich" (I Sam. 25:2). "Mesha king of Moab, [who] was a sheep breeder," had to pay an enormous annual tribute of lambs and wool to Ahab (II Kings 3:4). Solomon's tables devoured vast quantities of beef, mutton, and venison (I Kings 4:22-23). Every village had its oxen for plowing and its flocks and possibly herds of animals individually owned but shepherded in common by the boys. Feasts and sacrifices must have made great demands upon the nation's pastoral resources (I Kings 8:5, 62-64), but they at least satisfied the hunger of multitudes. Possibly the nomadic tribes in the steppe provided for such needs.

iii. Non-agricultural resources. It might be supposed that FISH from the Mediterranean, the Sea of Galilee, and the River Jordan would play a part in the economic life of the Hebrews. Quite the contrary is true. Their use was well known. But the Hebrews were men of the soil. Partly because they rarely occupied the coast and partly because transport was difficult, we hear little of fish as food. The Sea of Galilee was internationally famous for dried fish in Roman times, and the NT knows the fishermen there. Jerusalem had its "Fish Gate" in the postexilic period. This would intimate that the lack of allusions to commerce in fish and of their common use may have been the want of access to the sea. This was remedied under the Persians.

Along with its limited agricultural resources, Palestine's lack of mineral resources was almost fatal. The value that seems to have been laid and the labor expended on the meager amounts of copper and iron mines found in Wadi el-'Arabah and N of the Wadi ez-Zerqa near 'Ajlun and Rajib emphasize the dire want of resources in the land. These mines may have assisted in producing the prosperous times of Solomon (I Kings 9:26; cf. 22:48) and of Amaziah and Jotham (II Kings 14:22), but their contributions were irregular.

The only mineral product of which Palestine had enough was limestone (not marble) of various qualities, much of it excellent for building. About the Sea of Galilee and N of the Yarmuk, basalt was widely used, sometimes patterned with limestone. It was widely used also for millstones and grinding bowls. Good clay for pottery was abundant.

iv. Industry. Craftsmen such as were necessary in an agricultural community and also for moderate luxuries are mentioned in the Bible. But for more than ordinary activities they were imported. The skilled hands of Hiram's masons are to be seen in Samaria's walls, as men of foreign training have left their mark on Herod's building. Luxury items, such as ivory carving, evidently came from Syria. Its lack of indigenous materials prevented Palestine from developing industry beyond its internal needs. Industry could not enrich Palestine unless commerce accompanied it.

v. Value of indigenous resources. The Deuteronomist (8:7-10; 11:8-12; 26:9) is often quoted as proving that Palestine was a real "Land of Promise" in biblical times. But his engaging rhetoric goes too far. Doubtless it was much more productive in the seventh century B.C. than in the twentieth century

A.D. But it has physical limitations that are inescapable. For many thousands of years there have been no major changes in climate, only those short and long cycles through which all lands pass. However, there has been one major change. The center of commerce and culture has moved from the E Mediterranean to the Atlantic—on the way to the Pacific perhaps. Eventually, the Jews, perforce, followed commerce and culture.

2. Population. ***a. Unsatisfactory data.*** In the light of the description of Palestine's physical features, what were its human resources? What was the human result of the Hebrews' use of their land? Unfortunately the data on which to base conclusions are extremely scanty. M. Rostovtzeff, who probably knew the Hellenistic world as well as anyone ever has, said that we have "not even an approximate idea of the density of its population." He refused to make a guess. All that is possible is to indicate limits beyond which guesses should not go. Ancient censuses and "vital statistics" in the Bible are incomplete and often implausible. Palestine was never occupied by Hebrews alone, but the proportions of other races to Hebrews, like the density of population itself, is impossible to ascertain.

b. Probable limits. Some helpful suggestions are to be found—e.g., in an estimate of the population of Galilee, made by E. W. G. Masterman in 1909, at 250,000 for 900 square miles, or 277 per square mile. But the survey of Conder and Kitchener in 1875-77, after very careful observation, estimated 312 Galilean villages in an area of 1,341 square miles at 103,000, or 77 per square mile. There could hardly have been such an increase in three decades. The disparity of the figures illustrates the difficulties in making an estimation of the density of population. Masterman's estimate was much too large.

The total population of mandated Palestine in 1919 was set at *ca.* 650,000; in 1939 the non-Jewish population had risen to 927,000 by normal processes, including some immigration. The total of 1,210,000 includes a Jewish increase of over 200,000, which was abnormal. Even earlier, various sections of the country, both Jewish and Arab, were listed as "overcrowded." Many abnormalities since then, perhaps even before, render comparisons of dubious value.

At a venture, all things considered, the minimum population of Palestine may have run between 500,000 and 600,000 during the first millennium B.C.; the maximum, in peaceful and prosperous times, may have been 1,000,000 or more. Late in the sixth century the population of Judea may have been 20,000; a century later, 50,000, according to Albright. In the first century in little Judea and scattered among the Gentiles elsewhere, could there have been as many as 500,000?

c. Settlements and housing. The walled city, the military fortress, the market town, and the agricultural village provided homes for the bulk of the population. There were no isolated farm houses. The nearest approach to such would have been the manorial house surrounded by a "village" of huts for slaves, hired laborers, and hangers-on. Now there are a few such, and then there may have been some. The detached villa appears in Roman-Byzantine times (*see* CITY; HOUSE; VILLAGE). In addition, there have always been Bedouin encampments, as there are now, some more or less permanent, or centered around caves used for storage and shelters from the cold and rains of winter. *See* NOMADISM.

The extent to which caves served as living quarters will always be an unsolved problem. The so-called HORITES were, no doubt, actually Hurrians. That the numerous caves, natural and artificial, in the limestone rock served as dwellings to a lesser or greater degree, depending on economic conditions, cannot be denied, the more so as it is still true. Cave dwellings probably point to poverty rather than overcrowding. In general the level of comfort was extremely low.

3. Geography and ideology. ***a. Cultural conflicts.*** The Hebrews' racial and national history and their total geographical situation imposed upon them a series of cultural and ideological conflicts. There were the conflicts between nomadism and a pastoral-agricultural ideal, between these ideals and commerce.

More than is the case with the great majority of peoples, the history of the Hebrews is the story of cultural conflicts. Their own traditions looked back upon a nomadic or seminomadic life of generations before their half-voluntary servitude to Egypt and its fleshpots. They had formerly enjoyed the freedom of the steppe for long periods; then an escape from the hardships of the steppe into a "land flowing with milk and honey." But the Promised Land proved to be no Garden of Eden. Settled agricultural life in rugged, arid Palestine had its hardships and its servitudes also. There was always the temptation to escape into the license of the steppe, far from royal commissioners and temple and palace taxes. David in his time and Jonathan the Maccabee in his were saved by the wilderness and enabled to fight another day.

Subscription to radical critical views, which see the Hebrews as basically Habiru, or "wandering Arameans"—roving, homeless adventurers of diverse origins, known for nearly two thirds of a millennium before the Conquest as outlaws living on the outskirts of civilization—does not fundamentally alter the historical situation. Their traditions, if not their genes, were impregnated with nostalgic sentimental admiration for the simple life of the steppe as Abraham and his offspring had enjoyed it. Settlement in Palestine involved conflicts, not merely between Yahweh and Baal, but between differing types of culture, between incompatible ideologies. Both mores and morals were involved in the very techniques of agriculture and the practices of the cult.

A self-sufficient agricultural economy was impossible in a land as barren of resources as Palestine. Situated as they were, competition with neighboring nations for resources was inevitable. Political alliances were demanded to preserve independence, and unfortunate consequences followed. In their situation commerce also was inescapable. These contacts with the great cultural area, with the Fertile Crescent and neighboring regions, introduced new ideas, new conceptions of the world, and new conflicts, both economic and ideological.

The conflicts between nomadism and agriculture, and between the Israelite pastoral-agricultural ideal

and commerce, do not become explicit as such until the eighth century, when, in Hosea, they are still regarded as primarily a conflict between Baal and Yahweh. They appear as a moral and religious conflict again and again in the Pentateuch. Also as a cultural, religious, and economic conflict they appear in the eighth-century prophets. Amos, Hosea, Isaiah, and Micah make their plea for the poor against the rich, the nobility, and the royalty. Examples can be found scattered throughout Hebrew history: in Nathan's parable of the poor man's lamb, Naboth and his vineyard, the plea of the poor to Nehemiah (II Sam. 12:1-7; I Kings 21:1-19; Neh. 5:1-13). The new priestly "royalty" seem to be the chief offenders.

b. Ideological results. These cultural conflicts, with their moral and religious implications, grew into ideological conflicts of far-reaching significance and historical results, which continue "to this day." Commerce and foreign contacts were regarded as chief causes of city luxury and as also the guilty purveyors to its extravagances. The class conflict between rich and poor, city and country, city sophistication and rural simplicity, becomes also a conflict between assimilation and isolation. Racialism and nationalism are arrayed against universalism and internationalism.

Considering all this pyramid of woes erected on the basis of the abandonment of nomadism, the thoughtful and conscientious Israelite might well conclude that a return to the steppe was the only cure for Israel's woes. The Kenites from the first had refused to live in houses or drink wine, because these were not nomadic customs. Hosea was the first to put into writing this prescription for his people's salvation. (So, at least, Hos. 12:7-10—H 12:8-10 may be interpreted.) Israel had become rich by the trader's false balances and by oppression. Therefore Yahweh would coax her back into the wilderness, yet also give her vineyards (Hos. 2:14-15—H 2:16-17). The idea of a return to nomadism, or at least pastoralism, appears elsewhere (Isa. 7:21-25; Jer. 31:5, 12, 24). Zephaniah sees all Philistia become a pasture for Israel's flocks (2:5-7).

No religion could be more completely materialistic, hedonistic, and this-worldly than that of the Deuteronomist (ch. 38). There was, indeed, as yet no "other world." Obedience to God would bring health, wealth, and happiness. The problem of justice on earth was the prophetic problem, the most trying problem of the psalmists. The only explanation of Israel's failure to rule all nations was that she had sinned against God.

Bibliography. See the recent historical atlases of L. H. Grollenberg; E. G. Kraeling; and G. E. Wright and F. V. Filson; the maps of the Jordan and Israeli governments, which are excellent on topographical data. However, for original work only the *Historical Atlas* of G. A. Smith (rev. ed., 1936) is useful, since only it preserves the traditional names of mounds and ruins. His *Historical Geography of the Holy Land* is still the most interesting, but D. Baly, *Geography of the Bible* (1957), is far superior on climate, terrain, and purely geographical matters, especially in the relation of geology to the morphology of the land. See also N. Glueck, *Explorations in Eastern Palestine*, vols. I–IV (in 5 vols.; 1935-49); *AASOR*, vols. XIV, XV, XVIII–XIX, XXV–XXVIII.

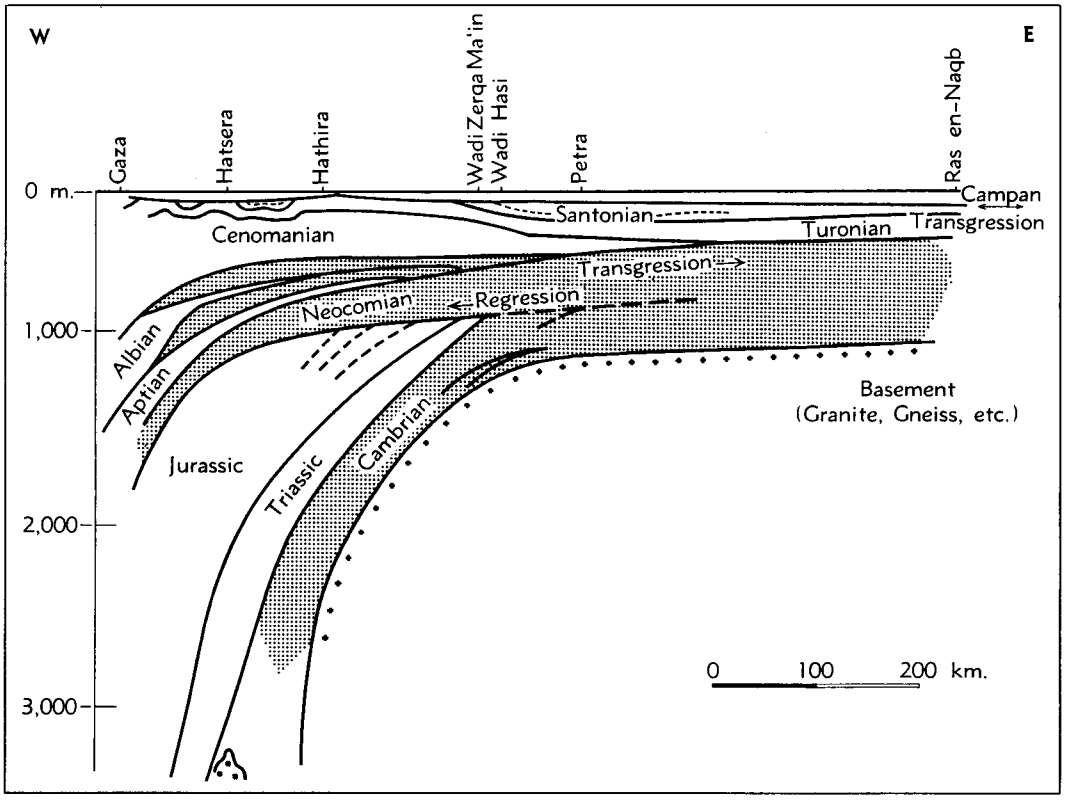
A. ***GENERAL PHYSIOGRAPHIC FEATURES, STRATIGRAPHY, AND STRUCTURE*** (Figs. PAL 17-18). **1. Physiographic features.** Cisjordan (present-day Israel and W Jordan) can be conveniently divided into three mountainous regions separated by plains and valleys. The mountainous sections from N to S are: the mountains of Galilee, the mountain ridge of Carmel-Ephraim-Judah, and the mountain ridges of the Negeb. Bordering the mountainous area are the NNE-SSW-oriented plain of the Mediterranean coast in the W and the Jordan-Dead Sea-Arabah valley in the E, the central part of which lies *ca.* 1,300 feet below sea level. The two main separating features are: the WNW-ESE-oriented plain of Jezreel, separating the mountains of Galilee from the Carmel-Ephraim-Judah mountains, and the valley of Beer-sheba–Tell el-Milh (Wadi Bir es-Sᵉba'–Wadi el-Milh), separating the Judean ridge from the mountains of the Negeb. This last dips strongly from E to W, from a level of 1,300 feet above sea level at Ras ez-Zuweira to the Mediterranean coast. The highest peaks in Cisjordan are Jebel Jermaq (3,973 feet) in Upper Galilee and the Ras Raman (3,389 feet) in the central Negeb.

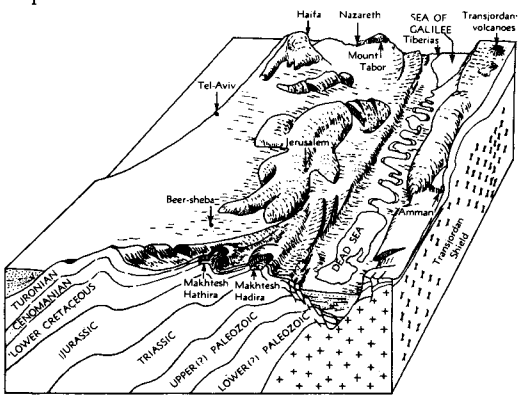
Transjordan (present-day E Jordan) is a fairly homogeneous plateau, bordered on its W side by the steep cliff of the Jordan–Dead Sea–Arabah valley and dipping gently to the E. Its W rim is somewhat higher than the highest tops of Cisjordan.

This outline has left out of account the sharp dissections of the mountains: the highest anticlinal ridges in the central Negeb are eroded and hollowed out into steep-walled round caldrons or canoe-shaped valleys called *makhteshim;* synclines in the Negeb usually appear in topography as elongated depressions; and in the N part of the country, in



17. Schematic cross-section of geologic strata of Palestine

Galilee, the mountains are dissected by transverse valleys, mostly tectonic trenches such as the Valley Biq'at Beit Netufa.



18. Structural block-diagram of Palestine

2. State of geologic mapping: quality of outcrops. The climate of the country ranges from warm Mediterranean to "Sudan-Deccanic" (i.e., comparable with the continental regions of African Sudan or of India), and consequently we may expect ideal outcrops in the dry S part of the country and good to fair outcrops in the N part. With the help of only a moderate amount of field work, we may indeed in the Negeb draw a nearly accurate geologic map from the air photographs. Scrub and agriculture limit the usefulness of air pictures in the N, but carrying out a geologic survey presents serious problems nowhere in the mountains and hills. Geophysical surveys, water holes, and some deep drilling for oil in the soil-covered plains give at least an idea what the alluvials may hide.

The geological maps of the N part of Cisjordan by G. S. Blake (1936) and of the Negeb by S. H. Shaw (1947), both on a 1:250.000 scale, are available. Of Transjordan only generalized maps on a 1:500.000 scale by Blake and one by Quennell are available.

3. Stratigraphy. ***a. Archaeicum* (*Archean, Early Pre-Cambrian*).** The outcrops of the oldest rocks are located W and NW of the Gulf of Eilat (Aqabah) in three separate massifs: the massif of Eilat, the massif of Bir Ora, and the massif of Timne. The oldest rocks are gray gneisses and mica schists, occurring some miles S of Eilat. The mica schists are rich in garnet and staurolite. They are intruded by younger gray and red granite and granite porphyry. The still younger dikes cutting through these rocks are so numerous that at some instances the original character of the country rock has been obliterated and changed into a "dike country," the elements of which range through the entire gamut of the alkali-calcium series (i.e., from diabase to quartz porphyry).

***b. Algonkian* (*Late Pre-Cambrian or Proterozoic*).** Possibly of Algonkian age are volcanic masses of quartz porphyry and flows with green tuffs, and a series of coarse conglomerates, the matrix of which consists often of a kind of soaking by quartz porphyry.

These Algonkian rocks are cut by still younger Algonkian narrow dikes of quartz porphyry and diabase, which seem to be the last volcanic activity before the basalts and the more acid eruptions in Lower Cretaceous times: from these younger Algonkian rocks up to the base of the Cretaceous, only sedimentary rocks are known.

The Archean and Algonkian rocks are much more extensive in Transjordan than in Cisjordan; outcrops of granite and the like are visible along the E cliff of the Arabah from the S tip of the Dead Sea down to Aqabah. The rocks in general are similar to those of Cisjordan, but a detailed survey is not yet available.

c. Paleozoic. The Pre-Cambrian is covered by arkose sands and conglomerates of probably Lower Cambrian age. In Cisjordan these sands and conglomerates are laid down on a surface of small knolls (hummocks), but in Transjordan similar sediments of the same age were deposited on a flat Pre-Cambrian plain. The small hills of the hummocky topography of the Cisjordan area disappeared as the sediments filled the valleys in between the hills (onlaps).

The older Paleozoic rocks are interbedded shales and dolomites; some poorly preserved fossils are found in the dolomites.

d. Triassic. The Cambrian is covered with variegated and white sands, which in the S Negeb are devoid of any sign of a major transgression older than the Cenomanian: the Triassic transgression seems not to extend farther to the S than the line linking Areif en-Nahgha (N Sinai) with E Ramon. The facies (i.e., the mineral composition, type of bedding, fossils, etc., of a sedimentary formation) of the Triassic is neritic and thin; fossils are mainly Encrinus stems. Myophoria, Pseudoplacunopsis, Germanoautilus, and various Ceratites are embedded in a yellowish-to-gray limestone. The base of the Triassic is sandy and contains bones of Stegocephales. In the Makhtesh of Ramon this series is covered by more than 325 feet of gypsum beds, which seem to be absent farther to the S, but have been encountered in the deep drill holes farther N in the Makhtesh of Hathira and Har Boqer. Triassic is developed in a similar facies in Transjordan (outcrops of Wadi Zerqa Ma'in at the NE corner of the Dead Sea), but farther S, no marine Triassic seems to have been laid down, though A. M. Quennel believes that the purple-colored sandstones of a land and desert facies are of the same age (between Kerak and Aqabah).

e. Jurassic. In the Roman area the gypsum series of the Upper Triassic is slightly uncomformably overlaid by (?) Liassic (Lower Jurassic) limestone, starting with a residual fire clay. The Lower Dogger (Early Middle Jurassic) in this area is sandy, and the Higher Dogger contains a thin layer of red limestone with Trigonia, Rhychionella, etc. No Malm (Upper Jurassic) is known from here or farther to the S. Jurassic seems to be developed in a similar facies as in the Makhtesh of Ramon in the Makhtesh of Areif en-Nagha (N Sinai), but no fossils are known from this region yet. No Jurassic rocks exist in the section of Har Arif, where the Triassic limestones are unconformably overlaid by Neocomian (Lower Cretaceous) sands. Everywhere in the central Negeb and N Sinai the Dogger is cut off unconformably by a dark conglomerate of Lower Cretaceous age, but farther to the N, in the Makhtesh of Hathira, the outcrops at the bottom of the valley start, where the section of the Ramon Makhtesh stops—i.e., at base Malm. Kimmeridge and Portland (i.e., Uppermost Jurassic) are here developed as yellow marls, limestones, coral reefs with brachiopods, Nerinea, etc.

No Jurassic is exposed farther N or NW of Hathira, but Jurassic formations have been pierced by several drill holes carried out by various oil companies. Near Beeri (E of Gaza) and farther N in the Helets oil field the Jurassic is developed as a very thick geosynclinal series of dark shales and highly oölitic and pisolitic limestones. In the N the nearest outcrops of Jurassic age occur in the S Lebanon and Anti-Lebanon. In Mount Hermon this formation consists of a *ca.*-5,000-foot series of dolomites and limestones of Bajocian (Middle Jurassic) to Lower Callovian (Lower Upper Jurassic) age covered by limestone and marl of Upper Callovian to Oxford. The Kimmeridge (Uppermost Jurassic) is again a hard, reefy limestone, covered by the Lower Cretaceous sands.

This very thick section (of W Israel and the Lebanon) is in contrast with the much thinner Jurassic section of Transjordan, which shows a sequence of rocks of fairly the same habitus as at Wadi Ramon: at Wadi Zerqa the Jurassic rocks consist of some Bajocian. Jurassic is not represented in a marine facies. S of the River Zerqa, Jurassic is not recognizable, though some of the sandy land deposits may belong to this formation (according to Quennell).

f. Lower Cretaceous. The sandy, mainly continental, section of the Cambrian to Cenomanian ages in the S part of the Negeb and of Transjordan does not allow a clear stratigraphic separation in formations. The southernmost indisputable contact between Cretaceous on Triassic (or Cretaceous on Jurassic) is exposed in the above-mentioned Makhtesh of Areif en-Nahga, and is marked by the black conglomerate of quartzite pebbles, which are well rounded. The sands covering this conglomerate are of Neocomian age and contain two separate basalt layers, in the Ramon area interbedded by a freshwater chalk with fossil frog bones. The Neocomian is a real blanketing sand—i.e., of very general and fairly uniform distribution—in Israel and surrounding countries, though it thins out considerably to the W and NW: the Lower Cretaceous of the Helets oil wells shows a complete, marine, geosynclinal section with all the members Barremian, Hauterivian, and Valengian represented, in which the sands form only a thin interlayer.

Wherever exposed, the Neocomian sands are variegated, mostly terrestrial, and contain plant remains.

g. Albian and Aptian (Lowest Upper Cretaceous). Albian and Aptian are developed only as some poor marine interbeddings in the sandy land deposits of the Negeb, but the section becomes more complete to the N and NW. In Galilee, e.g., the section is very similar to the sequence in the Lebanon. The Albian is a fossiliferous marl overlaying an oölitic, greenish limestone, the *Zumoffenbank,* which covers the Aptian. The Aptian consists, just as in the Lebanon, of an Orbitolina-bearing marl, covering cliff-forming dense white limestone, resembling in its lithological features the Turonian (called *Mizzi Hilu*). This cliff,

called "suicide cliff" by the Israelis, is known among geologists as *Fallaise de Blanche*. This bank rests directly on top of the variegated Neocomian sands below Kibuts Ramim (Manara) in Upper Galilee. Typical fossils of the Albian are, among others, Knemiceras and Heteraster.

h. Cenomanian (Lower Upper Cretaceous). The Cenomanian of central Israel and Galilee can be divided into three units: the lowest part is hard, forms generally steep walls, and consists of well-banked dolomite, as, e.g., exposed along the NW side of Mount Carmel or along the Tel-Aviv–Jerusalem railroad.

The middle section of the Cenomanian consists of much softer chalks, dolomitic chalks, and dolomites generally rich in flint nodules and quartz concretions called in Hebrew *Tappuche eliyahu* ("Elijah's Apples") and in the Lebanon *concrétions de choux fleurs* ("cauliflower concretions").

The upper series of the Cenomanian consists of hard, often reefy dolomite or, rarely, crystalline white limestone, called *Meleke* (such as on Mount Carmel). With the exception of Mount Carmel, the Cenomanian section is in the N rather poor in fossils. The main ammonite is Acanthoceras. In the S and in Transjordan the fauna is much richer: among the ammonites, Neolobites is the most abundant. The most common fossils are Exogyra (various species), Arca, Cardium, Trigonia, Plicatula. However, a lithologic compilation of the various members of the Cenomanian of the S part of the country and of Transjordan has still to be made.

Marked and exceptional features of Cenomanian and Turonian in Mount Carmel are thick interbeddings of soft volcanic tuffs and basalts; marine Cretaceous covers the flanks and tops of the relief of the submarine volcanoes.

In Transjordan, W Galilee, Mount Carmel, and most of the Negeb, the boundary between Cenomanian and Turonian is marked by a yellowish marl rich in ammonites such as Leoniceras, Thomasites, and Vascoceras. These beds alternate in the far S and in Transjordan with banks of gypsum.

i. Turonian (Middle Upper Cretaceous). The "classical" facies of the Turonian throughout the country is a dense, white, well-bedded limestone, called *Mizzi Hilu*. These beds are rich in Nerinea and Actaeonella. In E Galilee the Turonian is represented by bedded dolomite, hardly distinguishable from the underlying Cenomanian dolomites. In W Galilee the *Mizzi Hilu* is underlaid by *Meleke* beds—i.e., white crystalline limestone.

Lithologic compilations of most of the Turonian have still to be carried out.

j. Senonian (Uppermost Cretaceous). Though all the units of the Uppermost Cretaceous (Coniacian, Santonian, Campanian, Maestrichtian, Danian to Paleocene) are represented in Israel, many occasional stratigraphic gaps occur because of Pre-Eocene erosion or absence of sedimentation. As a rule, the section is completest in the present synclines and greatly reduced on top of the anticlines, where shallow marine to terrestrial conditions prevailed. The cause of this irregular condition is that the folding period started at least as early as Turonian.

Coniacian is best developed as an E-W-striking belt crossing the S half of the Negeb and part of Transjordan. It is a beige-to-red-brown marl with friable limestone, containing *Alectrionia dichotoma Barroisiceras* and many other macro-fossils. There are, however, indications that the silicified contact of the Senonian chalks with the Turonian in other parts of the country should also be attributed to the Coniacian. This series passes upward into a hard chalk with reddish bands and stripes, called *Kakule*, probably of Santonian age. Texanites is the most common fossil in these rocks, especially in the N.

The Upper Santonian to Lower Campanian is generally a white, soft chalk, often rich in large Gryphea. This is the lowest unit which shows clearly the above-mentioned facial differences—i.e., the section is most complete in the synclines and reduced on top of the anticlines.

The Campanian contains—especially in the S—many interbeddings of flint layers, alternating in the synclines with chalk beds. These chalk beds are, however, absent on top of the anticlines, and the Campanian may therefore be developed on the anticlines as a nearly pure section of flint beds. The Upper Campanian and Lower Maestrichtian contain in the synclinal facies of the central Negeb phosphatic chalks.

The Upper Maestrichtian consists both in Galilee and in the Negeb of a compact or stratified white chalk, rather poor in macrò-fossils, which are mainly small Pectenides and Terebratulina.

The Danian to Paleocene rocks consist of a marl or clay with limonite, marcasite, and pyrite concretions. In the N it is nearly impossible to map this series as a separate unit, as it is mainly covered with the same weathering crust (*nari*) as the under- and overlaying chalks of Senonian and Lower Eocene age; in the dry S, however, the gray color of these marls stands out clearly.

k. Eocene (Lower Tertiary). Wherever developed, the Lower Eocene is a white chalk with some flint, covered with hard limestone beds with flint. It is this flint which forms—together with the waste of the Campanian flint—the gravel deserts or *Hamadas* of the high plateau of Transjordan, the Negeb, and E Sinai. Macro-fossils are rare.

The Middle Eocene lies generally unconformably on the older formations and W of Jerusalem and in W Galilee consists of a white, unstratified chalk. In the rest of the country the Middle Eocene consists of a hard, crystalline, marblelike limestone rich in nummulites.

The Upper Eocene is a white chalk or marl, but the precise distribution is as yet unknown.

l. Upper Tertiary. Sediments of the younger Tertiary covered probably only smaller parts of the country, as irregular uplifts reduced the zones of sedimentation to the coastal area and several more or less isolated basins. The basins were the Bay of Haifa, the Plain of Jezreel, the Tiberias-Beisan Basin, the basin of the S end of the Dead Sea. Marine sediments are mainly limited to the coastal plain. Undoubtable Oligocene to Pliocene beds occur only along this plain. Along its E border the rocks are of littoral facies, such as calcareous sandstones, marine conglomerates, and coral reefs; but boreholes farther to the W revealed more geosynclinal conditions—i.e.,

thicker sediments; the Mio-Pliocene formations are clay and marl, very thick, and in them gas accumulated on fissures and in sacks; they are called *Sakye* beds. These clays pass eastward into a thin calcareous sandstone (Astian facies) running deeply into the bays of Beer-sheba and Haifa. Still farther eastward the facies becomes still more epicontinental (i.e., a shallow marine sea on a continent), and E and S of Beer-sheba the Pliocene consists mostly of a reddish sand, the *Hosb* series covering inland basins along the Arabah and the W plains of the Negeb.

The cliff of rock salt of Mount Sodom (Jebel Usdum, at the S end of the Dead Sea) and the covering sands and shales are probably Oligocene. Drilling on Mount Sodom revealed an apparent thickness of several thousands of feet of salt; this thickness is only an apparent one, due to intense "salt tectonics" (i.e., complicated folding and flow of salt beds under tectonic forces).

Around Tiberias and Beisan the yellowish marls, covered by gypsum, are probably continental Miocene; the covering pseudo-oölithic limestone is probably Pliocene. In these N basins the formations are interbedded with extensive and thick sheets of basalt lavas, but no Upper Tertiary volcanics are known in the S basins. Upper Pliocene to Lower Pleistocene is probably the clay rich in Melanopsis and Unio S of the Sea of Galilee and the steeply inclined envelope of clays and marls around Mount Sodom. Both series are unconformably overlaid by the Pleistocene *Lisan* marl, a typical *playa* deposit consisting of varved chalks extending far S of the Dead Sea to the Sea of Galilee.

The orange-grove-covered red sands and the calcareous sandstone (*Kurkar*) of the coastal plain are of Pleistocene age.

4. Structure and tectonics. Only epeirogenic movements (i.e., wide uplifts without folding) prevailed from Cambrian to Upper Cretaceous. Indications of earlier folding movements are only slight (the first clear folding started—as has been pointed out—at the end of the Turonian). These epeirogenic movements are expressed as a deepening of the Jurassic sea W of the present Dead Sea, and as a deepening of the Lower Cretaceous sea W of the present mountain border.

The iso-facies lines and lines of general equal sediment thicknesses of the Jurassic and Cretaceous show on a general map a clear "S" shape—i.e., NE-SW in Galilee and Lebanon, N-S from Nablus to Beer-sheba, again NE-SW from Beer-sheba to the S. The deep-sea facies lies always W of the iso-facies and iso-pach lines, and the shallow-sea facies E of them.

It is remarkable that the post-Turonian fold lines curved and adapted themselves largely to this "S" curve: the Lebanon and Anti-Lebanon strike NE-SW, the Judean mountains N-S, the Negeb folds again NE-SW. It looks as if the "waves" of the folding, "rolling" forward from W to E, "broke" against the "shore" of the "S"-curved basement border. The following features make this dynamic interpretation still more appealing:

Most of the folds S of Beer-sheba and N of Damascus are asymmetrical to the E, whereas the N-S-trending middle section consists of more or less symmetrical anticlines.

A second remarkable feature fitting into this concept is the so-called virgation of the fold bundle N of Damascus and S of Beer-sheba, whereas the N-S-striking middle section is tight: between Nablus and Beer-sheba the pressure was most probably at right angles to the border of the basement, whereas in the Lebanon and Negeb the pressure was oblique to it.

A third feature fitting into the same pattern is the presence of a number of more or less E-W-striking strike-slip faults ("transcurrent" faults, or "wrench" faults) N of Haifa and S of Beer-sheba. The sense of movement is "right-hand"—i.e., the N blocks moved always eastward in relation to the blocks S of the fault.

It is conceivable that the *makhteshim* are a feature related to the same couple of forces which caused the just-mentioned faults: They are all located in the very knee or strongest bend of the fold direction—i.e., where an extra rotational folding movement was added to the "normal" folding of the anticlinal ridges. By these E-W-oriented forces, extra domes developed on top of the anticlines, and these domes were later eroded into the steep-walled erosion mortars of *makhteshim*. Some of these domes were split into two parts by movement along one of the E-W-striking strike-slip faults: the N part of the *makhtesh* shifted to the E in relation to the S part (such as in the case of the double Makhtesh of Har Arif).

The style of the folding reflects, not only the thickness of the Lower Mesozoic, but also its facies: The folds are of a wide amplitude where the Jurassic facies is reefy, but elegant and narrow where folds are peeled off (*Abscherung*) from the Jurassic along the plastic Albian clay beds (N of Damascus) and where the total sediment thickness is shallow (central Negeb).

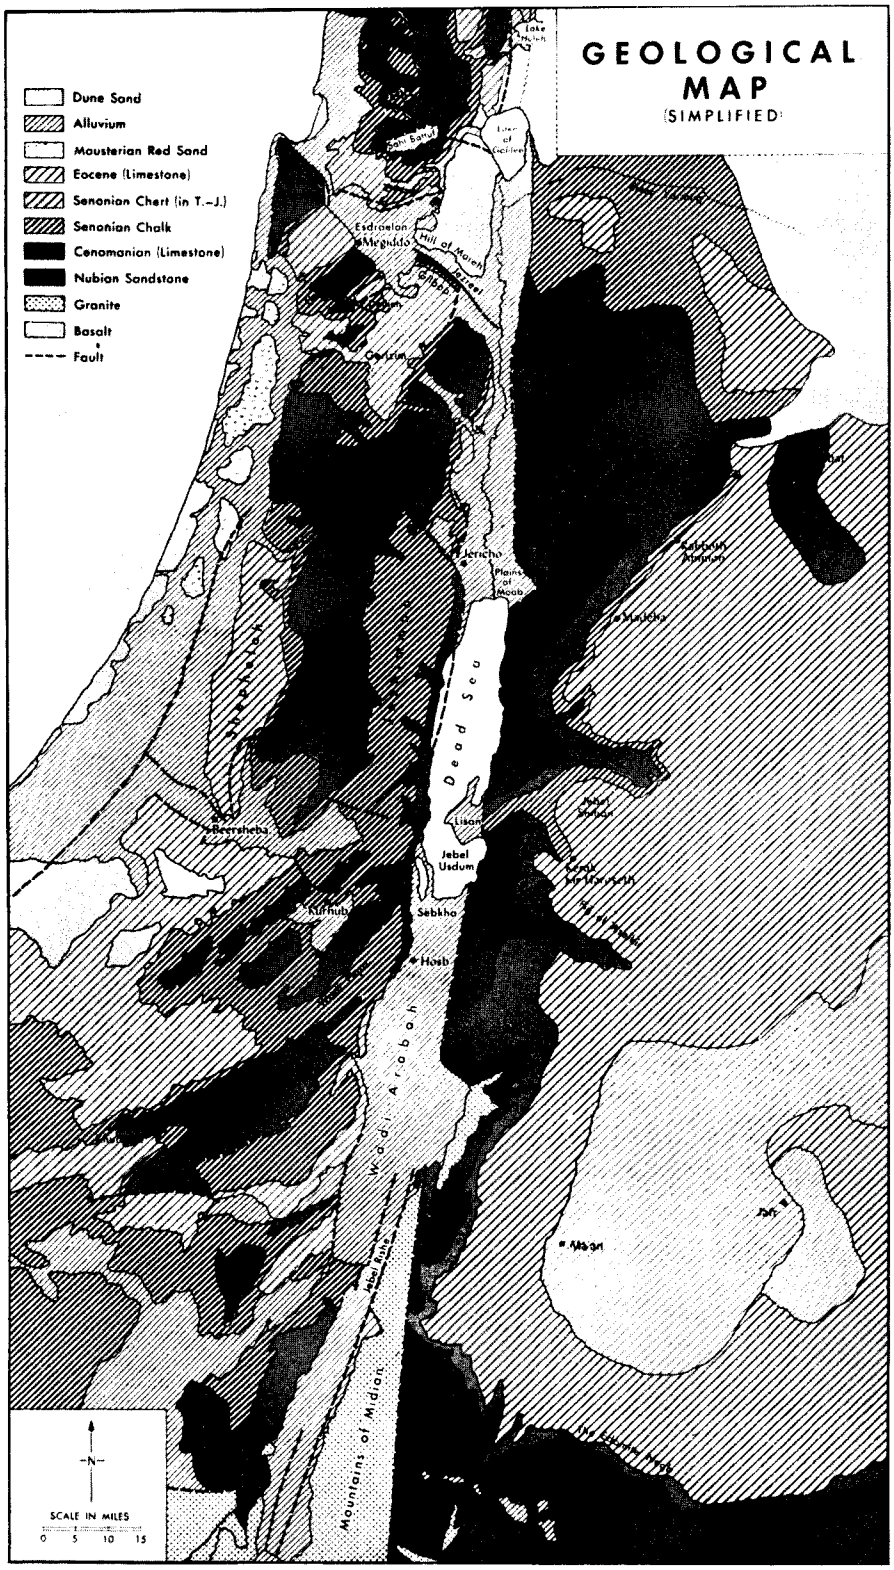
Concurrently with the last folding phase, however, a strong warp has set in since the Mio-Pliocene, not only lifting the mountains upward, but also bending the coastal zone downward: thick marine Pliocene *Sakye* beds lie uncomformably on top of the Cenomanian on some of the buried coastal anticlines. This warp may be partially due to the sinking of the N-S-oriented deep tension-graben of the Jordan–Dead Sea–Arabah area, as it is a well-known fact that the sinking of a graben may result in the uplifting of the bordering blocks. A. J. VROMAN

B. *SURFACE GEOLOGY: ROCK OUTCROPPINGS* (Fig. PAL 19). **1. The major rocks.** For an understanding of biblical history the most important Palestinian rocks are:

a) The hard, crystalline rocks of the Archean platform, exposed in the extreme S of Transjordan and W of Eilat.

b) The Nubian sandstone on the E edge of the Arabah, laid down, on and off, during the whole period from the Mid-Cambrian to the early Cretaceous, and justifying, by its copper deposits, the description of Palestine as a land "whose stones are iron, and out of whose hills you can dig copper" (Deut. 8:9).

c) The Cenomanian-Turonian limestones, the major rock of Cisjordan. They provide excellent building stone; Solomon's Quarries in Jerusalem, the reputed source of stone for the first temple, were in the Upper Cenomanian.



Courtesy of Denis Baly

19. Geological map of Palestine

d) The Senonian chalk, very infertile and useless for building purposes ("chalkstones crushed to pieces" [Isa. 27:9]), but important historically. It is so soft that it always forms a valley, and is easily worn down by the passage of men and animals to a hard surface, undisturbed by rocks. Thus, the Senonian valleys, especially in Cisjordan, formed many of the major roads—e.g., the Megiddo Pass across Carmel.

e) The hard Eocene limestone of the Shephelah, the lower central part of the Carmel spur, central Samaria, and parts of Lower Galilee. Much of E Transjordan is covered by Eocene deposits which, as a result of erosion, have formed the wide flint desert of Ardh es-Suwan W of the Sirhan depression.

f) Post-Eocene deposits. These include the low hills of Pleistocene limestone along the coast N of Jaffa. The merest thread, and no more than 150 feet high, they nevertheless contributed to the marshy conditions of the Sharon Plain by blocking the drainage to the sea, and they provided the strong defenses of Dor (possibly the "Naphoth-dor" of Josh. 11:2; ERV-ASV "heights of Dor"). Also must be included the recent alluvium of the coastal plain and intermontane basins, and the Lisan marls of the Jordan Valley and Dead Sea region, which form the badlands of the Qattara, enclosing the thick jungle of the Jordan.

g) The basalt of E Galilee and Transjordan. In Galilee the Hill of Moreh and the dam blocking the Jordan Valley S of the Huleh Basin are both basaltic. In Transjordan the high Jebel Druze, believed by some to be the "mountain of Bashan" (Ps. 68:15), and Trachonitis to the N of it, both of them regions of refuge, are also of basalt. Further S, in Moab, outflows from the ancient volcano of Jebel Shihan have created the resistant surface layer responsible for the precipitous slopes of the Arnon Canyon.

2. Regional survey. ***a. The central region.*** In the central region, roughly E and W of the Dead Sea, the structure is relatively simple. In Cisjordan the relief is dominated by the broad arch of the Judean upwarp. The greater erosion on the W side has pushed the water parting eastward so that the water-parting route, joining such towns as Jerusalem, Bethlehem, and Hebron, lies E of the real top of the arch. This Judean region is defended on both the E and the W by the Senonian chalk. On the E an unusually wide exposure of this porous, infertile rock has combined with the drought of the E slopes to produce the desolate Jeshimon, or Wilderness of Judea. Where the wadis have cut down through the Senonian to the harder Cenomanian underneath, striking gorges are formed. On the W the Senonian outcrop is narrow, but the valley it creates forms a protective moat the full length of Judea, dividing it from the Eocene limestone hills of the Shephelah, the important battleground between Judah and the Philistines. E of the Dead Sea the strata are notably level, but on the edge of the Rift Valley they have been pulled down in a great plunging monocline, which provided a strong defense for Moab on the W side.

On both N and S the central region is limited by hinge faults cutting in obliquely either from the Dead Sea region or from the N-S fault which outlines Judea on the W. SE of the Dead Sea is the fault valley of the Zered, the ancient frontier between Moab and Edom, and to the NE the cutting back of the plateau edge by a NE-SW fault has produced the enclave known as the Plains of Moab, where the Israelites encamped before crossing the Jordan into the Promised Land (Num. 22:1). On the other side of the Jordan Valley a similar hinge fault, running from Jericho toward the NW, provided the route from Jericho to Bethel, and on the W slope of the Judean Plateau the down-faulted Valley of Ajalon formed the most dangerous point in the Judean defenses, the Ascent of Beth-horon.

b. The N region. In Cisjordan the protective Senonian outcrops on each side of Judea have been terminated by the inward-curving hinge faults, and in Ephraim the Cenomanian limestone, exposed across the whole arch, has produced a high plateau with steep and difficult slopes. N of this again is Manasseh, where, instead of an arch, there is a basin surrounded by Cenomanian limestone hills. On the E is the main continuation of the Ephraimite arch through Jebel Kebir, gradually sinking toward Beth-shan. On the N are the hills of Gilboa overlooking the Valley of Jezreel, and on the W is the Umm el-Fahm upfold, the beginning of the Carmel spur. The center of the basin is filled with Eocene limestone which, being resistant to erosion, stands up as hills or mountains—e.g., Ebal and Gerizim near Shechem. Just inside the rim of the basin are the soft Senonian chalk valleys between the Cenomanian and the Eocene limestone outcrops. These formed the main routes of the region, and were easily accessible because the rim was broken by many faults. Manasseh, therefore, could not be well defended, and had no obvious central site for a capital.

N of the minor rift valley of Esdraelon and Jezreel is Galilee, divided into two parts by the great cross fault of esh-Shaghur, about the latitude of Acco. To the N of this fault is the high Cenomanian plateau of Upper Galilee, and to the S is Lower Galilee with limestone hills divided by down-faulted basins—e.g., Sahl Battuf, the Campus Asochis of the Romans. The "brow of the hill" at Nazareth (Luke 4:29) appears to have been the steep fault overlooking the Esdraelon Plain. The E part of Lower Galilee is largely basalt.

E of the Jordan the dome of Gilead stands opposite Ephraim and Manasseh. The greater part of this is Cenomanian limestone, but in the center the Jabbok Canyon has exposed a wide area of Nubian sandstone, which outcrops also in the down-faulted Beqa'a basin near es-Suweileh. The trend of the dome is NE-SW, and it runs out toward the NE corner of the Dead Sea in the hilly region known as Abarim.

c. The S region. In Cisjordan this is bounded on the N by the alluvium-filled depression of the ancient Beer-sheba–Tel el-Milh gulf. S of this, in the great triangle of the Negeb, is a series of NE-SW-upfolded ridges. Except in the extreme S, they are nowhere very high, and form Cenomanian hills in an otherwise generally Senonian region. Several of them have been broken open to form *makhteshim* (*see* § A1 *above*). The W slopes of the Negeb uplands are mainly Eocene limestone, with considerable areas of dune sand and loess.

E of the Arabah, in the district of Edom, the plateau edge has been pushed up to its greatest height (over 5,500 feet in several places). There is considerable exposure of the Nubian sandstone, fantastically eroded, and here were the copper mines of such places as Punon, probably the place where Moses lifted up the brazen serpent (Num. 21:9). The city of Petra is carved out of these same sandstone cliffs. Almost opposite Petra an upfold, crossing the Arabah diagonally from the SW, has raised the floor of the Rift Valley to 650 feet above sea level in Jebel Rishe. Somewhat S of Petra a great fault cutting ESE brings the plateau to an end in a tremendous scarp which once marked the S frontier of Edom. To the S lies Wadi Hasma, a sandy plain with islands of granite capped by sandstone, some rising well over 5,000 feet in height. The edge of the Arabah is now the huge wedge of the Mountains of Midian, which touch 5,000 feet in places. At the junction of this wedge with the S edge of the plateau is a shattered zone, permitting fairly easy movement from Wadi Hasma into the Arabah.

PALLET [κράβαττος, κράβατος; Lat. *grabatus*]. A small bed or mattress, light enough to be carried. It was the "poor man's bed," sometimes used as a camp bed (cf. Mark 2:4 ff; John 5:8 ff; Acts 5:15). "Bedridden" in Acts 9:33 is literally "lying on a pallet." B. H. THROCKMORTON, JR.

PALLU păl′o͞o [פלוא, *from* פלא, be conspicuous; *cf. personal name* פלאיה]; KJV PHALLU făl′— in Gen. 46:9; PALLUITES păl′o͞o īts. Second son of Reuben (Gen. 46:9; Exod. 6:14; I Chr. 5:3); father of Eliab, and head of the Palluites (Num. 26:5, 8).

PALM TREE [תמר, *tāmār, tōmer;* תמרה, *tîmōrâ;* φοίνιξ]. A tree and its fruit (*see* DATES), the *Phoenix dactylifera* L.

JERICHO is frequently referred to as the "city of palms" (Deut. 34:13; Judg. 1:16; 3:13; II Chr. 28:15; cf. Jos. War IV.viii.2-3). Several charred palm logs were found during the excavation of Khirbet Qumran by the Dead Sea. The Essenes, according to Pliny, lived "in the company of palm trees."

There were "seventy palm trees" in Elim, a desert oasis on the route of the Exodus (Exod. 15:27; Num. 33:9). ELATH, at the head of the Gulf of Aqaba on the wilderness route (Deut. 2:8), is believed to have derived its name from its "lofty trees," probably referring to palms (II Kings 14:22; 16:6; also Eloth in I Kings 9:26; II Chr. 8:17; 26:2). They are abundant in Aqaba today.

The palm appears in figurative language in Ps. 92:12: "The righteous flourish like the palm tree"; in Song of S. 7:7-8 as a figure of the stateliness of the bride; in Isa. 9:14 (cf. 19:15) as a symbol of the rulers of Israel; and in Joel 1:12 in an oracle of destruction.

Sacred associations with the palm are found throughout the ancient Near East, especially in glyptic art. It often appears as the TREE OF LIFE on cylinder seals and in other forms of art. The "palm of Deborah" (Judg. 4:5) may have been a sacred tree. The frequent occurrence of the palm tree carved in relief on the walls, doors, doorjambs, and other parts of Solomon's temple (I Kings 6:29, 32, 35; 7:36) and the visionary temple of Ezekiel (Ezek. 40:16, 22, 26, 31, 34, 37; 41:18-20, 25-26) suggests more than mere decorative coincidence. Similar decorations are found on Assyrian temples and royal buildings.

The association of palm fronds with the Feast of Booths (Lev. 23:40; Neh. 8:15) is carried into the decoration of ancient Jewish synagogues by reliefs (a well-preserved one is still at Capernaum) and mosaics. The palm figures prominently on the coins, especially those of Vespasian and Nerva. *See* MONEY, COINS, § 5, nos. 20, 23, 35, 38-42.

Christian traditions and legends refer frequently to the palm tree and its leaf. Palm Sunday received its name from the use of the fronds during Jesus' triumphal entry into Jerusalem, as recorded in John 12:13. In the vision of John of Patmos (Rev. 7:9) the white-robed multitude stands before the throne with palm fronds.

TAMAR appears as a personal name (Gen. 38:6; II Sam. 13:1; 14:27) and as a place name (Ezek. 47:19; 48:28). *See also* TAMIR; HAZAZON-TAMAR; BAAL-TAMAR.

In Jer. 10:5 *kᵉthômer miqšâ* is translated by KJV "upright as the palm tree" (ASV "like a palm-tree [mg. 'pillar'] of turned work"); but the parallel passage in Bar. 6:70—G 6:69 makes the original meaning clear: "like scarecrows in a cucumber field" (RSV; *see* CUCUMBER).

PALMER WORM. KJV translation of גזם in Joel 1:4 (RSV "cutting locust"); 2:25 (RSV "cutter"); Amos 4:9 (RSV "locust"). *See* LOCUST; FAUNA § F2.

PALSY. The KJV translation of παραλυτικός; παραλελυμένος (the RSV refers to being paralyzed). "Palsy" was a sixteenth-century English corruption of the French *paralysie,* and became the popular designation of various sorts of paralysis. The term occurs only in the NT.

This condition, which usually results from cerebral damage, injury sustained by the spinal column, or disease of the central nervous system, is characterized by a lack of ability to move or to exercise full bodily functions.

Apart from general designations (Matt. 4:24; Acts 8:7), the different forms of what the KJV designates "palsy" probably were paraplegia (Matt. 9:2; Mark 2:3; Luke 5:18), acute ascending (Landry's) paralysis (Luke 7:2), and acute atrophic (infantile) paralysis (Matt. 12:10; Mark 3:1; Luke 6:6). Aeneas (Acts 9:

33) had been paralyzed for eight years, but his particular palsy is uncertain. *See* DISEASE § 4.

PALTI păl′tī [פלטי]; KJV PHALTI fāl′— (I Sam. 25:44. Alternately: PALTIEL păl′tī əl [פלטיאל] (II Sam. 3:15); KJV PHALTIEL fāl′—. **1.** Son of Raphu; a leader of the tribe of Benjamin. Moses sent him with eleven other spies to survey the land of Canaan in view of the impending Israelite invasion (Num. 13:9).

2. Son of Laish, a native of Gallim in Benjamin. Saul gave his daughter Michal, David's wife, to Palti after David had been proscribed (I Sam. 25:44). Subsequently, however, when Abner had quarreled irreparably with Ishbaal (Ishbosheth), the reigning scion of the house of Saul, at Mahanaim, and had opened negotiations with David to effect a united kingdom, David stipulated that before further steps were taken, his former wife Michal must first be returned. Ishbaal, no doubt at the instance of Abner, took Michal from her grief-torn husband Palti and delivered her to David (II Sam. 3:15-16).

E. R. DALGLISH

PALTIEL păl′tī əl [פלטיאל, God is (my) deliverance]; KJV PHALTIEL fāl′— in II Sam. 3:15. **1.** A leader of the tribe of Issachar; son of Azzan (Num. 34:26). He was one of those appointed, under the oversight of Eleazar and Joshua, to superintend the distribution of the W Jordanian territory among the ten tribes to be settled in that area of Canaan. The meaning of the name Paltiel and of other names in this account underscores Israel's dependence upon God for the new life in Canaan.

2. Alternate form of PALTI 2.

PALTITE, THE păl′tīt [הפלטי]. Descriptive adjective of Helez, one of David's heroes (II Sam. 23:26). It means an inhabitant of BETH-PELET. The parallel passages in I Chr. 11:27; 27:10 read "the Pelonite," which should probably be emended to "the Paltite."

PAMPHYLIA păm fĭl′ĭ ə [Παμφυλία]. A region on the S coast of Asia Minor bounded on the W by Lycia, on the N by Pisidia, and on the E by Cilicia Tracheia. The area of the Mediterranean on the S was called the Pamphylian Bay or Pamphylian Sea. Pamphylia was *ca.* eighty miles long and up to twenty miles broad. It was, for the most part, a low, moist, fever-laden area; although at some points the Taurus Range, which makes travel to the N difficult, reaches to the sea. The country faced the sea; and although rugged roads did lead N to Phrygia and Lycaonia, its chief contacts with other regions were by water. Chief ports were Attalia and Side; Perga was several miles inland and near the River Cestrus, but was also considered a port (Acts 13:13).

While Greek colonists settled in Pamphylia at least as early as the fifth century B.C. and Jews lived there in the second century B.C. (I Macc. 15:23; see also Acts 2:10), the native element remained dominant; and the population, outside of a few cities, was not highly civilized. Of the chief cities, Perga was a stronghold of the native life and religion; Attalia, founded in the second century B.C. by the Attalid rulers of Pergamum, was more Greek; and Side in the second and first centuries B.C. was wealthy in large part through acting as the slave market for the Cilician pirates (whom Pompey suppressed in 67 B.C.).

Politically Pamphylia was never important. It was successively subject to the Persians, Macedonians, Seleucids, Attalids of Pergamum, and Romans. The history of Pamphylia as a Roman province is complicated and not entirely clear. The Romans usually combined it with neighboring regions, such as Cilicia and Galatia. According to Dio Cassius 60.17, it was combined with Lycia in one province in A.D. 43. Not much later, however, Lycia was separate from Pamphylia, which was then for a time again united with Galatia; but *ca.* 74, under Vespasian, Pamphylia was again joined with Lycia as one province.

Paul with Barnabas visited Pamphylia on his so-called first missionary journey, coming from Paphos on Cyprus and arriving at PERGA. There John Mark left them, either because he was displeased that Paul had supplanted his cousin Barnabas as leader of the party or because the plan to go over the mountain roads to the upland and reach "Antioch of Pisidia" was more than he had agreed to share (Acts 13:13-14). Pamphylia itself was so little Hellenized that it was not a promising field for mission work, and Acts gives no indication that Paul stopped to work there. Perhaps the unhealthy climate led him to hurry to the uplands and escape the fever-haunted coastland, where malaria could have troubled him (cf. Gal. 4:13). On the return journey from Pisidian Antioch, Paul and Barnabas stopped and preached in Perga; nothing is said of any success in this venture. From Perga the missionaries went to the port of Attalia and took ship for Syrian Antioch. Nothing further is said of Pamphylia in the NT, either in the account of Paul's further work in Acts or in I Pet. 1:1, which is directed to a large proportion of Asia Minor but makes no mention of Pamphylia. Christianity was late in gaining strength there. Its real evangelization occurred much later than the apostolic age.

PAN. *See* POTTERY; VESSELS.

PANEL [מסגרת (KJV BORDER), *from* סגר, close; ספון, *sippûn* (KJV CIEL), *from* ספן, cover]. In Solomon's temple were ten stands (KJV "bases") of bronze (*see* LAVER), four cubits long, four cubits wide, and three cubits high; and each had panels (מסגרות) set in frames (KJV "borders"). On these panels were lions, oxen, and cherubim (I Kings 7:28-29, 31-32, 35-36). Jeremiah in denouncing Shallum (Jehoahaz), son of Josiah, derides him for saying: "I will build myself a great house . . . paneling [ספון, *saphûn*] it with cedar" (Jer. 22:14). The text is uncertain; but "paneling" seems better than KJV "cieled." Haggai (1:4) denounces the people for dwelling in their

paneled (ספונים; KJV "cieled") houses while the temple lies in ruins. שחוף (Ezek. 41:16) is translated "paneled" as a conjecture (KJV "cieled").

See also ARCHITECTURE; CEILING. O. R. SELLERS

PANNAG păn'ăg. KJV translation of פנג (Ezek. 27:17), as a place name. The RSV follows three variant MSS, reading פגג, and translates "early figs," as an item in a list of Palestinian exports to Tyre. The ASV mg. suggests "a kind of confection," and this is supported by the Targ. and the Akkadian cognate *pannigu,* a variety of baked goods.

PAPER [χάρτης] (II John 12). Not true paper, but PAPYRUS. *See also* WRITING AND WRITING MATERIALS.

PAPER REED. KJV translation of ערות (Isa. 19:7). The RSV derives the word from the root ערה, "bare," and translates "bare places." Possibly the word has been borrowed from the Egyptian *'r,* "bulrush."

Bibliography. T. W. Thacker, "A Note on ערות," *JTS,* XXXIV (1933), pp. 163-65.

PAPHOS pā'fŏs [Πάφος] (Acts 13:6, 13). A city in the SW part of the island of Cyprus visited by Paul, Barnabas, and John Mark on the first missionary journey. The Pauline city, New Paphos (the modern Baffo), is to be distinguished from the old city of the same name, located *ca.* nine miles to the N. It was the seat of the government of Cyprus during the Roman period (Cicero Fam. XIII.48). Annexed by the Romans in 55 B.C., Cyprus became a senatorial province in 22 B.C., with a governor bearing the title of proconsul, as Acts 13:7 correctly names Sergius Paulus, who received Barnabas and Saul. The seaport, which is situated on a natural harbor immediately E of the rocky tip of the island's SW coast, was first distinguished by the name Πάφος Νέα, New Paphos, from the older city during the Roman period (Ptolemy *Geography* V.13[14].1; Pliny Nat. Hist. V.130); Strabo refers to the earlier city as Old Paphos (Παλαίπαφος; *Geography* XIV.683). According to tradition, the city was founded by a Greek named Agapenor, who settled there with a group of colonists from Arcadia and founded a dynasty. An Assyrian monument preserves a list of ten Cyprian kings of Paphos (IGR III, no. 939), evidently referring to New Paphos, which was the seat of the tiny Greek kingdom known from coins dating to *ca.* 480 B.C.

20. The harbor at Paphos

In the Hellenistic and Roman periods the port became a naval station (Diodorus XX.49.1). In 15 B.C. the honorary title Augusta was bestowed upon the city; later the names Claudia and Flavia were added during Tiberius' reign. In Byzantine times, perhaps because of the damage inflicted by a severe earthquake in the fourth century A.D., the city lost its title as the island's leading city to Constantia, the rebuilt city of Salamis.

PAPIAS pā'pĭ əs. A bishop of Hierapolis in Asia Minor, who flourished in the second quarter of the second century; author of a five-volume work, *Interpretation of the Lord's Oracles,* of which only fragments survive in the writings of Irenaeus, Eusebius, and medieval Byzantine exegetes and historians. *See* APOSTOLIC FATHERS.

According to Irenaeus (V.33.3-4), Papias was a hearer of John, the disciple of the Lord, and a comrade of POLYCARP. He was certainly a convinced millenarian, influenced by the author of Revelation; but what "John" he may have known is quite problematic. Philip of Side (*ca.* 430) preserves a tradition from Papias that both James and John, sons of Zebedee, were killed by the Jews.

Eusebius had a poor opinion of Papias' intelligence. His excerpt (Hist. III.39) shows that Papias was an avid collector of oral traditions from the "elders" about the sayings of the apostles and other disciples of Jesus, which he treasured above anything recounted in books. He apparently distinguished two persons named John among the Lord's disciples, the apostle and an "elder John." Eusebius is probably right that Papias had no personal acquaintance with any eyewitnesses of the Lord. But some of the miracles and legends about personages of the apostolic age Papias claims to have received from the daughters of Philip the Evangelist (cf. Acts 21:8-9), after they settled in Hierapolis.

The remarks of Papias about Mark and Matthew, also preserved by Eusebius, have baffled all students of gospel origins, and to date there seems no prospect of a consensus as to their precise meaning or significance. Mark, he said, had not been a hearer or follower of Jesus, but was an interpreter of Peter. After Peter's death, Mark committed to writing what he remembered from Peter's recollections of the Lord—accurately, but not "in order." We do not know what Papias meant by "order." Matthew, said Papias, "put in order" the oracles (or sayings) of the Lord in Aramaic, which "each one interpreted as he was able." Concerning other early Christian writings, Eusebius says only that Papias knew and used I John and I Peter, and that he related a story about a woman accused of many sins which was contained in the Gospel According to the Hebrews.

Bibliography. Most NT introductions and commentaries on Mark and Matthew discuss Papias. For texts and translations, *see* the bibliography under APOSTOLIC FATHERS.

PAPYRUS pə pī′rəs [גמא, *gōmē*]. A tall, aquatic reed plant, *Cyperus papyrus* L., noted especially for its use for ancient writing material. The papyrus plant, so abundant in ancient lower Egypt, is no longer found there.

Job 8:11 refers to the watery habitat of the papyrus reed (KJV RUSH). In Isa. 18:2 (KJV BULRUSHES) the word means papyrus used for light boats or canoes, commonly employed in ancient Egypt because of the scarcity of timber. In Exod. 2:3 most translations retain "bulrushes" (*see* BULRUSH) for the reeds from which the basket was made for the infant Moses, but doubtless papyrus was meant. The basket was floated among the reeds (*see* REED), along the banks of the Nile. In Isaiah's figure of the transformed wilderness (35:7), grass is to become "reeds (קנה) and rushes (גמא)." Here, too, the papyrus is probably meant to symbolize the abundance of water, though the meaning may be more general.

Papyrus as a writing material (*see* WRITING AND WRITING MATERIALS) was common in Egypt from the early third millennium B.C. (a few fragments from that period are extant) and continued in use well into the first millennium A.D. It was an important item of export from Egypt for many centuries.* In the familiar story of Wen-Amon, five hundred rolls of papyrus were part payment for a shipment of cedars from the ruler of Byblos (the Greek name meant "papyrus stalk" or "pith used for paper"). Figs. EGY 17, 20.

PAPER (the English word is derived from the word "papyrus") was prepared from thin strips of the inner pith of the papyrus stalk laid vertically, with another layer placed horizontally on top. An adhesive was used (Pliny says it was Nile water!) and pressure applied to bond them together into a sheet. After drying, it was polished with shell or stone implements; then the sheets were glued together to form rolls. Fig. ELE 25.

The only specific biblical reference to the paper made from papyrus is in II John 12, where the Greek χάρτης refers to the papyrus roll or sheet used in writing a letter.

The KJV refers to "paper reeds" (papyrus) in Isa. 19:7, following the versions, but the Hebrew (ערות) means "bare places" (so RSV).

To judge from the earliest extant Hebrew MSS which have come from the Qumran caves by the Dead Sea (the fragments date from *ca.* 250 B.C. to A.D. 50), papyrus was not so commonly used there, probably because of the greater abundance and accessibility of leather. Only a small number of papyrus fragments have been found among the thousands of those of leather. Many scholars consider the story in Jer. 36 to imply the use of papyrus for Jeremiah's writing in the late seventh century B.C.

***PARABLE** [משל, *from the verb* to be similar, to be comparable; παροιμία, παραβολή]. An extended metaphor, or simile, frequently becoming a brief narrative, generally used by men of biblical times for didactic purposes. Since an allegory is also an extension of a simile and since every metaphor presupposes a simile, confusion between the forms of parable and ALLEGORY has frequently and understandably occurred. The wide range of literary types designated as parables by biblical authors has also contributed to this confusion. The most familiar type of parable is the brief narrative which forcefully illustrates a single idea. During the biblical period Jesus in particular used the parable with skill and artistry.

Bibliography

1. Terminology of parable in the Bible. In contrast to the infrequent occurrences of the word משל in the OT, the Synoptic evangelists use the word παραβολή forty-eight times (Matthew seventeen times, Mark thirteen times, and Luke eighteen times), and the author of Hebrews uses it twice (Heb. 9:9; 11:19).

a. In biblical Hebrew. With the exception of two occurrences of the word משל (Job 27:1; 29:1), it always involves a comparison, either directly or by implication. Throughout the history of Israel's linguistic developments, however, the word is given varied meanings. Its earliest and continuously dominant significance is a popular saying or PROVERB (cf. I Sam. 10:12; 24:13; Ezek. 12:22-23; 16:44; 18:2-3). Consequently this form has closest affinities with the wisdom literature of the OT, whose authors occasionally give it the meaning of a profound discourse upon a difficult problem (Job 27:1; 29:1; cf. Pss. 49:4; 78:2). As a popular saying the משל frequently expresses derision and contempt (Ezek. 16:44; cf. Deut. 28:37; I Kings 9:7; II Chr. 7:20; Pss. 44:14; 69:11; Jer. 24:9; Ezek. 14:8) and takes the poetic form of a taunt song (Num. 21:27-30; Isa. 14:4; Mic. 2:4; Hab. 2:6). Some OT authors associate the משל with the word חידה, a dark or riddle-like saying (Pss. 49:4; 78:2; Prov. 1:6; Ezek. 17:2; 24:3). Hence משל also signifies an oracular utterance (Num. 23:7, 18; 24:3, 15, 20-21, 23) and in its more developed forms assumes an allegorical character (Ezek. 17:2-3; 24:3-4). In biblical Hebrew, therefore, משל includes popular and proverbial sayings, discourses of sages, taunt songs, and oracles.

b. In LXX Greek. The Greek terms παραβολή and παροιμία are used in the LXX for the word משל when it means a proverbial saying and involves the element of comparison. The greater precision of Greek vocabulary makes possible more exact translations of the varied nuance of משל than the limitations of the Hebrew language afford. For the open-

ing of the lengthy discourses of Job, the LXX translator uses correctly the Greek word for exordium, προοιμίον (Job 27:1; 29:1). Three Greek words are used to convey the various overtones of the derisive meaning of משל: θρύλημα for mockery (Job 17:6), ἀφανισμόν for desolation (I Kings 9:7), and θρῆνος for the taunt song or the dirge (Isa. 14:4; Mic. 2:4). In Num. 21:27 the significance of משל as an oracle was expressed by calling the משלים αἰνιγματσταί.

c. In NT Greek. An analysis of Jesus' use of the parable form for didactic purposes indicates that the evangelists included three varieties of illustrative examples within the single category of the παραβολή. First, there is the narrative parable, which is fully developed without an introductory formula of comparison such as "The kingdom of heaven is like . . ." In these parables the subject is, with four exceptions (the rich fool, the rich man and Lazarus, the publican and the Pharisee, and the good Samaritan), secular, and the story as a whole makes its own point. The second variety is the simple parable, which is introduced by formulas of comparison ("It is like . . . ," or "as" followed by a noun or a verb), by "when," or by a form of command or of question. The third variety is the parabolic saying, which is a brief utterance stating a fact of common human experience to be applied by the listener to some present situation or circumstance (e.g., Matt. 5:14*b*, 15-16; Luke 16:13). The parabolic saying differs from a parable in the absence of a comparative element and from the narrative parable in its brevity. The parabolic saying and the narrative parable, therefore, are extensions of metaphors, while the simple parable is an extension of a simile.

The author of Hebrews uses the word παραβολή in quite a different sense. In Heb. 9:9 the first tabernacle (called the παραβολή) functions as a symbol for the present age, which offers man no means of salvation. The reference to Abraham's recovery of Isaac in Heb. 11:19 points figuratively or parabolically to Christ's resurrection from the dead. The Fourth Evangelist uses the word παροιμία (an alternate translation of משל in the LXX for a proverb and so used in II Pet. 2:22) rather than παραβολή. The word as used by the Fourth Evangelist, however, does not mean a proverb but a hidden or esoteric saying which can be understood only by those who have a clue to its meaning.

2. Use of parable in the OT. Parabolic sayings and parables, which appear less frequently in the literature of the OT as compared with the use made of them by the rabbis and Jesus for instructional purposes, are a popular and familiar form of wisdom teaching. The preferred form of wisdom teaching is the gnomic saying which deals with familiar aspects of human life and conduct in a direct way without attempting to express any tangential or obscure concepts. By quoting several examples of gnomic and parabolic sayings found in the book of Proverbs, it is possible to point out their dissimilarities and the origin of their association. The proverb (10:1):

> A wise son makes a glad father,
> but a foolish son is a sorrow to his mother,

is an illustration of a gnomic saying. Parabolic sayings, which by comparison are rare in the book of Proverbs, may be illustrated by the following quotation (6:7-8):

> Without having any chief,
> officer or ruler,
> she [the ant] prepares her food in summer,
> and gathers her sustenance in harvest.

The difference between this statement and the gnomic utterance is that the former is merely a factual observation, while the latter pronounces a judgment upon a moral or religious issue. The parabolic saying, however, must be placed in juxtaposition (implicitly or explicitly) with a gnomic saying. In the case of the parabolic saying quoted above, the wisdom writer has made clear his didactic purpose by adding an interpretative application (vss. 9-11):

> How long will you lie there, O sluggard?
> When will you arise from your sleep?
> A little sleep, a little slumber,
> a little folding of the hands to rest,
> and poverty will come upon you like a vagabond,
> and want like an armed man.

The purpose of the parabolic saying, then, is the provision of a vivid illustrative example for wisdom teaching and may derive from the tendency toward parallelism in gnomic utterances. To be sure, the characteristics distinguishing a parabolic saying from a gnomic saying tend to blur. However, one may conclude that the parabolic saying is illustrative and dependent upon its association with another statement for clarification of its significance, while the gnomic saying is an independent moral maxim. Even though all parabolic sayings can be expanded into parables and some into narrative parables, wisdom writers generally prefer the briefer parabolic utterances.

In wisdom literature skilful use of the narrative parable is found in Eccl. 9:13-16. The narrative has an introduction: "I have also seen this example of wisdom under the sun, and it seemed great to me" (vs. 13). The author illustrates this idea by the following narrative: "There was a little city with few men in it; and a great king came against it and besieged it, building great siegeworks against it. But there was found in it a poor wise man, and he by his wisdom delivered the city. Yet no one remembered that poor man" (vss. 14-15). The gnomic saying: "But I say that wisdom is better than might, though the poor man's wisdom is despised, and his words are not heeded" (vs. 16), is appended to the story to guarantee a correct interpretation.

Wisdom and prophetic literature tend to use the parabolic saying for a second, though not so prominent, purpose. By associating the word משל (παραβολή) with חידה (αἴνιγμα; cf. Prov. 1:6; Ps. 49:4) and by associating both these words with an oracle concerning God's judgment in the future (Ezek. 17:2-21), the parable begins to have an esoteric significance. While the use of the parable form to conceal knowledge is rare in the OT period, it becomes an important factor for the writers of some pseudepigraphal books of the OT and for the Synoptists.

3. Use of parable in the Apoc. and the Pseudep. Of the apocryphal writers, Sirach continues to use the parabolic saying in the wisdom tradition. In the

following quotation (Ecclus. 13:2) the gnomic saying precedes the parabolic utterance:

> Do not lift a weight beyond your strength,
> nor associate with a man mightier and richer than you.
> How can the clay pot associate with the iron kettle?
> The pot will strike against it, and will itself be broken.

(Cf. 9:10; 11:2-3; 11:10*b*-13; 28:11*b*-12.)

In Enoch one finds a pseudepigraphic author using the word "parable" in a sense quite different from that of the wisdom writers, the rabbis, and the Synoptic evangelists. The parable is no longer a truism of common human experience but a vision of future things revealed to one chosen by God to receive knowledge of divine mysteries (Enoch 1–5; 37:5; 38:1; 45:1; 58:1; 68:1). Here observation and deduction have been replaced by revelation, without which the secrets of God would be inaccessible to mankind. Since these parables deal with subjects concerning knowledge of the future state of the wicked and the blessed, of astronomical secrets, of God's judgment of the world, and of the angelic world, they are eschatologically oriented and used to bridge the gap between the earthly and the heavenly and between the present and the future. At first glance such parables appear to have no association with the earlier Hebraic tradition. Their link with the tradition of wisdom and of prophecy, though tenuous, may lie in the parallel references to parable and riddle (or dark saying) in Proverbs (cf. Prov. 1:6), in the exordial significance given to the word "parable" in Job's discourses on the problem of evil (Job 27:1; 29:1; cf. Ps. 49:4-20), and in its oracular significance (cf. Num. 23:7).

4. Use of parable in the Synoptic gospels. Since the gospels are the works of Christian believers and preserve in written form the reminiscences of things said and done by Jesus, elements of the tradition concerning Jesus' activities have been influenced by their faith. Consequently it is necessary to keep in mind the probability that the evangelists have altered the wording of the parables themselves and the contexts within which they were originally spoken. Recognition of this problem requires observation of significant details which indicate the use made by the evangelists of Jesus' parables and the motives for their transformation of them.

a. The parable form. An initial problem concerns the material which can be appropriately classified as parable. The variation of opinion regarding the number of illustrative examples which scholars designate as parables is indicative of the intrinsic difficulties with this literary form. A solution is to eliminate similes and metaphors which some have included within the category of parables. Examples of Jesus' use of metaphor, as reported by the evangelists, are such phrases as the following: "Tell that *fox*" (Luke 13:32; an illustration of the simple metaphor); *"den of robbers"* (Matt. 21:13; a double metaphor); *"blind guides, straining out a gnat"* (Matt. 23:24; a compounded metaphor); and "Give, and it will be given to you; *good measure, pressed down, shaken together, running over, will be put into your lap. For the measure you give will be the measure you get back"* (Luke 6:38; an extended metaphor). The expression "Every plant which my heavenly Father has not planted will be rooted up" (Matt. 15:13) illustrates the transition from a metaphor to a parabolic saying, and the statement, "When the unclean spirit has gone out of a man, he passes through waterless places seeking rest, but he finds none . . ." (Matt. 12:43-45), is an example of its transition to a parable. In contrast to the metaphor, the simile involves comparison and contrast—e.g., "that he [Satan] might sift you *like* wheat" (Luke 22:31; a single simile) and "for you [Pharisees] are *like* whitewashed tombs, which outwardly appear beautiful, but within they are full of dead men's bones and all uncleanness" (Matt. 23:27; an extended simile). The comparison of the scribe to the "householder who brings out of his treasure what is new and what is old" (Matt. 13:51) illustrates the transition of a simile to a parable.

What remains of illustrative examples used for didactic purposes may be classified as parabolic sayings, parables, and narrative parables. The parabolic sayings, which are brief statements of fact and were applied by the evangelists in some way to larger contexts, are the utterances concerning the physician (Luke 4:23), the salt (Matt. 5:13), the city built on a hill (Matt. 5:14*b*), the lamp on the stand (Matt. 5:15), the eye as the light of the body (Matt. 6:22-23), serving two masters (Matt. 6:24), the requesting son (Matt. 7:9-10), the tree and the fruit (Matt. 7:17-19), the need of a physician by the sick (Mark 2:17*a*), things old and new (Mark 2:21-22), disciple and teacher (Matt. 10:24-25), manifestation of the hidden (Matt. 10:26-27), the blind leading the blind (Matt. 15:14), the divided kingdom (Matt. 12:25*a*), the divided house (Matt. 12:25*b*), the strong man (Matt. 12:29), children's bread (Matt. 15:26-27), pearls before swine (Matt. 7:6), figs and thistles (Matt. 7:16), adding measure to one's stature (Matt. 6:27), and the eagles and the carcass (Matt. 24:28). The simple form of a parabolic saying is the statement "Physician, heal yourself" (Luke 4:23); the double form, the saying on trees and fruit (Matt. 7:17-19); the conditional form, the blind leading the blind (Matt. 15:14); the extended form, the strong man (Matt. 12:29); and the transitional form from parabolic saying to the parable, the lamp on the stand (Matt. 5:15).

Various introductory formulas of parables relate this variety to the simile. These formulas are: "It is like" (Matt. 11:16; 13:44; 13:47; 7:24-26), "as" (Matt. 25:14; Mark 4:26; Luke 12:58), "when" (Mark 13:28; Luke 12:54; 14:8, 12), the question form (Matt. 24:45; Luke 11:5; 14:28-30, 31; 15:4, 8; 17:7), the conditional form (Matt. 18:12; 24:43), and the command form (Matt. 5:25). While all these parables invariably have an element of comparison, this relationship is not necessarily original with Jesus but may be the result of the evangelists' editorial work. The development of details in some of the parables, such as those in the parables concerning the pounds, the great supper, the ten virgins, the tares, the unmerciful servant, etc., suggests that originally these stories were told as independent narrative parables. In contrast to the parable, the narrative parable has no formula of comparison but is a fully developed and independent story which begins with such phrases as "there was" or "a certain," and is narrated in detail (cf. the

parable of the good Samaritan, Luke 10:30-37). The Synoptic evangelists have preserved fourteen narrative parables attributed to Jesus: the good Samaritan (Luke 10:30-37), the rich fool (Luke 12:16-21), the rich man and Lazarus (Luke 16:19-31), the unjust judge (Luke 18:1-8), the Pharisee and the publican (Luke 18:10-14), the sower (Mark 4:1-8), the fig tree (Luke 13:6-9), the great supper (Luke 14:16-24; cf. Matt. 22:1-10), the unjust steward (Luke 16:1-8), the pounds (Luke 19:12-27; cf. Matt. 25:14-30), the wicked husbandman (Mark 12:1-9 and parallels), the two sons (Matt. 21:28-32), and the two debtors (Luke 7:41-43).

b. The evangelists' use of Jesus' parables. From the evangelists' record of Jesus' use of parables for didactic purposes, one is impressed by the vivid and dramatic presentation of ideas through the narration of commonplace incidents. This characteristic of his teaching is heightened by a comparison of his parables with those of the rabbis, who were also skilful in the narration of a good story. However, since the rabbis use the parable form primarily to clarify or to prove a point of the Mosaic law, their parables are usually characterized by scholastic pedantry, rather than vigor and originality. Jesus' parables, on the contrary, support the evangelists' claim that he taught and preached with authoritative power and with creative novelty. Prior to a discussion of the message communicated by Jesus through parables, it is necessary to clarify the process of their adaptation to the gospel record.

A comparison of the details of two stories, the parables of the great supper (Luke 14:16-24) and the wedding feast (Matt. 22:1-14), leads one to conclude that they are undoubtedly alterations of the same parable. This comparison illustrates the treatment of Jesus' parables by the embellishment of details. The Matthean report of the parable changes the setting from a great supper to a wedding feast and the leading characters from a certain man and his servant to a king and his groups of servants. There is one important addition in the Matthean version, without parallel in the Lukan; this addition relates that the king was enraged at the refusal of the first guests and sent his armies to destroy his servants' murderers and to burn their city. The Matthean embellishments reflect developments occurring after A.D. 70: the Jews' rejection of Christian missionary endeavors, the consequent destruction of Jerusalem by Roman conquest, and the attempt to formulate historically God's plan of salvation from the Jews' rejection of their own prophets down to the final judgment day. Such interpretative corrections, which adjust Jesus' parables to the situation of the church, probably were made frequently by the evangelists, but it is not always possible to check them so readily as in this instance.

The variation between the Matthean and Lukan forms of Jesus' statement on going before the judge (Matt. 5:25-26; Luke 12:58-59) illustrates how great an alteration in meaning can occur merely by changing verbal forms. In Luke, the eschatological parable makes the following point: as the man conscious of his guilt, threatened with a lawsuit, seeks reconciliation with his accuser before the court trial, so the man conscious of the coming judgment must seek reconciliation with his God. In the Matthean form, the narrative style has been transformed to the command: "Make friends quickly with your accuser." The context no longer suggests that God, but one's fellow man, is the accuser. The Matthean form, therefore, represents Jesus as saying that one is to act as expediently as possible to avoid a heavy penalty for one's crimes. Since Jesus' ethical teaching urges men to consider seriously their responsibilities toward their fellow men, the Matthean version of the parable is obviously secondary to the Lukan version. The Matthean adaptation of the parable, however, represents a trend within the church, particularly on the part of the First Evangelist, to turn Jesus' parables into hortatory statements.

This trend is further illustrated by the theory concerning the use of parables advanced by Mark (4:10-12) and by his explanation of the parable of the sower (4:13-20). According to Mark, parables are means of concealing the real character and content of Jesus' teaching from the masses and of revealing their hidden meaning to a chosen few. Since Jesus' parables in themselves are generally quite clear and were received by the crowds gladly, Mark's theory is a strange representation of Jesus' use of parables. The evangelist presupposes an esoteric quality of Jesus' teaching which matches his theory of Jesus' secret messiahship. Both theories apparently have their origin in the idea that Jesus is warring against the powers of darkness, to whom he must not betray his powers of insight and of office, lest they take advantage of him and of his powers.

The theory regarding Jesus' use of parables is followed by Mark's explanation of the parable of the sower. By allegorizing the parable, Mark has indicated that he has not understood what a parable is. His allegorization of the parable tends to make the elements of the story significant in themselves. The explanation not only confuses the sets of equations but also changes the main point of the parable. The parable states that as the farmer must expect varying returns from his activity, so God also at the time of judgment. The allegory, on the contrary, stresses the aspects of failure in harvesting and serves, therefore, as a word of warning to all converts to guard against attitudes which will undermine the sincerity of their commitment to Christ. Mark's theory and explanation suggest that parables in themselves are obscure and that the church no longer was aware of their original situation and function.

The individual sayings (Luke 16:9, 10-12, 13) appended to the parable of the unjust steward indicate that a method other than allegorization was used to interpret difficult parables. Allegorization could not have made the unjust steward in his various acts exemplary as a whole. The central point of the parable itself (Luke 16:1-8) is that a steward, being a rogue and faced with a crucial situation, realizes that action is necessary to prevent disastrous consequences. Jesus' own didactic application of the story appears in vs. 8 and is a criticism of many devout people who, when confronted by situations requiring action, do nothing. The first appended saying (vs. 9) interprets the parable to mean that one can find a dwelling in "eternal habitations" by the correct use of "mammon" (presumably by giving alms). The second

appended saying (vss. 10-12) attempts to point up the parable in another way. By faithfully discharging small duties that concern mammon, one will be given a greater stewardship over heavenly things. The third saying (vs. 13) turns the parable in quite another direction by calling attention to the irreconcilability of one's allegiance to both God and mammon. By creating such contexts within which the parables are to be understood, the evangelists frequently altered the original meaning and intention of Jesus' parables, which can be recovered only by a careful analytical examination of the parables.

The evangelists' collections of Jesus' parables brought about similar changes, particularly the collection which uses the introductory formula "The kingdom of heaven is like" (Matt. 13:24, 31, 33, 44, 45, 47; cf. Matt. 18:23; 20:1; 22:2; 25:1; Mark 4:26). In the great majority of instances in which it is used, the theme of the parable does not deal with the kingdom as such but more often is concerned with one's attitudes toward the coming of the kingdom of God and relationships toward one's fellow man. Only four parables merit consideration as kingdom parables: certainly the parables of the self-growing seed (Mark 4:26-29) and of buried treasure (Matt. 13:44); and possibly the parables of the mustard seed (Matt. 13: 31-32) and of leaven (Matt. 13:33). The use of the formula is a further indication of the difficulties the early Christians had in trying to explain the meaning of the parables and of the alterations they made in adjusting the parables to the context of their own era.

Analysis of the gospel record and of its preservation of Jesus' parables indicates that the evangelists had available significant parabolic sayings, parables, and narrative parables, which had been transmitted to the Christian community by auditors as separate words of Jesus and which had become detached from their original context and situation. Eventually collections of such remembered words were made. While most of this parabolic material reliably represents Jesus' teaching, it is also necessary to recognize the activity of the Christian community in molding the tradition. There is one parable, the parable of the weeds (Matt. 13:24-30), however, that gives every indication that the First Evangelist created both the parable and its allegorical interpretation. The linguistic and ideological peculiarities of the interpretation are quite clearly Matthean, and the lack of reality in the parable itself suggests that the parable was written with the allegorical interpretation in mind.

One further observation needs to be made regarding the types of situations within which the parabolic material appears in the gospels. On the one hand, the evangelists reported Jesus' use of this material in controversial conversations, which implies that the parable had been and still was a useful instrument in hostile debates. On the other hand, the evangelists also frequently record the appropriateness of the parable for didactic purposes, particularly as a means of instructing the masses who thronged around a new teacher. Jesus dedicated his narrative skill to bringing a new note of hope for the discouraged, the dispossessed, and the outcast.

5. The message of Jesus' parables. Without an analytical study of the gospel record it would be impossible to use the parabolic material for historical purposes. Recognition of the changes brought about by the developing tradition, however, cannot solve the historical problem when crucial clues are missing. For example, the two parabolic sayings about things old and new in Mark 2:21-22 have been handed down without an interpretative application and without a reference to the original situation. In this instance, and in others similar to it, one may suggest possible didactic or polemic purposes for Jesus' use of these illustrative examples. However, no final criterion of his actual meaning has been established: Should the new order *not* be combined with the old lest the old be wasted? Or, should the new order *not* be prevented from creating new expressions of new religious insights? In instances of such parabolic sayings it is wise to admit ignorance regarding the precise significance of the saying, because its original context and function are lost and the utterance itself is insufficient to suggest anything more than possible interpretations.

Jesus and his rabbinic contemporaries use the parable form to clarify the main themes of their religious and ethical teachings. The chief concern of the rabbis is the exposition of the Law. The theme of Jesus' proclamation and teaching, however, is the kingdom of God, with particular stress upon its eschatological significance (Mark 1:15). His treatment of this theme was not that of the apocalyptic visionary who wrote the parables of Enoch (cf. especially Enoch 37–71), but that of the prophets who used the theme regarding the imminent arrival of God's kingdom as an occasion for practical religious preaching and instruction. For the writers of apocalypses, two factors were important: a description of the great drama in which God's sovereignty is to be established, and a calculation of the time of its arrival with full force. Both factors give free reign to vindictiveness and emotionalism. According to the parables which may genuinely have their origin in Jesus' thinking, he is not interested in scheduling future events or in contemplation of the procedures, of transition from the present world order to a new, heavenly type of existence.

Jesus' development of the theme "The kingdom of God is at hand" includes three main aspects. First, the imminence of God's assumption of sovereignty involves a crisis in the life of his people. Man's eternal destiny is about to be decided. Convinced of the inevitability of the imminent coming of judgment, Jesus devotes his life and his message to warning people of the crucial nature of their situation (Luke 12:57-59; 12:16-20; 16:19-31; 14:16-24; 16:1-8; etc.). Second, while Jesus does not minimize the awful fate that will overtake those who wilfully reject participation in the kingdom of God, he stresses, in particular, the eschatological joy of the kingdom's coming for the oppressed and the distressed (especially Luke 15:4-7, 8-10). In parables which illustrate this concept, he reassures those who are "poor in spirit" and who at the same time yearn for the kingdom's coming, by asserting that God will intercede in their behalf. Jesus clearly explains, however, that the initiation of God's beneficent action toward men does not lie in man's attitudes and actions (Luke 17:7-10), but in God's nature (Matt. 20:1-16).

Third, Jesus uses the theme of the imminence of the kingdom to teach men what is specifically required of them that they may prepare themselves for entrance into the kingdom. Preparation requires singleness of devotion toward God as shown in attitudes of repentance, faith, love, and obedience. The sincerity of these attitudes is to be expressed in concrete acts (Matt. 7:15-20). In the parabolic saying on serving two masters, Jesus illustrates what is meant by singleness of devotion. There can be only one fundamental and all-absorbing attachment for man: either God or mammon. While Jesus never defines what is involved in repentance, he describes it vividly in his parables of the prodigal son, and of the publican and the Pharisee. It involves a profound inner experience which is more than a feeling of shame or of insufficiency and is primarily a recognition of the forgiving quality of God's mercy and love never previously recognized. Without making calculations or comparisons, man is drawn by the Father's love and, as a consequence, finds both love and life. The son who was formerly lost and dead is now found and alive. A second attitude which reflects man's singleness of devotion to God is faith. As a dependent child may trust his father to give him things that are needful for his well-being, how much more may he trust in God, who will take care of the needs of his children (Matt. 7:9-11)? Implicit in these parables is man's attitude of love and devotion. A number of parables are dramatic illustrations of the necessity for absolute obedience to the Father's or the Master's will (e.g., Matt. 21:28-30; Luke 19:12-27).

The parables also clarify what obedience means with regard to concrete attitudes and acts toward one's fellow man. As God attempts to break down all barriers of hostility erected by men against him, so man is to reflect this same quality of love and mercy toward his fellow man (Matt. 18:23-35; Luke 10:30-37; and the parabolic sayings in Matt. 5:38-42, which the evangelist has transformed into rules for the Christian community). No boundaries are to limit the expression of constructive and creative good will for the neighbor. While Jesus' parables reveal his creativity in using this literary form, it is even more significant that they present a challenging and enduring religious and ethical outlook. On this subject *see also* TEACHING OF JESUS.

PARACLETE păr'ə klēt [παράκλητος]. Transliteration of a Greek word whose basic meaning is "one called to the side of" and which combines this passive sense (thus signifying one who stands by to aid and succor) with active extensions of it, thus denoting one who pleads as an "advocate" (I John 2:1) for someone, and so convinces and convicts, and also one who as a "counselor" (KJV "comforter"; John 14: 16, 26; 15:26; 16:7) exhorts, strengthens, and comforts another.

The term is applied to Jesus Christ in I John 2:1. Here it indicates his function as the representative of his people who makes intercession for them with the Father. As "righteous" (cf. the description of the Servant of the Lord in Isa. 53:11), he establishes a right relationship for his people with God, being himself the expiation for their sins. Through Christ the barrier, interposed by sin, between man and God is done away, and fellowship between them is established. Thus Christ is the "advocate" who pleads for men and represents them toward God. His function as "paraclete" is identical with his high-priestly office as expounded by the Letter to the Hebrews (cf. especially Heb. 7:25-28).

In the Fourth Gospel, Jesus promises that in answer to his prayer the Father will give his disciples "another paraclete" ("Counselor"; KJV "Comforter"). This is the Holy Spirit, whose function is thus said, by implication, to be identical with that of Christ, but who is yet distinguished from him. The use of masculine pronouns and adjectives (John 14: 16: "another"; 14:26: "he"; 16:13: "he") shows that the Spirit is regarded as fully personal; indeed, the "paraclete" passages of the Fourth Gospel mark the most highly developed thought in the NT in respect of the personality of the Spirit of God. The Paraclete is pre-eminently the revealer of Christ to believers and the witness to him, in various ways, to disciples and to the world. He is the Spirit of truth (John 14: 16-17), who is the guide to Christ, who is himself the truth (vs. 6). As the revealer of Christ he takes the place of the physical presence of the incarnate Word, and is in this sense "another paraclete" (vs. 16), being present at the side of Christ's followers. The Spirit will belong to all who are disciples of Christ and keep his commandments, being with them as an indwelling personal presence (vss. 17, 20-24). It is through the Spirit that Christ will be known and manifested, and the presence of Christ through the medium of the Spirit is very closely associated with his return to his disciples in the postresurrection appearances (14:18; 16:16; cf. 20:22).

This connection of the Resurrection with the revelation of Christ through the Paraclete is fundamental to Johannine theology, and is affirmed, explicitly or by implication, throughout the NT. The coming of the indwelling Spirit to Christ's followers is dependent upon, and consequent upon, the completion of the saving work of Christ himself in his death and resurrection, which together signify his exaltation (cf. 7:39). Hence the coming and the work of the Paraclete are spoken of in the future tense throughout, and the promise of the gift of "another Counselor" is fulfilled only when the dead and glorified Christ breathes the indwelling Spirit upon his disciples in a new act of creation (20:22). The coming of the Paraclete is therefore conditional upon the departure of Jesus, the removal of whose physical presence will enable his followers to receive through him the Spirit, who was not present during the earthly ministry of the Lord (7:39).

For the Fourth Gospel, as for Paul, the indwelling of the Spirit is the basic principle of life "in Christ." The union of Christ with the Father is to be extended to the believer through the return of Christ after death, by which are indicated both his postresurrection appearances and his continuing presence through the medium of the Spirit. It is the work of the indwelling Paraclete to reveal Christ—i.e., to

enable his followers, individually and corporately, to apprehend the true meaning of Christ's person and understand the significance of his deeds and words. Through the Spirit, Christians will have all that Christ said to them brought to their remembrance (14:26). It is from this standpoint that the Fourth Gospel is written; the author believes that through the work of the Spirit in the church it is possible to know Christ far more fully and adequately than he could be known by those who only saw him in the days of his earthly life. The Paraclete speaks of Christ. Christ is, in fact, the total content of the Paraclete's revelation to believers.

His task is thus to present the glorified Christ to men, and to unfold the meaning of what was once for all enacted by him in the gospel events. He will guide Christians into all the truth; but though he gives fresh understanding, the truth itself has already been revealed, for the truth is Christ (cf. 16:13-15). The Paraclete's witness to Christ reveals his true significance; it vindicates him to the world, convicting the world of sin in rejecting Christ, attesting Christ's vindication by the Father, and manifesting his final condemnation of the devil (16:8-11). This witness is the content of the apostolic testimony. It is the Paraclete who will inspire the preaching of Christ's disciples and enable them to testify to him; and their testimony, which is that of the Paraclete himself, is directly related to martyrdom and the confession of Christ under persecution (15:26–16:4). In the emphasis which it lays on this aspect of the work of the Spirit, the Fourth Gospel echoes a favorite theme of the Synoptists (cf. Mark 13:11; Luke 12:8-12).

PARADISE [פרדס; παράδεισος; Old Pers. *pairidaēza*, enclosure *or* wooded park]. A word meaning "park" or "garden" used, in some Jewish circles, to identify the Garden of Eden and the abode of the righteous beyond death which was associated with that garden. The term bears this meaning in its three NT occurrences (Luke 23:43; II Cor. 12:3; Rev. 2:7).

1. The word. "Paradise" was an Old Persian word that achieved international circulation, appearing in Hebrew, Aramaic, and Greek. In Hebrew and Aramaic it was used substantially in its original sense of "park" or "garden," without special religious connotation. It occurs three times in the Hebrew OT (Neh. 2:8; Eccl. 2:5; Song of S. 4:13) and continued to be used in subsequent rabbinic literature (e.g., Sanh. X.6; T.B. Soṭ. 10*a*). Its occurrence in T.B. Ḥag. 14*b* and parallels, as a term for the heavenly Garden of Eden, is exceptional.

In Greek literature παράδεισος appeared with the writings of Xenophon and was adopted by the language in its meaning of "park" or "garden." The Hebrew word for GARDEN was translated in the LXX sometimes by παράδεισος and sometimes by another Greek word κῆπος. However, in Gen. 2–3 παράδεισος was used exclusively and repeatedly for the original Garden of Eden. Presumably because of this identification, some circles in Judaism came to regard παράδεισος as a standard name for that garden —e.g., Philo (but not Josephus). After belief arose in an abode for the righteous beyond death, this abode was identified with the Garden of Eden and the name παράδεισος applied to this further development, as in I Enoch 20:7; Pss. Sol. 14:2; Test. Levi 18:10; Sibylline Fragment 3:48; IV Ezra 3:6; II Enoch 8:1-6; II Bar. 4:2-7; 59:8; repeatedly in the Apocalypse of Moses and the Books of Adam and Eve.

2. The Jewish background. According to traditional Hebrew theology the dead descended to SHEOL, where life was shadowy and distinctions between the good and the evil negligible. *Ca.* 200 B.C. this view was drastically modified by the emergence of belief in the RESURRECTION of the dead, or at least some of the dead (cf. Isa. 26:19; Dan. 12:2-3). While speculation flourished, there was a growing consensus that the abode of the righteous after their resurrection would be the Garden of Eden, or, as some called it, "Paradise." The corresponding place for the wicked was GEHENNA. Frequently the two were paired—e.g., T.B. Soṭ. 22*a:* "Lord of the Universe! Thou hast created the Garden of Eden and Gehenna; Thou hast created the righteous and the wicked"; II Esd. 7:36: "The furnace of Gehenna shall be made manifest, and over against it the Paradise of delight."

But what of the dead between the moment of death and their final resurrection? This question was finding an answer at the beginning of the Christian era. The older view of a Sheol without distinctions was replaced by that of a segregated Sheol in which the righteous were separated from the wicked. Finally the righteous were moved out of Sheol into the Garden of Eden, or Paradise.

At this point "Paradise" was used in three ways. It could refer to (*a*) the original Garden of Eden of Gen. 2–3; (*b*) that garden as the abode of the righteous dead prior to their resurrection; or (*c*) that garden as the eternal home of the righteous. This does not mean that there was more than one Paradise but rather that Paradise had three stages in its history. It fulfilled different functions in different periods. There was a notable lack of agreement as to the geographical location of Paradise during the second and third stages. For some it was on earth, for others in HEAVEN (cf. the "third heaven" of Apoc. Moses 40:2; III Bar. 4:8; II Cor. 12:2-3). For obvious reasons the "tree of life" (Gen. 2:9 ff) acquired particular significance in the descriptions of Paradise as the abode of the righteous dead (cf. Test. Levi 18:10; I Enoch 25:4-5; IV Ezra 8:52; Apoc. Moses 13:2-3; 28:4; Rev. 2:7).

3. The NT passages. The NT passages may be considered in the light of this summary of Jewish thought. In Luke 23:43 Jesus is reported to have said to the penitent thief: "Truly, I say to you, today you will be with me in Paradise." Attempts have been made to transfer the "today" of this saying to the introductory formula—i.e., "Truly, today I say to you . . . ." This would permit harmonization with belief in the DESCENT INTO HADES between Good Friday and Easter (cf. Eph. 4:8 ff[?]; I Pet. 3:19). However, a survey of the many other occurrences

of this introductory formula in the gospels suggests that whatever follows the words "Truly, I say to you," is always part of the statement and not of the formula. The reference to ABRAHAM'S BOSOM in Luke 16:22-31 confirms the view that Jesus, or at least Luke, assumed the entrance of the righteous into paradise at death. It has been suggested that if these are even approximately the words of Jesus, they could originally have presupposed an immediate PAROUSIA, in which case the reference could be to the final Paradise. Clearly this cannot be the meaning in the present context.

In II Cor. 12:1-4 Paul relates an experience in which he visited Paradise—in or out of the body—and received a revelation. If, as is probable, vs. 3 parallels vs. 2, then he locates Paradise in the third heaven (*see* § 2 *above*). While describing his experience as a "revelation of the Lord," Paul leaves it uncertain whether he saw the Lord in Paradise or whether the Lord granted the revelation without himself being present. Preponderant NT usage favors the former view. If this is correct, then Paul thought of the righteous dead as already living in Paradise with the Lord. This is in harmony with such passages as II Cor. 5:8; Phil. 1:23, though at an earlier stage Paul apparently assumed the believing dead were not reunited with the Lord until the Parousia. The awesome character of Paul's experience is reminiscent of T.B. Ḥag. 14*b*, in which it is asserted that four rabbis were temporarily translated into Paradise but only one, Rabbi Akiba, returned unharmed.

In Rev. 2:7 the church of Ephesus is encouraged with the words: "To him who conquers I will grant to eat of the tree of life, which is in the paradise of God." Did the writer expect this promise to be fulfilled at death or at the resurrection? The latter is more probable, since the parallels in the other letters of Rev. 2-3 point toward the end of history. Furthermore, eating of the tree of life was traditionally associated with the final deliverance (cf. Rev. 22; Test. Levi 18:10 ff; I Enoch 25:4-5; IV Ezra 8:52; Apoc. Moses 13:2 ff; 28:3-4. However, Revelation explicitly teaches that at least some of the righteous enter a heavenly abode prior to the final resurrection (cf. 6:9-11; 7:9-17), even though the tree of life may be reserved for the postresurrection period.

While only the three passages we have noted use the term "Paradise," there are numerous others which refer to the existence of the righteous beyond death—e.g., Mark 12:18-27 and parallels; Luke 16:9, 19-31; Rev. 6:9-11; 7:9-17 (*and see below*). It is clear that in the NT, as in the Judaism of the period, beliefs were in transition, and conflicting traditions supplied the language for eschatology—e.g., some NT passages may have presupposed the descent of the righteous to Sheol at death (cf. Matt. 12:40; Acts 2:24-32; I Thess. 4:13-16; Rev. 20:13). Yet the presence of divergent language is evidence not so much of inconsistency as of an awareness that all such language is symbolic and can at best only point in the direction of the final reality. While the details of the future life are not clear, it is characteristic of the Christ-centered NT faith that its confidence in life beyond death is based upon Christ's resurrection and, further, that this future life is most frequently described as life with Christ (John 12:26; 14:2-3, 18 ff; 16:16 ff; Acts 7:59; Rom. 6:8-11; 8:17, 29; 14:7-9; II Cor. 4:14; 5:8; Phil. 1:21-23; I John 2:28; 3:2; Rev. 7:17; 20:4; 21:23-24; 22:3-5). The dominant NT belief concerning the eschatology of the individual is adequately summarized by Paul's words: "I am sure that neither death, nor life, nor angels, nor principalities, nor things present, nor things to come, nor powers, nor height, nor depth, nor anything else in all creation, will be able to separate us from the love of God in Christ Jesus our Lord" (Rom. 8:38-39).

PARADOX. Biblical forms of paradox are the exaggerated expressions of concepts which, though contrary to fact and often absurd, contain an element of truth. Hence paradoxes are frequently associated with hyperboles and are used primarily by Jesus to communicate the radical and intense seriousness of his outlook. Thereby he sharpens the cutting edge of an idea, whether in debates with opponents or in conversations with men whose lives still lack commitment.

Paradoxical indictments directed against the Pharisees accused them of straining out gnats and swallowing camels (Matt. 23:24) and of seeing specks in their neighbors' eyes while ignoring logs in their own (Matt. 7:3-5). Whether the saying about giving and taking (Mark 4:25) is a part of his polemic caricature of the Pharisees' lack of perspective and inability to differentiate between essentials and nonessentials is difficult to ascertain, because of the varied contexts given to this paradox by the evangelists (Matt. 13:12; 25:29; Luke 8:18; 19:26).

Jesus also uses paradoxical statements to make more bold and incisive the significance to men of the imminent arrival of the kingdom of God. The coming of the kingdom should alter men's duties and vocations. "It is easier for a camel to go through the eye of a needle than for a rich man to enter the kingdom of God" (Mark 10:25) is a thrust at the complacency of the rich. The demands made of those who seek to commit their lives more specifically to the kingdom are expressed in such statements as: "Leave the dead to bury their own dead" (Matt. 8:22). By losing their lives in dedicated service, men find life (Matt. 10:39), and by serving the needs of others they find greatness (Mark 10:43). This paradoxical idea is basic to Paul's religious life, for he found that to be a slave of Christ and to serve his fellow men with love brought a freedom formerly unknown.

L. MOWRY

PARAH pâr'ə [פרה, heifer, young cow]. One of the villages in the inheritance of Benjamin (Josh. 18:23), located some 5½ miles NE of Jerusalem. The site is represented by the modern Khirbet el-Farah near the copious spring 'Ain Farah, from which water is supplied to the Old City of Jerusalem. It is conceivable, also, that here was *Parath* (translated

From *Atlas of the Bible* (Thomas Nelson & Sons Limited)

21. 'Ain Farah, which supplies water for present-day Jerusalem; near the spring is Khirbet el-Farah (Parah).

"Euphrates") of Jer. 13:4-7, at which place the prophet made symbolic use of his waistcloth.

PARALYSIS, PARALYTIC. *See* DISEASE §§ 3-4.

PARAN pâr'ən [פארן]. A wilderness in which the Israelites camped after they left Mount Sinai (Num. 10:11-12), and which they reached after Hazeroth (12:16). Moses sent out spies to explore Canaan from the Wilderness of Paran (13:3); and they returned there, to Kadesh (vs. 26), after completing their task. Deut. 1:22 states that the spies were sĕnt out specifically from Kadesh-barnea, which indicates that the encampment of the Israelites was at Kadesh-barnea, and that this locality was within the territory of the Wilderness of Paran. Since the objective of the spies was the exploration of S Canaan, the Wilderness of Paran must be located in the vicinity of its S border, and W of Edom, and N of the Wilderness of Sinai.

While the itinerary of the Israelites as given in Num. 33 does not mention the Wilderness of Paran —it mentions only the Wilderness of Zin (*see* ZIN, WILDERNESS OF), identifying it with Kadesh (Num. 33:36)—the LXX identifies Kadesh with the Wilderness of Paran: "They journeyed from the Wilderness of Sin [the LXX has Σιν for both Sin, סין, and Zin, צן] and encamped in the Wilderness of Paran (that is, Kadesh)." Such identification is not made anywhere else. The LXX reading also places the Wilderness of Paran after the Wilderness of Sin, which makes the location of Paran more complicated.

The name Paran appears also in several other passages: Gen. 14:6; 21:21; Deut. 33:2; I Sam. 25:1; I Kings 11:18; Hab. 3:3. The Deuteronomy and Habakkuk passages are poetic and deal with the theophany of God. Here Paran is referred to as Mount Paran (הר פארן), and both passages are similar in thought, but not in expressions, to Judg. 5:4-5; Ps. 68:7-8. God of Israel comes forth from his habitation which is variously referred to as Sinai, Seir, Teman, the region of Edom, and Paran (all located in the same general direction from Palestine), to save his people from oppression.

The following four references are pertinent to the location or extent of Paran:

a) In Gen. 14:5-7 the expression "El Paran" (איל פארן) is used in describing the geographical limit of the conquest of Edom by Chedorlaomer and his allies; they conquered "as far as El-paran on the border of the wilderness," and then turned back and came to En-Mishpat, identified with Kadesh. From this description, El Paran must be located in the neighborhood of Seir and Kadesh, "on the border of the wilderness." This wilderness may be the same which is referred to in the journey of the Israelites as the "wilderness of Paran."

b) In Gen. 21:21, Ishmael's dwelling place is called the "wilderness of Paran," which, from the rest of the context, appears to adjoin or extend into the Wilderness of Beersheba and perhaps to reach in the direction of Egypt, whence Hagar obtained a wife for him.

c) According to I Sam. 25:1, after Samuel died, David "rose and went down to the wilderness of Paran." Since the LXX B has Μαάν and the LXX A has Φαράν, the occurrence of "Paran" in the above passage has been questioned, because (*a*) this would place the activity of David too far S, and out of the territory of Judah, and (*b*) the narrative after vs. 1 deals with a man from Maon. In any event, if "Paran" is the correct reading, then the Wilderness of Paran reached into the S part of Judah.

d) I Kings 11:18 contains the narrative of the successful escape of Hadad the Edomite from Joab's slaughter. Hadad and his retinue fled from Edom to Midian, and from there they passed through Paran to Egypt. This would place the location of Paran in the general direction of SW of Edom and W of Midian.

PARAPET [פעקת, to check] (Deut. 22:8); KJV BATTLEMENT. A railing about a roof to check people from falling. As houses had flat roofs, people might easily be on them. It was prescribed that in building a new HOUSE a parapet must be made for the roof so that bloodguilt might not be brought on the house by someone's falling from the roof.

PARBAR pär'bər [פרבר] (I Chr. 26:18). A word referring to a room, or more likely to a section of the courtyard not covered by a roof, on the W side of the temple area, which, from the fifth century on(?), was presumably designated for the waste from sacrifices. With respect to location, it corresponds to the

area called בנין, "the building," behind the temple in the vision of Ezekiel (41:12). Although it is not absolutely undisputed, this non-Hebraic word must probably be connected with the plural פרורים in II Kings 23:11. The פרורים there are the roofed-over areas for chariots and horses of Shamash (from the time of Manasseh).

"Parbar" occurs in an Aramaic-Lydian inscription from Sardis as the open anteroom (vestibule?) of a tomb. It is still unclear whether it can be connected with the Babylonian *ê-bar-bar,* Egyptian *pr wr,* or Iranian *frabada.*

PARCHED GRAIN [קלי, קלוי, קליא, something roasted; Apoc. ἅλφιτον]; KJV PARCHED CORN. A food eaten by all people (Lev. 23:14; Josh. 5:11; I Sam. 17:17; Jth. 10:5), from the harvest worker (Ruth 2:14) to the king (II Sam. 17:28; cf. I Sam. 25:18). It was prepared either by roasting grains of wheat in a pan or simply by holding a small bundle of wheat in the fire.

PARCHMENT [περγαμηνή, μεμβράνας] (II Tim. 4:13). A writing material made from the skins of sheep or goats, which gradually supplanted papyrus because of its durability. Eumenes II of Pergamum (197-158 B.C.) is said to have been responsible for its production, hence its name, derived from περγαμηνή, "of Pergamum."

The hair was removed from the skins by soaking them in lime and scraping them; then they were washed, dried, and stretched out on frames, and finally rubbed smooth with fine chalk and pumice stone. Thus parchment differs from leather in not being tanned. A superior quality of parchment known as vellum was made from the skin of calves or kids. *See* WRITING AND WRITING MATERIALS.

The reference to parchments (μεμβράνας) in II Tim. 4:13 is obscure, especially as they are singled out for special mention, and scholars are divided as to their nature. That they were copies of the Greek OT is unlikely. Other suggestions are that they were documents of Roman citizenship, or merely blank sheets of parchment for future use. R. J. WILLIAMS

PARENTS [γονεύς]. *See* CHILDREN; FAMILY; FATHER; MOTHER.

PARK [פרדס, *pardēs, from* Pers. (Avestan) *pairidaēza,* enclosure; *cf.* παράδεισος, paradise, *and possibly* Akkad. *pardīsu,* park] (Eccl. 2:5). Alternately: FOREST (Neh. 2:8); ORCHARD (Song of S. 4:13). A wooded enclosure.

PARLOR. KJV translation of:

a) חדר (I Chr. 28:11; RSV "chamber"), an inner room of the temple.

b) לשכת (I Sam. 9:22; RSV "hall"), a room in which the sacrificial meals were held at the high place.

c) עליה (Judg. 3:20, 23-25; RSV "roof chamber"), a room in Ehud's palace. *See* HOUSE.

PARMASHTA pär măsh'tə [פרמשתא] (Esth. 9:9). One of the ten sons of HAMAN.

Bibliography. On the relevant textual and etymological problems, see L. B. Paton, *Esther,* ICC (1908), pp. 71, 284.

PARMENAS pär'mə nəs [Παρμενᾶς, *perhaps contracted from* Παρμενίδης, steadfast] (Acts 6:5). One of the SEVEN selected by the church in Jerusalem to assist the apostles.

PARNACH pär'năk [פרנך, Pharnaces(?), *from* Pers.] (Num. 34:25). The father of the Zebulunite leader Elizaphan, who was selected to help superintend the distribution of W Jordanian Canaan among the tribes to occupy that territory.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), pp. 8, 64. R. F. JOHNSON

PAROSH pâr'ŏsh [פרעש, flea; Apoc. Φόρος]; KJV PHAROSH fâr'— in Ezra 8:3; KJV Apoc. PHOROS fôr'əs. The name of two persons in the postexilic era. Earlier the word in its literal sense, translated "flea," was used as a figure of insignificance in I Sam. 24:14; 26:20.

1. Head of a postexilic family (Ezra 2:3; 8:3; 10:25; Neh. 3:25; 7:8; I Esd. 5:9; 8:30; 9:26).

2. A chief who set his seal to the covenant in the time of Ezra (Neh. 10:14). E. R. ACHTEMEIER

PAROUSIA pə rōō'zhĭ ə [παρουσία, presence, *then* arrival *or* coming]. A Greek word transliterated and adopted as a technical term for the future, eschatological coming of Christ (*see* ESCHATOLOGY). This usage is derived from the sixteen NT occurrences of the term in this sense.

Bibliography

1. The word. "Parousia" was used in classical and Koine Greek in the general sense of "presence" but also of "arrival" or "coming." It occurs four (five?) times in the LXX with these meanings (Neh. 2:6 [text?]; Jud. 10:18; II Macc. 8:12; 15:21; III Macc. 3:17). Of the twenty-four occurrences in the NT, six are of this type—e.g., I Cor. 16:17: "I rejoice at the coming of Stephanas and Fortunatus and Achaicus" (see also II Cor. 7:6-7; 10:10; Phil. 1:26; 2:12). However, in Hellenistic literature the term was frequently used in connection with the official visit of a ruler or the epiphany of a deity—e.g., Polyb. XVIII.48.4: "that they might not think he was . . . looking forward to the coming of Antiochus"; Diod. IV.3.3: "while the matrons . . . offer sacrifices to the god and celebrate his mysteries and, in general, extol with

hymns the presence of Dionysius." From this custom a quasi-technical usage of the term arose which is reflected in the majority (eighteen) of the NT passages. Except for II Thess. 2:9: "the coming of the lawless one" (*see* ANTICHRIST), and possibly II Pet. 1:16 (the first coming?), these passages refer to the coming of Christ at the end of history (cf. Matt. 24: 3, 27, 37, 39; I Cor. 15:23; I Thess. 2:19; 3:13; 4:15; 5:23; II Thess. 2:1, 8; Jas. 5:7-8; II Pet. 3:4, 12 [day of God]; I John 2:28). The eschatological usage may have been created by the Christian community—if Test. Levi 8:15; Test. Judah 22:2 are of Christian origin. (The term does not occur in Philo, and Josephus does not use it eschatologically, though he does use it with reference to divine manifestations—e.g., Antiq. III.v.2). It should be noted that the phrase "SECOND COMING" does not occur until Justin Martyr.

2. Hebrew-Jewish background. The OT people, whose national consciousness was shaped by the "mighty acts" of the Exodus, awaited a further divine deliverance in the future. This expectation is referred to in OT passages describing the DAY OF THE LORD or the "latter days," "that day," etc. During the intertestamental period this many-colored hope was modified by apocalyptic thought (*see* APOCALYPTICISM) and by the increasingly widespread belief in a personal MESSIAH as the agent of God's deliverance. No single pattern of messianic expectation emerged. Some leaders regarded him as the reviver of the Davidic dynasty (e.g., Pss. Sol. 17–18); to others he was the apocalyptic SON OF MAN; still others expected no personal messiah at all. Political, ethical, and apocalyptic ideas mingled in confusing fashion. The common factor was belief in a divine, eschatological intervention to occur at the end of history. While NT faith asserted that in Jesus the Messiah had already come, it awaited his further coming in glory—i.e., the Parousia—and regarded this expectation as the continuation of the OT hope.

3. Other relevant terms. Any study of the parousia concept must include consideration of other NT terms which express the same idea. Thus the OT "day of the Lord" and related phrases reappear in varying NT forms with reference to Christ: "day of the Lord" in I Cor. 1:8 ("day of our Lord Jesus"); 5:5; I Thess. 5:2; II Thess. 2:2; II Pet. 3:10, 12 ("day of God"); "day(s) of the Son of man" in Luke 17:22, 24, 26, 30; "day of Christ (Jesus)" in Phil. 1:6, 10; 2:16; "day" in Acts 17:31; Rom. 2:5 ("day of wrath"); I Thess. 5:4; Heb. 10:25; "in that (those) day(s)" in Matt. 7:22; Mark 13:24; Luke 17:31; John 14:20(?); II Thess. 1:10; II Tim. 1:18; 4:8. (Clearly parallel passages in the Synoptics have not been quoted.) While some of these references do not speak explicitly of Christ, it is clear that his "coming" was part of the expected schedule for that final day.

None of the four occurrences of "revelation" (ἀποκάλυψις) in the LXX is eschatological, though the verb form does occur in such contexts—e.g., Isa. 56:1. However, seven of the eighteen NT occurrences are eschatological. Of these, five refer to the revelation of Christ at the end of history (I Cor. 1:7; II Thess. 1:7; I Pet. 1:7, 13; 4:13; cf. the verb in Luke 17:30; I Pet. 5:1). A similar use is made of the verb "to be manifested" (passive of φανερόω), which occurs four times with reference to Christ's coming (Col. 3:4; I Pet. 5:4; I John 2:28; 3:2). In Hellenistic Greek the related term "epiphany" (ἐπιφάνεια) was used for the manifestations of deities either in person or through their acts (see Diod. IV.3.2-3, where "epiphany" and "parousia" are used interchangeably). This development is reflected in II Macc. 2: 21; 3:24; 5:4; 12:22; 14:15; 15:27; III Macc. 2:9; 5:8, 51—though not in Philo or Josephus. In the NT "epiphany" is used with reference to Christ's earthly life in II Tim. 1:10, but elsewhere it is applied exclusively to his parousia (II Thess. 2:8; I Tim. 6:14; II Tim. 4:1, 8; Tit. 2:13; cf. II Clem. 12:1; 17:4).

It is only natural that the verb "to come" (ἔρχομαι) should be used frequently in eschatological passages, with or without supporting technical terms—e.g., Matt. 10:23; 25:31; Mark 8:38; 13:26; 14:62; Luke 12:40; 18:8; 23:42; John 14:3(?), 18(?); 28(?); 21:22; Acts 1:11; 3:20; I Cor. 4:5; 11:26; Rev. 1:7; 2:5(?), 16(?); 3:11, 20(?); 22:7, 12, 20, to mention only those not previously indicated. Other passages, not easily classified by terminology, are: Matt. 13:41(?); 19:28; Mark 10:37(?); 13:6(?); 14:28(?); Luke 12:8-9; 13: 35(?); 21:36; 22:28 ff; John 16:16 ff(?); I Cor. 16:22; II Cor. 4:14(?); 5:10(?); Eph. 1:10(?), 14(?); 4:30(?); Phil. 3:20-21; 4:5; I Thess. 1:9-10; 4:14, 16; II Tim. 2:11 ff(?); Heb. 9:28; 12:14(?); Jas. 5:9; I Pet. 1:11; 4:5; Jude 21(?), 24(?); Rev. 2:25; 3:3; 19:11–20:10.

Possibly passages referring to the coming of the KINGDOM OF GOD should be included here, since Jesus may have expected the arrival of the kingdom at the Parousia, contrary to the interpretation of scholars who assert that the kingdom arrived during Jesus' ministry. This controversy can only be alluded to here.

4. The NT teaching. In general the NT writers expected an imminent, dramatic, visible return of Christ to usher in the New Age. The work begun in his ministry, death, and resurrection was to culminate in his triumphant parousia. This may be documented by a survey of the major divisions of NT literature.

a. In the letters of Paul. Nearly every letter of the Pauline corpus witnesses to the parousia expectation. I Thessalonians, probably his earliest extant letter, returns repeatedly to this hope. Its centrality for Paul's missionary preaching is indicated in 1:9-10. Other references are: 2:19; 3:13; 4:13–5:10; 5:23. Christians are comforted about their dead, not with the promise that at death they enter into God's presence, but rather with the hope of the Parousia, which is to occur in that generation (4:15, 17). This basic pattern is not changed by subsequent minor modifications: II Thess. 2 lessens the sense of imminence; I Cor. 15 and II Cor. 5 raise questions, by implication, concerning the nature of the body with which Christ is to return; Phil. 1:23 suggests that Paul ceased to be confident he would survive until the Parousia and that he came to believe he would go to be "with Christ" immediately at death. But his basic confidence in the Parousia remained unshaken (cf. Rom. 2:16; 8:18 ff; 13:11; I Cor. 1:7; 4:5; 5:5; 11:26; 15:20-28, 51-57; 16:22; II Cor. 4:14[?]; Phil. 1:6, 10; 2:16; 3:20-21; 4:5; Col. 3:4; II Thess. 1:5-10; 2:1-12).

Explicit parousia references are lacking in Galatians, Philemon, and Ephesians, but only the

silence of Ephesians is significant. It may be that the idea is implicit in Eph. 1:10,14, 18, 21; 4:30; 5:5-6; yet eschatology appears to have been eclipsed by ecclesiology. This may be an additional indication of non-Pauline authorship. The Pastorals, though presumably post-Pauline and presenting distinctive terminology, do not vary from the Pauline pattern (cf. I Tim. 6:14; II Tim. 1:18; 2:11 ff[?]; 4:1, 8; Tit. 2:13).

b. In Acts and the Synoptic gospels. Acts and the Synoptics confirm the view that the parousia expectation was vital to the early church and that it originated in the teaching of Jesus. For Acts, see 1:10-11; 3:20; 10:42-43; 17:31. The Synoptics present a more complicated problem, since the words of Jesus have been modified by later interpretations. However, the view that Jesus taught his imminent and essentially apocalyptic parousia is strongly supported by the appearance of such teaching in all strands of the Synoptic tradition (*see* SYNOPTIC PROBLEM): For Mark, see 8:38–9:1; 10:37; 13:6-7, 24 ff; 14:62. For Q, see Luke 12:8 ff, 39 ff; 13:35; 17:20-37; 22:28 ff (L?). For M, see Matt. 10:23; 13:40-41; 19:28(Q?); 25:31. For L, see Luke 12:35-38; 18:8; 21:36; 23:42.

While some of these passages are obviously creations of the early community, the cumulative mass of evidence cannot be ignored. (For divergent views *see* § 5 *below*.) Passages sometimes cited against the view that the Parousia was regarded as imminent are: Mark 2:19-20; 9:1; 13:9 ff, 32-37; 14:9; Matt. 10:17-18; 24:42; 25:13; Luke 12:39 ff; 17:22; I Cor. 11:25.

c. In the Johannine literature. The Johannine literature, taken as a whole, supports this same view of the Parousia, despite significant ambiguities in the gospel. Revelation is explicit (cf. 1–3; 19–22); imminence is stressed particularly in 1:1, 3; 6:10-11; 22:7, 10-12, 20. The new note is found in Rev. 20, where a temporary, messianic kingdom or MILLENNIUM is clearly taught. The present text of John's Gospel contains clear references to an eschatological *day* at the end of history (cf. 5:28-29; 6:39-40, 44, 54; 12:48; 21:22-23). These references indicate that the author presupposed the parousia of Christ, and this view is confirmed by I John 2:28; 3:2. Yet some of the most significant passages in the gospel are ambiguous—e.g., 14:2 ff, 15-31; 15:26; 16:5-11, 16-24. Does the "coming" here referred to mean the resurrection appearances, the gift of the Spirit, the death of believers, or the eschatological parousia? Are passages such as 5:25-27; 11:25 ff intended as substitutes for the eschatological hope, or do they complement it? Is the gospel a unity? On any assumption, the future hope is here balanced by a present possibility which goes beyond Paul's concept of the "first fruits of the Spirit."

d. In Hebrews. Hebrews raises problems similar to those in John's Gospel. The eschatological expectation is explicitly stated and includes the Parousia (cf. 9:28; 10:25). Traces of this same pattern reappear in 1:2; 2:8*b;* 3:7 ff; 4:1 ff; 6:2; 9:26; 10:12-13, 27, 37; 11:40; 12:26 ff; 13:14. Yet the basic interest is in present possibilities. A "new and living way" has been opened into the heavenly sanctuary; it is for the believer to enter "now." (But 10:11-25 ends with an appeal based on the eschatological *day!*) Probably the author took the Parousia seriously, but, with the passing of time, was discovering new possibilities in the already present reality.

e. In other NT books. James in 5:7-9 expresses his confidence in the imminent parousia, though this emphasis is not dominant. The same faith is a more vital part of I Peter, where the thought is conditioned by this expectation (cf. 1:3-21; 4:5-5:11). Though obviously on the defensive, II Peter reaffirms the traditional view (cf. 1:16[?]; 3:1 ff). Even brief Jude has references which probably belong in this category (vss. 6, 21, 24).

It is significant that the only books of the NT without any reference to the Parousia or related events are the single-chaptered II and III John and Philemon, the somewhat longer Galatians, and, possibly, Ephesians. Clearly primitive Christianity was an eschatological faith, though a shift of emphasis is apparent in Ephesians, Hebrews, and John, while II Peter implies a rising skepticism, presumably within the Christian community itself.

5. Further observations. Roman Catholic and conservative Protestant scholars dissent from the general position presented above and insist that the NT writers did not teach an imminent parousia. Thus the Pontifical Biblical Commission in its reply of June 18, 1915, affirmed that even I Thess. 4:15-17 may be interpreted "without in any way involving the assertion that the Parousia was so near that the Apostle counted himself and his readers among the faithful who will be left alive and go to meet Christ." The idea of the Parousia itself is, of course, recognized and accepted by these groups.

Dominant Protestant scholarship assumes that the NT writers regarded the Parousia as imminent, but is divided as to the actual teaching of Jesus in this entire area. A few eliminate the Synoptic parousia passages entirely by a drastic use of the scissors of literary-historical criticism. Some of these scholars suggest that the teaching of Jesus about the coming of the kingdom was transformed by the early community into the parousia concept centering in Jesus himself. Others accept the parousia passages but deny that Jesus identified himself with the SON OF MAN who is referred to in most such passages. (The parousia passages without this ambiguity—e.g., Matt. 7:22-23; 24:3; Mark 10:37; 13:6; Luke 13:35; 22:28 ff—are not impressive, yet it is difficult to believe that Jesus did not identify himself with the Son of man, since all strands of the Synoptic tradition make this identification.) Still other scholars admit that Jesus spoke of his own parousia but deny that he stressed its imminence; they emphasize sayings indicating either a lapse of time or uncertainty as to the time (*see* § 4*b above*). (It may be observed that uncertainty as to the day and hour of one's death is not incompatible with the conviction that it will occur within a generation.) Again, others speak of a number of parousias—e.g., the resurrection appearances, the outpouring of the Spirit, the fall of Jerusalem, the death of the believer, and the end of history. By this device the predictions stressing imminence may be alleged to have found fulfilment at the designated time. While most of these, and other, divergent views merit serious discussion, they can only be listed here.

This article has been concerned with the interpretation of the NT texts in their first-century setting. The theological problem of the reinterpretation of the parousia concept deserves mention by way of conclusion. There are three basic possibilities: the entire eschatological pattern, of which the Parousia is a segment, may be regarded as part of the eternal Word and hence accepted with comparative literalness; the eschatological pattern may be discarded on the grounds that it was the temporal garb in which the eternal gospel appeared; or the eschatological pattern may be translated into other terms. The first of these possibilities has been adopted, with modifications, chiefly by Roman Catholic and conservative Protestant scholarship; the second received the support of the extreme wing of late nineteenth-century and early twentieth-century liberalism; the third has commanded the attention of the various "neo-theologies" of the twentieth century. No single, definite pattern has yet emerged. It may be assumed, however, that the main line of the Christian tradition will interpret the Parousia to mean, at least, that God will bring to perfect completion the work begun through Christ, and that the same Christ who stands at the center of Christian faith will also stand at the final boundary of human experience in time, in space, and in eternity.

PARSHANDATHA pär shăn'də thə [פַּרְשַׁנְדָּתָא] (Esth. 9:7). One of the ten sons of Haman.

Bibliography. On the relevant textual and etymological problems, see L. B. Paton, *Esther*, ICC (1908), pp. 70, 284.

PARSIN. *See* Mene, Mene, Tekel, and Parsin.

PARTHIANS pär'thĭ ənz [Πάρθοι]. An Iranian tribal group. Among those who gathered in Jerusalem for the festival of Pentecost were the Parthians, along with the Medes, Elamites, and others (Acts 2:9-11).

Ca. the middle of the third century B.C. the Parthians claimed independence from the Seleucid rulers of Iran in their homeland, the ancient satrapy of Parthia (Old Persian *Parθava;* Greek Παρθία), to the SE of the Caspian Sea. Their rulers are known as Arsacids after the name of Arsaces, the founder of that dynasty. In the following centuries the Arsacids built an empire which stretched from the Euphrates to the Indus. One of its capitals was Ctesiphon on the Tigris River.

PARTITION, MIDDLE WALL OF (KJV); RSV DIVIDING WALL OF HOSTILITY. In the description of the Herodian temple Josephus (War V.v.2) mentions a stone trellis three cubits high. It contained, he said, at intervals blocks of stone with

Courtesy of the Musées d'Archéologie d'Istanbul

22. Warning-stone from wall around inner courts of Herod's temple

inscriptions in Greek or Latin, by which all strangers were warned against stepping out of the Court of the Gentiles into the inner area (after the time of Antiochus III [Antiq. XII.iii.4] the Jews had the privilege of policing the temple). In 1871, Clermont-Ganneau found such a stone with a Greek inscription to the N of the temple area; in 1935 a fragment was found on the E slope of Haram. The text reads: "No non-Jew may walk through the trellis and the area of demarcation to the sanctuary. Whoever is caught must blame himself that the death penalty is carried out at once."* The statement of Eph. 2:14 that Jesus Christ broke down the "dividing wall of hostility" has been interpreted as a reference to the middle wall of partition in Jerusalem, but it is completely improbable that such an allusion would have been understandable to the Ephesians. Fig. PAR 22.

PARTRIDGE [קרא, *qôrê* (I Sam. 26:20; Jer. 17:11; *cf.* Judg. 15:19), *possibly onomatopoeic, or* caller, *from* קרא, to call; πέρδιξ, *cf.* πέρδομαι, to break wind]. Any of various game birds of the subfamily *Phasianinae*, mostly of the genera *Alectoris* and *Ammoperdix*. Tristram states that the commonest partridge of Palestine is the chukar (probably *Alectoris graeca werae*), but that other varieties are found (*Alectoris graeca cypriotes, Ammoperdix heyi heyi*). The francolin (*Francolinus francolinus francolinus*), the black partridge of India, is also to be seen and heard in the lowland plains. In addition, Tristram tells of no fewer than four varieties of sand grouse (*Pteroclididae*).

It is conjectural that קרא refers either to the partridge or to one of the other birds mentioned above (*see* Fauna §B6*d*); the partridge conjecture, however, is supported by most of the ancient versions (but not by the LXX at I Sam. 26:20). It is commonly supposed that I Sam. 26:20 reflects the practice of hunting a bird by continuously chasing it; and this, in fact, was how, in Tristram's day, many partridges in Palestine were caught (cf. the use of a partridge as a decoy bird in Ecclus. 11:30). Jer. 17:11 may rest on a popular but erroneous belief that the partridge incubates eggs which she did not lay

(cf. the Jewish Midrashic tradition on this point); this belief appears to be a misinterpretation of the fact that the chukar partridge lays two batches of eggs, one for herself and the second for the cock (*cf. bibliography*).

W. S. McCULLOUGH

PARTY [αἵρεσις (Acts 5:17; 15:5; 26:5; Gal. 5:20)]. A word used in references to the PHARISEES (Acts 15:5; 23:9; 26:5); the SADDUCEES (Acts 5:17); and the "circumcision party" (οἱ ἐκ περιτομῆς; Acts 11:2; Gal. 2:12; Tit. 1:10). The word αἵρεσις is translated in other passages by different English words—e.g., "sect" (Acts 24:14), "faction" (I Cor. 11:19), and "heresy" (questionably; II Pet. 2:1).

"Party" is sometimes used without reproach, as, e.g., of the Sadducees in Acts 5:17, and of the Pharisees in Acts 15:5; 26:5. In Gal. 5:20, however, where Paul lists "party spirit" (or, perhaps, "divisions") among the works of the flesh, "party" is a term of reproach.

The term "circumcision party" is used of certain Jewish Christians whose leader was James the Lord's brother, and who criticized Peter for having broken Jewish food laws when he ate with Gentiles. *See* JUDAIZING.

B. H. THROCKMORTON, JR.

PARUAH pə rōō′ə [פָּרוּחַ] (I Kings 4:17). The father of Jehoshaphat, who was one of the twelve commissariat prefects under Solomon with the territory of Issachar as his assigned district.

PARVAIM pär vā′əm [פַּרְוַיִם] (II Chr. 3:6). A region from which came a gold used in the temple of Solomon. According to rabbinic sources (Yom. 21*b;* Shir Hashirim Rabbah to Song of S. 3:10), it was of a reddish hue, and from it was made the vessel used by the high priest to remove the ashes from the altar of burnt offering on the Day of Atonement. Since gold was mined extensively in Arabia in ancient times, Parvaim was probably in that country; the most probable identification is with Sak el-Farwein in Yemama.

S. COHEN

PASACH pā′săk [פָּסַךְ] (I Chr. 7:33). An Asherite; the first-born of Japhlet's three sons.

PASCHAL LAMB păs′kəl [τὸ πάσχα] (I Cor. 5:7). Paul's designation of Christ in relating the DEATH OF CHRIST to the Jewish PASSOVER.

PAS-DAMMIM păs dăm′ĭm [פַּס דַּמִּים] (I Chr. 11:13). The scene of one of David's victories. *See* EPHES-DAMMIM.

PASEAH pə sē′ə [פָּסֵחַ, limper; Apoc. Φεσσά, Φισόν, Φασέα]; KJV PHASEAH fə— in Neh. 7:51; PHINEES fĭn′ĭ əs in I Esd. 5:31. A name suggesting, by its original meaning, that those bearing it were in some way lame.

1. A descendant of Judah; the son of Eshton (I Chr. 4:12).

2. Head of a family of temple servants who returned to Judah with Zerubbabel from the Exile (Ezra 2:49 = Neh. 7:51; I Esd. 5:31).

3. The father of Joiada, who was one of the wall builders (Neh. 3:6).

E. R. ACHTEMEIER

PASHHUR păsh′ər [פַּשְׁחוּר, *perhaps from* פשׁח, be quiet, *and* סחוּר, round about (*cf.* Jer. 20:3), *or* Egyp. *Pš Ḥr;* Apoc. Φασούρ]; KJV Apoc. PHAISUR fā′zər; PHASSARON făs′ə rŏn. **1.** Son of Immer, and chief officer in the Jerusalem temple during the last years of the monarchy. He was probably second only to the high priest and in charge of maintaining order. He beat Jeremiah and threw him in stocks, for which the prophet pronounced his judgment along with that of the nation (Jer. 20:1-6). The play on words in the Hebrew of vs. 3 is absent in the Greek and may show assimilation to vs. 10. This Pashhur may be identical with 2 *below.*

2. The father of Gedaliah, one of the princes during the reign of Zedekiah (Jer. 38:1).

3. Son of Malchiah, and prince under Zedekiah (Jer. 21:1; 38:1). He sought from Jeremiah an oracle of the Lord on the eve of the Babylonian siege and was given a prophecy of doom for the king (21:1 ff). Later he was in the princely audience which heard the prophet's advice to capitulate to the Babylonians (38:1). His descendant was among the priests of the restoration under Nehemiah (Neh. 11:12; cf. I Chr. 9:12).

4. Ancestor of one of the postexilic priestly families mentioned in the list of the returned exiles (Ezra 2:38; Neh. 7:41; I Esd. 5:25). Several of the members were among those who gave up their foreign wives (Ezra 10:22; I Esd. 9:22).

5. One of the priests of the restoration who attended the sealing of the covenant under Nehemiah (Neh. 10:3—H 10:4).

J. M. WARD

PASS [מַעֲבָר, מַעְבָּרָה, *from* עבר, cross over]. A passage, ravine, or narrow route through a mountainous region. Although the mountain passes near Megiddo, Shechem, Michmash, and elsewhere in Canaan were prominent features of the land, the pass of MICHMASH is the only one mentioned by this term in the OT by name (I Sam. 13:23; cf. 14:4, where the same topographical feature is intended, although the Hebrew plural מעברות is used [KJV "passages"]). Isa. 10:29 mentions the same pass (see "Michmash" in vs. 28).

A pass in the hill country might be called an ascent (מַעֲלֵה) or a descent (מוֹרַד), such as the ascent of BETH-HORON between the coastal plain and Jerusalem, the ascent of ADUMMIM from the Jordan Valley to the hill country, the ascent of AKRABBIM on the S border of Canaan. *See also* the ascent of GUR, of LUHITH, and of HERES, the descent of HORONAIM, etc.

W. L. REED

***PASSION, THE.** A term used in the translation of the phrase μετὰ τὸ παθεῖν αὐτὸν (Acts 1:3), in reference to Jesus' suffering and death. English translations, following Wyclif, are influenced by the Vulg. *post passionem suam,* "after his passion." Goodspeed translates, more literally, "after he had suffered." Prior to the Vulg., the apostolic fathers, especially IGNATIUS in his Letters, popularized the use of "passion" (πάθος) for the sufferings of Jesus. "Passion" was in common use by the middle of the third cen-

tury. Subsequently the term acquired no exact definition. It is variously used to refer to the suffering of Jesus, to his crucifixion or death, to the section of the gospel narratives dealing with them, to the musical setting for these events, to the church's observance of the Sunday or the week preceding Holy Week. In general, "the Passion" is best taken in reference to the last two days of Jesus' life, including the Last Supper, the agony in Gethsemane, the arrest, trials, crucifixion, death, and burial.

Among the many NT references to Jesus' sufferings we may distinguish (*a*) those attributed to Jesus and (*b*) those about him. In the "passion sayings" Jesus thrice forecast to his disciples his suffering, death, and resurrection ([*a*] Mark 8:31-32; Matt. 16:21; Luke 9:22; [*b*] Mark 9:31-32; Matt. 17:22-23; Luke 9:43-45; [*c*] Mark 10:32-34; Matt. 20:17-19; Luke 18:31-34). After the Transfiguration he taught that the Son of man must suffer many things (Mark 9:12; Matt. 17:12; cf. Luke 17:25). At the Last Supper he desired the Passover before he suffered (Luke 22:15). His suffering is implied in his words about the bridegroom to be "taken" (Mark 2:20; Matt. 9:15; Luke 5:35); the constraint of a baptism (Luke 12:50); Jerusalem, where prophets perish (Luke 13:33); the slain son (Mark 12:8; Matt. 21:39; Luke 20:15); his body anointed for burial (Mark 14:8; Matt. 26:12). Glimpses of his purposes in the Passion appear in his life as a "ransom for many" (Mark 10:45; Matt. 20:28); his blood of the covenant is "poured out for many" (Mark 14:24; cf. Matt. 26:28: "for the forgiveness of sins"; Luke's longer text, 22:20: "poured out for you"); his necessary suffering is supported from scripture (Luke 24:27, 46); God's will must be done (Mark 14:36; Matt. 26:39; Luke 22:42).

Jesus' disciples, bewildered by his words about suffering, later gained insight from his death and resurrection; and from their faith they added explanations. Paul knew the wonder, the comfort, and the promise of sharing Christ's sufferings (Rom. 8:17; II Cor. 1:5; Phil. 3:10; Col. 1:24). He viewed Christ's resurrection as a sign of Christ's victory over suffering and death. As the believer shared Christ's death, he too arose to newness of life. The sufferings of Jesus appear also in the Letter to the Hebrews and in I Peter. In Hebrews, Jesus was made perfect through suffering (2:10); tested in sufferings, he can help others (2:18); he suffered once in sacrifice (9:26) outside the gate to consecrate people through his blood (13:12). The writer of I Peter claims to be an eyewitness of Jesus' suffering, which was predicted by scripture and rejoicingly shared by his followers (1:11; 4:13; cf. Acts 3:18; 17:3); though Christ's servants suffer unjustly, they must follow "in his steps" (I Pet. 2:21, 23).

The Passion requires some unity of thought and significance beyond a catalogue of NT references. Jesus anticipated his passion and found in it the deep mystery of God's will, in behalf of the sins of "many" (a Semitic expression [Isa. 53:12] for "everyone"). He looked for a kingdom beyond suffering. His first followers found in his passion a revelation of a merciful and forgiving Father. With joy they shared their sufferings in Christ, who was their example. Though he was the Lamb, slain for man's deliverance from sin, he was alive forevermore. The narrative of the Passion became the earliest and most significant nucleus around which the gospel was preached and the four gospels were composed.

PASSOVER AND FEAST OF UNLEAVENED BREAD. The first of the three great festivals in Israel's liturgical calendar, commemorating the deliverance from Egypt; observed in the spring.

1. Terminology
2. In the NT era
3. OT references
4. Current interpretations
Bibliography

1. Terminology. "Passover" is used both of the feast as a whole (Exod. 12:48, etc.) and of the sacrifice proper (Exod. 12:11, 27; Deut. 16:2; etc.). The Hebrew term translated "Passover" is פסח, "passing over"—i.e., "sparing" (Lev. 23:5; Num. 28:16; 33:3; Josh. 5:11; etc.). Etymologically, it may be related to the verb פסח, "to limp," referring to a ritual dance (cf. I Kings 18:21, 26). Other Hebrew terms are חג הפסח, "the Feast of the Passover" (Exod. 34:25; Ezek. 45:21) and זבח־פסח הוא ליהוה, "the sacrifice of the Lord's passover" (Exod. 12:11, 27; Num. 28:16).

In the LXX and the NT the term is τὸ πάσχα (cf. Aramaic פסחא), except in II Chronicles; Jer. 31:8—G 38:8, where φασέκ is used. The term φάσκα is found in Jos. Antiq. V.i.4; XIV.ii.1; XVII.ix.3; War II.i.3.

For "Feast of Unleavened Bread" the Hebrew term is חג המצות, "(the feast of) the unleavened loaves (or cakes)" (Exod. 12:17; 23:15; 34:18; etc.); the LXX and the NT use ἡ ἑορτὴ τῶν ἀζύμων.

In contemporary Judaism the word *Pēsaḥ*, or "Passover," is used to refer to the whole range of observances related to the season. This usage has been customary since *ca.* the second century of the Christian era. The tractate *Pēsaḥîm* (plural of *Pēsaḥ*, probably with reference to the individual sacrificial lambs; cf. II Chr. 35:7) in the Mishna both exemplifies and serves as basis for this custom. The single term serves as the title for all the festivities, including those observances which relate to unleavened bread, to which, indeed, the first three chapters of the tractate are devoted. Josephus refers to the "feast of unleavened bread" as the proper title for the whole; but in two places he adds the clause "which is called Passover," as if to indicate popular usage (Jos. War II.xiv.3; VI.ix.3; Antiq. XVII.ix.3; XX.v.3).

As the employment of the one title, Passover, indi-

cates, the Mishna, like Josephus, treated all the observances as parts of a single integrated feast. This had not always been so. Earlier, in the OT, and into the NT as well, "Passover" and "feast of Unleavened Bread" (Mark 14:1) were both used with reference to the rites. Now one and now the other covered the entire sequence. But basically the Passover referred to the eve of the first day, the fourteenth day of the month (Lev. 23:5, etc.), on which the sacrifice of the Passover lamb took place, while the Feast of Unleavened Bread (Lev. 23:6, etc.) applied to the seven days following. This indicates a recollection that there were two separable units or feasts in the single complex of observances. But this distinction was not carefully kept (cf. Luke 22:7). Because the two observances fell at the same time, and also because Passover proper lasted only a single night, this was almost impossible. E.g., the removal of leaven had to be completed before the slaying of the Passover sacrifice took place (Deut. 16:4; Pes. 1.1-4); so that the Passover meal itself was also a meal of unleavened bread (Exod. 12:8); and the term "Passover" was used for all the festal days (Deut. 16:2-3; Ezek. 45:21-25).

Exod. 23:15, a part of what is probably the oldest extant liturgical calendar of Israel, speaks of the "feast of unleavened bread" (cf. Deut. 16:16). This statement has been pivotal in all research and discussion about the history of Israel's culture. The issue at stake is whether at the time of the framing of this calendar, assigned to the Yahwistic editor and placed in the early period of the monarchy, the Passover sacrifice was a part of the cultus of the community of Israel as a whole, and whether, indeed, it had ever been such. Beginning with Wellhausen, the widely accepted view has been that until the reformation of Josiah, and the Deuteronomic legislation related to it, Passover as distinct from Unleavened Bread was a domestic observance rather than a rite serving as a celebration of Israel's national history. This view interprets II Kings 21–23 to mean that Passover was not nationally celebrated in the monarchic period and questions the historical tenability of the implication that there were such national celebrations in the days of the judges. It also holds that a clause such as Exod. 34:25*b* represents a later interpolation into old accounts. This well-established view of the history of Passover is sharply challenged today, as will be seen below.

Amid all the uncertainty about the history of Passover and Unleavened Bread in Israel there is general agreement on two points: the feast contains two originally separate components; and both of these have a pre-Israelite history, Passover as a nomadic shepherds' rite and Unleavened Bread as a Canaanite agricultural feast. On the latter point scripture itself seems to substantiate this view, at least with respect to Passover. Moses asked the Pharaoh to let the children of Israel go so that they might keep a feast to the Lord in the wilderness (Exod. 5:1; 10:9). The plausible hypothesis derived from these statements is that this "feast" was the pre-Israelite form of Passover, probably a shepherds' festival. Thus Wellhausen made the statement that "the exodus is not the occasion of the festival, but the festival the occasion, if only a pretended one, of the exodus." The subsequent analysis of the history of the forms of the Israelite cultus has confirmed this view that Passover and also Unleavened Bread had a long history as cult forms before being adopted as such by Israel to serve in the celebration of Israel's historic deliverance from Egypt. All accounts of both as pre-Israelite rites must, however, in the nature of the case, be hypothetical reconstructions based on their form in Israel and on our knowledge of analogous observances in ancient Semitic culture.

The following discussion will begin with a brief description of the form and role of Passover in the NT era, especially as reflected in the Mishna. Next it will treat various aspects of the form and meaning of the feast in its earlier history as indicated by OT references to it. The quasi-sacramental role of the rite in the priestly religion will be noted, as well as its memorial function elsewhere. Finally there will be a brief account of the current efforts to give a new description of the history of the feast in Israel and, consequently, of the history of the religion of Israel.

2. In the NT era. Until the destruction of the temple in A.D. 70, Passover was a pilgrim festival. It shared this distinction with Weeks and Booths (*see* WEEKS, FEAST OF; BOOTHS, FEAST OF). In popularity and in the number of pilgrims, coming from all lands of the Diaspora, it was matched only by the latter. A realistic estimate has suggested that as many as 100,000 pilgrims may have come to Jerusalem annually for the feast. The figures cited by Josephus seem fabulous (War II.xiv.3; VI.ix.3); but his indication that disturbances involving the occupying power were likely to occur at the time of the feast is familiar because of similar NT references (Mark 15:6-15, etc.).

In comparison with Booths, Passover was a rather solemn feast. The observances of Passover Eve proper consisted of two parts: the ritual slaughter of the sheep and goats at the temple with the sacrificial sprinkling of the blood against the altar, and the domestic meal and its role of fellowship and historical commemoration. For the host of pilgrims without residence in the city, the procuring of a "room" (Mark 14:15) and the purchase of a sheep for sacrifice were the first important preparations upon arrival. The feast brought a great influx of trade to the sacred city. Wine and spices were needed for the feast; and many who came from abroad brought foreign wares for sale, resulting in a holiday "business rush" (cf. Matt. 21:12). The lamb and the room were procured by the head of a "company" or family groups. The minimum number permitted for a group was ten (Pes. 7.13 ff); often the companies were much larger. Since the entire sheep had to be eaten, its size corresponded to the size of the group. Every member had to eat an amount of the meat as large as an olive. In the case of very large companies, every member first received such a small token portion from the lamb of the sacrifice. Thereafter nonritual roasts were provided for the meal itself.

At the temple all twenty-four divisions of priests were in attendance, though normally there was only one. The first ceremonial action consisted in the removal of leaven. This was done in the morning, and its completion was indicated by the ritual burning of leaven by the priests. Work ceased at noon. The daily afternoon sacrifice at the temple was made an

hour earlier than usual (Pes. 5.1). At about 3:00 P.M. the slaughtering of the Passover sacrifices began, announced by a threefold trumpet blast sounded by Levites. While some Levites sang the Hallel, others slew the sacrificial animals and bled them in gold or silver trays held by the priests. Then they flayed and dressed the animals. The priests meanwhile tossed the blood against the great altar and burned the portions of fat on the altar (Pes. 5.5-10). The tossing of the blood was the heart of the sacrificial action; originally it was probably a rite to protect, or substitute for, the first-born. But now it was a means of declaring or releasing the redeeming action of God for his whole people.

The dressed animals, with legs unbroken and head attached to the carcass, each wrapped in its own skin, were returned to the worshipers. Each company went to its house or room. The animal was spitted on a stick of pomegranate wood, with its head and legs folded into the cavity of the rump, and roasted in a portable clay oven.

The meal was served on low tables around which those who partook reclined on cushions (cf. Matt. 26:20), in the manner of a solemn banquet, and all were dressed in festive white. After the blessing the meal opened with a first glass of wine. This was followed by the eating of the lamb with bitter herbs dipped in *harosheth,* a paste of mashed fruits and nuts. Following a second glass of wine a designated "son" of the family asked the ceremonial question: "Why is this night different from all other nights?" This introduced the recital in song and story of the historical redemption of Israel from slavery in Egypt. It continued with the story of the subsequent crises and deliverances of Israel's long history and ended with a prayer for the redemption of the land from the occupying power of Rome. Following this prayer, which was later changed into a prayer for a return to Jerusalem, the formal commemoration was over. Gatherings could continue informally or members of one group could leave to greet those of another, groups having been kept carefully separate up to this point (Pes. 9.10).

With the destruction of the temple, Passover ceased as a sacrificial rite; as a sacred commemoration of God's redemption it has continued. The sacrifice still survives in the dwindling Samaritan community at Nablus, Jordan. This schismatic Jewish group separated from the temple in Jerusalem in *ca.* the fourth century B.C. Its observance of both the sacrifice and the communal meal in all probability preserves forms that antedate those described above. The slaughter is made at the foot of Mount Gerizim, precisely at sunset rather than earlier (Exod. 12:6). Instead of the chanting of psalms, the reading of Exod. 12 accompanies it. The actual communal eating of the sacrifice does not occur until after midnight and is done in great haste (cf. Exod. 12:11, 29). Unleavened cakes are used and bitter herbs. But there is no wine or *choroses.* In many respects the observance corresponds more closely to the scriptural prescriptions, notably those of Exod. 12, than was true of the observance in Jerusalem in the days of Jesus—a reminder, among other things, that, in its three thousand years or more of history as an Israelite observance, Passover has never ceased to change, however imperceptibly. In NT times the agricultural side of the feast, particularly as illustrated in the ceremony of the sheaf (*see below; see also* WEEKS, FEAST OF), seems to have played an insignificant role. It is a facet of the feast which has enjoyed a revival in the state of Israel in recent times.

The destruction of the temple, by eliminating the sacrifice with its sacramental implications, inevitably had the effect of making the celebration mainly a historical memorial of the great acts of God in Israel's past. It became Israel's festival of freedom. Yet it has never ceased to awaken Israel's hope for the future; this is indicated by the parting benediction at the Passover table, centuries old and still used today: "Next year in Jerusalem." And, while Passover is mainly a historical commemoration, its faithful observance is indispensable to the fulfilment of that prayer. The NT, on the other hand, concentrates on the Passover as a sacrifice. Christ is the Lord's true Passover; the redemption set forth in sacramental action, it holds, is historically actualized in the death of Christ.

3. OT references. In discussing Passover and Unleavened Bread on the basis of the relevant OT texts, two general statements must be made at the outset. In the first place, even where it is possible to be relatively certain about the date of the composition of a given literary unit, it is increasingly difficult with real confidence to associate its account of the feasts with that date alone. Current methods of historical criticism have persuasively shown that, notably with reference to cultic practices and traditions, relatively late documents often incorporate much older forms or reinterpret older practices. In the second place, in selecting the texts that have a bearing on the history of Passover, there are a number of references to "feasts" (I Kings 8:2; Isa. 29:1; 30:29; Hos. 2:11; 9:5; 12:9; Amos 5:21; 8:10), most of which have at some time been associated with Passover. This is especially true of Isa. 30:29. However, while it cannot be said that the issue is finally settled, it seems more probable that all these should be related to Booths (*see* BOOTHS, FEAST OF). In any case, an account of the history of Passover cannot be based on them.

The largest block of material in the OT dealing with Passover and Unleavened Bread is found in Exod. 12:1–13:16. It occurs as a part of the narrative of the slaying of the first-born of the Egyptians and of the ensuing departure of the Israelites. The object of the narrators is to associate both observances with the historical deliverance of Israel. They do this by stressing that both were established in Egypt and kept at the very time of the tenth plague and of Israel's departure, on "that night" (Exod. 12:12; cf. I Cor. 11:23) and on "this very day" (Exod. 12:17; 13:3-4).

The composition of most of this section, as we now have it, probably occurred in the Exile or in the post-exilic period. Documentary source criticism traditionally assigned Exod. 12:1-20, 28, 40–13:2, to the priestly writing. 12:24-27; 13:3-16 were considered the work of a Deuteronomic editor. Insofar as the narrative deals with the feast, this left only the brief section 12:21-23 to represent a pre-exilic source (J); and it gives no positive evidence that Passover was a

national observance celebrating Israel's history. This account of the literary history has not materially changed. H. G. May has rejected the notion that 12:21-23 must be early because it features a blood rite presumably not practiced in later Israel. He treats the entire unit 12:21-28 as a part of P also, associating it with Lev. 23:4 ff. He feels that 12:1-28 as a whole associates the feast with Jewish life in the Diaspora; "the representation," he says, "is consistently that of a simple, private home celebration with the sacrificial animal a sheep. Not only do the early legislators, Deuteronomy and Ezekiel, ignore these particular blood rites, but they have no place in their ordinances where such a celebration could have been performed" (*JBL*, LV [1936], 72). May's significant effort to tie the entire section more closely to later Jewish practice is matched by the persuasive observation of Kraus that all of it, both J and P, is archaic in quality and harks back to pre-Israelite elements. Both emphases are well founded. By giving both equally serious attention the full import of this section for our understanding of the history of the observances is best realized. I.e., the section seems to illustrate in a remarkable way both the tenacious persistence of the cultic forms and the constant, though sometimes imperceptible, changes of emphasis in the manner of observance of the feast.

Exod. 12 begins by saying that the institution of Passover establishes the month of its observance as the "first month of the year" (vs. 2). Elsewhere this month is known as Abib (Exod. 13:4; 23:15; 34:18; Deut. 16:1), meaning "ears," more specifically barley ears (Exod. 9:31). In all probability Israel's year originally began in the autumn (*cf.* BOOTHS, FEAST OF). With the Babylonian conquest came the adoption of the conqueror's calendar. But this was made palatable by using it as an illustration of Israel's cultic pattern. The Babylonian names of months were not used at first. The month of Passover is called the "first month" rather than Nisan, as later. What is more, it is the first month by virtue of the fact that the feast occurs in it. This reconstruction of the liturgical calendar probably occurred in the Exile and was the work of the priestly school (*cf.* FEASTS AND FASTS).

The precise words used here to describe the rite are: "It is the LORD's passover" (פסח הוא ליהוה; Exod. 12:11, 27). The same form occurs twice elsewhere in closely related passages (Lev. 23:5; Num. 28:16). The distinctive feature of this usage is that there is no verb of action, as in the many passages that say that the Passover is "kept" (Num. 9:2, etc.), "offered" (Deut. 16:2, etc.), "killed" (II Chr. 35:6, etc.), or "eaten" (II Chr. 30:18, etc.). The title seems to refer immediately to the action of God in passing over and smiting the first-born in Egypt (Exod. 12:12) or, on the other hand, in his passing over and sparing the "houses of the people of Israel" (12:27). And, simultaneously, it may well refer to the ritual action by means of which this redemptive and protective work of the Lord is both celebrated and made presently available for Israel. It is characteristic of the priestly strand of the OT to imply this sort of sacramental efficacy for the rites divinely appointed for the maintenance of the covenant (*cf.* ATONEMENT, DAY OF).

In relation to the Passover of the NT period this section disclosed both similarities and differences. There is the same concern for a family arrangement of the feast; though instead of stating that the minimum size of a "family" is ten, it insists that a man must join with "his neighbor" (Exod. 12:4) so that his group may be large enough to consume the lamb. The ordering seems to have been done more in terms of natural family units than by means of the "companies" of the era of the Mishna. Moreover, there is no hint here that Passover was a pilgrim feast, nor even of any common shrine for the several families. As in the time of the NT, the victim must be a male, sheep or goat, and without blemish; in both cases, too, the rite occurs on the fourteenth, though in later accounts one misses the prescription about the selection of the victim on the tenth of the month. There is no explicit reference to priestly or Levitical assistance at the slaughter; the Mishna obviously changes the original meaning of the phrase "the whole assembly of the congregation of Israel" (Exod. 12:6) by treating it as a warrant for the three courses needed to accommodate all for the temple sacrifice (Pes. 5.5). The counsel to kill the lambs "in the evening" is more literally followed in the Samaritan rite; the Hebrew is properly interpreted as dusk and cannot be fully reconciled with the later practice of making the sacrifice in the late afternoon; it also seems probable that, as with the Samaritans, the communal meal was about midnight, rather than in the evening, as was later true in Jerusalem.

The most striking difference between this priestly account and the later practice, however, is that the observance, though obviously sacrificial in character, was entirely a domestic affair. There is no clear reference to a shrine; and, instead of being dashed against an altar, there is the application of "some of the blood" (Exod. 12:7; cf. vs. 22) to the doorposts and lintel of each house in which the celebration occurs. Exod. 12:21-23 parallels vss. 6-7, 12-13, but may represent an older version of the matter. The word translated as "basin" also means "threshold" or "sill." This leads to the very plausible proposal that the slaughter occurred in the doorway of the house and that the blood was a means by which a house entered into a covenant with the Lord and served apotropaically to ward off evil. The directions in vss. 21-23, especially, carry an awesome aspect: the preparation is for a dreadful night; no one "shall go out of the door of his house until the morning"; at sight of the blood the Lord, passing through, will exempt the marked homes and restrain the destroyer. The rite seems to serve both as a sign for the Lord and as a protection against a nocturnal demon. This is not just a simple domestic celebration; it is a most solemn observance. It is generally agreed, too, that this form of Passover incorporated some ancient rite of protection through a blood sign, perhaps originally practiced by shepherd wanderers and employed at a crucial season or in a night of evil.

In vss. 6-7, 12-13, the awesomeness is somewhat reduced; the basin and the hyssop are not mentioned, nor is the destroyer. The setting and motivation, however, are identical: the Lord will pass through Egypt to "smite all the first-born" (vs. 12), or, simply, to "slay the Egyptians" (vs. 23). The Passover is here

instituted as a sacrifice by means of which Israel is to escape the tenth plague. The institution is not a commemoration of the escape but an anticipation of it and a means by which it becomes possible. It is the sealing of the covenant between the Lord and Israel by which the people pass into his protection and possession; it is a sign of the divine redemptive action that is about to take place. As words of institution, these verses speak of the first Passover. On this ground later rabbis also explained the fact that the marks of "haste"—loins girded, feet shod, and staff in hand—belonged to the institution and were not to be repeated. The sacramental emphases of the priestly writers, already noted above, are probably mainly responsible for the perpetuation of these accounts of institution.

Exod. 12:24-27 deals with Passover as a commemorative ordinance. There is the command to observe the rite "for ever." And this is illustrated by the prescribed reply to the question of the children: "What do you mean by this service?" (vs. 26). This didactic device corresponds to Deut. 6:20 ff, giving these verses a Deuteronomic cast. It is to be noted, however, that it is used there for the sake of the laws rather than the feasts.

The memorial ordinance also applies to the Feast of Unleavened Bread (12:14-20), which seems to play a secondary role in the section. While the Passover commemorates the slaying of the first-born, Unleavened Bread emphasizes the Exodus itself (vs. 17). The seven-day feast, with its holy assembly on the first and seventh days, corresponds closely to the provisions in Lev. 23. The account is of priestly origins. The statement that on the assembly days, which are days of sabbath rest, there may be prepared only "what every one must eat" (Exod. 12:16) —i.e., unleavened bread—may hint at the practice in the Samaritan observance of consuming all the unleavened bread, as well as the meat, on Passover night, baking additional amounts on the following days.

The importance of keeping the seven-day feast as a memorial of the Exodus is also reinforced by the parenetic device of the answer to the son's question (Exod. 13:9). The entire section, 13:1-16, shows strong Deuteronomic influence. Throughout, it implies that the feast is the occasion for the offering of the first-born. The offering of first fruits began at the Feast of Weeks (*see* WEEKS, FEAST OF) and was completed at Booths. The consecration of the harvest and the harvest season by the waving of the freshly cut sheaf of barley (Lev. 23:9-11) was an aspect of the observance of the Feast of Unleavened Bread, not mentioned here. It reminds us that it was originally an agricultural observance. After the ceremony of the sheaf the new crop could begin to be used for food; but not until the presentation of the leavened loaves at the Feast of Weeks, fifty days later (Lev. 23:17), did the grain harvest end. It seems probable that a special sacredness originally attached to this entire period, marked by the prohibition of leaven. Though the prohibition of leaven in Israel was only for the duration of the seven-day feast, the original pattern seems indicated by the connection between the sheaf of ceremony and the presentation of leaven at Weeks. Apart from the sheaf there were no special sacrifices at this time. Though it later became an individual matter, it is plausible that one original component of Passover was a communal offering or redemption of the first-born by the seminomadic ancestors of Israel. This would help to explain the fact that the greatest plague upon Egypt is the destruction of its first-born and also the institution of the Passover in this connection. The occurrence of the requirement to offer and redeem the first-born in the context of a discussion of the Feast of Unleavened Bread seems to show that this Deuteronomic interpretation of it is deeply influenced by nomadic and Passover traditions.

The far-reaching implications of the account in Exod. 12:1–13:16 can now be summarized. Its strongly sacramental interpretation of the role of the Passover rite points to a predominantly priestly origin. The large measure of agreement between this account of the feast and later practices, especially as recorded in the Mishna, indicates that it had wide influence. The fact that it is given a wholly domestic setting and lacks a temple ceremony—its most important distinction in relation to all other accounts—may point to an exilic origin. The account may represent practices begun or revised in Babylon; that its exilic origin would have made it readily usable by the subsequent Diaspora, as may be stressed, is easy to understand. The adaptation of the feast to a setting that lacked a temple may have involved the revival of some very old forms—e.g., the striking of the blood on the doorposts and lintel that focuses upon the pre-Israelite apotropaic or blood-covenant components reinterpreted in the observance. The offering of the first-born may also have pre-Israelite roots. If, as seems probable, it was in origin a Passover sacrifice, one feels that reference to it here in a predominantly Deuteronomic account of the Feast of Unleavened Bread may indicate that it formed a central factor in the pre-exilic observance of Passover. It likewise seems to bespeak a pre-exilic coalescence of some rites of the two originally separate "feasts."

Among the passages in the OT that were composed later than the section in Exodus discussed above, II Chr. 30; 35 are the most important. The first reports on a Passover attributed to Hezekiah, but on which there is no report in Kings. The account stresses the special themes of the Chronicler: the house of David is divinely chosen, and the temple in Jerusalem is the one true site for worship. As a true king, Hezekiah invited the people of the N to Jerusalem. The report that the feast was kept in the second month (30:2-3, 13), since the priests were unprepared at the proper time, must in all probability be read as a warrant for the later practice of permitting all who were disqualified to observe the feast in the first month to do so a month later (Pes. 9.1-2). Similarly, the statement that the priests and Levites slew the animals and tossed the blood, respectively, because the heads of families were not sanctified, is probably an attempt to explain how these functions had come to be transferred. The date, the sprinkling of the blood, the singing of the Levites, and the participation of those from beyond Judah are all in accord with later practice. The event is described as the greatest in Jerusalem since the days of Solomon (II Chr. 30:26). The description of Josiah's Passover

in II Chr. 35 compares closely with that of Hezekiah's. Josiah and the princes distributed the sacrifices for the people. The people are arranged by families and clans (35:4, 12), but one is given the impression that the account of the sacrifice and its distribution (35:13) unsuccessfully combines the prescriptions of P with those of Deut. 16, yielding an unintelligible result. The report in Ezra 6:19 ff, from approximately the same period, seems to correspond closely to the practice of the NT period. What, however, distinguishes all this material that is later than Exod. 12:1–13:16 is the role it assigns to the priests and Levites.

4. Current interpretations. The current debate about the history of the Passover feast relates to the interpretation of the earlier references to it. In II Kings 23:21-23, with respect to the Passover of Josiah, we are told that no such Passover "had been kept since the days of the judges." In the calendar of feasts, in Exod. 23:14-17, it is the Feast of Unleavened Bread, not Passover, that is coupled with those of Harvest and Ingathering, while the reference to Passover in 34:25 is suspect of being an insertion because of its context. From all this Wellhausen concluded that the coalescence of Passover and Unleavened Bread did not occur until the time of Josiah. The agricultural festival of unleavened bread was kept as such as a national Israelite feast, he felt, until the days of Josiah. The section in Deut. 16:1-10 was interpreted as an attempt to abolish the private Passover celebrations and to eliminate the apotropaic rites characteristic of these; therefore, Passover was combined with the national feast in Jerusalem, and, so he felt, the eating of the meal indoors was no longer permitted. The time of the feast was at the new moon of Abib rather than at the full moon as in Exod. 12 and subsequently.

Whereas Wellhausen held that the coalescence of the two facets of the feast in a national observance occurred for the first time under Josiah, furthering their "historification," recent interpreters, notably Joachim Kraus, hold that what Josiah effected was a re-establishment. He argues that Passover, though once a clan rite, was indeed celebrated at a central shrine of Israel in the days of the judges. Moreover, he maintains that the rites of Unleavened Bread entered the Passover observance even before that time; this view can claim some support from the fact that in all biblical records the use of unleavened bread with the Passover sacrifice is stressed.

Kraus's reinterpretation of the matter is predicated upon the well-known and widely accepted thesis that from its beginning Israel was an amphictyonic confederacy of tribes held together by a common religious tradition and a unifying cultus. The entire community would gather at some shrine center annually, or more frequently, to renew the covenant bonds of the confederacy and celebrate the common tradition. At this stage in Israel's history and in this manner, rather than much later, the assimilation of the Canaanite agricultural feasts of Booths and Unleavened Bread occurred, the former at Shiloh, the latter at Gilgal.

Kraus finds the relevant text in Josh. 4:19-23 and, especially, in 5:10-12. The present form of these passages shows the mark of the priestly editor. But Martin Noth, assuming Israel's amphictyonic history, finds that behind their priestly documentary form they contain authentic bits of a "Gilgal tradition." When we read the passage as a tradition of the Passover at Gilgal, we note that it celebrated both the deliverance from Egypt and the inheritance of the Land of Promise as the association of the crossing of the Jordan with the crossing of the Sea indicates. This occurs on the tenth day, the day on which, in Exod. 12:3, the Passover lamb is selected. Moreover, the Feast of Unleavened Bread is treated as a memorial of Israel in the wilderness in a way that complements its agricultural character. It marks the transition from the manna of the desert to the eating of the fruit of the land of Canaan. The institution of the Unleavened Bread rite corresponds to that of Passover in Exod. 12:1-13 in that it precedes the event of the inheritance of the land, of which it is the pledge. The eating of the parched grain, the first food eaten in the Land of Promise, presupposes the waving of the barley sheaf (Lev. 23:14), making the new crop available for food. In the feast, as here delineated, the Unleavened Bread observance is profoundly reoriented, as nowhere else, to celebrate Israel's holy history in terms of one of its great events. However, the form and emphasis strongly reflect the priestly tradition. It must also be pointed out that Kraus's view that this process of integrating Passover and Unleavened Bread by assimilating them to Israel's faith began very early, at Gilgal, depends both on the amphictyonic hypothesis and on the tenability of the results of his tradition criticism. Since the testing of the latter, especially, is far from complete, it is perhaps too early to predict to what extent his conclusions will be vindicated.

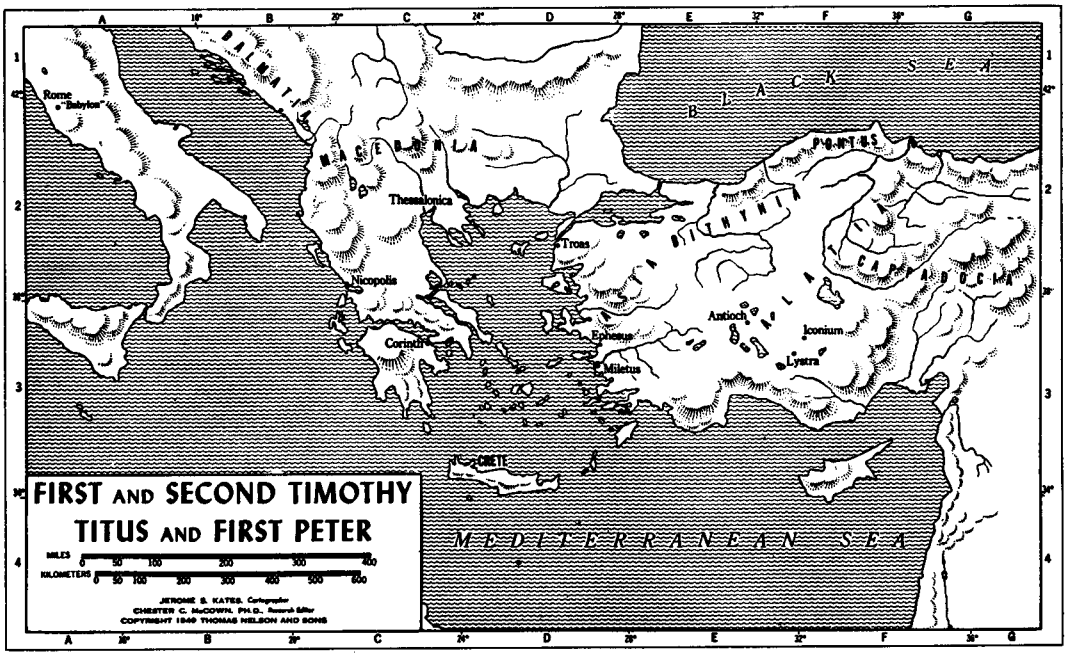
PASTOR. The translation of ποιμήν (Latin *pastor*) in Eph. 4:11. The word is usually translated "shepherd" (*see* SHEPHERD [THEOLOGICAL]) and is used of: (*a*) sheepherders, literally or symbolically; (*b*) Christ, as the "good Shepherd"; (*c*) leaders in the church. It is to be noted that only in the Ephesians passage are Christians called "shepherds" or "pastors" (but note John 21:15-17) and that here the term, closely linked with "teachers," apparently designates an office. *See* MINISTRY. B. H. THROCKMORTON, JR.

PASTORAL LETTERS, THE. A common way of referring to I and II Timothy and Titus, three letters of the NT which together form a distinct group within the Pauline letter corpus. The term, first used by Anton in 1753, emphasizes the pastoral and ecclesiastical concerns of the letters, written in the name of Paul as a chief pastor and administrator of churches to two associates.

Although the letters are intended to be private



communications to Paul's associates, they are actually more. Their official character as church documents is revealed by the greetings at the end of each letter; even the most private letter among the three, II Timothy, carries the plural greeting: "Grace be with you [all]" (4:22). The author has one primary concern, the stabilization of the church. He therefore exhorts his associates to enforce obedience to the Christian faith; to take and uphold solid measures with respect to worship, ordination, and the organization of the church; and to combat heresy.

A. ***AUTHORSHIP.*** The question of authorship continues to be a much-debated issue in NT scholarship. Are the letters to be ascribed to the apostle Paul, or are they pseudonymous in character? The issue turns on ecclesiastical tradition and internal evidence.

1. Ecclesiastical tradition. It is only since Irenaeus, who wrote his *Against Heresies* between 181 and 189, that explicit quotations from the Pastorals occur. Irenaeus cites from all thirteen chapters of the Pastorals except the first chapter of Titus. *Ca.* A.D. 190, the Muratorian Canon (*see* CANON OF THE NT) puts them at the end of the Pauline letters, with these words: "Howbeit to Philemon one, to Titus one, and to Timothy two were put in writing from personal inclination and attachment, to be in honour however with the Catholic Church for the ordering of ecclesiastical discipline." Yet it must be observed that the Michigan Beatty Codex of Paul (*ca.* 250; *see* TEXT OF THE NT) in all probability did not contain the Pastorals. Likewise the canon of MARCION did not contain them, and it seems unlikely that Marcion rejected the Pastorals, as Tertullian asserts (Tert. Marcion V.21). The later Marcionite churches seem to have accepted the Pastorals, which is unlikely if Marcion had explicitly rejected them. It is more probable that the Pauline canon known to Marcion did not contain them.

At the end of the second century, then, the evidence is ambiguous. Before that time the Pastorals seem to have been neglected, whereas they became common property of the church after that time. The Apologists are silent about the Pastorals; yet it may be contended that Pauline quotations are, in any case, rare in them. When we come closer to the beginning of the second century, there seems to be evidence of a knowledge of the Pastorals in the Apostolic Fathers, especially in Polycarp. The evidence is:

I Clement 2:7 (A.D. 95) gives the expression "ready for any good work," which seems to be identical with Tit. 3:1 (cf. II Tim. 2:21; 3:17).

Ignatius has some points of contact with the Pastorals, especially in the interpretation of Jesus as "our (common) hope" (Ign. Eph. 2:2; Magn. 11; Trall. 2:2; Phila. 11:2 [cf. I Tim. 1:1]).

Polycarp's Letter to the Philippians has striking parallels with the Pastorals. Polyc. Phil. 4:1 reads: "The beginning of all vices is love of money; knowing therefore that we brought nothing into the world, but neither have we anything to carry out . . . ," and seems to be a reminiscence of I Tim. 6:7, 10. Likewise Polyc. Phil. 9:2: "For neither have they loved

the present world," seems a recollection of II Tim. 4:10. Many less certain parallels can be adduced. However, when we notice the language of the Pastorals and its general proximity to the language of the higher Greek Koine, especially to that of the Apostolic Fathers, we must be cautious about arguing on the basis of literary dependence. Especially with respect to Polycarp, various conclusions have been drawn. It has been argued (*a*) that the Pastorals are prior to Polycarp's letter, which is traditionally dated *ca.* 110; (*b*) that the Pastorals are later than Polycarp's letter, the Pastorals quoting Polycarp rather than the reverse; and (*c*) that Polycarp and the author of the Pastorals are the same person. It seems more probable, however, in view of the proverbial character of the quotations, that both authors depend on a common source, which they cite independently.

2. Internal evidence. Vocabulary, style, and the situation which the letters presuppose are the three factors involved here.

a. Vocabulary. It has long been observed that there is a notable difference in the vocabulary of the genuine Pauline letters and the Pastorals. Although the argument from vocabulary in itself cannot be conclusive, it must be seen in conjunction with the other objections raised to Pauline authorship. The most complete study of the vocabulary of the Pastorals was undertaken by P. N. Harrison (*see bibliography*). Its main conclusions are here summarized:

The vocabulary of the Pastorals contains 902 words, of which 54 are proper names. Of the 848 remaining, 306 or more than ⅓ are not found in the ten other Pauline letters. There is an astounding number of *hapax legomena* (words occurring only once) among them: 175 do not occur in the NT at all; 131 words do occur in the Pastorals and other NT books, but not in the Pauline letters. The words, then, which Paul and the Pastorals share are 542. Of these, only 50 can be characterized as exclusively Pauline, since they do not appear in the other books of the NT. And only three of them (ἀφθαρσία; οἰκέω; χρηστότης) occur more than twice in any Pauline letters. These distinctly Pauline phrases were probably taken over literally by the author from the Pauline letters which he had before him.

The striking similarity in vocabulary between the Pastorals and the Apostolic Fathers and Apologists has already been mentioned. Of the total vocabulary of the Pastorals (848), 211 words, while absent from the vocabulary of Paul, are part of the working vocabulary of Christian writers in the second century. Furthermore, the language of the Pastorals is far closer to the popular-philosophical language of the time, as reflected in Epictetus and other Stoic philosophers, than it is to the language of Paul. The non-Pauline vocabulary reflects often the peculiar religiosity of the author. Phrases not used by Paul become prominent in the Pastorals. The author stresses a rationalized Paulinism, wanting to come to terms with an ongoing world in which the church has to find a place for itself. Therefore he uses terms such as: εὐσέβεια ("godliness, piety"); ὑγιαίνουσα διδασκαλία ("orthodoxy, sound teaching"); σώφρων ("sensible"); σεμνός ("respectable"); ὅσιος ("holy, chaste"); παραθήκη ("deposit of faith").

Furthermore, when the author uses Pauline phrases or compounds, he uses them with a different meaning: e.g., δίκαιος ("upright"); πίστις ("*the* body of Christian faith"). Whereas Paul uses for "revelation," ἀποκάλυψις, ἀποκαλύπτω, the Pastorals use "appearing" and "appear" (ἐπιφάνεια; φανερόω).

The use of concepts of mystery-religion and emperor-worship is conspicuous: e.g., σωτήρ; σωτήριος χάρις; μακαρία ἐλπίς; μέγας θεός; φιλανθρωπία. The word "good" (καλός) which Paul employs regularly as substantive is used twenty times as an adjective, often associated with ἔργα, "works."

One is thus led to observe the absence of the terms expressive of Paul's characteristic piety and theology. The place of the Spirit is amazingly reduced. Statistically, the ninety occurrences in Pauline letters are reduced in the Pastorals to six. Three of these are liturgical in character and are citations: I Tim. 3:16; II Tim. 1:14; Tit. 3:5. One (I Tim. 4:1) is a citing of prophecy in conventional language; the last two occur in II Tim. 1:7; 4:22. But the meaning of the Spirit in a christological connotation, as the agent by which the new creature lives, has disappeared. Likewise the characteristic Pauline term σῶμα, so often associated with πνεῦμα, has gone. Furthermore, δικαιοσύνη, as the justifying act of God in Christ, is present only in the liturgical citation of Tit. 3:7; in I Tim. 3:16 the verb δικαιόω is used in a creedal context of Hellenistic origin. And then ἐπίγνωσις τῆς ἀλήθειας has lost its Pauline mystic connotation (Phil. 3:10) and refers to the ethical conduct which is consonant with the truth of the Christian faith.

b. Style. The language of the Pastorals is more akin to a literary Koine similar to Luke, Hebrews, and I Peter than to Paul's use of the popular Koine. One notes also that the dramatic vivacity of Pauline argumentation, with its emotional outbursts, its dialogue form of thought, its introduction of real or imaginary opponents and objections, and the use of metaphor and image, is replaced by a certain heaviness and repetitiousness of style. The proponents of Pauline authorship cannot escape this argument by referring to the quietude of style which would be the result of the apostle's writing in his old age. Nor can they argue that in writing to friends Paul has no need of arguing his case vehemently. Psychological arguments such as these are dangerous to employ, especially when the vocabulary stands so decisively against Pauline authorship.

c. Situation. It seems impossible to fit the situation which the Pastorals describe anywhere in the life of Paul as described in Acts and the Pauline letters. Acts, to be sure, does not report the death of Paul at the end of the book. This silence is probably to be explained, not by the hypothesis that Paul's imprisonment at Rome did not result in his condemnation and death, but by the author's literary purpose. He is setting forth the successful missionary work of the apostle and therefore prefers to end his book with a reference to Paul's "unhindered" work in Rome. To have concluded with the martyrdom of Paul at the hand of the Roman authorities would have been an anticlimax for this early Christian apologist, whose aim is to show the political innocence of the Christian movement. It is evident, however, from Paul's farewell address at Miletus that the

author of Acts knew of Paul's death, which he stresses twice (Acts 20:25, 38).

When we consider the Pastorals as one unit, the situation described in them seems to presuppose a release from a prior Roman imprisonment. After Paul's deliverance "from the lion's mouth" (II Tim. 4:17), he was able to continue the proclamation of his message to the Gentiles for several years and in many lands. He traveled in Asia Minor, and from there to Macedonia (I Tim. 1:3); he visited Crete and Epirus, passing a winter in Nicopolis. And prior to his final arrest he was again in Greece (II Tim. 4:20) and in Asia Minor in Miletus and Troas (vss. 13-20). He may even have traveled to Spain, the "limits of the West," as I Clement indicates (cf. Rom. 15:24; I Clem. 5:7). Yet the evidence of *two* imprisonments is not so clear as we might wish: II Tim. 4:16 does not necessarily mean a release from a first imprisonment, but may refer to a first sitting of a trial at the first imprisonment.

If we do not take the Pastorals as one unit, the personal references may involve separate episodes in the life of Paul and can be more easily accommodated within the framework of the Apostle's career as we can reconstruct it from the other letters and from Acts; but, even so, no consistent picture emerges from the study of the data in any one of the three letters, and it seems likely that the author has created certain settings derived from Acts or legendary materials which would give his letters a more secure Pauline basis. The suggestion that the Pastor has included certain authentic Pauline personalia in his account has been defended and cannot be ruled out. The conclusion to which the great majority of scholars has come is that the Pastoral letters are (at least in their present form) non-Pauline and must be ascribed to a pseudonymous author of the early second century, who invokes the authority of the great Apostle to the Gentiles in order to give his exhortations the necessary apostolic support and weight.

B. *HISTORICAL SETTING AND PURPOSE.* Any evaluation of the Pastoral letters must attempt to place them in their historical setting. For it is only when this historical setting is elucidated that we gain an insight into the purpose and importance of the letters.

The apostolic period had passed. And with it the eschatological drive of that period, which saw the world passing away to make place for the glorious return of the Lord Jesus Christ and the establishment of God's visible kingly rule (*see* ESCHATOLOGY OF THE NT). The eschatological hope had been the main drive in the apostolic church. This hope had been stimulated by prophetic-charismatic utterances which strengthened the early churches in their consciousness of being the eschatological communities living in the end-time. The hope had been accompanied by a certain indifference to the world and its culture, since the final judgment over the world was thought to be forthcoming in the immediate future. In the postapostolic church the theme of hope had to be modified. The delay of Christ's glorious PAROUSIA made the church aware of the need to reformulate its attitude toward the world, and of coming to terms with its own existence as having to endure within the world. The hope is modified—not abandoned. The theme becomes that of pilgrimage: What does it mean to be in the world—to continue to live in it, but not to be of it? In the Pastorals this theme of pilgrimage is expressed in the appeal to the confession, to fighting the good fight, to suffering for the faith. Existence within the world involves certain forms of stabilization and organization. The church searches for its self-identity amid the forces of the world. And this search for self-identity is made more urgent by two movements which threaten to dissolve the church.

One of these threats arises within the church and the other from without the church. One is the threat of heresy; the other, that of public opinion and the state. Both threats are related to the struggle of the church to maintain its self-identity in the face of the new historical conditions. Heretics pervert the pilgrimage of the church, and the state desires to destroy the church. In the face of these two movements the church must react. The reaction opened the way for the three canons of the early Catholic church: (*a*) the formation of a creed; (*b*) the formation of a canon, and (*c*) the formation of an ordained clergy. In confrontation with heresy, forms of orthodoxy were being developed. In these early days of transition all these forms were in a flexible state, and it is difficult for the interpreter to get a clear picture of the issues. We must not forget that quite different developments may have taken place in various geographical areas. The development in Asia Minor was probably different from that in Syria; Syria, in turn, differed from Rome and Egypt.

Furthermore, the categories of orthodoxy and heresy were in the process of being formulated. As categories they are confusing, since we have no access to the heretical literature of the time. What seemed "sound doctrine" to our author may well have been marked heretical by his opponents. And how shall we ascertain the opinion of the majority? Does our author represent a minority opinion forcing itself as orthodox upon a majority which considers our author heretical? If, as there is good reason to believe, our author writes in the same era as IGNATIUS, he may have shared the same struggle in carrying through his convictions.

At the same time the church becomes increasingly aware of its relation to society and the state. When the church is identified as a movement different from Judaism, it faces persecution from public opinion and the state. The self-identity of the church became increasingly obvious after the first Neronian persecution (64); and especially after the fall of Jerusalem, which spelled the defeat of the Jewish Christian wing of the church. Apologists for the Christian church became active: the book of the ACTS OF THE APOSTLES is the first apology which emphasizes the political innocence of the church. In the Pastoral letters the self-conscious attitude of the church in relation to the world is reflected in the formulation of an ethic determined to create good will for the church. "Those outside" become an important category. Therefore, we find in these letters the insistence on good works and the avoidance of gossip. The source of the ethic is found in Jewish-Hellenistic ethical LISTS, in commonplace virtues of good behavior and chastity. Indeed, the adaptation of a

secular ethic for Christian usage forms an important element of the appeal of the author.

In conclusion then, there are several themes in the Pastorals. They come from the church's search for self-identity. The threat within the church is heresy, and it is met by a search for reliable criteria—i.e., by a trend toward orthodoxy. This trend occurs in the areas of worship, creedal norms, and the ministry. The threats from without the church are met by the effort to Christianize the best secular virtues in the interest of better public relations. But although the church is willing to go a long way toward finding rapport with the world, it knows that it may have to suffer for its convictions. The faithfulness to the confession is the boundary line. Here the church stands firm against the world; here clashes may come, and indeed have come, as the post-Pauline literature of the NT unmistakably indicates.

The Pastorals may be characterized as a manual for the clergy. Their purpose is to strengthen the church in its beleaguered position, and to give it guidance in its search for self-identity. Heretics must be shunned or excommunicated. The clergy must be selected carefully, its authority recognized, and its guidance in forms of worship followed.

The author has adopted the name of Paul because he is convinced that Paul would have addressed the church in the same way, had he been alive. Furthermore, the authority of Paul strengthens his hand and establishes the apostolic tradition in the church. It may well be the case that heretics employed the authority and letters of Paul to prove their points and that the author thus counterattacks.

C. ***CONTENTS.*** Although the chronological order of the letters is a disputed matter and cannot be solved definitely, the order is probably that of Titus, I Timothy, II Timothy. It may be observed that Titus is addressed to missionary regions, whereas I Timothy concerns itself with established churches. Yet their similarity in content makes it difficult to believe that there would have been a need for Titus if I Timothy had been written first. Whereas Titus and I Timothy are mainly occupied with church order, II Timothy is the most Pauline among the Pastorals. Here we find the largest number of personal references and more personal character than either I Timothy or Titus possesses. II Timothy may be called an "invitation to martyrdom."

The outline of the three letters indicates the emphases of the author. Two themes intermingle and influence each other: (*a*) the disrupting influences of the heretics, and (*b*) efforts toward consolidating the church in opposition to heretics.

Titus

I. Salutation, 1:1-4
II. Church polity against heresy, 1:5-16
  A. Manual for church officers, 1:5-9
  B. Attack upon heresy, 1:10-16
III. Manual for the ordering of the Christian life, 2:1-3:11
  A. Behavior in daily life for the various groups, 2:1-15
  B. Behavior toward non-Christians, 3:1-7
  C. Behavior toward heretics, 3:8-11
IV. Personal notes, 3:12-15

I Timothy

I. Salutation, 1:1-2
II. Attack on the theology of the heretics, 1:3-20
III. Manual for church life, 2:1-3:16
  A. The correct worship, 2:1-15
  B. The correct clergy, 3:1-16
IV. Attack on the ethics of the heretics, 4:1-11
V. Manual for church officers, 4:12-6:2
VI. The danger of the world's riches, 6:3-19
VII. Antiheretical ending, 6:20-21

II Timothy

I. Salutation, 1:1-2
II. Exhortation to courageous witness on the basis of Paul's example, 1:3-2:13
III. Behavior toward heretics, 2:14-4:8
IV. Paul's personal situation, 4:9-18
V. Greetings, 4:19-22

D. ***NATURE OF THE HERESY.*** The identification of heresy in the post-Pauline period is an exceedingly complex matter. This is primarily due to the fact that no heretical literature from this period has survived which enables us to describe it sufficiently. Moreover, the canonical literature of our period is of such a nature that we cannot draw a clear profile from the antiheretical sections. The church was just beginning to formulate an antiheretical front, and in doing so, it was not interested in a description of heretics or in a debate with them. The heretics are denounced in the most general terms, and all the vices of contemporary society are ascribed to them. Abuse seems to replace debate. Moreover, we must realize that the church was fighting for its existence and could not afford a debate. In this situation it adopted the *mores* of the time and encountered heretics in much the same way as the popular philosophical schools denounced one another. This was often in terms of traditional ethical lists. Notice, e.g., the barrage of vices attributed to the heretics in II Tim. 3:2-5: "Men will be lovers of self, lovers of money, proud, arrogant, abusive, disobedient to their parents, ungrateful, unholy, inhuman, implacable, slanderers, profligates, fierce, haters of good, treacherous, reckless, swollen with conceit, lovers of pleasure rather than lovers of God, holding the form of religion but denying the power of it." This general indictment of the opposition should not be used as a means of identifying it.

In view of these difficulties, two dangers must be avoided. The first one is that of dividing the heretical opposition into several groups or insisting on their Jewish Christian character. The essentially Hellenistic character of the Pastorals and the lack of evidence that the opponents insisted on circumcision or the OT food laws shows that the fight between Judaism and Christianity is over. Notwithstanding a Jewish element in the opposition (I Tim. 1:7; Tit. 1:10, 14; 3:9), we shall see that the nature of the heresy has nothing in common with legalistic Judaism. The second danger is the identification of the opposition with a well-known Gnostic movement of the second century. The extent to which the opposition has formulated a system cannot be ascertained, but it seems a doubtful undertaking to identify the heresies of the Pastorals with any of the elaborate Gnostic

systems described by Irenaeus, Hippolytus, or Epiphanius. It has proved to be tempting to identify the heretics with the Marcionite movement, especially because of the similarity in name of a Marcionite tractate, the "Antitheses," with the "contradictions [*antitheses*] of what is falsely called knowledge [*gnosis*]" of I Tim. 6:20.

One should not associate the heretics with the name of a well-known heresiarch, but should determine, if possible, what stage of the early Christian church the Pastorals illuminate for us. GNOSTICISM is not a late offshoot of the Christian gospel. In fact, a Gnostic climate surrounds the NT from its beginning; already Paul had to struggle with Gnostic tendencies in some of his churches (*see* COLOSSIANS, LETTER TO THE). Gnosticism narrates basically the tragic fall of the soul. The soul has fallen from the heavenly world of light and has been imprisoned by the demonic powers which rule over the world. The presupposition of Gnosticism is an absolute dualism in the macrocosmos (heaven-earth) and in the microcosmos (soul-body). Salvation consists of escaping this earth and this body in order that man's inmost being, his divine soul or spirit, may return to its heavenly source. The way of salvation is gnosis, revealed mystical knowledge which is communicated by a divine messenger sent from the heavenly world to redeem his own. All the variations of the Gnostic myths basically tell this story. The complete dualism is accompanied by an ethic which, because the world is evil, demonstrates the superiority and freedom of Gnostic man. This freedom is demonstrated, in different Gnostic circles, in two ways seemingly opposed to each other. One way is that of ethical libertinism, the other of asceticism. Both ways show the indifference of spiritual man to his existence in the world.

The Pastorals give some clear indications of the growth and character of the Gnostic heresy which the author opposes:

a) Asceticism. Asceticism manifests itself in the Gnostics' prohibition of marriage (cf. I Tim. 2:15; 4:3; 5:14; Tit. 2:4) and their abstinence from certain foods (cf. I Tim. 4:3; 5:23; Tit. 1:15). These ascetic features arise from their conviction that creation and procreation are essentially harmful to salvation and that salvation consists in avoiding contact with an evil and corrupt world.

b) Spiritualism. In contrast to their negative view of matter, the Gnostics exalt the soul. They believe it to be a consequence of Jesus' resurrection and ascension to the right hand of God that their own lives in Christ have already been essentially transported to a heavenly existence. In this sense Timothy must "avoid the godless chatter and contradictions of what is falsely called knowledge" (I Tim. 6:20). Part of this pseudo knowledge is the teaching of the heretics that "the resurrection is past already" (II Tim. 2:18).

c) "Myths and endless genealogies" (I Tim. 1:4; cf. 4:7; II Tim. 4:4; Tit. 1:14). This may refer to Gnostic interpretations of OT texts, especially speculation on the genealogies of the Pentateuch with reference to Gnostic aeons and other figures of the PLEROMA, the Gnostic world of the heavens. Yet in the abusive language of the Pastorals, myths may refer, not so much to specific Gnostic myths, as generally to "foolish stories."

d) Jewish elements. The occasional reference to Jewish elements of the heresy (Tit. 1:10: "the circumcision party"; 1:14: "Jewish myths"; 3:9: "quarrels over the law"; cf. I Tim. 1:7) does not exclude, but rather confirms, the Gnostic character of the heresy. The heresy is related to a gnosticizing Judaism, elements of which we meet already in Colossians. In fact, the earliest Gnostic systems arise in the Syrian basin and seem to have been associated with the baptismal movements of that region. The DEAD SEA SCROLLS exhibit Gnosticizing features already, and it is probable that the *minim* (heretics) of rabbinical literature should be thought of as Jewish gnostics, speculating on the names of God and on creation.

e) Libertinism. It is difficult to assert positive marks of libertinism in the Pastorals, since many references to it may simply have been part and parcel of the author's antipolemical arsenal. Yet I Tim. 1:8; II Tim. 3:6 may refer to antinomian practices.

f) Emancipation of women. The appeal of Gnostic teaching to women is evident from II Tim. 3:6-7: "Among them are those who make their way into households and capture weak women, burdened with sins and swayed by various impulses, who will listen to anybody and can never arrive at a knowledge of the truth." This seems quite in line with Irenaeus' testimony to the influence of Gnostics among women (Iren. Her. I.13.3; 23.2; cf. Just. Apol. I.26.3). In this light the Pastor stresses the household duties of women and gives strict rules about the order of widows and commands them to be silent in the church (I Tim. 2:9 ff).

The strength of the heretics is considerable. They are not outsiders but flourish in the midst of the church and seem to have considerable success. "Their talk will eat its way like gangrene" (II Tim. 2:17). The author puts prophecies about the end of time in the mouth of Paul, to let his readers know that what "Paul" prophesied is now a fact. "Now the Spirit expressly says that in later times some will depart from the faith by giving heed to deceitful spirits and doctrines of demons" (I Tim. 4:1). Again: "The time is coming when people will not endure sound teaching, but having itching ears they will accumulate for themselves teachers to suit their own likings, and will turn away from listening to the truth and wander into myths" (II Tim. 4:3-4). The Pastor seems to have changed his strategy toward the heretics or may have hardened his line of attack in the letters. A soft line of approach is suggested in II Tim. 2:24-25, where it is said that the "Lord's servant must not be quarrelsome but kindly to every one, an apt teacher, forbearing, correcting his opponents with gentleness" —presumably in view of the heretics Hymenaeus and Philetus, referred to just prior to this passage (vs. 17). Tit. 1:13; 3:10 suggest a short refutation and a shunning of the "heretical person," whereas in I Tim. 1:19-20 the heretics of II Tim. 2:17; 4:14 have already been "delivered to Satan that they may learn not to blaspheme"—i.e., excommunication has taken place.

E. ***MARKS OF ECCLESIASTICAL STABILIZATION.*** In the face of these heretical threats the church made serious efforts of consolidation. These

efforts are clearly seen in the area of worship and of the ministry.

1. Worship and creed. There is a double movement at work here. The need for a church order is matched by the establishment of an apostolic tradition which will give the church a firm foundation of the true apostolic faith. Regularly we meet in the Pastorals the living tradition on which the church is founded. Traditional formulas are used. Hymnal and creedal fragments are set in the midst of the hortatory emphases of the author (cf. I Tim. 3:16). Such creedal fragments may have been used in the worship service of the church and are often introduced with the formula: "The saying is sure and worthy of full acceptance" (I Tim. 1:15; 4:9). So it happens that most christological statements in the Pastorals are not the creation of the author, but citations from the early church confessions. (This would explain the often primitive features of this Christology.) In I Tim. 2 we find one of the earliest rules for the conduct of worship. This is in harmony with the emphasis on how to behave in church, how to conduct the correct worship. The charismatic gatherings of the primitive church had already been regulated by Paul according to the norm: "God is not a God of confusion but of peace" (I Cor. 14:33). The need for order and form drove the church to apply more rigidly the Jewish pattern of worship, which it had first adopted.

The pattern of the church order is primitive. We can still discern its origin. It is derived from the regulations for family life and the ethical LISTS (Col. 3:18-19; I Pet. 2:13–3:7). These regulations for family life are now applied to the life of the church. The structure of the house of God is built upon that of the family (I Tim. 3:15). This applies to the clergy as well: "He [a bishop] must manage his own household well, keeping his children submissive and respectful in every way; for if a man does not know how to manage his own household, how can be care for God's church?" (vss. 4-5). Similarly, patterns of behavior in the worship service are being formulated (2:1-2).

2. The ministry. The question of an officially ordained MINISTRY became an issue of importance in the post-Pauline church. The continuing existence of the church in the world, the gradual extinction of charismatic leadership, and the intrusion of incorrect interpretations of scripture made the question paramount: Who is the legitimate interpreter of scripture and the faithful guardian of the apostolic teaching? Ultimately the church arrived at a threefold apostolic criterion: an apostolic ministry, an apostolic creed, and an apostolic canon. They were to safeguard the church against arbitrary perversions.
