RA rä. Alternately: **RE** rä. The Egyptian sun-god, whose chief cult center was Thebes. *See* EGYPT.

RAAMAH rä'ə mə [רעמא]. Alternately: **RAAMA** [רעמא] (I Chr. 1:9). A son of Cush, and the father of Sheba and Dedan, hence the name of an Arabian locality (Gen. 10:7; I Chr. 1:9). The traders of Sheba and Dedan are reported to have brought the best of spices, all sorts of precious stones, and gold to Tyre in exchange for the latter's wares (Ezek. 27:22). Since the LXX renders the word by "Regma" (Ῥεγμα), many have identified Raamah with a city of that name mentioned by Ptolemy and located on the Persian Gulf. A better identification is with the city of Raamah near Ma'in in SW Arabia, which is mentioned in a Minean inscription as being the scene of an attack on one of their caravans by raiders from Sheba and Haulan. S. COHEN

RAAMIAH. Alternate form of **REELIAIH**.

RAAMSES. Alternate form of **RAMESES (CITY)**.

* **RABBAH** räb'ə [רבת], great or capital city (Josh. 13:25; II Sam. 11:1; 12:27, 29; I Chr. 20:1; Jer. 49:3; Ezek. 25:5; Amos 1:4). Alternately: **RABBAH OF THE AMMONITES** äm'ə nīts [רבת בני עמון], great or capital city of the sons of Ammon (Deut. 3:11; II Sam. 12:26; 17:27; Jer. 49:2; Ezek. 21:20—H 21:25); **KJV RABBAH (RABBATH) OF THE CHILDREN OF AMMON** —əth, äm'ən. The capital city of Ammon.

1. **General situation.*** The name, location, and nature of the site of modern Amman leave no doubt of its identity with the ancient capital of the Ammonite kingdom, Rabbah. Situated some twenty-three miles E of the Jordan River in the valley which forms the course of the upper Jabbok (Wadi ez-Zerqa, or modern Wadi Amman), Rabbah is the only city in Transjordan which biblical tradition clearly designates as Ammonite. The Iron Age settlement seems to have been divided into at least two parts: the "royal city" (II Sam. 12:26), probably composed of the principal fortress or royal citadel, and situated on top of the lofty triangular plateau (acropolis) that rises precipitously N of the Wadi

Amman; and the "city of waters" (vs. 27), apparently referring to some kind of fortification guarding a large source of water for the city in the valley of the Jabbok. Following the destruction of the Ammonite kingdom in the sixth century, Rabbah was not rebuilt until Hellenistic times, when the city was renamed Philadelphia (see § 3 below). This name prevailed throughout the Greek and Roman period, but disappeared after the Arab conquest of the land, when it reverted to a part of its ancient and now contemporary name, Amman. By far the vast majority of the beautiful and important ruins which are still visible at Amman stem from the Greek and Roman city.* The rude stone monuments (dolmens, cromlechs, and menhirs) that have been surveyed in the vicinity of Amman appear to come from the prehistoric period, and thus are not specifically Ammonite. Figs. RAB 1, 2.

2. Modern Amman (Rabbath-Ammon, Philadelphia) viewed from Roman theater

2. **Archaeological history and remains.** The earliest Ammonite occupation of Rabbah does not antedate the Late Bronze Age (ca. 1550-1200). Archaeological excavation at Amman by the Italians (1927-29) uncovered the remains of an ancient surrounding wall resting on natural rock on the lowest terrace of the E part of the acropolis. Unfortunately, few aids for dating were discovered, so that the fifteenth-century date assigned to the wall cannot be proved. However, more recent excavation near the

Amman airport has disclosed a Late Bronze Age shrine, constructed with large blocks of unhewn stone, and revealing remarkable quantities of weapons, seals, scarabs, jewelry, and pottery. Among the latter have been found for the first time in Transjordan the remains of over a hundred Mycenaean vases of various forms, which clearly fix the Late Bronze date. The curious isolation of the small shrine in the open country 2½ miles E of Amman would seem to suggest its use by seminomadic peoples and caravan traders of the early Ammonite kingdom. The ancient commercial highway between Damascus and Arabia ran directly through Rabbah.

Several Iron Age tombs have been cleared at Amman whose main contents point to a Late Iron II date (ca. 700-600). Outside these tombs, however, there are no architectural remains which can be dated with any certainty to the early Ammonite kingdom. What is left of the old city walls seems to stem from the time of the Ptolemies. From an architectural standpoint, the most important period at Amman was the age of the Antonines (second century A.D.), from which comes the great bulk of Roman remains. These include the el-Kal'ah, or citadel, situated on the main acropolis N of the Wadi Amman, and on which are the ruins of two temples (one dedicated to Zeus Ammon) and a cultic complex. Two other acropolises are without ruins, although some scholars consider the second eminence to have been the site of the Early Iron Age capital. Among the splendid constructions in the valley of the Wadi Amman S of the main acropolis is a long street of pillars, which branch out to the NW in a transverse valley. Along this avenue, from W to E, are arranged an aqueduct, a bath, the so-called Nymphaeum, the already-mentioned propylaeum, the famous amphitheater (largest in Syria, seating some six thousand spectators), the so-called Odeum, and an E gate and wall, the latter apparently constituting the only blockade against easy entrance to the city by marauding Bedouin. This magnificent array of Roman remains shows the extent to which the city participated in the prosperity of E Palestine during the second-third centuries A.D.

3. Political history. On the basis of evidence from archaeological explorations, ancient Rabbah would seem to have been established as early as the thirteenth century. There are only two references to the city in biblical literature going back to a time before the tenth century. The first is a tradition preserved by the Deuteronomist (Deut. 3:11) that the bed of the Bashanite king OG was kept in Rabbah (see ZAMZUMMIM). The second reference occurs in a geographical explanation of the location of Aroer, which, according to Josh. 13:25, was "east of Rabbah."

The most extensive biblical references to Rabbah are in connection with David's siege of the Ammonite capital in the early tenth century B.C. (II Sam. 11-12; see AMMON § 3d). For the first time in the history of Ammon, the capital was besieged and captured, after a bitter struggle (II Sam. 11:1, 22-24; 12:26; I Chr. 20:1). It would appear, from the parallel accounts describing this event (II Sam. 12:26-31; I Chr. 20:1-3), that Joab only directed the initial phase of the siege, capturing the "royal city" (עיר המלוכה; lit., "the city of the kingdom"; see § 1 above)

and the "city of waters" (עיר המים; see § 1 above); while David, upon being summoned from Jerusalem, led forth the reserve troops and administered the decisive blow that overwhelmed the entire city (II Sam. 12:28-29). Subsequently, David pillaged the Ammonite capital, and before returning to Jerusalem, organized the citizens of Rabbah, as well as others from neighboring Ammonite settlements, into a labor *corvée* (vss. 30-31). Throughout the remaining years of the United Monarchy, Rabbah continued under Israelite suzerainty. But sometime during the first half of the ninth century, the Ammonites regained their independence, earning a scathing condemnation from Amos, who prophesied the destruction of Rabbah (Amos 1:14).

No further mention of the Ammonite capital occurs in biblical literature until near the end of the seventh century B.C. Jeremiah acknowledges the last important expansive movement of the Ammonites at this time, and foresees the eventual military demise and destruction of Rabbah at the hands of Israel (Jer. 49:2-3). Finally, Ezekiel envisions God commissioning him to mark a way for the sword of the king of Babylon (Nebuchadnezzar) to come to Rabbah (Ezek. 21:20), and thus punish the rebellious Ammonites. The ultimate destruction of the Ammonite capital by the invading Arab hordes ca. 580 B.C. is vividly described by Ezekiel in his oracle against the Ammonites (Ezek. 25:5).

The name of Rabbah is nowhere mentioned in the OT in connection with Jewish history of the post-exilic period. We next hear of it after its capture by Ptolemy Philadelphus (285-247), in whose honor the city was renamed Philadelphia. In 259, however, the governor Zenon still called the city by its indigenous name, which (in the form Rabbatamana, τὰ Ῥαββατάμμανα) was retained by Polybius and Stephen of Byzantium. According to Polybius (V.71), the city was captured from Ptolemy Philopator by Antiochus III the Great in 218 B.C., after a severe and protracted siege, which was broken only through the help of a captive, who revealed the existence of a subterranean passage by which the citadel garrison obtained its water supply. A nineteenth-century survey of the site revealed the remains of a reservoir and aqueduct which possibly belong to this subterranean passage described by Polybius. In 199 B.C., Philadelphia passed under the Lagides after Antiochus' victory at Panion. In the time of Hyrcanus (135-107), so Josephus (Antiq. XIII.viii.1; xv.3) informs us, a Zeno Cotylas was tyrant over the city. In 63 B.C., Philadelphia became a city of the Decapolis, held by the Arabs (Jos. War I.vi.3), who were in open hostility to the Jews in the years 66 and 44 (Antiq. XX.i.1; War II.xviii.1) until finally defeated by Herod in 30 B.C. (War I.xix.5-6). Philadelphia did not belong to the province of Arabia until the time of Trajan (A.D. 106). In the middle of the fourth century A.D., Ammianus Marcellinus listed it as one of the great fortified cities of Coele-Syria. It later became the seat of a Christian bishop, forming one of the nineteen sees of *Palaestina tertia*. In 635 Philadelphia succumbed to the Arab conquest under Yezid. In the tenth century the Arab geographer Mukaddasi described it as the capital of the Belqa district lying on the border of the desert, where it has con-

tinued as an important city to this day. Unfortunately the installation of Circassians there in 1878 has been prejudicial to the preservation of some of the ancient buildings.

***RABBAH (OF JUDAH).** A village of Judah in the highland district of Jerusalem (Josh. 15:60; it probably also appeared in the Benjaminite list after Kiriath-jearim in Josh. 18:28, but was accidentally omitted).

Rabbah may be the Rubutu of the Amarna Letters (cf. *ANET* 488-89, nos. 287, 289-90), which seems to lie in the immediate vicinity of Jerusalem, as does Rabbah, whose present location remains unknown.

V. R. GOLD

RABBI, RABBONI rāb'ī, rā bō'nī [ῥαββί or ῥαββεί = רַבִּי, my master, from רַב, master (cf. רַבֵּב, be great); ῥαββουσί or ῥαββουσεί = רַבִּינִי, my master, from רַבֵּנ, a heightened form of רַב]. Alternately: MASTER. One learned in the Mosaic law; hence a teacher of the law. In modern Judaism the rabbinate is an ordained office. Formerly, however, it was simply a title of respect, addressed to learned laymen, sometimes indicating a master as contrasted with servants, but more often a teacher as contrasted with his pupils. It could even be used of Yahweh as teacher of Moses (Ab. 1.6). In the Talmudic era *rab* was used chiefly of Babylonian teachers and *rabbi* of Palestinian ones. Rabbi Yehudah Hannasī, who edited the Mishna, came to be known pre-eminently by the title "Rabbi" without the need to give his name. See TALMUD.

In the NT, "rabbi" is simply an honorific title with no overtones of official appointment. It is applied to teachers of the law in general (Matt. 23:7-8), and even to John the Baptist by John's disciples (John 3:26). In all other cases, both "rabbi" and "rabboni" mean Jesus, and are used in direct address to him. This occurs twice in Matthew and four or five times in Mark—the textual evidence for Mark 10:51 is conflicting. Supremely it is the Fourth Gospel which has Jesus honored in this way. It is done by inquirers (John 1:49; 6:25) and even a Pharisee (3:2), as well as by Jesus' own followers (4:31; 9:2; 11:8). As John 1:38; 20:16 say, however, "rabbi" and "rabboni" have the same import (though they have not the same literal meaning) as "teacher," and the latter occurs frequently in the Synoptics.

See also DISCIPLE; TEACHER.

PIERSON PARKER

RABBITH rāb'īth [רַבִּית]. A border town in Issachar (Josh. 19:20). "Rabbith" is an error for "DABERATH," a Levitical town in Issachar (Josh. 21:28; I Chr. 6:72—H 6:57), not otherwise mentioned in Josh. 19:

17-23. This view is strongly supported by LXX B, which reads "Daberoth" in place of "Rabbith" in Josh. 19:20.

G. W. VAN BEEK

RABBONI. See RABBI.

RAB-MAG rāb'māg [רַב־מַג, see below] (Jer. 39:3, 13). The designation of a court official of the Babylonian king; probably derived from Akkadian *rab mugi* (also *mugu* and *munga*), which, however, appears only in Assyrian texts. The meaning of the word is unknown in Akkadian.

Bibliography. E. Klauber, *Assyrisches Beamtenum* (1910), p. 52, note 2.

A. L. OPPENHEIM

RABSACES. KJV Apoc. form of RAB-SHAKEH.

RAB-SARIS rāb'sārīs [רַב־סָרִיס; Akkad. *ša-rēšī*, attendant—*lit.*, he who stands by (the king)] (II Kings 18:17; Jer. 39:3, 13). Chief eunuch. This is an Assyrian loan word in Hebrew and other Semitic languages, a euphemistic designation for the eunuchs at the Assyrian court. The role and function of these eunuchs has been recently elucidated by a series of Middle Assyrian texts that set forth instructions for the personnel of the royal harem, etc.

A. L. OPPENHEIM

RAB-SHAKEH rāb'shākā [רַב־שָׁקֵה, Assyrian loan word] (II Kings 18:17, etc.); KJV Apoc. RABSACES rāb'sāz. The designation of the chief cupbearer of the king. This Assyrian and Babylonian court official was of high rank and often in charge of administrative duties.

A. L. OPPENHEIM

RACA rā'kā [ῥακά, ῥακά; Aram. רִיקָן, רִיקָן, see below]. A term of reproach or insult, indicating a person who is contemptible in some way. Jesus is quoted as saying in Matt. 5:22 that anyone who uses this expression to a brother (RSV translates "insults his brother") will be "liable to the council." Since the word is used nowhere else in the NT, and rarely elsewhere, its precise meaning is difficult to determine.

"Raca" has usually been taken as a transliteration of the Aramaic *rēqā*, meaning an inferior or stupid person; related to *rēqān*, "empty" or, figuratively, "ignorant." In Ber. 32a Baraita a commander greets a pious man praying. When the man continues his prayer without answering, the commander demands why he does not reply to the greeting, calling him *rēqā*. In Ber. 75a Rabbi Jochanan addresses a pupil who laughed at one of his lectures as *rēqā*. In Midrash Qoh. 9:15 (44b) Noah says to his contemporaries: "Woe to you *rēqayyā!* Tomorrow the flood will come; repent." In Midrash Ps. 137:5 an ex-wife of a king calls her second husband *rēqā*, probably referring to his inferior status.

On the other hand, discovery of a Greek papyrus letter, dated Feb. 6 (or 9), 257 B.C., in which ῥακά is used (Ἄντιοχον τὸν ῥακά) has suggested to some scholars that the word is a Greek term of abuse of uncertain meaning. The spelling ῥακά in Matt. 5:22 has better MS support than ῥακά (* D W and most

OL as against B—the passage being mutilated in A C and p⁴⁹), and Tertullian and Cyprian also support ρακά.

RACHAB. KJV form of RAHAB (PERSON) in Matt. 1:5.

RACHAL. KJV form of RACAL.

RACHEL rā'chāl [רַחֵל, ewe; 'Ραχήλ]. The younger daughter of Laban; Jacob's second wife; and the mother of Joseph and Benjamin.

Like Rebekah, her aunt and mother-in-law, Rachel first appears in the OT narrative at a well (Gen. 29:1-14). The well was located near Haran in Mesopotamia, whither, according to the early JE tradition, Jacob had fled from his brother, Esau. Having arrived at the well, he encountered this beautiful shepherdess, the daughter of his uncle Laban. Jacob was immediately attracted to his cousin and agreed to work seven years under Laban in return for her hand (vss. 15-30). The seven years "seemed to him but a few days because of the love he had for her" (vs. 20). At the end of the stipulated time, however, the crafty Laban surreptitiously substituted Leah, his older and less attractive daughter, for Rachel in the wedding ceremony. When Jacob discovered the deception, his commitment to the elder sister was legally consummated, and he was powerless to escape the contract. In order to gain Rachel, he was forced to spend seven more years in the service of Laban. Once he received her for his wife, Jacob's love for Rachel was greater than his love for Leah.

Rachel was not immediately fruitful after her marriage, and she was both impatient and jealous when Leah gave birth to Reuben, Simeon, Levi, and Judah (Gen. 29:31-35). Her only recourse was to give Jacob her handmaid, Bilhah, for children—a custom paralleled in the Nuzi Tablets (see NUZI). The children of this union, Dan and Naphtali, were named by Rachel, indicating her claim to them (30:1-8). Rachel's burning desire for fruitfulness can be seen in her request for Reuben's mandrakes, which she believed would bring fertility (vss. 14-16). It was not until after Zilpah, Leah's handmaid, had borne Gad and Asher (vss. 9-12), and Leah had given birth to Issachar, Zebulun, and Dinah (vss. 17-21), that God at last remembered Rachel. To her was born Joseph (vss. 22-24), who was to become the father of Ephraim and Manasseh (41:50-52).

When Jacob determined to return to his homeland, both Rachel and Leah concurred in his decision (Gen. 31:1-16). As they fled, Rachel stole her father's household gods (see TERAPHIM), which would ensure both success and the family inheritance (vss. 17-35). Laban's concern in pursuing them was not so much for his lost daughters as for his lost gods. His search was in vain, since Rachel had hidden them in the saddle of her camel and sat upon them. Her explanation to her father was that she could not rise because the "way of women" was upon her (vs. 35).

Jacob's favoritism for Rachel and Joseph is reflected by their position in the processional which he formed when they were returning to Palestine and about to meet Esau. They were placed last, where they would be safest in case of violence (Gen. 33:1-2).

The death of Rachel came with the birth of her second child, as the company was moving S between Bethel and Ephrath (Gen. 35:16-21; cf. 48:7). When she learned that it was a son, she called his name Ben-oni ("son of my sorrow"), but Jacob named him Benjamin ("son of my right hand"). She was buried near Ephrath in the territory of Benjamin, and Jacob erected a pillar to mark her tomb. See RACHEL'S TOMB.

In only two passages outside Genesis does the OT mention Rachel. Ruth 4:11 refers to Rachel and Leah as those who founded the house of Israel, and Jeremiah 31:15 depicts her as weeping at the fate of her children (the N kingdom represented by Ephraim, Joseph's son) who had been exiled by Assyria.

The Hebrew idea of corporate personality would suggest that the Rachel traditions have another level of significance in addition to being stories of important individuals. They reflect tribal relations and history. The exact nature of this history is not easily discerned, but certain tentative conclusions can be advanced.

Some of those who see no evidence of real personal history in the Rachel stories think it is possible that there was originally a Rachel tribe or clan. Its totem could have been the ewe (רַחֵל), which would suggest a nomadic group.

More certain is the historical situation of the tribes of Israel, reflected by the family of which Rachel was a member. The sons of Jacob-Israel by Rachel, Leah, Bilhah, and Zilpah represent the twelve-tribe amphictyony which flourished during the period of the judges. Thus the sons of Rachel, Joseph and Benjamin, were prominent members of this Israelite confederation of tribes which were united by their common worship of Yahweh.

That Joseph was born to Rachel in the region of Haran reveals the memory of an Aramean origin of the "house of Joseph." Since Rachel's second son, Benjamin, was not born until she went to Palestine, it might be surmised that this tribe was formed only on that soil, perhaps as the result of a split of Ephraim. On the other hand, it could indicate that Benjamin was the first tribe to enter Palestine, and thus was already there when the other tribes arrived.

The entry of the Joseph tribes into Palestine after the other tribes is possibly reflected in the order of the births of Jacob's children. But since Rachel's son

Joseph, and particularly Joseph's son Ephraim, became pre-eminent in the N where these traditions were formed, they present Rachel and Joseph as favored by Jacob.

The geographical propinquity of Ephraim and Benjamin after the Conquest would seem best to explain the fact that Joseph and Benjamin were full brothers. If there is significance in the fact that Dan and Naphtali are the sons of Rachel's handmaid, Bilhah, it is not immediately obvious. Only Bilhah's son Dan was ever geographically contiguous to Ephraim and Benjamin. This tradition might reflect a preconquest relation.

In the NT there is a single reference to Rachel. The passage concerning Rachel's weeping for her children in Jer. 31:15 is used by the author of Matthew in connection with the slaying of the infants by Herod (Matt. 2:16-18).

***RACHEL'S TOMB.** The burial place of Rachel, Jacob's wife. The traditional location, *ca.* a mile N of Bethlehem on the W side of the Jerusalem road, was indicated very early by a gloss on Gen. 35:19; 48:7, and accepted by early Christian writers. At least as early as the fourth century A.D. there was a monument there, later described as a pyramid of twelve stones representing the twelve sons of Jacob. The present building consists of a domed room *ca.* twenty-four feet square, erected by the Crusaders, and an adjoining square vestibule containing a mihrab (Muslim place of prayer), added by Sir M. Montefiore when he purchased the monument for the Jews in 1841.

Gen. 35:16-19 tells that Rachel died on the way from Bethel to Ephrath "when they were still some distance from Ephrath" (vs. 16) and that she was buried there. The gloss: "that is, Bethlehem," erroneously identifies this Ephrath with the district of EPHRATHAH, in which Bethlehem was situated (Ruth 4:11; Mic. 5:2—H 5:1). However, both I Sam. 10:2 ("Rachel's tomb in the territory of Benjamin") and Jer. 31:15:

A voice is heard in Ramah,
lamentation and bitter weeping.
Rachel is weeping for her children,

assume a situation N of Jerusalem for her grave. A passage in Midrash Rabbah shows that the two con-

Trans World Airlines Photo

3. Though erected by Crusaders in the twelfth century of the Christian era, this tomb has played an interesting traditional role.

tradictory traditions caused difficulty for rabbinic exegetes in the early Christian period. Matthew's quotation of Jer. 31:15 with reference to the slaughter of infants around Bethlehem (Matt. 2:16-18) would indicate that he accepted the traditional view.

RADDAI rād'ī [רדי] (I Chr. 2:14). The fifth son of Jesse the Bethlehemite, and, consequently, an elder brother of David.

RAFT [רבות, towed objects, *from* Aram. רבר, lead, guide; רפסות. A floating collection of logs, timber, etc., fastened together, for their own conveyance or for a support.

Both words cited above refer to the method which Hiram of Tyre used to transport cedar and cypress logs by sea from Lebanon to Joppa. The rafts were presumably towed by boats. It is possible that rafts were used as ferries at the more important fords of the Jordan, for the transportation of objects too heavy for the backs of animals. Such rafts may have had their buoyancy increased by the use of inflated animal hides. It is instructive that in postbiblical Jewish Aramaic the word מַעְבְּרָא, *ma'berā*, used for "FORD" in the OT (Josh. 2:7, etc.), also has the meaning "ferry." W. S. McCULLOUGH

RAFTERS [קורות (*with* LXX; *in* I Kings 6:15-16, MT-KJV קורות, WALLS; *in* I Kings 7:7, MT-KJV קרקע, FLOOR); רהיט (Song of S. 1:17; *Kethibh* [רהיט]). Beams supporting the roof of a building.

RAGAE, RAGAU. See RAGES; also REU.

RAGES rā'jēz ['Páγoi, 'Páγαια, 'Payaí; Old Pers. *Rāgā*]; *in* Jth. 1:5, 15 RAGAE rā'jē ['Payaú; *see below*]; KJV RAGAU rā'gō. An important, strategically located, and well-fortified city in NE Media of the Persian Empire, situated *ca.* five miles SE of its modern counterpart, the Persian capital of Teheran, and generally identified with the present extensive and imposing ruins of Ray (Rai, Rhay, Rhey, etc.). It is mentioned six times in Tobit: 1:14; 4:1, 20; 5:5; 6:12; 9:2. *In* Jth. 1:5, 15 Rague refers to the general region, as in Diodorus Siculus (19.2) and in one of two references in the Behistun Inscription. Cf. Strabo (XI.9.1; 13.6); the *Avesta* (Vendidad 1.15; Yasna 19.18); Ptolemy *Geography* VI.5.4; etc., and various Pahlavi texts.

Located just S of the high mountain range of Alborz, bordering the Caspian Sea in an area which controls the "Caspian Gates," the city played an important part in the wars of Media and of Alexander the Great and his successors. It is one of the oldest centers of civilization in Iran, modern excavation (*see bibliography*) indicating occupation from *ca.* 5000 B.C. and, except for interruptions occasioned by earthquakes and several invasions (Parthians, Arabs, Afghans, Mongols), down to the end of the fourteenth century. It was long an important center of Zoroastrianism and between the seventh and early thirteenth centuries it flourished as a large Moham-medan metropolis.

RAGUEL rāg'yōō'el, rə gū'el [רַעוּאֵל; LXX 'Ραγουηλ]. 1. A member of the tribe of Naphtali living in Ecbatana; the husband of Edna, and the father of Sarah, Tobias' wife (Tob. 3:7, etc.). See TOBIT, BOOK OF; TOBIAS 1.

2. An (arch)angel (Enoch 20:4; cf. 23:4).

3. KJV form of REUEL in Num. 10:29, etc.

L. HICKS

RAHAB rā'hāb [רַהַב, wide, broad; NT 'Ραάβ, 'Ραχάβ in Matt. 1:5]; KJV RACHAB — kāb in Matt. 1:5. The harlot who sheltered the men sent by Joshua to spy out Jericho.

1. **In the OT.** According to the narrative (Josh. 2:1-21), which was preserved because Rahab was still living at the time of its composition (cf. 6:25), Joshua sent two men in secret to assess the strength of Canaan, especially Jericho. They lodged in the house of Rahab the harlot. Naturally the news soon reached the king, and he sent messengers to Rahab commanding her to produce her lodgers. Although she had actually hidden the spies in stalks of flax on the roof of her house, she told the messengers that she had seen the men but that they had left the city a short time before. Following this false lead, the agents of the king pursued them as far as the fords of the Jordan. Thereupon Rahab visited the men on the roof and told them that she and the people of Jericho had heard of the mighty deeds of Yahweh, and that she knew Yahweh to be "God in heaven." On this basis she asked the spies to swear that she and her clan would be spared from the coming destruction. The men agreed, and Rahab let them down by a rope through the window—her house was built in the city wall. For purposes of identification she tied a scarlet thread in her window. After the conquest of Jericho, Joshua told the spies to bring out Rahab and her clan; then the city was burned (Josh. 6:17, 22-25).

There is no further mention of Rahab in the OT, but according to rabbinic tradition she was one of the four most beautiful women in the world and an ancestress of eight prophets (including Jeremiah) and a prophetess (Huldah; Meg. 14b, 15a).

2. **In the NT.** According to Matthew's genealogy of Jesus, Rahab was the wife of Salmon and the mother of Boaz (Matt. 1:5). The early church fathers took for granted the identification of this Rahab with the Rahab of Joshua, but this was later doubted. The unique spelling 'Ραχάβ may indicate that Matthew distinguished the two. Elsewhere in the NT, Rahab is cited as an example of justification by works in Jas. 2:25, but in Heb. 11:31 as one who because of her faith did not perish.

See also PROSTITUTION; JERICHO 1. J. F. ROSS

RAHAB (DRAGON) [רַהַב, see below]. One of the names of the mythological dragon vanquished by

Yahweh in a primordial combat. On this myth, its significance and its parallels, see COSMOGONY.

The name Rahab is found only in poetic passages of the OT (viz., Job 9:13; 26:12; Ps. 89:10; Isa. 30:7; 51:9-10), and all these occur in books written after the seventh century B.C. Its meaning is uncertain. According to one view, the name derives from רַהַב, "be proud, arrogant"; according to another, it is to be connected with Akkadian *ra'abu*, "rage" or "be agitated." With the latter may be compared the Egyptian *hmhm.t*, "the roaring, turbulent one," as a name of the mythological dragon 'Apep.

The LXX renders ὑπερήφανος ("overweening") in Ps. 89:10; κήτος ("sea monster") in Job 9:13; 26:12. In Ps. 87:4, it merely transliterates (ρααβ); in Isa. 30:7 it does not recognize a proper name; and in Isa. 51:9 it omits the word altogether.

The Vulg. usually renders *superbus* (*Superbia* in Isa. 30:7). In Job 9:13, however, it identifies the "helpers of Rahab" (with whom we may compare the helpers of Tiamat in the Babylonian creation myth, Enuma Eliš, I.105-7) with submarine creatures who support the world (*qui portant orbem*). The notion of such creatures is widespread in world folklore.

In Ps. 87:4; Isa. 30:9 the ancient mythological name is used figuratively to designate Egypt, the former passage likening that foreign power to the proud monster who was eventually reduced to impotence (for MT הם שבת, read המשבת, "who was stilled").

T. H. GASTER

RAHAM rā'hām [רַחֵם, mercy, love] (I Chr. 2:44). A descendant of Judah; son of Shema, and the father of Jorkeam.

RAHEL rā'hēl. KJV form of RACHEL in Jer. 31:15.

RAIMENT. See DRESS AND ORNAMENTS.

RAIN [מָטָר = NT ὑετός, falling of rain, the rain which falls; גֶּשֶׁם = NT βροχή, downpour of rain; רָעַם (Job 24:8; KJV SHOWERS; elsewhere STORM; TEMPEST); ὄμβρος, rainstorm with wind (Luke 12:54)]. Most of the annual rainfall in Palestine occurs in the three months early December to early March. This is preceded by the EARLY RAIN and followed by the "latter rain" (see SPRING RAIN). The summer months are almost rainless.

See also PALESTINE, CLIMATE OF; DROUGHT; SEASONS. R. B. Y. SCOTT

***RAINBOW** [قوس (Rev. 4:3; 10:1); τόξον (Ecclus. 43:11)]; BOW IN THE CLOUD [קשת] (Gen. 9:13). The reflection and refraction of sunlight by a curtain of falling rain, producing a bow or arc of the prismatic colors visible to an observer facing away from the sun. Frequently it has as background the cloud mass of a retreating thunderstorm, so that it appears as a "bow in the cloud," an appropriate symbol of a storm that is past. It is the bow which Yahweh has set aside after shooting the arrows of his lightning (Lam. 2:4; Hab. 3:9-11), and becomes the sign of Yahweh's covenant that "the waters shall never again become a flood to destroy all flesh" (Gen. 9:8-17). Regarded with awe and admiration for its beauty (Ecclus. 43:11), the rainbow became a feature of

scenes laid in heaven (Ezek. 1:28; Rev. 4:3; 10:1).
R. B. Y. SCOTT

RAISIN-CAKES [ראשישות] (Isa. 16:7). Alternately: **CAKES OF RAISINS** (II Sam. 6:19; Hos. 3:1); **KJV FLAGONS OF WINE**. Food prepared by the pressing of dried grapes. Because it is virtually imperishable, such food is suitable for travel and for military provisions (II Sam. 6:19; 16:1; cf. I Sam. 25:18; 30:12; I Chr. 12:40). A festive food (Isa. 16:7); it was apparently also used in the cult of the fertility goddesses (Song of S. 2:5; Hos. 3:1; cf. Jer. 7:18; 44:19). See **BAAL 1**; **FERTILITY CULTS**; **HOSEA**.

Bibliography. B. Duhm, *Das Buch Jesaja* (1914), on Isa. 16:7; K. Gallig, *Biblisches Reallexikon* (1937), p. 84.

J. A. WHARTON

RAISINS [צמוקים]. Raisins often appear in lists of provisions (I Sam. 25:18; 30:12; II Sam. 16:1; I Chr. 12:40—H 12:41). They were prepared by soaking bunches of grapes in oil and water and spreading them in the sun to dry. **RAISIN-CAKES** are mentioned both as a common food and as offerings in pagan cults.
J. F. ROSS

RAKEM rā'kēm [רקם] (I Chr. 7:16). A grandson of Manasseh. In Hebrew this name is the pausal form of the name Rekem.

RAKKATH rāk'ith [רקת] (Josh. 19:35). A fortified town in Naphtali. It is perhaps located at Tell Eqlatiyeh, a small site with EB, MB, and some LB remains near the Sea of Chinneroth, ca. 1½ miles N of Tiberias. The Israelite town may have been situated at the foot of Tell Eqlatiyeh near the perennial spring 'Ain el-Fuliyeh. If this is not the site, it is possible that Rakkath is located beneath modern Tiberias, as suggested by the Talmud.

Bibliography. W. F. Albright, "The Jordan Valley in the Bronze Age," *AASOR*, 6 (1926), 26. G. W. VAN BEEK

RAKKON rāk'ōn [רקון, shore(?), narrow place(?)] (Josh. 19:46). A village of Dan; presumably on or near the Nahr el-'Auja (River Jarkon), not far from the Mediterranean, according to the context. Since the Greek text omits it, some suggest that it is a doublet of the preceding Me-jarkon. Others propose identification with Tell er-Reqqeit, ca. 1½ miles N of the mouth of the Nahr el-'Auja.

Bibliography. F.-M. Abel, *Géographie de la Palestine*, II (1938), 433; M. Noth, *Das Buch Josua* (1953), pp. 120 ff; G. E. Wright and F. Filson, *Westminster Historical Atlas to the Bible* (rev. ed., 1956), p. 126. V. R. GOLD

RAM rām [רם; Ῥαμ]; **KJV NT ARAM** âr'âm. 1. An ancestor of King David (Ruth 4:19; I Chr. 2:9); and an ancestor of Jesus, according to Matt. 1:3-4 (called Arni in Luke 3:33). It is to be noted, in view of 2 below, that this Ram is named as a brother of Jerahmeel in I Chr. 2:9.

2. The first-born son of Jerahmeel of Judah (I Chr. 2:25, 27).

3. Head of the family of Elihu, one of the friends of Job (Job 32:2).
E. R. ACHEMEIER

RAM (ANIMAL) [איל]. The mature male of the sheep. The ram was a possible sacrificial offering in

a number of ritual situations, including the peace offering (e.g., Lev. 1:10) and the guilt offering (5:15; 6:6). The ram was used for meat (Gen. 31:38); rams' skins were employed with other materials as coverings for the tabernacle (Exod. 26:14) and presumably other shelters; and the horns of the ram were commonly used in early times for trumpets (see Josh. 6:4-13).

The ram gains certain prestige in the OT as a central element in several passages of special force or significance. It is the ram, caught by his horns in the thicket, that provides the climax and denouement of the powerful story of the near-sacrifice of Isaac in Gen. 22 (see vs. 13). The early declaration of the prophetic temper placed on the lips of Samuel is another case in point:

Has Yahweh as great delight in burnt offerings and sacrifices, as in obeying the voice of Yahweh?

Behold, to obey is better than sacrifice,

and to hearken than the fat of rams (I Sam. 15:22).

Isaiah puts it in even more intense language, and employs the ram along with other animals of sacrifice to make his point:

What to me is the multitude of your sacrifices?
says Yahweh;

I have had enough of burnt offerings of rams
and the fat of fed beasts;

I do not delight in the blood of bulls,
or of lambs, or of he-goats (Isa. 1:11).

Yet again in prophetism, as an introduction to the familiar so-called prophetic summary of Mic. 6:8, the ram figures:

Will Yahweh be pleased with thousands of rams,
with ten thousands of rivers of oil?

Shall I give my first-born for my transgression,
the fruit of my body for the sin of my soul?

He has showed you, O man, what is good;

and what does Yahweh require of you

but to do justly, and to love kindness [חסד],
and to walk humbly with your God?

(Mic. 6:7-8).

RAM, BATTERING. See **BATTERING RAM**.

RAMAH rā'mā [רמה, הרמה, height, the height; Ῥαμᾶ, see 3 below]. 1. A border town in Asher (הרמה; Josh. 19:29). The biblical context clearly indicates that Ramah was situated in the N part of Asher, and probably in the vicinity of Tyre, but the exact location of the ancient town is unknown. The identification accepted by most scholars is Ramia, a village located in the hill country approximately eleven miles E of Ras en-Naqura, at the E foot of Khirbet Belat. A number of sarcophagi and rock-cut tombs have been found in the immediate vicinity. It has also been suggested that Ramah in Asher may be the same as Ramah in Naphtali, which is probably to be identified with er-Rameh. If this suggestion is correct, the appearance of Ramah in both territorial lists is to be explained by the fact that the town was located on the common territorial border and was presumably settled by both tribes.

Bibliography. A. Alt, "Die Reise," *PfJB*, 23 (1927), 46; R. Dussaud, *Topographie historique de la Syrie antique et Médiévale* (1927), p. 11.

2. A fortified town in Naphtali (הַרְמָה; Josh. 19:36). It is probably to be identified with er-Rameh, a village located approximately fifteen miles W of modern Safed on the route to Acco. The ancient site is perhaps located beneath the highest point of the modern village.

G. W. VAN BEEK

3. A town in the inheritance of Benjamin, near the frontier between the kingdoms of Israel and Judah (רַמָּה; Josh. 18:25; KJV RAMA in Matt. 2:18, CIRAMA sī rā'mə in I Esd. 5:20).

Baasha, king of Israel, fortified it in an attempt to enforce a blockade of Judah from the N. Subsequently, when Baasha's energies and attention were diverted to the defense of his N border against Damascus, Asa of Judah dismantled Ramah and used its stones and timbers to fortify nearby Geba and Mizpah (I Kings 15:17, 21-22; II Chr. 16:1, 5-6). In 587 B.C., Ramah seems to have been a gathering point from which the captain of Nebuchadrezzar's guard conducted the amassed captives of Jerusalem and Judah into Babylonian exile. Here Jeremiah was released from his bonds and permitted the freedom either of accompanying the captives or of remaining with the remnant in Judah (Jer. 40:1, 4). At the close of the Captivity, Ramah was one of the villages reoccupied by returning Benjaminites (Ezra 2:26; Neh. 7:30; 11:33). Near this town was the traditional site of the tomb of Rachel (I Sam. 10:2; Jer. 31:15; Matt. 2:18).

Ramah is found in frequent association with certain well-known towns to the N of Jerusalem. In Josh. 18:25 it is listed between Gibeon and Beeroth; the palm tree of Deborah is located between Ramah and Bethel (Judg. 4:5); a Levite journeying northward past Jerusalem came at nightfall to Gibeah, not yet having reached Ramah (Judg. 19:13-14); the Assyrian army is envisioned by Isaiah as making a southward march on Jerusalem, passing in succession through Geba, Ramah, and Gibeah (Isa. 10:29); Hosea mentions Ramah in close association with Gibeah (Hos. 5:8); and in the lists of those who returned from Exile, the sons of Ramah and Geba are enumerated as but a single contingent (Ezra 2:26; Neh. 7:30; I Esd. 5:20).

The references cited above so circumscribe the ancient site as to make practically certain its identity with modern er-Ram, ca. five miles N of Jerusalem, two miles N of Gibeah, three miles E of Gibeon, and two miles W of Geba. With such an identification both Eusebius (*Onomasticon*) and Josephus (*Antiq.* VIII.xii.3) would agree.

Bibliography. G. A. Smith, *Historical Geography of the Holy Land* (11th ed., 1904), pp. 247-56; E. G. Kraeling, *Bible Atlas* (1956), pp. 271-72; L. H. Grollenberg, *Atlas of the Bible* (1959), p. 160.

4. A town in the hill country of Ephraim (רַמָּה). Alternately: RAMATHAIM-ZOPHIM rām'ə thā'-əm zō'fīm (רַמְתַּיִם צוֹפִים); the first word means "the two heights," and רַמְתַּיִם צוֹפִים is probably an error for צוֹפֵי, "a Zuphite," the ם having been inadvertently written twice; I Sam. 1:1). It was the native home, official residence, and burial place of Samuel (I Sam. 1:19; 2:11; 7:17; 8:4; 25:1; 28:3).

In the introductory reference to the site, to specify which of several Ramahs is intended, it is called Ramathaim-Zophim (I Sam. 1:1; cf. 1:19). This designation is grammatically unsound and, following the LXX, the second element of it should probably be emended (*see above*) to read "a Zuphite"—i.e., an inhabitant of a district called Zuph. It is suggestive in this regard that Zuph appears both in the ancestry of Samuel (I Sam. 1:1) and as the name of the district in which his residence was located (9:5-6, 18). The aforementioned reference may, therefore, be read: "There was a certain man of Ramathaim [i.e., the Ramath with the two heights], a Zuphite of the hill country of Ephraim." In subsequent references to the site, Ramah, the customary short form of the name, is employed (I Sam. 1:19; 2:11; 7:17; etc.).

From their home in Ramah, the parents of Samuel were accustomed to make an annual pilgrimage to the religious center of Shiloh to worship and sacrifice (I Sam. 1:3, 19). At Ramah, his official residence, Samuel built an altar; here also he administered justice to Israel; and from this point he went on annual circuit, exercising a similar ministry in Bethel, Gilgal, and Mizpah (7:16-17). It was at Ramah that the elders of Israel assembled to Samuel to ask for the appointment of a king (8:4); here it was that Saul, the one to be anointed, first encountered the prophet of God (9:5-10:8); and to here Samuel returned following his final separation from the rejected king of Israel (15:34-35). Having anointed David successor to Saul, Samuel arose and returned to his home (16:13). David fled to him there from the jealous wrath of Saul, and the two of them took refuge at Naioth in Ramah (19:18-19). Seeking to capture David there, both Saul and his messengers prophesied before the prophets (19:19-24); from there David fled, soon to become leader of a refugee band (20:1; 22:1-2). In Ramah Samuel died and was buried in his house (25:1; 28:3).

In 145 B.C., as head of a toparchy called Rathamin, the site and its surroundings were detached from Samaria and assigned instead to the province of Judah (I Macc. 11:34). Eusebius (*Onomasticon*) identifies the site with the Arimathea of the NT (Matt. 27:57; John 19:38) and locates it in the vicinity of Diospolis (Lydda); Jerome further specifies the nearby district of Timnah. The same two writers identify the town with Remphis—the modern Rentis, which is located ca. nine miles NE of Lydda on the W slope of the hill country of Ephraim. Whereas many present-day scholars have followed the authority of the *Onomasticon* in the matter, some have preferred Beit-Rima, a hill village some five miles farther E and twelve miles NW of Bethel.

W. H. MORTON

5. A town of Simeon in the Negeb of Judah. In Josh. 19:8 it is called "Ramah of the Negeb" (רַמְתֵּי הַנֶּגֶב; KJV "RAMATH rā'māth of the south"); in I Sam. 30:27, "RAMOTH rā'mōth of the Negeb" (רַמְתֵּי הַנֶּגֶב; KJV "south Ramoth"). In Josh. 19:8 it is

made equivalent to BAALATH-BEER. It was one of the cities to which David made presents from the booty he gained from the Amalekites (I Sam. 30:27). The site is unknown. Both passages should perhaps be read "Ramah of the South" (so Josh. 19:8 LXX).

S. COHEN

6. Same as RAMOTH-GILEAD (II Kings 8:29; II Chr. 22:6).

RAMATH OF THE SOUTH. KJV form of Ramah of the Negeb. See RAMAH 5.

RAMATHAIM-ZOPHIM. See RAMAH 4.

RAMATHEM rām'ə thēm. KJV Apoc. form of RATHAMIN (I Macc. 11:34).

RAMATHITE rā'mə thīt [רמתחי]. A native of Ramah. The term is used in I Chr. 27:27 to designate the chief husbandman of David's vineyards. Which of several towns of this name is here referred to is unknown.

RAMATH-LEHI rā'mith lē'hī [רמת להי], hill of the jawbone]. The place where Samson routed a group of Philistines with the jawbone of an ass for a weapon (Judg. 15:17). See LEHI.

RAMATH-MIZPEH rā'mith mīz'pə [רמת המצפה] (Josh. 13:26). A town assigned to the tribe of Gad in the settlement of Palestine; sometimes identified with Mizpeh of Gilead. See MIZPAH 1.

RAMESES (CITY) rām'ə sēz [רעמסס; Egyp. (*pr*)-*r*-*ms-sw*, (the house of king) Ramses; LXX and Apoc. 'Ραμεσση]. Alternately: RAAMSES rā ām'sēz. The royal residence city in the Egyptian Delta, under the Nineteenth and Twentieth Dynasties, ca. 1300-1100 B.C.

When the Children of Israel began the sojourn in Egypt, they settled in the land of Goshen, alternately the land of Rameses (Gen. 47:11). Under the Oppression they were forced to help build the store cities of Pithom and Raamses (Exod. 1:11). The city of Rameses was the starting point of the Exodus, distant from the desert by two days' marches (Exod. 12:37; Num. 33:3-6).

Egyptian sources show that Ramses II (see RAMSES) was the namer and thus the founder of the city. Thebes remained a S and seasonal capital, while Rameses was the N capital and chief residence of the pharaohs for nearly two centuries. Although the Egyptian texts which praise the town are overeffusive, it was clearly an active city. It was located in the E desert and had harbors for seagoing vessels, and its ships also sailed S to other towns within Egypt. The poetical praise of the city tells of abundant fruits and nearby marshlands and fishing regions. Its frontier character is emphasized by the statement that it lies "between Djahi [the Syrian-Palestinian seacoast] and Egypt" and that it is "the south front of every foreign country, the north front of Egypt." These texts speak for a location close to the Sinai Desert but in a region having vineyards and olive groves, marshes and fisheries, and accessible by ship

from the Nile and the Sea. The N half of the E Delta best fits all these factors.

Unfortunately, scholars do not agree upon the precise location of Rameses. The pharaohs named Ramses, particularly Ramses II, were generous in naming towns after themselves. Further, references to this city have been excavated in Delta towns which can make no serious claim to being the location. Formerly, when the land of GOSHEN was thought to be coterminous with the modern Wadi Tumilat, the SE extension of the Delta, excavators sought Rameses in that valley. But a site in that valley, although suitable for the Israelites' herds, would not conform to the Egyptian texts, and Jth. 1:9-10 is probably correct in understanding Goshen to be simply the E Delta. Few scholars now push the claims of two Ramesside sites in the Wadi Tumilat, Tell el-Maskhutah or Tell er-Retaba, as the site of Rameses, although the former of these may have been PITHOM.

In 1918 the British scholar Alan Gardiner examined all the evidence and came to the tentative conclusion that Rameses had been located at the extreme NE, at Pelusium. However, after excavations had been undertaken at Tanis (see ZOAN), Gardiner decided that Rameses was to be found at Tanis, modern San el-Hagar. Certainly this was an important site for much of Egyptian history, and the excavations have shown that it flourished under the pharaohs named Ramses. As an important and well-located city, it is a strong candidate for the capital at that time. Increasingly scholars are thinking of an exodus which began across the N part of Sinai.

Recently another claimant has appeared at modern Qantir, fifteen miles S of Tanis. Here there were a Ramesside palace and a military post, and the place seems to be a center for inscriptions commemorating the worship of Ramses II as a god. One text lists Tanis and (Per-)Rameses separately, and some of the material excavated at Tanis is derivative from other places, so that there is no guarantee that inscriptions bearing the name Rameses were originally at home there. Fortunately for the understanding of the geography of the Exodus, Tanis and Qantir are very close together.

RAMIAH rā mī'ə [רמיה, Yahu is exalted; Apoc. 'Ιερμάς]; KJV Apoc. HIERMAS hī ūr'məs (Ezra 10:25; I Esd. 9:26). One of those listed as having married foreign wives in the time of Ezra.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), pp. 35, 145.

B. T. DAHLBERG

RAMOTH (PERSON). KJV form of JEREMOTH.

RAMOTH rā'mōth [רמותר]. A Levitical town in the territory of Issachar (I Chr. 6:73—H 6:58). It is the same as JARMUTH (Josh. 21:29), which occupies an identical position in the Levitical town list of Josh. 21:29, and probably the same as REMETH in Josh. 19:21. In all probability, the form "Ramoth" is more

original than "Jarmuth," since the former is supported by readings in LXX A and B. A number of identifications have been proposed, but none is satisfactory. One of the sites mentioned in this connection is Kokab el-Hawa, the Crusading Belvoir, located ca. seven miles N of Beth-shan. Its situation on a plateau 999 feet above sea level in a region of springs is attractive; however, the identification must be regarded as uncertain.

G. W. VAN BEEK

***RAMOTH-GILEAD** *rāmōth gīl'ōd* [רמת גלעד, רמת בגלעד, רמת בגלעד, רמת בגלעד]. An important fortress in Gilead situated in the E part of the territory of Gad. It is often called simply Ramah.

1. **History.** Ramoth-gilead was one of the three cities of refuge in E Palestine and a Levitical city; it was the residence of the prefect of Solomon's sixth region, which included Havvoth-jair and the Argob (Deut. 4:43; Josh. 21:38; I Kings 4:13). After the division of the kingdom of Israel (ca. 935 B.C.) the region became exposed to attacks from Syria and apparently was annexed to the latter country, either in the wars of Ben-hadad I against Baasha (I Kings 15:20) or as a result of the appeasement policy of Omri. This loss apparently rankled in the hearts of Israel, but it was not until after the Battle of Qarqar (853 B.C.) that Ahab made an effort to recover the place; it has been suggested that Ramoth-gilead had been promised him by Ben-hadad II as the price of his help against the Assyrians, and that the king of Syria failed to keep his promise. Ahab summoned Jehoshaphat of Judah as his ally, and went to fight with the encouragement of all the prophets except Micaiah the son of Imlah. The battle that ensued was indecisive; but Ahab was fatally wounded by a random arrow, and the army of Israel retired without accomplishing its purpose (I Kings 22).

Ca. ten years later Joram the son of Ahab had greater success. He captured the city and placed a garrison there under the charge of Jehu. He was wounded in the fighting that resulted when the Syrians made a counterattack; and while he was recuperating at Jezreel, a disciple of Elisha came to Ramoth-gilead and anointed Jehu as king. After this choice had been ratified by the army, Jehu set out for Jezreel, taking precautions that no one should leave the city and betray his plans; driving furiously, he surprised Joram, killed him, and seized the throne (II Kings 8:28-9:28).

Ramoth-gilead is not mentioned again in the Bible, but it must have shared the fate of the Gilead region, which was overrun by Hazael, who fought against Jehu and his weak successors; it was recovered by Jeroboam II, only to fall in the eighth century to the might of the Assyrians.

2. **Location.** The site of Ramoth-gilead is to be sought in a place which has a strong natural position in N Gilead, near the Syrian border, close to a plain where chariots could maneuver, and which was in existence during the Israelite period. The place that fulfils all these requirements is Tell er-Ramith on the Wadi Shomer, a three-knolled hill which rises

commandingly over the nearby plain. Its name also is a natural derivative from Ramoth.

S. COHEN

RAMPART [חיל, חיל, encirclement]. The outer fortification encircling a city, consisting of a broad embankment usually made of earth.

It is not always clear whether the Hebrew word refers to the rampart or to the moat between the rampart and the wall. Cities in Palestine said to have such defenses were Abel of Beth-maacah (II Sam. 20:15); Jezreel (I Kings 21:23; RSV "bounds," reading הלך הלך with some Hebrew MSS and versions; KJV "wall"), and Jerusalem (Pss. 48:13—H 48:14; 122:7 KJV [RSV WALLS]; Lam. 2:8), though in the last case only the N side was thus fortified (*see* JERUSALEM); it seems likely, however, that they were usual for most fortified cities. The term "rampart" is sometimes used of fortifications in general, as in the case of Thebes, whose rampart was a sea (Nah. 3:8), or Tyre (Zech. 9:3).

See also FORTIFICATION.

J. W. WEVERS

RAM'S HORN (SHOPHAR). *See* MUSICAL INSTRUMENTS.

RAMSES *rām'sēs* [Egyp. *r'-ms-sw*, (the sun-god) Ra is the one who begot him; Akkad. *Riamashshi*; 'Ραμέσσης]. The name carried by eleven pharaohs of the Nineteenth and Twentieth Dynasties in Egypt.

Ramses I (1303-1302 B.C.) founded the Nineteenth Dynasty. The preceding dynasty had won Egypt's Asiatic empire, but had been stained by the heresy of AKH-EN-ATON. Ramses was first a military man and then a vizier, who apparently seized the throne in a time of dynastic weakness. The Eighteenth Dynasty had arisen in the S of Egypt. The Nineteenth

From *Atlas of the Bible* (Thomas Nelson & Sons Limited)

4. On the helmet of Ramses II (1290-1224 B.C.) is the serpent Uraeus, and in his hand is a scepter, both symbols of his regal authority; probably from Karnak

had a N devotion to the sun-god Ra of On (Heliopolis) and to Seth, god of deserts, mountain thunder, and foreign countries. The dynasty moved its capital to the NE Delta; and the successor of Ramses I, Seti I, took energetic steps to try to regain the Asiatic empire, which had been lost in the reign of Akh-en-Aton.

The long reign of Ramses II (1290-1224) left an indelible mark upon Egypt.* He built extensively, and he attached his name to monuments of his predecessors. His reign began in war against the Hittites and achieved a dignified peace. The sheer fact of long stability under a single ruler made him a model for the emulation of his successors. In point of fact, he does not seem to have had the energy, vision, or taste of his father, Seti I; and after the death of Ramses II, Egypt's external and internal problems came to rapid crises. Since he founded in the Delta the royal residence city, Per-Rameses, which is the biblical store city RAMESES, he is the traditional Pharaoh of the Oppression. Ramses II completed the great hypostyle hall in the temple of Karnak, built the Rameseum at Thebes as his mortuary temple, executed the great cliff temple of Abu Simbel in Nubia, and erected colossi at Memphis and numerous other monuments in Egypt, Nubia, and Asia. Fig. RAM 4.

At the beginning of his reign Ramses II inherited a serious political problem. At the time of Egypt's military weakness under Akh-en-Aton, the Hittites of Anatolia had spread their power and had come to dominate N Syria, taking lands which had once been part of the Egyptian Empire. At the same time there was a great migration of the "Sea Peoples" into the E Mediterranean and its coasts. Among these Sea Peoples there were elements which were later to become essential components of the Greeks and the Romans, such as Achaeans, Dardanians, Mysians, Sardinians, and also the Philistines. These people were raiders by land and sea, and they endangered Egypt's lucrative trade from Asia. In the first instance, many of them combined with the Hittites against the Egyptians. Then within a century they overran and overturned the Hittite state.

In Ramses II's fifth year he marched N to fight against the Hittites and their Anatolian and Sea People allies in Syria. Through brash stupidity Ramses walked into a Hittite ambush at Kadesh on the Orontes. His personal courage and the timely arrival of reinforcements released him from disgraceful defeat. He was able to retire to Egypt in good order and there carved acres of wall space with a boastful claim of victory over the Hittites. However, his subsequent campaigning in Asia was chiefly in Palestine, carried out against such towns as Ashkelon, Eltekeh, and Merom.

The Hittites themselves found the Sea Peoples a constant threat and were perhaps affected by the slowly growing power of Assyria. In Ramses II's twenty-first year hostilities between Egypt and the Hittites were ended by a solemn treaty of peace and mutual assistance against an outside aggressor. In the pharaoh's thirty-fourth year the alliance was cemented by his marriage to the daughter of the Hittite king. For nearly forty years there was peace and prosperity. Ramses II lived on, to sire a tre-

mendous family, build extensively, and celebrate at least eleven jubilees of rule.

The cult of Ramses II as a god was active in his own lifetime. His real and fictional exploits were used to build him into a legendary hero for the next millennium, with an analogy to the later figures of Alexander and Caesar. It is entirely possible that some, at least, of the Children of Israel were employed as slave labor on the building enterprises of Ramses II, such as the cities of Pithom and Rameses. Practically all those who ultimately came to form the Hebrew nation had some tradition of Egyptian domination, either as slaves in Egypt or as Palestinian vassals under the Egyptian Empire. This common experience could be unified and personalized by making the Egyptian oppressor a single figure, Ramses II, under whom some of them had been in bondage. There is more than poetic justice in seeing him as the Pharaoh of the Oppression.

Ramses II was succeeded by his son MER-NE-PTAH. Wars against foreign invaders and the internal weakness of the state brought the Nineteenth Dynasty into disorder, and ca. 1200 B.C. there was even a brief interlude in which an Asiatic usurper ruled Egypt. From this disorder the Twentieth Dynasty redeemed the land.

Ramses III (1195-1164)* did his best to model his reign upon that of his famed namesake, going so far as to copy whole scenes and inscriptions from Ramses II. The internal politics of the reign of Ramses III are clouded with obscurity; his foreign problems are specifically stated. The movements of the Sea Peoples came to a climax, and the older populations along the E Mediterranean coast were being dislodged. Twice Ramses III had to defend his W frontier against Libyan invasions. In his eighth year

5. Limestone statue of Ramses III (1195-1164 B.C.)

he met a major crisis, the attack by a swarm of Sea Peoples, among whom the Philistines were a chief factor. They had overwhelmed the Hittites and established a camp in Syria as base for their proposed invasion of the Egyptian Delta. On land Ramses fought them along the seacoast of Syria-Palestine, but their fleet had to be met within the mouths of the Nile. He was victorious in both the land and the naval battle. Temporarily the S movement of the Sea Peoples had been checked. Yet within thirty-five years Egypt withdrew from her Asiatic empire and abandoned her copper mines in Sinai, while the Philistines settled along the Palestinian coast. In its total force, the immigration of the Sea Peoples finished both the Hittite and the Egyptian empires, deposited the Philistines in the land of Canaan, permitted the Children of Israel to become a nation, produced those difficult adjustments of new peoples which led to the siege of Troy, and was the first chapter in the history of Greece and Rome. Fig. RAM 5.

The later years of Ramses III were marked by internal disorders, with strikes by the unpaid government laborers and a palace conspiracy which probably took the life of the pharaoh. The long period of Egyptian domination of the E Mediterranean world was drawing to a close, and she was becoming that futilely intriguing force which she was in the days of Isaiah.

Ramses III left a political-religious will, in which he confirmed the temples of Egypt in the estates which they possessed at his death. The data are not clear enough for precision, but they do demonstrate that in the twelfth century B.C. the Egyptian temples owned an extraordinary proportion of the "free" and slave peoples in Egypt, of the agricultural land, and of movable property, and enjoyed huge annual incomes. In an awesome way the document illustrates the secular power of the Egyptian priesthood.

The age of the later Ramessides may be summarized briefly. A bronze base for a small statue of Ramses VI found at Megiddo need not necessarily mean Egyptian occupation of that Canaanite town *ca.* 1150 B.C., as this type of object was sometimes a royal gift to a friendly prince. With the coming of the Iron Age, Egypt, which had no iron, suffered a crippling economic inflation, and there was widespread distress and lawlessness. Mercenary soldiers, deprived of their chance for foreign booty, roamed through Egypt and pillaged defenseless towns. An era of open corruption began, with bold and unchecked robbery of the treasures in the royal and noble tombs at Thebes.

By 1100 B.C. the pharaoh had become a feeble palace figure, and there was a contest for power among the vizier, the army commander, and the high priest of Amon at Thebes. In the end the military man won out and founded the Twenty-first Dynasty *ca.* 1090. However, it was a victory of compromise, and the rule of Egypt was divided between merchant princes of Tanis (Zoan) in the Delta and the generals who also held the priesthood at Thebes.

Just before 1100 an Egyptian commissioner went to Byblos (Gebal) in Phoenicia, to purchase cedar for the temple of Amon at Karnak. His misfortunes at the hands of some of the Sea Peoples settled along the coast of Palestine and the brusque treatment

which he received from the prince of Byblos vividly illustrate the low esteem which the once mighty power of Egypt was now accorded in that part of Asia where she had once been dominant.

RAPE. *See* CRIMES AND PUNISHMENTS § C3.

RAPHA rā'fā [רפא, he (God) has healed, *probably shortened form of Raphael* (*cf. also* רפוא בית רפא and רפוא); LXX Ραφαη; KJV רפה (RSV RAPHAH); *confusion exists between רפא and רפה when used as a common noun, GIANT(S)*]. The fifth son of Benjamin, according to I Chr. 8:2; but he is not mentioned in the list of Benjamin's sons in Gen. 46:21, where Naaman is fifth.

See also GIANT.

L. HICKS

RAPHAEL rāf'ī əl, rā'fī— [רפאל; 'Ραφαήλ]. The angel of healing, who was sent to remove the white films from the eyes of Tobit and to bind Asmodeus, the evil demon, so that Sarah, daughter of Raguel, might marry Tobias son of Tobit (for the whole story, *see* TOBIT).

The names of specific angels are rarely mentioned in the Bible, and only in the later books. The Talmud records that the names were derived from Babylon—*i.e.*, they are ascribed to Parthian influence (*see* ANGEL). Raphael's name is not found in the canonical books. In Enoch 20:3 he is recognized as second in the order of angels. He is also described as binding Azazel hand and foot and throwing him into a pit (Enoch 10:4).

In many ways Raphael may be compared to MICHAEL. The appearance of these angels in the later literature is evidence of the growing importance in popular belief of angelic intervention in human affairs.

See the bibliography under TOBIT.

S. B. HOENIG

RAPHAH rā'fā [רפה] (I Chr. 8:37); KJV RAPHA. Alternately: REPHAIHAH rī fā'yā [רפיה] (I Chr. 9:43). A descendant of Saul of Benjamin; son of Binea, and the father of Eleasah.

RAPHAIM rāf'ī'əm [Ῥαφαίμ; Vulg. *Raphaim*] (Jth. 8:1). Ancestor of Judith; listed in her genealogy as son of Ahitub, and the father of Gideon.

J. C. SWAIM

RAPHIA rə fi'ə [Ῥαφία, Ῥάφεια]. A city ca. fifteen miles SW of Gaza. Although not mentioned in the Bible, it existed from OT times. Modern Rafah is on the site of Raphia, which ancient sources describe as halfway between Rhinocolura and Gaza (Strabo XVI.ii.31; Polybius V.80). It was important as the last city of Palestine on the great military highway from Asia to Egypt, and was regarded as the first city of Syria (Jos. War IV.xi.5). The territory of Raphia extended as far as the Egyptian border.

The strategic position of the city made it a military outpost and fated it to be the site of many battles between Egypt and the nearest ruling power of Asia. Here Sargon II of Assyria defeated the Egyptians in 720 B.C. It was largely Jewish until late in the fourth century B.C., when it fell under the Ptolemies of Egypt and became predominantly Greek. Raphia was the site of the famous battle in which Ptolemy Philopator severely defeated Antiochus the Great in 217 B.C. (III Macc. 1:2; Polybius V.80). Captured by Alexander Janneus ca. 97 B.C., it was again restored as a Hellenistic city by Gabinius in 55 B.C. (Jos. Antiq. XIII.xiii.3; XIV.v.3).

RAPHON rā'fōn [Ῥαφών]. A city near Carnaim (Karnaim) where Judas Maccabeus defeated the Syrian general Timothy (I Macc. 5:37-43). It may be the same as Anrapha in the list of Thutmose III. Since Carnaim is the same as ASHTEROTH-KARNAIM, the modern Sheikh Sa'ad, Raphon is probably the village of er-Rafeh on the right bank of the Nahr el-Ehreir, about eight miles NE of that site.

S. COHEN

RAPHU rā'fū [רפּוּ, healed] (Num. 13:9). The father of Palti, who was sent from the tribe of Benjamin to spy out the land of Canaan.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 179.

RAS SHAMRA rās shām'rə. The name of a Syrian mound, meaning "fennel mound." Here was located ancient UGARIT.

RASSIS rās'īs [Ῥασσίς; KJV RASSES rās'ēz (Jth. 2:23). A place, apparently near Cilicia, the people of which were devastated by the army of Holofernes. Some have thought the name to be a corruption of "Tarsus," as the Vulg. suggests. Others relate it to a Rossos mentioned by the ancient geographers Strabo (*Geography* XIV.5.19; XVI.2.8) and Ptolemy (*Geography* V.14), which Stummer believes is the modern Arsus, a Grecianized form of the Semitic *Ras(s)ūs*. Since the momentous Battle of Issus was fought near Jebel Arsus, the writer may have had this event in mind in mentioning this otherwise obscure spot.

Bibliography. F. Stummer, *Geographie des Buches Judith* (1947), pp. 24-25. E. W. SAUNDERS

RATHAMIN rāth'ə mīn [Ῥαθαμίν; KJV RAMATHEM rām'ə thēm [Ῥαμαθεμ]; ASV RAMATHAIM rām'ə thā'əm [Ῥαμαθαίμ]. One of the three toparchies which Demetrius Nicator of Syria (ca. 150 B.C.) took from Samaria and gave to Jonathan Maccabeus (I Macc. 11:34). Since the other two toparchies were Apherima (Ephraim) and Lydda, this must have been in the same region of Palestine as they were. However, no such place is known to have existed; furthermore Josephus, who used I Maccabees as a source, gives the name as "Ramatha" in a parallel passage (Antiq. XIII.iv.9). Hence it is probable that "Rathamin," although attested by the oldest MSS, is an early corruption from "Ramathem" or "Ramathaim," due to the fact that the succession of the consonants "r-th-m" was more agreeable to the Greek ear than "r-m-th." This toparchy would then be the district around the well-known home of the prophet Samuel.

RATHUMUS. KJV Apoc. form of REHUM 2.

RATTLES-SISTRUM. See MUSICAL INSTRUMENTS.

RAVEN [רַבּוּ, 'ōrēbh, possibly onomatopoeic; cf. Akkad. *āribu*, *ēribu*; Arab. *ghariba*, be black; *ghurāb*, crow, raven; κόραξ (Luke 12:24); cf. Lat. *cornix*, crow; *corvus*, raven]. The largest of the passerine birds, a member of the Corvidae family, which includes also the crows, rooks, jackdaws, magpies, jays, and choughs. The ravens, like the rooks, are conspicuous by their black plumage (cf. Song of S. 5:11), but the other genera are less soberly colored. The raven is essentially a scavenger, but it will attack any weak or defenseless young living animal (cf. Prov. 30:17; on crows' picking out the eyes of their prey, see Aristophanes *Birds* 582-83).

Among the unclean birds we find "every raven according to its kind" (Lev. 11:15; cf. Deut. 14:14); this phrase suggests a group of birds resembling the common raven (*Corvus corax*), and it is therefore probable that רַבּוּ is a general term for the whole family. Tristram found no fewer than eight species of this group in Palestine in his day—viz., three ravens, two jackdaws, one crow, one rook, and one chough (*NHB* 200). That ravens are able to obtain the necessary food, both for themselves and for their young, is cited in both the OT and the NT as illustrative of the providential care of God for his creation (Job 38:41; Ps. 147:9; Luke 12:24; cf. "birds of the air" in Matt. 6:26). Two of the most familiar raven references are in the flood story (Gen. 8:7) and the account of Elijah's being fed by the ravens (I Kings 17).

W. S. McCULLOUGH

RAZIS rā'zīs [Ῥαζείς (A), Ραζίς (V*^{v1d})] (II Macc. 14:37-46). One of the elders of Jerusalem whose kindness earned him the name "father of the Jews." He was sought out by Nicanor as an object of contempt against the Jews; but to escape such ignominy, he committed suicide, the account of which is rather gory.

C. T. FRITSCHE

RAZOR [תער, LXX ξυρόν; מורה, LXX σίδηρος, any instrument of iron]. A cutting instrument used in SHAVING or cutting the hair (forbidden to the NAZARITE). The razor may have been a simple knife, probably elongated with rounded end, or an elaborate instrument, sometimes decorated. Ezekiel symbolically employs his sword as a barber's razor (Ezek.

Courtesy of the University Museum of the University of Pennsylvania

6. Egyptian bronze razor with handle, blade partly broken; from Buhen, Nubia (1550-1090 B.C.)

Courtesy of the University Museum of the University of Pennsylvania

7. Egyptian bronze razor blade, from the Eighteenth Dynasty (1550-1350 B.C.)

5:1). תער in Jer. 36:23 is probably a PENKNIFE (so RSV). Figs. RAZ 6-7.

RE rā. Alternately: RA rā. The Egyptian sun-god, whose chief cult center was Thebes. See EGYPT.

REIAIAH רֵאִיָּה רֵא'עַי [ראיה, Y has seen]; KJV REAIA in I Chr. 5:5; AIRUS אִירֹוס [ἰαίρος] in I Esd. 5:31. 1. A Judahite; son of Shobal and father of Jahath (I Chr. 4:2); called Haroeh in I Chr. 2:52.

2. A Reubenite; son of Micah and father of Baal (I Chr. 5:5).

3. Head of a family of temple servants, or Nethinim, who returned from the Exile with Zerubbabel (Ezra 2:47 = Neh. 7:50; I Esd. 5:31).

E. R. ACHTEMEIER

REAPING. The harvesting of grain by hand. The worker grasps a few stalks and cuts them off with a small sickle made of flints set in a wooden or bone haft or, especially after the tenth century B.C., a small curved blade. See AGRICULTURE.

REBA רֵבָע רֵב'עַ [רבע] (Num. 31:8; Josh. 13:21). One of the five Midianite kings killed in battle by the Israelites under Moses. In Num. 31 the battle is apparently

to be set against the background of the religious apostasy into which Israel had fallen under Midianite enticements (ch. 25). In Josh. 13, however, the five Midianite leaders, called princes of Sihon, are said to have fallen in the same battle in which Moses defeated Sihon the Amorite king. R. F. JOHNSON

REBEKAH רִבְקָה [רבקה, probably cow]; NT REBECCA [Ῥεβέκκα, after LXX of OT form] (Rom. 9:10). Daughter of Bethuel, sister of Laban, wife of Isaac, and mother of Esau and Jacob.

Older etymologies derive this name from the root רבק, "to tie fast," with reference to Rebekah's "binding" beauty. But it more probably comes by metathesis from the feminine of the word בקר, "cattle," analogously to other names in the patriarch narratives, such as Rachel ("ewe") and perhaps Leah ("cow") and Zilpah ("short-nosed animal").

Rebekah is introduced in the Genesis narrative in ch. 24, which recounts her betrothal and marriage to ISAAC. The virgin daughter of the Aramean Bethuel, Abraham's nephew (22:23; 25:20), she was renowned for her beauty (24:15-16). Her hospitality in drawing water for Abraham's servant according to his special prayer was taken by him as a token that she was to be Isaac's wife (24:10-27). After negotiations with her family (vss. 28-60), she was conducted to Isaac for their wedding (vss. 66-67).

After twenty years of barrenness (Gen. 25:21, 26), Rebekah conceived twins as a result of Isaac's prayer. Alarmed at their struggling inside her, she obtained an oracle concerning their perpetual hostility (vss. 22-23). After Esau and Jacob were born (vss. 24-26), the latter became her favorite (vs. 28).

In Gen. 26, Rebekah and Isaac are represented as repeating the roles of Sarah and Abraham in ch. 20, passing themselves off as sister and brother out of fear of the Philistines, in whose territory they were dwelling. When, however, the king Abimelech discerned their true relationship, he sternly reprimanded them for giving his people an occasion for sin (26:6-11).

Rebekah and Isaac joined in disapproving Esau's marriage with two Hittite women (Gen. 26:34-35), but favoritism brought family strife when Rebekah plotted with Jacob to cheat Esau out of the blessing Isaac intended for him (27:5-17). As a result she had to urge Jacob to flee to Paddan-aram to escape Esau's revenge (vss. 42-46). Apparently Jacob never saw his mother again. Her death is not mentioned, but Gen. 49:31 reports that she was buried in the cave of Mach-pelah.

The only NT mention of Rebekah is in Rom. 9:10-12, where the oracle of Gen. 25:23 is cited as a demonstration of divine elective purpose.

S. J. DE VRIES

RECAH רֵכָח רֵכ'חַ [רכה]; KJV RECHAH. An unknown place in Judah (I Chr. 4:12). Perhaps one should read "Rechab" with the LXX B (cf. 2:55).

RECHAB רֵכָב רֵכ'בַּב [רכב, rēkhābh, probably rider, from to mount, ride, or possibly a contraction of רכבאל (the

god of Barrakab); LXX Ῥηχάβ]; RECHABITES rēk'ā bits. 1. A son of Rimmon, a Benjaminite from Beeroth. He and his brother Baanah were captains of raiding bands under Saul's son Ishbosheth. They murdered their master and brought his head to David, who, instead of rewarding them as they had hoped, ordered them executed, their hands and feet severed, and their bodies hanged beside the pool at Hebron (II Sam. 4).

* 2. Father or ancestor of J(eh)onadab, the zealous supporter of Jehu in the extermination of the house of Ahab and the violent suppression of Baal-worship (II Kings 10:15-27; see JONADAB 2). The name Rechab became the patronymic designating a group of devotees of the nomadic way of life, the "house of the Rechabites." All our direct information about these Rechabites comes from Jer. 35, where we learn that during Nebuchadrezzar's attack on Judah and siege of Jerusalem, the Rechabites took refuge in the city (vs. 11). They had apparently been living a seminomadic life in the Judean wilderness. They could not have been very numerous, for Jeremiah brought the entire group, the "whole house of the Rechabites," into a single chamber of the temple. He set pitchers of wine and cups before them and bade them drink, but they refused and cited the commands of Jonadab the son of Rechab, their father: "You shall not drink wine, neither you nor your sons for ever; you shall not build a house; you shall not sow seed; you shall not plant or have a vineyard; but you shall live in tents all your days, that you may live many days in the land where you sojourn" (vss. 6-7). These commands, they claimed, they had obeyed. Jeremiah commended their loyalty and contrasted their example with the rest of the inhabitants of Judah and Jerusalem who had been disobedient to the persistent commands of the Lord. The prophet, accordingly, pronounced doom on the unfaithful Judeans, but for the house of the Rechabites he prophesied that Jonadab the son of Rechab would never lack a man to stand before the Lord (vss. 18-19).

The origins of the Rechabites are obscure. The expression "Jonadab the son of Rechab, our father" (Jer. 35:6), is ambiguous; from this alone we could not be sure whether Jonadab or Rechab was considered the founder of the group. It is made clear, however, by vs. 19 that it was Jonadab, rather than Rechab, who was reckoned as the father of the order. Why then were they called Rechabites? We have no knowledge of J(eh)onadab's father, and it may be that the Rechab who is commemorated in the name of the order was a more distant ancestor. An item of the Chronicler's genealogical notes (I Chr. 2:55) is generally taken as a clue to Rechabite origins: the text mentions three families of scribes who dwelt at Jabez, the Tirathites, the Shimeathites, and the Sucathites, and adds (vs. 55b): "These are the Kenites who came from Hammath, the father of the house of Rechab." This enigmatic statement identifies Hammath as the "father of the house of Rechab" (אבי בית רכב). The view that Hammath was the father of Rechab and the grandfather of J(eh)onadab is unlikely. Now Hammath is otherwise unknown as a personal name and occurs elsewhere only as the name of a town in the territory of

Naphtali (Josh. 19:35). The genealogies of I Chr. 1-9 contain other personifications of place names, and it may be that the intent of this note was to give the Rechabites local connections, but the wording of the text is strange. Most interesting is the implication that the house of Rechab is of Kenite extraction. The Kenites and Midianites (see MIDIAN) were seminomadic tribes on the S borders of Canaan. Many scholars think that the Kenites were the original worshipers of Yahweh and that Moses' Kenite or Midianite father-in-law introduced him to the worship of this god. Groups of Kenites entered Canaan with the Israelites and dwelt among them mostly on the S borders of Judah (Judg. 1:15; I Sam. 15:6; 27:10; 30:29), and one group under Heber pitched tent near Kedesh in Naphtali in the same general region as Hammath, in the time of Deborah (Judg. 4:11, 17). It was the wife of this nomad Kenite chief who struck a crowning blow in an early clash of the Israelites with the Canaanites (4:18-22; 5:24-27). Jehonadab the son of Rechab and his followers may have been descendants of Kenite nomads such as Heber. In Jehu's time these proto-Rechabites were probably a nomad clan who pastured their flocks in marginal areas of the N kingdom, perhaps centering around the town of Hammath in Naphtali. However, the connection between the followers of Jehonadab the son of Rechab and the later house of the Rechabites who took refuge in Jerusalem in Jeremiah's time is not clear; perhaps some of Jehonadab's partisans or descendants migrated to Judah. At any rate, the later Judean Rechabites regarded Jehonadab as their founder.

The rule imposed by Jehonadab is the essence of nomadism. Conflict and antipathy between followers of the nomadic, pastoral mode of life and those of the sedentary, agricultural way is intrinsic and universal. This conflict appears already in Sumerian myths where the farmer is favored over the shepherd. Conversely, in the OT story of Cain and Abel the divine predilection is in favor of the shepherd, and this bias is evident throughout the OT. It was the lawless Cain who first built a city (Gen. 4:17). The patriarchal sagas point up the classic simplicity and ideal purity of the nomad life. The prophetic opposition to the Canaanite way of life drew inspiration from the idealization of the pre-Canaanite past when Israel was a beloved child innocent of Canaanite practices. The law was represented as having been given in this period before Israel was thoroughly contaminated. Elijah in his bitter struggle against Baal-worship gained renewed strength and resolution through a pilgrimage to the desert abode of his god. Amos, Hosea, and Jeremiah contrast Israel's purity in the wilderness with her defilement in Canaan. There were, of course, varieties and degrees of opposition to Canaanite culture. The S tribes were slower to conform than the N tribes, and this was doubtless due in large measure to their closer connections with nomad traditions and ideals. The Rechabites struck at the root of the evil, the tendency to assimilate, by making the nomad mode of life a religious obligation and by rejecting virtually everything Canaanite—except the language.

The Rechabite regulations are the normal ways of nomads. The tent is the nomad abode, and the word

continued as an appellative for "dwelling" long after the Israelites had accommodated themselves to houses. The tent peg with which Jael slew Sisera is a fitting symbol of nomad opposition to sedentary culture. The prohibition of agriculture expresses the nomad disdain of such pursuits as unmanly and degrading. The total abstinence from wine is not so much a reaction to the drunken orgies of the Canaanite fertility rites as an attempt to preserve the conditions of nomad life, in which wine was unknown. (The prohibition of wine is reminiscent of the vow of the NAZIRITE, and it may be that the Rechabites influenced the development of this institution.) While the Rechabites were apparently zealous Yahwists like Jehonadab—all the Rechabite names attested contain the element *yho-* or *-yah*: Jehonadab, Jaazaniah, Habbazaniah, Jeremiah, Malchijah—still their orders are nomadic rather than Yahwistic. Almost identical prohibitions are reported by Diodorus Siculus (XIX. 94) among the Nabateans, their purpose being to remain poor and thus free from fear of subjection by covetous neighbors.

The evidence that the Rechabites as a group survived the Babylonian exile is rather tenuous. There is reference to one Malchijah the son of Rechab, ruler of the district of Beth-haccherem ("house of the vineyard"!) who was given the honor of repairing the Dung Gate in Nehemiah's restoration of Jerusalem (Neh. 3:14); but this is, of itself, evidence that he no longer adhered strictly to the Rechabite rules. The pressure of circumstances must have forced many Rechabites to change their mode of life. In late postexilic times there dwelt at Jabez three families of scribes of Rechabite lineage (I Chr. 2:55). The Talmud (B.B. 91b) understood the "potters" mentioned in I Chr. 4:23 to be descendants of Jonadab the son of Rechab. The prophecy of Jeremiah (35:19) would naturally tend to keep the name and the traditions of the Rechabites alive. The expression "stand before the LORD" (see WORSHIP IN THE OT) usually connotes sacerdotal service in the temple (Targ. so interprets this passage), and Jewish tradition has it that the Rechabites entered the temple service by the marriage of their daughters to priests. The LXX superscription of Ps. 71—H 70, missing in the Hebrew, connects the psalm with the sons of Jonadab and the first exiles, and this has been taken as evidence that the Rechabites were among the Levite singers. According to the Talmud (Ta'an. 26a), the Rechabites had a special day, the seventh of Ab, for participation in the wood festival of the priests and the people. Hegeppus (Euseb. Hist. II. 23) relates that at the martyrdom of James "one of the priests of the sons of Rechab, of the Rechabites who are mentioned by Jeremiah the prophet," protested the crime. This statement, however, is suspect, since Epiphanius (*Heresy* LXXVIII.14) substitutes "Symeon the brother of James" for "the Rechabite."

Travelers have found "Rechabites" in various places. Benjamin of Tudela (twelfth century) reported that he found near El Jubar in Arabia a community of 100,000 Jews who abstained from wine and meat, gave tithes to teachers, and devoted themselves to study and to weeping for Jerusalem. In the nineteenth century Joseph Wolff thought to have found them in Mesopotamia and in Yemen, and Pierotti reported that he had met a tribe calling

themselves Rechabites near the Dead Sea. The name Rechabites was adopted by a short-lived fraternal order, founded in New England in the middle of the nineteenth century, devoted to total abstinence from alcoholic beverages.

RECHAH. KJV form of RECAH.

***RECONCILIATION, RECONCILE.** The coming to agreement of two or more persons after misunderstanding or estrangement. There are many instances of this in the Bible, but the dominant theme is the reconciliation of man to God. Man's condition is diagnosed as one of alienation from God his Maker. But the Bible affirms that God has taken steps to overcome this alienation, and has in Christ provided the means of reconciliation.

This is one aspect of the biblical doctrine of redemption. It is in strong contrast to secular thought, which can speak only of man's being reconciled to himself, his fellow man, or his environment. The Bible recognizes the need of reconciliation on these levels, but these relationships are derivative from the common dependence of all on God, and the basic need is to be in right standing with him.

1. **In the OT.** Basically, sin (see SIN, SINNER) in the OT is the breaking of COVENANT obligation. It is variously regarded as missing the mark (אָמַץ); as unconscious wandering from the right path (שָׁלַל); as deliberate turning aside from the right way (עָוָה)—here the will is involved; as rebellion (עָשָׂה)—here the thought is of a personal God who is disobeyed; as guilt before a judge—a more forensic idea (רָשָׁע). The sacrificial system was designed to "atone" for these sins, full account being taken of the fact that most of them are not deliberate transgressions (Lev. 4:1-5; 16:16-17). For wilful sins (Num. 15:30-31) no sacrifice availed, but restitution was required, in some cases the death of the offender. In all cases penitence was presupposed. This was insisted on by the prophets, and found classic expression in Ps. 51; Ezek. 18.

The essential meaning of the regular verb for "atone" (כָּפַר) is uncertain. It may derive from a Babylonian root signifying "wash away," implying the notion of sin as physical impurity; or from an Arabic root signifying "cover," in which case the original conception is perhaps more personal, of sin as a barrier causing estrangement between God and man. The subject of the verb is sometimes the priest, sometimes God. It is to be noted that in Hebrew usage God is never the object of this verb: "atone-

ment" in the OT means expiation of sin, never the placation of God. God provides atonement for man, but does not need to have his own attitude changed.

Other Hebrew terms to be considered are פָּחַד ("forgive"), used with both sin and the sinner as object; כֹּפֶר ("ransom")—e.g., in Ps. 130:8; לָמַח ("redeem"), especially in Isa. 43; 44:22-28; 49:7-26.

In the Hebrew we have to consider the terminology of sin and atonement, and the total OT assessment of the problem of man's estrangement from his Maker. This is focused in the classic narrative of Gen. 3, where man and woman, after exposure to temptation, feel unfit to face God. They are aware that God's command has not been obeyed; simultaneous with knowledge of right is consciousness of having done wrong. How is this gulf to be bridged? Man's only hope is the fact that God continues to feel concern for his creature, even though the immediate expression of this concern is punishment.

See ATONEMENT; MEDIATOR.

2. In the NT. The Greek terms to be considered are mainly the Greek verb καταλλάσσω, its compound ἀποκαταλλάσσω (three times), and its cognate noun καταλλαγῆ. Behind them lie OT ideas of atonement (Lev. 8:15; etc.).

The meaning of these terms is restoration of harmony between man and God. Apart from the reconciling power which God exerts, man is alienated from God; he is ἄθεος, "without God," living on his own resources, and deprived of hope (Eph. 2:12). Another way of describing this alienation is to view it as due to sin; on this view it is the expiation of the sin which effects reconciliation. Sin, as Paul understands it, is an objective state in which man finds himself, even apart from his own choice. See SIN.

The main sense is the reconciliation of man to God. Subordinate senses are reconciliation of man with his fellows (Matt. 5:24; I Cor. 7:11) and reconciliation of Jew and Gentile (Rom. 11:7-32; Eph. 2-3).

Four passages demand consideration:

a) Rom. 5:8-11. Here the estrangement between man and God is described as enmity (cf. Rom. 11:28; Col. 1:21). It is misplaced ingenuity to argue, with some commentators, whether this implies that God hates sinners or only that sinful men hate God—or whether this hatred is mutual. The reference is rather to the objective condition; the broken relationship is a gulf needing to be bridged. The enmity mentioned in Jas. 4:4 is less objective, for here the possibility of opposing God by deliberate choice is envisaged. Paul's thought is at a deeper level, where the question of human will is not primarily in view (but cf. Rom. 8:7). The notion of hostility has an OT root in Exod. 23:22; Isa. 1:24; and the frequent references in the Psalms to "enemies." The concept of the divine wrath is in Paul's mind—i.e., the reaction of holy love to sin and the secular attitude (see WRATH OF GOD). But it is the divine love (Rom. 5:8) which is at work in this situation making a new harmony possible. Only God could do this; man as sinner is helpless (vs. 6). It is not God's attitude which needs to be changed, but man's. God may be said to hate sin, but at the same time he loves the sinner (vss. 6-8). The expression of God's love was Christ and his self-sacrifice.

How this could become effective for reconciliation Paul does not elucidate. We must assume that he conceived Christ's death to have the efficacy attributed to the blood of sacrificial victims—viz., of releasing new potencies which took the place of the sin of the participators in sacrificial worship (so Rom. 3:25; 8:3); or of inaugurating a covenant (Mark 14:24; I Cor. 11:25). Alternatively we may suppose that in some way Christ exhausted the power of sin (II Cor. 5:21; Gal. 3:13), or overcame the demonic forces which cause sin and misery (I Cor. 2:6, 8; Col. 2:15). See MEDIATOR.

b) Col. 1:20-22 (perhaps the maturest thought of Paul). Here the reconciliation is extended to beings other than man (vs. 20b), and the moral perfection which is its ultimate outcome is emphasized (vs. 22b). Christ's death is again underlined as the means.

c) II Cor. 5:14-21. As a Christian preacher and church organizer, Paul has a message about reconciliation which God has already effected for mankind which was not truly living, but spiritually dead—i.e., because of sin (vss. 19, 21). Entirely new possibilities have been created, and are available when one is "in Christ"—i.e., has made the full response of faith (vs. 17). Christ entered the sinful human environment (vs. 21) and accepted its consequences, even to the point of actually dying (vs. 15). Insofar as God was active in him, this created a new situation, with benefits for all men (vs. 15) and the world (vs. 19). The part in vs. 19, "reconciling," does not imply that this is a process not yet complete; it indicates the continuous activity of God during Christ's earthly ministry. But the benefits have been secured, and only await appropriation by successive generations of mankind to whom the appeal of Christian preaching is to be made (vs. 20).

d) Eph. 2:12-17. This passage has in view the fact of Christian experience that the apparently insoluble antipathy of Jew and non-Jew can be overcome. Christ has removed the barrier (vs. 14) and "slain" the hostility (vs. 16; the RSV misses the subtle point here: it is not really Christ who is slain on the cross, but the hostility which separates men from one another and from God). Gentiles as well as Jews find their true life and spiritual home in the divinely indwelt society which Christ inaugurated (vss. 18:22; see also PEACE IN THE NT). This is evidence of divine operation, since the gulf between Gentile and Jew was regarded in the ancient Roman Empire as more unbridgeable than the modern disparity between East and West, Communist and non-Communist.

Summarizing, we note: (a) It is God who effects reconciliation. He is the subject, mankind the object. God takes the initiative; only he can act in this situation of estrangement. (b) Reconciliation is not a process, but a completed act. "We have now received our reconciliation" through Christ (Rom. 5:11). (c) Christ is the agent of reconciliation; more particularly, his atoning death (Rom. 5:6-9).

Bibliography. J. Denney, *The Christian Doctrine of Reconciliation* (1917), is still worth consulting; also his *Death of Christ* (1902). Outstanding among recent work is V. Taylor, *Forgiveness and Reconciliation* (1941), especially pp. 83-129.

E. C. BLACKMAN

RECORDER [מוֹכִיר, *from* זָכַר (*Hiph'il*), cause to remember; בעל־מַעֲמֵם (I Esd. 2:17; KJV STORY-WRITER)]. An official of high rank in the royal court of Israel. Perhaps originally he kept in mind the decrees and the judgments of the king, and possibly the customs (mores) of the people. He is closer to the CHANCELLOR or cupbearer than to the scribes. He advised the king and probably was in charge of royal chronicles and annals. Jehoshaphat served as recorder for both David and Solomon (II Sam. 8:16; I Kings 4:3; I Chr. 18:15). Joah son of Asaph represented Hezekiah in negotiations with the Assyrian Rabshakeh (II Kings 18:18, 37; Isa. 36:3, 22). He was also involved in the payment of laborers in the repairs to the temple made under Josiah (II Chr. 34:8, where he seems to outrank or at least parallel the governor of the city). C. U. WOLF

RED. Pigment of varying intensities of red was obtained from insects, vegetables, and minerals in ancient times (see COLORS; CRIMSON; SCARLET; VERMILION). However, where the word "red" has been selected to translate Hebrew or Greek terms in the Bible, the reference is primarily to the color of natural objects.

In the OT, the most characteristic of these words is אָדָם or אֲדָמָה and its derivatives. The ruddy, healthy appearance of the newborn Esau is expressed by אֲדָמָה in Gen. 25:25, and rendered by πορράκης in the LXX (see EDOM for the connection between Edomites and the color red). Elsewhere אָדָם as the color of pottage (Gen. 25:30), wine (Prov. 23:31), the sacrificial heifer (Num. 19:2), and horses (Zech. 1:8; 6:2) is also translated "red." The word אֲדָמָה designates the "reddish" hue appearing in garments (Lev. 13:49), or on body spots (Lev. 13:19, 24, etc.) where LEPROSY is suspected.

The use of derivatives of אָדָם to describe rams' skins (Exod. 25:5, etc.) and war shields (Nah. 2:3) suggests the artificial production of "red" color. In Isa. 63:1-2 a play upon words is implied in the similarity between Edom (אֲדָמָה) and the red (אָדָם) apparel which the eschatological conqueror wears.

Through popular etymology a relationship between אֲדָמָה ("red") and דָּם ("blood") is indicated in the allusion to water appearing as "red as blood" (II Kings 3:22). The significance of the color red as a symbol of sin is apparent in Isa. 1:18.

Other Hebrew words have also been interpreted as referring to natural red color. A red (חָמֵר) face follows weeping (Job 16:16), and eyes are red (חֲבִילִי) or dull from wine (Gen. 49:12). In Ps. 75:8, "foaming" (RSV) is a more precise translation of חָמֵר than "red" (KJV); likewise "porphyry" (RSV) is a more accurate rendering of בָּהֶם than "red" (KJV) in Esth. 1:6. The word חָמֵר is translated "red" in Isa. 27:2 KJV; however חָמֵר "pleasant" (RSV), was probably the original reading.

In the NT, the Greek verb πορράζω, "to be fiery red," is used to describe the color of the sky (Matt. 16:2-3); and πορρός identifies the color of the apocalyptic horse (Rev. 6:4) and dragon (12:3).

C. L. WICKWIRE

RED HEIFER [פָּרָה אֲדָמָה, *lit.* a red cow (Num. 19:2, 5-6, 8-10); δάμαλις, heifer (Heb. 9:13)]. The animal

whose ashes were the principal ingredient of the "water for impurity" used to counteract uncleanness caused by contact with death. See CLEAN AND UNCLEAR §§ 3a, 4; DEATH; WATER FOR IMPURITY.

The ritual of the red heifer is described in the OT only in Num. 19, where it comes as a direct command of Yahweh to Moses and Aaron, and is referred to in the Mishna, tractates Ohaloth and Parah. A red heifer which had never been put to profane or common use, and which was unmarred by lameness, blindness, or the like (and, hence, was acceptable as a sacrifice [Lev. 22:20-25; Deut. 17:1]), was brought to the priest, taken outside the camp, and slaughtered (Num. 19:2-3). The officiating priest sprinkled some of the blood seven times toward the front of the tent of meeting (vs. 4), making the animal sacred to Yahweh. It was not, however, a true sacrifice, since the carcass was burned outside the camp, not at the altar. Probably the subsequent use of the ash to remove uncleanness made the animal offensive to the holiness of Yahweh, and prevented its being brought into the sanctuary. The entire animal was burned, including the blood and dung: this was a unique case in OT rituals, where the blood was normally drained off and sprinkled at the altar. The priest threw cedar wood, hyssop, and scarlet thread on the burning carcass, so that all were reduced to ash together (vs. 6). The same three substances were used in the purification of cured lepers (see LEPROSY), but in this case the hyssop and cedar wood, bound together with the scarlet thread, were used to apply the cleansing agent to the leper (Lev. 14:6-7). The cleansing and healing power of HYSSOP, the tough durability of the CEDAR, and the red color of the thread, suggestive of blood, have powerful symbolic value in such rituals, but they are clearly components of secondary importance to the ashes of the heifer (Num. 19:10, 17; Heb. 9:13). A clean person gathered the composite ash and stored it "outside the camp in a clean place" (Num. 19:9) until it was needed to treat a case of uncleanness caused by death (i.e., a person who had touched a dead body, a human bone, or a grave, or who had been in a dwelling where a dead body lay; vs. 14, 16, 18).

When such a case arose, some of the ash was added to spring water in a vessel, and the resultant mixture, called the WATER FOR IMPURITY (מֵי נִדָּה—i.e., the "water for the removal of impurity"), was sprinkled from a bunch of hyssop over an infected person and over the interior and exterior of a contaminated house. Contact with the dead produced a seven-day uncleanness, and the "water for impurity" had to be applied on the third and seventh days under penalty of expulsion from Israel (vs. 13, 18-19).

The officiating priest (vs. 7), the one who burned the heifer (vs. 8), the one who gathered the ash (vs. 10), and the one who sprinkled the water (vs. 19) became "unclean until evening." Most commentators ascribe this uncleanness to contact with a sacred object, on the analogy of the later rabbinic doctrine that touching the sacred books "defiled the hands." Since, however, priests were not made unclean by handling sacred objects in their normal duties, it seems better to appeal to the ancient principle of association. The heifer, which was to remove un-

cleanness, became unclean in advance of its use, just as an unused coffin or an empty gallows causes revulsion to some because of the associations of the use to which it will be put.

The ordinary word for "cow" (פָּרָה), not the specific term for "heifer" (עֵגְלָה), is used in Num. 19. The translation "heifer" is a deduction from the further description of the animal (vs. 2), which implies that it is young, and is supported by a passage in the Canaanite Baal Epic, where the Ugaritic equivalents of the Hebrew "cow" and "heifer" are used in parallelism in reference to the same animal (Baal V.1.18). The red color suggests blood, the most powerful of all OT cleansing agents; but, since the Hebrew terminology of color is not exact, it may also refer to the reddish-brown color of the earth (see COLORS), and reflect a pre-Israelite stage of the ritual in which it was a sacrifice to placate the spirits of the dead which dwell beneath the earth. See DEAD, ABODE OF.

The heifer (עֵגְלָה) was a sacrificial animal in Israel from earliest times (Gen. 15:9; I Sam. 16:2), and female lambs and goats were preferred as sin offerings (חַטָּאת; Lev. 4:28; 5:6; 14:10, 13; Num. 6:14), a term applied to the red heifer (Num. 19:17). A heifer, killed in an uncultivated valley beside a running stream, was used to purge the land of the blood-guilt incurred in an unsolved murder. The elders of the village nearest the scene of the crime were made to declare their ignorance of the murder and to wash their hands over the body of the slain animal (Deut. 21:1-9). The heifer became a symbol of beauty (Jer. 46:20), sexuality (50:11), and stubbornness (Hos. 4:16).

The law of the red heifer is one of those rituals which, like the release of the scapegoat (Lev. 16) and the ordeal of jealousy (Num. 5:11-31; see AZAZEL; WATER OF BITTERNESS), came into Israelite practice from pagan sources, probably through the mediation of the Canaanites. The dead are universally objects of dread, and societies as far removed from one another as the Aztecs of Mexico and the Greeks of the classical period saw in them a potent source of uncleanness. The spirits of the dead could injure the community of the living unless the prescribed ritual precautions were taken. These frequently involved bovine animals. In India the urine of the ox is used in purification from the dead, and some hill tribes sacrifice water buffalo to the shades of their ancestors at the annual Guar.

The cults of death and of fertility were interrelated in ancient thought on the principle that such mighty opposites as life and death somehow belong together. The Baal Epic relates that the dead fertility-god, imprisoned in the underworld, had intercourse with a heifer, the deity thus revitalizing himself in the realm of the dead (Baal I.5.17-22). The practice of spreading the ashes of sacrifice on the fields to increase their productivity is attested from antiquity.

Since the fertility cults and the cult of the dead were prohibited in Israel, the ritual of the red heifer had to be modified and reinterpreted in Israelite cult practice. The stain of uncleanness is an offense against Yahweh's holiness and a violation of his will for Israel. As long as it remains, it jeopardizes Israel's

relationship to her God. Uncleanness in priestly thought was, therefore, equivalent to sin (see CLEAN AND UNCLEAR § 5b; SIN; HOLINESS), and the red heifer was interpreted as a sin offering (חַטָּאת; Num. 19:9, 17). It was not, however, a sacrifice in the strict sense, because it was not burned upon the altar (see SACRIFICE AND OFFERINGS). It was a sin offering only in the sense of "something that removes sin."

While water is the most common cleansing agent employed in OT priestly law, it serves in this case merely to carry the ashes of the heifer, which are the real cleansing agent. The writer of Hebrews recognized this when he compared the "ashes of a heifer," which purified the flesh, with the blood of Christ, which purified the "conscience from dead works" (Heb. 9:13-14). In this ritual spring water (מַיִם חַיִּים; lit., "living water") is specified as being a more potent symbol of life and cleansing than the standing water of a cistern. Semimagical liquids, like the "water for impurity," were widely used in purification rituals, and two close analogies are found in the OT: the "water of bitterness" (Num. 5:11-31) for the detection of a suspected adulteress, and the "water of expiation" (8:7) for the purification of the Levites.

RED SEA [יַם סוּף, *lit.*, Sea of Reeds or Rushes]; **THE SEA** [הַיָּם]; **THE TONGUE OF THE SEA OF EGYPT** [לְשׁוֹן יַם מִצְרַיִם] (Isa. 11:15). The term "Red Sea," which is the literal rendition of the Greek Ἐρυθρὰ θάλασσα (cf. Vulg. *Mare Rubrum*, *Mare Erythraem*), is of unknown origin. Various suggestions for the origin of the name have been made. The classical writers explained it as coming from Erythras, a king who ruled in Erythrae, one of the Ionian cities in Asia Minor. Others have suggested that the name is derived from the red corals which line its shores and cover the floor of the sea. And still others imply that its name comes from the color of the Edomite and Arabian mountains which border on its E shores, and from the glow of the sky reflected in its waters.

The name *Yam Sûph*, "Sea of Reeds [or Rushes]," appears to have been originally applied only to the area bordering on the S extension of Lake Menzaleh, near Baal-zephon. According to an Egyptian text, there were in antiquity two bodies of water near Rameses: (a) the "water of Horus" (Shihor; Isa. 23:3; Jer. 2:18); and (b) "Papyrus Lake," which in the Egyptian is called by the same word as in Hebrew, *Sûph*. Later *Yam Sûph* came to be applied to the Gulf of Aqabah, and perhaps to the Gulf of Suez (Num. 33:10-11 is the only clear reference to this gulf in the OT; however, its validity depends upon the verification of the location of Elim on the traditional route to Sinai; Exod. 16:1 knows of no camping by the *Yam Sûph* after they left Elim), and eventually to the entire body of water known as the Red Sea.

In antiquity the Red or the Erythrean Sea included both the Indian Ocean and the Persian Gulf. Today, however, it is limited only to the arm of the sea which separates Africa from Arabia, and which extends from the Gulf of Aden (Straits of Bab el-Mandeb) in the latitude 20° 40' N to the head of the

Gulf of Suez, latitude 30° N, and which is now joined to the Mediterranean by the Suez Canal. Its total length is ca. 1,200 miles, and its width varies from ca. 250 miles in the S half to ca. 130 miles at Ras Mohammed in the latitude 27° 45' N, where the sea is divided into two gulfs forming a V shape and enclosing between them the Sinai Peninsula, with the Gulf of Suez to the W and the Gulf of Aqabah (also referred to as Aelanitic) to the E. The Gulf of Suez has a length of approximately 130 miles and is ca. 18 miles wide, while the Gulf of Aqabah is ca. 90 miles long and ca. 15 miles wide.

The Red Sea is a part of a great rift-valley system which probably was formed in the Tertiary Age. It forms one of the most marked features of the earth's crust. The rift valley of the Jordan and the Dead Sea continues southward to the Wadi el-'Arabah, and its submerged section forms the Gulf of Aqabah. Another rift valley forming the Gulf of Suez and running southward meets it, and together they form the main basin of the Red Sea, the depth of which is over 7,200 feet.

The Red Sea presents a number of peculiarities. There are no large rivers draining into it. The climate, being hot and dry, causes a large degree of evaporation, resulting in the greater salinity of its waters than in the open ocean. Its level is maintained by a surface current which flows in from the Indian Ocean, while a current of very salty water flows outward at a depth of 300-6,000 feet below the surface. The water is clear and almost green, and it is one of the warmest bodies of water of the earth. The mean temperature of the surface water is 77° in the N, 80° near the middle, and 84° in the S. Below the surface at a depth of 1,200 feet, there is a uniform temperature in all parts of the sea. This high temperature of the water, along with its purity, makes it very favorable for all kinds of marine life, which exists in abundance.

Biblical connections with the Red Sea are limited to two phases of Israel's history: (a) the story of the Exodus, the most important event in which—the crossing of the sea—took place in the area between the Mediterranean and the Gulf of Suez; and (b) the Judean control of the seaport EZION-GEBER-ELATH on the Gulf of Aqabah. Here Solomon, in partnership with Hiram king of Tyre, built and operated a commercial fleet and carried on a profitable trade with OPHIR and other E countries (I Kings 9:26-27; 10:11, 22). Here, too, Solomon operated extensive copper mines and refineries which produced enough copper for domestic consumption and for the export trade. Archaeological excavations in this area have found the largest copper smelting and refinery plant ever uncovered in the Near East. After Solomon, the exploitation of the copper mines of the Arabah and the use of the seaport Ezion-geber languished. King Jehoshaphat attempted to revive the overseas trade by building a fleet of ships "to go to Ophir for gold; but they did not go, for the ships were wrecked at Ezion-geber" (I Kings 22:48). His son Jehoram lost the region to the Edomites, who successfully revolted against his rule (II Kings 3:20). It was recovered by Amaziah and Uzziah through a reconquest (II Kings 14:22), and finally lost permanently by Ahaz, when Edom (so RSV, with *Qere*; KJV "Syria"—i.e., Aram

—with *Kethibh*) became its possessor (II Kings 16:6).

The equating of *Yam Sûph* with the Red Sea presents a problem. There are no reeds in either gulf. Reeds or rushes thrive only in the sweet-water marshes, and these are found only in the marshes N of the Gulf of Suez. In the account of the crossing of the sea and the drowning of the Egyptian pursuers in its waters (Exod. 13:18; 14:21-29; 15:4, 21; and other passages where the allusion to this event is made) the translators of the English Bible have either assumed that the expression *Yam Sûph* or "the sea" invariably refers to the Red Sea, or use the traditional translation "Red Sea" even though the reference may not be to the same waters referred to elsewhere (as in Num. 21:4; Deut. 2:1; I Kings 9:26; etc., where the Gulf of Aqabah is meant). However, a glance at the map of the region where the Israelites found themselves at the time of the crossing of the sea, and the geographical location of the most northerly extremity of the Gulf of Suez, will show immediately that both expressions, *Yam Sûph* and "the sea," in the above passages cannot refer to the Red Sea or even to the Gulf of Suez. In order to have reached even the most northerly tip of the Gulf of Suez, the Israelites would first have had to cross a long tract of the desert to reach it; this feat would have been impossible for them to accomplish before the pursuing Egyptian chariot army would have been upon them. Both terms must then refer in this account, not to the body of water properly known as the Red Sea, but to the marshy area N of the Gulf of Suez, in the region of the S extension of Lake Menzaleh. The Israelites, not being a maritime people, made no distinction in their vocabulary between a body of water such as a lake and the sea. Both are referred to as "sea." The confusion of *Yam Sûph* with the Red Sea probably goes back to the Greek translators of the LXX, who equated *Yam Sûph* with *Erythra Thalassa*, the "Red Sea." This rendition passed into English translations by way of the Vulg. On the other hand, Luther, who relied on the Hebrew, rendered *Yam Sûph* correctly by calling it *Schilfmeer*, "Sea of Reeds."

On the basis of the findings of the recent archaeological explorations in both the Suez and the Aqabah area, the prevalent view that in antiquity both gulfs extended farther N has been completely disproved. No appreciable change in geographical extension has taken place in the last 3,500 years.

Where, then, was the crossing of *Yam Sûph*? Among the various theories, each of which has some point in its favor, the following have been suggested:

a) The traditional S route. The Hebrews started their itinerary from Rameses (Josephus claims that they started from Letopolis, now Old Cairo), which was located, according to this theory, at Qantir, and went to Succoth and from there to "Etham, on the edge of the wilderness." Finding their way blocked by border fortifications, they journeyed southward on the W side of the Bitter Lakes, and crossed into the wilderness at their S extremity. Migdol and Baalzephon were, according to this theory, located somewhere in the vicinity of the lower end of the Bitter Lakes, which at the time of the Exodus were linked to the Gulf of Suez. The expression "Sea of Reeds" could have been applied either to the Gulf of Suez

or to the part of the sea which connected it to the Bitter Lakes.

b) The central crossing. According to this theory, the Hebrews left Rameses (which might have been located either at San el-Hagar or at Qantir) and, after crossing the Pelusiac arm of the Nile, proceeded to Succoth (Tell el-Mashkhuta). Thence they went to the Lake Timsah, which they crossed either on the N end at Ismailieh, or on the S end. It is quite possible that the name *Yam Sûph* was originally applied to the lakes of the isthmus.

Assuming that the archaeological identification of Rameses with Tanis is correct, and that the "Papyrus Lake" was in its vicinity, the Hebrews, after leaving Rameses, headed first southward to Succoth (Tell el-Mashkhuta), where they hoped to escape into the wilderness of Etham by way of the Wadi Tumilat in the area of Lake Timsah. Finding their way blocked, they turned northeastward, and camped before "Pi-ha-hiroth, between Migdol and the sea, in front of Baal-zephon" (Exod. 14:1-2). According to a Phoenician letter, a temple of god Baal-zephon was located near Tell Defneh. It was at this point that the Israelites crossed the *Yam Sûph*, which was perhaps located at the S extension of the present Lake Menzaleh.

c) The N crossing. This theory identifies *Yam Sûph* with Lake Sirbonis, which is located between Pelusium and Raphia and is now called Lake Bardawil. It suggests that the escape of the Israelites was by a N route, by way of the narrow strip of land which separates the lake from the Mediterranean Sea. This theory involves giving up the identification of Succoth with Tell el-Mashkhuta, and identifying it with a place at or near Mohammediyeh. Migdol is then connected with Tell el-Her, and Baal-zephon with Zeus Kasios (Greek designation for Baal-zephon), who had a sanctuary on a knoll on the shores of Lake Sirbonis. Moreover, around this lake there are large areas of reeds, which would make the name *Yam Sûph* quite appropriate. According to this theory, the Israelites first made the march from Rameses to Etham; then, using military strategy, they turned northward toward the sea, thus giving the pursuing Egyptians the appearance that they were confused and lost. The Israelites, fleeing across the narrow, sandy strip, succeeded in crossing it, before the Egyptians could overtake them. The disaster which destroyed the Egyptians was probably due to a break-through of the narrow sandy strip by a strong E wind, and thus caused the water of the sea to pour into the lake basin.

REDEEM, REDEEMER, REDEMPTION. The legal process of redemption provides the biblical writers with one of their basic images for describing God's saving activity toward man. Originally a secular concept, it became of great theological importance in the OT—especially in Deuteronomy, Psalms, and

Second Isaiah—and to a lesser degree in the NT. Its central position in the vocabulary of modern Christian theology, where the terms have a currency quite disproportionate to the relative infrequency of their appearance in the NT, seems to be due to the influence of Luther.

1. The legal concept of redemption in the OT
 - a. The root פדה (*pādhâ*)
 - b. The root גאל (*gā'al*)
 - c. The word כֹּפֶר (*kôpher*)
2. The theological concept of redemption in the OT
 - a. The redemption of Israel
 - b. The redemption of individuals
3. The use of the concept in the NT

Bibliography

1. **The legal concept of redemption in the OT.** The words "redeem," "redeemer," and "redemption" are used to translate derivatives of two Hebrew roots, פדה and גאל, which, like their English equivalents, designate a process by which something alienated, or at least subject to alienation, may, in some circumstances, be recovered for its original owner by the payment of a sum of money. The thing alienated may be either real property or an animal or the legal freedom of a person. The term may also be applied to the saving of a life which has become legally forfeit.

a. **The root פדה (*pādhâ*).** This is the more general of the two terms and has cognates of related meaning in other Semitic languages; in the OT it is never used except with regard to the redemption of persons or other living beings. Thus the owner of an ox, known to be dangerous, which has killed a person may be allowed to save his own life by payment of a redemption price (*pidhyôn*; Exod. 21:30). A woman who has been legally betrothed may be redeemed if she proves unsatisfactory to her prospective husband (Exod. 21:8). By Hebrew law, all the first-born are to be sacrificed to God, but provision is made for redeeming the first-born of men and unclean animals by the payment of a fixed amount (Num. 18:15-16). An advance beyond the idea of money payment provides for the redemption of first-born children by the consecration of the Levites to God's service (Num. 3:45); even here, however, the surplus children, over and above the number of the Levites, must be redeemed by a payment of money (Num. 3:46-51). The term פדה designates objectively the act of redemption and (unlike גאל) implies nothing with respect to the status of the person who performs it, or his obligation to do so.

b. **The root גאל (*gā'al*).** This is a purely Hebrew word, belonging to the realm of family law, which denotes primarily the action of the next of kin to recover the forfeited property of a kinsman or to purchase his freedom if he has fallen into slavery. It is closely bound up with the conception of the solidarity of the family group. Thus Lev. 25:25 provides that if a man is forced to sell some portion of his property because he has fallen into debt, his next of kin, if he has the means, is under obligation to repurchase it for him. Ruth 4:4-6; Jer. 32:6-12 are good illustrations of how the law operated in practice. Lev. 25:47-49 allows the near kinsman the privilege of redeeming a poor relative who may have sold himself

into slavery because of debt. So intimate is the relationship between the root גאל and the family that the participial form *gô'el* (unlike the corresponding form of פדה) can be translated, not only "redeemer," but also "nearest kin" or "next of kin," as in Ruth 2:20; 4:1. Since the nearest of kin also has the duty of avenging a murder, the word *gô'el* in the phrase *gô'el haddâm* can be translated "the avenger" of blood (Num. 35:19). See AVENGER OF BLOOD.

In addition to the primary technical sense just described, גאל can also be used in a quite general way to mean simply "redeem" or "deliver," especially when the reference is to the redemption of inanimate property (as in Lev. 27:15, 19-20).

c. **The word כפר (*kôpher*).** While the verbal root כפר (probably meaning "to cover") has a purely religious sense in Hebrew and its different forms are usually translated by some variation of the phrase "to make atonement" (see ATONEMENT), the noun *kôpher* has a secular meaning and is translated either by something like "bribe" (Amos 5:12) or, in the context of a redemptive action, by "ransom," as in Exod. 21:30; Ps. 49:7-8, where "ransom" (*kôpher*) is associated with "redemption" (*pidhyôn*, a derivative of פדה).

2. **The theological concept of redemption in the OT.** Since the essential purpose of a redemptive act is to deliver a person or thing from captivity or loss, it becomes an appropriate image for God's saving actions among men. Against the background of Hebrew law, the image had a vividness which can hardly be realized by men of different background and culture.

a. **The redemption of Israel.** The term is widely used with reference to Yahweh's deliverance of his people from Egypt (Exod. 6:6; 15:13 [גאל]; Deut. 7:8; 9:26 [פדה]; Ps. 106:10 KJV [גאל]); the terms גאל and פדה are used without difference of meaning and without pressing the metaphor to include the thought of God's having paid a redemptive price.

In the days of the Babylonian exile, it was inevitable that the image should be used to describe Israel's similar deliverance from her second period of captivity. Redemption is one of the basic concepts of Second Isaiah (Isa. 43:1; 44:22-23; 52:9; etc.), who overwhelmingly prefer the root גאל because of its connotations of intimate relationship and personal responsibility. The word "Redeemer" (*gô'el*) is one of the prophet's favorite names for God (44:24; 47:4; etc.), pointing, as it does, not merely to the fact that Yahweh delivers his people, but that he has an obligation to do so because of having adopted them for his own. He is their "Next of Kin." The thought of a redemption price, however, is specifically excluded in Isa. 45:13; 52:3 and appears only half seriously in 43:3.

By a natural extension, the term "redemption" could also be used for God's deliverance of his people out of any trouble at all (Ps. 25:22; Hos. 13:14 [פדה and גאל]). The concept of redemption from sin appears nowhere except possibly in Ps. 130:8.

b. **The redemption of individuals.** The concept of redemption could also be applied quite naturally to God's deliverance of individuals from troubles of various kinds. It is occasionally found in this sense in the older literature (e.g., Gen. 48:16; II Sam. 4:9) and is frequent in the Psalms (e.g., 26:11; 49:15; 69:

18 [גאל and פדה]; 103:4). The most striking instance is Job's conviction that God is his personal redeemer (*gô'el*) and must therefore ultimately vindicate his integrity (Job 19:25).

3. **The use of the concept in the NT.** In contrast to the frequency with which these words occur in the OT, their use in the NT is relatively limited, probably because of the difference in cultural background which made other images such as ATONEMENT; SACRIFICE; and JUSTIFICATION more intelligible and appealing. The word "ransom" (λύτρον and ἀντίλυτρον) occurs only three times (Matt. 20:28 = Mark 10:45; I Tim. 2:6), but its occurrence in the first two of these passages is nevertheless of fundamental importance for understanding Jesus' own conception of his death as a redemptive act. He gives a new depth to the concept of redemption by associating with it the idea—derived from Isa. 53:5-6, 10—of a substitutionary sacrifice.

The derived verb "to redeem or ransom" (λυτρόω) occurs in connection with the death of Christ only in Tit. 2:14 (reflecting Ps. 130:8); I Pet. 1:18-19, which introduces the idea that the blood of Christ is the ransom price. The other two occurrences of the verbal idea (the first in a different form; Luke 1:68; 24:21) merely express the OT idea of redemption as the deliverance of Israel from oppression.

In the Pauline letters the noun "redemption" (ἀπολύτρωσις) occurs rarely and ordinarily only in the general sense of "deliverance" (Rom. 3:24; 8:23; I Cor. 1:30; Eph. 1:14 KJV; 4:30), although in Eph. 1:14 KJV the image of the Hebrew legal process may be in the author's mind. Only in Eph. 1:7 does the idea of the blood of Christ as a redemption price appear (the similar phrase in Col. 1:14 KJV is textually dubious and is omitted in the RSV). In Heb. 9:15 the term is also used in a quite general way as a synonym of "atonement" or "forgiveness." The use of the concept "redemption" in the NT in its proper Christian theological sense always implies deliverance from sin and its effects, rather than merely from death or trouble.

The concept of God's saving work among men as a process of redemption from possession or control by an alien power is, in spite of its infrequent use in the NT, one of the fundamental concepts of the Bible. The interpreter must, however, beware of pressing the metaphor too far—of asking, e.g., to whom the ransom price was paid. The biblical emphasis is on the fact of deliverance, not on the details of a legal process.

REED [קנה, *qānē*, Akkad. *qanū*, Ugar. *qn(m)*; אנה, 'ēbhē; אגמון, 'agmôn; אחו, 'āhū (Egyp. loan word), Ugar. *ah*; אנה, *gōmē*; סוף, *sūph* (Egyp. loan word); κάλαμος]. The flowering stalk of any of several species of tall aquatic grasses, and more generally any object of similar shape. *Qānē* seems to have been the generic word similar to the English word "reed," for its use is quite broad. Several Hebrew words re-

fer to reedlike plants. The RSV translates five of them with "reed," but not consistently; the KJV, only two, primarily *qānē*.

1. *Qānē*. This plant is referred to in I Kings 14:15: the prophet Ahijah predicted the Lord would smite Israel "as a reed shaken in the water." It also occurs in the description of the Servant who will not break a "bruised reed" (Isa. 42:3; cf. Matt. 12:20), and in an obscure allusion to "beasts that dwell among the reeds" in Ps. 68:30—H 68:31 (cf. KJV "company of spearmen").

The largest of the reed grasses, *Arundo donax* L., the "giant reed," provides a sturdy, bamboolike stalk, sometimes as much as ten feet long, useful for many purposes. The smaller reed, *Phragmites communis* Trin., is more common, however, and thus considered by some scholars the more likely one (see FLORA § A11). It is used metaphorically, to describe Egypt as a "staff of reed" that broke when Israel relied upon it (Ezek. 29:6) and as "that broken reed of a staff" (II Kings 18:21). In Ezek. 40:5 is a "measuring reed" (*qānē*) "six long cubits" in length (ca. ten feet, four inches) with which the measurements of the ideal temple of the future are given (40:5-7; 41:8; 42:16-19; cf. Rev. 11:1; 21:15-16; see WEIGHTS AND MEASURES). Apparently it might designate the beam of a balance, and so come to mean "scales." (The English word "canon," referring particularly to spiritual authority, probably stems ultimately from this word, through the Greek and the Latin.) *Qānē* is used also of the "shaft" and "branches" of the sacred lampstand (Exod. 25:31-32; 37:17-18). In Job 31:22 ("shoulder blade") it designates the humeral bone of the upper arm (cf. Ugar. references in Gordon 62:4; 67:VI:20). See also CALAMUS; CANE; SWEET CANE.

2. *ʿĒbhē*. The strange expression *ʿaniyyōth ʿēbhē*, "skiffs of reed," in Job 9:26 (KJV "swift ships") is now generally recognized to refer to the papyrus-reed boats (= נלִי נַמְסֵם in Isa. 18:2) which moved swiftly over the Nile in ancient times ("skiffs of reed"). The phrase is in a figure depicting Job's assurance of his swift-approaching death. See SKIFF.

3. *ʿAgmōn*. Zohary identifies this reed with the genus *Scirpus*, a sedge grass (see FLORA § A11d), while others prefer the genus *Juncus* or rush, both of which are common to swampy areas. The word is twice used metaphorically in Isaiah along with palm branches: once in a figure of God's punishment of Israel (9:14—H 9:13), and again in an oracle against Egypt (19:15); the KJV uses "rush." The identification is based on the noun *ʿagam*, meaning a "pool" (cf. Akkadian *agammu*, "swamp," and Arabic *ʿajam*, "pool of reeds"). In Jer. 51:32 *ʿagammim* may refer to the swamp reeds which are burned (so KJV), but many scholars prefer to follow the LXX (cf. RSV "bulwark"). In Job 41:2—H 40:26 *ʿagmōn* may refer to a "rope" (KJV "hook") made from the rush, while in 41:20—H 41:12 it probably refers to burning "rushes" (KJV "caldron"). The drooping, flowering panicles of the rush are a figure for criticism of fasting in Isa. 58:5 (RSV "rush"; KJV "bulrush"). See RUSH.

4. *ʿĀhū* appears in Gen. 41:2, 18; Job 8:11, and clearly refers to the reed grass (KJV "meadow," "flag"). Twice in a Ugaritic fragment (Gordon 76:

II:9, 12) *ah* appears in a context which has been interpreted to refer to Lake Semachonitis (Lake Huleh in Galilee), implying marsh grass. In Hos. 13:15 the puzzling "among brothers" (so KJV; *ben ʿāhīm*) is now considered by many to be an error for "as the reed plant" (so RSV; reading *kaʿāhāwīm*), for a flora reference best fits the context. See FLAG.

5. *Gômē*. This is the papyrus reed. It is translated "rush" in Isa. 35:7, "BULRUSH" in Exod. 2:3. In Job 8:11; Isa. 18:2 it is translated "PAPYRUS" (KJV "rushes," "bulrushes").

6. *Sūph*. This reed is identified by Zohary (see FLORA § A11c) as the cattail, *Typha angustata* Bery et Choub. The RSV translates "reed" only in Exod. 2:3, 5 (KJV FLAG), in the familiar story of Moses in the papyrus-reed basket which was placed among the reeds by the Nile. In Jonah 2:5—H 2:6 it is translated "weeds." *Yam-sūph* occurs twenty-four times in the OT and is given the meaning "RED SEA," although it literally means "Sea of Reeds." Several water bodies are given this designation in the OT. In Deut. 1:1 a place by the name of *SUPH* (KJV "Red sea") is mentioned, but its location is unknown.

7. *Κάλαμος*. In the NT the common Greek word *κάλαμος* is used for a reed (Matt. 11:7; Luke 7:24; etc.), a staff (Matt. 27:29, etc.), a measuring rod (Rev. 11:1, etc.), and a reed pen (III John 13). A reed was given in mockery to Jesus as a royal staff by the soldiers before his crucifixion (Matt. 27:29-30; Mark 15:19). In John 19:29 vinegar is offered to Jesus on the cross, with *HYSSOP* (in the parallels in Matt. 27:48; Mark 15:36, a "reed"). The RSV shifts to "rod" for the passages in Revelation (11:1; 21:15-16), which reflect Ezekiel's "reed" for measuring the future temple.

REELIAH *rēʿā līʿā* [רעליה] (Ezra 2:2). Alternately: **RAAMIAH** *rāʿā mīʿā* [רעמיה] (Neh. 7:7); Apoc. **RESAIAH** *rī sāʿyā* [ῤησαίας] (I Esd. 5:8), KJV **REESAIAS** *rēʿā sāʿyās*; Apoc. inserts also **REELIAH** *rēʿā līʿā*, KJV **REELIUS** — *ῤεελίος* (A), *Βορολείας* (B)], perhaps a copyist's attempt to correct marginally the preceding form. One of those whose names head the list of exiles returned from Babylon. Which MT variant of the name is correct is uncertain. B. T. DAHLBERG

***REFINING** [רַקַּק, צָרַר; πυροῦσθαι]. Reducing to a fine state; metaphorically, cleansing, purifying.

The two Hebrew terms refer to two different processes. The first (רַקַּק; lit., "to filter or strain," and used also of distilling rain [Job 36:27] and refining wine [Isa. 25:6]) has reference to melting, the physical process of changing metal from a solid to a liquid and rendering the metal purer by removal of dross (I Chr. 28:18; 29:4; Job 28:1; Ps. 12:6). The second term (צָרַר, specifically meaning "smelt," Akkadian *šarpu*) has reference to the extraction by fire supplemented by chemical reactions from ores found in nature (Isa. 1:25; 48:10; Jer. 6:29; 9:7—H 9:6; used of refining by smelting in II Sam. 22:31; Pss. 12:6—H 12:7; 17:3; etc.).

Melting, or cupellation, required a heated crucible or "fining pot" of well-fired POTTERY (see also FURNACE). The earliest smelting (see BRONZE) was by bonfires, ore heaped on fuel. Later the shaft furnace, fed from the top, with the end product withdrawn from the bottom, was developed. Still later, with higher temperatures required for iron-ore smelting (e.g., Solomonic EZION-GEBER), came a furnace with natural forced draft.* Refineries fully operating with fire by night and smoke by day made vivid symbols of purification (Isa. 1:25-26; Zech. 13:9; Mal. 3:3) and judgment (Isa. 1:22; Jer. 6:27-30; Ezek. 22:17-22). Fig. EZI 41.

Techniques of refining were adapted to the metal ore. GOLD and TIN required simple melting. Crucibles retaining melted COPPER were found near two blast furnaces (Philistine?) at Tell Qasile.* The most extensive refinery excavated in Palestine is at Ezion-geber; the copper and iron ore came from Solomon's Arabah mines. The process of silver-lead refining (see SILVER; LEAD) is reflected in Jer. 6:27-30. Ezek.

Courtesy of the Israel Exploration Society

8. Drawing of a reconstructed copper-smelting furnace, from Tell Qasile

22:20-22 pictures a jeweler melting scraps to recover silver (cf. Ps. 12:6; Prov. 17:3; 25:4; 27:21; Zech. 13:9). Three IRON refineries at Tell Jemmeh are dated by the excavator to the twelfth century B.C. These are smaller in size but of the same design as those in Solomon's "Pittsburgh." Fig. REF 8.

Lacking local ores, the Bible peoples probably did only the final refining of metals. In copper and iron production, however, at least in Solomon's time, Israelite smelters and refineries excelled.

REFUGE [מָצוּת, stronghold; מִשְׁגָּב, secure height; מָנוֹס, place of escape; מַחְסֵה, place of refuge]. The idea of "refuge" in the OT may be traced back to the language of warfare—the "secure height" and the "strong rock," etc., describe both natural and artificial protection afforded by the rocky landscape of Canaan's mountain regions (cf. Judg. 6:2; I Sam. 13:6; Isa. 2:19).

"Refuge" as an epithet of Yahweh is one of many synonymous expressions describing him as the protector of men (cf. "rock," "fortress," etc., in Ps. 18:1-2), a concept which is predominantly found in the

book of Psalms and other psalm literature in the OT (e.g., Deut. 32:3 ff; Jer. 16:19; 17:12-18; Nah. 1:2-8).

The pious "take refuge" in the "shadow of his wings" (Ruth 2:12; Pss. 17:8; 36:7; see WINGS; SHADOW); this may mean the temple in Jerusalem in some instances (cf. Pss. 57:1; 61:4; 63:7). Also, they take refuge "in him" (Pss. 2:12; 5:11; 16:1; Prov. 30:5; Nah. 1:7; cf. Isa. 57:13).

See CITY OF REFUGE for this technical use of the term.

REGENERATION [ἀναγεννᾶν; παλιγγενεσία; γεννᾶν ἄνωθεν, see below]. Transcendence beyond mortal life by encounter with Christ through the kerygma, whereby at death one is granted eschatological life, to which one repeatedly arises already during this life. Thus union with Christ is the continuing Christian experience of selfhood.

Ἀναγεννᾶν (lit., "rebeget" or "rebear") occurs only in I Pet. 1:3, 23 (ἀρτιγέννητος, in I Pet. 2:2, means "recently born"). Παλιγγενεσία (lit., a "becoming again"), occurs as "regeneration" only in Tit. 3:5. Γεννᾶν ἄνωθεν in John 3:3, 7, probably means "beget from above," since ἄνωθεν always has this meaning elsewhere in John (3:31; 19:11, 23), and the other Johannine modifiers of γεννᾶν are in harmony with this meaning: "from God" (1:13); "of (water and) the Spirit" (3:5-6, 8), rather than "of the flesh" (3:6; cf. 1:13). Furthermore, the Johannine explanation of regeneration in the Prologue and in ch. 3 is in terms of "him who came from heaven" (3:13; cf. 6:32-58), and here again ἄνωθεν is used (3:31; in 8:23 ἐκ τῶν ἄνω = ἄνωθεν). The term is then introduced into the saying of Jesus (which Just. Apol. I.61.4 cites using ἀναγεννᾶν; cf. Mark 10:15 and parallels), to exclude the objection (John 3:4; Just. Apol. 61.5) of an impossible second natural birth, which would be from below (cf. already Job 1:21; Ps. 139:13-15; eschatologically Isa. 26:19 and bBer. 15b on Prov. 30:15-16), and to bring the saying of Jesus into the framework of Johannine theology (cf. 3:36).

The nearest parallel to this usage is the Naassene interpretation of the Eleusinian mystery (Hippolytus *Ref.* V.3), where "the generation [γένεσις] that is spiritual, heavenly, from above [ἄνω]," is explained: "We who are spiritual come flowing down from

above [ἀνωθεν], from Adam." Similarly in the Gospel of Truth 22:3-4: "If a person has the gnose, he is a being from on high."

The translation "beget again" is linguistically possible (though not in the case of the Aramaic כְּלִי־לֵב, and certainly the begetting from above is understood as a begetting again. To this extent Nicodemus' restatement (John 3:4), though crude, is accurate: δευτερον . . . γεννηθαι, lit., "be born . . . a second time" (in contrast to "once born"; cf. Just. Apol. I.61.5). The general propriety of translating different though similar Greek terms with the same English term is strengthened when one observes, e.g., Justin associating (Dial. 138.2) πάλιν . . . γένεσθαι of Jesus with ἀναγεννᾶν of the believer, and citing (Apol. I.61.4) the same saying as John 3:3 with ἀναγεννᾶν instead of γεννᾶν ἀνωθεν (cf. Hesychius' definition of παλιγγενεσία: τὸ ἐκ δευτέρου ἀναγεννηθῆναι, ἢ ἀνακαινισθῆναι).

The lateness and the rarity of "regeneration" in the NT are partly due to the absence of any equivalent term in Hebrew, Aramaic, and the LXX (πάλιν γένομαι in Job 14:14 refers to a questionable afterlife; the variant ἀναγεννηθεῖς, in the Ecclesiasticus Prologue, is a scribal error). The variation in terminology when the idea is finally introduced not only reflects the availability of the various expressions in the Hellenistic world (see § A below), but also indicates that the development of the idea and experience within primitive Christianity had already advanced to the stage where the appropriation of the various terms could take place spontaneously and independently at different points in the NT. An analysis of the idea of regeneration where the term occurs (see § B1 below) will make it possible to trace the development even prior to the introduction of the term (see § B2 below).

Bibliography

A. **IN THE HELLENISTIC WORLD.** "Regeneration" (παλιγγενεσία) was used by the Stoics to designate the cosmic restoration following upon the world conflagration (Philo *On the Eternity of the World* 8 also uses [πάλιν] ἀναγέννησις of this Stoic view). The popularized form of this usage was appropriated to designate the RESTORATION after the Flood (Philo *On Moses* II.65; I Clem. 9:4), after the Exile (Jos. Antiq. XI.iii.9), and after the final destruction of the present evil aeon (Matt. 19:28). The Pythagoreans used the term individualistically to designate the transmigration of souls, and the term became current for various kinds of individual restoration, such as Cicero's return from exile (*Letters to Atticus* VI.6). Plutarch designates the divinity's restoration to life

after dismemberment in the myths of Dionysus (the E at Delphi 9) and Osiris (*Isis and Osiris* 35) as "regeneration." As the fertility cults developed into mystery religions with an increasingly personal and individual goal, "regeneration" was appropriated to designate the salvation attained for the believer by means of initiation.

For Apuleius (*Metamorphoses* XI) this usage is still somewhat unusual (*quodam modo renatus*), and occurs in contexts where initiation is most nearly a literal return to life: in Lucius' restoration from animal to human form (XI.16), and in restoration from the threshold of death (XI.21). Apuleius' regeneration takes place by means of a cultic voyage through the cosmos imitating death and restoration to life (XI.21.23), and achieves deliverance from fate—a more happy and glorious life, a blessed afterlife, and, if obedient, an extension of this life beyond the limit set by fate (XI.6, 15, 21, 25). The rite was climaxed by a presentation of the initiate dressed in the form of the solar divinity (XI.24), which suggests deification. Some such usage had already been attested indirectly by Philo (*Questions and Answers on Exodus* II.46), when he presented Moses' ascent of Sinai as a "second birth [δευτέρα γένεσις] better than the first," for it is not "mixed with a body" or of "corruptible parents," but is the pure mind, with God as father and no mother; it is "divine birth," "deification" by ascension "above the heavens" (II.40; cf. II.29).

The so-called "Mithras liturgy" in the great Paris magic papyrus explains how "regeneration" (μεταγεννᾶν; πάλιν γένεσθαι) is effected by means of a cultically experienced ascension (see ASCENSION § 1) through the various gates of heaven, during which one beholds "with immortal spirit" (by inhalation) the "immortal origin," the elements—i.e., one's heavenly "perfect body"—and the "immortal Aeon and Ruler of the flaming diadem," the sun-god and Mithra. During the vision one is free from the "perishable nature of mortals," and although one then returns from ecstasy to earthly existence, the cultic "transfer to immortal birth" from "mortal birth" has provided assurance of "immortality"—i.e., one's ascension at death.

An inscription from Rome dated A.D. 376 (CIL VI.510) refers to a person's having been "reborn for eternity [*renatus in aeternum*] by taurobolium and criobolium," although other inscriptions suggest that after twenty years one needed to repeat this Phrygian rite (which consisted in placing the initiate in a pit beneath the sacrifice, to be drenched in its blood). The spring festival of this cult, imitating Attis' emasculation so as to be united with Cybele, is interpreted philosophically by Sallust (*On the Gods and the World* 4) as "cutting off the further process of generation"; then follow a milk diet "as though we were being born again [ὡσπερ ἀναγεννωμένων]," and festivities representing, "as it were, a return up to the gods."

Tractate XIII of the Corpus Hermeticum is a secret discourse of Hermes Trismegistus to his son Tat, explaining and thereby mediating "regeneration" (παλιγγενεσία; ἀναγεννᾶν occurs only as a conjectural emendation): "Stop the working of your bodily senses, and then will deity be born in you" (XIII.7). The ten "powers" (virtues) of God dispel

the twelve "punishments" (vices), and themselves enter the initiate to constitute the "Logos"—i.e., the new man as one's divine self: "The intellectual birth has been put together . . . and we have been deified by birth" (XIII.10). One has "passed forth out of oneself into an immortal body" (XIII.3): "I am in heaven and in earth, in water and in air; I am in beasts and plants . . . everywhere" (XIII.11). Immortality (i.e., ascension at death) is assured. This intellectually mediated regeneration developed historically out of a more typical sacramental regeneration, as is apparent in IV.4, where the same enlightenment comes by baptism in a great basin filled with mind.

This survey indicates a rather consistent usage of "regeneration" to designate a sacramental anticipation of victory over death, transforming one's nature and giving assurance of immortality; such experiences were both more common and more ancient than the surviving instances of the term. As Tertullian (*On Baptism* 5) noted, this usage of the term is also that of the NT (except for Matt. 19:28), although the NT understanding of the experience cannot be determined by a preconceived definition, but only by an analysis of the NT material.

B. IN THE NT. 1. The usage of the term "regeneration." From the passages where the terms for "regeneration" occur, certain common traits can be established, which will both provide the basis for locating the experience before the term occurs, and serve to draw attention to the distinctive features in the various passages on the topic.

a. At baptism. Tit. 3:5 refers to the "washing of regeneration," where the term "washing" (λουτρόν) is the technical Hellenistic term for ceremonial washing (Just. Apol. I.62.1), which in the case of the NT church can only mean baptism (cf. especially Acts 22:16; Eph. 5:26; Heb. 10:22). John 3:5 explains regeneration as birth "of water and the Spirit," where a customary association of regeneration with baptism is probably reflected, even though John (like *Corpus Hermeticum* IV) may here, as in 4:14; 7:38-39, wish to transcend the literal element; the saying was probably already in a baptismal setting in Mark 10:15, as in Just. Apol. I.61.4. Such a baptismal context is confirmed by the discussion of baptism (John 3:22-30; 4:1-2) within the regeneration passage (cf. I John 5:6-8). In I Peter the baptismal passage 3:20-21 is so similar to the context of regeneration in 1:3, 23 ("through the resurrection of Jesus Christ" [3:21; 1:3]; the setting within the kerygma [3:18, 22; 1:23-25]; the initial ethical commitment [3:21; 2:1-2]), and the material of 1:3-4:11 is so similar to baptismal motifs in the early church, that one generally concedes the setting of regeneration in I Peter to be baptismal, just as Justin (*Dial.* 138) sees regeneration in the baptismal material included in I Pet. 3:20-21. Justin's own decription of regeneration (*Apol.* I.61.3) is conclusive for the association of baptism and regeneration: "Then they are brought by us where there is water, and with the manner of regeneration with which we ourselves were regenerated, they are regenerated: For in the name of God, the Father and Lord of the universe, and of our Savior Jesus Christ, and of the Holy Spirit, they then perform the washing in water."

b. Through a divine seed, contrasted to human seed. I Pet. 1:23-25 speaks of being born anew "not of perishable seed but of imperishable, through the living and abiding word of God" (cf. Mark 4:13-20 and parallels; Jas. 1:18, 21), which is contrasted to all flesh, which withers and falls. Quite similarly, John 1:13 speaks of being born "not of blood nor of the will of the flesh nor of the will of man, but of God" (cf. Jas. 1:15, 18), and John 3:6 contrasts "that which is born of the flesh" with "that which is born of the Spirit." From I John 3:9 it is clear that being begotten of God rather than of the devil means receiving God's "seed," the word of God (John 5:38; 15:7; I John 1:10). The Valentinians (*Tert. On the Flesh of Christ* 19) saw in John 1:13 an allusion to the "mysterious seed of the elect and spiritual"; their *Gospel of Truth* (43.10-14) says that the children of God "are in that true and eternal life and speak of the perfect Light filled with the seed of the Father." *Corpus Hermeticum* XIII.1-2 is also similar to John: "I know not . . . from what womb a man can be born again, nor of what seed. —Oh son, [the womb] is intellectual wisdom in Silence, and the seed is the true Good. —Who is the begetter? . . . —The will of God." Just. Apol. I.61.10 contrasts the first birth "of liquid seed" (in *Dial.* 125.5; 140.2 "fleshly seed") with regeneration; believers have within them "seed from God" (32.8), here specifically identified with the Word. Somewhat similarly, the "Mithras liturgy" contrasts the "perishable nature of mortals" with rebirth by God's imperishable right hand (cf. I Pet. 1:23): "Begotten of the mortal womb of X and of seed-filled fluid, and, today regenerated by thee, . . . made immortal."

On the other hand, Tit. 3:5 is on this point an exception, for here the Pauline contrast of man's works and God's grace provides the context of rebirth, while the divine presence is given the traditional baptismal and Pauline designation "Holy Spirit" (cf. John 3:5-6, 8; Just. Apol. I.61.3, 13). Even where in the NT the concept of seed does occur, the prominence of faith, correlative to the tendency to understand the seed as the word, tends to maintain the existential understanding of regeneration.

c. In union with Christ. I Pet. 1:3 says that rebirth is "through the resurrection of Jesus Christ from the dead" (see also 3:21*b*), while 1:23 says it is "through the living and abiding word of God," the gospel (1:25; cf. I Cor. 4:15; Eph. 1:13; Col. 1:5; I Thess. 2:13), which accompanies baptism (I Pet. 3:18-22; cf. Eph. 5:26). Since the content of I Peter's gospel is Christ's suffering and glory (1:11; 2:21 ff; 3:18, 22; 4:1, 13; 5:1, 9-10)—i.e., his resurrection from the dead (1:21)—the word of God and the resurrection coincide, and the person thereby regenerated is "in Christ" (3:16; 5:10, 14). Similarly, in Tit. 3:4-5 the salvation at the appearance of Christ coincides with our regeneration. A somewhat similar sentiment seems to be at the base of the choice of the rather unusual designation for regeneration in John. The answer to Nicodemus' question: "How can this be?" (John 3:9) consists in the parallel between regeneration and the Johannine kerygma of Christ's descent and ascent (3:13, etc.): Birth "from above" (3:3, 7)—i.e., "from God" (1:13)—is possible because Christ

is "from above" (3:31; 8:23)—i.e., "from God" (8:42; cf. 3:2, 16-17, 34; etc.). Regeneration means union with the incarnation: "To all who received him, who believed in his name, he gave power to become children of God" (1:12); "he who believes in the Son has eternal life" (3:36).

Regeneration as union with Christ has been somewhat formalized by Justin in *Apol. I.61*, where baptism presupposes acceptance of Christian doctrine and takes place in the name of the Trinity. But Justin reveals in *Dial. 138* what is still implied in such formal statements, when he sees in the eight persons on the ark (symbolizing baptism) a hint of the resurrection date, and adds: "For Christ, being the first-born of every creature, became again [πάλιν . . . γένεσθαι] the beginning of another race regenerated [ἀναγεννᾶν] by Himself through water and faith and wood, containing the mystery of the cross." Here christological and regeneration terminology tend to coincide, as is also the case in *I John 5:18*, where "He who was born of God" keeps "any one born of God." Thus some of the development toward the term "regeneration" may be reflected in or derive from the designation of Jesus as "first-born of the dead" (*Col. 1:18*; *Rev. 1:5*; cf. *Rom. 8:29*), and in the concept of Jesus' being "begotten" at his baptism (*Luke 3:22 D*; cf. *Mark 1:11* and parallels) or resurrection (*Acts 13:33*; *Heb. 1:5*; *5:5*; cf. *Acts 2:24*; *Rom. 1:4*; *Heb. 7:28*), in which the believer shares at his regeneration (see also *NEW MAN*). On the other hand, a preference for the traditional language of the kerygma in describing one's own experience may partially account for the delay in introducing the term "regeneration"—e.g., in the case of Paul.

d. The original eschatological setting. In *I Pet. 1:3-7* the significance of "regeneration" is expressed in terms of the eschatological message of primitive Christianity: One is born again to a "living hope . . . and to an inheritance which is imperishable, undefiled, and unfading, kept in heaven for you, who by God's power are guarded through faith for a salvation ready to be revealed in the last time, . . . at the revelation of Jesus Christ." Thus one is reborn into eschatological existence (1:20), so that in Christ one's relation to the old regime is that of suffering, and to the consummation that of joy. It is a life of faith, not sight (1:8); of ethical responsibility, not presumption (1:17). Similarly, the "sure saying" in which "regeneration" occurs in Titus conforms to the "then . . . now" pattern, with the appearance of Christ as the turning point to which regeneration unites us, so that we "become heirs in hope of eternal life." Yet here the relation to the Parousia has disappeared, and the emphasis falls upon salvation already attained through the divine epiphany. This development is even more apparent in the Johannine literature, where regeneration achieves eternal life now. Yet in *John 3:3, 5*, the earlier language of seeing or entering the kingdom of God occurs, and it is apparent that this saying on regeneration has developed out of the original eschatological message of Jesus (*Mark 10:15* and parallels). Apart from this saying, Justin likewise neglects the original eschatological context for interpreting regeneration, and yet reveals this context by his return to earlier baptismal categories (cf. *John the Baptist and Acts*), in

viewing regeneration in terms of repentance and the remission of sins (*Apol. I.61.2, 10*; *66:1*), which in *Dial. 138.3* is given its original significance: "escape from the impending judgment of God."

2. The development of the regeneration experience. a. Jesus. The baptismal and eschatological settings into which the term "regeneration" was introduced, as well as the specific recurrence of language from the eschatological preaching of John the Baptist and Jesus, indicate that the initial meaning of the regeneration experience was in terms of Jesus' basic pattern: "Repent, for the kingdom of God is near." The imminence of the kingdom of God called forth a complete break with the old and a radically new beginning. One way to convey this message was to pronounce the blessing of eschatological existence upon those who in one way or the other represented existence outside the present regime: the poor and hungry (*Luke 6:20-23* and parallel), the tax collectors and harlots (*Matt. 21:31-32* and parallel), the afflicted (*Matt. 10:7-8* and parallel; *11:4-6* and parallel; *Luke 4:18-19*; *14:21*), the demoniacs (*Matt. 12:28* and parallel), and the children: "Unless you turn and become like children, you will never enter the kingdom of heaven" (*Matt. 18:3* and parallels). "Turn and become" may reflect a Semitic idiom meaning "become again" (cf. the form of the saying in *Clement of Alexandria, Exhortation IX.82.4*: ἦν γὰρ μὴ αὐθις ὡς τὰ παῖδια γένησθε καὶ ἀναγεννηθῆτε). Yet the legitimacy for the subsequent use of this saying to introduce the term "regeneration" (*John 3:3, 5*; *Just. Apol. I.61.4*) lies in the radicality of the eschatological repentance for which it and the other illustrations called, not in the assumption of a specific theological interpretation of repentance in terms of rebirth by Jesus.

b. Jas. 1:18. The Jewish direction for developing theologically such an illustration as Jesus provided is evident in the somewhat similar rabbinic comparison of the new proselyte with a newborn child (from *Rabbi Jose ben Halaphtha*, mid-second century A.D., on). The comparison is not between conversion and birth, but, as the use of the saying indicates, between a child who has no past and a proselyte radically separated from his past—both have a completely new existence. The Jewish idea of creation and eschatological re-creation provided the theological context for conversion, as in the similar saying of *Rabbi Jose ben Zimra* (third century), that he who converts a Gentile "is as if he had created him." This is true even where the idea of birth is employed: "I make you a new creature, like a woman who is pregnant and gives birth" (*Rabbi Judah bar Simon*, fourth century, using *Exod. 2:2* to interpret *Exod. 4:12*). Here we have a formal analogy to *Jas. 1:18*, where the somewhat difficult expression: "He brought us forth" (ἀποκύειν), perhaps suggested from *1:15*, is explained: "that we should be a kind of first fruits of his creatures"; for God's fatherhood is that of Creator (vs. 17). Thus this verb of birth, in spite of similarities in its context to NT regeneration passages, has not yet produced a doctrine specifically of "regeneration," or of the mystical traits usually accompanying it; such a development of the term does take place in *Clement of Alexandria Instructor I.6.42, 45*, where the concept of birth dominates the presentation and ἀποκύειν = ἀναγεννᾶν.

In the Epistle of Barnabas 6:11-19; 16:8 one finds the same preference for Jewish terms of creation in describing regeneration as in James, although the terminology and understanding have moved noticeably nearer to that of Paul and I Peter. "Since then he made us new [ἀνακαινίζειν] by the remission of sins he made us another type, that we should have the soul of children, as though he were creating us afresh [ἀναπλάσσειν]." As in I Pet. 2:2, comparison is made (6:17) to the child's diet of milk (prophesied in Exod. 33:3), which is the "word," "his word of faith" (16:9), as in Jas. 1:18, 21; I Pet. 1:23-25, by which "God truly dwells in us" (16:8-10; cf. 6:15). The nearest terminological approach to "regeneration" is in 16:8: "When we received the remission of sins, and put our hope on the Name, we became new, being created again from the beginning [ἐγενόμεθα καινοί, πάλιν ἐξ ἀρχῆς κτιζόμενοι]."

c. **Paul.** Paul also uses the Jewish concept of creation rather than that of birth to designate regeneration, when he describes it as "new creation" (II Cor. 5:17; Gal. 6:15; cf. Eph. 2:10, 15; 4:24; Col. 3:10), and here too the eschatological radicality of primitive Christianity is apparent: "The old has passed away, behold, the new has come" (II Cor. 5:17). But when in Gal. 6:14 this is expressed in terms of Jesus' cross, "by which the world has been crucified to me, and I to the world," it is apparent that union with Christ has become a new category for describing regeneration. This is effected at baptism (Rom. 6:3-11; Gal. 3:27; Col. 2:11-13): "Baptism into Christ Jesus" means "baptism into his death," "crucifixion of our old self with him so that the sinful body might be destroyed," "burial with him"; to this "putting off the body of flesh in the circumcision of Christ" there corresponds "putting on Christ"—"being raised [or made alive together] with him," so as to be "alive to God in Christ Jesus" and "walk in newness of life" (cf. Tit. 3:5). The resulting regenerate life can be described mystically as "Christ living in me" (Rom. 8:10; II Cor. 13:3, 5; Gal. 2:20; Phil. 1:21; Col. 1:27; 3:4, 11; cf. Eph. 3:17), or, somewhat similarly, as bearing already the eschatological Spirit (I Cor. 12:13, etc.), or glory (II Cor. 3:18), or inner man (II Cor. 4:16). Paul can in a mixed metaphor speak of his birth pangs until Christ is formed in the believers (Gal. 4:19; cf. Rom. 8:22), and of his "begetting" (γενῶν) his converts (I Cor. 4:14-15; Philem. 10; cf. II Cor. 6:13; I Thess. 2:11); and in an allegory on Sarah and Hagar he contrasts the Jerusalem above as our "mother" with Mount Sinai "bearing children for slavery" (Gal. 4:24-26). In this context Paul can say (vs. 29): "As at that time he who was born according to the flesh persecuted him who was born according to the Spirit, so it is now." Yet he explains sonship to God only in terms of adult "adoption" to eschatological "heirs" (Rom. 8:14-23; Gal. 3:26-4:7; cf. Tit. 3:7; I Pet. 1:4). The mystic experience itself is described as "transformation" (II Cor. 3:18), by which the final resurrection "form" of Christ (Rom. 8:29) can, in view of the inbreaking new age (Rom. 12:2), be received now (Gal. 4:19). This concept is parallel to that of regeneration in Hellenistic literature, as is also evident, e.g., in the Euchologion of Serapion 19.3: "Form all those who are being regenerated (with) thy divine and inexpressible

form"; in Rom. 12:2 "transformation" is synonymous with "renewal," which is then in Tit. 3:5 identified as "regeneration." See NEW BIRTH.

Thus Paul attains in his concept of "transformation" the basic ingredients of the NT concept of "regeneration": the movement from Jewish terms into the more mystic categories characteristic of Hellenistic religiosity, and the persistence within these categories of the basically eschatological understanding of Christian existence. According to this understanding, regenerate life is lived out of the future—i.e., is transcendent—and thus is characterized by hiddenness (Col. 3:3-4; cf. I Pet. 1:4-5) rather than worldly demonstrability (I Cor. 12-14); by the continuing paradox of life in death to the present evil aeon, rather than in worldly success (contrast, e.g., I Cor. 4:11-13; II Cor. 1:8-9; 4:8-12; 6:8-10, with I Cor. 4:8-10); and by the ethical commitment to "be what you are" in Christ (Rom. 6:11-13; 12:1-2; 13:12-14; Gal. 5:24-25; Col. 3:1-17; etc.), rather than by any presuming upon an acquired status (I Cor. 10:1-12). The same is true in I John, where the triumphant indicative that those who are "begotten of God" do not, cannot, sin (3:9; 5:18), but do "overcome the world" (5:4), can be expressed inversely: it is those who do righteousness (2:29), love (4:7), and believe that Jesus is the Christ (5:1), who are "begotten of God"; both forms of expression are used for exhortation, and are parallel to the confession and forgiveness of sin (1:7-2:3).

REHOB rē'hōb [רחוב, רחוב, spacious area, market]. 1. The father of Hadadezer, king of Zobah (II Sam. 8:3, 12).

2. A signatory of the covenant made in the days of Nehemiah (Neh. 10:11).

E. R. ACHEMEIER

3. See BETH-REHOB.

4. A border town in Asher (Josh. 19:28, 30), assigned to the Levites (Josh. 21:31; I Chr. 6:75—H 6:60), whose Canaanite inhabitants Asher was unable to drive out (Judg. 1:31). It is perhaps to be identified with Tell el-Gharbi (or Berweh), located ca. seven miles E-SE of Acco in the plain. The site, which dominates an important road to the interior, was occupied in the Middle Bronze, Late Bronze II, Iron I, and Hellenistic-Roman periods.

G. W. VAN BEEK

REHOBOAM rē'āḇām [רחבעם, may the people expand; NT Ροβοάμ]; KJV NT ROBOAM rō-bō'ām. King of Judah ca. 922-905 B.C.; son and successor of Solomon; first king of the S after the disruption of the kingdom at Solomon's death.

In the LXX the name appears as Ροβοάμ, presumably on the basis of the contemporary "Jeroboam" of the N; hence the English "Rehoboam." It is equally possible, however, that "Rehoboam" provided the model for "Jeroboam," and that both are throne names. The emphasis on the power of the people as against that of the king may be deliberately intended by the use of the names. The verbal element is רחב, "to be widened" or "to expand"; or it may be an Arabic root meaning "to be generous." The element ׀ means "people"; or it may refer to the god Amm, or "the (divine) kinsman, or protector, or uncle." The latter meaning is unlikely.

Rehoboam became king at the age of forty-one and reigned seventeen years (I Kings 14:21; II Chr. 12:13). The Chronicler adds that he "was young and irresolute and could not withstand" Jeroboam and his followers at the time of the Disruption (II Chr. 13:7). Doubtless this refers to the "young men" (I Kings 12:8; II Chr. 10:8), whose advice Rehoboam

followed. The problem of chronology is exceedingly complicated (see CHRONOLOGY OF THE OT). In the light of the available evidence, both biblical and extrabiblical, a date ca. 922 seems most reasonable for Solomon's death and Rehoboam's accession. If this date is correct, it appears likely that Rehoboam reigned only some eight years. His mother was Naamah the Ammonitess.

He came to the throne at a very difficult time. Solomon had ruled as a despot, and as a result had roused bitter resentment, especially among the N tribes. The forced-labor system (the hated *corvée*) in particular ran counter to the spirit of the freedom-loving Israelites. Closely allied to this was Solomon's attempt to break the old tribal spirit by dividing the land (with the exception of Judah, which seems to have received preferential treatment in this regard) into twelve roughly equal administrative districts. It is possible that Judah had already been divided up into administrative districts by David. This scheme was, no doubt, devised in order to facilitate the collection of taxes. In many ways it disregarded completely the old tribal boundaries. Solomon seems to have been able to keep the people in subjection; at least they refrained from open rebellion during his lifetime. A smoldering resentment, however, was burning, and it came to a head at Solomon's death. Presumably Rehoboam had already been crowned king at Jerusalem (I Kings 12:6, 12b-13, 15). But this did not satisfy the N part of the country. "All Israel" (I Kings 12:1; II Chr. 10:1)—the reference must be only to the N tribes—gathered together at Shechem, the cultic center of the old N amphictyony, to make Rehoboam king, and there he came in person. Before he was accepted, however, the people demanded a lightening of the crushing load imposed upon them by Solomon. Rehoboam consulted with his father's old advisers. The key word in their reply was the word "serve" (I Kings 12:7). A leadership of service of this kind, however, had no appeal for Rehoboam, who then took counsel with the young men, his intimates and associates, who said: "Thus shall you speak to this people . . . , 'My father chastised you with whips, but I will chastise you with scorpions'" (I Kings 12:9-11; II Chr. 10:9-11). This advice Rehoboam chose to follow and his harsh answer meant the revolt of the N. The once proud empire of David and Solomon was no more.

Rehoboam's reaction to the assertion of independence revealed a high degree of irresponsibility. He sent Adoram (I Kings 12:18) or Hadoram (II Chr. 10:18) or Adoniram (I Kings 4:6), "taskmaster over the forced labor," to head off the incipient revolt. The people stoned him to death. In fear for his life, the king mounted his chariot and fled to Jerusalem, where he gathered together "all the house of Judah, and the tribe of Benjamin, a hundred and eighty thousand chosen warriors [the figures cannot be accepted as reliable], to fight against the house of Israel, to restore the kingdom to Rehoboam the son of Solomon" (I Kings 12:21; II Chr. 11:1). The planned campaign did not materialize, for, through the intervention of Shemaiah (I Kings 12:24; II Chr. 11:4), the men of Judah and Benjamin returned home.

Jeroboam probably appealed for help to the

Pharaoh Shishak of Egypt, whose protégé he had been for many years (I Kings 11:40), and Rehoboam's army apparently disbanded because of an unmistakable warning from Egypt that reprisals would follow the contemplated attack. Yet, "there was war between Rehoboam and Jeroboam continually" (I Kings 14:30; II Chr. 12:15). The reference here is in all probability to border warfare. It would appear that the territory of Benjamin was included in the S kingdom, while the former Danite territory was divided between the two kingdoms.

The Chronicler records that Rehoboam began to build cities for defense in Judah (II Chr. 11:5-12). Of the fifteen cities mentioned, none was in the territory of Benjamin (cf. vs. 10, 12*b*). The section interrupts the connection between vs. 1-4 and 13-17, and it cannot be assumed from its present position that the events described took place near the beginning of Rehoboam's reign. The Chronicler noted the fortress building prior to Shishak's invasion because he considered the loss of the fortresses as one of the punishments for Rehoboam's disloyalty to Yahweh (II Chr. 12:4). There are strong grounds, however, for the view that the building of the fortresses took place after the Egyptian invasion, as a direct result of it.

The list of towns named is interesting in view of their locations. The first four were to the E of Judah, the next four to the SW, the next three to the S, the next three to the NW, with Hebron by itself. No mention is made of fortress building to the N, apart from Aijalon. But perhaps this was not possible because of continuous border warfare. Does this list of cities represent the limits of Judah at this time? This is possible, especially if the time was after the Egyptian invasion. Noteworthy is the fact that such a boundary line would exclude the territory of Simeon, and might explain the later reference to this territory in the reign of Asa as being outside Judah (II Chr. 15:9). The more probable view, however, is that this list represents only the fortresses built by Rehoboam. There were also other fortresses which belonged to the time of Solomon. It is further to be noted that though the fortresses are said to have been very strong, there is no mention of horses and chariots.

The biblical account (I Kings 14:25-26; II Chr. 12:2-9) gives but meager information in regard to the invasion of SHISHAK. Fortunately, however, he himself has preserved details on the walls of the great Karnak temple in Upper Egypt. These indicate both the extent and the ferocity of the invasion. Not only was Judah involved, as Kings and Chronicles seem to imply, but also Philistia, the N kingdom as far N as Megiddo, Transjordan, and even Edom as far S as Ezion-geber, which seems to have been destroyed at this time. The suggestion that the list should be read boustrophedon (the alternation of lines from left to right and right to left) may be expected to produce interesting results and provide further details of the campaign. It seems clear from the available evidence that a strong and united Israel stood in the way of Egypt's revived dream of empire, and even before Solomon's death Shishak may have begun to plot against him. This would explain his receiving at his court the exiles Hadad the Edomite and Jeroboam the son of Nebat (I Kings 11:14-40). Shishak himself had been a Libyan noble, and his army was com-

posed of barbarian troops from Libya and Ethiopia (II Chr. 12:2 ff). They wrought widespread devastation everywhere. One hundred and fifty places are named on the great Karnak Inscription as having been taken. This picture has been confirmed by archaeology. Such towns as Debir and Ezion-geber were destroyed at this time. A fragment of a stele bearing the king's name was found at Megiddo. The great fortifications at Sharuhén, SE of Gaza, may indicate that Egypt used this place as a base of operations for the invasion. Jerusalem itself was not captured, but a very heavy tribute was imposed on the land.

As a result of this experience Rehoboam set about fortifying his kingdom. Most of the fortresses named commanded approaches from the S and the W. It seems clear that further attacks from Egypt were expected, but with Shishak's death (*ca.* 914) these did not materialize. It is possible that remains of Rehoboam's fortifications have been found at LACHISH and at AZEKAH.

The Chronicler records that Judah was strengthened considerably by the arrival of the priests and Levites from the N, who had been deprived by Jeroboam of their means of livelihood (II Chr. 11:13-17). They were accompanied by "those who had set their hearts to seek the Lord God of Israel." For three years, under their influence, Judah prospered. Then Rehoboam forsook the law of the Lord, and punishment came upon him in the form of an Egyptian invasion of the land. This took place in Rehoboam's fifth year, *ca.* 918 (I Kings 14:25; II Chr. 12:2). The Chronicler's picture is clearly dependent upon his viewpoint. Shishak's invasion occurred in the fifth year of the king. This must have come as the result of disloyalty to Yahweh. Such disloyalty belonged therefore to the fourth year of his reign. For his first three years he was loyal. The picture which the Deuteronomist presents is very different (I Kings 14:22-24). It is clear that the pagan influences for which Solomon was largely responsible continued during Rehoboam's reign. These affected worship both in the temple and throughout the land. In this connection it is to be noted that the king's mother was an Ammonitess. Specific mention is made of the construction of high places, pillars, and Asherim. In addition, there were male cult prostitutes in the land. Rehoboam's reign was characterized by religious perversions (cf. II Chr. 12:14).

The section dealing with Rehoboam's family (II Chr. 11:18-22) has no parallel in Kings, and raises a difficult problem. Of the king's eighteen wives only two are named—Mahalath and Maacah the daughter of a certain Absalom (probably not David's son; II Sam. 14:27; 18:18). He preferred the latter, and intended to make her eldest son, Abijah, king in his stead. The Chronicler gives the name of Abijah's mother as Micaiah the daughter of Uriel of Gibeah (II Chr. 13:2). The two statements are often harmonized by changing "Micaiah" to "Maacah" on the evidence of some of the versions, and assuming that Uriel of Gibeah was Tamar's husband. The problem is complicated still further by the evidence of Kings, which makes Maacah the daughter of Abishalom the mother of both Abijah and Asa (I Kings 15:2*b*, 10*b*), and yet claims Asa as Abijah's

son (vs. 8b). It seems best to consider Micaiah the daughter of Uriel of Gibeah as the mother of Abijah, and Maacah the daughter of Absalom (or Abishalom) as the mother of Asa, and to regard the section II Chr. 11:18-23 as coming from another source which was later inserted in Chronicles. It is difficult to account satisfactorily for these verses in their present context. The same judgment of another source is true also for II Chr. 12:13-14, which runs counter to the Chronicler's representation of Rehoboam as a young man (13:7).

As his source the Chronicler names the "chronicles of Shemaiah the prophet and of Iddo the seer" (II Chr. 12:15). Of such a prophetic work—others of similar nature are mentioned later—nothing is known.

H. B. MacLEAN

REHOBOTH rī hō'bōth [רחבות, broad places].
1. See REHOBOTH-IR.

2. The name of one of the wells dug by Isaac and his men in the Valley of Gerar (Gen. 26:17-22). After the Philistines had appropriated for themselves the first two wells, the third one resulted in no quarrel, so the name Rehoboth, signifying enough room for all, was given to it. There are several large wells, or cisterns, at Ruheibeh, ancient Rehoboth, ca. nineteen miles SW of Beer-sheba. Though these date from the Byzantine period, the patriarchs, using even more rudimentary tools, undoubtedly dug similar cisterns in the rock in their day.

3. An Edomite city, home of King Shaul (Gen. 36:37; I Chr. 1:48). The RSV translation, "on the Euphrates," for the more literal "on the river" is confusing, since the reference here is to a place, not in Mesopotamia, but probably somewhere in N Edom, as yet unidentified.

Bibliography. N. Glueck, *Explorations in Eastern Palestine*, vol. II, *AASOR*, 15 (1934-35), 100-10; F.-M. Abel, *Géographie de la Palestine*, II (1938), 435. V. R. GOLD

REHOBOTH-IR rī hō'bōth Ir' [רחבת עיר] (Gen. 10:11); KJV THE CITY OF REHOBOTH. A city in Assyria between Nineveh and Calah, built by Ashur. No such city name is known from the cuneiform sources. Since *rehōbhōth* means "open space" and *ir* means "city," the term has been compared with the cognate Assyrian *rebūt ali*, "open spaces in a city," "square," "unbuilt area"; and specifically with *rebūt Ninua*, by which the Assyrians designated unbuilt

areas on the periphery of Nineveh. It is conceivable that instead of Rehoboth-Ir, "the city 'Open Spaces,'" the text of Gen. 10:11 originally read "the open spaces of the city" and referred to peripheral sections of the city of Nineveh, which is mentioned immediately before.

T. JACOBSEN

REHUM rē'om [רחום, hypocoristic for (the Deity) has been merciful; Apoc. 'Ράθυμος (I Esd. 2:16-30; perhaps erroneously for 'Ράουμος), 'Ροῦμος (I Esd. 5:8)]; KJV Apoc. RATHUMUS rā thōō'mas (I Esd. 2:16-30), ROIMUS rō'ī mas (I Esd. 5:8). 1. One of those whose names head the list of exiles returned from Babylon with Zerubbabel (Ezra 2:2; I Esd. 5:8). In Neh. 7:7 the name is Nehum (נְחֻם), probably a scribal error.

2. An official in the Persian government for the province "Beyond the River" (Trans-Euphratia), which included Palestine. With one Shimshai the scribe, he cosponsored a letter to King Artaxerxes opposing the rebuilding of Jerusalem by the Jews after the Exile (Ezra 4:8-16). With a supporting reply from the royal court, he and Shimshai, with their associates, forced the work to a halt (vss. 17-24; cf. I Esd. 2:16-30).

Bibliography. R. A. Bowman, *Exegesis of Ezra*, IB, III (1954), 599-600.

3. A Levite, son of Bani; one of those who aided Nehemiah with the repair of the Jerusalem wall (Neh. 3:17).

4. One of the chiefs of the people, signatory to the covenant of Ezra (Neh. 10:25); possibly related to 1 above.

5. A corruption of HARIM 1 (Neh. 12:3).

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), pp. 38, 187. B. T. DAHLBERG

REI rē, rē'ī [רעי, friendly(?)] (I Kings 1:8). A Judean officer who sided with Solomon in the struggle for David's throne. Variants in the ancient versions include "his [Shimei's] friends" and "David's friend" (i.e., Shimei); but the MT is preferable.

J. M. WARD

REINS. See KIDNEYS; BIT.

REJOICE. See JOY.

REKEM rē'kam [רקם, friendship]. 1. One of the five kings of Midian who were slain by Moses and the people of Israel in obedience to the command of Yahweh (Num. 31:8; Josh. 13:21). According to the narrative, the war was one of Yahweh's vengeance upon Midian because the Midianites had beguiled the Israelites into worshipping Baal-peor and because Zimri of the tribe of Simeon had taken as a wife Cozbi, the daughter of a Midianite prince (cf. Num. 25)—both acts of apostasy. However, as it stands in the Priestly Code, the narrative serves primarily to furnish a precedent for the law regulating the distribution of booty.

2. A descendant of Caleb; a son of Hebron; and the father of Shammai (I Chr. 2:43-44).

3. A city within the territory allotted by Joshua to the tribe of Benjamin. Its location still remains uncertain (Josh. 18:27).

E. R. ACHEMEIER

RELEASE, YEAR OF. A name mistakenly applied in practically all English versions of the Bible to the **SABBATICAL YEAR**, based upon an incorrect translation, which originated with the **LXX**, of the Hebrew verb שָׁמַט and its derivative noun, שְׁמִטָּה in Deut. 15: 1-3, 9; 31:10. The Vulg. renders שְׁמִטָּה more justifiably as "remission." Far more correct would be the designation, not of the Sabbatical Year, but rather of the Jubilee Year (see **JUBILEE, YEAR OF**) as the Year of Release, based upon its function as the year of the proclamation of לְרֵוֹי, "liberty throughout the land to all its inhabitants" (Lev. 25:10), and the specific name, שְׁנַת הַרְרֹוֹי, the "Year of Liberty" (Ezek. 46:17) and its function as the year of liberty or release of Jews enslaved to fellow Jews, and also of release or restoration of property held in temporary possession by one Jew to its original Jewish owner or his family.

J. MORGENSTERN

RELIGION [θρησκεία (*alternately* WORSHIP); θεοσέβεια (KJV GODLINESS); εὐσέβεια (*alternately* PIETY; GODLINESS; GODLY LIFE; KJV GODLINESS; HOLINESS); ἰουδαϊσμός (Gal. 1:13-14 KJV; RSV JUDAISM)]. The words translated "religion" are used almost exclusively in the later, more Hellenistic NT writings, to refer (a) to the practice of the (proper) religious observances or patterns of worship—i.e., to correct cultic behavior; (b) to a recognized structure of religious-ethical behavior, covering all man's duties to God and man; and (c) especially in the Pastorals, to obedience to the Christian faith conceived as a deposit and a discipline.

The infrequent use of "religion" in the Bible is due to the fact that the concept of "religion" is itself alien to the core of biblical thought. The basic meaning of faith to the Hebrew is the concrete response of the whole man to God's call and obedience to his command, not intellectual acceptance of a body of truth or even correct observance of special cultic acts. Primary for faith is man's relation to God, not his relation to faith structure or cult practice.

The introduction of the general concept of "religion" into the late NT writings meant the weakening, if not the abandonment, of the revelation character of Christianity. "Religion," now meaning the Christian religion, becomes a system of doctrine, an organization, an approved pattern of behavior and form of worship.

Thus the primary importance of the term "religion" in the NT is in its pointing to the shift which was taking place in the Hellenistic churches, from the Hebrew understanding of faith as concrete obedience of the whole man to God, to faith as an ecclesiastically approved system of doctrine, worship, and behavior.

F. D. GEALY

REMAIAH rēm'ā'li'ah [רמליהו]. The father of the Israelite usurper Pekah (II Kings 15:25, etc.).

REMEMBRANCE. See **MEMORIAL.**

REMETH rē'mīth [רמת]. A border town in the territory allotted to Issachar (Josh. 19:21). It is probably the same as **RAMOTH** in I Chr. 6:73—H 6:58 and **JARMUTH** in Josh. 21:29, which are variants of the name of a Levitical town in this territory.

G. W. VAN BEEK

REMISSION. See **FORGIVENESS.**

REMMON. KJV alternate form of **RIMMON** 3-4.

REMMON-METHOAR rēm'mən mēth'ō'ār. KJV translation of רמון המתאר (Josh. 19:13). See **RIMMON** 4.

***REMNANT** [שאר, שארית, and other words derived from the roots שלט, שרר, and יתר; λείμμα, ὑπόλειμμα]. The portion of a community which is left, in the case of a devastating calamity; the portion upon which the possible future existence of the community depends.

In the secular realm, passages such as Josh. 10:40; II Chr. 20:23-24; Jer. 50:26 illustrate the principle of total destruction in which there is to be no remnant (see **BAN**); and Gen. 32:7-8—H 32:8-9; Judg. 21:16-17, the meaning of "remnant" as bearer of the further existence of a community. The theological use of the term develops where there is mention of the judgment of the holy God on everything sinful and ungodly; where one is also aware, however, of the compassionate mercy of God, who remains faithful to his work of salvation and permits a remnant to escape from the judgment. The concept "remnant" includes, accordingly, not only a destructive but also a constructive meaning. It refers to the judgment passed but at the same time to its merciful limitation by God's free grace. The accent can be placed differently, according to the circumstances: Isa. 17:6 shows an ironic use of the term "remnant" as a threat; Mic. 5:7-8—H 5:6-7, its paradoxically exaggerated promissory character in the proclamation of salvation.

In the history of the biblical concept of a remnant is mirrored a long trail of faith in salvation, from the early narrators through the prophets and apocalyptic writers, down to Paul in Rom. 9:11. Even the author of the J document speaks of the merciful deliverance of a remnant of the bearers of the promise from the destructive divine judgment: Noah in the Flood (Gen. 6:5-8; 7:1, 23); Lot in the destruction of Sodom (18:17-33; 19:1-29; cf. 45:7). The story of Elijah reveals the belief in the existence of a remnant of seven thousand who are true to Yahweh in Israel (I Kings 19:17-18).

Amos seems to assume on the part of his opponents a popular remnant idea bearing the stamp of eschatological salvation, when, in the face of their objections, he treats with irony or bitterly attacks every self-confident remnant hope (Amos 3:12; 5:3; 6:9; 9:1). Israel cannot simply equate itself with the remnant. Nevertheless, there remains also in his thinking for those who seek Yahweh and the good, the possibility that they may survive the judgment as a remnant (5:4, 6, 14-15). To be sure, all self-assurance is qualified by the "may be" (5:15), which makes salvation ultimately depend on God's free grace.

While the idea of a remnant is not found in Hosea, it plays a significant role in the case of Isaiah (7:3)

and his disciples (4:2 ff; 10:20-22; 11:10-16; 28:5; 37:32). As in the case of Amos, it belongs first of all in the proclamation of judgment (10:19; 17:5-6; 30:17; cf. 1:8). However, the name Shear-jashub, "A remnant shall repent" (7:3; see SHEAR-JASHUB; REMNANT SHALL RETURN, A), which was given to the eldest son of the prophet, proclaims and guarantees that a remnant will return to God. Prerequisite for this return are conversion and faith (7:9):

If you will not believe,
surely you shall not be established.

But it is God alone who permits the remnant (1:9). Nowhere does Isaiah say with sufficient clarity who will belong to the remnant. One may probably reckon among them him (6:7), his children and disciples (8:18), and the "afflicted of his people" who find refuge in Zion (14:32).

A fully developed remnant expectation is found in Zephaniah. He identifies the remnant with the poor and humble, both in his admonition (2:3):

Seek the LORD, all you humble of the land,
who do his commands;
seek righteousness, seek humility;
perhaps you may be hidden
on the day of the wrath of the LORD;

and in the promise (3:12-13):

For I will leave in the midst of you
a people humble and lowly.
They shall seek refuge in the name of the LORD,
those who are left in Israel.

As in Isaiah, it is God's act which creates the remnant; with it, justice is re-established (Zeph. 3:13). The remnant, as a spiritual Israel, is clearly differentiated from the political Israel.

Jeremiah and Ezekiel give up any claim to the traditional remnant concept in their proclamation of a total judgment (Jer. 8:3; 15:1-3; Ezek. 5:1-2; 15:7). In the vision of the two baskets of figs (Jer. 24) Jeremiah proclaims the final judgment upon "Zedekiah the king of Judah, his princes, the remnant of Jerusalem who remain in this land, and those who dwell in the land of Egypt" (vs. 8), while the "exiles from Judah" (vs. 5) are to be replanted and built up anew. It is significant that the term "remnant," which still expresses too strongly the continuity in the history of the people, is not expressly used for these people, though the ideas related to it are—ideas which, to be sure, find their fulfilment only after the national death. In the case of Ezekiel, who himself suffers severely under the ruthless proclamation of judgment (Ezek. 9:8; 11:13), the escapes from the catastrophe of Jerusalem will be the only proof of the suitability of the judgment (14:21-23). Like Jeremiah, he anticipates the function of the remnant of the exiles (11:14-20), but without applying the term "remnant" to them, as is done in Isa. 46:3.

The postexilic community can call itself the remnant which was left (Hag. 1:12-14; 2:2; Zech. 8:6, 11-12; Ezra 9:8, 14-15; Neh. 1:2-3). Moreover, the remnant continues as a future greatness in numerous promises of salvation from the period after the catastrophe of Jerusalem, promises which cannot be more accurately dated (Supplements to Isaiah: 4:2; 10:20-22; 11:11-16; 28:5-6; 37:32; to Jeremiah: 23:3; 31:

7bγ; to Obadiah: vs. 17; to Micah: 2:12-13; 5:7-8—H 5:6-7; 7:18; to Zephaniah: 2:7, 9). In Zech. 9:7; 14:16 the promise also applies to heathen nations or their remnant.

On the topic of the continuation of the idea of the remnant in the late Jewish apocalyptic writings, cf., e.g., Enoch 83:8; II Esd. 12:34; 13:48; II Bar. 40:2; Sibylline Oracles 5:384. In the NT the idea plays an important role in Paul's discussion of the course of God's salvation in Rom. 9-11 (see 9:27; 11:5). See also CHURCH, IDEA OF; ISRAEL, NAME AND ASSOCIATIONS OF; PEOPLE OF GOD.

REMPHAN. KJV form of REPHAN.

RENDING OF GARMENTS. See MOURNING.

***REPENTANCE.** The translation of several words expressing a variety of ideas, ranging from (a) a change of mind, (b) the feeling of regret or remorse, to (c) repentance in the ethico-religious sense, turning away from sin and back to God. The last of the three is most prominent and most significant in the Bible. The emphasis may rest on the negative side, of turning away from SIN, disobedience, or rebellion; it may also fall on the positive side, the turning back to God, the beginning of a new religious or moral life.

1. **Terminology.** The commonest term for "repentance" in the OT is שׁוּב, "turn back" (Jer. 8:4; Ezek. 33:19), which occurs frequently in the Prophets. Less common is נָחַם, "to be sorry, repent" (Exod. 13:17; Ps. 106:45). The LXX translates שׁוּב by ἐπιστρέφω, "turn about," and ἀποστρέφω, "turn back." נָחַם is translated by μεταμέλομαι, "to change one's mind," and by μετανοέω, "repent." The NT does not follow the practice of the LXX, but uses μετανοέω to render the thought-content of שׁוּב; this usage has support in other Greek translations of the Hebrew Bible and in Hellenistic Judaism.

In the NT the verb μετανοέω, "repent," occurs thirty-two times (Matt. 3:2; 4:17; 11:20; etc.); the noun μετάνοια, "repentance," twenty-two times (Matt. 3:8; Mark 1:4; Luke 3:3; etc.); the verb μεταμέλομαι, "to change one's mind, repent," six times. The verb ἐπιστρέφω is used sixteen times in the sense "turn back, be converted" (Matt. 13:15; Luke 22:32; Acts 15:19; I Pet. 2:25); and the noun ἐπιστροφή, "turning back, CONVERSION," occurs in Acts 15:3.

2. **In the OT.** Israel owes obedience to God, falls under judgment when it strays, and can only recover

his favor by renouncing sin and turning back to him. Defeat in warfare or failure of harvest is understood as a manifestation of the divine wrath and becomes an occasion for repentance. There are days of national repentance, such as that described in Neh. 9. An individual may also experience judgment and turn back to God, as Ahab does after Elijah denounces him (I Kings 21). There is a ritual of repentance: the rending of one's clothing, fasting, putting on sackcloth, sitting in ashes. There are liturgies of repentance; notable examples are preserved in Isa. 63:7-64:12; Dan. 9:4-19; Hos. 6; 14.

The prophets emphasize that man's relation to God is personal, and that sin roots in a wrong relationship to God. Repentance also is personal: it is a reorientation of the entire person and a return to Yahweh. Genuine repentance leads to obedience, unqualified trust in God, rejection of all idols, and refusal to lean upon human help. The growth of the personal understanding of sin and repentance is accompanied by criticism of religious formalism (Hos. 6:6; Amos 5:21-24). Repentance is renewal of life; it demands a new heart and spirit (Ezek. 18:31). It is a human possibility because it is the result of the divine redemption (Isa. 44:22; Jer. 31:33; Ezek. 11:19; 36:26).

3. In the NT. John the Baptist continues the prophetic demand for repentance: "Bear fruit that befits repentance . . . Every tree . . . that does not bear good fruit is cut down and thrown into the fire" (Matt. 3:8, 10). A new development is his relating of repentance to the imminent kingdom of God and to a BAPTISM granting FORGIVENESS of sins.

The preaching of Jesus resembles that of John the Baptist. Repentance is necessary for life under the kingly rule of God (Mark 1:15; Luke 13:1-3). It involves the total person: "The tree is known by its fruit" (Matt. 12:33); "Cleanse the inside of the cup and of the plate, that the outside also may be clean" (Matt. 23:26; cf. Mark 7:15). But he deepens the prophetic demand in his interpretation of the inwardness of sin (Matt. 5:28); by his insistence on the second mile (vs. 41) and love to enemies (vs. 44); and by the radical rejection of everything that hinders return to God (Matt. 5:29; 6:19; 7:13; Mark 3:31-35; 10:21): "Whoever of you does not renounce all that he has cannot be my disciple" (Luke 14:33). Repentance means becoming another person: "Unless you turn and become like children, you will never enter the kingdom of heaven" (Matt. 18:3). Entrance to the kingdom is for the poor in spirit, the receptive, the small and helpless. He offends the Pharisees by his associations with tax collectors and sinners and even more by his theological justification of his conduct: "I have not come to call the righteous, but sinners to repentance" (Luke 5:32).

The new element in Jesus' preaching of repentance appears at this point. The prophets know that God must give the sinner a new heart and spirit. Repentance in the deepest sense is beyond human powers. They look forward to the time when God will perform the miracle of raising men from the valley of dry bones (Ezek. 37). Jesus announces that the time has come: "The time is fulfilled, and the kingdom of God is at hand; repent, and believe in the gospel" (Mark 1:15). Repentance is no longer only

demand; it has become possibility, for what is impossible with men is possible with God (10:27). Repentance is completed by FAITH. Return to God is now no longer response to law but to a person; it is discipleship. Jesus points to himself with magisterial confidence as the fulfilment of the Law and the Prophets. Repentance and faith are two sides of the same coin. There can be no genuine repentance which is not also the acceptance of the divine promise spoken in Jesus of Nazareth.

In the preaching of the apostolic church repentance is basic (Acts 3:19; 5:31; 8:22; II Cor. 7:9; Heb. 6:1; Rev. 2:21). It is connected with baptism as the beginning of the life in Christ (Acts 2:38; 13:24; 19:4). It is related to faith (Acts 20:21; 26:18; Heb. 6:1), and to forgiveness (Luke 24:47; Acts 3:19; 8:22). It is a turning away from evil (Acts 3:26; 8:22; II Cor. 12:21; Heb. 6:1; Rev. 2:22; 9:20), and a return to God (Acts 20:21; 26:20; I Pet. 2:25; Rev. 16:9), based on the work of Christ (Acts 3:19; 5:31; 17:30). Repentance is at once man's responsibility (Acts 2:38; 3:19; 8:22; 17:30; 26:20) and a gift of God (Acts 3:26; 5:31; 11:18; Rom. 2:4; II Cor. 7:9; II Tim. 2:25; Rev. 2:21) through the Spirit (Acts 10:45; 11:15).

The term "repentance" occurs infrequently in the writings of Paul and not at all in the Fourth Gospel or the Johannine letters. This indicates no depreciation of the place of repentance in the Christian life, but rather points to the development of specialized theological vocabularies which emphasize the element of newness in the Christian life. For both Paul and John repentance is included in faith. Paul speaks of faith as union with Christ, the death of the old nature, the putting on of the new humanity, resurrection to newness of life, and new creation. The Johannine literature presents the life in Christ as rebirth; movement from death to life and from darkness to light; or as the triumph of truth over falsehood, love over hatred, God over the world.

REPHAEL rēf'ī'əl [רפאל] (I Chr. 26:7). The second son of Shemaiah; a gatekeeper, an "able man," who served in the temple at Jerusalem. According to tradition, he was set apart for service by David.

REPHAH rē'fā [רפה, rich(?)] (I Chr. 7:25). An Ephraimite. His parentage is obscured by the present Hebrew text, which gives no father's name. The intention may have been to name Sheerah, builder of Beth-horon, as his mother.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 231. R. F. JOHNSON

REPHAIAH rī fā'yā [רפיה]. Alternately RAPHAH rā fā [רפה] (I Chr. 8:37 = 4 below); KJV RAPHA. 1. A descendant of David and Solomon of Judah; the son of Jeshaiiah and the father of Arnan (I Chr. 3:21).

2. A Simeonite, and one among the five hundred

men of that tribe who made their home in the vicinity of Mount Seir, after having destroyed the Amalekites dwelling there (I Chr. 4:42).

3. A member of the tribe of Issachar, and a son of Tola (I Chr. 7:2). He is reported to have been a mighty warrior.

4. A descendant of Saul of Benjamin; son of Binea, and the father of Eleasah (I Chr. 9:43).

5. Son of Hur, and one of those who helped to rebuild the wall of Jerusalem in the days of Nehemiah (Neh. 3:9). He had charge of half of one of the five governmental districts into which postexilic Judah was divided (the Jerusalem district formed the middle area). It can therefore be assumed that he belonged to a family which had remained in Judah after the downfall of the southern kingdom in 586 B.C.

***REPHAIM** רֶפְאִים [רֶפְאָה, רֶפְאָה, רֶפְאָה] (the last two always with the article); Ugar. *rpi, rpum*, etc.; Phoen. [רֶפְאָה]. 1. The shades, the dead, inhabitants of SHEOL. They are the weak, shadowy continuations of the living who have now lost their vitality and strength. This suggests an etymological association with the verb רָפָה, "to sink down, relax," in the sense of sinking down to the underworld, Sheol, and being powerless. A more likely derivation is from the Hebrew verb רָפָא, "to heal" (Arabic *rafa'a*, "to mend, stitch together"), so that we may think of the dead as a community bound together in a common existence in Sheol. The Rephaim are not extinct souls, but their life has little substance. Except in one instance (Isa. 26:19), their case is hopeless; they cannot praise God (Ps. 88:10—H 88:11); they have no wisdom or understanding (Prov. 9:18; 21:16). Yet they may be thought to tremble in fear (Job 26:5), to be guests at a feast (Prov. 9:18), and to greet those who come to join their company (Isa. 14:9); and there is also a suggestion that they are the aristocracy of the dead (Isa. 14:9; 26:14).

The Sidonian kings Tabnith and Eshmunazar (ca. 300 B.C.) in the inscriptions on their sarcophagi express the curse that any tomb-robber who molests or disturbs them may have no resting place among the Rephaim.

The most numerous references to the Rephaim, and the earliest, are to be found in the Ras Shamra Texts. A verbal form is used once in the sense "to become a shade." The nominal form used with more than one meaning (see 2 below) is frequent. In the legend of Keret, this just king bemoans the loss of his whole family, who have become Rephaim, inhabitants of the nether world. Another group of texts, commonly associated with the legend of Aqhat, may be classed together under the general heading "Rephaim." These texts, though fragmentary, seem to describe how El, the supreme god of the Canaanite pantheon, summons the Rephaim ("shades") and the chthonian deities to his palace. They engage in a week of feasting, seemingly in honor of victorious Baal. The interesting feature in these texts is the probable identification of the Rephaim as chthonian deities. This may well be the origin of the Hebrew term, which, appearing in late biblical texts, indicates the persistence among the Hebrews of Canaanite thought-forms.

2. An ethnic term designating the pre-Israelite people of Palestine. It is frequently translated in the KJV and once in the RSV (I Chr. 20:4) as "GIANTS." A form in the singular, always with the definite article, הרֶפְאָה, occurs in II Sam. 21:16, 18, 20, 22, and in a slightly variant form in the parallel passages in Chronicles (הַרְפָּאִים in I Chr. 20:6, 8; הרֶפְאָהִים in vs. 4); in all these cases the RSV translates "giants" and the KJV "giant."

Israelite popular tradition ascribed gigantic stature to the Rephaim. Og, king of Bashan, their last survivor, was the possessor of a massive iron bedstead, nine cubits long and four cubits broad, according to Deut. 3:11. They are described (Deut. 2:11, 20) as being tall as the Anakim (see ANAK). The references from II Samuel and I Chronicles noted above mention the unusually large weapons and the great stature of the Rephaim. This tradition of the aboriginal giants, probably a product of Hebrew folklore, was, no doubt, partially inspired by the megalithic structures of the Neolithic period found in the Transjordan region, the area with which the Rephaim are most commonly, though not exclusively, associated. They were known by various names; thus the Moabites called them EMIM, the Ammonites called them ZAMZUMMIM, and they were identified with the Anakim (Deut. 2:11, 20).

"Rephaim" as an ethnic term may also be found in the Ugaritic literature. In the legend of Aqhat, Danel is regularly described by the epithet "Rephaite" or "Rapha-man," and this is frequently a parallel to "hero." The champion of Baal is called "Repu-baal." These usages lead one to think of manly vigor and vitality rather than of the shadowy inhabitants of the nether world, and may indicate the source of the Hebrew tradition which identifies the Rephaim with the giants.

The relation between the two usages of "Rephaim" is obscure. Perhaps it is to be found in the sense of "community"—on the one hand, the general group of pre-Israelite inhabitants of Palestine, and on the other hand, the community of those who lead a common life in Sheol.

R. F. SCHNELL

REPHAIM, VALLEY OF [רֶפְאָהִים]; KJV alternately VALLEY OF THE GIANTS (Josh. 15:8; 18:16). A broad valley, or rather a hollow plain, near Jerusalem, named for the early inhabitants of Palestine, to whom popular traditions ascribed a gigantic stature (see ANAK; NEPHILIM; REPHAIM 2). Consequently the Valley of Rephaim was interpreted κοιλάς τῶν Γιγάντων, τῶν Τιτάνων, by the LXX and by Josephus (*Antiq.* VII.iv.1); cf. the KJV rendering "valley of the giants" in Josh. 15:8; 18:16.

The Valley of Rephaim is mentioned in the description of the common boundary of the tribes of Judah and Benjamin (Josh. 15:8; 18:16); from E to W, the boundary went up along the Valley of Hinnom (see HINNOM, VALLEY OF THE SON OF), passed by the N end of the Valley of Rephaim, and reached the Waters of NEPHTHOAH, securely identified with

the springs at Lifta, NW of Jerusalem. These data point to the plain of the Baqa' in the SW suburbs of Jerusalem, from which it is easy to gain access to the Valley of Deir el-Musallabeh (the Greek monastery of the Holy Cross), and from there to the heights of Romema. The Valley of Rephaim is mentioned in several episodes of the flight of David against Philistine invaders who ascended from the lowlands up the Wadi Serar, and deployed in the Valley of Rephaim, from which they were in easy reach of both Jerusalem and Bethlehem (II Sam. 5: 18, 22; 23:13; I Chr. 11:15; 14:9). The identification of BAAL-PERAZIM with the Ras en-Nadir is in accordance with the presumed location of the Valley of Rephaim (II Sam. 5:20; I Chr. 14:11). The Valley of Rephaim is described as rich in grain (Isa. 17:5). See map "Jerusalem in OT Times" under JERUSALEM.

G. A. BARROS

REPHAN rē'fān [רֶפְאָן, רֶמְפָּאן (Textus Receptus, whence KJV; cf. Vulg. *Rempham*), רֶמְפָּא, רֶמְפָּא, רֶמְפָּאן, רֶמְפָּאם; LXX also Ραιφαν]; KJV REMPHAN rēm'fān. The LXX rendering, cited in Acts 7:43, of the name of a god which is given in the MT as כַּיְוָן (see KAIWAN). The erroneous Greek form appears to have resulted from the mistaking of כ for ר, and the transliteration of ו, properly taken as consonantal, by φ. Rephan or Kaiwan, clearly an astral deity, is the Babylonian name for Saturn.

F. W. BEARE

REPHIDIM rēf'ā dīm [רֶפְדִּים] (Exod. 17:1; 19:2; Num. 33:14-15). A stopping place of the Israelites in the Wilderness of Sin and the Wilderness of Sinai. In Num. 33:14-15 two additional encampments, Dophkah and Alush between Sin and Rephidim (vss. 12-14), are given.

Three events are connected with this name: (a) In this vicinity, the people found fault with Moses because of his inability to provide water for their thirst and put the Lord to the proof; hence the place came to be known as MASSAH AND MERIBAH (Exod. 17: 1-7). (b) The defeat of Amalek took place here, and was commemorated by the erection of an altar which was called YAHWEH-NISSI (Exod. 17:8-16). (c) The visit of Jethro, Moses' father-in-law, who counseled Moses about appointing judges (Exod. 18), may be inferred from its position in the narrative and from Exod. 18:5 to have been thought to have taken place in this vicinity, though most scholars today believe that its locale most rather have been Mount Sinai itself.

The location of Rephidim depends on the location of Mount Sinai. Various sites have been proposed for the mount of law-giving—i.e., the S tip of Sinai Peninsula, Kadesh-barnea, and Midian.

In view of the fact that the traditional location of Mount Sinai has persisted for nearly fifteen centuries and the further fact that the geographical locations of some of the stopping places mentioned in Num. 33 appear as reasonable, though none have been identified with absolute certainty, the traditional location which places the mountain of God near the apex

of the peninsula, is still preferable to either Kadesh-barnea or Midian. Both the latter localities present more problems than they solve. The difficulties which are encountered in accepting the traditional site can be eliminated by the assumption that the account of Exodus and the wilderness wandering consists of a number of separate strands of tradition, which have been fused together in the course of time.

In view of this, Rephidim must be located somewhere in the S tip of the peninsula in the proximate area of the modern Jebel Musa, either Wadi Feiran or more probably Wadi Refayid.

REPTILE [רֶמֶשׁ; ἕρπειόν]. Any of a class of cold-blooded, air-breathing, vertebrate animals, crawling on the belly or creeping on short legs. See CREEPING THINGS; SERPENT.

RESAIAH. Apoc. alternate form of REELIAH.

RESEN rē'zən [רֶסֶן] (Gen. 10:12). A city in Assyria mentioned as a great city built by Asshur between Nineveh and Calah. No major city thus located is known from Assyrian sources. Identification with an Assyrian village Rēsh-ēni, mentioned by Sennacherib in connection with his work to supply Nineveh with water, and situated NE of Nineveh, has been proposed but cannot be considered very plausible.

T. JACOBSEN

RESERVOIR [מְקוּה, from קוּה, collect]. A storage place. Reservoirs for the storage of rain water were common in biblical times, and traces of many can still be seen. Isa. 22:11 refers to the reservoir (KJV "ditch") between the two walls for the water of the Old Pool. It was presumably made by Hezekiah. For discussion, see JERUSALEM § 6c.

See also CISTERN; POOL; WATER WORKS § 4.

W. L. REED

RESH rēsh (Heb. rāsh) [ר, ר (Rēsh)]. The twentieth letter of the Hebrew ALPHABET as it is placed in the KJV at the head of the twentieth section of the acrostic psalm, Ps. 119, where each verse of this section of the psalm begins with this letter.

RESHEPH rē'shēf [רֶשֶׁף, flame, firebolt]. 1. A member of the great N tribe of Ephraim; son of Rephah, and the father of Telah (I Chr. 7:25).

E. R. ACHEMEIER

2. A proper name, translated as a common noun in Deut. 32:24; Pss. 76:4; 78:48; Job 5:7; Song of S. 8:6.

Resheph is well attested as a Canaanite deity in offering lists and theophoric names from Ras Shamra, in the Egyptian Papyrus Harris (late Nineteenth Dynasty), and in Aramaic inscriptions from Syria (eighth century B.C.). In the Keret epic of Ras Shamra he is the god of plague or mass destruction. In Egyptian sculpture he is portrayed with a helmet garnished with gazelle horns; this suggests that he

From H. Gressmann, *Altorientalische Texte und Bilder zum Alten Testament* (Berlin: Walter de Gruyter & Co.)

9. The god Resheph, from Horbet in the Nile Delta, Nineteenth Dynasty (ca. 1310-1200 B.C.)

was the deity named Mekal, so depicted on a stele from the fourteenth century at Beth-shan, the title meaning possibly "he who consumes" (from *כלה*). Apart from Beth-shan, another cult center of Resheph was probably Arsuf (later Apollonia) on the coast of Jaffa. There is probably a reminiscence of this plague-deity in Hab. 3:5, where "plague" (*דבר*) and "pestilence" (*רשע*) are the attendants of Yahweh.

Cook, *The Religion of Ancient Palestine in the Light of Archaeology* (1930), pp. 112-16; J. Leibovitch, "Un nouveau dieu égypto-cananéen," *Annales du Service des Antiquités de l'Égypte*, LXVIII (1948), 435-47. J. GRAY

RESPECT OF PERSONS. Recognition of the strength, merit, and significance of another (*הדר*, lit., "to pay honor to": Lev. 19:32; Lam. 5:12; cf. Mark 12:6; 15:43; Rom. 13:7; I Thess. 4:12; 5:12; I Tim. 3:4; I Pet. 2:18).

The OT and the NT set forth instances in which respect of persons is invalid. Laws concerning holiness of behavior state that judgment is to be made without respect of persons: when one judges, it is prohibited "to lift up the face" (*נשא פנים*), "to defer" (*הדר*)—i.e., in both cases, "to show partiality" (Lev. 19:15). The phrase *נשא פנים* appears in the Hebraistic *λαμβάνειν πρόσωπον*, "to receive the face of," "to accept the person of"—i.e., "to favor specially"; the two words form words like *προσωπολήπτης*, "a special favorer," "a respecter of persons," "one who shows partiality." It was said to Jesus: "You speak and teach rightly, and show no partiality" (Luke 20:21). God shows no partiality; he is no respecter of

persons (Acts 10:34; cf. Rom. 2:11; Gal. 2:6; Eph. 6:9; Col. 3:25). Jas. 2:1 advises: "My brethren, show no partiality." See also ACCEPTANCE.

T. M. MAUGH

REST. The translation of a number of biblical words with the connotation "repose." For the word in another sense, see REMNANT.

1. In the OT. In the OT the words used for "rest" are: (a) *נוח*, "rest," "settle down," "remain" (Gen. 8:4; Exod. 33:14; Deut. 3:20; Josh. 1:13-15; 23:1; Ruth 1:9; 3:1; II Sam. 7:1, 11; I Kings 5:4; I Chr. 22:9; Job 3:17-19), "repose" (Isa. 23:12); (b) *יגע* (Job 21:13), which refers specifically to the "peace" of Sheol (cf. also Jer. 6:16); and (c) *שבת* (Exod. 20:10; 23:12; 31:15-17), "rest," "cease," or "desist."

Usually the rest is purely physical (cf., e.g., Gen. 8:4: "The ark came to rest upon the mountains of Ararat"). Even when it is men who rest—or, more often, are given rest by God—the rest is bodily rather than spiritual. This physical or bodily rest is of many kinds. The first to be mentioned in the OT is that which consists in the possession by the people of God of a secure dwelling place in the Promised Land; thus the assurance which God gave to Moses: "My presence shall go with thee, and I will give thee rest" (Exod. 33:14 KJV), means: "I myself will go, and will settle you [my people Israel, rather than Moses individually] in the land which I have promised you" (cf. especially Deut. 3:20; Josh. 1:13-15). It also means freedom from war (Josh. 23:1; II Sam. 7:1, 11; I Kings 5:4; etc.). Solomon is called a "man of rest" (so KJV) or a "man of quiet" (so RSV; I Chr. 22:9), not because of his quiet and peaceable disposition, but because God will give him "peace from all his enemies round about" and "peace and quiet to Israel in his days." The rest which Naomi desired for her widowed daughters-in-law is simply the security and comfort of a good marriage (Ruth 1:9; 3:1; RSV "home"). The rest of the SABBATH (*שבת*) is simply freedom from ordinary work; it is enjoyed, not only by the pious Israelite, but also by his servants, by aliens living in his land, and by his cattle (Exod. 20:10). Its purpose is refreshment (23:12); God himself "was refreshed" after the work of creation by resting on the seventh day (31:15-17). The only significant reference to the rest of death is in the book of Job (3:17-19); this rest is complete inactivity, scarcely distinguishable from sheer non-existence—yet, even so, preferable to a life of continual sorrow. The same idea is found in Ecclesiasticus (22:11; 30:17, where the condition of the dead is called "eternal rest").

There does not appear to be any certain instance in the OT of "rest" in the sense of "inward peace," "tranquillity of mind." In Jer. 6:16, which is sometimes cited as an instance, the rest which the people are bidden to find by walking in the good way is, as the context plainly indicates, political and social security and well-being, and "for your souls" means only "for yourselves." In Ps. 37:7, "Rest in the LORD" (KJV) is a mistranslation; the meaning is given correctly in the RSV: "Be still before the LORD" (cf. KJV mg.).

2. In the NT. In the NT explicit references to rest are few, and most of them are of little or no re-

religious or theological significance. In the first three gospels and in Revelation the Greek words used are the verb ἀναπαύειν and the verbal noun ἀνάπαυσις. It has been asserted that the compound ἀνα-παύειν expresses a temporary, and the simple παύειν a final, cessation of some kind; but, though this is usually true, there are exceptions—e.g., Rev. 14:13, where the compound is used of what is clearly a final cessation; Luke 8:24, where the simple form is used of what is no less clearly a temporary cessation. But ἀναπαύειν and ἀνάπαυσις do often denote a temporary rest, and so come to mean simply “refreshment” of any kind. In all four instances of the verb in the Pauline letters (I Cor. 16:18; II Cor. 7:13; Philem. 7, 20), this is the meaning (similarly, Ignatius repeatedly speaks of having been refreshed by fellow Christians “in every way”). The simplest understanding of the gracious promise of Matt. 11:28-29 is, therefore, that Jesus offers to “all who labor and are heavy-laden” refreshment, relief from their weariness, which will enable them to carry on their labor, but under his easy yoke, which makes their burden light (cf. Vulg., *reficiam vos* and Luther’s translation, *will euch er-quicken*; both mean “I will refresh you”). But ancient interpreters (e.g., Origen, Chrysostom) took the burden from which Christ releases men to be the burden of their sins, and most recent commentators take it to be the burden of the Jewish law as interpreted by the scribes and Pharisees (cf. Matt. 23:4); in either case the relief promised must be final, not temporary.

The only NT writer who has much to say about rest is the author of the Letter to the Hebrews (Heb. 3:7-4:11). For him the consummation of the Christian gospel is that those who truly believe it will enter into God’s rest, the rest which God himself has enjoyed ever since, his works of creation finished, he rested on the seventh day (Gen. 2:2). The argument starts from the words ascribed to God in Ps. 95: “They [i.e., the disobedient and rebellious generation of the wilderness wanderings] shall never enter my rest.” Here “my rest” means simply the land of Canaan. But the author of Hebrews gives the phrase (LXX κατάπαυσιςμον) a wider and deeper meaning, interpreting it in the light of Gen. 2:2 (where κατέπαυσεν is the word used in the LXX) as God’s own rest, which it was his gracious purpose that his people should share. That purpose is not frustrated by the failure of those to whom the promise was first made; “because of unbelief” (Heb. 3:19) they were not able to enter God’s rest, but this means that it remains for others to enter it (4:6). The good news of this possibility has now been proclaimed to us; and having believed it, we shall certainly enter that rest (4:1-3; here εἰσερχόμεθα is a futuristic present; cf. Vulg. *ingrediemur*). Yet only if we hold our first confident belief firm to the end (3:4); we must therefore exert ourselves to enter it, for we too may fail by disobedience (here, as often, hardly to be distinguished from unbelief), as the people under Moses did. When we do attain that rest, exertion is at an end, for it is a “sabbath rest” (σαββατισμός—a word found only here in the Greek Bible, and possibly one coined by the writer); “whoever enters God’s rest also ceases [κατέπαυσεν] from his labors [ἔργων] as

God did from his” (4:9-10). Nothing more is said about the nature of the rest, but it cannot be supposed to be a state of complete inactivity, like the rest of the wicked, the weary, the prisoners, in Job (3:17-19). In the similar passage in Revelation (14:13) the blessed dead are said to rest from their “labors” (κόπος), so then it may be possible to distinguish between work which is toilsome and wearisome and work which is done easily and gladly. But this distinction cannot be made when God’s own works are in question. Probably the language of Hebrews has been determined by the naïve anthropomorphism of the Genesis passage, and does not adequately express the writer’s conception of the blessedness of the redeemed in heaven—or of the blessedness of God himself.

None of the other references to rest in the NT is of any religious significance. But it may be noted that the Greek word ἄνεσις, which means “loosening,” “relaxation,” “remission” (cf. Acts 24:23; II Cor. 8:13), is rendered, in the three other places in which it occurs, by “rest,” both in the KJV and in the RSV, in the contexts quite correctly (II Cor. 2:13; 7:5; II Thess. 1:7).

J. Y. CAMPBELL

RESTITUTION. See CRIMES AND PUNISHMENTS § C7.

RESTORATION [יְשׁוּבָה; ἀποκαθιστάναι, -άνειν; ἀποκατάστασις]. The destiny of the cosmos seen as the attainment of its original purpose and the preservation of its historical achievement.

The concept of cosmic “restoration” is rooted in the instinct of primitive cultures to experience the reality of temporal occurrence only as re-enactment of primeval archetypes. Babylonian astronomy (Berossos) developed the concept of an endless series of “great years” or aeons of astronomically determined duration, with alternating (Iranian) world conflagration (cf. Zephaniah) and (Babylonian) flood. This view was elevated to philosophical status especially by the Stoics, who taught a periodic conflagration followed by a “restoration” (*Stoicorum Veterum Fragmenta* II.190.19-20) or “regeneration” (*Marc Aurelius* XI.1; in the NT, Matt. 19:28), in which the same events recur in each cycle: “How many Chrysippuses, how many Socrateses, how many Epictetuses has the aeon already consumed!” (*Marc Aurelius* VII.19). This cyclic concept was in principle superseded in Persian eschatology by the view of a final transfiguration in which all would be saved. This linear or single-cycle view (minus universal salvation) became determinative for Hebrew-Christian thought, in its effort to understand historical events whose unique significance transcended the cyclic archetypal pattern. Thus the subjection of historical occurrence to nonhistorical categories gave way to a view in which distinctive historical occurrence could itself become determinative for the construction of the meaningful pattern of history. This meant, to be sure, that the concept of restoration must accept a secondary role in the understanding of history. Yet it continued to supply eschatology with archetypal material drawn both from the concept of creation and from the decisive occurrences of Hebrew and Christian history.

The verb "restore" became in the OT a technical term for the political restoration of Israel by God (Ps. 16:5 LXX; Jer. 15:19; 16:15; 23:8 LXX; 24:6; Ezek. 16:55 LXX; Hos. 11:11). This concept is attached to Elijah in Mal. 4:6, where he is prophesied as returning to "restore [LXX ἀποκαθιστάναι; RSV 'turn'] the hearts of fathers to their children and the hearts of children to their fathers, lest I come and smite the land with a curse." In Ecclus. 48:10 he "restore[s] [καθιστάναι] the tribes of Jacob." The problem of reconciling John the Baptist with this Elijah role of "restoring all things" (ἀποκαθιστάνειν πάντα) finds expression in Matt. 17:11; Mark 9:11-13. Luke instead places this Jewish concept of "restoring [ἀποκαθιστάνειν] the kingdom to Israel" on the lips of the disciples at the Resurrection (Acts 1:6), as an occasion for correcting the view of the nearness of the kingdom and of its limitation to Israel. The expression "restoration of all things" (ἀποκατάστασις πάντων) occurs in Acts 3:21, and other allusions to the Elijah tradition in the context suggest some such connection in the source material employed by Luke; yet in its Lukan form the passage seems to say no more than that Jesus waits in heaven "until the time for establishing all that God spoke by the mouth of his holy prophets from of old." Origen made a technical term of the expression ἀποκατάστασις πάντων in connection with his doctrine, based upon Neoplatonism, that souls (and even demons) could in the afterlife be purified, and thus ultimately all would be saved—a view rejected especially by the Fifth Ecumenical Synod at Constantinople in A.D. 553. In the NT the view of the completeness of Christ's victory (John 1:29; 4:42; 12:32; Rom. 5:18; 8:19 ff; 11:32; I Cor. 15:22-28; II Cor. 5:19; Phil. 2:10; I Tim. 2:4; I John 2:2; 4:14) does not eliminate the Jewish idea of a realistic judgment, but rather serves as the positive basis for the call to radical decision.

 6. Folklore of resurrection
- Bibliography

1. **Forms of the doctrine.** "Resurrection" is a blanket term covering three different, but related, beliefs:

a) That the essential self (or "soul") of an individual is awakened from the sleep of death shortly after the latter occurs, or after the dissolution of the body;

b) That the bodies of the dead will eventually be resuscitated, at the end of the present world;

c) That the righteous among the dead will be raised collectively, after a Last Judgment, either to a rarefied, eternal existence on some other plane, or to rebirth in a world which will succeed this one.

Resurrection is thus conceived either as an individual experience or as a common, eschatological event; either as an awakening from the body or as an awakening in it; either as universal or as selective; either as an inevitable continuance in eternity or as a privileged birth in a new creation.

This diversity of view is due to the fact that the doctrine was evolved in different philosophies to resolve different problems. Thus, where death was regarded as a sleep—a concept ubiquitous in primitive and ancient thought—resurrection was the inevitable waking, a natural and normal sequel. Where time was regarded as a cyclic, rather than a linear, process (see *COSMOGONY*), resurrection supplied an answer to the question of what would happen to the selves ("souls") of the deceased when the present cycle ended and a new world was brought into being. Lastly, during periods of religious persecution and martyrdom, it provided a necessary assurance to the faithful that they would indeed be rewarded hereafter, and the reprobate duly punished.

There are differences also in the symbols by which the doctrine is expressed. The prevailing image—from which, indeed, the term itself is derived—is that of waking from sleep (e.g., Dan. 12:2). But the analogy of the vegetable world, with its incessant rhythm of decay and revival, suggests also the alternative picture of reflorescence (e.g., Ecclus. 46:12).

2. **Resurrection in the OT.** Although it is today a cardinal tenet of both Judaism and Christianity, the doctrine of resurrection was not evolved in Israel until the Hellenistic period. The only positive reference to it in the OT occurs in the very late book of Daniel (168 B.C.), where it is said (12:1-2) that, at the end of the present world, following the appearance of Michael, the peculiar angel of Israel, "many of those who sleep in the dust of the earth shall awake, some to everlasting life, and some to shame and everlasting contempt." Written during the oppressive reign of Antiochus IV Epiphanes, this passage does not represent a natural development of previous Hebrew thinking, but is simply a clever exploitation of popular "pagan" notions, designed, on the one hand, to reassure the devout, and, on the

other, to hoist the infidels with the petard of their own apostatic beliefs. For it is not difficult to recognize in the figure of Michael a thinly disguised version of the Iranian Saoshyant, the savior who will come at the end of the present era to vindicate the righteous, discomfit the wicked, and resurrect the dead; while the condemnation of the faithless to everlasting shame echoes the fate assigned to them in Mazdean and Zoroastrian teaching (e.g., *Zend Avesta*, Yasht 16; *Bundahesh* 11.6; etc.).

To be sure, attempts have been made to trace a doctrine of resurrection in earlier portions of the OT, but none of the evidence adduced stands up under closer scrutiny.

Thus, in the parade passage, Isa. 26:19 ("Thy dead shall live, their dead bodies shall rise," etc.), the language is purely hyperbolic; the desired regeneration of a spiritually inert and virtually "dead" community of Israel is likened metaphorically and poetically to the quickening of languishing soil under the influence of even a slight morning drizzle (טל). What has seemed to all the world like a barren "ghost land" will yet yield a belated harvest (וארץ תפיל תפיל [where תפיל = תאפיל; cf. Exod. 9:32]).

Similarly, the famous words of Job 19:25-27 ("I know [rather, 'If only I knew'] that my Vindicator lives," etc.) express a desperate hope for the impossible—a *cri de coeur*—rather than a confidence in the inevitable. The inmost yearning which consumes me, says the tortured man of Uz, is that I could but leave some permanent, written record of my case; that I could be sure that someone, be he even the last man on earth, would someday arise to constitute a live champion of my cause (ואני ידעתי גאלי חי ואחריו) (על־עפר יקום); that even beyond these torments of the flesh, I might see before me a benign God, and not, as now, mere coldhearted opponents! All this voices no definite belief in the raising of the dead.

Again, Ps. 17:15 ("When I awake, I shall be satisfied with beholding thy form") does not, in fact, refer to waking from the sleep of death, but simply voices the prayer, or expectation, of one who has sought refuge in a sanctuary that he will, indeed, be safe overnight and wake to see his divine "host" in the morning! In other words, the passage is to be interpreted in the context of asylum and *epopteia* (see *bibliography*), rather than of resurrection.

Other passages that have been quoted (e.g., Deut. 32:39; I Sam. 2:6; Pss. 16:10-11; 49:15; 73:24) really allude only to rescue from imminent death, not to resuscitation after it; while the assertion in Ps. 1:5 that "the wicked will not stand in the judgment" refers merely to their inevitable collapse when duly arraigned, not to any doctrine of trial and resurrection at Doomsday.

3. Foreign influences and parallels. It is often asserted that, even if not expressly articulated in their earlier scriptures, a belief in resurrection can scarcely have failed to penetrate to the Israelites, because it is well attested among their neighbors. This assertion is completely erroneous. It is based on (a) the frequent designation of Mesopotamian gods as "bringing the dead to life" (*muballit mīti*) or even as retrieving them from the nether world, and (b) the widespread diffusion of myths and rituals revolving

around so-called "dying and reviving gods"—e.g., the Babylonian TAMMUZ and the Ugaritic BAAL. The fact is, however, that the designation in question refers only to preserving in life one who is at the point of death, not to actual resuscitation of the dead; while the Tammuz-type god is, in the final analysis, simply a personification of the rhythm of nature, so that the portrayal of him as alternately dying and reviving has no bearing whatsoever on the doctrine of a general human resurrection. Besides, it should be observed that, at least in some cases, such gods, though indeed mourned as if dead, are not, in fact, said to have died and been resurrected, but only, like Persephone, to have been trapped alive (e.g., "bound" [Akkadian *kamū*]) in the nether world and subsequently retrieved, or to have withdrawn from the earth in high dudgeon and been subsequently appeased (e.g., in certain versions of the Hittite Telipinu myth; cf. Hos. 5:6).

Nor can any doctrine of a general resurrection be deduced from the fact that in the Mesopotamian poem of the Descent of Ishtar to the Nether World (*ANET* 106 ff) the dead are said to rise along with Tammuz and "savour the incense"—i.e., partake of a ritual meal. For this poem was evidently designed for an annual festival, and the reference is simply to the widespread belief that on such occasions the ancestral dead temporarily rejoin their living kinsmen.

The plain truth is that there is no evidence in ancient Mesopotamian literature of any real doctrine of resurrection; while the Egyptians asserted only that after the demise of the body, the dead came into untrammelled possession of his essential self (*ka*) and attained a state of rarefied beatitude (*'ab*). In accordance with what Edward Tylor (*Primitive Culture*) characterized as the "continuance theory," the dead was regarded as defunct, but not deceased, and the problem was not how he could attain immortality, but how he could fail to do so. The prevalent attitude is evident both from the designation of the dead as the "weary, inert" (Egyptian *nny*, *wrd 'ib*; Ugaritic, Phoenician, *r-p'-m*, if derived from *r-ph-y*, "be slack, flaccid"; cf. οἱ ἀκόμντες, and see *Odyssey* IX.474-75), and from descriptions of their shadowy existence. The latter is represented ambivalently as a consummation of essential being and as a cheerless attenuation of it, the body being variously regarded as a temporary encumbrance or as a necessary complement. On the one hand, e.g., the departed are said, in the Egyptian Book of the Dead (*ANET* 9), to inhabit the "silent land," where sexual pleasure is replaced by beatific detachment (*'ab*), and gourmanderie by spiritual repose; while, on the other, in the Mesopotamian poem of Ishtar's Descent to the Nether World (*ANET* 107), they are portrayed as dwelling in darkness and squalor, feeding on dust and mud.

Broadly speaking, it was this conception that obtained in Israel before the Hellenistic period. The dead are likewise described in the OT as "weary" (Job 3:17) and "without vigor" (Ps. 88:4), dwelling in silence (דומה; Pss. 94:17; 115:17), whence they can never return (Ps. 88:11; Prov. 21:16; Isa. 26:14). See DEAD, ABODE OF THE.

On the other hand, while the formal doctrine of

resurrection cannot be traced to ancient Near Eastern sources, certain specific ideas which later became woven into the Judeo-Christian concept do indeed appear, in less dogmatic form, in Semitic and Egyptian myth and legend, and may therefore have been incorporated from time-honored popular lore current also in the Holy Land.

Thus (a) the idea of the resurrection of the body is foreshadowed in the belief that certain heroic characters who met their deaths through dismemberment were subsequently restored to life by the miraculous reassemblage of their limbs. This notion, which is indeed a commonplace of world folk tale (e.g., the resuscitation of Lemminkäinen in the Finnish *Kalevala*; the tale of Cola Marcione in Basile's *Pentamerone*), is familiar, of course, from the Egyptian myth of Osiris. It occurs also in the Ugaritic Poem of Baal, where the dismembered Mot (cf. I AB, ii.30-37), god of aridity and death, is eventually resuscitated, to fight another day. Moreover, it is virtually certain that the Ugaritic Poem of Aqhat ended with a similar resuscitation of the slain youth after vultures had devoured his flesh and bone. In all these cases, however, what is involved is something unusual and extraordinary, not the normal and inevitably destiny of all the dead. Besides, in the case of Mot, and in at least some representations of the myth of Osiris, this trait of the story simply dramatizes and symbolizes the process of sowing and reaping, rather than a real resuscitation of the human dead.

Again (b), the element of a last judgment, though articulated mainly on the pattern of Iranian teachings, may be recognized as at least partially a projection into a common, eschatological event of what had, in fact, long been believed to be the destiny of the individual dead. For such inquisition in the afterworld is not only abundantly attested in Egypt (e.g., Book of the Dead; *ANET* 34-35), but there are also sporadic traces of it in Mesopotamian belief, as when the constellation Libra is described as the "scales of the dead," and it seems also to be mentioned on sundry Babylonian funeral inscriptions found in the Elamite city of Susa. It should not be overlooked, however, that similar ideas always obtained among the Greeks (cf. *Iliad* III.278-79; XIX.259; Aeschylus *Eumenides* 267 ff; *Supplices* 414 ff; Democritus, fragments 199, 297; Plato *Phaedrus* 248 F; *Gorgias* 523; *Laws* IX.870; *Phaedo* 112 E) and might thus have reached the Jews of the Hellenistic period from other than purely oriental sources.

4. Resurrection in the Apoc. and the Pseudep. In most of the intertestamental scriptures, the doctrine of resurrection is fused with that of rewards and punishments, and, as a matter of fact, it developed alongside an increased insistence on fidelity to the covenant. The most common form of the belief is that all souls will be summoned to judgment at the last day, but that only the righteous will be resurrected—i.e., restored from the attenuated state imposed by bodily demise (Pss. Sol. 3:16; 14:7; 15:15; Enoch 91-104; Test. Simeon 6; Test. Levi 18; Test. Judah 25; Test. Zeb. 10; II Bar. 30; Adam and Eve 13; cf. also Jos. Antiq. XVIII.1.3; War II.viii.14; T.B. Ta'an. 7a; Keth. 111b), the wicked being then consigned to final perdition or "second death" (Pss. Sol.

13:9; II Bar. 50:1 ff; Jerusalem Targ. Deut. 33:6; Targ. Isa. 14:19; 22:14; 65:5, 15, 19; Jer. 51:39).

There is no decisive evidence that resurrection was ever conceived during this period as universal. The only passages which might possibly be construed in this sense are II Esd. 7:32, 37, for the references in Test. Judah 25; Test. Benj. 10 are certainly Christian interpolations. Such a construction, however, depends, in the last analysis, upon the ambiguity of the term "resurrection"; for what is envisaged is simply a general awakening of the dead to judgment, but not of all of them to ultimate revival. The Tosefta, on the other hand, does take up the problem (Sanh. 13.2), and it is laid down that pious Gentiles, too, and not only Israelites, were eligible for a portion in the world to come. By and large, however, there was a marked tendency to regard Israelites as especially qualified for the privilege (Enoch 1-36; 37-50 [Similitudes]; 83-90 [Dream-Visions]; II Macc. 7, *passim*; 12:43-44; II Bar. 50-51:6; M. Sanh. 10.1), by virtue especially of the covenant which God had made with them (Enoch 60:6). This covenant, however, was operative only so long as Israel observed its terms. Hence, certain exceptions were specified. Those, e.g., who denied the authority of the Torah were excluded (Mishna, *loc. cit.*; T.B. Keth. 111b), as were also those who shamed their fellow men in public (B.M. 59a) and, according to Akiba, those who "read outside books"—i.e., accepted as scripture what had been pronounced heretical (Sanh., *loc. cit.*).

There was likewise a divergence of view about whether the dead would be resurrected to live a life of immortality or actually to populate the newly created world. The former was originally termed "eternal life" (חיי עולם [Dan. 12:2]; Aramaic חיי עולם [Targ. Onqelos, Lev. 18:5; Deut. 33:6; Targ. I Sam. 2:6; Ezek. 20:11-12, 21; Hos. 14:10]; Syriac עולם דלא מאית, "immortal world" [Apoc. Bar. 51:3]; עולם דסוף, "the unending world" [II Bar. 15:7; 44:15]; also חיי עולמים, "eternal years" [M. Tamid vii.4]; ζωὴ αἰώνιος [Pss. Sol. 3:16; II Macc. 7:9, 36; cf. Enoch 37:4; 40:9; II Enoch 50:2; 65:10; IV Macc. 15:3]); and the latter, the "world to come" (העולם הבא [M. Ab. 2.7; T.B. Kid. 40b; Keth. 111a; Soṭ. 7b (*baraitha*); P.T. Keth. 35a; Shek. 47c]; Aramaic עולם דאתי [Jerusalem Targ. I, Deut. 13:10; Targ. Ruth 2.18; T.B. Sanh. 98a]), and the dead were said in each case to "inherit" or "acquire" it. In the course of time, however, the distinction was obscured, and the two terms came to be used as synonyms, to denote the hereafter in general.

There was likewise some difference of opinion as to whether resurrection was spiritual or corporeal. This divergence comes out especially in the book of Enoch, which is really a corpus of scriptures attributed to that ancient sage. In chs. 1-36, in 62:14, and again in the dream-visions of chs. 83-90, what is envisaged is resurrection of the body, whereas in chs. 91-94 it is resurrection of the soul. The former is likewise the view of II Bar. 50-51:6, while the declarations of the martyred brothers in II Macc. 7 presuppose a resurrection of the flesh and even a reassemblage of dismembered limbs (cf. also 12:43-44). A later (Pharisaic?) interpolation in Ecclus. 46:12—completely out of harmony with the general Sad-

ducean outlook of that book—also speaks of bones' rising "from where they lie."

Attempts have been made to stratify these various views chronologically, but since the precise dates of many intertestamental writings are still in doubt, and since they emanate from different schools of thought and different environments, such attempts are at present precarious.

5. Attitude of Jewish sects. There was no consensus concerning resurrection among the various Jewish sects which flourished in the days of the Second Commonwealth.

a. In the Dead Sea Scrolls. The attitude of the Qumran sectaries is ambiguous. In the Manual of Discipline (II.25) and frequently in the Book of Hymns (III.19-23; VII.29-31; XI.10-14; XVIII.26-30) there is reference to the belief that the faithful share a common estate with the angels ("holy ones") and stand forever in the presence of God. It remains doubtful, however, whether this is to be translated in the future tense and understood as an assurance of eventual resurrection, or whether it refers simply, in the common language of mysticism, to the inclusion of the earthly devout in the wider "communion of the saints" (cf. Eph. 2:19).

Furthermore, a fragmentary passage in the War Scroll (XII.5) has been interpreted as an allusion to "those that shall rise from the earth" at the time of the final battle of God against the forces of Belial. More probably, however, the Hebrew words (קמין ארץ) refer to "upstarts on earth" who will then be discomfited.

Lastly, in 1QH VI.34 ff, allusion is made, in an eschatological context, to a "raising of the flag" by them "that lie in the dust" and to a "lifting of the banner" by "this worm which is man." This passage has been construed as a reference to resurrection, but it is equally possible that it refers rather to an impious insurrection of earth-born reprobates, whom God will subdue.

b. Essenes. The views expressed in the Scrolls accord in general with those attributed by Josephus (Antiq. XVIII.i.5; War II.viii.11) to the *ESSENES*, with whom, indeed, the Qumran sectaries may be identical (see *DEAD SEA SCROLLS*). They held that although bodies were perishable, souls endured and mounted upward, the good to a realm of bliss, the evil to be consigned to a place of torment. This view is expressed also in Wisd. Sol. 3:1 ff; 5:16; Jub. 25; while something of the same kind—though without the reference to ultimate judgment—appears in Eccl. 12:7 ("The dust returns to the earth as it was, and the spirit returns to God who gave it"). The latter statement, it may be added, reproduces to a nicety the Iranian doctrine in the funeral inscription of Antiochus I of Commagene, to the effect that the body will rest in the tomb "through immeasurable time," after the soul, "beloved of God, has been sent to the heavenly throne of Zeus Oromasds."

c. Sadducees. The Sadducees denied resurrection altogether (Acts 23:8; 26:8; Jos. Antiq. XVIII.i.4; War II.viii.14; T.B. Sanh. 90b), and it is their attitude that is reflected especially in Ecclesiasticus (7:17; 10:11; 17:27-28, 30, 32; 28:6), which even supports it by quoting a well-known Greek saying (Epicharmus; see Euripides *Supplices* 531-36; *Orestes*

1086-88; *Chrisippus* fragment 839; cf. Lucretius *De rerum natura* II.998) to the effect that "all things that are of the earth turn to the earth again, and all things that are of the waters return to the sea."

d. Pharisees. The Pharisees, on the contrary, accepted the doctrine, excluding only certain specific categories of apostates from the privilege of resurrection (cf. M. Ab. 4.22; Sof. 9.15; Sanh. 10.1). It is their attitude that became normative in Judaism. It finds expression especially in the second of the Eighteen Benedictions recited in every Jewish service ("Thou, O Lord, art mighty for ever, Who quickenest the dead in abundant mercy . . . and keepest faith with those who sleep in the dust")—a benediction cited already in the Mishna (R.H. 4.5) and probably inserted in the Standing Prayer in deliberate rebuttal of the claims of the Sadducees. It is likewise expressed in the ancient form of the doxology (*Kaddish*) now recited at the burial service ("Magnified and hallowed be His great name, Who will hereafter renew the world, quicken the dead and raise them to life everlasting"); and again in the blessing intoned on visiting a graveyard (T.B., Ber. 58b [*baraitha*]; Tosef. Ber. 6.9: "Blessed art Thou, O Lord, . . . who formed you in judgment . . . and put you to death in judgment . . . and will hereafter restore and quicken you in judgment"). Furthermore, a profession of belief in the immortality of the soul and the resurrection of the dead occurs at the beginning of the daily morning service (cf. T.B. Ber. 60a).

e. Samaritans. It is commonly asserted that the Samaritans had no belief in resurrection. This view, however, must be received with caution, for the fact is that a fairly detailed description of that eschatological event is given by the fourth-century writer Marqeh (see *bibliography*) in his exposition of Deut. 32 and is repeated and elaborated in several later treatises. It must be observed, however, that our present text of Marqeh is by no means free of later Islamizing additions, and Islamic influence is, of course, all too evident in the medieval writings of the sect. The question is, therefore, whether Marqeh's statements represent a genuine Samaritan view later adopted by Islam or whether the borrowing was the other way about. At present there seems no way of deciding the issue.

6. Folklore of resurrection. Finally, a number of folkloristic ideas later associated with the doctrine of resurrection may here claim a brief comment.

a) The eschatological resurrection will be accomplished through Elijah (M. Sof. 9.15). This doctrine is derived from Mal. 4:5—H 3:23. The prophet, however, is here but a Judaized version of the Iranian Saoshyant, to whom the same mission is ascribed (Yasht 16; Bundahesh 11.6; cf. also Ganj-i-Shakiyan, 133, ed. Sanjana; Dinkart, ed. Sanjana, V, 332). There is added point in this adaptation inasmuch as the prophet is identified by Malachi (3:1) with the "messenger of the covenant," and, as we have seen (§ 4 above), it is precisely the covenant that assures the faithful in Israel of their eventual revival. In Enoch 39:6; 45:3; 51:5; 61:8, the place of Elijah is taken by "the Elect One."

b) The righteous will shine like stars (Dan. 12:3; II Esd. 7:97, 125; Enoch 104:2). If the reference is, indeed, to the righteous dead, it is pertinent to point

out that the location of the dead in the stars was a common idea in Greco-Roman paganism. Hadrian, e.g., held that the soul of his friend Antinous had become a star (Dio Cassius LXIX.ii.14). It is likewise abundantly attested in classical Greek and Roman sources and may be traced even further back to the Egyptian Book of the Dead and the Pyramid texts.

c) The righteous will be clad in special, pure garments (Enoch 62:15-16; 108:12; II Esd. 2:39, 45; 1QS 4.8 [cf. also Rev. 3:4-5, 18; 4:4; 6:11; 7:9, 13-14; Hermas *Similitudes* 8:2]). This idea recurs also in Iranian teaching (Yasht 55.2; Bundahesh 30.28). It is closely associated with the further notion that:

d) The righteous will emit a special fragrance (II Bar. 29:7; Asmp. Moses 29; 38; 40). This, too, is derived by one scholar from Iranian sources. The aforementioned Samaritan treatise by Marqeh has an interesting passage ament this concept: "When the good and the evil are (at last) foregathered, what a difference will appear between them! The good will give forth an acceptable fragrance, and their garments will be new, even as it is said, 'Thy garment hath waxed not old upon thee' [Deut. 8:4]. . . . But, over against them, the wicked will emit an evil, mephitic smell, redolent of dust and fire, and their garments will be tattered."

* **RESURRECTION IN THE NT.** Though the event itself is nowhere described, the resurrection of Jesus Christ represents the watershed of NT history and the central point of its faith. On the historical plane it marks the division between the earthly life of Jesus and the apostolic age; but it is seen also as nothing less than a new act of creation, signaling the divide between the old world and the new and inaugurating that resurrection order of life which is one day to be the only one. It has connections backward with the promise of RESURRECTION already held out in the OT and the Apoc., and forward with the general resurrection at the last day (see **ESCHATOLOGY OF THE NT**). But its center is that invisible point on the "third day," where faith and history meet in a relationship which remains as problematic as it is indissoluble.

A. THE RESURRECTION OF CHRIST AND RESURRECTION IN GENERAL.

It is necessary to emphasize from the start that, from the NT point of view, the resurrection of Christ is not, and cannot be, understood as a typical instance of resurrection in general. It is a unique event, and not one of a class in relation either to the expectation of other individuals or to other raisings from the dead in the biblical narrative. It is by definition the resurrection of the Messiah.

1. The Resurrection and the resurrection hope.

Nowhere in the NT is the resurrection hope deduced from the resurrection of Christ, as if his survival of death were the supreme instance that proved or guaranteed eternal life for others. "In Christ," indeed, and in his resurrection, others, and potentially all men, are included (I Cor. 15:22). And for Christians the resurrection hope is reinforced and redefined (cf. I Pet. 1:3) as a sharing in the risen life and body of Christ, both in the present and in the future (see §§ D1c, 2a, below). But nowhere is the prospect or even the certainty of life after death derived from the resurrection of Christ as its one sure example. For Jesus, the assurance of a general resurrection rests upon something independent of and prior to the event of the Resurrection—namely, the conviction that God "is not God of the dead, but of the living" (Mark 12:26-27). Even for Paul, who insists so strongly on the corporate character of the resurrection of Christ, the Resurrection is not the ground for accepting belief in resurrection in general—a hope that he already entertained as a Pharisee (Acts 23:6). He does not say, If Christ had not been raised, there would be no resurrection, but, "If there is no resurrection of the dead, then Christ has not been raised" (I Cor. 15:13). You cannot, he argues to the Corinthians, deny the resurrection of all men while accepting the resurrection of one man. But this is not to say that belief in the resurrection of all men depends upon accepting the resurrection of one. Moreover, Paul does not draw general conclusions from the resurrection appearances of Christ. Neither in his writings nor in the gospels is there any suggestion that the appearances prove, or even confirm, survival of death. The resurrection hope is never argued from them.

Nor is it argued that in the resurrection body of

the Lord we see the type or pledge of our own. Even when Paul goes on in the second half of I Cor. 15 to speak of the resurrection body of Christians, he draws no inference or analogy from his earlier record of the resurrection appearances of Christ, which are listed simply for their evidential value. He does not say that our resurrection body will be like his, only that its character will be determined entirely by the gift of God, "as he has chosen" (I Cor. 15:38). The resurrection of Christ is a unique event. He rises the "first-born among many brethren" (Rom. 8:29); but in this he is "pre-eminent" (Col. 1:18) rather than typical. (On the connection between Christ's resurrection and the future resurrection of those who belong to him, see § D2a below.)

2. The Resurrection and other raisings from the dead. Jesus is not the only one to be raised from the dead in the NT; but again, his resurrection is not simply one of a class. In fact, the noun ἀνάστασις ("resurrection") is never used of these other raisings. Even in the Lazarus story it is reserved by Martha for the general resurrection at the last day (John 11:24), and by Jesus for himself (11:25). This raising is, indeed, unique in being viewed consciously and deliberately as an anticipatory sign, both of the general resurrection and of the resurrection of Jesus. In the Synoptic stories (Mark 5:21-43 and parallels; Luke 7:11-17) and in Acts (9:36-42; 20:7-12) there is no such specific reference, though in Matt. 11:5 = Luke 7:22 the raising of the dead is part of the evidence given to John the Baptist for answering his question whether Jesus is the one "who is to come." But though the raisings, like the healings, are signs of the End (cf. Matt. 10:7-8), anticipations within this age of the eschatological deliverance of the body (see MIRACLE), all other men apart from Jesus are restored to life only to die again. Their death is merely postponed. Indeed, it is often debatable how far over the boundary of death they have passed. This is not to say that by medical standards they would not have been certified as dead. Of this there can be no question in the case of Lazarus (John 11:39) or even of the widow's son (Luke 7:12-14) or Dorcas (Acts 9:37); though the accounts of Jairus' daughter (Mark 5:39 and parallels) and Eutychus (Acts 20:10) could be read to imply that nothing more than resuscitation was required. What the language indicates is, rather, that for the Hebrew mind there was no absolute division between life and death. Death was, from one point of view, a weak form of life. At death the soul or spirit left the body but could be called back into it, if not too far gone (cf. II Kings 4:32-35; see DEATH; SOUL; SPIRIT). This is what Paul means by saying of Eutychus that "his life [lit., soul] is in him" (Acts 20:10), or Luke of Jairus' daughter that "her spirit returned" (Luke 8:55). Of the latter, Jesus says she "is not dead but sleeping" (Mark 5:39 and parallels), and even of Lazarus: "I go to awake him out of sleep" (John 11:11). They are indeed dead; but in all these cases the dead person is simply called back to life, and this is indicated by the corpse's opening its eyes and sitting up (Acts 9:40) or sitting up and beginning to speak (Luke 7:15). Raising the dead is the continuation of healing beyond a certain point. The restorative power is of God, but the

agents of it, as in the classic case of Elisha and the son of the Shunammite woman (II Kings 4:32-37), may be purely human. Indeed, raising the dead is included as part of the regular mission program laid upon the Twelve (Matt. 10:8).

But the resurrection of Jesus is quite different. There is no suggestion of mere resuscitation; he has passed right over the border into the realm of the departed spirits (see SHEOL); he is not brought back simply to this life, destined to die again, but raised forever to the right hand of God; this is effected, not through any human agency, but by God alone; and only of his raising does the NT use the term "the resurrection." This last point introduces the most decisive distinction of all between the resurrection of Jesus and any other: his is the resurrection of the Messiah.

3. The resurrection of the Messiah. For the earliest Christian preaching it is the Resurrection that designates Jesus as the Christ, the Son of God (Acts 2:36; 13:33; Rom. 1:4). This is the point at which his reign as Messiah begins, when, so far from returning to the confines of the present age, he enters upon and inaugurates the age of GLORY. At the hour when Jesus is glorified (Luke 24:26; John 12:23; Acts 3:13; Rom. 6:4; I Pet. 1:21; etc.), God's messianic act is complete, and the age to come has begun to supersede this one. And, conversely, it is because in it Jesus is declared unequivocally to be the Messiah that the raising of Jesus can be spoken of as "the resurrection"—as the beginning, i.e., of the general resurrection, the inauguration of the last day (see § D1d below). For prior to the "third day," the term "the resurrection" could have no reference except to the "last day." "In the resurrection" meant for Jesus' contemporaries and for Jesus himself "when they rise from the dead" (Mark 12:23, 25; cf. John 11:24). It was what happened "on the third day," and the eschatological significance attached to it, that alone could make men think of applying the term ἡ ἀνάστασις, "the resurrection," to a point within history.

B. THE PROSPECT OF THE RESURRECTION.

It follows from what has just been said that the Resurrection would have appeared quite different in prospect from what it came to be seen in retrospect. But the question must be raised whether Jesus had any prospect of the Resurrection, and, if so, whether any evidence of his prospect is afforded by our existing documents. These were written to set forth the postresurrection faith of the apostolic church: they were not written as documentaries to put on record how Jesus himself saw the event beforehand. Nevertheless, they do record as an integral part of their gospel the fact that Jesus himself spoke unwaveringly of the coming vindication by God of his person and cause. And sometimes this vindication is expressed quite specifically in terms of resurrection out of death.

There can be little doubt that these predictions, which sound like a knell through the second half of Mark's Gospel (8:31; 9:31; 10:33-34; and parallels), have been touched up in the light of events. This applies particularly to the details of the last prediction, with its reference to Jesus' being delivered to the chief priests and the scribes, who will condemn him and deliver him to the Gentiles, who will mock,

spit upon, and scourge him. But there is a growing tendency of scholars to recognize in the basic predictions something that may well have its origin with Jesus himself. Apart from details read back from the passion narrative, the language can be shown to take its color from Isa. 52-53, and in the Hebrew rather than the LXX version. This, indeed, cannot be said of the final, and for us crucial, clause that "after three days" the Son of man "will rise again." But neither can this clause be derived with any exactitude from subsequent events. For it was not strictly "after three days" that Jesus rose, but "on the third day," as Matthew and Luke recognize by their corrections at this point. Moreover, the whole clause evidently reflects the words of Hos. 6:2:

After two days he will revive us;
on the third day he will raise us up,
that we may live before him;

And it is by no means improbable that Jesus should likewise have seen his vindication as Son of man, representing the whole people of God, in terms of resurrection—a pattern for the restoration of Israel long since made classic by Ezek. 37. In any case, it has been argued, the very use of the term "SON OF MAN" implies the idea of vindication out of suffering (cf. Dan. 7:13-27), and no prophecy in which this was the central figure could end simply on the note of humiliation.

That Jesus foresaw some such vindication by God as the end of his ministry of humiliation and death is made more probable by the recurrence of this theme in other forms in his teaching. These other expressions of it also help to clarify how he understood it.

The saying most closely similar to the passion predictions is that of Luke 13:32-33: "Go and tell that fox, 'Behold, I cast out demons and perform cures today and tomorrow, and the third day I finish my course [lit., I am perfected]. Nevertheless I must go on my way today and tomorrow and the day following; for it cannot be that a prophet should perish away from Jerusalem.'" The "perfecting" of Jesus is in some mysterious way linked with his death in Jerusalem, with the "accomplishment" (it is the same root in Greek) of that "baptism" by which hitherto he has been constricted (Luke 12:50) and which, with the "cup," is the gateway to his "glory" (Mark 10:35-40). These convictions of a coming glory, when the sovereignty of God, "until now" subject to the despite of its enemies (Matt. 11:12), shall be vindicated in power (Mark 9:1; cf. Luke 22:15-18), reach their climax in the assertion that, as Son of man, Jesus is to come in glory to the Father and be seated in victory at his right hand (Mark 14:62 and parallels). Such, at any rate, is one well-supported interpretation of the trial saying. As in Dan. 7:13-27, the Son of man, representing the "saints of the Most High," comes to the throne of God to be given judgment in the face of his oppressors and to receive the kingdom, the power, and the glory. On this showing, Jesus' predictions of his rising again out of death and of his exaltation in glory from the hour of the Passion (cf. Matt. 26:64; Luke 22:69: "from now on") refer to the same act of God, which is to vindicate him as Christ and Son

of man. Both have an eschatological reference, to the final messianic act of God, which only the events of the third day were to prove to be located in the midst of history.

The objection, therefore, that Jesus could not have spoken to his disciples of his rising after three days, or they would not have been so surprised by it, loses much of its force. When the disciples, who are regularly represented as baffled by this saying (Mark 9:32 and parallels; Luke 18:34), questioned among themselves what the rising (of the Son of man) from the dead might mean (Mark 9:9-10), they could have given to it no other reference than the general resurrection at the last day. Hence their subsequent question about Elijah (9:11-13): for was not he to come first, "before the great and terrible day of the LORD" (Mal. 4:5)? It was only the evidence of the event itself that could open their eyes, "for as yet they did not know [i.e., understand] the scripture, that he must rise from the dead" (John 20:9). The initial effect of the event was to shatter the expectations which later it was found to confirm. The coming vindication of the Son of man of which Jesus had spoken so often to deaf ears—and so plainly (Mark 8:32)—was fulfilled in a way they could never have guessed, by a rising, not at the end of history, however imminently that might have been expected, but within history. And yet this was not simply one more temporary anticipation of the final resurrection; it was the beginning of "the resurrection," of the new world, itself. For it was the resurrection of the Son of man, of the Christ.

C. THE FACT OF THE RESURRECTION.

1. The empty tomb. The earliest records do not speak specifically of the empty tomb, and this has in consequence been held to be a subsequent embellishment or materialization of a tradition that originally knew nothing of it. It is, however, often overlooked how insistently they speak of the full tomb. Both in the primitive Pauline summary (I Cor. 15:4) and in the Acts preaching (13:29), Jesus' BURIAL is specifically mentioned (cf. Rom. 6:4). And against the natural presumption that under Roman law the body of Jesus as a condemned criminal would have been thrown into a lime pit or left to rot, or permitted interment by the Jews in a common grave, the tradition that he was given burial in a tomb, with its circumstantial explanation in all the gospel accounts (Matt. 27:57-61; Mark 15:42-47; Luke 23:50-56; John 19:38-42), must be accepted as one of the most firmly grounded facts of Jesus' life. (This must also be set against the counterargument that naturally the body could not have been produced to refute the resurrection story, since it would already have disintegrated beyond recognition.)

The empty tomb may not receive specific mention in the most primitive evidence—though in contrast, e.g., with the Virgin Birth, it is an integral part of the earliest gospel account. But even in the pregospel tradition, insofar as this can be reconstructed from the Pauline letters and the Acts speeches (see PREACHING), it is almost certainly implicit. The statements: "that he was buried, that he was raised on the third day" (I Cor. 15:4), that "they took him down from the tree, and laid him in a tomb. But God raised him from the dead" (Acts 13:29-30), and

that "he was not abandoned to Hades, nor did his flesh see corruption" (Acts 2:31), all imply belief in a bodily resurrection. Indeed, it would have been inconceivable for a Jew to think of resurrection except in bodily terms. As I Cor. 15:35 indicates, the issue involved in the question: "How are the dead raised?" was, not whether it would be with a body, but: "With what kind of body do they come?" A bodiless resurrection, or the notion that a man might be "spiritually" raised while his body lay on in the tomb, would have seemed to the Jew an absurdity. In whatever form the Resurrection was first proclaimed by the apostles, it must have implied an empty sepulchre. The stories about it may, indeed, be secondary—they must be judged on their own merits—but the idea that they represent a materialization of an originally "spiritual" understanding of the resurrection event betrays a purely modern viewpoint. This, of course, says nothing as to whether the resurrection of Jesus *was* a bodily event, only that from the beginning it must have been believed and preached as such.

When we turn to the gospels, their evidence on the empty tomb is in substance unanimous. There are, indeed, differences of detail which at times have been given an exaggerated prominence (*see bibliography*). Thus, there are the variations in the names and number of the women who visited the tomb. Matthew (28:1) speaks of "Mary Magdalene and the other Mary" (i.e., from 27:56: "Mary the mother of James and Joseph"); Mark (16:1) of "Mary Magdalene, and Mary the mother of James [and of Joseph (15:40, 47)], and Salome"; Luke (24:10) of "Mary Magdalene and Joanna and Mary the mother of James and the other women with them"; John (20:1) of "Mary Magdalene" only (though the "We do know where they have laid him" of the next verse implies the presence of others). There are divergent accounts of the exact degree of darkness when they arrived (Mark 16:2 and parallels; John 20:1) and of the motives from which they came (Mark and Luke: to anoint the body; Matthew: to see the grave; John: unspecified [cf. 11:31; 20:11]).

Again, the description of the figure or figures at the tomb varies. According to Mark 16:5, the women, on entering the tomb, "saw a young man sitting on the right side, dressed in a white robe." In Matt. 28:2-3, in what is part of an obvious embellishment, "an angel of the Lord descended from heaven and came and rolled back the stone, and sat upon it. His appearance was like lightning, and his raiment white as snow." According to Luke 24:3-4: "When they [the women] went in they did not find the body. While they were perplexed about this, behold, two men stood by them in dazzling apparel" (cf. 24:23: "a vision of angels"). In John, while the two disciples had seen nothing in the tomb but the graveclothes, Mary subsequently "stooped to look into the tomb; and she saw two angels in white, sitting where the body of Jesus had lain, one at the head and one at the feet" (20:11-12). Furthermore, there is some divergence about what these figures said (Matt. 28:5-7; Mark 16:6-7; Luke 24:5-7, vss. 6b-7 being clearly editorial; John 20:13) and how the women responded (Matt. 28:8; Mark 16:8; Luke 24:8-9; John 20:13-14 [but cf. 20:2, 18]).

None of these, however, is the kind of difference that impugns the authenticity of the narrative. Indeed, they are all precisely what one would look for in genuine accounts of so confused and confusing a scene. The very absence of uniformity or harmonization tells against any subsequent fabrication or agreed story, and the reserve and relatively minor legendary accretions, even in Matthew, contrast greatly with the highly colorful accounts—e.g., in the Gospel of Peter 6-12 and in the Gospel According to the Hebrews (according to Jerome *Of Illustrious Men* 2, 16).

But, details of description apart, the basic witness is extraordinarily unanimous. It is that through the good offices of Joseph of Arimathea the body of Jesus, swathed in linen, was given hurried burial outside Jerusalem on the Friday night in a rock tomb which was subsequently closed by a large stone. After the rest imposed by the sabbath, the women came at dawn on Sunday, to find the stone rolled away from the tomb and the body gone. The natural supposition was that the grave had been disturbed by human agents: "They have taken the Lord out of the tomb, and we do not know where they have laid him" (John 20:2). According to the Synoptists, however, the figure or figures at the tomb insist that Jesus has risen (in John this communication comes from Jesus himself, and in Matthew from both sources), and the women are charged to tell the disciples; "but these words seemed to them an idle tale, and they did not believe them" (Luke 24:11).

There is nothing in the records to suggest that the turn of events was anything but utterly unexpected, and no suggestion, except in John 20:8, where it is said the Beloved Disciple "saw and believed," that the empty tomb by itself was anything but bewildering and perplexing (cf. Luke 24:3-4). To say that it was the product of wishful thinking is to ignore the fact that it was the last thing that the women or the disciples could have wished. And when they found the tomb empty, their sole desire was to recover the body: "Sir, if you have carried him away, tell me where you have laid him, and I will take him away" (John 20:15). The theory that the disciples had themselves stolen the body, recorded by Matthew as put out by the Jews (28:13-15), implies that the whole subsequent preaching of the Resurrection was based on a conscious fraud; and this is as psychologically improbable as the supposed original action. The currency of this theory is testimony only to the fact that those who had most interest in doing so could neither deny the tomb was empty nor produce the body. Nor does it solve anything to postulate some entirely unidentified and unidentifiable robbers who vanished with the body as mysteriously as they came. The only alternative explanations—that the women visited the wrong grave, or that Jesus merely swooned on the cross and subsequently extricated himself from the linen bands and the tomb—have failed to command any serious measure of support. And all these explanations are bound to write off the detailed description of the graveclothes in John 20:6-7, which has none of the marks of incipient legend, such as characterize the story of the watch in Matt. 27:62-28:15.

Recent scholars have, therefore, tended to abandon

the attempt to give rationalistic explanations of the narrative as it stands. The whole story is seen rather as the inevitable representation in "mythological" terms of what began as the purely spiritual acknowledgment of the cross of Christ, not as a defeat, but as the victory of God. This acknowledgment, it is said, is what the Resurrection originally meant (and what it essentially means), and it was this conviction, and not any empty tomb, that dawned upon the disciples on the third day. This view embodies the modern existentialist presumption that "authentic" events take place in the realm of decision rather than of physical change.

The only issue relevant here, however, is whether or not this interpretation does justice to the scriptural evidence. It cannot, as we have seen, seriously claim to be supported by any evidence prior to the gospel records themselves; for there is no hint of any earlier preaching except of a bodily resurrection. Moreover, if the whole story of the empty tomb were a subsequent construction—and either the women found the body as they expected, or they did not go at all, or there was no tomb in the first place—it is difficult to believe that the resultant tradition would have shown either the agreements or the disagreements which it now does. Many, in fact, will continue to find it easier to believe that the empty tomb produced the disciples' faith than that the disciples' faith produced the empty tomb.

Nevertheless, there is no suggestion in the NT that to believe in the Resurrection means to believe in the empty tomb. For the empty tomb is not itself the Resurrection, any more than the shell of the chrysalis is the butterfly. Moreover, however objective it may appear, it can never be decisive. On the face of it, it looks the most public and solid piece of evidence: either it was empty or it was not. Yet the fact that the body was not produced will never prove that it could not have been produced. And, even if the tomb could be certified empty with complete assurance, what would it establish? Precisely, as the women realized with dismay, that "he is not here."

2. The appearances. According to all our accounts, it was the appearances, not the tomb, that were decisive for the disciples' faith. And there can be no doubt that they were an essential part of the earliest witness. Paul gives a detailed list of them in I Cor. 15:5-7 as forming part of the original tradition that he had himself received; and he adds that most of the witnesses were still alive. There are further accounts in all the gospels. The evidence of Mark 16:9-20 must be discounted, as clearly not belonging to the original text; but the majority of scholars would agree that it replaces an ending, now lost, which included an appearance to the disciples (cf. 16:7). See MARK, GOSPEL OF.

While some of the equations must remain uncertain, there appear to be records of at least eleven different appearances, apart from that to Paul (I Cor. 15:8; cf. Acts 9:3-8; 22:6-11; 26:12-18), which he himself claimed as one of the series:

1. To the women (Matt. 28:9-10)
2. To Mary Magdalene (John 20:11-18)
3. To Peter (I Cor. 15:5; Luke 24:34; cf. Mark 16:7?)

4. To two disciples on the road to Emmaus (Luke 24:13-31)
- 5-8. To the Eleven and other disciples
 5. Luke 24:36-49; John 20:19-23 (= I Cor. 15:5?)
 6. John 20:24-29
 7. Matt. 28:16-20 (cf. Mark 16:7?)
 8. Acts 1:6-9 (= Luke 24:50-51? = I Cor. 15:7?)
9. To seven disciples (John 21:1-14)
10. To more than five hundred brethren (I Cor. 15:6)
11. To James (I Cor. 15:7)

Three aspects of these appearances call for comment: (a) their recipients; (b) their location; (c) their form.

a) The common feature in all the appearances is that they were granted to those who were already followers of Christ. The consistent record of the NT is that the visions of Jesus after the Resurrection did not lie within the natural power of any who might wish to see him. He had not returned, like Lazarus, to public inspection (cf. John 12:9). The primitive account was that "God . . . made him manifest," and that "not to all the people but to us who were chosen by God as witnesses" (Acts 10:40-41); and the later descriptions all emphasize that the initiative lay with Christ in making himself visible: "he appeared" (Luke 24:34; Acts 1:3; 9:17; 13:31; I Cor. 15:5-8); "he revealed himself" (John 21:1, 14); "he presented himself alive" (Acts 1:3). The appearances were assurances given to those who had previously accepted him, not proof to compel faith or confound doubt (cf. John 14:19-23). It is only with the apocryphal Gospel of Peter (ch. 9) that the Resurrection itself is described as a public event and the rising Jesus is seen by unbelievers.

b) There is no similarly uniform tradition as regards the place of the appearances. Those that are localized (and none of the ones recorded in I Cor. 15 is) divide into two groups: in Jerusalem or its environs (1-6, 8); and in Galilee (7, 9). Mark 16:7 seems to presuppose a Galilee tradition, which Matthew confirms (though he also records a fleeting appearance to the women at the tomb); Luke has an exclusively Jerusalem tradition, as has John except in his Epilogue (ch. 21). There is no way of harmonizing these variant traditions, but equally no insuperable difficulty in supposing that appearances took place in both areas. It has been suggested that the appearances, first in Jerusalem, then in Galilee, and finally again in Jerusalem, correspond with where the disciples would naturally have been during, between, and again during, the festivals of Passover and Pentecost. Others have detected doctrinal interests of the different evangelists in Galilee and Jerusalem respectively and have seen the divergence as theological.

c) It is widely stated that there are divergences also in the form of the appearances, and that while Paul witnesses to purely spiritual visions, they are represented as progressively more materialistic as the gospel tradition develops. The only real evidence for this thesis, which reflects the same presupposition observed in relation to the empty tomb—namely,

that a purely spiritual resurrection is more probable and therefore more primitive—is that Paul regarded all the other appearances as conforming to the pattern of his own vision on the Damascus Road. But there is little basis for such a deduction. So far from regarding his own vision as normative, he marvels at his right to include it in the series at all. Paul, in fact, says nothing about the manner of the appearances, nor does he equate even his own seeing of the Lord (I Cor. 9:1) with his other “visions and revelations” (II Cor. 12:1-7). In the gospel records it is arbitrary to arrange the appearances in order of increasing materialization. There is none in Mark, and there are no details in Matthew except that the women “took hold of his feet” (28:9), an action expressly forbidden to Mary Magdalene in John 20:17. All the appearances, in fact, depict the same phenomenon, of a body identical yet changed, transcending the limitations of the flesh yet capable of manifesting itself within the order of the flesh. We may describe this as a “spiritual” (I Cor. 15:44) or “glorified” (cf. I Cor. 15:43; Phil. 3:21) body (though Paul himself does not apply such language to the resurrection appearances), so long as we do not import into these phrases any opposition to the physical as such. It is, indeed, the two evangelists who most insist upon the physical character of the manifestations (Luke 24:39-43; John 20:20, 27) who state most specifically that Jesus had already, by the time of the appearances, “enter[ed] into his glory” (Luke 24:26) and been “glorified” (John 13:31, etc.; cf. 20:22 with 7:39).

The impression that Paul witnesses to apparitions of the glorified Christ, whereas the gospels stress the continuity with his earthly form, is only partially valid. The gospels do stress the identity between the risen Lord and the Jesus whom the disciples knew and remembered. But the theological purpose of the resurrection stories is just as much to present this Jesus as exalted in the Father's glory. Indeed, there is no ultimate distinction between what might be called resurrection and ascension appearances. Though the emphasis may differ as the first shock of recognition passes, they are all demonstrations of Jesus as not only alive but sovereign. Thus Matthew, perhaps like Mark before him, closes upon a vision of the exalted Christ (Matt. 28:16-20) which in its language echoes that of the Son of man in Dan. 7:14, to whom

was given dominion
and glory and kingdom,
that all peoples, nations, and languages
should serve him;
his dominion is an everlasting dominion,
which shall not pass away,
and his kingdom one
that shall not be destroyed.

Even Acts 1:1-11, which equates the Ascension with the termination of the appearances (contrast Luke 9:51; 22:69; 24:26, where Christ's “taking up” to the power and glory of the Father is associated with the Passion and the Resurrection), treats this moment as one of adieu rather than of glorification. The moment of glory has already occurred, and the appearances are regarded as lying the other side of

Jesus' enthronement as Lord and Christ. The primitive witness was that Jesus was “designated Son of God in power” (the essential message of the ASCENSION) “by [or from] his resurrection from the dead” (Rom. 1:4); and this would point to a manifestation of Jesus in glory at the time of the Resurrection declaring him to be Son of God, such as is anticipated in the transfiguration vision (Mark 9:2-8 and parallels), whose meaning was to be revealed only when “the Son of man should have risen from the dead” (Mark 9:9).

It was the appearances which, according to our evidence, transformed the apostles. If we do not accept that the appearances produced the belief, then we have to postulate that the belief produced the appearances. They then become, if not pure hallucinations, at any rate the projections, objectivizations, of an already formed conviction that Jesus was alive and sovereign: the disciples believed themselves into seeing. But this still leaves unexplained where they derived the idea that he could be alive—nothing, on the face of it, seems to have been further from their minds. Moreover, the accounts of the appearances betray no trace of mass suggestion, but (except in the case of the five hundred brethren at once) speak of separate manifestations to persons and groups who show no other signs of suggestibility or hysteria; in fact, doubt and incredulity mix in their minds in equal proportion with frightened joy.

In contrast with the empty tomb, the resurrection appearances look far less tangible as evidence. It can never be proved that they were seen except by those who were previously prepared to believe. Yet we are here at one of the turning points of world history: no belief in the Resurrection, no Christian church. And, without those experiences in some form that was not illusory, is it possible to account for that belief and for the radical and permanent transformation of the disciples that followed? Yet, once more, what do the appearances by themselves prove? They provide, for those interested in physical research, a reasonably well-documented case of temporary survival; but nothing in themselves of any religious significance. They spelled resurrection only to those who had already begun to recognize in Jesus the Christ, the Son of God. And this introduces the third and apparently most intangible set of evidence.

3. The experience of the living Christ. If the appearances had been merely psychic phenomena, one would expect the sense that Jesus was alive to have grown progressively less vivid once the disciples ceased to be “in touch,” and those who had not seen the evidence to be as skeptical as third parties usually are to such supposed communications from the dead—let alone to reports of miraculously empty graves. But, in fact, the conviction became only the more settled once the appearances had ceased, and those who had not seen were won to just as living a faith as those who had. Moreover, the ground of appeal even for those who had shared in the appearances was not the past experiences so much as the present experience. Paul may have appealed to his vision of the risen Lord for his authority as an apostle (I Cor. 9:1; 15:8-9) and for explaining his changed manner of life (Acts 22:1-21; 26:1-23); but he never

reverts to it as the ground of his present faith. The basis for this is the abiding experience of the "Christ who lives in me" (Gal. 2:20) and the continuing knowledge of the "power of his resurrection" (Phil. 3:10). Similarly, it was to the signs of the living Christ, to "this which you see and hear" (Acts 2:33), to the powers now at work in his name (Acts 3:15-16; 4:30; etc.), that the first apostles appealed, as much as to the events they witnessed, for "their testimony to the resurrection of the Lord Jesus" (Acts 4:33).

This abiding and transforming experience, grounded, not on the reports of others, but on the firsthand awareness of the living Christ, is what made and sustained the Christian church. And the very existence of the church, not merely as the historical consequence of past phenomena but as the embodiment of a present faith, is itself a major part of the evidence of the Resurrection. Indeed, it was this present conviction, which thrills through the letters, that alone caused the other evidence to be preserved. The NT evidence for the Resurrection is to be seen not merely in the closing chapters of the gospels; it is to be seen above all in the faith which prompted the very composition of the gospels.

Moreover, though the present experience of the living Christ may look the weakest evidence of all—for it is less public even than the appearances, and quite intangible—yet the continuing existence of the Christian church which lives by this experience is the fact of history that is least open to doubt. No one can deny its existence, however skeptical he may be of the empty tomb or the appearances. And, finally, this knowledge of the living, victorious Christ is the only real evidence for affirming that he is risen, that he lives with God, as distinct from saying that he is not in his grave or that he survived as a ghost for a few weeks. As the NT writers were well aware, to assert that Jesus is alive now is to make a claim that only his continued presence and activity, and not simply past facts, however well authenticated, can sustain and confirm.

And yet the Resurrection remains for the NT, not primarily an experience, but an event. It uses the phrase "witnesses of the Resurrection," not of all who can testify to its power, but only of those who were eyewitnesses of the event—or rather of the identity between the risen Christ whom they had seen and the man with whom they had companied "during all the time that the Lord Jesus went in and out among us, beginning from the baptism of John until the day when he was taken up from us" (Acts 1:21-22; cf. 10:41; 13:31). The Resurrection is not simply the risen Christ, an abiding presence with which every generation is contemporaneous, but an act of God in history of which only those can be witnesses who were there to see. "Those who have not seen" may be equally "blessed" (John 20:29); but they are dependent, nevertheless, for their belief upon the "word" of those who have (John 17:20). The continuing presence of the living Christ can never detach the Christian faith in the Resurrection from history. Each generation is not equidistant from it: every successive generation has to go back to the apostolic witness. The "many proofs" (Acts 1:3) of

the Resurrection which the NT sets down are recorded, not simply as historical explanations of the apostles' own faith, but as the acts of God to which all subsequent faith must remain the response. Yet neither are the historical facts by themselves the witness: "We are witnesses to these things, and so is the Holy Spirit whom God has given to those who obey him" (Acts 5:32). The signs of the Resurrection in the life of the believer and the church are the indispensable internal testimony, without which Jesus might have been "raised" but could not have been preached as "risen."

D. THE MEANING OF THE RESURRECTION.

1. For the present time. *a. The identity of the risen one.* "It is the Lord!" (John 21:7); such for the disciples was the first instinctive reaction to the Resurrection. That he was "alive" (Luke 24:23), "risen indeed" (Luke 24:34), and that it was really he, was the great and staggering marvel. "I have seen the Lord," says Mary Magdalene to the disciples (John 20:18); "We have seen the Lord," say the disciples to Thomas (John 20:25). Was it really possible? Incredulity and doubt run right through the narratives (Matt. 28:17; Luke 24:11, 38, 41; John 20:25, 27; 21:4; and even 21:12). The emphasis laid upon physical aspects of the Lord's risen body is not in the interest of materialization for its own sake but of placing beyond dispute his identity: "See my hands and my feet, that it is I myself [ἐγὼ εἰμι αὐτός]; handle me, and see" (Luke 24:39); "he showed them his hands and his side. Then the disciples were glad when they saw the Lord" (John 20:20; cf. vs. 25, 27). Every appearance has at its heart a recognition scene, in which Jesus either says something (Matt. 28:9; John 20:16, 19, 26; cf. Acts 9:5 and parallels) or does something (Luke 24:30-31, 39-43; John 20:20, 27; 21:6, 13) which establishes his identity.

The actions by which this recognition is achieved are not fortuitous. They fall into two groups: (*a*) displaying the marks of the Passion (Luke 24:39; John 20:20, 27); and (*b*) sharing food (Luke 24:30, 35, 41-43; John 21:12-13; Acts 1:4 RSV mg.; 10:41; cf. Mark 16:14). The latter action recalls the Jesus, not only of the Last Supper, with his promise of eating and drinking new in the kingdom of God (Matt. 26:29; Mark 14:25; Luke 22:16-22), but also of that other messianic meal with bread and fish (Mark 6:30-44 and parallels; John 6:1-15) after which prematurely they sought to make him king (cf. especially John 21:13 with 6:11). The lines are redrawn between the Passion and the glory. Only those who have continued with him in his trials can eat with him at his table in his kingdom (Luke 22:28-30), and only those who have shared the suffering of the Son of man can recognize that same figure in power (Matt. 28:18); for thus it was necessary for the Christ to enter into his glory (Luke 24:26; cf. Mark 10:37-38). The sole recipients of the resurrection appearances can be those able to recognize, not simply the physical scars—others could have vouched for his identity at this level—but the spiritual continuity: those, in other words, who, in a more than literal sense, "came up with him from Galilee to Jerusalem" (Acts 13:31; cf. Mark 10:32-34).

For this reason the identity of Jesus through death and life is not confined to the first moments of recognition. It is one of the abiding marks of the NT witness that it should be "this Jesus" (Acts 1:11; 2:23) that was dead who is risen and ascended and shall come again. The returning Lord cannot appear without the marks of the nails (John 20:25), the Lamb victorious is the Lamb standing, "as though it had been slain" (Rev. 5:6), and the "living one" is by definition the one "who died" (Rev. 1:18; 2:8). This note of continuity is preserved throughout the apostolic preaching, from the first crude antithesis: "The God of our fathers raised Jesus whom you killed by hanging him on a tree. God exalted him at his right hand as Leader and Savior" (Acts 5:30-31), to the final climax of Paul's most mature writing: "It is Christ Jesus, who died, yes, who was raised from the dead, who is at the right hand of God, who indeed intercedes for us" (Rom. 8:34 RSV mg.). "We see Jesus, . . . crowned with glory and honor because of the suffering of death" (Heb. 2:9): this unexchangeable relationship of the risen glory with suffering and death is what ties the apostolic faith to history. The experience of the living Christ is not the awareness of the ever-present lordship of God in Christ, which was temporarily darkened by the Cross; it is the knowledge of a victory inaugurated only through the once-and-for-all act of the Cross. The tense of the Resurrection is the perfect, and not simply the aorist or the present.

b. The vindication of God in Christ. If the first reaction of the disciples was that Jesus was alive, the second was the realization that he had been raised by and to the right hand of God. He not only lived but also reigned. All that men had done had been overturned by the vindicating action of God: "The stone which was rejected by you builders . . . has become the head of the corner" (Acts 4:11); "this Jesus . . . you crucified and killed by the hands of lawless men. But God raised him up" (Acts 2:23-24). The constant NT emphasis is not simply that Christ has risen, but that God has raised him or that he has been raised (by God; Acts 2:32; 3:15; 4:10; 5:30; etc.; Rom. 4:24-25; 6:4; 8:11; I Cor. 15:4; II Cor. 4:14; Gal. 1:1; Eph. 1:20; Heb. 13:20; etc.). This action is associated with the Spirit (Rom. 1:4; 8:11; I Tim. 3:16; I Pet. 3:18), the power (II Cor. 13:4), and the glory of God (Rom. 6:4). Indeed, that God "raised him from the dead" and that he "gave him glory" (I Pet. 1:21) are virtually synonymous. For the consistent witness is that God raised Jesus, not from the underworld back to earth, but up to heaven.

By virtue of the Resurrection, Jesus "has gone into heaven and is at the right hand of God, with angels, authorities, and powers subject to him" (I Pet. 3:21-22). It is impossible in the Greek to distinguish between his being raised "by" the right hand of God and "to" the right hand of God (Acts 2:33; 5:31). The various phrases are all descriptions of the single act by which "God has highly exalted him and bestowed on him the name which is above every name" (Phil. 2:9). Hence it is no coincidence that in the earliest preaching the Resurrection is associated with Jesus' designation by God as the "man of his right hand" (equated in Ps. 80:17 with the "son of man")

—namely, as Lord and Christ (Acts 2:36), Son (Acts 13:33; Rom. 1:4), Savior (Acts 5:31), and Judge (Acts 10:42; 17:31). This is the moment when God's seal is placed unmistakably upon all that Jesus was and did—and has still to do. For to him he has also "subjected the world to come" (Heb. 2:5; cf. Eph. 1:21). As the "living one," Jesus has the "keys of Death and Hades" (Rev. 1:18), and in his triumph the principalities and powers have already been disarmed and exposed (Col. 2:15). They have yet, indeed, finally to be "destroyed," but even now he reigns and must reign "until he has put all his enemies under his feet" (I Cor. 15:24-28).

c. Union with the life of Christ. Resurrection is always seen by the NT, not simply as the moment when Jesus himself was "crowned with glory and honor" (Heb. 2:9) and "passed through the heavens" (Heb. 4:14), but as the moment also when he "opened the kingdom of heaven to all believers" and inaugurated the "new and living way" (Heb. 10:20) between man and God. This is the point when the constriction that had hitherto confined the work of Jesus (Luke 12:50) is broken. The powers of the kingdom were at work in him (Matt. 12:28 = Luke 11:20), but, in his own words: "Unless a grain of wheat falls into the earth and dies, it remains alone; but if it dies, it bears much fruit" (John 12:24). The Resurrection is the point of release, when the "life" that Jesus came to bring (John 10:10) is poured forth in power and let loose in all the world.

This finds expression in a number of different ways. First, and most obviously, the Resurrection means that Jesus is restored to his friends, never again to be parted from them (cf. John 16:22). The reunion of Jesus with his disciples is a powerful motif in the gospel narratives, especially in the Fourth Gospel: "I will not leave you desolate; I will come to you" (John 14:18). The "you will see me" of John 14:19 corresponds to the promise given to the disciples in Mark 16:7. And this restoration is not a mere human reunion but a permanent divine indwelling (John 14:23): "Lo, I am with you always, to the close of the age" (Matt. 28:20).

The restoration of Jesus to his disciples is closely paralleled by the promised outpouring of the HOLY SPIRIT. In Luke-Acts the gift of the Spirit, like the Ascension, is separated temporally from the moment of the Resurrection, but theologically they are all part of a single complex, as is evident in Acts 2:32-33: "This Jesus God raised up, and of that we all are witnesses. Being therefore exalted at the right hand of God, and having received from the Father the promise of the Holy Spirit, he has poured out this which you see and hear." This connection between the exaltation of Christ to the Father and his gift of the Spirit recurs in Eph. 4:8-10. In the Fourth Gospel the gift of the Spirit is clearly understood as contingent upon the glorification of Jesus (John 7:39). The Counselor cannot come unless Jesus goes (16:7); and the inbreathing of the Spirit is the direct gift of the risen Christ (20:22), with whose presence, indeed, he is equated (cf., e.g., 14:28; 16:7). He, like Jesus, is promised to the disciples "to be with you forever" (14:16).

If the Resurrection means that Jesus through the

Spirit is to be with the disciples, it means equally that the disciples are to be with Jesus, to share his risen life: "Because I live, you will live also . . . you in me, and I in you" (John 14:19-20); "when I go and prepare a place for you, I will come again and will take you to myself, that where I am you may be also" (14:3; cf. II Cor. 4:14). That God "made us alive together with Christ . . . and raised us up with him, and made us sit with him in the heavenly places" (Eph. 2:5-6), is one of the fundamental convictions of the NT (cf. Col. 2:12; 3:1). This conviction is equally expressed in the future tense: "God raised the Lord and will also raise us up by his power" (I Cor. 6:14; see § D2 below). But there is no contradiction here. Paul immediately follows his statement in Rom. 6:8 that "if we have died with Christ, we believe that we shall also live with him," by reminding his readers that they are "men who have been brought from death to life" (6:13; cf. vs. 11). The message that God sent his Son into the world that we might "live through him" (I John 4:9), and that "life" (which is essentially the "life of Jesus" [II Cor. 4:10-11]) is a present possession of the Christian, requires no emphasis. "If Christ has not been raised, . . . you are still in your sins" (I Cor. 15:17), "dead through the trespasses and sins in which you once walked" (Eph. 2:1-2, 5). It is the Resurrection through which the new life, with its forgiveness of sins, is offered (Acts 5:30-31; 13:37-38); for he was "raised for our justification" (Rom. 4:25). This new life is mediated through faith (Gal. 2:20), which is essentially faith in the God who "gives life to the dead" (Rom. 4:17; cf. II Cor. 1:9) and "raised [Jesus] from the dead" (Rom. 10:9-10); and through BAPTISM, which is the act whereby the death and resurrection of Christ are reproduced in us (Rom. 6:3-5; Col. 2:12; I Pet. 3:21).

d. The beginning of the new age. To say that the Resurrection designates Jesus as the Christ is but another way of stating that it inaugurates the messianic age, the new creation. "In Jesus" the apostles are able to proclaim the "resurrection from the dead" (Acts 4:2). "By being the first to rise from the dead" (Acts 26:23), "he is the beginning" (Col. 1:18): in him "the resurrection," which belongs to the age to come (Luke 20:34-36), has already set in. In his person it is no longer reserved for the "last day"; he is even now the "resurrection and the life" (John 11:24-25).

Yet once again the new age is not confined to his person. He is but the "first-born from the dead" (Col. 1:18; Rev. 1:5; cf. Rom. 8:29), the "first fruits" of the new order (I Cor. 15:20, 23). In one sense he remains unique. Even the resurrection of those who "belong to Christ" still waits upon "his coming" (I Cor. 15:23), though Matthew, as an anticipatory portent, associates the exhumation of "many bodies of the saints" with the Resurrection itself (Matt. 27:52-53). Even those raised from the dead by Jesus and the apostles have still to die again. Only he is exempt from this (Acts 13:34; Rom. 6:9); for the rest of mankind the "last enemy" remains (I Cor. 15:26). Yet at the same time Jesus promises that "he who believes in me, though he die, yet shall he live, and whoever lives and believes in me shall never die" (John 11:25-26). "If any one is in Christ, he is a new

creation [or, there is the new creation]; the old has passed away, behold, the new has come" (II Cor. 5:17). Those "born anew . . . through the resurrection of Jesus Christ from the dead" (I Pet. 1:3) can be said already to have been "glorified" (Rom. 8:30), or, more exactly, to be "partaker[s] in the glory that is to be revealed" (I Pet. 5:1); they have "wasted . . . the powers of the age to come" (Heb. 6:5) and "passed from death to life" (John 5:24; I John 3:14).

Nevertheless, all this language is proleptic and is constantly balanced by other language which puts beyond doubt that that to which the Christian has been born anew is essentially "living hope," an "inheritance" (I Pet. 1:3-4), of which in the "Holy Spirit of promise" (KJV) we have but the "guarantee . . . until we acquire possession of it" (Eph. 1:14; cf. Rom. 8:23; II Cor. 1:22; 5:5). Those who teach a completely realized eschatology, "that the resurrection is past already," are uncompromisingly condemned (II Tim. 2:18).

2. For the future. a. The resurrection hope. According to Acts 23:6, it was for the "hope and the resurrection of the dead" that Paul felt himself to be on trial. This may appear a curious statement, seeing that it was clearly as a Christian that Paul was being charged and that he explicitly affirms of his accusers that it was a "hope . . . which these themselves accept" (24:15). There are, indeed, tactical motives behind his line of defense at this point (23:6-9). Nevertheless, there is a sense in which Paul sees the whole Christian gospel as involved in this hope — negatively, because if it is "incredible . . . that God raises the dead" (26:8), then "our preaching is in vain. . . . We are even found to be misrepresenting God, because we testified of God that he raised Christ, whom he did not raise if it is true that the dead are not raised" (I Cor. 15:14-15); and positively, because "in fact Christ has been raised from the dead" (I Cor. 15:20) and in this the resurrection hope is included, for "Christ" is a representative figure. That "in Christ shall all be made alive" (I Cor. 15:22) is but another way of stating the Christian gospel of Christ as the new Adam, of all humanity restored in him (cf. Rom. 5:15-21; I Cor. 15:45-49).

The connection between Christ's resurrection and the future resurrection of those who are in him is emphasized as strongly as the conviction that those who are "in Christ Jesus" are already "alive to God" (Rom. 6:11): "If we have been united with him in a death like his, we shall certainly be united with him in a resurrection like his" (Rom. 6:5); "God raised the Lord and will also raise us up by his power" (I Cor. 6:14); "If the Spirit of him who raised Christ Jesus from the dead dwells in you, he who raised Christ Jesus from the dead will give life to your mortal bodies also through his Spirit which dwells in you" (Rom. 8:11).

This last passage again draws attention to the HOLY SPIRIT as the vital link, not only between Christ's resurrection and ours, but also between our present and our future state. That "what is mortal" will be "swallowed up by life" is even now guaranteed by the gift of the Spirit (II Cor. 5:4-5). For the Spirit is the anticipation of the End in the present, and the events at the "last trumpet" when "we shall all be changed" (I Cor. 15:51-52) are but

the climax to that transformation wrought by the Spirit by which already "we . . . are being changed into his likeness from one degree of glory to another" (II Cor. 3:18). For Christ "will change our lowly body to be like his glorious body, by the power which enables him to subject all things to himself" (Phil. 3:21); and this power is the Spirit, through whom even now "our inner nature is being renewed every day" (II Cor. 4:16). The process by which we are "transformed," ultimately to be "conformed" to the body of his glory (Phil. 3:21; cf. Rom. 8:29), is but the same process by which Christ himself is "formed" in us (Gal. 4:19). And this begins at baptism, where, by incorporation into the body of Christ, we come to "belong to another, to him who has been raised from the dead" (Rom. 7:4). By such language Paul relates the risen life at present known in Christ to the resurrection yet to come. The agent of this continuity through change is, from the divine side, the Spirit; its vehicle, from the human side, is the Body.

b. The resurrection body. "Flesh and blood cannot inherit the kingdom of God, nor does the perishable inherit the imperishable" (I Cor. 15:50). This is fundamental, and neither Paul nor any other NT writer speaks or could speak of the "resurrection of the flesh [σάρξ]." But he does speak of the resurrection of the body (σῶμα). The "physical body" (I Cor. 15:44) is indeed "perishable" (vs. 42) and "mortal" (Rom. 6:12; 8:11). Nevertheless, "this perishable nature must put on the imperishable, and this mortal nature must put on immortality" (I Cor. 15:33). This process, as we have seen, is closely connected, for Paul, with "putting on Christ" (Rom. 13:14; Gal. 3:27); for this is to "put on the new nature" (KJV "the new man"; Eph. 4:24; Col. 3:10). The new man is Christ (Eph. 2:15; 4:13; cf. Col. 3:11), the "last" or "second" Adam (I Cor. 15:45-47), and the resurrection body is, in the first instance, the body of Christ, in union with which and as members of which our own bodies are quickened and glorified (cf. I Cor. 6:14-15). To be raised is to "bear the image of the man of heaven" (I Cor. 15:49). Paul does not, in fact, discuss the resurrection body of any but those who "belong to Christ" (I Cor. 15:23), since it is solely in the context of their resurrection and the doubting of it by the Thessalonians (I Thess. 4:13) and the Corinthians (I Cor. 15:12) that he writes.

As regards the nature of the resurrection body, Paul's sole point is to stress that, for all the identity of person, there is a radical discontinuity of form. "What you sow does not come to life unless it dies. And what you sow is not the body which is to be. . . . But God gives it a body as he has chosen" (I Cor. 15:36-38). The Corinthians were questioning whether the dead could be raised, because they had no physical body (I Cor. 15:35), and whether the living needed to be, precisely because they had. Both, Paul insists, are in exactly the same position: "We shall not all sleep, but we shall all be changed" (I Cor. 15:51); and those that are alive will have no advantage over those that have fallen asleep (I Thess. 4:15; cf. II Cor. 4:14).

c. The resurrection and the Parousia. Those that are alive are those "who are left until the coming of the Lord," and Paul at first includes himself among

them: "The dead in Christ will rise first; then we who are alive" (I Thess. 4:16-17); "the dead will be raised imperishable, and we shall be changed" (I Cor. 15:52). His confidence seems to have waned in II Cor. 4:12-14, where he says: "Death is at work in us, but life in you," and expresses the faith that "he who raised the Lord Jesus will raise us also with Jesus and bring us with you into his presence." And he may later have viewed the prospect of death rather differently. In II Cor. 5:4 his preference is clearly for living on, that "what is mortal may be swallowed up by life" without his having first to be "unclothed." But in Phil. 1:23 his "desire is to depart and be with Christ, for that is far better." Nevertheless, even here he says: "I know that I shall remain" (vs. 25)—though this need not mean until the "day of Christ" (vss. 6, 10); and the aspiration of 3:11 "that if possible I may attain the resurrection from the dead" probably implies that he is now reckoning himself among those who must go through the process of death. But it remains true that Paul is always writing to a situation in which only a minority of Christians will need to be raised "from among the dead."

The focus of hope is always the PAROUSIA, the coming of Christ, rather than the raising of the dead. Nor is there any question of the dead being raised prior to this or independently of it (II Cor. 5:1 cannot with any consistency be interpreted of the moment of death. "We have a building from God" is probably best referred to the present anticipation in the body of Christ of the "heavenly dwelling" for which we long). Indeed, even at the Parousia it is only "those who belong to Christ" who are raised (I Cor. 15:23; I Thess. 4:16). Paul never brings this resurrection into relation with his belief in the general resurrection "of both the just and the unjust" (Acts 24:15), though this latter is presumably associated in I Cor. 15:24 with τέλος (the "end," or possibly the "rest"—i.e., of the dead). The author of Revelation alone specifies two resurrections, for Christians and for the "rest of the dead," separated by a thousand years (Rev. 20:4-5). Other writers appear to envisage a single resurrection for believers and nonbelievers at the "last day" (e.g., John 5:28-29; 6:39-40, 44, 54; 11:24; Luke 14:14).

But for Paul the important point is the theological unity between the resurrection of Christians and the parousia of Christ. It is not merely that they occur together (cf. Phil. 3:20-21); the dead are raised precisely in order to participate in the messianic victory. For when Christ comes, it is "to be glorified in his saints" (II Thess. 1:10; cf. Rom. 8:17). The Parousia is to be a corporate appearing (Col. 3:4), the "coming of our Lord Jesus Christ and our assembling to meet him" (II Thess. 2:1). And from this the dead in Christ—as risen men—cannot be excluded. "For since we believe that Jesus died and rose again, even so, through Jesus, God will bring with him those who have fallen asleep" (I Thess. 4:14; cf. II Cor. 4:14). And it is in relation to their "coming" (i.e., at the Parousia) that Paul raises the question of their resurrection body (I Cor. 15:35). Just as the resurrection of Christ was not simply restoration to life but exaltation to victory, so it is with the resurrection of those that are in him. The purpose of their "coming to life again" is that they may "reign with

Christ" (Rev. 20:4). The resurrection of Christians and the parousia of Christ are essentially one. The trumpet that marks the one (I Cor. 15:52) marks the other (Matt. 24:31; I Thess. 4:16). And it is the trumpet of the victory of God in Christ, the purpose of whose death and resurrection was that "whether we wake or sleep we might live with him" (I Thess. 5:10), or, in the more resounding phrase of Rom. 5:17, "reign in life through the one man Jesus Christ."

Bibliography. There are extensive articles in *Encyclopaedia Biblica* (1903; P. W. Schmiedel gives the best presentation of the radical critical position, where the "contradictions" of the gospel narratives are ruthlessly exposed); *HDB* (1908; W. J. Sparrow-Simpson—conservative and summary); *Dictionary of the Apostolic Church* (1918; J. M. Shaw—much the most comprehensive). Each of these has a full bibliography to date of publication.

Representative expositions of the older conservative case: H. Latham, *The Risen Master* (1901); J. Orr, *The Resurrection of Jesus* (1908).

Representative expositions of the liberal case: K. Lake, *The Historical Evidence for the Resurrection of Jesus Christ* (1907); C. R. Bowen, *The Resurrection in the NT* (1911); S. V. McCasland, *The Resurrection of Jesus* (1932).

RESURRECTION OF CHRIST, BOOK OF, BY BARTHOLOMEW THE APOSTLE. See BARTHOLOMEW THE APOSTLE, BOOK OF THE RESURRECTION OF CHRIST BY.

REU רֹעוּ, rē'ū [רֵעוּ, friend, companion, probably shortened form of REUEL; cf. Akkad. personal name Ra'ū and Aram. רֵעוּיָה; 'Ραγού]; in Luke 3:35 KJV RA-GAU rā'gō. A Shemite; the son of Peleg, and the father of Serug (Gen. 11:18-21; I Chr. 1:25; Luke 3:35). If the name is cognate with Akkadian Ra'īlu, an island in the Euphrates just below 'Anat, it may identify both a Mesopotamian site and a tribe.

L. HICKS

REUBEN רְעוּבֵן [רֵעוּבֵן, perhaps meaning substitute (for another child), from Arab. r' b, to restore, ending -en]; REUBENITE —רְעוּבֵנִי [רֵעוּבֵנִי]. The first-born son of Jacob, and the *heros eponymos* of the tribe of Reuben. Because Reuben, born of Leah (Gen. 29:32; folk etymology), was Jacob's first-born son, he was always first in the list of the descendants of Jacob (Gen. 35:23; 46:8-9; Exod. 1:2; I Chr. 2:1). In the story of Joseph his role as a leader is bound up with this fact (Gen. 37:21-22, 29; 42:22, 37; 48:5). Reuben

found the mandrakes which brought Jacob back to his mother in the etiological legend which explains the name of Issachar (30:14). Tribal history is hidden in the tradition that Reuben lay with his father's concubine Bilhah (35:22).

The tribe of Reuben must at one time have been an important tribe. There is no other way to explain its position of priority in the twelve-tribe system. Its history obviously began in the land W of the Jordan. This is indicated by the fact that the description of the border between Judah and Benjamin, which in its origins dates from the time before statehood, knows a landmark, on the last slope of the Judean highland toward the Valley of the Jordan, named for a Reubenite (the stone of Bohan the son of Reuben; Josh. 15:6; 18:17). It is also evident from the fact that the tradition of Reuben's crime against Bilhah is localized in the region of Migdal-eder (RSV "tower of Eder"; Gen. 5:21-22) in the hill country of Judah in the neighborhood of Bethlehem, to judge from Mic. 4:8 when compared with 5:2—H 5:1 (RSV "tower of the flock" is Hebrew "Migdal-eder"). Reuben's relations to Judah and to the Leah group in general, like those of Gad, date from the early period of the Israelite occupation of the land. The tribe then declined, presumably in connection with the events which lie behind Gen. 35:22. The first statement in the Blessing of Jacob also alludes to this:

Reuben, you are my first-born,
pre-eminent in pride and pre-eminent in power.
Unstable as water [lit. "You boiled over
like water"], you shall not have pre-eminence
because you went up to your father's bed
(Gen. 49:3-4).

The Blessing of Moses expresses Reuben's precarious situation even more clearly:

Let Reuben live, and not die,

and attaches to it the wish that his men might nevertheless still continue to be a respectable number (Deut. 33:6).

Whether the two statements have in mind Reuben's situation in the land E of the Jordan cannot be determined. It could be that Reuben had already completed the crossing at the time of the Battle of Deborah. For, unlike the tribe of Judah, which, S of the crossbar of Canaanite city-territories, was forced into its separate development, Reuben could maintain connections with the Israelite amphictyony. For this reason, Reuben is rebuked in the Song of Deborah for not having taken part in the battle (Judg. 5:15 ff). Like Gilead (Gad), which is named immediately after it, Reuben could easily have found the way across the Jordan. Probably the remnants of the tribe moved over into the land E of the Jordan either along with the Gadites or soon after them. The second alternative is supported by the fact that, according to the lists of towns in Num. 32; Josh. 13, the Reubenites settled in a relatively confined area in the middle of the larger Gadite territory, and perhaps also by the fact that for this very reason they could, unlike the Gadites, keep their blood pure. How the events in the tradition of the rebellion of the

Reubenites Dathan and Abiram (Num. 16:1; Deut. 11:6), which was already known to the Yahwist, fit into the history up to that time, remains an open question. In the period of the kings, Reuben, as a consequence of its insignificance, played no further role. Its fate was interwoven with the history of Gad.

The later literature makes note of Reuben almost exclusively in statistical connections or in schematic presentations which group "Reuben, Gad, and the half-tribe of Manasseh" together. To the latter belong numerous passages of the Deuteronomic historical work which have as their content the premature apportioning of the land E of the Jordan and the resulting obligation to assist in the conquest of the land W of the Jordan. Even the Chronicler, with the exception of the usual genealogy (I Chr. 5:1, 3) which has been expanded as over against the sources in Gen. 46; Num. 26, is able to report on only two individual Reubenites, beyond schematic remarks concerning Reuben, Gad, and the half-tribe of Manasseh (I Chr. 5:18, 26; 26:32). One of these two as the leader of thirty men (11:42) outshoots the list of the Thirty in II Sam. 23, while the other as chieftain of the Reubenites is said to have been led away into exile by Tiglath-pileser (I Chr. 5:6). In the lists Reuben's position of honor is generally respected, though there are significant exceptions, all of them in favor of Judah. In Deut. 27:13, Reuben occupies the first place only in the list of those who are to utter the curse. In the Priestly Code, Reuben has the first position in the list of the heads of tribes (Num. 1:5), of the first muster (1:20-21), of the scouts (13:4), and in the genealogical order (26:5, 7; see also Exod. 6:14). In the order for encampment and marching (Num. 2:10, 16), in the list of the offerings of the leaders (7:30), and in the sequence for breaking camp (10:18), Reuben has to give precedence to Judah, but ranks at the beginning of the second group of three who camp on the S side of the sanctuary. In the apportionment commission for the land W of the Jordan, Reuben is naturally excluded, and instead named first in the traditional group, Reuben, Gad, and the half-tribe of Manasseh (34:14). Reuben appears associated only with Gad in connection with a P narrative which deals with the bestowal and the division of the land E of the Jordan (ch. 32, mixed with JE). In the lists of the Levite cities Reuben has likewise yielded precedence to Judah and is classified along with Gad and Zebulun in the last group (Josh. 21:7, 36; I Chr. 6:63, 78—H 6:48, 63). The Chronicler's own lists give precedence to Reuben in the series of twelve (I Chr. 27:16) and in the supplement concerning the E Jordanians (12:37—H 12:38). In the general plan of I Chr. 1-9, Reuben is relegated to the third place in favor of Judah (and Simeon). In Ezek. 48:6, Reuben receives the strip to the N of Judah, but the first of the gates of Jerusalem is immediately named for Reuben (vs. 31). A geographical point of view might have been decisive in the insertion of Reuben to the N of Judah, while Gad receives the most southerly strip, since Reuben's old settlement area in the E lay a bit farther N than that of Gad, which once reached to the Arnon. The author of Ezek. 48 is, therefore, of another and historically more correct opinion than

the one who divided up the list of towns in Josh. 13 so that the S fell to Reuben and the N to Gad.

In the NT, Reuben is mentioned only in Rev. 7:5, as the second tribe after Judah.

For the territory of Reuben, see TRIBES, TERRITORIES OF, § D8b. See the bibliography under ASHER.

K. ELLIGER

REUEL רעוּאֵל [רעוּאֵל], friend, companion, of God; cf. Aram. (Elephantine) *proper names* רעוּיָהּ and רעוּיָא, and Palmyrene רעוּיָא, רעוּיָא; LXX Παρουήλ; KJV RAGUEL רָגוּ'אֵל in Num. 10:29. 1. Son of Esau and Basemath the daughter of Ishmael (Gen. 36:4, 10; I Chr. 1:35); the father of the Edomite clan chiefs (אֱלֹהִים) Nahath, Zerah, Shammah, and Mizzah (Gen. 36:13, 17; I Chr. 1:37). This genealogy points to a close relationship existing very early among Israelite, Edomite, and Arabian tribes.

2. The father-in-law(?) of Moses (Exod. 2:18 [J]; Num. 10:29 [JE]). The traditions are not unanimous concerning either the name or the tribal affiliation of the father of Moses' wife. Elsewhere J calls him Hobab; E uniformly names him Jethro. He is identified with the Midianites in Exod. 2:16; 3:1 (cf. 4:18-20) and with the Kenites in Judg. 1:16; 4:11. Some solutions offered are: (a) All three names may refer to the same person; (b) Reuel may be a tribal rather than personal appellation; (c) Hobab may be Moses' brother-in-law; (d) Hobab and Jethro may designate the father-in-law, with Reuel as Hobab's father (and being a gloss at Exod. 2:18). The last is widely accepted.

3. The father of Gadite leader Eliasaph (Num. 2:14; same as DEUEL).

4. A Benjaminite, grandfather of Meshullam (I Chr. 9:8).

REUMAH רעוּמָה [רֵאוּמָה] (Gen. 22:24). Nahor's concubine, whose four sons were eponymous ancestors of Aramean tribes generally located N of Damascus and related secondarily to the Israelites.

***REVELATION.** In the Bible, primarily a matter of God's initiative rather than of man's search and discovery. Its realm is even more prominently history and the world of human affairs than the world of nature; and God is described as revealing himself—his actions, his designs, his character—rather than as communicating propositions. Supremely, he has revealed himself in Christ; and the gospel is a summary of this revelation. Scripture, as the record of this revelation, accordingly ranks also as a medium of revelation.

God's revelation can be received only by the humble and receptive; from the proud and opinionated it is kept concealed (see MYSTERY). But among such as are humble and obedient, it is for all, without distinction. Within this general sphere, revelation of particular kinds is granted to chosen prophets and seers. See DIVINATION; INSPIRATION AND REVELATION; PROPHET, PROPHETISM; VISION.

Finally, in the future there is yet to come a decisive exposure of what is spurious, and a full dis-

closure of the glory of God. See APOCALYPTICISM; PAROUSIA.

1. **Terminology.** The chief words in use are הָרָא ("remove" or "uncover") and אֲפֹכָלֻטְיָא, אֲפֹכָלֻטְיָא ("uncover," "uncovering"). There is no noun in Hebrew corresponding to ἀποκάλυψις (in this sense), although of course there are words denoting "vision," etc., which are partly equivalent. Hebrew not only uses הָרָא as "disclose," but also the phrase פָּתַח אָזְנוֹ ("uncover the ear") as "communicate a secret" (I Sam. 9:15; Job 33:16; etc.; though in Ruth 4:4 it merely means "tell"). Cf. also the *pi'el* of the verb in the phrase בָּרַעַם עֵינַי הַלֹּהִי וַיִּגַּל, "The LORD opened [lit., 'uncovered'] the eyes of Balaam" (Num. 22:31; and see Num. 24:4, 16; Ps. 119:18). In Greek there are, besides ἀποκαλύπτω and ἀποκάλυψις, such words as ἐπιφάνεια ("appearing"), δηλώω ("disclose," "indicate"), σημαίνω ("show," "make known"), φανερόω ("[make] manifest"), χρηματίζω ("reveal [as by a divine oracle]"), which, in some contexts at least, are relevant to this theme.

2. **The meaning of "revealed religion."** The Hebrew and Christian religions are both described as "revealed religions," in the sense that they both claim that they are what they are because God has himself taken the initiative and revealed himself, rather than because man, by his own searching, has discovered the truth. Revelation is, therefore, in such a connection, to be distinguished from discovery, and the Bible lays far more stress on the former than on the latter. In the Areopagus speech in Acts 17, Paul says, admittedly, that God has so constituted mankind that they "feel after him"—i.e., grope for him as a discoverer feels for the truth; but even here the culmination of the thought is not the theme of discovery but rather of God's self-manifestation in the Incarnation: he "has fixed a day on which he will judge the world in righteousness by a man whom he has appointed, and of this he has given assurance to all men by raising him from the dead." Thus, it is God who takes the initiative: he is a "revealer of mysteries" (Dan. 2:47); he declares the past and the future and "reveals the tracks of hidden things" (Ecclus. 42:19).

3. **The nature of biblical revelation. a. Historical.** The particular words under review are not actually applied to manifestations of God in nature. This is not to say that the Bible does not describe "theophanies" in terms of natural phenomena: Pss. 19:1-6; 29 are—to go no further—splendid examples of this, the one in terms of astronomy, the other in terms of a majestic thunderstorm. Even more explicitly, in Rom. 1:19-20 the heathen are blamed for failing to recognize a clear revelation of God in

nature ("Ever since the creation of the world his invisible nature, namely, his eternal power and deity, has been clearly perceived in the things that have been made"); and the fact that they were not granted a more specific type of revelation is regarded as no excuse for their idolatry. Again, allusions are made in two of the Pauline speeches in the Acts (14:15-17; 17:24 ff) to the revelation of God through his created world. But this conception of God in nature is far less characteristic of the Bible than the idea that God reveals himself chiefly in his design for and in his dealings with men—i.e., in history. The now familiar distinction between "general" and "special" revelation is not explicitly made by the biblical writers, and its discussion does not belong here. It is enough to say simply that God is represented in the Bible as revealing himself in his actions and in his designs, and, most decisively of all, in Jesus Christ. Amos 3:7 declares that God does nothing without revealing his secret to his servants the prophets; Dan. 2 is full of the ability of the inspired seer to unfold the designs of God by interpreting dreams about what is soon to become history (cf. Dan. 10:1). It is in history—whether the history of Israel or of the surrounding nations—that God's design is mostly to be perceived, and this is how he chooses to reveal himself; and it is through Israel, and most of all through their Messiah, that the other nations receive the revelation (Luke 2:32).

b. **Personal rather than propositional.** It is further to be noted—though not all ages and branches of Christendom lay equal stress on this—that, in the Bible, God's self-revelation is personal rather than propositional (cf. GOD, NT, § 4). That is to say, ultimately revelation is in relationship, "confrontation," communion, rather than by the communication of facts: it is himself that God reveals, or his actions, his RIGHTEOUSNESS, his WRATH, rather than statements about himself.

Even when revelation can be reduced to a statement, it is, for the biblical writers, a statement of God's will and purpose—something, i.e., closely concerned with his person, and involving an obedient response (see KNOWLEDGE)—rather than the mere communication of information. Thus, in Gen. 35:7 allusion is made in terms of revelation ("there God had revealed himself to him") to Jacob's dream of the ladder (Gen. 28); and it is true that the dream included a specific promise about Jacob's posterity. Yet in essence the vision was concerned with God's purpose and his character as strength and protection to a man in need. So again, although there are accounts of soothsaying, yet the great prophets are more concerned with morals. Samuel can, indeed, tell Saul what has become of his father's asses (I Sam. 9:6); but he is far more intent upon God's plan for the leadership of Israel, and all that this will involve for Saul by way of response (vs. 20). Indeed, it was the divine revelation of a drastic moral judgment that began Samuel's prophetic career as a small child (I Sam. 3, where note the remarkable phrases in vs. 1, 21; Samuel's ministry marked a revival of revelation).

Similarly, Elisha uses divination by music, but he uses it in the interests of the wars of the Lord (II

Kings 3:15). And the great writing prophets from the eighth century B.C. onward, to whom God "revealed his secret" (Amos 3:7), are almost wholly occupied, so far as their words survive, with politics, morals, and (cf. I Pet. 1:12) the relation of these to the future. This is not to say that mere curiosity about the future is satisfied by revelation: God's revelation is essentially the practical manifestation of his will—his TORAH—for "the secret things belong to the LORD our God; but the things that are revealed belong to us and to our children for ever, that we may do all the words of this law" (Deut. 29:29). Of the future vindication of God's ways among his people it may be said (II Sam. 7:27) that God has revealed his plan for the house of David; or (Isa. 40:5) that "the glory of the LORD shall be revealed" (see GLORY; and cf. Isa. 53:1; 56:1). But such revelation is a matter of the general destiny of the people of God, and of the triumph of right over wrong; it is not the divulging of curious details.

4. Revelation in the NT. So it is also, and even more evidently, in the NT. It is true that particulars may on occasion be revealed: it is revealed to Simeon by a divine oracle (χορηματίζω) that he shall not die before seeing the Messiah (Luke 2:26); Paul may have divine admonitions to go somewhere or to refrain from going somewhere else (Acts 16:6 ff; Gal. 2:2), or may be forewarned about details of the shipwreck (Acts 27:23-26); even the choice of the twelfth apostle, to take the place of Judas, is divinely revealed—and that by the casting of lots (Acts 1:24-26; and see LOTS § 2); but the characteristic meaning of revelation is, once more, essentially the personal revelation of God himself, and supremely in Christ. Thus Paul writes: God "was pleased to reveal his Son to me" (Gal. 1:16); and in John 1:18 "the only Son, who is in the bosom of the Father, he has made him known" (ἐξηγήσατο); so John 17:6: "I have manifested thy name" (see NAME, PROPER). In the same way, when Peter makes his confession of Jesus as Son of God, it is described as due to a divine revelation (Matt. 16:17); and the parables and miracles of Jesus become, to those who have ears and eyes, manifestations that God is uniquely present in the ministry of Jesus (see Mark 4:11; Luke 11:20; John 14:11). Jesus, as the Word of God (John 1:1), gathers up all the previous piecemeal utterances of God's self-revelation (Heb. 1:1); he is "vocal to those who can perceive," to adapt a phrase from Pindar (*Olympian Odes* II.85).

Another way of saying the same thing is that, in the NT, it is the gospel which is the contents of revelation. It must be added that this gospel includes what is called the WRATH OF GOD (see also GOD, NT, § 5b) as well as his mercy; and that it is the moral judgments of God that are stressed by Paul when he is speaking to the heathen about revelation and the gospel (Rom. 1:17-18: "In it [the gospel] the righteousness of God is revealed through faith for faith; . . . the wrath of God is revealed"; cf. Acts 17:31; 24:25; also Rev. 15:4). But, be that as it may, the gospel is the contents of revelation (Rom. 3:21: "The righteousness of God has been manifested"—i.e., God's way of righteousness; Gal. 1:11-12: "The gospel which was preached by me . . . came through a revelation of Jesus Christ"—and even if this repre-

sents Paul's particular divine commission to preach to the *Gentiles*, it still illustrates the main point; cf. 3:23, of the revealing of "faith," which, in this context, means the good news of salvation through faith). And since the gospel is for all Christians as such, there is no exclusiveness in this revelation. It is not for some inner circle of the specially instructed, but for all Christians, to receive this revelation and progressively to learn the will of God (Eph. 1:17; Phil. 3:15).

It will be seen that such a conception of revelation corresponds closely with the characteristically biblical meaning of MYSTERY—namely, God's design, concealed for a time or from those who are not receptive, in order now (in the NT era) to be revealed when the time is ripe, and to the recipients who are ready (see Rom. 16:25-26; Gal. 1:12; Eph. 3:3). It is a striking paradox that "mystery" is so often associated in the NT with words of revelation—ἀποκαλύπτω and ἀποκάλυψις ("reveal," "revelation"); γινώσκω, γνωρίζω ("know," "make known"); φανερόω ("disclose"); λαλέω, λέγω ("speak"). But the mystery is divulged only to those who are humble and obedient, and the idea correlative to the revealing of the mystery is that of concealing. From the unreceptive, the proud, the opinionated, it is held back, as is indicated in such diverse passages as the following: "Thou hast hidden these things from the wise and understanding and revealed them to babes" (Matt. 11:25); "Though he had done so many signs before them, yet they did not believe in him; it was that the word spoken by the prophet Isaiah might be fulfilled:

'Lord, who has believed our report,
and to whom has the arm of the Lord been revealed?'"
(John 12:37-38; cf. 17:6 ff);

"None of the rulers of this age understood this; for if they had, they would not have crucified the Lord of glory" (I Cor. 2:8); "Their minds were hardened; for to this day, when they read the old covenant, that same veil remains unlifted, because only through Christ is it taken away" (II Cor. 3:14).

Indeed, the gospels may be viewed as written round the twin themes of veiling and unveiling. Broadly speaking, whereas the Synoptic gospels portray the hidden Messiah—Jesus carefully concealing his identity except from those who are ready to understand him—the Fourth Gospel portrays men veiling their own eyes from him, and obdurately refusing to recognize who he is. Thus, for the Synoptists, Jesus himself is "veiled," while for the Fourth Gospel it is the Jews who wear the veil (as in II Cor. 3:14). But in both cases alike, there is a revelation of the "mystery"—through parables, deeds, and character—to those who are receptive; and although in John the actual word "reveal" occurs only once, and then only in the Isaianic phrase cited above (John 12:38), the theme of revelation is clear enough through the use of such a word as "signs" (see SIGNS AND WONDERS) for the miracles, and the use of φανερόω ("manifest") and GLORY. Moreover, it is noticeable that, in this gospel, the Baptist has to have the concealed Jesus divinely indicated to him (John 1:33) and then proceeds to indicate him to others (vss. 29 ff). This, it seems, is in keeping

with certain phases of Jewish messianic expectation, according to which there was to be a *Messias absconditus* who has in due course to become *revelatus* (see Enoch 62:7; II Esd. 7:28-29; 12:32; 13:26, 52, though there are perhaps Christian interpolations here; see also Just. Dial. 8, 110).

5. **The mode of revelation.** The Bible provides ample illustrations of DIVINATION—by casting LOTS, by the use of omens, by interpreting dreams, etc. But, in keeping with the tenor of what has already been said, it is characteristic of the Bible that the ideal in the OT is on a higher level than these techniques, and that in the NT this ideal is claimed as intended to be entered upon by all Christians alike. The OT ideal is expressed in the noble words relating to God's special relations with Moses: "And [the LORD] said, 'Hear my words: If there is a prophet among you, I the LORD make myself known to him in a vision, I speak with him in a dream. Not so with my servant Moses; he is entrusted with all my house. With him I speak mouth to mouth, clearly, and not in dark speech; and he beholds the form of the LORD'" (Num. 12:6-8).

Now, it is true that in I Cor. 13:12 this language is clearly echoed (especially when the Greek is compared with the LXX of Numbers) in Paul's description, not of present conditions, but of the future fruition of God's promises; but from elsewhere it is evident, nonetheless, that for the ordinary Christian even here and now is claimed an intercourse with God, through Christ, which is already comparable with that Mosaic ideal. And perhaps the most significant passage for the NT conception of how revelation takes place is I Cor. 2. Here Paul speaks of that which cannot be found by discovery (in the sense defined in § 2 above):

"What no eye has seen, nor ear heard,
nor the heart of man conceived,
what God has prepared for those who love him"
[phrases from Isa. 64-65],

God has revealed to us through the Spirit" (vs. 9-10). And then he goes on to draw a daring analogy between the human self-consciousness and the divine. As man's thoughts, he says, are known only by the "spirit of the man which is in him" (or, as we might say, by a man's self-consciousness), so it is only the Spirit of God that can comprehend the thoughts of God (vs. 11). But if a man will admit into himself this Spirit of God, then he receives an understanding of what God himself can give, beyond the power of unaided human consciousness: "Now we have received not the spirit of the world, but the Spirit which is from God, that we might understand the gifts bestowed on us by God" (vs. 12). And thus to receive the Spirit of God is to have the mind of Christ (vs. 16). The same thought—that revelation is a gift of the Spirit of God through Christ—seems to underlie Eph. 1:17: "that the God of our Lord Jesus Christ, the Father of glory, may give you a spirit of wisdom and of revelation in the knowledge of him" (cf. Wisd. Sol. 9:17-18).

This tallies remarkably well with the famous passage in Matt. 11:25 ff; Luke 10:21 ff, where Christ himself is the means of revelation: "No one knows the Father except the Son and any one to whom the

Son chooses to reveal him." And it is the "babes" who are chosen; it is those who are humble enough to obey who find out the will of God (John 7:17; cf. Eccles. 1:6 ff; 3:18 (some MSS only; cf. vs. 20, and see MYSTERY § 2); 4:18; 51:23. Thus, by the Spirit we receive the mind of Christ, and Christ is the revealer of the mind of God (cf. I John 2:23). This is the typically Christian account of revelation; to receive the Spirit of God's Son is to be enabled to cry "Abba! Father!" (see Rom. 8:14-17; Gal. 4:6; see also GOD, NT, § 5b). The subject of man's response may be pursued further by reference to the pregnant biblical word "KNOWLEDGE."

But while this is the essence of Christian revelation, and is for all Christians as such—all who respond with obedience and are ready to "know" God in this sense—there is also, within the sphere of this commonly shared gift, the more specialized gift of "prophecy." This means a heightened sensitivity to the guidance of God in given situations, by which a prophet is enabled to read, and pass on to others, the will of God (I Cor. 14:1, 6, 26). But even this, be it noted, is under the control of the ordinary discrimination of the assembled congregation, the *communis sensus fidelium* (I Cor. 14:29); and it is tested by its usefulness for the building up of the community (I Cor. 14:1-5, 26, 30-33). It must be added that in II Cor. 12:1 ff, reference is made to some special revelation granted to Paul, the contents of which cannot be passed on. For the meaning of this, see the commentaries.

6. **Revelation through scripture.** If the gospel, culminating in Jesus, is supremely God's self-revelation, then scripture, as the record of this mighty act of God in history, with its preparation and its accomplishment, necessarily also ranks as a medium of revelation. This is a theme which, naturally, is not systematically developed within scripture itself. But Dan. 9:2 appears to allude to the use of the writings of Jeremiah as a divine oracle; the Dead Sea Scrolls exemplify a Jewish treatment of written prophecy as a medium of revelation, or of confirmation that God is at work in the affairs of the moment; and the NT is full of the idea that the Scriptures, fulfilled in Jesus, provide a divine confirmation of his unique mission. Moreover, the recognition of scripture as a medium through which the Spirit of God speaks is explicit in Hebrews (see 3:7 and *passim*; cf. John 10:34-35; II Tim. 3:15-16; II Pet. 1:19-21). See SCRIPTURE, AUTHORITY OF; INSPIRATION AND REVELATION.

7. **Revelation and the future: apocalyptic.** The ultimate revelation of God's purposes is cast still into the future by the NT, which is orientated toward the day when Christ will be fully and finally revealed in all the glory of God (Luke 17:30; Rom. 8:18; I Cor. 1:7; Col. 3:4; II Thess. 1:7; I Pet. 1:5, 7, 13; 4:13; 5:1; I John 3:2); and thus God's judgments will be manifest (Rom. 2:5), and reality will be uncovered (Matt. 10:26: "Nothing is covered that will not be revealed"; cf. Mark 4:22; Luke 12:2; I Cor. 3:13; 4:5: "the Lord . . . , who will bring to light the things now hidden in darkness and will disclose the purposes of the heart"). Insight into the meaning of present woes and their ultimate outcome

in the triumph of God can thus be styled apocalypse, "revelation" (Dan. 10:1; Rev. 1:1), and the term has given its name to a whole genre of writing (apocalyptic), both Jewish and Christian. Besides the Apocalypse of John (see REVELATION, BOOK OF), there are other NT examples of this sort of writing, notably Mark 13 and the parallels in Matthew and Luke. In II Thess. 2:3 ff a kind of apocalypse of Satan—a parody of the PAROUSIA of the Messiah—is described as imminent. For interpretations of what was here intended, see the commentaries.

The degree to which this type of literature (see APOCALYPSES, APOCRYPHAL; APOCALYPTICISM) is genuinely in the "prophetic" line may be measured by its degree of loyalty to the general tenor of the Bible, which (as already noted) finds revelation rather in the character and purposes of God himself than in specific and detailed propositions, or in the communicating of mere information, or in the satisfying of mere curiosity about the future. Just as "the testimony of Jesus is the spirit of prophecy" (Rev. 19:10), so the test of authenticity in Christian revelation is whether the will of God in Christ is involved and is obeyed (cf. II Cor. 12:7-10). In Rom. 8:19 it is the true sonship—filial obedience to God—that is to be revealed. See PROPHET, PROPHETISM, and note Deut. 18:21-22; I Kings 22, as throwing light on true and false revelation.

* **REVELATION, BOOK OF** (Ἀποκάλυψις Ἰωάννου, see REVELATION). The last book in the NT canon, written originally to the "seven churches that are in Asia" (i.e., the Roman province of that name in W Asia Minor) by John, an early Christian seer (see § B below). This is the only complete example in the NT scriptures of a type of literature—apocalypse—which had a great vogue among both Jews and Christians ca. the beginning of the Christian era (see APOCALYPTICISM). John's apocalypse far transcends all others of its class in the endeavor to present a theodicy or theology of history, to portray both "what is and what is to take place" (1:19) in the perspective of God's eternal purpose relative to man and his salvation. It is a dramatization of the gospel message sent forth in letter form and intended to be read aloud in the churches (1:3). As befits such a bold undertaking to set forth the mind and purpose of God as seen in redemptive history (*Heilsgeschichte*), John attributes his knowledge of it to "revelation" which came to him from God through Jesus Christ, or alternatively through "his angel" (1:1-2, 19; 4:1; 19:10; 22:8).

A. GENERAL CHARACTER. Of no other book of the NT is it so true that an understanding of its contents and message depends to a degree upon an examination of certain features which appear to characterize it. These are of a literary sort and may be examined conveniently under three heads, as follows:

1. Literary types: Letter and drama. All apocalyptic literature is dramatic in character, its varied scenes being reported as "visions" by the seer, who regales his readers with an account of his insights into the meaning of human history, age by age, or of his travels on earth, in heaven or hell, and the like. This is true both of pagan apocalypses, like Vergil's

Aeneid, and of Jewish and Christian examples, such as those circulated under the names of Enoch, Baruch, Esdras, the canonical Daniel, and portions of Ezekiel. John's book is no exception in this respect. Indeed, the dramatic form appears to be carried through in this work with a relentlessness not elsewhere to be found (see § E1 below). John alone, however, among apocalyptic writers has superimposed upon the dramatic structure of his book another structure—that of a letter. Failure to discern this dual literary character of John's work has led to much misunderstanding on the part of his interpreters. To disentangle the one form (drama) from the other (letter) is fortunately an easy task. The marks of the letter form appear only in an opening salutation (1:4-6) and a closing benediction (22:21). All that lies between is drama.

Paul appears to have been the first Christian writer to present the gospel (particularly its theological expression and ethical implications) in letter form. Indeed, his first extant letter (I Thessalonians) may represent the earliest endeavor to give any sort of literary expression to the gospel message (ca. 51). John follows Paul's characteristic formulas closely, giving us in his apocalypse the fourfold pattern: (a) salutation proper ("John to the seven churches that are in Asia" [1:4a]); (b) opening benediction ("Grace to you . . . on earth" [4b-5a]); (c) prayer, or as here doxology ("To him who loves us . . . Amen" [5b-6]); and (d) closing benediction ("The grace of the Lord Jesus be with all the saints" [22:21]).

It has been suggested that the letter should be considered to embrace only ch. 1 or, at most, chs. 1-3. But such an analysis of the contents of the book destroys at once its literary structure and its doctrinal unity. As it now stands, the letter ends, not at 1:20 nor yet at 3:22, as some have proposed, but at 22:21 with the closing benediction, thus embracing the entire book. Moreover, the drama is said by John to concern itself with both "what is" and "what is to take place hereafter" (1:19). Accordingly, the drama, as well as the letter, must include the contents of chs. 2-3 (i.e., the present condition of the church, at least in John's time—briefly, "what is"), as well as the elaborate setting in 1:7-20, against which as background the condition of the church is portrayed. To conclude the letter at the end of either ch. 1 or ch. 3 would result in our having a letter prefixed to a drama—and that a truncated one—a hybrid otherwise unknown to literature! It would seem far more likely that John first wrote his drama (1:7-22:20), and that thereafter, with a view to bringing it to the church's attention, he superimposed the letter form upon it. Indeed, what other course was open to him? He could neither have wished to have his drama enacted upon the Greco-Roman stage of his day, in view of its debased character, nor have achieved its showing had he desired it. John's drama was from the first intended as a "parlor" drama—to be read in private or at public assembly of a local church.

In John's day all books were brought out in the form of scrolls (see WRITING AND WRITING MATERIALS), and the title was appended on a small piece of papyrus or parchment attached at one end of the scroll. Such a title appears in Rev. 1:1-3, be-

ginning: "The revelation of Jesus Christ, which God gave him to show to his servants. . . ." (The title appearing in the RSV—"The Revelation to John"—is a late addition to the book.) When the Apocalypse was added to the other books of the NT canon and the whole was published in codex form like our modern books, this title would have been transferred to the inside of the book, thus further complicating its structure.

2. Literary affinity: Prophecy and apocalyptic.

John terms his book an apocalypse (the Anglicized form of the Greek word meaning "revelation"; cf. 1:1), and such it is in its literary form. But unlike all other Jewish and Christian apocalyptists, John claims for his work a close affinity in spirit and content with the writings of the Hebrew prophets as well. Thus, against his one reference to the book as being an apocalypse, John speaks of it as prophecy in six places (1:3; 19:10; 22:7, 10, 18-19); he places himself in the category of the "prophets" (22:9); he says his function is that of prophesying (10:11); and, like the prophets before him, he claims to hear God's Word directed to himself (1:2, 9). Among the non-canonical apocalypses only II Baruch appears ever to make such a claim for its author (10:1). Moreover, whereas in that entire literature such an inclusive term as "the prophets" occurs only twice (I Enoch 108:6; Sibylline Oracles 3:781), in John's book alone it is found seven times (10:7; 11:18; 16:6; 18:20, 24; 22:6, 9), thus exhibiting his deep attachment to the works of the Hebrew prophets. And as final confirmation of this attachment it is to be noted that he quotes directly phrases and clauses from their writings in some 150 passages, as reference to a modern Greek text such as Nestlé's serves to indicate. The conclusion appears irresistible, therefore, that, while in its literary form John's work is to be classed with the apocalypses of his day, its teaching purports to be far closer to that of the Hebrew prophetic scriptures than is that of these contemporaries. John's book is to a degree saturated with the Hebrew prophetic thought-frames and symbolism (see § E3 below), and it may well be that it was for this reason his book was included within the canon of the NT, whereas others not so characterized were rejected.

3. Style and diction. The Commentaries (see bibliography) should be consulted for a detailed statement on this subject. Here but two phenomena may be noted: (a) so many solecisms—probably of both a conscious and an unconscious nature—appear in this apocalypse as to have given rise to the suggestion that for John's work a "grammar of ungrammar" must needs be written; (b) of no other NT writer perhaps may it be so truly said that he "thinks in Aramaic and writes in Greek." It is just possible that these two characteristics of John's book should be considered one, or, at any rate, that the second is the cause of the first. And if this proves to be the case, then this phenomenon will accord well with what has been said above relative to John's close affinity in doctrinal matters with the Hebrew prophets and will be said below about his employing the Semitic thought-frames and symbolism. See § E3 below.

B. AUTHORSHIP. As already noted (see § A2 above), John the seer who wrote the Revelation was

consciously imbued with the prophetic spirit and fire. He was a theist who shared the passionate belief of an Amos and a Paul in God's universal concern for mankind and for its salvation (7:9 ff; cf. Amos 9:7; Rom. 5:18; Gal. 3:28). John believed in God's omniscience—his universal insight into the needs of his creation (4:6; 5:6); his providential care of his people (7:2 ff); his universal saving purpose through the Lamb that was slain (5:6, 13); his redemptive activity through the incarnate life of Jesus (12:4-6) and in the history of the church (12:13-17). This author was, moreover, perhaps the church's first scholar to attempt the construction of a philosophy (or, better perhaps, a theology) of history (*see* § E4 *below*), and perhaps the first possessed of the literary ability to present the gospel in the form of drama. This John was the pastor of at least the "seven churches" of Asia, and he wrote to them out of a shepherd's concern for his flock, while temporarily exiled from them in the penal colony of Patmos,* "on account of the word of God and the testimony of Jesus" (1:9), which had formed the subject of his preaching. Fig. PAT 23.

Little more can be said of this author, as he tells us no more than this about himself. But from the beginning of the church's history much speculation has been rife about him. It was the almost universal belief of the ancient church from the middle of the second century that the author was the apostle John. Justin and Hippolytus at Rome, Tertullian in North Africa, Clement and Origen of Alexandria, Irenaeus of Lyons, all spoke of this John as one of the Lord's apostles (or disciples). Modern scholarship, however, has remained unconvinced, preferring to identify the John of Revelation rather with John Mark, John the Elder (*see* JOHN, LETTERS OF), an otherwise unknown John, or a pseudonymous writer claiming for his work the prestige attaching to the name of the apostle. Further, theories of redaction or of editing (with possibly Jewish or pagan antecedents) have been seriously entertained by scholars of the stature of Julius Wellhausen, Adolf Jülicher, and R. H. Charles.

The arguments advanced for the modern theories are not all equally cogent, either as telling against the apostolic authorship or as establishing the identity of the author otherwise. E.g., to suggest that the John who wrote: "He who conquers, I will grant him to sit with me on my throne" (Rev. 3:21), cannot have heard Jesus saying to him: "To sit at my right hand or at my left is not mine to grant" (Mark 10:40), is to overlook the fact that in the one instance it is the risen Christ, in the other the historic Jesus, who speaks. Moreover, there is good evidence that even the latter had told his disciples that they would "sit on thrones judging the twelve tribes of Israel" (Luke 22:30b; cf. Matt. 19:28b, Q). It ought to be obvious that the Revelation and Q passages have to do with a fact in the moral order, whereas the Markan saying is dealing with a crass misunderstanding of Jesus' kingdom teaching, one which he can correct only with a reply at the kindergarten level thus far attained by the sons of Zebedee. Statements of this nature at two levels of understanding do not clash; they are like "ships which pass in the night" and are without logical relation to one another.

Again, arguments based on the linguistic phenomena of respectively the Fourth Gospel and the Revelation are unconvincing. These two works not only share a dramatic flare that is unmistakable, but the underlying thought-frames of both are Semitic. The argument, too, based on the supposed early date of the apostle John's death—while, no doubt, telling against the authorship by *this* John (unless the Apocalypse of John be dated early in the first century)—does not invalidate the possibility that some other John wrote both the Fourth Gospel and the Revelation. It is suggestive that Lohmeyer has found it possible to attribute both works to a single author—John the Elder.

Nonetheless, it cannot be said that John the seer of Revelation has been identified with any known John in the first century of the church's life. There must have been many Christians of this name in those early days, and there is no internal proof that the church's tradition identifying the seer with the apostle of the same name is correct. We know the John of Revelation only as the seer or prophet and shepherd that he claims to be.

C. DATE. The date of writing of Revelation is nearly as uncertain as its authorship. In any case it is impossible to argue—as some have done—either from date to authorship or the reverse; for neither datum has been established to the general satisfaction of scholars who have studied the problems involved. As regards the church's tradition in the matter, the following facts are known: (a) A diversity of dates was suggested for the book by late writers, including the reigns of Claudius (41-54), Nero (54-68), and Trajan (98-117). Certainly it does not commend these dates that they were proposed only by late writers like Epiphanius, Jerome, and others of the fourth and later centuries and on inconclusive evidence or none. The two earlier emperors were, no doubt, suggested on the basis of a literal interpretation of such passages as Rev. 6:9; 11:1 ff, to the effect that the Herodian temple was still standing in the author's lifetime. 12: 1-6 also has been interpreted as referring to the church's flight from Jerusalem to Pella across the Jordan during the First Jewish War (66-70). Such so-called internal evidence depends, as is obvious, upon a literal or historical type of interpretation which is, to say the least, questionable (*see* § D *below*). (b) The earlier church writers converged on a date in the reign of Domitian (81-96); such appears to be the united testimony of Melito of Sardis, Irenaeus, Clement of Alexandria, Origen, Victorinus, and Eusebius—church fathers ranging from the second to the fourth century. Jerome, too, knows of this tradition.

A number of modern scholars, rejecting both sets of early tradition, have attempted to establish a date in the reign of Vespasian (69-79), on the basis of the three passages above mentioned—as they would refer equally to this reign as to that of Nero—and additionally on Rev. 17:10; 18:4. But the same criticism applies to the interpretation of 18:4 as to that of the three others, while 17:10 is of such an enigmatical nature that no endeavor to reckon which seven emperors of Rome John has in mind has proved generally acceptable. It would be more in character with the generally symbolic nature of the

book to suppose that "seven" here stands for the total list of Roman emperors. This list was not yet complete when John wrote, for the reason that the Roman Empire had not yet come to an end. It would also accord well with John's practice to speak of the reigning monarch—whoever he might be—as the "sixth" and to identify him further with the "eighth," each figure standing in its way for the Antichrist (the true Messiah Jesus' number being 888). See SIX HUNDRED AND SIXTY-SIX.

On the whole, the Domitianic date appears to accord best with the thesis of Revelation and with the contemporary condition of the church as represented in it. While it is not impossible that churches other than those mentioned in either the Acts or the Pauline letters existed in the province of Asia as early as the reign of Nero or of Vespasian, it is unlikely that the church had by such an early period reached the low moral and spiritual ebb reflected in Rev. 2-3 (cf. particularly the condition of the churches at Ephesus, Pergamum, Thyatira, Sardis, and Laodicea). Then, too, the attitude of the church toward the Empire had undergone great change from the earlier one reflected in Mark 12:17; Rom. 13:1; and even in I Pet. 2:13-17. Domitian strenuously insisted on the recognition of the divinity of the imperial line and by his day emperor-worship was the one universal cultus in Asia Minor, the one sort of pagan worship which is portrayed in Revelation as intolerable (cf. 13:11-18). Moreover, the Nero Redivivus theory in the developed form in which this figure is seen "combining in his own person the characteristics of Beliar and the Antichrist" (Charles) is found in Revelation (17:8-11; cf. 13:1 ff)—a fact which argues for a late date and most likely the reign of Domitian. Finally, a late date is suggested for the book if—as seems likely—John employed a number of the other NT books in searching for materials for his own (e.g., Matthew, Luke, I and II Corinthians, Galatians, Ephesians, Colossians, I Thessalonians, I Peter, and James).

D. METHODS OF INTERPRETATION. It is perhaps not surprising that a variety of methods of interpretation should have been tried with reference to Revelation. Not only does the book seem an enigma in itself in view of its visionary pattern, its curious figures (beasts, dragon, horsemen, hordes of demons, angels, and the rest), and its cosmic catastrophes; but it has much to say as well of the eschatological time—a subject about which the church has never made up its collective mind satisfactorily. Accordingly, Christian scholars have always approached a study of John's book with minds biased on the subjects with which it deals, and the net result has been chaotic. A cursory summary of the types of interpretation applied to the book includes:

Historico-eschatological interpretations—taking their clue from passages like Rev. 1:1, 19; 20:5-10, the author has been thought to be dealing with a chronological scheme that is either (a) contemporary, so that the whole sweep of his visionary program is limited to his own times (whether these be found in the reigns of Nero, Vespasian, Domitian, or another); (b) futuristic—i.e., limited entirely to the eschatological time at the end of history, a time identified on this view with the period immediately preceding,

contemporary with, and following upon the "thousand years" literally interpreted (20:1-10); or (c) generally historical, either in the sense that the seer as a philosopher of history endeavors to present the whole panorama of history from the divine standpoint, as was done by other apocalyptists, or that he predicts specific events as about to happen throughout the span of world history, or that he has in mind certain characteristic types of the divine redemptive activity which find repeated expression throughout history and likewise characteristic human attempts to resist and thwart the divine will.

Literary-analytical approaches—some have seen the book as the end product of a series of editors or redactors who have worked over and assembled materials derived from many sources (Jewish, Babylonian, Egyptian, and the like); this method generally sees in the book strata of varying dates and origin, dislocations of particular passages, editorial or redactional misunderstanding of the original author's intent.

Allegorical methods—the Alexandrian school of biblical interpretation (dating from the second century) treated this book, along with the rest of scripture, with its allegorical method of exegesis, a method undoubtedly more readily justified here than in many other portions of the Bible, as the book is throughout an allegory of a sort by the author's own expressed intent (cf. 1:20; 11:8; 12:1, 9), but a method failing to serve any useful purpose when the bounds set by John's ideological scheme are transgressed.

Dramatic interpretations—that John's book is highly dramatic in style has long been recognized, and various interpretations based on this fact have been proposed. This last method is here favored. It is suggested that the book readily divides itself into seven Acts, each Act having in turn seven Scenes, and that so to divide it is to follow out the original intent of its author. Act I of this schema, then, gives us the picture of the church contemporary with the author—i.e., "what is" in his terminology (1:19)—and Acts II-VII similarly present us with "what is to take place hereafter"—i.e., the church and the world in the eschatological time. See §§ E1-2, 4, *below*.

The several methods of interpretation, it should be noted, are not all mutually exclusive. It is possible, e.g., to combine the dramatic method with several of the others (with the generally historical and literary-analytical approach), and this seems to be required by John's original intention.

E. CONTENTS. It has already been observed that the seer of the NT apocalypse was a martyr suffering for his evangelistic activity (1:9; see §B *above*). We may well believe, then, that it was the same evangelistic zeal that prompted him to obey the command to write down the content of the visions contained in his book (cf. 1:19), and that he was well aware, moreover, that the dramatic character of his writing served to provide a new medium for the setting forth of the gospel message—a medium not previously employed by the church in her evangelistic effort. Other evangelists and writers had invented or, at any rate, adopted the literary media known as "gospel," "letter," even history (Acts), and had used them effectively in the church's missionary en-

terprise. It remained for John to employ the dramatic potentialities of the apocalypse to the same end.

1. **Structure as determining interpretation.** Considerations arising from the contents of the book suggest that the key to its proper interpretation lies in the discovery of its dramatic structure as intended by its author and some appreciation of the cultural background motivating his choice of this particular evangelistic medium. John was clearly heir to two cultural traditions—the Hebrew-Christian and the Greco-Roman—upon both of which he unhesitatingly drew in the composition of his work, or, if one prefer, both of which were interwoven into the matrix of his “visions.” His method of combining these traditions—whether through the subconscious channels of the genuine mystic’s visions or through the intended devices of the literary artist matters little in the end—may be exhibited under the following heads:

a. **The sevenfold drama pattern.** As is well known, from ancient times the number seven symbolized completeness or finality to the Semitic mind. And it has been obvious to all of John’s interpreters that he adopted this symbolism. The seven seals, seven spirits of God, seven trumpets, seven bowls, and the like are clear examples of this fact. As Lohmeyer has remarked, the number seven is the “formative principle of the work” and appears in its every part, whether small or large. It would seem obvious, then, that we should look for an all-embracing sevenfold pattern as forming the framework of a book built on this formative principle. Further, inasmuch as some of the larger portions of the drama are subdivided into seven smaller parts, it seems reasonable to look for all the portions to be so divided.

This would give us seven major divisions with seven minor ones each, or—to employ the language of dramatic art—seven Acts, each with seven Scenes. Acts I (the seven letters; 2:1–3:22), II (the seven seals; 6:1–8:1); III (the seven trumpets; 8:7–11:18), and V (the seven bowls; 16:2–21) present us with no difficulty at this point: each divides itself on the author’s own showing into seven subdivisions or Scenes as indicated by the groups of sevens employed. Only Acts IV, VI, and VII, accordingly, afford us any problem for solution in this matter. But there are several considerations that suggest clues for the resolution of this problem, as follows: first, there is a parallelism of structure between Acts III and V which is patent and which has long been noted by commentators (see § E2 below). Lying between these two Acts, then, are the contents of 11:19–15:4; and the contents of ch. 14 are of such a nature as to suggest that John intended them to represent in some sense the climax of his theme—the salvation of the church and the triumph of the Lamb—toward which all that precedes builds up and from which all that is subsequent falls away. It appears that 14:1–5 suggests itself rather clearly as the exact middle of the drama and that this passage, accordingly, should be labeled “Act IV, Scene 4.” We have, then, a point from which to proceed in both directions.

Secondly, on either side of this middle point (or, more accurately, 11:19–15:4; 17:1–20:10) we appear

to have two sets of materials which are as clearly parallel to each other in both message and structure as we have just observed Acts III and V to be. Thus, there are in these parallel sections two women (12:1 ff; 17:3 ff), two beasts (13:1 ff; 17:6 ff); again, “another beast which rose out of the earth” (13:11 ff) and which from its description is readily identified with the emperor-worship cultus, and opposite its description in the other section the “final cosmic oratorio” which declares in terms of a Christian worship service the doom of the world culture (18:1–19:10). Further, the Lamb and the martyrs (14:1–5) opposite the Word of God and his retinue (19:11 ff)—rather obvious complements of each other. Similarly, the angel with an eternal gospel (14:6 ff) opposite the angel standing in the sun (19:17–18), the judgment scene at 14:14–20 and the judgment by battle at 19:19–21, and finally, the hymn of salvation in 15:2–4 as opposed to the final judgment of Satan in 20:1–2. The complementary nature of these opposite sets of passages is altogether too obvious to have been accidental.

Thirdly, a remarkably confirmatory check on the parallelism arrived at above is supplied by the discovery that John signalizes each change of scene in what may now be termed Acts IV and VI (and further, in Act VII as well) with the use of an introductory word meaning to “see” or “show” (εἶδον, ὤφθην, δειξω σοι, and/or ἔδειξεν μοι). In Acts I, II, III, and V the change of scene was, of course, sufficiently well indicated by the announcement of the successive items in each group of seven objects (letters, seals, trumpets, bowls) concerned with the action. It appears to have escaped the notice of students of Revelation (with the single exception of Austen Farrer, who independently made the same discovery) that in the remaining three Acts John employs εἶδον (13:1–2, 11; 14:1, 6, 14; 15:2; 17:3, 6; 18:1; 19:11, 17, 19; 20:1, 4, 11–12; 21:1–2, 22), ὤφθην (11:19; 12:1, 3), and δειξω σοι (17:1; 21:9) and/or ἔδειξεν μοι (21:10; 22:1) to accomplish the like end. (Outside what is now to be known as Acts IV, VI, and VII, it should be noted that εἶδον is employed indiscriminately by the seer, ὤφθην and ἔδειξεν μοι not at all, and δειξω σοι only at 4:1—i.e., at John’s introduction to the heavenly scene!) That is to say, in Acts IV, VI, and VII the simple device of changing scenes by the employment of one or other of these introductory words is accomplished with absolute precision, and the same holds for indicating a shift of stage props. Except for such changes, moreover, the words indicated are never employed in these Acts, though in 12:1, 3; 21:9–10, a certain redundancy occurs. I.e., at 12:1, 3, at the opening of Scene 1 of Act IV, ὤφθην for rather obvious reasons occurs twice rather than once only as everywhere else in the three Acts indicated. But comparison of this Scene with its opposite number in Act VI, together with the general considerations already advanced above which indicate the complementary nature of the Scenes in Acts IV and VI, makes it apparent that here John has slipped into the use of two ὤφθην’s as, so to speak, the equivalent of one εἶδον employed elsewhere. The second redundant use of words occurs at 21:9–10, where both δειξω σοι and ἔδειξεν μοι occur at the opening of Scene 5 in Act VII—surely an excusable

blunder, if such it be. The three considerations just advanced serve to furnish us, then, with Acts IV, VI, and VII, and these further subdivided into seven Scenes each. The sevenfold character of the drama is thus complete.

b. Stage props for the drama. If the seven-times-sevenfold structure of the drama found in Revelation follows the Semitic pattern, it seems equally certain that in several respects John borrows from the known setup of the Greco-Roman stage. The first of these concerns the stage settings which precede each of the seven Acts as now determined. These include the seven golden lampstands (1:9-20); the throne of God and the four creatures, the twenty-four elders, the slain Lamb and the mighty host of all created beings, together with the articles of furniture in the heavenly throne room (chs. 4-5); the altars of sacrifice and of incense (8:2-6); the ark of the covenant (11:19); the sanctuary or "tent of witness" (15: 1, 5-8; 16:1; 17:1-2); and the church enthroned with Christ (20:4-6). Some of John's interpreters have so far misunderstood his purpose in these sections as to imagine them to represent independent visions or main divisions of the book. But some of them are obviously so short and pointless in themselves as to render such an interpretation untenable. On the other hand, the two longer passages involved (1:9-20; chs. 4-5) are found at the two strategic points in the drama requiring considerable change of scenery—viz., respectively for Act I, which gives us a picture of the historic church with all its weaknesses and strengths, and for Act II, wherein against the background of the heavenly throne room we are to discern God's entire purpose in history.

It is to be expected that these Acts, which, so to speak, set the stage for all that transpires throughout the book, will require considerable elaboration of their settings as compared with the Acts which follow. Further, it is to be noted that such action as takes place in the passages here under discussion (e.g., in 1:9-20, where the Son of man is seen walking about in the midst of his church; and in chs. 4-5, with their episode of the scroll with the seven seals and the hymns sung by all creation in praise of God and the Lamb) is what might well be termed background action and constitutes a part of the stage setting for John's presentation of his theme. Such activity is not part of the dramatic action which goes into the production of the Scenes. The picture of the Son of man in his activity among the churches is a necessary backdrop for describing his lordly sway over the church universal as portrayed in the seven Scenes which follow in Act I. Similarly, the picture of God upon his throne surrounded by all the creatures of earth and heaven, together with the church as represented by the twenty-four elders, constitutes a necessary foil to the elaboration of God's purpose in history and his method of accomplishing it through the Lamb as this is set forth in the seven Scenes of Act II.

It is instructive to note in this connection that the hymns of both creatures and elders in 4:8-11 are indicated as proceeding eternally—a neat way of suggesting that this is stage-prop material (or alternatively, the music corresponding to that of the Greek chorus) and not part of the scenic activity carrying

forward the theme of the drama. In like fashion it seems clear that the "new song" and the acclamations in honor of the Lamb in 5:8-14 are merely anticipatory of the dramatic action which is to follow with the opening of the seven seals—i.e., the background functioning of the chorus. While all these stage props are taken bodily from the furnishings of the Jewish temple (seven lampstands, ark of the covenant, altars, etc.) or else serve to give expression to the Christian ideology (Lamb, elders, content of the hymns, and the like) and to concepts shared by both church and synagogue (the four creatures representing all God's animate creation, the angels of the Presence and of God's wrath), at the same time, however, their very use as stage settings is suggestive of the Greco-Roman stage, and, as we shall see particularly in connection with Act VII, no other locus can account for the peculiar succession of the events.

c. The cosmic stage of John's drama. Not only the stage furnishings, but also the over-all contours or larger dimensions of the scenery on John's cosmic stage, are suggestive at once of the arrangement of the Jewish temple and of the Greco-Roman stage. It is to be recalled that long before the first century A.D. this stage had attained a high degree of development with a recognized and rather definitely standardized plan. The theater at Ephesus, e.g., which may well have been in John's mind—both the subconscious as he "saw" his visions and the conscious as he wrote down what he saw—was, like the generality of theaters of the day, semicircular in shape and had a capacity of some twenty-five thousand people. Long before the first century A.D. the circular floor arranged to accommodate the chorus and orchestra had assumed this semicircular shape and was backed by an elevated stage upon which was erected a *skene* (σκήνη, whence our "scene") or building—formerly of wood or boughs, but now of stone—which formed a sort of backdrop for all the action as well as a convenient dressing room for the actors. On either side of this *skene* were erected two wings or *paraskenia* (i.e., side scenes), and before it a *prothyron* or porch which could conveniently represent the front of a palace or the façade of a temple. In the Hellenistic period a *proskenion*, or stage before the *skene* with its *prothyron* and between the *paraskenia*, was devised. This was continued into the Roman period and was found in the theater at Ephesus.

Much more of a more doubtful kind might be said at this point, but it is needful to recall merely those details which may with reasonable certainty be said to have characterized the theater from the third century B.C. forward. For it is here suggested that John conceived of the cosmic stage on which was to be enacted the drama of the Christian theology of history (or the gospel drama) as assuming in general the aspect with which his readers would long have been familiar. If we replace respectively the *skene*, *prothyron*, and *proskenion* with the sanctuary (or Holy Place and Holy of Holies); the *paraskenia* with the great white throne and the twenty-four thrones of the twenty-four elders arranged in semicircular fashion on either side of it (their seats being placed on the emerald rainbow which John says thrust out from the throne of God on either side; 4:3-4); the customary pagan altar, which stood in the foreground on

the level of the orchestra with the altar of sacrifice; and then, as occasion requires, conceive of the other furnishings mentioned (lampstands, altar of incense, sea of glass and of fire, etc.) as introduced onto this cosmic stage, we appear to have in these simple substitutions for the furnishings of the Greco-Roman stage as known to John's readers the proper arrangements for his cosmic drama as he saw it.

d. Prologue and epilogue. There appears to be but one touch left to make complete the picture of an unmistakable similarity between the Greco-Roman drama and its theatrical accouterments and the NT apocalypse. This concerns the matter of the prologue and the epilogue, which were regular features of such drama. And it is now proposed that Rev. 1:7-8—verses which to the casual reader appear to serve no useful purpose and which have always proved a stumbling block to translators and commentators as not being related in any way to their context—take on great significance when viewed as a prologue and as containing the accustomed announcements by the “herald” or interpreter of the theme of the play and by the *deus ex machina*. Aeschylus’ *Agamemnon* begins with a soliloquy by a “watchman”; similarly, Euripides’ *Hippolytus* has a prologue in which the cosmic significance of the story is represented. In the Roman drama also from the time of Plautus and Terence, and so long before John’s day, prologues had been employed for one purpose and another. And, although the pagan god (the so-called *deus ex machina*) was ordinarily brought onto the stage only after man had so tragically involved his affairs that a god was required to disentangle the snarl made in the skein of life, in the Greek new comedy the gods were at times introduced in the prologue with a view to giving needed instruction about the dramatic situation. It is here suggested, therefore, that John’s prologue contains an announcement by a herald of the “star” of his drama—namely, Jesus Christ (vs. 7)—and the imprimatur of the living God as “sponsor” of its action throughout (vs. 8). The epilogue (22:6-20), similarly, contains the imprimatur of the Lord himself, his Spirit, and the author of the drama, John, as its prophetic medium, upon the truth which the drama sets forth—a technique which once again appears in the Greek drama.

2. Outline. In conformity with what has been said above about the literary form of Revelation (letter and drama in one; cf. §§ A1, E1, *above*), a new outline of the book is herewith proposed. In the light of the preceding discussion, this outline should prove self-explanatory as far as its form is concerned. Its content will be discussed below (see §§ E3-4).

- I. The title of the apocalypse, 1:1-3
- II. Salutation to the seven churches, 1:4-6
- III. Prologue: Two voices (herald and Lord God), 1:7-8
- IV. Act I: The church on earth, 1:9-3:22
 - A. Setting: The seven golden lampstands, 1:9-20
 - B. The letters to the seven churches, chs. 2-3
 - Scene 1: The passionless church (Ephesus), 2:1-7
 - Scene 2: The persecuted church (Smyrna), 2:8-11

- Scene 3: The tolerant church (Pergamum), 2:12-17
- Scene 4: The compromising church (Thyatira), 2:18-29
- Scene 5: The dead church (Sardis), 3:1-6
- Scene 6: The missionary church (Philadelphia), 3:7-13
- Scene 7: The arrogant church (Laodicea), 3:14-22

- V. Act II: God’s purpose in history, 4:1-8:1
 - A. Setting: The throne of God, 4:1-8a; odes of creatures and elders, 4:8b-11; the sealed book and the Lamb, 5:1-7; hymns, 5:8-14
 - B. The opening of the seven seals, 6:1-8:1
 - Scene 1: The rider on the white horse, 6:1-2
 - Scene 2: The rider on the red horse, 6:3-4
 - Scene 3: The rider on the black horse, 6:5-6
 - Scene 4: The rider on the yellow horse, 6:7-8
 - Scene 5: Prayer of the martyrs, 6:9-11
 - Scene 6: The eschatological events, 6:12-7:17 (cosmic catastrophes, 6:12-17; sealing of the martyrs, 7:1-8; the martyrs in heaven, 7:9-17)
 - Scene 7: Silence in heaven, 8:1
- VI. Act III: The church in tribulation, 8:2-11:18
 - A. Setting: The altars, prayers of the saints, 8:2-6
 - B. The sounding of the seven trumpets, 8:7-11:18
 - Scene 1: Hail and fire fall, 8:7
 - Scene 2: A mountain cast into the sea, 8:8-9
 - Scene 3: A star falls on rivers and springs, 8:10-11
 - Scene 4: Heavenly bodies darkened, 8:12; an eagle announces three woes, 8:13
 - Scene 5 (woe 1): Pit of the abyss; locusts, 9:1-12
 - Scene 6 (woe 2): Four angels released, 9:13-15; two hundred million horsemen, 9:16-21; angel with the little book, ch. 10; times of the Gentiles, two prophets, the evil city, 11:1-14
 - Scene 7 (woe 3): Worship in heaven, 11:15-18
- VII. Act IV: The salvation of the church, 11:19-15:4
 - A. Setting: The ark of the covenant, 11:19
 - B. The showing of the seven pageants, 12:1-15:4
 - Scene 1: The woman and the dragon, ch. 12
 - Scene 2: The beast arising from the sea, 13:1-10
 - Scene 3: The beast arising from the land, 13:11-18

- Scene 4: The Lamb with the 144,000 martyrs, 14:1-5
- Scene 5: Announcement of doom to Babylon, 14:6-13
- Scene 6: The son of man on a white cloud and the winepress of God's wrath, 14:14-20
- Scene 7: Hymn of the Lamb chanted by the saved, 15:1-4
- VIII. Act V: The world in agony, 15:5-16:21
- A. Setting: The tent of witness, 15:5-16:1
- B. The pouring out of the seven bowls, 16:2-21
- Scene 1: Plague to the earth (boils on men), 16:2
- Scene 2: Plague to the sea (blood), 16:3
- Scene 3: Plague to rivers and springs (blood), 16:4-7
- Scene 4: Plague to the sun (burning heat), 16:8-9
- Scene 5: Plague to the beast's throne (darkness), 16:10-11
- Scene 6: Plague to the Euphrates (Armageddon), 16:12-16
- Scene 7: Plague to the air (devastation), 16:17-21
- IX. Act VI: The judgment of the world, 17:1-20:3
- A. Setting: An angel issuing from the sanctuary, 17:1-2
- B. The unfolding of the seven plagues, 17:3-20:3
- Scene 1: The woman on the scarlet beast, 17:3-5
- Scene 2: The beast at war with the woman, 17:6-18
- Scene 3: The final cosmic oratorio, 18:1-19:10
- Scene 4: The Word of God on the white horse, 19:11-16
- Scene 5: The angel standing in the sun, 19:17-18
- Scene 6: The Battle of Armageddon, 19:19-21
- Scene 7: Satan cast into the abyss, 20:1-3
- X. Act VII: The church in the Millennium, 20:4-22:5
- A. Setting: The church enthroned with Christ, 20:4-6; Satan's limited authority and defeat, 20:7-10
- B. The fulfilling of God's sevenfold plan, 20:11-22:5
- Scene 1: The old heaven and old earth, 20:11
- Scene 2: The Last Judgment, 20:12-15
- Scene 3: The new heaven and new earth, 21:1
- Scene 4: The new Jerusalem, 21:2-8
- Scene 5: Measuring of the city, 21:9-21
- Scene 6: The city's illumination, 21:22-27
- Scene 7: The city's source of life, 22:1-5
- XI. Epilogue: Imprimaturs on the book, 22:6-20
- XII. Closing benediction, 22:21

By way of comparison with this outline, the following synopses of representative outlines of others working in this field are given. Those of Lohmeyer and Rissi have been chosen because these writers have observed a sevenfold pattern of sorts as dominating the seer's purpose; those of Charles and Lund as examples of the type of scholarship which, to advance its critical theories, resorts to considerable rearrangement of the materials found in Revelation. In this respect, Lund gives John's book far more drastic treatment than Charles, who, like the other two scholars mentioned, also finds the book capable of a sevenfold treatment, though one quite different in detail from either of theirs or from that proposed here. See Table 1.

3. Symbolism and thought-frames. These are the stuff or fabric out of which an author fashions his message. They may be considered from the standpoint of their origins and from that of their essential content or teaching.

a. Origins. Much research has been expended on the possible background and origin of John's thought and imagery. Babylonian, Zoroastrian, Egyptian, and other pagan sources have been claimed for his reference to the "seven spirits" (1:4), and for his cosmological views relative to creation, heaven, hell, and the sea (4:1 ff; 20:14), to the "woman clothed with the sun" (12:1), to the "great red dragon" (12:3), and to numerous other items. It is also claimed by some that these pagan sources have been mediated to John either through the current Gnosticism or by means of Jewish apocryphal or apocalyptic writings. Among the Dead Sea Scrolls, that dealing with the "War of the Sons of Light with the Sons of Darkness" affords interesting parallels with John's "war . . . in heaven, Michael and his angels fighting against the dragon" (12:7-12); while there appear to be frequent ideological and linguistic coincidences with the cosmological and resurrection narratives recovered by Sumerologists. Pseudepigraphical writings such as I and II Enoch, II Esdras, the Testaments of the Twelve Patriarchs, and II Baruch also afford unnumbered parallels. Probably the significance to be attributed to source criticism of this sort involves the recognition of the existence of a certain "stock in trade" common to all Jewish and Christian apocalyptists. But the mediating agencies of most, if not all, of these materials, from whatever source, are the OT scriptures, on the one hand, and the common Christian tradition, on the other. See § A2 above.

b. Teaching content. John's thought-frames—whatever be their ultimate origin and mediation—are generally those of the Hebrew prophets, supplemented by the Christian additions common to all the NT writings. These include the ideas of the sovereignty of God, his holiness and righteousness, justice, truth, eternity, and love; a chosen people of God as contrasted with the generality of mankind; the Lord of the church envisioned as "one like a son of man"; a witnessing and martyred people; the elders of the congregation ruling with God or alternatively with Christ; the efficacy of prayer and the worship of God built around the same (18:1-19:8). Emblematic prophecy typical of prophets like Hosea, Ezekiel, and Jeremiah is to be seen in the portrayal of the Son of man's Lordship over and redemptive

activity for his church in the opening vision (1:12-20), in the action of the angel in heaving the "stone like a great millstone" into the sea (18:21-24), and the like. John presents these prophetic teachings after the usual apocalyptic fashion through the medium of a characteristic and striking symbolism, which is partly obscure but for the most part intelligible even to moderns who stand at a distance culturally and chronologically from his day. Thus, God's sovereignty as in all apocalypses is expressed by the vision of the divine throne room (chs. 4-5); his unapproachable holiness by that of the "sea of glass mingled with fire" (15:2; cf. 4:6; see SEA OF GLASS); his grace by a rainbow (4:3; cf. Gen. 9:12-13); his omniscience by the "seven spirits of God sent out into all the earth" (5:6); his judgment upon all his creation by the fact that "from his presence earth and sky fled away" (20:11). Similarly, the kingdom of evil is symbolized by the dragon and his angels (12:7 ff; 20:2-3; see DRAGON); and the corporate sin of the race, together with the secular might which incarnates it, is represented by a swarm of locusts (9:3 ff) and "troops of cavalry" (9:13-19). The evil messiah of this kingdom finds expression under the form of the "beast rising out of the sea" (13:1), and the cultic priesthood which gives it a religious sanction under that of "another beast which rose out of the earth" (13:11). See BEAST 4.

Further, the archangel Michael stands for Christ in his victorious battling with the forces of unrighteousness (12:7-10); "seven lampstands" for the church universal (1:20; see SEVEN CHURCHES); "seven

stars" for the "angels" (variously interpreted to mean bishops, messengers, heavenly counterparts, or the spiritual core; see ANGELS OF THE SEVEN CHURCHES) of the seven churches (1:20); "Sodom and Egypt," or alternatively "Babylon" and the city or world of mankind "where their Lord was crucified," for the contemporary world culture (11:8; 18:2); the "new Jerusalem" for the church or people of God (21:2; see NEW JERUSALEM); the "woman clothed with the sun" for the community of God's people out of which his messiah comes (12:1); the "great harlot who is seated upon many waters" for the evil community of the beast (17:1); finally, the "river of the water of life" (22:1) and the "tree of life" (22:2) for the final salvation which God affords his people. In addition, as already indicated above (see § E1), the background and stage setting for all John's "visions" are supplied from the various paraphernalia of tabernacle and temple, such as the lampstands (1:12), golden bowls full of incense (5:8), the altar of sacrifice (6:9), the golden altar of incense (8:3), the sanctuary with its ark of the covenant (11:19); and all these retain their usual significance as found in the OT scriptures.

The symbol creating the most difficulty for students of John's Apocalypse is the number of the beast (SIX HUNDRED AND SIXTY-SIX [13:18]). Most of the tyrants of history, from Nero to Kaiser Wilhelm and Hitler, as well as the pope of the Roman Catholic Church, have at one time and another been said both to answer to the description of the beast and to furnish in the numerical values attaching to their names in Hebrew or Greek the amount of the sum

indicated. Almost as much difficulty has attended the decoding of the meaning of the famous four horsemen at 6:1-8. Perhaps the best suggestion proposed is that the parallelism to be found between this passage and those at Matt. 24:6 ff; Mark 13:7 ff; Luke 21:9 ff offers an intelligible solution to the problem. In the event that this suggestion is adopted, the four figures on horseback represent, respectively, war or conquest, international or civil strife, famine, and death. In any case, the riders on the white horses at 6:2; 19:11 ff have nothing in common, the latter being clearly defined as "the Word of God." See further DEATH, SECOND; ARMAGEDDON.

4. Message: theology of history. Employing, as we have seen, the drama with its Greek stage and stage props, and the symbolism and thought-frames of both apocalypse and Hebrew prophecy, John endeavors in his book to set forth the divine philosophy (or theology) of history. This, to all intents, is the gospel—i.e., an account of God's redemptive activity—and this is carried through in the context of both man's general futility and the church's ineffectiveness. The seer is concerned to comfort a persecuted church and to exhort it to exercise a stronger faith and hope in the sovereign Lord of history (2:10, 13; 3:11-12; 6:11; 12:6). But his purpose far exceeds the mere wish to console and to focus the church's attention upon its own tribulations—however great these may appear to be. His earnest desire—subtly expressed at times, no doubt—is to place the church's dire extremity (Act III) in the context of the world's equally great need (Act V), on the one hand, and of God's redemptive purpose, on the other. For the church is at once the company of the saved (3:5; 15:2-4) and the redemptive agency by which God will both save (11:1-14) and rule (2:26 ff; 3:21; 20:4-6) the world. Accordingly, it is a mistake to see in the book merely consolation for Christians experiencing persecution. John's intention, it is true, includes this note, but it far transcends the wish to make the church more introspective than it already is. Nor is there here (any more than in the teaching of Jesus himself) a morbid attitude toward martyrdom such as appears, e.g., in the church of the second century (e.g., in the case of Ignatius of Antioch). There is, it is true, in the gospel as John dramatizes it what for the moment can only be called "bitter," as this gospel's full demand upon the church's powers is set forth (10:10; 11:1-14); and in his view there can be no escape from the necessity of carrying through to this bitter end (10:11). But the focus of attention throughout the book is neither upon the church's sufferings nor upon her exclusive salvation, but rather upon God's ultimate saving purpose and upon the church's part in its achievement.

Revelation opens with a vision of the Son of man walking in the midst of his church as its Lord (1:12-16), and holding in his right hand its spiritual core (the "angels of the seven churches" [1:20]) as its Savior. John says that, being "in the Spirit on the Lord's day" (1:10—the first reference to Sunday, if it be such, employing this phrase, in Christian literature; otherwise, perhaps a reference to the eschatological time, the phrase then being the equivalent of Amos' "day of the LORD"), he heard behind him a loud voice, and that, turning round, he saw, not im-

mediately the voice's owner, but rather a seven-branched lampstand or seven separate lampstands symbolizing the church, and only thereafter the church's Lord in its midst (1:12 ff). This is a good example of John's symbolic method—if one would see Jesus, he means to say, let him look at the church, for it is here that he is to be found!

The church is realistically portrayed in Act I as it was in John's day. If one thinks of the seven-branched lampstand of the temple as standing erect on Patmos with a strong light behind it to the SW, then its arms will cast their shadow upon the land in such a way as severally to connect the two wayward churches of Ephesus and Laodicea (the outermost branch), the two faithful churches of Smyrna* and Philadelphia (the middle branch), and the churches of Pergamum and Sardis (the innermost branch), which with that of Thyatira at the apex between them, stand respectively for tolerance of the evil courtship of emperor-worship, compromise with the pagan deification of the state for which it is sponsor, and death of the spirit of true worship in which it must issue. Such is—we are constrained to believe—a true picture of the church at the end of the first century as the seer sees it and as he portrays it for that church's admonition. Figs. SMY 70-71; REV 10.

But if in Act I we see the church as it is on earth, equally in Act II we are transported into the heavenly regions that we may view the historical scene in the perspective of God's eternal purpose.* The seven-sealed book (5:1-7) contains, as the following seven Scenes clearly indicate, a synopsis of God's plan for man in history. Scenes 1-4 present us with a picture of the rise and fall of empires and of the cyclic futility of man's life when he is left to himself (6:1-8). John never again mentions the four horsemen, because it is not his wish to dwell on man's futility, but rather to develop the theme of God's contrasting providence and grace. In the midst of this futility, the church—for which as a whole we believe the "martyrs" to stand (cf. 7:3-4, 13-14; Luke 14:27)—can only pray for deliverance and vindication (6:9-11; Scene 5), and for the moment its prayer is answered with the gift of the court dress of the heavenly throne room. Scene 6 then follows with a brief synopsis of the eschatological events which are to be portrayed in far greater detail in Acts III and V. Finally, Scene 7 gives us a picture of all the creatures of God's universe "frozen" on the stage, that we may for a brief "half an hour" meditate upon the divine purpose as disclosed in this comprehensive act (8:1). Fig. REV 11.

Acts III and V are complementary, as their successive scenes clearly indicate, and together they elaborate the eschatological events already narrated in 6:12-7:17. Act III portrays for us the church in the tribulation of the last times, even as Act V in like manner sets forth the effect on the secular world of the same distressing events. The more drastic effect of the cosmic catastrophes upon the world, as compared with their effect upon the church, is apparent as Scenes 1-4 of the two Acts are compared. This is John's parabolic way of saying that cosmic calamities cannot really touch God's people (cf. 16:2; 9:4). The same lesson appears in the fact that, on

John W. Bowman

10. Stage setting (based on an approximate location of the places depicted) for Act I of Revelation: Ephesus (E) and Laodicea (L), two "bad" churches, are connected by the lowest arm of the lampstand; Smyrna (S) and Philadelphia (Ph), two "good" churches, similarly are at either end of the middle arm; and Pergamum (P), Thyatira (Th), and Sardis (Sa) represent a progression from *tolerance*, through *compromise*, to *death* in dealing with sin.

the one hand, the prayers of the saints are indicated as bringing forth God's effective action within history (8:2-6; 11:15-18), while, on the other hand, the world cannot even approach his sanctuary during the tribulation of these times (15:8; cf. 16:21). During the eschatological time man is surrounded and harassed by corporate sin (9:1-12) and the secular power implementing it (9:16-21); these are respectively set forth in terms of a swarm of creatures like locusts and a horde of demonic cavalrymen, the imagery in both cases being derived from the book of Joel. At the same time, however, the church's evangelism proceeds apace in the city of Vanity Fair (called Sodom, Egypt, Jerusalem, Babylon [11:8; 16:19]—hence, any city and any land of like character); and, though martyred, the church rises and ascends like its Lord into heaven (11:1-14). From the co-ordination of this passage with its opposite number in 16:12-16, it becomes clear that the so-called Battle of Armageddon is one of ideologies (gospel versus *badspel*), not of guns and bombs (cf. 19:11-16, 21).

Similarly, Acts IV and VI are complementary, the one presenting the *modus operandi* of God's salvation of his people during the eschatological tribulation,

the other that of his judgment on the secular culture opposed to his will. And here the chronological scheme with which John is working becomes clear. For in 12:5 the entire incarnate life of our Lord is indicated (from Incarnation to Ascension)! It should be clear, accordingly, that for John the eschatological time embraces the whole period of the church's history from Incarnation to the end of time, as both of these Acts end in their closing Scenes with the final judgment of Satan and his hosts (14:14-20; 20:1-2).

In Act VII we have the "play within the play." The church is now seen to be seated with Christ and reigning with him throughout the Millennium (20:4-6)—a period to be reckoned according to God's time, not man's, and hence the equivalent of the "day of the Lord" (cf. II Pet. 3:8-10) or the entire sweep of the eschatological period. The seer makes this time span clear from his remark that this is the period of the "first resurrection"—i.e., of the moral one experienced by man within history (cf. Rom. 6:1-11; Eph. 2:1-10). To say as John does that the church reigning with Christ is privileged to observe the successive pageants presented in the seven Scenes of this Act, is simply to credit it alone with the spiritual in-

John W. Bowman

11. Stage setting for Acts II-VII of Revelation: The "sanctuary" of the heavenly temple (taking the place of the theater's *skene*) stands open, showing the "throne" and ark of the covenant; the twenty-four thrones for the elders correspond to the theater's *paraskeneia*.

sight required to foresee the eternal purposes of God in their completeness. Accordingly, throughout history the church is led by the Spirit to see that all creation is in God's sight judged as unworthy (Scene 1; 20:11), that he will judge all men in like manner (Scene 2; 20:12-15), that he will create a new cosmos after his own liking (Scene 3; 21:1), and that he is progressively bringing ever nearer the "new Jerusalem," Christ's church and bride (Scenes 4-7). The judgment in Scene 2 here presents the final stumbling block to every endeavor to interpret this book literally, for on the basis of such interpretation there is no place left for it to occur. For the interpretation outlined herein, however, no difficulty presents itself—this Scene, like all others of the drama, occurs on the stage, of course!

F. CANONICITY. At an early date Revelation was employed as authoritative by church fathers throughout the church.

1. **Europe.** Hermas (95-100), himself an apocalyptic writer at Rome, used its imagery (e.g., a woman to represent the church and a beast to stand for its enemy); while Justin Martyr, who lived and wrote in Rome a half century later, both employed the book and mentioned its author by name. The so-called Muratorian Canon, a second-century list of the books of the NT, remarks of it: "And John in the Apocalypse, although he writes to seven churches, yet speaks to all." Irenaeus, bishop of Lyons (175), also used the work, and it is quoted in the contemporary letter of the churches of Vienne and Lyons with the introductory formula indicating it as scripture. The OL MSS g and m (eighth or ninth century), representing a translation of about the same period, contained the book. Finally, under the influence of Jerome, it found a place in the Vulg. (391-404).

2. **North Africa.** The OL MS h (sixth or seventh century), containing a translation of the African type which goes back presumably to the second century, has fragments of Revelation along with the other NT writings. Tertullian (ca. 200) and Cyprian (ca. 235-58) both wrote in Latin; and the former possibly, the latter assuredly, employed the African Latin transla-

tion of the NT, including that of Revelation. Tertullian specifically speaks of it as by "John the apostle." The Council of Carthage (397) in this area, under the influence of Athanasius, adopted a canon including all the books of the NT accepted by the church universal ever since.

3. **Egypt.** Clement of Alexandria (212) is our first authority here to quote the book, and this he does under the name of the apostle John. He is followed by Origen (ca. 235), who gives Revelation a place among the "generally accepted" books of the NT canon. The contemporary Chester Beatty Papyrus (P⁴⁷), emanating from this area, is the earliest Greek exemplar of John's work; the Sahidic version (second to fourth century) also contains fragments of it. Dionysius of Alexandria (third century) challenged the Johannine authorship of the book, though he accepted it as canonical. It is found as well in the Bohairic version (of uncertain date). Finally, in his Festal Letter of 367, Athanasius included Revelation in his canon—a matter of great moment for the latter tradition of the church.

4. **The East.** In the area for which John wrote his book, Papias, bishop of Hierapolis (early second century), appears to have been the first on record to have employed it as authoritative; he was followed by Melito of Sardis (160-90), who wrote a commentary upon it. During the same period Apollonius is said by Eusebius to have used it, as did also Methodius, bishop of Olympus—both of Asia Minor. In addition, there are possible traces of its having been known to and used by the Valentinian Gnostics of the same area. In N Syria, Revelation experienced perhaps its most checkered career. Bishop Theophilus of Syrian Antioch (ca. 181) used and quoted from the book according to Eusebius, and Lucian (ca. 312)—the probable creator of the Byzantine text of the NT—incorporated it into that version, which became the standard Greek text of the Eastern Empire. But Bishop Rabbula of Edessa (411-35) omitted Revelation, along with the minor Catholic letters, from the Peshitta Version of the Syr., and it was not incorporated into this translation until 508 at the behest of Bishop Philoxenus of the Syrian Hierapolis. This is perhaps as satisfactory a history generally as could be expected of the only extensive bit of apocalyptic writing to be included in the NT scriptures.

G. TEXT. The witnesses for the text of Revelation divide themselves into three groups constituted respectively of: (a) P^{18.478} ACP 0207; (b) 046 and about forty cursives (incl. 1); and (c) the bulk of the cursives containing the Byzantine text. The Chester Beatty Papyrus (P⁴⁷) of the third century exhibits the most striking originality of all these witnesses, while agreeing on the whole with the group indicated. (For the versions and fathers, see § F above.) On the whole, the text of Revelation is fairly certain. A majority of the variants appear to deal with the curious solecisms in which the book abounds (see § A3 above); scribes from time to time endeavored particularly to correct the author's grammar in the matter of gender, number, and case of noun and adjective, and in that of mood and tense of the verb.

The most striking variants concern the number of the beast at 13:18 (see SIX HUNDRED AND SIXTY-SIX,

and the spelling of "Armageddon" (see HARMAGEDON). Other important readings about which some doubt exists include: 1:5—λύσαντι or λούσαντι; 4:3—ίρις or ιερεις; 10:3-4—the number of the "thunders" ("seven" or indeterminate); 15:3—the "King of the nations" or the "King of the ages"; 19:9—retention of "of the marriage" with "feast . . . of the Lamb"; 19:13—the participle to accompany ἱμάτιον; and 20:9—the addition of ἀπὸ τοῦ θεοῦ after πῦρ. Interesting variants of an interpretive type include: Βασιλεῖς καὶ ἱερεις for Βασιλείαν, ἱερεις (1:6; 5:10); πρωτότοκος for πρώτος (1:17; 2:8); ἐβάπτισας for ἐβάστασας (2:3); ἀπὸ τοῦ ξύλου for τοῦ μάννα (2:17); τὸ θηριον τὸ τέταρτον for τὸ θηριον (11:7); and omission of "This is the second death, the lake of fire," in 20:14.

There is little or no evidence for dislocation of text on an extensive scale in Revelation. The only likely exceptions occur at 15:1, which should possibly follow after vs. 2-4, and at 20:7-10, which might well follow immediately after vs. 3.

W. BOWMAN

REVENGE, REVENGER. See AVENGER OF BLOOD.

REVERENCE. There is no typical word in the original languages of the Bible corresponding to the English "reverence" (cf. εὐλάβεια, "godly fear," "reverence," only in Heb. 12:28; cf. 5:7). "Reverence" is sometimes used (cf. "revere," "reverent") for the Hebrew ירא, FEAR, "awe," when deep respect other than that owed to God is implied (Lev. 19:3, 30; 26:2; Judg. 6:10; I Kings 18:3, 12; in a different idiom: Ps. 119:48). The KJV uses the word "reverence" (RSV "obesance") for השתחוה, "to bow down," where one bows in homage to a man (II Sam. 9:6; I Kings 1:31; Esth. 3:2, 5).

The expression φόβος Χριστοῦ (Eph. 5:21), "fear of Christ" (RSV "reverence for Christ"), challenges the adequacy of the time-honored phrase "fear of the Lord" (Acts 9:31; Rom. 3:18; II Cor. 5:11; cf. 7:1) to contain the full dimension of man's response to God's fearful righteousness expressed in love. In the light of this passage and other NT exhortations to mutual subjection "in the Lord" (Eph. 6:1; Col. 3:18; cf. Eph. 6:9; Col. 4:1), the term "reverent" in I Pet. 3:2 (KJV "fear") is a fitting translation (cf.

Eph. 5:33, where the KJV has "reverence," the RSV "respect," for φοβείσθαι, "to fear"; cf. Deut. 32:51; I Pet. 3:15). The RSV uses "respect" for ἐντρέπεσθαι, "to shame oneself before another"—i.e., to respect him (KJV "reverence") in Matt. 21:37; Mark 12:6; Luke 20:13; Heb. 12:9. J. A. WHARTON

REVILE. See SCOFFER.

REWARD. The English word "reward" may have a neutral meaning of "recompense for good or evil," but most often it suggests a benefit or favorable compensation. In the RSV, with few exceptions (cf. Luke 23:41; Acts 1:18), "reward" means some positive outcome or return. Yet one must take account of the larger complex of thought, where good and evil are rewarded and punished, and man's responsibility and accountability are involved in the ethical scene. Related terms come into the picture, such as "wages," "hire," "recompense," "requital."

The operation of this reward ranges from the natural compensation man to man to God's recognition of obedience and service, from a happy outcome in this life to a gracious recompense in the life to come.

It is to be noted that the words used in Hebrew and Greek suggest the idea of the wholeness of an action, the completion of the deed. Just as work is completed for a man in the payment of his wages, so it is assumed that action naturally carries an entail in its outcome, whether of reward or of punishment. The overtones of a commercial transaction are not absent, as when reward is referred to as "wages." The Hebrew terms most often used are גמל, "to deal with, to benefit, to reward" (גמול, "act, benefit, recompense"); עקב, "end, reward, wages," sometimes used as a preposition, "in reward of"; פעלה, "labor, wages"; שוב, "to return, to do a second time, to reward"; שכר, "hire, reward" (משכורת, "wages, reward"); שלם, "to be whole, to complete, to restore, to requite."

The Greek terms give the sense of a wage return and an equivalent compensation. The word μισθός, with its cognates, μισθός, μίσθιος, μισθωτός, has a first meaning of "payment for services." The word ἀνταποδίδωμι, with its cognates ἀνταπόδομα and ἀνταπόδοσις, suggests an equal return; the prefixes ἀντί and ἀπό reinforce the idea of corresponding repayment. The Letter to the Hebrews uses a late Greek word, μισθαποδοσία.

Bibliography

1. **In the OT.** This article is concerned with reward in its ethical and religious dimensions. The covenant of God with Israel was the evidence of God's loving favor; it promised good things to Israel on condition of their obedience to the command of God. Disobedience was a violation of the covenant and would bring disaster and death. Israel was to observe what was right and good in the sight of the

Lord that they might prosper and come into possession of the land. In the period of the wanderings failure to obey, on the part of leaders and people, brought suffering and death. The history of the judges and the kings was written in terms of reward for faithfulness and punishment for sin and idolatry. Earthly victory and welfare depended on obedience (Josh. 1:7-9; Judg. 2).

In the Psalms and the wisdom literature this "neat doctrine of rewards and punishments" was applied to the individual life. The good life was assured on the basis of obedience and discipline, and wisdom came to be identified with the good life. The first psalm illustrates the fortunes of the wise, pious man and the ungodly fool. Elsewhere in the Psalms this neat mechanical pattern breaks down when the psalmist prays for forgiveness and says:

He does not deal with us according to our sins,
nor requite us according to our iniquities
(Ps. 103:10).

Proverbs follows the orthodox doctrine, but the writer or writers of Ecclesiastes found that life did not work out so neatly and the doctrine of retribution did not always apply in the span of the individual life. They sound a cynical note as they see the righteous suffer and the wicked prosper, or as they observe a common fate for all.

In the book of Job the friends take the position that righteousness is rewarded by welfare and long life, while sickness and poverty are the recompense for sin. In his suffering Job acknowledges that he has sinned, and yet he observes around him the wicked prospering. Job maintains his integrity before God, and for him the answer lies beyond the pattern of strict reward for righteousness and punishment for evil.

2. In the Apoc. Tobit illustrates a mechanical righteousness done with a view to reward. He tithes, gives alms, buries the dead, makes pilgrimage. Yet he suffers blindness and affliction in captivity. His piety appears to go unrewarded, and his wife complains: "Where are your charities and your righteous deeds?" (Tob. 2:14). The theme of the book is that good deeds register with God, and finally Tobit is vindicated with good success for him and his family. "Give alms. . . . So you will be laying up a good treasure for yourself against the day of necessity. For charity delivers from death. . . ." (4:7, 9-10).

In the book of Judith one theme is basic: If the Israelites sin, they are vulnerable to the enemy; but if there is no transgression, God will protect the nation from attack.

In Ecclesiasticus we see the individual application of rewards and punishments. Here piety is identified with wisdom (15:1), and the reward is more wisdom (6:18). "Do no evil, and evil will never befall you" (7:1). The freedom of man to choose good or evil is in his own hands, and he is held accountable for his choice.

Do your work before the appointed time,
and in God's time he will give you your reward
(51:30).

The author is aware of a certain skepticism concerning God's accounting, as though man might hope to

escape punishment (5:1-7), but he warns that suddenly God's wrath will go forth.

Mattathias in I Maccabees exhorts his sons to be zealous for the law and the covenant, and he recalls how the great leaders of the past, Abraham, Joseph, Joshua, David, had been rewarded for their faithfulness to God's commandment (2:51-60).

II Maccabees enlarges the range of reward and punishment with the idea of resurrection. The arrogance of the heathen will receive just punishment in the judgment of God and no resurrection to life, while the faithful martyr can look beyond death to his vindication at the hand of God (7:9, 29, 35-37).

Full reward in life after death is clearly stated in the Wisdom of Solomon:

The righteous live for ever,
and their reward is with the Lord;
the Most High takes care of them.
Therefore they will receive a glorious crown
and a beautiful diadem from the hand of the Lord
(5:15-16).

Even in this world the life of wisdom leads to security, honor, and prosperity.

3. In the teaching of Jesus. In the Judaism in which Jesus lived, God punished sin and rewarded righteousness. The Jewish teachers would say that "good deeds deserved the favor of God and the reward he promised" (G. F. Moore [see *bibliography*]). "Judaism has no hesitation about recognizing the merit of good works, or in exhorting men to acquire it and to accumulate a store of merit laid up for the hereafter." II Esdras and Tobit refer to the treasure of good works laid up. As the commandments of the law were multiplied, so the number of rewards for those who kept the commandments was to be multiplied in the afterlife. The lawyer in Luke 10:25 ff, with his question: "What shall I do to inherit eternal life?" provides an example of good works with a view to reward from God; Jesus' reply is in the same pattern: "Do this, and you will live" (10:28). It should be noted that the development of Jewish apocalyptic speculation concerning the Age to Come opened up a great prospect of reversal and reward.

Reward is an almost constant feature of Jesus' teaching (cf. the Beatitudes). Occasionally the outcome is in the sequence of this life, as is probably meant in Matt. 7:1-3, but more often it is in the spiritual relation with God (Matt. 6:4, 6, 18) or in the Next Age (Matt. 6:20; Mark 10:21: treasure in heaven). At other times Jesus calls for service without reference to reward (Luke 9:57-62; 14:25-33).

The reward motive is sharply curbed in the parable of the laborers (Matt. 20:1-16), where the payment of one denarius is for all, or in the parable of the servant from the field, whose hard labor created no merit: "We are unworthy servants; we have only done what was our duty" (Luke 17:7-10). In the judgment scene of Matt. 25 the righteous are rewarded with a place in the kingdom, but their service to the thirsty, hungry, naked, was so far from being done for a reward that the righteous were unaware of what they had done. In Mark 10:29-31, Jesus promises to the faithful disciples hundredfold restitution plus eternal life. But this can be under-

stood as suggesting no consciously chosen reward. Only suffering and privation in this life, but a reversal in the life to come. Incidentally, the reader of the Greek Testament should not always insist on the purposive aim in all the *ὅτι* clauses, for very often the writers made no clear distinction between purpose and result, confusing purpose with common sequence. Similarly when Jesus said: "If any one would be first, he must be last of all and servant of all" (Mark 9:35), he was not offering the first place as the consciously chosen goal to be achieved by humility—such self-centered humility would not be humility at all. How far Jesus' teaching was from self-seeking reward appears in the paradox: "Whoever would save his life will lose it; and whoever loses his life for my sake and the gospel's will save it" (Mark 8:35). Other goals and causes come first: "Seek first his kingdom and his righteousness, and all these things shall be yours as well" (Matt. 6:33).

Discussion of Jesus' reward ethics should include the following considerations: (a) the reward is of the same character as the principle, action, or service enjoined; (b) the reward can be understood as the necessary consequence of the way of life Jesus taught; life moves on to these outcomes and results, and God can be counted on to preserve the moral and spiritual order; (c) the rewards are included in the salvation offered as the gift of God to all men who will respond in faith; (d) the goal to which Jesus directed men is not self-aggrandizement, but self-forgetful service in God's kingdom, which is ours, not by merit, but by the grace of God.

In the consideration of rewards we can see the sharpest difference between the Synoptic gospels and the Fourth Gospel. Eternal life in the Fourth Gospel rests on belief, but this life is not a reward of the future after death—death for the believer is no more—eternal life is a present possession which the Son communicates. Faith and its outcome have been telescoped in this eternal life, which the believer now enjoys. Relics of the older eschatological scheme persist in reference to the judgment and the resurrection. Jesus says he goes to prepare a place for his disciples; the Counselor will come as compensation for Jesus' departure. But the future reward becomes a present possession in fellowship with the Father and the Son.

4. In the letters of Paul. Paul's great theme is that God in Christ freely justifies the believer and that he thereupon enters into the privileges of the new life in Christ. In this new state the believer enjoys the gifts of the Spirit in reward and victory in the moral struggle. Ideally the man in Christ has ceased from sin, and the law of commandments has no more power over him.

However, Paul just as persistently asserts man's responsibility for his actions and his accountability before the judgment seat of God or Christ: "We shall all stand before the judgment seat of God" (Rom. 14:10; cf. II Cor. 5:10). This judgment is individualized and particularized in Rom. 2:6-8: "He will render to every man according to his works: to those who by patience in well-doing seek for glory and honor and immortality, he will give eternal life; but for those who are factious and do not obey the truth, but obey wickedness, there will be wrath and fury"

(see also Gal. 6:7-8). In this judgment there will be gradations of punishment (Col. 3:25) or rewards (II Cor. 5:10; Eph. 6:8). Paul warns his readers that a so-called believer could be rejected (I Cor. 6:9-11).

At a few points Paul refers to reward in this life (II Cor. 9:6 ff; Eph. 6:2 ff; Phil. 4:17-19). But in general he finds that in this life there are only pain and hardship, and he projects the rewards for the Christian into the future at the Judgment or in the coming kingdom. The great reward will be the possession of eternal life (Gal. 6:8), which is also considered as participation in the kingdom of God. (The figure of the athletic contest, with its prize, is a familiar one in Paul's letters—e.g., I Cor. 9:23-27; Phil. 3:13 ff.) In the kingdom each individual will receive his award in proportion to his record on earth.

This apparent contradiction between justification by faith and the recompense principle has been much discussed. Both doctrines are clearly represented in Paul's thinking, and he does not seem to be aware of a contradiction. A certain adjustment of thinking does appear in Rom. 6:23: "The wages of sin is death, but the *free gift* of God is eternal life in Christ Jesus our Lord." But Paul as a Jew would naturally think in terms of human accountability before God, with the consequent rewards and punishments. The fact is that the teaching of justification by faith is properly set against the background of God's judgment of man, and it derives its meaning from that judgment. Human accountability is basic to the order of life for all men, but Paul sees the Christian entering on a new order of life in the Spirit where victory over sin is assured and where judgment will not bring the wrath of God but final vindication.

In the Pastoral letters that have been credited to Paul, there are frequent references to good works and their rewards (I Tim. 6:18-19; II Tim. 4:6-8). Eternal life is a prize to be won.

5. In the rest of the NT. In the Letter to the Hebrews we hear of the promise of rest (4:1), into which men should strive to enter. God is aware of the good deeds of the believer, who should seek through faith and patient endurance to inherit the promises (6:10-12). Christ has offered the perfect sacrifice for the sin of man, and yet the believer could fall away and finally face the fearful prospect of judgment and fire (3:12; 10:26-31). For the believer who confidently endures, there will be a reward (10:35; *μισθαποδοσία*). The author of Hebrews cites as an example Moses, who looked to a reward (11:26). Even Jesus "for the joy that was set before him endured the cross" (12:2).

The Letter of James deals vigorously with the idea of man's accountability before the whole law on the basis of his deeds. "Faith by itself, if it has no works, is dead" (2:17). The doer of righteousness will be blessed in this life (1:25), and his endurance of trial will be rewarded by the possession of strong, complete character. But all men face the imminence of judgment. The crown of life is promised to the man of tested faith, but evil men can anticipate only misery in the life to come (5:1-6).

The author of I Peter confidently looks forward to the Christian hope at the revelation of Jesus Christ. Faithful men suffer trial now, but then they will enter their inheritance and receive the crown of glory.

Instead of underscoring reward, he says in 1:9: "As the outcome [τέλος] of your faith you obtain the salvation of your souls." For all men there is the prospect of judgment, with a dire end for those who disobey the gospel of God. Yet there are many exhortations and injunctions without any reference to reward. For the slave in his suffering it is enough to have the approval of God.

The book of Revelation was written for the vindication of those who suffer now but who will have a share in the heavenly Jerusalem. In the seven letters at the beginning the portion of the faithful is described as the tree of life, the crown of life, the hidden manna, etc. The series of seven seals, trumpets, and bowls deal with the disasters coming upon the wicked, and part of the reward for the saints seems to be to gloat over the wicked in their suffering (18:20). The judgment of God brings wrath upon the wicked, but to the saints there will be exemption from hunger, thirst, sorrow, and suffering. God will reward them with rest, "for their deeds follow them" (14:13). And they will reign with Christ.

REZEPH re'zēf [רֶזֶפְתַּי; Assyrian-Babylonian *Rašappa*]. A town mentioned with Gozan (Assyrian Guzana, modern Ras-el-'Ain) and Harran in the message of Sennacherib's commander to Hezekiah (II Kings 19:12; Isa. 37:12) as an example of cities long ago captured by the Assyrians and not delivered by their own local gods. Reseph was located near the W end of Jebel Singar and had in 701 b.c., when Sennacherib's commander referred to it, been in Assyrian hands for a century or so, for it is known to have been an Assyrian provincial capital at least since Adad-nirari III (810-782). Most probably it was incorporated as an integral part of Assyria by Shalmaneser III after his campaign in that region in 838. Harran and Gozan, mentioned with it, seem to have been incorporated under Adad-nirari III.

REZIA. KJV form of RIZIA.

REZIN re'zīn [רֶזִין; LXX B 'Ρασιειν in Isa. 7; Aq., Symm., Theod., 'Ρασιιν in Isa. 8; MT doubtless has vocalized improperly the Canaanite expression of the name (*rašyōn*); cf. LXX 'Ρασισσών in II Kings; cf. Syr. *rašān*; Aram. *ra-ḥi-a-nu*, pleasant, agreeable, indicated by Akkad. *ra-ḥi-a-nu*]; DAISAN dā'sān (I Esd. 5:31). King of Damascus (died 732 b.c.). Born at Bit-Hadara near Damascus, he became the "head of Damascus" (Isa. 7:8). In 738 b.c., like Menahem of Israel (II Kings 15:19-20) and other kings of Syria, he paid tribute to the Assyrian king, Tiglath-pileser III.

During the reign of King Ahaz of Judah, apparently because he was frustrated in an attempt to

persuade Ahaz to join an alliance against Assyria, Rezin joined King Pekah of Israel in an attack on Judah with the intention of placing an Aramean on the throne of Judah (II Kings 16:5-6; Isa. 7:1, 6). Although the Arameans of Damascus extended their influence southward E of the Jordan, the assertion that Rezin displaced the Jews of Elath and colonized the place with Arameans (II Kings 16:6) may be unhistorical, resting on a confusion in spelling between "Aram" (אַרַם) and "Edom" (עֲדוּם), since the Edomites usually dominated that region. Rezin's attack on Jerusalem failed, but King Ahaz was terrified (Isa. 7:1-2). Despite the prophet Isaiah's advice to remain calm and trust in God because the power of the "two smoldering stumps of firebrands" was about spent (vss. 4, 7-9, 16), Ahaz sent treasures of his temple and palace as a rich bribe to persuade the Assyrian king to help Judah against Rezin and his ally Pekah (II Kings 16:7-8).

When Tiglath-pileser III attacked in 733 b.c., Pekah of Israel was assassinated, and Hoshea, the nominee of the Assyrian king, was installed as king of Israel (II Kings 15:29-30). Rezin briefly resisted, then fled "like an antelope" to Damascus, where he was besieged like a "caged bird," according to the Assyrian annals. Unable to take Damascus at once, the Assyrian turned against the Arabs, Tyrians, and Philistines who had been the allies of Damascus and might be expected to send assistance against the Assyrians. The gardens and parks that surrounded Damascus were destroyed; and 591 towns near the city, including Rezin's birthplace, Bit-Hadara, were laid waste. In 732 b.c., Damascus was captured, and many of its inhabitants were exiled. Rezin was executed (II Kings 16:9). Schrader claims that Rawlinson found an Akkadian record of the slaying of Rezin but that the slab was left in Asia and subsequently disappeared. After the fall of the city, the kingdom of Damascus lost its independence entirely and was made into an Assyrian province.

The name Rezin appears again in the postexilic period in the listing of the "sons of Rezin" among the temple servants (*see* NETHINIM) that formed part of the postexilic community (Ezra 2:48; Neh. 7:50).

Rezin is not to be confused with an earlier Aramean, REZON (רִזּוֹן), who was contemporary with Solomon (I Kings 11:23-25).

REZON re'zōn [רִזּוֹן, prince] (I Kings 11:23). An Aramean leader who was an adversary of Solomon. Rezon began his career in the service of Hadadezer, but left him, probably after the defeat of the Aramean coalition by David, to become the captain of an independent company of marauders. When Israelite control over Damascus weakened during the reign of Solomon, Rezon seized the city and made it the center of a new and powerful Aramean state. Probably he is to be identified with Hezion, grandfather of Ben-hadad I (I Kings 15:18).

RHEGIUM *rē'jī əm* [τὸ Ῥήγιον] (Acts 28:13). A town in S Italy where Paul stopped on the way to Rome; the modern Reggio or Reggio Calabria.

Rhegium is on the Strait of Messina, which here separates Italy and Sicily by a width of *ca.* seven miles. It appeared to the ancients that Sicily had been "rent" (from ῥήγνυμι) from the continent by earthquake; hence this town was called Rhegium. This was the explanation given by Aeschylus (Fragment 230); but others preferred to derive the name from *regium*, the Latin word for "royal" (Strabo VI.258).

According to Strabo (VI.257), Rhegium was first settled by Chalcidians, together with some Mesenians from the Peloponnesus, the latter being the people who settled Messina across the strait. The foundation of Rhegium probably took place in the latter part of the eighth century B.C. *Ca.* 494 B.C., contemporary with Gelon of SYRACUSE, Anaxilas was tyrant of the city (Herodotus VI.23; VII.165).

In 427 B.C., Athenian forces undertook to seize Sicily, and Rhegium provided them a base and contributed ships (Diodorus XII.54). In 415 B.C., however, when the Athenians were moving against Syracuse, where they were soon to suffer disaster, Rhegium held back from active alliance (Diodorus XIII.3). Soon afterward, the city resisted the rise of Dionysius the Elder in Syracuse, and warfare ensued, the result of which was the demolition of Rhegium by Dionysius in 387 B.C. (Strabo VI.258). Dionysius the Younger, who ruled Syracuse 367-343 B.C., rebuilt Rhegium and called it Phoebia, in honor of Phoebus (Apollo), whose son he claimed to be.

In 280 B.C., Pyrrhus, king of Epirus, invaded Italy, and Rhegium, fearing both him and also the Carthaginians, who dominated the sea, requested a garrison from the Romans. Four thousand men were placed in the city under command of Decius, but after a time the protectors, seeing the favorable situation and great wealth of the city, massacred or expelled the citizens and took it for themselves. In 271 B.C. the evildoers were punished and Rhegium restored to its own citizens (Polybius I.7).

In the Punic Wars, Rhegium was almost taken by Hannibal (Polybius IX.7), but maintained its independence and remained loyal to Rome (Livy XXIII.xxx.9). After the earthquake of 91 B.C., Rhegium was in want of population, but Augustus Caesar settled some of the men of his expeditionary forces there, and at the beginning of the first century A.D. the city was fairly populous (Strabo VI.258-59). Under Augustus it took the name of Rhegium Julium (Ptolemy Geography III.1).

RHEIMS VERSION *rēmz*. A term applied to the NT section of the official Roman Catholic English Bible, the DOUAY VERSION. Cardinal William Allen encouraged the professors of canon law at Douay in 1578 to prepare the version, and Gregory Martin carried the translation through to its completion (1582). It was begun at the English College at

Douay, France, but because of political upheavals the work was moved to Rheims, where the NT was completed; hence the term "Rheims Version." It was based on the "authentically Latin"—i.e., the Vulg.

RHESA *rē'sə* [Ῥησά] (Luke 3:27). An ancestor of Jesus.

RHETORIC AND ORATORY. In English these two terms are clearly distinguished: rhetoric is the art of composition by which language, whether written or spoken, becomes descriptive, interpretative, or persuasive; while oratory is the art of effective public speech. The latter term may even describe the contents of the speech as well as its manner. Both rhetoric and oratory presuppose grammar, whose rules are fundamental to both composition and delivery, and indispensable for a proper understanding of both the written and the spoken word.

In both Greek and Latin, however, the terms were identical: ῥητορικὴ τέχνη (Latin *ars rhetorica*) meant the art of the orator or public speaker, a fact which reminds us that "oral" literature long preceded written, and that the art of public speaking antedated the writing of books. The origins of Greek rhetoric (from which Latin was derived) go back at least to Homer, for his heroes are constantly engaged in public speaking and debate. Like all Greek art, poetry, music, architecture, sculpture, and painting, like Greek history and Greek religion, Greek rhetoric was a natural expression of the Hellenic spirit. Those who engaged readily in public debate obviously desired to win either public approval or a case in court. The keen dialogue so common in the tragedies and in Aristophanes was more than clever banter—as so often in Shakespeare. The debaters meant to score.

1. **Teachers of rhetoric.** The earliest teachers of the art of rhetoric were two Sicilians, Corax and his pupil Tisias, who came to Athens in the fifth century B.C. and opened a school. Tisias became in turn the teacher of the Sophist Gorgias and the orators Isocrates and Lysias. The main object of the teaching was to train orators for effective pleading in the law courts. Hence they studied not only the principles of delivery ("elocution") but also those of logic and persuasion, and also the details of traditional Greek law. They cultivated the art of plausibility—many of the cases defended by the orators depended upon purely circumstantial evidence and "probability" (τὸ εἰκός). Gorgias, who is forever pictured in Plato's *Dialogues*, introduced the emphasis on emotional appeal, thus producing a type of oratory (the decorative, ceremonial, or "epideictic") quite distinct from the forensic or legal type, hitherto in use. Later experts, like Thrasymachus, Protagoras, and Theodorus of Byzantium, developed the rules by which rhetorical effects could be gained and prose made as captivating as poetry—which to a Greek was irresistible. The criticisms which Plato leveled against the Sophists as a group and against all "sophistic" in argumentation, logic, and presuppositions, especially the absence of fixed moral principles, resulted in the meaning which ever since has been attached to "sophistry." These men cared nothing for either moral presuppositions or moral conse-

quences, but only for winning cases in court, or for political advantage in the struggles for social control in the disturbed Hellenic and international world of their time. The tragic case of Andocides (see his *On the Mysteries*) illustrates the attitude. He had grown up in Athens, an idle, irresponsible young man about town; now, years later, he finds himself on trial for his life as a desecrator of the Eleusinian rites and of the sacred household stones, the *hermae*. His behavior and his arguments reflect the shallowness of his Sophistic education.

Isocrates was an exception: he viewed rhetoric as a kind of philosophy, a training for the good life, and a means of sharing in the privileges and responsibilities of citizenship. But the older view—viz., that rhetoric was a conjurer's bag of tricks for amazing the hearers or persuading the court (often including a jury of five hundred)—prevailed, and in time came to be looked upon as the crown and climax of education, and the proof of both its value and its validity. When the younger Pliny visited his old school, his first question was, "How are the lads doing in oratory? And how are they doing in the courts, after they get out?" Success was the test, then as now. The first teacher of all, Corax, agreed that Tisias was to pay his fee only if he won his first case in court—and had, eventually, to bring suit against his pupil. It was the first case Tisias had ever defended. Corax insisted, "If I win the case, I will receive payment by the verdict; if I lose, I claim payment under our contract." "No," replied the pupil, "if I win, I will not have to pay; if I lose, I won't pay." The court dismissed the case, with the remark, "A bad crow [κόραξ] lays bad eggs."

2. Criticism by philosophers. The criticism of Plato and the constructive work of Isocrates, Aristotle, and Theophrastus led to a higher conception of the orator and his art, which, though neglected by the ordinary lawyer and politician, was influential with the great orators and literary critics of antiquity. No one ever made a more careful study of his art than Demosthenes or Cicero. Yet even the teaching of rhetoric failed to maintain the highest level, and the fourth century saw the beginning of a fligid, highly emotional, even sensuous style known as "Asiatic" (Hegesias of Magnesia was the chief proponent). It resulted in the practice of the writing and delivery of "declamations" in the schools, all based upon strict rules and following artificial examples, not the works of the great orators, but flowery "models of eloquence" written by the teachers. The so-called *Progymnasmata*, or preparatory exercises, of the first century B.C. provided a drill in various kinds of writing—fables, histories, elegies, pleas—but not political speeches, as these were not encouraged under the Hellenistic monarchies or, later, under the Roman Empire. This artificial kind of rhetoric continued to receive the criticism of philosophers and those literary men who stood for the classical tradition in education (the "Atticists" of 50 B.C. and later). The high standards of the past were recalled, and the sober influence of Roman political thought and speech had a good and growing influence. The so-called "canon" or standard list of the Attic orators was drawn up, Demosthenes heading the list. The Roman Cicero, who studied in Greek schools (Athens and Rhodes) and seriously

cultivated the art all his life, is probably the best example of the fusion of Greek and Latin oratory.

3. Influence on the NT. It is not surprising that attempts have been made to trace the influence of classical standards of rhetoric and oratory in the NT. (The OT and the Apoc. are exempt from this influence, as basically Semitic literature, though traces of Greek style have been found in II Maccabees and elsewhere.) The best example is the Letter to the Hebrews, which Hermann Von Soden outlined as an example of Greek oratory. It has a *proemium* (1:1-4:13), designed to win good will; a *diēgēsis*, or statement of the case (4:14-6:20), designed to win favor; an *apodeixis*, or demonstration (7:1-10:18), designed to complete the persuasion of the hearers; and an epilogue (10:19-13:21). But the author's development of the theme is far more direct and his cumulative logic far more powerful: (a) Christ is superior to angels (1:1-2:18); (b) he is superior to Moses (3:1-4:13); (c) he is the supreme High Priest, superior to Aaron, like Melchizedek; and his ministry is in the heavenly, not the earthly, sanctuary, where his offering of himself is final and forever effective (4:14-10:18). The rest of the homily or "epistle" is hortatory and practical (10:19-13:25). The most one can say is that the work is the finest example of Greek prose in the NT, and that Greek rhetorical standards (not rules or models) have influenced the writer, who was certainly a man of superior education.

Other examples that have been chosen to illustrate classical influence include Paul's speech before the Areopagus (Acts 17:22-31), which begins with an attempt to win favor (the usual *captatio benevolentiae*) and continues with a proclamation of the gospel of revelation and coming judgment; obviously Paul's speech (the account in Acts is barely an outline) was not modeled on the Greek orators, but ended like a Hebrew prophet's grave warning of doom. Another is the speech of Stephen in Acts 7; but this is like dozens of other brief surveys of Hebrew-Jewish history, of which we have examples in the Bible and elsewhere, even in the "historical" psalms. There is nothing "Greek" or "oratorical" about it. On the other hand, the forensic speeches in Acts, Paul's defense on the steps of the Castle of Antonia (Acts 22:1-21; it was interrupted in vs. 22 and never finished), or the one before the Sanhedrin (23:1-9; scarcely a speech, for it had only begun when it ended in a wrangle); or Tertullus' professional opening of the prosecution (24:2-8) and Paul's reply (vss. 10-21); or the climactic speech before Festus, Agrippa, and Bernice (26:1-23)—these speeches all reflect the skill of the author of Acts, but do not show any of the explicit organization or composition which was typical of Greek and Latin oratory. Any educated man on trial for his life would follow this procedure, trying to make contact with his judge or judges, to establish common ground, and to show that his words and actions had been reasonable and right. Paul was no Greek rhetorician reciting a speech carefully memorized in advance. His style was far more like that of the popular Cynic-Stoic "diatribe," the speech in the market place which these street preachers of ethical and political philosophy used in their efforts to improve mankind. He positively rejected the artful

literary and rhetorical devices of the “wise in this age” (see his defense in I Cor. 1–4; II Cor. 10–13). The same is true of other parts of the NT—e.g., the discourses of Jesus in Matthew and John, or the logic of Romans or Galatians, the dramatic denouement of Revelation, or the gnomic “wisdom” sayings of James. There are echoes of oratory and of orators here and there, but no studied imitation. The early Christians were not, for the most part, taken from the learned or the politically dominant class; and their religion, their sacred scriptures, their worship, their very vocabulary, were Semitic, biblical, Greco-Jewish. Their “models,” so far as they had any, for scripture exposition or exhortation were not Greek or Roman, but biblical—i.e., they were taken from or inspired by the LXX, the earliest Bible of the early Christians. It was in a later period, in the second century and afterward, that the artificial and florid popular rhetoric of the time began to influence Christian preaching and writing, especially sermons.

F. C. GRANT

RHODA rō'dā ['Póðη, rose] (Acts 12:13). Apparently a slave in the house of Mary, the mother of

John Mark; it is possible, however, that she was simply a member of the household or one of the company assembled and praying. She joyfully recognized Peter's voice outside the door, after his release from imprisonment. She was probably a Christian.

Tradition claims this house as the place where the Last Supper was held, and it was perhaps the headquarters of the Jerusalem church.

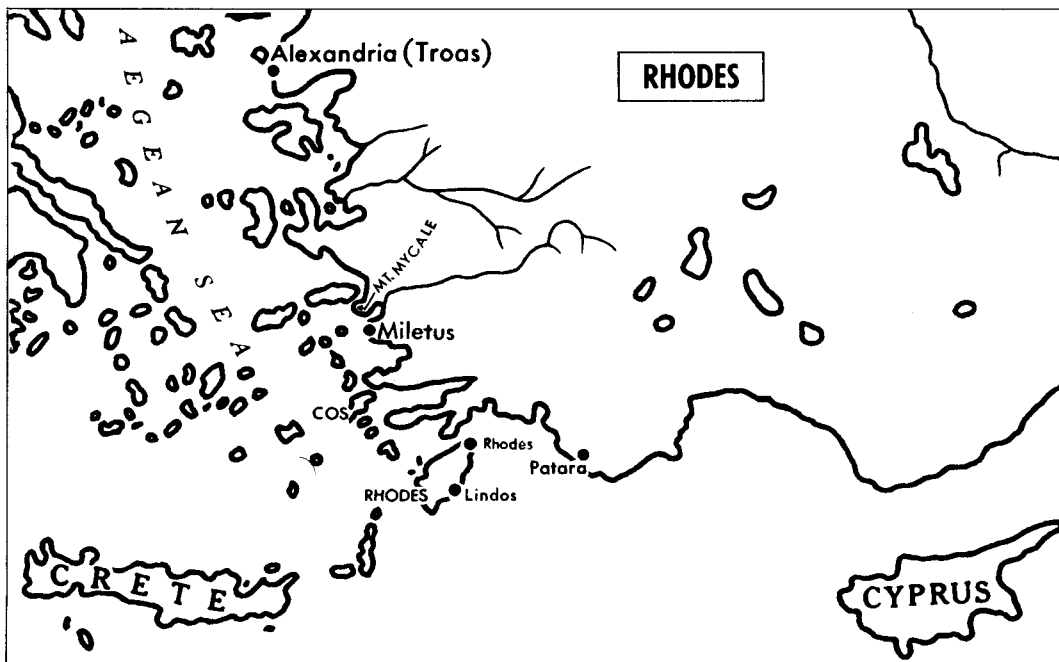

B. H. THROCKMORTON, JR.

RHODES rōdz ['Póðos]. A Greek island and city in the SE of the Aegean Sea (Ezek. 27:15; Acts 21:1). Rhodes is the largest island in the Aegean after Crete, measuring some forty-two by seventeen miles, and separated from Asia Minor by a channel ca. ten miles wide. Its central part is mountainous, its coasts have good harbors, and in summertime it has safe anchorage on the E side. As the natural station for Aegean traffic en route to the Orient, Rhodes early developed into a prosperous trade center.

The earliest inhabitants were of unknown Bronze Age origins. Minoan merchants founded a colony on the NW coast near Ialysos and were followed by Greek settlers who lived in Mycenaean sites all over the island. Later colonization was by Dorian Greeks, who developed the cities of Ialysos, Lindos, and Kameiros into leading trade centers. Colonies were sent abroad, and oriental trade went especially through the port of Lindos.

Liberated from the Persians, Rhodes became part of the Delian League (477 B.C.). In 408 the three old cities united in the foundation of a new capital, the city of Rhodes on the NE point of the island near the sanctuary of the sun-god Helios.

The new Rhodian state became a leading power in the Greek world. Its capital was designed along modern lines of town-planning, following the system of Hippodamus of Miletus. Its opportunities increased in Hellenistic times, when the trade to Alexandria,

to Cyprus, and to Phoenicia was going through the port of Rhodes. The famous siege by Demetrius in 305-304 B.C., successfully withstood, led to the erection of the Colossus of Rhodes, a bronze statue of Helios 105 feet high at the entrance to the harbor. This statue, one of the seven wonders of the world, was demolished by an earthquake ca. 227 B.C. The general earthquake damage was soon repaired, but the Colossus was left lying near its base.

Rhodes with its large fleet was a supporter of the Roman cause and a protector of Greek shipping against the Mediterranean pirates. Its fortunes turned in 167 B.C., when the Romans declared Delos a free port and reduced the Rhodian possessions.

The city of Rhodes afterward was of greater cultural than commercial importance. The philosopher Panetius (ca. 185-109 B.C.), head of the Stoa, came from Rhodes (Lindos). Posidonius (135-50 B.C.), although a Syrian, made Rhodes his home and founded a school there which was attended by many Romans.

A disaster befell Rhodes in 43 B.C., when Cassius mercilessly stripped the city of its material wealth. All gold and silver was collected from private and public resources. Many Rhodian works of art were transported to Rome on this occasion.

In imperial times Rhodes was a favorite resort for the Romans, whether travelers or exiles. Tiberius spent eight years on the island. In the first century A.D. the city, its monuments, and its artistic wealth were still a source of admiration to visitors (cf. Strabo XIV.652; Pliny Nat. Hist. XXXIV.36).

The archaeology of the ancient city of Rhodes is insufficiently known because of the extensive rebuilding of the town. Its most famous monuments date from the period when the Knights of Saint John founded a state on the island (1309-1522). Lindos and Kameiros are better preserved, as are the cemeteries of Ialysos.

Paul's ship on its way from Miletus and Cos to Patara stopped at Rhodes in accordance with ancient navigational routine (Acts 21:1). The LXX reading of "Rhodians" in Gen. 10:4; I Chr. 1:7 for "Dodanim" seems a late substitution based on familiarity with Rhodian sea power. "Rhodes" in Ezek. 27:15 (based on the LXX) is historically possible as a reference to Rhodian trade with Tyre.

RHODOCUS rōd'ō kās [ῥόδοκος] (II Macc. 13:21). A traitor of the Jewish army of Judas Maccabeus. He communicated secret information about Beth-zur, the citadel which Judas had strengthened. He was discovered, found guilty, and imprisoned.

RIBAI rī'āi [ריבאי] (II Sam. 23:29; I Chr. 11:31). The father of Ittai, who was a member of the company of the Davidic Mighty Men known as the "Thirty" and was from Gibeah of the Benjaminites.

RIBBAND. Archaic form of "ribbon," used by the KJV to translate פִּתוּל (RSV CORD) in Num. 15:38.

RIBLAH rī'blāh [ריבלה; Arab. *Ribla*]; KJV DIB-LATH dīb'lāth in Ezek. 6:14. An ancient Syrian

town situated S of the Lake of Hums in the vicinity of KADESH ON THE ORONTES. Its geographical position is where, in ancient times, the military highways to Egypt and Mesopotamia crossed.

Riblah is known from the time when the kingdom of Judah had to fight its uneven contest for its life, first against the Egyptians and then against the Babylonians. After the death of King Josiah in the battle at Megiddo against Pharaoh Neco in 609 B.C., his younger son Jehoahaz was made king—his eldest son Eliakim, being pro-Egyptian, had lost the confidence of the people. Neco did not approve the election of Jehoahaz. According to II Kings 23:33, Neco imprisoned him at Riblah and made his brother Eliakim king, and as Jehoiakim the latter ascended the throne. He was more or less an Egyptian vassal and had to pay tribute to Neco.

After the defeat of Neco at Carchemish in 606, Nebuchadrezzar of Babylon took over the hegemony in the Near East (cf. II Kings 24:7: "The king of Egypt did not come again out of his land"); so Jehoiakim became tributary to him. After a few years, however, he refused to pay the tribute; and because of this, Nebuchadrezzar pushed into Palestine with his armies. Jehoiakim died suddenly, and his son Jehoiachin (Jeconiah), eighteen years of age, became king after him. His foreign policy was along the same line his father had followed. This led to the capture of Jerusalem in 597. In the shadow of the Babylonian, the last king of Jerusalem, Mattaniah—or Zedekiah, as he called himself as king—ruled over the country until 586, when Nebuchadrezzar put an end to the Jerusalemite kingdom.

At first Jeremiah the prophet seems to have been successful in persuading the king not to undertake anything which might annoy Nebuchadrezzar. But after the death of Neco, Zedekiah was unable to master the situation, and the war party predominated. Because of this development, Nebuchadrezzar immediately came to the scene and encamped at Riblah; so the town was the place from which Nebuchadrezzar determined the fate of the last king of Jerusalem, when he destroyed the city. Zedekiah tried to escape, but at Jericho he was overtaken and then brought before the king of Babylon to Riblah: "[They] passed sentence upon him. They slew the sons of Zedekiah before his eyes, and put out the eyes of Zedekiah, and bound him in fetters, and took him to Babylon" (II Kings 25:5-7; cf. Jer. 52).

In one of his inscriptions, found at Wadi Brissa, Nebuchadrezzar alludes to his stay at Riblah.

RICHERS. See WEALTH.

***RIDDLE** [חידה; *verb* חוד, to propound a riddle; Aram. אַחֲרִידָה (Dan. 5:12)]. A literary form involving a matching of wits: the challenger hints at a concealed meaning which the contestant is to discover.

The classic biblical example of the riddle is Samson's in Judg. 14, and the setting may be typical. At his wedding feast, as a game with stakes Samson proposes his riddle (vs. 14):

Out of the eater came something to eat.
Out of the strong came something sweet.

Within the Samson narrative the riddle alludes to the honey which Samson had found in the carcass of the lion. So exceptional was his finding of honey thus, that his guests were at a disadvantage and had to be told. It was Samson's wife who gave them the answer (vs. 18a):

What is sweeter than honey?
What is stronger than a lion?

Samson surmised their source and accused them, and in his accusation used the riddle style (vs. 18b):

If you had not plowed with my heifer,
you would not have found out my riddle.

Now it is quite possible that both the riddle and what here passes for its answer are really older than the Samson narrative and themselves prompted the story of the slain lion and the swarm of bees, rather than the reverse. Actually the answer, in question form, is itself a riddle the solution of which is not hard to find: it is love which is "sweeter than honey" and "stronger than a lion." If this is correct, then Samson's riddle must have had another answer, and this, too, can be found out. One may eat too much at a celebration and overly indulge in sweet wine, and the results may be drastic, so that from the eater his food may come forth and from even the strong the sweet. This not uncommon experience may have been the original solution to Samson's riddle, and both riddles may well have been old folk sayings before they were woven into the Samson narrative, sayings quite appropriate at a wedding feast.

The propounder of a riddle is sly. He has observed an amusing analogy, and he is both revealing and keeping it for himself as one who peeps at a treasure held between cupped hands. The riddle is a form of humor and akin to the figures: fable, allegory, parable, simile. The numerical proverb, which has a Canaanite (Ugaritic) ancestry, may be a derivative of the still more ancient riddle form.

But the riddle was not merely a game. It was a test of wisdom. Solomon's renown rested largely on his skill at solving riddles: "When the queen of Sheba heard of the fame of Solomon . . . , she came to test him with hard questions [lit., 'riddles']. . . . And Solomon answered all her questions." And the queen of Sheba saw "all the wisdom of Solomon" (I Kings 10:1-5; II Chr. 9:1-4). Another great king, who shall arise "at the latter end of the indignation," is characterized as a "king of bold countenance, one who understands riddles" (Dan. 8:19, 23). It is the wise who deal in riddles, and skill in understanding them is wisdom (Prov. 1:5-6; cf. Ps. 49:1-4—H 49:2-5). Riddles were, moreover, a deposit of tradition and lore, "dark sayings from of old, . . . that our fathers have told us. . . . The glorious deeds of the LORD" (Ps. 78:1-4). And the riddle was a literary form employed for communication even by the prophets. Ezekiel called his song of eagles and a cedar tree a "riddle and . . . an allegory" (17:2; cf. 20:49—H 21:5). Many prophetic utterances which are not thus specifically designated riddles have the same form and probably developed from the riddle type of literary expression. Isaiah's "song of the vineyard" is a good example—the riddle propounded in detail in 5:1-6 is solved in vs. 7:

For the vineyard of the LORD of hosts
is the house of Israel.

(Cf. also Ezek. 15.)

In fact, the riddle was one of the media by which God was thought to reveal himself. Of Daniel it was said: "An excellent spirit, knowledge, and understanding to interpret dreams, explain riddles, and solve problems were found in this Daniel" (5:12), and so endowed, he interpreted the cryptic revelation written on the wall. Tradition distinguished Moses as one prophet with whom God communicated directly, "mouth to mouth, clearly, and not in dark speech" (חִירוֹת; Num. 12:8; cf. Jer. 23:28). That this was Moses' distinctiveness implies the normality of divine communication through "dark speech." There was probably more to the riddle than appears on the surface. It seems to be a heritage from the age of mythology, when men sought to get power over gods and nature by uncovering their carefully guarded secrets.

RIDGE OF JUDEA יָדוֹ דֵּעָ' [ὁ πρίων τῆς Ἰουδαίας] (Jth. 3:9). A geographical term of obscure meaning. It has been suggested that πρίων ("saw") was a translation of מַשׂוּר ("saw"), which was misread for מַשׂוּר ("plain"). But the Plain of Esdraclon is called עַמְקֵי מַשׂוּר. The OL took the genitive πρίωνος for a proper name. The words are lacking in the Vulg.

P. WINTER

RIE. KJV translation of כַּמְתָּה in Exod. 9:32; Isa. 28:25 (KJV FITCHES in Ezek. 4:9). This is now believed to be SPELT (so RSV) or possibly emmer (see FLORA § A1b), both of which are kinds of wheat. Rye, *Secale cereale* L., was not indigenous to Bible lands, but is a grain common to cold climates.

J. C. TREVER

RIGHT HAND. The side or direction, as well as the hand itself; often used in a figurative sense (יָמִין; δέξις; "right, right hand," with or without the corresponding words for HAND; cf. Josh. 1:7; Judg. 5:26; II Sam. 2:21; Matt. 5:30; Luke 1:11). For יָמִין, "south," see BENJAMIN 1; TEMAN.

In common with most cultures, the OT and the NT assign special significance to the right hand as the hand of strength (Job 40:14; Ps. 45:4; cf. Luke 6:6; Acts 3:7), the hand of blessing and unique capacity (Gen. 48:14; Exod. 29:20; Ezek. 21:22; cf. Matt. 25:33; 27:29; Rev. 1:16-17); while the left hand is unusually deceptive and deadly (Judg. 3:15, 21; 20:16; II Sam. 20:9-10). As the symbol of total strength, the right hand is the side on which a man is threatened (Job 30:12; Ps. 91:7) or accused (Zech. 3:1), and where his deliverer must stand to protect him (Pss. 16:8; 109:31; 121:5; cf. Acts 2:25). The place at one's right is the seat of dignity and honor (I Kings 2:19; Ps. 45:9).

The "right hand of God" is the OT metaphor of his mighty power by which he creates (Isa. 48:13), wages war, and delivers his people (Deut. 33:2; Ps. 89:13; cf. Exod. 15:6-12; Pss. 17:7; 18:35; 139:10). Its withdrawal means judgment and ill fortune (Ps.

74:11; cf. 77:10; Lam. 2:3), and he may even use it against his own people (Lam. 2:4; but cf. Isa. 62:8).

Ps. 110:1 is the normative passage for the "right hand of God" in the NT. Originally it may have alluded quite concretely to the enthronement of Israel's king in the throne room immediately south (ימין) of the temple—i.e., at the "right hand" (the place of ultimate honor) of Yahweh conceived as present in the sanctuary. This psalm is quoted or echoed many times in the NT as a virtually constant element of the apostolic witness to the exalted Christ, reigning in honor and power at the right hand of God (Mark 12:36; Acts 2:34-35; Heb. 1:13; cf. Acts 5:31; Rom. 8:34; Eph. 1:20; Col. 3:1; Heb. 8:1; 10:12; 12:2; I Pet. 3:22). For Matt. 22:41 ff, see *bibliography*.

RIGHTEOUSNESS IN THE OT. Righteousness as it is understood in the OT is a thoroughly Hebraic concept, foreign to the Western mind and at variance with the common understanding of the term. The failure to comprehend its meaning is perhaps most responsible for the view of OT religion as "legalistic" and as far removed from the graciousness of the NT. However, within the past one hundred years, thanks largely to the efforts of German scholars (see *bibliography*), this important motif of biblical faith has been clarified.

The concept deserves some negative definitions. In the OT it is not behavior in accordance with an ethical, legal, psychological, religious, or spiritual norm. It is not conduct which is dictated by either human or divine nature, no matter how undefiled. It is not an action appropriate to the attainment of a specific goal. It is not an impartial ministry to one's fellow men. It is not equivalent to giving every man his just due.

Rather, righteousness is in the OT the fulfilment of the demands of a relationship, whether that relationship be with men or with God. Each man is set within a multitude of relationships: king with people, judge with complainants, priests with worshipers, common man with family, tribesman with community, community with resident alien and poor, all with God. And each of these relationships brings with it specific demands, the fulfilment of which constitutes righteousness. The demands may differ from relationship to relationship; righteousness in one situation may be unrighteousness in another. Further, there is no norm of righteousness outside the relationship itself. When God or man fulfils the conditions imposed upon him by a relationship, he is, in OT terms, righteous.

1. Terminology of righteousness. a. In the OT.

The terms for righteousness are consistently צדק (masculine) and צדקה (feminine), there being no significant difference in the employment of the masculine and feminine nouns. The verb is צדק, "to be righteous," "to be just," "to be in the right," with the *hiph'il* form הצדיק translated "to justify," "to declare righteous." צדיק is the adjective "just," "righteous."

b. *In the LXX.* The LXX most frequently translates צדיק with δίκαιος (without exception in the Psalms); צדק (verb) with δικαιούσ; צדק (noun) with δικαιοσύνη (less frequently with δίκαιος); and צדקה with δικαιοσύνη. Thus the LXX usage little illumines the meaning of צדק. Exceptions to this are formed by the use of ἀμειπτος, "blameless," "faultless" (Job 22:3), and καθαρός εἶναι, "to be clean, pure" (Job 4:17), for צדק (verb); ἀληθής, "true" (Isa. 41:26), πιστός, "faithful," "true" (Job 17:9), and εὐσεβής, "reverent," "pious," "religious" (Prov. 12:12; Isa. 24:16; 26:7), for צדקה; ἐλεημοσύνη, "pity," "compassion" (Ps. 35:24—G 34:24), and κρίσις, "judgment," "decision" (Isa. 11:4; 51:7), for צדק (noun); ἐλεημοσύνη (Deut. 24:5—G 23:5; Isa. 1:27; etc.), ἔλεος, "pity," "mercy," "compassion" (Isa. 56:1; Ezek. 18:19, 21), εὐφροσύνη, "joy," "gladness" (Isa. 61:10), and κρίμα, "judgment," "sentence," "lawsuit" (Isa. 9:6), for צדקה. However, from the LXX usage we learn little about the basic meaning of צדק.

c. *Etymology of צדק.* The etymology of צדק also little illumines its meaning. Using the Arabic, most lexicons and commentators have defined the basic meaning of the root צדק as "straightness," "hardness," "firmness"; and discussion of the subject has centered around the question of which meaning is to be preferred—"straightness" usually is favored. However, it has been increasingly recognized that none of these meanings can explain the variety of ways in which the stem is employed. E.g., the RSV translates (ה)צדק sometimes with "vindication" (Ps. 103:6; Jer. 51:10), "deliverance" (Isa. 46:12; Mic. 7:9), "saving deeds" (I Sam. 12:7), "saving help" (Ps. 40:10), "righteous help" (Ps. 71:24), or "salvation" (Job 33:26), sometimes with "equity" (II Sam. 8:15) or "right" (Isa. 5:23), sometimes with "uprightness" (Jer. 4:2) or "truth" (Ps. 52:3), sometimes with "triumph" (Judg. 5:11) or "victory" (Ps. 48:10; Isa. 41:2), even with "prosperity" (Prov. 8:18). How can the basic meaning of "straightness" help to explain such a variety of usage? Obviously the only course is to examine the use of צדק in each of its contexts, to note its synonyms and antonyms, and to try to find a common factor governing its use. When this is done, it becomes clear that צדק is a concept of relationship and that he who is righteous has fulfilled the demands laid upon him by the relationship in which he stands.

2. **Righteousness in social relations.** There were demands in Israel which were imposed by the family relationship. Thus Tamar, who had played the har-

lot, was more righteous than Judah because she fulfilled these demands, while Judah did not (Gen. 38:26). Again, David was righteous because he refused to slay Saul, with whom he stood in a covenant relation (I Sam. 24:17; 26:23), and he condemned those who murdered Ish-bosheth, Saul's son (II Sam. 4:11). But after the downfall of Saul's house, Mephibosheth had no right to expect kindness from the new king (II Sam. 19:28). The demands of righteousness changed with the relationship.

Generally, the righteous man in Israel was the man who preserved the peace and wholeness of the community, because it was he who fulfilled the demands of communal living. Like Job, he was a blessing to his contemporaries, and thus צדק is sometimes correlated with "mercy" (Hos. 2:19). He cared for the poor, the fatherless, the widow (Job 29:12-15; 31:16-19; cf. Deut. 24:13; Prov. 29:7), even defending their cause in the law court (Job 29:16; 31:21; cf. Prov. 31:9). He gave liberally (Ps. 37:21, 25-26; Prov. 21:26), providing also for the wayfarer and guest (Job 31:31-32), counting righteousness better than any wealth (Job 31:24-25; Ps. 37:16; Prov. 16:8). He was a good steward of his land (Job 31:38-40) and work animals (Prov. 12:10), and his servants were treated humanely (Job 31:13). He lived at peace with his neighbors (Job 31:1-12), wishing them only good (Job 31:29-30; cf. 29:24). When he was in authority, his people rejoiced (Prov. 29:2), and he exalted the nation (Prov. 14:34). He was a joy to his family (Prov. 23:24), his path was like the dawn (Prov. 4:18), and his very memory itself was a blessing (Prov. 10:7). When it went well with him, the whole city rejoiced over his welfare (Prov. 11:10). He was an immovable factor for good (Prov. 10:25, 30; 12:3, 12), who knew blessing (Prov. 10:6; Isa. 3:10) and long life (Ps. 92:12; Prov. 10:16; 11:19; 12:28), posterity (Ps. 37:37-38) and prosperity (Prov. 13:21, 22, 25; 15:6), the fulfilment of his desires (Prov. 10:24, 28; 11:23), and deliverance from trouble (Prov. 11:8; 12:21; 24:16). He lived in peace and prosperity, because he upheld the peace and prosperity—in short, the physical and psychical wholeness—of his community by fulfilling the demands of the communal and covenant relationship (cf. Ps. 15:2-5; Isa. 33:15). For this reason צדק sometimes stands parallel with שלום (Isa. 48:18; 60:17; cf. Pss. 72:3, 7; 85:10; see PEACE). For this reason it can be translated "prosperity" (Prov. 8:18). And for this reason, too, its meaning can be "truth" (Ps. 52:3; cf. Prov. 12:17), for right speech upholds the covenant relationships existing within a community (Ps. 15:2-4; Prov. 8:8; 10:11, 20, 31; 16:13; Isa. 59:4; cf. 45:19); it is righteousness.

It is understandable then that in most of the passages listed above and in most others the OT sets over against the צדיק רשע, the evildoer, the wicked, not because the latter violates a norm of ethical action existing within the community, but because he destroys the community itself by failing to fulfil the demands of the community relationship. The רשע is he who exercises force and falsehood, who ignores the duties which kinship and covenant lay upon him, who tramples the rights of others under foot. His sin is not murder, theft, falsehood, evil in itself, but evil which is committed against one

with whom he stands in relationship. Murder of one outside the covenant may be considered righteous (Judg. 5:11 [see vs. 26]; II Kings 10:9); murder of a covenant partner is always unrighteous.

3. Righteousness as a forensic concept. These facts help to explain the forensic use of צדק. The term is often used as a correlate to שפט, "to judge," or משפט, "judgment" (Deut. 25:1; I Kings 8:32; Pss. 9:4; 33:5; 143:2; Prov. 1:3; Isa. 1:21; Jer. 11:20; Amos 5:7; etc.), and the verb appears almost exclusively in a forensic context (e.g., Job 33:32; Isa. 43:9). (Some hold that its use is only forensic.) Thus one might conclude that righteousness is a legal concept.

In one sense this is true. He who is righteous is he who is judged to be in the right (Exod. 23:7; Deut. 25:1). But again, the demands of communal relationship are determinative. That which is right in a legal sense is that which fulfils the demands of the community relationship, and the sole function of the judge is to maintain the community, to restore right to those from whom it has been taken (II Sam. 15:4; Ps. 82:3). Thus righteousness as a forensic concept is not an impartial decision between two parties, based on a legal norm, such as is known in Western law, but protecting, restoring, helping righteousness, which helps those who have had their right taken from them in the communal relationship to regain it. Righteousness is the fulfilment of the communal demands, and righteous judgments are those which restore community (Exod. 23:7-8; Deut. 1:16; 16:18, 20; Ps. 82:3; Prov. 17:15, 26; 18:5; 24:24). Thus the constant plea of the prophets is for righteousness in the gate, for a restoration of the foundations of the communal life (Isa. 5:23; 29:21; 59:4; 14; Jer. 22:3, 15; Amos 5:12; Hab. 1:4; cf. Ps. 72:2; Prov. 31:9). In such contexts there is no difference between ethical and legal standards. They are one, both equivalent to the demands of community.

Not only was it the function of the judge to uphold the community in Israel, however. This was one of the main duties of the king. He, too, was responsible for protecting and restoring the right (cf. Hos. 13:10). This was his covenant duty, to preserve righteousness, and in so doing, he himself was righteous (II Sam. 8:15=I Chr. 18:14; I Kings 10:9=II Chr. 9:8; Ps. 45:6-7; Prov. 16:12; cf. II Sam. 23:3-4; Isa. 16:5). Thus in Ps. 72 we have a picture of the peace and prosperity wrought by a king who judges righteously, and Jeremiah's appeal to the despotic Jehoiakim is for justice and righteousness (Jer. 22:3, 15). Further, when the Messiah comes, his kingdom will prosper through righteous judgments (Isa. 9:7; 11:3b-5; Jer. 23:5-6; 33:14-16; cf. Isa. 16:5) which will defend the people against all evil (Isa. 32:1-8).

The צדיק then in Israel was he who fulfilled the demands of the relationships in which he stood, and thus צדק often stands parallel with זכה, "to be clean" (Job 15:14); with תם, "blameless" (Job 9:20); or with נקי, "innocent" (Exod. 23:7). The צדיק did right, as right was defined by the relationship.

4. Righteousness as a covenant concept. Because Israel stood in a covenant relationship with Yahweh, righteousness was also a religious concept. To be righteous, Israel had to fulfil the demands of her

relationship with Yahweh, and this included obedience to the law of the Lord (Ps. 1). But here we must avoid two misunderstandings:

First, not all righteousness had a religious basis. E.g., in Gen. 38:26 there is really no thought of the religious relation to Yahweh. An act on the social plane is not righteous because it at the same time satisfies a demand of the law, though this of course often happened. It is righteous because it fulfils the demands of a social relationship. The relationship is always the determinative factor.

Secondly, we must observe that Israel's relationship to Yahweh was not dependent on her righteousness. Israel's righteousness consisted in the fulfilment of the demands of her relationship with Yahweh, but righteous or unrighteous, she still stood in relationship. The covenant relation was prior to all law and all demands. Yahweh had chosen Israel. That was the basic fact of her existence. All else followed after. (This is very important in view of § 9 below.)

Further, Yahweh's station within the covenant relationship was that of Lord. He was Lord of the covenant, its initiator, its defender, its preserver. He and he alone upheld it. Only he could break it. Israel could reject her God and thereby bring his wrath upon her, but she could not escape her relationship with God. The relationship might be one of wrath, which led to Israel's destruction, but nevertheless it was a relationship. God initiated the covenant. He alone could nullify it (cf. Ps. 89:28-37).

Thus in the OT there is nothing legalistic about the relation of Israel with her God. It is a relation based, not on law, but on grace, on Yahweh's loving choice of a few oppressed Semitic tribes in Egypt to be his people, his peculiar treasure (Exod. 19:4-5). And because this is true, it is a relationship received primarily with joy and thanksgiving by the people Israel. Celebration, joyfulness, praise—these are the primary notes of Hebrew faith, as the Psalter attests.

Within this relationship of grace the law is given as a guide by God to his covenant people. Its purpose is to make Israel holy as Yahweh is holy (Lev. 19), and the revelation of the law to Israel is also an act of God's grace, for of all the people of the earth, Yahweh chooses to guide Israel. Thus Israel loves the law (Ps. 40:8); it is her meditation day and night (Ps. 1:2), a gift more to be desired than gold and sweeter than honey (Ps. 19:10).

But the law is meaningless outside the relationship, outside the covenant. He who receives Yahweh's election in faith, who places his life under Yahweh's lordship, also follows the law, for the law is God's guidance within the covenantal relationship. For him who lacks such faith, for him who stands outside the relationship, the law is worthless. The context of the law is the holiness, the lordship, of Yahweh. The law protects this lordship. It provides for the sole worship of Yahweh (Exod. 20:3-7; Lev. 20:8; Deut. 6:13-15); it forbids sin, because sin dishonors God (Lev. 18:1-5; 19:2; 22:2, 32; Deut. 7:6; etc.). He who does not in faith accept the context of the law, the lordship of Yahweh, cannot be righteous before Yahweh, though he fulfil all other precepts of the law. Faith is the presupposition of the law, and works without such faith are useless. Obedience to the law does not make a man righteous.

The relationship to Yahweh, the relationship of faith, is primary.

This is evidenced in the law itself. Were righteousness to depend solely on the fulfilment of the law, any sin would shut off the sinner from God's grace. But such is not the case. The law itself provides for a day of atonement for Israel's sins (Lev. 16), and there is constant provision for restoration of right relationship with God and with the community. One thing, however, is unpardonable: the rejection of God's law "with a high hand" (Num. 15:30), rebellion against his lordship, lack of repentance—in short, faithlessness. The failure to acknowledge Yahweh's lordship in humility and repentance, the failure to accept in faith his provisions for restoration to communion with him, the failure to acknowledge in his law his gracious leading of his people—these are unforgivable, the OT equivalents of the sin against the Holy Spirit, for they constitute a faithless rejection of Yahweh's grace, and the law without faith is useless. The fulfilment of the law does not constitute righteousness, but he who is righteous fulfils the law because he accepts it in faith as God's gracious guidance of him. Neither works nor works accompanied by faith make for righteousness, but rather only faith, which is manifested in works. Faith is the fulfilment of the relationship to Yahweh and is thereby righteousness (Gen. 15:6; Hab. 2:4). See § 8 below.

5. **Yahweh as righteous.** Throughout the OT it is proclaimed that Yahweh is righteous (II Chr. 12:6; Neh. 9:8; Pss. 7:9; 103:17; 111:3; 116:5; Jer. 9:24; Dan. 9:14; Zeph. 3:5; Zech. 8:8; etc.), and not once, not even in the book of Job, is he held to be unrighteous. Indeed, righteousness is one of the major motifs in the witness to God's person, as he reveals himself in his actions. But Yahweh's righteousness consists, not in action consonant with his inner nature, certainly not in works which conform to some norm or standard of right outside and above him. Nor is Yahweh's righteousness, as it is commonly thought, a distributive justice which rewards the good and punishes the evil, as good and evil are defined in the law. Yahweh's righteousness is his fulfilment of the demands of the relationship which exists between him and his people Israel, his fulfilment of the covenant which he has made with his chosen nation. We might therefore note that only he who stood within the covenant could speak of Yahweh as righteous.

Now in the OT the righteousness of Yahweh is most often portrayed in forensic terms, and it is usually in his function as judge of the earth that he is pictured as righteous (Pss. 9:4, 8; 50:6; 96:13; 99:4; Isa. 5:16; 58:2; Jer. 11:20). So as with the human judge, he upholds the right. He helps those who have had their right taken from them to regain it. He does this on behalf of Israel. He protects and restores her right. This is Yahweh's righteousness. This is his fulfilment of his relationship with her. The purpose of his judgment is the preservation of community, of his covenant with Israel (Pss. 89; 94; cf. § 3 above).

Thus Israel constantly appeals to Yahweh's righteousness for deliverance from trouble (Pss. 31:1; 88 [note vs. 12]; 143:11), from enemies (Pss. 5:8; 143:1),

from the wicked (Pss. 36; 71:2); for vindication of her cause before her foes (Ps. 35:24). Yahweh is righteous insofar as he heeds these pleas. His righteousness consists in his intervention for his people, in his deliverance of Zion (Ps. 48; צדק is here translated "victory" [vs. 10]), in his salvation of his chosen nation (I Sam. 12:7-12; צדקה is here translated "saving deeds" [vs. 7]). So Jeremiah waits confidently for Yahweh's righteous vengeance on his enemies (Jer. 11:20; cf. Ps. 71:24). So exiled Israel hears the promise of victory over her oppressors (Isa. 54:14-17). So her people should call on their God in the day of trouble (Ps. 50:15). For Yahweh maintains the cause of the afflicted and needy (Ps. 140:12). His decision is for his people over against all other peoples of the world (Isa. 43:1-7; 54:11-17).

In short, Yahweh's righteous judgments are *saving* judgments (Ps. 36:6), and Deutero-Isaiah can therefore speak of Yahweh as a "righteous God and a Savior" (Isa. 45:21). Yahweh's salvation of Israel is his righteousness, his fulfilment of his covenant with her. This is confirmed by the fact that צדק is often translated "saving deeds" (I Sam. 12:7), "deliverance" (Pss. 22:31; 51:14; 65:5; Isa. 46:12-13; 51:1, 5-6, 8), or "vindication" (Isa. 62:1-2), and that it is often placed in parallelism with "salvation" (Ps. 40:10; 51:14; Isa. 61:10). As judge of the earth, Yahweh decides for his people, delivering and saving them. This is his righteousness. And this is Israel's "triumph" (Judg. 5:11; Isa. 45:25), God's "victory" (Ps. 48:10).

6. The afflicted as righteous. God's saving judgments on behalf of his covenant people bring us to a second definition of the צדק in the OT. Not only is he righteous who fulfils the demands of a relationship, but also he who has had his right taken away from him within such a relationship. This view forms part of the backdrop of § 5 above, and of course again the thinking is largely forensic. The judge intervenes to restore the right to him who has been deprived of it. He decides in favor of the deprived one, of him who is needy. He declares the oppressed or afflicted one to be צדק, to be in the right.

Thus from the time of the enslavement in Egypt, Israel has been in the right over against her enemies (Ps. 103:6), and God has been her champion, putting down her foes (Ps. 68). Over against her enemies Israel is always righteous. Her righteousness consists in the fact that she is oppressed and deprived of her right (cf. Isa. 54:14; but see §§ 7-8 below).

However, the same is true within the community of Israel itself. Those who are righteous are those who are victims of oppressors (Ps. 14:5), of enemies (Ps. 69:28), of wicked rulers (Ps. 94:21), of violent men (Ps. 140:13). And their hope is the Lord, for he it is who restores their right, who saves those who are bowed down (Pss. 116:6; 146:8). His judgments are always favorable (Ps. 146:7-9) for the oppressed and the hungry, the prisoner and the blind, the widow and the fatherless, the alien and the poor (Amos 2:6). We thus see why the words for the poor and needy, רשע, עני, אביון, are placed parallel with צדק. They are righteous before God. Yahweh restores their right. Thus again Yahweh's righteous judgments are saving judgments.

7. Righteousness and sinfulness. These facts seem strange, however, when we consider that often in the OT he who is called צדק is at the same time sinful. Indeed, the OT has no hesitation in portraying Israel's persistent sin before her God, and the confession of the psalmist is that "no man living is righteous before thee" (Ps. 143:2). Yet this same psalmist appeals to Yahweh's righteousness, to Yahweh's saving judgments (vss. 1, 11) for deliverance from his adversaries (vss. 3, 9, 12). He is not alone in this appeal (cf. Ps. 51:14), and other psalmists witness to God's salvation of them despite their sinfulness (Pss. 40:10 [cf. vs. 12]; 65:5 [cf. vs. 3]; 103:17 [cf. vss. 3, 10-12]). They unhesitatingly number themselves among the righteous (Ps. 32:11 [cf. vss. 1-5]; 69:28 [cf. vs. 5]). Indeed, Yahweh's righteousness is sometimes the source of forgiveness (Ps. 51:14; 103:11-12, 17).

Despite such facts, we need not dwell too long on the point that throughout the OT Yahweh condemns evil. His righteous judgments restore the right to those from whom it has been taken, but they also put down the wicked. Those judgments which bring salvation for Israel at the same time bring destruction upon her foes (Ps. 58:10-11; Isa. 11:4; 61:1-2; Hab. 3:12-13; Mal. 4; cf. Hag. 2:22-23; Zeph. 2:8 ff; Zech. 14). The Lord has a day of vengeance on behalf of his people (Isa. 34:8), and his righteousness and vengeance go hand in hand (Isa. 59:16-19; cf. Pss. 7:11-13; 129:4; Isa. 45:25; Jer. 11:20). When Yahweh saves, he also recompenses (Isa. 35:4; 40:10; 62:11). And the same is true within Israel. In his work of restoring the right, Yahweh punishes the sinner (Exod. 23:7; I Kings 8:32 = II Chr. 6:23; Ps. 51:4; Lam. 1:18). There are two sides to his righteousness: salvation and condemnation; deliverance and punishment.

However—and this is an important point—Yahweh's righteousness is never solely an act of condemnation or punishment. There is no verse in the OT in which Yahweh's righteousness is equated with his vengeance on the sinner, and not even Isa. 5:16 or 10:22 should be understood in such a manner. Because his righteousness is his restoration of the right to him from whom it has been taken, it at the same time includes punishment of the evildoer; but the punishment is an integral part of the restoration. Only because Yahweh saves does he condemn. His righteousness is first and foremost saving. He is a "righteous God and a Savior."

It seems clear, however, that that which gives the oppressed Israel or the afflicted person within Israel his ground for hope in Yahweh's deliverance is not his sinlessness. His righteousness consists not in ethical or moral blamelessness. He often openly confesses his transgressions. Further, though he is righteous over against his enemy, his righteousness consists not solely in this fact. One cannot simply identify the poor and oppressed with the צדקים in the OT. Yahweh, who punishes the wicked, does not overlook the sin of the afflicted because the latter is bowed down. No, the poor and oppressed have a further righteousness which is all-important before Yahweh, and this righteousness is their faith, their fulfilment of their relationship with Yahweh.

8. Righteousness and faith. Wherever you find an appeal to Yahweh's righteousness or salvation or deliverance in the OT, you find the attitude of faith. It takes many forms, but it is characterized primarily by a complete dependence on God. Those who are faithful are those who wait for him (Isa. 33:2; Mic. 7:7-9), who hope in him (Pss. 69:6; 71:5, 14; 146:5), who seek after him (Ps. 69:6, 32), who trust in him (Pss. 71:5; 143:8); cf. Ps. 33. They are those who know Yahweh (Ps. 36:10), who fear him (Ps. 103:11, 13, 17), who love his name (Ps. 69:36). He is their fortress. In a world in which they are oppressed and needy, the Lord is their sole refuge (Pss. 5:7-12; 14:6; 31; 36:7; 52:6-7; 71:1-3; 94:22; 118:8-9; 143:9). Thus, as opposed to those who trample them underfoot, as over against those who trust in riches (Ps. 52:7), they trust in Yahweh, crying to him in their distress (Pss. 35; 88; 116; 140), bowing before his judgments (Pss. 94:12; 118:18), acknowledging their sin (Pss. 32; 51), offering to him a broken spirit and a contrite heart (Ps. 51:17). Yahweh is their only hope and sure salvation. They turn to him in faith.

Such faith is the righteousness of the afflicted, Israel's fulfilment of her relationship with Yahweh. Not because she is oppressed does Yahweh forgive Israel's sin, not because she is needy does he deliver his sinful nation, but because she repents of her sin and throws herself on his mercy. Israel's religion is her righteousness over against all the peoples of the earth. Thus Isaiah writes:

Zion shall be redeemed by justice,
and those in her who repent, by righteousness.
But rebels and sinners shall be destroyed together,
and those who forsake the LORD shall be consumed
(1:27-28).

Righteousness here is the saving judgment of Yahweh which intervenes on behalf of the repentant. It is a thought similar to that set forth by the psalmist:

The salvation of the righteous is from the LORD;
he is their refuge in the time of trouble.
The LORD helps them and delivers them;
he delivers them from the wicked, and saves them,
because they take refuge in him (37:39-40).

This is Israel's righteousness, that she repents and takes refuge in her God, that she trusts in him, that she is faithful. Her faith is the fulfilment of her relationship with Yahweh (cf. § 4b above).

In this sense Israel calls *herself* righteous (Ps. 37:39), not because she is ethically or morally blameless (Pss. 32:11; 69:28), not because she thinks she merits God's salvation, but because she believes, because God is her refuge (Pss. 5:12; 14:5; 31:18; 33:1; 36:10; 52:6; 94:15, 21; 118:15, 20). She knows her faith to be her one sure foundation:

Love the LORD, all you his saints!
The LORD preserves the faithful,
but abundantly requites him who acts haughtily.
Be strong, and let your heart take courage,
all you who wait for the LORD!

(Ps. 31:23-24).

9. Justification and the covenant. Israel's confidence that her faith in Yahweh will lead to her salvation rests, however, on one further fact: God's choice of her and his covenant with her. As has

been pointed out (see § 5 above), Yahweh's righteousness consists in his salvation of his chosen people. By preserving his people, Yahweh fulfils the demands of the covenant relation. And the covenant relation is prior to Israel's righteousness. Righteous or unrighteous, believing or unbelieving, she stands in a covenant relationship with her God, a relationship which can be nullified by Yahweh alone. Until Yahweh rejects her (cf. Hosea), Israel stands under the shadow of Yahweh's saving arm (Isa. 40:10-11; 52:10).

This is the message primarily of Deutero-Isaiah, and here we are brought to a third meaning of righteousness in the OT. Not only is he צדיק who fulfils the demands of the relationship in which he stands, and not only is he righteous who has been deprived of his right within such relationship. He also is righteous who has righteousness imputed to him. In this sense, righteousness is justification by God, a "being-declared-righteous" by the Lord of the covenant (cf. Isa. 60:21).

The gift of such righteousness is announced in the great eschatological witness of Deutero-Isaiah. Israel is a sinful folk, sunk in idolatry (Isa. 44:9-20; 50:11), full of transgressions (53:5-6, 8, 11), who is unable to confess her God rightly (48:1), who has burdened him with her evil (43:24), who has refused to call upon her savior (43:22). For this reason Yahweh has given her into the hand of her captors (42:24-25; 47:6) to suffer double punishment for her sins (40:1), to drink the full measure of the wrath of the Lord (51:17-20), to be refined in the furnace of affliction (48:9-11), to be bruised (53:10) and forsaken (54:7-8). And in the middle of her exile Israel thinks herself to be lost, her way hidden from the Lord (40:27), her people rejected forever (49:14; 50:1). In short, Israel has forgotten the covenant. She has forgotten her relationship to Yahweh, because Yahweh is wrathful toward her for her sin.

Deutero-Isaiah's glad message is that the covenant still stands. Yahweh cannot forget his child (49:15), or, in another figure, he has not divorced his wife Israel (50:1; cf. 54:5-6). His relationship with his people endures. His word, his promise, his agreement, stands forever (40:8; 55:11). This is Israel's hope, that the covenant is yet good. If she seeks deliverance, let her look to the rock from which she was hewn, to the promise to Abraham and the covenant with the fathers (51:1-8). There is Israel's hope. For the word of the Lord stands forever.

Without such word, Israel has no hope, for she has no righteousness of her own. She does not do the right (48:18-19; cf. §§ 2-4 above), and for this she has been punished. True, because she is oppressed by her captors, she can plead God's saving help. She is righteous in that her right has been taken from her (cf. § 6 above; 41:17-20; 42:14-22; 43:14; 45:14; 46:1-2; 47 [note vs. 6]; 48:14; 49:23-26; 51:13-14, 21-23; 54:14-17). But even this Israel does not do. She does not call on Yahweh (43:22), because she does not believe. It is as if she were blind and deaf (42:18-20; 43:8). She is stubborn of heart (46:12) and stiff-necked (48:4), rebelling against God from her birth (48:8). She will not trust him or rely upon him (50:10), for she thinks he has no power

to deliver (50:2). She has no faith and therefore ultimately no righteousness of her own.

Deutero-Isaiah's exhortation to such a people is to believe, to cast themselves on the Lord: "Have you not known? Have you not heard?" he cries (40:28), "... they who wait for the LORD shall renew their strength" (40:31), and his entire witness to God's power and majesty is intended to inspire trust in the saving help of Israel's God (e.g., 40:12-31). Yahweh will save Israel, for Yahweh has chosen her (41:8-10; 43:1-7; 44:1-5, 22; 46:3-4; cf. 49:8-13). His covenant stands, despite Israel's unrighteousness. God intervenes for the cause of his afflicted folk before all the peoples of the earth (51:22). He will deliver her from exile (43:14); he will forgive her sin (43:25; 44:22; cf. 54:9); he will care for her as a shepherd cares for his flock (40:11).

In short, Yahweh will fulfil the demands of the covenant relationship. He will maintain his righteousness. He will do so by justifying Israel, by imputing righteousness to her who has no righteousness, by delivering her who has no right to be delivered (46:12-13). And this will be Israel's righteousness before all the world, that God helps her (50:9; cf. 52:13-53:12). In God's righteousness, Israel will be established (54:14); in his salvation of her, she shall be declared צדיק (45:24-25). Despite her failure to do the right, despite her lack of faith, Yahweh, the creator, the king, the judge of all the earth, will decide in her favor. Deutero-Isaiah's plea is that Israel but faithfully accept such deliverance. It is no wonder that the tone of the Second Isaiah is one of joy and celebration (cf. 52:7-10).

Righteousness in the OT, then, is the fulfilment of the demands of a relationship, whether with men or with God. And though man's righteousness fails, God's endures. He intervenes on behalf of his own, saving them from bondage, forgiving their sin, declaring them to be in the right before himself and all the world. The connection with the NT message of salvation in Jesus Christ seems obvious, for "while we were yet sinners Christ died for us" (Rom. 5:8). See **RIGHTEOUSNESS IN THE NT**.

RIGHTEOUSNESS IN JEWISH LITERATURE, 200 B.C.-A.D. 100 [צדקה, צדקה, δικαιοσύνη; Lat. *justitia*]. The Jewish literature of the period 200 B.C.-A.D. 100 comprises the canonical books Ecclesiastes, Daniel, and Esther in the OT, the apocryphal and pseudepigraphic books of the OT, the writings of

Philo and Josephus, and, perhaps, also the recently discovered DEAD SEA SCROLLS. Of frequent occurrence in the translations of this literature are the English words "righteous," "righteously," and "righteousness," and their equivalents in other languages. These terms are generic for all forms of approved conduct. Naturally they are also terms of ardent commendation. Commendation, as distinguished from any clear reference, seems to be, at times, their only function (Wisd. Sol. 1:15; Eccles. 26:28; Enoch 81:4, 7; 94:3).

1. **The qualities constituting righteousness.** This literature, of course, leaves us in no doubt regarding the nature of righteousness. Righteousness is understood to consist in the possession of certain qualities and in the absence of certain other qualities.

a. **The positive side of righteousness.** Righteousness is identified or closely associated with such traits as mercy (II Esd. 8:36; Tob. 3:2; Eccles. 44:10; II Macc. 1:24; Enoch 39:5; 71:3; Slavonic Enoch 42:11); beneficence (II Macc. 1:24; Sibylline Oracles III.234); benevolence (Tob. 1:3; 14:11; Eccles. 7:10;

40:24); goodness of heart (Tob. 14:11; Wisd. Sol. 1:1); love of neighbor (Jub. 7:20; 20:2); compassion for the poor and weak (Asmp. Moses 11:17; Test. Benj. 4:4); gentleness (Slavonic Enoch 42:11); the capacity for giving joy (Enoch 104:12); innocence (Sus. 53); forbearance (Slavonic Enoch 9:1; Syriac Apocal. Bar. 24:2; Manual of Discipline); humility (IV Ezra 8:49); compunction about one's shortcomings (Pss. Sol. 3:7; 13:5); cultivation of one's soul (Philo *On Husbandry* V); truthfulness (Tob. 1:3; 3:2; 4:6; Wisd. Sol. 5:6; I Macc. 7:18; IV Ezra 7:114; Aristeas 306; Enoch 10:16; 62:3; Slavonic Enoch 42:11; Pss. Sol. 3:6; Test. Dan 1:3; Apocal. Abraham 27:18; Thanksgiving Hymns II.2-19; IV.40); justice (Aristeas 147; Jub. 7:34), especially toward the needy, as in Isa. 11:5 (Formulary of Blessings), and including fairness even toward the ill-behaved (Ecclus. 42:2); chastity (II Esd. 6:32; Aristeas 152; Enoch 69:11; Jub. 7:20; 20:23; 25:1); honoring of parents (Jub. 7:20); kindness toward all one's kindred (Jub. 31:3); concord among kindred (Jub. 7:26); fidelity (Enoch 108:13; IV Ezra 7:114; Formulary of Blessings; War Scroll, referring to Isa. 11:5); integrity (1QS VIII.20-IX.6); constancy (Jub. 1:25); courage (IV Macc. 1:18); manliness (IV Macc. 1:18; 2:23); mastery over one's impulses (Aristeas 215; IV Macc. 3:1; 5:24; 7:22); poise (IV Macc. 5:24); steadfastness amid poverty and illness (Pss. Sol. 16:14 [or 15]); moderation (IV Macc. 1:18; Aristobulus 2:66); temperance (Wisd. Sol. 8:7; Aristeas 278); sobriety (Aristeas 209); appreciation of virtues in others (Test. Benj. 4:4); thoughtfulness (IV Macc. 1:18; 2:23); intelligence (IV Macc. 1:18); wisdom (Wisd. Sol. 10:13; Syriac Apocal. Bar. 66:2; Enoch 32:3; 48:1; 99:10; Sibylline Oracles III.218; 1QH II.2-19); wise discrimination (Aristeas 151). The question is raised by Philo whether righteousness and ignorance are compatible (*Questions on Genesis* on Gen. 20:4). The righteous keep their hearts open to knowledge (Manual of Discipline; 1QH II.2-19), including knowledge of God's judgments (1QS II.25-III.12) and of the things that belong to eternity (1QM XVI.11-XVII.15). They recognize the righteousness of God (Pss. Sol. 3:5). According to Philo (*Allegory of the Jewish Law* 24.78): "The righteous man, exploring the nature of existences, makes the surprising find that all things are a grace of God." The righteous praise God (Pss. Sol. 15:5; Tob. 13:6, 8). They deem it a small matter to be divinely afflicted (Pss. Sol. 3:4), esteeming God's judgments as righteous even when those judgments are adverse to themselves (Pss. Sol. 3:3-4). They "can endure the narrow things because they hope for the wide" (IV Ezra 7:18).

b. The negative side of righteousness. The righteous person is free of such traits or doings as avarice (Sibylline Oracles III.234), bloodshed (Jub. 7:23), destructiveness (Jub. 7:26), violence (Enoch 91:18-19; 102:10; Aristeas 147; Jub. 35:13), injuring others (Aristeas 168, 232), peculation (Jub. 23:21), removal of landmarks (Sibylline Oracles III.630), envy (Jub. 7:26; Test. Benj. 4:4), oppression (Sibylline Oracles III.630), and tyrannizing (Aristeas 147-48).

c. Righteousness in occupations. Judges, to be righteous, must practice equity (Wisd. Sol. 9:3).

Especially must they observe scruple in their dealings with widows and orphans (Slavonic Enoch 42:7, 9). They must eschew bribery (Aristeas 209; Jub. 21:4; Asmp. Moses 5:3), partiality (Jub. 21:4; Slavonic Enoch 9:1), and venality (Asmp. Moses 5:3). Similarly employers. In reply to his question: "How could he build in such a way that his structures would endure after him?" King Ptolemy is counseled: "If he never dismissed any of those who wrought such works and never compelled others to minister to his needs without wages . . . for it is the deeds that are wrought in righteousness that abide continually" (Aristeas 258-59). To the king's query: "Whom ought we to appoint as officers over the forces?" the reply is: "Those who excel in courage and righteousness and those who are more anxious about the safety of their men than to gain a victory by risking their lives through rashness" (Aristeas 281). Also involved in righteous conduct is the observance of the RELEASE every fifth year (Jub. 7:37)—not, as in Deut. 15, every seventh year. *See OCCUPATIONS.*

d. Righteousness and prayer. Characteristic of the righteous is recourse to prayer (Enoch 47:2; 97:3, 5; 99:3). At the last judgment, the righteous, imitating such as Abraham, Moses, and David, who prayed for others, will intercede for the ungodly (II Esd. 7:41; IV Ezra 7:102, 111). The righteous supplicate also in heaven (Enoch 39:5). Every day they beseech the Almighty in behalf of the damned in hell (Apocal. Sophonias 17:5). One of these writings alleges that the righteous in heaven had to be placed far from the underworld in order to be kept from hearing the groans of the wicked and imploring God's mercy upon them (Elijah 9:2). *See PRAYER.*

e. Unique meanings of "righteousness." Seldom is the word "righteousness" associated with matters of ritual conformity (Jub. 20:2) such as burnt offerings (Ecclus. 7:31; cf. Deut. 33:19), tithes and pilgrimages (Tob. 1:6-7), and the avoidance of forbidden foods (Tob. 1:10-12) and of idolatry (Bar. 6:73). Sometimes Hebrew idiom permits the word "righteousness" to mean "credit for being righteous" (Bar. 2:17). Sometimes it means "good fortune" (Ecclus. 44:10), and sometimes "divine punishment" (Ecclus. 16:22). But the most frequent of these special usages lies in the application of the term to the practice of almsgiving (Tob. 1:3; 12:8; 14:11; Ecclus. 40:24; Slavonic Enoch 9:1; IV Ezra 7:35). Such is the sense of the word "righteousness" in Dan. 4:24, where it is thus translated by the LXX. Similarly the Greek text of Ecclesiasticus says ἐλεημοσύνη ("almsgiving"), wherever the GENIZAH Hebrew says צדקה ("righteousness"). Later, in the rabbinic writings, the Hebrew word for "charity" is always the same as the Hebrew word for "righteousness"; just as, in English, "morality," while it signifies commendable conduct of all kinds, carries also the special meaning of probity in matters sexual. Such is, in the literature we are considering, the identification of righteousness with the giving of alms.

f. Righteousness and severity. Yet righteousness is, at the same time, compatible with harshness. Commended as an act of righteousness is the practice of burning the harlot (Jub. 20:4). We are told that the

brothers Levi and Simeon wrought righteousness when they slew the Shechemites (Jub. 30:18, 23; *see* SHECHEM). God is praised as a righteous judge because Jews, who had worn amulets dedicated to a certain idol, were among those who fell in battle (II Macc. 12:41). Philo believes in righteous anger (*On Flight and Finding* 17.90; *On Dreams* I.15.91; II.1.7).

According to this literature, the righteous will praise God's justice when they will have the gratification of beholding the extermination of their foes (Pss. Sol. 4:8). Especially is this boon to occur at the last judgment (Enoch 5:6; 62:12; 95:3; 96:1; 98:12; 99:3, 6; Apocal. Elijah 41:4) and in the days of the Messiah (Jub. 23:30). The righteous are assured:

Fear not the sinners, ye righteous;
For again will the Lord deliver them into your hands,
That ye may execute judgment upon them according
to your desires (Enoch 95:3).

The sinners are told: "Know that ye shall be delivered into the hands of the righteous, and they shall cut off your necks and slay you, and have no mercy upon you" (Enoch 98:12). The righteous will remember the sins which the sinners have committed (Enoch 99:16). In order to curse the sinners, they will ascertain the names of the sinners (Enoch 5:6). Then they will have the angels place the sins of the sinners before the Most High, thus keeping God reminded (Enoch 99:3).

2. Benign aspects of the divine implications of righteousness. In various ways righteousness is associated with God. The ancient predication that God is righteous occurs in this literature countless times, often with striking turn of phrase: God is the light of righteousness (Test. Zeb. 9:8), righteous beyond reckoning (Enoch 63:3); his righteousness is unending (*Manual of Discipline*) and eternal (Tob. 3:2). *See* GOD, OT VIEW OF.

a. Divine attributes of righteousness. Among God's righteous attributes are his mercy (II Esd. 8:36; Jub. 31:25; IV Ezra 8:12) and compassion (Asmp. Moses 11:17; Apocal. Esd. 1:12) and the abatement of his anger (Dan. 9:16). His compassion extends even to such as have no wealth of good works (II Esd. 8:36; IV Ezra 8:32). It enfolds, in its healing, also the Gentiles (Test. Zeb. 9:8). For all "who lift not the hand against" God's judgments, there is pardon and salvation (Zadokite Fragment 9:52-53).

b. God's righteousness toward Israel. Righteous are God's works (Dan. 9:14; IQH I.5-39; IV.40). These include God's choice and consecration of Israel (II Macc. 1:25), his covenant with Israel (Jub. 22:15), and his care for Israel (Bar. 5:9; Pss. Sol. 8:32). God will give Israel salvation when, amid the heathen, they turn to him (Jub. 1:15-16). He will save them and gather them from among the Gentiles (Test. Naph. 8:3). He will plant them in their land as a plant of righteousness that will never be uprooted (Jub. 36:6). His sanctuary will be restored in their midst (Jub. 1:17). He will disclose to them abounding peace (Jub. 1:16).

c. God's bestowal of righteousness upon man. Included in God's righteous works are his bestowal of righteousness upon human beings (Bar. 5:2, 9; Wisd. Sol. 12:16; Aristeas 280; Jub. 1:16; *Manual of Dis-*

cipline; IQH II.2-19; IV.5-40; XIV.1-27; XVI.1-19) and his transformation of people's character from evil to good (*Manual of Discipline*). Human righteousness has God as its source (Bar. 5:9; Jub. 16:26). Man turns his thoughts to God and is thus imbued with righteousness (Wisd. Sol. 15:3; Jub. 1:20). Until the God of righteousness appears, wars will have no end (Test. Judah 22:2).

d. The righteousness of God's commands. Similarly righteous are God's commands (Ecclus. 17:14; Pss. Sol. 14:1-2; Sibylline Oracles III.630; Apocal. Abraham 31:5) and precepts (Syriac Apocal. Bar. 61:6; IQS II.25-III.12). Consummately righteous is God's law (IV Macc. 13:24; Aristeas 131; Sibylline Oracles III.580; Aristobulus 2:66; Pseudo-Philo 11:15; Zadokite Document I.1-II.12). The minutiae of the law are, according to Aristeas, not trivial; their purport is that of fostering righteousness. God gave statutes to Moses, not apropos creeping things (Aristeas 168-69) or mice and weasels, but in order to inculcate righteousness (Aristeas 144). The birds forbidden for food are "wild and carnivorous, . . . preying upon the tame birds, seizing lambs and kids, pouncing upon human beings, alive or dead" (Aristeas 145, 147). The prohibition of such creatures "thus teaches that those for whom those laws were ordained must practice righteousness in their hearts." Similarly the Jewish practice of ritual hand washing is a token that the person has done no evil (Aristeas 306); it is a symbol of righteousness and truth. Referring to the phylacteries, one of the translators remarks: "Upon our hands a symbol is fastened showing we ought to perform every act in righteousness" (Aristeas 159).

e. God's favors to righteous people. The phrase that God is the God of the righteous (Prayer Man. 8; Joseph and Asenath 12:1) becomes meaningful in the light of the innumerable favors that God lavishes upon righteous people (Enoch 41:8; 45:6; 49:3; 58:2, 4; 94:4; Pss. Sol. 3:4). To God, the righteous are acceptable (Ecclus. 35:6; Enoch 94:1; IQS VIII.20-IX.6). Their prayers, a delightful offering to him (Zadokite Fragment 14:1; cf. Prov. 15:8), will bring that for which they petition (Apocal. Elijah 42:1). God rejoices in the righteous (Ecclus. 35:6; Enoch 94:1; IQS VIII.20-IX.6); blesses the righteous (Enoch 99:10; Pss. Sol. 3:14; 9:7); he is faithful to the righteous (Pss. Sol. 13:12; 14:1-2; 16:14-15), gracious to the righteous (Pss. Sol. 3:14; 13:12; Enoch 92:4), loves the righteous (Aristeas 209; Jub. 1:25), has compassion on the righteous (Pss. Sol. 2:35) and mercy on the sons of the righteous (Tob. 13:9). He rewards the righteous (Wisd. Sol. 10:17; IV Ezra 8:33), compensating them as one pays a laborer (Wisd. Sol. 2:22; Enoch 104:13; Apocal. Esd. 1:14). The angels maintain a strict record of each person's deeds (Pss. Sol. 9:6; Apocal. Sophonias 3:5; IQH XVI.1-19). The person who sows the seed of righteousness shall reap sevenfold (Slavonic Enoch 42:11). God confers upon the righteous joy and ecstasy (Test. Adam 2:11). For the righteous, he renews the world (Apocal. Abraham 17:13).

f. Material benefits. The righteous and their works are in God's hands (Eccl. 9:1; Wisd. Sol. 3:1). God preserves their lot (Enoch 48:7). He makes plain

their way (Pss. Sol. 10:3). He brings their efforts to success (Aristeas 18). They shall inherit good things (IV Ezra 7:17). They shall be happy and prosperous (Tob. 14:11; Enoch 1:8; 94:4; Sibylline Oracles III. 580). They shall acquire houses (Enoch 91:13). Tilled in righteousness, the earth will yield abundance (Enoch 10:18). Especially rewarded with good crops shall be those who, in righteousness, grant release every fifth year (Jub. 7:37). Also envisioned is success at arms. At the time of Sennacherib's invasion, King Hezekiah's righteousness was King Hezekiah's hope (Syriac Apocal. Bar. 63:3). See REWARD.

g. Spiritual benefits. But the gains are not exclusively material. Some are spiritual. In the name of his righteousness, God strengthens the spirit of righteous people (Enoch 41:8). He will put faithfulness in their habitation (Enoch 108:13). His wisdom, which has marvelously guided them (Wisd. Sol. 10:17), will be revealed to them (Enoch 48:7; 91:10; 104:12). To the righteous and the elect will be disclosed the mysteries of creation (Enoch 93:10; 104:12-13). In the book of Enoch, this linkage of the righteous and the elect occurs constantly. Frequent also is the nexus of the righteous and the holy. See REWARD.

h. Remission of sin. Not all authors agree with those among them who hold that the righteous are guilty of no sins for which to repent (Pss. Sol. 9:7) or for which to be reproved (Apocal. Shadrach 15:2). The righteous do, at times, sin; but, among the manifestations of the divine righteousness, is God's forbearance—toward righteous and wicked alike (Syriac Apocal. Bar. 24:2). God exonerates the righteous who, like Shadrach (Apocal. Shadrach 12:5), thoroughly expiate their sins with chastisement and fasting (Pss. Sol. 3:8). The faithful shall have pardon (Zadokite Fragment 9:52-54); God's wrath abates toward such as have piety in their souls (Sibylline Oracles IV. 169). Though the righteous stumble, they nonetheless recognize the righteousness of God and look for divine help (Pss. Sol. 3:5). God, in fact, warns the righteous and reproves him like a dear son (Pss. Sol. 13:8-9). This reproof is feeble by comparison with the doom in store for sinners (Pss. Sol. 13:6-7). The chastisement of the righteous is not destructive (Pss. Sol. 10:3; cf. Ps. 118:18). Lest sinners gloat at seeing the righteous punished, the punishment of the righteous is mild (Pss. Sol. 13:7). The belief is expressed that the worship of idols or the partaking of forbidden food under compulsion entails no divine penalty (IV Macc. 8:22). In brief, God, who is righteous, liquidates the sins of the righteous (Pss. Sol. 13:9). See FORGIVENESS.

i. The righteous at the last judgment. The present world is unable to furnish the righteous with all they have been promised; it is a world full of impotence and sin (IV Ezra 4:27). The righteousness of God requires, accordingly, that the righteous be favored at the last judgment (Enoch 38:1; 62:8; 99:10; IV Ezra 9:13). God will appoint, for the righteous, angelic guardians until he puts an end to every wickedness (Enoch 100:5). A fragrant tree will be available to the righteous, at the last judgment, with food for the elect (Enoch 25:4). The Son of Man will be a staff to the righteous that they fall not (Enoch 48:4). Hunger, sword, and death shall avoid

the righteous (Pss. Sol. 15:7). They shall escape the upheavals of those turbulent times and shall beget thousands of children (Enoch 10:17). See ESCHATOLOGY OF THE APOC. AND PSEUDEP.

j. The righteous at the resurrection. For the righteous there will be RESURRECTION from the grave (Enoch 62:15). God will not suffer the bodies of the righteous to be handed over to AZAZEL (Apocal. Abraham 13:11). Though they sleep the long sleep, they can look forward without fear (Enoch 100:5; 102:4; Syriac Apocal. Bar. 11:4; 14:12). They shall arise from that sleep (Enoch 91:10; 92:3). From the treasuries in which souls are preserved (IV Ezra 4:39), they shall, at the resurrection, come forth in radiance (Syriac Apocal. Bar. 30:2; 51:1). For them is prepared all goodness, gladness, and glory (Enoch 51:5).

k. The righteous at the time of the Messiah. Then there is the messianic age when the righteous shall have, upon their faces, the brightness of God (Enoch 38:4). They shall bask in the light of the sun (Enoch 58:2-3). The light of the sun will, in fact, not be needed (Pseudo-Philo 26:13); for upon the righteous shall glow the light of eternal life (Enoch 58:2-3). Clothed in garments of joy (Enoch 62:15; II Esd. 7:17:99), they shall live; they shall be established (Apocal. Abraham 29:18). See MESSIAH (JEWISH).

l. The righteous in Paradise. According to Enoch, there exists for the righteous a garden located in the third part of the fourth quarter of the earth (60:23; 77:3). Yet the chief garden for the righteous is a PARADISE beyond earth (II Esd. 7:17; IQM XVI.11-XVII.15). At times it is difficult to distinguish between the glories of this Paradise and the mundane glories of the messianic age. E.g., speaking of the last days, Slavonic Enoch 65:8 foretells the great epoch when all the righteous shall be assembled and time shall be no more. "There will be neither years nor months nor days nor hours." In all events, there gleams for the righteous the world on high (Greek Bar. 10:5). Just as our present world was created for the righteous (IV Ezra 9:13), so also was the next world created for the righteous (Syriac Apocal. Bar. 15:7). Men were intended to be righteous and deathless in a Paradise on earth (Enoch 69:11; Pss. Sol. 13:9, 11; 14:3). This was not achieved in the earthly Paradise, but it is to be achieved in the Paradise supernal (Wisd. Sol. 5:15). Ezra saw in hell lions, dogs, and flames, but the righteous strode through them all into heaven (Vision of Esd. 58). As a slave obtains his freedom if he does well by his master, so do the righteous enter the kingdom celestial (Vision of Esd. 66).

The souls of the righteous are in the hands of God (Wisd. Sol. 3:1). Dwelling with him, they have peace, refreshment, and rest (Enoch 39:4-5; 71:14; Apocal. Esd. 1:12; Apocal. Shadrach 16:5). They are destined for gladness and glory (Enoch 25:7; 103:1, 3). They shall be resplendent (Enoch 108:14). They shall be strong as fiery lights (Enoch 39:7). Ezra saw thousands of such, and their abodes were sumptuous (Vision of Esd. 59).

We are told that the spirits of the righteous abide in a compartment near a bright spring of water (Enoch 22:9). There is no darkness (Apocal. Sopho-

nias 2:2). And these glories shall endure forever. In the book of Enoch such words as "forever" and "eternal" are favorites.

In that supernal world reside Enoch, the patriarchs, Moses, Elijah, and the angels (Apocal. Esd. 5:22). The role of the angels is frequent and varied (Greek Bar. 12:3; Enoch 39:5; 60:2; 61:2-3; 70:3). The "secrets of the righteous" are mentioned several times. By these are meant felicities too profound for comprehension (Enoch 38:3; 49:2; 71:3). One who dies in righteousness is indeed blessed (Enoch 81:4). Considering the rest in store for them (Pseudo-Philo 28:10), the righteous do well to leave this transient and evil world (Enoch 81:9).

3. Austere aspects of the divine implications of righteousness. Divine righteousness, however, consists not only of graciousness but also of austerity. Retribution for the sinner is stressed repeatedly (Wisdom Sol. 1:8; 12:13; 17:2; Aristeas 131; Enoch 91:12; 97:1; Jub. 21:4; VI Esd. 15:7; III Macc. 2:3; Pss. Sol. 2:34-35; 3:14; 17:21). Life's adversities are punishments divinely and deservedly inflicted upon individuals and upon nations (Ecclus. 10:8; Pss. Sol. 2:10; 9:10; 1QH I.5-39; XII). The unrighteous are objects of God's hatred (Slavonic Enoch 66:1); God's Righteousness personified scolds Unrighteousness personified (VI Esd. 16:51). And the divine judgment brooks no escape (Ecclus. 26:28; Add. Esth. 5:4 [or 16:4]). Judas Maccabeus invokes God's righteousness when he wreaks bloody vengeance upon Joppa for the atrocities committed by that city upon its Jewish inhabitants (II Macc. 12:6). Sometimes the manner of the punishment is the manner of the sin (Wisdom Sol. 12:23; Enoch 100:7). Cain, e.g., who killed Abel with a stone, was himself killed by a falling stone (Jub. 4:31). "Innocent blood cries up unto me," says God (VI Esd. 15:8). See GOD, OT VIEW OF.

a. Israel's sins and punishments. Israel's misfortunes, such as the dispersion (Pss. Sol. 9:2; IV Ezra 14:32) or the persecutions waged by Antiochus (IV Macc. 4:21) or the entry of Pompey into Jerusalem (Pss. Sol. 8:17, 26), were but manifestations of divine righteousness (Tob. 3:2, 5; 13:9; Add. Esth. 3:12 [or 14:1]; 3:18 [or 14:7]; 5:21 [or 16:21]; Bar. 1:15; 2:6, 9, 12; Song Thr. Ch. 4 [or 27]; 5 [or 28]; Jub. 1:16; Pseudo-Philo 35:4). The righteousness of God's judgments should be acclaimed even by those who are stricken (Add. Esth. 3:18 [or 14:7]; Song Thr. Ch. 5; Jub. 1:6; Enoch 108:13; Pss. Sol. 5:1; 8:24, 40; 9:3-4; 14:1; 18:8; Zadokite Fragment 9:52-53). Philo teaches that divine punishment is something which the conscience-stricken would do well to seek (*That the Worse Is Wont to Attack the Better* XL).

b. Punishments of the high and mighty. Particular attention is called to God's judgments on the wealthy and powerful (Enoch 63:9; 96:4; 99:16). God's righteousness was manifest when Ptolemy Philometer, profanely intruding into the Jewish temple, was stricken with paralysis (III Macc. 2:21-22). Similarly was the intruder Apollonius felled, not by human power but by heavenly power (IV Macc. 4:13).

c. The last judgment. At the last judgment the wicked will be overwhelmed (Enoch 27:3; 38:1; 60:6; 96:1; 97:3; 98:13-14; Pss. Sol. 9:5; 13:11; Apocal.

Elijah 41:5). The Prince of Wickedness will be humbled (1QM XVII). Everyone will receive according to his deserts; there will be no substitutions of one person for another (IV Ezra 7:106). The godless will be smitten by hunger, sword, and death (Enoch 50:4; Pss. Sol. 15:8). Their seed will be uprooted (Wisdom Sol. 3:16). The righteous themselves will not escape unless they have previously repented of their shortcomings (Syriac Bar. 85:12; Vision of Esd. 65). See ESCHATOLOGY OF THE APOC. AND PSEUDEP.

d. Hell. Counterbalancing the heaven of the righteous, a HELL awaits sinners (Pss. Sol. 14:4-7). By divine righteousness, King Antiochus, e.g., is headed for those torments (IV Macc. 9:9; 11:3; 12:12). The righteous tortures suffered by the damned are seen by Sophonias (Apocal. Sophonias 2:5). To the agonies of those condemned ones is added the misery of their beholding, from the fires of hell, the felicities of the righteous with the angels in heaven (Enoch 108:14; Apocal. Esd. 1:9).

4. The righteousness of man (see MAN, NATURE OF, OT). **a. Man's lack of righteousness.** Some authors are persuaded that God alone possesses righteousness (Ecclus. 18:2; 1QH I; IV), and that man is devoid of righteousness (Dan. 9:18; Ecclus. 5:8; IV Ezra 8:32; Zadokite Document VII; cf. Deut. 9:5); man is enthralled in wrongdoing and deceit (1QH I), uncleanness, defilement, and contempt (Jub. 21:21). Some writers, while expounding no doctrine of total depravity, refer to their own age (Syriac Apocal. Bar. 85:3) or to some bygone age (Bar. 4:13; Wisdom Sol. 5:6; Pss. Sol. 17:19 [or 21]) or to some coming age (Jub. 23:21; IV Ezra 5:11) as utterly lacking in righteousness. Reference to the shortcomings of the Maccabees is seen in Pss. Sol. 1:3. Familiar are the plaintive words of Eccl. 3:16: "I saw . . . in the place of justice, even there was wickedness, and in the place of righteousness, even there was wickedness." One author puts it that the very laws which are tokens of righteousness are evidences of unrighteousness; without these laws, men would constantly transgress (Heraclitus of Ephesus VII.10.5).

b. Man's righteousness. Other stretches of this literature are less disheartened. Many are the passages which affirm or assume that the world does contain, has contained, or will contain some righteous people (Ecclus. 27:8; Song Thr. Ch. 63-64 [or 86]; Slavonic Enoch 35:1; Apocal. Abraham 27:6; 1QH XVI; 1QM XIII). Philo contends that, in man, righteousness and unrighteousness are commingled (*Questions on Genesis* on Gen. 18:23); this is not far from the view in Eccl. 7:20: "There is not a righteous man on earth who does good and never sins." Philo declares that, while every vice loves the body, righteousness loves the soul (*Who Is the Heir of Divine Things* 50), and man does have a soul. Philo maintains likewise that some sins are involuntary, and sins of this type he regards as halfway between sin and righteousness (*Questions on Genesis* on Gen. 20:4). One author observes that, if the righteous are few, it must be remembered that the more precious a metal, the rarer its deposits (II Esd. 7:51 ff).

The allurements of Satan need not always hold sway (Jub. 1:20). In Syriac Apocal. Bar. 61:6 righteousness is asserted to have been widely prevalent

in the time of David, and in 85:1 at certain other times. The righteous were exalted by King Josiah (66:2). And righteousness will again prevail at some epoch in the future (Enoch 10:16, 21; 107:1; Jub. 23:26). When the Messiah comes, thirty thousand righteous will attend him (Elijah 6:1). In fact, a certain number of the righteous must have entered the world before it will be possible for the Messiah to appear (Enoch 47:4; IV Ezra 4:35). In the messianic age, righteousness will be universal (Enoch 10:21; 39:6; 71:16; 81:7; 107:1; Slavonic Enoch 65:8; Pss. Sol. 17:26-27, 29, 32) and everlasting (Dan. 9:24). The godless will vanish (Enoch 91:14; IV Ezra 5 [or 7]:114). Sin will become extinct (Pss. Sol. 17:27, 32; VI Esd. 13:53).

c. Righteous individuals. Certain individuals have been outstanding for righteousness: Enoch (Test. Benj. 9:1; Apocal. Esd. 5:22; Apocal. Sophonias 14:3), Noah (Ecclus. 44:17); Abraham (Prayer Man. 8; Jub. 14:6; 20:9; 23:10; Enoch 93:5; Syriac Apocal. Bar. 58:1; Apocal. Esd. 5:22; Apocal. Sophonias 14:3), Isaac (Prayer Man. 8; Jub. 31:23; 36:6; Syriac Apocal. Bar. 58:1; Apocal. Esd. 5:22; Apocal. Sophonias 14:3), Jacob (Prayer Man. 8; Wisd. Sol. 10:10; Apocal. Esd. 5:22; Syriac Apocal. Bar. 58:1; Apocal. Sophonias 14:3), Simeon (Jub. 30:23), Levi (Jub. 30:19, 23), Joseph (Wisd. Sol. 10:13), Job (Aristeas Fragment 11), Moses (Apocal. Esd. 5:22; Pseudo-Philo 24:6), David (Apocal. Sophonias 14:3; Pseudo-Philo 62:9), Solomon (Pss. Sol. 1:2), Elijah (Apocal. Esd. 5:22; Apocal. Sophonias 14:3), Hezekiah (Syriac Apocal. Bar. 63:3), Ezra (II Esd. 6:32), the translators of the Pentateuch (Aristeas 43), and one of the authors of the Book of Hymns (1QH XVI). According to passages, some of which are regarded by modern scholars as Christian interpolations, supreme righteousness imbues the Messiah (Enoch 38:2; 62:8; Pss. Sol. 18:8; Elijah 6:1), the Elect One (Enoch 39:6; 51:2; 53:6; 62:2), the Son of Man (Enoch 46:3; 48:4; 71:14), the Son of David (Pss. Sol. 17:26-27).

d. Righteous Israel. Often the Jews are spoken of as a righteous nation or race or people or seed (Add. Esth. 1:6 [or 11:7]; 1:8 [or 11:9]; Wisd. Sol. 10:15, 20; 16:23; 18:7; Prayer Man. 1; Enoch 10:16; 65:12; 93:2; Jub. 16:26; 20:9; 25:3; 36:6; Sibylline Oracles III.218, 234, 580; Test. Naph. 8:3; 1QpHab 2 on Hab. 2:4). At least Israel, when restored, is to be worthy of this designation (Jub. 1:17). "Peace of righteousness" is to be the name of Jerusalem (Bar. 5:4). A double garment of righteousness is to be donned by Jerusalem; the righteousness of Jerusalem is to be like a diadem set upon the head (Bar. 5:2). See ISRAEL, HISTORY OF.

e. Partisan sense of "righteous." Sometimes it is obvious that the appellative "righteous" labels a given party, political or religious (Enoch 93:6; 103:9; Pss. Sol. 17:22; 1QH VII.6-25; 1QM III.1-11), opposed to some other party identifiable as the "ungodly" or the "wicked" (Wisd. Sol. 2:12; Dead Sea Scrolls Commentary on Ps. 37:32-33). According to Charles, the "righteous" in Enoch 108:14 are the Essenes. It is surmised that the unrighteous kings and mighty ones in Enoch 38:5 may be either some heathen or some opposing party of Jews.

f. Righteousness taught. Much is said about the teaching of righteousness and teachers of righteousness. Noted for teaching or exhorting or adjuring or training others for righteousness are such personages as Enoch (Enoch 13:10; 14:1; 91:3-4, 18-19; 94:1, 3-4), Noah (Jub. 7:20, 26), Abraham (Jub. 20:2), Levi (Jub. 31:15; Test. Levi 13:5), Judah (Jub. 31:15), Benjamin (Test. Benj. 9:1), Solomon (Wisd. Sol. 1:1), Ben Sirach (Ecclus. 7:1), Tobit (Tob. 4:5; 13:6), the mother of the seven martyred brothers (IV Macc. 17:5), the Sibyl (Sibylline Oracles III. 630), and the translators of the Pentateuch (Aristeas 215, 267).

As a specific personality, a "Teacher of Righteousness" is mentioned in the Zadokite Fragment, known since 1910 (1:7; 4:7; 8:10; 9:29, 39, 50, 53), and also in the Dead Sea Scrolls, more recently discovered (1QH II.2-19; I; Commentary on Ps. 37). Here, however, this Teacher of Righteousness and the Messiah are not identical.

Also envisioned is the winning of converts to righteousness by those who have themselves exemplified righteousness (Dan. 12:3; Ecclus. 32:16; The Dead Sea Scrolls [The Zadokite Document, VIII]). Akin to teaching righteousness is the act of blessing righteous people. Such blessings are spoken by various notables (Enoch 82:4; 99:10; Slavonic Enoch 42:11; Jub. 36:16). Enoch supplicates that the righteous community might be enabled to endure forever (Enoch 84:6).

g. The troubles of the righteous. Contrary to much that we have noted already, the lot of the righteous on earth is often described as a sad one (Wisd. Sol. 3:1-2; IV Ezra 4:27). The righteous are constantly subject to the abuse and the persecutions of the wicked (Wisd. Sol. 2:10; Sus. 33; Syriac Apocal. Bar. 64:2; Apocal. Elijah 38:3; Enoch 81:9; 95:7; 96:8; 100:7, 10; 101:3; 104:10; Slavonic Enoch 9:1; Zadokite Fragment 1:15). A victim of such mistreatment is, among others, the righteous Son of God (Wisd. Sol. 2:18-19). Sometimes the victim is the entire Jewish nation (Add. Esth. 1:6 [or 11:7]; Wisd. Sol. 10:15; 17:2; IV Ezra 10:22). The righteous are, by word and deed, a reproach to the ungodly, and this the ungodly resent (Wisd. Sol. 2:1-21).

h. The triumphs of the righteous. But, upon the arrival of the Messiah, God will bring retribution and deliverance (Pss. Sol. 2:34; Enoch 47:1-2; 103:9; VI Esd. 15:8). Then will the righteous have rest from oppression (Enoch 53:7). Then will the tables be turned. The righteous will then wield dominion (Wisd. Sol. 3:8; Enoch 50:2; 65:12; Syriac Apocal. Bar. 52:5). Kings and other persons of might will be given into their hands (Enoch 38:5). The foes of the righteous shall vanish like straw in fire, shall sink like lead in water (Enoch 48:9).

Armed with God's breastplate, sixty chosen of the righteous will hasten to Jerusalem and combat "the shameless one"—whoever, in the political commotions of those days, this may have been (Apocal. Elijah 37:5). The Son of David is to shatter the unrighteous ruler (Pss. Sol. 17:22). He is to drive away sinners (Enoch 91:12; Pss. Sol. 17:23) and to rule with righteousness and energy (Pss. Sol. 17:42).

Also in the celestial hereafter will the righteous

judge the godless; righteous youth will sit in judgment over the aged wicked (Wisd. Sol. 4:16). The righteous will confront his oppressor, and the wicked shall realize how the righteous brim with power (Wisd. Sol. 5:6).

5. Nonconformist views. This literature is not without breaks in its dominant orthodoxy.

a. The naturalistic approach. Here and there reference to the supernatural subsides, and righteousness is seen in a context of natural, observable occurrences. This obtains particularly in the Letter of Aristeas. King Ptolemy wishes to know how he can live amicably with different races. The translator to whom this question is addressed replies: "By acting the proper part toward each and taking righteousness as your guide" (Aristeas 267). With these we might range the words of Ecclus. 10:8: "Because of unrighteous dealings, injuries, and riches got by deceit, the kingdom is translated from one people to another." Similarly naturalistic is the admonition of Enoch 91:4:

Love uprightness, . . .
Walk in righteousness. . . .
And it shall guide you in good paths,
And righteousness shall be your companion.

From passages such as these, reference to the supernatural is absent.

b. Sharp distinction between righteousness and unrighteousness. Yet, on the whole, this literature allows scant leeway for skepticism. Though it deals extensively with social conflict, it understands such conflict only as a warfare between the "righteous" and the "wicked" (1QM III.1-11). It applauds the "righteous" for doing what it condemns the "wicked" for doing. Though, to its thinking, "God created both righteous and sinners as he created day and night" (Apocal. Esd. 2:9); though the righteous, as well as the wicked, contribute to the world's confusion (Apocal. Abraham 17:13); and though unrighteousness can even have a defender (II Esd. 16:51); these writings harbor not the least surmise that ethical standards can vary from group to group, one group branding as sinful what another lauds as meritorious, while both groups can be similarly conscientious and sincere.

c. Doubts. There is reference—to be sure, dissenting reference—to the Sadducean denial that the dead will be resurrected: "As we die, so die the righteous; what benefit do they reap of their deeds?" (Enoch 102:6). There is dissenting reference to the observation that the righteous are carried off while the impious prosper (Syriac Apocal. Bar. 15:3). Some uncertainty is divulged as to what will befall the righteous at the destruction of Jerusalem (Syriac Apocal. Bar. 67:4). Yet the only outright abandonment of the belief in supernatural reward and punishment appears in the book of Ecclesiastes, the oldest of these writings. The words are familiar: "There is a righteous man who perishes in his righteousness" (Eccl. 7:15). "There are righteous men to whom it happens according to the deeds of the wicked, and there are wicked men to whom it happens according to the deeds of the righteous" (Eccl. 8:14). "One fate comes to all, to the righteous and the wicked" (Eccl. 9:2). "Be not righteous over-

much" (Eccl. 7:16). Curiously, the nonconformist book of Ecclesiastes attained canonization while many of the conformist works remained apocryphal and pseudepigraphic, including even such conformist writings as the Wisdom of Solomon and the Psalms of Solomon attributed, like Ecclesiastes, to the illustrious king. Accounting for this phenomenon might yield a fascinating chapter in the history of this literature.

ABRAHAM CRONBACH

***RIGHTEOUSNESS IN THE NT.** The use of the concept "righteousness" in the NT presumes a covenant relationship, which, for its preservation, needs the active participation of both covenant partners. Thus, the one who upholds, and therefore participates in, this covenant relationship is designated "righteous"; and, as in the OT (see RIGHTEOUSNESS IN THE OT), those acts which preserve a covenant relationship, either between God and man, or between man and man, are righteous, while those acts which break this relationship are unrighteous. Although an act which upholds the covenant relationship may also be of an ethicomoral nature, it is nevertheless not designated a "righteous" act because it conforms to some ethical norm, either divine or human. Rather, the act is righteous because the covenant relationship has, for its preservation, required such an act from that party to the relationship.

In the prevailing NT use of this concept, God's righteousness is most clearly demonstrated in his saving acts on behalf of man, whereby God, in Christ, upholds, and thus restores, the covenant relationship with sinful man. Man's righteousness, on the other hand, consists of, and depends upon, his trusting acceptance of God's saving act in Christ, whereby man accepts the restored covenant relationship with God.

1. Terminology
2. Righteousness as a relational concept
 - a. As relationship to God
 - b. As relationship between men
 - c. As meeting the demands of a relationship
3. God as the sole source (through Christ) of righteousness
4. Reliance on God alone (through faith in Christ) for righteousness
5. Righteousness and personal benefit
6. Other uses of the concept of righteousness
 - a. As a forensic term
 - b. As retributive justice
7. Righteousness and conformity to a norm

Bibliography

1. Terminology. The noun δικαιοσύνη is most commonly translated "righteousness" (Matt. 3:15; etc.; in the KJV virtually without exception where this word appeared in their MSS). Depending on context, however, δικαιοσύνη may be translated

“piety” (Matt. 6:1), “justice” (Acts 24:25), “justification” (Gal. 2:21), “right” (I John 2:29), or “what is right” (Eph. 5:9). The phrase εἰς δικαιοσύνην is also translated either “(may) be justified” (Rom. 10:4), or “is justified” (Rom. 10:10), the context again being determinative. Δίκαιος, the adjective, in addition to the two most common translations, “righteous” (Matt. 9:13) and “just” (Matt. 5:45), is also translated, again depending on the context, “right” (Luke 12:57), “innocent” (Matt. 27:4), “sincere” (Luke 20:20), “upright” (Tit. 1:8), and, in one instance, “justly” (Col. 4:1). The verb δικαίωω has the sense of “showing to be righteous” (Matt. 11:19), or “declaring” or “pronouncing righteous” (Luke 7:29), but its most common English translation is “to justify” (Rom. 3:30; see JUSTIFICATION). The remaining NT words which belong to this conceptual framework appear much less frequently than those listed above. The noun δικαίωμα signifies a concrete expression of righteousness, either in act or in command. Thus it can be translated “just requirement” (Rom. 8:4; cf. 1:32), or “righteous deed” (Rev. 19:8). But it can also be translated simply as “righteousness” where the context warrants (Rom. 5:18; this translation is preferred in the KJV, where it predominates over all other translations of this word), and in some instances simply as “precepts” (Rom. 2:26), where the righteous aspect of those precepts is made clear by the context. Δικαιώσεις, signifying the act of pronouncing righteous, occurs only twice in the NT, and is translated “justification” (Rom. 4:25), or “acquittal” (Rom. 5:18). The adverb δικαίως, “righteously” (I Pet. 2:23 KJV), or “justly” (Luke 23:41), can also, as the context demands, be translated by such a word as “upright” (Tit. 2:12), or, in a phrase, “come to your right mind” (I Cor. 15:34). Two nouns, each occurring only once in the NT, round out the terminology of righteousness: εὐθύτης, which occurs in Heb. 1:8 (“righteous”), and δικαιοκρισία, which is used in Rom. 2:5 (“righteous judgment”).

In addition to what can be learned from the words which designate the positive aspect of righteousness, much can be learned from a study of those words which describe the negative aspect of this concept: unrighteousness. Such words as ἀδικία, a noun translated “unrighteousness” (I John 1:9), or “injustice” (Rom. 9:14), or “iniquity” (II Tim. 2:19), or “wickedness” (Rom. 1:18); or the adjective ἄδικος, meaning “unrighteous” (Luke 16:11; cf. Matt. 5:45, where it is used in direct contrast to δίκαιος), or “unjust” (Rom. 3:5b)—such words will often throw no little light on the positive meaning of the term “righteousness.” These two words, along with the verb ἀδικέω (“to do harm or injury”; “to act unjustly”; cf. Acts 25:11), the noun ἀδικημα (“an unrighteous or unjust act”; cf. Rev. 18:5), and the adverb ἀδικῶς (“unjustly”; I Pet. 2:19), need to be considered in any examination of the total meaning of the concept “righteousness” in the NT.

2. Righteousness as a relational concept. The great majority of instances (*but see § 6 below*) where the concept “righteousness” occurs in the NT require, to explain the various contexts within which this concept is found, an underlying thought-pattern, which may be formulated in this way: God, who in his grace desires fellowship with men, chose the peo-

ple of Israel with whom to establish a covenant (Exod. 24; Deut. 7:7 ff). God promised to be their God (and therefore save them), and Israel promised to be his people (and therefore obey him). Through human rebellion and sin, this covenant was broken, and, since only the innocent party (in this case, God) can re-establish a broken covenant, man cannot restore the covenant fellowship with God. Though the Jews held that the law embodied the demands which the covenant relationship with God laid upon man, once that covenant relationship is abrogated through sin, the law is powerless to restore man to fellowship with God. Therefore, meeting the demands of the law (“righteousness based on law”), though in men’s eyes righteous because fulfilling the demands of the covenant relationship, cannot be considered righteous by God, since this covenant relationship has been broken by man.

But through Christ, God has now re-established the covenant relationship, thus making it possible for man to have fellowship with God. This restored relationship lays a twofold demand on men: that they admit their failure, through sin, to uphold the covenant with God (repentance), and accept the restored covenant relationship as an act based, not on their merit, but on God’s grace (faith). In addition to accepting this fellowship with God, man must accept, and uphold, fellowship within the community that God’s covenant act calls into being.

Thus, the NT sees righteousness on two levels: accepting the covenant relationship with God (by repentance, faith, and obedience), and with the covenant community (acting unselfishly). In both instances, however, righteousness depends ultimately on God’s act of restoring the covenant with sinful men through Christ; and therefore there can be no true righteousness apart from a relationship of fellowship with God. Only as God forgives sin and re-establishes the relationship by his saving act in Christ, can man stand within that fellowship, and therefore be righteous before God.

a. As relationship to God. That the NT uses the concept “righteousness” to designate a relationship between man and God is shown in a variety of passages. Cornelius, a centurion, is called a “righteous” man, not because he acts in accordance with some moral norm, but because he is a “God-fearing” man—i.e., one whose attitude toward God is the attitude which the relationship to God requires (Acts 10:22; cf. vs. 35). Elymas the magician is an “enemy of all righteousness” because, as a “son of the devil,” he makes “crooked the straight paths of the Lord”—i.e., he destroys the relationship with God by obscuring the requirements of this relationship (Acts 13:10). Simon is in the “bond of unrighteousness” because he proves by his desire to buy the “gift of God” that he is outside a positive relationship to God (Acts 8:20, 23). Jesus calls a judge “unrighteous” (Luke 18:6), not because the judge refused to heed the pleas of the woman (he does resolve to vindicate her), nor because his judgments were perverted. He is called unrighteous apparently because he “neither feared God nor regarded man” (Luke 18:2); i.e., the judge met the demands neither of the relationship to God nor of that to man. Satan’s servants, bent on destroying the relationship between God and man, never-

theless, in order to gain an advantage, pose as "servants of righteousness"—i.e., as those who would uphold the relationship rather than destroy it (II Cor. 11:15). Jesus is called "righteous" because, by his act of sacrifice, he brings men to God (I Pet. 3:18). Those who trust in themselves for their righteousness are told that they are less righteous than a confessed sinner who knows righteousness depends on his relationship to God (Luke 18:9 ff), but those who "hunger and thirst for righteousness" are assured that this longing will be satisfied by God (Matt. 5:6; the passive $\chi\omicron\rho\tau\alpha\sigma\theta\eta\sigma\omicron\nu\tau\alpha\iota$ to be understood as Semitic periphrasis to avoid use of the divine name).

John the Baptist, who preached repentance and a new relationship to God about to come (Matt. 3:2), is acknowledged a "righteous" man even by his executor (Mark 6:20). For Paul, the righteous are those who stand in a positive relationship of trust in God; because of their faith, the Corinthians stand in a positive relationship to God, and are not to be "mismatched" with the unrighteous, who stand outside that relationship (II Cor. 6:14). Only the man who has yielded himself to God and thus accepted the divine-human relationship can yield his "members" as "instruments of righteousness" (Rom. 6:13; cf. vs. 19). Indeed, righteousness is so closely bound up with the relationship to God that once he has pronounced the verdict of "righteous," no one can disagree (Rom. 8:33), and Jesus' righteousness will be proved at the end of his earthly life by the fact that he goes to the Father, thus making evident the relationship between himself and God (John 16:8, 10).

The difficult use of the word "righteousness" in the report of Jesus' baptism (Matt. 3:15) is also best understood in relational terms. John's baptism constituted part of his call to repentance in preparation for the coming kingdom of God. As such, it was a demand that all men, including the Jews, admit by repentance and baptism that a radically new relationship to God was necessary. Thus, by his submission to John's baptism, Jesus also recognizes the necessity of this new covenant relationship, which God will bring about by the establishment of his kingdom. Jesus "fulfills all righteousness" through submitting to John's baptism, because by it he points to man's need for repentance, thus validating John's announcement of a new relationship to God. To recognize the baptism by participating in it is to welcome the new relationship that the baptism announces, and thus to "fulfil all righteousness." God's kingdom, in turn, is also inseparably related to God's "righteousness," because in his kingdom he re-establishes and upholds the covenant relationship which sinful men have broken. For this reason, God's kingdom and his righteousness are closely identified in the message of Jesus (Matt. 6:33; 13:43; cf. Matt. 5:10; Rom. 14:17; I Cor. 6:9), and the consummation of that kingdom is described as the place where "righteousness dwells"—i.e., where the divine-human relationship will be permanent (II Pet. 3:13; cf. Heb. 12:23, where those in heaven are termed "just men made perfect").

b. As relationship between men. The words "righteous" and "unrighteous" are often used to describe the preserving or breaking of a relationship between men. Thus, in Jesus' discussion of the steward who used his position to his own advantage (Luke 16:1 ff),

the antithesis is between a faithful steward and an unrighteous one—i.e., between one who is faithful to his relationship with his master, and one who is not (vs. 10). The steward mentioned here is "unrighteous" (vs. 8; RSV "dishonest") precisely because he has broken the relationship of trust with his master (vs. 2). Similarly, in the parable of the laborers in the vineyard, the owner is not unrighteous, although he pays the same wage for different labor. In paying the one denarius to all, the owner in no way breaks the relationship with the laborers by rejecting the requirements of this relationship: both parties had agreed to one denarius when the relationship was established (Matt. 20:2). Therefore, the action cannot be called "unrighteous" (vs. 13). In describing the type of action necessary for the "righteous" man (Matt. 5:20), Jesus uses several examples of actions which, because they are not motivated by compassion, will break a relationship. To hate a man as surely breaks the relationship of compassion with him as to kill him (vss. 21 ff); to desire a woman lustfully as surely breaks the relationship of compassion as to fulfil the deed (vss. 27 ff); to hate an enemy destroys any possibility of coming into a positive relationship with him (vss. 43 ff). Such actions, because they render the relationship of compassion impossible, are unrighteous.

Again, in order to gain information on the basis of which to try to convict Jesus, the Jews must enter the inner circle around him. To do this, they send spies who pretend to be "righteous"—i.e., who pretend to be in a positive relationship with him—in order to gain the desired information (Luke 20:20; RSV "sincere"). The money paid to Judas is called the "reward of his unrighteousness" (Acts 1:18; RSV "wickedness"), because by his act of betrayal he decisively broke the relationship of trust between himself and Jesus. The author of II Peter tells his readers it is a "righteous thing" for him to arouse them by way of reminder—i.e., this act is consonant with the relationship existing between them (II Pet. 1:13). It is also a "righteous thing" for children to obey their parents, because in this way the relationship between them is upheld (Eph. 6:1).

Paul tells the Philippians that it is a "righteous thing" for him to feel as he does about them, because this feeling strengthens, rather than weakens, the relationship between them (Phil. 1:7). Even Paul's ironic plea to the Corinthians for forgiveness for an "unrighteousness" (II Cor. 12:13; RSV "wrong") is based on the fact that they were "less favored" than the other churches in not being allowed to support him. To the extent that the Corinthians were unable to do this, and thus were not enabled to establish as close a relationship to Paul as the other churches, to that extent Paul was "unrighteous" toward them!

c. As meeting the demands of a relationship. When a covenant relationship is established, both partners of the agreement assume certain responsibilities for upholding it. To meet these responsibilities is to uphold the relationship, and therefore such acts are called "righteous." Thus, Elizabeth and Zechariah are "righteous before God," because they obey fully all the "commandments and ordinances of the Lord," and therefore, by their act of obedience, they fulfil the demands of the covenant relationship (Luke 1:6).

These demands may vary with individual situations. Noah is an "heir of righteousness" because at a time when it seemed ill advised, he built an ark at the command of the God he trusted, thus meeting the demands which his relationship to God laid upon him (Heb. 11:7; cf. II Pet. 2:5). Abraham was "pronounced righteous" (ἐδικαιώθη) when, in trustful obedience to God, he was willing to offer his son Isaac on the altar, thus fulfilling the demand which the covenant relationship to God laid upon him at that point (Jas. 2:21 ff). Hence, the two elements necessary to uphold the covenant are trust in God and obedience to his will. Thus James affirms that a man is called righteous "by works and not by faith alone" (2:24), though both are necessary (vs. 23). Seen in this light, Paul has a similar position. For Paul, sin and righteousness are mutually exclusive, denoting the absence or presence of the covenant relationship (Rom. 6:20). Either one does not trust and obey God, thus failing to meet the demands of the relationship (trust in, and obedience to, God), and thus is sinful (unrighteous), or one does trust and obey God, thus meeting the demands, and then one is righteous (vss. 18-19). Because, for Paul, the demands of the covenant relationship with God are filled by "obedience," he uses this word in a strange manner (see especially vs. 16): to "yield to obedience," or even "obey obedience," means simply to uphold the covenant relationship with God by meeting its demand of obedience to God. To become "enslaved to obedience" thus means to perform all acts within the context of upholding the divine-human relationship. What Paul understands as the demands of this covenant relationship he makes clear in his ethical admonitions: these are the acts required of those who stand within, and mean to uphold, the covenant relationship (within which they stand as a sheer gift of grace, through Christ; see § 3 below). These same demands James calls "works" (2:21 ff); in both cases, the demands of the divine-human covenant relationship are met by trusting obedience to God.

3. God as the sole source (through Christ) of righteousness. Man, through his disobedience, rejected the demands which the covenant relationship with God laid upon him, thus breaking this relationship. Since the covenant relationship is broken by man, God is released from his covenant promise to save man. If God fulfils this promise, the covenant relationship will be upheld *despite* man's act, and man, by participating in it, may still be righteous; if God allows the covenant relationship to remain broken *because* of man's act, no man can be righteous. Thus, whether or not the covenant relationship is upheld depends solely on God's act. Therefore, since God, by his act in Christ, did uphold the relationship by meeting its demand (salvation for man), God is the sole source of righteousness.

No man has fulfilled the demands of that covenant relationship with God, and therefore no man is righteous (Rom. 3:10). The Gentiles (1:18 ff) have not acknowledged God in the way their relationship to him required (vs. 21). The Jews have also rejected the demands which the covenant relationship laid upon them (2:17 ff). Thus, all men have broken their relationship to God, are sinners (3:9), and are devoid of righteousness (vss. 10-18). Nor will the plea that

they have kept the demands of the law enable the Jews to claim righteousness—i.e., that they still uphold the covenant relationship with God. That law cannot be the basis of anyone's claim to righteousness, because of its close relationship to sin (vs. 20). To keep the law would be to meet the demands of the covenant relationship, and thus those acts would be righteous, were it not for the fact that the relationship to God has been broken by man's disobedience. Therefore, although to do the works of the law is to fulfil the demands of a relationship, they are not righteous in God's eyes, because the covenant whose demands the law represents has been broken. Only in those who participate in the restored relationship can the righteousness of the law be fulfilled (τὸ δικαίωμα τοῦ νόμου; Rom. 8:4); and only God, as the "innocent party," can decide whether or not to uphold his relationship with man, and thus restore man's relationship to him. Therefore God alone decides the fate of the covenant relationship, and therefore God alone is the source of righteousness. It is God who "pronounces righteous"; there is no other (8:33).

It is acknowledgment of this fact that underlies the activity of John the Baptist. The people who accepted John's baptism of repentance have, by this act, pronounced God righteous; i.e., they admit by sharing in John's baptism of repentance that God alone is the source of their relationship with him, and therefore that God alone is the source of righteousness (Luke 7:29). The Pharisees and the lawyers, on the other hand, rejected this baptism, and thus they rejected God's purpose for themselves (vs. 30)—i.e., that they too admit that righteousness alone is from God. By this rejection these men do not, by clear implication, "pronounce God righteous" by admitting that their relationship to God depends on God alone. They want their own righteousness, and thus deny themselves all righteousness (cf. Luke 16:15).

Thus, it is the witness of the NT that God has elected to uphold the covenant relationship with sinful man. God has decided to be merciful toward man's unrighteousness; he has decided not to "remember their sins" (Heb. 8:12; cf. Jer. 31:34). Despite man's perfidy and unrighteousness, God upholds the covenant relationship, thereby proving his righteousness. This righteousness has characterized God's dealings with Israel. Despite Israel's continued perfidy and unrighteousness by breaking the covenant agreement, God nevertheless remained faithful to the requirements of that covenant. In this faithfulness, God's righteousness is demonstrated (Rom. 3:2-3; in this context, "faithfulness" in vs. 3 and "righteousness" [RSV "justice"] in vs. 5 point to the same thing: God upholds the covenant relationship).

This same righteousness comes most clearly to light in Christ. In him, the twofold aspect of God's righteousness is shown, especially in Christ's sacrifice on the cross. On the one hand, God, by this sacrifice, enables man to be saved, thus upholding the covenant relationship with man by fulfilling his promise made within that relationship: the salvation of man. In thus fulfilling the demand and upholding the relationship, God proves himself righteous (Rom. 3:26a). On the other hand, because Christ's sacrifice

on the cross is a supreme act of obedience to God's will, Christ thereby fulfils the demand of the covenant relationship upon man: obedience to God. Thus, the relationship is restored for man; and man, by participating in this relationship, can be righteous (vs. 26b). But, because man's righteousness depends on God's act in Christ, God is still the source of righteousness (cf. John 17:25, where the context indicates that God is called "righteous" because he has sent Christ as an evidence of his love for man, thus restoring, by this act, the broken relationship). But more, Christ has now become both the proof of God's righteousness, and the hope of man's righteousness (vss. 25-26). Therefore, for the NT, righteousness is centered in Christ.

It is Christ's act of obedience, in his death on the cross, that nullifies the disobedience of man whereby man broke the covenant relationship with God. This act of obedience restores the relationship of man with God by fulfilling the demand that the relationship had laid upon man: obedience to God. Therefore, by Christ's act of obedience the covenant relationship is restored, and man, by participating in it, may be righteous (Rom. 5:19). Because this is man's only chance for righteousness (participation in the covenant relationship with God), there can no longer be any question of "righteousness through the law" (9:31; cf. 10:3). If the relationship between God and man could be upheld by man's ability to preserve the relationship by meeting its demands (the law), then Christ need not have died in obedience to God, thus fulfilling for man the demand of the relationship, and thus upholding the relationship. But such was not the case; righteousness is possible for man only through the death of Christ, by whom the relationship is restored and upheld (Gal. 2:21; cf. I Pet. 2:24). Christ alone upholds the relationship; his "act of righteousness" in restoring the covenant relationship leads to a "living righteousness" through participation in this relationship for all men (Rom. 5:18; RSV "acquittal and life"). Thus, because of Christ, a man, despite his sin in failing to obey God and thus meet the demands of the relationship, can nevertheless share in the relationship, and thus be righteous (cf. 8:10).

Because this is so central, the NT witness never tires of formulating and reformulating statements in which Christ is designated the source of man's righteousness (especially in Paul), or in which Christ is identified with righteousness or is specifically called "the Righteous."

Because Christ alone has met the demand for obedience which the covenant relationship laid upon man, Paul can say that God made him "our righteousness" (I Cor. 1:30), or can affirm that we are now pronounced righteous "by his blood" (Rom. 5:9a), referring to the act of obedience on the cross. A man's righteousness comes "in the name of the Lord Jesus Christ" (I Cor. 6:11); and this righteousness, because it depends, not on what man did, but on what Christ did for him, can only be regarded as a gracious gift (Rom. 3:24; cf. Tit. 3:5). Because Christ's act of obedience fulfilled the demands of the relationship for all men, Christ the righteous one died for man the unrighteous, thereby bringing men to God by restoring the divine-human relationship for

man (I Pet. 3:18). Christ's sacrificial act of obedience means that the sin of rebellion is placed upon Christ and overcome by him, thus making it possible for man to become, through Christ, the "righteousness of God" (II Cor. 5:21). The results of the relationship with God (the "fruits of righteousness") are inseparably linked to Christ, by whose act the relationship is restored (Phil. 1:11). It is through Christ that men receive the "free gift of righteousness"—i.e., their participation in the restored covenant relationship is based on Christ's act and thus is a free gift, not on their merit and thus a reward (Rom. 5:17).

All of this means that Christ is the proof that God has decided to preserve the relationship, thus restoring for man the chance of participating in it. It is in this act of Christ, whereby God makes known this decision, therefore, that a man becomes righteous—i.e., he enters again into a positive relationship with God. But since this relationship to God is the sole criterion for man's righteousness, a man is righteous only when he enters again into this relationship. Thus, when the NT says that God "reckons a man righteous" or "pronounces him righteous" (the RSV regularly translates this verb, δικαιόω, as "justify"), it means simply that God, through the act of Christ's obedience, has upheld, and thus, for man, restored, the relationship. Therefore, the problem of whether a man is really righteous, or only treated by God "as if" he were righteous, rests on a misunderstanding of the nature of righteousness. Righteousness is a matter of man's relationship to God, not an ethical state. When man is in a positive relationship to God, through God's act in Christ, that man is truly "righteous," because he is, by God's act, reintroduced into a positive relationship to God. God does not treat man "as if" man were righteous; God, through Christ, restores the covenant relationship, and therefore the man who, by God's gracious decision, participates in this relationship is in fact "righteous" (cf. Rom. 8:33).

Because Christ's act of obedience fulfils the covenant demand and therefore is, par excellence, the righteous act, the NT frequently identifies Christ with righteousness by applying the title "Righteous" to him. Peter accuses the Jews of having rejected the "Holy and Righteous One" (Acts 3:14). Stephen, in his defense, accuses the Jews of having killed the prophets who announced the coming of "the Righteous One" (7:52). Ananias tells Paul that it was God's will for Paul to be converted by seeing the "Righteous One" (22:14; RSV "Just One"). The author of I John bases his exhortations on the apparently accepted fact that Christ is righteous, and that therefore man's righteousness is linked to Christ's (I John 2:29; cf. 2:1; 3:7).

4. Reliance on God (through faith in Christ) for righteousness. Since, therefore, God, through Christ, is the sole source of righteousness, man must rely on him (by faith) for his own righteousness. This necessity of reliance on God carries with it the necessity of admitting that man is incapable of his own righteousness—i.e., is incapable of restoring or upholding the covenant relationship. To admit this, however, is to allow God to show his righteousness by forgiving sins and restoring righteousness—i.e., relationship to himself—to men (I John 1:9). Because John the Baptist

leveled the same demand, he came in the "way of righteousness"; i.e., both John's personal austerity and his message of repentance displayed his complete reliance on God to fulfil the demands of the divine-human relationship. All a man could offer to such a relationship was repentance—i.e., admission of failure to meet the demands of the relationship (Matt. 21:32). Because the Pharisees refused repentance, thereby refusing to admit their failure in regard to the covenant relationship, they are looked upon as the chief examples of unrighteousness. They are the ones who "justify themselves"; but this act is an "abomination in the sight of God" (Luke 16:15; cf. 18:9). By this act, they refuse to rely on God for their righteousness. For this reason, the poor sinner who could only plead for mercy (Luke 18:13), thus relying on God to uphold the relationship, did participate in that relationship, whereas the Pharisee, boasting before God of his own righteousness (vss. 11-12), was denied this participation. He was not "pronounced righteous" by God (vs. 14). Although outwardly the Pharisees, with their legal minutiae, gave the impression of fulfilling the demands of the relationship, in reality these acts effectively blocked their sharing in it (Matt. 23:28). Unless, therefore, a man's righteousness is greater than that of the Pharisees, he will never see the consummation of the covenant relationship: the kingdom of heaven (Matt. 5:20). Man's only hope of participating in the relationship which God alone upholds is to admit this fact; to rely on his own "righteousness"—i.e., his own ability to uphold the relationship with God—is to deny himself participation in this relationship. Thus, Simeon is righteous because, in looking for the "consolation of Israel" which God alone can provide, he acknowledges that God alone can fulfil the demands of the broken covenant relationship. For his expectant waiting, rather than relying on his own works (and for recognizing God's true righteousness! cf. Luke 2:27 ff), Simeon is "righteous" (vs. 25).

That man must rely on God to uphold the covenant relationship, and thus must rely on God for his righteousness, is the particular emphasis of Paul. Such reliance on God, Paul called FAITH. This alone was the basis for any righteousness, any participation in the covenant relationship. Only on the basis of faith does God pronounce a man righteous by accepting him into a positive relationship to himself (Rom. 5:1); and since the "fulness of time" (Gal. 4:4; cf. Rom. 5:6, where *κατὰ καιρὸν* apparently has this sense), only on the basis of faith in Jesus Christ (Rom. 3:26).

To emphasize the meaning of faith, upon which righteousness depends, Paul contrasts the righteousness of faith with that of the law. Paul was convinced that the demands of the law could be met—i.e., that there was a "righteousness under the law"; he had, in fact, achieved it (Phil. 3:6b). But it was of no avail; this "righteousness" did nothing toward restoring, and thus upholding, the relationship with God. There was a "righteousness" of the law, but it could not aid a living relationship with God (Rom. 9:31). Discovering this after his conversion, Paul renounced such a "righteousness" of "his own"—i.e., based on his own efforts to uphold the covenant relationship by works of the law (Phil. 3:9). True righteousness is not from

the law; it is from reliance on God alone—i.e., through faith that God in Christ has restored and upholds the covenant relationship (Gal. 2:16). Therefore, the Jews who do not rely on God's righteousness, but who seek, by works of the law, to establish their own righteousness—i.e., seek to uphold the covenant relationship by fulfilling its demands—have no righteousness at all (Rom. 10:3). Whether for Jew or for Gentile, righteousness must come from God alone, and in reliance on God alone (Rom. 3:30); true righteousness is based solely on faith, not on works of the law (vs. 28).

But God gave the law to the Jews. If it was not meant to lead to righteousness—i.e., to show man how to uphold the divine-human relationship by meeting its demands—how is the law to be understood? What is the relationship of law to righteousness by faith? To understand this, one must understand Paul's conception of the history of the covenant relationship between God and man.

For Paul, God's original covenant with man laid upon man the demand of obedience. This covenant was broken by the first man, Adam, through his act of disobedience (Rom. 5:19; cf. Gen. 3:3 ff). Therefore, even the law points, not to an original covenant, but to a restored covenant, restored on the basis of, and thus dependent on, God's grace, not man's works. Thus, no man can be righteous—i.e., preserve the covenant relationship—by works of the law, since even the law was introduced into a situation where the relationship was upheld only by God's righteousness—namely, his faithfulness to his covenant promise. Thus, even possessing the law, man can remain in covenant relationship to God, and thus be righteous, only by admitting that participation in this relationship depends on God's grace, not man's acts. But this, thinks Paul, was misunderstood by the Jews, who thought that by keeping the law, they thus fulfilled the demands of the covenant relationship, and that thus they could have their own righteousness (could remain in the covenant relationship on the strength of their fulfilment of its demands) without being dependent on God for their participation in the relationship. In short, they relied, not on God (faith), but on themselves (works) to meet the demands of, and thus uphold, the covenant relationship. Because of this misunderstanding, the Jews pursued the righteousness of the law as though it depended on works, not on faith (Rom. 9:32). But the necessity of relying on God alone to uphold the relationship, to which the law pointed, was then most clearly displayed in Christ's self-sacrificing act of obedience. Thus Christ becomes the end and consummation (*τέλος*) of the law, because he makes unavoidably clear that reliance on God alone makes man righteous—i.e., allows him to participate in the covenant relationship (Rom. 10:4).

Therefore, says Paul, from the beginning, only faith "is reckoned as" righteousness (as upholding the covenant relationship), and he shows what this means in a discussion of Abraham, the father of the Jews (Rom. 4). God promised that he would do what Abraham could not: give Abraham an heir (vss. 18-19; cf. Gen. 15:1 ff). Abraham believed this promise; he trusted that God would do what he said (Rom. 4:20-21). This act of trust on Abraham's part ac-

cepted the conditions of that covenant relationship (cf. Gen. 15:18): it depended totally on God's act to initiate and uphold it (Rom. 4:18). Therefore, this act of trust in God, because it accepted the relationship with God by relying on him and not on man to uphold it, is a righteous act (vs. 22). Because the law and circumcision came *after* this act of trusting acceptance of the covenant relationship (Rom. 4:11; Gal. 3:17), they cannot be the basis of Abraham's relationship to God (Rom. 4:13).

Therefore, this act of trust is the means whereby Abraham accepted the relationship with God in the only way it can be accepted: relying on God alone to uphold it; and thus this act is "reckoned as righteous." Abraham accepted God's promise because he trusted God, and thus he entered into the covenant relationship which God offered him. Therefore, this trust (faith) is reckoned as righteousness—i.e., as accepting the covenant relationship with God.

This was not, however, limited to Abraham. It is true of all men (Rom. 4:23-24). To trust that God will uphold the covenant relationship with man, though man has broken it; to rely on God (in Christ) to do this, not on oneself (by works), is to accept the relationship, and thus be righteous (Phil. 3:7-9). Therefore, this act of acceptance (faith), whereby man admits that God has done what man could not—restored the covenant relationship in Christ—this act is a righteous act, because only by such an admission can a man accept the covenant relationship with God. So long as man refuses to trust that God (in Christ) has restored the covenant relationship, and tries to uphold it himself by meeting its demands (works of the law), which he cannot do, so long man remains outside a positive relationship to God (Gal. 5:4). To trust that God in Christ has restored the covenant relationship is the only way man can live in this relationship, and thus be righteous (Rom. 1:17; cf. Gal. 3:11; Heb. 10:38). Therefore, faith is not another work—it is the admission that works are of no avail in preserving the covenant relationship between God and man. The admission that a man can contribute nothing is the only thing a man can contribute to the relationship with God, and therefore this admission alone (faith) is a righteous act.

Therefore, for Paul, to be "counted righteous by faith" means to accept the fact that one is righteous (i.e., participates in the covenant relationship with God), not by one's own act, but by God's act in Christ, whereby God upheld, by grace, this relationship. Thus, the terms "righteous by faith" (Rom. 5:1), "righteous by grace" (Rom. 3:24), and "righteous by Christ's blood" (Rom. 5:9; RSV "justified" in each of these instances) all mean the same for Paul: the covenant relationship with God exists because, through Christ's act of sacrificial obedience, God alone upholds it. Therefore, because "righteousness," like "salvation," is a gift of God's grace in Christ, the two are often closely linked (Rom. 3:24; 10:10; I Cor. 1:30; cf. Matt. 13:49; 25:46; Tit. 3:7; for the negative aspect, cf. II Thess. 2:10, 12). Indeed, to participate in the covenant relationship (righteousness) is to participate in God's fulfillment of this covenant (salvation, or eternal life); the two cannot be separated. Man must rely for both on God alone.

5. Righteousness and personal benefit. The covenant relationship between God and man, which God by his act in Christ restored and upholds, places a demand, as do all relationships, on man. This demand is faith (*see* § 4 *above*): the acknowledgment that man can contribute nothing to the establishment or upholding of this covenant relationship, and trust that God, despite this, can and will allow the relationship to remain intact. But the restored (new) relationship also includes the creation of a new community among men. Therefore, those who share in the new divine-human relationship also share in the new community, and thus, the covenant relationship places a demand on man over against his fellow man. The nature of this demand is determined by the nature of the covenant. Because the act whereby man can participate again in the covenant relationship is the obedient self-sacrifice of Christ, who thus acted, not for his own benefit, but for the benefit of sinful man, those who participate in the covenant relationship are also expected to act for the benefit, not of themselves, but of others. Thus, men are expected to glorify God and boast in him, not in themselves (Rom. 4:2; I Cor. 1:30-31; Gal. 6:14), and they are to serve, not themselves, but their fellow men (Matt. 22:36 ff). Thus, the demand which the new covenant relationship lays upon man in relation to God is faith; and in relation to man, the demand is that one's action be to the benefit of others, not oneself. To act for the benefit of others is thus to uphold the relationship by meeting its demand, and therefore it is righteous; by the same token, to act for one's own benefit, to the neglect of others, is unrighteous.

Thus, Jesus is righteous because he acted for the benefit of others. He does not seek his own will, but the will of God, and therefore his "judgment" is righteous: it also serves God's will, not his own (John 5:30). There is no unrighteousness in Jesus, because he seeks, not his own glory, but the glory of the One who sent him (7:18). This activity of Jesus on behalf of others did not end with his obedient self-sacrifice on the cross; it continues to the present time. He is still an "advocate with the Father" (παράκλητος . . . πρὸς τὸν πατέρα) for sinful men, and therefore is termed the "righteous one" (I John 2:1). Thus, the relation of man and man is determined by the relation of God and man; God's acts are acts of mercy, independent of the worth of the recipient (cf. Matt. 5:45-48); so must man's be.

Thus, the "righteous" are those who have met the demands toward their fellow men which are laid on them by their participation in the covenant relationship. They have fed the hungry, given drink to the thirsty, and performed other acts of mercy (Matt. 25:34 ff). And because the nature of the relationship between men is determined by the nature of the relationship between God and man, fulfillment of the demands of the former is also fulfillment of the demands of the latter (Matt. 25:37 ff, especially vs. 40). Again, those who have invited the poor and the lame to the feast will be deemed righteous in the Last Judgment, because their actions have been solely for the benefit of the recipients. Those guests cannot "repay" the righteous (Luke 14:14). Paul assures the Corinthians that he has done nothing unrighteous (οὐδένᾳ ἡδικήσαμεν), because he has not taken advantage of

them—i.e., used them for his own gain (II Cor. 7:2). In the same sense, those who go to great lengths to avoid acting for personal benefit to the detriment of the relationship with their fellow men are considered by the NT as especially righteous. Men who act in this way are said to “suffer for righteousness’ sake” (I Pet. 3:14). Such men will suffer discomfort and even death rather than, by resisting, act to their own benefit and thus break the relationship (Matt. 5:10-11; I Cor. 6:7; cf. Jas. 5:6, where the righteous man avoids resistance even to death). In this sense Jesus’ admonition to avoid resistance must be understood: it concerns refusal to act for personal benefit, whatever the cost, but it is not a demand to avoid all forceful action, where this action would benefit another or bring glory to God (Matt. 5:38 ff; cf. 21:12 ff; John 2:15).

On the other hand, those who do act for personal benefit are called “unrighteous” in the NT. They do not meet the demands toward their fellow man which the covenant relationship places upon them. Thus, Jesus warns men not to perform their acts of righteousness (*δικαιοσύνη*; RSV “piety”) for the purpose of being admired by men (Matt. 6:1). Such acts do not uphold the relationship. For the same reason, Jesus was unrelenting in his condemnation of the Pharisees: they performed the outward semblance of righteousness, but they acted from selfish motives. Therefore, the charge of hypocrisy is leveled against them (Matt. 23:13, 25, 28, etc.); they do what they do, not for the benefit of their fellow men, but for their own benefit (“to be seen by men”; vs. 5 ff). As God acted in love, thus fulfilling the relationship with man, and upholding it, so man must act in love toward his fellow man, thus fulfilling the demands toward his fellow man which the covenant relationship lays on him (I John 3:10).

A lack of unity within a group is also termed “unrighteousness” when it is based on a factious spirit that seeks to uphold its own view to the disregard of others (Rom. 2:8; cf. Jas. 3:16 ff). For this reason, Paul is so deeply concerned about the manifestations of disunity in Corinth (I Cor. 1:10 ff). If the demand of the covenant relationship—seeking the good of others—is upheld, unity is the result. Thus Christian unity and righteousness go hand in hand.

6. Other uses of the concept of righteousness. Although the great majority of cases where the terminology of righteousness is employed in the NT are best understood in a relational sense, these words are also used in other contexts, where this meaning is less apparent, if it exists at all.

a. As a forensic term. Although it can be argued that part, at least, of the terminology of “righteousness” is forensic in origin (see JUSTIFICATION), the instances where this is clearly the case are somewhat limited in the NT. In this sense, that is “just” which corresponds to the facts (cf. Luke 12:57; Acts 4:19). If an accusation distorts the facts, it is unjust; the man falsely accused, on the other hand, is just because the facts favor him and refute the accusation. Thus, the centurion beneath the cross exclaims that Jesus must surely have been “just” (Luke 23:47; RSV “innocent”; cf. Matt. 27:4, where the witness of some MSS to ἀθῶνον, “innocent,” and others to δίκαιον, “just,” indicates an early overlapping in their

meanings) because various natural phenomena, as well as his manner of death, suggest that the allegations against him were untrue (Luke 23:44 ff). In the same sense, Pilate’s wife warns her husband to have nothing to do with “that righteous man”; the context of the trial makes it clear that she regards the accusations against him to be untrue (Matt. 27:19). Jesus refutes the charge that he is a “glutton and a drunkard” with the statement that “wisdom is justified by her deeds,” indicating that the facts will vindicate him of such charges (Matt. 11:19). The lawyer who asks Jesus about the central element of the law seeks to “justify himself” by asking who his neighbor is. He wants to clear himself of Jesus’ implied accusation that he has not kept the command to “love his neighbor” (Luke 10:29). Jesus tells his listeners to decide for themselves what is right (Luke 12:57); the preceding context indicates that he is speaking of a correct interpretation of the facts (Luke 12:54 ff; cf. John 7:24, where a “just” judgment is contrasted with one based only on appearances).

The forensic nature of part of the vocabulary of “righteousness” is also indicated when it is employed to describe legal proceedings. This is especially true in Acts, where this vocabulary is consistently employed in describing Paul’s experiences with Roman judicial proceedings. Gallio says that Paul is not charged with any serious injustice (*ἀδίκημα*; Acts 18:14), and Paul himself affirms the same thing before Felix (Acts 24:20; cf. 24:25; 25:10-11). The same general use of the terms is evident when the NT describes the Last Judgment; in this context, the legal simile of judgment extends to the use of forensic terminology in describing God’s (or Jesus’) action on that last day (Acts 17:31; II Tim. 4:8; etc.).

b. As retributive justice. There are also some instances in the NT where the words under study seem to mean “justice” in the retributive sense. Thus, God is called just (*δίκαιος*) in his judgments because he has “given blood to drink” to those who shed the blood of saints and prophets. God is just because he gave them “their due” (Rev. 16:5-6; vs. 7 is probably also to be understood in this sense). Again, because God has avenged the murder of his servants by judging and thus destroying Babylon, his judgments are just: they give Babylon due measure for what she gave (Rev. 19:2; cf. 15:4; 19:11). God considers it “just” to repay with suffering those who cause Christians to suffer (II Thess. 1:6)—again clearly a retributive statement. Christians are assured that God is not so unjust that he will not reward the acts of love which Christians show in serving their fellow saints (Heb. 6:10). In these and a few other instances, the element of retribution is clearly included in the vocabulary of “righteousness.”

Yet it must be noted that this use does not contradict the use in a relational sense. The retributive punishment of God is against those who harm the covenant people (cf. II Thess. 1:6; Rev. 16:5 ff; 19:2), whereas the just rewards are given to those who act on behalf of their fellow men, thus upholding their relationship (Heb. 6:10). Therefore, though not on the surface, the relational understanding of “righteousness” seems to underlie the retributive sense.

7. Righteousness and conformity to a norm. If, as has been stated, righteousness is to be understood

basically as a relational term, then it is also true that it cannot mean basically "conformity to a (moral) norm." This is not to say that morality and righteousness are unrelated in the NT, but it is to say that righteousness is fundamentally more concerned with the covenant relationship with God, and more particularly with man's broken and restored relationship to God, than it is with man's moral shortcomings and ethical ideals. Aside from the fact that righteousness as meaning conformity to a moral norm would mean that God too conforms to this norm, since God is called "righteous" (an idea incompatible with the NT view of God's sovereignty), such an understanding makes it difficult to explain how the term "righteousness" can so often be applied to God's saving act on behalf of those who are supremely unrighteous and thus morally delinquent (Rom. 5:8, among others). That believing God is "reckoned as righteousness" (Gal. 3:6), particularly when illustrated by Abraham, indicates that action in conformity to some ethical norm is not what is counted as righteous. In this case, righteousness clearly denotes a trusting relationship to God (Gal. 3:8; Heb. 10:38). If righteousness is a moral state, then to reckon those as righteous who are not morally pure is either to be blind to the facts or simply to disregard them. To say that God reckons men as righteous now on the basis of what they will one day (perhaps) become is not justified by the NT; there is no evidence for such a proleptic justification.

The clear statement of Paul that no man is counted righteous before God on the basis of works should be enough to eliminate moral conformity from consideration (Gal. 3:11, etc.). The affirmation that none is righteous (Rom. 3:10 ff) means that none has remained within the covenant relationship with God (Rom. 1:18-3:9), not that no moral action has ever been performed. The fact that Paul can use the blanket term "unrighteous" to describe those outside the Christian fellowship at Corinth (I Cor. 6:1) means it can hardly refer to a moral state; Paul himself acknowledges that the moral state of some within the fellowship is lower than that of most outside it (I Cor. 5:1-2). Jesus' condemnation of those who thought righteousness consisted only in conformity to a norm (the Pharisees), and his association with those whose morals were of the lowest type in his world (harlots, tax collectors, "sinners"), indicates that Jesus was not interested primarily in moral purity but in a relationship of repentance and trust in God (cf. Luke 18:9 ff). And Jesus himself is called "righteous," not because his acts conform to a moral norm (quite the contrary; cf. Luke 7:34), but because by his obedient, sacrificial death, he brings men into a new relationship to God (Luke 19:10; I Pet. 3:18), and thus Jesus, not man's moral acts, is man's "righteousness" (I Cor. 1:30).

RIMMON rīm'ən [רִמּוֹן, pomegranate(?), or the thunderer(?); cf. Akkad. *ramanu*, to roar]. 1. A Beerothite; the father of Baanah and Rechab, the men who killed Ish-bosheth (II Sam. 4:2, 5, 9).

E. R. DALGLISH

2. The deity whom Naaman the Syrian and the king of Syria worshiped in his temple, probably at Damascus (II Kings 5:18). The god was known to the Assyrians as Ramanu, a title of Hadad, the god of storm, rain, and thunder, called in Syria "Baal"—i.e., the lord par excellence. The identity of Rimmon with Hadad and his significance in the religion of the Syrians of Damascus is confirmed by the fact that "Hadad" occurs as an element in the theophoric name Ben-hadad, borne by several kings of Syria, and Tabrimmon, the father of Ben-hadad the contemporary of Asa of Judah (I Kings 15:18).

On the particular features of this god and his cult, see **BAAL (DEITY)**; **HADADRIMMON**.

Bibliography. M. Jastrow, *The Religion of Babylonia and Assyria* (1898), pp. 156-61; A. S. Kapelrud, *Baal in the Ras Shamra Texts* (1952), pp. 31-37. For further bibliography, see **BAAL (DEITY)**. J. GRAY

3. A town in S Judah whose full name is Ain Rimmon (EN-RIMMON; Josh. 15:32, where "Ain" and "Rimmon" are separated by "and" but almost certainly belong together). First assigned to Simeon (Josh. 19:7; I Chr. 4:32), it became a part of Judah's Negeb district of Beer-sheba (Josh. 15:32). Returnees from the Exile settled at En-rimmon (Neh. 11:29). In the final chapter of Zechariah, the whole Judean hill country as far S as Rimmon is envisioned as becoming a plain, with Jerusalem towering above it (Zech. 14:10).

Eusebius speaks of Erimmon (En-rimmon) as a very large Jewish village ca. sixteen (Roman) miles S of Eleutheropolis, in the middle of the Darome (i.e., the S part of Judea). En-rimmon in S Judah is usually identified with Khirbet er-Ramamin, nine miles N-NE of Beer-sheba.

4. A town in central Zebulun (Josh. 19:13) on the S edge of the Plain of Asochis (Sahl el-Battof), identified with modern Rummaneh, a village six miles N-NE of Nazareth. "Remmon-Methoar" (Josh. 19:13 KJV) is a nonexistent place. "Methoar" is properly corrected to read "it bends toward" in the RSV.

It became a Levitical city (I Chr. 6:77, where Rimmono = Rimmon; cf. LXX Remmon). "Dimnah" (Josh. 21:35), otherwise unknown, almost certainly should be read "Rimmon," with initial *r* (ʾ) misread as *d* (ד). The OL text, which depends heavily on the B text, reads "Remmon" here, a good support for the proposed corrected reading.

During the period of the Crusades the town was known as Romeneh.

5. The rock of Rimmon, near Gibeah; the place to which the remnant of the Benjaminites fled to escape from the victorious Israelites who had determined to punish Gibeah and Benjamin for the

atrocities perpetrated by the men of Gibeah against a Levite and his concubine (Judg. 20:45-47). Later, an embassy from the congregation of Israel invited the six hundred escaped Benjaminites to return from their hiding place and provided them with wives from Jabesh-gilead and Shiloh (Judg. 21:13 ff). The place was probably the limestone outcropping ca. four miles E of Bethel on which the modern village of Rammun now stands. Ravines protect it from approach from the N, S, and W; in it are many caves in which the Benjaminites could have taken refuge.

If the suggested reading of Isa. 10:27 is correct in the RSV, Rimmon was one of the places on the route to Jerusalem taken by the Assyrian conqueror.

RIMMONO רִמּוֹנוֹ *rīmō'nō*. Alternate form of RIMMON 4 in I Chr. 6:77—H 6:62 (cf. Josh. 19:13; 21:35).

RIMMON-PEREZ רִמּוֹן־פֶּרֶז *rīmōn-pîr'îz* [רִמּוֹן, pomegranate of the pass (breach)—*i.e.*, the pomegranate pass(?)] (Num. 33:19-20); KJV RIMMON-PAREZ—*pâr'îz*. One of the stopping places of the Israelites between Rithmah and Libnah.

RING. The translation of the following words:

a טבעת (alternately "signet ring"). A term applied to a number of different kinds of rings. There was a finger ring which was a sign of authority—*i.e.*, signet ring (Gen. 41:42; Esth. 3:10, 12; 8:2, 8, 10). Taken in war as booty, it was then presented as an offering to the Lord (Num. 31:50). In Isa. 3:21 it is an article of luxury. See SIGNET.

This term applies also to rings for staves and curtains of the tabernacle (Exod. 26:29; 27:4, 7) and the ark (Exod. 25:12, 14-15, etc.), for breastpiece and ephod (Exod. 28:23-24, etc.), for the incense altar (Exod. 30:4; 37:27), and for the altar of burnt offering (Exod. 38:5, 7).

b גליל ("cylinder"). A ring for holding drapery cords (Esth. 1:6). The KJV translates this word "gold ring" (RSV "rounded gold") in Song of S. 5:14, where it refers figuratively to arms.

c נזם. A nose ring, earring, or ring in general. See NOSE RING; EARRING 1.

d חותם. A seal ring. See DRESS AND ORNAMENTS § A6.

e Δακτύλιος (Luke 15:22). A symbol of dignity.

f Σφραγίς. A seal ring. See DRESS AND ORNAMENTS § A6.

g Χρυσσοδακτύλιος (Jas. 2:2). A gold ring signifying wealth and position.

The KJV translates גַּב "ring" in Ezek. 1:18 (RSV "rim" [of a wheel]).

J. M. MYERS

RINNAH רִנְיָהּ *rīn'āh*, ringing cry] (I Chr. 4:20). A son of Shimon; one of the members of the S tribe of Judah.

RIPHATH רִיפַתְהָ *rīfāth* [רִיפַתְהָ]. Son of Gomer and grandson of Japheth (Gen. 10:3). Riphath is non-Semitic and probably Anatolian, together with his brothers,

Ashkenaz and Togarmah, as well as their father, Gomer. In I Chr. 1:6 "Diphath" (דִּיפַתְהָ) occurs instead of "Riphath," but about thirty Hebrew MSS, the LXX, and the Vulg. read "Riphath" also there, supporting "Riphath" as the correct form.

C. H. GORDON

RISSAH רִיסָהּ *rīs'āh* [רִיסָהּ, dew drop(?), rain(?), or ruin(?)] (Num. 33:21-22). A stopping place of the Israelites in the wilderness between Libnah and Kehelathah. The location is unknown.

RITHMAH רִיתְמָהּ *rīth'māh* [רִיתְמָהּ, broom plant] (Num. 33:18-19). The stopping place of the Israelites in the wilderness after Hazeroth. The location is unknown.

RITUAL. See WORSHIP IN THE OT; WORSHIP IN NT TIMES, JEWISH; WORSHIP IN NT TIMES, CHRISTIAN.

RIVER. The translation of several terms in the Bible. See also BROOK; FLOOD; VALLEY.

The four terms usually translated "river" are: (*a*) נהר (Gen. 2:10; Num. 24:6), used more than 120 times, frequently for the Euphrates (Gen. 15:18; Deut. 1:7); (*b*) נחל (Lev. 11:9; Deut. 2:37; the RSV frequently translates "valley" where the context requires it—*e.g.*, Gen. 26:19; Deut. 2:36); (*c*) יַאֲרֹךְ, frequently designating the Nile (Gen. 41:1; Exod. 1:22), but also the Nile tributaries or canals (Exod. 7:19; II Kings 19:24), and in one passage, the Tigris (Dan. 12:5-7); (*d*) ποταμός, used in the LXX for the preceding terms, and also in the NT (Mark 1:5 [the Jordan]; John 7:38; Rev. 8:10).

Other words translated less frequently "river" are: יַבֵּל (Jer. 17:8 KJV [RSV "stream"]); אַפְיקִים (Ezek. 6:3 KJV [RSV "ravines"]; Joel 1:20 KJV [RSV "brooks"]); פְּלִגִּים (Job 29:6 KJV; Ps. 1:3 KJV; RSV "streams"). As indicated above, the most descriptive English word in translating is sometimes difficult to select. In Ps. 93:3; Hab. 3:8, where the feminine and masculine plural of נהר occur (KJV-RSV "floods," "rivers"), the symbolism is that of the primordial waters, paralleling the primordial sea.

Biblical rivers mentioned by name, in addition to those above, are: ABANAH; AHAVA; CHEBAR; GHON; GOZAN; HIDDEKEL; JABBOK; KISHON; PHARPAR; PISHON; RIVER OF EGYPT; ULAI.

Rivers are frequently referred to in indicating geographical boundaries (Josh. 1:4; Judg. 4:13; I Kings 4:21). They were used in irrigation (see AGRICULTURE); bathing (Exod. 2:5); as means of transportation (Isa. 18:2); in defense (Nah. 3:8); for drinking (Exod. 7:18); fishing (Lev. 11:9), and healing (II Kings 5:10); as places of theophany (Gen. 32:22-23), baptism (Matt. 3:6), and prayer (Acts 16:13).

Rivers are mentioned in a figurative sense to suggest the prosperity of a region (Num. 24:6; Ps. 65:9; Isa. 66:12) over which God's power extends; the drying up of the rivers was a symbol of tragedy (Job 14:11; Isa. 19:5). Righteousness is compared to a perennial stream (נחל איתם; Amos 5:24), and God's blessing to a "river of the water of life" (Rev. 22:1). Of special note are the pictures of a river which

flowed from Eden (Gen. 2:10 ff) and the river or rivers to flow from the temple in the new age (Ezek. 47:1-12; Zech. 14:8; Rev. 22:1-2; cf. John 7:38; Rev. 12:15).

W. L. REED

RIVER OF EGYPT. See EGYPT, BROOK OF; EGYPT, RIVER OF.

RIVER OF THE WILDERNESS. KJV translation of "brook of the Arabah." See ARABAH, BROOK OF.

RIZIA רִיזִיָּא [רִיזִיָּא] (I Chr. 7:39); KJV REZIA. A chief in the tribe of Asher, and a mighty warrior.

RIZPAH רִיזְפָּה [רִיזְפָּה], glowing coal, heated stone, bread baked in ashes]. Daughter of Aiah, and a concubine of Saul. After the death of Saul, Abner took Rizpah as his wife (II Sam. 3:7). This act amounted to a claim to the throne (cf. I Kings 2:22); and Ishbaal, Saul's son, and now king in name only, challenged Abner's loyalty. Abner then made good his claim to the actual leadership of the kingdom by beginning his negotiation to make David king in Israel (II Sam. 3:7-21). Later, when a famine was regarded as due to Saul's guilt in slaying Gibeonites, David made expiation by handing over seven of the sons of Saul, two sons of Rizpah and five of Merab, to be hanged (21:1-9). Then Rizpah began a heroic vigil by the bodies, keeping off the birds and beasts of prey, from the beginning of the barley harvest until the rain finally came. Then at last the burial could be made, and "after that God heeded supplications for the land" (21:10-14).

D. HARVEY

ROAD. A frequent translation of דֶּרֶךְ (Gen. 38:14, 16; Num. 22:23, 34; Deut. 2:8, 27; etc.; alternately WAY, as commonly in the KJV wherever "road" in the ordinary sense is intended), and an occasional translation of נתיבות (Isa. 59:8; Jer. 6:16; 18:15), מַסְלָה (I Chr. 26:16, 18), and ὁδός (Matt. 21:8; Mark 10:32; 11:8; Luke 9:57; 10:4, 31; 19:36; 24:32, 35; Acts 8:26, 36; 9:17, 27).

Roads and trade routes figured prominently in the geography and history of Palestine, which served as the land bridge among the empires of the ancient Near East. Many of the trade routes were strategically important in commerce and military activities, and as sacred ways for pilgrims traveling to religious shrines. Understandably, such great religious centers as Jerusalem and Damascus also became commercial centers.

The importance of roads and travel is evident in biblical history. The roads which crossed Palestine led to many countries. Caravansaries along these routes realized tremendous profits from charges for services and from tolls. Fortresses located at crucial points along these routes allowed for control both of military and of commercial movements.

The major route from Palestine to Egypt lay along the coast. The exiles to Babylon in 586 probably went around the Fertile Crescent and down the Euphrates to Babylon, though there were caravan routes eastward across the Syrian Desert from Damascus, Amman, etc. According to Neh. 7:66-69, a group of returning exiles brought horses, mules,

camels, and asses with them; food and water for such a caravan could have been provided far more easily along the Fertile Crescent than across the Syrian Desert.

The most famous road system in biblical lands was the Great West Road, or the Road to the Sea; this system had many branches. One joined Damascus and Dothan, crossing the Jordan between Merom and Galilee. Another branch went W from Safed to Acre through the valley between Upper and Lower Galilee. A branch also went through Capernaum and down the Plain of Gennesaret, joining the W branch at Ramah. A much-traveled section went from Capernaum through the Plain of Esdraelon, probably S of Mount Tabor, to Megiddo and down the coastal plain to Egypt. A shorter branch connected Capernaum with the Plain of Esdraelon by way of Tiberias and Beth-shan. The route to Acco connected with a caravan route which ran from the region of Mount Carmel to Antioch. Main roads also joined Galilee and the Plain of Esdraelon with Jerusalem, Hebron, and Beer-sheba. There was a road in very ancient times from Jericho up to a point N of Jerusalem (Ai) and on down to the region of Joppa.

A major N-S route joined Asia Minor with the spice routes from Arabia; this route ran S from Damascus and down the plateau on the E side of the Jordan. It has served as a pilgrimage road to Mecca into modern times. Branches off this road led into Palestine at several points (see, e.g., Gen. 37:25; see also KING'S HIGHWAY).* A major road ran westward from Petra to Gaza and would seem to have joined routes from Arabia, thus allowing goods from Arabia and the E to be carried up the coastal plain from Gaza. Many of the great cities in the Syrian and Jordanian deserts (e.g., Palmyra in the eleventh century B.C.; and the Nabatean cities, including Petra, in the second century A.D.) were essentially caravan cities and military outposts. Fig. KIN 7.

Hittites, Babylonians, Assyrians, and Persians, all built roads for commercial and military purposes in the Near East. The Romans built numerous roads in the area in efforts to consolidate and maintain the political and military interests of their empire and to

12. Roman road from Amman to Yajuz and then to Jerash, showing fallen milestones beside the road

From *Atlas of the Bible* (Thomas Nelson & Sons Limited)

13. Roman road between Aleppo and Antioch on the Orontes

strengthen the Pax Romana generally. Many of their roads, which were built and maintained at great expense, are still visible, especially in Jordan. Figs. ROA 12-13.

Jesus of Nazareth seems to have shown a preference for byways. His native town was near several major caravan routes and Roman roads. Nazareth was connected by road with the Mediterranean, Megiddo, Jerusalem, and the Sea of Galilee. At nearby Sepphoris a great road led to the Phoenician coastal towns; eastward a road ran across the Valley of Jezreel, S of Beth-shan, and across the Jordan. A road system joined the populous towns around the W side of the Sea of Galilee. After going down the E side of the Jordan, Jesus probably took the ancient road from Jericho through Wadi Qelt (the Jericho road) to Jerusalem. Paul frequently traveled the great highways of Palestine, Asia Minor, and parts of Europe. He entered Rome on the Appian Way, which may still be traveled between Brindisi and Rome.

See also TRADE AND COMMERCE; TRAVEL AND COMMUNICATION.

H. F. BECK

ROADS AND TRAVEL. See TRAVEL AND COMMUNICATION.

ROBBER, ROBBERY. See CRIMES AND PUNISHMENTS § C7c.

ROBE. The translation of the following words:

a) כִּיְרֵי (alternately "coat"; "garment"). A coat without sleeves. See DRESS AND ORNAMENTS § A2.

b) כְּתָנֶה (alternately "coat"). A long shirtlike tunic, a symbol of official status (II Sam. 15:32; Isa. 22:21), and worn by priests (Exod. 28:4; 29:5, 8; etc.). On כְּתָנֶה פְּסִים ("long robe with sleeves"; KJV "coat of many colors"), see CLOTH § 6.

c) אֲדָרְתָּהּ (alternately MANTLE 1). A cape or loose coat; a robe of state (Jonah 3:6; cf. Mic. 2:8).

d) כִּגָּר. Any kind of garment. This term is used of the robe of kings in I Kings 22:10, 30; II Chr. 18:9, 29.

e) פְּתִיגִי (a loan word; "rich robe"; KJV "stomacher"). Apparently a garment of fine material (Isa. 3:24).

f) Χλαμύς. A short mantle or cloak, generally a military cape. This term is used to designate the scarlet robe placed on Jesus by Roman soldiers (Matt. 27:28, 31).

g) Στολή. A garment, especially a long, flowing robe or dress (Mark 12:38; 16:5; Rev. 22:14). This term is used for the robe of the prodigal son (Luke 15:22) and of scribes (Luke 20:46) and for the white garments of martyrs (Rev. 6:11) and the redeemed (7:9, 13-14).

h) Ἴεσθής (Acts 1:10; 12:21; "apparel" in Luke 23:11). Clothes, raiment.

i) ἱμάτιον. An outer garb worn over the χιτών (Matt. 26:65; I Pet. 3:3; Rev. 19:13, 16). This term is used to designate the purple robe of Jesus (John 19:2, 5). See DRESS AND ORNAMENTS § A1.

j) Ποδήρης (Rev. 1:13). A garment extending to the feet.

J. M. MYERS

ROBOAM. KJV NT form of REHOBOAM.

ROCK. See PALESTINE, GEOLOGY OF.

ROCK BADGER [רֶשֶׁשׁ; see bibliography]; KJV CONEY. Alternately: BADGER (Ps. 104:18; Prov. 30:26). Any of a family of small ungulate mammals, the hyraxes, of which ca. fourteen species are known. The only variety found outside Africa is the Syrian hyrax (*procapra syriaca*). Except for its inconspicuous ears, the appearance of the hyrax is like that of the rabbit, which it also resembles in size. Unlike the rabbit, it does not burrow but lives in rocky regions. To use the term "badger" for this animal is without any justification; Bodenheimer prefers the term "coney." See FAUNA § A2d.

The propensity of this animal for rocks is alluded to in Ps. 104:18; Prov. 30:26. In Lev. 11:5; Deut. 14:7 it is placed among the unclean animals, though the statement that it is a ruminant is unfounded. Tristram observes (*NHB* 76) that the "constant motion of the little creature's jaws" may have suggested that it was chewing its cud.

Bibliography. For רֶשֶׁשׁ as a personal name in a Sinai inscription, see *BASOR*, no. 110 (1948), p. 21.

W. S. McCULLOUGH

ROD [רֹד, מַטֵּה, מַקֵּל, שֶׁבֶט, ῥάβδος]. Alternately: STAFF; POLE. A stick cut from the stem or branch of a tree and used for numerous purposes. Straight staffs, thicker at one end than at the other and of varying lengths, were the protection and support of shepherds and travelers on foot. They might also serve as poles for carrying burdens, as shafts for arrows or spears, and as instruments for inflicting punishment. A shorter staff with a knobbed end, often studded with nails or bits of flint, served the soldier and the shepherd as a weapon. Artificial rods, resembling the natural sticks, could be described by the same words—e.g., "rod of iron" (Ps. 2:9; Rev.

19:15). Two of the words (שבט, מטה) may also mean "TRIBE."

The translation "rod" (more frequent in the KJV than in the RSV) is preferred for each of these words in certain contexts. Thus, while מטה may mean the stem of a growing plant (Ezek. 19:11-14), a soldier's weapon (I Sam. 14:27, 43; "staff"), or a king's SCEPTER (Ps. 110:2), it is translated "rod" chiefly when it refers to the wonder-working rods of Moses and Aaron, which began as simple shepherds' staffs, but were endowed by Yahweh with supernatural powers and figured prominently in the miracles in Egypt and in the wilderness (Exod. 4; 7-8; Num. 17).

Similarly, שבט may refer to the stick used for threshing cummin (Isa. 28:27); to the staff of authority, especially the king's scepter (Ps. 125:3); to the staff with which the shepherd marshals and counts his sheep (Lev. 27:32; Mic. 7:14); or to the club with which he defends his flock (Ps. 23:4); but, when translated "rod," it usually means a scourge, the instrument of punishment, either human or divine (e.g., a "rod for the back of fools" [Prov. 26:3]; Assyria as the rod of the Lord's anger [Isa. 10:5; the parallel term מטה is here rendered "staff"]).

חט is also a scourge (Prov. 14:3), and מקל refers principally to the peeled sticks cut from a variety of trees, by means of which Jacob influenced the breeding of Laban's flocks and herds (Gen. 30:37-41). This word appears in Jeremiah's vision in the "rod of almond" (Jer. 1:11); it is frequently translated "staff."

In the NT ῥάβδος reflects OT usage, referring to an instrument of punishment (I Cor. 4:21), to a measuring stick (Rev. 11:1), or to Aaron's rod (Heb. 9:4).

L. E. TOOMBS

RODANIM rō'dā nīm [רודנים] (I Chr. 1:7). Rhodians. See RHODES.

Though Gen. 10:4 has "Dodanim" (דדנים; so, too, some Hebrew MSS in I Chr. 1:7), the LXX again has Ῥόδιοι, "Rhodians." The *d* (ד) and the *r* (ר) are similar in the Hebrew script, and since Dodanim/Rodanim are included among the Greeks (especially the islanders), "Rhodians" fits in quite well. On the other hand, "Dodanim," being the *lectio difficilior* (i.e., the more problematic reading), deserves careful consideration precisely because it is obscure; for no scribe would change the clear "Rhodians" into the obscure "Dodanim," though the opposite could easily happen, and perhaps did.

C. H. GORDON

ROE, ROEBUCK יחמור (Deut. 14:5; I Kings 4:23—H 5:3; KJV FALLOW DEER); KJV צבי (Deut. 12:15, etc.), צביה (Song of S. 4:5, etc.), RSV GAZELLE; יעלה (Prov. 5:19), RSV DOE]. The roe DEER (*Capreolus capreolus*), a very graceful animal. It is one of the smallest members of the deer family, the adult male standing ca. twenty-six inches in shoulder height. Its antlers rise almost vertically from the head, becoming forked only near their summit. Bodenheimer (see FAUNA § A2iv) claims that there is no word for this kind of deer in the OT.

W. S. McCULLOUGH

ROGELIM rō'gə līm [רגלים, (place of) fullers]. A city in E Gilead; the home of Barzillai, who befriended David when he arrived in Mahanaim in

flight from Absalom (II Sam. 17:27-29; 19:31—H 19:32). It was apparently located on the Jabbok, in the hills E of Mahanaim. Abel suggested a possible site in Tell Barsina, from the similarity of the name to Barzillai, but Glueck (see bibliography) found no evidence of a settlement there before the Roman period, and suggested instead the nearby Zaharet Seq'ah, a strong IA fortress dominating the neighborhood.

Bibliography. N. Glueck, *AASOR*, XXV-XXVIII (1951), 176-77. S. COHEN

ROHGAH rō'gə [רוהגה] (I Chr. 7:34). A member of the tribe of Asher; the first-born son of Shemer.

ROIMUS. KJV Apoc. form of REHUM.

ROLL [מגלה; KJV ספריא (Ezra 6:1; RSV ARCHIVES; see also BOOK); KJV גליון (Isa. 8:1; RSV TABLET); κεφαλις (Heb. 10:7; KJV "volume")]. A leather or papyrus scroll. See WRITING AND WRITING MATERIALS § C.

ROMANTI-EZER rō mām'ti ē'zər [רומנתי עזר] (I Chr. 25:4, 31). One of the musicians, sons of Heman, appointed by David to serve in the sanctuary. But the names in vs. 4 appear to form a liturgical prayer and may not refer to real persons.

See also GIDDALTI.

B. T. DAHLBERG

ROMAN EMPIRE rō'mən. The complex of political, military, social, and cultural forces which controlled the Mediterranean world and Western Europe from ca. 30 B.C. to the fifth century A.D. Christianity arose within the Empire and developed primarily within its confines, being recognized as the religion of the state in the fourth century.

 12. Christian views of the Empire
- Bibliography

1. **Expansion; acquisition of provinces.** The Roman Empire came into existence through a long process of development in which the little city-state of Rome (traditionally founded by Romulus and Remus in 753 B.C.) extended its power at first under kings, some of whom were Etruscan, and after 508 under a republican form of government headed by two magistrates elected annually. For two centuries, however, Rome was rent by class struggles which accompanied, and were lessened by, a series of treaties and wars with the nearby Latin League. By 275 Rome had gained control of all Italy and was ready to enter the struggle for world power with the

divided successors of Alexander the Great. In 264, when the Carthaginians from North Africa, rivals of Rome in the contest for Mediterranean trade, occupied part of Sicily, Rome attacked them, and with the aid of a newly constructed navy finally drove them out in 241. Between 237 and 219 the Carthaginians occupied Spain, and in 218 their General Hannibal crossed the Alps to invade N Italy, whence he moved S, severely defeated the Roman armies, and was able to remain until 203. By that time the Romans had worn out his army, had driven the Carthaginians out of Spain, and had landed an army in Africa. In 201 Carthage became a dependent ally of Rome. Fifty years later, attacked by the king of Numidia but not supported by the Romans, Carthage took up arms against him, only to be attacked in turn by Roman forces, which finally took the city and destroyed it (146).

Meanwhile, Rome had been intervening in Eastern affairs, aiding Pergamum against Macedonia (an ally of Carthage for a time) and finally making Greece a Roman dependency; Macedonia was annexed as a province in 148, and Corinth was destroyed two years later. Similarly the Romans intervened in Asia Minor, though after smashing the army of Antiochus III in 189 they withdrew their troops. In 133, however, Rome was forced to exercise permanent authority in Asia; the king of Pergamum bequeathed his kingdom to the Roman people. Still farther E, a Roman legate prevented an expedition against Egypt, threatened by Antiochus IV, but neither Syria nor Egypt was regarded as subject to Roman rule.

Because of the contacts with Greece made in these ventures, Greek teachers came to Rome and there strongly influenced important circles of the nobility, though many Romans still preferred old-fashioned ways. It was impossible, however, to retain the primitive (and partly imaginary) simplicity of the past, in view of Rome's growing responsibilities in world affairs. Moreover, internal conflicts began to occupy attention. In the last century of the Republic, from 135 to 30, the class struggle became acute. Two slave wars in Sicily (135-132 and 103-101), as well as that later led by Spartacus in Italy (73-71), were symptomatic, but there were also sharp conflicts between the Senate and the other classes. A popular dictatorship under Marius (107-100) was followed by a conservative reaction under Sulla (88-79), combined with further foreign military ventures. After Sulla's death the Republic was rent by conflicts between various generals and the Senate, and by incessant intrigues on the part of all. The orator and consul (63) Cicero hoped for the creation of a moderate central party, but the Senate could not bring itself to co-operate with him. The state came to be controlled by three politically minded generals, the first "triumvirate" of Pompey, CAESAR, and Crassus, a millionaire real-estate speculator. After Crassus' death, Caesar ultimately broke with Pompey, and, after a civil war, achieved supreme power, only to be murdered in 44. Another struggle for power followed; it was won by AUGUSTUS, the real founder of the Roman Empire. For details of the reigns of his successors, see TIBERIUS CAESAR; CA-

LIGULA; CLAUDIUS; NERO; VESPASIAN; TITUS; DOMITIAN. See also EMPEROR; EMPEROR-WORSHIP.

The expansion of Roman power from Italy throughout the Mediterranean world was thus a gradual, and partly an involuntary or at least unpremeditated, process. Sicily, Sardinia, and Corsica were annexed in 241 and 238, at the end of the first Carthaginian war, and Spain in 197, after the second. During and after the third Carthaginian war, Macedonia (148), Africa—including Carthage (146)—and Achaëa (146) were taken over. Thirteen years later Pergamum was received by the king's will. The next half-century saw the occupation of Transalpine and Cisalpine Gaul, as well as Cilicia in E Asia Minor; and between 74 and 58 the Romans acquired Cyrene and Bithynia by the wills of the local kings, as well as Crete (68), Syria (63), Cyprus (58), and the rest of Gaul by direct military action.

After Augustus' rise to power, his defeat of Antonius and Cleopatra made Egypt a Roman province (31), and before his death the provinces of Illyricum (27), Galatia (25), Raetia, Noricum (after 16 B.C.), Judea (A.D. 6), and Pannonia (9) were added to the Empire. Under Tiberius, Cappadocia became a province (17); under Claudius, Mauretania (42), Britain (43), Moesia (44), and Thrace (46). All these areas had previously been either occupied by Roman troops or governed by pro-Roman rulers. In later times only a few provinces were acquired, and, especially in the East, they were held only temporarily.

At its height the Empire thus included the whole Mediterranean world and extended from Britain S to Morocco, thence E to Arabia, N to Turkey and Rumania, and W along the Danube to the Rhine. Britain was defended by a fortified wall, and in Germany and to the E there were rough forts and legionary camps. During the first century of the Christian era there were between twenty-five and twenty-eight legions constantly under arms. At full strength each legion was composed of six thousand officers and men, in addition to an equal number of native auxiliary troops.

2. Population and social structure. The population of the Empire has been given widely varying estimates; the figure generally accepted is approximately 54,000,000, of which about 1,000,000 lived in the city of Rome. In the year 47 *ca.* 6,000,000 persons, including women and children, were carried on the census rolls of Romans in Italy. In the total population there may have been as many as 5,000,000 Jews. With these figures may be contrasted the 6,000 Pharisees mentioned by Josephus and the 5,000 Christians found in Acts 4:4.

The social structure of the Empire resembled a pyramid. At the top were the 600 members of the SENATE and their families. Below them were the knights or equestrians, 1,800 in the late Republic but increased in number by Augustus. While senators had to possess the equivalent of 1,000,000 sesterces, knights needed to have only 400,000. The vast majority of Roman citizens belonged to neither order and were sometimes called plebeians. In addition there were many freedmen, ex-slaves who usually did not become citizens. Finally there were

the slaves, who perhaps constituted a third of the population.

Related to this structure was that of the state, beginning with the EMPEROR and proceeding downward through his council to the heads of government departments (*see* PROCURATOR), the administrators of Rome and the provinces (prefects and proconsuls [*see* PROCONSUL]), and other officials. In the imperial period it was customary for a member of the two upper classes to pass through a regular sequence of offices (*cursus honorum*) in order to have a career in government service.

3. Agriculture, industry, trade, and communications. The most important crops of the Empire were wheat (especially in Egypt, which supplied the city of Rome), grapes, olives (for oil), and vegetables. Papyrus also came from Egypt. Mining, both open-cut and underground, was carried on for gold, silver, lead, tin, copper, and iron. Most of the mines belonged to the state and were worked by slaves. Marble was quarried chiefly in Greece, though some use was also made of the Italian stone. Manufacturing in pottery, textiles, leather, metals, and glass was the work chiefly of slaves and freedmen, sometimes associated in syndicates which provided capital and banking facilities for the various branches of the business. Agricultural and manufactured goods were transported either overland on the excellent Roman road system (stone and concrete) or through the Mediterranean and other seas by ship. Highwaymen continued to present difficulties, but at sea the pirates had been exterminated, and Roman patrol vessels safeguarded both the Mediterranean and the W coast of Europe. In the early Empire 120 vessels a year sailed to India, exporting linen, coral, glass, and metals, and importing perfumes, spices, gems, ivory, pearls, and Chinese silk. The government had a courier service for official mail, though other mail had to be sent by private messengers.

4. Money and banking. One of the most important factors in the unity of the Roman Empire was the uniform system of imperial coinage. Under the Republic both foreign and domestic conflicts were almost invariably followed by a sharp reduction in the value of currency. Under the Empire, however, for nearly two centuries the basic silver coin, the denarius, retained most of its value and circulated at par with the various local drachmas of the East. During this period there was only a gradual decline in the weight (20 per cent) and silver content (40 per cent) of the denarius, though the way was prepared for the critical devaluation and price inflation of the third century, once more by the cost of wars.

The Roman currency was a medium not only of exchange but also of propaganda. In 44 B.C. the Senate ordered the first portrait of a living ruler placed on the coins; this new precedent was followed by Caesar's assassins, by his successors in the Triumvirate, and by the later emperors. Religious, military, and political symbols were placed on the reverse sides of various issues; they informed the Roman people of the emperor's health, his long reign, the births of his children, his choice of an heir, his various military campaigns, and the posthumous deification of himself and members of his

family. The occasional repetition of symbols called attention to important anniversaries. In other words, Roman coins had a function resembling one of the functions of modern postage stamps.

Commerce and investment were facilitated by private banks and moneylenders, and a system of clearances made currency shipments unnecessary. In 51 B.C. the Senate set the maximum interest rate at 12 per cent, though loans in kind and on crops and cargoes were exempted because of the risks involved. Endowments and large estates generally earned a return between 5 and 6 per cent.

5. Taxes and government finance. Roman taxes included customs duties levied at various transit points, as well as such levies as 1 per cent on sales and 5 per cent on emancipations of slaves and inheritances of Roman citizens. Other sources of revenue included bequests, fines, booty acquired in war, and the proceeds from the state-owned mines and the imperial estates. A direct tax called *tributum* was levied outside Italy on land and personal property; the rate is not known. Rights to collect provincial taxes, including tithes on agricultural produce, were usually sold to *publicani* (hence "publicans"), who formed companies which had shareholders at Rome and elsewhere. These companies were supervised by procurators, but abuses were fairly common. Under the Republic most taxes were paid into a treasury controlled by the Senate, but under the Empire this treasury, though continuing to function, became much less important than the *fiscus*, theoretically the private property of the emperor and his heirs.

In Augustus' day the annual income of the treasury was apparently around 400,000,000 sesterces (100,000,000 denarii), but by the time of Vespasian imperial revenues may well have approached 2,500,000,000. He is said to have stated that after the civil wars 40,000,000,000 sesterces were needed to make the Empire solvent; perhaps he had a capital sum in mind. In any event, taxes were almost constantly increased.

State policy was not guided by economic considerations. E.g., in A.D. 33 Tiberius suddenly enforced an old law requiring capitalists to invest in Italian land. The not unnatural result was a financial panic, which the emperor mitigated by advancing 100,000,000 sesterces to private banks for real-estate loans.

6. Social conditions. It is even more difficult to generalize about family life in the Roman Empire than it is to generalize about it today. From antiquity we have few usable statistics, and much of our information about Rome, if it can be called information, comes from satirists, who necessarily described extreme cases. It is fairly plain, however, that the political chaos of the first century B.C. and the influx of a great deal of new money to Rome were reflected in the family life, not only of the wealthy, but also of other classes. The size of families sharply diminished, and emancipated Roman women often scandalized moralists. Under Augustus legislation was enacted to make divorce more difficult, to discourage adultery, and to encourage larger families, especially in the upper classes. This legislation was confirmed and strengthened by nearly all Augustus' successors,

though this very fact suggests that legislation was not a panacea. In the early Empire neither abortion nor the abandonment of infants was forbidden. A law of the late Republic, enforced by Domitian, provided a fine of 10,000 sesterces for male homosexual acts.

In spite of legislation, and the complaints of moralists like Musonius Rufus and Seneca, the allusions in Martial's epigrams and the wall scribblings at Pompeii reflect a way of life against which both Jews and Christians vigorously protested. Paul's letters written to CORINTH show how in his opinion Christians had to keep separate from the world.

It should not be forgotten, however, that there were innumerable families in which such erosion had not taken place. We do not often hear of them (any more than in modern newspapers), but their existence is occasionally indicated by papyrus letters, funerary inscriptions, and such writers as the younger Pliny and Plutarch. Juvenal's picture of Roman matrons in his sixth satire owes a good deal to his own misogyny.

The influx of wealth at Rome also resulted in a remarkable increase in legacy-hunting, and played its part in the rise of professional informers during the first century. Parasites surrounded the unmarried rich, and were often rewarded by legacies. Augustus endeavored to check this practice by forbidding bequests to unmarried adults and by reducing the amount which could be left to childless married persons. Some of the later emperors forbade bequests to themselves, though such bequests were regarded as a form of insurance for the residue of the estate. And because of the vagueness of the laws against treason it was possible for informers to attack the rich and receive bounties. Many emperors tried to prevent this abuse, and false witnesses were often severely punished.

7. Roman law. The Empire was governed not only by men but also by law. In the last century of the Republic, Roman law had become highly developed, and the emperors, as chief magistrates of the state, rendered decisions which themselves had the force of law. Jurists were members of the imperial council, and their decisions too were binding.

The law was concerned not only with protecting the state, the citizen, and private property, but also with social conditions related to all three (*see* § 6 above). In imperial times greater stress came to be laid upon equity than upon the observance of exact legal forms. And long before the triumph of Christianity there was an improvement in the legal status of women and of slaves, partly under the influence of the Stoics. Slaves could possess property, even though in theory it belonged to their masters, and they could use it to buy their freedom. They were also protected by law against mistreatment.

It should not, however, be supposed that the Romans shared the modern notion of punishment as aimed at the correction of the offender. The penalties for private offenses were chiefly intended to redress the wrong done; penalties for public offenses were essentially vindictive, and are exemplified in Roman condemnations of Christians to be crucified, beheaded, burned alive, drowned, and delivered to wild animals.

8. Astrology, magic, religion, and philosophy.

In the Roman world of the first century both astrology and magic played a significant role, and astrologers, while occasionally expelled from Italy, exercised strong influence over most of the emperors. Arising in the Orient, astrology was closely related to astronomical theory and to philosophical doctrines of fate, especially among Stoics. Magic was forbidden by Roman law when it resulted in damage to persons or their property, but its abiding popularity is attested by the NT and the church fathers, as well as by classical writers and the extant magical papyri. *See* SIMON MAGUS.

Magic was often associated with the foreign cults and prophecies which flourished in the Empire as in the late Republic. These cults, often called "mystery religions," came chiefly from the Orient and in general were modifications of ancient local or national religions. While the traditional civic cults of Greece and Italy continued to exist and were supported by local governments, to some extent they were overshadowed by the new expressions of the ancient Eastern religions, and a fair number of Romans, especially of the middle class, were initiated into their rites. The oriental gods could provide "salvation" or escape from fate, and sometimes from death. The most important of them were the Egyptian Isis, the Great Mother from Asia Minor, and the Persian Mithras, though it should not be forgotten that the Greek mysteries of Demeter at Eleusis continued to be very prominent; several Roman emperors were initiated there, and the Eleusinian mysteries seem to have influenced the forms assumed by their oriental competitors.

The worship of Isis, occasionally repressed at Rome under the late Republic and even in the early Empire, gradually spread throughout the Roman world. Her public rites, together with testimonies to her miraculous powers, made her cultus attractive. Similarly the Great Mother was publicly advertised. Both Isis and the Mother had begging priests who went everywhere. Mithraism, on the other hand, was private and had no special priestly class in the Roman Empire. It was often spread by soldiers, and its worship took place in Mithraeums, which were usually underground. It does not seem to have been an important rival to Christianity until the end of the second century.

As far as we can tell from early Christian literature, Christians found stronger competition among philosophers than among oriental priests. One reason for this is obvious: Christianity felt itself to be closer to philosophy than to other religions, with the partial exception of Judaism. The writings of the second-century apologists reflect the Christian effort to come to terms with philosophy, especially religious-minded Middle Platonism. The process must have begun much earlier, however. The story of Paul at Athens (Acts 17) looks programmatic, even if we cannot be sure that his speech was correctly reported (*see* ACTS OF THE APOSTLES). In the Greco-Roman world there were not only teachers who instructed classes in their own (or their teachers') philosophical doctrines, but also street preachers, especially Cynics and Stoics, who deliv-

ered "diatribes" on moral and even on theological topics. The form of address they used is sometimes reflected in the Pauline letters and in James.

Philosophers generally advocated monotheism, and the tendency in this direction was also reflected in the innumerable popular or scholarly identifications of one god or goddess with others. Isis, e.g., was known as the "countless-named," because she was such a central point for equations, while Jews and Christians were conspicuous because of their denial that their God was known by nonbiblical names. It should be added that as far as we know, the adherents of nonbiblical religions never had any difficulties in coming to terms with EMPEROR-WORSHIP; they might advocate monotheism, but it was not an exclusive monotheism.

Philosophers felt free to reinterpret the old Roman official religion and to distinguish "philosophical theology" from "civil theology." Civil theology consisted of their analysis of the twelve gods officially recognized by the state and served by a college of sixteen pontiffs, chief of whom was the Pontifex Maximus, after 12 B.C. the emperor himself. This body presided over the official rites regularly performed at Rome. There were other colleges, such as that of the augurs, who discovered whether the gods approved or opposed official actions. The arrangements at Rome were imitated in the provinces and in the colonies. But as has been noted, Rome tolerated other religions, at least as long as they were not regarded as threatening either the established religion or traditional morality.

9. Scientific knowledge and research. The state of natural science in the early Empire was marked by some optimism about the future of discovery (expressed, e.g., by Philo, Seneca, and Pliny the Elder), along with a great deal of traditionalism in most areas of investigation. Little fresh investigation was carried on, and in medicine the influence of philosophical systems overshadowed and often prevented clinical observation. Surgical instruments, however, continued to be improved, and the gynecology of Soranus includes a good deal of common sense. The study of various peoples (ethnology) continued, though often under the influence of a romantic primitivism, and the study of geography was advanced by the successes of the Roman legions. Geographical theory, however, was simply borrowed from earlier Greek writers, and after Hipparchus (ca. 120 B.C.) astronomy was largely a matter of systematization and of correlation with astrology. The gulf between theory and technology may be illustrated by Roman failure to employ the equivalent of the machine gun, invented by Greeks but not used by the legions. It is, of course, a question whether this failure was a fortunate or an unfortunate one.

Pliny (Nat. Hist. II.118) claims that science is not advancing because of contemporary materialism, but this claim explains little. It might better be said that science was held in check by idealistic philosophies and inadequate technical work, and by a failure to maintain mathematics in a fruitful relation to the data of experience. The existence of slavery made unnecessary a quest for labor-saving devices.

10. Literature. The beginning of the Empire was heralded by a group of semiofficial poets and historians who were in part supported by the circle around AUGUSTUS. The most important of these poets was Vergil, whose *Aeneid* traced the history of Rome back to the Trojan War and laid emphasis on the "manifest destiny" of the Empire. Other poets included Horace and Ovid. The historian Livy traced Roman history from its beginnings to 9 B.C. and tried to create an interpretation which would be useful for administrators. Related to the group was the adviser and historian of Herod the Great, Nicholas of Damascus, whose universal history was used by Josephus. An admirer of the new empire, Strabo, wrote a geography in this period; around the same time PHILO JUDEUS tried to construct a Jewish-Greek philosophical system.

From the middle of the first century we have the tutor of Nero and would-be philosopher and dramatist, Seneca; the moral philosopher Musonius Rufus; and the antiquarian and encyclopedist Pliny the Elder, who suffocated when he remained too close to the erupting Vesuvius.

From the end of the first century and the beginning of the second come the histories and apologetic works of JOSEPHUS; the Histories and Annals of Tacitus; and the Lives of the Twelve Caesars by Suetonius. The *Institutes of Oratory* of the famous rhetorician Quintilian was published ca. 95. Among the poets should be mentioned Martial, whose twelve books of epigrams appeared at intervals between 86 and 101; and Juvenal, whose satires were published early in the second century. Both writers are important for our understanding of Roman social life; both undoubtedly exaggerate its weaknesses (see § 6 above). Greek moralists and philosophers include Dio Chrysostom, Plutarch, and Epictetus.

In addition to these major writers there were also the less important writers of romances, forerunners of the second-century apocryphal Acts. See ACTS, APOCRYPHAL.

Apart from this writing, more or less creative, there was also the development and use of anthologies in schoolteaching; from the early imperial period come anthologies of poetry and collections of philosophical opinions (doxographical writings) arranged according to subjects. Such anthologies and collections were used by Jewish and Christian apologists. Literary criticism also flourished, chiefly as a part of rhetorical education. The student would learn to analyze grammar, composition, and style; he would also be trained to judge the authenticity of documents and of narratives regarded as historical. Such judgments are later reflected in early Christian and anti-Christian criticism of the Bible.

11. Rome and Christianity. The Roman attitude toward the early church cannot be viewed in isolation from the Roman attitude toward other foreign religions. Pliny, Tacitus, and Suetonius regard Christianity as "superstition"; by this they mean that it is a novel foreign religion brought to Rome by unenlightened members of the lower classes. Just as the Jews believed that idolatry led to adultery, so Romans believed that foreign superstitions led inevitably to sexual promiscuity or cannibalism, or to

both. The belief is reflected in Livy's account of the suppression of the Bacchanalia in 186 B.C. (*From the Founding of the City* XXXIX-XL), an account which was written, not for purely historical reasons, but to serve as a statement of the Augustan attitude (cf. Dio Cassius LII.36); and something like it seems to have been in Pliny's mind as he described the activities of Christians (Epistle X.96). Similarly the Druids of Gaul were regarded as inhumanly barbarous, since human sacrifice was said to be a part of their rites; and both Augustus and Claudius took action against them. The religion of Isis was foreign, and under Tiberius a flagrant instance of immorality resulted in prosecution (from the Roman viewpoint) or persecution (from that of Isiacs). But since this case was exceptional, Rome did not carry on continuous warfare against the cult.

In Roman eyes Christianity was a superstition since it was obviously foreign; it had arisen in Judea. It was a superstition because it involved the worship of a criminal condemned by a Roman governor, and its adherents were (therefore?) suspected of immorality. Its missionary zeal, its eschatological emphasis, and its unwillingness to relate itself either to Judaism (a religion tolerated in the Empire) or to the state cults meant that it could only be regarded as at least potentially subversive.

The earliest report about Christianity to come to Roman attention must have been that sent by Pontius Pilate to the emperor, but it was never made public, and so-called Acts of Pilate are forgeries. At a later date, under CLAUDIUS, there were Jewish riots at Rome in which the name Chrestus was involved. The picture in the book of Acts, according to which Roman officials either protected or ignored Christians, seems to be correct; in Palestine it was only when the Roman procurator was absent that James the Lord's brother was put to death (62). Yet there was considerable antipathy toward Christians, or toward some Christians, and after the fire at Rome under NERO, Christians were put to death. It remains a question whether any legislation specifically anti-Christian was introduced. Under DOMITIAN, Christians seem to have been investigated in relation to problems arising out of Judaism. In the letter of Pliny to Trajan (Epistle X.96) it looks as if suspicions of clandestine immorality, including cannibalism, were reflected.

12. Christian views of the Empire. Within the NT itself different views of the Empire are expressed. Jesus' opponents claimed that he was obstructing tax payments (Luke 23:2), but when he was asked for a judgment on the payment of tribute to "Caesar," he replied that what belongs to Caesar should be paid him (Mark 12:17 and parallels). According to the Fourth Gospel, he told Pilate that Roman jurisdiction was given "from above" (John 19:11). Writing early in Nero's reign, Paul told Roman Christians that they owed obedience, loyalty, and tax payments to the state (Rom. 13:1-7; cf. Iren. Her. V.24). Similar views are expressed in Tit. 3:1 (cf. I Tim. 2:2); I Pet. 2:13-17.

On the other hand, just as in Judaism (where Philo and Josephus were pro-imperial and apocalyptic writers were not), there were also apocalyptic writings which, under the threat of persecution by

self-deifying emperors, did not hesitate to proclaim the imminent destruction of the Empire by God (II Thess. 2:7; see REVELATION). The apologist Justin did not hesitate to threaten the Antonine emperors (mid-second century) with perpetual punishment; his pupil Tatian denounced the Empire as wicked.

To a considerable extent these writers shared in a widespread attitude of hostility toward the Empire, found especially in frontier provinces which did not appreciate the benefits of the "wasteland" situation which the Romans called "peace" (cf. Tac. *Agricola* XXX). This attitude is reflected in the innumerable rebellions against the Empire during the first and second centuries, and in the fairly frequent mutinies of Roman troops in the provinces. The accuracy of Roman historians is confirmed by their descriptions of the hostility of subject peoples. Somehow these nations preferred liberty to the blessings both of Roman rule and of Greco-Roman culture. The Romans were equally hostile toward many of their subjects, perhaps especially the "superstitious" Egyptians and the "immoral" Syrians.

There were influential Christians who in spite of persecution expressed their loyalty to the state. Athenagoras stated that the rule of Marcus Aurelius and his son was given them by God, and Melito held that Christianity, which had grown up with the Empire, and had been persecuted only by bad emperors, should be its state religion. This hope, realized in the fourth century, was at least in part a natural outgrowth of the ecumenical mission of the church. The Roman Empire became, officially at any rate, Christian.

 3. The religion of Numa
 4. The state religion
 5. Syncretism
- Bibliography

1. Prehistoric origin. The origin of Roman religion was prehistoric. It consisted mainly of ancient, really "primitive," rites and practices, observed and perpetuated with no attempt at explanation, with no reference to any divine revelation or command, but solely because they belonged to ancestral custom (the *mos maiorum*). These rites had been found to work, or—more often—their neglect had been found to be disastrous; hence it was everywhere assumed that they must be observed with meticulous care. Although the rite was usually some form of sacrifice, there were many other kinds: supplications, lustrations, lectisterniums (banquets set before the gods), circumambulations, processions, and other symbolic acts. Roman religion was essentially a system of ritual, without a theology, or an authorized set of religious beliefs, or any organized system of religious instruction. Cicero defined religion as the "cult of the gods" (*On the Nature of the Gods* II.8); this term meant more than worship and included care, devotion, and constant attention to their needs and demands.

Hence Roman religion was legalistic, with specific requirements which men must meet if they hoped for specific responses on the part of the higher powers. A Roman did not hesitate to accompany his prayer with the formula: "I give so that you may—or will—give." He also made it clear that his gift was meant for one particular god or group of gods and no other, and if he was not sure of the identity or sex of the god, he said so: *sive mas sive femina*. And he explicitly stated and reiterated just what his offering was: cakes, a fat sow, a lamb or goat. The language is as specific and explicit as a lawyer's formulation of a deed, a transfer, or a claim. At the same time additional requirements or demands on the part of the higher powers were often set forth, and also special divine guidance in severe crises, through oracles (especially the Sibylline books, which were nevertheless obscure and needed interpretation) or the art of divination (especially the "reading" of

the markings observed on the liver of the sacrificial animal). Both the Sibylline Oracles and the art of divination were an inheritance from the Etruscans, though the origin of divination was very ancient and probably must be traced to Babylonia.

In brief, the general character of ancient Roman religion was "primitive"—i.e., prehistoric—with many surviving features of animism, magic, and polydaemonism. Certain "sacred" places or things possessed supernatural power, which was conceived of more or less as the Polynesians conceived of *mana*; or were indwelt by supernatural beings, though one could not be sure just how personal they were, what their names or functions, or whether they were friendly or unfriendly to their neighbors. In dealing with the supernatural, it was of paramount importance that the correct formula be used. Any mistake, such as omission, repetition, or transposition of words, was unlucky and invalidated the whole procedure: one must begin the rite and the accompanying formula or formulas all over again. Most of the rites were so old that there was no explanation of either their origin or their meaning; some scholars have argued that they originated at a predeistic stage in religious development, when only semi-personal local powers were addressed, not gods—personal gods came later, under Greek influence. But it is not certain that any such "predeistic" state of religion ever existed in Italy. Nor can we ascribe all this to "primitive" religion, about which we know very little—we do not know even the conditions of life among really primitive men. What we find in Roman religion, in historical times, is the survival, modification, and eventual submergence of prehistoric rites which were shared in some measure with other Italian peoples but were preserved and recorded only at Rome or under Roman influence.

The oldest inhabitants of Italy were, as far as archaeology can trace them, a presumably indigenous group of people among whom were settled various invading or immigrant nations, chiefly one branch of the Indo-European family (early Latin reflects this migration), but also including such other groups as the Greeks in S Italy (Magna Graecia) and Sicily, and the Etruscans (probably coming from SW Asia Minor) who occupied NW Italy; W and N of the Tiber and along the coast as far as the latitude of Pisa and Florence, and in the NE even farther. Other groups were the Ligurians along the coast N and W of the Etruscans, and the recurrently invading Celts in the lower ranges of the Alps, the Dolomites, and the Po Valley.

2. Early Roman religion. The traditional date of the founding of Rome was 753 B.C., when a group of shepherds, farmers, and traders established a stronghold upon two of the seven hills, the Palatine and the Capitol, and set up their market on the bank of the Tiber, far enough inland to escape the pirates and raiders who infested most of the Mediterranean in that era. The description of the Arcadian Evander's humble city on the Palatine, in Vergil's *Aeneid*, book VIII, is improbable archaeologically and historically, but it conveys the deep feeling of the "numinosity" of the Palatine, which was the real center of Roman religion throughout

its long history. During the era of the Etruscan kings, when the great temple to Jupiter, Juno, and Minerva was erected on the Capitol, there was a tendency to transform Roman religion into a spectacular state cult; but even centuries later, when Augustus dedicated his chapel to Apollo, it was on the Palatine, the hill below which lay the Sacred Way and where lived the Vestal Virgins in their holy house, and where also were the home of the Flamen Dialis and the temple of Vesta. It was the oldest street in Rome, and beside it were preserved the oldest and most sacred monuments of Roman religion and government. Officially the Capitol was the religious center of the Roman Empire; in reality the Palatine was the sacred hill which enshrined the deepest religious loyalties.

3. The religion of Numa. The traditional founder and codifier of religious law and lore was the second Etruscan king, Numa Pompilius; hence the oldest elements in Roman religion were often referred to as the "religion of Numa." In reality, the rites were far older than Numa, and reflect the period of slow social, political, and economic development which long antedated the founding of Rome and which also in the rural districts long survived the founding, the period of the Etruscan kings, and even the five centuries of the Republic (509-27 B.C.)

Since there is no contemporary record—the later historians and poets were no better off than we are—the most authentic clues to the early religion of Rome are the festivals recorded in the pre-Julian calendars, fragments of more than twenty of which still survive, though usually with added notes (in smaller letters) from a far later period. The "primitive" year began in the spring (January and February were ignored). March was the first month, the time for the spring sowing, the trimming of the vines, and other agricultural activities; but it was also the month for polishing (or lustrating) the war trumpets, exercising and drilling the cavalry horses, and invoking Mars, the god or numen of war. The armed dance of the Salii, another expression of the war spirit, also took place; for war was an annual, seasonal occupation, and began each year in this month. April followed with its Fordicidia on the fifteenth, the sacrifice of a pregnant sow for the purpose of ensuring or increasing fertility, the Cerealia on the nineteenth and the Parilia or Palilia on the twenty-first, the Vinalia on the twenty-third in honor of the numina of grain, fruit, and wine (or vines) respectively, and the Robigalia on the twenty-fifth, designed to ward off rust from the growing crops. These are obviously ancient agricultural festivals, each with its appropriate rites.

The ritual can be learned from the ancient antiquarians (e.g., from Varro, the fragments of whose famous work on *Antiquities Human and Divine* are to be found as quotations in Augustine's *City of God*, or from Dionysius of Halicarnassus, Plutarch, Macrobius, Athenaeus, or Johannes Lydus) or from the poets (e.g., Ovid, whose *Fasti* covers the first half of the year—i.e., from January to June; it was written in the time of Augustus, and never finished, as Ovid was banished). Often the descriptions of the ancient rites are exact, but their interpretation

is overlaid with much later Greek identification and explanation, together with the writer's own fanciful guesses—a feature especially pronounced in Ovid. However, we can make out the essential character of most of the "primitive" rites. E.g., the Ambarvalia, or lustration of the fields, consisted in a circumambulation of the farm by its owner and his *familia* (which included the slaves), all dressed in white, and leading a group of animals for the sacrifice—viz., a sow, a sheep, and a young bull (the *suovetaurilia*); Tibullus says (II.1) that the last named was originally a male lamb. Another rustic rite was the annual sacrifice at the landmark, where the borders of farms adjoined; it was a ritual sacred to Terminus, and was accordingly named the Terminalia. Other rites were concerned with the sowing, harvesting, and garnering of the crops, and the making of wine or the preserving and storing up of seed for the coming year.

One of the strangest rites was that of the "October Horse," when the off-horse in the team which won the chariot race was sacrificed to Mars; its head and tail were cut off and taken by a runner to the Regia, where once the king had been entrusted with these powerful instruments of magic, and hung up so that the blood could drip on the hearth. Later a contest was held, and the winning group carried off the head to their own quarter in the lower town. All this had nothing to do with Mars as the god of war, but as giver of the harvest: so powerful was he that all good things were his gift, including both victory in war and an ample food supply. The strange chant and solemn procession (or dance, with its peculiar "three step") of the Arval Brethren was also addressed to Mars and invoked a blessing on the crops; originally, perhaps, it was thought to produce or to ensure such a blessing. It was because of later Greek influence and the identification of the Roman gods with the Greek that men came to think of Mars chiefly as the war god (Ares) and little more.

Still another "primitive" rite was the Lupercalia (February 15), somehow associated with the protection of small domestic animals from the wolves (*lupus*="wolf"), but more specifically connected with fertility. At the SW corner of the Palatine mount, near an ancient cavern, a dog and some goats were sacrificed. Young men were smeared with the blood, which was then wiped off with wool (a lucky material) dipped in milk; then they ran about the Palatine settlement with strips of the fresh goatskins, striking with them everyone they met. These blows were especially welcome to women, for it was thought that they averted barrenness and ensured fertility. Other ideas were connected with the ritual, as is often the case with ancient rites; but the prevailing or most widely accepted interpretation seems to have been that of fertility magic.

It was this early agricultural religion which formed the fundamental and most permanent stratum of Roman religion. With the Etruscans and the Greeks had come temples, statues of gods (conceived now as personal beings, human in form), divination, and mythology. These new emphases had a transforming effect upon the religion of the city dwellers, though the old rituals survived in the rural districts. The

offering of a young lamb to the spirit resident in a spring; a few beans or flowers offered to a tree nymph or to the family ghosts; the pious observance of ancestral customs, such as the ritual of the communal Lar or Lares, the family Genius, or the Penates (guardians) of the household storeroom—all these are described by the Augustan poets, Vergil, Horace, Tibullus, Ovid. But they were in reality survivals from an age long past, and were now to be found chiefly on the farms and in the country towns.

4. The state religion. On the other hand, the public religion of the Roman state (especially as observed in Rome itself) was thoroughly organized. At its head was the pontifical college, which included the several pontiffs (originally three, later increased to six, nine, fifteen, or sixteen); the fifteen flamens, including the three leading ones, the *flamen Dialis* (priest of Jupiter) and those of Mars and Quirinus; the Vestal Virgins, in charge of the rites of Vesta and the sacred undying fire on her hearth; and the Rex sacrorum (king of rites, who inherited the ancient priestly functions of the early kings). The presiding officer of the college was the Pontifex Maximus, and next to him the Rex sacrorum. It was the duty of this college to oversee all public rites and religious ceremonies, to ascertain the will of the gods either through divination (by augurs) or through consultation and interpretation of the Sibylline books. But in time the whole system fell into disrepute, especially when, under the later Republic, commanders and magistrates did not hesitate to manipulate the auspices or the calendar or the interpretation of signs or portents in furtherance of their own purposes.

Originally a simple "primitive" religion (i.e., prehistoric), thoroughly legalistic and eudaemonistic in conception and aim, the "religion of Numa" might perhaps have developed into a noble code of morals and worship, somewhat comparable to the Hebrew. But the Roman religion was not permitted to develop in this way; foreign influences, especially mythological and artistic, and the absence of any group or order comparable to the prophets of Israel, doomed it to sterility and eventual extinction. It was chiefly the Greek influence, unfortunately, which brought to bear, not only an alien mythology, but also a skeptical philosophy, at a time when internal crisis and decay already threatened to destroy the religion of Rome.

5. Syncretism. It was the age of syncretism. As Rome had grown in political importance, conquering the entire Italian peninsula and Sicily, driving its rival Carthage from the Mediterranean and finally destroying it, and conquering eventually the whole of Southern and Western Europe, North Africa, Asia Minor, Egypt, and the Near East, new tendencies had steadily arisen, in consequence of this vast international expansion—tendencies which were destined to alter the whole character of Rome. The gods of the conquered had flocked into the city, brought there by the *invocatio* or the invitation or the vows of conquering generals and by their now enslaved votaries. In the great crisis following the Battle of Cannae (211 B.C.), an embassy was sent, at the direction of a Sibylline oracle as interpreted by the

decemvirs, to Pessinus in Phrygia; and the sacred stone of Cybele, the Great Mother of the Gods, was brought to Rome, enshrined in the temple of Victory until her own *aedes* or shrine could be completed, and her worship entrusted to authentic Phrygian priests. Similarly the rites of Dionysus (identified with Bacchus, and thus in turn with Pater Liber) were introduced, though with severe restrictions, especially after the scandal caused by the "orgies" or drunken worship of the Bacchants in 168 B.C., when the Senate issued a decree forbidding Romans to take part in them. But the precedent had already been set, and the steady influx of foreign gods and their cults continued, in later centuries with increasing popularity and finally with irresistible consequences for the ancestral cultus and its round of associated ideas.

In the NT period, from ca. 50 to 150, the tide of "orientalism," which included new superstitions, new kinds of magic, astrology, "mystery" cults, and occultism in general, was still held somewhat in check; but after Marcus Aurelius, the "last of the Romans" (died 180), the floodgates were opened, and under the third-century Severi the Eastern cults swept westward without hindrance. It is quite improbable that the early Christians were influenced by the mystery cults; the period of popularity of these cults, in the West, came later. Nor was the early church inclined to adopt or adapt ancient Roman religious customs—the whole religious outlook of the church was too Hebraic, too biblical, to find values in primitive pagan rites; above all, the hope of redemption through Christ and the eschatological expectation of the coming kingdom of God found little contact or support in Roman religion—save only where, as in Vergil, Roman religious thought had already been influenced by similar ideas: Vergil's *Fourth Eclogue* seems to echo the messianic hope, especially as set forth in Isaiah. Indeed, the church of the first century met the greatest threat to its existence when it confronted the imperial cultus (the worship of *Roma* and the emperor; see the Revelation to John, especially chs. 13; 17-18). Emperor-worship was one more importation from the East, and not an original element in Roman religion; its spirit was essentially political and even commercial, not religious, though it celebrated the establishment of world peace under Augustus, and was meant to be a "religion of all good men." But Christians were not able to participate, any more than Jews were (the Jews, fortunately, were exempt from this requirement). The result, for the church, was long decades of martyrdom during the repeated persecutions which broke out from the first century to the fourth.

The real impact of Roman religion upon Christianity was seen long after the persecutions had ended, when the political ideas and ideals of responsible world government, of the universal maintenance of law and order, and of a hierarchical organization of society came to expression and fulfilment in Latin Catholicism. After the third century the language of the Western church was Latin; its conception of sainthood was tinged with the ancient ideal of sobriety, seriousness, even solemnity (*gravitas*), which had been characteristic of the earliest type of religious

feeling in Italy. Its conception of worship and devotion was formed on the ancient Roman appreciation of piety (*pietas*), with its strong attachment to family and especially filial duties; its great virtues of humility (*humilitas*), as contrasted with pride or arrogance (*superbia*)—Augustine insisted upon this as firmly as Vergil had done (q. I Pet. 5:5)—and of loyalty (*fiducia*), which came to include the church's theology as well as its ethics, so that men spoke of the duty of belief and of unquestioning acceptance of theological definitions and of ecclesiastical authority—all these basic characteristics of Latin Catholicism, which placed a stamp on the whole of Western Christianity for many centuries (including that of modern times), were a legacy from the best elements in the ancient Roman character, now combined, sweetened, and inspired by the ethics of the gospel, but also modified by new circumstances and conditions. These are factors of far greater importance than the more overt and obvious emphasis on such matters as correct ritual, often noted by church historians and others. It is only the earliest beginning of this religious and cultural process that can be traced in the NT; but it is indubitably present, and its later development is foreshadowed in more than one passage—e.g., in Mark, the gospel of the martyr church at Rome; in Luke-Acts, where the gospel is exonerated and approved, if not accepted, by Roman officials; and in the Letter to the Romans, where the duty of loyalty and obedience to the representatives of the great world state is clearly expressed (ch. 13). Only Revelation takes a wholly negative attitude toward Rome and its cultus—a fact fraught with dire consequences for more than one group of early Christian enthusiasts and nonconformists who saw nothing good but only evil in the pagan world and its religions.

F. C. GRANT

***ROMANS, LETTER TO THE.** A letter written by the apostle Paul to "all God's beloved in Rome," and now found as the sixth book of the NT canon and the first in order of the letters. It is the longest of all Paul's letters and offers the most comprehensive account of his understanding of the gospel of Christ as the effectual divine remedy for the plight of man, the universal sinfulness and guilt which no human effort can remove. Though it retains some elements of the true letter, a personal communication prepared for a particular group of readers rather than a literary construction employing the form of the letter, it approaches more nearly than any other of the apostle's writings to the formal theological treatise; certainly it must be said that the exposition

of the theology is not developed in immediate relation to particular problems or errors of the Roman church.

The general importance of this letter in the history of Christian theology cannot be overestimated, and it remains indispensable to the understanding of most of the fundamental doctrines of the Christian faith and the potentialities of the Christian life.

Bibliography

1. Authenticity and integrity. The authenticity of the letter is not seriously questioned and is not, in fact, open to question. The rejection of Romans involves the rejection of all the Pauline letters, for there is no other letter with any greater claim to authenticity which could serve as a standard of comparison. There are clear evidences of its use by other Christian writers before the end of the first century and in the first half of the second century—in other NT writings and in the Apostolic Fathers; and before the end of the second century it is listed and cited under Paul's name. Every list of the Christian scriptures which has come down to us includes Romans among the letters of Paul. The external evidence of authenticity could not be stronger, and the internal evidence fully supports the tradition. The letter belongs to the first generation of the church, and there is much in it which could not reasonably be related to any later situation; the language includes scores of words and phrases which are characteristic of the vocabulary of Paul; and there is nothing to suggest the mind or training of a writer who could not be identified with the apostle on the ground of what we know of him from other sources. The author of Romans is certainly the author of Galatians and of I and II Corinthians also, and there is overwhelming evidence that these letters are the work of the man whose name they bear.

The question of integrity is raised chiefly in connection with the ending of the letter. First, the Doxology (16:25-27) is probably a later addition; secondly, the remainder of ch. 16 is regarded by many as a separate letter, which is more likely to have been addressed to Ephesus than to Rome; and thirdly, there is a good deal of evidence to show that in early times there were copies of the letter in circulation which ended with ch. 14.

The style and vocabulary of the great Doxology are not Pauline, and practically all commentators are agreed that it is not from his hand. As there are indications that the earliest collections of the Pauline letters ended with Romans, it has been suggested that the Doxology may have been composed as a fitting conclusion to the whole body of Paul's cor-

respondence. In phraseology and temper, it recalls the Pastoral letters. Doubts of its authenticity are confirmed by the variations in the position which it holds in different MSS. A few MSS omit it altogether; the vast majority of them place it at the end of ch. 14; a relatively small number, but those of the highest quality, have it at the end of ch. 16, where it is found in English versions; a few include it in both these places; and in one, but that the oldest of all, the Chester Beatty Papyrus P⁴⁶, it is put at the end of ch. 15, and the scribe has put a line under it before the beginning of ch. 16, as if to emphasize that in his view the letter ended at this point.

The presence of the Doxology at the end of ch. 14 must go back to some copy or copies in which the letter ended at this point. None of our extant MSS, however, fail to include chs. 15-16. The evidence that some early copies ended with ch. 14 is confirmed by Origen of Alexandria (early third century), who tells us that Marcion cut away from this letter all that follows 14:23; and adds that some codices "which have not been rashly handled by Marcion" insert the Doxology at this point. This would suggest that the shortening of the letter was independent of Marcion, and that he simply happened to have it in the abbreviated form in which it was already circulating. Some early Latin lists of chapter headings, found in such great codices of the Vulg. as Amiatinus and Fuldensis, pass directly from 14:23 to the doxology, even though the codices themselves contain chs. 15-16.

There is, nevertheless, no reason for suspecting that ch. 15, at least, did not form part of the original letter. Certainly the first part of the chapter (vss. 1-6) follows upon the thought of ch. 14 without any break, completing the discussion of how to deal with the "man who is weak in faith" (14:1); and there is not a line in the remainder of the chapter that does not reflect the mind and breathe the spirit of Paul, and at the same time throw light upon his conception of his apostolic task and his purpose in writing the letter.

Ch. 16 is another matter. The letter comes to a natural ending with ch. 15, and even has a brief blessing to close it (vs. 33). The commendation of Phoebe the deaconess, with which ch. 16 begins, would more naturally be addressed by Paul to a church which already knew him than to a church to which he was a stranger. But a greater difficulty is occasioned by the long list of greetings to friends of Paul. It would be surprising, in the first instance, to find that Paul has so many Christian friends in a city which he has never visited, that he should know the houses in which they meet for worship and the groups which are associated together in one capacity or another (vss. 11, 14-15). But when we find that the list includes Aquila and Prisca, who had been expelled from Rome by the Emperor Claudius, had given Paul a home at Corinth, and had later been associated with him at Ephesus (Acts 18:2-3, 18-19, 26); and immediately after them mentions Epaenetus, who is described as the "first convert in Asia for Christ"; and when we observe the closeness of the relations between the apostle and many of the others

whom he names here ("kinsmen and . . . fellow prisoners; . . . my beloved in the Lord; . . . our fellow worker in Christ; . . . the beloved Persis," etc.), we are almost forced to the conclusion that this chapter was addressed to the church at Ephesus, the capital of the Roman province of Asia, where Paul had worked for several years. The warning against troublemakers (vss. 17 ff) also accords better with a church for which Paul has pastoral responsibility than with a church which he knows only through the reports of others, and which he addresses with a measure of diffidence (15:14-15) and with every effort to avoid even the appearance of criticism. There is, in fact, a wide measure of agreement among scholars that this chapter is a letter, or part of a letter, addressed by Paul to the church at Ephesus, which somehow became attached to the Letter to the Romans when the letters were collected into a corpus.

This conclusion is challenged by a number of scholars, who feel that the hypothesis of an Ephesian address for the chapter raises more difficulties than it solves. Some feel that a letter consisting almost entirely of personal greetings is inconceivable. This type of objection need not be taken too seriously. Obviously, the primary purpose of the letter is to commend the visiting deaconess, to make sure that she is welcomed in a strange city. With a whole sheet of papyrus available, why should not the apostle use the rest of it for greetings to his friends and for a word of warning against troublemakers? Nor does it seem at all unnatural that he should include in the greetings a few personal tributes to old and valued friends.

To the demand that the proponents of this hypothesis explain how the salutation of this letter came to disappear, it is sufficient to reply that II Cor. 10-13 is widely regarded as a separate letter, and that no difficulty is felt about the absence of a separate salutation.

There is also the question of just how this Ephesian note became attached to the Roman letter. One would be justified in pressing this question only if we could otherwise picture with the utmost clarity the methods of the collector of the Pauline letters and the whole editorial process through which the collection passed. The question of how this letter became attached to the letter to the Romans is trifling in comparison with that of the composition of II Corinthians, and still more trifling in comparison with that of the reception of the Pastorals into the corpus. It has been suggested that the chapter is possibly a pseudonymous addition, which may have been introduced at the same time as the Pastorals. Once it is realized that the objections to the Ephesian hypothesis carry very little weight, it becomes unnecessary to resort to the hypothesis that the chapter is not from the hand of Paul at all.

The conclusion here, then, is that the letter to the Romans consisted originally of chs. 1-15, and that ch. 16 is part of a letter originally addressed to the church at Ephesus. It may be added that the interpretation of the letter as a whole is not significantly affected by the critical conclusion that may be reached about the origin of ch. 16.

2. **Destination.** The earliest MSS set above the opening words of the letter the brief title $\pi\rho\delta\varsigma$ Ῥωμαίους , "To Romans." This phrase could, of course, be employed only in relation to a collection, and is to be ascribed to an early editor; in later MSS it is elaborated into such designations as "The epistle of the blessed apostle Paul to the Romans." The text of the letter itself mentions the Christians of Rome in the Salutation: "Paul . . . to all God's beloved in Rome, who are called to be saints" (1:1, 7; cf. vs. 15).

It has been suggested, however, that the Roman address is secondary, and that the letter was composed in the first instance as a general letter. This conjecture was inspired by the observation that there is testimony to the existence in early times and in widely scattered areas of the church of copies which omitted the words $\acute{\epsilon}\nu$ Ῥώμῃ ("in Rome") in 1:7 and $\tau\omicron\upsilon\varsigma$ $\acute{\epsilon}\nu$ Ῥώμῃ in 1:15. The nature of the evidence does not allow us to ascribe the omission to mere scribal inadvertence. It is perhaps best explained as liturgically motivated. At all events, it is clear that entire paragraphs at the beginning and end of the letter (1:8-15; 15:14-33) are addressed, not to the church in general, but to a particular local church; and there can be no shadow of doubt that this is the church at Rome.

Nothing is known of the founding of the Roman church. When Paul wrote his letter, this church was well established and already known and esteemed throughout the Christian world (1:8; 15:23-29). It was composed mainly of Gentiles, with a certain number of Jewish members, and was certainly a Greek-speaking community, which means that its membership was drawn chiefly from the Levantine population of the city. This Greek character continued until the later years of the second century, for it is not until then that we find the earliest Latin documents of the Roman church. It must have been founded before A.D. 50, for the conflicts which its coming occasioned within the Jewish community led to an edict of the Emperor Claudius by which the Jews were expelled from Rome (Suetonius *Life of Claudius* 25; Acts 18:2); but there is no indication that it had any distinguished leadership before the arrival of Paul and subsequently of Peter, who came to be revered as the joint founders of the church in the capital. See **ROME (CHURCH)**.

3. **Occasion and purpose.** Paul himself indicates with unusual clearness the circumstances which impelled him to write this letter. He had long hoped and prayed that he might be able to visit the Roman church, but had hitherto been prevented from doing so, no doubt by the insistent demands of other work (1:9-13). Now at last he sees some prospect of making the journey to the capital. He has completed the tasks which he set for himself in the Eastern provinces and is looking forward to a mission in Spain; and he hopes to visit the Romans in passing and to secure their support for his projected mission (15:17-24). First, however, he must make a trip to Jerusalem with a contribution which his Gentile churches of Greece and Macedonia have raised for the poor of the Jerusalem church, a material return for the spiritual blessings which they have received from their Jewish brethren in the faith (15:25-27); as soon

as he has completed this task, he will be passing through Rome on his way to Spain (vss. 28-29). He is doubtful about the kind of reception which may be awaiting him in Jerusalem, and he asks for his readers' prayers (vss. 30-32).

The letter is written primarily to pave the way for his intended visit. As the Apostle to the Gentiles, he is conscious of a responsibility to Romans as to the men of all nations (1:5-6, 13-15), and he is eager to discharge it. In part, he feels that he has some contribution to make toward the strengthening of their faith, and he is quick to add that he counts on receiving, as well as conferring, a blessing (1:11-12). He disavows any desire to suggest that their own faith and knowledge are deficient (15:14), and almost apologizes for his boldness in writing to remind them of what they already know (15:15). It is clear, however, that he has more ambitious ends in view than this. Although he does not state it in so many words, he is manifestly bent on removing misunderstandings of his gospel which he fears may have been formed at Rome (3:7-8; 6:1; 9:1-2; etc.). If he invites their support of his mission in Spain, he feels that they have a right first to know from his own testimony the substance of his teaching, to be assured that they can support him wholeheartedly.

Yet we are inclined to feel that a broader, perhaps only partly conscious, purpose lies behind the letter. After all, it goes far beyond the scope of the brief statement of faith which would suffice to give proof of his soundness as a Christian teacher. This careful and wide-ranging exposition of the significance of the gospel seems to come close to a formal, definitive account of the apostle's mature understanding of the Christian faith. Can it be that he half-divines the central place which the church of the capital is destined to attain in Christendom, and chooses it as the initial recipient, that it may also be the lasting guardian, of his greatest theological legacy? In the mother church of Jerusalem he cannot have too great confidence; as he goes up on his last visit, he must fear, not only the dangers that may beset him at the hands of unbelievers, but mistrust and suspicion on the part of the Christian believers themselves (15:31). A strategic insight seems to have guided him in the establishment of his key churches throughout his missionary career; may not the same strategic insight have enabled him to perceive that the chief city of the world must shortly become the capital of the growing empire of Christ? In some degree, then, the Letter to the Romans would partake of the nature of an encyclical, addressed *urbi et orbi*, giving permanent expression to Paul's clear understanding of the nature of the gospel, of its relation to the OT and to the Judaism of the law, and of its power to bring the whole of man's life into new relationship with God and into new powers and glories.

As the letter was written when Paul was on the point of leaving for Jerusalem with the great collection which his Gentile churches had gathered (15:25 ff), it was probably dispatched from Corinth shortly before he set sail with his companions, representatives of the churches which had shared in making the collection (Acts 20:3-4). The date cannot be determined with certainty, but will fall between 54

and 57 (see CHRONOLOGY OF THE NT; PAUL). The long and painful conflict reflected in the Corinthian letters will have ended, with the complete victory of the apostle, and he will have had the leisure and the freedom from intense anxiety which would permit him to undertake so massive a work of theological construction as the Letter to the Romans.

4. **Outline of contents.** With the omission of ch. 16, the letter falls into three main divisions (II-IV in the following outlines), with an introduction and a conclusion.

- I. Introduction, 1:1-15
 - A. The Salutation, 1:1-7
 - B. The Thanksgiving, and affirmation of the apostle's desire to visit Rome, 1:8-15
- II. The main theme: the gospel of salvation, 1:16-8:39
 - A. The theme stated: the gospel as God's power put forth to bring salvation, 1:16-17
 - B. The universal need of salvation: the plight of man, 1:18-3:20
 1. Guilt of the Gentile world: idolatry and moral corruption, 1:18-32
 2. Equal guilt of the Jews, despite their complacent assumptions of superiority, 2:1-24
 3. Knowledge of the law does not mitigate Jewish guilt, 2:25-3:8
 4. Conclusion: sin and guilt are universal, and law does not remove them, 3:9-20
 - C. The theme restated: the grace of God brings deliverance through Christ to all who believe, 3:21-26
 - D. Corollary: no place is left for human pride in moral achievement, 3:27-31
 - E. Testimony of the ancient scriptures: Abraham, counted righteous through his faith, the type of the Christian believer, both the Jew and the Gentile, ch. 4
 - F. The new relationship with God, entered through faith, brings certainty of final salvation, 5:1-11

5. **The argument. a. The main theme.** The Salutation (1:1-7), much more extended than in any of the other letters, conveys in brief Paul's conception of his commission and of the high glory of the Christ whom he preaches, and intimates that the breadth of his apostolate is such as to include the Romans, to whom he extends the apostolic greeting of grace and peace. The thanksgiving to God, which follows (vss. 8-15), begins in accordance with common Greek practice, but is extended far beyond the conventional

into a warm expression of Paul's eagerness to visit Rome, and of his sense of responsibility to communicate to men of every race and condition the gospel which has been entrusted to him.

He now announces the central theme of his apostolic preaching (1:16-17). The gospel of God, for which he has been "set apart," is defined as the "power of God [put forth to bring] salvation to every one who has faith," and as the "righteousness of God revealed through faith for faith." The two expressions are substantially parallel in meaning, for the "righteousness" of God is here used, not in the abstract Greek sense of moral uprightness, but in the active Hebrew sense of that which vindicates the right, that which brings the victory of right over wrong, the power which is put forth to overthrow evil and make truth and goodness triumphant. God's "righteousness" is his salvation, his saving power making itself effectual (cf. Isa. 51:4-8 KJV, with its refrain: "My salvation shall be for ever, and my righteousness [RSV 'deliverance'] shall not be abolished"). Again, the repeated insistence on faith, with the appeal to the words of Habakkuk which promise life to the man who is "righteous through faith," introduces one of the fundamental tenets of the apostle's teaching, which is related to the universalism of the gospel ("to the Jew first and also to the Greek"), and will be shown to be the correlative of grace (cf. 4:16 KJV: "Therefore it is of faith, that it might be by grace") and the antithesis of legalism, of a doctrine that makes salvation depend upon human moral achievement.

b. The plight of man. The universal need of salvation is now demonstrated by an analysis of the condition of mankind (1:18-3:20). The state of the world is here defined in terms of religion and morals in the narrowest sense; there is no trace of concern for social injustice, economic distress, or military and political despotism. All the evil of the world is seen as deriving ultimately from man's wilful rejection of the truth of God, which is manifested in the works of nature in such wise as to leave man with no excuse for his failure to give God the honor that is his due. This primal repudiation of responsibility to God has clouded the human mind and led to the immense folly of idolatry; and the worship of false gods has issued in an increasing corruption of mind and action and a dreadful harvest of vice and debauchery (1:18-32).

Up to this point, Paul has spoken chiefly of the moral corruption of Gentile society. With the beginning of the second chapter, he turns his attention to the stern critic of these vices, and accuses him of being himself guilty of the crimes which he is rebuking in others. With vs. 17, he tells us explicitly that the censor whom he has in mind is the Jew, with his complacent feeling of superiority over the Gentile, who boasts that he has the "embodiment of knowledge and truth" in the law, but who by breaking the law is dishonoring God. Paul insists that God shows no partiality; evil will be punished and goodness rewarded to Jew and Gentile alike. The good Gentile will put to shame the Jewish transgressor. The Jew has, indeed, had many advantages (3:1 ff), but these do not mitigate his guilt.

The apostle has now shown that "all men, both Jew and Greeks [i.e., Gentiles], are under the power of sin"; the Scriptures themselves, addressed primarily to "those who are under the law," support the massive indictment of evil and godlessness and show that the whole world is guilty before God. And the law can do nothing to clear men of the charge; it can bring only the knowledge of sin (3:9-20).

c. The theme restated. Paul is now prepared to restate his main theme in greater fulness, in the light of his analysis of the plight of mankind. This wider statement (3:21-26), let us note, is placed in its entirety under the rubric: "Now . . . apart from law" ($\nu\upsilon\iota\ \delta\acute{\epsilon}\ \chi\omega\rho\iota\varsigma\ \nu\omicron\mu\omicron\upsilon$); it is most unfortunate that our translations generally fail to reflect the weight which this phrase carries by virtue of its position at the beginning of the paragraph. Paul blazons abroad in his headline that in the manifesting of his righteousness God is now (i.e., in the gospel) acting "apart from law." He is not dealing with men as a judge deals with culprits on the basis of violations of the law. This rubric governs the interpretation of all that follows, and forbids us to insist on purely "forensic" interpretations of the verb "justify" (vss. 24, 26), despite the all but unanimous authority of Protestant commentators. Paul's first words have put us on notice that he is not using the language of the law courts to describe God's gracious dealings with sinful men.

This fuller statement of the theme takes up again the language of 1:17, interpreting the gospel in terms of God's "righteousness," manifested through faith—now defined as "faith in Jesus Christ"—and for faith, "for all who believe." Again, the thought is not simply that God is revealing himself as righteous in his own person, but that he is acting with power to make right triumphant over wrong, good over evil. All men are in the same condition before God—sinful, guilty, and unable of themselves to put things right; and God has provided the means for all alike of annulling guilt, of expiating sin, of breaking man's bondage. "There is no distinction; since all have sinned and fall short of the glory of God, they are justified by his grace as a gift, through the redemption which is in Christ Jesus, whom God put forward as an expiation by his blood, to be received by faith" (vss. 22b-25a). The three key words here are "JUSTIFICATION," "redemption" (see REDEEM), and "EXPIATION"; and each of them requires careful attention.

d. Key terms. The noun "righteousness" (of God), the verb "justify," and the adjective "just" (or "righteous"), which all occur in this passage, are renderings of three words which in Greek are cognate ($\delta\iota\kappa\alpha\iota\omicron\sigma\upsilon\eta$, $\delta\iota\kappa\alpha\iota\acute{\omega}$, $\delta\iota\kappa\alpha\iota\omicron\varsigma$). The verb and the adjective must therefore be interpreted in harmony with the sense of "righteousness" which has been indicated above. The usual sense of the verb in Greek is to "declare righteous," or "pronounce not guilty"—the verdict of the judge, the antithesis of "find guilty," or "condemn." This is the "forensic" interpretation of the word, which has been all but unanimously upheld by Protestant theologians from Luther down. Despite this weight of authority, this interpretation is far from satisfactory here. It leaves us with the monstrous notion, which is not adequately

defended by resort to the magic word "paradox," that God "pronounces men righteous" who are in fact guilty of sinning against him! It would be easier to defend the rendering "make righteous" (Good-speed), which has at least the sanction of practically all pre-Reformation interpreters; indeed, if God's word does not go forth void, his pronouncement itself makes a man righteous; he speaks, and it is done. Justification is not to be regarded as a legal fiction. But in this context, the meaning of "justified" is substantially "forgiven" (cf. 4:6-8), with the addition of the positive factor that man is brought into a right relationship with God. Guilt is annulled and sins forgiven; but more than that, the believer is "put in the right" before God. And the greatest emphasis is laid upon the fact that this is wholly God's doing; we are "justified by his grace as a gift," not in any sense or degree as a compensation for merit.

The second key term is "redemption" (ἀπολύτρωσις). The basic thought here is of deliverance. In common Greek usage it would suggest the emancipation of a slave or of a captive upon the payment of a ransom (λύτρον), and this is the initial meaning here: the slave of sin is set free (the thought of the price paid for his redemption is not introduced here). But in a well-known OT usage, the word is employed figuratively to signify the deliverance of Israel from Egypt. God "redeemed" his people when he brought them forth out of the land of Egypt, out of the house of bondage. This was the redemption with which the life of the people of God began and on which it continued to be based. Again, in later time, the promised return of Israel from captivity in Babylon was described under the same figure of redemption; the exodus from Egypt became a type of the new exodus, the restoration of the exiles. Now in the gospel, the "redemption which is in Christ Jesus" brings an infinitely greater deliverance, not of Israel but of all mankind, not from a temporal captivity but from the bondage of the spirit.

The third of our key words is "expiation." The Greek word ἱλαστήριον, which Paul uses here, is related to a verb ἰλάσκομαι, which commonly means "propitiate," and in ordinary usage would convey the thought of appeasing an angry deity, assuaging his wrath, rendering him propitious. Ancient Greek paganism knew many rites which were intended to serve this very end. But the Jewish scholars who translated the OT into Greek used the same verb in a quite different sense. To them it was unthinkable that the righteous anger of God should be averted by any rites of sacrifice. They used the verb ἰλάσκομαι to translate the Hebrew כָּפַר ("cover"), to signify the "covering" or purging of sins, not the propitiating of God. This is the sense in which Paul uses the noun here. The death of Christ is conceived as a sacrifice by which the sins of men are purged. His "blood"—i.e., the offering of his life—is represented as having the mystical power to expiate the sins of man and thus to remove the evil infection which debar him from communion with a holy God. So far is God from requiring to be propitiated that it is he himself who provides this sacrifice of expiation—he has put Christ forward "as an expiation by his blood, to be received by faith." It is not a matter of

divine anger to be appeased by sacrifice, but of divine love that removes the stain of sin which makes communion with him impossible.

Throughout this restatement, Paul has brought out insistently the thought that this triumph over sin is wholly God's doing. Guilty, enslaved, defiled, man has nothing to contribute. He can only make the response of faith, trusting himself to God, believing that God is able and willing to do for him what he can by no means do for himself—to remove the burden of his guilt, break his bondage to sin, blot out his sins with all their defilements. In all this there is no place for boasting; faith can only receive God's bounty.

In ch. 4, Paul undertakes to show that the gospel of grace, of justification by faith, is in essential harmony with the OT revelation. Though it is "apart from law," nevertheless "the law and the prophets bear witness to it" (3:21). He appeals for illustration to the story of Abraham and to the testimony of the Psalms. Even Abraham was not justified by "works," but by his faith in God; and the psalmist proclaims the blessedness, not of the man who can claim a personal virtue, but of the man who has been forgiven. The Abraham story also witnesses to the universalism of the gospel, for it shows that Abraham's faith was reckoned to him for righteousness before he was circumcised; and thus the promises made to Abraham are not limited to the people of the circumcision but are extended to all who share his faith, faith in the God who raises the dead; and so to all who share the Christian faith in the God who raised Christ from the dead.

e. The Christian life. Paul now begins to recount the spiritual blessings that belong to the new standing before God to which the Christian believer has been admitted, and invites his readers to enjoy them (5:1-11). He speaks of peace with God, the hope of sharing his glory, joy that is only intensified through suffering, divine love that is poured into our hearts through his Holy Spirit. The love of God, unconditioned and unmerited, is set in high relief against our complete unworthiness as "helpless, . . . ungodly, . . . sinners, . . . enemies." Here is the assurance of final salvation. If God could so manifest his love toward us while we were his enemies, how much more will he continue to love us and to complete his work of salvation for us, now that we have been reconciled to him through the death of his Son?

The following paragraph (vss. 12-21) brings the thought back full circle to the analysis of the state of mankind with which Paul began (1:18-3:20), and sets forth in glowing words the all-embracing triumph of grace over universal sin. In his opening analysis, Paul had been concerned chiefly to show that sin involved all mankind in guilt; here he speaks of sin as bringing death upon all. A universal condition is met by a universal remedy. Taking the story of the Fall (Gen. 3) as the basis of his imagery, he sets Adam and Christ in contrast as type and anti-type—the one through disobedience bringing sin and death into the corporate life of humanity, the other through obedience bringing righteousness and life eternal. Christ has inaugurated a new humanity in which grace reigns "through righteousness to eternal

life," whereas, apart from him, "sin reigned in death" (vs. 21).

The next step in the argument is to deal with possible misunderstandings and wilful misinterpretations, such as Paul must have encountered many times in his missionary career. First, there is the antinomian perversion of his doctrine (see ANTINOMIANISM). If it be true that "where sin increased, grace abounded all the more" (5:20), then why not go on sinning? "What shall we say then? Are we to continue in sin that grace may abound?" (6:1). And secondly, there is the objection of the man who has been brought up, like Paul himself, to revere the law: Paul's language would almost lead one to say that law is itself an evil, to equate the law with sin! (7:7). These are the difficulties with which the apostle deals in the sixth and seventh chapters.

Paul begins his rebuttal of the antinomian error by bidding his readers have in mind all that is involved in Christian baptism. The immersion in the water was a kind of burial, a participation in the death of Christ, a radical parting from the old life of sin. It is unthinkable that after having thus "died to sin" (6:2), we should any longer live in it. He thinks of baptism as a sacrament which effectively accomplishes that which it represents—our participation in Christ's death, our participation also in his risen life. "For if we have been united with him [σύμφυτοι, lit., 'grown together,' of *organic* unity] in a death like his, we shall certainly be united with him in a resurrection like his" (6:5). He bids us therefore think of ourselves as we are in truth—"dead to sin and alive to God in Christ Jesus" (vs. 11).

In a second approach, he takes up the thought of the old life as a form of slavery—slavery to sin. The slave of sin has been emancipated, and has become a "slave of righteousness" (vs. 18). He is summoned to give the same wholehearted service to his new master as he once gave to sin. Paul admits that the figure is not adequate (vs. 19); later in the letter he makes it clear that God does not call men into a new bondage, but into the freedom of a son in his father's house (8:15; cf. John 8:34-36). And he concludes with a magnificent statement of the illimitable difference in the issue: all the difference between death and eternal life. "For the wages of sin is death, but the free gift of God is eternal life in Christ Jesus our Lord" (vs. 23).

Paul now turns to the more difficult question of the relation of the Christian life to the law (see LAW IN THE NT). Here is the central point of conflict between Christianity and the Pharisaic Judaism in which Paul had been reared; for he was, he tells us (Phil. 3:5-6), "a Hebrew born of Hebrews; as to the law a Pharisee, . . . as to righteousness under the law blameless." Now he takes the radical position that the Christian, as he has died to sin, has also died to the law; the regime of law is applicable only within the sphere of that old life which the Christian has renounced, which came to an end for him in his baptism. Here Paul uses the figure of the marriage relationship. As long as the husband is living, the wife is bound to him by law and cannot contract a new relationship without adultery; but the death of

her husband releases her from her obligations under this law. So now Christians "have died to the law through the body of Christ, so that [they] may belong to another" (7:4)—i.e., to Christ himself. The figure is again unsatisfactory, since it leads into the thought that the partner who has died is thereby free to contract a new marriage; but Paul is content with the basic thought that through death the Christian has entered into a new union with Christ in which the relationships and obligations of the old life no longer apply. "Now we are discharged from the law, dead to that which held us captive" (vs. 6); and we serve God no longer in terms of an external law, but "in the new life of the Spirit."

Paul now finds it necessary to go more deeply into the whole question of the nature and effect of the law. If baptism into Christ's death means dying to the law, as it means dying to sin; if emancipation from sin means also emancipation from the law, are we not saying that the law is sin? (7:7). From such a conclusion Paul's whole being recoils in horror. "By no means!" (KJV "God forbid.") It is the law which has made sin known. The law is indeed God's law, and is in itself holy and just and good. The evil is not in the law, but in the nature of man. "We know that the law is spiritual; but I am carnal [σαρκινός, 'fleshly'], sold under sin" (vs. 14). Deep down in man, below the level of the rational mind and will, there is a predisposition to evil too powerful to be overcome by the conscious mind's approval of the good and hatred of the evil. (See FLESH IN THE NT.) To a being so constituted, the law, even in its inherent goodness, acts as a provocation to the sinful impulses and brings, not life, but death. Man is at war with himself, and his moral perception is overcome by the irrational drive of evil within. "I delight in the law of God, in my inmost self, but I see in my members another law at war with the law of my mind and making me captive to the law of sin which dwells in my members" (vss. 22-23). In this conflict of the mind with the flesh, victory can be gained only through Jesus Christ our Lord.

The secret of this victory is the theme of ch. 8: it is the Spirit of God (see HOLY SPIRIT) dwelling within. "The law of the Spirit of life in Christ Jesus has set me free from the law of sin and death" (vs. 2). Here is the mightier power that comes in to help our weakness, enabling us to fulfil the "just requirement of the law" (vs. 4), and bringing to us life and peace (vs. 6). This is the Spirit of sonship, which enables us to call God "Father," and to know ourselves as his sons, destined to share the glories of his Son Jesus Christ (vss. 14 ff). And in this new life of our spirits, transformed by the divine Spirit which is the Spirit of Christ himself, lies the hope and pledge of a renewal of the whole creation. "The creation itself will be set free from its bondage to decay and obtain the glorious liberty of the children of God" (vs. 21). The Spirit aids us in our prayers and intercedes for us according to God's will. Thus we see how God brings us to the destiny which his foreknowledge and predestination have prepared for us, that we should "be conformed to the image of his Son, in order that he might be the firstborn among many brethren" (vs 29); calling us into his service,

forgiving our sins and putting us right with him, and finally imparting to us something of the divine glory. And Paul ends his exposition of his great theme with a tremendous assurance of the triumphant love of God in Christ, from which no power can ever separate us.

This exposition of the gospel, now completed, is to be made the ground of an exhortation to live a life in accordance with the will of the God who has so freely showered upon us the riches of his grace. But this exhortation is to be deferred for some time, while the apostle enters upon a lengthy discussion of the great theological problem which has been raised for him by the success of the Gentile mission and the repudiation of the gospel by the mass of the Jewish people. This is the theme of the next three chapters.

f. Subsidiary theme (excursus). Chs. 9-11 constitute a relatively self-contained section within the letter, neither depending upon the preceding argument nor required as further ground for the exhortations which are to follow (12:1-2). Commentators have been sharply divided in their judgments of its relationship to the letter as a whole and to the main theme. To some, it has seemed to be in no sense subsidiary, but an integral part of the main argument, a necessary complement to chs. 6-7. There Paul had refuted criticisms of his gospel based on the charge that it led to the negation of all morality and the denigration of law itself; here he deals with the objection that it nullifies God's promises to Israel and so represents God himself as unfaithful. Some have even gone so far as to hold that this section is the very heart of the letter, and that all the preceding argument has been but a preparation. Yet to others the passage has seemed to be so complete in itself, so loosely related to the general structure of the letter, that it can be regarded as a prior composition, perhaps a stock "sermon" on this topic, which the apostle had used before and had constructed independently, without any thought of addressing it to the Roman church.

Against this it must be said that the argument of the section is by no means so coherent as one would expect in an independent construction with which the writer was wholly satisfied. It conveys much more the immediate struggle with recalcitrant thoughts which cannot be brought wholly within an ordered compass. It strongly suggests a man thinking on his feet and shaping his words as his amanuensis sets them down on the MS. The thought is constantly interrupted by tentative suggestions of one kind and another as the apostle seems to grasp eagerly at anything that may soften in some degree the stark predestinarianism (*see* PREDESTINATION) by which he feels himself bound. There are, moreover, some few but distinct points of contact with things on which the apostle has touched in the earlier chapters, sufficient to indicate that the section was composed in the immediate context of the letter. The problem itself has been adumbrated in 3:1-8; and the exalted contemplation of the divine blessings set forth in ch. 8 leads naturally enough to the apostle's distress at the recollection that his own kindred are excluded from the enjoyment of the promises fulfilled in Christ.

At the same time, the section can hardly be re-

garded as integral to the main argument. If these three chapters had disappeared from the earliest copies and were no longer extant, it would never occur to any reader that there was anything missing between the end of the eighth chapter and the beginning of the twelfth. They are not needed to complete the apostle's exposition of the meaning of the gospel, nor to enrich his description of the life in the Spirit. The problem which is here attacked is not, in fact, raised by the doctrine of justification in itself, but by the concrete historical development which has been witnessed in the preceding decade of the apostle's career—the hardening of the Jewish people in opposition to the church and the gospel, and the concomitant success of the mission to the Gentiles. It seems necessary, therefore, to regard the section, not as an integral part of the main argument, but as an excursus upon a collateral theological problem.

The section begins abruptly, with nothing to prepare the transition from the rhapsodies of assurance which sound forth so magnificently at the close of ch. 8 to the passionate outburst with which the apostle voices his concern for the salvation of Israel and rehearses the glorious privileges that have been accorded to his "kinsmen by race" (9:1-5). His vehemence leads us to infer that he is reacting to the unfair charge, which must often have been laid against him, that in his concern for carrying the gospel to the Gentiles he has become a renegade to his own people and that he no longer sets much store by the heritage of religion to which he was born. In his repudiation of any such thought of neglectfulness, he will even go so far as to affirm that his mission to the Gentiles is intended "to make [his] fellow Jews jealous, and thus save some of them" (11:14).

But the main problem to which Paul now turns is that which is presented to a Christian Jew by the spectacle of the general rejection of the gospel by the Jews and the readiness with which it is being accepted by the Gentiles of the Roman provinces. The people to whom the promises of God were given in the first instance, renewed in successive generations, and sealed by covenant, are not sharing in the fulfilment of these promises in Christ. Is God then untrue to his own promises to the patriarchs? Or, as he will put the question later: "Has God rejected his people?" For Israel's rejection of the gospel must, in the last analysis, be attributed to the will of God; the apostle never doubts that God has foreordained both the "hardening" of Israel (11:25) and the calling of the Gentiles into the church.

The problem is not at first clearly stated; rather, the answer is in part anticipated. "It is not as though the word of God had failed" (9:6). The Israel of the promises is not to be identified with the Israel of natural descent. (Unfortunately, Paul does not keep this simple distinction clearly in mind throughout, and his failure to do so leads to a lack of clarity.) From the days of the patriarchs, it is clearly shown in scripture that the promises are limited in their application to an elect number within the elect race; and Paul insists that the divine election does not rest on merit but solely on God's "call" (9:6-13).

Here Paul turns aside for a moment to deal with an objection. If God exercises his will in so arbitrary

a manner, if his purpose of election takes no account of merit, then the challenge is raised: "Is there injustice on God's part?" (vs. 14). The answer takes the form of an uncompromising reaffirmation of the absolute sovereignty of God: "He has mercy upon whomever he wills, and he hardens the heart of whomever he wills" (vs. 18). It must be said that this answer is not addressed to the objection at all: the question of justice or injustice in the exercise of the divine will is completely disregarded. And when it is further objected that on this basis no place is left for human moral responsibility (vs. 19), Paul flatly replies that man is presumptuous if he asks God for his reasons (vss. 20-21). The apostle is still refusing to deal with the objection itself—once again he is falling back on the infinite transcendence of God, which makes unthinkable any attempt to justify his ways or ask his reasons. Yet he cannot really content himself with the erection of such a stone wall. He goes on to suggest, now somewhat tentatively, afterward (ch. 11) with increasing assurance, that under this appearance of arbitrary will there is a divine purpose of all-embracing mercy (vss. 22-24). And he cites the prophetic scriptures to show that God has revealed his purpose, both of calling the Gentiles into his family of love (vss. 25-26; in Hosea, the words promise the restoration to favor of a chastened Israel, not the calling of Gentiles), and of preserving only a remnant of Israel from destruction (vs. 27-29).

It is impossible to feel that Paul has dealt at all successfully with the difficulties which are raised by his unqualified assertion of the arbitrariness of the divine will. The absolute will of God cannot be thus affirmed except in the context of an equally firm insistence on the infinite wisdom and infinite love which that will expresses. Without this wisdom and love, the absolute will cannot but take on the appearance of a monstrous tyranny. Paul is, of course, fully persuaded that the will of God is exercised in perfect wisdom and love; but he has caused himself and his readers needless difficulty by disregarding everything except the divine will for the purposes of this argument. At the same time, we must realize the profound truth of Paul's central principle, that man is not the measure of all things, that man cannot without intolerable presumption call God to account! He must trust, and through faith seek understanding (*fides quaerens intellectum*).

Returning to his theme (vss. 30-31), Paul at last gives explicit statement to the concrete historical fact which has occasioned his problem: Israel, with all its prior advantages, has failed to attain the righteousness (justification) which it had sought through the discipline of law; while Gentiles, without any such striving, have attained justification through faith. But Paul now seeks the cause of Israel's failure, not in the mysterious and unchallengeable divine decree of reprobation, but in the misguided zeal of the nation itself, which has persistently failed to understand and follow the way of righteousness through faith ("God's righteousness"), and failed to understand that Christ is the end of the law (9:30-10:4). And the righteousness which is based on law and is a matter of human achievement ("their own" righteousness [vs. 3]) is to be clearly distinguished from

the "righteousness based on faith," which is the gift of God in the gospel of Christ (10:5-12). Faith is awakened in men by the preaching of the gospel, and Israel has not lacked opportunity to hear the word; nevertheless, she has failed to understand and to respond (vss. 14-21).

Yet it would not be true to say that God has rejected his ancient people of Israel. Paul himself is a living proof to the contrary. Amid the general apostasy, as in the day of Elijah, "there is a remnant, chosen by grace." It must nonetheless be recognized that the nation as a whole is hardened against the gospel (11:1-10). But this apostasy is not the end of the story. Even now it has issued in the extension of salvation to the Gentiles; the fall of Israel has enriched the world; and Paul envisages an incalculably greater conversion of Israel. His own mission to the Gentiles, he avers, has in view the winning of his fellow Jews, if only through provoking them to jealousy of the benefits which the gospel is bringing to the Gentiles (vss. 11-16).

Paul now interjects a warning to the Gentiles against despising the Jews as rejected of God. He holds that there is something unnatural about the admission of Gentiles to the holy community, as if a shoot of wild olive had been grafted into a cultivated stock in place of the natural branches which had been cut off; but this should cause the grafted shoot to fear for itself, rather than to be vain. The fable is awkwardly developed, especially when it is suggested that the grafted shoot may in turn be cut off and the natural branches grafted again into their old place—surely the weirdest horticulture! And Paul appears to be quite unconscious that "the Gentiles" are an entity only to a Jew; there was no sense of unity, merely as non-Jews, among the heterogeneous peoples of the city and the Roman provinces. The lasting interest of the passage lies chiefly in its reflection of Paul's view of the church as the true continuation of the historic community of Israel, branching from the one ancient root. For all his radical critique of Judaism, he never ceases to hold the Christian faith firmly in unity with its OT inheritance; and the continuity is not solely or even primarily in the realm of thought—it is the organic continuity of a living community (vss. 17-24).

The "mystery" of the final salvation of all Israel is now unveiled. Alienated though they now are through disobedience, God still purposes to show them mercy, "for the gifts and the call of God are irrevocable." Here the apostle seems to abandon his fundamental distinction between the spiritual Israel and the Israel of natural descent (9:6-7), and the whole conception of an elect remnant (11:5-7). He reverts again to the notion that God has given his promise to all Israelites without distinction: "As regards election they are beloved for the sake of their forefathers." Despite this inconsistency, there remains the great thought that even in unbelief and hostility they are still in God's hands, and his purpose of mercy will in the end triumph over their present disobedience (vss. 25-32). And in this confidence that even the severity of God issues at last in the manifestation of his mercy, Paul bursts into a noble prayer of adoration and wonder (vss. 33-36).

6. Ethical instruction. In his other letters, the ethical instructions and exhortations of Paul appear to arise directly out of disorders or problems that have actually come to light in the life of the particular church to which he is writing. This is most obvious in I Corinthians (see especially 1:10-12; 5:1; 7:1; 11:17), but it is almost as evident in Philippians, Galatians, Colossians, and the Thessalonian letters. In the case of Romans, it is not at all certain that the apostle has any specific knowledge of the moral and spiritual condition of his readers or of any problems that may be causing them concern. At the most, he may possibly have heard that there were divisions, and even some acrimony and censoriousness, in the Roman church over the scruples of some members in matters of foods and of the observance of holy days; for he makes this the subject of a long and earnest discussion (14:1-15:13). Yet even here, it seems likely that he is writing out of his wealth of experience with other Gentile churches, in the knowledge that Rome will need much the same kind of instruction as was required by Corinth. The ethical section of Romans (12:1-15:13), like the great doctrinal exposition of the previous chapters, thus takes on something of the nature of a general treatise. Paul here sets forth the main lines of his ethical teaching, not at all in the manner of an essay on moral philosophy, but in the form of an appeal to Christian believers to live in accordance with the gospel of the grace of God.

The first two verses of the section (12:1-2) form the rubric under which the whole body of instruction and exhortation stands. Paul is giving us an ethic of redemption, not a system of morals applicable to mankind in general. He has made it abundantly clear that man in his natural state is not capable of moral achievement: those who are in the flesh cannot please God (8:9). He is addressing his appeal to those who are in the Spirit, in whom the Spirit of God dwells. The moral appeal thus rests upon the experience of redemption, the "mercies of God"; it requires, first of all, the offering of the whole being in sacrifice to God, the rejection of the pressures of conformity to the "world" or "age" in which we live, and the complete inward transformation "by the renewal of the mind," which issues in practical obedience to the will of God. The moral life of the Christian, that is to say, is not determined by his own nature as man or by his environment, but by his relationship to God in Christ.

Further, this is an ethic of the church, of participation in the corporate life of the Christian community. For Paul, the Christian is not envisaged as a practitioner of private virtue, but as a member of the body of Christ, living in a nexus of mutual responsibilities and benefits. He is formed for the life of the church, as Aristotle's man was held to be formed for the life of the city. He is therefore under obligation to use the gifts of grace (*χαρίσματα*; vs. 6) which God had bestowed upon him for the benefit of the whole society of faith. This passage (vss. 3-13) reads like a summary of the longer discussion of the same theme in I Cor. 12.

But the church lives in the midst of a pagan society, under a pagan government, and the apostle

must show how the Christian is to behave toward his pagan neighbors and governors. He is called to return good for evil, without taking vengeance into his own hands, to "overcome evil with good" (vss. 4-21). The powers of government derive ultimately from God, and are a terror to wrongdoers; the Christian must obey his rulers, not out of mere dread of the punishment which attends disobedience, but "for the sake of conscience," recognizing that they are servants of God and exercise their functions under his authority (13:1-7). Paul is far from conceiving Christianity as a proletarian revolution against the tyrannies of a master class! This positive view of the state as an organ of the divine government of the world has had a profound influence upon the relations of the church with the state throughout history; but it must, of course, be recognized that it does not provide in itself an immediate answer to all the problems, especially in the new form which they take in the presence of totalitarian governments. It remains true that civic responsibilities fall within the realm of religious duties for a Christian, whatever tensions may be occasioned by a conflict of loyalties.

The whole duty of the Christian may be summed up under the one commandment, which embraces all the moral obligations of man: "You shall love your neighbor as yourself" (vss. 8-10; see LOVE IN THE NT). The nearness of the great day of salvation should spur us to the complete renunciation of evil and complete dedication to Christ (vss. 11-14).

A particular problem of moral theology, arising out of the ramifications of the sacrificial system of ancient paganism, gives the apostle occasion to teach great lessons of tolerance, humility, respect for the opinions and even for the scruples of others, and consideration for the weak (14:1-15:13). The problem itself—whether Christians are free to eat meat which has been offered for sale after a rite of sacrifice to local deities—no longer exists for us; but the apostle's teaching carries us beyond the limits of the particular problem to the underlying principles which are to govern the Christian approach. Nothing is more characteristic of Paul than this habit of penetrating—and leading his readers to penetrate—beneath a particular or local problem to the fundamental principles of Christian truth which determine the Christian's answer. So here he leads us to see that we must look upon the brother whose scruples we do not share, or who does not share our scruples, not as a morally inferior person, but as one whom God has accepted. How then shall we presume to pass judgment on him? We must be concerned rather with the account which we must give of ourselves to God (14:1-12). What is indifferent to you may be more than a needless scruple on the part of your brother; it may be a stumbling block to him. Then you must set his welfare above your own liberty, for "if your brother is being injured by what you eat, you are no longer walking in love. Do not let what you eat cause the ruin of one for whom Christ died" (vs. 15). Our regard for our brother must be measured by the infinite value that Christ has set on him, and for the sake of his conscience we must limit our freedom (vss. 13-23). And the apostle supports his teaching by the example of Christ himself (15:1-2).

7. Text. The major problems of the transmission of the text of the letter have been dealt with in §§ 1-2 above. As with all the NT books, the textual tradition is excellent, immeasurably superior to that of any other ancient literature. The greater part of the text of chs. 5-16 is included in the Chester Beatty Papyrus Codex of the Pauline letters (P⁴⁶), written not much later than A.D. 200, probably at Alexandria. It provides confirmation of the substantial accuracy of the general MS tradition, which begins with the great fourth-century codices Vaticanus (B) and Sinaiticus (Ⲱ) and continues with hundreds of additional Greek MSS; early versions in Coptic, Latin, and Syriac; and innumerable citations in the works of the early fathers. Such a mass of evidence inevitably presents us with thousands of variant readings; but it is surprising to find how seldom there is real reason for dispute over the reading to be preferred. A few examples of particular interest may be noted.

5:1: The reading ἔχωμεν (subjunctive; "Let us have [peace with God]") against ἔχομεν (indicative; "we have") is supported by an overwhelming weight of MS evidence. In this instance, some good commentators feel obliged to set aside the evidence of the MSS and read the indicative. One scholar holds the subjunctive to be an error and suggests that this error goes back to the autograph—the scribe took the word down wrong from the lips of Paul! But it must be said that the difficulty of interpreting the subjunctive is not so great as to justify the rejection of the MS evidence.

10:9: Here Codex B, with some Egyptian support, has the striking reading: "If you confess the word with your mouth, 'Jesus is Lord'" (ἐὰν ὁμολογήσῃς τὸ ῥῆμα ἐν τῷ στόματι σου ὅτι κύριος Ἰησοῦς), while virtually all other MSS omit "the word" (τὸ ῥῆμα) and have the accusative κύριον Ἰησοῦν in place of the direct quotation ὅτι Κύριος Ἰησοῦς. In this instance, the reading of B cannot be explained as a scribal corruption. It adds great vigor to the phrase, lifting it out of the commonplace, summing up "the word of faith which we preach" (vs. 8) as the proclamation that "Jesus is Lord." Despite the lack of supporting attestation, we are almost forced to conclude that Codex B has preserved the legitimate text.

13:1: Here the Beatty Papyrus lends unexpected support to the Western reading, which would be rendered: "Be subject to all governing authorities."

16:24: The Beatty Papyrus agrees with the great Alexandrian witnesses in omitting this verse, which is included in virtually all the minuscules and in some important witnesses to the Western text.

F. W. BEARE

ROME (CHURCH) rōm. This is an attempt to put together all that we can learn about the Christian community of Rome in the NT period from the meager and fragmentary materials available to us. These consist of: (a) a few references, some of them doubtful, in classical writers (Suetonius, Tacitus); (b) inferences that may be drawn from Christian writings addressed to the Roman church (letters of Paul and of Ignatius, and possibly Hebrews), or emanating from it (I Clement; probably Paul's Imprisonment letters—Colossians and Philemon, more doubtfully Philippians, and Ephesians if it is regarded as Pauline; probably also Mark, and perhaps I Peter); (c) occasional references elsewhere in the NT (Acts; the Pastorals); (d) fragments of tradition preserved in later Christian writings, where a few grains of fact may be winnowed from the heaps of legend; and (e) a modicum of archaeological evidence, extremely difficult to evaluate.

1. **Origins.** It is probable that Christianity came to Rome very early in the apostolic age, but nothing is known about the founding of the church there. According to Acts 2:10, there were "visitors from Rome, both Jews and proselytes," among the crowds who heard Peter's first sermon on the day of Pentecost, and it has been suggested that these would surely carry the gospel to their fellow citizens. Apart from the difficulty of taking the Pentecost story as a baldly factual narrative, it must be noted that "every nation under heaven" (Acts 2:5) could equally well be supposed to have received the gospel early, through the representatives who were present at Pentecost. One tradition, preserved in the pseudo-Clementines, attributes the first preaching of the gospel in Rome to Barnabas; another, more widely held and almost official, reports that Peter came there as early as A.D. 42. None of this can be taken seriously.

The first trace of Christian activity in the capital is probably to be found in the words of Suetonius (*Life of Claudius* 25), who tells us that Claudius "expelled the Jews from Rome because they were continually rioting at the instigation of Chrestus." Even this reference is doubtful, for Chrestus may be the name of a Jewish agitator; but it seems likely that "Christus" is meant, and that Suetonius is giving us a garbled reference to disturbances in the Jewish community over the propagation of the gospel, perhaps at the time of its first introduction. Aquila and Priscilla, Paul's associates at Corinth, were expelled from Rome under this edict (Acts 18:2), and as there is no intimation that they were converted by Paul, it would seem that they had been members of a Christian group in Rome. There is reason to hold, therefore, that Christianity came to Rome sometime before the year 50, and that it drew its first members from the ranks of the synagogue, as happened so frequently elsewhere.

2. **Character.** Paul's Letter to the Romans, written no later than 58 and perhaps as early as 53, throws no great light upon the character of the Roman community or upon the conditions prevailing within it. Paul had not yet been to Rome himself,

and was dependent upon the reports of others for such knowledge as he possessed. His words are based upon the assumption that he is writing to a predominantly Gentile community (see, e.g., Rom. 1:13: "I have often intended to come to you . . . in order that I may reap some harvest among you as well as among the rest of the Gentiles"); he even feels that he must warn them not to despise the Jews, the natural branches of the olive tree into which they have been grafted, that they may share its richness (Rom. 11:17-19). At the same time, he knows that some of his readers will be Jews (2:1-3:20), and he can speak of Abraham as "our forefather according to the flesh" (4:1). And, indeed, the whole argument against the possibility of justification by the works of the law presupposes that the community has had some indoctrination in the Jewish insistence on the "righteousness which is based on the law" (10:5), and needs to be schooled further in the meaning of the "righteousness that comes from God" (10:3)—the "righteousness of God through faith in Jesus Christ for all who believe" (3:22).

The question will always arise of how far his exposition is based on the particular character and needs of the Roman community, and how far it reflects simply his own experience of the problems and needs of any Gentile church of the time. Yet some confirmation of the supposition that the church at Rome had a Jewish cast is afforded by a passage from the fourth-century Latin commentator known as Ambrosiaster, who claims that "it is generally admitted [*constat*] that in the time of the apostles there were Jews . . . living in Rome; those among them who had become believers delivered to the Romans the tradition that while professing Christ they should keep the law." He holds that they should be praised rather than blamed, for "without seeing any miracles . . . or any of the apostles, they accepted faith in Christ, though according to a Jewish rite." But is this properly regarded as a confirmation from an independent tradition, or is it an inference drawn by Ambrosiaster from the letter itself? Is he explaining how it came that the great Roman church needed to be taught that we "have died to the law through the body of Christ, . . . dead to that which held us captive, so that we serve not under the old written code but in the new life of the Spirit" (Rom. 7:4, 6)?

3. **Literary sources.** The tradition that Philipians, Colossians, Philemon, and Ephesians were written from Rome has been challenged by many modern scholars in favor of the hypothesis that they were written from Caesarea, or earlier still, from Ephesus. Ephesians tells us nothing of the church from which it is written. Colossians and Philemon tell us something of Paul's companions, and of his conversion of the fugitive slave Onesimus; in Col. 4:11, it is intimated that Paul was not being supported by Christian Jews, except for Aristarchus, Mark, and Jesus Justus: "These are the only men of the circumcision among my fellow workers . . . , and they have been a comfort to me." Philipians likewise mentions division in the community over the attitude toward Paul: "Most of the brethren have been made confident in the Lord because of my imprisonment, and are much more bold to speak the

word of God without fear"; but there are some who "preach Christ from envy and rivalry, . . . out of partisanship, not sincerely but thinking to afflict me in my imprisonment" (Phil. 1:14-17). In the same letter greetings are sent from "those of Caesar's household" (4:22); and we are told that "it has become known throughout the whole praetorian guard . . . that my imprisonment is for Christ" (1:13). If this letter was written from Ephesus or from Caesarea, the words need mean no more than that there are Christians in the imperial civil service ("Caesar's household") and in the governor's headquarters (the praetorium, not "praetorian guard"); but if the tradition of a Roman origin can be maintained, they will suggest that the gospel has made its way into the imperial court itself and into the emperor's bodyguard, and that the Roman church has ceased to be—if it ever was—entirely proletarian.

The personal references in the Pastorals can be adduced only with the greatest reserve; few critics now regard these letters as authentic, and even if it is held that they embody some genuine Pauline fragments, no one can tell with certainty when or where they may have been written. Two passages in II Timothy deserve particular attention; if we can persuade ourselves that Paul wrote them, and wrote them from Rome, they will throw some light on the conditions of his imprisonment and his relations with the Roman church. In II Tim. 1:15-18, the writer speaks of a general alienation from him of Asian Christians, naming two of the leaders; and he speaks with feeling of Onesiphorus, "for he often refreshed me; he was not ashamed of my chains, but when he arrived in Rome he searched for me eagerly and found me." This suggests that the Roman church so far turned against Paul in his imprisonment that none of its members could even tell Onesiphorus where he was to be found; Onesiphorus was obliged to make his own search. The second passage (II Tim. 4:9-17) likewise suggests that Paul was deserted by many of his closest friends, and that he was given no support at his first appearance in court (vs. 16). But we must hesitate to form judgments on the basis of materials supplied by a pseudonymous writing.

Tacitus (Ann. XV. 44) and Suetonius (*Life of Nero* 16) tell of the mass persecutions which the Roman church suffered under Nero, but give no useful information about the nature of the community, except that it was very large: Tacitus speaks of a "mighty multitude" which perished amid the most horrible tortures. Both these Latin writers hold that the punishment was justified; the Christians were detested for their evil practices, for their hatred of the human race (Tacitus); they were a "race of men given to a new and deadly superstition" (Suetonius). This is, of course, no more than a retailing of popular calumnies. According to the tradition, Paul and Peter were both put to death in this persecution, which began in 64.

Mark, the earliest gospel, probably made at Rome within the decade following the Neronian persecution, may be regarded as the deposit of the tradition concerning Jesus in the scope and form wherein it was known and prized by the Roman church at this time. Its central emphasis on the way of the cross is

not, indeed, peculiarly Roman; it is entirely in keeping with the emphasis of early Christian preaching and piety as reflected in the Pauline letters (the "preaching of the cross"; "Christ crucified"; "crucified with Christ"; "baptized into his death"; etc.). Yet it derives an added poignancy from the experience of martyrdom through which the church had been passing; and the Christ of Mark is under one aspect the great exemplar of martyrdom, the heroic "pioneer and perfecter of our faith, who for the joy that was set before him endured the cross, despising the shame" (Heb. 12:2). As one of the principal sources of Matthew and Luke, as well as in itself, this gospel must be acknowledged to be the first of the great and enduring contributions made by the church of Rome to catholic Christianity. Negatively, it must be said that Mark does not confirm the suggestion that the Roman church had an important Jewish element; it is distinctly a document of Gentile Christianity.

The Emperor Domitian (81-96) toward the end of his reign sentenced many Romans of noble family to death or banishment. Among those executed were his own cousin the consul Flavius Clemens, and a former consul, M. Acilius Glabrio; Domitilla, the wife of Flavius, was banished. It is often affirmed—with more confidence than the evidence permits—that these three suffered as Christians. The catacomb of Domitilla and that of Priscilla, who may have been the wife of Glabrio, are among the earliest Christian cemeteries at Rome, but there appears to be no evidence for their use by Christians as early as the first century. The letter sent to the Corinthian church by the Roman church, known to us as I Clement, which was probably composed toward the end of the first century, begins with a reference to a succession of calamities which had recently burst suddenly upon the Roman community, but gives no indication of their nature.

It is held by some critics that Hebrews was addressed to the Roman church at about this time, and was an appeal to it to assume the responsibility incumbent upon it of teaching other churches; it found a quick response in I Clement, addressed to Corinth, and in I Peter, addressed to the provinces of Asia Minor. The date and destination of Hebrews are as much in doubt as the name of the author; but it will be agreed that about this time the Roman church began to acquire a position of leadership among the churches. It intervened at Corinth, through I Clement, to deal with an internal dispute, a challenge to the established authorities within the Corinthian church; and less than twenty years later, Ignatius of Antioch addresses it in terms of marked respect, and employs phrases which suggest the recognition of some kind of primacy ("presides in the chief place of the Roman territory"; "presiding [προκαθήμενη] in love"). The significance of these phrases is much disputed. It is perhaps more important that neither Clement nor Ignatius makes any reference to a Roman bishop; in both letters it is the Roman church that is in view, and there is no indication that it was monarchically governed. This is especially remarkable in the case of Ignatius, who is concerned above all things to exalt the authority of the episcopate. I Peter, addressed to the churches of the Asiatic

provinces at this period, is generally held to have been written from Rome, but it throws no light upon the life of the Roman community, unless we can give credit to a recent theory that it is a liturgical document issued by Rome for the guidance of other communities (a "Paschal liturgy" [F. L. Cross]; *ein urchristliches Gottesdienst* [H. Preisker]). See PETER, FIRST LETTER OF.

All the documents addressed to the Roman church or issuing from it during this period, and until the end of the second century, are in Greek. The Roman Christians of apostolic and postapostolic times were Greek-speaking, drawn mainly from the great Levantine population of the city. Latin Christianity did not begin in Rome, but in North Africa.

1. **Description.** The city is described in the Natural History (III.66-67) of the elder Pliny: "In the principate and censorship of Vespasian and Titus, in the 826th year after the city's foundation (A.D. 73), the walls of Rome, embracing the seven hills, measured 13.2 miles in circumference. The city is divided into 14 districts, and has 265 intersections with guardian *Lares*, or titular deities. A measurement running from the milestone set up at the head of the Roman Forum to each of the city gates—which today

From E. G. Kraeling, *Bible Atlas*, copyright by Rand McNally & Co.

number 37 if the Twelve Gates are counted as one and the seven of the old gates that no longer exist are omitted—gives a total of 20,765 miles in a straight line. But the measurement of all the thoroughfares block by block, from the same milestone to the outermost edge of the buildings including the Praetorian Camp, totals a little more than 60 miles. And if one should consider in addition the height of the buildings, he would assuredly form a fitting appraisal and would admit that no city has existed in the whole world that could be compared with Rome in size. On the east it is enclosed by the Rampart of Tarquin the Proud, a work among the leading wonders of the world, for he raised it as high as the walls where the

15. The ruins of the Temple of Mars in the Roman Forum

approach was level and the city most exposed. On the other sides it was protected by lofty walls or steep hills, but the increasing spread of buildings has added many suburbs." (Orig. tr.)

Like modern cities, Rome had expanded from a central core. The seven hills (Capitol, Palatine, Aventine, Caelian, Esquiline, Viminal, Quirinal) rising to the E of the Tiber Valley were surrounded (except for the Esquiline) by the Wall of Servius, built in 378 B.C., and the areas between them were drained into the Tiber. The Forum Romanum,* center of civic activities, was bounded by four hills; on the nearby Capitol were temples,* the greatest being that of Jupiter (rebuilt by Augustus); on the Palatine were the great houses and palaces of the rich and the emperors; the Caelian was dominated by the great temple of the deified Claudius; and to the NE, on the edge of the Quirinal, were the newer forums of Caesar and Augustus. Figs. ROM 14-15.

2. **Administrative divisions.** Under Augustus the city was divided into the fourteen districts mentioned by Pliny; they were governed by magistrates annually selected by lot. Beginning in the SE and running in a rough circle counterclockwise, they were as follows: (a) Porta Capena, (b) Caelimontium, (c) Isis and Serapis, (d) Templum Pacis, (e) Esquiliae, (f) Alta Semita, (g) Via Lata, (h) Forum Romanum, (i) Circus Flaminius, (j) Palatium, (k) Circus Maximus, (l) Piscina Publica, and (m) Aventinus. Across the river was (n) Trans Tiberim. Tacitus tells us (Ann. XV. 40.4) that the fire in Nero's reign left only four districts untouched, while three were completely leveled.

3. **Buildings of the early Empire.** During the last century of the Republic much building activity had been going on at Rome. We need note only Sulla's temple of Jupiter Capitolinus and his Tabularium, Pompey's great theater decorated with countless statues removed from Greece, and Caesar's temple of Venus Genetrix. Caesar's murder prevented his rebuilding the center of the city, and his plan, modified, was carried out only by Augustus.

After Augustus' victory at Actium (31 B.C.) he proceeded to make Rome a city of marble rather than of brick—though the marble was a veneer over the structural brick or concrete. A new Senate house

16. The Pantheon at Rome

and the mausoleum of the Julian family were erected in 29, and in the same year the temple of Caesar was completed and dedicated. In 28 the Senate authorized Augustus to rebuild or restore eighty-two temples which were in need of repair, and he also built a great temple of Apollo near his own house on the Palatine. The next year his counselor Agrippa erected the Pantheon* on the W side of the Campus Martius. Rebuilt by later emperors, it still bears the inscription "M. Agrippa L. F. Cos. Tertium Fecit." The most important of several altars erected by Augustus was the Ara Pacis Augustae, consecrated in 9 B.C. Other important building operations included the Basilica Julia in the Forum, the Theater of Marcellus, various edifices in the Circus Maximus and the Campus Martius, and three aqueducts. Fig. ROM 16.

Under Tiberius less building activity went on, but he began the temple of the deified Augustus (finished by Caligula) and erected a palace on the Palatine (Domus Tiberiana) and a camp for the praetorian guard. Caligula began a circus W of the Tiber (finished by Nero) and added a wing to the palace of Tiberius. The more practical-minded Claudius devoted his attention to the water supply, building aqueducts (in part still standing) from Subiaco to Rome.

Nero finished the circus near the Vatican and, taking advantage of the land clearance provided by the fire in 64, proceeded to erect his Golden House in a large park, with an elaborate approach from the Forum. A colossal statue of Nero stood in this approach, which consisted of porticoes and colonnades. His successors continued the building program.

18. The Arch of Titus, with the Colosseum in the background

Vespasian built the Colosseum (finished by Titus);* Titus and Domitian erected baths. Vespasian also began the triumphal Arch of Titus* to commemorate the victories in Palestine. All the Flavians also erected temples and palaces in the center of the city. Figs. ROM 17-18.

4. Living conditions. The public buildings of Rome were magnificent, more than worthy of the emperors who erected them. The houses of the rich, usually on the various hills of the city, were sumptuous. But most Romans lived in tenements (*insulae*), often three or four stories high, and subject like their modern equivalents to collapse or burning. The *insulae* were surrounded by narrow, dirty, dangerous, and noisy streets with an incessant flow of traffic, day and night. On the other hand, the people generally were provided with "bread and circuses" by the state. Since 58 B.C. the majority of them had received a free distribution of wheat; water was also free, and wine was ordinarily very cheap. Admission to the games was also free, and such games, including chariot racing, gladiatorial contests, and theatrical performances, attracted huge crowds. The Circus Maximus could hold 150,000 people; the theater of Pompey, 40,000. By the time of Nero, even slaves were admitted.

5. Police and fire fighting; crime. Under Augustus a kind of police force had been created, consisting of three "urban cohorts" whose prefect was to maintain order in the city. He also established seven cohorts of *vigiles* for fighting fires; each cohort was responsible for two of the fourteen districts of the city. Under ancient Roman law severe penalties for incendiarism had already been provided. No statistics are available for the prevalence of murder, or other crimes against persons or property. Prostitution

was not outlawed but regulated; prostitutes, often foreigners, had to be registered with the magistrates, pay a tax, and wear distinctive clothing.

6. Foreigners in Rome. During NT times there was a great influx of foreigners into Rome, especially from the East. Like every great city, Rome was a magnet for the ambitious, the adventurous, and the lazy. Romans constantly complained that Rome was no longer Roman. The foreigners tended to remain in rather isolated groups. They brought their own traditions, cultural and religious, and often formed societies, professional and other, for mutual aid, especially in providing for funerals. They were gradually Romanized and urbanized, but in the process they modified the meaning of Rome.

Two examples of religious groups originally foreign may be given. In the first place, under the Republic conservative magistrates viewed the worship of Isis with great disfavor, while others, in search of popular support, tended to allow the construction of Isiac shrines. Even in the reign of Augustus one of the city districts (*see* § 2 *above*) was apparently named for the Egyptian deities, though it was not until the second or third century that temples of Isis could be described as "everywhere" (*Scriptores Historiae Augustae Caracalla* 9). Archaeology suggests that the goddess had a large number of private chapels even earlier. In the second place, the spread of the worship of the Persian Mithra, at the end of the first century and afterward, led to the construction of many places of worship in Rome, though not, apparently, on the Palatine or Capitoline hills. Excavations reveal the existence, at various times, of about forty-five Mithraea; it has been conjectured that there may have been a hundred of them.

7. Jews and Christians. a. Location of groups. The principal Jewish quarters of the city were in the Trastevere region, in the Subura, on the edge of the Campus Martius, and near the Porta Capena—in other words, in the W, central, NW, and SW sections. Presumably the first Christians lived or met in the same quarters. There were at least thirteen Jewish synagogues at Rome, though not all of them may have existed in the first century. They were those of (a) the Augustesians (dedicated to Augustus), (b) the Agrippesians (to Agrippa), (c) the Volumnesians (to Volumnius, perhaps Roman governor of Syria), (d) the Herodians (to Herod?), (e) the Campesians (Campus Martius), (f) the Siburesians (Subura district), (g) the Vernaculi (Jewish slaves born in Rome), (h) the Calcarensians (lime-kiln workers), (i) the Tripolitans (from Tripolis in Africa), (j) the Elaians (from Elaia, in Mysia?), (k) the Hebrews (old conservative traditionalists?), (l) the Sekeni (?), and (m) the Calabrians (?). The names thus come from the persons to whom the synagogues were dedicated (a-d), from districts in which they were located (e-f), or from the origins or trades of the members (g-j). The meaning of the last four is not entirely solved.

b. Peter and Paul. During Nero's reign some Christians were martyred in the Gardens of Agrippina, W of the Tiber in the Campus Vaticanus and near Nero's new Circus. Were Peter and Paul among them? Our earliest evidence for their martyrdom at Rome is given in I Clement, written there *ca.* 96.

Clement seems to refer to both Peter and Paul as martyrs at Rome, and he goes on to speak of the tortures of Christian women in a way that recalls the mythological plays given by NERO. Ignatius of Antioch is another witness; he first speaks of his own impending death and then refers to the apostles Peter and Paul, who gave commands to the Roman church (Ign. Rom. IV.2-3). While neither of these witnesses provides absolute proof that Peter and Paul were martyred at Rome, neither of them disagrees with the statement of Gaius of Rome (*ca.* 190): "I can point out the trophies of the apostles. For if you are willing to go to the Vatican or to the Ostian Way you will find the trophies of those who founded this church" (Euseb. Hist. II.25.7). The word "trophies" is difficult to translate. It can refer to monuments or memorials; it is also used by Christian writers to refer to relics of the martyrs. Probably, though not certainly, Gaius believed that Peter had been buried on the Vatican and Paul on the Ostian Way. The probability would be increased if we could be certain that he was arguing against Montanists, who believed that John lay buried at Ephesus. On the other hand, graffiti in the catacombs under St. Sebastian, on the Appian Way, clearly suggest that at a later time there were Christians who believed that Peter and Paul were buried there. A translation of relics to St. Sebastian may have taken place at the time of the persecution under Valerian in 257, around the time when Pope Xystus and his deacons were arrested in the catacombs. And the relics may have remained there until Constantine built the basilicas of St. Peter and St. Paul. Alternatively, the St. Sebastian graffiti may reflect only a cult rival to the Vatican's.

How early was there concern for the relics of martyrs? Interest in such matters was widespread in paganism, but the earliest evidence for Christian concern is provided in the Martyrdom of Polycarp (156 or 167): "We took his bones, more precious than jewels and finer than gold, and put them in a suitable place" (XVIII.2). At an earlier time, Ignatius wrote the Romans that he hoped that the wild beasts would become his tomb and would leave no trace of his body (Ign. Rom. IV.2), and, indeed, there is no trace of the preservation of his relics. Is it likely that in Nero's time Christians would have been allowed to bury the bodies of those condemned for arson? At Lyons in 177 the bodies of martyrs were thrown into the Rhone. It is impossible to tell whether Peter and Paul were buried by Christians or not.

Some light on the belief at Rome around the time of Polycarp is cast by excavations under St. Peter's. In 1939 the pavement of the basilica built by Constantine was found, along with pagan graves and sarcophagi beneath it. Constantine's church had been built on a steep slope on the Vatican hill, and in the midst of a pagan cemetery. These difficulties had been faced so that a little monument, part of a wall built between 160 and 170, could occupy a central position in front of the apse of the church. This monument very probably marks the spot where second-century Christians believed Peter had been martyred, if not buried; but there are no certain traces of a grave beneath it, even though some bones were found.

The probable conclusion to be drawn from the literary and archaeological evidence is that both Peter and Paul were martyred at Rome in the time of Nero, and that in the second century memorials were erected to mark the traditional locations of their martyrdoms, on the Vatican and the Ostian Way (Gaius). In view of the difficulties presented by the cult at St. Sebastian, it is not possible to say with any certainty that they were buried at these locations.

c. Catacombs. Both Jews and Christians had catacombs at Rome; these were subterranean rooms and passageways used, not for meetings, but for the burial of the dead. Six Jewish catacombs have been discovered, and many more Christian ones; among the latter, those of Domitilla, Priscilla, and Callixtus are the earliest, though they are no earlier than the latter half of the second century. They were often richly decorated with wall paintings of religious themes, most of which come from the fourth century (there are a few second- and third-century examples). The figure most commonly portrayed is the good shepherd with his sheep on his shoulder; other examples include Jonah, Noah, Abraham and Isaac, Daniel in the lions' den, the three "children" in the fiery furnace, Susanna and the elders, and the raising of Lazarus. Christian artists obviously owed much to their Jewish predecessors. Since not only Christians but also Gnostics had to bury their dead, there are also catacombs with themes at least probably Gnostic on their walls.

d. Early churches. Questions about Christian ownership of meeting places arose in the third century, and we know that early in the fourth there were at least forty churches at Rome. The most prominent among them were three great basilicas built by Constantine: St. Peter's, St. Paul's outside the walls, and St. John Lateran. St. Maria Maggiore was also a fourth-century foundation. Thus the church at Rome "emerged from the catacombs" to enjoy the warmth and light of imperial favor.

ROOF [גג, קוּרְיָה, סְדָעָה]. In ancient Middle Eastern houses the flat roof, covered with clay, was easy of access and a place where members of the family spent a good amount of time (cf. Josh. 2:6; I Sam. 9:25; II Sam. 11:2; Mark 2:4; Acts 10:9). See ARCHITECTURE; HOUSE; UPPER ROOM. O. R. SELLERS

ROOF CHAMBER. See CHAMBER.

ROOM. Words translated "room" have other primary meanings—e.g.: מְקוֹם and τόπος, "place"; מְרֻחָב, "broad place"; קֶן, "nest." See ARCHITECTURE; CHAMBER; HOUSE; UPPER ROOM.

ROOT [שֵׁרֶשׁ; ῥίζα]. A word used almost exclusively in figures of speech—e.g., "the root of the matter" (Job 19:28; cf. Job 28:9; 36:30; I Tim. 6:10; for Job 30:4, see BROOM).

The root of a man is the resource and security of his life (Jer. 12:2; 17:7-8 [cf. Ps. 1:1-3]; Col. 2:7). Similarly, the roots of a family (Deut. 29:18; cf. Heb. 12:15), a dynasty (Isa. 14:29), or a nation (Ezek. 31:7) represent its anchorage in the past and its present security, the foliage and fruits describing the extent and quality of its posterity (Deut. 29:18; Isa. 37:31; Ezek. 31:5-9). "Uprooting" may then signify judgment and destruction (I Kings 14:15; Pss. 9:6; 52:5; Jer. 24:6; Matt. 15:13; cf. different figures in Isa. 14:30; Amos 2:9; Matt. 3:10).

Israel is often described as a plant under the aspect of Yahweh's election (Ps. 80:15; Rom. 11:16-18), judgment (Isa. 5:24; cf. Matt. 3:10), and restoration (Isa. 27:6; Hos. 14:5-6; Amos 9:15).

The expectation of a coming great ruler from the Davidic dynasty produced the figures "root of Jesse" (Isa. 11:10; cf. vs. 1; Rom. 15:12) and "root of David" (Rev. 5:5; 22:16; see BRANCH; MESSIAH [JEWISH])—i.e., the dynasty or the successor in whom the dynasty is epitomized and brought to perfection. Isa. 53:2 probably reflects the language of Akkadian TAMMUZ mythology, used to describe the threatened existence of the "servant."

ROPE [חבל, עֵבֶת, σχοινίον]. A thick cord formed of twisted strands of leather, sinews, vines, or plant fibers, used for many agricultural, military, nautical, and domestic purposes.

Neither Hebrew nor Greek distinguished between rope and cord, and which word is used in translation depends on the context. The RSV renders "rope" more often than the KJV. The art of rope making is older than either spinning or weaving, and Egyptian and Mesopotamian art shows rope in use for a wide variety of purposes, from towing barges to binding captives. Rope was so cheap in Israel that to wear it as part of the garments was a sign of poverty (Isa. 3:24) or submission (I Kings 20:31). While the Bible gives no details of how ropes were made, it testifies to their numerous uses—for harnessing or leading animals (Job 41:2; Isa. 5:18), for fashioning snares and traps (Job 18:10), for tying prisoners (Judg. 15:13; 16:11-12; cf. Pss. 2:3; 129:4; Ezek. 3:25), for hauling stones and tearing down fortifications (II Sam. 17:13), for ship's tackle (lit., "ropes"; Isa. 33:23), for holding a tent ("cords"; Isa. 33:20), as a measuring line or cord (II Sam. 8:2; Zech. 2:1—H 2:5), and for raising or lowering weights (Josh. 2:15; Jer. 38:11). The only NT use of rope is for the tackling of a ship (Acts 27:32, 40).

See also CORD; TACKLE.

L. E. TOOMBS

ROSE [חַבְצֵלֶת, ἡαβησσέληθ; ῥόδον]. The true rose (genus *Rosa*) is not mentioned in the Bible, except for its use in the Greek name Rhoda (Acts 12:13); but there are several references to it in apocryphal literature. The KJV in Song of S. 2:1 translates ἡαβησσέληθ "rose of Sharon," and in Isa. 35:1: "The desert shall rejoice, and blossom as the rose." The RSV preserves

"rose" in Song of S. 2:1, but indicates in the margin that the Hebrew means "crocus," with which it translates the word in Isa. 35:1. It is clear that the Hebrew does not mean "rose," but the identification is disputed. *See* CROCUS.

That the true rose was known in ancient Palestine, at least since Greco-Roman times, is no longer disputed. Apparently the expression in II Esd. 2:19: "seven mighty mountains on which roses and lilies grow," refers to the *Rosa phoenicia* Boiss, well known in mountainous regions of Lebanon and Syria. Wisd. Sol. 2:8 ("Let us crown ourselves with rosebuds") may refer to the same flower. Other references in apocryphal literature to ῥόδον seem more likely to imply the oleander (*Nerium oleander* L.), however, which grows profusely along streams even today. Ecclus. 39:13: "like a rose growing by a stream" (some MSS read: "like a cedar"), and Ecclus. 24:14: "like rose plants in Jericho," clearly fit such an identification. Ecclus. 50:8; Enoch 82:6; 106:2, 10; III Macc. 7:17, other occurrences of ῥόδον, are more difficult to identify; but the oleander might be meant. The Phoenician rose would not fit these contexts.

The so-called "rose of Jericho" sold in Jericho today is not a rose at all but the dried tumbleweed, *Anastatica hierochuntica* L., which opens like a rose when put in water.

ROSETTA STONE רֹזֶט'א. A partly broken copy of a decree honoring Ptolemy V Epiphanes in 196 B.C. The Rosetta Stone was discovered in August, 1799, near the village of Rosetta in the W Delta of Egypt by Captain Bouchard of the French Army, then campaigning in Egypt under the command of Napoleon. The original inscription contained a complete copy of this decree in hieroglyphic Egyptian, Demotic, and Greek. The chance finding of this trilingual text furnished European scholars the necessary key with which to decipher the hieroglyphic and Demotic scripts, a task which was undertaken shortly thereafter with accumulative success by such pioneers as the Swedish diplomat Akerblad, the English physicist Thomas Young, and the brilliant young French scholar J.-F. Champollion. Fig. ROS 19.

Bibliography. J. Friedrich, *Extinct Languages* (1957), pp. 16-26. T. O. LAMBDIN

ROSH רֹשׁ [רֹשׁ, head, chief] (Gen. 46:21). Seventh son of Benjamin. However, the LXX here names him as son of Bela and thus as Benjamin's grandson. Also, Rosh does not appear among the Benjaminite tribal families in Num. 26:38-39; I Chr. 8:1-5. Perhaps "Ehi, Rosh, Muppim," in Gen. 46:21 is a corruption of אֶחִים שׁוֹפְטִים in Num. 26:38-39.

L. HICKS

ROSIN. KJV Apoc. alternate form of NAPHTHA.

RUBEN רֹבֵן. Douay Version form of REUBEN.

RUBY. KJV translation of פְּנִינִים (RSV PEARL in Job 28:18; "jewel" in Prov. 3:15; 8:11; 20:15; 31:10;

CORAL in Lam. 4:7). The real ruby, a crystallized variety of corundum of the same chemical constituency as sapphire but differing in color, is not found in excavated sites of the ancient Near East. The best rubies come from Burma, Ceylon, and Siam.

See also JEWELS AND PRECIOUS STONES.

W. E. STAPLES

RUDDER [πηδάλιον, from πηδός, oar] (Acts 27:40; Jas. 3:4); KJV alternately HELM (Jas. 3:4). Early in the history of boating it must have become apparent that a dugout or canoe could be steered only from the stern paddle, and this principle was subsequently applied to the management of larger vessels. Egyptian sailing boats ca. 2500 B.C. display two paddles at the stern for steering. While shortly after this it was found that one steering oar, controlled by a tiller, would suffice to guide a boat (cf. Herodotus II.96), two paddles were more commonly used in Egypt. Greek ships generally had two steering oars, although Odysseus' sailing craft had only one (*Odyssey* V.255). The use of two paddle-rudders continued into the Roman period, as we know from Acts 27:40 and many other sources. It is probable that such steering oars were operated independently.

See also SHIPS AND SAILING.

Bibliography. A. Neuburger, *The Technical Arts and Sciences of the Ancients* (trans. H. L. Brose; 1930), pp. 490-91.

W. S. McCULLOUGH

RUDDY. The translation of various forms of רָדָה, "to be red," describing an attribute of male comeliness. While the later passages (Song of S. 5:10; Lam. 4:7) refer to the ruddy complexion of vigorous health, the earlier passages (I Sam. 16:12; 17:42) may possibly refer to red hair (cf. Gen. 25:25).

J. A. WHARTON

RUDIMENT. KJV translation of στοιχείον (RSV "elemental spirit") in Col. 2:8, 20. *See* ELEMENT.

RUE [πήγανον]. A strong-smelling perennial shrub with gray-green leaves and lemon-yellow clusters of flowers, *Ruta graveolens* L. (or possibly *Ruta chalepensis* var. *latifolia* [Salisb.] Fiori). It was widely used as a condiment, in medicines, and as a charm. Jesus thus criticized the Pharisees: "You tithe mint and rue and every herb, and neglect justice and the love of God" (Luke 11:42). The parallel passage (Matt. 23:23) has "dill." The facts that Papyrus 45 (third century) in Luke 11:42 reads "dill," and that rue was not subject to the tithe (M. Sheb. IX.1), indicate that "dill" was probably the original word in the saying.

See also DILL; SPICES.

RUFUS ρῦφ'ος [Ῥούφος; Lat. *Rufus*, red-haired]. 1. Son of Simon of Cyrene (Mark 15:21), and brother of Alexander. Though Simon is mentioned in all three Synoptic gospels, his sons are referred to only by Mark. They must have been well known in the community to which the Gospel of Mark was ad-

Courtesy of the Trustees of the British Museum

19. Rosetta Stone

dressed, which is usually believed to have been Rome.

2. The recipient of a greeting in Rom. 16:13; called an outstanding Christian. His mother is included in the greeting, and Paul adds that she acted the part of a mother to him as well.

If Rom. 16 is an integral part of Romans, there is a strong probability that Rufus 1 and Rufus 2 are identical. But the increasing tendency to regard this chapter as a separate letter, addressed to Eph-

esus, would make such an identification of these two men considerably less likely.

F. W. GINGRICH

RUG [רֹגַל]; KJV MANTLE. The covering which Jael put over Sisera (Judg. 4:18) when he entered her tent in flight from Barak. It may have been a rug, a tent curtain, or perhaps a heavy cloak. The versions generally use words denoting heavy wraps used for cold weather and for sleeping, though the

LXX, with δέρις, implies one of the curtains used to partition the tent. E. M. GOOD

RUHAMAH רוֹחַמָּה *rōh hā'mā*. KJV translation of רחמה ("pitied"; RSV "She has obtained pity"), a new name to be given Israel in the day of redemption, denoting the change in God's attitude from anger to mercy (Hos. 2:1; cf. vs. 23).

RULER OF SYNAGOGUE ראש הכנסת; ἀρχισυνάγωγος]. The leader or president of a SYNAGOGUE; a kind of chargé d'affaires whose particular duty was to care for the physical arrangements of the synagogue services. Several men serving in this capacity are named or mentioned in the NT:

a) Jairus, the father of a twelve-year-old girl whom Jesus raised from death (Mark 5:22-43). However, Matt. 9:18 calls him merely "a ruler."

b) An unnamed man who became indignant when Jesus healed on the sabbath (Luke 13:10-17).

c) Those who permitted Paul and his companions to speak in the synagogue at Pisidian Antioch (Acts 13:14 ff).

d) Crispus, a convert to Christianity at Corinth (Acts 18:8). This is probably the Crispus whom Paul baptized at Corinth (I Cor. 1:14).

e) Sosthenes, also ruler of a Corinthian synagogue at the time of Paul's first missionary journey (Acts 18:17). He was beaten in the presence of the proconsul Gallio, though Acts does not say why. Many have identified him with the Sosthenes of I Cor. 1:1, whom Paul calls "brother" and who was evidently known to the Corinthian church. In that case he had gone to Ephesus, at least for a time, after his conversion. See CORINTHIANS, FIRST LETTER TO THE.

PIERSON PARKER

RULERS OF THE CITY. See CITY AUTHORITIES.

RUMAH רוּמָה *rōmā*. The town of Zebidah, the mother of Jehoiakim, and/or her father, Pedaiah (II Kings 23:36). Josephus takes Rumah as the home of Jehoiakim's mother, but he does not locate the place (Antiq. X.v.2). It may perhaps be located at Khirbet Rume, near Rimmon in Galilee.

A place called Ruma was the home of two brave Galileans who attacked the Tenth Roman Legion (Jos. War III.vii.21).

It has also been suggested that Rumah is to be identified with ARUMAH.

Presuming that Jehoiakim's immediate ancestors would be expected to come from Judah, a location in Judah has been sought, and "DUMAH" (דוּמָה), in the vicinity of Shechem, in Josh. 15:52 has been taken as a scribal error for "Rumah." Neither this nor the Dumah in Isa. 21:11 (in Edom) is our Rumah.

W. L. REED

RUNNEL רוּנֵל, *runnel*, watering trough] (Gen. 30:38, 41); KJV GUTTER. Alternately: TROUGH (Exod. 2:16). A watering trough where flocks cared for by Jacob came to drink. In Gen. 30:38, "that is, the watering troughs," has plausibly been taken as an explanatory gloss.

RUNNER. See GUARD.

RUSH, RUSHES [primarily ראגמן]. A reedlike plant, usually associated with river banks and marshes, of the Juncaceae family, particularly those of the genus *Juncus*, and less correctly those of the genus *Scirpus*. The term is used loosely in all English Bibles, to translate several Hebrew words.

See also FLORA § A11; HOOK; PAPYRUS; REED.

J. C. TREVER

RUST [חלאה, disease; ἴος, consumer, devourer; βρώσις, poison]. The biblical terms for rust are associated with various metals and apparently mean "corrosion" generally, something like disease, possibly connected with rust of CEREALS. The rust (KJV "scum") of a "pot" or caldron is a symbol of Jerusalem's "filthy lewdness"; even with repeated intense heatings, the "thick rust does not go out" (Ezek. 24:1-13). A corrosion term in modern metallurgy is "copper disease"; the oxide of copper is green or gray-green, the color of death. The Letter of Jeremiah 6:12, 24, in ridicule mentions rust (βρώσις) on gold and silver ornaments of IDOLS. The NT references to rust are: in Matt. 6:19-20, where the word is βρώσις and precious metals are implied; and in Jas. 5:3, perhaps reflecting Jesus' saying, where the word is ἴος and the metals subject to corrosion are gold and silver.

P. L. GARBER

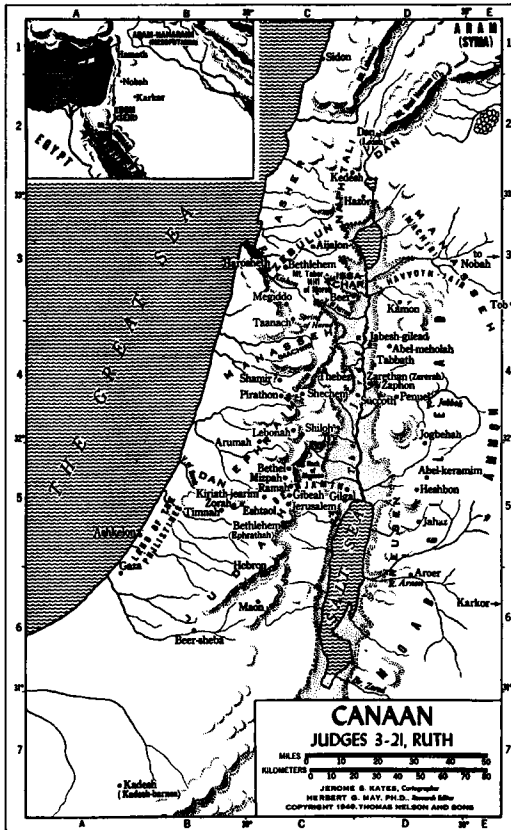

***RUTH, BOOK OF** רוּת *rūth*, see below]. The story of Ruth and Naomi, a tale of human kindness and devotion transcending the limits of national- or self-interest. It is the book of the OT which has long been cited as a perfect example of the art of telling a story.

The name Ruth (רוּת) is traditionally associated with רעיה, "friend, companion," as indicated by the Syriac spelling רעיה (cf. Akkadian *ru'u*, "friend, companion"). A derivation which accounts better for the Hebrew spelling of the name is from the root רוּה, "be satisfied" (with water), "water abundantly," "refresh" (cf. B.B. 14b).

The biblical Ruth was a Moabite woman who had married a Hebrew, a native of Bethlehem in Judah, who was living in Moab. On the death of her husband, she chose to accompany her Hebrew mother-in-law, Naomi, to Bethlehem, instead of returning to her own people. Here she became the wife of Boaz, a kinsman of her husband. Their son was Obed, the father of Jesse, the father of David. Ruth appears, then, as ancestress of David, and so of Jesus, in the genealogy of Jesus Christ (Matt. 1:5).

1. Content
 2. Date
 3. Purpose
 4. Place in the canon
- Bibliography

1. **Content.** A family from Bethlehem in Judah—Elimelech, his wife Naomi, and their two sons—sought refuge in Moab in a time of famine. The two sons took Moabite wives, Orpah and Ruth. When the death of the men of the family left the three women widows, Naomi resolved to return to her

native land. In contrast to Orpah, who yielded to the urging of Naomi and returned to her own people, Ruth declared her complete devotion to her mother-in-law (Ruth 1:16-17), and went with her to Bethlehem. Here, at the time of the barley harvest, Ruth received permission to glean in the fields of Boaz, a kinsman of Elimelech. At the end of the harvest, Naomi sent Ruth to ask protection from Boaz, as next of kin. After one nearer kinsman had legally waived his prior right to buy the family property and provide an heir for Elimelech, Boaz took Ruth as his wife. The son born of this marriage was then celebrated as a son "born to Naomi." The family line was thus preserved through the efforts of Ruth and Naomi, and preserved for the greatest distinction, since this child was to be the ancestor of David.

2. Date. According to the tradition of the Talmud (B.B. 14*b*), Samuel was the author of Judges and Ruth, as well as of the book that bears his name. The story of Ruth has its setting in the period of the judges. The excellent classical style of the book, and the use of a number of archaic verbal forms, are entirely appropriate to this earliest period of Hebrew literature. In its present form, however, the book of Ruth shows considerable evidence of a postexilic date—i.e., sometime between 450 and 250 B.C.

The book begins with the characteristic folk-tale description of a time long past: "In the days when the judges ruled" (1:1). It goes on to explain, as if it were obsolete, a custom still known in the time of the writing of Deut. 25:9: "Now this was the custom in

former times in Israel" (4:7). The genealogy of David (4:18-22) is like genealogies of the postexilic period in both content and language. In content it seems too brief to cover accurately the whole period from Perez to David. It does not appear in the early accounts of David's ancestry in Samuel, but is the same as that given in I Chr. 2:4-13. The same form of the verb "to beget" appears in the genealogies in Ruth, P, and Chronicles (הוֹלִיד in I Chr. 2:4-15, etc.), while a different form appears in earlier writings (יָלַד in Gen. 10:15, etc.). There are other instances where the language of the book suggests the later period. The word for taking a wife (נָשָׂא [1:4]) occurs elsewhere in Ezra, Nehemiah, and Chronicles, while a different verb appears in earlier sources (לָקַח in Gen. 24:4, etc.). Other words are typical of Aramaic or postexilic usage (לָחַץ; עָנָן; שָׁבַר [1:13]; מָרָא [1:20]; קָיָם [4:7]). The content of the book as a whole, with its story of a foreign woman who became a member of Israel's most respected family, suits the special concern of the postexilic period, with the problem of particularism (cf. Ezra 9-10; Neh. 13) and universalism (cf. Isa. 66:18-23; Jonah). In the Hebrew canon Ruth is found in the *Kethubim* or Writings, the third and last section of the Bible to be canonized. The combined evidence of the author's view of the past, the language of the book, its content, and its place in the canon, points clearly to a postexilic date. It seems probable, therefore, that the author used deliberately an archaic style suitable for the kind of story he was telling, and that the book may be dated in the postexilic period.

It seems unlikely, however, that the writer of the present book of Ruth created a fictional story to serve his purpose. The argument of the commentators as to whether the main purpose of the book is to enter the controversy over Israel's relation to foreigners, or to tell an idyll of a story with no polemic stress, is an indication of the diversity of materials within the book. The present climax of the story, with the triumphant naming of the child and statement that Obed "was the father of Jesse, the father of David" (4:17), presents certain difficulties in relation to its context. The name Obed is not suggested by the explanatory saying "A son has been born to Naomi," and the connection with David may well have been an addition to the story. The book as it now stands seems to depend upon at least some earlier materials.

There is no indication, however, that the author of Ruth made use of written sources. The tradition that Ruth was once part of the written book of Judges does not seem probable in the light of the difference in content and feeling between the two books. There is no indication that the genealogy of David goes back to any accurate written source. The author's interpretation of the law of levirate marriage and property redemption is not entirely consistent with the law of Deut. 25:5-10. On the other hand, the perfection of story form which the book shows suggests the possibility of a long oral tradition in the course of which the tale was polished and repolished. The use of exactly the right amount of detail is part of the art of the story—Boaz himself passing Ruth food at the noon break, or Ruth saving the remains

of her lunch to take home to Naomi. The growing suspense is carried through perfectly from the time when Ruth "happened to come to the part of the field belonging to Boaz" to the final threat to the whole scheme when the nearer kinsman announced that he would redeem the property. These sound like elements in a folk tale that have been found successful through many tellings. If this is true, the focus of the tale may have shifted from time to time, and the recovery of the original form of the story is probably impossible. The basis may have been the account of an actual friendship. It may even have been an ancient cultic myth of Bethlehem, in which the harvest ritual, the lamenting woman, and the birth of a new child were all connected (cf. W. E. Staples [see *bibliography*] for a further, and highly conjectural, discussion of cultic elements which may have contributed to the details of the story). Either of these is possible. But whatever the origin, or the date of the original materials, the result is a tale which is a work of art. It is the tale as it now stands, as it has emerged from any process of retelling, which must be considered in the attempt to evaluate the purpose and significance of the present book of Ruth.

3. Purpose. In the opinion of many commentators the achievement of such perfect artistry is a sufficient purpose for the book. Richard Moulton describes the tale as "so delicate in its transparent simplicity that the worst service one can do the story is to comment on it." Judged on the basis of artistry alone, Ruth is clearly an outstanding example of Hebrew literature. It is a delightful short story, beautifully told. The idyllic scene is presented with obvious enjoyment and skill. There is no villain in the story. No reprehensible act is done by any character. But the author has used detail and contrast to such good effect that the difference between ordinary and exceptional goodness stands out clearly against the background of details of common life. Orpah is in no way lacking in dutiful devotion. She is ready to accompany her mother-in-law to a new country, and yields only to a second urging of Naomi to go back to her own people (1:8-14). The nearer kinsman is prepared to accept his responsibility and redeem the property, and yields only when he finds that a marriage is involved which may conflict with his duty to his own inheritance (4:4-6). It is against this background that the unusual magnanimity of Ruth and Boaz is seen in its true perspective. Naomi's final success in bringing about a restoration of the family line is given its proper importance in contrast to her own realistic evaluation of the odds against its likelihood (1:11-13). The only proper conclusion for this tale of heroic perseverance and human kindness is a conclusion of the kind that is given, the greatest reward that a family could receive—its place in the ancestry of David. The story makes an artistic whole. Each detail plays its part, and the conclusion reached after just the right amount of suspense is clearly the right conclusion. In the light of this obvious artistic success, it may well seem an unnecessary perversity to look for any other purpose.

It is true, however, that Ruth, like any good short story, has a theme. A theme mentioned frequently

above is that of human kindness over and above conventional duty. One rabbinic commentator, noting that Ruth does not deal with ritual or legal matters, states positively that it was written to teach "how great is the reward that accrues to those who perform kindly deeds" (Midrash Rabbah, Ruth II.14). Much of the popular appreciation of the book has been in response to this theme, especially as seen in the unselfish devotion of Ruth to Naomi. Ruth's reply to Naomi, beginning with the words: "Entreat me not to leave you or to return from following you; for where you go I will go" (1:16-17), has long been taken as a symbol of true friendship between women, parallel to the famous example of the friendship of David and Jonathan. Here is not simply the loyal devotion to a husband which might be expected from a wife, but devotion to a woman who was both a foreigner and a mother-in-law, beyond any reasonable requirement of duty.

The emphasis of the book, however, is not so much on Ruth's devotion to her mother-in-law, as on the fact that Ruth was accepted in Israel in spite of her foreignness. The point stressed most frequently in the text is that Ruth was a foreigner (1:4, 22; 2:2, 6, 10-13, 21; 4:5, 10). Ruth mentions this twice emphatically when she speaks of Boaz' favor to her (2:10, 13). The adjective "Moabitess" appears at least twice in connection with Ruth where the plot does not demand the title (2:2, 21). Human kindness and devotion are certainly an important theme of the book, but the stress seems to be on the fact that this kindness was not limited by any of the usual prejudices, on the part either of Ruth or of Boaz. Israel Bettan brings out this dual aspect when he describes the theme of the book as the "law of kindness which transcends national boundaries and makes all men kin." It is this double theme, with the emphasis more on a universalism that goes beyond national barriers than on the simple friendship of Ruth for Naomi, that goes through the book as a whole. That "Ruth the Moabitess" could then be the great-grandmother of David is the fitting climax for this theme, and a climax which has caused traditional-minded commentators considerable difficulty (cf. the struggles of Midrash Rabbah to reconcile the exclusion of Moabites required by Deut. 23:3 with Ruth 2:5-6; 4:17).

The concern of postexilic Judaism with this problem of particularism and universalism, and the emphasis of Ruth on the acceptance of the foreigner and on her goodness, is one argument for the date of the book (see § 2 above). In the second half of the fifth century B.C., Nehemiah attempted to put an end to all marriages of Jews with non-Jews on the ground of preserving the original commandment of God (Neh. 10-13; cf. Ezra 9:1-3). Many scholars have taken the book of Ruth as a response to this specific attempt to enforce the separation of Israel from other peoples (see G. A. Cooke, *The Book of Ruth*, p. xiii, for a summary of this position) and have considered the designation of Moab as Ruth's country of origin as the deliberate choice of a nation excluded by the law Nehemiah attempted to enforce (Deut. 23:3), and yet possible historically because of the fact that David turned to Moab as a place of sanctuary for his parents (I Sam. 22:3-4). Others have seen in Ruth an

expression of liberal feeling protesting the later attitude of exclusiveness over the question of accepting proselytes to Judaism. A rabbinic comment on Ruth's going with Naomi (Ruth 1:18) invites the reader to "come and see how precious in the eyes of the Omnipresent are converts" (Midrash Rabbah, Ruth III.5; cf. Ruth 2:12 for the treatment of this issue).

It is difficult, however, to find evidence of specific protest in the book of Ruth. The attitude of the book is certainly incompatible with racial or religious exclusiveness. But there is no obvious polemic or invective. The choice of Moab could be explained on historical, as well as ideological, grounds (I Sam. 22:3-4). It seems impossible, therefore, to limit the purpose of Ruth to an attack against any specific set of wrongs. The book has, rather, a positive purpose: the statement in story form of the possibility of good will and respect for another human being, without any regard for national or religious intolerance. It is precisely this lack of polemic which makes the book of Ruth a positive and lasting witness on the side of universalism in any human situation.

4. Place in the canon. It is certainly partly this theme of universalism that is responsible for the existence of Ruth as a written book of the Bible. Good stories were obviously enjoyed in ancient Israel (cf. Gen. 12:10-20), but for a story to be written down, and then to be included in the Bible, some further purpose was required (cf. discussion of this point in *IB*, II, 831). The statement of universalism was, no doubt, one reason for the acceptance of Ruth, as it was for Jonah. Another, and probably more compelling, reason for the inclusion of Ruth in the canon was the fact that it deals with the ancestry of David.

In the Hebrew Bible, Ruth is found in the *Kethubhim* or Writings, the third section of the canon. The Talmud puts Ruth first, before the Psalms and Job, in its listing of the Writings (B.B. 14b). In all recent Jewish tradition, however, Ruth belongs with the Song of Solomon, Lamentations, Ecclesiastes, and Esther, as one of the five Megilloth, or Scrolls, which are read on special occasions during the year. The Song of Solomon is read at Passover, Ruth at Shabuoth or Weeks, Lamentations on the Ninth of

Ab, Ecclesiastes at Sukkoth or Tabernacles, and Esther at Purim. In Hebrew Bibles the Megilloth usually appear in this order, following the order of the festivals, although in some MSS Ruth comes first, immediately before the Song of Solomon (see CANON OF THE OT). The LXX did not preserve the division between the Prophets and the Writings, but put Ruth after Judges, and Lamentations after Jeremiah, probably because the books deal with the same periods of history. The Latin translation follows the order of the LXX. Josephus apparently went further and regarded Ruth as an appendix to the book of Judges. The Talmudic statement that Samuel was the author of both Judges and Ruth (B.B. 14b) seems to represent an acceptance of this opinion. In the English translations of the Bible, as in modern versions generally, the tradition of the LXX is maintained, and Ruth follows Judges.

The place of Ruth in the Hebrew canon, as the scroll to be read on the Feast of Shabuoth, gives some indication of the significance of the book in Jewish tradition. Shabuoth is the biblical festival celebrating the close of the weeks of the grain harvest, and Ruth, with its harvest setting, is associated with this festival. The tradition connects Shabuoth also with the commemoration of the giving of the law, and it is because of this connection that the holiday has achieved its present importance for Judaism. It is of interest, therefore, that some modern commentators have seen the giving of the law as an act of universal significance, intended as a gift for all mankind, and Ruth as the book appropriate to the universalism of this festival (cf. Israel Bettan [see *bibliography*], p. 54).

***SABBATH** sāb'əth [שבת, cessation, desistance]. In origin, the closing day of a seven-day week. The noun is derived from the verb שבת, "to cease, to abstain, to desist from, to terminate, to be at an end." Only secondarily does this verb connote "to be inactive, to rest" (Exod. 21:19; Lev. 26:34-35; II Chr. 36:21). Accordingly, despite the testimony of Josephus (Antiq. I.i.1; Apion II.ii), the connotation "rest" for the noun is at the best questionable and under any circumstances postbiblical.

In the initial stages of its evolution the sabbath was observed as a day upon which all physical labor was taboo, probably because it was regarded as an unlucky, an evil, day, under the control of gods or spirits hostile to mankind. Ultimately it became a day of positive worship of the Deity, characterized not only by complete abstention from all ordinary occupations and activities but also by assemblage in temple or synagogue and sacrifice or prayer and ritual observance there. In this, its major and only persistent aspect, the sabbath is essentially of Jewish origin. Conforming to ancient tradition, Judaism has

always observed the sabbath upon the seventh day of the week, Saturday. This was the practice likewise of the early Jewish Christians. Gentile Christianity, however, motivated perhaps by the suggestion of Paul (Col. 2:16-23; cf. I Cor. 16:2; Gal. 4:9-11), gradually shifted its sabbath to Sunday, the first day of the week. In so doing it was influenced in large measure by the considerations that according to biblical tradition light was created upon the first day (Gen. 1:3-5) and that Jesus, the Light of the world, rose from the nether world upon Sunday (Barn. 13.9-10).

1. **Origin.** In ancient Babylonia a particular day of distinctive character was known as *šabattū* (*šapattū*), a name plainly identical with the Hebrew שבת. It was designated specifically as the "day of quieting of the heart." The precise meaning of this expression is uncertain, but at least the concept of relaxation is implicit therein. Furthermore, the seventh, fourteenth, twenty-first, and twenty-eighth days of certain months, and not improbably of every month, and likewise the nineteenth day—i.e., the forty-ninth, the seven times seventh, day from the first day of the preceding month—were regarded as "evil days." Upon these days the physician, the oracular priest, and, above all, the king might not function in any official or professional capacity whatsoever. While there is no definitive evidence that these successive seventh days were identical with the *šabattū*, it is a reasonable inference that such was actually the case. On the basis of this evidence certain scholars have maintained that the biblical sabbath was of Babylonian origin. Such, however, is not at all the case.

Certainly the conditions of nomadic life out in the Arabian Desert, their original home, where animal husbandry was the primary source of human livelihood, would not have permitted the Hebrew clans or tribes to desist even briefly from ordinary, daily, pastoral activities and observe a weekly sabbath, a day of abstention from all labor. All available evidence indicates unmistakably that the sabbath can have originated only in an agricultural environment. Actually the Hebrews became acquainted with the sabbath only after they had established themselves in Palestine and had settled down there alongside their Canaanite predecessors in the land, whom in some measure they displaced, and had borrowed from them the techniques of tilling the soil, and with this various institutions of agricultural civilization, of which the sabbath was one.

Actually the sabbath had its origin in a unique and rather primitive calendar, distinctly agricultural in character, which was current among the various West Semitic peoples until approximately 1000 B.C.—i.e., until some three centuries, more or less, after the settlement of the Hebrews in Palestine and the adjustment of the majority of their tribes, particularly those dwelling in the more fertile central and N sections of the country, where farming was naturally the dominant occupation, to Canaanite agricultural civilization. This calendar was based upon and recorded the successive stages in the planting, ripening, harvesting, and use of the annual crop. It was one of the institutions of Canaanite culture which these Hebrew newcomers borrowed. It had been current likewise among the Eastern Semites in earlier

times, and it was undoubtedly from this calendar that the Babylonian *šabattū* was derived. Accordingly, instead of the Hebrew sabbath's being the outgrowth of the Babylonian *šabattū*, both institutions, the Babylonian *šabattū* and the Hebrew sabbath, sprang from a common source.

This calendar has been aptly designated as the pentecontad calendar because of the significant role which the number 50 played in it. Its basic unit of time-reckoning was the week of seven days. Its secondary time unit was the period of fifty days, consisting of seven weeks—i.e., seven times seven days—plus one additional day, a day which stood outside the week and which was known and celebrated as an *עצרה*, a festival of conclusion or termination—termination, of course, of the pentecontad or fifty-day period. The year of this calendar consisted of seven pentecontads plus two festival periods, each of seven days or one week, plus one additional day of supremely sacred character, 365 days in all. One of these two seven-day festival periods came immediately after the fourth pentecontad of the year, and the other immediately after the seventh and final pentecontad. Obviously this second seven-day festival was celebrated upon the last seven days of the year and in some respects partook of the nature of a festival of conclusion. The extra day, of supremely sacred character, followed immediately upon this second seven-day festival—i.e., then immediately after the close of the old year. It marked, therefore, the beginning of the new year and so was celebrated as the New Year's Day. It too, like the seven *עצרות*, the festivals at the close of the seven yearly pentecontads, stood outside the week and had its distinctive name. Upon this day the first sheaf of the crop of the new year was cut, with appropriate ceremonial, and was offered as a sacrifice for the redemption of the remainder of the crop from the possession or control of the Deity and its free and unrestricted use by the people for their daily needs. The seven-day festival coming immediately after the fourth pentecontad—i.e., early in October—was known and observed as the *הג האסוף*, the Feast of Ingathering (see *BOOTHS, FEAST OF*)—the ingathering, of course, of the annual crop at the close of the harvest season. The second seven-day festival, following immediately upon the seventh pentecontad and coming upon the final seven days of the year and shortly before the vernal equinox, was known as the *הג המצות*, the Feast of Unleavened Bread (see *PASSOVER*). During the course of this festival and in manifest preparation for the harvesting of the crop of the new year, everything which remained of the old crop, that of the year just ending, was eaten in the form of *מצות*, "cakes of unleavened bread," and whatever could not be so consumed had to be burned; for, in conformity with a principle and a practice quite common among primitive agricultural peoples, the old crop had to be disposed of completely before even the cutting of the new crop could commence. Under no condition might the crops of two successive years be mingled or be allowed to contact each other in any way, for the result would be disastrous for the community. These various considerations and procedures evidence unmistakably the distinctively agricultural character of this pentecontad calendar.

Table 1 sets forth concisely and graphically the form of this early—in fact, this oldest—calendar current among the various Semitic peoples.

Table 1

New Year's Day	1 day
1st "Fifty" (Grain Harvest)	49 days
<i>עצרת</i> (Festival of First Fruits)	1 day
2nd "Fifty"	49 days
<i>עצרת</i>	1 day
3rd "Fifty"	49 days
<i>עצרת</i>	1 day
4th "Fifty"	49 days
<i>עצרת</i>	1 day
Festival of Ingathering (<i>האסוף</i>)	7 days
5th "Fifty"	49 days
<i>עצרת</i>	1 day
6th "Fifty"	49 days
<i>עצרת</i>	1 day
7th "Fifty"	49 days
<i>עצרת</i>	1 day
<i>מצות</i> Festival	7 days

Quite plainly the number 7 was basic to this primitive system of time-reckoning. This is evidenced, not only by the institutions already noted—viz., the seven-day week, the pentecontad (i.e., the fifty-day, seven weeks plus one day, time unit), and the year, consisting of seven pentecontads plus two major festival periods, each of seven days' duration, plus one additional day—but also by the added facts that each period of seven years constituted a further and a larger time unit, with the seventh and final year thereof known as the *SABBATICAL YEAR*, while seven such seven-year periods plus one additional year, known as the Jubilee Year, fifty years in all, constituted the largest, the ultimate, unit of time-reckoning of this calendar. See *JUBILEE, YEAR OF*.

There is abundant evidence that among the early Semites, and even persisting in certain circles down to the present day, the number 7 was regarded as evil, unlucky, a potential source of ill fortune, and therefore to be strictly avoided. Thus, e.g., among the native peasantry of Palestine still today, in counting or measuring, the number 7 is never pronounced, for 7 is the number of the evil spirits, and the mere utterance of their number might well have the effect of summoning them to work their mischief. Among the ancient Babylonians the evil spirits were likewise seven in number; and while they were spoken of freely as a group of seven, no more than six were ever mentioned together by name. Similarly the two groups of beneficent deities, the *Igigi* and the *Anunnaki*, consisted each of seven gods. In fact, the common ideogram of the *Igigi* specifically designated them as "the Seven." But despite this they were generally spoken of as eight in number, while the *Anunnaki* were regarded as nine. Likewise the various lists of the group of deities known as *Sibittišunū*, "the Seven," or, more precisely, "They Are Seven," always enumerated eight divine beings. A similar belief or superstition existed among the Phoenicians and no doubt among the closely related Canaanites likewise. Quite similarly in the Bible the seven pre-Israelite peoples of Palestine are frequently referred

to and mentioned by name, but, with the exception of three passages (Deut. 7:1; Josh. 3:10; 24:11), the names of no more than six are ever cited together.

All this suggests quite compellingly that this seventh and final day of the week was regarded quite generally by those ancient Semitic peoples which had attained the agricultural stage of civilization as an evil day, a day controlled by evil spirits, a day therefore upon which human labor would certainly not prosper, and which might even incense these evil spirits and induce them to work mischief, not only to him who carried on such labor, but also to his entire community. Accordingly it was, as its name, in both Babylonian and Hebrew, indicates, essentially a day of total abstention from labor, labor of all kinds. There can accordingly be little question that this institution, the seventh-day sabbath, was strictly observed already by the Canaanites and was borrowed from them, as an integral element of their agricultural way of life and practice, by the Israelite newcomers in the land. As a Canaanite religious institution it was entirely negative in character, an evil day, a day of total abstention from labor, but nothing more. It was Israel which, even while retaining this primary manner of celebrating the day, gradually transformed it into a day of gladness of spirit and of positive and joyous worship of the Deity.

2. History. The fundamental role of the sabbath in the religious belief and practice of Israel is demonstrated convincingly by the fact that its strict observance is enjoined in all four biblical decalogues, those concise statements, each summed up in ten short words or commandments, which, voicing what was regarded at the time as the all-essential principles of Israel's religion, constituted the basis of a solemn reaffirmation of the covenant relationship between Yahweh, Israel's God, and his people. See TEN COMMANDMENTS.

Exod. 34:21*a*, the oldest of these decalogue statements with regard to the sabbath, dating from 899 B.C. and formulated in the S kingdom under King Asa, commands abstention from all agricultural labor upon the seventh day. Apparently the commandment contemplates no more than this and does not prohibit other essential forms of work, such as the preparation of food; for the verb עָבַד, here employed, means primarily "to perform agricultural labor, to till the soil" (Gen. 2:5; 3:23; 4:2; Deut. 28:39; II Sam. 9:10; Prov. 12:11; Zech. 13:5). This interpretation of this commandment, as it is worded here, finds strong confirmation in what seems to be an editorial expansion of the commandment (vs. 21*b*), which, probably added relatively early, admonishes the people emphatically that even during the plowing and harvesting seasons, naturally the two busiest and also most critical periods of the agricultural year, when every moment was precious, the seventh day must be observed strictly by abstention from all labor. It is significant also that here the day is designated only as "the seventh day" and is not called specifically "the sabbath." Moreover, in this commandment the verb שָׁבַת is used strictly in its primary connotation, "to cease, to desist (from labor)." Equally significant is the fact that while this earliest decalogue enjoins additional ritual practices and is on the whole predominantly ritualistic in

character, it seems to have placed this commandment for the seventh day first upon its list of positive ritual injunctions, quite as if abstention from all farm labor upon the seventh day was regarded as the fundamental ritual institution of the religious practice of even the by no means primarily agricultural S kingdom.

The second decalogue in chronological sequence (Exod. 20:23-24*a*; 23:10-19 [minus certain passages of late, editorial, supplementary character]) was patterned closely in form and content after the earlier decalogue and emanated from the N kingdom in 841 B.C., at the beginning of the reign of Jehu. There is cogent reason for believing that the prophet Elisha was the chief protagonist in its formulation and promulgation. Under the dynasty of Omri the N kingdom had become relatively prosperous through cultivation, in close association with Tyre, of an active commercial program upon an international scale. Urban life was expanding, and the merchants in particular were growing wealthy. Accordingly in this second decalogue the commandment for the strict observance of the seventh day by abstention from labor (Exod. 23:12*a*), while closely resembling in form and language the corresponding commandment in the older decalogue, and while specifically continuing to designate this day only as the seventh day and not as the sabbath, and using the verb שָׁבַת only with the connotation "to desist," provides that the people were to desist, not merely or even primarily from agricultural labor, but rather from work of all types, manifestly from commercial as well as agricultural pursuits. Whether the wording of this commandment, "from all thy labors," contemplates likewise the prohibition of essential, daily tasks in the home is not clear; but, inasmuch as this wording plainly represents an expansion, in terms of the contemporary economic situation of the N kingdom, of the sabbath commandment of the earlier decalogue, it seems more probable that it enjoined complete desistance upon the seventh day only from all occupational activities, but no more. Moreover, in close association with this commandment for the seventh day—in fact, in the commandment immediately adjoining it—this decalogue prescribes the observance of every seventh year by noncultivation of the fields, by allowing them to lie fallow—in other words, by complete desistance from agricultural labors and observance of the SABBATICAL YEAR. And again, still following the pattern set by the older decalogue, the commandment for the observance of the seventh day apparently stood first in the list of ritual prescriptions, quite as if it were regarded in the N kingdom also as the ritual procedure of primary importance. It should be noted likewise that Exod. 23:12*b* is a postexilic, editorial addition to the original, concisely stated commandment, and that accordingly in this second decalogue also, just as in the first, the seventh day is primarily a day of desistance from all occupational labor rather than a day of conscious and socially motivated rest.

The third decalogue in the order of chronological sequence, the so-called Deuteronomic decalogue, served as the basis of the religious reformation and of the attendant renewal of the covenant with Yahweh in the reign of Hezekiah (II Kings 18:3-7) and

again of the parallel action in the reign of Josiah (II Kings 22:3-23:25). This decalogue is recorded in two versions, in Exod. 20:2-17; Deut. 5:6-18. In its original form this decalogue, like its two predecessors, was couched in the form of ten direct and concise commandments, each expressing what had come, under the influence of evolving prophetism, to be regarded as a fundamental principle of the life which Yahweh demanded that his people live in fulfilment of its covenant obligation to him. As is to be expected, the two versions of this decalogue, in their original, concise, unexpanded formulation, are practically identical. But five of the ten commandments have been amplified more or less extensively by postexilic editors. And particularly in this amplification of the sabbath commandment (Exod. 20:8, 10b-11; Deut. 5:12, 14b-15) the two versions differ extensively and significantly.

The original, concise formulation of the sabbath commandment in this third decalogue (Exod. 20:9-10a; Deut. 5:13-14a) seems to have been patterned upon the versions of the corresponding commandment in each of the two older decalogues, for it specifically commends agricultural labor and likewise all other types of work upon the first six days of the week, but strictly forbids all such activities upon the seventh day by the positive declaration that the seventh day is a *שבת* belonging to, or in honor of, Yahweh. Moreover, by the substitution of *כל-מלאכתך*, "all thy work," *מעשיך*, "thy labors," of the sabbath commandment of the second decalogue, this commandment of this third decalogue apparently prohibits, not only all occupational activities, but also all forms of work, household duties and all other comparable activities included. In other words, it would seem that with this reformation the seventh day has at last become for Israel a day of complete desistance from all types of labor on the part of every person.

Furthermore, in this commandment, as it was worded in its original, concise form, *שבת* is plainly the formal name or title of the day. But equally plainly its essential connotation here is still "desistance, abstention"—i.e., of course, from all labor—rather than "rest." This consideration suggests very cogently that as late as the religious reformation under Josiah in 621 B.C. the sabbath, in the S as well as in the N kingdom, was still observed primarily in its negative rather than its positive aspect, as a day upon which all labor was strictly taboo, rather than as a day of purposed rest and relaxation from toil. But, very significantly, even in its negative aspect it has now become definitely a day sacred to Yahweh, Israel's God, rather than to the evil spirits. In fact, the inclusion of the provision for sabbath observance in the two older decalogues suggests that already by the beginning of the ninth century B.C. the sabbath had lost in Israel much of its original character as an evil day, closely linked with evil spirits, and had become integrated, though still chiefly in its negative aspect, as a day of desistance from all labor, with the cult of Yahweh.

One further matter of significance is apparent in this third decalogue. Whereas the two earlier decalogues included in their formulations of the essential principles of Israel's covenant relationship with Yah-

weh various cultic institutions and practices, even though they apparently accorded to the sabbath priority therein, in this third decalogue the sabbath is the only cultic institution the observance of which, by prescribed action or conduct, is specifically enjoined. Manifestly the sabbath is here well on its way to becoming the primary cultic institution of Israel's religion.

In the fourth decalogue, that of the Holiness Code, associated with the reaffirmation of Israel's covenant relationship with Yahweh in connection with the dedication of the second temple in 516 B.C., the sabbath commandment (Lev. 19:3aB) reads, with utmost conciseness: "and you shall keep my sabbaths." The very brevity and directness of this statement, without any definition, as in the sabbath commandment of each of the three earlier decalogues, of precisely wherein sabbath observance consists, suggests very strongly that by the final quarter of the sixth century the approved manner of sabbath observance had become firmly established and even conventional. And plainly too this was, just as the sabbath commandment of the third decalogue had prescribed, complete desistance by all persons from every form of labor.

Moreover, this sabbath commandment is here, within the compass of a single verse, linked closely with the commandment of reverence for parents. This indicates unmistakably that, at least to some degree, this fourth decalogue was patterned directly after the third decalogue, for there too, just as here, these two commandments stand in immediate juxtaposition, although in reverse order. And here too, just as there, the sabbath is represented as belonging definitely and entirely to Yahweh, as being a, or even the, fundamental institution of the approved ritual worship of him. But, quite significantly, this commandment to keep Yahweh's sabbaths is also linked very closely with another commandment, "and [you shall] reverence my sanctuary" (Lev. 19:30). This suggests forcibly that by 516 the sabbath had come to be regarded by the Jewish community of Judea, not only, in its negative aspect, as a day of prescribed desistance from all labor, but also, in a very positive aspect, as a day of rest from toil, which, in turn, made possible assemblage at Yahweh's sanctuary and active worship of him there. Apparently now, at the very commencement of the postexilic era, and specifically with the dedication of the second temple, the sabbath was beginning to acquire an altogether new character and import. It was no longer merely a day of mechanical desistance from all labor, largely because of the persistence of the old and antiquated idea that work performed upon that day would certainly not prosper and might even displease Yahweh and incur his wrath, since the day had now come to be generally regarded as his day. Instead, it had now become a day of rest in a very real sense in honor of Yahweh and also of active worship of him at his restored sanctuary. Very definitely the sabbath had at last become in Israel a ritual institution altogether positive in character.

This record of the history of the sabbath in Israelite religious practice in the pre-exilic period is fully confirmed by other, extra-Pentateuchal references to it. Throughout the entire period of Israel's history covered by the biblical writings the sabbath seems to

have been closely linked with the day of the new moon. The latter was apparently also a day upon which human labor was strictly taboo; though why this should have been is far from clear, since very little is known of the import of the new-moon day in the culture and religious practice of Israel prior to the adoption of the lunar calendar in the final quarter of the fifth century B.C. But be that as it may, both New Moon and sabbath were days of complete desistance from labor. Accordingly during the pre-exilic period upon these days certain unusual activities, such as consultation of a prophet or diviner, even when this involved journeying to a considerable distance and attendant labor of servants or slaves (II Kings 4:22-23), seem to have been permissible. The royal bodyguard seems to have been changed regularly upon the sabbath (II Kings 11:5-9; II Chr. 23:4-8). Upon both New Moon and sabbath all shops were closed and all buying and selling, even of such essentials as food, ceased completely, to the dissatisfaction of the shopkeepers eager for profit (Amos 8:5). This situation reflects, no doubt, the prevailing attitude of a certain, and probably a not inconsiderable, section of the urban population of Israel toward the sabbath *ca.* the middle of the eighth century B.C. But at the same time it illustrates graphically the strong and persistent hold which the taboo of all labor upon the sabbath then had upon all classes of society. On the other hand, the opportunity to desist from labor upon sabbaths, New Moons, and festival days was to the rural population of the country apparently a source of satisfaction and even of general group merriment (Hos. 2:13). Isa. 1:13 suggests that already in the eighth century New Moons and sabbaths, like other festal occasions, were celebrated by certain ritual acts and even perhaps by some specific sacrifice. But if so, this was unquestionably incidental to the primary character of these days as taboo days. Also from this evidence it is plain that already by the middle of the eighth century, and quite probably even somewhat earlier, the word שַׁבָּת, even though still retaining much of its primary connotation, "desistance, cessation," had come to be used as a proper name, the regular designation for the seventh and final day of the week.

Already in the early postexilic period, as has been noted, and perhaps beginning even during the Exile, a transition of the character of the sabbath set in, from its primary and altogether negative aspect, as a day upon which all labor was strictly interdicted, to one more positive. In all likelihood the role of the SYNAGOGUE, steadily expanding during this period, as a basic institution of Jewish religious life contributed materially to this significant transformation. The original prohibition of all forms of labor upon this day was not qualified in any degree. If anything, it was intensified in some measure; for desistance from labor upon this day now lost in large measure its primary, negative character, as a safeguard against mishap at the hands of supernatural agencies hostile to mankind, and became instead an act of positive homage to Yahweh, Israel's God. As such the sabbath became quite naturally a day of purposed rest and relaxation from the rigorous tasks and obligations of daily life, a day therefore, in some measure

at least, of ease, comfort, and pleasure, a day of high, divinely instituted privilege for Israel, but a privilege also which would ultimately be extended to all mankind (Isa. 66:23 [a very late interpolation between vss. 22 and 24]).

Moreover, this complete freedom from all the activities and responsibilities of daily life upon the sabbath, and this too in the name of Yahweh, made the day quite naturally convenient and appropriate for assemblage in local synagogues and for communal worship there, under approved leadership, of the Deity, to whom, in a very positive sense, the day was now sacred.

Accordingly in the biblical writings of this period the sabbath is represented as the sign of God's sanctification of Israel as his people and of his eternal covenant with it (Exod. 31:13, 16; Ezek. 20:12 [plainly a late interpolation into this extremely composite chapter]; likewise in the writings of the Qumran sectaries [see *bibliography*]). A somewhat later form of this doctrine told (Jub. 2:17-32) that God chose Israel alone from all the nations to observe the sabbath in his honor, along with and in the very same manner as the highest angels. Exod. 23:12b; Deut. 5:14b (both secondary Deuteronomic amplifications of the original, simple and concise sabbath commandment of the third decalogue and dating from the early postexilic period) state explicitly that the distinct purpose of the sabbath was that servants and domestic animals and likewise the stranger (or perhaps the proselyte to Judaism) sojourning at the time within the household might rest and relax upon the sabbath even as did the master. Moreover, during this period, 516-485, while the second temple was standing and while there was an active program of proselytism of foreigners to Judaism, strict sabbath observance by at least complete abstention from labor was one of the ritual practices imposed upon these converts (Isa. 56:4, 6). Under these circumstances the sabbath tended more and more during this period to lose its original, negative character as an evil day and to become instead distinctly a day of communal rest, assemblage for public worship and even for social activities on a communal plane, a day of general gladness of spirit and of public rejoicing.

The coming of Ezra to Jerusalem in 458 B.C., coupled with his erection, with the permission of Artaxerxes I and even with Persian material assistance, of the third temple; his restoration of the Zadokite priests, who had returned with him from Babylonia, to major priestly office and authority in the new sanctuary; and the inauguration and rigid enforcement of his program of intensive Jewish separatism and ritualism, all of which was reinforced by Nehemiah some twenty-five years later, and which culminated in the formulation of the Priestly Code (see *PENTATEUCH*) as the official expression of Jewish belief and practice, revived in no small measure something of the original, austere character of the sabbath as a day when all labor and even all undue physical activity were strictly prohibited (Neh. 10:32; 13:15-22; Jer. 17:19-27 [a non-Jeremianic passage, manifestly dating from this middle post-exilic period]; Ezek. 22:8, 26; 23:38 [all late interpolations]).

The origin of the sabbath and its character as a

sacred day, a day of abstinence from all labor, now came to be explained by the tradition that God had created the world in six days and had himself desisted from all labor and had rested upon the seventh day; therefore he sanctified it and bade Israel rest thereon, even as he had rested (Gen. 1:1-2:3; Exod. 20:11; 31:17). Correspondingly God sent down the manna from heaven for six days, with a double portion, sufficient for two days, upon the sixth day, but let none fall upon the seventh day, impliedly because he was resting upon this day. Accordingly he bade Israel gather its necessary supply of manna daily, but upon the sixth day to gather a two-days' supply, so that it too might observe the sabbath in prescribed manner (Exod. 16:4-36). Accordingly labor of any kind upon the sabbath, even acts so essential as kindling a fire in the home (Exod. 35:3) or moving about unduly from place to place (Exod. 16:29), were forbidden absolutely. The spirit of the post-Ezranic age and the stress which it laid upon the most rigorous sabbath observance are evidenced by the fact that a new term, of definitely technical character and found only in the Priestly Code, was coined, a derivative of the root שבת in its primary connotation, "to cease"—שבתי, "total cessation" (from all manner of activity; Lev. 25:5). Accordingly the compound term שבת שבתון, oft recurring in the P stratum of the Hexateuch, designates the day as a "sabbath of total cessation (from labor)."

In fact, so fundamental did sabbath observance become in the ritual expression of Judaism formulated and supervised by the Zadokite or Aaronite priests of the third temple from the close of the fifth century B.C. onward that the most extreme penalties were prescribed for its violation, at first excommunication from the sacred community of Israel (Exod. 31:14b β), but ultimately death itself (Exod. 31:14b α ; 35:2b; Num. 15:32-36). Whether these extreme penalties were ever actually enforced, and, if so, to what extent, is uncertain, although Jub. 2:25, 27; 50:8, 13, probably voicing an extreme, sectarian point of view, reaffirm this death penalty. But be this as it may, prior to the Maccabean wars, in the second quarter of the second century B.C., pious Jews would not bear arms upon the sabbath, even in self-defense (I Macc. 2:32-38), nor yet, if actually engaged in warfare, would they negotiate for peace upon this day (Jos. War IV.ii.3). Mattathias, the father of the Maccabees, however, instituted the rule that Jews might, and even should, defend themselves actively against national enemies upon the sabbath (I Macc. 2:39-41; Jos. Antiq. XII.vi.2; cf. XIII.i.3; XVIII.ix.2; War I.vii.3). This evidence establishes clearly the fundamental role which sabbath observance in its primary aspect, total abstinence from labor, played in Jewish practice from ca. the middle of the fifth century B.C. onward.

However, as might well be imagined, in the course of time differences of opinion with regard to specific activities which might or might not be performed upon the sabbath manifested themselves in various Jewish circles. Of all Jewish groups or sects the Essenes were the most extreme in their principle and procedures of sabbath desistance from labor (Jos. War II.viii.9). Apparently equally extreme in this respect were the sectaries of Qumran (Zadokite

Document XIII.1-27). In fact, the detail and rigidities of their rules for sabbath observance lend strong support to the assumption that these Qumran sectaries were actually Essenes. Furthermore, between the disciples of Hillel and Shammai, the leading rabbinic authorities of the first century B.C., significant differences existed with regard to activities permitted or prohibited upon the sabbath, with the former as a rule the more liberal in their decisions (M. Shab. I.5-8). In the period immediately preceding the destruction of the third temple by the Romans, in A.D. 70, the established penalty for violation of this primary principle of sabbath observance was reduced to the sacrifice of a sin offering (M. Shab. VII.1-4). And ultimately Rabbi Akiba, the foremost rabbinic authority of the first half of the second century A.D., formulated the principle that any labor or physical activity essential to normal existence which could be performed before the sabbath began might under no condition be performed upon the sabbath; but, were this impossible, then its performance upon the sabbath was permitted (M. Shab. XIX.1). Moreover, as this rabbinic dictum implies and as is borne out by abundant evidence, and as is in fact clearly implicit already in the motif of the relatively late biblical (late fifth or early fourth century) narrative of the double portion of manna from heaven upon the sixth day, Friday, as the day preceding the sabbath, and particularly the afternoon thereof, acquired the character and apparently, at least in certain circles, the formal title, of the Day of Preparation (Jub. 2:29; 50:9; Jos. War II.viii.9; Mark 15:42; Luke 23:54; John 19:31, 42)—preparation, of course, for strict sabbath observance by the performance in advance of all tasks, even the most essential, such as the cooking of food, which would otherwise have to be performed upon the sabbath.

In the temple ritual from the middle of the fifth century B.C. onward the sabbath was celebrated in positive manner by special sacrifices (Lev. 23:38; Num. 28:9-10; II Chr. 2:3; 8:13; 31:3; Neh. 10:34; cf. Ezek. 46:4-5 [a passage dating from the period in question]) and by the changing of the BREAD OF THE PRESENCE (Lev. 24:8). The formal commencement of the sacred day, and therefore the precise moment when upon it all labor was to cease, was heralded by a trumpet blast, blown by a priest within the temple precincts; and in the same manner the official termination of the day and, with this, permission to resume labor were announced (Jos. War IV.ix.12; M. Suk. V.5). In private life Jews were forbidden not only all forms of physical labor but also to travel to a distance of more than two thousand cubits from their homes (Zadokite Document X.14-XI.18; Jos. Antiq. XIII.viii.4; Acts 1:12; M. So \dot{t} . V.3). But, despite the innumerable restrictions which encompassed it, the sabbath was to be, above all else, a joyous day for its celebrants, joyous in appreciation of the privilege of worshipping God upon it (Isa. 58:13). Accordingly fasting upon the sabbath was prohibited (Jub. 50:12; Jth. 8:6; Zadokite Document XIII.13).

But distinguishing the sabbath from the other six days of the week more than all else were, from the sixth century B.C. onward, the weekly assemblies in the local synagogues for communal worship by

means of an established and steadily expanding ritual, in which the reading of the Pentateuch and selected passages from the Prophets and the expounding thereof by recognized authorities played a central role (Jos. Antiq. XVI.ii.3; Matt. 4:23; Mark 1:21-22; 6:2; Luke 4:16-21, 31-33; Acts 13:27; 15:21; 17:1-2; 18:4). Quite probably the singing or chanting of selected psalms also constituted an important part of the early synagogal sabbath ritual (cf. Ps. 92:1). There is ample ground for the assumption that prior to the destruction of the third temple by the Romans in A.D. 70 such synagogal worship was in considerable measure sectarian in character. But following this momentous event sabbath worship in the synagogue became, and has been ever since, the primary institution of Jewish ritual. The Sunday-sabbath and ritual worship thereon in the church are quite obviously a part of Christianity's heritage from Judaism.

SABBATH DAY'S JOURNEY [σαββατου ὁδόν]. The distance scribal legislation allowed one to travel on the sabbath.

In Acts 1:12, Mount Olivet is described as a "sabbath day's journey" from Jerusalem. Josephus refers to the distance as 5 furlongs (Antiq. XX.viii.6), and as 6 furlongs (War V.ii.3), thus a distance of 3,031 or 3,637 feet (as measured by the Alexandrine stadion or furlong, which amounts to 606 feet, 2 inches). The phrase, not used elsewhere in the Bible, is derived from Josh. 3:4, where the ark is indicated as 2,000 cubits ahead of the people. From this idea arose the notion that 2,000 cubits constituted the greatest distance from the tabernacle to the outside of the Israelite camp. This thus became the basis of the law that on the sabbath a person could travel no more than 2,000 cubits, the farthest distance one would be from the center of worship. As Exod. 16:29 stated: "Let no man go out of his place on the seventh day," Num. 35:5 further defined the sub-

urbs of the cities of the Levites as measured 2,000 cubits in every direction from the city walls. Rabbinical interpretation defined this as a sabbath day's journey.

The command in Exod. 16:29: "Let no man go out of his place on the seventh day," is interpreted in a Jerusalem Targ.: "Let no man go walking from this place beyond 2,000 cubits on the seventh day." A Targ. based on Ruth 1:16 has Naomi say to Ruth: "We are commanded to keep sabbaths and festivals, and not to walk beyond 2,000 cubits." In the Zadokite Documents there are the two laws for the sabbath day's journey: "Let him not walk about outside his town above 1,000 cubits" (page 10, line 20); and "Let no man go after a beast (on the sabbath) to pasture it outside his town more than 2,000 cubits" (page 11, line 28), thus indicating a different length of journey on the sabbath for different purposes.

Various estimates have been made as to what linear distance constituted 2,000 cubits: a cubit (or ell) by the Hellenistic system of measures was 1 foot, 6 inches, the distance from the elbow to the end of the middle finger; though the Roman system of measure determined this distance as 1 foot, 9 inches. Hence the 2,000 cubits would be 3,000 feet by Hellenistic measure, or 3,600 feet by Roman measure. Egyptian measure viewed a "sabbath day's journey" as 1,000 double-steps. Jerome (*Epistle to Algasiam X*) estimated a "sabbath day's journey" as 2,000 feet: "They are accustomed to say, 'Barachibas and Simeon and Hillel, our masters, have handed down to us that we should walk 2,000 feet on the sabbath.'" Rabbi Nachman (*Er. 42a*) said: "If one is on a journey, where the sabbath boundary is not known, take 2,000 medium steps." Scribes were able, however, to figure how a person might go 4,000 cubits on the sabbath: Preceding the sabbath a person could establish his "home" 2,000 cubits away by carrying food for two meals to a given place, one meal to be eaten and the other buried; to mark one's presence at a given spot could establish one's "home"; a person could eye a tree or a wall 2,000 cubits from his residence, and call this his legal "home" on the sabbath; or a person could send out another person to mark the spot for his sabbath "home." Hence, from any of these places an individual could travel 2,000 cubits farther on the sabbath, and thus legally travel 4,000 cubits.

SABBATHEUS. KJV Apoc. alternate form of SHAB-BETHAI.

***SABBATICAL YEAR.** The final year in a cycle of seven years; an institution of ancient Israelite time-reckoning and religious, social, and economic practice. Originally designated simply as the "seventh year" (Exod. 23:11; Neh. 10:31), it came to be called by Deuteronomic writers the "year of dropping" or "of cancellation [of debts]" (שנת השמיטה; Deut. 15:9), and also, by a late redactor of the Priestly Code, the "year of sabbatical desistance [from agricultural activities]" (שנת שבתון; Lev. 25:5). It had its origin

in the so-called pentecontad calendar, the earliest calendar current among the ancient Semitic peoples, a calendar of strictly agricultural character, which, as an integral element of the then prevailing Canaanite agricultural civilization of Palestine, the invading nomadic or seminomadic Israelite clans and tribes adopted when they conquered and established permanent residence in the land. In this calendar the seventh or sabbatical year bore to the other years precisely the same relationship as the SABBATH bore to the other days. Just as in this calendar seven days constituted a basic and convenient unit of time-reckoning (*see* WEEK), with the seventh and final day therein, the sabbath, observed as a taboo day, one upon which agricultural labor was rigorously prohibited, so, correspondingly, seven years constituted another, larger unit of time-reckoning, with the seventh and final year therein observed as a taboo year, in which, for its entire duration, all agricultural labor was "dropped" (the primary connotation of שָׁמַט, the root of שְׁמַטָּה; cf. II Sam. 6:6; II Kings 9:33; I Chr. 13:9) or interrupted. Whether, like the sabbath day, this seventh year was originally regarded as being controlled by evil spirits is uncertain, but this seems altogether probable.

It is not surprising that the oldest Decalogue in the Bible, the so-called Kenite Code (Exod. 34:17-26), formulated in 899 B.C. in the Southern Kingdom, where, because of the general poverty of the soil, agriculture was normally not a primary source of livelihood, makes no mention of the sabbatical year, even though it does stress the strict observance of the sabbath day. However, the Decalogue next in chronological sequence, that of the so-called Book of the Covenant (Exod. 20:23-24a; 23:10-19), formulated in 841 B.C. in the Northern Kingdom, where agriculture was always the dominant occupation, does provide, just as might be expected, for the observance of the seventh year (Exod. 23:10-11) as the year in which the land was to be "dropped"—i.e., to remain uncultivated. Moreover, the spontaneous, untilled fruitage of field, orchard, or vineyard could not be retained by the owner thereof for use by himself and his family alone, but might be eaten freely by the poor of the land, those who were not property owners; and what they did not eat was left for consumption by animals, both domestic and wild. Under no condition might the crop of this seventh year be harvested and stored.

A secondary but fairly early stratum of the Book of the Covenant provides for the automatic release of Hebrew male slaves in the seventh year (Exod. 21:2-6). However, this legislation contemplates no more than that the normal period of servitude for a Hebrew, in bondage to a fellow Hebrew, should be six years, reckoned from the moment of entrance into this social state. But this automatic manumission of Hebrew slaves has no connection whatever with the sabbatical year, either in this legislation or in its Deuteronomic reformulation (Deut. 15:12-18) some two centuries later. This conclusion is confirmed by the historic incident recorded in Jer. 34:8-22. The reference there to the legislation in Deut. 15:12-18 is readily apparent. But once again there is no reason whatever to connect this legislation or the procedure on this specific occasion with the sabbatical year.

On the other hand, the legislation in Deut. 15:1-4a definitely links the nationalized institution of the cancellation of debts owed by one Israelite to another with the sabbatical year. In fact this legislation designates the cancellation of debts specifically by the ancient, technical term שְׁמַטָּה, "dropping," and so, by clear implication, connects this institution with the שְׁמַטָּה הַשְּׁמִיטָה, the "year of dropping" or "cancellation," as, in this connection, the Hebrew name may very well be interpreted.

Quite significantly, however, the Deuteronomic Code does not, in any of its primary strata, make any provision whatever for the ancient agricultural institution of leaving the fields lie fallow during the sabbatical year. But what is unquestionably a secondary, postexilic piece of Deuteronomic legislation (Deut. 31:10-13) does make incidental reference to the sabbatical year, and this too under its traditional name, the "year of dropping," by commanding that every seventh year, when the people would assemble at the single, central sanctuary, the temple in Jerusalem, for the celebration of the festival which, still in the early postexilic period, inaugurated the new year, the Torah, or Law, should be read to them (*see* LAW IN THE OT). Unquestionably it was in conformity with this command that Ezra read the Law to the people, assembled in Jerusalem in order to celebrate the Festival of Ingathering (*see* BOOTHS, FEAST OF) during the final seven days of the old year, and also upon the eighth day, immediately ensuing, the tenth of the seventh month, the New Year's Day (*see* NEW YEAR). From this it follows with practical certainty that this new year, inaugurated in just this manner by Ezra and his followers, was a sabbatical year.

Following the overthrow of the Southern Kingdom by the Babylonians and the destruction by them of Jerusalem and other walled cities and the exile of the upper social strata of the nation, the economy of the section of the Jewish people left resident in the land became, of necessity, predominantly agricultural. Accordingly it is not at all surprising that the Holiness Code (*see* PENTATEUCH), the product in its entirety of the postexilic period, and the primary stratum of which must be correlated with the erection and dedication of the second temple (*see* TEMPLE, JERUSALEM) in 516 B.C., revived the strict observance of the sabbatical year in the ancient manner, by noncultivation of fields and vineyards (Lev. 25:1-7). On the other hand, as might well be expected of legislation evolving out of the then prevailing, strictly agricultural economy, this code made no provision whatever for the cancellation of debts in the sabbatical year. Instead, the lending of money on interest by one Jew to another was forbidden absolutely and in its stead generous, brotherly provision for needy fellow Jews was earnestly commended (vss. 35-38). And that the Deuteronomic institution of debt-cancellation in the seventh year was generally disregarded, and even practically invalidated, throughout the postexilic period is convincingly evidenced by the economic situation existing within the Jewish community of Palestine of the third quarter of the fifth century B.C. (Neh. 5:1-13). Moreover, in the Holiness Code the automatic release of fellow Israelites, held as slaves, in the seventh year, after six years of servitude, was transferred to the Jubilee

Year (*see* JUBILEE, YEAR OF). From this varied legislation it is readily apparent that in the postexilic period the sabbatical year reverted, at least in large measure, to what it had been originally, a year of complete "dropping" or "interruption" of agricultural labor and of consequent noncultivation of fields, orchards, and vineyards—in other words, a year of strictly sabbatical character in the primary connotation of this term.

Quite significantly, the Priestly Code, formulated during the final quarter of the fifth century B.C. as the constitution of the official Judaism of the next five centuries, makes not the slightest mention of or reference to the sabbatical year and apparently disregarded the ancient institution completely. The reason for this is easily determined. This official Judaism centered in the temple in Jerusalem, the one single, officially legitimized sanctuary for the entire Jewish people. There the well-organized and formally sanctioned ritual worship of Yahweh was closely supervised and administered by the Zadokite or Aaronite priests. Furthermore, as one result of the administrative and civic reforms of Nehemiah in the course of the third quarter of the fifth century B.C., and particularly of his enforced repopulation of Jerusalem and other cities of Judea (Neh. 11), a clear-cut distinction speedily evolved between the urban and the rural sections of the Jewish community of Palestine. The former, and especially the population of Jerusalem, largely tradespeople by occupation and living in immediate contact with the temple, naturally conformed strictly to its official cult, as this was set forth in the Priestly Code. For these townspeople the sabbatical year, in its primary character, as a purely agricultural institution, could have little concrete meaning and appeal. And even more, for them as tradesmen, in their then somewhat precarious economic situation, its observance in its secondary, Deuteronomic phase, as the year of cancellation of debts, would have been practically impossible. However, despite these considerations it would seem that an effort was made, in strict conformity with the now traditional and reversed Mosaic law, to impose upon them the observance of the sabbatical year in both its phases—leaving the fields lie fallow and cancellation of debts (Neh. 10:32*b*). But there is good reason to believe that this program proved to these Jewish city dwellers altogether impracticable and unacceptable. This circumstance will account adequately for the complete silence of the primary stratum of the Priestly Code with regard to the sabbatical year.

Moreover, the rural sections of the Palestinian Jewish community of the end of the fifth century B.C. and thereafter, dwelling in small, open villages at varying distances from the temple, and therefore in their religious beliefs and practices but little amenable to priestly supervision and control, and, moreover, largely shepherds or farmers by occupation, and as such naturally conservative, and even more or less reactionary, in thought, belief, and practice, zealously adhered to many ancient religious institutions; among these, in response to their current way of life, was the old, agricultural pentecostal calendar, and with this the sabbatical year, in its primary aspect of leaving the fields lie fallow, and apparently also, to some extent at least, in its secondary

aspect of cancellation of debts. That these Jewish country people continued to observe the sabbatical year by at least leaving the fields lie fallow is evidenced abundantly. Thus, quite significantly, in the original Holiness Code legislation for the sabbatical year (Lev. 25:1-7) two manifestly late, priestly redactional interpolations can be detected (vss. 4*aa* [middle], 5*b*), which not only reaffirm the original H legislation for the sabbatical year but even coin for this year the new and decidedly descriptive title שנתן שבתון, the "year of sabbatical desistance." There is cogent reason for believing that these particular redactors represented a Jewish sectarian movement of the late fourth or early third century B.C., recruited very largely from the rural sections of the Jewish community of Palestine, and which, at least for its own sectarian purposes, employed a calendar which differed radically from the then official Jewish calendar and which approximated the ancient pentecostal calendar rather closely.

Likewise demonstrating the dominant practice of the Jewish farmers of Palestine of the first half of the second century B.C., I Macc. 6:49, 53-54, tells that Beth-zur fell to Antiochus V because the food supply of the garrison, necessarily scanty in a sabbatical year, was quickly exhausted (cf. Jos. Antiq. XIV. xvi.2; XV.i.2). Josephus tells likewise that under John Hyrcanus (135-104 B.C.) the Jewish nation refrained from aggressive warfare during the sabbatical year (Antiq. XIII.viii.1; War I.ii.4) and also that Julius Caesar remitted the annual tribute of the Jewish people in the sabbatical year, since in it they neither tilled their fields nor gathered the fruit of their trees (Antiq. XIV.x.6; cf. XI.viii.5-6). Furthermore, just as might be expected, various Jewish sectarian groups, recruited largely—so abundant evidence indicates—from rural, agricultural, and more or less peripheral sections of the Jewish community, stressed the observance of the sabbatical year in its primary aspect, by leaving the fields lie fallow, and also as a convenient unit of time-reckoning. Josephus (Antiq. XI.viii.6) reports that the Samaritans kept the sabbatical year in this manner. And Jubilees, certainly a Jewish sectarian writing, tells (4:18; cf. 50:1-3) that Enoch "recounted the sabbaths of the years"—i.e., unquestionably the sabbatical cycles of seven years, with the seventh and final year of each cycle a sabbatical year, undoubtedly strictly observed by the members of this sect. And, of equal significance, the Qumran sectaries of the final two centuries B.C. and the first two centuries A.D., likewise observed the sabbatical year, and this too in a manner conforming closely, both in content and in terminology, to the biblical prescription, as the "year of dropping," the year of both noncultivation of the soil and cancellation of debts. *See bibliography.*

Quite similarly, rabbinic Judaism, evolving rapidly in the period following the final destruction of the temple, that by the Romans in A.D. 70, sought, in conformity with its fundamental principle of strict adherence to the Mosaic law as this is recorded in the Pentateuch, to observe the sabbatical year in both its phases, letting the fields lie fallow and cancellation of debts. However, steadily changing conditions of Jewish life in Palestine and also the rapidly expanding migration, both voluntary and compulsory,

of Jews from Palestine to other lands necessitated all manner of modification, with rabbinic sanction and guidance, of the manner of observance of the sabbatical year. The record of all this is in the Mishna Tractate *Shebi'ith*. And, as might well be anticipated, the ancient institution finally fell into complete desuetude. This is evidenced rather graphically by the fact that the Babylonian Talmud contains in its Tractate *Shebi'ith*, merely the Mishnaic text but no record whatever of discussion thereof and action thereupon by post-Mishnaic rabbinic authorities. The Palestinian Jewish community rapidly became too small and unimportant for its practice with regard to the sabbatical year to have any further significance. And, quite naturally, for Jews dwelling outside Palestine, in foreign lands and among strange peoples with widely divergent cultures, the observance of the sabbatical year in either of its two phases became both meaningless and impracticable. Thus this ancient institution eventually became completely obsolete.

SABBEUS. KJV form of Apoc. Sabbaias. See SHE-MAIAH.

SABEANS סבא'נז סבאי' [שבאי, שבא; KJV סבא (Ezek. 23:42; RSV "drunkards"); SEBA סב'ב [סבא]; SHEBA שח'ב [שבא]. A Semitic people who dwelt in the SW corner of the Arabian Peninsula, and who traded in spices, gold, and precious stones. Seba is perhaps the name of a Sabean colony in Africa (see below); "Sheba" is the Hebrew spelling of "Saba," the S Arabic name of the Sabean state.

The Sabeans occupied that part of SW Arabia

which roughly corresponds to modern Yemen; their sphere of influence and the boundaries of their state expanded and contracted at different times with the shifting political scene. This region is one of the most fertile parts of ARABIA, and its productivity was augmented in antiquity through Sabean development of enormous irrigation works, such as the dam and sluices at Marib. Located as they were on the periphery of the ancient Near East at a safe distance from the great empires to the N, the Sabeans enjoyed comparative peace and security throughout all but the last centuries of their history, and they were able to develop their state and culture relatively free from forced foreign influence. Fig. SAB 1.

This location also enabled the Sabeans to play an important role in the economic life of the ancient Near East. On land, they dominated the major caravan route to the N, over which passed frankincense from Dhofar and myrrh from neighboring states. It is in connection with their caravan activities and traffic in incense, precious stones, and gold that the Sabeans were known to biblical writers (Job 6:19; Ps. 72:10, 15; Isa. 60:6; Jer. 6:20; Ezek. 27:22-23; 38:13). At various times the Sabeans controlled the ports of Muza (near modern Mocha), Ocelis (near Babel-Mandeb), and probably Eudaemon Arabia (Aden), where cargoes from India and the Far East were exchanged for commodities of the Mediterranean world, and where frankincense and myrrh from N Somaliland and other products from Africa joined the stream of international trade. From these ports sailed Sabean ships to trade with East Africa, Socotra, and probably India. As a result of such economic activities, great wealth flowed into Saba, and it was described by classical writers as *Arabia Felix*, "Happy Arabia."

The recovery of the Sabean civilization began in 1762 with the explorations of a Danish expedition led by Carsten Niebuhr. The Danes were followed by several individual explorers, notably U. E. Seetzen (1810), T. Arnaud (1843), J. Halévy (1869), E. Glaser (four journeys, 1882-94), and A. Fakhry (1947), who copied thousands of S Arabic inscriptions and described numerous ancient sites and remains. The first excavations (1928) were undertaken by C. Rathjens and H. von Wissmann at Huqqa, a site ca. fourteen miles N of San'a, where they cleared a small temple. More extensive and productive excavations were carried out at a temple—the so-called Haram Bilqis—near Marib, the ancient Sabean capital, by F. P. Albright for the American Foundation for the Study of Man in 1951-52.

The origins of the Sabeans are shrouded in mystery, though new information is beginning to come to light. Genesis, the earliest known literary source, preserves tantalizing, though somewhat baffling, bits of information. In Gen. 10:7 (=I Chr. 1:9) Sheba, together with Seba, is listed as a descendant of Ham through Cush, and was therefore considered by the author to be related to W and NW peoples. It is clear from this reference and from Ps. 72:10 that Seba and Sheba were not identical, though both names probably go back to S Arabic Saba. Since Seba is directly descended from Cush (Nubia), and since it is clearly associated with Nubia and Egypt in Isa. 43:3, it is probable that Seba was located in

1. Exit of S sluices as seen from the E, showing irrigation in ancient Qataban (Beihan)

Africa. Furthermore, the similarity of the names Seba and Saba suggests that Seba was a Sabeian colony. But according to Gen. 10:28 (=I Chr. 1:22), Sheba and several other S Arabian tribes are descended from Shem through the lineage Arpachshad, Shelah, Eber, and Joktan; here Sheba was believed to be closely related to N and NE peoples. Moreover, Gen. 25:3 (=I Chr. 1:32) lists Sheba as a descendant of Jokshan, the son of Abraham by Keturah, making Sheba and Israel closely related. Taken together, these genealogical references indicate that the Israelites thought that the Sabeans were related to the peoples of the Fertile Crescent—including themselves—on the one hand, and to the peoples of Africa on the other. Such extensive relationships are not surprising, in view of the fact that the Sabeans were engaged in trade and commerce from early times.

For a number of years, scholars disputed the position of Saba in the chronological framework of S Arabian history. Some argued that Ma'in, Qataban, and Hadhramaut chronologically preceded Saba, and that as late as the end of the eighth century B.C., Saba was a nomadic tribe centered in N Arabia. Others held that Saba preceded these states, which they dated as late as the fifth century B.C., and that it was located in S Arabia from early times. Excavations at Hajar Kohlan (ancient Timna', capital of Qataban) brought to light evidence which conclusively proved that the latter view was correct; Saba chronologically preceded the other S Arabian states.

A number of lines of evidence—linguistic and archaeological—suggest that S Arabia was settled by Semites who migrated southward from central or W Arabia in the middle centuries of the second millennium B.C. Whether the founders of Saba were among this group or were part of a later wave of migrants is as yet unknown. In any case, by ca. the twelfth century B.C., when travel across stretches of desert became possible as a result of the effective domestication of the camel, the Sabeans seem to have initiated caravan trade with the N. By the tenth century B.C., Saba was so well established that a queen could journey to Palestine—a distance of ca. fifteen hundred miles—with a richly laden caravan. Her visit to Solomon (I Kings 10:1-10, 13; II Chr. 9:1-9, 12) must have been concerned with trade, at least partly for the purpose of acquiring an agreement covering the distribution of incense and other commodities in the N that would be beneficial to both Saba and Israel. Presumably her mission was part of a general Sabeian commercial expansion in this period, which may have included the colonization of Ethiopia to the W and the development of a trading hegemony over S and W Arabia.

From not later than the ninth to the middle of the fifth century B.C., Saba was governed by rulers who assumed the title *mukarrib* (*MKR*B), a word which probably means "priest (king)." This situation is presumably similar to that which existed in Assyria before the fourteenth century B.C.; there the god was called "king," while his earthly agent—the actual king—was called *shangu*, or "priest." The known *mukarribs* of Saba, numbering over twenty, may be arranged in three groups on the basis of paleography and genealogy. The first group ruled from the ninth century to ca. 675 B.C. and included two rulers who

are mentioned in Assyrian inscriptions; Yithi'amara (Assyrian spelling, Iti'amra) by Sargon II, and Karib'il (Assyrian spelling, Karibi'ilu) by Sennacherib. To this period belongs the construction of the S tombs at Marib, though the builders are unknown. The rulers of the second group (ca. 675-525 B.C.) are known to have been extremely active in building. The first member of this group—Yadi'il Dhirrih, son of Sumuhu'alay—built temples to the moon-god at Sirwah, Marib, and el-Mesajid. Two other *mukarribs* of this period, Sumuhu'alay Yanaf and Yithi'amara Bayyin, cut sluices through solid rock at the S end of the great dam at Marib. The third group ruled ca. 525-450 B.C., but little is known of their activities. Throughout the *mukarrib* period, Sabeian art and architecture were strongly influenced by the cultures of Mesopotamia and Syro-Palestine.

Ca. 450 B.C., Karib'il Watar, the last *mukarrib*, assumed the title "king of Saba"; the change in title was probably a concession to the times, without any administrative meaning. Karib'il Watar was an ex-

ceedingly energetic ruler. He conquered the kingdom of Ausan in the S with the aid of Qataban and Hadhramaut, which were then vassal states, and captured the cities of Nejran to the N. He is also responsible for many constructions in Saba, as well as in the newly acquired territories. His successors carried out extensive building operations at Marib, including especially the completion of the oval wall and the construction of the entrance hall of the temple of the moon-god; they also extended the great dam at Marib. During the third and second centuries B.C., Saba became increasingly weak, while Qataban and Ma'in emerged as the dominant S Arabian states. In 24 B.C., Augustus Caesar, seeking to share in the lucrative incense trade, dispatched Aelius Gallus on a campaign to conquer this area, according to Strabo. After a disastrous march during which many legionaries were lost, Aelius Gallus laid siege to Marib; however, Marib was spared when, six days later, he lifted the siege, because of lack of water, and returned northward. Figs. SAB 2-3.

Contact with the Greco-Roman world was made early in this period and increased greatly during the first century B.C. and the first century A.D. Objects of Hellenistic art were imported or were made locally from imported molds for wealthy Sabaeans. Arretine (Italian *sigillata*) and other imported pottery has also been found at a number of S Arabian sites. Descriptions of S Arabia by a number of writers, including Theophrastus, Eratosthenes, Artemidorus, Diodorus Siculus, and Strabo, appeared during this period.

The period of the Kings of Saba and Dhu-Raidan began ca. the middle of the first century A.D. The early years were marked by a struggle for ascendancy and for possession of Qatabanian territory, then held by Hadhramaut. Saba emerged victorious from this struggle. In view of the prominence of tribal names in inscriptions of this period, it seems probable that a decentralization of power occurred in Saba at this time. There was some minor building during this period, especially repairs and additions to Awvam temple at Marib by Karib'il Watar Yuhan'im, his son Halak'amar, and others. Increased contact with the Mediterranean world is reflected by the more accurate descriptions of the region by the author of the *Periplus of the Erythraean Sea*, by Pliny the Elder, and by Claudius Ptolemy.

Ca. A.D. 325, King Shamar Yuhar'ish adopted the title "King of Saba, Dhu-Raidan, Hadhramaut, and Yamanat," following his conquests throughout S Arabia. He is also responsible for the construction of the present N sluices of the Marib dam. Following his reign, Saba and the W part of S Arabia were occupied by the Abyssinians for a generation or more (ca. 335-70); and during this period (341-46) Theophilus converted the Sabeian ruler to Christianity, no doubt with the support of the Christian ruler of Abyssinia. Toward the end of the fourth century one of his sons, Abkarib As'ad, conquered much of W and central Arabia—and assumed the title "King of Saba, and Dhu-Raidan, and Hadhramaut, and Yamanat, and their Arabs of the highlands and on the coastal plain." Legend holds that Abkarib As'ad journeyed to Medinah, where he adopted Judaism and thereafter made it the state religion of Saba. In the early sixth century the Jewish king, Yusuf As'ar

(Dhu-Nuwas), persecuted the Christians of Nejran, according to Syriac and Greek tradition. When word of this persecution spread, the Christian Abyssinians once again crossed the Red Sea, and in A.D. 525 killed Dhu-Nuwas and his followers. This Abyssinian occupation of Saba covered several decades, perhaps lasting until ca. 575. The last Sabeian ruler, the Abyssinian viceroy Abraha, made extensive repairs to the Marib dam and undertook an unsuccessful campaign against Mecca, the center of paganism. The Persian occupation of Saba began ca. 575 and continued until 628, when Saba surrendered to the forces of Islam.

G. W. VAN BEEK

SABI sā'bī [Σαβειή (B); Σαβή (A)]. KJV Apoc. form included in the latter part of the name POCHERETH-HAZZEBAIM.

SABTAH sāb'tā [סַבְתָּה]. Alternately: **SABTA** [סַבְתָּא] (I Chr. 1:9). A son of Cush, and hence the name of a place in Arabia (Gen. 10:7). It has usually been identified with Sabota in Hadramaut, a noted emporium for salt and incense, but the fact that this name is written as שַׁבּוֹת in Sabeian inscriptions militates against this view. Another possibility is the Sapha mentioned by Ptolemy, an inland town situated not far from the Persian Gulf.

S. COHEN

SABTECA sāb'tā [סַבְתְּכָא]; KJV **SABTECHA** (Gen. 10:7); **SABTECHAH** [סַבְתְּחָה] (I Chr. 1:9). A son of Cush, and hence the name of an Arabian locality. It has not been identified.

SACHAR sā'kār [שַׁכָּר]; KJV **SACAR**. 1. A Hararite; the father of Ahiam, who was one of the Mighty Men of David known as the "Thirty" (I Chr. 11:35). In the parallel catalogue his name is given as Sharar the Hararite (II Sam. 23:33). While it is not possible to determine the original proper name, the gentilic "Hararite" is undoubtedly the true reading.

2. A Korahite who is included among the sons of Obed-edom, the eponymous ancestor of one of the families of gatekeepers (I Chr. 26:4; cf. vs. 15).

E. R. DALGLISH

SACHIA סַחִיָּא [שַׁחִיָּא] (I Chr. 8:10); **KJV SHACHIA** shā—. A Benjaminite.

SACK [קֶשׂ, (also **SACKCLOTH**), *Egypt. sag, Coptic sok, Assyrian sakku, Gr. σάκκος; סַחִיָּא, from סַחִיָּא, spread out; כֵּל, a vessel or instrument (I Sam. 9:7; KJV VESSEL); עֲקָלוֹן (II Kings 4:42; KJV HUSKS), cf. Vulg., perhaps emend to קֶלֶחַ, bread bag]. In most references, a container for grain or food. Sacks were perhaps often made of coarse (goat's hair) cloth.*

H. F. BECK

SACKBUT. See **MUSICAL INSTRUMENTS.**

SACKCLOTH [קֶשׂ; σάκκος]. A garment of goat's hair or camel's hair, often worn as a symbol of mourning and by some prophets and captives. See also **ASHES; CLOTH; MOURNING.**

The "sack" of "sackcloth" is derived from the Hebrew קֶשׂ via the Latin *saccus* and the Greek σάκκος (cf. Akkadian *saqu*, Aramaic סַקֻּ). Authorities do not agree as to the shape of the garment. Some hold that it was a rectangular piece of cloth sewn on the sides and one end, leaving space for head and arms but having the shape of a grain bag. In support of this view may be cited the grain bags (קֶשׂ) carried to Egypt by Joseph's brothers (Gen. 42:25, 27, 35), and the worn-out sacks used by the Gibeonites in their deception of Joshua (Josh. 9:4; cf. Lev. 11:32, where the קֶשׂ is a common household object). Another view is that the sackcloth was a smaller garment such as a loincloth. Representations of Asiatic captives in ancient Near Eastern art often picture them wearing such a garment. In favor of this view may be cited the Hebrew practice of girding (חָגַר) the loins with sackcloth (II Sam. 3:31; Isa. 15:3; 22:12; Jer. 4:8; etc.), and putting it on the loins (Gen. 37:34; I Kings 20:31; Jer. 48:37; etc.). The fact that the person could be covered or clothed in sackcloth (II Kings 19:1-2; I Chr. 21:16; Esth. 4:2; Ps. 69:11; Isa. 37:1-2; etc.) may indicate that the garment was larger than a loincloth; doubtless its shape changed during the centuries and differed for men and women.

Sackcloth was dark in color, as can be judged by the phrase:

I clothe the heavens with blackness,
and make sackcloth their covering

(Isa. 50:3; cf. Rev. 6:12: "The sun became black as sackcloth").

The origin of sackcloth is unknown, although it probably goes back to prehistoric times when it was the only garment worn. There is no indication that the coarseness of the cloth produced physical discomfort when worn, or that it was used for the purpose of self-punishment, but it was put on as a sign of mental anguish at times of personal loss (II Sam. 3:31) and national calamity (II Sam. 3:31; II Kings 6:30; Neh. 9:1).

The use of sackcloth continued over many centuries. Jacob wore it to mourn for Joseph (Gen. 37:

34); Ahab "put sackcloth upon his flesh, and fasted and lay in sackcloth" (I Kings 21:27) in despair at his defeat by Elijah; the elders of Zion put on sackcloth in mourning for Jerusalem (Lam. 2:10); entire families with their cattle, laborers, and slaves girded themselves with sackcloth in time of national crisis (Jth. 4:10; cf. vs. 11, where the sackcloth was spread before the Lord, probably indicating that it was so designated even when not in the form of a garment; cf. Jonah 3:8 for a similar reference to the use of sackcloth with cattle); Mattathias and his sons put on sackcloth when in distress (I Macc. 2:14; 3:47); in the NT it is mentioned as a symbol of repentance (Matt. 11:21; cf. Luke 10:13).

Sackcloth is not mentioned in the Law; its general use seems to have been approved without question. Priests, like others, wore sackcloth (Joel 1:13) at a time of mourning, as did a virgin lamenting for the bridegroom (Joel 1:8). Although Isaiah wore sackcloth on one occasion (Isa. 20:2), it was probably not a normal prophetic garment—the mantle of hair worn by Elijah (II Kings 1:8; cf. Zech. 13:4) and the garment of camel's hair worn by John the Baptist (Matt. 3:4; cf. Mark 1:6) were more substantial robes.

W. L. REED

SACRED STONE [δίοπετής; *lit.*, fallen from Zeus] (Acts 19:35). Probably a meteorite which, having fallen from the sky and thus believed to be of supernatural origin, was considered a symbol of Artemis.

B. H. THROCKMORTON, JR.

***SACRIFICES AND OFFERINGS, OT.** From the earliest times until the destruction of the second temple in A.D. 70, a dominant element of Hebrew religion was a series of rites and ceremonies, both public and private, in which beasts were dispatched and victuals presented to, or consumed in the presence of, the deity. These are commonly styled sacrifices and offerings, the formal distinction being that a sacrifice does involve the slaughter or burning of an animal, while an offering does not.

The practices in question were diverse and varied not only in form but also in motivation and significance. Some of them were conceived as the presentation of gifts designed to propitiate the god on an outright basis of *do ut des* ("I give that you may give"). Some were payments of tribute due to him as landlord, king, and lifegiver. Some, again, were designed to provide the fare for a common meal by which god and worshiper might recement their ties; and others had as their object the sustenance of the god while he was on earth, or the purging of sin and the regeneration of the sinner by sanctified blood. Accordingly, they cannot be derived from any one single principle, and, in respect of them, all monogenetic theories of the origin of sacrifice may be safely discountenanced from the start.

From the practical as well as the theoretical point of view, Hebrew sacrifices and offerings are best classified according to their respective motivations. On this basis, four classes may be recognized: (a) gifts and tributes; (b) media of alimentionation; (c) media of communion; and (d) media of expiation. Each class is, of course, susceptible of further subdivision. Thus, media of alimentionation will include the suste-

nance of the god on the one hand and of the priests on the other. Similarly, media of expiation will embrace both substitutes, or surrogates, for individual "sinners" and vehicles for eliminating impurity from the community as a whole—i.e., "scapegoats"—while media of communion will cover rites designed to forge or consolidate bonds between men, and also those the purpose of which was to unite the deity with his worshippers.

In elucidating the several particular sacrifices and offerings, we need no longer confine ourselves to the scriptural text. Parallels both in terminology and in practice may now be found in some profusion in other ancient Semitic sources, particularly in ritual texts from Mesopotamia, Ugarit (Ras Shamra), and South Arabia. In addition, there are interesting points of resemblance in Hittite documents, while the resources of modern anthropological studies may also be recruited for purposes of general illustration.

A. Typology

1. Gifts and tributes
 - a. Propitiatory
 - b. Tributary (first fruits and tithes)
 - c. Votive
 - d. Thanksgiving
 - e. Freewill offerings
2. Alimentary
 - a. Blood and fat
 - b. Daily fare of God
 - i. The continual offering
 - ii. Schedule of offerings
 - iii. The "bread of the Presence"
3. Covenant and communion (blood sprinkling)
4. Expiatory
 - a. "Sin offering"
 - b. "Guilt offering"
 - c. Surrogates and scapegoats

B. Special occasions of sacrifices

1. Public
2. Private
3. Sacrifices to the dead
4. Human sacrifice
5. Foundation sacrifice

C. Sacrificial procedure

1. Introductory
2. Classification of sacrifices
3. Reserved portions
4. Priestly portions
5. Concessions to the poor

D. Material of sacrifices and offerings

E. The condition of purity

1. Prohibition against breaking bones
2. Ritual nudity
3. Apotropaic measures
 - a. Salt
 - b. Blowing of the ram's horn
 - c. Circumambulation of the altar

F. Attitude of the prophets

G. Later developments

1. Rabbinical Judaism
2. Sectarian attitudes

Bibliography

A. TYPOLOGY. 1. Gifts and tributes. Whatever their several motivations may have been, all sacrifices and offerings actually involved the presentation of

something to or before the deity. Hence they might readily come to be regarded as gifts, and the most generic Hebrew names for them—viz., מַתָּנָה (Lev. 23:38; Deut. 16:17; Ezek. 20:26, 31, 39), מְנַחָה (Exod. 29:41; 40:29; Lev. 2:1; etc. [cf. Arabic *manaḥa*, "donate, give use of"]); and קָרְבָּן (Lev. 2:1, 4, 7, 12; Num. 31:50; Neh. 10:35; etc.; cf. Mark 7:11), in fact possess that meaning.

These terms were by no means confined to the Israelitic system. The equivalent of מַתָּנָה occurs as the name of an offering in a sacrificial tariff from Ras Shamra-Ugarit (Ras Shamra 1939, 1.2), while *mnḥt* likewise denotes an oblation in various Phoenician texts (e.g., Marseilles Tariff, 14; Carthage Tariff, 10; *Corpus Inscriptionum Semiticarum* I, 145). As for קָרְבָּן, the corresponding verb is used in the same technical sense in Ugaritic (Ras Shamra 1929, ii.18) and, later, in Palmyrene (*North Semitic Inscriptions*, no. 133). Similarly, in Mesopotamian usage, sacrifices and offerings are sometimes designated by words meaning "gift" (e.g., *qistu*, *igisu*); while a common term, alike in Ugaritic (Ras Shamra 1929, i.1; ii.15-16; etc.), South Arabic (Glaser, 1150.3; Halévy, 185.5), and in inscriptions from Serabit, in Sinai (cf. W. F. Albright, *BASOR*, 110 [1948], 15), is *ḫ'*, of the same meaning (cf. Arabic *ḫ-w-*, "donate").

a. Propitiatory. As gifts, sacrifices and offerings would be considered primarily as of the same order as those which had to be presented to a king or other superior when one sought favors from him (Judg. 3:17; I Sam. 10:27; Mal. 1:8; cf. Plato *Republic* 390C: "Gifts persuade both gods and noble kings"). In other words, they would be propitiatory.

This may be further illustrated by the fact that the verb from which קָרְבָּן is derived is actually used in Akkadian with the specific connotation of "advancing a plea."

b. Tributary (first fruits and tithes). A gift made to a superior might easily assume the complexion of a tribute, and it is significant in this respect that the terms מַתָּנָה and מְנַחָה are, indeed, employed also in the OT of payments made by subjects to overlords (מַתָּנָה in Ps. 68:18—H 68:19; לָקַחַת מַתָּנֹת בְּאָדָם; מְנַחָה in Judg. 3:18; II Sam. 8:6; II Kings 20:12; Isa. 39:1; etc.); while the expression "proffer מַתָּנָה" is used in Amos 5:25 of bringing an oblation to God, but in I Kings 4:21—H 5:1 of paying tribute to a king.

This use of מַתָּנָה finds a parallel in the cognate Akkadian *mandattu* (cf. מָדָה in Neh. 5:4); while in Akkadian documents from Ugarit, *manḥatu* designates a token of homage rendered to an overlord (cf. W. F. Albright, *BASOR*, 146 [1957], 35), and in a poetic text from the same site (III AB, B 35-36), *mnḥ* is what other gods bring to Baal in recognition of his sovereignty. The association of ideas is further illustrated by the fact that the term *kbd*, which, in the ritual tariffs from Ugarit (Ras Shamra 1929, i.2; ix.13), designates a type of sacrifice, is employed also, in Akkadian texts from that site (cf. *Mission de Ras Shamra*, IV/iii [1955], p. 221, under *kabādu*), and in South Arabic inscriptions (e.g., Glaser, 150.2; 1083.4; cf. M. Lidzbarski, *Ephemeris*, II, 98), in reference to gifts of homage presented to rulers.

The idea that sacrifices and offerings are tributes rests not only on the general conception of the god

as a king, but also, more particularly, on the Near Eastern principle—attested especially in Arabic law—that he who “quickens” the soil, or activates anything, is entitled to a share of the produce. As sender of rainfall, etc., the god claims such due. It is, so to speak, the dividend on his investment, and to withhold it from him is an act not only of impiety but also of embezzlement. Indeed, on the same principle, a portion of the spoils of war was made over to the god who led (or inspired) a victorious army (I Sam. 22:10; II Kings 11:10).

The latter practice is attested also in Mesopotamian sources (e.g., Shalmaneser III = Luckenbill, *Ancient Records of Assyria and Babylonia*, I, §§ 616-17); while in the Ugaritic Poem of Aqhat it is enjoined (I, v.37-38) that the first “bag” (*pr'*) of a successful hunt must likewise be dedicated to the gods.

As such tribute, the god claimed the male FIRST-BORN (בכור, פטר רחם) of all living creatures; though in the case of human beings, as also of unclean animals, provision was made for ransom by monetary or other equivalents (Exod. 13:11-16; 34:19-20; Lev. 27:26; Num. 18:15-17; Deut. 14:23; 15:19). To the god belonged also the FIRST FRUITS of the field (Exod. 22:29; 23:19; 34:26) and the prime portion (ראשית) of all grain, must, oil, and new-shorn wool (Lev. 23:10; Num. 18:12-14; Deut. 18:4; cf. Neh. 10:37) and of all coarse meal (Num. 15:20-21).

Analogous offerings (*rešēt*) are attested in Mesopotamia, in Phoenician sacrificial tariffs (קריבת; Marseilles, 12; Carthage, 8; *Corpus Inscriptionum Semiticarum* I, 166.3) and in South Arabic inscriptions (*pr'*: Glaser, 1936.3; Halévy, 51.18; 476.3). There are likewise references to them in Hittite sources (e.g., *Keilschriftkunden aus Boghazköi*, XII 4, iv. 3-4); while among the Greeks first fruits of barley and wheat were presented to Demeter and Korê at Eleusis (Isocrates *Panegyricus* 6 ff; cf. Dittenberger, *Syllogê* [3rd ed.], iv.83); and among the Romans, the first ears of corn were offered to Ceres (Ovid *Fasti* II.520; *Festus*, p. 423 [Lindsay]).

The specification of first fruits and firstlings as tributary offerings was probably influenced by the widespread primitive notion that there is a special “virtue” in new things, which renders them inviolate (cf. Lev. 19:23-25) and by reason of which they must be set apart for the gods or other holy beings. Moreover, it is commonly believed that the surrender of a prime part will protect the rest from hurt and blight.

Originally of undetermined quality, these first fruits were later stabilized as a tenth part, or *TITHES* (מעשר; Lev. 27:30-32; cf. II Chr. 31:5-6, 12; Neh. 10:38; 12:44; 13:5, 12; Amos 4:4; Mal. 3:8, 10), the identity of the two things—at least in the Deuteronomic system—being evident from a comparison of the parallel passages, Deut. 14:22 ff; 26:2 ff, where the terms “firstlings” and “tithes” are used interchangeably.

Such tithes are mentioned also in texts from Ugarit (cf. *Mission de Ras Shamra*, IV, Index, under *mašaru*, *mešertu*; Ras Shamra 1929, v.2: 'šr 'šr).

c. *Votive*. Besides being propitiatory or tributary, gifts could also be votive—i.e., consequent upon a Vow or promise to make a concrete payment to a god for fulfilling the wish, or otherwise prospering the interests, of his suppliants. Offerings of this kind

(נדב; Lev. 7:16-17; 22:21; 27; Num. 6:21; 15:3 ff; 30:11; Deut. 23:21 ff; Jonah 1:16; etc.) could be presented either on making the vow or later, when the request had been granted. Moreover, the vows themselves could be envisaged either as purely speculative, or as formally contractual.

The basic meaning of נדב would seem to be “to set apart”—i.e., to segregate for the god or for sacred use. This meaning is contained also in the expressions פלא נדר (Lev. 22:2; Num. 15:3) and פלא נדר (Lev. 27:2), for the primary sense of the verb פלא is “to segregate, render special.” The corresponding noun (*pl'*) occurs in Ugaritic (III Keret, iii.23) with the signification “vow.”

The verb נדר is not infrequent in Phoenician votive stelae (e.g., *Corpus Inscriptionum Semiticarum* I, 92 [Idalion, 354 B.C.] and in Neo-Punic and Nabatean inscriptions (e.g., North Semitic Inscriptions, no. 59, c. 2 [Maktar]; p. 245, n. 1 [El-Qanawat in Jebel Hauran]).

d. *Thanksgiving*. Where the votive offering is made in acknowledgment of favors received, it naturally tends to merge into the thank offering (תודה; cf. Lev. 7:12-13, 15; 22:29; II Chr. 33:16; Pss. 50:14, 23; 107:22; 116:17; Jer. 17:26; Amos 4:5; etc.), although the two things are, of course, formally distinct, inasmuch as the latter does not imply any previous promise or contract. Moreover, in Lev. 7:15 ff, the offering of thanksgiving is put into the category of a meal consumed by the offerants, and may therefore well have originated—at least in certain cases—in the festive banquet which celebrated the successful issue of anything, and only later have come to be associated with the idea of acknowledging divine favors.

A sacrifice in acknowledgment of the favor (*dbh n'mt*) of the sun-goddess (*Špš*) in bringing vines to blossom is mentioned in the Ugaritic text, “Shahar and Shalim,” 27; while a common formula in South Arabic sacrificial inscriptions (e.g., *Corpus Inscriptionum Semiticarum* IV, 28.5; 163.17; 180.8; 181.6; 197.12) combines references to votive and thanksgiving offerings in the words: “For past and future favors [*ldi n'mt wtn'm*].”

e. *Freewill offerings*. Lastly, to the category of gifts belonged the voluntary, or freewill, offering (נדבה; Exod. 35:27-29; 36:3; Lev. 7:16; Num. 15:3; Deut. 12:17; 16:10; 23:23; II Chr. 22:21; 31:14; 35:8; Ezek. 46:12), prompted solely by the impulse of the donor. Since it therefore involved no statutory commandment, and was neither a means for establishing sacramental communion with the god, nor a payment made in respect of a contract with him, the regulations governing it were less stringent than in other cases: the animal offered did not have to be spotless (Lev. 22:23).

2. *Alimentary. a. Blood and fat*. It was a belief of the Semites, as of other ancient peoples, that the immortal and supramundane quality of gods was sustained by their eating special food or imbibing special drink in heaven. Such celestial “food of life” (*akâl balaṭi*) and “water of life” (*mê balaṭi*) play a significant role in the Mesopotamian myth of Adapa (B, 60-62; *ANET* 102). The belief is attested among the Hebrews by Pss. 78:25; 105:40; Wisd. Sol. 16:20. Analogous, of course, are the Vedic soma and amrita, and the Greek nectar and ambrosia.

Accordingly, when the gods came down to earth and sojourned among men, they were temporarily deprived of that substance, and therefore stood in need of constant refreshment by more mundane life-giving substances. Such were, above all, the blood and suet of earthly creatures, for these were considered the primary seats of vitality and energy.

The notion was widespread in antiquity. For the vital quality of blood, cf., among the Hebrews, Gen. 9:4; Lev. 17:11; Deut. 12:23; and for analogous ideas among other peoples, see: Pythagoras, quoted by Diogenes Laertius VIII.30; Servius on Vergil *Aeneid* III.79.

Hence, another of the primary purposes of sacrifice was to supply the gods, while on earth, with blood and suet; and this survived atavistically in the Hebrew system by reserving to Yahweh just those elements of the offertory victims (cf. Exod. 24:5 ff; Lev. 3:14; Deut. 32:37-38; I Sam. 2:15).

b. Daily fare of God. Moreover, when a god took up residence in an earthly habitation in order to render himself more accessible to men and, as it were, to hold rendezvous (יעד) with them, he was treated in the same way as a mortal king, being roused in the morning, washed, dressed, coiffured, fed, and put to bed at night. It was, in fact, this constant ministration to his creature comforts rather than mere acts of adoration, that formed the essence of the statutory sacred offices, and the Hebrew term עבודה, commonly rendered "worship," really implies such service in the widest sense. Similarly, in the Babylonian Epic of Creation (*Enuma Eliš*, VI.5-8), the primary purpose of man's creation is said to be the provision of a robot who might perform menial chores (*dullu*) for the gods. In this context, sacrifices and offerings provided the daily victuals of the deity.

i. The continual offering. In the Hebrew system, the daily sustenance of God on earth was provided principally by the so-called "continual offering" (תמיד), which consisted of an immolated beast offered whole (עלה), together with a meal or cereal offering (מנחה) and a libation (נסך); cf. Exod. 29:38-42; Lev. 6:13; 24:3-4, 8; Num. 28:3, 6; I Kings 18:29-36; II Kings 25:29-30; II Chr. 2:3; 24:14; Ezra 3:5; 9:4; Ezek. 39:14; 46:13-15; Dan. 9:21; 11:31; 12:11. The rules concerning it seem, however, to have varied at different periods. In I Kings 18:19-36 and again later, in Ezra 9:4; Dan. 9:21, the immolation takes place in the morning, and the cereals are offered in the late afternoon. On the other hand, in Exod. 29:38; Num. 28:1-8; Dan. 8:11-14, both are presented alike in the morning and in the evening.

This last is paralleled in Babylonian practice, for a ritual calendar from Uruk (*ANET* 342-45) prescribes a "heavy meal" (*naptanu rabu*) and a "light meal" (*naptanu quṭtinu*) alike in the morning and in the evening.

On sabbaths, New Moons, seasonal festivals, and holy days, supplementary offerings (מינסח) were added.

ii. Schedule of offerings. The schedule is given in detail in Num. 28-29. This prescribes a daily whole offering of two yearling he-lambs, one in the morning, the other in the evening. On the sabbath, two further yearling he-lambs are to be sacrificed; while at the New Moon and on the festivals of Un-

leavened Bread and First Fruits, the extra offering is to consist of two young bullocks, one ram, and seven yearling he-lambs without blemish. On the first day of the seventh month—called the "Day of the Blowing of the Trumpet"—and likewise on the tenth day (i.e., the Day of Atonement), the supplementary offering is to comprise one young bullock, one ram, and seven yearling he-lambs without blemish. In the former case, this is to be superogatory to the ordinary New Moon sacrifice. At the Feast of Ingathering, thirteen additional young bullocks are to be offered on the first day, and one less on each of the succeeding six days, together with two rams and fourteen yearling he-lambs without blemish. Finally, on the Feast of 'Ašereth, immediately after Ingathering, one bullock, one ram, and seven unblemished he-lambs are to be added. Furthermore, on all the aforementioned occasions, except the sabbath, a he-goat is to be offered as a מוסח, or medium of purgation (see § A4a below); on the Day of Atonement this is to be superogatory to that used in the major purification ceremony (Lev. 16:9).

A fixed scale determines the accompanying meal offerings. Every day one tenth of an ephah (0.105 American bushel) of fine flour is to be presented, soaked in one quarter of a *hin* (0.40 gallon) of oil, and with each of the two he-lambs is to go a libation of one quarter of a *hin* of strong drink. Otherwise the rule is that for each young bullock there must be an accompanying offering of three tenths of an ephah of fine flour, and for each he-lamb one tenth. Furthermore, with each young bullock there is to be offered half a *hin* of wine; with each ram, one third of a *hin*; and with each he-lamb, one quarter of a *hin*.

A different schedule, however, is laid down by the prophet Ezekiel (574 B.C.) in his blueprint of the restored temple of the future (45:18-46:15). The daily offering is to consist of one yearling bullock, offered in the morning, along with one sixth of an ephah (0.175 American bushel) of fine flour, and one third of a *hin* (0.54 gallon) of oil. On sabbaths, six unblemished he-lambs and one unblemished ram are to be presented, plus one ephah of fine flour with the latter, and an optional amount with the former. Each ephah is to be moistened with one *hin* of oil. On New Moon the quota is to be the same, except for the addition of one young bullock. Moreover, it is as an accompaniment to that beast that the ephah of cereal is to be presented, the amount going with the other animals being optional. During the festivals of Unleavened Bread and Ingathering, the president (נשיא) of the community is to present on its behalf seven young bullocks and seven unblemished rams, together with one ephah of cereal and one *hin* of oil for each. (No provision is made for the Feast of First Fruits, though it is possible that words relative to this occasion have dropped out of the text of 45:21.)

A young bullock is to be offered as a מוסח at the Feast of the Passover, and a he-goat on each day of the ensuing Festival of Unleavened Bread and of the Feast of Ingathering. Furthermore, on the first day of the first month, and again on the first of the seventh month (so LXX; MT "on the seventh day of the first month"), a bullock is to be offered for the decontamination (מטמ) of the sanctuary; drops of its

blood are sprinkled on the four corners of the altar fence and at other crucial parts of the building.

Analogous Babylonian sacrificial schedules—though on a more lavish scale—may be found on the famous tablet from Uruk (*ANET* 343-45). The Ugaritic sacrificial tariffs contain but few indications of the calendar dates to which they apply. One of them (Ras Shamra 1929, iii), however, prescribes offerings for each of seven consecutive days, but whether this refers to a seven-day festival or to the seven days of the week we cannot tell. The same document also prescribes “two sheep on the day of the new moon” (line 48: *by m hdt ʔn ʃm*), and elsewhere (ix.10-11) there is an allusion to the king’s performing some kind of purificatory ceremony (*mlk brr*) “in the month of Teshrit”—possibly analogous to the Hebrew atonement rites.

iii. The “bread of the Presence.” Besides such daily quotas of meat, meal, and drink offerings, Yahweh received also, as statutory fare, the so-called BREAD OF THE PRESENCE (לֶחֶם הַפָּנִים; Exod. 25:30; I Sam. 21:6; I Kings 7:48; II Chr. 4:19; cf. Exod. 39:38; Num. 4:7), later known as showbread (לֶחֶם הַמִּצְבֵּי; I Chr. 9:32; 23:29; 28:16; II Chr. 2:4; 13:11; 29:18; Neh. 10:33; cf. Matt. 12:4; Mark 2:26; Luke 6:4; Heb. 9:2). Alternative names for it were: “bread of God” (לֶחֶם אֱלֹהִים; Lev. 21:6, 8) and “holy bread” (לֶחֶם קֹדֶשׁ; I Sam. 21:4—H 21:5). According to the prescription in Lev. 24:5-6, it consisted of twelve loaves of fine flour, set upon the altar in two rows of six, and topped with pure frankincense (and, according to the LXX, also with salt). The loaves were changed every sabbath, those that were removed being then eaten by the priests.

There are arresting parallels in Mesopotamian cultus. There too the regular offertory bread is sometimes termed “food of the presence” (*akāl pāni*; V R 24, 18 c-d), and it is sometimes said to consist of twelve loaves—a number likewise favored in Hittite sacrificial usage. Moreover, although the fact is nowhere stated in the OT, postbiblical sources (Jos. Antiq. III.vi.6; x.7; M. Men. 5.1) assert that the bread was unleavened, and in Mesopotamian sources it is similarly described (*mutqu*).

3. **Covenant and communion (blood sprinkling).** In some cases sacrifices and offerings were simply a translation to the cultic sphere of regular social practices. One of the most prominent of these was the custom—attested by our own word “com-pani-on” (cf. לֶחֶם אֲנָשִׁי [Obad. 7]; אֲנֹכִלִי לֶחֶם [Ps. 41:9—H 41:10]; בָּעֲלֵי לֶחֶם [Ecclus. 9:16])—of forging or reaffirming ties of kinship and alliance by “breaking bread” together. Abram, e.g., thus cemented alliance with Melchizedek, king of Salem (Gen. 14:18-20), and Isaac with Abimelech (26:30); while the Israelites were tied to the Gibeonites through having partaken of food in common (Josh. 9:14). Such usages survive among modern Bedouins. Herodotus relates (IV.172) of the Nasamoneans that they made covenants by drinking out of one another’s hands.

Accordingly, it has been suggested by one scholar that the primary and original purpose of sacrifice among the Semites was to forge or cement relations with a god by sharing a meal with him. In support of this view, it is pointed out that in Israelitic thought the relationship between God and his people was in-

deed conceived as that of a COVENANT, and that the OT itself bears witness to the belief that the god participated in communal feasts, and especially in those held to cement alliances. In Deut. 12:7, e.g., the Israelites are commanded that, after the occupation of Canaan, they are to perform sacrifices and offerings and “eat in the presence of Yahweh your God” at his appointed place; while in Exod. 18:12 we are told that when Moses and Jethro concluded an alliance, “Aaron came with all the elders of Israel to eat bread with Moses’ father-in-law in the presence of [RSV ‘before’] God.” Similarly, in the Ugaritic Poem of Aqhat (I, iv.57-58), when Yatpan welcomes the maiden Paghat to his tent and offers her his protection, the pledge is sealed by a drink in which the god “who owns the fields” participates (*tqh ks bdh, qb’t bymnh, wy’n ʔtʔn mhr ʃt: byn ʔʃt iln ʃ . . . il dyqny ʒdm*; cf. Vergil *Aeneid* VIII.274-75: *pocula porcite dextris, Communemque vocate deum, et date vina volentes!*).

To be sure, the generalizing inferences drawn from these evidences have long since been invalidated by the increased information (from Mesopotamian and Ugaritic sources) which was unavailable until recently. Nevertheless, the importance of commensality as one of the elements of Hebrew sacrifices and offerings must indeed be recognized. It should be observed also that the theories regarding the purpose of sacrifice as covenant and communion were formerly based very largely on a description of Saracen sacrificial practices given by Nilus in the fourth century, but it has since been shown that this account is quite unreliable and that the usages in question do not really represent survivals from primitive Semitic antiquity.

It has been suggested also that the Hebrew word הֲשֵׁן, commonly rendered “fire offering” (as if from שָׂן, “FIRE”), is really to be derived from a root שָׂן, “be sociable,” and that the sacrifice thus designated is hence to be regarded as having been designed primarily to effect communion, or social rapport, between god and men. This, however, is doubtful.

In outward recognition of the covenantal bond, it was anciently the custom to sprinkle drops of the sacrificial blood on the persons or dwellings of the participants. In Israelitic sacrificial usage, this survived in the ritual of the PASSOVER, where such blood was dashed on doorpost and lintel, thereby signifying that the occupants of the house were, so to speak, duly registered “kinsmen” of Yahweh and therefore ensured of his protection against hurtful demons (Exod. 12:7, 13, 22-23).

4. **Expiatory. a. Sin offering.** Any contact with impurity, either physical or moral (and the two were not rigorously differentiated), any infringement of traditional taboos, and any violation of cultic laws, was regarded by the Hebrews as entailing an impairment of the offender’s essential “self” (נַפְשׁוֹ). Out of harmony with the prescribed order of things, he was, until regenerated, in the category of “damaged goods.” The Hebrew term for this was חַטָּאת, usually rendered “sin.” Such a rendering, however, tells but half the story. The primary meaning of the word is “to miss, fall short of,” and the reference was not so much to the actual commitment of the offense as to the consequent state of the offender’s self. The corresponding Akkadian *hātū* often possesses the con-

notation of "unlucky," and the nouns *hitu* and *hititu* mean "(concrete) damage, loss, or defect" (e.g., Code of Hammurabi, sections 235.18; 267.84; *Archives Royales de Mari*, III, 12.14). The range of meaning is approximately that of the Italian *disgrazia*. See SIN, SINNERS.

To purge this condition, recourse was had to the sacrificial rite known as חטאת (LXX ἀμαρτία; Vulg. *peccatum*), usually rendered "sin offering" (cf. Exod. 29:14, 36; Lev. 4, *passim*; 5:9, 11-12; 6:18, 23; 8:10-14; 10:1-13; 14, *passim*; 16:6, 11, 25, 27; Num. 19:9, 17; 28:22-38; 32:23; II Chr. 29:23-24; Ezek. 40:39; 42:13; 43:21-25; 45:19-22; 46:20; etc.). The rite was performed not only in respect of such moral misdeeds as refusing to testify, but also in order to remove the "contagion" of childbirth and leprosy; while at the major festivals, and likewise at the consecration of priests (Exod. 29:9-34; Lev. 8:10-14), it served to cancel latent pollution. In South Arabic (Sabean) inscriptions, the corresponding term *h-t'* denotes the performance of a rite designed to rehabilitate a person who has violated sexual taboos—e.g., a woman who has had intercourse during menstruation, or visited a sanctuary at that time.

The rite was two-sided: on the one hand, it removed the contagion; on the other, it regenerated the "infected" individual(s). The former end was usually (though not always) accomplished by having the offrant or priest lay his hand (סתר) on the victim's head (Exod. 29:10, 19; Lev. 1:4; 3:2, 8, 13; 4:4, 24, 29, 33; 16:21; 24:14; Num. 27:18), thereby indicating a transference of the taint. Similarly, among the Toradjas of the Celebes, when a man returns from a long voyage, he has to lay hands upon a dog, in order to transfer to it all malign influences with which he may be charged, before entering his house.

The latter end was served by having the priest apply drops of the sacrificial blood to the right ear, thumb, and big toe of the offrant (Exod. 29:20; Lev. 4, *passim*; 8:23-24; 14:14, 25). Since this blood had been previously "consecrated" by being sprinkled on, or brought into contact with, the altar, the purpose of the procedure was evidently to regenerate the impaired "self" (נפש) of the offender by transferring to him something of the *elan vital* of that holy substance. Not impossibly, the choice of the ear and the right hand and foot effected, or symbolized, the regeneration of the senses on the one hand and the limbs on the other.

Nor was it only human beings who could be thus reconditioned. The altar too could be purged of taint and made over anew into the category of the supramundane (קדוש) by being aspersed with blood of a חטאת. Thus, at the installation of Aaron and his sons—a mere historicization, of course, of practices attending the induction of priests—Moses is said to have slaughtered a bullock as a חטאת and to have applied drops of its blood to the horns (i.e., corner projections) of the altar, pouring out the remainder at the base (Lev. 8:15; cf. Exod. 29:12). Thereby, we are told, he not only "cleared it of taint [ויהיטא]," but also "made it holy by purging it [ויקדשהו לכפר עליו]." *b. Guilt offering.* Utterly distinct from the חטאת, though often confused with it by modern scholars, was the so-called guilt offering (אשם; LXX πηλη-

μέλεια; KJV "trespass offering"; Lev. 5:16, 19; 7:1-7; 14, *passim*; Num. 5:7-8; 6:12; 18:9; II Kings 12:17; Ezra 10:19). Far from being a vehicle of rehabilitation, this was primarily a fine imposed upon one who had caused material damage to another—e.g., by concealing evidence, swearing rashly, misappropriating property (Lev. 6:1-26), or ravishing a betrothed handmaid (19:20). Originally a purely civic institution, it was later extended to cases of damage or loss occasioned to the deity by fraud (מעל) in respect of sacred things (5:16-17) or by such ritual impurity—e.g., through leprosy (14:12-13) or violation of the Nazirite state (Num. 6:12)—as disqualified a man from rendering his normal service. Indeed, at the return from the Babylonian exile, it was imposed also on those priests who had married Gentile women (Ezra 10:19).

The incorporation of the אשם into the sacrificial system first appears in the Priestly Code (P), which dates from the fifth century B.C. The institution itself, however, was certainly known at an earlier date, for the author (J) of Gen. 26:10 has Abimelech chide Isaac for exposing the Philistines to possible payment of an אשם (for ravishment) by passing off his wife, Rebekah, as his sister; while in I Sam. 6:3-17, the plague-ridden Philistines, anxious to placate Yahweh, are advised by their priests to accompany the return of the captured ark by payment of an אשם.

On the other hand, the oft-repeated statement that the אשם is mentioned in the Ras Shamra Texts is false, for the word (*atm*) so identified is, in fact, Hurrian and occurs only in Hurrian documents (viz., Ras Shamra 1929, vii.6-8; xxxiv.11).

The אשם was not an indemnification, but simply a mulct. Indeed, it had to be paid over and above the actual restitution of the damage (Lev. 5:14-16). Its purpose was punitive, not compensatory, and it corresponded, more or less, to the modern concept of a "debt to society," which implies far more of retaliatory privation than of material restitution. In the popular mind, however, a fine paid to an abstract God in respect of material damage inflicted upon him will readily merge into an act of restitution, and it is therefore not surprising that the payment of it is sometimes described in the OT by the verb "restore, give back" (השיב; Num. 5:7-8; I Sam. 6:3-4, 8, 17).

The basic idea of the אשם may perhaps best be apprehended from two poetic passages in which the point depends on the original meaning of the term. (a) In Isa. 53:10 (where no emendation of the text is necessary!), it is said of the Suffering Servant, who undergoes tribulation on behalf of his people, that "if he let his own person serve as an אשם [lit., if his own person render אשם נפש; אשם תשים אשם נפש], then, though Yahweh has chosen [at present] to crush him with sickness, he shall yet see progeny, enjoy long life" (orig. tr.). (b) In Joel 1:18, the sorry condition of flocks and herds which lack pasture in a time of famine and divine displeasure, is described in the arresting words: "Even the flocks of sheep are being made to pay their guilt offering" (נאשמו; LXX ἠφαινόθησαν; Vulg. *desperierunt*; RSV "are dismayed"; KJV "are made desolate" [i.e., נאשמו]).

c. *Surrogates and scapegoats.* A common view of expiatory offerings is that they were designed pri-

marily to provide surrogates, or substitutes, for the lives of human offenders, which the god might otherwise claim in retribution. This, e.g., seems, by and large, to have been the view of the ancient rabbis (cf. Zeb. 6a), and modern scholars have resorted to it especially to account for the familiar rite of the scapegoat on the Day of Atonement (Lev. 16; see ATONEMENT, DAY OF). In support of it, reference is made to the frequent use of such substitutes (*takpirtu*, *puhu*) in Babylonian magical ceremonies and Hittite rituals (*ANET* 346-47), as well as to the virtual ubiquity of the animal ransom (*fedu*) in modern Arabic popular custom. This view, however, is thoroughly mistaken, for such animals are not in fact substitutes for capital punishment, but merely vehicles for transferring and thereby removing taint and contagion, either actual or prospective. If the animal is eventually put to death, this is purely incidental; the main thing is simply to dispatch it from the community, so that the miasma may be borne away with it. This, e.g., was the function of the human scapegoats (φάρμακοί) dispatched from the city at various ancient Greek festivals, as it is also of "the Death" and similar figures in modern folk customs; while the biblical ritual itself prescribes that the beast be dispatched "to a solitary land" (Lev. 16:22)—the Mishna's description (Yom. 6.6) of how it was then pushed over a cliff represents only a later elaboration.

Such disposal of residual miasma was obviously necessary before complete clearance from impurities like leprosy could be effected (cf. Lev. 14). In the case of the scapegoat, however, two further elements enter the picture. First, the scapegoat was not, as modern parlance would suggest, something to which one shifted the blame for one's own transgressions and which was made to pay the price of them. On the contrary, it was a means of removing from the community the taint of sins which had first to be fully and openly confessed (16:21). What it removed, therefore, was miasma, not responsibility. Second, the expulsion of the scapegoat was, among the Hebrews as elsewhere, essentially a public ceremony, and in their case (as again in many parallel instances) it took place just before the opening of the agricultural year, when the community was about to enter upon a new lease of life. Its primary purpose, therefore, was to rid society as a whole of any latent miasma, responsibility for which could not, for one reason or another, be assigned precisely to particular individuals. In such circumstances the only possible means of riddance was by pronouncing a collective, blanket confession of sins and then saddling the collective taint upon some one deputed being. In other words, the scapegoat was representative, not substitutional, and the real and sole purpose of the institution was to do that which had to be done for the public benefit but which could not be done by individuals.

A close parallel to the biblical ritual is afforded by the ceremony called *kuppuru* (cf. Hebrew *kip̄p̄urim*, "purgation, atonement"), which took place on the fifth day of the Babylonian festival of Akītu, celebrated at the beginning of the year. The temple was aspersed and fumigated (cf. Lev. 16:11-16). Then a sheep was beheaded, and the walls of the chapel of Nabu were rubbed with its carcass. This done, head

and carcass were tossed into the river, while the slaughterer and the officiating priest were sent out of the city, to observe a quarantine until the end of the festival (cf. vs. 26; see *Keilschrifttexte aus Assur Verschiedenen Inhalts*, p. 120, ii.22-38).

B. SPECIAL OCCASIONS OF SACRIFICE.

1. Public. In addition to those which formed part of the statutory cult, sacrifices were performed publicly on occasions when it was thought necessary to purge the community of the taint of collective misdeed (Lev. 4:13 ff; Num. 15:24-26) or of a plague (II Sam. 24:21-25; I Chr. 21:23), or when an offense committed by the priest might entail grievous consequences for the people (Lev. 4:3 ff; cf. 14; 16:11, 14). The consecration of a temple or altar also required appropriate sacrifices (8:14 ff), and so too did the consecration of priests (Exod. 28; Lev. 8) and the installation of kings (I Sam. 10:8; 11:15). In all these cases, what was involved was the removal of impurity on the one hand and the replenishment of "holiness" on the other.

Sacrifices were offered also before battle (I Sam. 7:9; 13:9). It is not sufficient, however, to say simply that these were propitiatory, for they may equally well have been designed (at least originally) as a means of absorbing "divine" vigor in a moment of crisis.

2. Private. Private sacrifices comprised not only the *אִשָּׁה* but also offerings made after childbirth (Lev. 12:6-7) and weaning (I Sam. 1:24) and on concluding personal pacts (Gen. 26:26-30; 31:46-54). Periodic family pilgrimages seem also to have been made to local sanctuaries for the purpose of offering sacrifice (I Sam. 1:3-4), doubtless as a means of recementing ties with the deity.

Sacrifices offered by families and religious guilds are expressly distinguished in the Phoenician tariff from Marseilles (line 16) from those presented by individuals (*אִרְמָם*). Such a guild was called a *mrzḥ* (*מְרִיחָה*)—a term derived from the root *רוּח*, "shout," and thus akin to the familiar Greek *θάσος*, as it is, indeed, rendered by the LXX in Jer. 16:5 (cf. also the Palmyrene inscription, *North Semitic Inscriptions*, no. 140, A 2 [A.D. 132]; Sifre, 47b [ed. Friedmann]). The institution was ancient, for the *mrzḥ* (*marze'u*) of a god named Šatran is mentioned in Akkadian texts from Ras Shamra-Ugarit. A further reference to "clan offerings" has been tentatively recognized (*ANET* 155) in the obscure expression *dbḥ dgtl* in the Ugaritic Poem of Aqhat, C 187-88, 192-93.

3. Sacrifices to the dead. Such sacrifices are seemingly mentioned in Ps. 106:28. Here again, however, caution is in order, for the Hebrew text speaks only of "sacrifices of the dead" (*זְבָחֵי מֵתִים*), not to them, and all that may really be meant is the common practice of sharing meals with ancestral spirits, who are believed to visit their kinsmen at seasonal festivals. It is to be noted, in fact, that the people themselves are said expressly to have partaken of the fare!

4. Human sacrifice. That human sacrifice was current in early Palestinian religion is abundantly attested by the biblical denunciations of this practice (Lev. 20:2; Deut. 12:30-31; II Kings 16:3; 17:31; 23:10; Ps. 106:37-38; Jer. 7:30-32; 19:3-5; Ezek. 16:20-21; cf. Wisd. Sol. 12:4-6). Moreover, in North Mesopotamian texts of the tenth-seventh centuries B.C.

we hear, indeed, of the cremation of male children in honor of Hadad.

Here too belong the several references in the OT to the passing of children through fire to Molech (Lev. 18:21; II Kings 23:10; Jer. 32:35). What is implied is a matter of debate among scholars. According to the traditional view, Molech is a pagan god (i.e., "the King"), and a deity of this name is certainly mentioned in tablets of the eighteenth century B.C. from Mari and of the Third Dynasty of Ur. Moreover, Diodorus tells us explicitly (XX.14) that children were set before the statue of the Tyrian god Melqarth at Carthage and then passed into a furnace. On the other hand, O. Eissfeldt has argued, from the occurrence of *molch* in Punic votive inscriptions, that the term means simply "votive offering." It is possible also that the Israelite writers have confused with human sacrifice a more innocuous practice, widely attested, of passing children rapidly through a flame as a means of absorbing immortality or giving them extra strength. The practice is most familiar from the classical tales of Demeter and Demophon (Homeric Hymn to Demeter 237 ff; Apollodorus *Bibliotheca* I.v.1; Ovid *Fasti* IV, 487), Thetis and Achilles (Apollonius *Rhodiis Argonautica* IV.869; Apollodorus III.xiii.6), Medea and her children (Pausanias II.iii.1). It is related also concerning Isis and the infant son of the king of Byblos (Plutarch *De Isis et Osiris* XVI), and is reported as current in Timorlaut.

The archaeological evidence for the sacrifice of children is ambiguous. Skeletons of children have been found together at Gezer, Ta'anach, and Megiddo, but it is questionable whether these are anything more than normal interments. Figs. MEG 28; SAC 4.

Jephthah's sacrifice of his daughter (Judg. 11:30-40) is simply a Hebrew version of a widespread folk tale, and the whole point of the story depends on its being something unusual and extraordinary. Accordingly, it cannot be construed as evidence of normative practice.

4. Burial jar for infant, found at Megiddo (ca. seventh-eighth century)

5. Foundation sacrifice. To the category of human sacrifice pertains also the practice to which allusion is made in Josh. 6:26; I Kings 16:34, of slaying persons at the foundation of a city or building. This practice, designed to "handsel" the new structure against evil powers, is widespread in world folklore. Often the human victim is walled up alive, or the rite is attenuated to the slaughter of an animal, whose blood is poured over the foundation stone.

C. SACRIFICIAL PROCEDURE. 1. Introductory. The most comprehensive term for "sacrifice" in biblical Hebrew is זבח, a word which means primarily "slaughtering" (cf. Arabic *dabaḥa*, "slit the throat"). It has therefore been assumed that the original method of dispatching sacrificial animals was by immolation, and that burning came in later. In further support of this view, it is contended that such an odd expression as "a zebaḥ of oil" (זבח שמן), found in Phoenician sacrificial tariffs (Marseilles, 12; Carthage, 8), can be explained only on the assumption that זבח, "slaughter," was originally the only form of sacrifice known, so that the word was already standardized by the time cereal and other types of offering were introduced.

This inference is quite unwarranted, for the fact is that other terms which had originally denoted particular types of offering came likewise, in the course of time, to be used in an extended (and, strictly speaking, inappropriate) sense. The Arabic *nusk*, e.g., which is indeed used of immolations, is derived from a root meaning primarily "pour out" (cf. נסך), and the same is true of the term *n-q-*, similarly employed in Akkadian, Amurritic (Mari), Ugaritic, and Syriac (cf. Akkadian *naqû*, "pour"), and of the Hittite *sipant-* (cf. σπένδω). By the same logic, therefore, one could just as well conclude that the earliest form of offering was the libation!

2. Classification of sacrifices. In developed Israelitic usage, sacrifices were divided into the two major categories of (a) עלה, "burnt offering," or כלי, burned whole on the altar; and (b) זבח or שלם, in which certain parts only were assigned to the altar, the rest being consumed by the offerer(s) or the priest(s). The term עלה is usually explained from the *Hiph'il* of the verb עלה, "cause to ascend," used specifically in reference to sacrifice (I Sam. 7:9-10; 13:9; cf. Ugaritic *š'ly*). It is thought to refer either to the placing of the victim on the altar or to the rising of the smoke in a burnt offering. An alternative view, however, connects the word rather with Arabic *ḡ-l-y*, "boil." An equivalent, 'lt, is recognized by Albright in four inscriptions from Serabit, in Sinai. Otherwise, no cognate of the term has yet been found in any Semitic language, except as a direct borrowing from Hebrew. The כלי (LXX δλοκάτασμα; Vulg. *holocaustum*; Targ. Onqelos גמר) recurs in the Phoenician sacrificial tariffs from Marseilles and Carthage, where it is defined as a form of שלם. However, it is there not burned entire on the altar; part of the flesh is assigned to the priests. The term שלם recurs in Ugaritic (Ras Shamra 1929, i.4; iii.17,52; v.7; vi.6; ix.7,15; xvii.18) and Phoenician (Marseilles and Carthage tariffs); while a seemingly related *mšlm* appears in South Arabic altar inscriptions. The meaning is disputed. The versions connect it with

שלום, "peace" (LXX $\theta\upsilon\sigma\iota\alpha$ εἰρηναίκα)—i.e., "peace offering"—designed to effect amicable relations with the deity. In support of this may be cited Akkadian *salimu* in the specific sense of "pact, agreement," and Ugaritic *šlm*, "Danegeld" (Krt, A 130-31). On the other hand, some scholars would connect the term rather with *šllem* (cf. Arabic *salama*), "pay"—i.e., simply, "payment."

3. Reserved portions. The reserved portions usually consisted of the blood, the omentum, the kidneys with the fat on them, the *lobus caudatus* (יִתְרַת הכֶּבֶד, "appendage of the liver"; Lev. 8:16), and, in the case of sheep, also the fat tail (אֵלִיָּה; LXX $\delta\sigma\phi\upsilon\varsigma$; Exod. 29:22; Lev. 3:9; 7:3; 8:25; 9:19), these being deemed the seats of vitality (see § A2a above).

4. Priestly portions. Provision was made for the priests to receive a meed of the sacrifices and offerings for their sustenance. In the case of the חֲטָאת and אֲשָׁם, everything except the blood and the reserved fat fell to them (Lev. 5:13; 6:18, 22-23; 7:6-7; Num. 18:9-10, 18; Ezek. 44:29; cf. Jos. Antiq. III.ix.3). Of the ordinary זֶבֶח, if the victim were a sheep or goat, the priests received the leg, jowls, and maw (Deut. 18:1-5); while in the case of an עֵלָה, they also received the skin (Lev. 7:8; cf. Jos. Antiq. III.ix.1; Zeb. XII.2-4). Theirs too were the right shank and the breast of every שֶׁלֶם (Lev. 7:30-34), everything "devoted" to the deity (חֲרָם)—e.g., out of the spoils of war (Num. 18:14; Ezek. 44:29)—and the prime portion (רֵאשִׁית) of corn, must, oil, and new-shorn wool (Num. 18:12; Deut. 18:3-5). They were likewise entitled to the major portions of cereal offerings (Lev. 2:10; 6:9-11; 7:9-10, 14; 10:12-13; Num. 18:10; Ezek. 44:29), after a representative specimen (אִזְכָּרָה) had been removed (Lev. 2:9, 16; 5:12; 6:8; Num. 5:26; cf. Eccclus. 35:7; 38:11; 45:16).

The precise meaning of אִזְכָּרָה is obscure. It is usually derived from זָכַר, "remember," and rendered, somewhat vaguely, "memorial portion" (cf. LXX $\mu\eta\mu\eta\rho\sigma\iota\sigma\tau\omicron\varsigma$; Vulg. *memoriale*). An alternative suggestion is, however, that the word is connected with a homonymous זָכַר, "be fragrant," although the latter is none too well authenticated.

In addition, they received the bread of the Presence, once it had been replaced by a fresh supply (Lev. 24:5-9; cf. Matt. 12:4; Mark 2:26; Luke 6:4; Jos. Antiq. III.ix.4; Suk. V.7-8).

Similar provisions appear elsewhere in the ancient world. Thus, a sacrificial tariff from the Babylonian city of Sippar prescribes that the priests are to receive the skin, loins, ribs, sinews, maw, chitterling, and knuckles of the sacrificial victim; while in the Phoenician tariffs from Marseilles and Carthage, comparable—though not identical—allocations are made, and in the Ugaritic texts (Ras Shamra 1929, i.21; iii.40; ix.8), provision is made for a special gift of fowl (or, a brace of fowl [*'šrm*; Akkadian *iššuru*]) to "the man of the gods [*'anš ilm*]." In Greek sacrifices the hide went to the priests.

5. Concessions to the poor. Although the amounts of sacrifices and offerings were, in general, precisely defined, concessions were made for the benefit of the poor. Thus, according to the (late?) law of Lev. 4:23-32, a commoner need bring only a female goat or sheep as a חֲטָאת, whereas a chieftain (נָשִׂיא) had

to bring a he-goat, and the anointed priest a bullock. Furthermore, in cases of indigence, two turtledoves might be substituted for the sheep, and, if even these could not be afforded, one tenth of an ephah of fine flour (3:7, 11). Similarly, a poor woman might substitute two turtledoves for the statutory sheep prescribed for purification after childbirth (Lev. 12:8; Luke 2:24), and a poor leper (or victim of vitiligo) might bring one tenth of an ephah of fine flour soaked in oil, together with one *lôg* of oil, in lieu of the normative offering of lambs, fine flour, and oil combined (Lev. 14:21); while in the paschal rite two households could club together, if the provision of the lamb exceeded the resources of either (Exod. 12:4).

Similarly, a Babylonian ritual text prescribes a dove for a nobleman (*rubû*), but only the intestines(?) of a sheep for one of lower degree (*muškenû*); while in the Phoenician tariffs from Marseilles and Carthage it is stated expressly that, if the offerer be a poor man, the priests are to forgo their usual share. The Hittite "Yuzgat Tablet" (Goetze, *Verstreute Boghazköi Texte*, no. 58) prescribes analogously that, while the normal offering to the sun-god in return for favors is to be nine sheep, a poor man need offer only one.

D. MATERIAL OF SACRIFICES AND OFFERINGS. By and large, any clean beast was acceptable as an עֵלָה (Lev. 1:2), but, if it was a quadruped, it had to be male and without blemish (22:22-25).

The sacrifice for an אֲשָׁם was usually a ram (Lev. 5:15; cf. Ezra 10:19), though in some apparently late laws (Lev. 5:6; 14:12, 22; Num. 6:12) a lamb (כֶּבֶשׂ) was permitted, and there were even further concessions in cases of poverty (Lev. 5:7, 11).

The beast offered for a חֲטָאת varied with different cases. In that of a private ceremony, a she-goat was prescribed (Num. 15:27); but for the communal חֲטָאת on the Day of Atonement the statutory animals were he-goats, though for the expiation of the priests on the same occasion a bullock was required.

At the release of a Nazirite from his term, a yearling female lamb had to be brought as a חֲטָאתָ, a yearling he-lamb as an עֵלָה, and a ram as a שֶׁלֶם (Num. 6:13-21). The paschal ceremony required a lamb (Exod. 12:3, 21). The formal prescriptions of the legal codes are well illustrated by the historical narratives, where the following sacrificial animals are mentioned:

a) Bovines. Cattle (בָּקָר; II Sam. 24:22-25); ox (שׁוֹר; I Sam. 14:34; II Sam. 6:13; I Kings 1:19-25); bull (פָּר; Judg. 6:26; I Sam. 1:24); cow (פָּרָה; I Sam. 6:14); heifer (עֵגְלָה; Gen. 15:9; I Sam. 16:2); young of the herd (בְּנֵי בָקָר; I Sam. 14:32); fatling (מְרִיא; II Sam. 6:13; I Kings 1:19, 25).

b) Ovines. Sheep (שֶׂה; Gen. 22:7; I Sam. 14:34); ram (אֵיִל; Gen. 22:13; I Sam. 15:22); suckling lamb (שֶׁלֶה חָלֵב; I Sam. 7:9).

c) Caprines. Kid (גִּדִּי; Judg. 13:15, 19; I Sam. 10:3).

In the Ugaritic texts mention is made of: large cattle (*gdlt*; Ras Shamra 1929, i.3, 5, 8, 13-15, 19, 21; iii.12, 17); small cattle (*dqt*; i.3-4, 18; iii.13, 28, 32); oxen (*'alp*; i.5; v.6; ix.8); sheep (*sun*; v.1; xxiii.5; *sun nqd*; xxii.5; s; i.2, 5-7, 10-11, 19; iii.5-6;

ix.2); rams (*dkrm*; v.19; *il*; iii.5); doves (*ynt*; i.2, but uncertain).

A holocaust offered at the obsequies of the god Baal (I AB, i. 19-31) includes seventy buffaloes (*rumm*), seventy oxen ('*alpm*), seventy sheep (*sin*), seventy harts ('*aylm*), seventy mountain goats (*y'lm*), and seventy asses (*hmrm*). This, however, is offered by the goddess 'Anat, and therefore need not reflect common practice among mortals, but may be a deliberate exaggeration.

In the Phoenician sacrificial tariff from Marseilles (third-second century B.C.; North Semitic Inscriptions, no. 42), the animals specified are: ox, calf, ram, goat, lamb, kid, young of the hart, domestic(?) bird (צפר אגנון), wild fowl, and "game" (צד).

In many cases, the rule is laid down that sacrificial animals are to be not more than one year old (cf. Exod. 12:5; 29:38; Lev. 9:3; 12:6; 14:10; 23:18-19; Num. 6:12, 14-15; 7, *passim*; Ezek. 46:13; etc.); while once (Gen. 15:9) we hear of three-year-olds (cf. also I Sam. 1:24 LXX). A late law (Lev. 22:27) prescribes that they must be at least eight days old.

One-year-old sacrificial animals (*apal/mārat šatti*) are likewise mentioned in Mesopotamian sources; while in the Ugaritic Poem of Baal (II AB, vi.43), the gods are regaled on "one-year-old calves" ('*glm dt šnt*).

With the three-year-old ram, goat, and bullock, cf. the three-year-old heifer of Isa. 15:5; Jer. 48:34 (S. Bochart, *Hierozycon* [1692], I, 258; E. A. Speiser, *BASOR*, 72 [1938], 15-17). Note also that in Theocritus (XXIX.17) a "three-year friend" (τριετής φίλος) is a mature friend.

Vegetable offerings consisted in a tithe of the produce (Deut. 14:22) and in the first fruits of the crops (Exod. 23:16; Deut. 26:2). There is also mention of bread (I Sam. 10:3-4), parched ears of corn (Lev. 2:14-16), and oil. Oil was used especially in the preparation of sacrificial cakes (Exod. 29:2, 40; cf. Ezek. 46:14), but is also mentioned as an independent offering (Lev. 14:10-11; cf. Gen. 28:18; 35:14; Mic. 6:7).

Libations of wine usually accompanied the sacrifice of animals (Hos. 9:4; cf. Gen. 35:14; II Kings 16:13) or of bread (Jer. 7:18).

Babylonian sacrificial texts mention, in addition to animals: wine (*karanu*), must (*kurunnu*), date wine (*šikaru*), honey (*dišpu*), cream (*hīmētu*), and garlic (*šummu*). In the Ugaritic ritual tariffs reference is made to: oil (*šmn*; Ras Shamra 1929, iii.44; *šmn rqm*; iii.21), wine (*yn*; iii.23), spelt (*kšm*; i.19 [cf. Hebrew *kussemeth?*]), and "greenstuff[?]" (*dti*; i.19); and in the Phoenician tariff from Marseilles the meal offering is said to be soaked (לל; cf. Exod. 29:2; Lev. 2:4; etc.) in oil or milk.

Leavened food—because leavening necessarily implies fermentation, and fermentation implies putrefaction—was, in general, forbidden in offerings (Exod. 23:18), and was presented only by apostates (Amos 4:5). The taboo was explicit in connection with the Passover and the Feast of Unleavened Bread (Exod. 13:6-7), but, according to Judg. 6:19-21, the bread of God also was unleavened. Such leaven as was necessarily involved in first fruits was given only to the priests, but not set on the altar (Lev. 23:17, 20). Cakes of unleavened bread (רקיקים)

are mentioned in Exod. 29:23; Lev. 8:26; Num. 6:19.

E. THE CONDITION OF PURITY. All sacrifices and offerings involved contact with divinity, and were therefore in the category of the "holy," or supramundane (cf. קדשים as a generic term for them, in Exod. 28:38; Lev. 21:22; 23:6-7, 12; Num. 18:19; II Kings 12:19; II Chr. 29:33; 35:13; Neh. 10:34). Moreover, since, in many cases, the essence of the sacrificial ceremony was to provide a means whereby that quality might be absorbed, care had to be taken to ensure that it be kept free of contamination. Sacrificial animals had therefore to be whole and without blemish (Lev. 1, *passim*; 22:19-20; Deut. 15:21; 17:1; cf. Mal. 1:7, 13); while in the case of cereals, all leavened (i.e., putrefied) food was forbidden in offerings made by fire to the deity (Lev. 2:11; cf. Exod. 23:18; Judg. 6:19-20; Amos 4:5), being permitted only when the sacrificial fare was to be eaten by men (Lev. 7:13; 23:17), and even then, not in the paschal ceremony (Exod. 13:6-7). Furthermore, to ensure absolute purity, the fat of sacred animals, which was consigned to the god, was not allowed to remain on the altar overnight (Exod. 23:18).

The priests and all other participants in a sacrificial ceremony had likewise to be in a state of purity; maimed, deformed, and diseased persons were excluded (Lev. 21:17-23). Precautions had also to be taken to ensure that the portions allotted to the priests be eaten in a place deemed "holy" (Lev. 24:9; Ezek. 42:13; 46:20).

Such regulations reflect standard practice in antiquity. The Babylonians too insisted that sacrificial animals be perfect (*šalmu*), and the Hittites that female beasts presented at the altar be such as had never been covered. Similarly, a common epithet of priests both in Mesopotamia and in Egypt was "the pure one" (*ellu*; *w'b*); while rigid rules for priestly cleanliness are prescribed also in Hittite texts (e.g., *ANET* 207-10). Lastly, the same insistence that the sacred precincts be kept unsullied obtained both among the Hittites and among the Greeks.

1. Prohibition against breaking bones. The basic requirement that *materia sacra* must be whole and unimpaired finds expression also in the rule, imposed in connection with the paschal sacrifice, that the bones of the victim be not broken (Exod. 12:46; Num. 9:12; cf. John 19:36). Bone, like blood, represents the essential self (cf. עצם, גרם, "self"), so that what is implied is that the life used in a sacramental meal must be unimpaired.

2. Ritual nudity. On the other hand, the super-vening prejudices of the Israelites seem to have imposed the discontinuance of another ancient practice originally designed to the same end—namely, that of approaching the altar *in puris naturalibus*, lest clothes convey impurity (cf. Exod. 20:26). At the same time, what was really an attenuation of this usage—viz., the custom of removing one's shoes at a holy place—was indeed retained (cf. Exod. 3:5). Both usages are well attested elsewhere. Ritual nudity is evidenced for early Mesopotamian cultus by plaques from Lagash, Ur, and Nippur, a vase from Uruk, clay figurines from Khafaje. It likewise characterized the pre-Islamic rite of the *ṭawāf*, or ritual circumambulation of the altar, and survived sporadically in Arabic liturgical procedure. Indeed,

to this day, Palestinian Arab women sometimes remove their clothes when invoking *welis*.

A seal from Lagash shows a worshiper standing unshod before his god; while Herodian says explicitly (V.6.10) that the Phoenicians removed their linen stockings when entering on holy ground.

3. Apotropaic measures. Closely associated with the foregoing provisions for purity was the necessity of averting noxious and untoward influence (e.g., demons) from sacrifices and offerings. The latter were therefore accompanied by various apotropaic practices.

a. Salt. Every offering had to be accompanied by salt (Lev. 2:13; cf. Ezek. 43:24). According to the LXX (Lev. 24:7), this applied also to the bread of the Presence. In the Levitical prescription, this is associated with the well-known custom of sealing covenants by sharing bread and salt (Num. 18:19), being thus taken to symbolize the covenant thereby established between the god and his human "kinsmen." In that case, the purpose of the salt would have been simply to prevent premature putrefaction of the covenantal fare. It is not improbable, however, that the real purpose—at least originally—was to avert demons, for the belief that salt, being an incorruptible substance, is immune to such corrosive influences and can impart this immunity to any who consume or hold it, is widespread in folklore, surviving even in the Catholic rite of baptism (cf. T.B. Ber. 40a).

The sacrificial use of salt finds parallels in Babylonian, as also in Greek and Roman usage (cf. Theocritus XXIV.97; Tibullus III.4.15).

b. Blowing of the ram's horn. At New Moon, seasonal festivals, and other ceremonial occasions, the ram's horn (שופר) was blown over sacrifices (Num. 10:10). This is explained as a "memorial before Yahweh your God," and in Lev. 23:24 the first day of the seventh month is described as a "day of memorial of the trump" (orig. tr. cf. Num. 29:1; Ps. 81:3—H 81:4). The meaning of this expression is, however, quite obscure, and it seems likely that the original purpose of the trumpet-blowing was to scare away those demons and noxious spirits which are universally believed to be rampant "at the dark o' the moon" and on other crucial calendar dates; for this is standard practice in many parts of the world.

The basic principle would be reflected also in the custom of attaching bells to the robe of the high priest to prevent his meeting death when he entered the holy of holies (Exod. 28:33-35), for bells likewise avert demons.

c. Circumambulation of the altar. To the same order of apotropaic precautions belongs also the practice, mentioned in Ps. 26:6, of circumambulating the altar, for this procedure, likewise widespread in religious usage, is usually designed to keep out demons. Such circuits are mentioned in later sources (e.g., M. Suk. IV.5) as part of the ritual of the Feast of Booths, and they find their counterpart in the circular dance around the altar in early Arabic ritual. Indeed, in South Arabic, the altar was actually called "place of circuit" (*qyf*, *mqf*). For a classical parallel, cf. Ovid *Metamorphoses* VII.258.

F. ATTITUDE OF THE PROPHETS. Once the real nature and function of sacrifice are made clear,

the statements of the prophets about the current observance of it (e.g., Isa. 1:11-14; Amos 5:21-23; Mic. 6:6-9) can be better appreciated. Contrary to a widespread impression that there was a fundamental antithesis on this subject between the religion of the law and that of the prophets, the truth is that the latter were not against sacrifice per se, but simply against the abuse of it; and, as a matter of fact, Isaiah (1:15) inveighed equally against hypocritical prayer. Their protest was directed primarily against the attribution to sacrifice of properties and virtues which in fact it did not, and could not, possess; especially against the view that it expressed of itself the spiritual bond between worshiper and God, that God could thereby be persuaded or compelled, and that a man could be spiritually shriven by being ritually cleansed. Nowhere, however, in all the prophetic literature of the OT, is there any denial of the premise that, within its prescribed limits, sacrifice was indeed an effective religious vehicle; the advance beyond this assumption is entirely postbiblical.

G. LATER DEVELOPMENTS. A detailed account of sacrificial usage in the second temple is furnished in the fifth section ("order") of the Mishna, entitled *Qôdhâsim*, "hallowed things." This includes, besides others, special treatises on: immolations (*Ze'bhâhim*), cereal offerings (*Menâhôt*), firstlings (*Be'khôrôt*), substitutions (*Temurah*), sacrilege (*Me'ilah*), the continual offering (*Tamidh*), and offerings of fowl permitted as a concession to the poor (*Qinnim*).

Sacrifices and offerings were divided broadly into the two categories of (a) "sacred in the highest degree" (קדש קדשים) and (b) "sacred in lower degree" (קדשים קלים). The former comprised: the whole burnt offering (עולה), the regular cereal offering (מנחה), the clearance ("sin") offering (חטאת), and the mulct (אשם); while the latter covered those offerings of which the presenter also partook (i.e., the שלמים), including the thank offering (תודה), the votive offering (נדב), the freewill offering (נדבה), and the paschal sacrifice (פסח).

In accordance with the rules laid down in the Pentateuch, an animal sacrifice was held to consist in six consecutive acts: (a) the imposition of hands on the victim (סמיכה); (b) the slaughtering (שחיטה); (c) the gathering up of the blood (קבלה); (d) the conveyance of the blood to the altar (הוליכה); (e) the aspersion of the blood (זריקה); and (f) the burning of the dedicated portion (הקטרה). If the offering were one of fowl, the three essential acts were: (a) the "pinching off" of the head (מליקה; cf. Lev. 1:15; 5:8); (b) the squeezing out of the blood against the side of the altar (מצוי); and (c) the burning of the dedicated portions (הקטרה).

1. Rabbinical Judaism. There was a difference of opinion as to whether one hand, or both hands, should be used in the act of imposition (סמיכה). The Jerusalem Talmud prescribes the former, but the Babylonian (*Men. 95a*) the latter. Note, in this connection, that in Num. 27:18 the MT enjoins that Moses is to impose but one hand upon Joshua when ordaining him, yet in vs. 23 it is said that he in fact imposed two hands. The LXX has the plural in both cases, while Samar. and Peshitta read the singular also in the latter verse.

The act was performed by the offerer, but was

omitted when the latter was deaf, blind, mentally defective, a slave, or a woman. It was omitted also at all communal sacrifices, except that offered as a collective אָשָׁם (cf. Lev. 4:13) and in the rite of the scapegoat on the Day of Atonement. Furthermore, according to Rabbi Simeon (Men. 92a), in the case of a sacrifice offered in expiation of public idolatry, the act was to be performed by the elders, as indicated in Lev. 4:15.

The only wine libations permitted were of red wine; this restriction was based on Ps. 75:8—H 75:9, which was understood to mean: "In Yahweh's hand is a cup of red wine." Actually, this is a misinterpretation, for the word rendered "red," חָמֵר, derives from חָמַר I, "be foaming" (cf. Ugaritic Poem of "Shahar and Shalim" 6: חֲמַר יַחַ), not from חָמַר II, "be red."

In treating of the practical efficacy of sacrifices and offerings, the rabbis were careful to distinguish between expiation and atonement. The former implied simply the removal of the taint of sin and the restoration of the damaged psyche (נִשְׁטָה). The latter, however, meant actual reconciliation with God, the re-establishment of an impaired relationship. The one, as Rabbi Judah put it (J. T. Yom. 8.7), could be effected automatically by the very procedure of sacrifice; the other, however, depended entirely on spiritual posture and inward effort—above all, on repentance and amendment (הַשְׁוֵבָה; J. T. Yom. 8.3; Tosef. Yôm Kippurim 5.9; cf. Ecclus. 34:12-35; Philo *De plantatione Noë* III.10). All sacrifices except שְׁלָמִים possessed inherently the power of expiation, and in certain circumstances this applied also to the חַטָּאת and אָשָׁם (Yom. 8.5-6; T. B. Yom. 86a; J. T. Yom. 45b; cf. Mek., Jethrô, 7). That power lay in the blood (B. T. Zeb. 6a; Yom. 5a), as implied in Lev. 17:11. But the total regeneration of the sinner involved both expiation and atonement together; neither was complete without the other.

Following the destruction of the temple in A.D. 70, prayer was held to be the legitimate substitute for sacrifice (T. B. Ber. 15a-b, 33a; Suk. 45a; Ta'an. 26a-27b; Meg. 31a), the services of the synagogue being named for the statutory daily oblations—viz., שַׁחֲרִית, "morning service"; מִנְחָה, "afternoon service"; עֶרְבֵית, "evening service," with a supplementary מוֹסֵף, or "additional service," on New Moons, sabbaths, and holy days.

A foregleam of this concept may be seen in the development of the Hebrew word עָתַר from the meaning of "sacrifice" (cf. עָתַר, "fume," in Ezek. 8:11; Arabic 'athara), "to entreat." The precentor in the synagogue was held to substitute for the sacrificing priest (T. B. Ber. 8b).

In the synagogal services for New Moon and holy days, the appropriate sacrificial regulations are read, from a second scroll, as an additional lesson from the Law; and on the Day of Atonement an account of the sacrificial ritual in the temple (עֲבוּדָה), based on the Mishna, forms a high light of the additional service (*Mūsāf*).

2. **Sectarian attitudes.** The attitude of the Dead Sea Covenanters toward sacrifice is a matter of debate among scholars. Some forty careful deposits of animal bones, discovered in 1955 in the Qumran

compound, have been explained by R. de Vaux as the remains of offerings; but it is difficult to see how a community so firmly committed to the traditional law could ever have countenanced sacrifice outside the "chosen place" in Jerusalem. Moreover, the quantity of the bones is too small to represent a continuous practice. The literary evidence, too, is ambiguous. In one passage of the so-called Zadokite Document (XI.18) there is, indeed, a provision concerning the dispatch of offerings to the altar. Elsewhere, however (e.g., 1QM II.5-6), reference to sacrifice seems to be made only in prescriptions for the future dispensation of Israel; while in a hymn appended to the Manual of Discipline (col. X) statutory prayers are said to serve as the equivalent of the daily and seasonal oblations ordained in the Law.

This last seems also to have represented the attitude of the ESSENES, for Josephus says of them (War I.iii.5) that they did not make offerings at Jerusalem but "offered sacrifices *within themselves*." The meaning of these crucial words, however, is disputed. Another interpretation is that they signify rather, "among themselves," and thus indicate the existence of an independent sacrificial system.

The view that prayer took the place of sacrifice became normative also, of course, in Christianity (Did. 14).

SACRIFICE IN THE NT. See ATONEMENT.

SACRILEGE [βδέλυγμα]. Something repulsive, loathsome, disgusting; the filching or the befouling of the sacred. In Mark 13:14 and the parallel in Matt. 24:15, the RSV translates the word "sacrilege" (KJV "abomination of desolation"), but in Luke 16:15; Rev. 17:4-5; 21:27, where it also appears, the RSV uses "abomination." See ABOMINATION THAT MAKES DESOLATE.

Matt. 24:15; Mark 13:14 have exactly the same expression as is found in the LXX of Dan. 12:11, and with slight differences in Dan. 9:27; 11:31. In the Daniel passages the "abomination that makes desolate" (שְׁקִיף שָׁמַיִם) refers to the small Greek altar which the Seleucid tyrant Antiochus IV Epiphanes had erected on the altar of burnt offering in the Jewish temple in Jerusalem, and on which swine were offered in December of 168 B.C. This "abomination" is the profanation of the temple, which makes it desolate. Jews could not worship Yahweh in a temple having a pagan altar (cf. I Macc. 1:54).

In Mark 13:14 and the Matthean parallel the reference is not to the second-century profanation of the temple under Antiochus Epiphanes. What, then, is the "desolating sacrilege" in the gospels? The most important interpretations are the following:

a) It has frequently been held that the "desolating sacrilege" refers to a statue of the Roman emperor Caligula which he decided to place in the temple in Jerusalem in A.D. 40. It has been argued, therefore, that Mark 13:14a was incorporated in the gospel in 40, when many Christians linked Caligula's threat with the Danielic prophecy and believed that the end prophesied by Jesus had really come. This interpretation has much to commend it, but it has some difficulties as well:

The mad Caligula was murdered in January, A.D. 41, and his statue was never installed. The fulfillment of the Danielic prophecy was thus a threat to the church for only about a year. How, then, did Caligula's intention become so permanently embedded in the gospel record?

The Greek for "sacrilege" is neuter, but the participle translated "set up" is masculine, suggesting that a person was being referred to and not a statue.

The consequences described which are to ensue from the setting up of the sacrilege (vss. 14b ff) are hard to harmonize with the setting up of a statue in the temple. They are to occur too suddenly and appear to be conceived as having a supernatural cause.

b) A second interpretation is that the reference is to the Antichrist, or man of sin, or lawless one—i.e., to a supernatural figure such as is expected in II

Thess. 2:3-10; Rev. 12; 19-20. Three questions arise concerning this interpretation:

If an individual is referred to in vs. 14a, how is he related to the "false Christs and false prophets" of vs. 22? Is he supernatural, while they are not?

If vss. 14b-27 are to be interpreted as describing the situation to exist at the coming of the Antichrist, then can we accept any of these words as authentic words of Jesus?

Is the phrase "set up where it ought not to be" easily taken as describing the Antichrist? Who "sets up" the Antichrist, and where ought he to be?

c) A third view is that the reference is to the Roman army at the time of the war in 66-73, when it ravaged Judea and destroyed the temple. Vss. 14b ff seem to describe wartime conditions; and, furthermore, this is Luke's interpretation (21:20-24). But there are factors weighing against this view also:

The expression "set up where it ought not to be" does not describe a war.

Do vss. 14b ff really describe wartime conditions? Surely vss. 24-27 do not; but do vss. 15-18? Do not all these verses describe a supernatural event, which will not be accomplished by an army (at least by a first-century army) and which will not last for seven years? Luke apparently had another source besides Mark, and it may be older than Mark.

d) A fourth view is that Mark did not intend any particular thing, or person, or event, in 13:14a, but that he referred only to some unknown but horrible desecration of the temple, which must take place before the end.

e) Finally, it is possible that the words "desolating sacrilege set up where it ought not to be" were not originally a part of the context at all, and that the context, therefore, does not shed any light on their meaning, which may have to remain a mystery for the present.

SADAMIAS sād'ā mī'ās. KJV Apoc. form of SHAL-LUM 9.

SADAS sā'dās. KJV Apoc. form of AZGAD.

SADDEUS. KJV Apoc. form of IDDO.

SADDLE [סַרְכָבָה, from רכב, to ride]. A cloth or leather seat for a rider, strapped to the back of an animal.

In the biblical world asses were the oldest riding animals, and a piece of cloth or leather, fastened by a girth, served as the saddle. Doubtless the wisdom of doubling the cloth, or padding it, must have been recognized, but anything approaching a saddle in the modern sense was unfamiliar to the OT, and appears to have emerged only in Scythia in the fourth century B.C. Thence it came into the Mediterranean area, but it was not fully developed until the Christian era.

The noun "saddle" is found in the Bible only in Lev. 15:9. The verb "to saddle" (סָבַע, lit., "bind," "bind on"), found only in the OT, is always used of saddling asses (Gen. 22:3; Num. 22:21; II Sam. 17:23; etc.).

SADDLECLOTHS [שַׁבְּטֵי חֵשֶׁת, cloths or clothes of hophesh; cf. Akkad. *hipšu*, a kind of cloth] (Ezek. 27:

20); KJV PRECIOUS CLOTHES. Ornamental cloths used with saddles "for riding" (לרכבה; KJV "for chariots"). They were a trade item of Tyre from Dedan in Arabia. H. G. MAY

SADDUC. KJV Apoc. form of ZADOK THE PRIEST.

SADDUCEES sāj'ə sēz [צַדִּיקִים; Σαδδουκαίοι, from ZADOK]. The priestly, aristocratic party in Judaism, whose interests centered in the temple, and whose views and practices opposed those of the PHARISEES. Arising following the Maccabean Rebellion, the Sadducees supported the Hasmonean development of the Jewish state. The Romans attempted to dominate the priesthood by controlling the high priests, but with little success. The Sadducees suffered heavily in the revolt against Rome that culminated in the fall of Jerusalem, and they were no longer influential in Judaism after A.D. 70.

1. Derivation and use of the name. The name Sadducee was probably derived from the Zadok who was, together with Abiathar, priest under David, and was appointed (chief) priest, displacing Abiathar, by Solomon (I Kings 2:26 ff, 35; cf. 1:8; 5:7). Church fathers (e.g., Epiphanius *Heresies* I.14; Jerome *Commentary* on Matt. 22:13), and formerly some scholars, thought that the name was derived from the adjective צַדִּיק (*zadik*), "righteous." However, the vowel change from "i" to "u" is inexplicable. While the name is probably derived from the personal name Zadok, the question has been disputed as to which Zadok. A ninth-century rabbinic legend (ARN 5) names Zadok, a disciple of Antigonus Soko, as the father of the Sadducees. Antigonus, according to the legend, taught that one ought to serve God without expectation of reward. This teaching has been interpreted as a denial of a future life, similar to that noted among the Sadducees. However, the legend is too late to be of historical value. Moreover, it erroneously mentions the Boethusians as a party originating at the same time as the Sadducees. The term "Boethusians" has been shown to be a popular, derisive synonym for Sadducees, originating during Roman times (Jos. Antiq. XIX.vi.2). A conjecture that the Sadducees derived their name from a hypothetical Zadok, perhaps contemporary with Jonathan the Hasmonean, has little to commend it.

It is now commonly accepted that the name Sadducee was derived from Solomon's priest Zadok, who became the father of the Jerusalem priesthood. The reforms of Josiah (621 B.C.), patterned upon the Deuteronomic Code (see DEUTERONOMY), left Jerusalem the sole sanctuary in Judah. But while the Code allowed provincial priests to officiate in Jerusalem (Deut. 12; 18:6-8), in practice the provincial priests were prevented from sacrificing there (II Kings 23:9). It seems possible that it was at this time that the

Jerusalem priesthood advanced their claim of descent from Zadok as the test of legitimacy. In Ezekiel's ideal theocracy only the "sons of Zadok" were permitted to "come near to the LORD to minister to him" (Ezek. 40:45-46; 43:19; 44:15; 48:11). It is possible, however, that the requirements of Ezekiel were liberalized or not strictly followed, so that other "Levites" obtained a place among the priests through the expediency of circumventing Zadok in tracing their family line back to Aaron (cf. Lev. 10:1 ff). The Hebrew text of Ecclesiasticus preserves a special blessing for the priests: "Give thanks unto him that chose the sons of Zadok to be the priests" (51:12), which brings the tradition of the Zadokite origin of the priesthood down to approximately the beginning of the second century B.C. In the NT the high priests and their party are called the Sadducees (Acts 4:1-5; 5:17). In Josephus, Sadducees are identified with the priestly, aristocratic families (Antiq. XVIII.i.4; XX.ix.1; etc.). It seems likely, therefore, that a party, gravitating about the priesthood, that traditionally traced its origin to Solomon's priest Zadok, was known as the Sadducees.

2. History. While the Sadducees derived their name and lineage from the father of the Jerusalem priesthood, it appears that they emerged as a party in Judaism during Maccabean times (see MACCABEES; HASMONEAN). Following the ill-conceived attempt to re-establish the monarchy under ZERUBBABEL, leadership among the Jews centered about the priesthood. It was not, however, until recognized divisions, or schools of thought and practice, arose in Judaism that the Sadducees became known as a party.

a. Origin. The Jewish priesthood is traditionally said to have descended from Aaron. Some scholars trace the origin of the Sadducees (as well as that of their name) to Zadok the father of the Jerusalem priests, or to Joshua the priest of the return from Babylon. It is more probable that the Sadducees arose as a party subsequent to the Maccabean Rebellion. The first mention of Sadducees in the days of John Hyrcanus (135-104 B.C.; Jos. Antiq. XIII.x.5-6) is frequently cited as indicative of the time of their origin. This story in Josephus is problematical, but there are other indications that the Sadducees became recognized as a party subsequent to the Maccabean Rebellion. It appears that the old priestly line, Hellenized in the days of Antiochus IV Epiphanes (175-163), was disrupted by the rebellion (I Macc. 2:44-48; 7:5 ff; cf. 10:14). This necessitated the creation of a new high-priestly line: Simon Maccabeus (142-135) and his successors (I Macc. 14:41; cf. 4:42-46; I Chr. 24:7; possibly Ps. 110). Thus the priestly party of the Sadducees must have grown about the loyal priesthood and centered in the new Hasmonean high priests. Also, at this time the Hasidim, thought to be the forerunners of the Pharisees, were first mentioned (I Macc. 2:42; 7:5-23). About the same time the doctrine of resurrection, a bone of contention between Sadducees and Pharisees, was promulgated in Judaism (Dan. 12:2; see DANIEL). Thus, the reorganization of the priesthood and the appearance of factors of differentiation between sectarian parties in Judaism about the time of the Maccabean Rebellion suggests that the Sadducees came to be recognized as a party not long after the reor-

ganization of Judaism under Maccabean leadership.

b. The Hasmonean period. The Hasmoneans continued as high priests until the Roman period, usually with the support of the temple priesthood. Early in the dynasty monarchical aspirations appeared with attempts to re-establish the borders of the Davidic kingdom under John Hyrcanus (135-104 B.C.) and his sons. The Hasmonean break with the Pharisees, possibly under Hyrcanus, was probably over the spectacle of the high priest's engaging in military exploits (cf. I Chr. 28:3, according to which David was prevented from building the temple because he had shed blood). With Aristobulus (104-103), the Hasmoneans adopted the royal title. But when Salome Alexandra (76-67) succeeded her husband, Alexander Jannaeus (103-76), to the throne, she appointed her elder son, Hyrcanus II, high priest without civil authority. Turning from the priestly (Sadducean) influence, she became greatly influenced by the Pharisees (Simon ben Shetach, a famous Pharisee, was her brother). For the first time the Pharisees became influential in the government (Jos. War I.iv-v; Antiq. XIII.xvi.1-6). Apparently fearing the control of government would be lost by the indolent Hyrcanus, Aristobulus II (67-63), a younger but more vigorous son of Jannaeus, began an insurrection in which, after his mother's death, he displaced Hyrcanus as high priest and resumed the royal title his father had borne. However, when Hyrcanus was induced by Antipater (the father of Herod the Great) to seek to regain his crown, there followed a struggle between the brothers that was concluded only by the intervention of Rome in 63 B.C. In this struggle the priests supported whichever faction appeared likely to gain control (Jos. War I.vi.1; cf. Antiq. XIV.ii.1). But when the brothers appealed to Pompey, the nation, according to Josephus, was against both of them, complaining that the brothers, though descendants from the priests, were trying to change the form of government from a rule of the priests to a monarchy (Antiq. XIV.iii.2); and when the temple fell before Pompey, the priests, no longer wavering, fanatically continued the temple service in the face of death (Jos. War I.vii.4; Antiq. XIV.iv.3). Pompey appointed Hyrcanus II high priest, in return for his support during the siege, and placed the land under Roman jurisdiction (Jos. War I.vii.6-7; Antiq. XIV.iv.4-5).

c. Under the Romans. As during the Hasmonean period, knowledge of the Sadducees under the Romans is primarily to be derived from Josephus' accounts of the high priesthood. The attempts of Aristobulus II and his son Alexander to unseat Hyrcanus II and restore the Hasmonean monarchy reflect no priestly concern. The rise of Herod, however, did represent a usurpation of power that the priests considered rightfully theirs. Hence, it was possibly Sadducean pressure that stirred Hyrcanus II to bring Herod to trial for the execution of a brigand chief and his followers (Jos. War I.xii.5; Antiq. XIV.xii.2). Likewise, Antigonus, son of Aristobulus II, probably received Sadducean support when he drove out the now pro-Herod Hyrcanus II, and became king and high priest for three years (40-37). For such partisanship the Sadducees suffered in Herod's revenge when he took Jerusalem in 37 B.C. (Jos. War I.xviii.4;

Antiq. XV.i.1). Becoming king (37-4), he adopted the policy of appointing and removing puppet high priests at will. His appointment of Aristobulus III (35-34), a Hasmonean, to quiet family pressures, nearly brought an insurrection to remove Herod in favor of Aristobulus. Shortly thereafter, Herod had him drowned (Jos. War I.xxii.2; Antiq. XV.ii.5-iii.3).

The procession of high priests under Herod's son, Archelaus (4 B.C.-A.D. 6), Herod Agrippa (A.D. 41-44), and the procurators (A.D. 6-41, 44-66), was patently the result of the unsuccessful attempts of the Roman authorities to find high priests who would long continue quietly subservient. The high priesthood of Joazar illustrates the prevailing conditions: Herod appointed Joazar high priest when the high priest Matthias became implicated in the attempt to remove a golden eagle from above the great gate of the temple (Jos. Antiq. XVII.vi.2-4; War I.xxxiii.2-3). Upon Herod's death, the populace demanded unsuccessfully that Joazar be removed in favor of a more fitting high priest (Jos. War II.i.2-3; Antiq. XVII.ix.1-3). However, when Archelaus returned from having his rule confirmed in Rome, he removed Joazar on suspicion that he had participated in the insurrections during his absence (Jos. Antiq. XVII.xviii.1). This apparently was not without cause, since, when Archelaus was exiled to Vienna, the people conferred the high priesthood on Joazar! The prefect of Syria soon removed him in favor of a safe incumbent (Jos. Antiq. XVIII.ii.1). Josephus numbers twenty-eight high priests from the days of Herod until the fall of Jerusalem (Antiq. XX.x.1). Another evidence of the Romans' attempt to control the high priesthood is seen in their insistence on custody of the vestments of the high priest during the periods of the procurators.

Josephus was anxious to show that the leading Jews, the high priests, and the chief Pharisees desired to avert the disastrous revolution of 66-70 (War II.xv.2-4; xvi.2; xvii.2). But this does not hide the fact that Eleazar, the governor of the temple and son of Ananias the high priest, initiated the decisive act of revolt in refusing to accept temple sacrifices for foreigners, thus preventing the daily sacrifices for the Roman emperor. The temple priesthood evidently supported Eleazar, since he was able to enforce the restriction (Jos. War II.xvii.2). This suggests an alignment of a preponderance of the priesthood with Eleazar against the Romans and their puppet high priest; this preponderance of the priesthood certainly was the Sadducees. When Ananias was murdered, Eleazar made a bid against Menahem for leadership of the revolt; he was supported by the Sadducees (Jos. War II.xvii.9). Josephus himself was of an aristocratic, priestly family (Jos. Life I)—a Sadducee, though he later became a Pharisee. It was his Sadducean status that secured for him a command in Galilee early in the war (Jos. War II.xx.4).

Following the destruction of Jerusalem and the temple in A.D. 70, the Sadducees no longer played an important role in Judaism. The reorganization of Judaism at Jamnia (ca. 90) was along Pharisaic lines. The loss of Sadducean influence cannot be accounted for simply by the destruction of the temple; the Jews anticipated the rebuilding of the temple. Probably

the Sadducees, concentrated about Jerusalem, and being implicated in the war, suffered heavily with the fall of the city. Thus diminished, their influence was outweighed by the preponderance of Pharisees in the postwar period.

3. Characteristics. Scholarly opinion usually has characterized the Sadducees as the high-priestly party that supported Hellenization under Antiochus IV Epiphanes, and revived these interests in support of the Hasmonean dynasty. In Roman times, being at home in the wider world of Hellenistic culture, and with their interests essentially political, they supported the status quo. In contrast, the Pharisees are described as Jews, loyal to the law and repulsing the inroads of Hellenistic influence. In consequence, the Sadducees are regarded as easy collaborationists with the Romans, or, as Josephus suggests (*Antiq.* XVIII.i.4), without influence on the populace, forced to follow Pharisaic directions. This position, however, embodies serious problems. It is doubtful that influence by Hellenized elements of the priesthood survived the Maccabean Rebellion. Moreover, it has been shown that the Pharisees were influenced by Hellenism to such a degree as to make Hellenism among the Sadducees no longer a remarkable differentiation. Hellenization among both parties, and in Judaism in general, after the Maccabean Rebellion must have been largely incidental and unconscious. Josephus' histories do not support the assertion that the Sadducees were willing tools of the Romans. They at times were obliged to serve as magistrates; but, according to Josephus, they did so reluctantly (*Antiq.* XVIII.i.4). Moreover, it has been shown that Josephus, in his *Antiquities*, has rewritten the history to exaggerate the importance of the Pharisees and make the Sadducees appear subservient to them. His purpose, apparently, was to suggest that the Romans should support the Pharisees, if they hoped to succeed in their dealings with the Jews. In reality, however, Sadducean influence was eclipsed only after A.D. 70.

Another characterization depicts the Sadducean-Pharisaic distinction as one between economic classes: the aristocratic priesthood against the urban shopkeeper. The Sadducees, slow to shed their inheritance from provincial surroundings, maintained the violence and crudity of the rustic; loud and crude manners maintained aristocratic authority over subordinates. The Pharisees, on the other hand, were mild mannered, as is needful for market-place merchants to induce customers to buy. Again, the Sadducee-Pharisee opposition has been described as a conflict between two theories on the nature of Judaism: the Sadducees were devoted to the politico-secular interests of Judaism as a state; the Pharisees viewed Judaism as a spiritual religion independent of ties to nationalism and politics. Another hypothesis suggests that the Sadducees represented the interests of the temple and its priesthood as compared with the Pharisees, who represented the interests of the synagogue and its teachers. But such sharp demarcations do not seem to have existed between the Sadducees and the Pharisees.

The Sadducees are more readily understood as defenders of their priestly prerogatives. These included their religious interests (the performance of the tem-

ple service and the priestly interpretation of the law) and their political interests (Israel was viewed as a theocratic state properly organized under the leadership of the high priest). The Sadducees learned from the proscription of Judaism by Antiochus IV Epiphanes (I Macc. 14:25-65), and the threat of the Roman emperor Gaius to desecrate the temple (*Jos. Antiq.* XVIII.viii), that foreign domination was more than a matter of politics; it represented a constant threat to the one important thing, the uninterrupted temple service. And foreign domination abrogated the high priest's right to rule. Likewise, the controversy with the Pharisees over the oral law probably arose from the priestly prerogative to interpret the law. The oral law probably did not arise in opposition to the priestly interpretation of the law. But, since the priesthood was concentrated in Jerusalem, authoritative priestly interpretation of the law was available only at Jerusalem. It may be that the oral law had its origin in lay transmission of priestly interpretation of the law to remote areas of Judaism. This oral commentary on the law was developed and came to be regarded as authoritative by laymen, since they had not the priestly right of immediate interpretation of the law. But the laymen recognized no antagonism against the priesthood in preserving this tradition. However, any tradition of interpretation tended to restrict the priestly prerogative of immediate interpretation of the law. Therefore, the Sadducees rejected the authority of the Pharisaic oral law (*Jos. Antiq.* XIII.x.6; XVIII.i.4), and consequently were free to agree or to differ with it. The Sadducean student need not regard the teacher as authoritative; it was a virtue to discuss and dispute with him (*Jos. Antiq.* XVIII.i.4; *War* II.viii.14). It probably is a mistake to suppose that the Sadducees rejected the Prophets and the Writings, as some Christian fathers suggest (Hippolytus, *Refutation of Heresies* 9:29; Epiphanius, *l. c.* I.14; see CANON OF THE OT). But the Sadducees did not receive even these as authoritative commentaries on the law. The law stood alone, unencumbered, subject to immediate interpretation; any tradition of interpretation could be challenged.

4. Views and doctrines. The NT (*Matt.* 22:23; *Mark* 12:18; *Luke* 20:27; *Acts* 4:1-2; 23:8) and Josephus (*Antiq.* XVIII.i.3-4; *War* II.viii.14) agree that the Sadducees denied the doctrine of the resurrection of the body; Josephus adds that they denied all future punishments and rewards, holding that the soul perishes with the body (cf. Hippolytus *Refutation of Heresies* 9:29). According to *Acts* (23:8), they also denied the existence of angels and spirits. Josephus tells us that they also denied fate (*War* II.viii.14; *Antiq.* XIII.v.9). The reason for these denials probably was that the foregoing doctrines were not found in the law.

All our information concerning the Sadducees is from their opponents and must, consequently, be regarded with caution. This is especially so when tendency or bias is noticed in the materials, such as Josephus' treatment of the Sadducees in his *Antiquities*. The rabbinic materials seem frequently to continue this tendency to disparage the Sadducees. This is certainly the case in the later rabbinic literature from the period of the Amoraim, when historical memory of the Sadducees had passed and the name

Zadduki simply signified "heretic." The Tannaic period may preserve some historical information concerning the Sadducees. However, here, also, a depreciatory tendency is observable. Talmudic sources concur with Josephus' apologetic that in the later days public opinion forced the Sadducees to yield to Pharisaic pressures (Yom. 19*b*; Nid. 33*b*; cf. Jos. Antiq. XVIII.1.4). But this is simply reading the post-seventy situation back into earlier times. Likewise, it is doubtful that the Pharisees had any significant influence upon the priestly functions of the conduct of the temple service and festivals while the temple stood. The rabbinic material certainly is mistaken in depicting Alexander Janneus as deliberately breaking the temple ceremony at the Sukkoth feast to irritate the Pharisees; nor do priestly regulations for this feast constitute opposition to it (Suk. 43*b*; 48*b*; Tosef. Suk. 3.16; cf. Jos. Antiq. XIII.xiii.5). Similarly, the controversies between Sadducees and Pharisees over the fixing of the day of Pentecost (Meg. Ta'an. 1; Men. 65*a*), or the burden of expense for the daily burnt offerings (Meg. Ta'an. 1.1; Men. 65*b*; Sheḥ. 3.1.3), or the disposition of the meal offering (Meg. Ta'an. 8; Men. 6.2), or the degree of purity required of those who officiated at the preparation of the ashes of the Red Heifer (Par. 3.7; Tosef. Par. 3.1-8), or the place of kindling the fire in the incense vessel carried by the high priest on the Day of Atonement (Sifra, Ahare Mot. 3; Yom. 19*b*; 53*a-b*; J. Yom. 1.39*a-b*), can have little historical relevance; these matters fell under priestly jurisdiction while the temple stood. The rabbinic assertion of the literal interpretation of the *lex talionis* (Exod. 21:23; Deut. 19:21) by the Sadducees (Meg. Ta'an. 4; B.K. 84*a*) has been shown to be too late to have historical value.

Whether discussions on matters not so evidently of priestly jurisdiction are more reliable is problematical. The Sadducees appear more lenient than the Pharisees in the treatment of false witnesses in cases of capital punishment; the Sadducees would not inflict the death penalty unless the testimony of the false witness had been decisive in the execution of the accused (Mak. 1.8; Tosef. Sanh. 6.6). Sadducees held the owner responsible for damage done by a slave as by a beast; the Pharisees distinguished between reasonable and unreasonable beings (Yad. 4.7). The Sadducees extended the power of contamination to indirect contact (Yad. 4.7), but rejected the Pharisees' assertion that the scrolls of scripture rendered the hands unclean (Yad. 4.6). They opposed the Pharisaic teaching of 'Eurib, the merging of several private properties into one to permit the carrying of food and vessels from one house to another on the Sabbath ('Er. 6.2). The Sadducees are said to have interpreted Deut. 21:17; 25:9, regarding inheritance rights and levirate marriage literally, while the Pharisaic teachers were inclined to interpret the words figuratively (Meg. Ta'an. 4; cf. Sifre, Deut. 237; Keth. 46; Yeb. 12.6). In dating civil documents the Sadducees used the phrase "After the high priest of the Most High," and opposed the formula "According to the law of Moses and Israel," introduced by the Pharisees into divorce documents (Meg. Ta'an. 7; Yad. 4.8). It may be that some indication of the nature of Sadduceism may be preserved in

such descriptions. However, for the most part, even in the period of the Tannaim, the concerns are of a scholastic nature. It would appear that the real issues dividing Sadducees and Pharisees were forgotten.

A. C. SUNDBERG

SADOC. KJV Apoc. and NT form of ZADOK.

SAFFRON [כַּרְכֹּמִים, *karkôm*]. A plant and its product used in cooking and medicines. In Song of S. 4:14 the bride is described as a park (cf. Amer. Trans.) in which the choicest of trees and plants appear, and *karkôm* is listed along with imported fragrant spices which are highly prized. Saffron is extracted from the aromatic style and stigma of certain crocuses, particularly the *Crocus sativus* L. The LXX translates it κρόκος. The Arabic equivalent, *kūrūm*, is defined by *zā'farān*, from which the English word derives.

See also CROCUS; FLORA § A6*g*; ROSE; FOOD.

J. C. TREVER

SAHIDIC VERSION סֵה הִיד'יִק. One of the oldest and textually most important of the ancient translations of the Bible into the several dialects of Coptic. See VERSIONS, ANCIENT, § 5.

SAIL [סַיִם (Isa. 33:23; ENSIGN in Ezek. 27:7), cf. Akkad. *nasāsu*, move to and fro; סַפְרֵשׁ (Ezek. 27:7; KJV THAT WHICH THOU SPREADEST FORTH), from שַׁפַּשׁ, spread out]; FORESAIL [ἀρτέμων, from ἀρτῶν, fasten to] (Acts 27:40; KJV MAINSAIL). A sheet of strong material, usually textile, which is extended on a mast to catch enough wind to propel a vessel through water.

Boats on the Sea of Galilee were fitted with a small sail, as well as with oars (Luke 8:22-23).

Mediterranean ships of the biblical period would have one or two sails, both being square or rectangular; the uncommon word ἀρτέμων in Acts 27:40 probably means "foresail," indicating a two-masted ship. Later a triangular topsail is found set above the mainsail. While ships usually ran before the wind, a skilful captain could travel windward, but this would

be uncommon. The importance of the wind is reflected in Acts 27:4, 7, 15.

See also SHIPS AND SAILING. W. S. McCULLOUGH

SAILOR [ναύτης] (Acts 27:27, 30; Rev. 18:17). As the ship on which Paul was taken to Rome neared Malta, the sailors lowered the dinghy; but the soldiers cut its ropes. Acts says that the sailors were attempting to escape from the ship (why, one would not know); but without the dinghy the ship's passengers could not make shore without running the ship aground.

Revelation records John's vision of the mourning of shipmasters and sailors over the destruction of Rome, for "all who had ships at sea grew rich by her wealth" (Rev. 18:19). See SHIPS AND SAILING.

B. H. THROCKMORTON, JR.

SAINT. A translation of קדוש, קדוש, and ἅγιος, meaning "holy" or "set apart" for God's use.

1. In the OT. As the covenant people, Israel is a holy nation, being consecrated as the peculiar possession of God, who is uniquely holy and the source of HOLINESS. This relationship to God is summed up in the "code of holiness": "You shall be holy; for I the LORD your God am holy" (Lev. 19:2).

The more general term "holy one(s)" (קדוש) is applied to those who are specially dedicated to God and consecrated to his service. The attendant angels of the Lord, or the company of the heavenly host or court, are so described in the "blessing of Moses":

The LORD came from Sinai,

he came from the ten thousands of holy ones
[KJV "saints"] (Deut. 33:2).

Let the heavens praise thy wonders, O LORD,
thy faithfulness in the assembly of the holy ones!

says the writer of Ps. 89:5 (KJV "saints" instead of "holy ones"). God is depicted "in the council of the holy ones" (Ps. 89:7; KJV "saints"); and the "holy ones" (KJV "saints") are to accompany the Lord in his self-manifestation in the last days (Zech. 14:5). The same conception of the appearance of the angels as ministers of the final judgment is found in the NT in a citation from Enoch 1:9: "Behold, the Lord came with his holy myriads [KJV 'ten thousands of his saints'], to execute judgment on all" (Jude 14). Daniel, in his vision, hears a "holy one"—speaking to another (8:13).

More commonly, the term is used of Israel as God's people. "You are a people holy to the LORD your God; the LORD your God has chosen you to be a people for his own possession, out of all the peoples that are on the face of the earth" (Deut. 7:6); hence, because God "loved his people," "all those consecrated to him [KJV 'saints'] were in his hand" (Deut. 33:3). "Saints" or "holy ones" is a general description of God's people, found in many passages such as:

Gather to me my faithful ones [ERV-ASV "saints"],
who made a covenant with me by sacrifice!
(Ps. 50:5).

Holiness is the special quality of the faithful remnant of Israel (cf. Isa. 4:3), and it is with reference to

the loyal nucleus of God's people, especially those who remained steadfast in the persecution under Antiochus, that the word *hasid* ("pious") is used. In a more general sense, this term describes the pious and God-fearing Israelite (II Sam. 22:26; Pss. 12:1; 85:9).

Love the LORD, all you his saints!
The LORD preserves the faithful
(Ps. 31:23);

The LORD loves justice;
he will not forsake his saints
(Ps. 37:28).

This occurrence of the term in certain psalms raises the difficult question whether or not some or all of the psalms which speak of *hasidim* may be of Maccabean date and allude to the loyalists of that time. On the whole, it is unlikely that the instances mentioned above are Maccabean, but the possibility is somewhat greater in the case of Ps. 79:2, where the "saints" have been slaughtered; Ps. 97:10, which speaks of God's delivering them from the hand of the wicked; and Ps. 149:5, 9 (*hasidim*; RSV "faithful" and "faithful ones"; ERV-ASV "saints"), in the context of the vengeance to be taken by God's people upon their foreign oppressors.

Certainly in Daniel the term denotes the faithful to whom the kingdom will be given in the approaching day of judgment and vindication, who are represented in Daniel's vision by "one like a son of man" (Dan. 7:18, 21-22; cf. vs. 13). These "saints of the Most High" are the pious upholders of the law who as a definite party formed a fanatically loyal body of support for the Maccabean rising so long as the movement retained its character as a holy war for the law and the rightful high priesthood (I Macc. 2:42; 7:13; II Macc. 14:6).

The word is also used in a restricted sense of the priesthood (II Chr. 6:41; Ps. 132:9, 16).

2. In the NT. The faithful of pre-Christian times are called "saints" in Matt. 27:52. Generally, the term describes the Christian community as those who have inherited the covenant privileges as the holy people of a holy God (cf. I Pet. 1:15-16; 2:9). Christians are "saints" by virtue of being "in Christ Jesus" (Phil. 1:1), Christ as Son of man being preeminently the "Holy One of God" (Mark 1:24; Luke 4:34; cf. Luke 1:35; Acts 3:14). Their holiness is in respect of God's calling; they have a vocation as a consecrated people. Hence Paul addresses those who are "called to be saints" (Rom. 1:7). The Corinthian church consists of those "sanctified in Christ Jesus, called to be saints" (I Cor. 1:2). The "saints," as the covenant people, now include Gentiles, who have been made "fellow citizens with the saints" (Eph. 2:19); and as the faithful people they are to fulfil the part of Daniel's "son of man" in the last day: there will be a manifestation of those who are in Christ when Christ is manifested in glory, the "coming of our Lord Jesus with all his saints" (I Thess. 3:13; cf. Col. 3:4), when he will "be glorified in his saints" (II Thess. 1:10). Thus the saints will be associated with Christ in the final judgment of the world, including the angels (I Cor. 6:2-3).

"Saints" naturally becomes a common term for the

members of the church, and the Pauline letters are addressed to the various local communities under this title (Rom. 1:7; I Cor. 1:2; II Cor. 1:1; Eph. 1:1; Phil. 1:1; Col. 1:2). He sends personal greetings to the saints in particular households (Rom. 16:15), and from his own companions or the members of the church where he is staying to Christians elsewhere: "All the saints greet you" (II Cor. 13:13). The same use of "saints" as equivalent to "Christians" is found in Acts (9:13, 32, 41; 26:10); Hebrews (13:24); and Revelation (5:8); and especially of the Christian martyrs in Rev. 16:6; 17:6; 18:24. The "saints" are the object of the pastoral care of the church's ministry (Eph. 4:12), and the future heirs of God's promises (Eph. 1:18; Col. 1:12). Their calling implies a high ethical standard (Eph. 5:3), and the term "saints" is particularly associated with the love shown by Christians to one another, demonstrated in practical service (Rom. 12:13; 16:2; Eph. 1:15; Col. 1:4; I Tim. 5:10; Heb. 6:10). The great example of this is Paul's collection for the Jerusalem church, for the "relief of the saints" (II Cor. 8:4; cf. Rom. 15:25-26; I Cor. 16:1; II Cor. 9:1). Despite the association in late Judaism of poverty with sanctity, we need not suppose that the Jerusalem saints are so called by virtue of their material poverty. They are a church of God's people, like any other group, but of special importance in relation to the Gentile mission.

Jude 3 suggests a tendency to distinguish as "saints" the earliest generation of Christians, to whom the faith was first delivered; but this was not typical of NT thought.

SAKKUTH AND KAIWAN säk'əth, kī'wān [סַכּוּת, כִּיּוּן; see below] (Amos 5:26); KJV TABERNACLE, CHIUN kī'wān. Names referring to Israelite apostasy.

These words are patient of two interpretations. "Sakkuth" might be a corruption of *succath* ("tabernacle"), and "Kaiwan" might mean "pedestal." The names, however, probably denote two deities; the mention of the divine star in the sequel in Amos 5:26 suggests that astral deities are denoted, and such are known from Mesopotamian sources as Saccuth (SAK-KUT being the ideogram of Ninib) and Kaiwanu, both being names of the Babylonian Saturn. In both cases the vowels of the original have been replaced by those of שִׁיּוּשׁ (*shiqqūs*), "ABOMINATION," as regularly in Hebrew references to pagan deities.

SALA, SALAH. KJV forms of SHELAH 1.

SALAMIEL sə lā'wī əl [Σαλαμιηλ, God is friendly(?)] (Jth. 8:1); KJV SAMAEL sām'ī əl. An ancestor of Judith; son of Sarasadai. The name is identical with the LXX form of SHELUMIEL and refers presumably to the same person.

SALAMIS sāl'ə mīs [Σαλαμίς, possibly from שָׁלַם, peace]. A principal city of Cyprus, situated on a shallow inlet on the E coast opposite Syria. The name appears in a variety of spellings; Christian and Byzantine writers usually refer to it as Σαλαμίνη. The received spelling appears first in the Homeric *Hymn to Aphrodite* X.4. Ancient writers recognized the confusion with the island and city of the same name in the Saronian Gulf between Attica and the Peloponnesus (cf. Herodotus IV.162).

From the sixth century B.C. the city was governed by a succession of Greek rulers, perhaps interrupted for a time by Phoenician rule under Hiram III (Σίρωμος). It was at its zenith in the fifth century B.C. under the rule of its city king Enagoras, who repulsed a Persian siege. In the period of the Diadochi the city lost its self-rule and became the residence of the Egyptian governor of Cyprus. In NT times under Roman rule Salamis lost to PAPHOS its distinction as the seat of the island's government. The influential Jewish colony which Paul and Barnabas visited (Acts 13:5) may have been founded before the Roman period, during the dispersion under the Ptolemies. According to an early Christian

5. Marble forum at Salamis

tradition Barnabas was martyred here by a Jewish mob goaded on by visiting Syrian Jews (Acts of Barnabas 22-23). In A.D. 116-17 the Jewish community led the island in a violent rebellion, which resulted in the destruction of the city by Trajan, the ruthless slaughter of the Greek population, and the expulsion of the Jews from Cyprus (Sibylline Oracles V.450 ff; Dio Cassius LXVIII.32.2).

6. Salecah (modern Salkhad)

the Israelites when they conquered Bashan. It plays no important part in the Bible.

The site and name have been preserved in the town of Salkhad, the strongest point in the Jebel el-Druze, not far from Qanawat, the biblical Kenath, also called Havvoth-jair. The city is built on a circular hill of basalt, the solidified lava "plug" of an old volcano, which rises more than three hundred feet above the surrounding plain. Nabatean inscriptions found there indicate that it was captured by their king Malik in A.D. 17, and for a time bore the name Tzalhad. Numerous inscriptions from Roman times have also been found.

SALEM sā'lēm [סלם]. Originally the name of a locality of which Melchizedek was the king (Gen. 14:18), and which was at times identified with JERUSALEM. This identification appears clearly in Ps. 76:2, where Salem is mentioned in parallelism with Zion, as the abode of God on earth. The same Jewish tradition is cause that the Valley of Shaveh or King's Valley (see SHAVEH, VALLEY OF; Gen. 14:17) was tentatively identified with the Kidron. It must be emphasized, however, that the name Salem is not properly another toponym for Jerusalem, nor an abbreviation of the name of the city, the pre-Israelite (pagan) origin of which is certain, but a poetic and religious appellation, in spite of the fancy explanations of Josephus (*Antiq. I.x.2*) and of medieval commentators.

The identity of Salem and Jerusalem in Gen. 14:18 has been variously challenged in non-Jewish circles. Jerome, who had accepted it at first (*Hebrew Questions on Gen. 33.18*), gave it up (*Letters 73.2*), and finally came back to it (*Letters 108.9*). The Greek text of Eusebius' *Onomasticon* refers, under the caption "Salem" (no. 152), to Salumias, a village of the Jordan Valley, S of Scythopolis (see BETH-SHAN). It is this opinion which Jerome had favored for a time. If accepted, it might lead to the identification of the Salem of Genesis with SALIM (Σαλειμ) near which John baptized (John 3:23), tentatively localized at Umm el-'Amdan. See AENON.

According to another tradition, based on the Greek, Latin, and Syriac rendering of Gen. 33:18

reproduced in the KJV, "Shalem, a city of Shechem," Salem might tentatively be identified with the village of Salim, some four or five miles E of Balata-Shechem. See SHALEM 2.

Christian speculations of the late Middle Ages sought to localize the meeting of Abraham and Melchizedek on Mount Tabor.

G. A. BARROIS

SALIM sā'līm [Σαλίμ, Σαλειμ] (John 3:23). A place of uncertain location near AENON, where John was baptizing "because there was much water there."

The traditional site is that identified by Eusebius (ca. A.D. 335), who is quoted by Jerome (ca. A.D. 400; *De Situ et Nom. Hebr.* 165), as eight Roman miles S of Scythopolis (Beth-shan). Nearby are numerous springs. A site favored by some modern scholars is a place called Salim, which is ca. four miles E of Shechem (cf. Epiphanius *Heresies* LV.2). Ca. three miles away are the copious springs of the Wadi Far'ah. The only likely Judean site is a Wadi Saleim, ca. six miles NE of Jerusalem, near which are the springs of another Wadi Far'ah.

SALLAI sā'l'ī [סל'י, possibly (God) has restored; cf. Arab. sala'a, but see below and bibliography]. 1. A Benjaminite, resident in Jerusalem in the postexilic period, according to Neh. 11:8. But the text of this verse is corrupt, and the name is absent in the parallel I Chr. 9:9. On possible emendations, see bibliography.

2. A Levitical house in the postexilic period, according to Neh. 12:20. But vs. 7, as well as some ancient versions, support the reading "Sallu" (סלו). See SALLU 2.

Bibliography. L. W. Batten, *Ezra and Nehemiah*, ICC (1913), pp. 268-69; M. Noth, *Die israelitischen Personennamen* (1928), pp. 39, 174; R. A. Bowman, *Exegesis of Nehemiah*, IB, III (1954), 773.
B. T. DAHLBERG

SALLU sā'l'ōō [סלו (I Chr. 9:7, סלא (Neh. 11:7), סלו (Neh. 12:7), hypocoristic forms for (God) has restored]. 1. A Benjaminite among the returned exiles; son of Meshullam (I Chr. 9:7; Neh. 11:7).

2. A Levite or Levitical house among the returned exiles (Neh. 12:7), referred to in vs. 20 as Sallai (סלי). The form "Sallu" is better attested in the versions.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 174.

SALLUMUS. KJV Apoc. form of SHALLUM 10.

SALMA. Alternate form of SALMON.

SALMON sā'l'mōn [סלמון (Ruth 4:21); סלמון (Ruth 4:20); Σαλμών]. Alternately: SALA sā'l'ō (Luke 3:32); SALMA sā'l'mō [סלמון] (I Chr. 2:11, 51, 54). 1. Son of Nahshon; the father of Boaz of the family of Chelubai (Caleb; I Chr. 2:11; Ruth 4:20-21; Matt.

1:4-5; Luke 3:32). As an ancestor of David he is included in the genealogy of our Lord, which in the Matthean account is annotated with the notice that Salmon begat Boaz of Rahab.

2. A Calebite whose father, Hur, was the son of Caleb and Ephrath(ah), or "the Ephrathites" (I Chr. 2:19, 50-51). Salmon is described as the "father of Bethlehem" (progenitor of Bethlehemite residents) as well as the ancestor of the residents of Atrothbeth-joab, the Netophathites, and the non-Zorite half of the Manahathites; and, finally, the Siphrite families dwelling in Jabez: the Tirathites, Shimeathites, and Sucathites (vss. 54-55; see *bibliography*).

SALMONE *sāl mō'nī* [Σαλωμώνη] (Acts 27:7). An E point of Crete; probably the modern Cape Sidero. The Egyptian ship in which Paul and his companions were en route to Rome sailed by this promontory, seeking shelter from adverse Aegean winds by skirting the S coast of the island. The ship had approached the Carian city of Cnidus with great difficulty, perhaps because of unusually strong westerly winds. Rather than risking the danger of the N coast of Crete, the captain chose to follow a familiar course by running before the Aegean winds to the E and S coasts of Crete, thence slowly working westward under the shelter of the island.

SALOM. KJV Apoc. form of SHALLUM 11.

SALOME *sālō'mī* [Σαλώμη = *ḥōlōw*, peace, well-being]. 1. A Galilean follower of Jesus; probably the wife of Zebedee, and the mother of James and John.

In Mark 15:40-41 several Galilean women are mentioned as present at the Crucifixion, among them Salome, who later joined in bringing spices for anointing Jesus' body (16:1). Matt. 27:56 quite clearly identifies Salome as the "mother of the sons of Zebedee." In John 19:25 "his mother's sister" probably is to be distinguished from "Mary the wife of Clopas," and Salome may thus be meant. This would make Salome and Zebedee aunt and uncle, and James and John cousins, of Jesus.

It is argued by some scholars that Jesus' committal of his mother to the Beloved Disciple (believed by them to be John) at the Cross (John 19:26-27) thus becomes plausible, as does the ready response of the sons of Zebedee to Jesus' call (Mark 1:19-20).

The above construction of the data, though attractive, rests on supposition built on supposition and cannot be held as more than a possibility.

The transfer of the blame for the request for special preference in the kingdom from James and John to their mother (cf. Mark 10:35 with Matt. 20:20) is perhaps to be explained as an attempt by Matthew or his source to protect the reputation of these apostles.

2. The daughter of Herodias; unnamed in the gospels (Matt. 14:6; Mark 6:22) but called Salome in Josephus (*Antiq.* XVIII.v.4). She is said to have danced for Herod Antipas and his guests.

E. P. BLAIR

SALT [Heb.-Aram. *ḥāḥ; ḥāḥ, ḥāḥ* (Mark 9:49)]. Salt was a necessity of life in biblical times (Ecclus. 39:26). Thus Job asks: "Can that which is tasteless be eaten without salt?" (6:6). In addition to its use as a condiment, it was strewn on sacrifices, both the CEREAL OFFERING (Lev. 2:13) and the BURNT OFFERING (Ezek. 43:24). INCENSE was also to be "seasoned with salt" (Exod. 30:35; KJV "tempered together"). Thus salt appears in a list of provisions for the temple (Ezra 6:9). The practice may be derived from Mesopotamian religion; more probably it reflects the natural association of salt with food.

The custom of rubbing a newborn child with salt (Ezek. 16:4; see BIRTH) may have been for medicinal purposes. Possibly, however, it had religious significance, such as to safeguard against demonic influences.

In biblical times salt was generally procured from the area of the DEAD SEA. Zephaniah (2:9) refers to the salt pits of SODOM and GOMORRAH, and Ezekiel hears that although the Dead Sea is to be freshened in the new age, its swamps and marshes are to be left for salt (47:9, 11). The famous story of the transformation of Lot's wife into a pillar of salt (Gen. 19:26) is probably an etiological legend explaining a natural rock-salt formation in the area of Sodom and Gomorrah. See LOT. Figs. LOT 37; SOD 73.

The terms "salt," "saltiness," and "salty" are often used as images for BARRENNESS or desolation. This usage is derived from the practice of sowing a vanquished city or land with salt (Judg. 9:45), and it has parallels in Assyrian military history. Thus the disobedient land is described as "brimstone and salt, and a burnt-out waste, unsown, and growing nothing" (Deut. 29:23—H 29:22; cf. Job 39:6; Ps. 107:34; Jer. 17:6; Zeph. 2:9). Conversely, however, the life-giving and preservative qualities of salt are often mentioned. Elisha purifies the spring at JERICHO with salt so that "neither death nor miscarriage shall come from it" (II Kings 2:19-22). The expression "covenant of salt" (Num. 18:19; II Chr. 13:5; see COVENANT) means a "permanent covenant," since eating salt with someone means to be bound to him in loyalty (cf. Ezra 4:14).

These uses of the term "salt" are also to be found in the NT. Jesus' command: "Have salt in yourselves" (Mark 9:50; cf. Col. 4:6), enjoins the mutual loyalty of the covenant relationship; his description of the disciples as the "salt of the earth" (Matt. 5:13) is probably connected with the above-mentioned life-giving qualities of salt. The prediction: "Every one will be salted with fire" (Mark 9:49), refers to the sacrifice involved in the coming judgment. See SALT, CITY OF; SALT, VALLEY OF.

SALT, CITY OF [עיר המלח]. A city of Judah in the "wilderness" district (Josh. 15:62), to be identified with modern Khirbet Qumran. Remains of Iron II (900-600) buildings have been found but cannot be reconstructed. They are almost certainly those of another fortress comparable to those of MIDDIN; SEGACAH; and NIBSHAN. Large numbers of Iron II sherds compare favorably with those found at the Buqe'ah fortresses. A road leading down the Wadi Qumran may actually have been first constructed

Courtesy of Herbert G. May

7. Round cistern at back center in its earlier use goes back to the time when Khirbet Qumran was the City of Salt, period of the Hebrew monarchy (ca. eighth-seventh century B.C.).

during the Iron II period to connect the City of Salt with the fortress cities in the Valley of Achor (el-Buqe'ah), just a few miles to the W and the S.

SALT, VALLEY OF [גיא המלח, גיא מלח]. A valley in the neighborhood of the Dead Sea, the scene of victories of the Israelites over the Edomites. The first of these was in the time of David, who for the first time conquered Edom (II Sam. 8:13, where the correct reading must be "Edomites" with RSV, as against RSV mg. and KJV "Syrians"). Elsewhere this victory is credited to Abishai (I Chr. 18:12) or, less probably, to Joab (Ps. 60, title—H 60:2). Ca. two centuries later, Amaziah again defeated the Edomites, who had won their independence after the death of Jehoshaphat, in the same place, and as a result was able to reconquer a large part of Edom (II Kings 14:7).

Opinions are divided as to the exact location of the Valley of Salt. The Wadi el-Milh, E of Beersheba, is a tempting suggestion, because of the similarity of the names; but since in each case the Israelites were the aggressors, the site is more apt to have been in Edomite territory. The most likely place is es-Sebkha, a barren saline stretch S of the Dead Sea.

S. COHEN

SALT SEA [ים המלח]. The name applied, in the Pentateuch and in Joshua (Gen. 14:3; Num. 34:3,

12; Deut. 3:17; Josh. 3:16; 12:3; 15:2, 5; 18:19), to the lake now customarily called the DEAD SEA. This designation is derived from the lake's excessive saltness—its twenty-five-per-cent solids make it the world's densest in this regard. W. H. MORTON

SALU sā'lōō [סלו, restored] (Num. 25:14). A Simeonite; the father of Zimri, who was slain when he married Cozbi, a Midianite woman. The marriage of Zimri, the head of a Simeonite family, occurred while Israel was lamenting its earlier apostasy to a Moabite Baal and evoked the wrath of the Israelite leaders.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), pp. 174-75. R. F. JOHNSON

SALUM. KJV Apoc. form of SHALLUM 12.

SALUTATION [ἀσπασμός]. Alternately: GREETING. A greeting on meeting. The custom of bidding "peace" to persons greeted developed from OT times (cf. I Sam. 1:17; 25:6; Mark 5:34; Luke 10:5-6). The Greek greeting, "Hail," is χαίρε, or χαίρετε (Matt. 26:49; 28:9; Luke 1:28). Both the Hebrew and the Greek term are reflected in the salutations of NT letters. See LETTER.

For embracing, kissing, cf. Gen. 29:13; Luke 15:20; Rom. 16:16. O. J. F. SEITZ

SALVATION, SAVIOR. Salvation may truly be said to be in some sense the ultimate concern of all religion, even of those religions which do not envisage the need of a savior apart from man himself. Salvation is conceived of in different religions in very different ways, but every religion may be described as in some sense a way of salvation. We need not here inquire whether biblical faith is properly described as "religion," but it should be noted that the Bible would have failed to meet the deepest need of man's being if it did not answer his question about salvation.

Biblical faith, however, is not at all concerned with asking in what salvation consists or in recommending techniques, whether mystical or ethical, by which salvation may be attained. It is concerned rather with the proclamation of the fact of salvation, and thus it differs from all "religions" by being kerygmatic in character. The Bible is concerned with the fact that God actually has in concrete historical fact saved his people from destruction; and it proclaims that the historical salvation thus attested is but the foreshadowing or "type" of the salvation that is to come. This is the theme both of the OT and of the NT. God is a God of salvation: this is the gospel of both Jewish and Christian faith. He has saved his people and will save them; in the Bible salvation is both a historical and an eschatological reality. God is often called "Savior," and "Salvation" is in some parts of the Bible a name for God. It is therefore wholly appropriate that the Son of God, by whom the divine purpose of salvation was achieved, should have been called Jesus, which means "savior." Thus, salvation is the central theme of the whole Bible and as such is related to every other biblical theme. Among the other themes, see especially ATONEMENT;

DELIVERER; RECONCILIATION; REDEEM; JUSTIFICATION.

1. **Terminology of salvation in the Bible.** "Salvation," "save," and "savior" are words of frequent occurrence throughout the Bible, especially the verb "to save." They range in meaning from the most ordinary, everyday or secular sense to the most profoundly theological and religious; the context alone enables us to determine the sense, as in so many biblical instances of everyday words and phrases which have come into technical theological usage.

a. **In biblical Hebrew.** In the OT "salvation" is used to translate different Hebrew words, of which the most important are *ישועה* and *ישע* from the stem *ישע*, which is found only in *niph'al* and *hiph'il*, the *hiph'il* having the sense of "to deliver." The root *ישע* has the fundamental meaning "to be broad," "to become spacious," "to enlarge," and it thus carries the sense of "deliverance," just as conversely "compression," "confinement," and "constraint" carry the sense of being oppressed and in need of deliverance (cf. Luke 12:50). The most significant proper name derived from this root is *יהושע* (LXX Ἰησοῦς; Acts 7:45; cf. Matt. 1:21, 25). "Savior" is the translation of the *hiph'il* participle of *ישע*—namely, *מושיע*, as, e.g., in Judg. 3:9, 15; Isa. 19:20; 43:11 (the first two instances RSV translates inconsistently by "deliverer"; possibly the translators wished to retain "savior" for the divine Savior). Other Hebrew words are often used to express the idea of saving or salvation (e.g., at Gen. 19:19; 45:7; 50:20; Exod. 1:17-18; Num. 22:33; Deut. 20:16; Judg. 8:19; I Sam. 12:21; 19:11; II Sam. 19:9; Job 2:6; 20:20; Jer. 51:6, 45; Ezek. 3:18; 18:27). But the word to which attention should chiefly be called is *גאל* (*gā'al*), "to redeem"—i.e., to recover property which had fallen into alien hands, to purchase back (e.g., from slavery), etc. The sense of a payment of money falls out of sight, and the word is used as a synonym for "deliver," "save," especially in the Prophets and the Psalter, where it bears particular reference to the saving activity of God. See REDEEM; RANSOM.

Redemption is conceived as deliverance from adversity, oppression, death, and captivity (Egyptian, Babylonian); it is unusual in the OT to come across redemption from sin (but see Ps. 130:8). It is especially in Deutero-Isaiah that Yahweh himself is

represented as Israel's *gō'el* (Isa. 41:14; 43:14; 44:6, 24; etc.); in all some thirteen times; outside Isaiah, God is called *gō'el* only five times).

b. **In LXX Greek.** The LXX renders the different Hebrew verbs for "save," "save alive," etc., by *σώζειν*, and hence any distinctions implied in the Hebrew are lost in the Greek. "Salvation" is either *σωτηρία* or *τὸ σωτήριον* from the adjective *σωτήριος*, "saving"; in classical Greek the neuter plural *τὰ σωτήρια* can mean "deliverance," "safety," or else an offering made in return for safe deliverance; *ἡ σωτηρία* is the usual classical Greek word for "deliverance," "safety" (Latin *salus*). The meaning of *σωτηρία* in Hellenistic religion is discussed in § 4a below. In the LXX "savior" is rendered by *σωτήρ* (e.g., Judg. 3:9, 15; Isa. 45:15, 21); "redeemer" is *λυτρωτής* (e.g., Ps. 19:14—G 18:15), *ὁ λυτρούμενος* (e.g., Isa. 41:14; 43:14; 44:24), or *ὁ ῥυσάμενος* (e.g., Isa. 44:6; 48:17); and cf. *ὁ ῥυόμενος* (Isa. 59:20, cited in Rom. 11:26).

c. **In NT Greek.** When we turn to the NT, we find that *σώζειν* occurs more than one hundred times; about half these occurrences are found in the gospels. Some fourteen of the gospel instances refer to deliverance from disease or from demon-possession, whereas in the LXX *σώζειν* never relates specifically to healing. Some twenty other gospel uses refer to rescue from physical peril or from death (e.g., Matt. 8:25; 14:30; Mark 3:4; 15:30-31; Luke 23:39), and the rest, another twenty uses, refer to salvation in the technical theological or specifically religious sense (e.g., Matt. 1:21; 10:22; 19:25).

"Salvation" is rendered by *σωτηρία*, which is found forty-six times in the NT; *τὸ σωτήριον* occurs only four times (Luke 2:30; 3:6; Acts 28:28; Eph. 6:17). The adjective *σωτήριος* occurs only once—in Tit. 2:11: *ἡ χάρις σωτήριος*, "saving grace." "Savior" is represented by *σωτήρ*, a word which appears in the gospels only at Luke 1:47; 2:11; John 4:42; and in Acts only at 5:31; 13:23. In the Paulines it occurs twice: Eph. 5:23; Phil. 3:20. It is found ten times in the Pastorals (out of twenty-four appearances in the NT in all), but no fewer than six of these instances refer to "God our Savior." Apart from these six references, only two other passages speak of God as *σωτήρ* (Luke 1:47; Jude 25); all the remaining sixteen instances refer to Christ as *σωτήρ*. Instances in II Pet. 1:1; I John 4:14, together with four more in II Peter, complete the tally of uses of *σωτήρ* in the NT.

It will be noted that the great majority of uses occur in those parts of the NT which probably belong to the period after the death of Paul, but it is not obvious whether any inferences should be drawn from this fact—such as that it was not until toward the end of the first century that, perhaps under the influence of Gnosticism, the title *σωτήρ* began to be commonly used of Christ.

2. **Salvation in the OT.** Biblical faith is essentially faith in God as Savior. Its development may be traced in the OT, since it arose in the first place out of the conviction of the Hebrew people that God had saved them from destruction and was fulfilling his purpose of salvation. So far as we can tell, it was the actual historical experience of God's deliverance of

Israel from Egyptian bondage at the Red Sea which formed the basis of the belief that God was the Savior of Israel; we may leave it to the specialists in OT study to discuss whether the Hebrews had any experience of a historical salvation before the days of Moses. There can be no doubt that it was upon the historical experiences of the deliverance from Egypt and the establishment in Canaan that the fundamental certainty of all biblical faith was based:

Blessed be the Lord,
 who daily bears us up;
 God is our salvation.
 Our God is a God of salvation;
 and to God, the Lord, belongs escape from death
 (Ps. 68:19-20).

But it is uniquely the genius of the Bible that the historical is transmuted by the eschatological, so that the action of God in the past becomes the type or foreshadowing of his action in the future. The salvation accomplished in history is the promise and warrant of the salvation that shall be in the end time. This is the contribution of the great prophets of Israel, who understand the forthcoming salvation at the end of history as a new act of creation-redemption whereby a new people of God and, indeed, new heavens and a new earth are to be brought into being. It is the claim of the NT that this prophetic expectation has already been fulfilled in its first stages by the coming of Jesus Christ and his church: the new creation is already in existence, though it is visible in this present age only to the eyes of faith. The redeemed still await the final salvation, the passing away of the old order at the great act of creation-salvation by which the new heavens and new earth shall appear.

a. Nontheological usage and "salvation history."

It is, of course, natural that "save" and its cognates should be used in the Bible, especially in narrative passages, in quite nontechnical, everyday senses (e.g., Gen. 47:25; Exod. 1:17-18; Josh. 6:25; I Sam. 23:5; II Sam. 19:5). A tribe or nation which is surrounded by hostile tribes or imperial powers is inevitably preoccupied with the problem of its preservation or deliverance from its enemies, and it is not at all surprising that we read very frequently indeed about being saved from one's enemies. Yet the secular or nontechnical use of the "save" words passes over almost imperceptibly into the technical religious use, so that again and again one must hesitate before deciding that this or that usage is completely nontechnical. E.g., we may say that the escape or deliverance of the young Amalekite from the rout of Saul's army on Mount Gilboa (II Sam. 1:3) is a purely nontechnical instance of being saved; but on the other hand, the various escapes of David from the wrath of King Saul (I Sam. 19:10, 18), though they are apparently quite "secular" occasions, are undoubtedly thought of by the narrator of the stories as deliverances for which Yahweh, as David's Savior-God, was responsible. When Israel is said to have been saved from her enemies, the implication is always that it is God who has wrought the deliverance.

It is God who sends "saviors" (Gen. 45:7; Judg.

3:9, 15; II Kings 13:5; Neh. 9:27) and who empowers these human saviors to perform their mighty deeds of deliverance (Judg. 6:15-16); and, indeed, he keeps his ceaseless, unsleeping watch over Israel to preserve her and save her from all evil (Ps. 121). Thus, every deliverance which is experienced by Israel, or by one of those representative individuals (such as David) with whom the fortunes of Israel are bound up, is in reality an instance of the fatherly care of God over Israel his children (Ps. 103:4, 13); and therefore it is rash to say that any use of such words as "save," "deliver," "preserve," "escape," at least in connection with Israel, is entirely nontechnical or secular.

A good illustration of the possible double meaning of deliverance stories is to be found in II Kings 7, where the four starving lepers enter the camp of the besieging Syrian army and find it deserted after the Syrians have fled in fear. When they have eaten and drunk their fill, the lepers bethink themselves of their duty to the starving inhabitants of the besieged city, and they say to one another: "We are not doing right. This day is a day of good news [LXX ἡμέρα εὐαγγελίας], [and] we are silent" (7:9). Have we here merely a secular story of deliverance, or are there not at least undertones of the biblical theme of a historical deliverance as being a day of good tidings, a day of salvation? Every deliverance comes from God, and the biblical point of view would be that there is no salvation—of any kind, secular as well as religious, individual as well as national—except it come from the Lord. "Deliverance belongs to Yahweh" (Ps. 3:8; Jonah 2:9); he is the "rock of our salvation" (Ps. 95:1), the "God of our salvation" (Ps. 79:9; 85:4). All safety, safe dwelling, or security is dependent solely upon God, who throughout the Psalms is called by such titles as Rock (see also Deut. 32:4, 18, 30-31; especially 32:15: "Rock of . . . salvation"; and note Ps. 19:14: "my rock and my redeemer"; Ps. 62:6: "my rock and my salvation"), Strength, Fortress, Shield, etc. (Ps. 18:1-2). National and personal well-being are gifts of God alone, and they must be sought from no other source than the hand of the Lord. It becomes axiomatic with the biblical writers that Israel's security is the God of Israel, not alliances with powerful states like Egypt, and that he alone, and not material possessions or any other natural asset, is the giver of a man's prosperity.

If, then, we are unable always to distinguish between instances of ordinary, everyday contingent deliverances from peril and those deliverances of which the author is God himself, this is because we cannot properly distinguish between the secular and sacred elements in Israel's history. There is a sense in which all Israel's history is *Heilsgeschichte* or "salvation history," so that it is true to say that in this sense there is no secular history in the Bible. Many sections of the biblical history are very similar to portions of the history of other peoples, yet it is the biblical narrative alone which is "salvation history." E.g., the stories of the escapades and escapes of David, the young courtier and adventurer, who made bold raids upon the overbearing Philistines and slew their champion Goliath in single combat, have

their counterpart in the national sagas of many nations; they are not unlike the stories of Robin Hood and his Merry Men, beloved of children from generation to generation. Yet the David cycle is sacred history and the Robin Hood cycle is not. This is not because the stories about David are more edifying, more moral, than those about Robin Hood; indeed, in the matter of edification there is little choice between the two cycles. The crucial difference between them is that the David stories belong to the line of salvation history—i.e., the line of God's action in the events of world history, which leads to the achievement of his purpose of the salvation of mankind. It was by a particular series of historical events, through a particular national history, that God's saving purpose in Jesus Christ was fulfilled. It is because salvation is in the name of Jesus Christ, and no other (Acts 4:12), that the biblical history is "salvation history"; and it is for this reason that the salvation story is the story of Abraham, Isaac, Jacob, Moses, Joshua, Rahab the harlot, Gideon, Barak, Samson, Jephthah, David, Samuel, and the prophets (Heb. 11), not the story of Buddha, Confucius, Socrates, Plato, Aristotle, Marcus Aurelius, Plotinus, Mohammed, Rousseau, Marx, Gandhi, Bertrand Russell.

Salvation history is the story of the divine action for our salvation in and through the lives and persons of real flesh-and-blood historical characters, as sensual and as fallible as men usually are, and yet who were, through no virtue of their own, made the instruments of the divine plan for the salvation of the world. Small wonder that in the Bible it is often difficult to distinguish between the ordinary, everyday use of words like "save" and their tremendous theological technical usage, when the everyday stuff of national history has been transmuted into the sacred mystery of salvation history.

The OT shows that the Hebrews were uniquely conscious of their being "encompassed with deliverance" (Ps. 32:7). They knew themselves to be elected by God for his purposes of salvation and were constantly aware of their standing under his perpetual protection and providence:

The eternal God is your dwelling place,
and underneath are the everlasting arms.
And he thrust out the enemy before you,
and said, Destroy.
So Israel dwelt in safety.

Happy are you, O Israel! Who is like you,
a people saved by Yahweh!
(Deut. 33:27-29).

The Psalter contains the most vivid and vigorous "songs of deliverance," which attest the nation's consciousness of God's continuing salvation (e.g., Pss. 18; 30-31; 34; 46; 48; 68; 91; 95-99; 105-107; 116; 118; 136; 145). When Israel suffered adversity, the prophets were ever ready to remind their countrymen that this was not because Yahweh was faithless to his covenant and promise, or because he was too weak to save them, but because by their sin they had rejected the salvation which he was always offering to them and which was theirs upon condition of repentance:

"Return, O faithless sons,
I will heal your faithlessness."
"Behold, we come to thee;
for thou art Yahweh our God.
Truly the [Baal rites on the] hills are a delusion,
the orgies on the mountains.
Truly in Yahweh our God
is the salvation of Israel" (Jer. 3:22-23;
cf. also Lam. 3:26 in its context).

b. Salvation as historical deliverance. This conviction of Israel's, that God was their special Savior for all eternity (Isa. 45:17), was based upon the actual experience of deliverance in history. Doubtless there were many occasions, such as those commemorated in certain of the psalms (e.g., 46; 118), when Israel experienced a national deliverance, but the evidence of the OT leaves no room at all for doubt that the determinative experience of Yahweh's salvation was the deliverance from Egyptian bondage, the miracle of the Red Sea and the subsequent experience of God's fatherly care in the wilderness.

It is quite impossible for us today to reconstruct the course of "what happened" at the Exodus, nor does it matter greatly for our present purpose that we cannot do so; the accounts as we now have them in the book of Exodus were written down several centuries after the period of the events which they recount. It is sufficient to note that, whatever their actual experience may have been, the Israelites emerged from the wilderness into Canaan, no longer a welter of tribes, but a people conscious of national identity and bound together by a sense of their common mission and destiny. No doubt, much consolidation was necessary after the settlement in Canaan, as the records make plain; but there can be little doubt that the Israelites had at the coming out of Egypt undergone a profound and transforming experience which had convinced them that they had been the beneficiaries of a supernatural deliverance through the power of Yahweh, to whom forever afterward they were bound by an everlasting covenant. The Lord had worked salvation for Israel at the Red Sea (Exod. 14:13, 30-31; 15:1-2, 13).

This experience of deliverance left its mark upon the whole of Israel's subsequent existence and upon every part of the OT; it was sung in psalmody, recounted in story, and re-enacted in Passover ritual.

We have heard with our ears, O God,
our fathers have told us,
what deeds thou didst perform in their days,
in the days of old (Ps. 44:1; cf. Pss. 78;
105-6; 114; 135-36; Exod. 12:1-20;
Deut. 6:20-24).

Indeed, it is not too much to say that the making of Israel as a people, and the continuance in later centuries down to the present day of the Jews as a race, bear testimony to the greatness of the event that happened to the tribes that came out of Egypt. Something of a very remarkable kind must have happened to this people, so that alone of all the peoples of the ancient world they have retained, despite the vicissitudes of their checkered history, a self-conscious awareness of their national destiny and distinctiveness. It is upon Israel's experience of salvation in history that the biblical conception of

salvation is based. That is to say, the biblical doctrine of salvation is not a theory or a set of ideas about God; it is not a logical deduction from a theistic philosophy; nor yet is it based upon any technique of mystical absorption into the divine. Biblical theology is essentially recital—the recitation of the great things which God has done in history for his people; the biblical doctrine of salvation is an assertion of something which has actually happened. “You shall say to your son, ‘We were Pharaoh’s slaves in Egypt; and Yahweh brought us out of Egypt with a mighty hand; and Yahweh showed signs and wonders, great and grievous, against Egypt and against Pharaoh and all his household, before our eyes; and he brought us out from there, that he might bring us in and give us the land which he swore to give to our fathers’” (Deut. 6:21-23).

The Bible is thus concerned, not with the philosophy of religion, but with proclamation (kerygma), gospel (evangel), the recital of a creed whose clauses consist of historical statements rather than of philosophical or theological propositions. God’s character cannot be known in itself or apart from God’s own revelation of it in action. The view that God is love is not a conclusion reached philosophically after a long process of reflection upon the being and attributes of God; it is the consequence of his self-revelation through his saving action in history: “It is because Yahweh loves you, and is keeping the oath which he swore to your fathers, that Yahweh has brought you out with a mighty hand, and redeemed you from the house of bondage, from the hand of Pharaoh king of Egypt. Know therefore that Yahweh your God is God, the faithful God who keeps covenant and steadfast love with those who love him and keep his commandments” (Deut. 7:8-9). Salvation, that is to say, is not something that is deduced from the character of God as this has been philosophically discerned; it is the fact from which the people of God deduce his character of love. We do not believe in our ultimate salvation because we first believe that God is love: we believe that God is love because of our experience of salvation.

This is what is implied when we speak of biblical religion as being historical religion, and this also is what differentiates biblical religion from all “religion”—which is why many theologians today doubt the propriety of speaking of biblical “religion” at all. Biblical faith is distinct from all “religion” precisely in respect of its character as historical recital: “[God] has visited and redeemed his people” (Luke 1:68). The worship of God includes the recitation of the historical creed, the proclamation of what God has done. Here, e.g., is the rubric concerning the offering of the first fruits: “You shall take some of the first of all the fruit . . . and . . . put it in a basket, . . . and . . . the priest shall take the basket from your hand, and set it down before the altar of Yahweh your God. And you shall make response before Yahweh your God, ‘A wandering Aramean was my father; and he went down into Egypt. . . . And Yahweh heard our voice, and saw our affliction, our toil, and our oppression; and Yahweh brought us out of Egypt with a mighty hand and an outstretched arm . . . ; and he brought us into this place and gave us

this land, a land flowing with milk and honey. And behold, now I bring the first of the fruit of the ground. . . .’ And you shall set it down before Yahweh your God, and worship before Yahweh your God” (Deut. 26:2-10). So, too, at the Eucharist in the Christian church solemn recitation was always made of the facts of the historical redemption (“that the Lord Jesus on the night when he was betrayed took bread . . .” [I Cor. 11:23]); so, too, the Christian church in her worship recites the Apostles’ and the Nicene Creeds—creeds which are not philosophical statements of our beliefs about God but proclamation of what God himself has actually done in history “for us men and for our salvation.”

An important aspect of historical salvation is brought out by the frequent occurrence of the first person plural in the recitation of the events of the deliverance. Though the event may have happened weeks or years or centuries ago, it happened to *us*, who are members of the people for whom the redemption was wrought. In some way the event is part of *our* existence; it is not something dead and gone, something that happened to people who lived a long time ago and has nothing to do with us. “A wandering Aramean was my father; and he went down into Egypt. . . . And Yahweh heard our voice, and saw our affliction . . . ; and Yahweh brought us out of Egypt.” “That which was from the beginning, which we have heard, which we have seen with our eyes, which we have looked upon and touched with our hands . . . that which we have seen and heard we proclaim also to you” (I John 1:1-3). The saving event is re-enacted, is made contemporary, in the dramatic anamnesis of the Passover meal or the Lord’s Supper: “This day shall be for you a memorial day. . . . You shall observe this rite as an ordinance for you and for your sons for ever. . . . It was a night of watching by Yahweh, to bring them out of the land of Egypt; so this same night is a night of watching kept to Yahweh by all the people of Israel throughout their generations” (Exod. 12:14, 24, 42). “As often as you eat this bread and drink the cup, you proclaim the Lord’s death until he comes” (I Cor. 11:26). The act of deliverance, so to speak, remains active and potent throughout the continuing history of the people for whom it was wrought; in the biblical view it is not a mere event of the past, but something that is ever and again made present and real in the lives of those who celebrate it in word and sacrament; the salvation that was once-for-all wrought for the whole people is appropriated by each family or each individual as the family or the individual makes response in worship and thanksgiving (Exod. 12:26-27; Deut. 6:20-25; 26:1-11; John 6:53-58; I Cor. 10:16-17; 11:23-26).

c. Salvation as an eschatological conception. By speaking of salvation as an eschatological event we mean much more than that it is a future event or a future reality. An eschatological reality is one which is even now real, present, and active, and at the same time is not yet realized, made visible (except to faith), or consummated. In the Bible, in both the OT and the NT, salvation is real, achieved, and active, but it is not yet wholly realized, made visible to all, or finally consummated. We live in an intermediate

state, "between the times," when by faith we know already the salvation which is ours, although we have not fully appropriated or finally apprehended it. In the OT the salvation of Israel is already assured, for it was achieved at the exodus from Egypt and ratified by the everlasting covenant which God made with Moses on Mount Sinai. According to the teaching of the prophets, God's act of salvation at the Red Sea was active in the history of Israel; it was a continuing redemption, delivering God's people from Assyrian invasion or Babylonian exile; and it would be consummated in the final redemption of God's people at the end of the age, the day of the creation of new heavens and a new earth. It is especially in the prophecy of the Deutero-Isaiah that this doctrine is most fully developed and clearly expressed. There is no divorce or contradiction between the historical and the eschatological, because the former, by becoming active in the present and no mere past-and-gone event, is the matrix and type of the latter; the eschatological salvation, even now active in the present, is the final realization beyond history of that which the historical redemption foreshadowed and promised. Past, present, and future constitute, not three deliverances, but one deliverance. To speak of the biblical view of time as linear is misleading if it obscures this truth.

There is a close connection in biblical thought between salvation and righteousness; indeed, the terms become virtually synonymous, for they both denote the same outgoing quality of the divine character. God saves Israel because he is righteous; it is the worst sin of pride on Israel's part to imagine that God saves her because she is righteous. "Do not say in your heart, after Yahweh your God has thrust them [the Canaanites] out before you, 'It is because of my righteousness that Yahweh has brought me in to possess this land'" (Deut. 9:4-6). It is not because of Israel's worthiness that God delivered her and cleansed her; he has done it "for the sake of [his] holy name" (Ezek. 36:22-32). That is to say, God cannot deny his own nature and break his covenant; though Israel has been faithless to her vow and promise, God will remain faithful; because he is righteous, he will not abandon his people but will find a means of "covering" their sins and justifying them, so that they may stand in his presence as righteous.

You have burdened me with your sins,
 you have wearied me with your iniquities.
 [But] I am He
 who blots out your transgressions for my own sake,
 and I will not remember your sins.
 Put me in remembrance [of the covenant], let us argue
 [as in a law court] together;
 set forth your case, that you may be proved right
 [i.e., justified] (Isa. 43:24-26).

Thus, it is not because of any righteousness of her own that Israel is saved; she is saved by the righteousness of God; this is what is meant by the assertion that Yahweh is a "righteous God and a Savior" (Isa. 45:21). Righteousness and salvation are inseparable elements of the divine character; there could not be one without the other. Israel's justification is by faith alone; Deutero-Isaiah had long ago enun-

ciated the biblical truth concerning salvation, which later Paul had to recover from beneath the rabbinic doctrine of merit by which it had been obscured, just as, centuries later still, Luther had to recover it once more from beneath the medieval doctrine of salvation by works. Though Paul's exegesis of Hab. 2:4 ("The righteous shall live by his faith"; cf. Rom. 1:17; Gal. 3:11) may be technically defective, he was not wrong in implying that the prophets had taught a doctrine of justification by faith which had been repudiated by rabbinic Judaism. It is often overlooked how remarkably Paul's doctrine of justification is adumbrated by the OT prophets. The forensic metaphor of justification is based upon the picture of Yahweh as engaged in a lawsuit in a court of justice with his rebellious people (Isa. 1:18; 43:26; Hos. 4:1; 12:2; Mic. 6:2; etc.); and the prophets speak of God's verdict of acquittal, vindication, or justification of Israel (Isa. 43:26; 45:21-23). Indeed, Paul's use of δικαιοσύνη is taken over from the LXX, and he employs it to reassert the profound OT conviction that "no man living is righteous before [God]" (Ps. 143:2; cf. I Kings 8:46; Job 9:2-3; 15:14-16; 25:4; Pss. 51:4; 130:3-4; Eccl. 7:20; Isa. 64:6). His doctrine of justification is already stated in Isa. 59, except that whereas the latter passage looks forward in hope to the coming of a redeemer to Zion, wearing a breastplate of righteousness and a helmet of salvation, Paul proclaims a gospel which is even now the power of God unto salvation—namely, that the righteousness of God has been revealed in Christ (Rom. 1:16-17; 3:25-26), in whom the promised salvation is come. Thus, for Paul as for the Isaianic school, "righteousness" and "salvation" are virtually synonymous terms; or, to put it another way, Paul expresses his doctrine of salvation in terms of his teaching about justification by faith. Salvation is justification, and it is the corollary of the righteousness of God.

In the prophetic view salvation is also virtually synonymous with creation; the saving act is necessarily an act of new creation. It is not an accident that Deutero-Isaiah should have given the clearest expression to be found in the OT both of the doctrine of God as sovereign creator and also of the doctrine of God as redeemer. Much distortion has been caused in Christian theology through a putting asunder of the doctrines of creation and redemption, or through emphasizing one to the neglect of the other. Deutero-Isaiah sees clearly that redemption involves a new creation—another point taken up by Paul in his exposition of the redemptive work of Christ (II Cor. 5:17-18).

The prophets of Israel are not afraid to make use of the old Semitic mythology to convey their profoundest spiritual teaching, so completely have they transcended the old conceptions of the king as God and demythologized the Baal-worship of the surrounding peoples. They represent God's original act of the creation of the world as a mighty deed of salvation, in which according to the ancient world picture God defeated the Dragon of the Deep (Tiamat, etc.) and brought order out of the chaos of the waters. The picture of God as King above the water-floods and Lord of the power of the sea arises out of

this ancient myth, which is used by the prophets to represent poetically the omnipotence of the Creator God (e.g., Pss. 93; 95:5; 96; 98). It is worth noting how the picture of God as King above the raging floods is combined with the prophecy of his coming to judge the world in righteousness and how this righteousness is identified with the coming salvation (e.g., Pss. 96:11-13; 97; 98:7-9). The picture of Yahweh as slaying the Dragon of the Sea and thus effecting salvation has survived most vividly in Ps. 74:12-14:

God my King is from of old,
working salvation in the midst of the earth.
Thou didst divide the sea by thy might;
thou didst break the heads of the dragons on the waters.
Thou didst crush the heads of Leviathan.

It is noteworthy that this picture is embedded in a heartfelt appeal to God to come in righteousness and save his people (by an act of new creation or salvation) from their oppressors.

Deutero-Isaiah thinks of the creation of the world as an act of divine salvation which was the type of the redemption of Israel from Egypt and also of the deliverance of God's people from the Babylonian captivity in his own day. The Creator-Savior, who defeated chaos and established the world, by a new act of creation redeemed Israel from Egypt at the miracle of the Red Sea (cf. Exod. 15:1-12; Pss. 77:11-20; 114; etc.); now Yahweh was redeeming them again by a new act of creation-salvation, so that the ransomed of Yahweh should return (from Babylon) and come with singing to Zion.

Awake, awake, put on strength,
O arm of Yahweh;
awake, as in days of old,
the generations of long ago.
Was it not thou that didst cut Rahab in pieces,
that didst pierce the dragon?
Was it not thou that didst dry up the sea,
the waters of the great deep;
that didst make the depths of the sea a way
for the redeemed to pass over?
And the ransomed of Yahweh shall return,
and come with singing to Zion (Isa. 51:9-11).

Thus says Yahweh,
your Redeemer, the Holy One of Israel:
"For your sake I will send to Babylon
and break down all the [prison] bars.

I am Yahweh, your Holy One,
who makes a way in the sea,
a path in the mighty waters"
(Isa. 43:14-16).

The idea of redemption as an act of new creation thenceforward passes into the thought of Judaism; thus in Wisd. Sol. 19:6-8 we read:

The whole creation in its nature was fashioned anew,
dry land emerging where water had stood before,
an unhindered way out of the Red Sea,
where those protected by thy hand passed through as
one nation,
after gazing on marvelous wonders.

Thus, according to prophetic thought, creation is renewed in redemption, and salvation may be thought of as new creation. When God brought Israel out of Egypt or out of Babylon, he created Israel anew. The idea of a new Israel is implicit in the thought of Yahweh's salvation, and hence it is that with the growth of the expectation of a coming great salvation there appears also the clear hope of a new world. This hope takes different forms, whether (as perhaps in the First Isaiah) it is that of a renewal of the natural order, a paradisaic existence as in the beginning of the world (Isa. 9:2-7; 11:1-9), or (as perhaps in the optimistic days of the Deutero-Isaiah, Haggai, and Zechariah) that of a new political world order, with all the nations bringing their tribute and honor into Jerusalem, so that Israel should be the light of the Gentiles and the salvation of the ends of the earth (Isa. 49:5-13; Hag. 2:4-9; Zech. 2:7-13), or (as in the age of disillusionment of the later Isaianic school, when the aspirations of the builders of the second temple had failed of realization) that of new heavens and a new earth which should come into being when the former heavens and earth had passed away (Isa. 65:17; 66:22). With the disappointment of the hope of a renewed Israel and of a more just international and social order in the years after the return from Exile, it was natural that prophetic thought about salvation should become more and more transcendentally eschatological; because God was a God of salvation, he *must* create a new world in which his purpose would be fulfilled and his people would find their rest.

Behold, I create new heavens
and a new earth;
I create Jerusalem a rejoicing,
and her people a joy.

It is in the new Jerusalem of the transcendental order that the paradisaic state of innocence shall be restored, when the wolf and the lamb shall feed together and the lion shall eat straw like the ox (Isa. 65:17-25).

So certain was the prophetic expectation that the outgoing, self-realizing righteousness of Yahweh must issue in his people's salvation and justification that they dared to transfer to new heavens and a new earth those aspirations of whose realization they despaired in this world. By the time that the work of the OT prophets is done, the concept of salvation has become thoroughly eschatological; salvation is that which will be established for all the earth on the day of new creation, the great Day of Yahweh; in that day "all flesh" shall come and worship before him (Isa. 66:22-23). The assurance of this salvation is given in the historical acts of redemption which God has already wrought for his people; the knowledge of salvation is possessed by the community which itself has undergone the experience of redemption in its own history, and this knowledge is sustained by the recitation of the mighty acts of God and by obedience to his command to keep the Passover as his anamnesis, a memorial of the deliverance that has taken place and a foretaste of that which is to come. The knowledge of salvation in the Bible is articulated

and communicated by the ministry of word and sacrament.

d. The expectation of a Savior. Salvation, of course, implies the existence of a savior, but does not necessarily imply the existence of a savior other than Yahweh himself. The OT, for the most part, speaks of no other savior than Yahweh. As we have seen, Yahweh may send human saviors in certain crises of Israel's history, but the main emphasis of the OT is that it is God himself who saves and that there is no other savior.

I, I am Yahweh,
and besides me there is no savior
(Isa. 43:11; cf. 45:21; Hos. 13:4).

"Vain is the help of man!" (Pss. 60:11; 108:12). In the canonical OT the Messiah is never called "savior"; on the contrary, it is Yahweh who is the "saving refuge of his Anointed" (Ps. 28:8). But the figure of the Messiah in the OT is somewhat unformed and shadowy; insofar as he is only the projection of the King, who was par excellence Yahweh's Anointed (e.g., II Sam. 1:14, 16), it is clear that he will stand in need of God's deliverance (cf. Ps. 144:9-10:

I will sing a new song to thee, O God;
.....
who givest victory to kings,
who rescuest David thy servant).

Insofar as he is a prophet like Moses, whom God raised up to be his instrument in saving Israel (cf. Deut. 18:15, 18), he may be called "deliverer" or "redeemer" (as, indeed, Stephen calls Moses in Acts 7:35), but in reality he is only the agent of God in the divine work of salvation, for it was God himself who came down to deliver Israel (Exod. 3:8; Acts 7:34).

Deutero-Isaiah portrays a new deliverer of the type of Moses, whose special title was the "Servant of Yahweh" (Exod. 14:31; Deut. 34:5; Josh. 1:1, 13, 15, etc.; II Chr. 1:3; 24:6, 9, etc.); he is God's agent in the work of redemption in the crisis of the return from exile. Who precisely is intended by the figure of the Servant in Deutero-Isaiah is, of course, one of the most vexed questions of OT scholarship. The Isaianic Servant suffers, as Moses did, for the sins of his people and bears their iniquity (Isa. 52:13-53:12), but by his tribulations and obedience ("knowledge") the righteous Servant makes many to be accounted righteous (53:11). One thing only may be said with certainty about the figure of the Isaianic Servant: he is the Moses, the Servant of Yahweh, of the deliverance from the Exile, and he plays in relation to that deliverance the same role Moses played in the deliverance from Egypt. Though he is not the Messiah in the sense in which this term was understood in later Judaism, he is anointed by Yahweh with his Spirit (Isa. 42:1; 48:16; cf. 11:2; 61:1) for the task of proclaiming and securing release for the captives.

It is with this figure of the Spirit-anointed Moses of the new act of redemption that Jesus in the gospels identifies himself (e.g., Luke 4:18-19): knowing nothing of more than one "Isaiah," Jesus and his church understood the prophetic figure whose linea-

ments are sketched in Isa. 9; 11; 40-55; 61; etc., to be a prophecy of Christ himself, anointed with Holy Spirit in his baptism for the new and final work of redemption, which was to take place at the end of the age, the day of new creation. But this is to anticipate the development of the biblical theology.

After the profound theological insights of the Isaianic school had been achieved, the prophetic vision faded, and the great concept of salvation by the divine righteousness alone was obscured in the doctrines of later Judaism, especially those which implied salvation by works of human merit. According to the teaching of the rabbis, the salvation of the individual was to be achieved by the meticulous observance of the detailed commandments of the Torah (law of Moses), and it was possible by a straightforward system of bookkeeping to ascertain a man's prospects of salvation by noting whether his merits exceeded his transgressions. Different schools of rabbis awarded higher or lower points for this work of merit or that transgression, but all observed the same fundamental rules of the game. Moreover, it was generally agreed that a pious Jew who had tried, but had barely succeeded, might draw upon the bank of the superabundant merits of the fathers (Abraham, Isaac, and Jacob) and of the Maccabean heroes. Salvation thus became largely a matter of human achievement assessed by the method of the balance sheet.

Such was the nature of official (rabbinic) Judaism at the end of the OT period and until A.D. 70; but, if we may judge from the evidence of the Qumran literature, the sect type of piety was little better. A fanatical legalism, which ordered a withdrawal from every kind of worldly contact, aimed at the salvation of a small community of the puritanically elect; the salvation which it envisaged was as far removed as possible from that which was proclaimed by Jesus to be available for publicans and sinners. Later Judaism knew only of salvation for the righteous and nothing of the salvation of sinners. It was Jesus and his followers, notably Paul, who undertook a reformation which consisted fundamentally in the rediscovery and assertion of the prophetic doctrine of salvation by the righteousness of God.

3. Salvation in the Apoc. and the Pseudep. The canonical OT says little about a coming savior other than God himself, and its expectation of a saving Messiah is, at best, shadowy (see MESSIAH). The position is quite otherwise in the apocryphal and pseudepigraphical literature. The continued frustration of the national aspirations of the Jews under Seleucid or Roman domination gave rise to wishful dreaming about a coming national salvation; and different forms of expectation concerning a deliverer who should be raised up by God are encountered in the literature of the period. There is little agreement concerning the deliverer's origin or nature. This literature thinks, not only of national salvation, but also of individual salvation, and it introduces a doctrine of resurrection which envisages a distribution of rewards and punishments after the individual's death. In some of the literature of the period the expected salvation will take place on this earth, and Jerusalem will be the prosperous center of the

messianic kingdom (e.g., Enoch 1-36, with its rather gross and materialistic portrayal of the delights of the age to come). In the Psalms of Solomon, Jerusalem will be purged by a righteous Davidic king, free from sin, ruling over a mighty messianic kingdom (Pss. Sol. 17). But the most striking developments of the period are found in those books (e.g., Enoch 37 ff; Apocalypse of Baruch; Assumption of Moses) in which the scene of the expected salvation is laid beyond this world of time and history in a transcendental future, and in which salvation has become entirely otherworldly. It is new heavens, rather than a new earth, which these apocalyptists think of, and the redeemed community will live in the new heavens, transformed into the likeness of the righteous Messiah (Enoch 82-90).

In the Similitudes (Enoch 37-71) the Messiah is a wholly supernatural being, the Son of man, with whom in a transformed heaven the elect live forever as angelic existences enjoying the closest communion with their messianic redeemer (62:14; *see* ENOCH, BOOK OF; SON OF MAN). The conception of the Isaianic Servant of Yahweh may have influenced the Enochian conception of the heavenly Son of man, who is also called "the Elect One" and "the Righteous One"; as in Deutero-Isaiah, those in Israel who stand in a special relation to God (which is the meaning of "the elect" or "chosen" in the OT) are called "the elect" (Isa. 43:20; 45:4), and the Son of man is righteous because he makes the elect ones righteous, which means that he saves them. "Righteousness shall prevail in his days, and the righteous and elect shall be without number before him forever and ever" (Enoch 39:6-7). God prepared this savior before the creation of the world, and his existence is the guarantee that the oppressed righteous, elect ones shall be delivered at his future epiphany in glory. Though there is much in this conception that is reminiscent of Deutero-Isaiah, especially the connection that is made between righteousness and salvation, it is also true that the deepest insights of that prophet are lacking. There is no conception of the redemption of the elect through the vicarious suffering of the Son of man. He will slay sinners with the word of his mouth, and it is the righteous whom he saves, not the transgressors.

The Targums identify the Isaianic Servant of Yahweh with the Messiah, but they rewrite Isa. 53 in such a way as to make him a national, even nationalistic, political hero; the latter secures the exaltation of the remnant of Israel and the destruction of her enemies, who submit to the Messiah like a lamb that is led to the slaughter!

It is neither apocalyptic Judaism, as represented by Enoch and other works of its genre, nor rabbinic Judaism, as represented by the Targums, nor yet sectarian Judaism, as represented by the Qumran literature, which recovers the deep insight of OT prophecy, but Jesus and the church. Nor is it the thinking of the apocalyptists which has contributed much to the basic theology of Jesus and his followers beyond certain conventional imagery and phraseology. The theology of the NT is basically a reinterpretation of the OT prophetic plan of salvation, not a hotchpotch of Jewish apocalyptic and Hellenistic

Gnostic fantasies. The NT teaching concerning salvation owes little to any noncanonical work of the intertestamental period that is known to us; there is small connection between the Son of man of Enoch and the Son of man of the gospels. There is no evidence that Jesus was familiar with the Enoch literature (much of which may have first seen the light after his crucifixion), but there is plenty of evidence that he had reflected deeply upon the Isaianic prophecy of salvation, which he recovers and claims to fulfil. "Son of man" as used by Jesus as a self-designation means the "Servant of Yahweh" in Isaiah's sense, not the "Elect One" of the Enochian fantasy. The intertestamental literature is valuable in adding to our background knowledge of the prevalent ideologies of NT times, but it is the canonical OT which is the clue to the understanding of the NT doctrine of salvation. If the Scriptures are those writings which make us "wise unto salvation," then the reformers rightly understood the matter who declared that the apocryphal books "the Church doth read for example of life and instruction of manners; but yet doth it not apply them to establish any doctrine" (Articles of Religion, VI, appended to the Book of Common Prayer; the title of the Article runs: "Of the Sufficiency of the Holy Scriptures for Salvation").

The most significant development in the concept of salvation during the intertestamental period is the transference of the locus of salvation from this world, where the OT firmly grounds it, to the world to come. In the OT, with scarcely an exception (the exceptions are Isa. 26:19; Dan. 12:2), salvation is in this world order, and even the restored paradisaic righteousness of Isa. 11:1-9 will belong to this age. Such a passage points, however, toward the conception of a MILLENNIUM or long period of Utopian bliss upon the earth after the intervention in history of God or his Messiah—a doctrine which may be studied, e.g., in II Esdras, where it is taught that when the messianic kingdom has fulfilled its time, the Messiah himself will die (7:29); in II Esd. 7:30-98 also may be studied a characteristic apocalyptic view of the general resurrection and the Judgment. But it would be a mistake to suppose that it was only the apocalyptists who believed in the resurrection of the dead; Jews of entirely different points of view had also come to accept this doctrine before NT times (e.g., Wisd. Sol. 3:1-9); and by the time of Christ all sections of Jewish opinion, save only the conservative Sadducean minority, had come to believe in the RESURRECTION of the dead. Obviously such a doctrine will considerably enlarge the concept of salvation, and we should expect to find significant developments in the doctrine of salvation between the OT and NT.

4. Salvation in Hellenistic religion. Since attempts have been made to explain NT theology in terms of the religious ideas of the Hellenistic world, it is necessary to examine the concept of salvation which is said to have been current in NT times.

a. Gnostic tendencies. In the second and third centuries A.D. the Hermetic literature bears evidence of a widespread myth (often today called the "Gnostic myth"), which certain modern scholars have declared to underlie the NT conception of

Christ as redeemer, especially in Colossians-Ephesians and the Fourth Gospel. These scholars claim that in the first century this myth would have been familiar throughout the Hellenistic world, especially to "intellectuals"; as a religious philosophy it was widely accepted. It is the myth of the Anthropos, or Heavenly Man. Of oriental origin, it comes down from a distant antiquity. A celestial light-being was cast down from heaven, having been vanquished in combat or else because of his folly (cf. the Fall); he fell down to earth, where his personality was shattered into countless atomic units, which in fact are our human selves. These fragments—i.e., mankind—are now imprisoned in evil matter—i.e., our bodies. They are subjected to the demonic rulers of this age, and they have forgotten their real nature and origin. The Gnostic redeemer, however, comes down from heaven to save them; he is the "Heavenly Man" and is sometimes described as the "son" or "image" of the Most High God in heaven. He saves by imparting knowledge (gnosis) of man's real nature and by communicating the passwords by which the soul at death can escape the planetary guardians of the heavenly spheres and so ascend to the world of light: salvation consists in the re-creation of the fallen man into the heavenly person which he was before he fell, the New Man. The heavenly redeemer, while he is on earth, disguises himself in many human forms, so that he may escape the attention of the demonic rulers of the world (cf. I Cor. 2:8).

The myth is incorporated syncretistically into many of the mystery cults of the Hellenistic world, and it is suggested that it has likewise been incorporated into Hellenistic Christianity, notably that of Paul and John. Thus, Paul's "second man . . . from heaven" or "heavenly man" (I Cor. 15:47-48), the "new man" of Col. 3:10, the "perfect man" of Eph. 4:13, and the Son of man in the Fourth Gospel who descends from and ascends into heaven (John 3:13; 6:62; etc.)—all these and similar conceptions show how Hellenistic Christianity reinterpreted the original kerygma of the Aramaic-speaking church, so that it became a kind of Christianized Gnosticism which would be intelligible and congenial to the "higher paganism" of the Greco-Roman world. The whole conception of a gathering into one of a fragmented humanity in the "body" or person of the Son of man from heaven, it is argued, is a Christianized version of the Gnostic myth.

Compelling though this theory seems to be at first sight, it is nevertheless open to serious criticism. In the first place, there is no evidence at all for the existence of the Gnostic myth in the first century, apart from the NT itself; all the evidence is found in literature which cannot be earlier than the later second century: in other words, this literature itself may be the Gnosticizing of biblical-Christian conceptions. Moreover, it is a circular argument to say that, e.g., Colossians-Ephesians embodies the widespread Gnostic myth and then to prove the existence of the myth by citing, not evidence from outside the NT, but Colossians-Ephesians! And, lastly, all the characteristic terms and concepts of salvation which are found in the NT can be elucidated satisfactorily by reference to the OT, the prophetic theology of

which is the basis of the NT scheme of salvation. As we shall see, the NT plan of salvation is a rediscovery of the OT prophetic kerygma in the light of the ministry, death, and resurrection of Jesus Christ. There is no need to look for an explanation of the NT doctrine of salvation in a hypothetical myth, which one must assume to have existed, when there is in existence a substantial literature—namely, the canonical OT—in which the NT doctrine of salvation is already set forth in adumbration.

b. The imperial cult. The concept of salvation through political power, an illusion of mankind in every age, expressed itself mythologically in the first century in the cult of emperor-worship. The myth of the divine king, who was the benefactor and savior of his people, was, of course, oriental in origin, and it is probable that it lies behind concepts of the King-Messiah such as are found in Jewish apocalyptic literature. The book of Revelation is a profound study of the rival mythologies of Caesar-worship and Christ-worship, in which the former is shown to be a kind of diabolical perversion or caricature of the worship of the true King of kings and Lord of lords. Julius Caesar was accorded divine honors after his death; but temples were erected in Asia Minor in honor of *divus Augustus* during his lifetime. Augustus and Tiberius kept the cult within reasonable limits, and Claudius was skeptical of his own divinity. But the egocentric Gaius (Caligula) and the paranoiac Nero took their divine status seriously; and so did Domitian at the end of the century. In Asia Minor especially, the divine emperors were worshiped in temples built in their honor and at the imperial games, where the adulation of the crowds was expressed in hymns which ascribed salvation and honor and glory and worship to Caesar as God and Savior of his people. Domitian was hailed as *Dominus et Deus noster*, and throughout Asia the titles of *Εὐεργέτης* (cf. Luke 22:25) and *Σωτήρ* were accorded to the emperors. It is against this background that the three ascriptions of *σωτηρία* to God and Christ found in Revelation (7:10; 12:10; 19:1) are to be understood. The word *σωτήρ* does not occur in Revelation. If (as was pointed out in § 1c above) this word occurs most frequently in the later portions of the NT, the reason may perhaps be, not the influence of a shadowy Gnosticism, but the pressure of an arrogant and persecuting political religion which demanded the worship of the brute force of imperial Rome ("the beast" [Rev. 13]), and which asserted that salvation would be found in submission to the imperial will. See also EMPEROR-WORSHIP.

5. Salvation in the NT. The NT in every part claims that the salvation adumbrated in the scriptures of Israel has been fulfilled in the coming of Jesus Christ. Salvation still fundamentally means, as it did in the OT, God's saving action in history, by which he rescues his people from destruction and by which he assures them of the greater salvation that is to come. The whole NT is concerned, therefore, with the proclamation of a gospel, which is the "power of God for salvation" (Rom. 1:16).

a. The ministry and teaching of Jesus. The Synoptic gospels represent the ministry of Jesus as concerned with the work of salvation: "The Son of man

came to seek and to save the lost" (Luke 19:10). They represent Jesus himself as teaching that his mission concerns the lost, or the lost sheep of Israel (e.g., Matt. 10:6; 15:24; 18:12-14; Luke 15:3-10; etc.). The distinctive and, indeed, unique feature of his doctrine of salvation is that it is offered to sinners; in this respect there is no parallel to the teaching of Jesus in rabbinic Judaism, apocalyptic, or sectarian Judaism. "Those who are well have no need of a physician, but those who are sick; I came not to call the righteous, but sinners" (Mark 2:17). For this very reason the conventionally religious people and their leaders, the Pharisaic rabbis, were scandalized at him (Matt. 11:19; Mark 2:16; etc.). The issue was whether salvation was by the righteousness of God or by men's own righteousness; it is stated by Jesus with devastating lucidity in the parable of the Pharisee and the publican (Luke 18:10-14). The man who acknowledged that he was a sinner in need of God's mercy went down to his house justified, rather than the man who boasted of his genuinely good works. It was sinners, who knew that they had need of God's forgiveness, who responded to the gospel of Jesus, not the law-observing Pharisees: "The tax collectors and the harlots go into the kingdom of God before you" (Matt. 21:31). At the messianic banquet the guests would be the poor and maimed and blind and lame, gathered together from the high-ways and hedges (Luke 14:16-24).

All these were justified by their faith, not by their works. "Your faith has saved you"—these words are spoken by Jesus to sinners like the woman who anointed his feet in the house of Simon the Pharisee (Luke 7:50), and they are clearly synonymous with "Your sins are forgiven" (vs. 48). Salvation means the forgiveness of sins, reconciliation with God, and the peace which flows from it: "Your faith has saved you; go in peace" (vs. 50). Repentance and amendment are the conditions of salvation and reconciliation in this sense, as the story of Zacchaeus illustrates: "Today salvation has come to this house" (Luke 19:9). God cannot forgive unless the sinner is in a state of willingness to be forgiven (Luke 15:11-32); Jesus can do nothing for the proud who have no need of the physician (Mark 2:17).

Hence the mission of Jesus, whose object is salvation, is closely bound up with the forgiveness of sins. This is most clearly brought out in the miracle stories of healings, in which the forgiveness of the person healed is emphasized. The formula "Your faith has saved you" is applied to the sick who have been healed (Mark 5:34; 10:52; Luke 17:19), and we are thus reminded that the Greek word *σώζειν* means "to save" and also "to heal or make whole"—a double meaning essential to the purpose of the miracle stories of healing, but one which is not easy to express in an English translation (the RSV completely misses the point with "Your faith has made you well" [contrast Luke 7:50: "Your faith has saved you"—the same phrase in the Greek, *ἡ πίστις σου σέσωκέ σε*]). The miracle stories of healing are parables of salvation; they are signs (*see SIGNS IN THE NT; MIRACLES*) of who Jesus is, at least to those who have eyes to see—i.e., those who have faith in him (cf. "Your *faith* has saved you"). This truth is

especially brought out in the story of the paralytic (Mark 2:1-12), where the declaration that the sufferer's sins are forgiven is authenticated by the causing of the paralyzed man to rise and walk. To heal implies the power to forgive sins (both senses of *σώζειν*). As the Pharisees rightly perceive, healing and forgiveness ("saving") are divine prerogatives (Mark 2:7; cf. John 9:33); the fact that Jesus healed the sick is evidence to the eyes of faith that Jesus is the Messiah. This is true, even though the superstition be rejected that all sickness and suffering are divine punishments for sin—a view which Jesus himself would seem to have denied, although it was the common belief of his day (Luke 13:1-5; John 9:2-3).

The fact is that the healing signs were an integral part of the total picture of the Servant—Son of man which Jesus had discerned in the prophecy of Isaiah and which he applied to himself. In the days of the coming salvation the blind would see, the deaf hear, the lame walk, the dumb sing (Isa. 32:3-4; 35:5-6; 42:7); and it is precisely these Isaianic signs which are fulfilled in the gospel miracle stories of Jesus' healings—as Jesus himself points out to John the Baptist (Matt. 11:4-5; Luke 7:22). The gospel stories are parables of the saving power of Christ; e.g., the leper who is cleansed at Christ's touch in Mark 1:40-45 is a symbol of those who, being sinners, were unable to fulfil God's law but who now, through the compassionate touch of Christ, are able to stand confidently and to offer the things which Moses commanded.

The healings of the demon-possessed (exorcisms) are also parables of Christ's saving mission; they make their point, however, in rather a different way from the stories of the healing of disease. Demon-possession in the popular view, unlike disease, is not punishment for sin; it is quite fortuitous, and might happen to anyone, good or bad. The exorcisms are not connected with forgiveness. They depict Christ as Savior in an altogether different connection. The demons are the emissaries and agents of Satan, who has invaded God's good creation and subjected it to his evil dominion (Luke 4:6; 22:53; John 12:31; I John 5:19; Rev. 13:2). The exorcisms are signs that the house of the "strong man" (i.e., Satan) has been entered and is being spoiled: Satan's kingdom is at an end (Mark 3:26-27). Christ is the conqueror of Satan; his victory is a cosmic victory, involving the liberation of the whole creation from subjection to the evil "powers" which have enslaved it. This important NT theme, graphically set forth in the stories of exorcisms in the gospels, proclaims Christ as liberator, for he has not only loosed us from our sins (Rev. 1:5) but also set us free from bondage to the hostile world powers.

According to Luke, Jesus saw his own mission in terms of the Isaianic Servant's liberating work:

He has sent me to proclaim release to the captives,

 to set at liberty those who are oppressed
 (Luke 4:18; cf. Isa. 61:1).

The same conception is expressed under the redemption metaphor of Mark 10:45: "The Son of man also came . . . to give his life as a ransom for many." This

verse is an echoing of Isa. 53:10-12 and is further testimony to the fact that Jesus conceived of his mission as that of the Servant of the Lord, whom Isaiah had foretold, who would atone for the sins of the world by bearing them and who by his sufferings would effect the release of those who were in bondage to a tyranny more terrible than that of Egypt or Babylon.

Further evidence that Jesus thought of himself and his work in this way is found in the NT accounts of his teaching-sign with the bread and wine, at the Last Supper, whereby he set himself forth as the new sacrificial offering in whose blood a new covenant was ratified between God and a newly redeemed Israel (Matt. 26:26-29; Mark 14:22-25; Luke 22:17-20; I Cor. 11:23-25; cf. Exod. 24:8; Jer. 31:31). The original Moses of the redemption from Egypt had offered to give his life for the forgiveness and salvation of his people (Exod. 32:32); Deutero-Isaiah had foretold a new Moses who would give his life for his people's redemption; and Jesus understood his own death as effecting the salvation of the world through the establishment of a new covenant between God and man. It was Jesus himself who first taught that he was the Savior foretold by the prophet in the words which are quoted by Paul:

"The Deliverer [ὁ ρυόμενος] will come from Zion,
he will banish ungodliness from Jacob";
"and this will be my covenant with them
when I take away their sins"
(Rom. 11:26-27; Isa. 59:20-21).

The Servant of the Lord, according to the Isaianic prophecy, would establish a new covenant with God's people and enlighten all the nations of the world; he would open the blind eyes and bring out the prisoners from the dungeon (Isa. 42:6-7). It was in this sense that both Jesus and the apostolic church understood his work of salvation.

b. Salvation as historical deliverance. In the NT, as in the OT, salvation is understood to be accomplished by an act of God in human history. Man is not saved by wisdom or right knowledge (Gnosticism), nor by merit or right actions (Judaism), nor yet by mystical absorption into deity (Hellenistic mysticism), but by the act of God in the birth, life, death, resurrection, and ascension of Jesus Christ. Accordingly the Christian message is not a philosophy (σοφία), nor an ethical code, nor yet a technique of mystical practice: it is kerygma, preaching, evangel in the Isaianic sense of proclaiming the fact of liberation (Isa. 40:9; 52:7; 61:1-2). The title Savior (σωτήρ), which in the OT is a name for God, is applied to Christ in the NT (Luke 2:11; John 4:42; Acts 5:31; 13:23; Eph. 5:23; Phil. 3:20; II Tim. 1:10; Tit. 1:4; 2:13; 3:6; II Pet. 1:1, 11; 2:20; 3:2, 18; I John 4:14).

His work of salvation is presented under a considerable variety of images or metaphors, and it is the character of these metaphors which determines whether it is said that we are saved by Christ's death or by his life. Salvation is not exclusively connected with his death, for it is the whole Christ event, including the Resurrection, which is regarded as the saving act of God (Rom. 4:25; 5:10; II Cor. 4:10-11;

etc.). Our salvation depended, not only on the fact that Christ was willing to die, but even more upon the fact that he was willing to be born (II Cor. 8:9; Phil. 2:6-7); the incarnation of the Son of God is itself the act of atonement whereby God and man are brought together in the new humanity of Jesus Christ, and thus the very purpose of Christ's coming into the world was to save sinners (John 3:17; Rom. 8:3; I Tim. 1:15; I John 4:9-10, 14). It is the life of Christ which saves us; but it is natural that, in the metaphors of salvation which are based upon Jewish sacrificial ideas and practices, it should be said that we are saved by his death. The "blood" of Christ is frequently said to be the means of our salvation (Acts 20:28; Rom. 3:25; 5:9; Eph. 1:7; Col. 1:20; Heb. 9:12; 12:24; 13:12; I John 1:7; Rev. 1:5; 5:9; etc.), and in these contexts "blood" is synonymous with "death"; it is a graphic image of the kind of death he died. Christ is represented as the sacrificial victim by whose death communion with God and the forgiveness of sins were obtained, for in the OT all sacrifice is thought of as a means of communion with God; but it is nowhere taught in the NT that God could not have forgiven sins if Christ had not died. The death of Jesus occurred at Passover time, and it is hardly surprising that the metaphors of the Passover and of the paschal lamb should be prominent in NT theology. Jesus is the Christian Passover lamb (Mark 14:22; John 6:51; 19:36; I Cor. 5:7; probably also John 1:29, 36), and the Eucharist in the church became the weekly paschal festival (Easter), the commemoration of the historical deliverance wrought by Jesus and thanksgiving for the covenant of salvation which he had made.

The NT says almost nothing about the Eucharist and its meaning, probably because it was considered improper to commit the most sacred truths of the inmost mystery of the faith to writing and perhaps thus to expose them to profane inspection; but it provides sufficient evidence to show that in the church of the first century, as in that of later centuries, the Eucharist was considered to be par excellence the means by which the Christian community drew upon the life of God and appropriated to itself the benefits of Christ's salvation (John 6:53-56; I Cor. 10:16-21; perhaps Heb. 13:10). Just as the Passover continued and kept alive in Jewish life the tradition of God's deliverance from Egypt, so in the church the Eucharist was the liturgical ἀνάμνησις of the historical sacrifice of Christ and of the deliverance which God wrought through it; the recitation of the events of the Last Supper and of the Passion was from the earliest days an integral part of the Eucharistic rite.

Thus, the death of Christ is set forth in the NT and celebrated in the church as the means of our salvation, but the death was always regarded as a moment in the whole act of deliverance. It is noteworthy that it is the Letter to the Hebrews, with its tremendous emphasis upon the once-only efficacious death of Christ, that stresses most powerfully the significance of Christ's ascension in the work of salvation (Heb. 9:24-26; cf. Eph. 4:8). Other metaphors, like that of reconciliation, stress the fact that it is God himself who is providing for sinners the means

of forgiveness and therefore of fellowship with himself (Rom. 5:1-11; II Cor. 5:18-19); it was God who reconciled us to himself through Christ, not Christ who reconciled God to us. God himself is the originator of our salvation, and he is several times called "Savior" in the NT (e.g., Luke 1:47; I Tim. 4:10; Jude 25).

It should be noted too that this act of salvation or reconciliation, which God has accomplished through Christ, is not limited to the human race; salvation in the NT is a cosmic conception. Through Christ, God reconciled all things to himself, whether things upon earth or things in the heavens (Eph. 1:10; Col. 1:20). It is nothing less than the new creation, foretold by the prophets, that has now appeared in Christ, the creation of the new heavens and new earth (II Cor. 5:17). In this age the new creation is discernible only by the eye of faith, and it constitutes the sphere of church; for the church is the new Israel of God, the people of the new act of creation-redemption, who are the first fruits of the consummation that shall be. In this sense it may be said that in the NT there is no salvation outside the church. The church consists of the redeemed, those who are *σωζόμενοι*, those who are now in the sphere or process of salvation (I Cor. 1:18; II Cor. 2:15). The historical salvation has already taken place, and the existence and preaching of the church provide the evidence of it. The day of salvation heralded by the prophet has dawned for men with faith (Isa. 49:8; II Cor. 6:2; Heb. 3:7-4:13); today, the era of the preaching of salvation, is a day of opportunity and decision: "How shall we escape if we neglect such a great salvation?" (Heb. 2:3). Sometimes it seems to be suggested that the moment of baptism into the church is the time of the individual Christian's salvation (especially at Tit. 3:5: "He saved us . . . by the washing of regeneration and renewal in the Holy Spirit"; cf. Acts 2:47). "By grace you have been saved through faith" (Eph. 2:8; cf. 2:5). The perfect tense shows that, as far as the salvation of the individual Christian is concerned, it is an event which has taken place at a particular and definite moment in his past history. The view would accord with the theological outlook of the apostolic church that, whereas the death of Christ upon Calvary represents the baptism of humanity as a whole into the sphere of salvation, the moment of the death to sin, or resurrection to salvation, of the individual believer is his baptism into Christ's church.

c. Salvation as an eschatological reality. The tension between the historical "even now" and the eschatological "not yet," which we saw was present in the OT conception of salvation, is even more strongly marked in the NT. The saving righteousness of God has been revealed in the historical Christ, but it has been revealed only to faith; and the gospel of Christ, which is the power of God for salvation, is communicated in this age "through faith for faith" (Rom. 1:16-17). But the historical event is only the guarantee of the mighty salvation that is yet to be revealed; it is the means by which salvation is brought to us even now by faith in the midst of history, so that we are saved by the revelation of the righteousness of God.

It is Paul who, alone among the NT writers, explicitly revives the Isaianic conception of the divine righteousness which works salvation, the conception which (as we have noted) underlies Jesus' own understanding of his mission to sinners. Paul uses *δικαιοσύνη* more than all the other NT writers together; whereas they generally use the word in the normal, rabbinic sense of conduct pleasing to God, Paul uses it in the deeper, Isaianic sense of the outgoing, energizing power of God which works salvation for men. The divine righteousness has appeared in history, working salvation (Rom. 1:16), and it is communicated to us through faith (Phil. 3:9); God has demonstrated his righteousness (i.e., his faithfulness to his covenant promise that he would save his people) by setting forth Christ as an expiation for their sins: the death of Christ has proved that God is righteous and that he justifies—as Isaiah promised that he would—those who have faith in Jesus (Rom. 3:25-26). Our present knowledge of salvation (cf. Luke 1:77), brought to us by Christ, is only an earnest or foretaste of the salvation that we shall know at the parousia of Christ. Our present experience of salvation in the church of Jesus Christ is, as it were, the shadow cast before by the reality of the salvation that is coming; in this sense it is true to say that even the historical salvation that we have known is itself eschatological, the pre-revelation of the salvation that is to come. The conception of salvation in the NT is through and through eschatological. Salvation is essentially a future reality which we enjoy even now through faith. It cannot be known apart from faith, because faith is the form of knowing in the age of history. When we say that God has saved us (e.g., Tit. 3:5), we are speaking in characteristically biblical-Hebraic idiom, according to which past and future are identified: to say that God has saved us means that he will save us. The paradox of the "even now" and the "not yet" of salvation means that we are saved or *σωζόμενοι* by reason of God's coming salvation, which was realized in history in the life, death, and resurrection of Jesus Christ.

Thus, Paul can write: "Salvation is nearer to us now than when we first believed" (Rom. 13:11), or again: "By hope were we saved" (Rom. 8:24 ERV). Salvation in its full and final sense is accomplished in the "day of the Lord Jesus" (I Cor. 5:5); the day of the Lord (i.e., the Parousia) is the "day of salvation" and also the "day of wrath." Both the salvation and the wrath of God have already been revealed in history through Jesus Christ (Rom. 1:17-18), and it is through faith in God's righteousness that we shall be reconciled to God: "We shall be saved from the wrath of God through him" (Rom. 5:9 ERV)—i.e., from the destruction that will overtake the wicked in the day of judgment. Living in the hope of salvation, Christians wait for a Savior from heaven (Phil. 3:20; cf. Tit. 2:13). They are those "who by God's power are guarded through faith for a salvation ready to be revealed in the last time" (I Pet. 1:5; cf. vs. 9), which is to be understood in connection with the promise contained in the preceding verse of an "inheritance which is imperishable, undefiled, and unfading, kept in heaven for you." Christians are "those who are to

obtain salvation" (Heb. 1:14), the σωτηρία αἰώνιος (i.e., salvation in the aeon to come) of which Christ is the source (Heb. 5:9). The general attitude of the NT as a whole is that of Heb. 9:28: "Christ, having been offered once to bear the sins of many, will appear a second time, not to deal with sin but to save those who are eagerly waiting for him."

Although the fundamental historical-eschatological pattern of the conception of salvation remains the same in the NT as in the OT, there is nevertheless a significant extension and enrichment of the meaning of salvation in the NT. This is because of the general acceptance in the intertestamental period of the idea of life after death. Salvation now in the NT concerns, not only this life, but also the life of the age to come. Indeed, salvation and the "life of the age to come" are synonymous terms; the Fourth Gospel, e.g., uses σωτηρία only once (John 4:22: "Salvation is from the Jews"), but the conception is identical with that of ζωή, or ζωή αἰώνιος, which in biblical Greek does not mean "eternal life" in any Platonic sense, or even "everlasting life" (as if the emphasis were upon duration), but the life of the Aeon—i.e., the age to come. Jesus came that men might have life (John 10:10); he brings to them the waters of salvation or "living water" (John 4:14), which in Johannine language means the life-giving Spirit (John 7:37-39). The Johannine conception of "life" largely replaces the Synoptic "kingdom of God," with which it is synonymous; to enter into the kingdom of God and to enter into life are identical expressions, and both have reference to an eschatological salvation, as a study of Mark 9:43-48 will make clear. To be saved is to enter even now by faith into the life of the age to come and even now to possess it eschatologically; nevertheless, we do not yet possess salvation or "life" in the full and final sense in which it will be ours hereafter; it is only he who endures to the end who will be saved (Mark 13:13).

Not even Jesus himself knows when this end will come (Mark 13:32), and Christians can but exercise steadfast, patient endurance amid the tribulations which will precede it (cf. Heb. 10:25). They must work out their salvation with fear and trembling (Phil. 2:12), not presuming to boast of their condition (I Cor. 10:12). The trials which will precede the end will be unparalleled since the creation of the world, and had not God shortened the days of the tribulation, no flesh could have been saved (Mark 13:19-20).

The final salvation is described by Jesus in pictures drawn from the traditional Jewish imagery of the messianic banquet—a sitting down with Abraham, Isaac, and Jacob in the kingdom of God (Matt. 8:11; Luke 13:28-29). This "sitting at table in the kingdom of God" is anticipated in the church's Eucharist, the banquet of the elect with the Messiah, for whom it is appointed that they shall "eat and drink at [his] table in [his] kingdom" (Luke 22:29-30). The Eucharist is the showing forth of Christ's saving death until he comes (I Cor. 11:26). It proclaims also that salvation is a social reality; there is no individualism in the NT conception of it. All the metaphors of the state of salvation are corporate in character—the Israel of God, the elect, the body

of Christ, the communion of saints, the fellowship of the Holy Spirit, the messianic banquet, the kingdom of God, the church, the new man, the new creation. So great is this salvation that the earth cannot contain it; indeed, the whole created order itself is awaiting the day of liberation from its bondage to decay (Rom. 8:19-23).

The scene of the final salvation must be beyond earth and beyond history in the world to come, beyond time, decay, and death; the scene must be laid in the new heavens and new earth of Isaianic prediction, the scene which in his vision the author of Revelation has glimpsed again—the city of God, new Jerusalem, whose temple is the Lord God the Almighty and the Lamb, and where no light of lamp or sun is needed, for the Lord God will be its light forever and ever (Rev. 21:1-22:5). Of course, this is pictorial language, and the poetry is spoiled if it is treated as literal prose; but all our speaking about our ultimate salvation must be in pictures, for we have no other means of communication. This is because we are attempting to speak of a realm which utterly transcends our experience and therefore have no words which can describe it; yet through the gift of the Spirit we can speak of it, since it has been revealed to us. "As it is written,

"What no eye has seen, nor ear heard,
nor the heart of man conceived,
what God has prepared for those who love him,"

God has revealed to us through the Spirit" (I Cor. 2:9-10, citing Isa. 64:4; cf. Isa. 65:17).

Bibliography. The books dealing with the biblical theme of salvation are far too numerous to be listed, since all works dealing with biblical theology are relevant. See, e.g., C. F. Burney, *Outlines of OT Theology* (1899). A. B. Davidson, *Theology of the OT* (1904). R. H. Charles, *Religious Development Between the Old and the New Testaments* (1914). G. F. Moore, *Judaism in the First Centuries of the Christian Era*, vols. I-II (1927). W. O. E. Oesterley and T. H. Robinson, *Hebrew Religion* (1930). G. Aulén, *Christos Victor* (1931). O. Eissfeldt, *Einleitung in das AT* (1934). W. Eichrodt, *Theologie des AT*, vols. I-III (1936-39). N. H. Snaith, *Distinctive Ideas of the OT* (1944), pp. 79-93. C. H. Dodd, *Interpretation of the Fourth Gospel* (1953). U. E. Simon, *A Theology of Salvation* (1953). R. Leivestad, *Christ the Conqueror* (1954). H. H. Rowley, *Biblical Doctrine of Election* (1954). A. Bentzen, *King and Messiah* (1955). R. Bultmann, *Theology of the NT*, vol. I (1952); vol. II (1955). E. Stauffer, *NT Theology* (1955). W. D. Davies and D. Daube, eds., *Background of the NT and Its Eschatology* (1956). G. W. H. Lampe, *Reconciliation in Christ* (1956). S. Mowinckel, *He That Cometh* (1956). L. Newbigin, *Sin and Salvation* (1956). A. 1. **Location.** Samaria occupies a hill in the central range of Palestine, approximately forty-two miles N of Jerusalem and *ca.* twenty-five miles E of the Mediterranean Sea. It is surrounded on three sides by fertile valleys and slopes, and overlooks the main N-S road connecting Jerusalem with the Plain of Esdraclon and the N. The hill itself is a long E-W ridge which terminates in a summit on the W and is joined to the hills on the E by a long, narrow saddle. The site is easily defensible—a factor which, no doubt, figured in Omri's decision to build his capital there (see § 2a below). On the extreme E end of the ridge is located a modern village whose name, Sebastiyeh, preserves the Herodian name, Sebaste. Fig. SAM 8.

9. Plan of Samaria (Sebaste)

The site has been partially excavated by two different expeditions. From 1908-10, Harvard University sponsored a series of campaigns under the direction of G. Schumacher (1908) and G. A. Reisner

the British School of Archaeology (Jerusalem) from 1931-33, and by the above-mentioned British institutions only in 1935, was directed by J. W. Crowfoot with the assistance of E. L. Sukenik, Kathleen Ken-

yon, and a number of archaeologists and architects. These expeditions cleared a considerable portion of the summit and the ridge to the E and excavated a number of smaller areas on the terraces and slopes; as a result, the history and material culture of the site can be described in some detail. Fig. SAM 9.

2. History. *a. Israelite.* Aside from a quantity of EB material found in cuttings in bedrock, the hill was first occupied early in Iron II (ca. 870 B.C.), when Omri purchased it from Shemer for two talents of silver and built a city on it, which he named Samaria (I Kings 16:24). Abandoning Tirzah, Omri made Samaria the capital of Israel, a position which it held until the downfall of the N kingdom.

Remains of the Omri-Ahab city (Periods I-II of the Joint Excavations) have been found on the summit, terraces, and slopes of the hill. This city is attributed to both Omri and Ahab, because the constructions of this period are too numerous to have been completed during the remaining six years of Omri's rule, and much must have been finished by his son. Although later construction and quarrying destroyed most of this occupation, the few surviving wall fragments and foundation trenches show that Samaria was a beautifully designed and magnificently constructed city; some of its walls are among the finest ever built in Palestine in any period. The style of masonry used

in them also appears slightly earlier at Megiddo, Taanach, and Beth-shan; it was probably introduced into Palestine by Phoenician masons during the reign of Solomon (I Kings 5:17-18), and was revived in this period, when Phoenician influence was again strong. Figs. SAM 10-11.

The royal quarter, which consisted of a number of buildings and courtyards, occupied the summit. The palace itself must have contained at least two stories, in view of representations of roughly contemporary buildings of this type elsewhere in the Near East, and of II Kings 1:2, which states that Ahaziah, Ahab's son, was fatally injured as a result

of falling through the window of an upper room of the palace. On the N side of the courtyard a large, shallow, rectangular pool was discovered, which may have been the "pool of Samaria," where Ahab's blood was washed from his chariot following his death in battle at Ramoth-gilead (I Kings 22:38). Presumably in the royal quarter were also located the temple and the altar, which Ahab built and dedicated to Baal (16:32), but no traces of these structures survive.

The most noteworthy find in this area was a group of more than five hundred fragments of ivory, most of which are inlays* from wooden wall paneling and furniture, although some are from small boxes and toilet articles. It is almost certainly in the sense of inlaid wall panels and inlaid furniture that the references to Ahab's house of ivory (I Kings 22:39) and to beds of ivory (Amos 6:4) must be understood. Some of the fragments are carved in the round, but most are in relief; many are inset with colored glass or paste. In general, their style suggests that they were carved by Syro-Phoenician artisans using Egyptian models. In view of the close relations between Israel and Phoenicia in this period—note that Ahab's wife, Jezebel, was a Phoenician princess (I Kings 16:31) and a strong protagonist of Phoenician culture in Israel (18:4, 19)—the discovery in Israel of ivories from N workshops is not surprising. See IVORY. Figs. INL 8; IVO 22.

The royal quarter was surrounded by an enclosure wall, the lower courses of which were laid against a rock scarp. Later—probably during the reign of Ahab—a second enclosure wall was built just outside the earlier one. It varied in thickness from *ca.* twelve feet on the S to more than thirty-two feet on the N and was constructed on the casemate principle—i.e., two parallel walls were joined at intervals by cross walls, and the compartments formed by this design were usually filled with rubble. The topography of the site suggests that the palace area was entered from the E, and in this area six proto-Ionic pilaster capitals, similar to several discovered at MEGIDDO, were found which may have decorated the walls of a monumental entrance. Traces of walls which probably formed another ring of fortifications have been found on the middle terrace below the summit, and on the E side the remains of what may have been a gateway have been discovered. It was probably in this gateway—or in the entrance to the royal quarter—that Ahab and Jehoshaphat sat on thrones and heard Micaiah the prophet speak of impending doom at Ramoth-gilead (I Kings 22:10; II Chr. 18:9). Here, also, business transactions took place in the time of Elisha (II Kings 7:1), and probably through the life of Israelite Samaria. A third defensive system, consisting of a wall and towers, possibly encircled the lower slopes of the hill; walls of impressive buildings belonging to this period were found on these slopes, and it is unlikely that they would have been left defenseless. So strong was this system of fortifications that the city successfully withstood all attempts to take it (e.g., I Kings 20; II Kings 6:24) until the long Assyrian siege (see § 2b below).

Samaria witnessed the full fury of the revolution, inspired by Elijah and Elisha and carried through by Jehu (*ca.* 842-815 B.C.), which destroyed the Dynasty of Omri. Here, according to II Kings 10:1-

7, the elders of Samaria beheaded seventy sons of Ahab rather than risk warfare with Jehu. Here also Jehu killed the remaining descendants of Ahab, slaughtered Baal-worshippers, and destroyed the temple of Baal which Ahab had built (II Kings 10:12-28). From the excavations it is clear that the first transformation of the city took place at this time (Period III). There is evidence of destruction to parts of the Omri-Ahab royal quarter on the summit, but whether this destruction resulted from a natural catastrophe—such as an earthquake—or from Jehu's zeal is not known. In any case, much rebuilding and new construction were probably carried on in this period. In view of the fact that Israel's relations with Phoenicia were strained or broken as a result of Jehu's purge, and since Jehu was under tribute to Shalmaneser III of Assyria, according to the Obelisk of Shalmaneser, Samaria's prosperity must have declined significantly at this time.

Little is known of Samaria during the reigns of Jehoahaz (*ca.* 815-801) and Joash (*ca.* 801-786) except that the latter is said to have brought to Samaria treasures from the temple and palace in Jerusalem, after defeating Amaziah of Judah at Beth-shemesh and sacking Jerusalem (II Kings 14:8-14; II Chr. 25:17-24). Under Jeroboam II (*ca.* 786-746), Samaria enjoyed its greatest period of prosperity. Wealth flowed into the city following Jeroboam's expansion into Syria, Transjordan, and possibly Judah (II Kings 14:23-28), and as a result of his friendly relations with Phoenicia, whose commercial empire in the Mediterranean was at its peak. In the city itself, numerous repairs to fortifications and at least three building phases (Periods IV-VI) attest to increased building activity. But nowhere was the fine construction characteristic of the Omri-Ahab city used in this period; walls were roughly built of stones varying in size and were finished with a coat of plaster. The most important find of this period was a group of sixty-three ostraca (inscribed potsherds)*—containing receipts and orders for various commodities such as oil, wine, and barley—which were discovered in a building just W of the Omri-Ahab palace. All of them apparently belong to the eighth century B.C., and a number date *ca.* 778-770, in the reign of Jeroboam. These ostraca are significant, not because of their contents, but because of the light they shed on Hebrew paleography and on the study of personal names, religion, and state administration of this period. Fig. SAM 12.

12. Ostrakon from Samaria (eighth century)

The stability and prosperity enjoyed by Samaria under Jeroboam ended soon after his death. During the next twenty-four years leading to the fall of Samaria, six kings occupied the throne; and of the six, four were assassinated, two of them in Samaria (II Kings 15:8-31). Meanwhile Assyrian power was growing under the leadership of a series of strong rulers, who applied increasing pressure on the small states in Syro-Palestine. According to II Kings 15: 19-20 and the annals of Tiglath-pileser, Menahem (*ca.* 745-738) was forced to pay heavy tribute to Pul (Tiglath-pileser III, *ca.* 745-727) of Assyria to save Samaria—spelled “Samerina” in the Assyrian texts—from siege. Again during the reign of Pekah (*ca.* 737-732), Tiglath-pileser invaded Israel—this time at the request of Ahaz of Judah (II Kings 16:7-9)—and occupied a large portion of the area N of the Plain of Esdraelon and Gilead (II Kings 15:29). After Pekah was murdered, Tiglath-pileser placed Hoshea on the throne and imposed tribute on him, according to Assyrian inscriptions. With Tiglath-pileser’s death, Hoshea rebelled against the new Assyrian king, Shalmaneser V (727-722), who placed him in prison and laid siege to Samaria. The city held out for three years against the most powerful army of the time, but finally capitulated in 722-721 to Sargon II, who meanwhile had succeeded to the Assyrian throne. Part, if not all, of the city was burned, as shown by a burned layer which sealed the remains of this period on the summit. Before and immediately after this catastrophe, Isaiah and Micah repeatedly warned Judah of the consequences of following Israel’s footsteps, and on several occasions used the fate of Samaria as an object lesson to Jerusalem (e.g., Isa. 8:4; 10:9-11; Mic. 1:1-7).

b. Assyrian. The events surrounding the fall of Samaria are recorded in the Bible (II Kings 17:1-6, 24) and in Assyrian texts (the annals of Sargon and the so-called “Display Inscription”). After conquering Samaria, Sargon deported 27,290 Israelites, resettling them at various places in the Empire, from Gozen to Media. In turn, he repopulated the city with people from other conquered lands. Samaria was rebuilt—Sargon boasts that it was better than before—and became the headquarters of an administrative district of the Assyrian Empire. Of the buildings of the city itself (Periods VII and VIIa), little is known. The summit was occupied, but only foundation trenches and a few isolated fragments of walls survive. Noteworthy objects attesting to Assyrian domination include: a fragment of an Assyrian stele, a broken cylinder and fragments of clay tablets written in cuneiform, and sherds of Assyrian pottery.

c. Babylonian. With the fall of Nineveh to the Medes and Babylonians in 612 B.C., and the subsequent division of the Assyrian Empire by the victors, Samaria became a Babylonian possession and functioned as a provincial administrative center. Little is known of the city during this period. According to Jer. 41:5, there were still some Yahweh-worshippers in the city, in spite of the earlier Assyrian deportation; and Samaria’s unfaithfulness and punishment had not been forgotten (Ezek. 16:44-55; 23). Few building remains of this occupation (Period VIII) have been found at the site. To the E of the earlier Omri-Ahab palace, a part of the summit was leveled

13. Rich brown soil layer in the excavations at Samaria, probably of a Babylonian-period garden

and capped with a thick layer of rich brown soil, which probably marks the location of a large garden, a not uncommon feature of Babylonian cities. Fig. SAM 13.

d. Persian. Following the Persian conquest of Babylon in 539 B.C., Samaria became the administrative center of a Persian province, which included Jerusalem and N Judah. In the late sixth and fifth centuries, many of the exiles returned to Judah, and conflicts of interest soon developed between them and the officials of Samaria, centering especially around efforts of the returnees to rebuild Jerusalem (Ezra 4:8-24; Neh. 2:9-20; 4:1-9; 6:1-14). During the late fifth century, Samaria is also mentioned incidentally in the Elephantine Papyri. Fragmentary building remains, coins, Persian seal impressions, and pottery—particularly Attic black- and red-figured ware—witness to the occupation of the site in this period (Period IX).

e. Hellenistic. This period, beginning with the conquest of Palestine by Alexander (332 B.C.) and ending with the Roman occupation under Pompey (63), was one of turmoil and warfare at Samaria. In little more than 250 years, it successively belonged to the Macedonian, Ptolemaic, and Seleucid empires, and finally to the Jewish kingdom. It is therefore not surprising that the most prominent remains of this period are two systems of fortifications. The earliest of these is a series of round towers—each measuring from forty-two to forty-eight feet in diameter—which were built to strengthen the old Israelite wall on the middle terrace. When these towers first came to light during Reisner’s excavations, they were tentatively assigned to the time of Jeroboam II, but subsequent discoveries have shown that they must be dated *ca.* 300 B.C. They have been described as the “finest monuments of the Hellenistic age in Palestine.” Fig. SAM 14.

The second defense system replaced the Israelite casemate wall around the summit. It consisted of a wall *ca.* thirteen feet thick, constructed of blocks of various shapes and sizes and built with offsets and towers. Portions of a similarly built city wall were also found on the lower slopes near the W gate. These walls were probably constructed *ca.* the middle

14. Hellenistic round tower at Samaria, after the clearance in 1935

of the second century B.C. to protect the Seleucid city from the Maccabees. But between 111 and 107, John Hyrcanus besieged Samaria, and he took it a year later, after which he broke down sections of the walls (Jos. Antiq. XIII.x.2-3). The city remained part of the Jewish kingdom until 63 B.C.

Most of the site was occupied during this period, but only traces of buildings have come to light in the excavations, because later construction destroyed these remains. In spite of unsettled conditions, Samaria was a prosperous city in the Hellenistic age, as shown by the discovery of fragments of sculpture and inscriptions, many coins, and much imported pottery, including Megarian bowls and more than two thousand Rhodian and other stamped jar handles.

f. Roman. This period is divided into three phases. The first phase covers the period from the Roman conquest of Palestine to the First Jewish Revolt (A.D. 66-70). Following the capture of Jerusalem, most of Palestine—including Samaria—was incorporated into the province of Syria; Samaria itself was returned to its own inhabitants (Jos. Antiq. XIV.iv.4). It remained an unwalled city until Gabinius, the provincial governor (57-55 B.C.), gave orders to rebuild the walls (Jos. Antiq. XIV.v.3). In gratitude, the inhabitants renamed the city in honor of Gabinius and remained loyal to Rome. Fragmentary remains of this occupation—found under Herod's temple complex on the summit—show that the city was well planned, with houses and shops arranged in blocks bounded by streets. To this period probably belongs the layout of the forum and possibly the Doric stadium, though the latter may be Herodian.

Samaria regained much of its earlier prominence during Herod's reign, because the city supported him in his struggle with Antigonos (Jos. Antiq. XIV.xv.3). Here Herod left his mother and children for safety (XIV.xv.4); here he married Mariamne (XIV.xv.14); here he entertained Agrippa (XVI.ii.1); and here he had his sons put to death (XVI.xi.7). In 30 B.C., Herod undertook a great program of construction at Samaria (Jos. War I.xxi.2) and renamed the newly built city Sebaste (Σεβαστός, Greek translation of "Augustus") in honor of the emperor. The most noteworthy structure of this period was a large temple,* consisting of a portico and a cella, which stood on a platform *ca.* fourteen feet high. On the N a monu-

mental staircase gave access to the platform from a long forecourt at a lower level.* A large altar stood in the courtyard directly in front of the staircase, and in the debris E of the altar was found a large fragment of a marble statue of an emperor, probably Augustus. To the W of the temple enclosure was a large atrium house; to the S, an apsidal building of unknown purpose; and to the E, buildings which probably served as dwellings for temple priests and servants.* Herod also enclosed Sebaste with a new city wall, which was more than two miles in circumference, and was strengthened at numerous points throughout its length by towers. Entrance to the city

15. Altar and monumental stair of Herodian temple at Samaria

was gained through a gate on the W side—the only one excavated to date—another on the E, and possibly one on the N and another on the S. Figs. SAM 11, 15, 16.

This was the Samaria of Jesus' time. Here Philip preached with much success, and following his mission, Peter and John prayed that the newly baptized converts might receive the Holy Spirit (Acts 8:5-17).

The second phase of the Roman period extends from the end of the First Jewish Revolt to the reign of Constantine (A.D. 274-337). Early in the Jewish Revolt, Sebaste was captured and burned by the rebels. After the revolt was put down, the temple was repaired, and to this reconstruction probably belong the subterranean corridors of the temple complex, a large tower at the NE corner of the forecourt platform, and a fragment of an inscription of Vespasian (A.D. 69-79). But until the late second century A.D., Sebaste received little attention, judging from the scanty remains of this period.

Between *ca.* 180 and 230, Sebaste enjoyed another period of prosperity. During the reign of Severus (193-211), it became a colony known as Lucia Septimia Sebaste, having supported Septimus Severus against Pescennius Niger in a struggle for the Empire. Its new prosperity is reflected by the results of a great building program undertaken during the reign of Severus; it is primarily the remains of this period that survive above ground level. All these new constructions were built of similar stone and in much the same style. The summit temple and the temple of Kore on the terrace N of the summit were thoroughly rebuilt. A small theater* with an external

16. Plan of Herodian temple at Sebaste (Samaria) built by Herod the Great

diameter of ca. 210 feet was erected on the N slopes of the summit, midway between the summit temple and the forum. The latter, also reconstructed in this period, was rectangular in plan and enclosed by porticoes on all sides. Adjacent to the W side of the forum was a large basilica* which consisted of a central hall with open colonnades on three sides and a semicircular tribunal on the N. N of the forum and just inside the city wall, a large rectangular stadium

(for foot racing), with a peristyle supported by 160 columns, was constructed over the remains of the earlier and smaller Doric stadium. The W gate was again rebuilt, and a long colonnaded street was constructed, which connected the W and E gates and ran just S of the summit and forum area. The street averaged ca. forty feet in width and was flanked by colonnaded sidewalks, along each of which was a row of shops. Other interesting constructions of this

period include an aqueduct *ca.* 2¼ miles long, which brought water to the forum from a spring SE of the hill, and several magnificent mausoleums. Figs. SAM 17-18.

The third phase covers the period from Constantine to the Arab conquest (634). With the establishment of Christianity as the religion of the Roman Empire, Sebaste became an episcopal see—bishops of Sebaste attended the councils of Nicea, Constantinople, Chalcedon, and the Synod of Jerusalem—though paganism remained strong in the city during the early part of the period and culminated in anti-Christian riots during the reign of Julian (361-63). Numerous changes took place in the city during this period. Structures particularly associated with paganism were destroyed or reused. The temple of Augustus became a quarry except for the E and W corridors, which were used for a factory and a stable respectively. The basilica was completely rebuilt,

with two apses at the N end, and converted into a cathedral. The summit was occupied by large houses floored with mosaics and complete with baths. A glass factory was located SE of the forum. During this period Sebaste was widely known as the site of the burial of John the Baptist, and two shrines were revered. One was his alleged tomb at the E end of the city under the present mosque; the other marks the traditional place where his head was hidden by Herodias. On this spot, S of the summit, a basilica with three aisles and an apse at the E end was erected, perhaps in the fifth century A.D.

In 634, the city surrendered to 'Amr ibn al 'As, and the Arab occupation of the site began.

SAMARIA, TERRITORY OF. A region in the hill country of Palestine, named after the capital city of Israel. The boundaries of this territory changed during the centuries, and they cannot be precisely fixed for every period with the scanty information available. In general, however, they corresponded to the combined tribal allotments of Ephraim and W Manasseh, and included the region bounded on the S by a line from Jericho to the Valley of Ajalon, on the W by the coastal plain, on the N by the S edge of the Valley of Jezreel, and on the E by the Jordan

River. The territory enclosed by these boundaries measures approximately forty miles from N to S and ca. thirty-five miles from E to W. Fig. SAM 19.

The S, or Ephraimite, portion of this region has a relatively high elevation. On both the E and the W side, precipitous valleys lead down to the Jordan Valley and the coastal plain. Access by means of these valleys was difficult but possible, and as a result, this region was somewhat isolated from the outside world. The combination of rich terra-rossa soil and sufficient rainfall made the land fertile and productive.

The N portion consists of a central basin enclosed on the S by the hills of Ephraim; on the E by the central ridge of Palestine, which swings to the NE in this region; on the N by the mountains of Gilboa; and on the W by the Carmel foothills. The topography of this basin is obscured by a number of hills which rise out of its floor. Of these, Mount Ebal (3,100 feet) and Mount Gerizim (2,910 feet)*—located in the center of the basin—are the most notable examples. Agriculturally this region is extremely productive; grain is grown in the alluvium-covered plain; olives and vines thrive on the slopes of the hills (cf. Jer. 31:5). Access to this basin from both the coastal plain on the W and the Jordan Valley on the E was gained with little difficulty by means of several valleys which cut through the surrounding ridges, including principally Wadi esh-Sha'ir on the W and wadies Far'ah and el-Khashneh on the E. Similarly, movement within the basin was easy through a number of broad passes which connect the various plains. The accessibility of this region facilitated the movement of trade, which brought great prosperity to the area. It also exposed the land to influence from other cultures, particularly the Phoenician and Aramean cultures of the N, and it was against the religious and moral aspects of these cultures that the prophets Elijah, Elisha, Amos, and Hosea fought bitterly (e.g., Hos. 7:1; 8:5-7; Amos 4:1). Further, the richness and openness of the territory attracted invaders who, in the course of centuries, overran the land with comparative ease. Figs. GER 24; EBA 2.

This region, of course, did not become known as the territory of Samaria until after the division of the kingdom and the founding of Samaria as the capital of the N kingdom. Thus the reference in I Kings 13:32, belonging to the time of Jeroboam I, is an obvious interpolation. Following the fall of Israel in 722/721 B.C. and the deportation of Israelites, the

Assyrians settled captives from Babylon, Cuthah, Ava, Hamath, and Sepharvaim in the cities of Samaria (II Kings 17:24-26). The Assyrians incorporated the territory in their empire as the province *Samerena*, and ruled the region until the late seventh century, when their control weakened. It was then that Josiah of Judah (ca. 640-609) was able to destroy the high places in the cities of Samaria (II Kings 23:19). With the end of the Assyrian Empire in 612, the territory became a Babylonian province.

After the fall of Jerusalem in 587, the N hill country of Judah, including Jerusalem, was added to the province of Samaria. In 539 the Persians conquered Babylon, and the territory became a province or satrapy in the Persian Empire. With the return of the exiles, the governors of this province sought to hinder the returnees who were attempting to rebuild Jerusalem (Ezra 4:8-24; Neh. 2:9-20; 4:1-9; 6:1-14). But with the coming of Nehemiah, the hill country of N Judah was made a separate province, and the S border of the territory of Samaria was established approximately in its pre-Babylonian location. This region became the center of the Samaritans, following the Jewish-Samaritan schism, which took place in the days of Ezra and Nehemiah, and it has remained so. After the fall of the Persian Empire to Alexander the Great, the territory of Samaria was successively ruled by Macedonian, Ptolemaic, and Seleucid rulers. Between 111 and 107 it was incorporated in the new Jewish state, after the capture of Shechem and Samaria, and the destruction of the Samaritan temple on Mount Gerizim by the Macabean leader John Hyrcanus.

20. The high hills of Samaria, with the temple of Herod in the foreground

In 63 B.C., Pompey assumed control of the territory for the Romans, and it was placed under the supervision of the province of Syria. This region was given to Herod the Great* by Augustus in 30, and Herod bequeathed it to his son Archelaus, who ruled until A.D. 6, when he was deposed by Augustus. It was then placed under the control of appointed Roman procurators, among whom was Pontius Pilate, until A.D. 41. From 41 to 44, the territory was ruled by Herod Agrippa I, but upon his death it was again governed by procurators. The ministry of Jesus and the work of the apostles took place in this period, although the territory of Samaria is rarely mentioned in connection with their activities. Jesus and his disciples generally seem to have followed the Jewish

custom of skirting the borders of Samaria in journeying to Judea (e.g., Matt. 19:1; Luke 17:11), but on one occasion they are reported to have traveled through Samaria (John 4:4-9). Following the Resurrection, the disciples obeyed Jesus' command to bear witness in Samaria, among other places (Acts 1:8); and the preaching of Philip, Peter, and John resulted in the formation of churches in this region (Acts 8: 1-25; 9:31; 15:3). SAMARITAN, THE GOOD sə mār'ə tən. This narrative parable (Luke 10:30-36) contrasts two answers to the question: Who is my neighbor? Two representatives of Jewish law dared not aid a wounded Jew and risk possible contamination through contact with his corpse-like figure. Not even traditional hostility between Jews and Samaritans, however, prevented the Samaritan from responding to the Jew's needs.

L. Mowry

***SAMARITAN PENTATEUCH.** It is acknowledged that the SAMARITANS accepted as canonical only the Pentateuch, and when in 1616 the first copy of their recension of it became available for study, it was hailed as the earliest source for the Pentateuch text. In 1815 Gesenius demonstrated the fallibility of the assessment, but in 1915 Kahle (*see bibliography*) modified this view by establishing that the evidence of the version, along with the LXX and with some non-

LXX NT passages, forms part of the case for his *Vulgärltexte* (*see* TEXT, OT) hypothesis. Two recent discoveries further modify our assessment of the recension:

a) The Qumran MS 4QEx^a, which Skehan (*see bibliography*) has described (*see* TEXT, OT, § A1a) as obviously related to the Samar., proves its antiquity and constancy of transmission, without priority for its text over the MT.

b) Two independent examinations of photographs of the Abisha Scroll in Nablus (*see bibliography*), which have resulted in favor of the great antiquity of the text. The authenticity of the Abisha Scroll has been generally questioned since Gesenius' time, and Kahle has described it as a mixed MS, partly ancient and partly fourteenth-century.

MSS of the recension have recently become available from before the twelfth century, but in the Paris and Walton Polyglots the text of seventh-century MSS is given, and the critical edition of Von Gall (1914-18) is eclectic, based on medieval MSS.

The recension is estimated to have around six thousand variants from the MT, mainly orthographic; and the numerous textual changes and transpositions—e.g., Gen. 2:2; 5; 11:10-32; Deut. 27:4—reflect Samaritan religious tendencies, as well as genuine variants.

For Aramaic renderings, *see* TARGUM; VERSIONS, ANCIENT. Fig. SAM 21.

21. Copy of the Samaritan Pentateuch (the Abisha Scroll) at Nablus

***SAMARITANS** sə mār'ə tən [שמרנין; Σαμαρείτης]. Originally, the inhabitants of SAMARIA in general; the term "Samaritans" is now restricted to a particular religious community, or sect, living in that area. The community is of significance for biblical and allied studies for three main reasons: (a) it claims to be the remnant of the kingdom of Israel, more specifically of the two half-tribes of Ephraim and Manasseh; (b) it possesses an ancient recension of the Pentateuch which differs at several points from the standard (Masoretic) Jewish text and sometimes corroborates readings of the Greek LXX; (c) certain of its characteristic doctrines reappear in the Pseudep. of the OT and in the Dead Sea Scrolls, and may therefore help to reconstruct the religious background of those writings and to recover traditions lost to, or abandoned by, "normative" rabbinic Judaism. In addition, the sect is especially familiar to readers of scripture from the parable of the Good Samaritan in the NT (Luke 10:25-37).

Unfortunately, although much has been written on the subject, our knowledge of the Samaritans is very imperfect. Early references to them are scant and confused, while the bulk of their own literature is of late date and extant only in MSS still unpublished. Moreover, since they were for many centuries under Muslim rule and influence, and since most of their writings date from that period, it is often diffi-

cult to determine, in cases where Samaritan and Muslim ideas or expressions coincide, whether they both ascend to a common ancient tradition, or whether the Samaritans have simply borrowed and adapted from Islam. This article will be concerned exclusively with those elements of Samaritan history and teaching which bear upon the Bible and the intertestamental period, and it will confine itself mainly to the older sources—e.g., the writings of the fourth-century theologian Marqeh (Mark). Since, however, it will be necessary to draw also upon the later, post-Islamic literature, the reservation just made must be kept firmly in mind. It should be emphasized, in fact, that any comprehensive account of the Samaritans can, at present, be only tentative and provisional, subject in large measure to the better insight of the morrow.

A. ORIGINS. 1. **The Jewish view.** This view identifies the Samaritans as the descendants of the colonists whom Shalmaneser, king of Assyria, is said to have brought from Cutha, Babylon, Hamath, and other foreign parts after he had conquered Samaria in 722 B.C. and deported the native population (II Kings 17). These colonists, it is added, were later supplemented by others, introduced by Shalmaneser's successors, Esarhaddon and Ashurbanipal, alias "Osnappar" (Ezra 4:2, 10). Whatever knowledge of Judaism they possess is dismissed as purely superficial. The first settlers, runs the story, were beset by an invasion of lions. Thereupon they appealed to the authorities to repatriate one of the priests of Yahweh, that they might learn from him the proper procedure (משפט) of the traditional local cult. The result, however, was a grotesque syncretism; Yahwism served only as a thin veneer spread, for convenience, over an essential and deep-seated heathenism. It was for this basic reason, in fact, that the Samaritans obstructed the efforts of Ezra and Nehemiah to rebuild Jerusalem and re-establish the sanctuary of Yahweh (cf. Ezra 4:2 ff; Neh. 2:19; 4:2 ff).

In accordance with this view, the Jews dub the Samaritans contemptuously "men of Cutha" (כּוּתִים), or—in slightly more charitable vein—speak of them as "lion converts" (גּוֹרֵי אַרְיֹוֹת; *Qid.* 75a-76a), regarding them, at best, as one degree nearer than Gentiles, but still not as full-fledged members of the house of Israel.

2. The Samaritan view. The Samaritans, for their part, dismiss this story as a vile Jewish canard. The deportation in 722, they say, was neither total nor final; the exiles were, in fact, repatriated after fifty-five years! It is the descendants of these native Israelites that they claim to be. According to their version, the breach with the Judeans goes back to the time of Eli, who took it upon himself to set up an apostatic sanctuary of Yahweh at Shiloh, whereas the true "chosen place" prescribed in the law of Moses was Mount Gerizim.* This infamy was later reinforced by the "accursed Ezra," who falsified the sacred text and thereby seduced the people, on their return from the Babylonian exile, to erect the second temple beside the Judean capital. Admittedly, pagan colonists were introduced by the Assyrian monarchs; but these must not be confused with the true, native Israelites. Fig. GER 24.

In harmony with this view, the Samaritans prefer to style themselves *Shāmērīm* (שְׁמֵרִים)—i.e., "the observant"—rather than *Shōmērōnīm* (שְׁמֹרֹנִים)—i.e., "the inhabitants of Samaria."

3. Critical appraisal. There is something to be said for each of these views, and the truth probably lies between the two extremes.

The biblical story of successive exchange of population, following the fall of Samaria in 722, is confirmed, in its broader outlines, by the Assyrian records.

It is plain from these documents, however, that the Hebrew historian has confused and "telescoped" his data. In the first place, it was not Shalmaneser, but his successor Sargon (who, in fact, completed the siege), that effected the exchange in question. Secondly, it seems more probable that the colonization mentioned in II Kings 17:24 actually took place over several years and under successive monarchs. Thus, the Hamathites were probably transported to Samaria only after Sargon had quelled a revolt in that city in 721 (*Annals* 23 ff)—a revolt in which the Samaritans indeed participated; while the deportation of the Israelites to Media would seem to have counterbalanced one of the Medians to Samaria, following a successful campaign against them in 714 (cf. *Annals* 94 ff). Similarly, the introduction of Babylonians and Cutheans is more plausibly assigned to Ashurbanipal than to Shalmaneser, for it may well have been an act of retribution for their share in the civil war raised by the former's rival, Shamashshum-ukin.

Such confirmation of the biblical account does not prove, however, that the Jews are right in regarding the Samaritans as the mere offspring of the colonists rather than the true scions of Israel; and there is, in fact, much to support the Samaritan claim.

In the first place, Sargon himself says distinctly (*Annals* 11-17; *Prunkinschrift* 23-24) that he deported only 27,290 persons, whereas a computation based

on a contemporary record in II Kings 15:19 shows that wealthy landowners alone then numbered 60,000! Furthermore, in II Chr. 34:9, we indeed hear of a "remnant of Israel" still resident in Ephraim and Manasseh about a century later, in the days of Josiah; and the analogy of what happened at the fall of the Southern Kingdom (II Kings 24:14) would suggest that, while more influential citizens may, indeed, have been driven into exile, the proletariat were left where they were. Lastly, it should be pointed out that there is, in fact, nothing in subsequent Samaritan doctrine which betrays any indebtedness to Assyrian ideas, and that the attitude of the Samaritans toward the Jews is wholly and most naturally explicable as a continuance of the inveterate hostility between Israel and Judah.

The most plausible conclusion is, then, that after the fall of Samaria in 722, the local population consisted of two distinct elements living side by side—viz., (a) the remnant of the native Israelites; and (b) the foreign colonists. For tendentious reasons, however, the Jewish version ignores the former; the Samaritan version, the latter.

B. HISTORY. 1. Opposition to Ezra and Nehemiah. On this hypothesis, the story told in Ezra-Nehemiah concerning the attitude of the "Samaritans" at the restoration from the Babylonian exile becomes readily intelligible. The author is writing from a chauvinistically Jewish viewpoint; his reference, therefore, is to the foreign colonists rather than to the native Israelites. These colonists were animated by a twofold fear: First, they feared that what Nehemiah was undertaking in Jerusalem might lead to such a recrudescence of Judean power as would be dangerous to their own several nations. Second, they were scared lest this Jewish attempt to create an *imperium in imperio* might evoke from the Persian government repercussions which would eventuate in the suppression of all minorities, and hence a reduction of their own status. In addition, it is not impossible that the question of the demarcation of boundaries between Samaria and Judah was also involved. Accordingly, it would have been but natural for these foreign colonists to have aligned themselves with the designs of their governor, Sanballat, who had, of course, his own personal reasons for seeking to arrest the growing power of his Judean confrere.

Of a somewhat different complexion is the earlier offer of co-operation with Zerubbabel in 536 B.C. (Ezra 4:2); for although this is usually taken to refer to the Samaritans, the text actually speaks only of "adversaries of Judah and Benjamin" who had been deported (whether is not stated) by Esarhaddon. Accordingly, the passage may allude equally well to general "Gentile Zionists" from other parts. Their offer would very intelligibly have been rejected by a Jewish leader who saw in his movement the spearhead of an essentially national revival, and who did not wish to compromise this main objective by any concessions to a vaguer, ecumenical universalism.

All this, however, does not exclude the possibility that the native Israelites of Samaria offered, for their part, a parallel opposition to Ezra and Nehemiah on more religious grounds. It is true that the Bible has nothing directly to say on this point, but that concurrent attempts were being made to erect the temple

on Israelite soil is perhaps indicated by the fact, long since observed by modern scholars, that Ezekiel's blueprint of that edifice seems, in its original form, to have envisaged a location in the Northern kingdom (40:2). Moreover, the famous words of Isa. 66:1:

Heaven is my throne
and the earth is my footstool;
what is the house which you would build for me?

then acquire added significance as an attempt to put an end to this corroding rivalry by (literally) "calling a plague upon *both* their houses."

2. The Samaritan temple. However it may have begun, the rivalry between the Samaritans and the Jews reached its culmination in the erection by the former of their own distinctive temple on Mount Gerizim.

Unfortunately, we do not know when this took place. Our main reference to the event is furnished by Josephus (Antiq. XI.viii.4), who places it in the reign of Darius Codomanus (335-330 B.C.), the last king of Persia. A Jerusalemite priest named Manasseh, he tells us, had been expelled for marrying Nicaso, daughter of Sanballat, the governor of Samaria, and then refusing to divorce her. Sanballat, to reward him, obtained permission from the king to have a Samaritan temple built on Gerizim, but the promise was fulfilled only by Alexander the Great.

Scholars have long suspected the authenticity of this story. In the first place, the tale of the irregular marriage seems to be a mere elaboration of a very similar incident, one hundred years earlier, to which allusion is made by Nehemiah (13:28). Secondly, unless Alexander's permission was granted straightway in 332, immediately after the completion of his conquest of the Near East, it is unlikely that it was granted at all, for we know that in the following year he was none too friendly to the Samaritans in consequence of their assassination of Andromachus, the governor of Coele-Syria (cf. Eusebius *Chronicle* II.114 [Schoene]), and also that he exacted savage punishment upon them for revolt (Quintus Curtius *History* IV.5.8). It may be suggested, in fact, that Josephus grotesquely patched his story together by fusing a Jewish and a Samaritan tradition. The Jews, for their part, had tried to pour obloquy on the Samaritan temple by associating it with the familiar incident of the "unfrocked" priest; while the Samaritans had sought to give it equal status with that of the edifice in Jerusalem by inventing a firman on the part of Alexander to match that which the Jews boasted from Cyrus!

Whenever it may have been founded, the Samaritan temple on Gerizim was razed by John Hyrcanus in 129/128 B.C. (Jos. Antiq. XIII.ix.1; War I.ii.6). According to Josephus, this was done in exasperation over their prolonged apostasy and treachery. Already in the days of Antiochus Epiphanes, they are said to have avoided association with the Jews by declaring themselves to be Sidonians and by requesting that their temple be dedicated to Zeus Hellenios (Jos. Antiq. XII.v.5). Such stories, however, must be received with caution; they could very well be mere calumny.

The Samaritans designate as the "era of favor" (רְחוּתָה) the time, from the conquest of Canaan until

the apostasy of Eli, when the presence of God rested on Gerizim, and this they reckon as 260 years (cf. *Ma'lef*, Cod. Gaster 1169, fol. 88a). It has been suggested that this is simply a "reconstructed tradition," based on the duration of the Samaritan temple. If we deduct 260 years from the date of its destruction in 128 B.C., the edifice will thus have been founded in 388 B.C. An allusion to it is recognized by some scholars in Ps. 78:68-72.

3. Later times. The subsequent history of the Samaritans is related mainly by Josephus and by their own medieval chronicles, and the essential facts may be summarized briefly.

During the wars between the Ptolemies and the Seleucids, Samaria passed constantly from side to side: from Laomedon, governor of Syria, to Ptolemy Lagos in 320, then to Antigonus of Syria in 314, then back to Ptolemy in 311, then again to his enemy three years later. Once again it came under Ptolemy's sway by the terms of a treaty signed in 301, but three years later it was ravaged by Antigonus' son, Demetrius Poliorcetes.

Under the oppressive regime of Antiochus Epiphanes, the Samaritans appear to have quitted themselves with far less fortitude than the Jews, and it is perhaps for this reason also that they are characterized in Hellenistic Jewish literature as a foolish or churlish people.

Conquered by John Hyrcanus in 129/128 B.C., they were eventually liberated from the Jewish yoke by Pompey, while under Gabinius the territory was more adequately fortified. They lost some twelve thousand men in a revolt against Vespasian (Jos. War III.vii.32), while in the insurrection of Bar Cocheba they at first aided the Jews and then turned to the Roman side. For their assistance to his cause, Hadrian permitted them to rebuild their temple. After continuous oppression under the Christian emperors, they were finally suppressed by Justinian in 529.

In 636 they fell under Muslim rule, in 1099 under that of the Crusaders, and in 1244 (after the Battle of Gaza) again under the Muslims.

Medieval travelers report Samaritan communities in many places, even in Cairo, but these have long since disappeared. Only some two hundred souls remain, mainly at Nablus, under the shadow of Gerizim. In recent years, however, there has been a certain amount of migration to Jaffa and other Israeli cities.

Modern knowledge of the Samaritans dates only from the end of the sixteenth century, when Scaliger and other European scholars began a correspondence with them. Interest was fired especially when, in 1616, Pietro della Valle managed to procure from them a copy of the Samaritan Pentateuch and various other writings. In the late nineteenth century, Moses Gaster, A. E. Cowley, E. Kautzsch, M. Heidenheim, P. Kahle, and other European scholars spearheaded a revival of interest in the community, and MSS of their literature were acquired in increasing quantity. There are now extensive holdings in this field in the British Museum, the Bodleian, the Vatican, the Hebrew University, and the John Rylands libraries, as well as at the Hermitage in Leningrad. Scientific study of this material has been conducted especially

by Cowley and Gaster, by Z. Ben Haim and S. Talmon in Jerusalem, and by the schools of P. Kahle and J. Bowman at Bonn and Leeds respectively. There is, however, a great deal of further work to be done before any adequate picture of the sect can be drawn; in the words of Chaucer, "God wot, there is a largë field to ear."

C. THE SAMARITAN FAITH. 1. Beliefs. The Samaritan faith is epitomized in five cardinal tenets: (a) belief in God; (b) acknowledgment of Moses as the supreme apostle of God and as a unique being; (c) acceptance of the Torah (Pentateuch) as the only authentic law of God; (d) recognition of Mount Gerizim as the chosen place of God, prescribed in scripture; (e) expectation of a final day of rewards and punishments.

a. God. God is unique and incorporeal, beyond time, space, and accident. He is without associate (שׁוֹתֵף; Marqeh 183a); and, although he fills all things, he can be neither punctualized nor localized. He is beyond conception or description; but, as a poetic way of speaking, his glory (כְּבוֹד), power (חַיִל), and splendor (אִיקָר) can be personified and hypostatized (e.g., Marqeh 15a). His essential being is epitomized in the words: "I AM WHO I AM" (אֲהִיָּה אֲשֶׁר אֲהִיָּה; Exod. 3:14), which are regarded as his most sacred designation. He is the creator and sustainer of all things, and is bound specifically to Israel by a covenant which has been affirmed on no fewer than ten occasions—viz., with Noah by the rainbow; with Abraham by circumcision; with Isaac and Jacob; with Moses by the sabbath; with the two tablets of the Ten Commandments; with the Passover; with the covenant of salt (Num. 18:19); and with the covenant of eternal priesthood made with Phinehas (Num. 25:12).

Like the Jews, the Samaritans refrain from pronouncing the Tetragrammaton, usually substituting the word *shēmā*—i.e., "the Name." It has been stated that in some of their hymns they rhyme it with words ending in *-eh*, suggesting that they pronounced it "Yahweh." This, however, is doubtful.

b. Moses. Moses is not only the "exalted prophet" (הַנְּבִי הַרָם), the "seal [i.e., last, climax] of the prophets" (הַתּוֹמֵם הַנְּבִיִּים), the "apostle" (שְׁלִיחַ) par excellence, and the "choicest of creatures" (דְּמוּעַ הַבְּרוּרִים), but also an utterly unique being. He is a distillation (טַפְּחָה) of the primordial light, itself none other than the holy light of God which illumines the saints. As such, he is the "light of the world," and all other lights derive from his. He therefore existed from the dawn of creation, and was only later incarnated as the offspring of Amram and Jochebed. The whole world was created for his sake (Marqeh 67b). He intercedes for the deserving and leads the prayers of the celestial congregation. He is the future prophet foretold in Deut. 18:18; for on any other interpretation, the promise contained in this verse would contradict the express words of Deut. 34:10—H 33:10 (as read in the Samar. text): "There shall not again arise [MT 'There has no more arisen'] in Israel a prophet like unto Moses!"

c. The Torah. The Torah was written by God in a MS (Arabic *madraja*) which was given to Moses on Sinai along with the two tablets (Arabic *ul-luāḥ*) of the Ten Commandments. It is permanent and im-

mutable. The Samaritans often term it "the Verity" (הַכִּוּנָה), and they recognize no other part of the Bible.

d. Mount Gerizim. Mount Gerizim, not Zion, is the true chosen place of God prescribed in the Torah. According to the Samar. text, Deut. 12:5—H 12:4 declares that God "has chosen" it, not, as in the Jewish recension, that he "will choose" it. Moreover, after each version of the Ten Commandments (viz., after Exod. 20:17; Deut. 5:21), the Samaritans interpolate a paragraph (composed synthetically from Deut. 27:2-8; 11:30) ordering sacrifice on that mountain; and in Deut. 27:4 their text represents the curse as being pronounced on Ebal, and the blessing on Gerizim—rather than vice versa, as in the Jewish recension.

Gerizim existed before creation (Marqeh 68a; 71b). It alone escaped the Flood, and it alone will escape the destruction of all things on Doomsday. It is the center, or "navel" (שִׁבּוּר), of the earth, and Adam was fashioned out of its dust. It is the "choicest place in all the dry land" (רִמְעֵי דִיבְשָׁתָה), and in the final age streams of living waters will issue from it. The ark of the covenant is hidden upon it (Marqeh 77b), but will be revealed in the last days.

In order to validate its claims, Samaritans identify Gerizim with several places mentioned in the Torah—viz., (a) the "ancient hill" (הַר הַקְּדָם; RSV "hill country") of Gen. 10:30; (b) Bethel, the scene of Jacob's dream (Gen. 35:1); (c) the "house of divine beings" (i.e., angels; בֵּית אֱלֹהִים) and (d) the "gate of heaven" of Gen. 28:17; (e) Luz of Gen. 28:19—interpreted as Hebrew *lô zeh* (לוֹ לָה)—i.e., "to Him [i.e., God] it belongeth"; (f) the "sanctuary" (מִקְדָּשׁ) of Exod. 15:17; (g) the "chosen place" of Deut. 12:11; (h) the "everlasting hills" (גְּבֻעַת עוֹלָם) of Deut. 33:15; (i) "one of the mountains" and (j) YHWH-yir'eh, the scene of the intended sacrifice of Isaac, in Gen. 22 (Marqeh 71b-73a). It is said also to be the place where Abel built the first altar (cf. Gen. 4:4), where Noah sacrificed after the Flood (Gen. 8:20), and where the twelve stones were erected, in accordance with Deut. 27:4, after Israel had entered the Promised Land. In order further to authenticate their claims, the Samaritans read "Moreh" for "Moriah" in the story of the intended sacrifice of Isaac (Gen. 22:2), and identify it with a certain More, near Shechem. Similarly, they locate Abraham's encounter with Melchizedek king of Salem (Gen. 14:18), not at Jerusalem, but at Salim, also near Shechem.

e. The day of vengeance and reward. The day of vengeance and reward (יוֹם נִקְמָ וְשִׁלְטָם) derives its name from the Samar. text of Deut. 32:34-35 ("Is it not stored and sealed up in my treasuries, against the day of vengeance and reward?")—a reading supported by the LXX and by a fragment from Qumran. On that day God will inquire after the deeds of men. Scales will be set up, and angels will serve both as prosecutors and as defenders. God will cry out: "See now that it is I even I" (vs. 39 Samar.), and at that moment the earth will be split asunder, graves will open, and the dead will arise. Those that led worthy lives will be robed in clean garments and exude a fragrant aroma, whereas the wicked will be clad in tatters and emit a mephitic odor. After

judgment, the former will enter Eden, where Moses, Aaron, and the ancestral saints (זִכְאִים) will greet them, whereas the wicked will be consigned to the devouring fire, and find themselves in the company of Cain, Lamech, Korah, Amalek, and other notorious sinners (Marqeh 189b-191a).

The day of doom is designated by a wide variety of names. Thus, in a single paragraph (190a), Marqeh the fourth-century theologian styles it: the day of resurrection (יוֹם עֲמִידוּתָהּ); the day of reckoning (יוֹם חוֹשְׁבָנָה); the day of judgment (יוֹם דִּינָה); the day of assembly (יוֹם בְּנוּשָׁה); the day of retribution (יוֹם גְּנוּי); the day of inquisition (יוֹם שׂוֹאָה); the day when all feet shall quake (cf. Deut. 32:35); the day of the emergence from below the earth (יוֹם הַמַּפּוֹק מִכַּחַי) (אֲרַעְתָּהּ). In general, the description of it hews close to Deut. 32, and the latter is the ultimate (and oft-quoted) source of all doctrines concerning it.

f. The Taheb. Inextricably associated with the last day is the concept of the *Taheb* (תָּהֵב), or "Restorer," who is then to appear on earth to usher in the new dispensation. The *Taheb* is not a messiah in the Jewish sense of an anointed prince. Rather is he the prophet foretold in Deut. 18:18—the eschatological guide and monitor mentioned also in the Dead Sea Manual of Discipline (9.11), in the NT (Matt. 11:14; Mark 9:11 ff; Acts 7:37; etc.), and in the Pseudep. (Test. Levi 18), and identified by the Jews with Elijah (Men. 45a; B.M. 3a). Known also as the Star, in accordance with Num. 24:17 ("A star shall step forth out of Jacob"), the *Taheb* will restore the temple on Gerizim, reinstitute the sacrificial cult, and obtain the recognition of the heathen. He is destined to live 110 years. The date of his advent is disputed, but the Samaritans seem to have shared the Iranian and Jewish notion that the world will dissolve after six thousand years, and the *Taheb* is regarded as the herald of this event.

g. Ra'ūtah and Fanūtah. The Samaritans divide the history of their community into two major periods—viz., that of *Ra'ūtah* (רְאוּתָהּ), or "Favor," and that of *Fanūtah* (פְּנִיתָהּ), when God turned away (פָּנָה) from them. The former is said to have lasted for 299 years, of which 39 were passed in the wilderness, and the remainder when the temple stood on Gerizim unchallenged—i.e., before the apostasy of Eli.

The expression "era of favor" (קִיץ רִצוֹן) recurs in the Dead Sea Scrolls (1QH 15.15; fragment 9.8), as distinguished from the present "era of wickedness" (Zadokite Document 6.10, 14; 12.23; 14.19; 15.7, 10), and the penultimate "era of wrath" (Zadokite Document 1.5; 1QH 3.28; cf. B.B. 10a; Shab. 11a; cf. also Ecclus. 48:10).

h. The ancestral saints. No less important to the Samaritans than any of the foregoing is the concept of the ancestral saints (זִכְאִים), who, in a successive chain (שִׁלְשִׁלַּת), transmitted the divine "likeness" (צִלְמִ), first imparted to Adam (cf. Gen. 1:26-27). This likeness is interpreted metaphorically to mean something like prophetic inspiration or insight. It is identified with the "light of holiness" (אֹרֶן הַקְּדוּשָׁה)—i.e., the source of religious "illumination." Adam, it is said, passed it to Seth, Seth to Enosh, Enosh to Noah, and thence by successive stages it reached Abraham, Isaac and Jacob, Moses and Aaron, Eleazar and Phinehas, Joshua, Caleb, and the seventy elders, ceasing with the apostasy of Eli. The

Samaritans claim that, by virtue of it, the ancestral saints can intercede with God, and to this end pilgrimages are made to their reputed graves on Mount Gerizim.

2. Practices. The Samaritans are essentially a religious community, governed by a high priest.

The three seasonal festivals of Passover, Pentecost, and Booths are marked by pilgrimages to the summit of Gerizim, and on the eve of the first-named, the paschal lamb is slaughtered and consumed in accordance with biblical prescriptions. The name Passover (פסח), however, is reserved for this ceremony, the subsequent festival being known as that of Unleavened Bread (מצות). In agreement with the Sadducees and Karaites, the Samaritans observe Pentecost on the fiftieth day after the (first) sabbath in Passover-Maṣṣōth. It thus falls always on a Sunday, the word "sabbath" in the relevant law of Lev. 23:15 being taken literally, and not, as by the Jews, in the sense of "festival."

Sixty days before Passover and Booths occurs the so-called Day of Simmūth (צמית). The word means "conjunction," and originally bore an astronomical meaning. Today, however, it marks the dates of the semiannual payment of dues to the priests. Every Samaritan gives a half-shekel, and by way of receipt obtains a calendar for the ensuing six months, drawn up by the priests in accordance with the "correct computation" (חשבון קשטה) said to have been worked out by Phinehas from the meridian of Gerizim.

The Samaritans observe the sabbath rigidly; no one is permitted to stir from his house except to attend services at the *kinsā*, or synagogue. They allow no fire to burn on that day, interpreting the law of Exod. 16:23 to refer to the burning, rather than only to the igniting, of the flame. They also do not recognize the Jewish device of the ערוב, whereby the biblical law regarding the length of a sabbath-day's journey can be circumvented by the legal fiction of establishing an *ad hoc* residence on the perimeter of the city.

The holiest day of the year is the Day of Atonement, the fast of which is obligatory upon all. The high point of the service in the synagogue is the display of an ancient scroll of the Law, said to have been written by Abisha', the grandson of Aaron. (Actually, it would appear to date from the twelfth century.)

Phylacteries are not worn by the Samaritans; the law of Deut. 6:8 is interpreted metaphorically. Similarly, prayer shawls are worn only by priests officiating at divine services, and this appears to be a modern innovation.

D. AFFINITIES WITH ISLAM. It is difficult to say how much of Samaritan belief, as recorded in the more recent sources, represents a genuine heritage from remote antiquity, and how much is simply borrowed from Islam. The parallels between technical expressions used by Samaritan writers and those found in the Quran and in such Muslim classics as the *Mishkāt al-Anwār* of al-Ghazzālī are indeed arresting, but the presumption of Samaritan priority is strengthened when we find them also in the works of the fourth-century Samaritan theologian Marqeh. It must not be overlooked, however, that the history of the text of Marqeh is as yet virtually unexplored,

and that most Samaritan writings show a constant process of adaptation and editorial manipulation. Hence we cannot be sure that Marqeh has not, in fact, been subjected to Islamizing redaction.

With this reservation, it is worth while to point out some of the more striking parallels.

a) Standard Samaritan epithets of God reproduce to a nicety some of those prominent in Muslim theology. Thus *Qa'im* (קעים), "the Permanent," corresponds exactly to Arabic *al-Baqī*, said by Abu Hurairah to have been one of the divine names revealed by Mohammed. *Hab-bôrē* (הבוריא), "the Creator," is the *al-Bārī* of Quran 59.24. The statement that God has no *shâtēph*, or "associate," accords with the common Muslim assertion that he has no *sharik*, of the same meaning.

b) The idea that Moses is a distillation of the primordial light finds its counterpart in Muslim notions associated with Mohammed, and the founder of Islam is likewise known as the "seal of the prophets." Moreover, the doctrine that the primordial light was transmitted through a chain of saints recurs in the writings of the Ikhwār al-Safā.

c) Several of Marqeh's designations of the day of judgment reappear verbatim in the Quran. Thus, the *yōm hušbanā*, or "day of reckoning," is the *Yaumu 'l-hisāb* of Sura 40.28; the *yōm kinnūšā*, or "day of assembly," is the *yaum 'l-jum'* of Sura 64.9, or the later *yaum 'l-ḥaṣr*. The *yōm 'amidhūthā*, or "day of resurrection" (also called explicitly *yōm gī'āmā*) is the *yaumu 'l-giyāmah* of Sura 2.79; 83.5; and the *yōm dīnā*, or "day of judgment" (cf. Jewish *Yōm ha-Dīn*), is the *yaumu' d-dīn* of Sura 1.3; 83.17.

The scales (מזון) of judgment are likewise mentioned in Sura 21.47 (*mizān*).

d) The notion that special waters flow from Gerizim is paralleled not only in Jewish ideas about Zion, but also in Muslim folklore concerning the holy rock at Mecca.

e) The use of the term בסר, "good news, gospel," in reference to the mission of Moses and the advent of the *Taheb* accords with the Arabic *bushrā* of the publication of Islam (e.g., *Mishkāt* XXIV, ch. 1); though the Christian εὐαγγέλιον is, of course, an equally striking analogue.

f) The statement of older writers that the Samaritans had no belief in angels is refuted by countless references to them from Marqeh onward, and a special group of four angels is said to have watched over Moses in the bulrushes. But the constant designation of the celestial powers as "the hidden ones" (בסיאתה) recalls at once the Islamic *al-ghaib* (or *al-ghiyāb*) in the same sense; while the מלאכי ערשו mentioned in a prayer and the נושאי ערשו of an unpublished Samaritan book of proverbs are surely the eight angelic *ḥamalatu 'l-'arṣ*, "throne-bearers," of the Quran (Sura 40.7; 69.17).

g) Lastly, the ancestral "saints" (זכאים), of varying number, bear a marked resemblance to the six ancient 'ulū, or "possessors of constancy"—viz., Adam, Noah, Abraham, Moses, Jesus, and Mohammed—of Sura 46.34.

E. KARAITE AFFINITIES. There are several curious affinities between the Samaritan exegesis of the Torah and that of the Karaites, the antirabbinical Jewish sect which rose to prominence in the

eighth-ninth centuries of the Christian era. Thus, both interpret the law of levirate marriage (Deut. 25:5) to refer only to the betrothed but not to the fully espoused wife of a man's brother; both calculate Pentecost from the day after the (first) sabbath in Passover; both forbid the use of even the skin of carrion or of an animal not slain in accordance with Mosaic law; both insist that fires may not burn (let alone be kindled) on the sabbath. Both maintain, against the Jews, that by the law of Lev. 3:9 the fat tail of the sheep belongs to the priest alone; both render Exod. 20:26: "Thou shalt not go up towards mine altar in perfidy," rather than "by steps," taking the word במעלות as from מעל, "deal treacherously," rather than, as do the Jews, from עלה, "go up."

Now that it is becoming increasingly apparent, in the light of the Dead Sea Scrolls, that Karaite doctrines were to some extent a recrudescence of far earlier, nonnormative ideas, and did not always spring *ab ovo* in the eighth or ninth century, the possibility arises that the affinities between Samaritanism and Karaism may constitute links in the chain of an otherwise forgotten tradition—a view adumbrated by Geiger in the nineteenth century.

F. LANGUAGE AND LITERATURE. The traditional language of the Samaritans is a dialect of Western Aramaic (see ARAMAIC). It is written in the characters of the archaic Hebrew alphabet, resembling the script of the LACHISH ostraca and of Hasmonean coins (see MONEY). Since the Muslim conquest in 636, however, it has been replaced by Arabic, except for liturgical and learned purposes.

The earliest literature of the Samaritans has perished. It would appear that during the Hellenistic period they wrote, like the Jews, not only in their own tongue but also in Greek, for Eusebius and other writers preserve extracts from such compositions by the historiographers Artapanos and Eupolemos and from a metrical adaptation of Exodus by a certain Ezekiel. A Greek poem on Gerizim, obviously of Samaritan provenance, has also survived. In addition, there are sundry references to variant readings of the text of the Pentateuch contained in something styled τὸ Σαμαρειτικόν. This is thought to have been a Greek rendering parallel to that of the LXX, or an adaptation of the latter to the Samar. Hebrew text. Others, however, believe that it is simply the Samar. Hebrew text itself.

Extant Samaritan literature falls into two major divisions: pre-Islamic, written in the native dialect; and post-Islamic, written (except for liturgical pieces) mainly in Arabic. The principal works of the former all date (approximately) from the fourth century and are: (a) a Targum, or translation, of the Pentateuch; (b) the treatises of the theologian Marqeh (i.e., Mark), known as the *Discourse of Marqeh* (מִימַר מַרְקָה) or *The Book of Wonders* (סֵפֶר פִּלְיָאוֹת); (c) the earliest portion of the Liturgy, called *Defter* (i.e., δῖφτερον, "codex"), prominent elements of which are prayers by Marqeh himself and a series of hymns called the *Durrān*, or "String of Pearls," by one Amram Darah.

A striking feature of the Targum is its similarity to that of Onqelos (see TEXT, OT). This has been explained on the assumption that both ascend to a

common oral version, variously "edited." An alternative view is, however, that the Samar. version was subsequently "corrected" from that of Onqelos.

Marqeh's disquisition is a prolonged (and tedious) homily on the career of Moses and on his final Song (Deut. 32). Not improbably, it was designed as a series of sermons.

Of the later works, written in Arabic, that which claims primary consideration is the book of Joshua, a version of the biblical text with midrashic (legendary) additions and interpolated hymns. The work is said to have been based in part on a Hebrew—i.e., Samaritan—original. A Hebrew version of this work was produced in the nineteenth century, and was claimed by Moses Gaster to be of remote antiquity. It is, however, quite demonstrably of far more recent origin, though the possibility must not be overlooked that the underlying scriptural text indeed reflects a pre-Masoretic recension. Moreover, the insertion of hymns attributed to Joshua now stands in a new light in view of the discovery of such apocryphal compositions, likewise attributed to him, among the Dead Sea Scrolls.

Noteworthy also is the so-called *Al-Asāṭir* [i.e., Stories] of Moses, probably of the twelfth or thirteenth century, written in Samaritan. The material contained in this work is often genuinely ancient, recurring in the Pseudep. of the OT and other early sources; and it is therefore a valuable repository of time-honored traditional lore. A distinction must be drawn, however, between the antiquity of the material and the date of the composition itself, and accordingly the claim of Moses Gaster that the latter is of the third century B.C. is untenable.

Of later works—many of them the product of a literary revival in the fourteenth century—mention may be made especially of a series of poems on the nativity and career of Moses, designed principally for recitation on the anniversary of his birth (*Mūltā*) and on joyous occasions. The principal of these are by Ibrahim ibn Salamah, and Jacob the Rabban of Damascus; while the most elaborate and philosophical is the *Maulid an-Nashi'* ("Nativity of the Child"), composed in 1537 by Isma' il ar-Rumaihi.

An Arabic rendering of the Pentateuch, apparently drafted by a certain Abu-'l-Barakat in the twelfth century and later revised by Abu Sai'd, is also extant, and is remarkable for its similarity to the rendering of Saadya. Another, independent version is also known.

The principal expositions of Samaritan doctrine and practice are: the *Kāfi* ("Compendium"), commenced by Joseph of 'Askar (a village near Shechem) in 1041, and the *Ṭabaḥ* ("Potpourri") by Abu-'l-Ḥasan of Tyre, written in the eleventh century. There are also numerous compositions on special portions of the Torah and a number of more extensive theological works. A good idea of these may be obtained from E. Robertson's detailed catalogue of the Crawford MSS in the John Rylands Library, at Manchester, England. It must be added, however, that the great bulk of Samaritan literature remains unpublished.

Concerning the Samar. Pentateuch, see TEXT, OT; VERSIONS, ANCIENT.

SAMATUS. KJV form of SHEMAIAH 21.

SAMECH sā'mēk [ם, *s* (*Sāmēkh*)]. The fifteenth letter of the Hebrew ALPHABET as it is placed in the KJV at the head of the fifteenth section of the acrostic psalm, Ps. 119, where each verse of this section of the psalm begins with this letter.

SAMEIUS. KJV Apoc. form of SHEMAIAH 19.

SAMGAR-NEBO sā'm'gār nē'bō [סמגרי־נבו] (Jer. 39:3). The name, or more probably the title, of a Neo-Babylonian prince who participated in the siege of Jerusalem in 588-586 B.C. The text probably mentions three, rather than four princes, the first of whom is "Nergal-sharezer the Samgar" and the second, "Nebo-sarsechim the Rabsaris." Both formations, then, represent Hebrew corruptions of Babylonian names, perhaps "Nergalsharusur the Sinmagir" and "Nebushazban the Rabsaris," respectively. J. M. WARD

SAMI. KJV Apoc. form of SHOBAL.

SAMIS. KJV Apoc. form of SHIMEI 17.

SAMLAH sā'm'lah [שמלה] (Gen. 36:36-37; I Chr. 1:47-48). Fifth king in Edom "before any king reigned over the Israelites"; a native of Masrekah. Because of variant spellings in Hebrew and Greek, cf. SHALMAI.

SAMMUS. KJV Apoc. form of SHEMA 4.

SAMOS sā'mōs [Σάμος, heights, lofty place (*according to* Strabo *Geography* VIII.3.19; X.2.17)]. One of the Ionian islands, in the SE part of the Aegean Sea, only a mile from the promontory of TROGYLLIUM; it was SW of Ephesus and NW of Miletus. It measures *ca.* twenty-seven miles from E to W and *ca.* fifteen miles at its greatest width. Its chief city, also called Samos, was a free city in Paul's time. The

island was an important naval power in early times, especially in the sixth century B.C. under Polycrates. In 479 B.C. the Strait of Mycale, between Samos and Trogyllium, was the scene of the important defeat of the Persians by the Greeks. I Macc. 15:23 shows that Jews were settled there in the second century B.C. According to Acts 20:15, Paul's ship, on his final journey to Jerusalem, either "touched at" and anchored overnight at Samos (so RSV, though this is an unusual meaning for παρεβάλομεν) or "came near" to Samos and passed by it on the E or the W to anchor for the night at Trogyllium.

SAMOTHRACE sā'm'ə thrās [Σαμοθράκη, Thracian Samos(?)]. An island in the NE Aegean on the route of the apostle Paul's missionary travels.

1. Geography and history. The island, which lies off the coast of Thrace in the Grecian Archipelago, was probably settled by Samians in the eighth century B.C. They may have named it Thracian Samos (Homer *Iliad* XIII.12) because of a Thracian people they found there. Or it may have been settled by colonists from NW Anatolia or Lesbos. Lying on a sea lane which led from Greece to the Black Sea, it became a center of importance for travelers, colonists, and traders. Mount Phengari, the tallest of its four mountain summits, towers to a height of 5,250 feet, and served as a beacon for Aegean sailors. Poseidon was said to have watched the battle for Troy from its lofty peak.

Archaeological evidence indicates that the island was inhabited in the Neolithic Age. Greek colonists began to arrive *ca.* 700 B.C., gradually and peacefully assimilating a pre-Greek population of Thracian stock. Their town, which served as the center of the island city-state, developed into one of the major Greek cities, possessing lands on the Thracian coast opposite the island and thus controlling the sea lane between. The city was at its zenith of power in the sixth and fifth centuries B.C., declining somewhat thereafter with the loss of independence. Serving as a naval base in the Hellenistic period, it was known chiefly as the great religious center for N Greece. See § 2 below.

2. The Samothracian cult. The island held a special importance as an international religious center comparable to Olympia and Delphi as the home of a famous mystery cult which had secondary centers in many cities of Asia Minor and on the Boetian coast. Excavations, which began in the middle of the nineteenth century, following the discovery of the ship monument known as the Victory of Samothrace, commenced afresh after 1938 and unearthed the remains of the Sanctuary of the Great Gods, containing the ruins of twelve buildings from the time of Alexander and his successors. Renowned throughout the Greek world from the fifth century B.C. on, the cult of the Great Gods is referred to by Herodotus, Plato, and Aristophanes. To its public rites municipal ambassadors and pilgrims came from all over Greece and Asia Minor. Two of the pre-Greek divinities

called *Cabiri* became identified by the Greeks with their twin-gods the Dioscuri, and were revered as the protectors and guides of sailors. The private mysteries of the Great Mother involved the familiar enactment of a ritual drama representing a sacred marriage; they were unique in their inclusive acceptance of all without restriction who desired initiation. Many prominent personages, including Philip of Macedon and Hadrian, were initiated into the Samothracian mysteries. With the banning of the cult in the fourth century A.D., the island declined in historical importance.

3. Paul's voyages. The ancient city located beside a small harbor on the N coast was visited by the apostle Paul on his way to Neapolis (Acts 16:11), and presumably on his return to Troas, as Acts 20:6 implies. An early Christian church, whose ruins were discovered in 1938 at the edge of the harbor, may commemorate the landing.

Bibliography. Pauly-Wissowa, *Real-Enzyklopädie*, 2nd Series, vol. I (1920), cols. 2223-26; K. Lehmann, *Samothrace, A Guide to the Excavations and the Museum* (1955), with an excellent bibliography. E. W. SAUNDERS

SAMPSAMES sāmp'sə mēz [Σαμψάμης, Σαμψάκης; Vulg. *Lampsacus*] (I Macc. 15:23). One of the places to which the Roman consul Lucius addressed a letter in order to further the interests of the Jews. It was perhaps a seaport on the Black Sea, the modern Samsun. N. TURNER

SAMSON sām'sən [שמשון, solar or sun's man; Ugar. *špšyn*; Σαμψών (Heb. 11:32)]. Hero or "judge" of the tribe of Dan, famous for his superhuman strength associated with his uncut hair as a Nazirite and for his exploits against the Philistines (Judg. 13-16).

- Bibliography

1. Name. The Hebrew name Samson is clearly from the Hebrew root שמש, "sun," but it is uncertain whether with the *-ōn* ending the word is to be understood as diminutive, hence "sun's child," or, more likely, simply as "solar," "sunny," or perhaps "sun's man." The ending *-ōn* may have originally been from the *-yanu* ending, frequent in Ugaritic personal names, and the form *šmshn* occurs as a Syrian place name. Josephus' derivation of the word as from שמש, "robust," and hence "strong," and its explana-

tion as from שמש, "be devastated," are probably attempts to avoid connecting the name with the sun.

Thus Samson seems clearly to have been a Canaanite personal name. Whether or not Samson is to be regarded as originally the hero of a sun myth (see § 4 below), the connection of his name with the sun is indubitable. His birthplace was across the Valley of Sorek (see SOREK, VALLEY OF) a short distance from the city Beth-shemesh, "house of the sun," the site of a shrine of the sun-god.

2. Narrative. The biblical account of Samson is a cycle of stories based on Hebrew folklore, doubtless told and retold orally for generations. While there are some inconsistencies in the narrative, the stories are probably all part of the earliest stratum in the book of Judges, perhaps an extension of the J document of the Hexateuch. There is here no so-called E material and remarkably little Deuteronomic or later editing (only 13:1; 15:20; 16:31b; and possibly 13:13b-14).

The present collection of Samson stories may have been included in the book of Judges in the following order: (a) the stories of his exploits in connection with or immediately following his intended marriage (chs. 14-15, ending with the brief editorial conclusion of 15:20); (b) another cycle of stories, also drawn from the earliest source, but perhaps deliberately omitted by the previous editor because based upon his nonmarital amours and culminating in his tragic death (ch. 16, with the editorial conclusion of 15:20 repeated in vs. 31b); (c) the story of the annunciation and birth of Samson, to account for his superhuman feats and his being worthy of inclusion among the "judges" (ch. 13).

The antiquity of these stories, in which is Hebrew storytelling at its best, is indicated not only by their character as true folklore, but also by their inclusion of bits of Hebrew poetry such as riddles and taunts (14:14, 18; 15:16; and probably 14:3, 16; 16:6, 15, 17, 23-24).

The successive events of the story are as follows: a) Samson was born as the child of promise to a long-time barren woman who kept the vows of a Nazirite after an angel's appearance to her and her husband, MANOAH (ch. 13). The theme of the barren woman's at last giving birth to a promised son is common (cf. Sarah [Gen. 16:1; 18:1-15; 21:1-3]; Rebekah [Gen. 25:21-26]; Rachel [Gen. 30:1-2, 22-24]; Hannah [I Sam. 1]; Elizabeth [Luke 1:5-25, 57-80]). Unlike the similar appearance of Yahweh or his angel to Abraham (Gen. 18) or to Gideon (Judg. 6:11-24), it was not Manoah, but his wife, who played the chief human role in the event. The messenger spoke first to the woman, and it was by her logical reply that she calmed her husband's fears of death at having seen God. As the host, Manoah presented the sacrifice and asked about the divine name, but he received no answer (cf. Jacob [Gen. 32:29]). Yahweh, present in his angel in the miracle at the holy rock, disappeared in the ascending flame.

The whole experience was understood as promising divine power to the boy to be born. As he was to be a "Nazirite to God from birth," his mother was to prepare by carefully keeping the vows concerning food and drink: eat nothing unclean; have nothing to do with any product of the vine; drink no liquor

of any kind (cf. Amos 2:11-12). As for the son himself, from birth to death no razor dare touch his head (cf. the vow concerning Samuel [I Sam. 1:11], who is stated to be a Nazirite in a Dead Sea Scroll MS; for comparison of these lifelong vows, hair sacrifice, etc., in the later law, Num. 6, *see* NAZIRITE). In the subsequent story of Samson only the vow concerning uncut hair was observed, for wine flowed freely at the marriage feast, and the honey from the lion's carcass was hardly clean food, as the greatest source of uncleanness was any contact with a dead body. That, as expected, the son of promise had divine endowment was seen when, while he was yet at home, "the Spirit of the LORD began to stir him" (from *רָעַע*, "be or feel disturbed," especially by dreams; Judg. 13:25; cf. Gen. 41:8; Ps. 77:4—H 77:5; Dan. 2:1, 3). What this inner disturbance meant is told only in the subsequent episodes.

b) Samson's first adventures occurred in connection with his intended marriage with the Philistine woman at Timnah: after she had coaxed out of him the secret of his lion-and-honey riddle and he had paid his debt with the clothes of thirty Philistine victims, Samson discovered that she had been given to his best man and took prompt revenge by igniting Philistine crops with 150 live-fox-tail torches and by slaughtering many more Philistines (14:1-15:8).

Samson's would-be marriage was opposed by his parents as an undesirable union with "uncircumcised" pagans (cf. Esau [Gen. 26:34-35; 27:46]), but excused by the writer as Yahweh's scheme to discomfit the enemy (Judg. 14:3-4). It is obvious that, despite some confusion in the narrative, neither parent would have anything to do with the proposed marriage. Contrary to custom, then, Samson had to go after his own wife, procure Philistine instead of Israelite friends of the bridegroom (cf. Song of S. 3:7), and hold the feast in the bride's, rather than the groom's, home. Some think he intended the unique type of marriage in which the husband occasionally visited the wife in her father's household (*sadiqâ*; cf. Gen. 2:24; *see* MARRIAGE § 1f), but more likely he planned to bring his bride home after the week's ceremonies were over. He had not intended to leave in a rage (Judg. 14:19).

The RIDDLE is an age-old form of mind-stretching and merrymaking suitable for the long hours of the festivities (cf. Ps. 19:1-4a—H 19:2-5a, based upon a riddle; 49:4—H 49:5; Prov. 1:6; Ezek. 17:2). Samson's riddle (Judg. 14:14) may have been an ancient one rephrased. If gastronomical, the expected answer: "Vomit," would have brought loud guffaws from the male drinking party. If astronomical, the answer: "The Lion sky constellation bringing the harvest," would have closely fitted the experience which had brought the riddle to Samson's mind. The reply given by the Philistines (vs. 18a) may have been another riddle whose answer only enraged Samson the more, for love, "sweeter than honey, stronger than a lion," had weakened him before his sweetheart's tears—and it was to bring his final destruction!

That the story tells of no reprisals against Samson for killing thirty men of Ashkelon in order to get the costly linen wrappers and the dress clothes to pay his wager may have been due to the distance of twenty-three miles. It is more likely typical of the

folklore nature of the tales. The hero, only temporarily outwitted, strode across the miles and single-handedly himself outwitted the enemy.

According to Canaanite law based upon earlier Sumerian and Babylonian legislation, the father had a right to give his daughter to someone else in order to save face when the bridegroom left the wedding festivities, but she should not have been given to the best man, for the latter's responsibility was to look after the groom's interests. Therefore, Samson's revenge was "blameless," with the law on his side, and the Philistines dealt with the bride and her father as with an adulterer (15:6b). Foxes with blazing torches attached to their tails were ceremonially hunted in the Roman circus centuries later, according to Ovid—a custom which had begun when grainfields had been set afire by such a fox firebrand escaped from a farmer's boy. Samson's feat of catching three hundred such animals is another superhuman tale. This time Philistine anger forced him to find refuge in a cave.

c) Samson's next two exploits provide two etiological legends for place names: Ramath-lehi, the "Hill of the Jawbone," possibly originally so called because of its peculiar formation; and En-hakkore, the "Spring of Him Who Called," really "Partridge-Spring," named for a bird distinguished by its clear call-note (15:9-20).

Testimonial to fellow Judeans' fear both of Samson's mysterious power and of their Philistine overlords is the story that three thousand of them came and, humorously to Samson, bound him with new ropes to hand him over to the enemy. There is a bloody play on words in Samson's song of victory over his thousand Philistine victims—literally: "With the jawbone of a red ass I have reddened them bright red" (vs. 16). Afterward by a miracle God provided water for his thirsty hero (vss. 18-19; cf. Exod. 17:1-7).

d) The sheer strength of a superhuman giant is the point of the story of Samson's interrupting his night with a harlot at Gaza, the southernmost strong city of the Philistine pentapolis, pulling up the heavy city gates under the noses of sleeping guards, and striding off nearly forty miles to deposit them on a hilltop near Hebron (16:1-3).

e) The foolish weakness of the physical giant is the theme of the story of how, enslaved by passion in another illicit love, he toyed with his sacred vow and, sleeping on Delilah's lap, lost successively his hair, his power, his eyes, and his freedom (16:4-22). So valuable would Samson's capture be that the Philistine overlords offered Delilah a then enormous price, perhaps nearly four thousand dollars. Although she was deceived in turn by seven snapped bowstrings, broken new ropes, and an uprooted loom hanging to the seven locks of Samson's uncut hair, the woman readily recognized that her nagging had at last succeeded when he lay bare the essence of his being, "told her all his mind" (vss. 17-18). The Philistines inflicted customary revenge in gouging out his eyes (cf. the Ammonite threat [I Sam. 11:2] and Zedekiah's fate [II Kings 25:7]) and setting him to the hard labor of an ox or an ass, ironically for him, at previously gateless Gaza.

f) Samson's career ended in a final act of desper-

ate heroism: his strength returning with his growing hair, brought into the temple of DAGON to provide amusement for the festival, uttering a prayer for vengeance for just one of his eyes, with a last surge of strength he pulled the supporting temple pillars and death down upon his head, but in this one deed accomplished more deliverance from the Philistines than in his whole life before (16:23-30). Thus he was rewarded with rest in the family tomb (vs. 31a).

3. Historical importance. The locale of the Samson stories was the border between the tribes of Dan and Judah, perhaps in the period after the migration of most of the Danites to their N home (Judg. 1:34; 18), only the remnants remaining in the S territory (see DAN). This was also the border between these Israelite tribes and the great Philistine plain to the SW. Samson's home at Zorah was some fourteen miles W of Jerusalem at the E end of the Valley of Sorek. The Philistine city of Timnah lay only four miles farther on. Probably because of their superior material civilization, including the use of iron, the Philistines in this border territory were increasing their control and expansion activities. But the conflicts with the Israelites in this period, perhaps the second half of the twelfth century, were only local disputes. As shown by the Samson stories, there were free communication and trade and even intermarriage between Israelites and Philistines.

Therefore, unlike Othniel or Gideon or Jephthah at the head of an Israelite army, Samson is never described as "deliverer" from the enemy. He was only to "begin to deliver Israel from the hand of the Philistines" (13:5) by feats of purely personal revenge. His anti-Philistine exploits strikingly resembled those of two other heroes with somewhat similar names, SHAMGAR (3:31) and SHAMMAH (II Sam. 23:11-12).

Thus the historical significance of the Samson stories lies not in his defeat of Philistines, for this became necessary only in the later era of Samuel and Saul (I Sam. 4-6; 13). It lies rather in its frank and colorful picture of life on the Philistine border in the period of the judges—wedding festivities and procedure and relationships with women, village heroism in feats of muscular strength and witty repartee, alternate free communication and sporadic clashes between Israelites and Philistines. Here is extraordinarily instructive sociological material, of more value to the historian, it has been suggested, than a list of conquered cities on such a significant monument as the Moabite Stone.

4. The story as myth and folklore. Samson's name, his home opposite the shrine to the sun-god at Beth-shemesh, and his adventures have given rise, beginning even with early Christian interpreters, to comparison with sun heroes of Greek, Phoenician, or Babylonian mythology—Hercules, Melkart, or Gilgamesh. His slaying of the lion, in method more marvelous than the similar deeds of David (I Sam. 17:34-36) or Benaiah (II Sam. 23:20), resembled that of such mythological persons. Striking parallels of features of Samson's career with the various roles of the sun have been enumerated: benevolently, his hair was the sun's rays giving daily agricultural life, but cut off by sleep-producing night (the name DELILAH, דלילה, may be a pun on Hebrew לילה, "night"); malevolently, the fox-tail firebrands were the sun-

withering blight on agricultural crops; Samson's solitary life, blinding, imprisonment, and hair regrowth were the sun's solo role in its annual waning and return in the season cycle, comparable to the death and resurrection of the god of vegetation (cf. the sun as bridegroom in Ps. 19:4b-6—H 19:5b-7). Some have interpreted Samson's adventures as numbering twelve, comparable to the twelve labors of mythical Hercules. Others have compared his career, from his slaying of the lion, his having seven locks of hair, and his fate at the hands of a woman, to that of Gilgamesh.

Such mythological parallels possibly indicate that certain of Samson's adventures originated from the heroes of mythology. His total career, however, is so earthy that he may better be interpreted as a folklore hero like a Paul Bunyan or a Peer Gynt. Samson is the rustic hero of frontier days. Although never described as a giant in stature, he was possessed of enormous muscular strength and given to selfish passion and feats of vengeance to restore injured honor. He was humorous trickster par excellence and conqueror of women, wild beasts, and warriors sent to capture him. The deeds of a historical Samson were probably enlarged to giant proportions by centuries of village storytelling.

5. Religious significance. Fortunately this primarily folklore hero was on the right side of the ethnological fence. Unlike Goliath, he was Israelite, not Philistine. His moral virtues and vices were those of the rough day in which he lived. But what gives the Samson cycle of stories religious significance is the fact that the story is tragedy. His selfish and uncontrolled passion, forgetful of sacred vows, brought him to disaster, even though in grim heroic climax. Thus he was a negative religious hero—an example of what God's charismatic individual should not be.

It is possible that in an earlier form of the story Samson's power lay only in the magic of seven unshorn locks of hair (cf. similarly Gilgamesh), and that the biblical account, by its addition of the Nazirite vow, partially transforms a folklore hero into a religious savior. In any case, the clear emphasis of the Samson stories as they stand is the working of Yahweh's spirit in his chosen hero, evident in his childhood (Judg. 13:24), exhibited in mighty feats of strength (14:6, 19; 15:14), withdrawn when in pursuit of his own passions he forgot his vow (16:20), but surging back again in response to prayer (16:28).

It was the interpretation of Samson's uniqueness in being devoted to God before birth and possessor of God's indwelling Spirit which inspired a gospel writer to write in language similar to that about Samson in the announcement of John the Baptist's birth (cf. Judg. 13:4-5 with Luke 1:15) and in the report of the growth of the child Jesus (cf. Judg. 13:24 with Luke 2:40). Thus Samson became one of the heroes of faith in the Letter to the Hebrews (11:32). His story has similarly inspired paintings by Rembrandt and Rubens, an oratorio by Handel, Saint-Saëns' opera *Samson and Delilah*, and Milton's *Samson Agonistes*.

SAMUEL sām'yōō əl [שמואל, name of God, or his name is God]. A prophet of the eleventh century B.C., who anointed first Saul and later David as king over Israel. The first book of Samuel in the OT canon reports his life and deeds.

A reconstruction of the historical data of the life of Samuel encounters great difficulties, for there are irreconcilable differences within the biblical tradition concerning Samuel. The sources of the books of Samuel (see SAMUEL, I-II, § C2) themselves introduce marked contrasts into the portrayal of Samuel. Therefore, a survey of the different biblical traditions is necessary prior to any attempt to discover the historical nucleus within the sources.

1. Biblical traditions
 - a. E's portrait of Samuel
 - b. J's portrait of Samuel

2. Other traditions concerning Samuel
3. Historical reconstruction
 - a. Samuel's office
 - b. Samuel's role in the establishment of the monarchy

Bibliography

1. **Biblical traditions.** Among the sources of the books of Samuel, the E source shows the greatest interest in Samuel; the J source is concerned with Saul rather than with Samuel; and the L source contributes only a shred of information to the enigma of Samuel.

a. *E's portrait of Samuel.* Elkanah, Samuel's father, was an Ephraimite from the town of Ramah in the territory of Zuph (I Sam. 1:1). At a family pilgrimage to the sanctuary of Shiloh, Hannah, Elkanah's wife, who was barren, besought the Lord in ardent prayer for a son, and she vowed to dedicate the child to the Lord if her petition were granted. When Samuel, this child of prayer, was born and weaned, Hannah entrusted him into the care of Eli, the priest of the sanctuary of Shiloh (1:19-28). Later, the Lord revealed to the boy Samuel the coming end of the house of Eli, and from that time Samuel was established as a prophet (3:3-21).

Samuel was the last "judge" of Israel, and he went out from his home town, Ramah, "on a circuit year by year to Bethel, Gilgal, and Mizpah; and he judged Israel in all these places" (7:16). Once, he called the people of Israel to Mizpah and bade them repent of their idolatry (7:3-6). There the Philistines attacked the unprepared gathering of the Israelites, but the entreaties of Samuel and the people's repentance moved the Lord to deliver Israel by a miracle (vss. 7-10). The Philistines were so completely defeated that they did not rise against Israel again in the days of Samuel (vss. 11-13).

As Samuel became old, he set his two sons in his stead as judges over Israel, but they turned out to be corrupt (8:1-3). Under these circumstances, the elders of Israel asked Samuel to appoint a king over the people. This request was an apostasy in the eyes of the Lord, but nevertheless he ordered Samuel to fulfill the wish of the people (ch. 8). Thus in a public festival at Mizpah, Samuel chose by lot the king over Israel, Saul (10:17-21*abα*). In a stern address Samuel warned King Saul and his people to remain faithful to the Lord (ch. 12).

In the next scene (ch. 15), the Lord, through his prophet Samuel, ordered Saul to engage in an expedition against the Amalekites and to consecrate for destruction all the captives and spoil. In spite of this divine command, after the successful campaign Saul spared the life of the king of the Amalekites. Also the best of the sheep and the oxen were spared from destruction by Saul's warriors for a sacrificial meal. When Samuel learned of the violation of the ancient custom, he himself slew the captive king and rejected Saul from kingship over Israel.

On a later date, Samuel secretly anointed David to be king of Israel (16:1-13). David, after his duel with Goliath, joined the royal court, but as his fame grew, he had to flee from the royal court because of Saul's jealousy and outbursts of rage. David escaped with the help of Samuel, who was the head of a prophetic guild (19:18-24).

Samuel's influence upon the life of Israel did not cease even with his death (25:1), for before the disastrous battle with the Philistines, Saul, beset by forebodings, consulted the ghost of Samuel with the help of a medium. The ghost conjured foretold the defeat of the Israelites and the deaths of Saul and his sons (28:3-19).

b. *J's portrait of Samuel.* The J source of the books of Samuel is interested in the life of Samuel insofar as it is involved with the career of Saul. Here Samuel is represented as a seer of Ramah to whom Saul turned for advice in his search for the lost asses of his father. Samuel invited Saul to participate as a guest of honor in a sacrificial meal (I Sam. 9). The next morning Samuel secretly anointed Saul to be king over Israel and sent him upon his way, with the admonition to wait at Gilgal seven days for the prophet's coming (10:1-16). After starting an uprising against the Philistines, Saul waited seven days for Samuel. But when Samuel did not arrive at the end of the appointed time and the people following Saul began to scatter, the king offered sacrifices in order to entreat the favor of the Lord before the impending combat with the Philistines. As soon as King Saul finished offering the sacrifice, Samuel arrived and, in the Lord's name, rejected Saul from kingship over Israel because of his disobedience (13:8-15*a*).

c. *L's contribution.* In the framework of this source Samuel makes his entry only within the short passage of I Sam. 10:21*bβ*-27. It was Samuel's role to conduct the rites of the election of the king. He introduced Saul as the man who "was taller than any of the people from his shoulders upwards" and subsequently promulgated the laws of kingship and deposited them before the Lord.

d. *Other traditions concerning Samuel.* Samuel was remembered as a great intercessor, second only to

Moses (Jer. 15:1; cf. Ps. 99:6). The Chronicler's genealogical table lists Samuel as one of the "sons of Levi" (I Chr. 6:28). He and David are credited with the establishment of the office of gatekeepers who guarded the tent of meeting (9:22). The rabbinical tradition which ascribes the partial authorship of the books of Samuel to the prophet Samuel (B.B. 15a) also finds its roots in the Chronicles (I Chr. 29:29).

2. Historical reconstruction. Samuel's personality made a lasting impression upon his contemporaries. His office, his personality, and his role in the introduction of monarchy are shrouded by the presence of legendary elements and discrepancies within the tradition complexes. Therefore, any attempt at separating the historical data must consider the legendary character of the sources and will run the risk of rejecting historically sound data or admitting material of dubious historicity.

a. Samuel's office. Samuel belonged to a rich and important family of the town of Ramah, as the genealogy of his father, Elkanah, spanning over four generations, indicates (I Sam. 1:1). He was an Ephraimite, though the Chronicler lists him as one of the "sons of Levi" (I Chr. 6:28).

He was remembered as a "man of God," a "seer," a "prophet," and the last "judge" of Israel. He was, no doubt, more than a "seer" if the word "seer" meant a mere village clairvoyant who for a small fee gave information concerning the whereabouts of lost objects or animals (I Sam. 9:6-9). On the other hand, Samuel's office of "judge," conceived as an authority over the whole of Israel (8:4-5), must not be maintained either. Apparently he had authority in religious matters, as his connections with the cult, local and national, amply document. At the high place of Ramah, the people would not commence with the sacrificial meal before Samuel blessed it (9:13); he could invite guests, give orders, and determine the seating order of the worshipers at the sacrificial gathering (vss. 22-24). He had the oil for the anointment, or he could consecrate it so that it received some kind of potent sacramental character (10:1). He could also proclaim the consecration of spoils and captives for destruction (15:3) and deny the right of offering from the king (10:8; 13:13). All these cultic privileges and his role in the rites preparing the election of the king designate him as the leading religious personality of Israel in his own time.

Apparently Samuel had some connections with the prophetic guilds of Israel (10:5-6; 19:18-24). Whether or not he was a member or leader of the prophetic movement cannot be decided, but undoubtedly this man of God was one of the precursors of the great prophets of the eighth century B.C.

b. Samuel's role in the establishment of the monarchy. Samuel's role in the anointment of King Saul cannot be exactly defined, but it is exceedingly clear, in the light of the threefold witness of the sources (E: 10:17-21ab α ; J: 10:1-16; L: 10:21b β -27), that his role was decisive in the introduction of monarchy into Israel.

A great difficulty arises from the fact that in the E source both the Lord and Samuel are opposed to earthly kingship, but in the J source their attitude is friendly. An attempt at historical reconstruction

might consider that Samuel could have opposed the introduction of kingship in the beginning. Later, however, under the influence of the growing menace of the Philistine power, he could have changed his position and taken an active part in the introduction of the monarchy. Samuel probably conceived kingship as an earthly vicegerency of the Lord's kingship over Israel (see THEOCRACY). Therefore, Samuel required from the king absolute obedience to the word of the Lord, as both rejection narratives reveal (I Sam. 13; 15). It is within the realm of probable historicity also that after he withdrew his support from Saul, Samuel searched for another theocratic vicegerent and found him in the person of the famed military leader David.

S. SZIKSZAI

***SAMUEL, I AND II.** The ninth and tenth books of the English Bible and the third and fourth books of the Former Prophets in the Hebrew Bible. They report the events of the period from the birth of Samuel, through the introduction of monarchy by Saul, and David's reign unto his old age.

A. Title

B. Contents

1. Samuel (I Sam. 1-7)
2. Samuel and Saul (I Sam. 8-15)
3. Saul and David (I Sam. 16-II Sam. 1)
4. David becomes king of Judah and Israel (II Sam. 2-8)
5. The events of the Davidic court (II Sam. 9-20)
6. Appendixes (II Sam. 21-24)

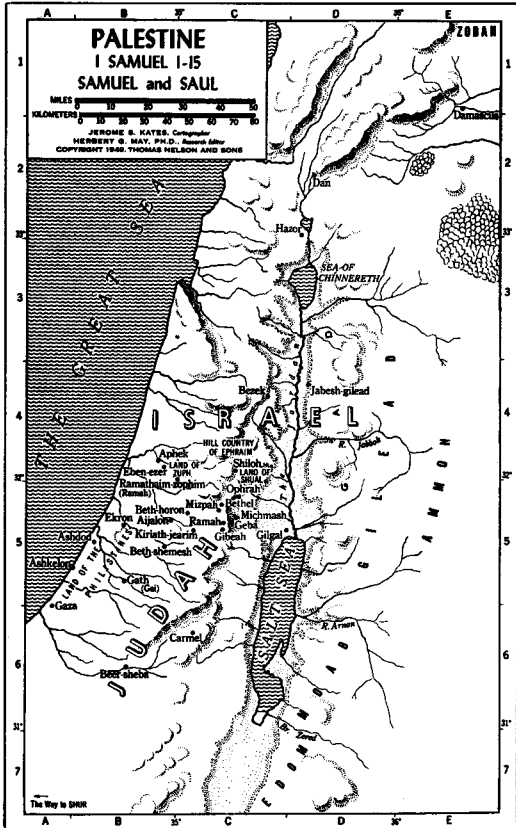

C. Composition

1. Attempts to solve the problem
 - a. Two-source theory
 - b. Three-source theory
 - c. Saga-cycle theory
2. Demonstration of the three-source theory
3. Source analysis of the books
4. Evaluation of the sources
 - a. Characteristics of the sources
 - b. Dating of the sources
 - c. Historicity of the sources

5. The history of composition

D. Text
Bibliography

A. **TITLE.** The names of the books in the Hebrew canon are I and II Samuel. These two books were originally one, and the LXX first introduced the division, naming them the books of the "kingdoms," βασιλειῶν α' and β'. The LXX has four books of "Kingdoms," the books of Samuel together with the

two books of "Kings." Jerome preferred the designation *Regum* ("Kings"), in accord with the Hebrew מלכים, to *Regnorum* ("Kingdoms"), which name was customary then. The division into two books (in harmony with the LXX) appeared in the Hebrew Bible for the first time in a MS, A.D. 1448. The Bible of Felix Pratensis (1517-18) perpetuated this division in the printed editions.

The ascription of the books to Samuel as author is a Talmudic tradition (B.B. 14b), which also states that the events after the death of Samuel were related by the seer Gad and the prophet Nathan (B.B. 15a). This tradition is evidently based upon I Chr. 29:29.

B. **CONTENTS.** The two books can be divided into six parts:

1. **Samuel (I Sam. 1-7).** The birth of Samuel and his dedication to the service of the Lord at the ark sanctuary of Shiloh are the first events related (ch. 1). The child Samuel and an unknown man of God announced the downfall of the priestly family of Eli, the priest of Shiloh (chs. 2-3). The ark was captured by the Philistines in the battle at Aphek. Two sons

of Eli fell in this battle, and the news of the disaster killed Eli (ch. 4). But the captive ark brought calamity to the Philistines, who returned it to the land of Israel, where, at last, it found a home in Kiriath-jearim (chs. 5-6). In the seventh chapter Samuel, already the judge of Israel, called the people to a national repentance of sins. The Philistines' attack upon the people was deterred by a miraculous deliverance wrought by the Lord.

2. **Samuel and Saul (I Sam. 8-15).** The people of Israel desired to be like all the nations and have a king, in place of the judge Samuel. Though the Lord regarded the people's wish as an apostasy, he gave his consent to the designation of a king (ch. 8). Saul, a Benjamite, in search of the lost asses of his father, came to Ramah, where Samuel secretly anointed him to be king over Israel, in accord with a divine command (chs. 9-10). In another scene Saul was publicly chosen to be king (10:17-27). In the next episode Saul, who did not seem to reign like a king, delivered Jabesh-gilead from the siege of the Ammonites. After this successful campaign, the army went to Gilgal to "renew the kingdom" (ch. 11). There, Samuel abdicated his office of judge and charged the people and King Saul to be faithful to the Lord (ch. 12).

Saul's military campaigns against the Philistines occupy chs. 13-14. In preparation for a battle, Saul offered a sacrifice. Because of this act, Samuel reprimanded Saul and rejected him from the kingship (ch. 13). Jonathan, Saul's son, prepared a great victory over the Philistines with a heroic feat, but unwittingly broke the fast which Saul had vowed for the army. Jonathan faced death for his breach of the vow, but the people ransomed his life (ch. 14). A summary account of Saul's military engagements and family closes this section. In a war against the Amalekites, Samuel had proclaimed a *hérem* or consecration for the destruction of all spoils and captives. Saul disobeyed the ban, and therefore Samuel again rejected him from the kingship (I Sam. 15).

3. **Saul and David (I Sam. 16-II Sam. 1).** Samuel had secretly anointed David to be the future king of Israel, and afterward David came to the court of Saul as a lyre player (ch. 16). David killed Goliath in a duel, whereupon the victorious youth was introduced anew to Saul (ch. 17). David won the friendship of Jonathan and the admiration of the people but awakened Saul's jealousy, and he attempted to kill David in a jealous rage. Later, Saul gave his younger daughter, Michal, to David in marriage (ch. 18). Jonathan succeeded in mollifying Saul's rage against David; in another scene Michal helped David escape from Saul. David found refuge within a prophetic group led by Samuel (ch. 19). Jonathan secretly met David and assured him of his unbroken friendship (ch. 20). Ahimelech, the priest of Nob, helped David in his flight, and for this reason Saul massacred the whole priestly colony of Nob. Abiathar, one of the priests of Nob, fled to David, who had, after a short stay with the Philistine Achish, gathered an army of freebooters and lodged with them in the mountains of Judah (chs. 21-22). Saul continued to pursue David in the wilderness of Ziph and Engedi. Once David spared the life of Saul, who

had been in his power (chs. 23-24). David married Abigail, the widow of a rich Calebite (ch. 25), and he spared Saul's life again at Ziph (ch. 26). Later, he entered with his private army into the service of the Philistines, who entrusted to him the military outpost of Ziklag (ch. 27).

See map "Palestine: I Samuel 16-31, Saul and David," under SAUL.

The Philistine army encamped at Gilboa against the Israelites; Saul, in his despair, turned for advice to the ghost of Samuel, who foretold the defeat of the Israelites (ch. 28). David appeared at the Philistine mustering, but the distrust of his overlords, who sent him back to Ziklag, saved him from participation in the defeat of his own people (ch. 29). In the meantime, Ziklag was raided by the Amalekites. David found Ziklag burned and empty, but he pursued and overtook the Amalekites and rescued the captive women and children (ch. 30). In the Battle of Gilboa, the Philistines defeated Israel. Saul's three sons were slain, and Saul himself fell upon his sword (ch. 31). An Amalekite brought the news to David and reported that he had killed Saul on Mount Gilboa. David slew the Amalekite and sang a dirge over Saul and Jonathan (II Sam. 1).

4. David becomes king of Judah and Israel (II Sam. 2-8). After the death of Saul, the elders of Judah anointed David king in Hebron. In the N, Saul's son Ish-bosheth became king (ch. 2). Ish-bosheth's army commander promised to support David's claim for the suzerainty over the N, but Abner, the commander, was killed by Joab, the commander of David's army, in a private blood revenge (ch. 3). Soon Ish-bosheth was killed by two of his captains; the assassins expected reward from David but were executed by him (ch. 4). Being without a competitor, David also became the king of Israel. After the capture of the Jebusite city of Jerusalem, David established his own capital there (ch. 5). The ark was also brought to Jerusalem (ch. 6), but David's plan to build a temple for the ark was rejected by the Lord in the prophecy of Nathan, in which the Lord promised to establish the reign of the Davidic dynasty forever (ch. 7). In the eighth chapter a short summary of David's wars and a list of his chief officials are found.

See map "Palestine: II Samuel, The Kingdom of David," under DAVID.

5. The events of the Davidic court (II Sam. 9-20). David reinstated Mephibosheth, the son of Jonathan, into the estate of Saul and invited him into his court (ch. 9). The king of Ammon's humiliation of David's envoy led to repeated long wars with the Ammonites and their allies, the Syrians (ch. 10). During one of these wars David plotted the death of Uriah, one of his officers, with whose wife, Bathsheba, he had committed adultery. After her husband's death, Bathsheba became David's wife (ch. 11). When Nathan the prophet denounced David for the murder of Uriah, David repented, but the fruit of the illicit love died. Solomon was David and Bathsheba's second son (ch. 12). Amnon, the first-born son of David, raped his half sister, Tamar, whereupon her full brother, Absalom, killed Amnon in revenge. After this fratricide, Absalom fled to

Talmai, his maternal grandfather (ch. 13). As a result of Joab's reconciling attempts between David and his son, after three years Absalom was allowed to return to Jerusalem, and after two more years David readmitted him to the court (ch. 14). Absalom successfully conspired against his father and finally started an open rebellion, which forced David and his army to flee from Jerusalem (ch. 15). The fleeing king kept his peace, even when he was humiliated by the curses of Shimei, a Benjaminite. Absalom listened to the wrong advice, deliberately given by Hushai, a friend of David, and delayed his attack on David. This tactical blunder enabled David and his army to retreat to Transjordan territory to rest and to rally new troops (chs. 16-17). In the ensuing battle the rebels were defeated, and Absalom was killed (ch. 18). The king mourned his son and pardoned Shimei, who prostrated himself before the victorious king (ch. 19). Later, Sheba, a Benjaminite, rallied the N tribes in a revolt against David, but the army of Joab successfully stifled this rebellion (ch. 20).

6. Appendixes (II Sam. 21-24). David, at one time during his reign, allowed seven of Saul's descendants to be put to death by the Gibeonites, who demanded their lives for obliteration of Saul's blood guilt. The seven Saulides were hanged. David, moved by the grief of Rizpah, who lost her two sons in this blood revenge, gathered the remains of the whole family of Saul and buried them in the tomb of Kish, Saul's father (ch. 21). Ch. 22 is a psalm attributed to David and identical with Ps. 18. Another poetical work, the "last words" of David, appears, together with a short summary of the feats of David's heroes, in ch. 23. The final chapter reports an episode from the life of David—that of the census of Israel. This census displeased the Lord, so that he sent pestilence upon the land. In order to avert the plague, David built an altar for the Lord on the threshing floor of Araunah as an expiation (ch. 24).

C. COMPOSITION. The books of Samuel are not the work of one writer, but they appear to be composed of different sources, as the parallel stories, incongruities, and discrepancies within the books indicate. Thus Saul is anointed to be king over Israel by Samuel secretly (I Sam. 10:1) and on two different occasions elevated to the same office in public ceremony (10:21; 11:15). Twice Samuel rejects Saul from kingship (13:14; 15:23). Twice David is introduced to Saul (16:21; 17:58). Twice David escapes from the court of Saul (19:12; 20:42); Saul knows of David's flight in the first case (19:17), yet he questions his absence from the court on a later date (20:27). The slaying of Goliath is attributed both to David (I Sam. 17) and to one of his heroes, Elhanan of Bethlehem (II Sam. 21:19). These and many more similar instances establish beyond a doubt the composite character of the books.

Sharp differences can also be perceived in the religious outlook of several portions. Within I Sam. 7-12 there is an easily discernible shifting in the views concerning the evaluation of the institution of the monarchy. Kingship is alternately regarded as an institution favored by God, and condemned as an apostasy.

1. **Attempts to solve the problem.** The composite character of the books of Samuel presents a challenge to the scholarly world which advances three different theories in answer to the problem of the composition of the books of Samuel. All three theories recognize that the final composition of the books was the work of the Deuteronomistic editors (*see* DEUTERONOMY), who, in order to document the Lord's reign and work in Israel's history, compiled and edited some extant literary material between 621 and 586 B.C. The difference between the three theories is in their separation and identification of the literary works utilized as sources by the Deuteronomistic editors. Accordingly, one might distinguish between (a) the two-source theory, (b) the three-source theory, and (c) the saga-cycle theory.

a. **Two-source theory.** At the end of the nineteenth century some scholars suggested that two sources, J and E, were component parts of the books. Some of these scholars maintained that the J and E sources represent the actual continuation of the Pentateuchal sources marked with the same sigla. There were other scholars who accepted the two-source theory, but had some doubts concerning the connection of the sources of the books of Samuel with the sources of the Pentateuch. Others, in a mediating position, questioned the identity of these two sources and the Pentateuchal ones, but attributed the two sources to circles which stood near the Pentateuchal authors, J and E.

b. **Three-source theory.** A thoroughgoing analysis of the narratives of I Sam. 7-12, which report the institution of the monarchy, led several scholars to the recognition that, at least in the chapters in question, there are three easily separable sources. Two of these sources are favorably disposed toward the monarchy, and the third has a definitely antimonarchic attitude. These three sources are designated as "L," "J," and "E." Their identity with the Pentateuchal sources L, J, and E is not always asserted; however, the affinity with the sources of the Pentateuch is presupposed, as the use of the identical sigla indicates.

c. **Saga-cycle theory.** As a reaction to the sometimes exacting source-critical approach, several tradition-historical attempts were made to solve the problems of the books of Samuel. The tradition-historical school endeavors to trace individual traditions to their oral form and conception. The representatives of this school emphasize the decisive importance of narrative complexes centered around a single theme. They assume the independent existence of such saga cycles as the ark narratives (I Sam. 4-6; II Sam. 6) and the history of David's court (II Sam. 9-20; I Kings 1-2). The scholars belonging to this school of thought reject the separation of the book into sources. They explain the occasional doublets as the result of slow accumulation of MS variants, supplementations, and preservations of two different versions of the same oral tradition. Thus, the saga-cycle theory propounds that the books of Samuel were composed of narrative complexes, which were joined together, not by interweaving them along their full length, but by setting one after another and by connecting these parts loosely.

The apparent difficulty of the saga-cycle theory is

in its lack of a sharp distinction between literary pieces and literary subjects. Apparently, the same literary piece might include several subjects—i.e., the shifting of interest from one topic to another does not necessarily mean a change of the narrator. The presence of a literary plan and the continuity of theological and historical views indicate that small, subject-centered literary units do belong in a larger whole, which deserves the name "source."

2. **Demonstration of the three-source theory.** The three-source theory seems to do the greatest justice to the books of Samuel because it offers the most probable explanation of some of the peculiarities of the books. This assertion can be supported by a validity of the three-source theory, which may be demonstrated within the narrative complex of Saul's elevation to kingship (I Sam. 7-12). This narrative complex can be unraveled into three separate threads.

One of these sources, designated with the sign "E" (7:2-17; 8; 10:17-21 α ; 12), sharply condemns the institution of monarchy. The E source starts with the assumption that Israel did not need the military leadership of a king against the Philistines, for Samuel, the judge of Israel, had miraculously defeated the attacking troops of the Philistines (7:5-14). The defeat of the Philistine army was so complete that the Philistines did not again assault the nation of Israel within the lifetime of Samuel, and they restored all the former Israelite territories. Thus, in the opinion of the E writer, the introduction of kingship was not a national necessity arising from the pressure of the annihilating power of the Philistines, but a sheer apostasy of the obstinate people. For the Israelites rejected, with their demand for a king, not merely Samuel as the judge of Israel, but also the Lord's kingship over Israel (8:7). Samuel had warned the people of the despotic ways of the kings, but the people of Israel refused to listen. They stubbornly repeated their request to Samuel for a king, so that they might be like all the nations (8:10-19). Finally the Lord gave his consent to fulfil the foolish and rebellious desire of the people (8:19-22). Samuel called the people together at Mizpah for the selection of a king from the assembled tribes of Israel; there Samuel recounted the mighty saving acts of the Lord and contrasted them with the people's ungrateful desire for a king. The selection of the king was done by lot, and Saul became the king (10:17-21 α). The gathering at Mizpah was continued with Samuel's abdication of his office as judge and his farewell admonition to people and king. These farewell words (ch. 12) are also pervaded by the antimonarchic spirit, just as were the previously mentioned parts. The hero of the E source is apparently Samuel, beside whom King Saul is dwarfed.

The second strand of the narrative concerning the introduction of kingship in Israel is designated with the letter "J" (I Sam. 9; 10:1-16). In the J source Saul appears as a young man still living at his father's house and going on his father's errands. When Saul was sent in search of the lost asses of his father, he met Samuel, who anointed him to be king over Israel. In this source one does not hear the rebellious demand of the people for a king. Here, the intro-

duction of the monarchy is not regarded as apostasy. On the contrary, it was the Lord himself who saw the affliction of his people under the Philistines and decided to deliver them by the hands of an anointed prince (9:16; 10:1 LXX). In this source Samuel does not have the same stature of national importance as in the E source but appears as a local seer, whose influence was most likely limited.

The third source, designated "L," appears in 10:21b β -11:15. This source shows more sympathy toward kingship than does E. According to the account of the L source, the people did not desire a king so stubbornly as in E (ch. 8). The king apparently was appointed by the Lord, and the people's opinion concerning the necessity of the institution of the monarchy was mixed (10:26-27). The favorable attitude of the L source toward kingship is manifest in the fact that it calls those who voiced their derogatory opinion of Saul "worthless fellows" (10:27). That 10:21b β -27 is not the direct conclusion of the E report in 10:17-21a α may be easily conceived. There is an abrupt change of the subject of action from Samuel (10:21a) to the people (10:22). The election to kingship by lot, as it is described in 10:20-21a α , presupposed the presence of Saul, but Saul was obviously not present (vs. 21b β). When the people inquired of the Lord, significantly they did not ask the question: "Did the man come hither?" (10:22 LXX), but, according to the MT: "Is there yet a man to come hither?" These facts and the emphasis on Saul's tallness (vss. 23-24) do not postulate the selection by lot, but rather the receiving of an oracle. This oracle would not have, necessarily, designated Saul to be king, but merely would have specified that the Lord's choice for kingship had to be one head taller than anyone else of the people. This presumed oracle would have been followed by a general mustering of the people, and when nobody had been found who could fulfil the requirements of the oracle (vs. 21b β), the people would have had to inquire again (vs. 22) of the Lord. Obviously also, the divine answer: "Behold, he has hidden himself among the baggage" (vs. 22), could not have been obtained by the awkward oracle technique of the sacred lot, which was mentioned in the E account (vs. 21). The composition of the sources into one continuous narrative would have resulted in the present mutilated account. Also, in 10:25, the "law of the kingship" (MT; cf. RSV "rights and duties of the kingship") can hardly be identical with the "law of the king" (MT; cf. RSV "ways of the king") in 8:11. In L the law is divinely approved, and therefore it is laid before the Lord (10:25), but in E the "law of the king" is more or less the arbitrary way of the oriental despot (8:11-18). The dismissal of the people (10:25) prepared the scene for the deliverance of Jabesh-gilead (ch. 11). The continuity of the two episodes—i.e., Saul's election to kingship and the military deliverance of Jabesh-gilead within the L source—is established by the fact that, after the victory over the Ammonites, some of the warriors asked the death penalty for the "worthless fellows" (11:12) who, after Saul's elevation to kingship, doubted his ability to save Israel (10:27). But Saul showed clemency and declared that no man had to

be put to death on the day of deliverance of Israel (11:23).

Undeniably, the three-source theory can be best demonstrated within this complex, but the presence of the three sources can be traced throughout the books of Samuel.

3. Source analysis of the books. The separation of the three sources within the books of Samuel appears to be possible, and a short analysis will be presented.

I Sam. 1-6: Within chs. 1-3, two sources, J and E, might be separated, and some late additions and glosses (2:1-10, 27-36; 3:12-14) can be discovered. The J source (1:3b; 2:12-17, 22-25) does not mention the name of Samuel and speaks of Hophni and Phinehas, the sons of Eli, as the priests of Shiloh (1:3b). The E source, at the very start (1:1-3a, 4-28; 2:11, 18-21; 3:1, 2a, 3-11, 15-21), presents Samuel as the revered hero of the source, and his birth story and consecration (even as a child) to the service of the Lord in the sanctuary of Shiloh represent an appropriate prelude to the life of Samuel. The E source regards Eli as the only priest of Shiloh (2:20). The L source makes its first appearance in chs. 4-6. Its interest is focused upon the vicissitudes of the ark. The narrative is interwoven with the J source, which continues to follow the destiny of the sons of Eli in addition to its main interest in the fate of the ark.

For an analysis of I Sam. 7-12, see § C2 above.

I Sam. 13-15: Within these chapters, Saul's early wars and his rejection from the kingship are related. Apparently the E source could not have reported any of the Philistine wars, because E was convinced that after the victory at Mizpah the Philistines were subdued in Samuel's lifetime (7:13-14). Thus this story, which joins Saul's rejection from the kingship to a cultic offense during the punishing expedition against the Amalekites (ch. 15), must be E's version of Saul's rejection.

The rejection of Saul from kingship in ch. 13 (vss. 8-15a) originates from another source, J, which knows of Philistine wars even during Samuel's lifetime. To be sure, Saul's offense is cultic in its nature also, according to J. According to both E and J, King Saul had to bear a trial of faith, which he failed by sinning in the field of the cult. In ch. 14, L reports, significantly, a cultic offense of Jonathan, Saul's son, in connection with the Philistine wars; thus, this episode forms a partial parallel to the E (ch. 15) and J (13:8-15a) stories.

I Sam. 16-18: It is generally recognized that I Sam. 16:1-13, as the undisturbed continuation of Saul's rejection in ch. 15 (E), belongs to the E source. But also 16:14-23 belongs manifestly to E, as is shown by the organic connection between David's anointment and the coming of the Spirit of the Lord upon David on the one hand, and the Spirit's departure from Saul and his torment by an evil spirit on the other hand. Thus, David is brought, according to the E source, to Saul's court as a player of the lyre.

Some words, such as "a man of valor, a man of war" (16:18), and "he became his armor-bearer" (vs. 21), must be removed from the context, because

they do not fit the E portrait of the youthful David. These words can be connected with 14:52: "When Saul saw any strong man, or any valiant man, he attached him to himself" (L). In this way, two accounts of David's coming to Saul's court can be established within ch. 16. But there is a third thread in ch. 17 (most clearly recognizable in 17:12-31, 55-18:4), according to which Saul did not know David before his duel with Goliath. This third thread is J, and it is conflated with the E source within ch. 17, so that sections could belong to both J and E. The E thread appears at its clearest in vss. 32-39. The musician David of the E source appears in 18:10-16 and the valiant warrior of L in 18:5-9, 20-29, while J is clearly seen in 18:17-19, which seems to allude to Saul's promise to give his daughter to the victor over Goliath (17:25).

I Sam. 19-30: Saul's jealousy of him forced David to flee from the presence of the king. He was helped in his escape by Michal, his wife, according to L (19:11-17). The same service was accorded to him in J's version (20:1b-42) by Jonathan. Finally, E reports that the escape of David was possible because of the help given by Samuel (19:18-24). The separation of the sources cannot be completed with precise finality in every case. Thus 21:1-9 might be L or J; the case is similar to 22:1-2, 6-23, but the Gath episode in which David feigns insanity before the Philistines (21:10-15) definitely points to E, for E does not recognize David's mercenary services to the Philistines. David's deliverance of Keilah from the hands of the Philistines in 23:1-13 is L; so are the Nabal and Abigail idyl in 25:2-44 and ch. 26, which reports David's sparing of Saul's life in the encampment at Ziph. The J source parallels L in 23:19-28; 24. In this account David spares the king's life in a cave at Engedi. E narrates about a secret covenant between David and Jonathan (23:14b-18) and thus supplies a doublet to J (20:41-42).

The next narrative complex is centered around David's association with the Philistines. The L source reports that David, after a short stay in Gath, received from Achish, king of Gath, the outpost of Ziklag (27:5-7). The J source, on the contrary, pictures David as staying in Gath with Achish and finally becoming Achish' bodyguard (27:8-12; 28:1-2). Both the L and the J sources need 27:1-4 to introduce David's decision to become a mercenary of the Philistines. The events (at the mustering of the Philistine army at Aphek) which freed David from the danger of fighting his own people (ch. 29) were reported by both L and J, as traces of conflation show within the narrative. E (28:3-25) gives the memorable scene of Saul's consulting the ghost of Samuel with the aid of the medium of Endor. The L source, which is aware of David's manning of the fortress of Ziklag, relates the Amalekite raid on Ziklag and David's ensuing revenge and liberation of the captives (ch. 30).

I Sam. 31-II Sam. 6: The death of Saul and his sons on Mount Gilboa (ch. 31) is the L source, as the piety of the Jabeshites indicates (cf. ch. 11). The two sources L and J reappear in the composite II Sam. 1. Apparently the messenger who "escaped from the camp of Israel" (vs. 3) cannot be identical

with the Amalekite who "by chance . . . happened to be on Mount Gilboa" (vs. 6). Also, the report of the young Amalekite (vss. 6-10) ought to be followed immediately by his questioning and execution (vss. 13-16). Instead, the continuity of this L narrative is interrupted by J's account of David's mourning (vss. 11-12). The dirge of David on Saul and Jonathan (vss. 17-27) belongs to J. Chs. 2-6 belong, in the main, to L, but there are small traces of foreign material present.

II Sam. 7-8: The seventh chapter starts with an oracle of Nathan (vss. 1-17), which prohibited David from building a temple for the Lord but promised establishment of the Davidic dynasty forever. This oracle is generally referred to as the dynastic oracle, which was repeatedly ascribed by biblical scholars to the Deuteronomistic editor or was identified as a late midrash. However, if the central importance of the temple in late pre-exilic and postexilic periods is considered, it seems most unlikely that either the Deuteronomistic editor or a late midrash would have expressed a prohibition in such terms, which not merely forbade David to erect a temple, but also discredited the necessity of building a temple (vss. 5-7). Because of the favorable attitude toward the institution of kingship, the dynastic oracle cannot belong to the E source, either (vss. 8-16). Thus the dynastic oracle might be assigned either to L or to J, or to an independent but ancient tradition, even though in a shorter form, for the whole seventh chapter is overlaid with later additions. The eighth chapter has a definite similarity to I Sam. 14:47-51, for, as the latter summarizes the reign of Saul, so this chapter gives a short account of David's reign. Both sections are from the pen of L.

II Sam. 9-24: These chapters represent the so-called court narrative, which extends beyond the books of Samuel into the books of Kings (I Kings 1-2). This narrative of the Davidic court is the work of J. The chronological order might be restored by placing II Sam. 21:1-14—i.e., the vengeance of the Gibeonites on Saul's house—before ch. 9, where Jonathan's son, Mephiboseth, receives David's favor. Some scholars tried to discover traces of the E source within the court narrative, but the arguments enlisted do not bear out this contention. The occasional discrepancies (e.g., the conflicting reports on Absalom's offspring [cf. 14:27; 18:18]) must be explained by the presence of later accretions.

4. Evaluation of the sources. The use of the sigla of the Pentateuchal sources (L, J, E) for the sources of the books of Samuel does not necessarily imply their identity. Their use, however, expresses the conviction that the sources of the books of Samuel are related to the sources of the Pentateuch. The degree of relationship of these sources cannot be conclusively stated, and it will suffice to maintain that there are sufficient grounds in the similarities of style and outlook to assume that both the Pentateuchal sources and those of the books of Samuel originate from the same circle of authors.

a. Characteristics of the sources. Even a superficial comparison of the sources reveals that L (Lay source) is the least interested in theological thoughts, and that E approaches the events with a clearly

definable "philosophy of history." Between the L and E sources, J has a middle place, its view on history being theocentric, though not always emphasized.

Also in the point of religious orientation, the sources differ markedly. An interest in the destiny of the holy ark is characteristic of L, which recognizes only the ephod and the oracle techniques (cf. I Sam. 23:6-13; 30:7-8) as God's means of communication with man. J also seems to take great interest in the fate of the ark but likewise in the destiny of the priesthood of Shiloh and Nob. J recognizes that, besides the oracle (II Sam. 21:1), men, too, are used by God to express, with unmistakable words, his will (I Sam. 9:1-10:16; 13:13-14). The rapture of the prophetic bands of I Sam. 10:10 does not arouse J's sympathy, but rather an indifferent attitude can be observed. E, however, seems sympathetic toward the same mass ecstasy (I Sam. 19:18-24), and is exceedingly interested in the person of Samuel, giving, in addition, his childhood idyl. E's religion, though it has cultic aspects, is not identical with cultic-ritual observance; obedience before the Lord is the decisive aspect of E's religion (I Sam. 15:22).

A difference between these sources can be clearly perceived in their individual concept of the "spirit of the Lord." For L, the spirit of the Lord meant an irresistible impulse for action and the communication of suprahuman power (I Sam. 11:6). J recognizes it as the force causing the mass ecstatic phenomenon (10:10). E, beyond the mass ecstatic aspect (I Sam. 19:18-24), also recognizes a constant leading and blessing spirit (16:13-14).

The most significant difference can be seen, as has been expounded already (*see* § C2 *above*), in the sources' views concerning the institution of kingship.

An investigation of the literary peculiarities of the sources reveals that the L source has an explicit preference for sagas presenting folk-tale motifs—e.g., Saul's hiding among the baggage (I Sam. 10:22) and his being called from behind the oxen (11:5). L enjoys reporting the bizarre marriage presents, when Saul asked for one hundred Philistine foreskins and David gave double the amount (I Sam. 18:25-27). David's flight, with the help of Michal, preserves a rough, peasant humor (19:11-17). L relates the Nabal episode with the sincere sympathy so characteristic of the folk tale toward the successful adventurer, and L even gives, with a rough sense of mockery, the name Nabal ("fool") to the extorted peasant (I Sam. 25:2-44). The stories which are not colorful enough for L's taste are given in short summaries (e.g., I Sam. 14:47-51; II Sam. 8). The circle from which the stories originate was close to the country folk. The place of origin is Judah, as is indicated by the unique traditions of L. These stories are: David's sojourning in Keilah (I Sam. 23:1-13), the Nabal episode in Maon (25:2-44), and David's presents given to the Judean elders from the Amalekite spoil (30:26).

The literary characteristics of J include a remarkably vivid, forceful style, elegance of expression, and a fondness for folk-tale or saga motifs. Folk-tale motifs appear in episodes such as that in which the

young Saul starts out to look for the lost asses and finds a kingdom (I Sam. 9:1-10:16), and the fight of young David with Goliath (ch. 17). But the story of the ascendance of David and, especially, the court narrative assume the clarity of an eyewitness account. The apparent closeness to the court points to Jerusalem as the place of origin of the source.

It is characteristic of the E source that its literary material is mostly of the sacred, legendary nature. This source is not especially interested in the early kings, Saul and David. E's foremost hero is Samuel, the great intercessor, who, without battle, won a decisive victory over the Philistines (I Sam. 7). He was the judge of Israel, whom the people asked for a king (ch. 8); and after the rejection of Saul from kingship (ch. 15), he anointed David as the new king (ch. 16). Significantly enough, E alone includes Samuel's birth narrative (ch. 1), reports his childhood prophetic call (ch. 3), and relates that Samuel, even after his death, foretold Saul's defeat (ch. 28). The spirit of these legends has a degree of similarity with the medieval legends of the saints. The memories of the great man were probably preserved by the prophetic circles of the N empire, with which Samuel was associated, according to E (I Sam. 19:20). Therefore, the place of the origin of the E source was apparently the N, and there its native environment was located in the prophetic colleges.

b. Dating of the sources. In any attempt to find the date of the origin of any literary source, one encounters great difficulties. The dating of the sources of the books of Samuel can obviously not be divorced from the question of how far the sources extend beyond the conclusion of the court narrative of David (I Kings 1-2). Some scholars assume that the narrative extends to II Kings 17, relating the fall of Samaria. Accordingly, the earliest possible date of the writing of J would have been during the reign of Hezekiah (715-687 B.C.). Others think that J did not go beyond I Kings 12, which reports the separation of the two kingdoms. Consequently, the earliest date of J's writing would be after 922. E is traced by some scholars to II Kings 23 and is dated shortly after the Josianic reform (622). Others claim that E can be found throughout the books of Kings and find the date during the Exile, sometime after 561. It appears, however, that there is little justification for tracing the sources of the books of Samuel beyond I Kings 1-2—i.e., Solomon's ascension to the Davidic throne.

J, which extends to I Kings 1-2, seems to be closest to the happenings in the Davidic court; his account seems to be that of an eyewitness or, at least, based on an eyewitness' story. If this is true, J could be dated either during Solomon's reign or during Rehoboam's kingship—i.e., the late tenth century B.C. The L source's saga character must not be explained as being from a great remoteness from the events, but from L's connection to that cultural circle which is primarily responsible for the birth of sagas. The cultural environment of L is with the country folk, and there, among peasants and shepherds, the memories of events become sagas in a single generation. But L's closeness to the events of the Davidic reign can be assumed on the ground

that David still did not become a stereotyped folk-tale figure, for his personality can be clearly observed. If all these factors are taken into account, the late tenth century B.C. seems to be the probable date for L.

The dating of E is dependent in large measure on its antimonarchic attitude. E's antimonarchic attitude is, in part, the authentic memory of the antimonarchic reaction at the time of the institution of kingship in Israel. This contemporary reaction was based upon this theological consideration: the Lord is the king of Israel; therefore the elevation of a human king is rebellious apostasy. This theocratic, antimonarchic view seems to be older than the monarchy itself (cf. Judg. 8:22-23; 9:7-15). But E's formulation of the "ways of the king" (I Sam. 8:11-18) points to some recent experience and concrete abuse of the royal power. The situation described in this "royal law" can hardly describe the reigns of Saul and David, for Solomon seems to be the first to have organized taxation (I Kings 4). The statement: "He will take the best of your fields and vineyards and olive orchards and give them to his servants" (I Sam. 8:14) could allude to the seizing of Naboth's vineyard (I Kings 21:1-16). If this is the case, the date of E would be after the reign of Ahab (869-850 B.C.), probably the end of the ninth or the beginning of the eighth century.

c. Historicity of the sources. The historical validity of these literary sources presents a very intricate problem. There are some scholars who, in a general, unqualified statement, endorse the historical reliability of the early source or sources but deprive the E source of historical validity. Against such generalizations, it must be maintained that, with the exception of the Davidic court narrative of J, all the sources are inclined to transcend the historical facts and prefer to convey the meaning of events in legends or sagas. On the other hand, the presence of an antimonarchic prophetic opposition in the time of the introduction of kingship is attested by the E source. Nevertheless, the fact that it is E's report will not detract from the historicity of the tradition. General statements on the historical reliability of any of the sources are unjustified, for a historical investigation must weigh, in each individual instance, the historicity of all the sources in question.

5. The history of composition. Any attempt to reconstruct the detailed history of the process of composition necessarily runs the risk of unwarranted speculation—at one or another point. However, it seems to be advisable to sketch, for the sake of clarity, a history of the composition. Approximately the following steps can be distinguished:

At first, some sagas were formed by utilizing folklore patterns and motifs; these sagas were transmitted in the channels of oral tradition. Such sagas were the origin of the kingdom (I Sam. 9:1-10:16), the wars of Saul (chs. 11-14), and the material concerning the ark (I Sam. 4-6; II Sam. 6). The dirges of David (II Sam. 1:17-27; 3:33-34) and the original pithy version of the dynastic oracle (II Sam. 7) belong to this period, and so do some original lists and annals such as those in II Sam. 8; 21; 23.

The second stage of the history of composition saw

the emergence of the continuous historical works, L and J.

Later the E circle brought and joined together the original historical works of L and J and added to them its own prophetic point of view. This is especially clear in Samuel's birth and childhood narrative (I Sam. 1-3) and in the report on the rise of the monarchy (chs. 7-8; 12). E also contributed some independent tradition, such as the historically trustworthy episodes of the Amalekite war (I Sam. 15) and Saul's visit with the medium of Endor (I Sam. 28).

In the next stage, the Deuteronomist edition of the book took place. The Deuteronomist did not plow deeply into the already existent book, but added only some passages, such as I Sam. 2:27-36; 3:12-14; and some additions to the dynastic oracle (II Sam. 7).

The last step in the process of composition was the incorporation of such poetical material as I Sam. 2:1-10; II Sam. 22; 23:1-7 into the books of Samuel.

D. TEXT. The text of the books of Samuel is corrupt in many places, but occasionally a reconstruction of the text is possible by the utilization of the parallel accounts of the books of Chronicles and the ancient versions. Among the versions, the LXX is of foremost importance for the study of the text of Samuel. The LXX seems to point to a variant Hebrew text, nonextant at the present, which was unlike the MT. Some portions are missing from the LXX (e.g., I Sam. 17:12-31, 55-58; 18:1-5, 10-11, 17-19). The discoveries of MS fragments in the caves of Qumran also support the contention that the occasional divergence of the LXX text from the MT cannot be explained alone by the paraphrasing tendency of the LXX translators, or by their liberty with the text in general, but only by the former existence of non-Masoretic Hebrew texts. However, the Hebrew variants, revealing a higher degree of affinity with the LXX than with the MT, were apparently rejected and suppressed, probably during the second century A.D., as a result of Judaism's endeavor for a normative and authoritative text of the Scriptures.

***SANBALLAT** *sān bāl'at* [סַנְבַּלַּט; Akkad. *Sin-uballit*, Sin (the moon deity) has given life]. The chief political opponent in Palestine of Nehemiah's efforts, as governor of Judah under the Persian Empire, to rebuild the walls of postexilic Jerusalem (ca. 445-437 B.C.; cf. Neh. 2:10, 19; 4:1, 7; 6:1-2, 5, 12, 14; see NEHEMIAH 3). Sanballat is referred to in a letter from Elephantine in Egypt (see ELEPHANTINE PAPYRI; see also *bibliography*) dated the seventeenth year of the Persian king Darius II (ca. 407 B.C.) as "Sanballat [סַנְבַּלַּט] the governor [*pehāh*] of Samaria," and as having two sons with the Hebrew names Delaiah and Shelemiah—suggesting that Sanballat observed Jewish faith and practice at least formally. See SAMARIA, TERRITORY OF.

While he does not call him "governor," Nehemiah also represents Sanballat as having substantial political power in the province of Samaria under Persian rule (e.g., Neh. 4:2). Nehemiah refers to him as "the Horonite," identifying him probably with Upper and Lower BETH-HORON, two towns in Ephraim overlooking the road from Jerusalem to Lydda and the Mediterranean coast—a position of considerable military strategic value which Sanballat must have controlled (cf. Josh. 10:10; I Macc. 3:16, 24; etc.). See *bibliography*.

The bitter opposition of Sanballat to Nehemiah's work was based presumably on the threat to the control of Judah enjoyed by Samaria to a greater or lesser degree ever since the fall of Jerusalem in 586 B.C. to Babylon. Nehemiah's uncompromising refusal to let his opponent's machinations deter him from his purpose to fortify Jerusalem (see *references above*) is the measure of Nehemiah's own political ability. The rivalry between the two leaders was primarily neither racial nor religious in nature, although such factors may have aggravated the mutual antagonism. As a matter of fact, Nehemiah's own account rather shows that Sanballat and his colleague Tobiah the Ammonite were on relatively good terms with influential segments of the Jewish community (cf. 6:10-14, 17-19), and the grandson of Eliashib, the Jewish high priest, took Sanballat's daughter in marriage during Nehemiah's absence from Jerusalem—for which, to be sure, Nehemiah on his return had him banished from the city (13:28). It is probable that the Jewish governor's adamant stand in this matter, as in others having to do with Sanballat, is responsible at this time in Jewish history for the very survival of the Jewish community itself.

The Jewish historian Josephus (ca. A.D. 100) implies that this last-mentioned affair—the expulsion of Sanballat's son-in-law from Jerusalem—brought about the Jewish-Samaritan schism (Antiq. XI.viii.2) and led to the building of the Samaritan temple on Mount Gerizim, but the biblical account gives no such indication. Moreover, Josephus places Sanballat himself, as well as these events connected with him, a century later than the time of Nehemiah, in the period of the change-over from Persian to Hellenistic rule over Palestine (333 B.C.; cf. Antiq. XI.vii.2; viii.2, 4). But Josephus' account at this point must be considered historically less trustworthy than that of Nehemiah. That there may have been two Sanballats has been suggested, and this is not impossible, but it is scarcely probable that their separate careers

should resemble each other in such detail as the accounts in Neh. 13:28 and Josephus do with regard to the marriage of Sanballat's daughter and the expulsion of his son-in-law from Jerusalem. The Josephus narrative is further suspect in this section for its being set in a context of much else that is historically questionable, if not plainly erroneous, in his narrative—e.g., the coming of Alexander to sacrifice in the Jerusalem temple and his being shown the book of Daniel, with its prophecies concerning him (Antiq. XI.viii.5).

See also GESHEM; TOBIAH 2.

Bibliography. A thorough review of the problem of Sanballat's role in Jewish history is given in H. H. Rowley, "Sanballat and the Samaritan Temple," *Bulletin of the John Rylands Library*, vol. 38, No. 1 (Sept., 1955), pp. 166-98. For text and translation of the Elephantine letter, with notes, see A. Cowley, *Aramaic Papyri of the Fifth Century B.C.* (1923), pp. 108-19; the translation alone is given also in J. B. Pritchard, *ANET* (2nd ed., 1955), p. 492. See also W. F. Albright, "The Date and Personality of the Chronicler," *JBL*, XL (1921), 111; *The Biblical Period* (1950), p. 52. See especially R. A. ***SANCTIFICATION.** The realization or progressive attainment of likeness to God or to God's intention for men. It may be regarded both as a status conferred by divine grace and as a goal to be aimed at. As a biblical doctrine it belongs more to the NT than to the OT, but it presupposes the fundamental OT conception of holiness.

1. **OT background.** Holiness in the OT, as in other sacred writings, relates to man's elemental reactions to that which is beyond his normal experience and control. It is to be classified as a category distinct from the intellectual and moral and aesthetic categories. But it must also be recognized that if this factor of human experience is not to be outgrown as man progresses from the primitive, it needs to be moralized and intellectualized. A main contribution of Hebrew religion was precisely this.

The basic sense of the Hebrew root *qadosh* (as of its Greek equivalent in the Bible, *ἅγιος*), seems to be "separateness"—i.e., from ordinary usage (see HOLINESS). In reference to God, the term "otherness" has been much used. What needs to be kept in mind, however, is not so much that God is essentially different from man as that he is God; the quality of the divine is positive. Modern thought, in contrast to biblical, is anthropocentric; and when we speak of God, we tend to describe him in negative, nonhuman terms. But the Bible retains the insight of primitive man, for whom the divine was not a hypothesis, but the primary reality, however indefinable. The word *qadosh* has this sense of reality in it; it is not a negative term. It is not taboo, the untouchable, but rather mana, superhuman potency; more correctly, it is both.

This is, of course, a primitive idea, and is applied to beings other than God, and to material things. Good examples of this sense in the OT are the narratives about the ark of the covenant in I Sam. 6:19-7:1; II Sam. 6:6-11 (cf. also Lev. 17-26; Ezek. 42:1-14; 44).

Real progress in religious thought arises when the

idea of holiness is lifted out of the impersonal. Two developments in particular are distinctive of the OT: (a) Holiness is conceived as referring pre-eminently to Yahweh (Job 6:10; Isa. 6:1-5; Hos. 11:9b), and all other persons and things are defined as holy only in connection with him, especially the priests and the temple (cf. Exod. 19:6; 29:42-44; Lev. 19:2; I Kings 9:3; Jer. 1:5). The books of Isaiah and Ezekiel are particularly significant here (cf. Isa. 5:16; 40:25, and the frequent reference to Yahweh as the "Holy One of Israel"). Ezekiel the priest-prophet thinks of God's action as specially motivated by concern for his holiness; and this finds expression in a curious use of the *niph'al* (passive) form of the verb *q-d-sh*, which the RSV renders "manifest" or "vindicate" (my) holiness (cf. Ezek. 20:41; 28:22, 25; 36:23; 38:16; 39:27). (b) The pre-exilic prophets moralized the notion of divine holiness—i.e., understood God's will as having moral implications. (This was somewhat obscured in the postexilic reorganization, but cf. Lev. 19:9-18.) Important chapters in this connection are Isa. 5; Jer. 5-7; Amos 4-5; Hos. 11; and even Ezekiel (cf. ch. 18).

2. NT development. *a. In the primitive church.* From Acts we learn that sanctification depends on reception of the Holy Spirit. This implies turning away from the world (Acts 2:40b), and presupposes forgiveness of sin (2:38; 26:18). More positively, reception of the Spirit confers power to perform miracles (2:43; 3:6; 4:12-16; etc.), moral power (4:31-37), and generally the courage to witness to Christ (2:32-36; 4:31; 5:32).

Christians are called simply "saints," holy ones (ἅγιοι; 9:13, 32; 26:10). This is also regular Pauline usage (Rom. 1:7; 12:13; I Cor. 6:1; 16:1; etc.). Similarly, in Revelation the word is used fourteen times. For fuller emphasis, cf. I Cor. 7:34; Eph. 1:4; 5:27; Col. 3:12-17. Sometimes we have the present participle of the cognate verb in the same sense—e.g., I Cor. 1:2; Heb. 2:11; 10:14: "those who are being sanctified" (οἱ ἁγιαζόμενοι). The meaning in all these cases is not moral perfection, but consecration to Christ—i.e., a Christian appropriation of the original OT sense of separation. There is some overlapping of meaning with words implying cleanness or purification, whose basic notion is that of ritual purity, but which like sanctification easily pass over into a moral signification. See Acts 10:14-15, 28, which shows that Jews are no more "clean" than Gentiles, but all alike capable of being regarded by God as acceptable (cf. 10:34-35, 45; 11:17-18; 15:9; 28:28). For the collocation of purity and holiness, cf. Eph. 1:4; 5:26; Col. 1:22; I Thess. 4:7; II Tim. 2:21; Heb. 9:13-14. See SAINT.

This usage has two main implications: (a) it is the basis of the concept (more fully thought out in Paul) of the church as a holy society. This is a corporate ideal and needs to be kept in view if a too narrow and individualistic striving after sainthood is to be avoided. The original, semimagical concept of separateness is here fully personalized. Individual Christians enter the sphere of sanctification where with their fellow Christians they are united in worship of a Lord who is Head of the body and source of holiness and moral power. (b) The NT terminol-

ogy of sanctification implies that the church is a divinely controlled society. For the word "holy" (ἅγιος; ὁἴος) is an attribute of God, and is applied in the NT to Christ also (Mark 1:24; John 6:69; Acts 3:14; 4:27; Rev. 3:7). See especially I Pet. 1:16; 2:9.

Church experience is described in Acts 20:32; 26:18 in terms of inheritance "among those who have been sanctified." The reference is not to the final inheritance of Christians, either here or in the similar passages Eph. 1:18; Col. 1:12. The perfect tense of the verb should be noted: the sanctification is already effected, even though not completed, when a man is gathered into the church; it is simultaneous with God's gift of forgiveness. This is clearest in Acts 26:18. Christians have entered upon an inheritance which may have appeared to many still future, beyond death. For the Christian who has begun to experience sanctification, the conventional distinction between here and hereafter, earth and heaven, becomes less absolute, and death itself loses significance.

b. In the Synoptic gospels. According to Mark, Jesus is God's Holy One (1:24), who drives out all that is unholy—e.g., the unclean spirits (1:23-26, 34, etc.). Even the holy temple has to be cleansed (Matt. 12:6; Mark 11:15-17; 14:58). He is not afraid of contamination by contact with uncleanness, for his holiness is positive and sovereign, not negative like that of the Pharisees (Mark 2:15-17; Luke 19:5-10). He rejects their definition of what constitutes holiness and defilement, in order to diagnose the need of man more truly (Mark 7:1-23). Man's chief requisite is not warning against sinful actions so much as purification of heart where the overt sins are motivated (Matt. 5:21-32; 6:22-23; 7:17-18; 12:34-35). Jesus understood his mission to be to cleanse men from that inward uncleanness which vitiates their life, issues in wrong deeds to their fellow men, and makes them unfit for fellowship with God. To this purpose he devoted his life, even to the ultimate sacrifice of death, believing that God would make this sacrifice potent for the emancipation and sanctification man needs (Matt. 26:28; Mark 10:45; 14:21-24).

c. In Hebrews. The main theme of the Letter to the Hebrews is the work of Christ as priest and sacrifice. It can be stated as the provision of "purification for sins" (1:3), implying the imagery of sacrifice, as in 2:17b; 5:1 and in the whole central argument of chs. 5-10. But the metaphor changes to that of sanctification when Christ is referred to as the sanctifier (2:11; 7:26-27; 13:12). These metaphors are used interchangeably, as we see from 9:11-14—a peak point in the argument—and 9:22-23. The point of contrast here between Christian and Jewish mediatory rites is that whereas the latter effected outward sanctification, Christ offers an inward one ("conscience"; vs. 14b) which fits men for God's service, or, more precisely, for the sharing of God's own holiness (ἁγιότης; 12:10), which is the greatest need of man. The vision of God is not possible for the unholy (12:14). "Sanctification" is a synonym for "perfection," a key word in this letter (2:10; 10:14; 11:39-12:2). This sanctification or perfection is due

to Christ, who identified himself with man, a made man fit for God's presence, and pioneered a way thither as "forerunner" (6:20; 10:19 ff; cf. 3:1a).

d. In John. The idea of sanctification does not occupy much space in the Johannine Gospel, but it can be related to the Johannine thought. Christ is the remover of the world's sin (John 1:29). Sin also is not much mentioned in this gospel (but cf. I John 1:7-2:2; 3:4-10). The narrative of the marriage at Cana seems to imply that Christ represents something more potent than Jewish "purification" (John 2:6); this, however, is described, not as purification (καθαρισμός) nor as sanctification (ἁγιασμός), but as a manifestation of glory (vs. 11). Almost in the same context Jesus protests against temple profanation, and exemplifies zeal for God's house (2:17). This means that in him is operating a power superior to the temple, and destined to replace it (cf. 4:20-26). The holiness of earthly temples such as those in Jerusalem and on Mount Gerizim—the best that men have developed in institutional religion—must give way when true spiritual worship is inaugurated.

Similarly, Jesus transcends the sacredness of the sabbath (5:9-18). In virtue of his contact with his Father, he can by-pass sabbath regulations in the performance of his divinely prescribed work. He does not cease work on the sabbath, but his work is part of God's (vss. 16-17; cf. 9:33). Nor can holy scripture be quoted to limit his freedom, for he is in communion with the Source of scripture, and his word is holier than the words of Moses (5:37-47). As Son of man, he is "from above"—i.e., from the source of holiness (3:12-13; 6:33-51; 8:23). He is God's "Holy One" (6:69).

Jesus' ministry is a continuation of God's own activity, and a revelation of God's glory; he represents God among men (13:31; 14:7-11). The terminology of sanctification is not used, but the essential thought can be expressed in it. Christ imparts holiness more effectively than all other media, personal or material. Those who believe in him are sanctified in the sense of being in communion with God himself (17:20-26; cf. "seeing" the Father in 14:9-10; 16:15, 25-28). They no longer simply exist; they live on a higher plane, eternally, not belonging any longer to the "world" of ordinary existence untouched by God's saving power. They possess the truth, and are sanctified by it (17:17); Christ's own sanctity is imparted to them (17:19). In the simpler thought of I John, they are children of God, and destined to be made like Christ; this very prospect is a means of purification (I John 3:3).

e. In I Peter. In I Pet. 1:2 sanctification is due to the Spirit, but is also connected with God's eternal purpose and the atonement effected by Christ (cf. 1:19; 3:18). It is a reproduction of the holiness of God himself (1:15-16), which distinguishes Christians from other men (2:9), and constitutes them a priesthood (2:5)—i.e., able to approach God and to facilitate the approach of others to him. The author comes near to defining this holiness as imitation of Christ. See 3:15a, where to "sanctify Christ as Lord in your hearts" must mean to acknowledge Christ's holiness (cf. Isa. 29:23; Matt. 6:9) and to appro-

priate it in the sense of letting it determine your own behavior (I Pet. 3:16, leading to vs. 18; cf. also 2:21 ff).

f. In Paul. In Christian experience sinful men are accepted by God. The limits imposed on human life by sin and death are broken. Sin is a powerful enemy but not sovereign, for God's grace is even more powerful (Rom. 5:20). This is the meaning of redemption and justification in Paul's writings. Is there need of sanctification as well? The Christian, freed from his past, walks in "newness of life" (Rom. 6:4). Negatively this involves avoiding former sinful behavior (Rom. 6:12-19). When Paul begins to speak of the positive implications of this, he uses the term "sanctification" (ἁγιασμός; Rom. 6:19, 22), which in this context means "righteousness," as contrasted with "sin," service of God rather than slavery to passion. In I Thess. 4:3, 7, it is contrasted with immorality and uncleanness. (The RSV alternates between "sanctification" and "holiness" in I Thess. 4:3, 4, 7, though the Greek ἁγιασμός is used in all three places, as also in I Tim. 2:15; Heb. 12:14. It would be preferable to translate "sanctification" in all these passages, and keep "holiness" as a rendering of the two cognate words which are more abstract—viz., ἀγιότης [II Cor. 1:12; Heb. 12:10] and ἁγιωσύνη [Rom. 1:4; II Cor. 7:1; I Thess. 3:13].)

The new moral emphasis is described in terms of the Spirit, which emphasizes its divinely given quality (Rom. 7:6b; 8:2-4, 11-13; Gal. 5:16-25; see HOLY SPIRIT). This Spirit terminology is, in fact, more frequent in Paul's references to the Christian development than the language of sanctification. For the two together, cf. I Cor. 3:16-17. Sometimes a reference to sanctification is conspicuously missing—e.g., Rom. 8:30 ("glorified" instead of "sanctified"); Gal. 3:26-4:7.

It is not sufficient, however, to take "sanctification" as a synonym for "moral growth," though this connotation is included. Sometimes "sanctification" refers to the original establishment of the believer in his new environment as a Christian who has broken from his sinful past—to his position at the start of the race, as it were, rather than to his progress as a runner in the race. Thus "sanctification" can be a synonym for "justification"—i.e., I Cor. 1:2: "sanctified in Christ Jesus, called to be saints"; 6:11; 7:14 (here note the original sense of holiness as separation from ordinary usage: the Christian, like the Jew, is a man apart; he belongs to Christ, and this determines all his conduct; cf. I Cor. 10:14-21; II Cor. 6:14-7:1; Eph. 1:4-5). The reference to Christ as our sanctification (I Cor. 1:30) is not to be taken exclusively in this sense, because a full exegesis would make Christ source of all the church's progressive attainment.

Against this reference of sanctification to the beginning of the Christian experience may be quoted passages which imply that sanctification is an aspect of the whole life of the Christian, or something the church contributes during the course of its service (cf. Rom. 12:1; 15:16b; II Cor. 7:1; Eph. 2:19-22). Even I Cor. 6:11 is in an ethical context. In I Thess. 3:13-4:7 "sanctification" means avoidance of gross sin, and in I Thess. 5:23-24 it is a process finally completed at the Parousia. Its connection with the

Spirit appears again in II Thess. 2:13-14, with the notion that it is part of God's original purpose for the church. The progressive moral and spiritual fitness of the church is due to Christ's cherishing rather than to her own self-culture (Eph. 5:25-30); but it is a gradual process not complete at the original calling of converts (cf. Eph. 4:12-13, 22-5:2; Phil. 1:9-11; 2:12-16).

In short, the experience Paul has in mind when he speaks of sanctification is too rich in significance to be confined to any single moment of the Christian career. If justification is taken to mean that act of God which starts a believer on his experience of salvation, sanctification has a much broader range. It is the process thereby inaugurated, presided over by the Spirit, and mounting up to a maturity definable in terms of Christ's own perfection (Eph. 4:16). Sanctification will be complete at the time of Christ's final intervention (I Thess. 5:23). See also JUSTIFICATION.

***SANCTUARY** [שקד, sacredness, apartness, place apart; מקדש, sacred place; ἱερόν; ναός; σκηνή]. Basically, a center of holiness. In the OT the word refers to heavenly or earthly sacred places, specifically the tabernacle, the temple, Jerusalem, Zion, etc. In the NT, ναός is used of the Jewish temple, the heavenly temple, and temples in general, including heathen sanctuaries. The word is also personalized for reference to the body of Jesus, to the spirit-filled life of the Christian, and for other applications. ἱερόν is used of Artemis' temple and of the Jerusalem temple in whole or part.

See also TEMPLE, JERUSALEM; BAMAH; HIGH PLACE; TABERNACLE. G. HENTON DAVIES

SAND LIZARD חמט, possibly dark one; cf. Jewish Aram. חמט, to be dark; cf. Akkad. *hulmittu*, species of lizard; KJV SNAIL. The ancient versions and the context in Lev. 11:30 favor some variety of LIZARD, but further identification is hazardous. Jewish Aramaic חמטון (*hūmtōn*; "sandy soil") has been thought to place חמט (*hōmet*) in the Skink family (Scincidae), whose haunts are sandy regions and who are often known as "sand lizards" (cf. Tristram, *NHB* 268-69).

SANDALS AND SHOES. Sandals apparently were worn in Palestine from the earliest times. The monuments of Syria and Mesopotamia depict numerous characters with footgear of various types, though ordinary persons are generally represented as barefoot.

1. Terms
2. Use
3. Types
4. Materials

5. Symbolic use

Bibliography

1. Terms. The general term for "sandal" or "shoe" in the OT is נעל, which occurs some twenty times. In Arabic it signifies that by which the foot is shielded, frequently the sole. In Hebrew it means footgear in a general sense and may be either "shoe" or "sandal," as distinguished from נעל, the Assyrian soldier's BOOT. The most common word in the NT is ὑπόδημα, a sole attached to the foot with straps (Matt. 3:11; 10:10; etc.). Σανδάλιον, specifically a protective sole bound to the foot, occurs only in Mark 6:9; Acts 12:8.

2. Use. Women's shoes appear to have been somewhat different from those worn by men. Shoes were designed for protection against cold and damp in winter and against the hot sand and sharp stones during the summer. They were especially useful for the shepherd, who had to be prepared to go through briars and over rough ground to care for the sheep. Foot protection was not required at home, and so shoes, being dirty, were removed upon entering the house (Luke 7:38, 44). Taking off one's shoes at the holy place was a mark of respect (Exod. 3:5; Josh. 5:15; Acts 7:33) and is still practiced by Muslims when they enter their mosques. Footwear is not mentioned in connection with other priestly apparel, and the assumption is that the priests performed their ministrations barefoot. At other times they doubtless conformed to the general custom of wearing shoes. To go without shoes was a mark of poverty and destitution (Luke 15:22), or an outward sign of mourning (II Sam. 15:30; Isa. 20:2-4; Ezek. 24:17, 23). To put on one's sandals indicated readiness for a journey (Exod. 12:11; Acts 12:8) or for the discharge of a mission (Mark 6:9).

3. Types. As already noted, there is no way of distinguishing types of footwear from the biblical terminology. Our only sources are the monuments, descriptions in postbiblical literature, and present-day survivals. The earliest representation at Teleilat Ghassul (fourth millennium B.C.) is far from clear, and all that can be distinguished on a painted panel is some kind of low-cut boot. The Beni-hasan panel (early nineteenth century B.C.) depicts a group of Asiatics in Egypt (Fig. JOS 29). The men wear sandals composed of soles fastened by various methods—some with ankle and crisscrossed straps; others with, in addition to these straps, one running around the leg just above the ankle. The women have on a kind of low boot trimmed with a white band around the top which reaches above the ankle. The black obelisk of Shalmaneser III (854-824) depicts, on one of its panels, Jehu of Israel bearing tribute to the Assyrian king. The tribute bearers seem to be wearing shoes with upturned, pointed toes, though their height and method of fastening cannot be determined (Fig. INS 11). N Syrian monuments from Samal and Carchemish (ninth and eighth centuries) and a painting of Sargon II (721-705) show sandals with a high counter running from the arch on each side, held in place with a double strap over the arch and a single strap over the toes (Fig. SAR 27). But it must be remembered that these were probably not the shoes or sandals worn by ordinary

22. Upper: ancient Egyptian sandals; lower: Assyrian sandals

23. Assyrian sandals fastened to the foot by means of thongs (latchets)

people. They probably had no more than a simple piece of leather or wood or fibrous material tied on with leather thongs (Gen. 14:23; Isa. 5:27 [שרוך]; Mark 1:7; Luke 3:16; John 1:27 [ἰμᾶς; KJV "latchet"]) strung through ears or holes in the sides. Figs. SAN 22-23.

4. **Materials.** Leather was doubtless the regular material employed in the making of footwear. Shoemakers were probably included in the general class of leatherworkers. In later times wood was used, but leather bands or strings were generally supplied for them. Sometimes other material was used for such purposes (see S. Krauss, *Talmudische Archäologie*, I, 175-85). Worn shoes were mended with leather straps (Josh. 9:5, 13).

5. **Symbolic use.** Shoes were also of symbolic significance, as may be seen from the legal practice of presenting the shoe to confirm publicly the renunciation of levirate marriage rights or obligations (Deut. 25:9; Ruth 4:7-8). According to Amos 2:6;

8:6; the LXX of I Sam. 12:3; and some legal texts from Nuzi, shoes were obviously regarded as legal symbols—i.e., token payments necessary for strict legal transactions but often far from the spirit of the law (see *bibliography*). To be unsandaled was to be dispossessed (Deut. 25:10), and to cast one's sandals upon property signified possession (Pss. 60:8; 108:9).

***SANHEDRIN** sān hē'drān, sān'ā drīn [סנהדרין, Heb.-Aram. transliteration of συνέδριον, from σύν, together, plus ἔδρα, seat; the spelling Sanhedrim arose from a mistaken notion that the word derived from a Heb. masculine plural form]. The supreme Jewish council of seventy-one members in Jerusalem during post-exilic times; or one of the lower tribunals of twenty-three members, of which Jerusalem had two, according to the Tosefta (Ḥag. 2.9; Sanh. 7.1; cf. M. Sanh. 1.6; 11.2). The supreme council had legislative and executive, as well as judiciary, functions, but the extent of its effective authority varied considerably under different political regimes.

Bibliography

A. **DESIGNATIONS.** Both in the Greek and in the Hebrew sources various expressions are employed to designate the supreme council.

1. **Greek.** Five species of designation are to be distinguished under this head:

a) συνέδριον occurs in the LXX version of the book of Proverbs in the sense of "deliberative assembly" (e.g., 15:17) and as an equivalent of "tribunal" or "court of justice" (e.g., 22:10). In point of historical reference, Josephus first uses the term in a passage concerning the Roman legate of Syria, Gabinius, who divided Palestine into five districts with a συνέδριον (Antiq. XIV.v.4) or σύνοδος (War I.viii.5) over each; but he first employs it to denote the supreme Jewish council in connection with certain Galilean activities of the youthful Herod (Antiq. XIV.ix.3-5). In the NT the term (especially in the plural) is sometimes used of any judicature (e.g., Matt. 5:22; Mark 13:9); but usually it refers to the supreme council before which Jesus, Peter, John, Stephen, and Paul had to appear (Matt. 26:59; Mark 14:55; 15:1; Luke 22:66; John 11:47; Acts 4:15; 5:21; 6:12; 22:30; 24:20).

b) Γερουσία, "senate," is not infrequent in the

Apoc. (e.g., II Macc. 11:27). In the writings of Josephus the earliest historical appearance of the word to denote the supreme Jewish council is in Antiq. XII.iii.3, where Antiochus the Great (ca. 200 B.C.) uses it in this sense. In the NT the only occurrence of the term is in Acts 5:21, where we read "the sanhedrin [RSV 'council'] and all the senate [γερουσία] of Israel." This curious phrase may mean that the author of Acts had the erroneous notion that the sanhedrin was more comprehensive than the senate; alternatively perhaps the *καί* is explanatory, in which case the rendering should be "the sanhedrin, even the whole senate of Israel," the point being that the whole council, not merely the necessary quorum, was called together.

c) Βουλή is used fairly often by Josephus (especially in War; e.g., II.xvi.2) to designate the supreme council, but it is never so employed in the NT, although βουλευτής occurs in Mark 15:43 (where it means "councilor"); Luke 23:50 (where it definitely means "member of the high court," as the following verse shows). In Jos. War V.iv.2, βουλή apparently signifies the building in which the sanhedrin held its sessions.

d) Πρεσβυτέριον, "council of ELDERS," appears in Luke 22:66; Acts 22:5.

e) In his autobiography Josephus generally employs τὸ κοινὸν τῶν Ἱερουσαλιμιτῶν or more briefly τὸ κοινόν to denote the supreme council (cf. Life 12; 38; 52; etc.).

2. Hebrew. Four types of designation are to be distinguished under this head.

a) סנהדרין is the usual word for the supreme council in talmudic literature; sometimes the ה is assimilated to the preceding ך, and sometimes the final ן is dropped; plural forms (feminine) are סנהדריות and סנהדראות. Such expressions as גדולה, "great sanhedrin," and סנהדרין של שבעים ואחד, "sanhedrin of seventy-one," serve to distinguish the high council from the lower assemblies of twenty-three members.

b) The expression בית דין גדול is also frequent (e.g., M. Sanh. 11.2); its meaning, "great house of justice," brings out the judicial function of the supreme council; the addition שבירושלים, "which is in Jerusalem," is not infrequently made.

c) The term חבר, "company" (*collegium*), is associated with the reigning high priest on certain Hasmonean coins, where it doubtless designates the supreme council; thus some of the coins minted in the reign of Alexander Janneus (103-76 B.C.) bear the legend: "Jehonathan the high priest and the senate [חבר] of the Jews."

d) בנישטא, "assembly," "meeting place," is used of the supreme council in the Megillath Ta'anith 10; cf. the employment of הגדולה, "the great synagogue," of the assembly under Ezra and Nehemiah (Neh. 8-10), which in the rabbinical tradition constitutes the connecting link between the last of the prophets and the first teachers of the law who are mentioned by name in the Greek period (cf. M. Ab. 1).

B. HISTORY. The sanhedrin remained basically an aristocratic body until the time of the great insurrection in A.D. 66-70, when, with the collapse of

the Jewish state and the convocation of scholars at Jamnia, its whole character underwent a fundamental change. See ISRAEL, HISTORY OF.

1. Origin and early history. In rabbinical interpretation the sanhedrin had its origin in the council of seventy elders appointed to assist Moses in the business of government (M. Sanh. 1.6; cf. Num. 11:10-24), and was reorganized by Ezra soon after the return from the Exile (cf. the Targ. to Song of S. 6:1). But the way in which the sanhedrin is thus connected with Moses and Ezra, and subsequently with the names of leading rabbis (cf. M. Ab. 1), betrays a concern to demonstrate that the council established at Jamnia had its roots deeply embedded in the soil of Israel's past. Actually, however, there is no trustworthy evidence for the early existence of the sanhedrin. The "elders" mentioned in such passages as I Kings 8:1; II Kings 23:1; Ezek. 14:1 scarcely constituted a regularly organized body; and the court of appeal presupposed in Deut. 17:8-13; 19:16-19, like the institution ascribed to Jehoshaphat in II Chr. 19:8, was merely a judiciary, not a legislative council largely responsible for the government of the country, as the sanhedrin evidently was in Greco-Roman times. Doubtless the returned exiles would require some form of political organization, and perhaps the "elders" of Ezra 5:5, etc., and the "nobles" and "officials" of Neh. 2:16, etc., represented the future sanhedrin in germ. In Greek sources the earliest mention of a Jewish γερουσία, "senate" (Jos. Antiq. XII.iii.3), has reference to the time of Antiochus the Great (223-187 B.C.). A Hellenistic γερουσία, however, was usually a democratic body, whereas the sanhedrin at Jerusalem was an aristocratic institution presided over by a hereditary high priest (see PRIESTS AND LEVITES), and this may indicate that the Jewish council goes back to the Persian period.

2. The Hasmonean regime. It would seem that this new dynasty had to enlist the support of experts in the interpretation of the law as well as that of certain influential priestly families, and that representatives of both sections were soon appointed to positions on the sanhedrin. This introduced an element of contrariety into government circles, and so the history of the sanhedrin during this period is largely bound up with the history of the conflicts between the SADDUCEES and the PHARISEES. According to Jos. Antiq. XIII.x.5-6, a Pharisee named Eleazar, having cast doubts on the legitimacy of the birth of John Hyrcanus I (135-104 B.C.), demanded that he should resign from the high priesthood and content himself with the civil leadership of the people, whereupon Hyrcanus joined himself to the Sadducees and declared the enactments of the Pharisees to be without validity—an action which must have entailed their expulsion from the sanhedrin (cf. the parallel in B. Kid. 66a). The conflict continued, and, according to Jos. Antiq. XIII.xv.5, Alexander Janneus (103-76) on his deathbed advised his wife Salome Alexandra to ally herself with the Pharisees. This she did (Simon ben Shetah, a leading Pharisee, was her brother), and during her reign (76-67) the Pharisees for the first time became the dominant party (Jos. War I.v.2).

3. **The Roman period.** The quarrel between Alexandra's sons, Hyrcanus and Aristobulus, led directly to the intervention of Rome in Jewish affairs of state.

a. Early intervention. Pompey in 63 B.C. abolished the monarchy and made Hyrcanus II high priest and ethnarch of the Jews (Jos. Antiq. XIV.iv.4; War I.vii.6). Gabinius, the proconsul of Syria (57-55), went further: he deprived Hyrcanus of civil power and degraded the sanhedrin of Jerusalem by dividing Jewish territory into five administrative districts with a council over each (Jos. Antiq. XIV.v.4; War I.viii.5). A new order was introduced by Caesar in 47 B.C.: Hyrcanus again became high priest and ethnarch of the Jews, while Antipater was made governor of Judea (Jos. Antiq. XIV.viii.3; War I.x.3); and apparently the sanhedrin was restored to its former status as the supreme council over the whole extent of Jewish territory in Palestine, for Herod in his youth had to appear before it because he had trespassed on its authority by putting to death a rebel chief and many of his followers in Galilee (Jos. Antiq. XIV.ix.3-5).

b. Herodian rule. At the beginning of his reign Herod the Great (37-4 B.C.) sought to destroy the influence of the priestly aristocracy by taking bloody action against them (Jos. Antiq. XIV.ix.4; XV.i.2). Later he successfully prosecuted his capital charge against the aged Hyrcanus before the sanhedrin (Jos. Antiq. XV.vi.2). Not being qualified by his descent to assume the high priesthood himself, he reduced the importance of that office by making it no longer hereditary and tenable for life; no fewer than seven high priests were arbitrarily appointed and deposed during his reign (cf. Jos. Antiq. XV.iii.1, 3; ix.3; XVII.vi.4; etc.). The authority of the sanhedrin was curtailed, and Herod soon came to be hated as a cruel tyrant. After his death an embassy from Jerusalem went up to Rome and asked that Palestine be incorporated into the Roman province of Syria, contending that, with the greater autonomy this would bring, the Jews would quickly show that they were not really an unruly people (Jos. Antiq. XVII.xi.2). Despite this plea Augustus confirmed Herod's testament, save that Archelaus was appointed ethnarch until he proved himself worthy of the royal title. This he never did, and, after a delegation from Jerusalem and Samaria had complained of his misgovernment before Augustus, he was banished to Gaul (Jos. Antiq. XVII.xiii.2; War II.vii.3), and his ethnarchy (Judea, Samaria, and Idumea) was put under Roman procurators (A.D. 6).

c. Procuratorial government. With the introduction of the new system the territory over which Archelaus had ruled became an imperial province under a procurator of equestrian rank, and the taxes for which the sanhedrin was responsible (like the tolls collected by the *publicani*) would go directly into the *fiscus*, or imperial treasury. The Roman officials did not share the Herodian jealousy of the local aristocracy, representatives of which, together with leading scribes or learned lawyers, appear to have mainly made up the composition of the sanhedrin (cf., e.g., Mark 14:1, 53). The nobility being predominantly Sadducean and the lawyers predominantly Pharisaic, the sessions could be enlivened by stormy debates (cf. Acts

23:1-10). The internal government of the province seems to have been largely in the hands of the sanhedrin, and its authority in judicial matters finds recognition in many passages in the NT (cf. Matt. 5:22; Mark 14:55; John 11:47; Acts 4:15; 22:30; etc.). To what extent (if any) it had constitutional responsibility for the administration of justice in the tetrarchies of Antipas and Philip is disputed; but its religious authority would be recognized by Jewish communities even beyond the boundaries of Palestine (cf. Acts 9:2, etc.).

The high priest acted as president and convener of the sanhedrin (cf. Mark 14:53; Acts 24:1; Jos. Antiq. XX.ix.1; etc.), although, of course, it was in the power of the Roman authorities to proceed independently of the sanhedrin and to call the sanhedrin together to deal with any case they considered required their attention (cf. Acts 22:30; 23:26-30). The procurator (or the legate of Syria) exercised the right of appointing and deposing the high priest (cf., e.g., Jos. Antiq. XVIII.ii.2), but he would be careful to restrict his choice to members of the priestly oligarchy. Of the eighteen high priests who held office in A.D. 6-67, sixteen represented only five families, and those who belonged to such families played an important role in the public life of the time, though their effective power was curbed by the opposition of the Pharisees (Jos. Antiq. XVIII.i.4). Strictly there was only one high priest at a time, but the word "high priest" could be used in the plural (RSV "chief priests") in a general sense to denote the sacerdotal aristocracy (e.g., Luke 23:13; Jos. War VI.ii.2); and it is noteworthy that Josephus could complain that the Zealotic revolutionaries, by appointing Phanas to the high priesthood in 67, "had robbed of their dignity those families from which in their order the high priests had been selected" (War IV.iii.6).

A new regime was established by Claudius in 41, when Herod Agrippa I was made king of all the territory (save Iturea) which had been ruled over by his grandfather Herod the Great. After Agrippa's death in 44 the whole of his kingdom became an imperial province under a procurator of equestrian rank (as the Judean district had been previously). There were seven procurators before 41, and seven again after 44. In response to a Jewish petition Herod of Chalchis and, after his death in 49, Agrippa II were granted the authority to appoint high priests (Jos. Antiq. XX.i.1-3; viii.8; ix.7). There were seven high priests in 6-41, and eleven were appointed from 41 up to the time when the Zealots took charge of affairs during the great rebellion of 66-70.

d. After A.D. 70. Thanks to the insurrection, the large measure of autonomy which had hitherto been conceded to the Jewish people was taken away, and the sanhedrin as a political institution with authority other than purely religious ceased to exist. The sanhedrin founded at Jamnia (which after several migrations settled in Tiberias toward A.D. 200), though held in rabbinical literature to be a direct continuation of the old institution, established under Moses and reorganized by Ezra and the men of the Great Synagogue at Jerusalem (cf. M. R.H. 2.9; M. Ab. 1.1-2.8; etc.), was really an assembly of religious teachers, the effectiveness of whose pronouncements

was limited by the willingness of Jewish communities to abide by their rulings. It was an ecclesiastical tribunal of an academic character and, despite the fact that it came to acquire much power and influence in Jewish circles (cf. Origen *Letter to Africanus* 14), talmudic literature still leaves traces of a deep-seated regret that the veritable sanhedrin was no more (e.g., M. Soṭ. 9.11).

C. THE GREEK AND THE HEBREW SOURCES. According to the Greek sources, the Apoc., the NT, and the writings of Josephus, the sanhedrin was basically composed of men drawn from the priestly nobility. On the other hand, according to talmudic literature, it was a court of experts in the interpretation of the law, the priestly element not appearing and the Sadducees scarcely taken into account save as exponents of unacceptable opinions; and pairs of famous rabbis, whose names can be given, filled the offices of president (נָסִים) and vice-president (אֲבִיבֵית־דִּין) from ca. 160 B.C. to the time of Hillel and Shammai (ca. 30 B.C.—A.D. 10). One possibility is that this difference in representation is to be accounted for by supposing that there were two sanhedrins in Jerusalem, one being a political, the other a religious, institution. It seems much more probable, however, that the rabbinical picture is due to a tendency to read the past in the light of the present, the sanhedrin as it existed prior to the great insurrection being thought of in terms of the court founded at Jamnia, the destruction of Jerusalem in 70 having eliminated the influence of the priestly aristocracy with its Sadducean traditions. Of course, this does not necessarily mean that talmudic literature preserves no trustworthy reminiscences concerning the sanhedrin of the period before 70; on many points of detail, indeed, it may well be reliable, but modes of representation having no corroboration in the Greek sources should always be treated with a certain reserve.

As regards the usual talmudic view that the sanhedrin was composed of seventy-one members (M. Sanh. 1.6; cf. Num. 11:16), it may be observed that Josephus appointed seventy elders when preparing for the rising in Galilee and that the Zealots established a tribunal of seventy members in Jerusalem during the great rebellion (Jos. War II.xx.5; IV.v.4). Among other points of interest we note that vacancies were filled by co-optation (M. Sanh. 4.4), and that membership was confined to Jews of pure Israelite descent (M. Sanh. 4.2). There were no sittings on sabbaths or on feast days (M. Yom. Tob. 5.2), and a capital case could not be tried on the eve of a sabbath or festival, as it was not legal to pass a sentence of death until the day following the trial; nor could a capital case be tried by night (M. Sanh. 4.1). The sanhedrin held its sessions in the "hall of hewn stone" (לִשְׁבֵּת הַגִּזִּית) on the S side of the great court of the temple (M. Mid. 5.4). On the other hand, we gather from Josephus that the council chamber was near the Xystos and outside the upper city (War V.iv.2; VI.vi.3), and this may be indicated by the rabbinical name (ξυστός = גִּזִּית); but some scholars conjecture that Josephus is referring to the locus of the later sittings, which, according to a tradition preserved in the Babylonian Talmud, was situated

outside the temple area (Sanh. 41a; 'A.Z. 8b; etc.). Also, according to the NT, the sanhedrin could hold its sessions in the residence of the high priest (Mark 14:53).

As to procedure, the members sat in a semi-circle so that they could be seen by one another, and before them stood the two clerks who recorded the votes for and against acquittal (M. Sanh. 4.3). In capital cases certain special formalities had to be adhered to (M. Sanh. 4.1; 5.5). The sanhedrin does not seem to have been a court of appeal in the sense that a condemned person could appeal to it against the judgment of a lower court, but it could be requested to intervene whenever an inferior court was unable to agree as to the interpretation of the Mosaic law in any particular case (M. Sanh. 11.2; cf. Jos. Antiq. IV.viii.14).

D. COMPETENCE. There are several pieces of evidence which have to be considered in any discussion of the important question whether the sanhedrin during the procuratorial period was constitutionally competent to execute a capital sentence.

According to Mark's Gospel, which probably contains the passion narrative in its earliest extant form, Jesus was arrested at the order of the Jewish authorities, but executed at the order of Pilate; and this may be taken to imply that the sanhedrin was not authorized to inflict the death penalty without procuratorial consent. It is possible, however, that Jesus was handed over to Pilate on a political charge of sedition because he had not committed an obvious capital offense against the Mosaic law, and that Mark's account of the nocturnal trial (14:55-65) is anachronistic, a reflection of the fact that certain Christians had been condemned to death by the sanhedrin for committing blasphemy in identifying the crucified Jesus with the promised Messiah (cf. Deut. 21:23; Gal. 3:13; 5:11); Jesus had not yet been "accursed by God" on Calvary when he stood before his accusers.

In John 18:31 the Jews informed Pilate that it was not lawful for them to put any man to death. But is it likely that Jews would have reminded the procurator of the limitations of their legal authority, or that Pilate would have required any such reminder? The Fourth Evangelist here seems to have an apologetic aim in view—to show that a constitutional restriction was the only thing that prevented the Jews from putting Jesus to death; and vs. 32 suggests that a theological motive is also involved.

In J. Sanh. 1.1; 7.2 we read that the power to pass capital sentences was taken away from the Jews forty years before the destruction of the temple. But this may be an inference based (a) on a tradition that the sanhedrin ceased to hold its sessions in the temple forty years before its destruction, and (b) on a rule, which was apparently not laid down before ca. 150, that the sanhedrin could pass a capital sentence only when sitting in the temple chamber (cf. B. Sanh. 41a; B. 'A.Z. 8b).

In the *Pericope Adulterae* (John 7:53-8:11) the following dilemma may be intended: If Jesus pronounced against carrying out the requirements of the Mosaic law (Deut. 22:23-24), he would be discredited by the people; whereas if he counseled ac-

tion contrary to the Roman imperial decrees (by pronouncing that the woman should be put to death), his enemies would secure material for a grave accusation against him. On the other hand, should a dilemma be involved, it could equally well be of the form: If Jesus declared that the prisoner should be released, he would be contravening the Mosaic law; whereas if he declared that the Mosaic ruling should be applied, he would stand condemned by his own ethical teaching concerning the necessity of love and forgiveness (cf. Luke 6:27-38).

In the Megillath Ta'anith 6 we read that five days after the withdrawal of the Roman troops in 66 the Jews were again able to put evildoers to death. But in the eyes of the Zealotic revolutionaries the greatest sin was committed by members of the chosen race who betrayed Israel by supporting the Roman government, and the passage may mean that soon after the removal of the occupation forces from Jerusalem, faithful Jews were free to deal with traitors and apostates after the manner required by divine justice.

From Jos. Antiq. XVIII.iv.1 we learn that Pharisaic pressure restrained the Sadducean magistrates who were wont to be harsh in their judgments; there is no suggestion in the passage that any restraint or restriction came from the side of the imperial authorities.

According to Jos. Antiq. XX.ix.1, James and certain other Christians were put to death at the order of the sanhedrin; and although objection was taken to the action, the critics do not contend that the sanhedrin was formally incompetent to inflict capital punishment. The objection may have come from certain Pharisees who disapproved of the arbitrary way in which Ananus, the Sadducean high priest, filled vacant seats on the sanhedrin, and who perhaps took the view that an identification of the crucified Jesus with the Messiah was not blasphemy in the strict sense of the law of Moses (cf. Gamaliel's warning in Acts 5:33-42).

According to Acts 6:8-8:1, Stephen was condemned by the sanhedrin and was duly stoned to death. The proceedings do not seem to have constituted a case of mob violence: thus the precept of Lev. 24:14 was observed, the prisoner being taken out of the town to be stoned (Acts 7:58); and the witnesses, who must cast the first stones (Deut. 17:7; cf. M. Sanh. 6.4), laid their clothes at the feet of a prominent member of the council (Acts 7:58).

In M. Sanh. 7.2 we read of a priest's daughter who was burned to death for committing adultery. On the basis of two other rabbinical passages (B. Yeb. 15b; T. Sanh. 9.11), however, it could be argued that this execution took place during the reign of Agrippa I (41-44), when the procuratorial system of government was temporarily suspended. On the other hand, these two passages do not exclude the possibility that the execution took place as late as 53.

In M. Sanh. 7.1 strangling is mentioned as one of the four authorized modes of capital punishment, although this punitive measure is nowhere referred to as a recognized Jewish practice either in the OT or in the Greek sources. It seems to have been introduced by the rabbis toward 100, perhaps in an effort

to avoid official detection of the fact that they continued in some degree to exercise judicial authority after 70, when the sanhedrin was deprived of all constitutional power.

According to Philo *Embassy to Gaius* 39, even the high priest was liable to the death penalty if he entered the holy of holies in the temple at Jerusalem at other than the prescribed times.

An inscription discovered in 1871 by Clermont-Ganneau definitely shows that the Jewish authorities were formally entitled by the imperial government to put any Gentile to death if he ventured to pass into the sanctuary beyond the second enclosure of the temple (cf. Jos. Antiq. XV.xi.5; War V.v.2; VI.ii.4; Philo *Embassy to Gaius* 31; Acts 21:29; Eph. 2:14). The ordinance doubtless implies that a special dispensation had been granted to the Jewish authorities. Generally the sanhedrin would be competent to deal only with religious offenses committed by Jews. The procurator would be ultimately responsible for the maintenance of public order, and he would be kept informed of the proceedings at Jewish courts. But it ought not to be inferred from the special character of the ordinance that the inscription has no bearing on the general question under consideration. For if in certain circumstances the Jewish authorities could have a Roman citizen put to death—a right not even enjoyed by the procurator himself—is it not likely that the sanhedrin would be empowered to execute any Jewish citizen accused and found guilty of a capital offense against the law of his religion?

T. A. BURKILL

SANSANNAH sān sān'ə [סנסננה]. A town in the S part of Judah in the neighborhood of Ziklag (Josh. 15:31). The parallel lists of the cities of Simeon give HAZAR-SUSAH; HAZAR-SUSIM; and are apparently the same as "Sansannah," a form which probably arose from a scribal error due to the preceding name, Madmannah.

S. COHEN

SAPH sāf [שפ] (II Sam. 21:18). Alternately: SIPPAI sīp'ī [שפי] (I Chr. 20:4). One of the descendants of the giants. He was slain by a member of the

"Thirty," Sibbecai the Hushathite, in a Philistine encounter at Gob. Saph is included among the descendants of the giants who, probably as foreign mercenaries serving with the Philistines, took up their residence at Gath.

E. R. DALGLISH

SAPHAT. KJV Apoc. form of SHEPHATIAH 6.

SAPHATIAS. KJV Apoc. form of SHEPHATIAH 6.

SAPHETH. KJV Apoc. form of SHEPHATIAH 7.

SAPHIR. KJV form of SHAPHIR.

SAPPHIRA סַפְּרִיָּה [Σαπφείρη; Aram. שפירא, beautiful; related to SHIPHRAH]. A member of the primitive Christian community in Jerusalem, wife of ANANIAS.

Acts 5:1-10 relates that Sapphira and her husband sold a piece of property and pretended to give the entire proceeds to the community while keeping part for themselves. When rebuked by Peter for this deceit, each in turn fell dead.

T. S. KEPLER

SAPPHIRE. A transparent rich-blue corundum. It is of the same chemical constituents as the ruby. There are also white, green, purple, and yellow sapphires. The word translates the following:

a) סַפִּיר = σάπφειρος (RSV mg. "lapis lazuli," in accord with Theophrastus and Pliny). The biblical contexts suggest brilliance and preciousness, with no indication of color or hardness. God stands on a tile of sapphire (Exod. 24:10); his throne is sapphire (Ezek. 1:26; 10:1). It is one of the marvels derived from the earth (Job 28:6, 16). The New Jerusalem is laid in sapphire (Isa. 54:11). It is a stone in the breastpiece of judgment and the ephod (Exod. 28:18; 39:11), a stone in the covering of the king of Tyre (Ezek. 28:13). It is used of the girdle worn by the scribe (Ezek. 9:2 LXX). The beauty of the form of the princes of Jerusalem had been like sapphire (Lam. 4:7). The body of the lover is a column of ivory adorned with sapphires (Song of S. 5:14).

b) Σάπφειρος (RSV mg. "lapis lazuli"). It is the second jewel in the foundation of the walls of the New Jerusalem (Rev. 21:19).

c) Ὑακίνθινος (RSV mg. "hyacinth"; KJV "JACINTH"). Color of the breastplates of the riders in Rev. 9:17.

W. E. STAPLES

SARA. KJV Apoc. and NT form of SARAH.

SARABIAS. KJV Apoc. form of SHEREBIAH 2.

SARAH sār'ā [שררה; Σάρρα, princess, mistress]; KJV alternately: SARAI sār'ī [שרי; LXX Σάρα; Heb. 11:11; I Pet. 3:6; see below], SARA. 1. The wife of ABRAHAM, and the mother of ISAAC.

The change from "Sarai" to "Sarah" at Gen. 17:15, together with the change from "Abram" to "Abraham" at vs. 5, is a significant clue for literary criticism. This is apparently the work of a late writer, whether the author of Gen. 17 himself or a redactor, since all previous and subsequent occurrences of these names have been made to conform to this

change. It is noteworthy that Gen. 17:15 offers no etiological explanation of the meaning of "Sarai" and "Sarah." The former is probably the old Semitic feminine form, and "Sarah" was substituted for it as a later grammatical form. Both names evidently mean "princess" or "mistress" (cf. שר, "prince," from the root שרר, "to rule"), although there is a possibility that the root is שרה, "to strive" (as in "Israel"), with reference to Sarah's contentiousness toward Hagar. Once-popular identifications with Semitic goddesses have little value.

Sarai is first mentioned in Gen. 11:29-30, where it is stated that she was Abram's wife and that she was childless. According to 20:12, she was also Abram's half sister. She accompanied him to Haran (11:31) and subsequently to Canaan (12:5). Judging from 12:4; 17:17, Sarai was sixty-five years old at this time; but despite her age she had retained so remarkable a beauty that when Abram found it advisable to go to Egypt to escape famine in Canaan, he schemed with her to tell the half-truth that they were brother and sister, out of anxiety for his personal safety (12:10-13). As a result Pharaoh took her into his house, but plagues sent upon him caused him to understand that Sarai was really Abram's wife, and he expelled them together from his land (12:14-13:1).

Gen. 16 recounts Sarai's strife with her maid HAGAR. Despairing of herself producing the heir which God had promised Abram, she gave Hagar to him with the hope that she might produce a child for them. However, Sarai could not suppress her resentment when Hagar conceived and became contemptuous toward her (vss. 1-5). In anger she had Hagar expelled from the camp, but after a vision of God in the desert her maid returned to bear ISHMAEL (vss. 6-15).

At the time that her name was changed to Sarah, God promised that she would have a great posterity through a son who would be born to her within a year (Gen. 17:15-21). This promise was repeated at the time of a subsequent visit to the patriarchal couple at Mamre by Yahweh and two angels in human form (18:1-10). Sarah overheard Yahweh speaking this; but because she was now ninety years old, she laughed in disbelief, and for this Yahweh reproved her (vss. 11-15).

At this point in the narrative a second account of Abraham and Sarah's dissembling about their relationship intrudes (ch. 20; cf. the parallel story involving Isaac and Rebekah in ch. 26). This incident took place in Gerar. Thinking them to be brother and sister, King Abimelech took Sarah into his house, but he was warned by God in a dream not to touch her (20:1-7); thereupon he reprimanded Abraham but gave Sarah a gift and sent them away with permission to live in his territory, and a curse of sterility which God had put upon his household and flocks was removed (vss. 8-18).

According to the divine promise, Sarah conceived in her old age and bore Isaac (21:1-3), whose name is explained from her joyous laughter at his birth (vss. 6-7). At Isaac's weaning feast, she jealously demanded the expulsion of Hagar and Ishmael, which this time was permanent (vss. 8-21). Sarah died at Kiriath-arba (Hebron) at the age of 127 (Gen. 23:1-

2) and was buried in a family cave at Mach-pelah purchased by Abraham from the Hittites (vss. 3-20; 25:10; 49:31). She is mentioned once more in the OT at Isa. 51:2, where she is recalled as an ancestress of the Hebrews.

The NT has several reminiscences of Sarah. In Rom. 4:19 her prolonged barrenness is cited as evidence of Abraham's faith. In 9:9 her conception of Isaac as the heir of promise in the place of Ishmael is mentioned as an instance of divine sovereignty in election. Her own faith is cited in Heb. 11:11, and her submissiveness to her husband is chosen in I Pet. 3:6 as an example of true godly adornment. Gal. 4:21-31 plainly refers to her in an allegorical contrast to the slave-girl Hagar, although it does not mention her name.

That postbiblical Judaism looked upon its first mother not only as an example of piety but also as a paragon of beauty may be observed in some of its legends and midrashes, but the most striking and detailed description of her charms has been discovered among the Dead Sea Scrolls. In a partially preserved Aramaic document dating from the first century A.D. an ancient scribe has pictured the retainers of Pharaoh praising Sarah to their lord, describing in detail her hair, her eyes, her mouth, and other parts of her body, and rising to a climax in the hyperbole: "Above all women is she lovely and higher is her beauty than them all."

24. General view of Sardis, showing the two high remaining pillars of the temple of Artemis

tary, the Pactolus (modern Sart Çay), N of the Tmolus Mountains (modern Bozdağ). The site is well known, as it contains a number of striking ancient landmarks: an acropolis formed by a craggy rock, actually a spur of the Tmolus, on the E side of the Pactolus; Roman and Byzantine ruins at the foot of the citadel; the temple of Artemis, and the cemetery of the "thousand hills" (Bin Tepe), across the Hermus. Fig. SAR 24.

2. Topography. a. City and acropolis. The acropolis is the most impressive feature in the present-day scenery.* Although heavily eroded, it still carries the ruins of fortification walls which are made of reused material of classical-to-Byzantine origin. The lower city was also fortified, but at present a poor Byzantine wall is the only known remnant of the lower circuit to the N of the citadel. Among the ruins of the city are a Roman theater and stadium, both constructed in concrete, and a large rectangular concrete building. Near the stadium there is a ruined

marble arch; to the W nearer the Pactolus a large building awaits further investigation. A Roman aqueduct can be traced leading from Mount Tmolus to the acropolis. Fig. SAR 25.

b. Temple of Artemis. The outstanding architectural relic is the temple of Artemis, to the W of the acropolis. Its original form is hardly known. The cult was dedicated to a local Asiatic goddess, identified with Artemis but sometimes referred to as Cybele. During Croesus' rule the temple must have been of Ionic appearance; but this archaic temple was destroyed in the Ionic revolt of 499 B.C. when the

26. The temple of Artemis at Sardis

lower city of Sardis was burned (Herodotus V.102). The present building is a fourth-century reconstruction on the same monumental scale as the temple of Artemis at Ephesus, but it was never finished. Roman repairs were made to its E façade after an earthquake in A.D. 17 had brought a landslide from the acropolis down on the temple. Two columns of the ornate temple were still standing when the American excavations began in 1910, although the building had been in steady decay since the sixth century A.D. Fig. SAR 26.

c. Churches. A small brick church was built against the SE angle of the peristyle of the temple in the fourth century A.D. It is excavated and well preserved. There are some other ruins which may prove to be churches, although excavation would be needed to investigate whether any specific church can be identified and attributed to the period of Rev. 1:11. On the N side of the city eight large piers of white marble, sometimes attributed to a church, deserve examination.

d. Cemeteries. The cemeteries of ancient Sardis are twofold. Modest rock-cut tombs exist on the slopes of the hills across the Pactolus to the W and even on the E bank of this river. A characteristic element in the modern scenery of Sardis is the necropolis, which lies some seven miles to the NW of the ancient city across the Hermus River, S of the Lake of Gyges (modern Marmara göl). The modern name of the cemetery, Bin Tepe ("a thousand hills"), is a numerical exaggeration for the multiplicity of burial mounds visible on the horizon. There are *ca.* a hundred tumuli, round hills erected over chamber tombs. In general appearance Bin Tepe is related to the tumulus cemetery to the NE of the Phrygian city of Gordium, and to Etruscan cemeteries (cf. Caere). The largest tumulus is the "tomb of Alyattes," on the E side, some 150 feet high and surrounded by a stone retaining wall (Herodotus I.93). It covered a stone tomb chamber; but modern archaeological investigations of Bin Tepe have not yet been made, so that the whole complex is insufficiently known. It can be presumed to contain the royal and aristocratic burials of the Mermnad Dynasty.

3. History. The history of Sardis is closely tied up with that of LYDIA, whose capital it remained throughout the political vicissitudes of the region. There is some evidence for prehistoric habitation; but the leading position of the city must be a development of the Lydian period under the kings of the Mermnad Dynasty. Sardis appears in the royal inscriptions of the Persians as *Sparda* (Darius, Behistun § 6; Babylonian *Sa-par-du*), a name designating the Lydian land, as well as the city. Sardis became the most important Persian city in Asia Minor. It lay at the W end of the great royal road which went from Susa across the rivers and through Asia Minor. A branch road led from Sardis to Ephesus (Herodotus V.52-54). The wealth of the city of the Persian period can be gauged to some extent from the jewelry found in tombs of the Pactolus cemetery. Among the gold plaques, necklaces, pendants, bracelets, and seal stones there are excellent samples of Achaemenian artistry.

Sardis may appear in the OT in Obad. 20 as SEPHARAD (ספראד), as a place where exiles from

Jerusalem were living during the fifth century (?) B.C.

In 334 the city surrendered to Alexander, who left a garrison in the acropolis. Sardis remained the administrative center under the Seleucid Dynasty. In the struggle of the usurper Achaicus against Antiochus III the lower city was burned (216 B.C.). Sardis was yielded to the Romans in 189 and put under Pergamene rule until 133 (see LYDIA). Under the Romans, Sardis became the center of a *conventus iuridicus* which encompassed a large number of Lydian cities. It enjoyed great prosperity in the first three centuries A.D. Trade and industry flourished. After the earthquake of 17, Tiberius facilitated reconstruction by his munificence (Tac. Ann. II.47). Hadrian visited Sardis in 123.

From the first century on, Christianity gained in Sardis. Melito, bishop of Sardis in the time of Marcus Aurelius, wrote a large number of treatises, one of which, a sermon, has recently been recovered in the Chester Beatty Papyri. After the reorganization of Asia by Diocletian in 297, Sardis became the capital of the revived district of Lydia, seat of the governor and of the archbishop of Sardis, who was metropolitan.

Sardis was conquered by the Arabs in 716. It continued to be inhabited even after its destruction by Tamerlane in 1403. At present it is the site of a small village which still preserves the name of Sart.

4. Excavations. An expedition under Howard Crosby Butler worked at the site from 1910-14. A joint expedition of Harvard and Cornell universities in co-operation with the American Schools of Oriental Research started new excavations in 1958. The identification of the large Roman buildings will have to await the outcome of the architectural analysis now in progress.

SARGON sär'gōn [סַרְגִּון; Akkad. *Šarru-kēn*, the king is legitimate]. 1. Sargon of Akkad (Agade); ca. end of third millennium, king of Akkad.

With the exception of a few damaged lines on a stela found in Susa, all historical inscriptions referring to Sargon of Akkad are extant only on later copies made and found in Nippur. Besides this body of material we have a group of literary texts in Sumerian and, mostly, in Akkadian, containing legendary tales centering around Sargon, and also sections from late chronicles, as well as references to him in omens.

In his inscriptions Sargon claims to have extended his realm from the Upper to the Lower Sea (i.e., from the Persian Gulf to the Mediterranean Sea), specifically mentioning Elam (and Barahshum); Mari; and, farther to the W Tutul, Jarmuti, Ibla, and the semimythical localities of the Cedar Forest and the Silver Mountain. From other sources, epigraphic and archaeological, we have evidence which places Sargon and his powerful grandson Naram-Sin as far abroad as Nineveh, Chagar-Bazar, and Tell Brak in Upper Mesopotamia, and Diarbekir on the upper Tigris. The legends, especially the historical epic, *šar tamhari*, take him deep into Anatolia; and certain passages in the historical texts refer to peaceful commercial relations with the E regions, around the Persian Gulf, of Magan, Meluhha, and the island of Telmun. As to Babylonia proper, Sargon, a high court official of King Ur-Zababa of the N city of Kish, conquered first that city and defeated the powerful Lugalzagesi of Umma, who had succeeded, for the first time in Mesopotamian history, in reaching out beyond the conquests of neighboring city-states to extend his sway over the entire S part of the region. During the fifty-six years of ruling which the king list gives to Sargon, he built, in N Babylonia, a new capital, Agade, which so far has not yet been located, and succeeded, perhaps by means of a standing army and an effective bureaucracy, in organizing the core of his far-flung state and at least in policing the outlying territory. His success in this respect is borne out by the fact that his successors—i.e., his sons Rimush and Man-ishtisu, and the latter's son Naram-Sin—could hold on to their realms for nearly sixty years in spite of rebellions from within and the attack of external enemies.

The legends reflect the unique achievements of Sargon and elaborate on his far-reaching campaigns and marvelous prowess. They endow the story of his birth and rise to power with mythological trappings and attribute his success to the love of the goddess Ishtar.

brother Shalmaneser V, and the father of Sennacherib. The circumstances of Sargon's accession to the throne remain obscure. When his brother Shalmaneser V was murdered during the siege of Samaria, certain events must have happened in Assyria which brought Sargon to the throne. The fact that Sargon refers to himself only once as the son of Tiglath-pileser III and that there are some clearly derogatory remarks concerning Shalmaneser V in his inscriptions makes it clear that an internal conflict brought about the accession of Sargon. Fig. SAR 27.

Among his first acts was the granting of a new charter to the city of Assur and of important privileges to sanctuaries. In his first campaigns, fought to establish his dominion, he was defeated near Der by Merodach-baladan, then king of the small kingdom of Bit-Yakin, who had the assistance of the Elamite king Humbanigash I. Sargon then turned against Syria, where, since the death of his brother, Shalmaneser V, the Assyrian rule had collapsed at least as far N as Hamath. On the historic battlefields of Qarqar on the Orontes (where in 853 Shalmaneser III had fought a similar coalition) he met the kings of Hamath and Damascus and others whom the Egyptian general Sib'u had been able to muster. The defeat of the allies was complete, and Sargon pursued the Egyptian contingent as far as Raphia, from

where the general fled home after another defeat. Sargon did not cross the Egyptian border.

The next years were taken up by campaigns directed toward two main military objectives: first, the advance toward SE Asia Minor, the containment of Midas, king of the Muski, and whatever was necessary to secure Assyrian communications to that front; and second, the offensive against Urartu. In both endeavors Sargon was extremely successful. He reached Cilicia and the Mediterranean coast in 712, held Asia Minor as far as the Halys River, erected a stela on Cyprus (Kition near Larnaca) and conquered and destroyed Musasir, the capital of Urartu, in 714—an event of which we know more than we do of any other of Sargon's campaigns, because of a special report of it (found in Assur) in the form of a letter addressed to Ashur and the other gods of the capital and to its citizens.

The conquest or reconquest of Samaria spelled the end of the kingdom of Israel, whose inhabitants were deported, first to a region on the River Habur, and then still farther, into Media, where they disappeared. In their place were settled Arameans deported from just-conquered Hamath, later on Arabs were moved there, and eventually the defeated inhabitants of Cutha and Babylon.

Not until more than ten years after his accession to the throne did Sargon turn against Babylon, where Merodach-baladan's rule seems to have been beset by internal conflicts. Babylon was given up without a fight, but Merodach-baladan escaped into Elam. Sargon made himself king of Babylon in 709, fortified the frontiers toward Elam, and received tribute from Telmun, the principal island in the Persian Gulf. In 711 another insurrection, caused by the king of Ashdod, and, of course, supported by Egypt, was crushed (Isa. 20:1).

In the following years, campaigns were made mainly toward the W, and they led to the annexation of the region between the Euphrates and the Taurus (Commagene) and to the N of it. The menace of the Cimmerians appeared for the first time when they moved into Asia Minor after clashes with the kings of Urartu. On one of the rather minor campaigns against them, Sargon was killed; an eponym list reads laconically: "The king was killed, the encampment of the king of Assyria was [. .]."

29. Gateway of two human-headed winged bulls at Sargon's palace in Khorsabad (722-705 B.C.)

With the exception of the customary rebuilding of the sanctuaries in Babylonia, Sargon's main interest was concentrated upon the building of his own city, called Dur-Sharruken (Khorsabad),* near Nineveh. It was begun in 713 and inaugurated in 707 but hardly ever really inhabited, and finally was abandoned at the king's death. It represents one of the most ambitious projects of any Assyrian king with regard to building a new city in which to reside in a new and splendid palace. Figs. SAR 28; JAC 3; SAR 29.

SARID sār'id [שריד]. A border town in the territory of Zebulun (Josh. 19:10, 12). The LXX reading "Sedud" is more correct than the MT "Sarid." It is almost certainly to be identified with Tell Shadud, a small mound located on the N edge of the Valley of Jezreel, approximately six miles N-NE of Megiddo. Surface explorations have shown that the site was occupied in the Late Bronze, Iron I, Hellenistic-Roman, and early Islamic periods.

SARON. KJV NT form of SHARON.

SAROTHE sār'othī [Σαρωθει(B), Σαρωθει(A)] (I Esd. 5:34). Head of a family of sons of Solomon's servants who returned with Zerubbabel. His name is omitted in the parallels Ezra 2:57; Neh. 7:59.

C. T. FRITSCHE

SARSECHIM sār'sə kīm [שרסכים] (Jer. 39:3). The name or title of one of the Babylonian princes participating in the capture of Jerusalem. If the word-division of the MT is incorrect, the name may be "Nebo-sar-sechim," a corruption of "Nebushazban" (vs. 13); or it may be a title, שר־סכיים (*sar sukkim*), "chief of the slaves" (?). J. M. WARD

SARUCH. KJV NT form of SERUG.

SASH [שָׁרָף] (Isa. 3:20); KJV HEADBAND. Alternately: ATTIRE (Jer. 2:32). That which is bound on; a band around the waist. See DRESS AND ORNAMENTS § 6.

SATAN sā'tən [שָׂטָן]. The archfiend; chief of the devils; instigator of all evil; the rival of God; the Antichrist.

1. **Meaning of the term.** The Hebrew root שָׂטַן (cf. Arabic *ṣ-ṭ-n*), from which the name Satan derives, means primarily "obstruct, oppose." It is used in the OT of obstructing a man's path (Num. 22:22, 32), opposing in war (I Sam. 29:4), preferring charges in a court of law (Ps. 109:6), and playing the part of an adversary in general (Pss. 38:20—H 38:21; 109:4, 20, 29). Cognate is the root שָׂטַם (Gen. 27:41; Job 16:9; Ps. 55:3—H 55:4; etc.), whence the noun מִשְׂטָמָה, "hostility" or "hatred" (Hos. 9:7).

The LXX renders the term uniformly by διάβολος, except in I Kings 11:14, 23, 25 (and in Codex Alexandrinus at Job 2:3), where it is treated as a proper name. Aq., Symm., and Theod. follow suit, except in Zech. 3:1 (and in the first-named's rendering of Job 1:6), where the word is transliterated. The Vulg. usually has *diabolus*; but in the three passages (viz., I Chr. 21:1; Job 1-2; Zech. 3:1-3) where the term is applied to a superhuman being, it treats it as a proper name.

In the Apoc. the form σατανᾶς occurs only at Ecclus. 21:27, but the substitute διάβολος is found in Wisd. Sol. 2:24.

On the usage in the Pseudep. and the NT, see §§ 3b, 4a, below.

2. **In the OT.** Nowhere in the OT does Satan appear as a distinctive demonic figure, opposed to God and responsible for all evil. To be sure, the name is applied in three passages (all postexilic) to a superhuman being, but in each case it is simply an appellative, not a proper name—i.e., it merely defines the role which the being in question happens to play in a particular situation.

a) In the prose prologue to the book of Job (chs. 1-2), the member of the divine entourage who impugns the integrity of the pious man of Uz and receives permission from Yahweh to put it to the test is described as "the satan" (הַשָּׂטָן; LXX ó διάβολος; but Vulg. *Satan*; Syr. סַטַנָּא). Here the name means no more than "the one who acts as ac-

cusor, or prosecuting attorney, on a given occasion." It is not implied that this is his constant name or role, nor even that he is inherently evil. Moreover, far from being the antagonist of God and the chief of a rival dominion, he is his subordinate and can act only with his consent and in accordance with his orders.

b) In Zech. 3:1-2 (519 B.C.; cf. 1:7), the celestial being who challenges the fitness of Joshua (Jeshua) ben Jozadak to function as high priest at the time of the restoration from the Babylonian exile, is likewise styled "the satan" (LXX ὁ διάβολος). Here again, no more is implied than an *ad hoc* accuser; certainly not an inherently malevolent fiend or antagonist of God. The role of this satan (i.e., prosecutor) is, in fact, simply part of the prophet's vision of a divine tribunal.

c) In I Chr. 21:1, "Satan" (LXX ὁ διάβολος) is said to have incited David to the sin of taking a census. Although the term is here used without the definite article, it is nonetheless no proper name, but simply a common noun (i.e., "a satan"), denoting a spirit—in this case, virtually a personification of human frailty—who happened on that particular occasion to act with untoward effect. The book of Enoch speaks similarly (40:7) of "satans"—in the plural; and the word is likewise employed as a common noun in the Dead Sea Scrolls (1QH fragments 4.6; 45.3; Formulary of Blessings), in the Talmud (Ber. 60b; Shab. 39b), in early portions of the traditional Jewish prayerbook, and in later Mandaean literature (e.g., Right Ginza 279.4: ܚܝܘܢܘܨܐ). Moreover, it is to be observed that in the earlier account of this incident, in II Sam. 24:1, it is Yahweh himself who is represented as having vengefully incited the king. Accordingly, the satan of the later version may well have been regarded as his instrument, rather than his rival.

3. In the Apoc. and the Pseudep. a. History of the concept. It is only in the Deutero-canonical scriptures that Satan begins to emerge as a distinctive personality. This development may be attributed to the special conditions that obtained during the Greco-Roman period, when the national fortunes of Israel were in eclipse.

The time-honored classic theory that disaster was a divine retribution for apostasy had become increasingly insupportable, both emotionally and intellectually. In the first place, it ran counter to the ineluctable fact of life that men who are visited with affliction will not readily reconcile themselves to the darkness unless confident of the dawn, nor be persuaded of God's justice unless convinced at the same time of his mercy (cf. Lam. 3:31-33). Secondly, unless there were some assurance that the misfortune was but temporary and that the promises of the covenant (cf. Deut. 30:3-5) would eventually be fulfilled, the Jews of that difficult time might just as well resign themselves to the fact that, its basic charter having thus been revoked, the *raison d'être* of Israel had come automatically to an end.

Judaism fought its way out of this dilemma by increasing recourse to the dualistic theory that the world was currently in the clutches of a demonic marplot who was responsible at once for the massive

sinfulness that had occasioned God's displeasure and for the vicious malevolence of Israel's oppressors. On this theory, the current "dark night" was not so much an expression of God's irremediable vengeance as a temporary setback in his continuous battle against the Evil One—a battle which would assuredly issue in his eventual triumph, the reassertion of his obscured verities, the salvation of the faithful, and the redemption of the ancient pledge.

The concept of the demonic marplot was derived from two main sources. On the one hand, out of the individual casual devils ("satans") of popular belief there now emerged the figure of an archdevil, who was the ultimate cause of evil not only in the sense of misfortune but equally of sin and crime, and who was therefore the "onlie begetter" of the current afflictions. Just as demons in general came to be regarded in late Greco-Roman thought as "antigods" (ἀντίθεοι; cf. Heliodorus *Aethiopica* IV.7; Pseudo-Iamblichus *De mysteriis* III.31.15), so this archdemon was the direct antithesis of Yahweh. It must immediately be added, however, that just as the concept of a supreme deity may express itself in henotheism as well as in monotheism, so that of a supreme devil did not automatically eliminate the countless individual devils of popular lore, but merely reduced them, by what may be termed "henodaemonism," to the status of his agents and adjutants.

b. *Names of Satan.* The archfiend was not always called Satan (or "the Satan"; Greek ὁ διάβολος); indeed, in the Deutero-canonical scriptures this title is relatively rare. His more usual name was BELIAL—i.e., "the Worthless One"—a term expressive more of his pragmatic effect than of his disposition. (Exactly comparable is the Gaelic "the Worthless One" as a sobriquet of the Devil.) Alternatively, he was known as *Maštemah* (Jub. 10:8; 11:5, 11; 17:16; 49:2; Zadokite Document 4:13; 5:18; 8:2; 16:5)—a name related philologically to *saṭan* and meaning "hostility." (This name, it may be added, reappears at a later date in the Ethiopic, Arabic, and Coptic versions of "The Prayer of the Virgin on Behalf of St. Matthias in the City of Bartos [i.e., among the Parthians].") Not impossibly, the feminine form *Maštemah* was chosen in preference to the masculine *Saṭan* in direct imitation of the Iranian Druj, the spirit of deceit and unrighteousness, who was regarded as female; see § 3e below.) Furthermore, in special contexts the demonic marplot continued to be designated by the name of one or other angel considered in earlier folklore to be responsible for this or that particular form of misfortune. Thus, as the bringer of death he might be called Gadriel (Enoch 69:6)—a name best explained as a distortion of *Qatriel*, from the Aramaic *q-t-r*, "intrigue"; or Sammael (e.g., Testament of Abraham 16)—i.e., "the angel of poison." It was said, in fact, that he had originally been an angel named Satanel, but that the divine element (*el*) had been cut from his name when he led a rebellion against God and was ousted from heaven (II Enoch 29:4).

c. *Role of Satan.* At the same time, whether or not he was actually called by that name, all the varying implications of the word שָׂטָן were indeed applied to him. He was the obstructor of men's happiness and

prosperity in that he led them to discord and violence (Test. Gad 4:7; Test. Benj. 7:1), licentiousness (Test. Reuben 4:7; Test. Simeon 5:3), and duplicity (Test. Asher 3:2). It was he, e.g., who had emplanted corruption among the sons of Noah (Jub. 11:5; II Enoch 22:42; cf. Gen. 6:10-12), who had led Dan to conspire against the life of Joseph (Test. Dan 1:7; cf. Gen. 37:20) and Potiphar's wife to attempt to seduce him (Test. Joseph 7:4; cf. Gen. 39:7). It was he too that had prompted the initial sin of man and thereby brought death into the world (Wisd. Sol. 2:24; II Enoch 11:74-80; 22:42). He was likewise the cause of sicknesses (Jub. 10:8); and, again, it was he that regularly sent ravens and other birds to peck the newly sown seed out of the earth (Jub. 11:11). Evil men were men who had fallen beneath his sway (Test. Asher 1:8; Test. Benj. 3:3, 8; 1QS 3.20-25). He was portrayed as flying through the air on his fell missions (Targ. Job 28:7), and all human tribulation was due to his malevolence (1QS 3.23).

Moreover, he was now represented as the obstructor (i.e., satan), not only of men, but also of God. He had been at work even before the creation of man (II Enoch 22:42), and he commanded his own rival hosts (Ascension of Isa. 2:9; Adam and Eve 16), though it was necessarily affirmed that he and they would eventually be worsted in a decisive combat (Enoch 67:6; 103:8; Test. Dan 5:10-11; Test. Judah 25:3; Sibylline Oracles 3:71 ff; 1QH 3.35; 6.29; 10.34-35; 1QM, *passim*, especially 1.10, 13-14; cf. also Mandaean Ginza [trans. Lidzbarski; 1925], pp. 16, 23).

There was, however, a certain fluidity about the concept, for the Evil One sometimes retained his earlier character of a servant, rather than an opponent, of God, and divinely appointed dooms and trials were thought to be executed through him. It was he, e.g., that was said to have instigated Abraham to the proposed sacrifice of Isaac (Jub. 17:16-18:12), an act which the Bible (Gen. 22:1) represents as a test of faith imposed by God himself. It was likewise he that served as God's instrument in the slaying of the first-born of the Egyptians (Jub. 49:2)—a view which may well have been suggested in the first place by seeing in the Hebrew word *מַשְׁחֵת*, "to destroy you," in Exod. 12:13 an allusion to the term *הַמַּשְׁחֵת*, "destructive angel," which was a common synonym or epithet of Satan at this period (cf. 1QH fragments 4.6; 45.3).

d. Reinterpretation of OT legends. As the figure of the Evil One developed, traditional legends were modified to accommodate him. Thus, as the ultimate source of death, he came necessarily to be identified with the serpent in the Garden of Eden (II Enoch 31:3; Adam and Eve 14-16; SoT. 9b; Sanh. 29a)—an identification which was probably influenced also by the common notion that serpents were demonic. Similarly, he was identified with the ringleader of the "sons of God" who had consorted with the daughters of men (Enoch 54:6; cf. Gen. 6:1-4), and with the angelic upstart who had been cast out of heaven (cf. Isa. 14:12-15). See LUCIFER.

e. Iranian influence. The other source of the concept of the Evil One was that Iranian dualism by which the Jewish masses were increasingly influenced during the Greco-Roman period. Satan was, to a

large extent, simply a Judaized version of the Avestan figures of Angra Mainyu (Ahriman), the inveterate foe of the supreme god Ahura-mazda (Ormazd); or of Druj, the spirit of deceit. Indeed, almost all the salient features of the Iranian myth were boldly transferred to him. Of Angra Mainyu it was likewise said that he had brought death into the world (Yasna 30.4), and that the devas, or evil spirits, were under his leadership (30.6). He too was represented as a father of lies (Yasht 31.3) and as the causer of bodily deformities and afflictions (cf. Vidēvdāt 2.29, 37; 20.3; 22.2). Moreover, just as the Dead Sea Hymns assert repeatedly that Belial will eventually be worsted (e.g., 3.35; 6.29; 10.34-35) and God's truth (*מִתְּמָה*) will emerge triumphant (e.g., 4.25), so the Avesta is insistent that Angra Mainyu and Druj will suffer a like discomfiture at the hands of Asha, the spirit of truth and normalcy (Yasht 19.96; Yasna 29.2; 30.8; 47.6). And just as the apocalyptic era of corruption is frequently described in the Deuterocanonical scriptures as the epoch of "wrath" (Ecclus. 48:10; Enoch 5:9; 69:18; 91:9; Testament of Abraham 19; cf. B.B. 10a; Shab. 11a; 'A.Z. 18b)—a term deftly referred to the wrath and indignation of God—so in the Avesta it is Aeshma, the spirit of wrath and fury, that is held to be responsible for the prevailing anarchy and chaos (Yasna 29.1).

f. Dissident views. There were, of course, dissident voices. In precisely the same way that the worship of angels was discountenanced by the rabbis and their very existence denied by the Sadducees (Acts 23:8)—evidently as an infringement upon the absolute sovereignty of God—so too was the tendency to resort to dualism as an escape from acknowledgment of God's chastisement. An echo of this protest may be heard in the declaration of Jesus ben Sirach (Ecclus. 21:27 [missing in the Hebrew text]) that "when an ungodly man curses Satan [*τὸν Σατανᾶν*], what he is really cursing is his own self." The passage is often rendered (as in the RSV):

When an ungodly man curses his adversary,
he curses his own soul,

but it is difficult to see what this can mean; whereas in the alternative translation the sense is transparent: the writer is protesting against the view that men can attribute their misdeeds to an independent Evil One; that figure of popular fancy, he avers, is really but a personification of their own natures!

4. In the NT. a. Names of Satan. Satan (usually Grecized as Σατανᾶς) is mentioned by name thirty-three times in the NT, but he appears also (thirty-two times) in the translated form, ὁ διάβολος, "the Obstructor, Devil." He is likewise styled: "the tempter" (ὁ πειράζων; Matt. 4:3; I Thess. 3:5; cf. I Cor. 7:5), "the evil one" (ὁ πονηρός; Matt. 13:19; I John 5:18), "the accuser" (κατήγορος; Rev. 12:10), "the enemy" (ἐχθρός; Matt. 13:39; Luke 10:19), "the Plaintiff" (ἀντίδικος; I Pet. 5:8; RSV "the devil"), "the prince of demons" (ἄρχων τῶν δαιμονίων; Matt. 9:34; 12:24; Mark 3:22; Luke 11:15), "the ruler of this world" (ὁ ἄρχων τοῦ κόσμου τούτου; John 12:31; 16:11), and "the prince of the power of the air" (ἄρχων τῆς ἐξουσίας τοῦ ἀέρος; Eph. 2:2). In II Cor. 6:15 he bears the alternative proper name of Beliar

(i.e., BELIAL), and on two occasions (Matt. 10:25; 12:24, 27; cf. Mark 3:22; Luke 11:15, 18-19) Jesus styles him BELZEBUL, a quasi-mythological sobriquet which has thus far eluded satisfactory explanation.

b. Role of Satan. Satan appears invariably as a distinctive personality. He is represented as entering into men and as the responsible author (not merely the personification) of their evil deeds and passions. It is Satan that tempts Judas and Simon Peter (Luke 22:3, 31; John 13:27); that prompts Ananias to withhold his contribution (Acts 5:3); that incites incontinence (I Cor. 7:5); and that shuts men's hearts and ears to the message of God (Mark 4:15; cf. Rev. 2:9; 3:9). He maliciously obstructs Christian endeavor, preventing Paul from visiting the Thessalonians (I Thess. 2:18). Essentially a power of darkness, he is the inveterate enemy of the light and of God (Acts 26:18), though he sometimes cunningly disguises himself as an "angel of light" (II Cor. 11:14)—possibly, indeed, as the angel of lights mentioned in the Dead Sea Manual of Discipline (3.20). He is a father of lies, a murderer from the beginning (John 8:44), and it is he that brought death into the world (Heb. 2:14).

At the same time, Satan retains the more primitive character of a noxious demon who causes bodily pains and afflictions. A woman who has suffered such afflictions for twenty years is said to have been "bound" by Satan (Luke 13:16), and he is described expressly as "ruining" or "corrupting" human flesh (I Cor. 5:5); while the two blasphemers, Hymenaeus and Alexander, are consigned to him by way of punishment (I Tim. 1:20), where the implication probably is that they were visited with some form of bodily torment.

c. Rabbinic parallels. It cannot be said that the NT makes any appreciable advance in the concept of Satan upon the time-honored fancies of Jewish popular lore. Almost everything that is said about him can, in fact, be paralleled from Jewish sources. Thus, when he is described as wielding dominion over the air (Eph. 2:2), he is simply filling the standard role of Sammael, the angel of death, in rabbinic literature (cf. Targ. Job 28:7), and the air is probably conceived also as the region of darkness, in accordance with the tradition attested by Philo (*On the Creation of the World* 7). Again, when he is styled "the accuser, prosecutor" (κατήγορος; Rev. 12:10), not only is this a literal translation of the Hebrew *šatan*, but the Greek word is itself employed in rabbinic sources as one of his standard epithets (e.g., M. Ab. 4.11; Targ. Exod. 32:19). So, too, when the wicked and recalcitrant are termed the "synagogue of Satan" (Rev. 3:9), the expression finds its exact counterpart in the "congregation of Belial" (עדת בליעל; cf. LXX συναγωγή = עדת) in one of the Dead Sea Hymns (2.22). Similarly, the reference to the "angels of Satan" in Matt. 25:41 is not without rabbinic parallels.

d. Satan in Revelation. Of especial interest is the role played by Satan in the apocalyptic visions of the book of Revelation. He is described as "the great dragon, the ancient serpent" (ὁ δράκων ὁ μέγας, ὁ ὄφις ὁ ἀρχαῖος), and is said to be vanquished by Michael (or by an "angel who comes down from heaven") and thrust into the bottomless pit, along

with his confederates. At the end of a thousand years, however, he will break loose, but only to be defeated once again, this time forever (12:9; 20:2-3, 10).

The epithet "the ancient serpent" recurs in rabbinic literature (נחש הקדמון): Genesis Rabbah 22, 23c; Deuteronomy Rabbah 5, but it is there applied to the serpent in Eden. Here, on the other hand, the term refers rather to the primordial Dragon (Leviathan, Rahab, Tannin), who was said in ancient Hebrew myth to have been subdued by Yahweh at the dawn of creation (see COSMOGONY). This myth, related only allusively in the OT (Job 7:12; 9:13; 26:12-13; Pss. 74:13-14; 89:9-10; Isa. 27:1; 30:7; 51:9-10), is more clearly articulated in the Babylonian Epic of Creation, where the gods who rebelled against the sovereignty of Anu are indeed thrust by their conqueror, Marduk, into nether caverns (*tubqātē*; IV.113). These contumacious spirits were known in Mesopotamian folklore as the "bound gods" (*ilāni šabtūti*, or *kamūti*) and were sometimes identified as "devils" (*ašakkē*). Onto this ancient Semitic myth, however, has here been grafted the Iranian myth of Azhi Dahaka, the noxious serpent, defeated in primeval time by the hero Thraetaona and held captive in the bowels of the earth, only to break loose again after a prescribed period (variously defined) and then to be finally discomfited by Keresaspa (cf. Yasht 19.38-44). Moreover, Satan has here been identified with the rebel angel ("Lucifer") of Isa. 14:12-15—a tradition anticipated in the book of Enoch (54:5-6) and perpetuated in subsequent Christian literature (cf. especially, in English literature, the Anglo-Saxon poems *Genesis B* and *Christ and Satan*; *The Vision of Piers the Plowman*, book II, lines 105-11; and, of course, Milton's *Paradise Lost*).

e. Folklore. Lastly, two items of folklore relating to Satan may here fittingly claim our attention:

a) In Jude 9 reference is made to an altercation between Satan and the archangel Michael for the body of Moses. According to Origen (*De principiis* III.2), the story in question was related in the pseudepigraphic Assumption of Moses, but it is not to be found in the incomplete text of that work that has come down to us. There are, however, several later rabbinic legends (cf. *Midrash Peširath Mōšeh*, in A. Jellinek's *Bêth Ha-Midrash*, VI, 71-76) which tell how Sammael, the satanic angel of death, gaily embarked on the mission of calling forth the lawgiver's soul, after Michael and other angels had proved reluctant to do so. Moreover, it has long since been suggested that a somewhat similar incident in the Testament of Abraham (ch. 16) may well go back to a story originally related about the death of Moses.

b) In Barn. 4:9 Satan is described as "the Black One" (ὁ μέλας). In illustration of this epithet—which has since become commonplace—it may be observed that the concept of the devil as a swarthy "Ethiopian" recurs later in the apocryphal Acts both of Andrew (ch. 22) and of Thomas (55), as well as in the famous Paris Magical Papyrus (lines 1238-39: σαδανας εθηιωθφ). So too, in the Gnostic *Pistis Sophia* (p. 367 of the Coptic text), the fiend who presides over one of the hells is called "the Ethiopian [i.e., sunburnt] Ariuth"; while in a Mandeian magical in-

cantation, demons in general are designated "black ones" (שחוריון). In Jewish legend, the Devil is sometimes portrayed as clad in black silk, and a similar tradition obtains in French and German folklore. Furthermore, modern inhabitants of Mosul believe in a female demon called "the Black One" (Sôdâ), while in Gaelic folklore the Evil One is sometimes named "Black Donald."

SATHRABUZANES. Apoc. form of SHETHAR-BOZENAI.

SATIRE. See IRONY AND SATIRE.

SATRAP sā'trāp [שטרפון, Aram. שטרפניא, a transcription of *Medic khšatrapāvan*; Pers. *khšaçapāvan*, protector of the land]; KJV LIEUTENANT (Ezra; Esther); PRINCE (Daniel). A governor of a province in the Persian Empire.

The Greek and Latin versions vary in their translation of the word; the Vulg. has *satrapae* except in Esth. 8:9 (*principes*); 9:3 (*duces*). In Greek epigraphic and classical literature the Persian word is reproduced as ἑξαράτης, ἑξαιθρατεύων, ἑξαστρατεύων, and finally shortened to σατράτης. Herodotus, who has given us the standard list of the twenty Persian satrapies (III.89-94), uses therein the Persian word σατραπηία, but he usually used the Greek word ὑπαρχος and once νομοῦ ἀρχων (III.120), since νομός (III.90, etc.) is his usual term for "satrapy." Thucydides and Xenophon follow the terminology of Herodotus. Jerome in the Vulg. uses *satrapa* before the Persian period (Judg. 3:3; I Sam. 29:6; II Chr. 9:14). The word occurs in Latin literature as early as Terence (died 159 B.C.).

1. **Name.** The name of the first king of Israel appears nearly four hundred times in the OT and once in the NT (Acts 13:21). In the OT it is confined to the books of Samuel; I Chronicles; the titles of Pss. 18; 52; 54; 57; 59; and Isa. 10:29. The name (שׂאול, "asked, requested") is a hypocoristic and is to be explained on the basis of הוּא שׂאול ליהוה "He is lent to the LORD" (I Sam. 1:28). It also occurs as a West Semitic name in Assyria (*ša-u-li*), at Palmyra in the third century A.D. (שׂאול), and possibly on a seal of uncertain date. See *Bibliography*.

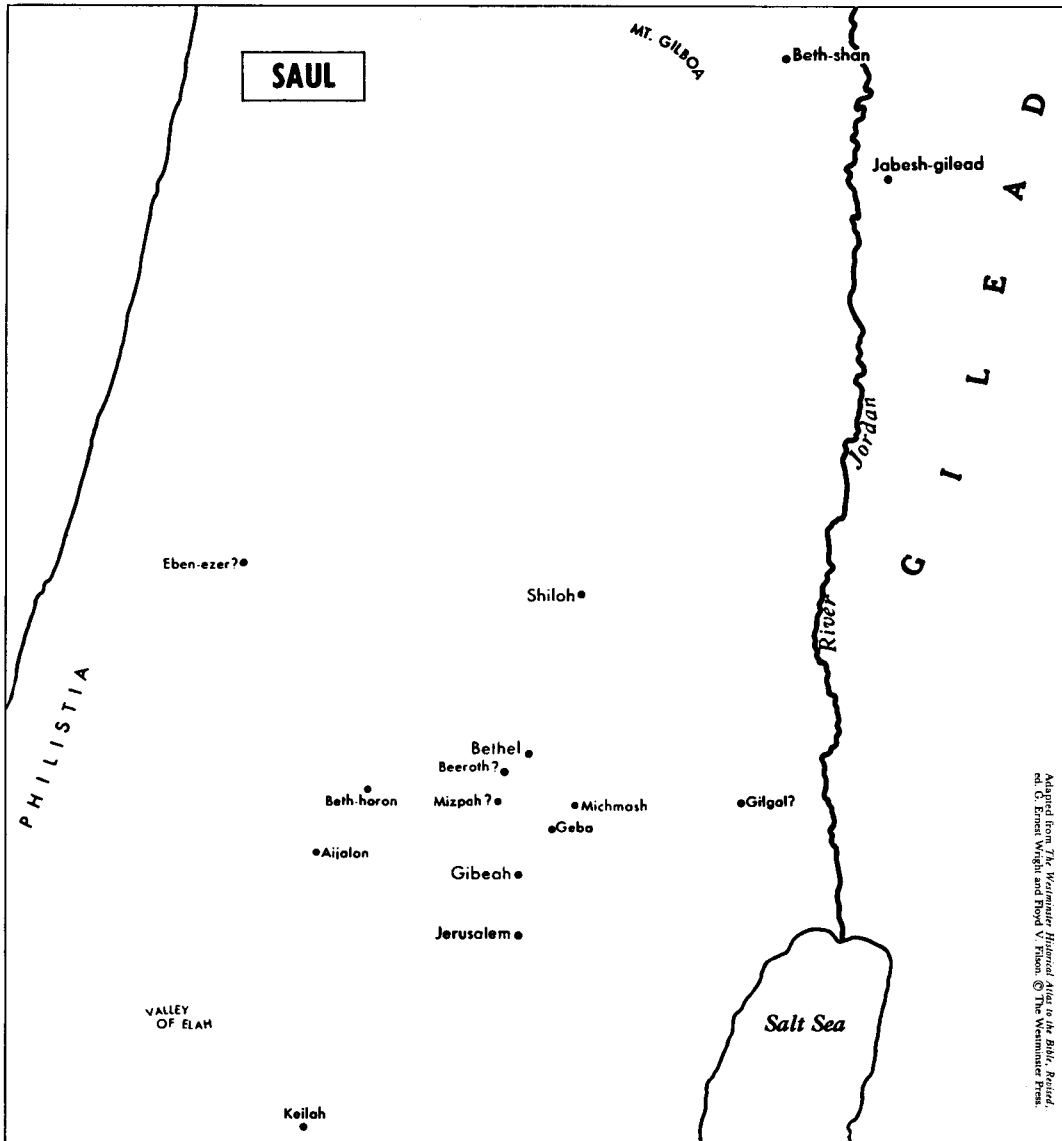

2. **Family.** Saul was a Benjaminite (I Sam. 9:1-2, 16, 21; 10:20-21). The family tree in Table 1 illustrates the family relationships of Israel's first king.

Table 1

The family home was at Gibeah in the tribal territory of Benjamin. The family was also somehow connected with Zela (II Sam. 21:14), for this was the

burial place of Kish and the place where the remains of Saul and Jonathan were interred. That the family was relatively well-to-do may be judged from the fact that it possessed asses, servants (I Sam. 9:3), fields, and oxen (11:5).

Gibeah of Saul, present Tell el-Ful ("hill of the beans"), is located *ca.* three miles N of Jerusalem and is a limestone mound of *ca.* two acres. The city in the time of Saul consisted of a village with a fortress of massive masonry, which may have been the castle of the king.* Excavations indicate that life was relatively simple, just what might be expected in the eleventh century B.C. At the time of Saul the Philistines maintained a garrison there with a governor or commander in charge (I Sam. 13:3). See GIBEAH 2. Fig. GIB 27.

See map "Palestine: I Samuel 1-15, Samuel and Saul," under SAMUEL, BOOKS OF.

3. **The times of Saul.** Saul was a creature of circumstances. He was the man of the hour. It must al-

ways be remembered that Israel's first king stood in a period of transition from a loosely organized group of tribes in the time of the judges to the larger and more effectively united confederation under David and Solomon. The times, therefore, played a most important role in the life and activity of the man concerning whom our sources do not speak too kindly.

From the religious point of view, the tribes had some measure of unity in Shiloh, as may be seen from the first chapters of I Samuel. Doubtless this fact made it easier for united political action later on. But in the wake of increasing Philistine pressure in the central highland, Shiloh had been laid in the dust, and the priestly leadership was apparently no longer adequate to meet the situation. Even the ancient symbol of the nation, the ark of the covenant, had virtually disappeared from the scene of action (I Sam. 6-7). Gilgal became the center of worship (10:8; 11:14-15; 13:4, 8-15; 15:12, 21, 33).

On the political side, the Battle of Ebenezer ended tragically for Israel (I Sam. 4). The result was that all the central mountain territory, hitherto the center of Israelite cultic life, fell into the hands of the Philistines. The devastating blow struck at Shiloh was, of course, meant to wreck the rallying point of the tribes. A control center was set up by the enemy at Gibeah (10:5; 13:3) with a garrison and a governor. The heavy hand of Philistine hegemony is best illustrated by the monopoly on iron which they succeeded in imposing upon Israel (13:20-22). The Israelite farmers had to go to Philistine smiths for the making and sharpening of their plow points, colters, axes, and mattocks. No iron weapons were allowed, though Saul and Jonathan possessed them—how, we do not know. The success of the Philistines doubtless encouraged other enemies of Israel to take advantage of the situation to extend their holdings at the expense of Israel (ch. 11). Fortunately, the Philistines did not press their victory beyond the central highland, so that the Israelites were able to rally around the old shrine of Gilgal, where the kingdom of Saul was set up which marked the beginning of effective resistance against the Philistines.

4. Choice of Saul as king. There are at least two stories dealing with the choice of Saul as king. Both of them belong to the earlier source of SAMUEL. The first story centers in the episode of the lost asses of Kish, which Saul and a servant were sent to find. An exhaustive search in Benjamin and the surrounding area proved unfruitful. As a last resort they resolved to consult the seer in the town nearby. As they were about to enter the city, Samuel met them, though they did not recognize him. When they inquired after the whereabouts of the seer, Samuel informed them that he himself was the seer. He told them that the asses were found but pressed them to attend the sacrifice at the high place, where the best portion had been reserved for Saul. The next morning, in accordance with some cryptic intimations the day before (I Sam. 9:20, 22, 24), Samuel anointed Saul (10:1) and, with an extended discourse, sent him on his way. The sequel to the story of the lost asses and the private anointing of Saul belongs to the later source (10:17-25a); it relates the popular choice of Saul in a sacrificial meeting at Mizpah.

Apparently not all the people were convinced of the wisdom of the clamor of the majority (10:27; 11:12). Whether this opposition developed later or was present from the beginning is difficult to determine with certainty; doubtless there were misgivings on the part of the conservatives from the start.

The second story of Saul's rise to power is connected with the move of the Ammonites against Jabesh in Gilead (I Sam. 11). The people of Jabesh and the Benjaminites appear to have had a close affinity for each other after the episode detailed in Judg. 21, and because of what Saul did for them on this occasion they maintained this relationship (I Sam. 31:11-13; II Sam. 2:8 ff). In response to the threat of Nahash the Ammonite, an embassy was sent post haste to Gibeah to plead for help. The men of Gibeah could only lament the plight of their brethren. But "the spirit of God came mightily upon Saul when he heard these words, and his anger was greatly kindled" (I Sam. 11:6). He immediately sacri-

ficed a "yoke of oxen" and sent the pieces to the people of the territory. This had the effect of binding them in a covenantal relationship and of pledging them to follow the inspired leader.

Here is a clear reflection of the charismatic principle operative in the time of the judges. This principle at work in the case of Saul is demonstrated elsewhere—e.g., in Saul's connection with the ecstatic prophets (ch. 10; 19:23-24). It is not difficult to understand how, after the incident at Jabesh, the events related in ch. 7 came to be associated with the selection of Saul as the chosen one of the Lord.

Immediately after Saul's return from the deliverance of the citizens of Jabesh, the people again raised their voices in behalf of making him king. Samuel yielded, and the ceremony of investiture was held at Gilgal in connection with a thanksgiving offering for victory over the Ammonites. These factors thus combined to put Saul in office: (a) the charismatic power which indicated the presence of the Lord, manifested in demonstration of skill and prowess, as shown by his defeat of the Ammonites; (b) the official act of anointing at Gilgal; (c) the popular demand and assent.

5. Major campaigns of Saul. The first act of Saul was the reduction of the Philistine outpost at Gibeah (I Sam. 13:1 ff), which he appropriated as his own seat of government and base of operations. The Gibeah exploit aroused the Philistines, who mustered their forces for war. Saul summoned his warriors to Gibeah, while the enemy encamped at Michmash, from which they raided Israel in several directions (vs. 17-18). Jonathan and his armor-bearer precipitated the battle by attacking the outpost of the Philistines (14:14 ff). The former's courageous exploit threw fear into the enemy camp and roused his fellows to action. The result was a telling local victory for the forces of Israel. But it did more than bring military success; it marked the beginning of Israel's earnest resistance against the foe. Those who for one reason or another had joined the Philistines (14:21) and those who hid out of fear joined hands with their brethren. There was a real revival of spirit in Israel that day, and the Philistines were driven out of the central highland as far as Aijalon (vs. 31).

To the early period of Saul's reign belongs also the raid on the Amalekites (ch. 15), the story of which comes from the later source. Like the Ammonites, the Amalekites, Israel's old enemy (Exod. 17:16), doubtless took advantage of the situation to expand its own territory at the expense of Israel. Saul, by his successful expedition against them, restored to Judah what they had taken.

The older source of Samuel says "there was hard fighting against the Philistines all the days of Saul" (I Sam. 14:52), which was probably all too true. Saul pressed his early local advantage and carried the war closer to their centers of population, and the next move we read about is that in the Valley of Elah,* some twenty miles to the SW of Gibeah. The Goliath episode is connected with this campaign (see § 7 below), which served to push the enemy still farther toward his own borders in the vicinity of Ekron and Gath (17:52). The effective operations of Saul appear to have cleared the Philistines pretty well from the extremities to which they had penetrated. The ex-

pansion of Saul's movements must have been keenly felt by the Philistines, especially as it developed toward the N. The threatened severance of their trade routes across the Plains of Esdraelon precipitated Saul's last battle with them at Gilboa.* This struggle, with its outcome, is described in I Sam. 29-31. The army of Saul suffered a severe defeat, and the enemy was victorious. The situation at Gilboa was similar to that which existed after the Battle of Ebenezer (ch. 4). However, Saul seems to have checked the immediate further advance of the Philistines, who never again penetrated the hill country beyond the W limits of Jerusalem, where they were dealt a powerful blow by David (II Sam. 5:17 ff). Thus, while they were not decisively beaten, they were definitely challenged and measurably weakened by Saul and his valiant followers. Figs. ELA 21; GIL 33.

6. Saul and Samuel. One of the most disconcerting episodes in the history of the early kingdom of Israel revolves around the increasingly strained relations between the "man of God" and the first king. Tradition has it that the popular clamor for a king arose because of the character and activity of Samuel's sons (I Sam. 8:2-3), which forced the old seer to yield; though, according to the much exaggerated Deuteronomic additions (10:18 ff; 12), which reflect later experiences, he had his misgivings about the whole affair. His first meeting with Saul occurred in connection with the lost asses of the latter's father (ch. 9). He is represented there as having reserved a special place of honor for Saul and then as having anointed him king in a private ceremony (ch. 10). Here there can be no doubt that Samuel was the responsible agent of Saul's inspiration, for "God gave him another heart" (10:9). At the time of public investiture Samuel again figured as the mouthpiece or representative of the Lord, though the ceremony was political in import (11:15). Moreover, he celebrated a great thank offering after the anointing. All this made a deep impression on the anointed king, who was utterly dependent upon Samuel. When Saul summoned the men of Israel to join him in delivering Jabesh from the Ammonites, he did it in his own name and in that of Samuel (11:7).

The first serious rupture between Samuel and Saul came just before the battle at Michmash (ch. 13). There was to be a sacrifice at Gilgal. Saul waited the number of days which had been agreed upon, but the Philistine pressure was mounting and the people became restless. When Samuel still delayed his coming, Saul took matters into his own hands and then overstepped his bounds. When the sacrifice was over, Samuel appeared and characteristically upbraided him for his rash act and informed him: "Now your kingdom shall not continue" (vs. 14). Saul was undoubtedly shaken by the prognostication, but, while Samuel left Gilgal apparently alone, "the rest of the people went up after Saul to meet the men of war" (13:15 Chicago Bible). The situation was thus not regarded yet as irreparable.

The final breach came after the Amalekite raid (ch. 15). At the instigation of Samuel, Saul undertook to liberate his brethren in Judah from the razzias of the Amalekites, who doubtless took advantage of the Israelite preoccupation with the in-

ursions of the Philistines. Saul was ordered to exterminate them ruthlessly, without mercy. The campaign proved quite successful, but Saul spared the king and the best of the sheep and cattle. Though Saul's explanation of his disobedience appears somewhat weak, the suggestion that he deviated a bit from the stern, conservative *hérem* of the old prophets may be correct. In any case, Samuel regarded this act of the king as rank insubordination to the will of the Lord and with his own hands slew Agag at Gilgal. Moreover, though Saul acknowledged his sin and begged forgiveness, Samuel refused to be appeased. He declared unconditionally that the Lord had rejected him in favor of "a neighbor of yours, who is better than you" (15:28). The best Saul could do was to persuade Samuel to remain for the sacrifice for the sake of appearance (vs. 30). The break was complete; "Samuel did not see Saul again until the day of his death" (vs. 35). Saul's last contact with Samuel came in the form of an uneasy conscience on the eve of his death in the Battle of Gilboa. A tired and beaten man, he sought out the witch of Endor in the last desperate hope for some word of encouragement from the spirit world from the man of God (28:8-25). But to no avail, for the answer was the same as that given on previous occasions. The end had come; tomorrow he must die and Israel go down in defeat.

The attempt to combine the charismatic principle of leadership with a political kingdom thus ended in failure. The priesthood was probably kept on the side of Saul, since it was located at Nob, near Gibeah (I Sam. 21:1; 22:9, 11, 19), though he later alienated them (22:11 ff; 30:7-8). But Samuel could not be controlled. Obviously the lines between political and religious functions were not yet drawn and could not be at this stage. Conditions dictated that Saul carry out his responsibilities as king in accordance with demands. As later experiences testify, such a course did not always fit in with the principles and views of the prophets. Thus they were bound to clash sooner or later. Because Saul was a devoted person and deeply religious, the consequences of the breach with Samuel were demoralizing. Up to this point he had been fairly successful, but henceforth failure met him at every turn. "The Spirit of the LORD departed from Saul, and an evil spirit from the LORD tormented him" (16:14). In other words, the cessation of co-operation between him and the prophet was followed by a divided personality, which led to disaster for himself and the nation.

7. Saul and David. Two stories of David's coming to the attention of Saul are related in the sources of I Samuel. The first tells of the former's coming to the court as a skilled musician, sought out to calm the disturbed mind of the king after the rupture with Samuel (16:14-23). The other has David come to the notice of Saul in the Goliath episode (ch. 17), which is one of the most thrilling stories of the OT. But scholars generally regard the former story as the more authentic in detail of the two, mainly because in II Sam. 21:19 (cf. I Chr. 20:5) Goliath is said to have been slain by Elhanan. David certainly performed some heroic exploits—indeed, he may even have slain a giant too, but the account in part appears to have something of the character of sacred

legend, the slaying of Goliath being a later attribution to DAVID.

Both narratives indicate the immediate rise to favor of the young Bethlehemite in the court of Saul. He became his personal attendant and armor-bearer (16:21). Not only so, but because he "was successful wherever Saul sent him" (18:5), he was soon made a lieutenant in the army, to the manifest satisfaction of all concerned. The rapid rise of David, together with the unstinted praise heaped upon him by the people, preyed on the already divided mind of the king. He was aroused to a jealousy which knew no bounds and which urged him to pursue the son of Jesse to the end of his life. It is not difficult to understand how Saul became a victim of desperation—in the wake of the withdrawal of prophetic support and the striking success of David, which could be due only, so Saul believed, to the transfer of the divine blessing from himself to David.

Chs. 18-24; 26-27 tell the story of the relentless efforts of Saul to do away with his young armor-bearer. First, in one of his melancholic fits he attempted to pin him to the wall with his spear (18:9-16). Then he exerted every effort to persuade him to marry his daughter, thinking perhaps to gain sympathy, on the one hand, or to spur David on in further exploits with the Philistines in the hope that he might be killed, on the other (18:17-18, 22-27). In each instance Saul's pains served only to thwart himself and enhance the prestige of David. The result was greater bitterness and hostility toward him (18:28-29). Next Saul tried to influence Jonathan and his servants to kill him (19:1); afterward Jonathan interceded with his father on behalf of his friend and secured a pledge from him that David should not be put to death (19:6). This pledge might have held had David not distinguished himself in further skirmishes with the Philistines. Again Saul attempted to thrust David through with his spear (19:9-10); failing this, he sent his police to David's quarters to take him while he slept (19:11-17), but Michal helped him escape. Another conference of David with Jonathan ended in a plan to discover once and for all whether it was safe for David to remain within reach of Saul (ch. 20). At the Feast of the New Moon, Saul flew into an uncontrollable rage when he discovered David's planned absence supposedly due to a visit with his family at Bethlehem, and Jonathan risked his own life in a futile endeavor to reason with him (20:23-33).

David's flight from the king and the latter's pursuit is one of the sorriest tales in the early history of the kingdom. Saul poisoned the minds of his body-guard against David (22:7-8). Since the priests at Nob had unwittingly assisted David, he had them murdered in cold blood (22:11-20). With his army he prepared to follow David to Keilah (23:8), but when he discovered that David had fled, he gave up his plan. While David was in Horesh, informants brought word to Saul (23:19-23), who immediately went after him, only to find that he had escaped to the Desert of Maon (23:24 ff). He was compelled to give up the chase because of a Philistine raid (23:27-28). Thereafter Saul heard that David was at Engedi and set out to hunt him down there (ch. 24).* His life

was in David's hands there, but the latter demonstrated that Saul's fear of him was ill founded. Saul returned home once more after swearing an oath with David. Once more Saul pursued David, this last time in the Wilderness of Ziph (ch. 26), where the latter again could have put him out of the way. David and Abishai (26:7) stole into the camp by night and took the king's spear and jug of water as visible evidence of his exploit. Abishai wanted to thrust Saul through, but David would not be guilty of laying a hand on the Lord's anointed. When Saul was apprised of what had taken place, he acknowledged his error in attempting to kill David, especially in view of the fact that the latter had now twice spared his life. This was destined to be the last meeting between the two great rivals. "So David went his way, and Saul returned to his place" (26:25c). Fig. ENG 28.

8. An estimate of Saul and his kingdom. The Bible presents Saul as a rejected king because of his incomplete subservience to the prophetic commands. And certainly there was much to be desired in the way in which he carried out the commission laid upon him by Samuel and the times. But he was hardly to be blamed so severely as a cursory reading of the sources might indicate. He succeeded in checking the unhindered Philistine penetration of the central highlands of Israel. His expedition in Transjordan and his punitive raid on the Amalekites held the old enemies of his people in check and made his people relatively secure throughout his reign. He probably broke the monopoly on iron of the Philistines. He set the stage for his more sagacious successor, David, by developing a kind of separation of functions of church and state. To be sure, he was not very adroit in his relation with the religious authorities, but he broke the ice. The times demanded political leadership of a type that went beyond the old charismatic principle operative in the days of the judges. Saul took the step which marked the transition from judge to king, which was not fully realized until Solomon took over the kingdom.

As a person Saul was, first of all, a commanding figure. At times he could inspire his followers with unbounded zeal. He was also a man of conscience, or he never would have been so deeply troubled by prophetic opposition. This opposition was responsible for the indecision and fear so characteristic of him in later days. He admitted his guilt on numerous occasions but was met with stern refusal of mercy and forgiveness. This was enough to crush the stoutest personality. It interfered seriously with the progress of the kingdom. If Saul had had the sympathetic counsel of a Nathan, history might have presented an altogether different portrait of him.

The kingdom of Saul was only a loosely organized confederacy and of necessity so. It was modeled after the kingdoms of Israel's neighbors, Edom, Moab, and Ammon, rather than after those of the Canaanite city-states. Saul had the support of his own tribe—of Ephraim, Manasseh, and Judah, at least. He had a small standing army generated by Abner, doubtless supported largely by gifts and booty. The capital, as shown by excavations, was not pretentious; it was just a fortress in the town and very modest indeed.

SAVARAN. KJV form of AVARAN.

SAVIAS סַבִּיָּא [Σαουια (A)] (I Esd. 8:2 KJV). One of the ancestors of Ezra. The name is omitted by the RSV, which follows the LXX B at this point. C. T. FRITSCH

SAVIOR. See SALVATION; CHRIST.

SAVIOR, DIALOGUE OF THE. A Gnostic treatise in the form of a dialogue between Jesus and his disciples regarding cosmogony; one of the many Coptic documents discovered in 1946 at Chenoboskion in Upper Egypt. See APOCRYPHA, NT.

M. S. ENSLIN

SAVOUR. See ODOR.

SAW [מַגֵּרָה (*the second time in I Chr. 20:3 an error for מגורה*, axes), *from* גָּרַר, to drag(?); מַשׂוּר; מַשׂוּר; אֶזְרָא]. In idea and primitive form, a knife with a notched blade, sometimes provided with a pistol-grip handle or an arched frame to enable the cutting edge to be applied more firmly. Early saws cut only on the push or the pull of the stroke, not on both. For cutting stone or other hard material, a copper blade provided with stone teeth was used, or powdered abrasive was run in under the cutting edge. The surgeon used the saw, especially for cutting bone.

The saw was a familiar implement of the Israelite woodcutter (Isa. 10:15), and stone-working with saws is referred to in the account of the building of Solomon's temple (I Kings 7:9). Heb. 11:37 alludes to the saw as an instrument for inflicting slow and painful death, and traditionally Isaiah's martyrdom was by this means. OT references to putting military prisoners "under saws" probably means only putting them to work (II Sam. 12:31).

SAYINGS OF JESUS, OXYRHYNCHUS. See OXYRHYNCHUS SAYINGS OF JESUS.

SCAB [יִלְפַת; KJV גֵּרַב (Deut. 28:27; RSV "scurvy"), מַסְפַּחַת (Lev. 13:6-8; RSV "eruption"); LXX λειχήν]. An itching DISEASE, perhaps *favus*, *tinea sycosis*, or *tinea tonsurans*.

SCABBARD (Jer. 47:6). An alternative form of SHEATH.

SCALES [פְּלִטָּה] (Isa. 40:12). Alternately: BALANCE (Prov. 16:11); KJV WEIGHT. A plausible view holds this word, from the verb meaning "look at, examine," to be the indicator arm. See BALANCES; WEIGHTS AND MEASURES § 1. O. R. SELLERS

SCALES (FISH). The translation of several Hebrew and Greek words in the Bible. See also BALANCE.

Only fish with both scales (שֶׁשֶׁת) and fins are permitted as food for the Israelite (Lev. 11:9-12; Deut. 14:9-10). The term is used figuratively in I Sam. 7:5 for scale armor (קַשְׁשִׁים), where the term otherwise would be דְּבָקִים (II Kings 22:34; II Chr. 18:33; cf. θώραξ in Rev. 9:9).

מָגֵן, "shield," is used figuratively in Job 41:15—H 41:7 to mean the scales of Leviathan.

The LXX λεπίς, translated "scales" (of fish) in Lev. 11:9-12; Deut. 14:9-10, is used in metaphor to explain Paul's regaining his sight in Acts 9:18 (cf. Tob. 11:7-13). J. A. SANDERS

SCALL, DRY. KJV translation of נִתַּח (RSV ITCH).

SCAPEGUAT. See AZAZEL.

SCARAB. See SEALS AND SCARABS.

SCARECROW [תָּמָר, *properly* palm tree or pillar]. Probably a pillar, crudely shaped in human form and set up to frighten away birds or vandals, or possibly evil spirits. Jeremiah (10:5) compares pagan idols to "scarecrows in a cucumber field." Bar. (Letter of Jeremiah) 6:70—G 6:69 echoes Jeremiah's sentence (Greek προβασσανόνιον). "Scarecrow" is the most apt translation; the KJV "upright as the palm tree" can hardly be correct in this context.

L. E. TOOMBS

SCARF [רֵעֵלָה, veil] (Isa. 3:19); KJV MUFFLER. According to Arab tradition, a double veil, one part of which was placed around the head above the eyes and the other below the eyes, and the end of which was left hanging down over the chest.

J. M. MYERS

SCARLET [שָׁנִי, תוֹלֵעַת, or variant forms; LXX and NT κόκκινος]. A highly prized brilliant red color obtained from the female bodies of certain insects and used for dyeing woven fabric, cloth, and leather. Coloring matter was extracted from the kermes (Sanskrit *krinjia*; Ancient Persian *krmi*; Arabic *qirmiz*) insect, *Coccus ilicis*, which attached itself to the kermes oak, *Quercus coccifera*, a native of the Near East and the Mediterranean area. An insect similar to the true cochineal *Coccus cacti*, the source of a flourishing carmine dye industry later in the New World, was also found in the Ararat valleys and used for its coloring properties in antiquity. Shades of scarlet varied; results of dyeing were unpredictable. It is impossible to distinguish between the meaning of terms translated as "scarlet" or "crimson" in the Bible. Probably the more lasting hues were produced with the aid of a mordant such as alum.

In the OT תולעת is usually preceded or followed by שני (see CRIMSON). The rendering of the latter word in Isa. 1:18 by φοινικαῖον in the LXX, and the identification of the kermes oak with Phoenicia by Theophrastus, the Greek botanist, suggest the likelihood that the Phoenicians developed the scarlet industry. Kermes was used not only for dyeing but also for medicinal purposes, and the Romans exacted it as tribute from conquered peoples. To the Hebrews scarlet was an important dye and color. Scarlet thread (Gen. 38:28, 30), cord (Josh. 2:18, 21), and cloth (Num. 4:8; II Sam. 1:24; Prov. 31:21; Nah. 2:3) are noted in the OT. Yarns dyed scarlet were used extensively alone and with linen and yarns of blue and purple for the tabernacle furnishings (Exod. 25:4; 26:1, 31, 36; etc.) and vestments of the priests (28:5-6, 8, etc.). According to the Dead Sea War Scroll (1QM 7.11), priests in time of battle were to wear girdles of linen, blue and purple and scarlet stuff, תולעת שני (cf. Exod. 39:28-29). Scarlet clothing was associated with well-being (II Sam. 1:24; Prov. 31:21) and was also represented as the dress of the harlot Jerusalem (Jer. 4:30).

In the NT, "scarlet," as in the LXX, is a translation of κόκκινος. Reference is made to scarlet wool (Heb. 9:19), and the robe put on Jesus was scarlet (Matt. 27:28). The woman of Rev. 17:3-4 is dressed in purple and scarlet and is seated on a scarlet beast. Luxury is suggested by the allusion to Rome clothed in scarlet, purple, gold, and precious stones (Rev. 18:16), and the economic import of the scarlet trade is implied in the statement that scarlet can no longer be bought from Rome because of her fall (vss. 11-12).

SCENTED WOOD [θύων, from θύω, to offer burnt offerings]; KJV THYINE WOOD θύϊν. One of the imports prized by the apocalyptic "Babylon" and its peoples (Rev. 18:12). According to Pliny the Elder (ca. A.D. 23-79), who calls the tree "citrus" and says that it is known to the Greeks "by the name of *thyon* or sometimes *thya*," this fragrant wood, imported from Africa, was employed by the Romans in the manufacture of furniture, particularly tables. It took a high polish, and its grain ran in "waving lines" or "spirals like so many little whirlpools," which led to tables made of it being designated respectively as "tiger tables" and "panther tables." Because of its aromatic scent this wood was also used by the Greeks in connection with temple worship, whence the name θύων (see Homer *Odyssey* V.60). This large pinaceous tree (*Callitris quadrivalvis*) is called "sandarac" today (from σανδαράκη, realgar, orange pigment) from the resin (gum sandarac) furnished by the tree.

30. A guard with scepter in his left hand at the tomb of Tut-ankh-Amon (1361-1352 B.C.) at Thebes; in his right hand he holds a mace.

and, specifically, of his striking power; occasionally possessed also by a lesser dignitary (Num. 21:18). Figs. SCE 30; SEN 41.

A ceremonial staff—the stylized descendant of man's most ancient weapon, the club—is an almost invariable feature of Near Eastern royal portraits, and a similar object was undoubtedly part of the Israelite kings' royal regalia (Gen. 49:10; Pss. 45:6—H 45:7; 110:2; Ezek. 19:14). Scepters are mentioned in connection with the kings of Egypt, Moab, Damascus, and Ashkelon (Jer. 48:17; Amos 1:5, 8; Zech. 10:11).* The scepter of Yahweh, the supreme king, is the tribe of Judah, to which the Davidic monarch belonged (Pss. 60:7—H 60:9; 108:8—H 108:9); this is a metaphoric way of saying that the Davidic kingship is an extension of the divine au-

31. Three views of an Egyptian king's scepter, showing the elaborate use of gold, lapis lazuli, faience, turquoise, and carnelian in inlays (Tut-ankh-Amon)

thority (*see* KING). The stafflike nature of the royal scepter is clear from the fact that the word translated "scepter" has a more general use for any kind of rod, as, e.g., the shepherd's club (Ps. 23:4) and the farmer's flail (Isa. 28:27), and is used in parallelism with the normal word for "staff" (מַטֵּה)—e.g., in Isa. 14:5. *See* ROD; CLUB. Fig. SCE 31.

Two main types of scepter are pictured in ancient art: a long, slender staff with an ornamented head; and a short-handled battle mace, with a pear-shaped stone head three or four inches long. The first is seen in a relief of the Persian king Darius, grasped in the right hand a little below the tip and with the butt resting on the floor between the king's feet, a position suggested by Gen. 49:10. The Persian royal scepter is mentioned in Esth. 4:11; 5:2; 8:4, where we are informed that it was made of gold and was extended by the king toward a suppliant who had won his favor. A scepter of this type is suggested by the metaphor in which the vine, Israel, grows tall and its strongest branch becomes a ruler's scepter (Ezek. 19:11). The mace type of scepter appears in a relief of Esarhaddon of Assyria; and, since this form of scepter is a stylized military weapon, it serves well to symbolize the king's striking power, as the scepter frequently does in the OT—e.g.:

A scepter shall rise out of Israel;
it shall crush the forehead of Moab
(Num. 24:17; cf. Ps. 125:3;
Isa. 14:5).

The only use of ῥάβδος in the NT is in Heb. 1:8, a quotation of Ps. 45:6—H 45:7. L. E. TOOMBS

SCEVA *σεῦβα* [Σκευᾶς] (Acts 19:14). A Jewish high priest whose seven sons at Ephesus were exorcising evil spirits in the name of Jesus.

The story of Sceva and his seven sons ought to be understood in the larger context of Acts 19:11-20. Paul was just concluding two years of most successful missionary work at Ephesus when an outburst of remarkable healing miracles by his hands occurred. He was able to cure diseases and cast out demons at a distance by sending to the afflicted napkins and aprons which he had merely touched. Jewish exorcists there were so impressed that they undertook to cast out demons in the name of Jesus. The seven sons of Sceva attempted this. But the demon challenged their authority, and the possessed man leaped upon them and drove them away humiliated, naked, and wounded. People of Ephesus were so amazed that they began to revere the Lord Jesus, and many of the magicians abandoned their spells and destroyed their books of magic in a great bonfire.

The statement that Sceva was a high priest has caused difficulty. No record of the existence of a high priest by that name has been discovered. Codex Bezae reads "priest," but "high priest" is almost certainly the correct reading. Some have inferred Acts has reported an inaccurate popular tradition here; that these Jewish exorcists had falsely claimed to be sons of a high priest. But there is another reasonable possibility. Sceva was a name of Latin origin. It was common for a Jew to have both a Hebrew name and a Greek name. If we knew this man's Hebrew name, it might be possible to identify him.

Formerly a contradiction was felt between the statement in vs. 14 that there were seven sons and the report in vs. 16 that "both of them" (ἀμφοτέρων) were routed. But it has been learned from papyri and other sources that ἀμφοτέρων can mean "all," and so the RSV has translated it.

The reference to itinerant Jewish exorcists agrees with what we know otherwise of Jewish preoccupation with such matters. In Antiq. VII.ii.5, Josephus avers that King Solomon was a recognized authority on spells and incantations. Then he tells of one Eleazar who was famous for casting out demons. Jesus and his disciples, all of whom were Jews, were notable for their exorcisms. It is probable that this was one of the specialties of MAGI. We encounter SIMON MAGUS of Samaria in Acts 8:9-24; ELYMAS of Cyprus in 13:6-11; and Atomos, another magus of Cyprus, in Jos. Antiq. XX.vii.2.

That these Jews tried to cast out demons in the name of Jesus reminds us that the same thing occurred during the ministry of Jesus (Mark 9:38). The Paris Magical Papyrus 574, lines 3018 ff, gives a spell from the time of Hadrian or later, which begins: "I adjure you by Jesus, God of the Hebrews."

The healing power of faith has been known in many cultures. The temples of Aesculapius among the Greeks and Romans were hospitals. Testimonial inscriptions have been recovered from temple ruins in both Epidaurus and Rome. Christianity has shared this knowledge with other religions.

The narrative in Acts 19:11-20 may sound strange, perhaps incredible, to modern readers, because its ideas follow unfamiliar patterns. But in the real context of its time, there is not an item in the story which lacks authenticity.

Bibliography

A. EGYPT. 1. Mathematics. In spite of the deep admiration expressed by Herodotus, Aristotle, and Democritus, the truth seems to be that Egyptian mathematics—and up to a certain extent the same is true for astronomy—has been a factor of only secondary importance in the civilization of Egypt. Its largely pragmatic and utilitarian character is the outcome of the general social and economic conditions of Egyptian society.

Among the sources are two fragmentary papyrus from the Middle Empire (Papyrus Kahun and Berlin); two longer and slightly younger texts (Papyrus Rhind and Moscow), which seem to represent copies of older treatises; a leather document (British Museum leather roll); and two wooden tablets from Cairo.

a. Arithmetic and algebra. The Egyptian script possessed special signs for units, tens, hundreds, thousands, and millions. Addition and subtraction were made by the accurate counting of these signs. Multiplication and division were executed on the basis of the principle of duplication. The problem of multiplying 3 by 17 was realized as in Table 1:

Table 1

— 1	3
2	6
4	12
8	24
—16	48

51 (sum total of 1 and 16, marked by — in the left-hand column, or 17 times 3, obtained by the addition of the corresponding numbers, 3 and 48, in the right-hand column).

In the case of division the inverse procedure is followed. If, e.g., 169 is to be divided by 8, the procedure in Table 2 is followed:

Table 2

— 1	8
2	16
— 4	32
8	64
—16	128

21 (sum total of 1, 4, and 16, since the opposite numbers 8, 32, and 128 add up to 168).

In general, only fractions with the numerator 1 are used. Fractions such as (a) $2/5$ are represented by $1/15 + 1/3$, or (b) $4/7$ by $1/14 + 1/2$ —general formula for (a) $2/n = 1/3.1/n + 5/3.1/n$; for (b) $4/n = 1/2.1/n + 7/2.1/n$. The Papyrus Rhind contains a table, from $2/5$ to $2/101$, for the reduction of a fraction of the type $2/n$ (n is an odd number) into two or more fractions with numerator 1.

The use of algebra of the empiric kind is shown by a problem like: "A number to which the fourth part of it is added becomes 15. Which is this number? [Answer] The number is 12, its fourth part is 3. Total 15. [Demonstration] Count with 4. Take one fourth, namely 1. Total 5. Count with 5 in order to find 15: —1 5

—2 10
result is 3.

Multiply 3 by

4: 1 3
2 6
—4 12
result is 12.
1 12
1/4 3

Total 15." (Papyrus Rhind, problem

26.)

Or: "How to divide 100 into two parts so that the square root of one part is $3/4$ of the other." This problem is solved by starting from the numbers 1 and $3/4$. These are squared ($1, 9/16 = 1 9/16$), and the square root is taken of the total ($1 3/4$). Then, the square root is taken of 100—namely, 10—which

stands for $1\frac{1}{4} \times 8$. Finally, it is admitted that the original numbers (1 and $\frac{3}{4}$) have to be multiplied by 8 so as to become 8 and 6. It must be left to specialists to decide whether this solution is reached in a way similar to that used in modern algebra ($x^2 + y^2 = 100$; $y = \frac{3}{4}x$; $x^2 + 9/16 x^2 = 100$; etc.) or not.

b. Geometry. Besides being able to compute the areas of triangles, rectangles, and trapezoids, the Egyptians empirically found the relatively accurate value of 3.1605 for the number π . The problem runs as follows: "Method to compute a circular piece of land the diameter of which is 9 *khet*. What is its area of land? You should subtract its ninth (part) from 9. Rests 8. Then, you should multiply 8 eight times, which gives 64. See, its area is 6 *khâ* and 4 *setat*. Thus this is done:

1	9
1/9	1
Subtract from it, rests 8.	
1	8
2	16
4	32
—8	64

Its area in land is "6 *khâ* [written 60], 4 *setat*." (Papyrus Rhind, problem 50.) In more general terms, $A = (8/9 d)^2$ if d is the diameter.

The same concise style appears in the computation of the volume of a truncated pyramid (with square base) with height h , a as the length of the lower and b as the length of the upper base. a is squared (a^2), a is multiplied by b (ab), and b is squared (b^2). All three are added ($a^2 + ab + b^2$) and multiplied by $\frac{1}{3}$ of h . The general formula $\frac{1}{3}h(a^2 + ab + b^2)$ gives the correct volume of the truncated pyramid (Papyrus Moscow, no. 14).

"Problems concerning areas or volumes do not constitute an independent field of mathematical research but are only one of many applications of numerical methods to practical problems," O. Neugebauer has written.¹ The preceding examples will render evident the correctness of this characterization of Egyptian geometry.

2. Astronomy. The deficient nature of Egyptian arithmetic acted as a retarding force upon the development of astronomy. In another way, the scarcity and recent origin of the source materials are responsible for our imperfect knowledge of the achievements and the development of this branch of science.

a. Calendar. The Egyptian year consisted of 12 months of 30 days each; to the total of 360 days 5 *epagomenae* were added at the end of each year; the 12 months were divided into 3 seasons: inundation, winter, and summer. Its practical usefulness made it a model for Hellenistic astronomers, and it served as the basis for the lunar and planetary tables of Copernicus. Its origin, however, seems to have been rather of an agrarian practical—the more or less close coincidence of the annual rising of the water of the Nile with the heliacal rising of Sirius—than of an astronomical theoretical nature. Next to the civil calendar, lunar calendars for liturgical purposes were in use. A Demotic text of the Roman period (Papyrus Carlsberg no. 9) shows the way in which civil and lunar years were integrated. The procedure is

¹ *The Exact Sciences in Antiquity* (Providence, R. I.: Brown University Press).

based on the fact that 25 civil years are almost equal to 309 lunar months and contain 9,125 days, which are distributed over lunar months of 29 and 30 days. By means of this 25-year cycle it became possible to calculate the new and full moons without an error in excess of 2 days. The day was divided into 24 hours, 12 for the time of daylight and 12 for the time of night, originally of unequal length according to the change of the seasons, but later, in Hellenistic times, replaced by hours of equal length, each of which was divided into 60 minutes. Thus it was by a Hellenistic modification of an Egyptian practice combined with Babylonian numerical procedures that our present 24-hour day and 60-minute hour came into effect.

b. The "decans." Until the Hellenistic period there is no Egyptian evidence for the zodiac. By a special set of constellations, which first appear on coffin lids of the Middle Kingdom, the year is, however, divided into 36 "decans," each of which corresponds to $\frac{1}{36}$ of the zodiacal signs and to 10 degrees of the ecliptic. The decans, of which only 2, Sirius and Orion, can be immediately identified and which in some cases represent groups of stars and in others a single star, rise in turn at a specific hour of the night during all the 36 periods of 10 days of the year. They are situated in a zone of the sky parallel to and S of the ecliptic. Every ten days a different star was chosen to mark the last hour of the night. The sequence of the decans is tabulated in "diagonal" fashion, which in the original documents runs from right to left. See Table 3.

Table 3

	Decades		Visibility
I	II	III	
		Star A	second to last hour
	Star A	Star B	next to last hour
Star A	Star B	Star C	last hour

c. Eclipse. In the existing documents only one doubtful reference to a partial solar eclipse of 610 B.C. has been discovered.

d. Astrology. It is only in the second century B.C. that texts of astrological content appear. It seems idle, therefore, to speculate on the astrological origin of Egyptian astronomy.

e. The "secret science of the Pharaohs." What has been called the "secret science of the Pharaohs," a general designation for the alleged astronomical and mathematical significance of the pyramids and of the pyramid of Cheops in particular, which supposedly included such knowledge as the exact value of π , the exact measure of the radius of the terrestrial globe and of the arc of the terrestrial meridian, is obviously not in accordance with the results of archaeological research.

The character and achievements of Egyptian astronomy are aptly summarized by Neugebauer (*The Exact Sciences in Antiquity* [1957], p. 91) as follows: "In summary, from the almost three millennia of Egyptian writing, the only texts which have come down to us and deal with a numerical prediction of astronomical phenomena belong to the Hellenistic and Roman period. None of the earlier astronomical documents contains mathematical elements; they are

crude observational schemes, partly religious, partly practical in purpose. Ancient science was the product of a very few men; and these few happened not to be the Egyptians."¹

3. Medicine. Until 1875 the achievements of Egyptian medicine were known only through the Greek writers such as Theophrastus, Dioscurides, and Galen. The discovery and subsequent publication of such documents as the Papyrus Ebers (a collection of medical prescriptions from the Eighteenth Dynasty), Kahun, Berlin (prescriptions from the Nineteenth Dynasty), and Smith (surgery from the Eighteenth Dynasty) thoroughly modified this situation.

The statement of Herodotus that "each physician treats one disease and not more Some are doctors of the eyes, others of the head, the abdominal region, and of diseases of uncertain localization" (II.84), seems to contradict the actual practice of general practitioners and specialists (oculists, dentists, surgeons) both.

Precise knowledge of the internal structure of the human body is lacking. Sicknesses of the respiratory system, larynx, bronchi, and pulmonary lobes are not kept apart but are classified after the common symptom of cough, for which a large number of remedies are given. Under sicknesses of the stomach are given gastric discomforts, dilatation, hemorrhage, and gastric fever, as well as cough, angina pectoris, and diabetes. In the same source, the Papyrus Ebers, afflictions of the intestinal system such as constipation and those caused by taenia and other parasites are mentioned, and the use of medicines (ricinus, honey, beer, poultice) is recommended; diarrhea and dysentery are, apparently, unknown. Both the Papyrus Ebers and the Papyrus Berlin deal with diseases of the urinary tract, among which is bilharziasis, the "hematuria of Egypt," and prescribe curative substances (beverages of different kinds, electuaries).

The knowledge of the exterior parts of the body, head and skull, and face (ears, mouth, eyes) is considerably more precise and advanced. Wounds of the skull and face (caused in battle), migraine ("pain in one side of the head"), alopecia, canities ("remedy to cause gray hair to disappear infallibly . . ."), head cold, fracture of the nose, inflammatory conditions of the ear, diseases of the teeth (filling of cavities, reinforcement of two teeth by means of a gold string, draining of an abscess through holes in the jawbone, treatment of the gums), conjunctivitis, trachoma, cataract, night blindness, are among the ills which can be determined with more or less certainty.

Considerable portions of the documents refer to matters which in modern terms would come under the heading of gynecology. For the determination of the sex of the unborn baby several methods were used. One of them, in the words of the Papyrus Berlin (no. 199), goes as follows: "(Put) barley and wheat (in two different sacks) to be aspersed by the woman with her urine, each day. . . . In case the barley germinates (first), it will be a boy; in case the wheat germinates (first), it will be a girl."

It is in surgery, the subject matter of the Papyrus Smith, that the achievements of the Egyptian physicians, obtained by a combination of common sense,

scientific method, and ingenuity, appear to be most advanced. Such devices as the use of some sort of adhesive tape, of stitches to close a wound, of splints, and of a tube to insert food into the mouth of a patient struck by tetanus, seem to be well attested. The following quotation from Papyrus Smith (no. 31) illustrates the process of examination, diagnosis, and prognosis practiced in the case of a dislocation of one of the cervical vertebrae: "[*Entitled*] Instructions concerning a dislocation of the neck. [*Examination*] If thou examinest a man having a dislocation in a vertebra of his neck, shouldst thou find him unconscious of his two arms (and) his two legs on account of it, while his phallus is erected on account of it, (and) urine drops from his member without his knowing it; his flesh has received wind [*abdominal tympany*]; his two eyes are blood-shot [*subconjunctival hemorrhage*]; it is a dislocation of a vertebra of his neck extending to his backbone which causes him to be unconscious of his two arms (and) his two legs. If, however, the middle vertebra of his neck is dislocated, it is an *emissio seminis* which befalls his phallus. [*Diagnosis and prognosis*] Thou shouldst say concerning him: 'One having a dislocation in a vertebra of his neck while he is unconscious of his two legs (and) his two arms, and his urine dribbles. An ailment not to be treated'" (J. H. Breasted, *The Edwin Smith Surgical Papyrus* [1930], pp. 324-25, 327, 452-53).²

B. MESOPOTAMIA. 1. Mathematics. The study of Mesopotamian mathematics is a recently developed branch of research. What is known of it is largely due to the pioneering efforts of O. Neugebauer and F. Thureau-Dangin (*see bibliography*). Generally speaking, the Mesopotamian mathematical documents fall into two groups, "table" texts and "problem" texts. They date from two periods, the "Old Babylonian" period, roughly contemporary with the Dynasty of Hammurabi (1800-1600 B.C.), and the "Seleucid" period (third, second, and first centuries B.C.). In the first, mathematics appears as a fully developed discipline. Though there is no evidence of earlier (Sumerian) stages, this naturally presupposes a period of undetermined length of development. The documents of the second period, posterior by over one thousand years, show little essential change (on the "zero" sign, *see below*) if compared with those of the first. The achievements of Mesopotamian mathematics are summarized by O. Neugebauer (*The Exact Sciences in Antiquity* [1957], p. 48): "We are dealing with a level of mathematical development which can in many aspects be compared with the mathematics, say, of the early Renaissance. Yet one must not overestimate these achievements. In spite of the numerical and algebraic skill and in spite of the abstract interest which is conspicuous in so many examples, the contents of Babylonian mathematics remained profoundly elementary." And again: "Babylonian mathematics never transgressed the threshold of prescientific thought."¹

a. Arithmetic. The basic principle of Mesopotamian arithmetic is the consistent use, at least in mathematical and astronomical texts, of a positional sexagesimal system. In other words, a notation like 3, 4, 7, is equivalent to $(3 \cdot 60^2) + (4 \cdot 60) + 7$ or 11,047

¹ Used by permission of Brown University Press.

² Used by permission of the University of Chicago Press.

in the decimal notation. For a multiplication table for 10, as given in Neugebauer's transcription (*The Exact Sciences in Antiquity* [1957], p. 16), see Table 4.

Table 4¹

1	10
2	20
3	30
4	40
5	50
6	1 (for 60)
7	1,10 (for 60+10=70)
8	1,20 (for 60+20=80)
9	1,30 (for 60+30=90)
10	1,40 (for 60+40=100)
11	1,50 (for 60+50=110)
12	2 (for 60+60=120)
13	2,10 (for 120+10=130)

A word of caution is, however, in place as to the exclusive use of the sexagesimal system, since clear evidence for other systems of notation has been found. The presence of special cuneiform signs for 1, 10, and 100 points toward the decimal system.

It is only in the Seleucid period that a special sign for "zero" is generally used. By this device, which in the older texts was already occasionally present in the form of an open space, the ambiguity of a notation 120 (as 1,20=60+20=80 or 1,0,20=3,600+0+20=3,620) was avoided. The zero symbol is, however, never used at the end of a number. For this reason it would be wrong to accept the complete functional identity of the Mesopotamian and our zero.

"The advantages of the Babylonian place value system over the Egyptian additive computation [see § A1a above] with unit fractions are so obvious that the sexagesimal system was adopted for all astronomical computations not only by the Greek astronomers but also by their followers in India and by the Islamic and European astronomers. Nevertheless the sexagesimal notation is rarely applied with the strictness with which it appears in the cuneiform texts of the Seleucid period in Mesopotamia. Ptolemy, for example, uses the sexagesimal place value system exclusively for fractions but not for integers. . . . The same procedure was followed by the Islamic astronomers and it is the reason for our present astronomical custom to write integers decimally and then use sexagesimal minutes and seconds" (O. Neugebauer, *The Exact Sciences in Antiquity* [1957], p. 22).¹

In order to divide a number a by a number b , the reciprocal of b ($1/b$) as found in the tables of reciprocals which often accompanied the multiplication tables was multiplied by a . In the tables of reciprocals the numbers are arranged in such a way that the product of any number of the left-hand column and of the corresponding number in the right-hand column equals 1 (or any other power of 60): 2. 30/60=1; 3.20/60=1, etc.), as in Table 5.

It is obvious that this procedure works only in case the number a contains the prime numbers 2, 3, and 5. For those numbers, absent from the table, which do not fulfil this condition, such as 7, 11, 13, 14, etc.,

Table 5¹

2	30	16	3,45	45	1,20
3	20	18	3,20	48	1,15
4	15	20	3	50	1,12
5	12	24	2,30	54	1,6,40
6	10	25	2,24	1	1
8	7,30	27	2,13,20	1,4	56,15
9	6,40	30	2	1,12	50
10	6	32	1,52,30	1,15	48
12	5	36	1,40	1,20	45
15	4	40	1,30	1,21	44,26,40

(O. Neugebauer, *The Exact Sciences in Antiquity* [1957], p. 32; see also the same author's "Sexagesimalsystem und babylonische Bruchrechnung," *Quellen und Studien zur Geschichte der Mathematik*, Abteilung B, Band I-II [1930-32]).

sometimes the remark "7 does not divide," "11 does not divide," etc., is found. Other tables, however, give complete lists of reciprocals of both "regular" and "irregular" numbers (see A. Sachs, "Babylonian Mathematical Texts I," *Journal of Cuneiform Studies*, 1 [1947], 219-40).

Further proof of the skill of the Mesopotamian computers is found in the existence of tables of squares and square roots, of cubes and cube roots, etc. In most cases the roots are given for perfect squares and cubes only. As an approximation of $\sqrt{2}$, both 1.416 and the remarkably correct 1.414213 are given. The former is the same as found in the Indian *Sūlvāsūtras* (third or fourth century B.C.?). For lack of direct evidence, it is hard to say in which way these approximations were found. Similarly, it is hard to say whether the correct answer to the problem of computing the total sum (S) of the geometric series consisting of ten terms ($n=10$) with first term (a) 1 and ratio (q) 2 was found by simple addition ($1+2+4+8+16+32+64+128+256+512=1023$) or by the use of a formula similar to the modern formula

$$S = a \frac{q^n - 1}{q - 1},$$

since the Mesopotamian scribe prescribes only to take the last term (512) minus 1 and to add the last term to it ($511+512=1023$).

An interest in number theory appears in the text known as Plimpton 322. Its numbers as arranged in the first three columns seem to have been obtained as a series of solutions of the Pythagorean equation $a^2 = b^2 + c^2$ (the first column list a^2/c^2 ; the second and third columns give the corresponding values of b and a). For a different interpretation, see E. M. Bruins, "On Plimpton 322. Pythagorean numbers in Babylonian mathematics," *Koninklijke Nederlandsche Akademie van Wetenschappen* (Amsterdam), *Proceedings*, vol. LII, no. 6 (1949), pp. 191-94; *Sumer*, 11 (1956), 117-21.

b. Algebra. Three preliminary remarks are in order. First, the use of the term "algebra" as applied to the contents of certain Mesopotamian mathematical texts seems to be justified by the fact that they contain problems resulting in equations of the first and second order, with one or more unknowns, which, but for the use of a symbolic notation, are solved by means of the systematic application of a developed

¹ Used by permission of Brown University Press.

combinatory procedure similar to that used in "modern" algebra. Furthermore, some of these texts seem to be the result of theoretical interest or to have, while repeating the original problem in a more complicated form, a didactic purpose, rather than to be the outcome of practical considerations. Finally, it should be kept in mind that the remarkable achievements of the Mesopotamian algebraists are to be taken as the result both of trial and error and of a rational theoretical effort.

Out of the numerous texts dealing with such problems as equations of the first, second, and, in special cases, of the third and fifth order, compound interest, consecutive powers of given numbers, and the determination of the exponents of given numbers, the following problem involving the solution of an equation of the second degree ($11x^2 + 7x = 6.25$ or, in the accepted form, $11x^2 + 7x - 6.25 = 0$) may serve as an example. For the sake of convenience the sexagesimal notation of the original text has been replaced by the decimal notation, and other slight changes have been made; the symbols a , b , and c have been used for 11, 7, and 6.25 respectively in order to show how the final formula

$$x = \frac{-b + \sqrt{b^2 + 4ac}}{2a}$$

was obtained:

"Multiply 11 [a] by 6.25 [c]: 68.75 [ac]. Take half of 7 [b]: 3.50 [$\frac{b}{2}$]. Multiply 3.50 [$\frac{b}{2}$] by itself:

$12.25 [\frac{b^2}{4}]$. Add $12.25 [\frac{b^2}{4}]$ to 68.75 [ac]: $81 [\frac{b^2 + 4ac}{4}]$

The square root of 81 is $9 [\frac{\sqrt{b^2 + 4ac}}{2}]$. Subtract 3.50

$[\frac{b}{2}]$. . . from $9 [\frac{\sqrt{b^2 + 4ac}}{2}]$: $5.50 [\frac{\sqrt{b^2 + 4ac}}{2} - \frac{b}{2}$ or $\frac{-b + \sqrt{b^2 + 4ac}}{2}]$. . ."

One final step, the division of the last formula by 11 [a], is needed to obtain the correct answer: 0.50; the negative answer [-1.13636] is neglected.

c. Geometry. It would be somewhat wrong to consider geometry a special branch of Mesopotamian mathematics. Spatial relations were considered of importance only insofar as they led to algebraic equations. In other words, the "geometric" problems were of a primarily algebraic character.

Out of the large number of interesting problems only a few can be selected:

a) The rectangular triangle inscribed in a semi-circle is understood in the following problem (see Fig. 1 below): "60 (is) the perimeter, 2 (the length of) the perpendicular (on the chord). Which is the length of the chord?" The solution says: "Square 2 [a]: 4. Subtract 4 from 20 [d , which, it should be noted, assumes a value 3 for π ; see below]: 16: Square 20, the diameter [d]: 400. Square 16 [$d-2a$]: 256. Subtract 256 [$(d-2a)^2$] from 400 [d^2]: 144. The square root of 144 is 12. That is the length of the chord. Thus one should proceed." From Fig. 1 it will be seen without difficulty that the scribe follows the formula

$$l = \sqrt{d^2 - (d-2a)^2}$$

in order to establish the length of the chord.

Fig. 1

Fig. 2

b) Knowledge of the Pythagorean theorem is also implied in the solution of a problem which involves the determination of the length (L), width (l), and diagonal (d) of a rectangle if $L + l + d = 40$ and $L \cdot l = 120$. The correct answer ($L = 15$, $l = 8$, $d = 17$), which is given without the intermediate steps, is based on the equation $d^2 = L^2 + l^2$.

c) That the concept of similarity of rectangular triangles was manipulated is apparent from the following problem (see Fig. 2 above). Height (H) and width (e) of a wall are given. A piece of wood (a tree?) sticks out above the wall at a height h . At what distance (x) does an observer have to be from the wall to see the top of the piece of wood? From the similarity of the triangles $AA'B$ and $A'CB'$ it results that

$$\frac{h}{e} = \frac{H}{x}$$

from which the formula

$$x = e \frac{H}{h}$$

is derived by the scribe.

As to the circle, most documents give the crude value 3 to π . A better approximation of $3\frac{1}{2}$, however, is given in a Susa text. (See E. M. Bruins, "Quelques textes mathématiques de la mission de

Suse," *Koninklijke Nederlandse Akademie van Wetenschappen* [Amsterdam], *Proceedings*, vol. LIII, no. 7 [1950], pp. 369-77.) As noted by Neugebauer, this approximation does not seem to be attested before Albrecht Dürer in 1525.

Among the other mathematical texts found at Susa in 1936 are tablets which give the computation of the radius r of a circle which circumscribes an isosceles triangle of sides 50, 50, and 60 ($r=31.25$), the regular hexagon from which the approximation 1.75 for the square root of 3 can be deduced, a problem concerning the sides x and y of a rectangle with diagonal d with given values for xy and x^3d , which leads to a quadratic equation for x^4 ($x^3 + a^2x^4 = b^2$), etc.

The volume of cubes and parallelepipeds is correctly calculated (product of the base and the height). The volume of the truncated pyramid is calculated by the approximative formula: $V = \frac{1}{3}h(a^2 + b^2)$, a and b being the length of the lower and upper base and h the height. The volume of the cylinder is calculated with $\pi = 3$ (see above). No formula for the sphere has been found.

2. **Astronomy.** It is only since the careful investigations of such scholars as Epping, Kugler, Strassmaier, Schaumberger, Neugebauer, and others that a more precise view of Mesopotamian astronomy, free from misconceptions about the importance of magic, number mysticism, and astrology, has been reached. Chronologically the astronomical texts, the large majority of which originate from the archives in Uruk and Babylon and which were written by such professional scribes as Sudines, Naburianos, and Kidenas, as mentioned in the Greek and Latin sources, fall into several groups. As in the case of mathematics, evidence for the existence of a Sumerian astronomy is lacking.

a. **The older period (1800-400 B.C.).** The first texts based on observation, in this case of the planet Venus, date from the reign of Ammisaduqa (ca. 1650); they have proved to be of importance for the chronology of the period of Hammurabi. See Langdon, Fotheringham, and Schoch, *The Venus Tablets of Ammizaduga* (1928).

From a tablet from Nippur, written in the Cassite period but actually dating from an older period, it appears that the universe was conceived as consisting of eight concentric spheres with the moon in the center. (See O. Neugebauer, *Quellen und Studien zur Geschichte der Mathematik*, Abteilung B, Band 3 [1936], pp. 273 ff.)

In texts written ca. 700 B.C. though actually from an older age, the fixed stars, the planets, the moon, the seasons, etc., are mentioned. (See E. F. Weidner, "Ein babylonisches Kompendium der Himmelskunde," *AJSL*, 40 (1924), 186-208. B. L. van der Waerden, "Babylonian Astronomy II, The Thirty-six Stars," *JNES*, 8 (1949), 6-26; "Babylonian Astronomy III, The Earliest Astronomical Computations," *JNES*, 10 (1951), 20-34. From the same time date texts which deal with solar and lunar eclipses.

It seems safe to assume from these and other texts that by the end of the older period the Babylonian astronomers used "the zodiac of 12 times 30 degrees as reference system for solar and planetary motion," used "a fixed luni-solar calendar and probably some of the basic period relations for the moon and the

planets," and possessed "an empirical insight into the main sequences of planetary and lunar phenomena and the variation of the length of daylight and night." (O. Neugebauer, *The Exact Sciences in Antiquity* [1957], p. 103.)

b. **The Seleucid period (third, second, and first centuries B.C.).** The tablets of this period present the most mature achievements of Mesopotamian astronomical science.

i. **The lunar calendar.** It seems that from the beginning the Mesopotamian calendar has been lunar at all times. The beginning of the month was counted from the evening when the new moon could be seen again for the first time shortly after sunset. Apart from varying meteorological conditions during the observation of the horizon, a number of technical factors (the variable velocity of both the moon and the sun, the variation of the angles between the ecliptic and the horizon, the variation of the latitude of the moon) cause the length of the lunar months to be subject to variations. This length is actually comprised between 29 days plus 6 hours and 29 days plus 20 hours. A calendar of months of 29 and 30 days is only roughly in accord with the lunar cycle. Complete accordance would necessitate the addition of 1 day to 1 month of 29 days every 30 months. In addition to the variables mentioned above, the use of a calendar of this kind is accompanied by other inconveniences. There is, e.g., the fact that the lunar year of 12 average lunar months represents 354 days and is $11\frac{1}{4}$ days shorter than the solar year. After 3 such years the lunar year is over a month behind the solar (seasonal) year, and after 9 such years there will be a difference of a full season. A periodic adjustment becomes necessary in the form of the addition of a thirteenth month by royal decree. As Hammurabi puts it: "This year has a gap. The next month should be inscribed Elul II"; and, careful not to give the taxpayers an extra month, Elul (I) and Teshrit being consecutive months, he adds that "the payment of taxes in Babylon will be terminated by the 25th of Elul II instead of by the 25th of Teshrit." Regularity in the intercalation of this thirteenth month is attested only from the fourth century B.C. onward; 7 intercalations are prescribed in 19 years, since 235 lunar months correspond exactly to 19 solar years or 19 lunar years plus 7 months.

ii. **The lunar ephemerides.** In order to cope with the difficulties connected with the variations of the length of the lunar month, a coherent system was developed by the Mesopotamian scribes predicting the effects of the above-mentioned variables on the visibility of the new crescent at the horizon. This theory lies at the basis of the composition of the so-called lunar ephemerides.

These documents, from Seleucid times, consist of columns of numbers and are of two types (I and II or A and B), of which, according to Kugler, the I or A type is more ancient and more primitive than the II or B type. Both types existed for unknown reasons simultaneously.

The main difference between the two types resides in the assumption, in the A-type texts, of a constant velocity of the sun, which runs contrary to actual observation but results in regular numerical progressions in the series of numbers on the tables. In the

B texts the numerical progressions show variations in accordance with the variability of the sun's velocity as confirmed by observation. Within the limits of this survey it is impossible to do justice to the contents of the ephemerides without assigning considerably more space than is available to technical discussion. Suffice it to say that the numerical data of these tablets refer to such topics as the year of the Seleucid era, the consecutive months, solar and lunar velocity, the length of daylight and night, the latitude of the moon, the evening of the first visibility of the new moon, the inclination between the ecliptic and the horizon, etc. (See further O. Neugebauer's chapter "Babylonian Astronomy," *The Exact Sciences in Antiquity* [1957], pp. 110-22.)

iii. **Eclipses.** With the data contained in the ephemerides it is possible to give an accurate computation of lunar eclipses. It seems likely that previously—as early, perhaps, as the time of Sargon I—lunar eclipses could be more or less precisely computed. A more refined method of computation became available only after the ephemerides were developed.

These same data, however, were insufficient for the computation of solar eclipses. The only question they are able to answer is whether a solar eclipse was excluded or possible.

iv. **Planets.** As in the case of the ephemerides, the planetary theory developed by the Mesopotamian scribes cannot be fully described within this framework. Several different systems were apparently in use simultaneously. They seem to have been modeled after the types A and B of the lunar ephemerides. In general it can be said that the procedure adopted in the planetary ephemerides is analytical. Each phenomenon regarding the planets was treated separately, just as if it concerned an independent body moving in the ecliptic. The planets of regular movement ("inner" planets), such as Venus, were studied without a division of the ecliptic; for others, like Mars ("outer" planets), a division of the ecliptic in six parts became necessary, and the movement of these planets within each of these six parts was considered as "regular."

The results of the Mesopotamian astronomers for the synodic revolutions of the planets are given in Table 6:

Table 6¹

Planet	Number of revolutions	Years
Mercury	145	46
Venus	5	8
Mars	15	32
Jupiter	65	71
Saturn	57	59

(For detailed information see O. Neugebauer, *Astronomical Cuneiform Texts*, vol. II [1955].)

It should be stated that the conditions and the tools of observation (*alidade, gnomon, polos, clepsydra*) set limits to the precision of the celestial phenomena observed. It was their arithmetical skill and versatility which enabled the Mesopotamian astronomers to go beyond these limitations and to collect the precise numerical data contained in the ephemerides.

¹ O. Neugebauer, *Astronomical Cuneiform Texts* (London: Lund Humphries & Co. Ltd., 1955).

v. **Astrology.** From the older period (see § B2a above) date documents which deal with celestial omens which link important events in the life of the community (peace, prosperity; famine, epidemics, flood, war) and the king (universal dominion, victory; rebellion, usurpation) with certain celestial phenomena. The most important of these texts is known as *Enūma Anu Enlil*, "When Anu, Enlil . . ." (see E. F. Weidner, *Archiv für Orientforschung*, 14 [1942], 172-95, 308-18; 17 [1954], 71-89). This kind of omen texts may have served as the starting point for the horoscopic astrology of Hellenistic times.

In this connection and in connection with the wide spread of "Chaldean" astrology, it should be remembered that the rise of astrology in Mesopotamia and horoscopic astrology is rather recent. The earliest horoscope in Mesopotamia dates from 410 B.C., when Mesopotamia formed part of the Persian Empire; other cuneiform horoscopes belong to the Seleucid period; in Egypt the earliest horoscopes are from the reign of Augustus. Further, it should be kept in mind that the number of astrological texts, almost all of which belong to the Seleucid period, is very small if compared with the number of astronomical texts.

For detailed study of the older history of astrology and its subsequent popularity in Hellenistic and later times, see such works as F. Cumont, *L'Égypte des astrologues* (1937); A. Bouché-Leclercq, *L'astrologie grecque* (1899); A. Festugière, *La révélation d'Hermès Trismégiste*, vol. I; *L'astrologie et les sciences occultes* (2nd ed., 1950).

3. **Medicine.** The larger majority of medical texts comes from the royal library of Ashurbanipal (seventh century B.C.) and from temple archives. From the earliest times the art of medicine and the magical technique of the exorciser were well kept apart, and the former may be considered an objective science. A Sumerian text from ca. 2100 B.C. from Nippur contains a series of prescriptions without resorting to magical practices. In addition, this text gives the impression of being the result of long previous experience. In another, Assyrian text a repertory apparently composed by an individual physician is given which contains a list of plants with the corresponding disease and the proper method of preparation and application in three parallel columns.

To the Kassite period belongs a group of tablets which deal with diagnosis and prognosis. In them the practices of the magician and the physician appear together. See the work of R. Labat quoted in the *bibliography*; and for possible parallels between the Akkadian, Greek, and Indian procedure, see J. Filliozat, "Pronostics akkadiens, grecs et indiens," *J.A.* (1952).

In some texts a general classification after such symptoms as fever, skin disease, partial or general paralysis, troubles attributed to possession by a demon or witchcraft, is given. In other cases the Mesopotamian compilers introduced some kind of order among the medical documents by classifying them after the afflicted parts of the body. Thus, special collections of texts have been found which deal with diseases of the skull and face, the ears, the eyes, the respiratory organs, the liver (a particularly severe and often incurable kind of jaundice is called *ahhāzu* after the name of a demon), the genital

organs, the urinary tract (a bronze tube was used for injections into the urethra), the intestines, the rectum, the lower extremities, etc.

Little direct information exists on surgery. In general it is clear from indirect evidence that serious and delicate operations (cataract[?], treatment of pleurisy by incision[?], trepanation[?]) were successfully executed. No document, however, describes the methods which were followed in such cases. The surgeon's art seems to have been handed down by direct oral instruction.

In spite of the fact that in many instances the documents deal side by side with magic and medicine, a distinct tendency to separate the two procedures and to adopt a more enlightened method of approach is apparent. Although the distinction between left (unfavorable) and right (favorable), all-important in divinatory practices, occurs also in medicine, it seems to have lost most of its force. Similarly, in the case of the symbolism of colors, so important in magic and divination, but explained in terms of their relation to certain facts confirmed by medical experience (red, inflammation; yellow, liver disease), a positivistic attitude of mind comes to the fore. The notion of the importance of the evolution of a disease, the recognition of the possibility of more than one diagnosis in the case of identical symptoms, the observation of a regular pattern in the condition of patients suffering from certain fevers, are so many indications of the same trend.

The products of Mesopotamian pharmacutists and druggists enjoyed wide popularity in the Near East and were traded and used over an extensive area. The correct understanding of the plants and minerals used for them, their composition and formula, has been promoted by recent studies on chemistry, geology, and botany. (See R. C. Thompson, *A Dictionary of Assyrian Chemistry and Geology* [1936]; *A Dictionary of Assyrian Botany* [1949].)

C. ISRAEL. In our main source, the Bible, the data on ancient Hebrew science are incidental and very small in number. This is partly because of the character and purpose of the Bible. In addition, the political vicissitudes which accompanied the existence of Israel hardly ever permitted the creation of conditions favorable to scientific activity.

1. Mathematics. There is no evidence for anything even approaching an organized discipline of mathematics in the Bible. Scattered evidence for the use of both the decimal and the sexagesimal system can be found. The names of the numbers 30 to 90 are the plural forms of the numbers 3 to 9 (שָׁלוֹשׁ=3, as against שְׁלוּשִׁים=30, etc.). Among the dry and liquid measures the proportion 1 to 10 occurs (Ezek. 45:11). Next to the sequence 1 talent=60 minas=3,600 shekels, based on the sexagesimal system, 1 talent is also equalled to 3,000 shekels (Exod. 38:25-26; cf. Ezek. 45:12). See further WEIGHTS AND MEASURES.

The extent of ancient Hebrew knowledge of (empirical) geometry can only be guessed from references to its use for surveying purposes which presuppose considerable practical skill.

2. Astronomy. The sum total of elementary observations of celestial phenomena found in the Bible can be summed up briefly.

a. Sun and moon. See SUN; MOON.

b. Eclipse. Eclipses of the moon may be alluded to in the expressions "to become dark, to be darkened," in Isa. 13:10 (חָשַׁךְ); Joel 2:10 (קָדַר); and "to turn into blood" in Joel 2:31. It should be noted that these same passages also mention the darkening of the sun. See also Matt. 24:29; Acts 2:20; Rev. 6:12.

c. Stars. "The stars" (כּוֹכָב; Ugaritic *kbbk*; Akkadian *kakkabu*; etc.) are created by God (Gen. 1:16); the "stars of heaven" are mentioned in Gen. 22:17 and elsewhere; the "shining stars" praise God (Ps. 148:3); the "stars of God" occur in Isa. 14:13; their multitude is mentioned in Gen. 15:5 and their height in Job 22:12.

Of individual stars, "Morning Star" or "DAY STAR" (הֵלֵל, *Hêlêl* [Isa. 14:12; KJV "Lucifer"]; see SHAHAR) and KAIWAN (i.e., Saturn; כַּיִן [Amos 5:26]; Akkadian *kaiawānu*; cf. REPHAN [Acts 7:43]) deserve to be mentioned.

The star of Bethlehem (Matt. 2:2) was probably a comet or a meteor.

Worship of the stars and other celestial bodies was explicitly forbidden (Deut. 4:19; see also II Kings 17:16; Jer. 19:13; Ezek. 8:16).

d. Constellations. Among the constellations mentioned (Job 9:9; 38:31-32), only the identification of כְּסִיל (Job 9:9; 38:31; Amos 5:8), "insolent, stupid, dull," with ORION (plural כְּסִילוֹת [Isa. 13:10; "their constellations"]) may refer to Orion and its constellations), and of כִּימָה (Job 9:9; 38:31; Amos 5:8), "heap, herd" (Arabic *kūmu*), with the PLEIADES seems to be reasonably certain. In the case of עֵשׂ (Job 9:9 [עֵשׂ]; 38:32 [עֵשׂ עַל בְּנֵיהָ]), "lion" (Arabic *'ayyūl*), there is doubt as to whether Arcturus (KJV), Ursa Major, the Pleiades(?), or Hyades(?) are meant (RSV "the Bear"). Even more uncertain are הַרְרֵי הַיָּמִין (Job 9:9), the "chambers of the south" (i.e., the constellations of the S zodiac[?]); מְזָרִית (Job 38:32), MAZZAROTH, a plural form, which has been taken as a reference to Venus as morning and evening star, the Hyades, or the S constellations of the zodiac; and מְזָרִים (Job 37:9), *mēzārîm*, which is rather an expression for the cold N winds than a reference to the Hyades (RSV "whirlwind").

e. Astrology. "Astrology" as a designation for the art based on the assumption of an inescapable relationship between the celestial bodies and terrestrial happenings was obviously not officially at home in Israel. Isa. 47:13 exhorts Babylon to resort to astrologers, stargazers, and monthly prognosticators in a last effort to escape its doom (הַבְּרִי שְׂמִים, lit., "dividers of the sky"; ἀστρολόγοι). In Dan. 1:20; 2:2 the translation "conjuror" (cf. RSV "ENCHANTER") for אֲשַׁפּוּ (Akkadian *išippu*) is preferable to the KJV "astrologer." The same disregard for astrology appears from Jer. 10:2:

[Be not] dismayed at the signs of the heavens because the nations are dismayed at them.

See also ASTROLOGER.

SCOFFER [שָׂפֵר, from שָׂפַר, originally to be spokesman (KJV SCORNER)]; TAUNT [תָּוַן, to be sharp, to say sharp things] (KJV REPROACH). One of several parallel expressions used, mostly in the book of Proverbs, to describe the man who rejects the path of WISDOM (see also PATH; WAY). In the OT the scoffer is numbered among the simpletons, the fools (Prov. 1:22), and the wicked (9:7), being the very opposite of the wise (13:1; 14:6; 15:12) and happy man (Ps. 1:1; see BLESSEDNESS). Although he is apparently often punished bodily (Prov. 19:25, 29; 21:11; 22:10), this does not serve to improve him, since he will either abuse (9:7) or hate (vs. 8) his correctors, and will not listen in any case (13:1)! He scoffs at the way of wisdom and right, for the sake of scoffing (1:22), and is a source of strife, quarreling, and abuse (22:10).

His character is perhaps more acutely assessed in 21:24, where he is identified with the man of arrogant pride; this renders him incorrigible, and he seeks wisdom in vain (14:6; 15:12). He is an abomination to men because of his sinful folly (24:9), and thus incurs the dread "scoffing" of God (3:34). In Isa. 29:20 he shares the fate of the ruthless in the day when the meek and the poor are exulting in the Lord (cf. Prov. 3:34).

The word "taunt" describes the derisive mockery and scorn of an exultant enemy (cf. parallel words in Pss. 79:4; 89:51; 102:8). Thus, to be "made a taunt" implies utter defeat and oppression.

The psalmist describes his suffering in terms of the taunts of his enemies (Ps. 102:8) or of his friend (Ps. 55:12)! Nehemiah's enemies attempt a ruse to frighten him, thus putting him to scorn (Neh. 6:13). Pss. 44:13; 79:4 cry out that Israel has become the taunt of the neighboring people, while in Neh. 4:4; Ps. 79:12, Yahweh is bidden to turn their taunts upon their own heads; for Yahweh himself is the real object of this derision (Ps. 79:12; cf. 89:51). The scorn of the enemy against ruined Israel as well as Yahweh is expressed in the phrase: "Where is your God?" (Ps. 42:10). Zeph. 2:8 envisions retribution in the reversal of the "taunts of Moab" which have been heard by Yahweh. "Taunt" further appears in a series of synonyms for utter devastation by divine judgment in Jer. 24:9; 42:18; 44:8, 12; 49:13; Ezek. 5:15 (parallel to such words as "desolation," "reproach," "curse," "horror," "BYWORD").

SCORPION [עקרב; Arab. 'aqrab; Assyrian *akrabu*; Ethio. 'aqrab; σκορπίος]. An arachnid (not an insect), of which there are a dozen species in Palestine and ninety per cent of which are the yellow *Buthus quinquestratus*. Scorpions are slow, nocturnal animals which prey upon insects and other arachnids, including other scorpions. Most species carry a poisonous sting at the end of the tail, which is fatal to their prey and extremely painful even to man.

According to Deut. 8:15, the wilderness abounded in both serpents and scorpions. The מעלה עקרבים, "Ascent of AKRABBIM," may have been so named because of an abundance of them.

Rehoboam threatens his people with a worse yoke than his father, Solomon, put upon them (I Kings 12:11, 14; II Chr. 10:11, 14). In fact, it will be as much worse as a scorpion is more dreaded than a whip.

Ezekiel is told not to fear his people even though their words and looks compare with briars, thorns, and scorpions (2:6).

Jesus, in giving the Seventy authority over serpents and scorpions, was referring to everything opposed to himself (Luke 10:19). He tells his disciples that earthly fathers know better than to give a child a stone, a serpent, or a scorpion when he asks for food (Luke 11:12). God, being wiser than men, knows even better how to answer requests addressed to him.

32. Scorpion

The first woe to strike those not sealed upon their foreheads is locusts, large as horses, equipped with stings like scorpions, which will torment them for five months (Rev. 9:3, 5, 10).

SCOURGING. Beating with rod or staff (שׁבט, שבט) was a form of discipline and punishment dealt out to slaves, children, and—in the wisdom literature—to fools (Exod. 21:20; Prov. 13:24; 26:3; Isa. 9:4). More painful was the hide whip (שׁוּשׁ; I Kings 12:11, 14; properly for beasts [cf. Prov. 26:3; Nah. 3:2]), of which the עקרב, "scorpion"—so called because of its sting—was the cruelest type (II Kings 12:11, 14).

As a judicial penalty forty strokes are the maximum allowed by the law of Deut. 25:1-3, to prevent

the undue humiliation of the culprit. The number varied in accord with the offense (vs. 2), but the laws fail to specify which crimes are punished by scourging (save, perhaps, for the case of defamation: ויסרו of Deut. 22:18 is understood by Jos. Antiq. IV.viii.23 and Sifre as "beat" [so RSV]). The offender was placed in a reclining position and beaten under the supervision of the judge.

Later Jewish law punished with scourging contraventions of biblical prohibitions not otherwise penalized (M. Mak. 3:1-9). The Mishna describes the procedure thus: After being examined to determine whether he could stand flogging, the culprit was bound by his hands to a pillar, and his back and chest were bared. The minister of the synagogue (הוֹן הַכְּנֵסֶת; cf. Matt. 10:17) administered the flogging with a whip of calfskin, doubled twice and interlaced with two ass-hide straps (hence the verb μαστιγῶ in Deut. 25:2-3 LXX; Matt. 10:17, from μάστιξ, by which the LXX renders שׁוּשׁ). One third of the strokes were laid upon the culprit's chest and two thirds on his back, to the total of thirty-nine (הַתְּ אַרְבַּעִים הַסֵּר אַחַת = τεσσαράκοντα παρὰ μίαν, "forty less one"; II Cor. 11:24; cf. Jos. Antiq. IV.viii.21, 23)—one stroke fewer than allowed in Deuteronomy, to allow for error. If he befouled himself, the flogging was halted; if he died under the whip, there was no guilt for him (M. Mak. 3.10-14).

Roman practice in scourging varied with the status of the culprit. Freeman might be beaten with rods of elm or birch (*virga*, ῥάβδος; cf. I Cor. 4:21, whence ῥαβδίζω in Acts 16:22; II Cor. 11:25) by the lictors (ῥαβδοῦχος, "bearer of rods"; cf. Acts 16:35, 38). Slaves and non-Romans might be examined by scourging with a whip (μάστιξ in Acts 22:24, whence μαστιγίζω in vs. 25). The victim was stripped (16:22) and his hands tied to a post with thongs (22:25). Slaves, aliens, and criminals condemned to death might be beaten with a whip of knotted cord or leather straps, often weighted with pieces of metal or bone to aggravate the torture.* This worst form of scourging, known as *flagellum* (whence φραγέλλιον in

33. Roman scourges

John 2:15; φραγελλῶν in Matt. 27:26; Mark 15:15), was administered upon the naked back, and was at times fatal. Fig. SCO 33.

SCREECH OWL. KJV translation of לילית (Isa. 34:14; RSV NIGHT HAG). See LILITH.

SCREEN [ךסמ, from סכך, to cover]; KJV HANGING. Alternately: COVERING. The priestly term for the three screens of the TABERNACLE furnishings.

It describes the screen separating the Holy of Holies from the rest of the TENT (e.g., Exod. 35:12 [LXX καταπέτασμα]; 40:21; etc.). For this screen the Hebrew also uses the word פרכת, "veil." The Greek does not distinguish consistently between the two Hebrew words. The Hebrew often uses both words of this screen. This screen was the richest material of all three, a colored linen with the same cherubic decorations on its inside as on the rest of the hangings of the Holy of Holies. It veiled the dwelling place of God, and on the Day of Atonement blood was sprinkled in front of the veil. See ATONEMENT, DAY OF.

The second screen was at the entrance of the tent itself (e.g., Exod. 26:36 [LXX ἐπίπαστρον], 37 [LXX καταπέτασμα]; etc.). This was the same linen material but without the cherubim and not of such excellent workmanship—i.e., of the embroiderer, not of the designer.

The third screen was at the gate of the court (Exod. 27:16 [LXX κάλυμμα]; 38:18 [LXX καταπέτασμα]; etc.). This was twenty cubits wide and was of the same material as the screen at the tent door.

No veil or screen is mentioned in Solomon's temple, but II Chr. 3:14 mentions the inmost veil (פרכת). If the P tabernacle imitates Solomon's temple, then the P veil and screen would confirm the Chronicles reference in part; otherwise the P veil and screens point to the second temple. For Herod's temple the evidence is not conclusive. Matt. 27:51 = Mark 15:38 = Luke 23:45 record the rending of the inmost veil when Jesus died. Heb. 6:19; 9:3 also refer to the veil of the Holy of Holies of the tabernacle. Heb. 10:20 uses the veil as a figure of the flesh of Jesus Christ, which is the only way believers enter into the presence of God. The NT Greek word for "veil" is καταπέτασμα. Since the law of the OT was canonical in NT times, Herod's temple certainly had the veils and Josephus' description of the two temple veils confirms this.

SCRIBE [γραμματεὺς]. A class of professional exponents and teachers of the law in postexilic Judaism.

1. Meaning of the term
2. Origins

3. Scribes and Pharisees
 4. Scribes in the Sanhedrin
 5. The scribes and Jesus
- Bibliography

1. Meaning of the term. The original scribe, or *sôphêr*, was a person able to "cipher" (*sāphar*), and from this came the meaning of "secretary" or "scribe." At Jer. 36:26, the term is applied to an official who had charge of legal documents, such as deeds of purchase (cf. Jer. 32:12-15), and who had a special chamber in the royal palace (cf. II Kings 18:18; Jer. 36:12). At II Kings 22:3 ff, Shaphan the scribe appears to have been a kind of minister of finance, and, in the reign of Hezekiah, Shebna the scribe was secretary of state as well (Isa. 36:3; cf. 22:15).

Thus in pre-exilic times the term had no religious significance, but applied to a purely secular office.

There was another class, however, among whom the art of writing was cultivated, though the term *sôphêr* never appears to have been applied to them before the Exile; this was the priestly caste, the first specialists in, and guardians of, the law. While the ancient class of professional scribes did no more than supply the name, the spiritual ancestors of the scribes of later Judaism were the pre-exilic priestly exponents of the law.

2. Origins. The scribes as a professional class of "doctors of the law" had their origins in the conditions of the Exile. It was then that the law became the center of all Jewish life and exiled Israelites occupied themselves in its study.

These early scribes cannot, however, have been simply jurists in the narrower sense (as they became in later times). They were also the wise men (*hakhāmîm*), the "men of understanding," the "just men," of Proverbs, Ecclesiasticus, and the book of Daniel (Dan. 11:33, 35; 12:3; cf. Ecclus. 38:24 ff; see § 3 below). It is also undoubtedly to this class of postexilic doctors of the law that we owe the selection and fixing of the canon of the OT. They were men of (sacred) letters, occupying themselves in gathering together Israel's sacred literature as well as interpreting it; in addition they were copyists, editors, and guardians of the textual purity of scripture.

It was at the time of the restoration under Ezra the scribe that the Sopherim emerged as a distinctive and influential professional class of teachers and interpreters of the law. Ezra is the type par excellence of these earliest postexilic doctors of the law (Ezra 7:6, 11-12; Neh. 8:1, 4, 9, 13; 12:26, 36). He is described as a "scribe skilled in the law of Moses" (Ezra 7:6), and as one who "had set his heart to study the law of the LORD, and to do it, and to teach his statutes and ordinances in Israel" (vs. 10). The twofold function of interpreter and teacher was characteristic of the profession. The (νομο)διδάσκαλοι, or "teachers (of the Law)," in the NT are identical with the νομικοί ("lawyers") or γραμματεῖς (Luke 5:17; cf. 2:46; 7:30).

3. Scribes and Pharisees. Like Ezra the priest-scribe (cf. Ezra 7:12), the scribes of the restoration were, according to our sources (Neh. 8:7; II Chr. 34:13), drawn from the families of the priests and Levites, forming themselves into guilds or clans (I

Chr. 2:55). The classic description occurs at Eccles. 38:24-39:15.

He will be filled with the spirit of understanding;
he will pour forth words of wisdom
and give thanks to the Lord in prayer.
He will direct his counsel and knowledge aright,
and meditate on his secrets.
He will reveal instruction in his teaching,
and will glory in the law of the Lord's covenant.
Many will praise his understanding,
and it will never be blotted out;
his memory will not disappear,
and his name will live through all generations.
Nations will declare his wisdom,
and the congregation will proclaim his praise;
if he lives long, he will leave a name greater than
a thousand,
and if he goes to rest, it is enough for him.
(Eccles. 39:6b-11.)

According to rabbinic tradition, the period following the restoration was characterized by the rule of the Men of the Great Synagogue. The identity of these legendary figures cannot be certain, but it seems likely that they were scribes or leaders of the people drawn from the scribes. At the time of the Seleucid Hellenizing of Israel, it was a "synagogue of the scribes" (συναγωγή γραμματέων) which provided the religious backbone of the movement of popular resistance which culminated in the Maccabean Revolt (I Macc. 7:11-17). They belonged to the HASIDIM, "the pious," or "the loyalists" for the law; and they formed the spearhead of the Hasidean movement. (It is possible to interpret I Macc. 7:11 ff to mean that the "group of scribes" mentioned at vs. 12 as resisting Seleucid pressure represented at the time the entire movement or party of the Hasidim.)

It was sometime early in the Greek period that an influential group of lay scribes succeeded in forming a popular, democratic political party, consisting of themselves (at its head), with adherents and partisans from the people; they came to be known as the PHARISEES. The history of the scribes, or, at any rate, of the most influential section of them, the Pharisaic scribes, comes from now on to be the history of the Pharisaic party.

The important evidence for the position of the scribes in the time of Jesus comes from the gospels and Acts. The scribes (without further connection or qualification) are mentioned a number of times (e.g., Matt. 13:52; 9:3; Mark 9:11, 14). Individual scribes are featured in the gospel narrative at Mark 12:28 (cf. Matt. 8:19; Luke 10:25). The combination of σοφοί and γραμματεῖς at Matt. 23:34 (cf. I Cor. 1:20) reminds us of the connection between the *hakhamim* and the *sopherim*. See § 2 above.

These references to the scribes simply as such show clearly that they represented a distinctive class in the community. They practiced their legal profession throughout Palestine (and as certainly in the DISPERSION). Mark 7:1 refers to certain of the scribes from Jerusalem, and Matt. 7:29 to scribes of the masses outside Jerusalem; Luke 5:17 speaks of scribes drawn from every village in Galilee and Judea and from Jerusalem.

Most other references occur in combination with associated groups, in particular the "Pharisees and the scribes," or the "scribes and the Pharisees." The

evidence divides into two main categories: (a) that of Mark (and parallels) and Acts, and (b) that of Matthew and Luke.

Mark and Acts agree in making special mention of the "scribes of the Pharisees" (e.g., Mark 2:16 [cf. Luke 5:30]; Acts 23:9: lit., "some of the scribes belonging to the sect of the Pharisees"). Such passages are generally taken to imply that there were scribes with other sectarian affiliations, such as Sadducean scribes.

Mark agrees with Acts in the description of scribes in association with chief priests and elders (e.g., Mark 8:31; 10:33; 11:18, 27; 14:1; 15:31; cf. Matt. 2:4; 21:15; Luke 22:66; 23:10; Acts 4:5; 6:12). The usual order of the terms shows elders to have been the least important of the three groups; Schürer identified them with the lay members of the SANHEDRIN. For reasons not quite obvious (Matthew himself may have been a converted scribe), Matthew substitutes "elders of the people" for the Markan "scribes" at 26:3. The chief priests were the more important of the two remaining groups; they are not only almost invariably mentioned first, but the position of the scribes in relation to the "chief priests" is indicated at Mark 15:31: "the chief priests: . . . with the scribes." The Lukan parallel uses ἄρχοντες ("rulers") for the entire group.

4. Scribes in the Sanhedrin. We evidently have to do with the composition of the Sanhedrin, the rulers of the people, consisting, in order of precedence, of chief priests, scribes, and elders. The chief priests were the heads of the priestly class, high priest, ex-high priests, and other leading members of the sacerdotal aristocracy (Acts 4:6: ὅσοι ἦσαν ἐκ γένους ἀρχιερατικοῦ). The scribes were obviously a special, high-ranking group in the Sanhedrin; they may have been identical with the scribes from Jerusalem mentioned at Mark 3:22; 7:1. Next to the high priest and his family, this group of Sanhedrin scribes represented the leading personages in the Jewish bureaucracy of the time.

The chief priests must have belonged, chiefly if not exclusively, to the party of the SADDUCEES. To which party did the Sanhedrin scribes belong? The accepted view is that they adhered strongly to the sect of the Pharisees, but also included Sadducean scribes. What is certain is that there were Pharisaic scribes in the Sanhedrin; Gamaliel (Acts 5:34 ff) was a Pharisee and a scribe. The only evidence we have for the existence of Sadducean scribes is the inference from the passages discussed above, referring to the "scribes of the Pharisees," together with one inconclusive reference in Josephus (War VI.v.3) to ἱερογραμματεῖς, where the context appears to favor "priestly scribes." But it is also possible to explain Josephus' term as a general description of Jewish scribes, intended for Greek readers, without any particular reference to priestly or Sadducean scribes. The Sanhedrin scribes may have been entirely Pharisees; they may have shared the rule of the people with the priestly aristocracy, mainly Sadducean, forming a Sadducean-Pharisaic coalition, extremely useful to Rome, with its policy of "divide and rule."

The next important evidence from the gospels is the combination of "Pharisees and scribes" found at

Mark 7:5 (=Matt. 15:1), and the much more frequent combination "scribes and Pharisees," never found in Mark but confined to Matthew, Luke, and to one occurrence in John (Matt. 5:20; 12:38; 23:2, 13-15, 23, 25, 27, 29; Luke 6:7; 11:53; John 8:3).

5. The scribes and Jesus. At Mark 7:5 the phrase "the Pharisees and the scribes" is not a stereotyped formula such as "scribes and Pharisees" has clearly become in Matthew. In the Markan passage it is a substitute for the earlier description "the Pharisees . . . , with some of the scribes, who had come from Jerusalem." This was a definite group of Pharisees with a certain number of Jerusalem scribes. It has all the appearance of having been an official deputation, and, since Jesus was being challenged on a point of law, his interrogators must have been the scribes from Jerusalem. It seems likely that the Pharisees belonged to a local group who had called in the scribes from the capital, possibly members of the Sanhedrin (or their deputies). The same kind of official visit is portrayed by Luke in his version of the healing of the paralytic (5:17 ff); Luke has also introduced his familiar motif of "representative universalism"—the Pharisees and "teachers of the law" (νομοδιδασκαλοι) come from every village in Galilee and Judea and from Jerusalem (cf. also Luke 7:30 ff).

There is a quite different situation with the combination "scribes and Pharisees." At Luke 6:7; 11:53, the phrase may not yet have become a stereotyped one, but its use in Matthew (and at John 8:3) bears this character. It almost certainly represents a later historical perspective; the scribes are given precedence over the Pharisees, because, as professional lawyers, they were, in fact, much more important than the nonprofessional members of the party.

It might be objected that "scribes and Pharisees" occurs in the words of Jesus himself in the long denunciation of both at Matt. 23, and is therefore original. But in both the Markan and the Lukan parallels (Mark 12:38; Luke 20:45 ff; cf. 11:46) the denunciation is directed against the scribes alone; in Luke (11:39 ff) the Pharisees come in for a separate denouncing. This seems much more likely to reflect the historical situation.

The main business of the scribes was teaching and interpreting the law. This consisted mainly in the transmission of traditional legal judgments, known as HALACHAH, and distinguished from HAGGADAH, or edifying religious discourse. The scribes' real interest—and this applied especially to the Pharisaic scribes—was less in the plain meaning of the text than in the preservation of the legal system built upon it.

Their authority, but not their example, is recognized at Matt. 23:2-3. There are, however, also more spiritually minded scribes in the gospels (Matt. 8:19 = Luke 9:57), and the gospel portrait of scribes, as well as Pharisees, requires to some extent to be corrected. It was to their faithful transmission of the religion of Israel in the Greek and Roman periods that we owe the preservation of our OT scriptures, together with the foundations in Judaism of the Christian religion.

SCRIP. A KJV archaism, referring to a wallet or a bag of a wayfarer; in I Sam. 17:40 a shepherd's bag (קִישׁ); RSV "wallet") and in Mark 6:8; Luke 9:3; 10:4; 22:35-36, a traveler's bag (τῆρα; RSV "bag").

J. M. MYERS

***SCRIPTURE, AUTHORITY OF.** The Bible has been acknowledged as authoritative by Christians in every century, including the first. Even in apostolic days, when the NT was not yet written, the church had its Bible—namely, the scriptures of what we now call the OT. When in the course of time a NT had been added to the original Jewish Bible, the Christian Bible as a book of two testaments came to be accepted as authoritative in the same sense as the Jewish Bible had been authoritative both for Jews and for Christians in the apostolic age (see BIBLE; CANON OF THE NT). Thus, church and Bible are inseparable; there never was a time when the church existed without the Bible or when the church did not acknowledge the authority of the Bible. But though it is clear that the Bible is authoritative, it is not at all easy to define the nature of its authority. This question, to which little attention had been given up to the end of the eighteenth century, became one of the most urgent and difficult questions of theological discussion in the twentieth century. This was the direct result of the revolution in historical and literary scientific method which took place in the nineteenth century.

1. Authority of scripture in the apostolic church. The NT writers regard the scriptures of the OT as completely authoritative. They have unquestioningly taken over the view of rabbinic Judaism, that the Scriptures were given by God through his Spirit as the means by which the revelation originally imparted to the patriarchs and prophets of old might be communicated to the generations which came after them. The attitude of the whole apostolic church is epitomized in the words addressed by Paul (or his admirer) to Timothy: "From childhood you have been acquainted with the sacred writings which are able to instruct you for salvation through faith in

Christ Jesus. Every scripture inspired by God is also profitable for teaching, for reproof, for correction, and for training in righteousness, that the man of God may be complete, equipped for every good work" (II Tim. 3:15-17 RSV mg.). The ancient men of faith, to whom the original revelation had been given, had been moved by the Spirit to commit to writing the sacred truths which were to instruct the generations yet unborn (e.g., Acts 4:25). Thus, the words of scripture could be cited as the direct utterance of God (e.g., Heb. 5:5) or of the Holy Spirit (e.g., Heb. 3:7); sometimes a scriptural passage is quoted under the simple formula: "He says" (λέγει; e.g., Eph. 4:8; 5:14; RSV "It is said" is inaccurate). Moses and the prophets had spoken God's truth to every succeeding generation (Luke 16:29-31). The narrative of God's dealings with his people in past times was "written down for our instruction, upon whom the end of the ages has come" (I Cor. 10:11). Thus, the apostolic church believed that God had revealed his character and purpose to the patriarchs and prophets of Israel and that the Jewish scriptures were the written record of this revelation. But these scriptures could be understood only in the light of Christ's fulfilment of them (Luke 24:27, 44-45; John 5:39); the Jews themselves could not rightly comprehend them, because they did not possess the key to their mysteries—namely, Christ. Even the prophets themselves did not understand many of the things which they wrote, for such things could be apprehended only in the light of Christ's coming (I Pet. 1:10-12). The Sacred Scriptures recorded the witness of the prophets to the Christ who was to come, while the preaching church bore its living testimony to the truth that Jesus of Nazareth was he.

Thus, the apostolic church, while it held no particular theory concerning the mode of the communication of the revelation recorded by the scriptural authors, believed that God had indeed spoken through the Scriptures. It worked out no theory of the "inspiration" of scripture; indeed, the word and the idea of inspiration are hardly biblical at all. (The word occurs only in the KJV of II Tim. 3:16, cited above from the RSV; the idea behind the phrase "every scripture inspired by God" is that God has breathed into the dry dust of the scriptural words the breath of life; cf. Gen. 2:7). In fact, the apostolic church did not believe in the "inspiration" of scripture in the sense in which later Christians, influenced by pagan ideas (cf. Vergil's Sibyl, *Aeneid* VI), came to believe in it. The veil which lies over the understanding at the reading of the Old Covenant is lifted only by Christ (II Cor. 3:14); the letter of scripture, even if engraved in stone, deadens, and the Spirit alone can breathe life into it. The Scriptures were not held to be authoritative on the ground that they were "inspired."

2. From the apostolic age to the nineteenth century. No official doctrine (dogma or church definition) of biblical authority was put forward during this whole period, because no heretic had arisen to dispute the authority of the Scriptures. Marcion (died ca. 160) questioned the authority of the OT, and the Alexandrians (Clement, Origen) during the next century found difficulties in its literal inter-

pretation, which they eased by their allegorical method (see ALLEGORY; CANON OF THE NT); but no major conflicts arose, and the authority of the Scriptures was accepted by all parties to the christological and other controversies of the ancient church. So matters continued through the Middle Ages and even through the Reformation period; Calvin would have agreed with Aquinas that theology was a matter of deducing and systematizing the truths which were contained in the inerrant words of scripture. It was the great revolution in historical method, which took place in the nineteenth century, that opened the question of biblical authority in its acute modern form. If, as a result of the application of scientific historical and literary methods (higher and lower criticism) to the books of the Bible, it was now no longer possible to believe in the literal inerrancy of scripture, in what sense could it still be believed that the Bible is authoritative? See BIBLICAL CRITICISM.

3. Inadequate solutions of the problem of biblical authority. *a. The authority of plenary inspiration.* An immediate consequence of the rise of the critical method was to provoke an extreme reaction in the form of theories of plenary inspiration. Frightened by the excesses of the Tübingen school of criticism and its successors, conservatives began to lay emphasis upon the literal inerrancy of the Bible, as inspired or even dictated by the Holy Spirit, in a manner that was novel in the history of Christian doctrine. Unbiblical notions of inspiration once more played a prominent part in the discussion, reviving the pagan conceptions of inspiration which had first entered Christian thought as a result of the Hellenization of the gospel in the second and third centuries A.D. The unbiblical word "inspiration" became the storm center of controversy, and the term "fundamentalism" has been widely applied to this type of view as a result of the appearance of a series of booklets on "the fundamentals" published in America from 1909 to 1915.

Nothing could better illustrate the devastating effects of this historical revolution upon traditional Christian belief than the triumphant recrudescence of fundamentalism, which has had a powerful appeal amid the very great religious confusion of the age, in the middle decades of the twentieth century. The widespread positivistic attitude of mind, which holds that scientific truth is the only kind of truth, is paradoxically the great strength of the fundamentalist position: since there is no other kind of truth than literal truth, either the stories of Gen. 1-3 are a literal, scientific account of creation, or they are false; there is no such thing as the truth of poetry for a generation brought up to believe that there is only one kind of truth. During the earlier years of the twentieth century, when biblical criticism seemed to be indissolubly bound up with liberal theology, the rejection of liberalism and belief in the biblical theology seemed to involve the repudiation of criticism altogether, but now it has been abundantly demonstrated that criticism and biblical theology are, in fact, not in opposition to each other, but belong together. See also INSPIRATION; REVELATION.

b. The authority of the church. Sometimes it is suggested that the Bible is authoritative because there

stands behind it the authority of the church. The authority of scripture is therefore derivative from that of the church. It was the church (whether Jewish or Christian) which in the first place accepted the various books of scripture, while it rejected others, and thus the church is the supreme authority even over the Scriptures.

Now it is true that the relation of the church's authority to that of the Bible is a very complex and difficult problem; but this solution of it is altogether oversimplified and will not bear careful scrutiny. In the first place, it confuses authority with authorization; the church authorized the canon of the Bible, but it did not confer its authority upon it. In authorizing a canon of scripture, the church recognized an authority which it did not create. Secondly, having adopted a scriptural canon, the church must submit every question of faith and morals to the test of scripture and is no longer free to accept new doctrines which are not themselves demonstrable by scriptural warrant.

c. The authority of religious experience. In the earlier years of the twentieth century liberal theologians developed the view that the authority of scripture results from the fact that the Bible is the normative record of man's developing religious experience. The men of the Bible, especially the prophets, were religious geniuses, the fine flower of a people which enjoyed a national genius for religion, just as the Greeks had a genius for philosophy or the Romans for law.

This kind of theory, though still enjoying considerable popularity, is inadequate, primarily because it does not fit the biblical evidence itself: the Hebrew prophets do not fall easily into the class of "religious genius," and they would have been astonished to hear that their backsliding fellow countrymen had a genius for religion. Moreover, the theory does not account for the objectivity of scriptural authority: if we can say only that the Bible is authoritative because it is inspiring, what are we to say to those who declare that they are not inspired by it or about those parts of the Bible which we ourselves do not feel to be very inspiring?

d. Rational and moral authority ("progressive revelation"). Closely related to the foregoing theory and often compounded with it is the view that the progressive revelation of God's will and character, which the Bible enshrines, commends itself to the rational and moral consciousness of the human race and compels its assent ("We needs must love the highest when we see it"). God revealed himself as completely as the developing conscience of mankind was able to understand, and thus the Bible traces men's evolving ideas of God's character from primitive tribalistic notions to the ultimate conception of God as the Father of Jesus Christ. The Bible is thus the record of a progressive revelation which at each stage of human spiritual evolution is authoritative.

This theory is valuable insofar as it does away with the necessity of claiming that all parts of the record are equally "inspired," but it does not account for certain hard facts. Why, e.g., did the spiritual consciousness of mankind stop evolving about the end of the first century A.D.? Why may we not ex-

pect progressive revelation to continue, and why should we not look for new and greater Christs? And what are we to say to those good pagans, who are no less rational or moral than we, but who fail to be convinced by the biblical revelation?

e. The authority of poetic inspiration. Reaction from "liberal" views of this kind expressed itself in different ways, and toward the middle of the twentieth century a new conception of inspiration was put forward in certain quarters, notably by Austin Farrer (see *bibliography*). The inspired minds of the sacred writers perceived the truths of revelation and gave expression to them, not in literal prose (as fundamentalists insist), but in great prophetic images, which convey the biblical truth in much the same way as poetry, drama, or parable conveys truth in other fields. Those who (with Bultmann) would demythologize the gospel are as far as possible from the true scriptural method of imparting truth, for ultimate truth can be expressed only by means of the religious imagination, not by discursive reasoning. The NT writers themselves were aware of the non-literal character of their imagery, and it is the modern demythologizers who have fallen into the error of literalism and have failed to understand the means by which religious truth can be expressed or communicated.

This theory has the great advantage of delivering us from literalism while yet at the same time it takes the biblical revelation very seriously; its danger is that it can easily fall over into an uninhibited proliferation of typological images and allegorical meanings, which recall the more luxuriant growths of Alexandrian speculation.

4. Toward a more adequate view. There is doubtless truth in each of the above kinds of view, but the defect of all of them is that they say little about God's action in history. A truer view would be one which starts from the fact that the history of Israel, culminating in Jesus Christ and his church, is a unique history with a significance paralleled by no other historical development.

a. The authority of Christ. The Scriptures (like the church) have no authority apart from Christ. They do not differ (as we now know) from other books because of the way in which they were written; they are amenable to the canons of literary and historical criticism just as other books are; they are not even distinctive on account of any ideas about God which they may contain—e.g., that he is love—for such ideas are found in other books which are not regarded as "scripture." The Bible must, then, derive its authority from the authority of Christ. If Christ is authoritative ("Lord"), then the Bible is authoritative; if Christ is just a man like other men, albeit a very good man, perhaps a religious genius, then the Bible is just a book like other books, doubtless a very good book and perhaps a work of religious genius. But if Christ is unique, then the Bible is unique. This is not because of the "ideas" which are found in the Bible, but because the Bible is a book of history.

b. The Scriptures as witness to Christ. The authority of scripture consists solely in the fact that the Bible is the authoritative historical witness to Christ. It is the testimony of those who actually saw and

witnessed to the saving acts of God in history (Exod. 10:2; 12:26-27; 13:8,14-15; Deut. 4:34-35; 6:20-23; Judg. 6:13; Ps. 44:1; I John 1:1-3). This is the significance both of the OT and of the NT. Both testaments witness to Christ: the OT contains the testimony of the prophets to the Christ who should come; the NT contains the witness of the apostles to the fact that Jesus of Nazareth is he. Outside the Bible there is no historical testimony to Christ; everything that can be known about the Jesus of history is to be found in it. There is, of course, valuable testimony to Christ outside the Bible (e.g., in Augustine's *Confessions* or in Bunyan's *Pilgrim's Progress*), but it is not historical testimony, and therefore it is not "scripture."

This is why the canon of the NT closes about the end of the first century A.D.; there is no more historical witness to be had, for those who had been in touch with the original eyewitnesses were now almost all passed from the scene. It is not a question of the "progressive revelation" of ideas about God, but of the testimony of eyewitnesses to the unique and saving act of God in history, the Christ event, which is the theme of the Bible as a whole.

5. The Word of God and the word of man. The Bible is essentially a book of witness, and it is this in a twofold sense. On the one hand, it contains human witness to the events which the minds of the prophets and apostles, illuminated by God's Spirit, perceived to be the saving acts of God in Israel's history. On the other hand, it becomes the means through which the Holy Spirit bears his testimony in our hearts to the truth of God's salvation. The Bible is thus both the Word of God and the words of men, and each of these statements must be taken seriously. The Bible is the Word of God in that it contains God's saving Word to the world—namely, Christ—of whom it is the only authoritative historical record. In the strictest theological sense the "Word of God" is Christ, but in a derivative sense the Bible, qua witness to Christ, may be called the "Word of God." But its words are nonetheless human words—the poor, inadequate, stammering words of men who were subject to all the limitations of their historical situation, struggling to give expression to the truth which they had perceived.

Like all human words and sentences, the scriptural writings are historically conditioned and therefore fallible; yet they express the deepest truth about man and his relation to God that can be reached by finite and sinful beings. The testimony of the human writers becomes for us the means of our apprehension of God in Christ. In Luther's striking metaphor, the words of the Bible are the swaddling clothes in which the Christ is laid: "Poor and mean are the swaddling clothes but dear is the treasure which lies within." To deny the full humanity of the biblical words is error comparable to Apollinarianism in Christology; as in Christ God and man are joined in hypostatic unity, so in the Bible the testimony of the Holy Spirit is perfectly united with the human testimony of the prophetic and apostolic witnesses. Just as God could take a poor, uncouth slave tribe and make it the instrument of his saving purpose for the world, so he could take the fragmentary com-

positions of many writers and make of them one Book, through which the testimony of the Holy Spirit might bring conviction to the hearts of many.

In the last resort the authority of the Bible is apprehended by those to whom the Spirit of God has brought conviction through the words of its human writers; this double witness to Christ is the reality which gives to the Sacred Scriptures their sole and unique authority in the hearts and lives of all who confess that Jesus is Lord. To those who are not yet ready to acknowledge Jesus as Lord, the Bible may perhaps possess other kinds of authority—that of the insights of religious genius, that of compelling rational and moral conceptions of God's nature and purpose, or that of poetic imagination; but none of these admissions is equivalent to the authority acknowledged by the Christian believer who has found in the Scriptures God's authoritative, personal address to his own soul.

Bibliography. The literature on this subject is vast. Among modern books the following may be mentioned: G. E. Phillips, *The OT in the World Church* (1942). A. Richardson, *Preface to Bible Study* (1943). H. Cunliffe-Jones, *Authority of the Biblical Revelation* (1945). A. G. Hebert, *Authority of the OT* (1947). A. Richardson, *Christian Apologetics* (1947), ch. 9. A. Farrer, *Glass of Vision* (1948); *A Rebirth of Images* (1949). W. Vischer, *The Witness of the OT to Christ* (English trans., 1949), I, 7-34. J. Woods, *The OT in the Church* (1949). A. Richardson and W. Schweitzer, eds., *Biblical Authority for Today* (1951). H. W. Bartsch, ed., *Kerygma and Myth* (English trans., 1954). A. G. Hebert, *Fundamentalism and the Church of God* (1957). J. K. S. Reid, *The Authority of Scripture* (1957).

The following will also be found of great interest in the historical development of thought: W. Sanday, *Inspiration* (Bampton Lectures; 1893). J. E. Carpenter, *The Bible in the Nineteenth Century* (1903). C. Gore, *Doctrine of the Infallible Book* (1924). C. H. Dodd, *Authority of the Bible* (1928). E. Hoskyns and N. Davey, *The Riddle of the NT* (1931).

ALAN RICHARDSON

SCROLL [מגלה; ספר (Isa. 34:4), book; βιβλίον, βιβλαρίδιον]. A papyrus or leather book roll. See BOOK; ROLL; WRITING AND WRITING MATERIALS.

SCROLLS, DEAD SEA. See DEAD SEA SCROLLS.

SCULPTURE. See ART.

SCULPTURED STONES [פסלים] (Judg. 3:19, 26). The precise meaning of the Hebrew word translated thus is not evident. Elsewhere it refers to cultic representations of deities, which were prohibited by the First Commandment (see IDOL; IMAGE; GRAVEN IMAGE). It could refer simply to stone quarries which Ehud passed on the way to and from his fateful meeting with King Eglon. This seems unlikely, however, in view of frequent usage of the word with reference to idols (see above). More probably, the references in Judg. 3 are to hewn or dressed stones, or to sculptured stones (cf. פסל, "cut, hewn"). These stones may have been set in a certain formation, as in the story about Joshua's taking stones from the Jordan (Josh. 4:20). They may have served as a boundary marker between Moab and the neighboring territory. If they were actually sculptured to a certain form or carved in relief, they probably had religious significance as well.

Boundary stones (Akkadian *kudurru*) bearing scenes in relief have been found in Mesopotamia dating from the seventeenth to the eighth century B.C. However, comparable remains have not been found in the Palestine area. Thus, no single interpretation of the Hebrew word translated "sculptured stones" in Judg. 3 can be regarded as securely established.

Bibliography. J. B. Pritchard, *ANEP* (1954), pp. 156, 176, 300-301, 310-11. G. B. COOKE

SCURVY [צרר; LXX ψώρα ἀγρία; Vulg. *scabies*] (Deut. 28:27). Alternately: **ITCHING DISEASE** (Lev. 21:20). Not true scurvy, but a fungus disease such as *tinea* (ringworm). See **ITCH**.

SCYTHE [ἄρματα δρεπανηφόρα]. A curved blade attached to a war chariot. The military equipment marshaled by Antiochus V Eupator and Lysias against Judas at Beth-zur included three hundred chariots equipped with scythes, according to the account in II Macc. 13:2, although they are omitted in the list of I Macc. 6:30, which represents the total size of the army to be considerably smaller. The scythed chariot was a popular weapon among the Egyptians and the Persians, but it was not used by the Greeks and the Romans. It is known that the Seleucid kings used it at the Battle of Magnesia (190 B.C.), but Bevan (*see bibliography*) doubts that it was used after that (cf. Polybius V.53.10; Livy XXXVII.41); and it is unlikely that it would be used in a country like Judea.

Bibliography. E. Bevan, *The House of Seleucus*, II (1902), 290; F.-M. Abel, *Les Livres des Maccabées* (1949), p. 450.

E. W. SAUNDERS

***SCYTHIANS** σιθηῖανζ. A nomadic people speaking an Indo-Iranian dialect, originating in S Russia and moving through the Caucasus into the Near East. At the beginning of the eighth century B.C. the first waves of Eurasian nomads came on horseback into the Near East: first the Cimmerians (Akkadian *Gimirrai*; see **GOMER**), and then the Scythians (Akkadian *Ašguzai*, *Iškuzai*). Esarhaddon fought with the latter, naming Ishpaka as a king of the Scythians. While the Cimmerians, hard pressed by the Scythians as well as through Assyrian efforts, turned aside into Asia Minor, the sway of the Scythians extended farther to the E. The Scythians became the allies of Assyria—their king Bartatua requested a daughter of Esarhaddon in marriage—while the Medes sided with Babylonia. It remains uncertain as to whether the Scythians made any move to save their allies when Assyria was fighting her last battles. The Scythians seem to have gone, in a large-scale raid, along the Phoenician coast down to Egypt, where Pharaoh Psammetichus (663-609) turned them back by paying them off. They are supposed to have destroyed Ashkelon and Ashdod. Eventually the Medes turned against the Scythians and defeated and destroyed them, except for a remainder, which turned back toward the N.

The Scythians are referred to in the OT under the name **ASHKENAZ** (Gen. 10:3; I Chr. 1:6; Jer. 51:27), and the threat of their raid through Palestine is

often cited as the occasion for the book of **ZEPHANIAH** and some of the oracles in **JEREMIAH** (*see* § B1). The memory of their savagery persisted even to NT times, when Paul chose the name Scythian (Σκύθης) to represent the extreme of barbarism (Col. 3:11).

Bibliography. T. T. Rice, *The Scythians* (1957).

A. L. OPPENHEIM

SCYTHOPOLIS σιθη ὄρ'ᾶ λῖς [Σκυθῶν πόλις, city of Scythians]. Apoc. name of **BETH-SHAN**. See also **DECAPOLIS**.

SEA [ים; θάλασσα]. This term, with appropriate qualifying words, refers to a general gathering of water, specific bodies of water, and structures such as the bronze sea and the sea of glass.

According to the Priestly account of the Creation, God gathered together the waters apart from the dry land and called them "Seas" (ימים; Gen. 1:9-10). The sea is mentioned in the Bible as a body of water over which God's power extends (Job 26:12; Acts 14:15), where the fish dwell (Gen. 1:26, 28), where danger lurks (Jonah 1:4; Matt. 18:6), and from which great beasts of world power are pictured by the apocalyptic writers as coming (Dan. 7:3; Rev. 13:1). There is no evidence that the people of Palestine in biblical times sailed the Mediterranean Sea with fleets of ships, as did their neighbors the Phoenicians. See **GREAT SEA**.

Although the people of the Palestinian area were not primarily a seafaring people, they were acquainted with the most important seas of the region, and their history was often linked with them in some special way. The W border of the land was frequently designated as the Great Sea or the Western Sea; it was also mentioned simply as "the sea" (ים; θάλασσα; Josh. 16:8; I Kings 5:9; Acts 10:6; etc.). Among the other seas mentioned in the Bible are the **RED SEA**; the **DEAD SEA**; and the **Sea of Galilee** (*see* **GALILEE**, **SEA OF**). The Red Sea (ים סוף; "sea of reeds"; Exod. 10:19; 15:4; etc.) was the scene of the deliverance of the Hebrews in their flight from Egypt; the sea or a part of it is referred to in Isa. 11:15 as "the sea of Egypt" (ים מצרים). The Dead Sea is commonly referred to as the Salt Sea (ים המלח; Gen. 14:3; Num. 34:12; Deut. 3:17; Josh. 3:16; etc.). It was also described as the "sea of the Arabah" (ים הערב; Deut. 3:17; 4:49; Josh. 3:16; KJV "sea of the plain"), and as the "eastern sea" (הים הקדמוני; Ezek. 47:18; Joel 2:20; Zech. 14:8). The Sea of Galilee (θάλασσα τῆς Γαλιλαίας), the largest fresh-water lake in Palestine, is frequently mentioned in connection with the ministry of Jesus (Matt. 4:18; 15:29; Mark 7:31; etc.). In the NT it is also called the Lake of Genesaret (λίμνη Γεννησαρέτ; Luke 5:1) and the Sea of Tiberias (θάλασσα τῆς Τιβερίδος; John 6:1; 21:1). In the OT it is designated as the Sea of Chinnereth (ים כנרת) in Num. 34:11; Josh. 13:27, and as the Sea of Chinneroth (ים כנרת) in Josh. 12:3.

The bronze sea (KJV "brazen sea") was a large basin made of bronze, located in front of the Jerusalem temple, and was, according to II Chr. 4:6, a storage place for water which the priests used in their ablutions. In addition to being called the "bronze sea" (ים הנחשת; II Kings 25:13; I Chr. 18:

8; Jer. 52:17), the vessel was also designated as the "molten sea" (הַיָּם מוֹלֵט; I Kings 7:23; II Chr. 4:2; see SEA, MOLTEN) and simply as "the sea" (הַיָּם; I Kings 7:24; II Kings 16:17; etc.).

The SEA OF GLASS (θάλασσα ὑάλινη) is a term used in Rev. 4:6; 15:2 to refer to a kind of heavenly sea, like crystal, which was before the throne.

W. L. REED

*SEA, MOLTEN [הַיָּם מוֹלֵט, cast, or poured, metal sea] (I Kings 7:24; II Chr. 4:2); BRONZE SEA [הַיָּם הַנְּחֹשֶׁת] (II Kings 25:13; I Chr. 18:8; Jer. 52:17; KJV BRAZEN SEA); THE SEA [הַיָּם] (I Kings 7:24; II Kings 16:17). A large vessel made of cast bronze. It was cast by Hiram of Tyre, whom Solomon engaged for bronze work (I Kings 7:13-14); according to I Chr. 18:8, it was made from the bronze which David had taken as spoil (cf. II Sam. 8:8). If it stood in the place of the corresponding bronze LAVER of the tabernacle (Exod. 30:18), it may have been located at the entrance of the temple and before the altar.

The vessel was round, with a diameter of 10 cubits, its height was 5 cubits and its circumference 30 (LXX 33) cubits, and its volume was 2,000 baths (I Kings 7:23; in II Chr. 4:2 3,000). Its thickness was a handbreadth (3 inches), and its brim was turned outward, giving the appearance of a cup, "like the flower of a lily" (see LILY-WORK). Under the brim were two rows of ornamental gourds which were cast with the vessel. The basin rested upon twelve bronze oxen, facing at right angles in four directions. The oxen were probably only pediment figures, showing only their fore parts beneath the rim of the hemisphere.

Josephus assumed that the vessel was a hemisphere and its volume 3,000 baths. Others have taken the shape to be cylindrical and denied that from the given dimensions the volume of either 2,000 or 3,000 baths was possible, irrespective of whether its shape was hemispherical or cylindrical. C. C. Wylie suggests that the volume in I Kings was hemispherical and in II Chronicles cylindrical. Using the given dimensions in the respective formulas for volume of a hemisphere ($V = \frac{1}{2} Cr^2$), and of a cylinder ($V = \frac{1}{2} Crh$), and multiplying the result by 8 baths—a supposed rabbinical rule by which a cubic cubit equals 8 baths—he obtained the following results:

a) Volume = $\frac{1}{2} \times 30 \times 25 \times 8 = 2,000$ baths

b) Volume = $\frac{1}{2} \times 30 \times 5 \times 5 \times 8 = 3,000$ baths

The problem with this solution is the source of the supposed rabbinical rule which claims that a cubic cubit equals 8 baths. R. B. Y. Scott suggests that the capacities of the "sea" given in I Kings and II Chronicles were obtained by means of calculations rather than experimental measurements, and that the scribe who in I Kings calculated the capacity of the "sea" from its dimensions used in error the formula for the volume of a sphere instead of that of a hemisphere. On the basis of the estimate of a bath as 22 liters, and the value of the Hebrew cubit as 17.5 inches or 444.7 millimeters, Scott suggests that the volume of the sea in I Kings was actually 1,000 rather than 2,000 baths. This leaves unsolved the 3,000 baths in II Chronicles. The probable solution, if there is a solution at all, is that the volumes in both

34. The Molten Sea, a copper bowl 15 feet in diameter and 7½ feet in height; from model by E. G. Howland

I Kings and II Chronicles are later scribal additions.

The purpose for the molten sea is not given in the account of the Kings. II Chr. 4:6 states that it "was for the priests to wash in." However, the cosmic symbolism of the object has long been noted, and comparison has been made with the Babylonian *apsu*, a term used for the fresh-water "deep" from which all life and fertility were derived. Likewise the ornamental oxen (bulls?) on which the basin rested must have had originally some symbolic significance.

In the reign of King Ahaz, the sea was taken "from off the bronze oxen . . . and put . . . upon a pediment of stone" (II Kings 16:17). When the Babylonians captured Jerusalem in 587 (586), the sea was broken up and its bronze pieces carried to Babylonia (25:13, 16).

SEA GULL [הַיָּבִישׁ; LXX λάρος, a ravenous sea bird, perhaps gull; Vulg. *larus* (from Gr.)] (Lev. 11:16; Deut. 14:15); KJV CUCKOO. Any of a family of web-footed sea birds (Laridae) of the subfamily Larinae, mostly of the genus *Larus* (of which there are ca. fifty species). These birds, which are gregarious and noisy, frequent sea-coasts and inland waters; their food is fish as well as various items picked up on shore such as worms, insects, bird eggs, young birds, refuse, etc.

The הַיָּבִישׁ is clearly a bird, and is unclear presumably because it eats live prey or carrion. The force of the argument that its place in the two bird lists (Lev. 11; Deut. 14) points to a land bird, and in particular to an owl (see *bibliography*), depends upon how confident we are that the lists have an intelligible arrangement which we can discover. That Driver finds eight owls in a list of twenty birds (or nineteen if we leave out the bat), raises some suspicion, in view of the variety of birds known in Palestine, that his method of identification is, in part, open to criticism.

The LXX's gull, in the light of Tristram's evidence for "many species of Sea-gull, common both on the coasts and on the Sea of Galilee" (*NHB* 211), is a

reasonable surmise. Tristram mentions particularly the Common Gull (*Larus canus*), the Great Black-headed Gull (*Larus ichthyæetus*), the Herring Gull (*Larus argentatus*), the Black-headed Gull (*Larus ridibundus*), and the Lesser Black-headed Gull (*Larus fuscus*). He also notes that petrels and shearwaters (of the family Procellariidae) abound in the E Mediterranean.

SEA MONSTER [תנין] (Job 7:12). See DRAGON; LEVIATHAN; RAHAB.

SEA OF THE ARABAH אַרְבָּה יָם [הַעֲרַבְיָה], sea of the desert, wilderness]. The lake equated in the OT with the Salt Sea (Deut. 3:17; Josh. 3:16; 12:3; see also Deut. 4:49; II Kings 14:25) and now generally called the DEAD SEA. This designation is derived from the situation of the sea in the deepest part of the Arabah depression.

SEA OF CHINNERETH כִּנְרֵת יָם. See GALILEE, SEA OF.

SEA OF GALILEE. See GALILEE, SEA OF.

SEA OF GLASS, GLASSY SEA [θάλασσα ὑάλινη]. A vision of John the seer in Rev. 4:6; 15:2. In the vision of the heavenly throne room (4:6), this sea is described as "like crystal," an obvious borrowing from Ezekiel's characterization of the "firmament" appearing in his own throne vision (Ezek. 1:22); whereas in Rev. 15:2 the same glassy sea is "mingled with fire"—i.e., either reflecting the glow of the lightning playing about God's throne (4:5), or else (as is more probably meant) actually containing or even composed of the fire of judgment, through which all men must pass to attain the farther shore of salvation (cf. the "stream of fire" issuing before the throne of the "ancient of days" in Dan. 7:10).

The view is widely held that the prototype of John's glassy sea is to be sought in the Jewish teaching regarding an original creation pattern or cosmology (*einer alten Naturanschauung*) wherein it was said that there were "waters . . . above the firmament," and so in heaven, as well as below on earth (cf. Gen. 1:7; Ps. 148:4; I Enoch 3:3; Test. Levi 2:7; Jub. 2:4). But, while this further reference may lie in the background and furnish at this point the pattern for John's cosmological scheme, his more immediate thought centers in: (a) the furnishings of tabernacle and temple, where purification in the "laver" (Exod. 30:17 ff) or "molten sea" (I Kings 7:23 ff) was required of priests approaching the sanctuary to conduct the worship of Yahweh; and (b) the victory achieved at the crossing of the Red Sea, an event which for John symbolized man's passing through the eschatological fire of God's judgment, these two occurrences accordingly being fittingly signalized, respectively, by the "Song of Moses" and the "song of the Lamb" (Rev. 15:3 ff; cf. Exod. 15). It is likely, therefore, that we should see in this "sea of glass" the laver of cleansing—an integral part of the equipment of the heavenly tabernacle, and at the same time a representation or symbol at once of

God's wrathful judgment on man's sin and of that purifying process or "holiness without which no one will see the Lord" (Heb. 12:14; cf. Ps. 24:4; Matt. 5:8; I Cor. 10:1 ff; Rev. 22:3-4). This "sea of glass" is not to be confused with the "lake of fire" (Rev. 19:20), which symbolizes the "second death" (20:14).

Bibliography

A. BIBLE REFERENCES. The first OT mention of a signet is preserved in the clan legend of Judah and Tamar (Gen. 38:18, 25). Two of the three pledges are relevant, Judah's SIGNET (חֹתֶם) and his CORD (חֲתוּלָה; KJV wrongly "bracelet"). The association suggests that Judah may have owned a cylinder seal which he wore round his neck (see § B1b below), rather than a signet ring. However, the latter is clearly indicated when Pharaoh invested Joseph with royal power (Gen. 41:42), and the Hebrew word used is טַבְעִיתָה (cf. Egyptian *db't*, current from at least Old Kingdom times). The same word is used for the various rings employed in the construction of the ark, its furniture, and Aaron's breastplate. It has therefore as wide a connotation as "ring" in English. The references in Genesis record events which traditionally took place within ca. a century of each other; the mention of Pharaoh's chariot shows that Joseph's

appointment could not have preceded the Eighteenth Dynasty (ca. 1570 B.C.).

Passages referring to the Mosaic period which contain the word חותם, and in particular those which mention the engraving of onyx stones (Exod. 28:11, 21) and (vs. 36) of a gold FRONTLET (יָצִי; KJV "plate") "like the engravings of a signet" (cf. Exod. 39:6, 14, 30), may be glosses of P documents in the Pentateuch. The ring (טבעת) is mentioned with other jewels among the free gifts offered for the tabernacle (Exod. 35:22; Num. 31:50). References to the act of sealing and to the use of seals and signets are discussed below.

1. Delegation of authority. As a conveyance of power, the use of a royal seal is attested from ca. 850 B.C., for Jezebel used Ahab's seal (חותם) to authenticate forged letters (I Kings 21:8). Postexilic sources referring to the period of the Exile give instances in which the king's ring (טבעת) was used (a) against the Jews (Esth. 3:10, 12) and (b) in their favor (Esth. 8:2, 8, 10). These sources may not be wholly historical, but the appointment of a regent for his son by King Antiochus IV Epiphanes, who was invested with the king's crown, his robe, and his signet, shows that the latter was one of the emblems of authority in the Seleucid Empire of the second century B.C. (I Macc. 6:15). Josephus refers to a similar investment in the first century A.D. (Antiq. XX.ii.2).

2. Assent to documents. The words of the prophet Jeremiah record the procedure for the legal purchase of land during the last days of the Judean monarchy, referring to a sealed deed of purchase and an open copy (Jer. 32:10-11, 14, 44). Cf. this account with the patriarch Abraham's purchase of the field at Hebron, when the payment of money before witnesses was sufficient (Gen. 23:2-20).

With the restoration of Jerusalem and its walls in the fifth century, the chief men of the city set their seal to a written covenant to keep its laws (Neh. 9:38; 10:1).

3. Sealing of masonry. When Daniel was cast into the lions' den, the king sealed (Aramaic *hathām*) it with his signet (Aramaic *'izqā*), and with the signets of his lords (Dan. 6:17—H 6:18). The only factual reference to sealing in the NT is contained in the account of the closure of the Holy Sepulchre (σφραγίζω, "to seal, impress"; Matt. 27:66).

4. Metaphors. The first reference to the subject in a figurative sense dates from the eighth century: "Bind up the testimony, seal the teaching" (Isa. 8:16), referring, no doubt, to a scroll; cf. the passage from a postexilic pen: "like the words of a book that is sealed" (Isa. 29:11). The personal use of a signet, worn on the right hand (Jer. 22:24), and its choice (Hag. 2:23) are metaphors dating from the sixth century, while the simile "set me as a seal" (חותם) upon the heart and the arm occurs in a postexilic source (Song of S. 8:6). The same book (5:14) uses the word גלילית, *gēlīlīm*, from the Hebrew root *gālāl*, "to roll," apparently as a metaphor for the fingers of the hand, which may therefore be more correctly rendered "cylinders" than "rings" (KJV; in the RSV "גלילית of gold" is rendered "rounded gold"). The learned author of the book of Daniel also employs "seal" in a figurative sense (Dan. 9:24; 12:4, 9), while the editors of Job were definitely addicted to the use of this

metaphor (Job 9:7; 14:17; 33:16; 37:7; 38:14; 41:15).

References in the NT to a "seal," "impression," or "inscription" (σφραγίς) are general (Rom. 4:11; I Cor. 9:2; II Tim. 2:19; Rev. 5:1-2, 5, 9; 6:1, 3, 5, 7, 9, 12; 7:2; 8:1; 9:4), except for the description of the book with seven seals (Rev. 5). The verbs "to seal" or "to impress" are also used as metaphors (σφραγίζω; John 3:33; 6:27; Rom. 15:28; II Cor. 1:22; Eph. 1:13; 4:30; Rev. 7:3-8; 10:4; 20:3; 22:10).

B. ARCHAEOLOGY. Discoveries in Western Asia during the last hundred years provide more information than any other source about the use of seals in antiquity. Three main geographical divisions (§§ 1-3 below) correspond roughly to the spheres covered by those languages expressed in cuneiform writing, Egyptian and other hieroglyphic symbols, and Hebrew and Aramaic script; the development of seals and sealing will be followed in each area according to chronological order, as far as it can be established by comparative study. Fig. SEA 35.

1. Iran and Mesopotamia. The earliest attempts at the production of crude seals probably date from the fourth millennium.

a. Stamp seals. Stone "seal-pendants," which have been found in graves or in the debris of settlements, were either bored through the central axis or shaped and pierced like buttons, so that they could be strung on necklaces or cords; many impressions on clay of the designs engraved on the convex or flat surfaces of these seals have survived.

In ancient ELAM, now SW Iran, at the old capital of SUSA, stamp seals appear during an early phase of the city's growth contemporary with the introduction of metal. Both are found together on N Mesopotamian sites in the Tigris Valley (e.g., Arpachiyah, Gawra). The designs at Susa developed independently of the N, and show a preference for geometric stylization (Periods A-B=Early Uruk; see *bibliography*). So little is known of contemporary glyptic art in S Mesopotamia that it is not possible either to suggest the source or direction of cultural influence or to assess relative chronological priority.

The main event of the following phase was the invention of writing, represented at Susa (Period C=Late Uruk) by an apparently indigenous script, derived from pictographic symbols, while about the same time another pictographic script was employed in S Mesopotamia which was ultimately simplified into wedge-shaped strokes, now known as CUNEIFORM.

b. Cylinder seals. With the development of writing, seals in the form of a cylinder came into use. They were either provided with a loop at the narrow end, or were pierced longways for suspension; the outer face was engraved with patterns and signs in intaglio, worked in reverse; the design therefore read correctly when it was impressed on any flat or curved surface of moist clay, which was then sun-baked to preserve it. The seal could be worn on a necklace or wristlet of beads, or carried attached by a pin to some part of the owner's dress. See *bibliography*.

Fine seal-engraving was achieved by the Sumerians in the Proto-Literate (Jemdet Nasr) period, and was followed by increasing stylization in Early Dynastic times, the last phase of which is roughly equivalent to the date of the royal tombs at Ur (ca. twenty-fifth

2900 B.C., from Megiddo (by permission of the Oriental Institute, the University of Chicago); (3) ivory cylinder seal, ca. 2900 B.C., from Beisan (by

permission of the British School of Archaeology in Iraq); (4) steatite cylinder inscribed Ni-maat-Re (Amen-em-het III), ca. 1840-1790 B.C., from Tell el-'Ajjûl (by permission of the Palestine Archaeological Museum, Jerusalem, Jordan); (5) impressions on pottery handle of cylinder seal and scarab, from Balâṭah (by permission of the Palestine Archaeological Museum, Jerusalem, Jordan); (6) store jar to show approximate positions of sealings in no. 5, from 'Athlîṭ (by permission of the Palestine Archaeological Museum, Jerusalem, Jordan); (7) steatite scarab, scroll pattern, ca. 1800 B.C., from Lachish (copyright: by permission of Oxford University Press); (8) steatite scarab, robed personage, ca. 1750-1650 B.C., from Lachish (copyright: by permission of Oxford University Press); (9) steatite scarab, hatched design, ca. 1750-1650 B.C., from Lachish (copyright: by permission of Oxford University Press); (10) steatite scarab, with name *Yqb(?)*, glyptic corruption of the correct *Yqb* (Hebrew Jacob), from Mirsim (by permission of the Palestine Archaeological Museum, Jerusalem, Jordan); (11) steatite scarab, set in bronze ring, inscribed Men-kheper-Re (Thut-mose III), ca. 1490-1436 B.C., from Tell el-'Ajjûl (by permission of the Palestine Archaeological Museum, Jerusalem, Jordan); (12) paste cuboid seal, inscribed Aa-khepru-Re (Amen-hotep II) with figures of three gods, their names written in characters allied to Early Canaanite script, ca. 1447-1421 B.C., from Lachish (copyright: by permission of Oxford University Press); (13) green glaze "lion hunt" scarab of Neb-maat-Re (Amen-hotep III), ca. 1413-1377 B.C., from Lachish (by permission of the Trustees of the late Sir Henry S. Wellcome); (14) steatite scarab, originally set in bronze ring, inscribed Usr-maat-Re, Setep-en-Re (Ramses II), ca. 1301-1234 B.C., from Tell el-Far'ah (by permission of the Palestine Archaeological Museum, Jerusalem, Jordan); (15) royal Hittite emblem impressed on jar handle, ca. 1400-1300 B.C., from Hazor (by permission of the Trustees of the British Museum); (16) impression of faience cylinder seal, showing warrior-deity facing goddess, identified by her name inscribed in hieroglyphs, 'Astart (Astarte), ca. 1300 B.C., from Bethel (by permission of the American Schools of Oriental Research); (17) Haematite seal in shape of bull's head, obverse engraved with animals, ca. 1050-950 B.C., from Tell el-Far'ah (by permission of University College, Lon-

don, Department of Egyptology); (18) bone scaraboid, ca. 860-820 B.C., from Lachish (copyright: by permission of Oxford University Press); (19) bone scaraboid, ca. 810-710 B.C., from Lachish (copyright: by permission of Oxford University Press); (20) jasper scaraboid, inscribed *lsm 'bd yrb'm*, "(belonging to Shema' the servant of Jeroboam [II?], king of Israel," ca. 786-746 B.C., from Megiddo (by permission of J. C. Hinrichs Verlag, Leipzig); (21) seal in copper mount, inscribed *lytm*, "(belonging to Jôtham," (?) king of Judah, ca. 742-735 B.C., from Ezion-geber (by permission of the American Schools of Oriental Research); (22) carnelian(?) scaraboid in silver ring, inscribed *l' dnr 'bd 'mndb*, "(belonging to 'Adoni-nur, the servant of 'Ammi-nadab" (by permission of the Palestine Exploration Fund); (23) onyx scaraboid, inscribed *ly'znyhw 'bd hmlk*, "(belonging to Jaazaniah, servant of the king," ca. 600 B.C., from Tell en-Nasbeh (by permission of the American Schools of Oriental Research); (24) clay sealing from document, marks of papyrus and thread on reverse, inscribed, upper register, *lgdlyhw*; lower register, (*'jskr 'lhbyt*, "belonging to Gedaliah, he who is over the House," from Lachish (copyright: by permission of Oxford University Press); (25) steatite scarab: upper register, four-winged *scarabeus* with Hebrew letters *smk* above, and *ankh* sign between the wings; lower register, *l'hmlk*, "(belonging to Semak Ahimelek"; ca. 800 B.C., from Lachish (copyright: by permission of Oxford University Press); (26) clay sealing with impression of four-winged *scarabeus*, marks of papyrus document to which it was attached on back, ca. 850-700 B.C., from Samaria (by permission of the Palestine Exploration Fund); (27) royal jar stamp, class i, ca. 800-750 B.C., from Lachish (copyright: by permission of Oxford University Press); (28) royal jar stamp, class ii, ca. 750-700 B.C., from Lachish (copyright: by permission of Oxford University Press); (29) royal jar stamp, class iii, ca. 700-600 B.C., from Lachish (copyright: by permission of Oxford University Press); (30) jar handle with impressed rosette, ca. 600-500 B.C., from Lachish (copyright: by permission of Oxford University Press); (31) jar stamp, pentagram design, with Hebrew letters, ca. 600-500 B.C., from Ophel (by permission of Felice Le Monnier, Florence); (32) rectangular jar stamp, inscribed in Greek, from Lachish (copyright: by permission of Oxford University Press)

century). The cylindrical form remained typical of the seals classified, according to the main regional styles, as early Akkadian, Kassite, Assyrian, and late Babylonian (Herodotus I.195). The same shape enjoyed sporadic popularity whenever the influence of these powers extended to other lands of the E Mediterranean world (Fig. SEA 35, No. 3). The impression of a cylinder seal soon became, not merely a mark of ownership or security, but a form of legal assent to a written contract.

At the turn of the fourth-third millennium, Mesopotamian influence expanded in all directions; seals were carried by officials and merchants, and impressions from them found in many places are among the indications of far-reaching trade.

2. Egypt and the Aegean. Trade relations between Egypt and Crete in remote times seem to have existed, and a marked expansion of trade between the Nile Valley and the island is noticeable early in

the second millennium, when new influences were brought to bear on the intervening land routes through Asia.

a. Cylinder seals. However, the earliest seals to reach Egypt were cylinders based on Mesopotamian example, for the same distinctive symbols appear on both. But these Pre-Dynastic cylinders of black steatite were very lightly scratched, in comparison with Mesopotamian seals, and the most popular scene—a figure seated before a table of offerings—was entirely personal and religious in character (*see bibliography*). No impressions of this type of design have been found, and it is therefore concluded that these cylinders were traditional items which the deceased required to have with him in his tomb.

The situation had changed by the First Dynasty (ca. 2900 B.C.), when a pictograph of a cylinder seal was already established as an ideogram or determinative for words like "seal" and "treasurer" in hiero-

glyphic texts. During the first half of the third millennium cylinder seals were engraved with the names and titles of kings and officials, who used them in administrative business and sealed goods with them, which were intended for the royal tombs and pyramids. The collapse of the Old Kingdom was followed by a period of anarchy and a redistribution of wealth among the poorer classes, while the trade routes from the N were again open.

b. Seal-amulets. Stamp seals appear at this time, engraved with barbaric and geometric designs, which can be matched among the stamp seals of Syria and Crete. Described as "seal-amulets" to cover many varieties of form, including "button-shaped" seals, and the gradual emergence of scarab-shaped seals which ultimately replaced them, the majority were made of steatite, and the surface was sometimes covered with blue or green glaze, which occasionally filled the engraving, making it impossible to use them as seals. However, from the signs of wear and repair, it is considered almost certain that seal-amulets were not merely funerary, but were also worn as charms during life, chiefly by women and children. It is also clear from the continuity of design that the first scarabs were amulets in origin. *See bibliography.*

c. Scarabs. Various kinds of beetle were venerated in Egypt; among them the dung beetle (*Scarabaeus sacer*) became the emblem of resurrection and continual existence, because of its habit of carrying food in the droppings of animals, which it rolls into a ball. It has been known to lay eggs in the body of a dead companion, so that when the young emerged, the Egyptian saw life coming forth from death. In later times, he symbolized the scarab as the emblem of the Creator, *Kheper-Re*, rolling a ball—the sun—across the sky.

In the first centuries of the second millennium the emblem of a scarab was fashioned in stone to form the back of administrative seals. They were engraved on the flat surface with royal names and titles, or with those of government officials; a thin wire was passed through the length of the scarab, and was bound round the half-hoop of the ring, so that the flat surface of the stone swiveled in its setting when required for use as a seal (Fig. SEA 35, No. 11). However, the names of the earlier Middle Kingdom rulers also occur on cylindrical seals, though these soon became obsolete (No. 4). The revival of the upper classes under a vigorous Twelfth Dynasty (ca. 1900 B.C.) led to expansion toward the S, to periodic forays northward to Syria, and to reciprocal trade contacts with the Aegean (*see bibliography*). The resulting need of more officials holding authority under the king no doubt stimulated the production of scarabs, and many persons were styled "sealer" or "royal sealer," while among more unusual posts, one official was described as "guard of the 110 'Aamu" (*see AMORITES*). From the Twelfth or Thirteenth Dynasty onward, scarabs with designs and good-wish symbols became popular, and their history can be followed more closely in Palestine than in Egypt, where the majority were acquired by purchase toward the end of the nineteenth century, while in Palestine most of the scarabs now extant were found in excavations.

3. Syro-Palestine. Far removed in time from any other object which resembles a seal is an unbaked

cone of clay with a swastika pattern on the base from Neolithic Jericho (Fig. SEA 35, No. 1). Apart from this isolated find, the E Mediterranean littoral added contributions of its own to cultural development, though it was inevitably influenced by the two great powers at opposing ends of the land bridge between Asia and Africa.

a. Early cylinder impressions. The habit of stamping jars and jar handles before kiln-firing is foreign to Mesopotamia, though the seals used were of cylindrical form (Fig. SEA 35, No. 2), and were probably carved from wood, though at least one ivory original is known (No. 3). They belong to Palestinian Early Bronze Age II (ca. 2900-2700), contemporary with the First-Third Dynasties in Egypt, and with Early Dynastic times in Mesopotamia. This valuable chronological link was broken in the troubled centuries which followed, and only an occasional seal-amulet (*see § B2b above*) has been discovered in Palestine.

The invention of a system of numerals and linear signs was not begun much before the last centuries of the Early Bronze Age in Palestine, but this significant development was followed, as it had been a thousand years before in Mesopotamia and Egypt, by the increased use of seals.

b. "Hyksos" scarabs and cowroids. Dating perhaps from ca. 1900 B.C., the impression of both a cylinder and a scarab seal and counterseal a jar handle (Fig. SEA 35, Nos. 5-6). The scroll border on the scarab is typical of contemporary Middle Kingdom date in Egypt, like the well-proportioned spirals of No. 7, though it is thought that Egyptian designers may have been stimulated by Cretan prototypes (*see bibliography*). More than one new cultural group penetrated into Palestine during the Middle Bronze Age, and each seems to have produced individual styles (contrast the back and sides of No. 7 with those of Nos. 8-10). The group which favored hatching in the design (as on No. 9) made only limited use of hieroglyphic signs, while there are indications (No. 10) that another group may have used them for the transcription of non-Egyptian names. These groups were known collectively to the Egyptians as *HYKSOS*, a term which is currently used for the period mid-eighteenth to mid-sixteenth centuries. During this phase some seals were made in which the back was shaped in imitation of a cowrie shell.

c. Egyptian Empire scarabs and seals. The military campaigns of Thut-mose III in the mid-fifteenth century established Egyptian rule over Palestine and part of Syria. Scarabs bearing his name are by far the most common (Fig. SEA 35, No. 11), and those of his immediate successors found in Palestinian tombs date them within a few decades, and confirm that some Egyptian control existed until the end of the Eighteenth or the beginning of the Nineteenth Dynasty (Nos. 12-14), though no doubt Hittite influence was stronger in the N (No. 15). Note in particular the names of Egyptian gods written in characters allied to Canaanite script (No. 12), and that of a Canaanite goddess transcribed in hieroglyphs (No. 16). The great age of scarabs in Egypt and Palestine ceased with the end of the Bronze Age, ca. 1200 B.C., but mass-produced reproductions became popular in the Mediterranean world in the centuries which followed.

d. Hematite seals and bone scaraboids. Because of unsettled conditions during the early decades of the Hebrew settlement, few cities recovered their former prosperity, and consequently few finds are datable to the first three centuries of the Iron Age. With the introduction of IRON, iron ore or hematite was used for making conoid seals, the bases of which were engraved with lifelike fauna. In this material a bull's head, pierced for suspension, is particularly fine (Fig. SEA 35, No. 17). Bone scaraboids with simple but lively designs of animals and men belonged to poorer individuals of the tenth-eighth centuries (Nos. 18-19).

e. Gems and sealings. Nearly two hundred gem seals carved in varieties of chalcedony have come to light in Israel and Judah, but none can be dated before the ninth century. Jezebel probably used a seal of this class when she forged letters in Ahab's name (I Kings 21:8), but the earliest gem now extant is that of Shema', who probably served Jeroboam II (Fig. SEA 35, No. 20). Among many beautiful seals, the following are of great historic interest: the seal of Jotham (No. 21); the name is not followed by a title or a patronymic, which suggests that it belonged to King Jotham of Judah [eighth century]); the seal of Adoni-nur (No. 22), "servant" of an Ammonite king, mentioned among his vassals by Ashurbanipal in Assyrian annals (mid-seventh century); and the seal of Jaazaniah (No. 23), possibly the individual mentioned in II Kings 25:22-23 who supported Gedaliah (No. 24) in his short governorship after the fall of the Judean monarchy early in the sixth century. Fig. GED 16.

f. Royal symbols and stamps. A four-winged scarabaeus engraved above an inscription reading *smk l'hmk* (Fig. SEA 35, No. 25) on a scarab—the only one bearing characters in Early Hebrew script—is at least as early as the Shema' scaraboid on epigraphic grounds, while nine clay seals with a similar emblem (No. 26) found at Samaria, capital of Israel, may have come from correspondence sent from Judah. Jar handles stamped with a four- or two-winged symbol come exclusively from Judean sites and range between the eighth and sixth centuries. The Early Hebrew letters above the symbol read *lmk*, "(belonging to the king," while the name of one of four towns (Hebron, Socoh, Ziph, and Memshath) appears below (Nos. 27-29; see WEIGHTS AND MEASURES, § C4e). Over 550 of these stamps, supplemented by others found in 1956-57 at Gibeon, revive the E Mediterranean tradition of stamping jar handles (see § B3a above), which continued during the Exile (Nos. 30-31), and which finally became the hallmark of the wine exporters of the Hellenistic world (No. 32). See bibliography.

g. "Rhodian" jar handles. The largest class of these stamped handles comes from the island of Rhodes, which by virtue of its position as a key to the SE Aegean was able to export its inferior wine to Athens, Alexandria, Syria, and Palestine, also to places as far E as Susa and as far W as France and Spain; but other Greek islands, notably Chios and Thasos, shared in this trade, which flourished from the third to the second century B.C. Stamped from a die made of wood or clay, the inscription normally consists of two names, that of the "potter" or "manufacturer," followed by the name of an official, accompanied by

the word *epi*, "in the term of," which served to indicate a date. There can be little doubt that the Greek amphorae on which these stamps occur represent a late offshoot of an E Mediterranean trading system which originated in the fourth millennium B.C.

O. TUFNELL

SEAMAN. See SHIPS AND SAILING.

SEASON. The translation of several words, all designating a period of time:

a) עת; αἶρος. An annually recurring period distinguished by weather (חרף)—winter, late autumn cold (Prov. 20:4; Jer. 36:22), time of rain (Deut. 11:14), of LATTER RAIN (Zech. 10:1), of dry summer heat (Ps. 32:4; Isa. 18:4); by behavior of animals and birds (Gen. 31:10; Isa. 18:6; Jer. 8:7); by features of the agricultural year—time of plowing (Exod. 34:21), of sowing (Lev. 26:5), of first leaves (Matt. 24:32), of barley harvest (Ruth 1:22), of wheat harvest (Gen. 30:14), of threshing (Job 5:26), of summer fruits (Gen. 8:22; Amos 8:1), of fig ripening (Mark 11:13), of grape harvest (Num. 13:26); by position of constellations (Job 38:32); by annual customs—pilgrimage (I Sam. 1:3; Luke 2:41), campaigning (II Sam. 11:1).

b) מועד; αἶρος; ἑορτή. A festival of the sacred lunar calendar (Gen. 1:14; Exod. 23:15; Ecclus. 47:10; Gal. 4:10).

c) זמן (Hebrew and Aramaic); αἶρος. A fixed, preordained time or period (Eccl. 3:1), especially in the phrase "times and seasons" (Dan. 2:21; Wisd. Sol. 8:8; Acts 1:7).

See also SUMMER AND WINTER; FEASTS; YEAR; CALENDAR.

R. B. Y. SCOTT

SEAT [כִּסֵּא] (usually THRONE; CHAIR in II Kings 4:10; KJV COVERING in Song of S. 3:10, STOOL in II Kings 4:10), cf. Akkad. *kussû*, seat, chair; מוֹשֵׁב (SEATING, KJV SITTING, in I Kings 10:5), שְׁבֵת (KJV DWELLING in Num. 21:15), *from* יָשַׁב, sit; מוֹרֵב, *from* רָבַב, to ride; מוֹנֵה, *from* מוֹן, to be firm; καθέδρα, *from* κατά, down, *plus* ἔδρα, seat, chair; KJV frequently for θρόνος (RSV THRONE)]; BEST SEAT [πρωτοκαθεδρία, *from* πρῶτος, first, foremost, *plus* ἔδρα, seat, chair (KJV variously CHIEF, UP-

PERMOST, HIGHEST SEAT)]. The biblical data make it difficult to distinguish between "seat," "chair," and "stool," and in some instances the distinction between these terms and "throne" is not much clearer. כִּסֵּא in most of its occurrences has reference to the royal or divine throne and is so translated.

Likewise we can say little about the materials and methods used in constructing this furniture. We know, mostly on the basis of Egyptian archaeology, that woodworking was a highly developed skill in the ancient Near East, but to what extent this was known in Palestine we can only surmise. It is instructive, however, that in Sennacherib's list of tribute received from Hezekiah of Judah ca. 701 B.C., both couches and chairs are mentioned (*ANET* 288).

The various uses of the word "seat" are:

a) Royal seats, court seats. These include the seat of Eglon, king of Moab (*Judg.* 3:20), dining couches at Saul's court (*I Sam.* 20:18, 25), a chair for Bathsheba beside Solomon's throne (*I Kings* 2:19*b*), the seat of Solomon's throne (*I Kings* 10:19*b*), the seating arrangement at court for Solomon's officials (*I Kings* 10:5), and Haman's seat at the Persian court (*Esth.* 3:1). See JUDGMENT SEAT. Figs. ART 70; DAR 4.

b) The seat of a palanquin (*Song of S.* 3:10).

c) Ordinary chairs or stools. These include Eli's at the door of the sanctuary at Shiloh (*I Sam.* 1:9) and by the roadside (4:13, 18), Elisha's in his roof chamber (*II Kings* 4:10), Job's in the town square (*Job* 29:7), and those of the pigeon sellers in the temple court (*Matt.* 21:12; *Mark* 11:15). Figs. BAN 19-20; COS 49.

d) Synagogue seats. No first-century synagogue has survived, but the synagogue at Capernaum, which has been excavated and is dated about the third century A.D., has two stone benches along each of two sides. People who could not be thus accommodated apparently stood or sat on the floor. The "best seats," of which the gospels speak (*Matt.* 23:6; *Mark* 12:39; *Luke* 11:43; 20:46), were the seats reserved for the elders who sat at the front with their backs to the ark and their faces to the congregation. "MOSES' SEAT" (*Matt.* 23:2) was a special chair (in some cases, at least, of stone) allotted to one of these elders who was presumably a scholar of distinction (see SYNAGOGUE). Fig. SEA 36.

e) Figurative. In *Job* 23:3 "seat" is used for God's dwelling place (cf. *Isa.* 18:4, where a cognate noun is translated "dwelling"), and in *Ezek.* 28:2 Tyre boasts that she sits in the "seat of the gods." In *Prov.* 9:14 folly, personified as a wanton woman, takes her seat in a public place. In *Ps.* 1:1 we have the "seat of scoffers," meaning the assembly of scoffers (in 107:32 the same word is translated "assembly"). In *Amos* 6:3 the "seat of violence" means the establishment of injustice in the land. In *Ezek.* 8:3 "seat" appears to be a base on which, or a niche in which, an image or some other idolatrous object rested. In *Num.* 21:15 the "seat of Ar," possibly so named because of a local seatlike land or rock formation, refers to some unidentified location in Moab.

f) The covering of the ark is called the MERCY SEAT.

Bibliography. For a discussion of woodworking in the time of Sennacherib, see C. Singer, E. J. Holmyard, and A. R. Hall, eds., *A History of Technology* (1954), I, 684-703.

W. S. McCULLOUGH

SEAT, MOSES'. The scribes and Pharisees were said by Jesus to sit on Moses' seat (*Matt.* 23:2). The rabbis of a much later period had a transliterated word, קַתְדֵרָא, to describe the seat which they declared had been made for Moses, like a scholar's seat in which one appeared to be standing while sitting. The SCRIBES were by long tradition the recognized exegetes of the LAW of Moses, and the seat meant by Jesus is the metaphorical *cathedra* of

From Sukenik, *Ancient Synagogues in Palestine and Greece* (The British Academy, Schweich Lectures, 1930); courtesy of the Hebrew University, Jerusalem, Israel

36. Seat of Moses, from the synagogue at Chorazin

the teacher. Only a few among the extensive body of holy people known as PHARISEES were actually scribes. But Matthew often classes them together as one unit for condemnation.

Fig. SEA 36.

N. TURNER

SEBA sē'ba [סְבָא]. Perhaps a Sabean colony in Africa. See SABEANS.

SEBAM. Alternate form of SIBMAH.

SEBAT. KJV form of SHEBAT. See also CALENDAR.

SECACAH sī kā'kə [סַכְכָּה, thicket, cover]. A town of Judah in the "wilderness" district (*Josh.* 15:61), probably to be identified with modern Khirbet es-Samrah, ca. 3½ miles SW of Khirbet Qumran in the Buqe'ah (Valley of Achor). It is the largest of three fortresses in the Buqe'ah (see also MIDDIN; NIBSHAN). Typical Iron II remains (casemated walls, pottery, etc.) suggest that these cities may be among those fortified by Jehoshaphat (ca. 873-849; *II Chr.* 17:12). Some construction may date from Uzziah's reign (ca. 783-742; cf. *II Chr.* 26:10).

Bibliography. F. M. Cross, Jr., "A Footnote to Biblical History," *BA*, 19 (1956), 12-17; F. M. Cross, Jr., and J. T. Milik, "Explorations in the Judean Buqe'ah," *BASOR*, 142 (1956), 5-17.

V. R. GOLD

SECHENIAS. KJV Apoc. form of SHECANIAH 3.

SECHU. KJV form of SECU.

SECOND ADAM. A phrase used to describe the idea of Christ expressed in Rom. 5:14-19; I Cor. 15:21-23, 45-50; and perhaps also Phil. 2:5-11. Christ, as the "second Adam" or the "second man from heaven," is a glorified, life-giving Spirit, in whom believers are made alive and glorified, in contrast to the first man Adam, who is of the earth, earthy, whose sin brought condemnation, and in whom all men die. See SON OF MAN § 3c. S. E. JOHNSON

SECOND COMING. A phrase used to refer to the future coming, or PAROUSIA, of Christ. Despite Heb. 9:28; II Pet. 1:16(?), the phrase does not occur in the NT, which omits "second"—e.g., Matt. 24:3; I Thess. 2:19; Jas. 5:7; II Pet. 3:4. Justin Martyr, *ca.* A.D. 150, supplies the first evidence for precisely this terminology (e.g., Dial. 14.8). H. K. McARTHUR

SECOND QUARTER [שני רבע, second (district)]; **KJV THE SECOND** (Zeph. 1:10); **THE COLLEGE** (II Kings 22:14; II Chr. 34:22). A district of Jerusalem in which Huldah the prophetess dwelt, in the angle formed by the W wall of the temple and the first (oldest) N rampart of the city; subsequently included within the wall restored by Nehemiah (see OLD GATE). Fig. NEH 13.

G. A. BARROIS

***SECRET, MESSIANIC** *mēs'ī ān'īk*. The knowledge that Jesus was Messiah and Son of God, which according to several NT books was not disclosed until after the Resurrection except to a small group of disciples.

According to Mark, Jesus was not recognized as Messiah until Peter's confession at Caesarea Philippi (8:27-9:1), when Jesus also taught that he was the suffering Son of man. Even so, the disciples failed to grasp the import of this (cf. 8:31-32 with 9:30-32). The demons, however, being spiritual creatures, had earlier recognized him as Son of God; but he had bidden them be silent (1:24-25; 3:11-12). Even Jesus' parables were, according to Mark's theory, obscure until explained to the disciples (4:10-13, 33-34). The secret of his nature was made public only at the hearing before the high priest (14:62).

This theory explained to the evangelists the rejection of Jesus and the apparent obscurity of some of the teaching. Q likewise emphasizes his rejection and the messianic secret (Matt. 11:2-30=Luke 7:18-35; 10:12-15, 21-24). Paul believes that the secret had been withheld from both Gentiles and Jews (Rom. 11:25; I Cor. 1:18-24; 2:6-9), but for Christians it is a mystery no longer (II Cor. 3:12-18). According to Luke, the messianic prophecies of the OT are not understood until after the Resurrection (Luke 24:25-27, 44-48). In the Gospel of John, John the Baptist recognizes Jesus at once, and Jesus reveals himself to his disciples at the very first (1:29-51), but they are slow to realize the implications of his teaching, and chs. 13-17 portray him as explaining the mystery after Judas has left the Upper Room. See CHRIST § 5.

SECRETARY. See SCRIBE.

SECU *sē'kū* [שׁוֹכֵן, lookout point(?)] (I Sam. 19:22); **KJV SECHU.** A site on the route between Gibeah and Ramah where Saul, in pursuit of David, sought information relative to his whereabouts. Though the site has commonly been regarded as a village, there are indications that a place name is, perhaps, not to be preferred, for some Greek and Latin MSS—e.g., LXX B—read ἐν τῷ ξεφεί, "on the bare hilltop," instead of the MT "Secu." The exact location is presently unknown, but a cistern on the ancient site apparently served as a well-known and much-frequented gathering place. W. H. MORTON

SECUNDUS *sī kōōn'dās* [Σέκουνδος; Σεκοῦνδος; Lat. *Secundus*, second] (Acts 20:4). A Thessalonian, companion of Aristarchus. With others, they accompanied Paul from Greece (probably Corinth) on his final journey to Jerusalem, when he took his collection to be presented to the poor there. It is possible, but not probable, that Secundus went only as far as Troas. B. H. THROCKMORTON, JR.

SEDECIAS *sēd'ə sī'əs*. ZEDEKIAH in Douay Version.

SEDUCTION. See CRIMES AND PUNISHMENTS § C3b.

SEED, SEEDTIME. Wheat, barley, and flax were planted between November and January; while chick-peas, cucumbers, lentils, melons, millet, and sesame were planted between January and March. See AGRICULTURE.

SEEING [הִרְאָה, הִרְאָה; ὀράω, βλέπω, θεάομαι, θεωρέω]. Some special biblical uses of this term are:

a) Experiencing (e.g., Pss. 16:10; 27:13; 34:8, 12 ["enjoy"]; 89:48; 90:15; John 8:51).

b) Seeing (one's desire) on an enemy (cf. Ps. 118:7; found also on the MOABITE STONE).

c) Visionary seeing, foreseeing, etc. (cf. Num. 24:4, 16; I Kings 22:19; Isa. 6:1; Ezek. 1:1; Zech. 1:8; Acts 9:10; 10:3, 11; 22:17-18; Rev. 1:12 ff). See PROPHET; VISION.

d) Recovering of sight by the blind, as a parable of spiritual enlightenment (Mark 8:18 ff; John 9) and a sign of the new age (Isa. 35:5a; Luke 4:18; 7:21-22). Living to see the dawn of the new age brings happiness (cf. Luke 2:26; 10:23-24) to those who respond. Those who "see and perceive" (cf. Mark 4:12) will "see life" (John 3:36) or "see the kingdom of God" (Mark 9:1; John 3:3).

e) Seeing God. God is all-seeing but unseen—except to faith (Heb. 11:27). In earlier OT narratives seeing God is believed to be fatal, but there are exceptions (e.g., Exod. 24:10; the LXX spiritualizes: "They saw the place where the God of Israel stood"). Moses may see only God's back, since none can see his face and live (Exod. 33:20 ff). Cf. the NT affirmation: "No one has ever seen God"; but "the only Son . . . has made him known" (John 1:18), for he is the "image of the invisible God" (Col. 1:15). To see him and behold his glory (John 1:14) is to see the Father (John 14:9). "The pure in heart . . . shall see God" (Matt. 5:8); cf. Nathanael, whose introduction (John 1:47 ff) recalls an etymology of "Israel" as a "man who sees God" (אִישׁ רֹאֵה אֱלֹהִים). Those who saw Jesus in resurrection (cf. Matt. 28:17; I Cor. 9:1; 15:5 ff;

etc.) had objectively real experiences, although others saw nothing (Acts 9:7; 10:41). To have seen the risen Christ was an indispensable qualification for apostleship (Acts 1:22). Cf. the emphasis on ocular testimony in John 3:11, 32; 8:38; 19:35; I John 1:1, 3 (see WITNESS). Yet a special beatitude is pronounced on "those who have not seen and yet believe" (John 20:29).

F. F. BRUCE

SEER. See PROPHEET.

SEGUB *sē'gūb* [שגוב, exalted]. 1. The youngest son of Hiel, the man who rebuilt Jericho during Ahab's reign (I Kings 16:34). Segub and his eldest brother, Abiram, may have been offered as foundation sacrifices for the new city. Such practice occurred in the ancient world. This interpretation was first offered by the Targ., which remarked that Hiel had killed his sons. Many modern commentators dispute the theory, however, holding merely that the deaths in Hiel's family were popularly linked with his building project. In any case the editor of Kings considers their deaths the fulfilment of Joshua's curse against anyone who should rebuild Jericho (Josh. 6:26), and it was undoubtedly only because of that tradition that the historical detail of these deaths was remembered.

2. A great-grandson of the patriarch Judah (I Chr. 2:21-22).

Bibliography. J. A. Montgomery, *The Books of Kings*, ICC (1951), pp. 287-88. J. M. WARD

SEINE [מכמרת; cf. Akkad. *kamaru*, net, snare] (Hab. 1:15-16); KJV DRAG. A large dragnet. See NET § 1a.

The context of Hab. 1:14-17 suggests that "hook," "net," and "seine" are used figuratively to designate the military power of Israel's enemies. The reference to worship in vs. 16 may be to some veneration accorded to weapons of war. The precise meaning of *מכמרת* is not clear.

W. S. McCULLOUGH

SEIR *sē'or* [שעיר, hairy, shaggy, covered with brush or forests]. 1. The chief mountain range of Edom; modern Jebel esh-Shera'. It extends the entire length of the Edomite homeland from the Wadi el-Hismeh in the S to the Wadi el-Hesa in the N, though its elevation begins to decline N of esh-Shobek and then rises again, followed by another decline before reaching the Wadi el-Hesa. This N section is called Jebel (cf. Roman and Byzantine Gebalene, Gobolitis). Its extension to the SW to the Gulf of Aqabah is the Sha'fat Ibn Jad, and to the SE another lower range of hills overlooking the Hismeh Valley is the Ras en-Naqb. It reaches from the Arabah on the W to the desert on the E. Much of it is a high plateau (up to 5,600 feet above sea level) with rolling hills; the rest, especially as one approaches the edges, is very rough to nearly impassable. While heavily wooded at one time, the process of denudation was completed during World War I.

Seir became the home of Esau and his descendants, the Edomites (Gen. 32:3; 33:14, 16; 36:8; Josh. 24:4; Judg. 5:4; etc.), who displaced the Horites (Gen. 14:6; 36:20-21; Deut. 2:1-8, 12). "Seir" is also

used as an expression for the Edomite nation (e.g., Num. 24:18; Ezek. 35; cf. Ezek. 25:12-14).

See also EDOM; IDUMEA.

2. A mountain forming part of Judah's N border (Josh. 15:10; see JEARIM, MOUNT); usually identified with Saris near Kesla (Chesalon), ca. nine miles W of Jerusalem. It is probably the place of farthest penetration by the Israelites in their abortive effort to enter Canaan from the S (Deut. 1:44). They were chased back by the Canaanites and the Amalekites (Num. 14:45). Since Canaanites never lived in the region occupied by Edom and the combination of Canaanite (in the N) and Amalekite (farther S) fits the known situation W of the Jordan, it seems probable that "Seir" of Josh. 15:10 is meant in Deut. 1:44 as well. Furthermore, it is known that Israel attempted an invasion from the S of Palestine, but there is no implication of a campaign of occupation in the biblical narrative that would result in a flight from Seir (E of the Arabah) to Hormah (W of the Arabah).

It is also possible that it is this Mount Seir to which the Simeonites migrated in the late eighth century (I Chr. 4:42-43), though the Edomite Seir (see 1 above) is also possible.

Bibliography. F.-M. Abel, *Géographie de la Palestine*, I (1933), 390-91. A. Robert, "Idumée," *Dictionnaire de la Bible, Supplément*, vol. 4 (1949), cols. 195-99. V. R. GOLD

SEIRAH *sē'arā* [שעירה, wooded hills(?)] (Judg. 3:26); KJV SEIRATH. It is not clear from the context whether the word is the name of a city or a term applied to some topographical feature. Ehud, after assassinating Eglon king of Moab, "passed beyond the sculptured stones [הפסילים; Amer. Trans. *Pesilim*, as though the name of a village] and escaped to Seirah." The association with the SCULPTURED STONES, possibly the weirdly shaped hills in the Ghor near the Jordan River, supports the interpretation of Seirah as a topographical feature in the same general area.

It has usually been assumed that Seirah is to be sought in the territory of Ephraim, but a location in the Jordan Valley or E of the Jordan River in Moabite territory is equally possible. If the tradition had intended to describe the route within Canaan of Ehud's return to Ephraim, it is probable that reference would have been made to well-known places such as Jericho, Bethel, or Shiloh.

W. L. REED

***SELA** *sē'lā* [סלע, crag]; KJV *once SELAH* (II Kings 14:7). 1. A fortress city of Edom, conquered by Amaziah of Judah and renamed by him Joktheel (II Kings 14:7). It is to be identified with Umm el-Bayyarah, the great acropolis which dominates the basin in which the Nabatean city of PETRA was built; this is proved by the quantities of sherds from the Early Iron I-II Age (1200-600 B.C.) which are found there. It is situated in the W boundary of Edom proper, ca. twenty miles from its S extremity, at the point where the road from Gaza climbs up the plateau from the Arabah, and was evidently intended to protect the S capital of Teman, located ca. three miles E. Figs. SEL 37-38; PET 41-42.

No details are given in the Bible as to the exact

From *Atlas of the Bible* (Thomas Nelson & Sons Limited)

37. Aerial view of Sela, Umm el-Bayyarah

Courtesy of the Palestine Archaeological Museum, Jerusalem, Jordan

38. Edomite mountain city of Sela, dominating the enclosure at Petra

course of Amaziah's campaign, but it is probable that, after defeating the Edomites in the Valley of Salt, he marched down the King's Highway as far as Teman, then turned westward and took the fortress in reverse. There is a possible reminiscence of this feat in passages that speak of Edom as living "in the clefts of the rock" (Jer. 49:16; Obad. 3), as the Hebrew word for "the rock" is the same as that translated "Sela."

Another Sela in Edom, marked by a village of the same name, is found a few miles W-NW of Buseirah (biblical Bozrah). This, however, was a Nabatean city and not the same as the Sela of the Bible.

2. A place on the border of the Amorites in the time of the judges (Judg. 1:36). It was apparently in Judah, but its site is unknown.

3. A place in Moab, mentioned rather obscurely in a prophecy of destruction (Isa. 16:1). Its site has not been identified.

S. COHEN

SELAH sē'lā. See MUSIC.

SELA-HAMMAHLEKOTH sē'lā hā mā'lō kōth. KJV translation of סלע המחלקות (I Sam. 23:28; RSV ROCK OF ESCAPE). See ESCAPE, ROCK OF.

SELED sē'lēd [רָלָד] (I Chr. 2:30). The first-born son of Nadab of Judah. He was childless—a terrible fate for a Hebrew, since immortality was known only in the perpetuation of one's name and honor through one's heirs.

SELEMIA sī lē'mī ʾ [Vulg. *Salemiam*] (II Esd. 14:24). One of five scribes Ezra was bidden to take with him, "because they are trained to write rapidly."

J. C. SWAIM

SELEMIAS sēl'ə mī'əs. KJV Apoc. form of SHELEMIAS 6.

SELEUCIA sī lōō'shə [Σελευκία or Σελεύκεια, according to MS preferred]. The name of several cities, one of which (see SELEUCIA IN SYRIA) is mentioned in both the Apoc. and the NT; all situated in the Middle East and all founded during the Hellenistic period (see GREECE § 9) by Seleucus Nicator. In the Greek language "Seleucia" is the adjective formed from the noun "Seleucus," and so it means the "city belonging to Seleucus." See SELEUCUS 1.

There were nine ancient towns which bore this name, but only four of these are of great interest to the student of the Bible.

1. See SELEUCIA IN SYRIA.

2. Seleucia in Mesopotamia. This city was founded by Seleucus Nicator in 312 B.C. and was intended to be his capital in Mesopotamia, taking the place of Babylon as the center of the new Greek cultural interest in that part of the world. It was cosmopolitan, having a mixed population (ca. 600,000) of Macedonians, Greeks, Syrians, and Jews, in NT times. It was situated on the right bank of the River Tigris. When the city was destroyed (A.D. 164), there died with it all that was best of Hellenistic civilization in Mesopotamia.

3. Seleucia in Cilicia. This was an autonomous city, also owing its origin (300 B.C.) to Seleucus. It

39. The market gate at Seleucia

was situated on the River Calycadnus (now the Göksu) a few miles from its mouth, in the Roman province of Cilicia. It was anciently known as Seleucia Tracheotis or Trachea (the modern Icel, or perhaps Silifke). It was probably designed to protect Cilicia against attacks from the seaward side.

Fig. SEL 39.

4. Seleucia in Palestine. Josephus informs us that in the days of the ruthless and powerful Alexander Janneus (see *HASMONEANS* § 3*d*) a certain Seleucia was among the places which had previously belonged to the fast-disintegrating kingdom of Syria but were now in the hands of the Jews (Jos. Antiq. XIII.xv.4). This Seleucia was not the Syrian fortress (see *SELEUCIA IN SYRIA*), but was a city in Bashan, near GOLAN and Gamala, which too Alexander seized (Jos. War I.iv.8), and situated on the E side of Lake Merom in the extreme N of Palestine. Jewish occupation did little good to cities which had adopted Greek ways; much of the Greek culture was destroyed and nothing of comparable value substituted. When Pompey left the Middle East for home in 61 B.C., Seleucia once again enjoyed, in common with neighboring cities, virtually a complete freedom, in spite of the official subjection to a Roman governor; and the city magistrates were elected by the people on the Greek model and wielded wide powers of government in the city. Later on, Josephus fortified the place as a center of revolt against the Romans (Jos. War II.xx.6). The present site is unknown.

SELEUCIA IN SYRIA. On or near the site of this Hellenistic city stands the modern Samandağ or Suediah, in Turkey, which is no longer a port, its importance as a trading center having been long ago usurped by the Turkish port of Iskenderun (or Alexandretta) much farther N. The constant depositing of silt, flowing down the river Orontes, has converted the ancient harbor into a level, marshy expanse. In the biblical period, from the third century B.C., Seleucia was a flourishing commercial city and frontier fortress on the seacoast of Syria and near Cilicia. It figured in the missionary journey of Barnabas and Saul. See PAUL § A2*d*.

1. **Origin.** There is no doubt that Seleucia and three other cities of N Syria, which together formed

a group known as the Seleucian Tetrapolis, were founded at the beginning of the third century B.C. by Seleucus Nicator, who was one of the generals of Alexander the Great and the first of the line of Seleucid rulers of Syria. It was five miles N of the mouth of the River Orontes, on which Antioch was situated. In the group were also Antioch, Apamea, and Laodicea. Antioch was built by Seleucus at the same time to form a new capital for his Syrian share of Alexander's empire, and the intention probably was that Seleucia should be an impregnable port serving the capital, from which ships might sail with passengers and merchandise along the coast as far as Egypt or westward to the island of Cyprus and Asia Minor. Seleucia, moreover, proved to be the fitting burial place of its founder, Seleucus.

The city is more strictly referred to as Seleucia Pieria in order to distinguish it from the many other Seleucias, especially the one in Mesopotamia and the one in Cilicia not far away. The name Pieria is mentioned by Strabo, the ancient Greek geographer of the first century B.C., who refers to a special kind of asphalt which was mined there. A monk named John Malalas, who was born in Antioch at the end of the fifth century A.D. and who spent most of his life there, has left in his *Chronicle* the interesting information that Seleucus Nicator had the desire to build many cities, and that he actually commenced with Seleucia, calling it after himself, and building it on the site of a previous trading center named Pieria. Malalas implies that Seleucia was older than Antioch, which was built next by Seleucus and called after his son Antiochus Soter. At all events, near the site of Seleucia today can be seen the ruins of the port of Al Mina, which traded with the cities of Greece until the time of Alexander the Great. Al Mina had been in very ancient times the capital of a small kingdom, Alalakh, which was destroyed ca. 1200 B.C. by invaders from the sea. It was probably with this old port as a nucleus that Seleucus founded the new Hellenistic port of Seleucia.

2. **History.** Early in its history Seleucia was lost by its Seleucid founders and went to Egypt, having been conquered by the Ptolemies. This was in the middle of the third century and was directly due to the conflict between the rival queens at the death of Antiochus II. At this point the new king of Egypt, Ptolemy III Euergetes, in order to take vengeance for the evil done by Laodice, wife and sister of Antiochus II, to his own sister Bernice, the second wife of Antiochus, came over from Egypt and eventually overran Syria, after he had first taken and entered in triumph the key fortress of Seleucia. The Egyptian force which achieved this, probably setting out from Cyprus, was designed to come to the aid of Bernice, who was already being supported by the city of Antioch. Seleucia surrendered willingly to Ptolemy, the garrison having declared in favor of Bernice, and the governor of Cyprus entered Seleucia with a squadron as he passed on his way to Antioch. Ptolemy came also, but too late to save his sister, who had been betrayed. The substance of Dan. 11:7-9 is to be interpreted in the light of these events; the "fortress" of vs. 7 is thought to be Seleucia, as being the fort of Antioch. The issue of this Third Syrian War was that Egypt retained Seleucia and all Phoe-

nia, although Laodice's son, Seleucus II Callinicus, had driven Egyptian forces from much of Syria. But it seems almost certain that this domination was short-lived in the case of Seleucia, because we find that in 229 Seleucus II is granting to the city its freedom. There must have been some form of counter-attack and some attempt to regain Seleucia and other places, on the part of Seleucus, before he bowed to the inevitable and resolved on a ten-years' peace with Ptolemy. The words in Dan. 11:9 appear to hint at an unsuccessful counterattack of this kind at this point: "Then [the king of the north] shall come into the realm of the king of the south but shall return into his own land." It was not until the energetic campaigns of Antiochus III "the Great" that Seleucia was regained from Egypt by the Seleucids. By 219, Antiochus had decided it was time to regain the former Seleucid possessions; he attacked the strongly held Seleucia first of all, bribing some of the officers there, and speedily gaining control. On a later occasion in his reign, after great successes in the East in 205, he re-entered Seleucia in magnificent triumph as a second Alexander, bringing 150 elephants and enormous plunder. It was probably on this occasion, and actually in Seleucia, that he assumed the Achaemenid title of "great king," thus becoming known to the Greeks as Antiochus "the Great."

Seleucia increased in importance as a port and frontier fort until the Roman period. It was so well fortified, by nature as well as by man, that its advantages became obvious to potential foes of Syria. The fortress has therefore been well described as a kind of Ptolemaic Calais or a Syrian Gibraltar—a strong city which the Seleucid rulers valued highly in their constant struggles with the Ptolemies. This was particularly so when Ptolemy Philometor VI, ruler of Egypt in the mid-second century B.C., made an attempt to win Egypt's lost territories from Syria and, according to I Macc. 11:8, did succeed in 146 B.C. in capturing Seleucia and other coastal cities.

It was in Seleucia that the much-married and resourceful woman, Cleopatra Thea, was marooned during the subsequent period when Trypho was struggling to retain the throne of Syria. Cleopatra had first married Alexander Balas ca. 150 B.C.; but her father, Ptolemy Philometor, having decided to support Demetrius II, who was the rival of Balas and was trying to gain the throne of Syria, had proceeded to take her away from Balas and bestow her upon Demetrius. Her second husband was later captured by the Parthians, and it was while she was shut up in Seleucia (as Josephus states) that Cleopatra, living in dread lest the inhabitants should surrender to her husband's usurper, Trypho, sent a proposal of marriage to her husband's sixteen-year-old brother, Antiochus, along with the suggestion that he should usurp the kingdom himself, which he did in 138 B.C. (Jos. Antiq. XIII.vii.1). This seems to have been the end of Seleucia's domination by the Ptolemies forever; in 109 the Syrian ruler, Antiochus Grypus, again bestowed freedom upon the city—a privilege which apparently included the right to coin money.

Mithridates of Pontus and Tigranes of Armenia were at one in their suspicion of the encroaching power of Rome in the Middle East, and, before Pompey was entrusted in 66 B.C. with command of the

Roman military maneuvers in the East, Armenian armies had invaded Syria and penetrated as far as Jerusalem. When Pompey arrived, he quickly drove the invading kings away and made himself master of everything in Asia W of the Euphrates. He granted to Seleucia, when it fell into his hands, the status of a free city (which privilege it had received on more than one occasion already) because of the stout resistance which it had shown against the invading Armenian king and his ally, the king of Pontus. On the collapse of the Syrian kingdom, the Romans improved it still more from a military point of view, increasing its already fine natural and artificial defenses.

At the time when Barnabas and Saul and John Mark, in A.D. 49, sailed away from here in a merchant vessel on the first Christian missionary voyage (Acts 13:4), and when, in the reign of Trajan at the end of the first century A.D., the holy martyr Ignatius, bishop of Antioch, passed through the port of Seleucia on his way to the wild beasts at Rome, Seleucia still enjoyed at the hands of the Romans the status of a free city. Although it is said that the missionaries returned to Antioch (Acts 14:26), with no mention of Seleucia, it is nevertheless beyond reasonable doubt that they landed at the port from which they had set out, rather than that they sailed up the River Orontes to Antioch itself. Beneath the sea, beyond the swampy ruins of Seleucia's port, two pieces of the old harbor which are, or were, locally known as Paul and Barnabas are reputed still to be visible, and in all probability these outer pillars of the harbor date at least from the apostle's period.

It is further most likely that it was from this same harbor of Seleucia that Paul set sail with Silas on his second missionary journey (Acts 15:40-41), and that Barnabas set sail from here with Mark on his second journey (vs. 39).

Its status as a free city was confirmed by the Romans in 70. It was the base of an imperial fleet, the *classis Syriaca*, early in the reign of Augustus and throughout the first century. Roman emperors attempted to improve the place as a port—never very successfully, for it was not really adapted geographically for the purpose. There is, however, one feat of Roman engineering which travelers may still see and wonder at. It is an enormous tunnel seven yards high, cut through the rocks at considerable depth for two hundred yards or so, apparently with the aim of deflecting the waters of a mountain stream—one of those "donkey-drowners" of which the ancient inhabitants complained—away from the harbor, to save the harbor district from floods and to form perhaps a reservoir of drinking water. At any rate, near the entrance the inscription "Divus Vespasianus et Divus Titus" has been discerned on a stone, and this suggests that the work had some connection with the visit of Titus to Palestine in order to quell the Jewish rising, or that at least it was contemporaneous with it (A.D. 66-70).

It is interesting to note that the harbor of Seleucia was the scene not only of memorable Christian journeys in the formative years of the new faith, but also of the journeys of one who must be regarded as a rival to the Christians, yet one who likewise set out to purify morals, to drive out demons, and to heal

the sick wherever he went. The Greek author Philostratus tells us that Apollonius, the venerable sage of Tyana, and his fellow pagan evangelists, leaving Antioch, "went down to the sea of Seleucia, and finding a ship, they sailed to Cyprus" (*Life of Apollonius* III.lviii). Apollonius was a would-be reformer of paganism along Pythagorean lines. He was born at the beginning of the Christian era, and his journeys barefoot through the port of Syria must have coincided almost with those of Paul and Barnabas and Silas. Apollonius wrote letters, after the manner of the Christian apostle, and two of these were addressed to the councilors of Seleucia (almost certainly our Seleucia), who had asked him to visit them. From these letters we learn that the city was hospitable to man and devoted to the gods (*Epistles of Apollonius* XII; XIII).

3. Description. As is already clear, Seleucia Pieria was a valuable city-fortress in the N of Syria, high enough to make Cyprus visible on a clear day, situated in the bleakly mountainous frontier district between Cilicia and Syria. The city was established on a long, sloping S spur of Mount Pierius—or Mount Coryphaeus, as Polybius calls it—which broods over the Mediterranean, more than four thousand feet in height, just S of the Bay of Alexandretta, and now has the name of Jebel Mousa (or Mousa Dagh). It is the extreme S part of the long range known to the Romans as Mons Amanus.

Seleucia was surrounded by terraced cliffs on three sides and lay four or five miles N of the mouth of the River Orontes, sixteen miles W of Antioch. Its position reveals the astuteness of its founder, Seleucus, who appreciated the problems attendant on the constant heavy flow, down the river, of silt and sewage from Antioch which would quickly obstruct any harbor built at the river's mouth. Indeed, the silting has now finally completed its work, and the harbor, though five miles distant to the N of the mouth, lies at the present time beneath the swampy, malarial soil. It never ranked among the first-class ports of the world, but it was certainly the equal of Coptos, Myos Hormos, Aradus, and Berytus in the East.

From the sea the upper part of the city could be approached only by way of a steep and twisty stairway, still visible, cut in the rock (as Polybius tells us), but there was a lower part or suburbs, fortified strongly within the same walls, which was in reality the port and business quarter of the city. This lay on a table of level ground below the steep mountain on which the upper city and its acropolis stood.

The ancient city must have been a proud place, resplendent with many temples; and it had an amphitheater, partly cut out of the cliff, the ruins of which remain at the present time. The cities of the Syrian Tetrapolis, of which Seleucia was one, ever prided themselves during the Hellenistic period on their loyalty to Greek cultural ideals, and on coins dating from the middle of the second century B.C. there is stamped the high-sounding inscription ἀδελφοὶ δῆμοι ("brother townships"—a title with ancient Greek associations). Moreover, there is still to be seen the ruin of the ancient great road which connected Antioch with its port of Seleucia, running deeply through the rocks. There is also a lofty ruin of a great gate in the city wall, the market gate. In

addition, on the steep lower slopes of Mousa Dagh there is still visible a series of large caves, the ruins probably of ancient warehouses, and there are, moreover, desecrated tombs in the cliffs.

Extensive excavations have been carried out in modern times both in and around Antioch. These excavations, commenced in 1932 and interrupted by the outbreak of World War II, were conducted mainly under the auspices of Princeton University. Many of the remains of ancient Seleucia Pieria, which cover a very large area, began to be carefully unearthed and studied from July 17, 1937, and were excavated more extensively during the following spring and also in 1939. These included houses and the market gate, the large Doric temple in the upper city dating from the biblical period, and a memorial church, the Martyrion, in the lower city, dating from the fifth century A.D.

N. TURNER

SELEUCUS σῖ λῶδ'κῶς [Σέλευκος]. The name of four kings of Syria belonging to the family known as Seleucidae. See ANTIOCHUS.

1. Seleucus I Nicator. One of Alexander the Great's generals, who after Alexander's death in 323 B.C. gradually made himself king of Syria, also ruling most of the Asiatic provinces which were once included in Alexander's empire. In 321 the satrapy of Babylonia was assigned to him; but in 316 Antigonos, ruler of Phrygia, drove him out. Seleucus placed himself under Ptolemy of Egypt (hence Dan. 11:5 calls him "one of his princes"), and assisted him in the defeat of Antigonos at the battle of Gaza in 312. After this, Seleucus regained his lost satrapy and established the Seleucid dynasty, which lasted

40. Coin of Seleucus I: obverse, head of Seleucus; reverse, Athena drawn in chariot by four elephants

until 65 B.C. After the Battle of Ipsus in 301 he received also Syria and much of Asia Minor. The Seleucid era, from which events are dated in I Maccabees and other histories, also began at this time. The founding of several great cities, including Antioch and Apamea, Laodicea, Edessa, Beroëa, and Seleucia, centers of Greek culture, was his work. He was well disposed toward the Jews; indeed, he settled

them in Antioch and several others of his cities, with rights of citizenship. He was assassinated in 282, while he was in the process of attempting to gain the whole of Alexander's empire.

Fig. SEL 40.

2. Seleucus II Callinicus (246-226 B.C.), son of Antiochus II of Syria. He is mentioned in Dan. 11: 6-9. He was engaged in a war, known as the Third Syrian War or Laodicean War, with Ptolemy Euergetes, who had invaded his dominions because his mother, the outrageous Laodice, had murdered the Egyptian princess Bernice. Ptolemy captured the city of Seleucia. When Seleucus tried to retaliate against Egypt, he was routed. It seems that Egypt captured Antioch and most of the Seleucid Empire. Seleucus entrusted much power to his younger brother Antiochus, who, however, proved to be treacherous until he was finally put down. Seleucus' reign ended in some uncertainty, and he died as the result of a fall from his horse.

3. Seleucus III Soter (or Ceraunus; 226-223 B.C.), son and heir of Seleucus II and brother of Antiochus III the Great. He did not wage war with Egypt, but his invasion of Asia Minor to put down Attalus—during which invasion he met his death—is thought to have been a prelude to future campaigns in Egypt on the part of his brother.

4. Seleucus IV Philopator (187-175 B.C.), nephew of Seleucus III and brother of Antiochus Epiphanes. He succeeded his father, Antiochus the Great. In II Macc. 3:7 he is mentioned in connection with an unsuccessful attempt to rob the temple at Jerusalem "for royal glory" (the reference is to him in Dan. 11: 20). Seleucus sent his chief minister, Heliodorus, to seize the funds which had been deposited in the temple. He was both avaricious and, at that time, in great need of funds. He had come to the throne in inglorious times, when his own country was weak and Rome was powerful in the East, and Seleucus owed much money to Rome in connection with a peace treaty made between them. Finally, his minister Heliodorus murdered him and attempted to seize the throne, but Seleucus was succeeded by his brother.

N. TURNER

SELF-CONTROL. The translation of several words in the Bible. The only occurrence of the word in the OT is as the translation of אֵין מַעַצֵר לְרוּחִי in Prov. 25:28:

A man without self-control
is like a city broken into and left without walls.

In some respects the KJV "he that hath no rule over his own spirit" is nearer the original. The picture is that of a city whose walls have been so nearly destroyed as to be without defense against an enemy; so is the man who has no restraint over his spirit, the "source of man's passionate energies" (IB, IV, 928). He has no defense against anger, lust, and the other unbridled emotions that destroy the personality. Prov. 16:32 gives the positive side:

He who is slow to anger is better than the mighty,
and he who rules his spirit than he who takes a city,

although the same Hebrew word is not used. The virtue of self-control, a familiar one to Greek thought, is referred to in the OT only in the wisdom books.

In the NT "self-control" is used as a translation for words which come from two distinctly different Greek stems. In II Tim. 1:7 it translates σωφρονισμός, which occurs only once, and is used here as an equivalent of σωφροσύνη. Along with φρόνησις or σοφία ("good sense" or "wisdom"), ἀνδρεία ("courage"), and δικαιοσύνη ("justice"), σωφρονισμός was a virtue common to all Greek ethical thought since the days of Plato. It meant originally "soundness of mind as opposed to insanity," then "moderation," "good sense." The first meaning is found in Acts 26:25, and the second in I Tim. 2:9, 15. The cognate verb, σωφρονέω, appears in the first meaning in Mark 5:15; Luke 8:35; II Cor. 5:13; and in the second, "to exercise moderation," in Rom. 12:3; Tit. 2:6; I Pet. 4:7. Plato defines σωφροσύνη as "self-discipline in certain desires and pleasures"; and the corresponding adjective was often given the specific sense of "controlled in sexual desire," "chaste." Since in II Tim. 1:7 "self-control" is merely one of a list of three virtues, a "spirit of power and love and self-control," in contrast to a "spirit of timidity," it is somewhat difficult to determine the exact shade of meaning. Easton's translation, "sober wisdom," seems better than the RSV "self-control."

The other occurrences of "self-control" are translations of the noun ἐγκράτεια (Acts 24:25; Gal. 5:23; II Pet. 1:6) and the verb ἐγκρατεύομαι (I Cor. 7:9; 9:25), both meaning basically the control which one exercises over something or someone, including oneself. This last, ἐγκράτεια ἑαυτοῦ, played an important part from Plato on in the ethical systems of classical and Hellenistic teachers, who regarded it as one of the cardinal virtues. It represents the ideal of the free man's having power over his own desires and emotions, so that he does not become a slave to base pleasures (φαῦλα ἡδοναί). Philo also uses it frequently, but he is influenced by his cosmological dualism, in which the material is to be avoided. Hence for him the goal of ἐγκράτεια is the avoidance of every physical act which is not absolutely essential to existence. In contrast ἐγκράτεια and ἐγκρατής appear very infrequently in the Greek Bible, and then only in the Apoc.

In the NT, Paul uses the verb in I Cor. 7:9 to mean the control of sexual desire, and in 9:25 of the athlete who exercises self-control over the bodily appetites as part of training for participation in the games. In Gal. 5:23 the noun is given in a list of virtues which are the "fruit of the Spirit"; and in much the same way it is found in II Pet. 1:6. In Acts 24:25 it, along with "justice" (δικαιοσύνη) and "future judgment," is the subject of Paul's discussion with Felix, but it is difficult to discover just what connotation the word has here. In I Cor. 7:5 "lack of self-control" is the translation for ἀκρασία, from the same root as ἐγκράτεια, and clearly means "incontinence."

Two things in particular may be said as one compares the idea of "self-control" in Greek literature

and in the Bible. One is the fact of its rarity in the latter—a clear indication that it does not play an important part in the thinking of the biblical writers. The other is that, when it does occur, its meaning must be determined in the light of the whole biblical outlook. The Greek ideal looked toward a perfecting of the self into a harmonious whole—a man at peace with himself and with his environment, a work of which one might be justly proud and which justly claimed the respect of one's fellows. Hence ἐγκράτεια, "self-control," was the art of keeping all one's natural drives and instincts under one's command in order to produce a well-rounded personality. On the other hand, for the Christian, ἐγκράτεια is one of the "fruits of the Spirit," along with love, joy, peace, etc., whose essential meaning can be arrived at only in the light of the long history of the development of the idea that man can attain perfection only as he relies more and more upon God and not upon himself, and as he sees more and more clearly the meaning for himself of the work of Christ and of the Holy Spirit.

SELF-DENIAL. A concept which may be seen in both the OT and the NT. In general, self-denial is the rejection of self, the renunciation of one's personal desires or ambitions in favor of a higher goal. As the idea appears in the Bible, it is less prominent in the OT than in the NT, where it is portrayed as self-rejection in favor of personal loyalty to Christ (Matt. 16:24; Mark 8:34; Luke 9:23; *see below*).

1. Background in the OT
2. In early Christian piety
3. Radical self-denial in the NT
 - a. In the teaching of Jesus
 - b. In the thought of Paul

Bibliography

1. Background in the OT. In the OT there are forms of partial self-denial such as disciplinary restrictions and prohibitions for some individuals (*see* RECHABITE; NAZIRITE; ESSENES; FASTING; cf. also 1QS I.1-15, etc.).

Self-denial as such is not clearly expressed as a general principle in the main stream of OT thought. It is implied, however, to the extent that the vocation of Israel is understood in terms of subordinating national ambition to the purpose of God (*see* ELECTION; VOCATION; cf. Isa. 42:1-8; 52:13-53:12; etc.). Similarly, self-denial becomes the obligation of certain persons who must forego their own inclinations in favor of a special calling—e.g., Moses (Exod. 3:1-8), Jeremiah (Jer. 1:4-10; 15:15-18), and Amos (Amos 3:8).

2. In early Christian piety. One may describe as forms of partial self-denial certain acts of piety, fasting, charity, and self-restraint mentioned in the NT (Matt. 4:1-11; Luke 4:1-13; Acts 13:3; 14:23; I Cor. 7:5; 9:27; I Tim. 2:9; I Pet. 3:3-4; etc.; but cf. Mark 2:18-20). These practices, however, seem to be expressions of ordinary piety or SELF-CONTROL and do not receive a major emphasis in the NT.

In the Sermon on the Mount, an added dimension

of self-denial is imparted to almsgiving and fasting when men are exhorted to carry out these duties in secrecy and without ostentation (Matt. 6:1-4, 16-18). Elsewhere in the NT, Christian life and piety are given a self-denying depth of meaning when the self-giving love of Christ is held up as the example (Matt. 20:25-28; Mark 10:42-45; Luke 22:25-27; John 13:12-17; I Cor. 8:9; Eph. 5:1-2; Phil. 2:5-11; I Pet. 2:21-23; etc.).

3. Radical self-denial in the NT. The strongest and clearest expression of self-denial in its radical and distinctive NT sense is found in the saying of Jesus: "If any man would come after me, let him deny himself [ἀπαρνησάσθω ἑαυτὸν] and take up his cross and follow me" (Mark 8:34; cf. Matt. 16:24; Luke 9:23).

a. In the teaching of Jesus. The meaning of radical self-denial in the teaching of Jesus is clear: it is utter self-rejection in favor of following Christ. In Mark 8:34-35 (cf. Matt. 16:24-25; Luke 9:23-24; John 12:25-26), both the negative and the positive elements in the NT concept of self-denial appear. In its negative sense, self-denial is the rejection of one's own life, property, and welfare (Matt. 19:16-30; Mark 10:17-31; Luke 18:18-30; cf. Matt. 10:37-38; Luke 14:26-27). In its positive aspect, self-denial is but the first step in the total act of committing oneself to Christ. Thus, self-denial is not an end in itself; rather, it is the self-rejection which is incurred in the process of following Christ.

It is of significance that all three Synoptic gospels place the primary saying of Jesus about self-denial in the context of the first prediction of his own suffering and death. Seen in the light of this context, Christian self-denial is to be understood as participation in the cross of Christ (cf. Matt. 20:20-28; Mark 10:35-45).

b. In the thought of Paul. Even though self-denial as such is not mentioned in the writings of Paul, he nevertheless understands the Christian life in terms of sacrificial self-giving (Rom. 12:1). As far as Paul's personal life is concerned, the heart of his teaching is stated when he indicates his own desire to count all things as refuse for the sake of gaining Christ (Phil. 3:7-11). Even so, however, Paul does not think of the Christian life apart from the work of Christ himself. According to Paul, the Christian life has its focus and dynamic in the believer's dying and rising with Christ (Rom. 6). This spiritual-moral process of participating in the death and resurrection of Christ includes the renunciation of the old self in order that a new self might become a reality in and through Christ (Rom. 6:6-11; Gal. 2:20; cf. Eph. 4:20-24; Col. 3:5-11).

SEMITE sēm'it. A person belonging to those peoples of mankind either having common descent from Shem the son of Noah (Gen. 5:32) or speaking one of the Semitic languages (see LANGUAGES OF THE ANCIENT NEAR EAST). This is a linguistic, and not a racial, classification.

The term was first used in 1781 by A. L. Schlözer to designate the descendants of Shem in the list of Gen. 10:21 ff. Geographically this list suggests that Shem's descendants spread from Lydia eastward through greater Syria, Assyria, to Persia. The N boundary was in Armenia; the S, on the Red Sea and the Persian Gulf. It is probable that EBER (Gen. 10:24) is to be related to those who spoke the HEBREW LANGUAGE. Curiously, the Canaanites and Abyssinians seem to be classified as sons of Ham (vss. 6-7), even though these languages are Semitic. This perhaps reflects the political situation in ancient Israel.

The original home of the Semites is difficult to assay. At the dawn of civilization traces of the Semitic languages are found all over the Fertile Crescent. They perhaps came originally from N Arabia but were already in the area of the Tigris and Euphrates before the great city-states were established. Waves of Semitic nomads (see NOMADISM) at various periods in prehistoric and historic times are thought by some to have successively engulfed the Fertile Crescent from the E deserts. It is impossible to prove this theory.

The Semitic family today includes most of the inhabitants of Syria, Iraq, Jordan, Israel, Arabia, and a high percentage of Turkey, Lebanon, and North Africa. Through the Jews they have influenced Europe and America, and through the Arabs they have penetrated deep into Africa.

The book of Genesis contains some suggestions of the pre-Mosaic Semitic religion. Even some of the practices of the patriarchs are not to be confused with orthodox Mosaic religion. There was belief in local deities (Gen. 16:13; 31:13; 35:7). Some of the names of the patriarchs and their relatives are not only place names but appear also as deities. The name El for "god" seems to have been widespread among the Semites and probably, as in Ugarit, indicates a great high god. The fertility cult was strong in pre-Israelite Canaan, and its survival during the monarchy caused the prophets from Elijah to Jeremiah much difficulty.

It is no longer necessary to argue the point that the Semites are not a race. It is a fallacy to apply eighteenth- and nineteenth-century linguistic studies to the field of anthropology. At best today they are a group of people speaking related languages. Al-

ready in the tenth century A.D. the language affinities of Hebrew and Arabic were recognized. In the sixteenth, Abyssinian (see ETHIOPIA) was added to this group. The OT has recorded the language of Canaan (Isa. 19:18), the Aramaic language (II Kings 18:26), that of Judah (II Kings 18:26, 28; Neh. 13:24; Isa. 36:11; cf. "Jews" in Esth. 8:9), that of the Chaldeans (Dan. 1:4), and that of Ashdod (Neh. 13:24). The NT speaks of Hebrew (Acts 21:40; 22:2; etc.). The eighth-century-B.C. siege of Jerusalem indicates that the ARAMAIC LANGUAGE was understood both by the inhabitants of the city and by the army of the enemy (II Kings 18:26-27). Aramaic may have been the language of diplomacy at the middle of the first millennium B.C.

Usually there are three divisions made in the list of Semitic languages: (a) Eastern: Akkadian (Babylonian and Assyrian); (b) Northwestern (sometimes subdivided): Aramaic, Syria, Samaritan, Palmyrene, Nabatean, Canaanite, Phoenician, Moabite, Hebrew (Amorite); (c) Southern: Arabic, Sabeen, Minean, Ethiopic (Amharic).

There seems to be a basic common stock in vocabulary and a parallel structure to all the known Semitic languages, both ancient and modern. Yet the use of the definite article varies considerably. These languages popularly are considered to be consonantal, but internal vowel change is significant in all, and Akkadian and Ethiopic indicated vowels very early. Most of the languages added vowel signs late in their development. All the languages are written from right to left except Akkadian and Ethiopic. In all the languages the majority of the roots are triconsonantal, but a strong case has been made for biconsonantal roots. Parts of speech are formed by various affixes to these roots. The basic root form of the verb was the third person singular. The tense system is dissimilar to that in the Aryan languages. There is a multiplicity of verb forms, with Akkadian, Ethiopic, and Arabic having more than a dozen, and Hebrew and Aramaic having seven. The syntax is similar for all the languages. In Hebrew especially, subordination of clauses with conjunctions is rare. There is no neuter gender.

The influence of Semitic languages was spread by contact, invasion, and colonization into Egypt, Cappadocia, and Tunisia (Carthage), by early Christian missionaries to India, and by Islam throughout Africa and into Europe (Turkey, Spain).

From these Semitic-speaking peoples have come the three great modern, monotheistic faiths: Judaism, Christianity, and Islam. They seem to have been responsible for the invention of the ALPHABET sometime in the second millennium B.C. Situated astride the Fertile Crescent, for many years they were the middlemen of the world.

B. T. DAHLBERG

SENATE. In the Roman Empire, a hereditary legislative, administrative, and judiciary body made up of six hundred members of the aristocracy. Augustus set the property qualification for membership at a million sesterces. The group met twice a month in or near Rome to approve the emperor's report and to make decrees. By voting the deification or condemnation of dead emperors, and by choosing new ones, the Senate retained a kind of veto, but it gradually lost most of its powers. A few provinces away from the frontier remained under direct senatorial control, and certain religious and civil appointments were open only to Senators.

R. M. GRANT

SENATOR. According to II Macc. 6:1, Antiochus Epiphanes sent an "Athenian senator" (γέρωντα Ἀθηναίων; KJV "old man of Athens") to compel the Jews to apostatize and to rededicate their temple to Olympian Zeus. The Greek may also be translated "Geron the Athenian" (Geron was the name of several Athenians, see epigraphical evidence assembled by Wilhelm in *Anzeiger*, Akad. d. Wissensch. in Wien, Philos.-hist. Kl., 74 [1937], 20 ff). On the other hand, the context does not demand that γέρων be taken as a proper noun, and the parallel in I Macc. 1:41 refers merely to messengers sent by the king. The variant reading "a certain Antiochian senator" (Latin *senem quendam Antiochenum*; cf. RSV mg.), though superficially more appropriate, is not to be accepted against the combined testimony of all Greek MSS and all other ancient versions. Furthermore, since Antiochus built a magnificent temple to Olympian Zeus at Athens (Polybius XXVI.1, § 11), he may well have selected an Athenian to introduce the worship of the same deity at Jerusalem.

See also GERON.

B. M. METZGER

SENECA, EPISTLES OF PAUL AND. See PAUL AND SENECA, EPISTLES OF.

SENEH *sē'nə* [סנה]. A peak at the pass of MICHMASH, opposite another crag called BOZEZ. These crags are located ca. seven miles NE of Jerusalem along the Wadi es-Suweinit.

Seneh is mentioned only in an incidental way in the description of Jonathan's approach to the camp of the Philistines at Michmash (I Sam. 14:4). The following verse completes the description by locating one of the peaks "on the north in front of Michmash" and the other "on the south in front of Geba." If the order of these descriptions is the same as the order of the naming of the peaks, Seneh was on the S side of the pass. This would accord with the possible meaning of "Bozez" ("shining"), the peak on the N side, whose S slope would reflect the rays of the sun.

The etymology of "Seneh" is uncertain. One possibility is that it is from the root שן, "tooth," descriptive of the shape of the peak. Another possibility is that the word is from a root סנה, "thorn," used because the area was noted for thorn bushes. Josephus' reference to the "Valley of Thorns, near a certain village called Gabaothsaul . . . from Jerusalem about thirty furlongs" (War V.ii.1), is often cited as having a possible reference to Seneh. The name of SENAHAH (סנאה), a city located in Judah and occupied by Jews returning from the Babylonian exile, may possibly be derived from the same root as Seneh (see Ezra 2:35; Neh. 7:38).

W. L. REED

SENI *sē'nər* [שניר]; KJV SHENIR *shē'* — in Deut. 3:9; Song of S. 4:8. According to Deut. 3:9, the Amorite name of Mount Hermon. In Song of S. 4:8 MT reads "Shenir," but some MSS have the reading "Senir" here also (so RSV; cf. I Chr. 5:23). According to this passage, Senir seems to have another designation than Hermon, since both names occur. Perhaps they refer to two different peaks (see HERMON, MOUNT). According to Ezek. 27:5, Senir was famous for its fir trees used for shipbuilding.

A. HALDAR

SENNACHERIB *sə nək'ər ıb* [סנחריב; Akkad. *Sin-ahhē-riba*, Sin-Replace-the-(Lost)-Brothers!]. King of Assyria and Babylonia (705-681 B.C.); son of SARGON II, and father of ESARHADDON.

Sennacherib is one of those very few kings of the Neo-Assyrian Empire who came to the throne without any civil war or other complication. When his father died on the battlefield, the Empire was consolidated enough even to allow the new king some years of comparative peace. Although Sennacherib's policy toward Babylonia resulted in the destruction of that city, it should be stressed that he made every attempt to follow the example of his father by giving Babylon a special political status rather than incorporating it into the Empire. In general, Sennacherib adopted his father's policy of administrative integration of border states, though he was much more cautious in his military moves and resorted to warfare only when other means failed. It is somewhat puzzling that he mentions the name of his father only once in his numerous inscriptions.

The crucial event of Sennacherib's reign was certainly the destruction of Babylon and the years full of warfare, victories, and defeats which led up to it. All other campaigns of Sennacherib were, politically and militarily speaking, of minor importance, including the one against Hezekiah of Jerusalem, to which so much scholarly investigation has been dedicated.

In Babylon, two years after the accession of Sennacherib, a Babylonian, under the name of Mardukzakirshumi II (703), ascended the throne, to which Sennacherib himself, as the son of Sargon II, had a definite claim. Merodach-baladan, the ruler of the powerful Chaldean tribe Bit-Yakin, having returned from his exile in Elam, where he had been since his defeat by Sargon II, deposed the new king and took over Babylonia with Elamite military help. Merodach-baladan attempted to unite the warring Chaldean and Aramean tribal chieftains, and he seems also to

have had as allies various Arab tribes and to have planned a diversionary maneuver by sending messages to the Assyrian vassals in the W to incite them to rebel. Sennacherib reacted with promptness and defeated the allied Elamites and Chaldeans near Kish, whereupon Babylonia surrendered. There he installed a native, Bel-ibni, as king (702-700). In the meantime the kings of Sidon and Tyre threw off the yoke of Assyria, rebelling thus openly for the first time, instead of paying tribute as had been their policy up to then. From farther S, where the proximity of Egypt apparently fostered the illusion of strength, we hear of offensive steps on the part of Hezekiah king of Judah, the most important prince of the region. He had received a letter from Merodach-baladan (II Kings 20:12-13) and had seized the pro-Assyrian ruler of Ekron. When Sennacherib appeared, all defiance collapsed quickly in Phoenicia, but the Assyrian army had to fight in the S (Ekron, Ashdod, Ashkelon), and it defeated with ease a sizable Egyptian army at Eltekhia. Camping most probably at Lachish,* Sennacherib summoned Hezekiah to pay tribute, which the latter seems to have done only after an Assyrian army started to lay siege to his city. Seen from the Assyrian military point of view, the purpose of the entire campaign, the third of Sennacherib, was to enforce the delivery of tribute and to make a show of military power toward Egypt, ruled at that time by the Pharaoh Shabaka. Even the action against Judah was only a typical punitive expedition and, as such, successfully handled in a minimum of time. Seen from the political point of view of the ruler of the small kingdom of Judah, who endeavored to maintain some independence by using Egypt's influence against that of more distant Assyria, it was a minor setback. In fact, the readiness of Sennacherib to take tribute instead of conquering the recalcitrant city actually saved it, in spite of the defeat of the Egyptian army and the foolish stubbornness of Hezekiah. This reluctance of Sennacherib cannot be explained; he may have had some respect for the tenacity of this people, in view of the long, drawn-out siege of Samaria; he may have realized that the rebellion in the W was but a diversionary move of Merodach-baladan; or he may have had other reasons to keep the campaign as short as possible. The OT report on these events is interwoven with a lively and anecdotal story centering around the prophet Isaiah, who is said to have kept Hezekiah from surrendering with the prophetic promise that the Lord would make Sennacherib return to his country because of some rumor. Then the text goes on to tell us that the "angel of the LORD" slew in one night 185,000 of Sennacherib's soldiers, thus forcing the king to return to Nineveh, where he was killed by his two sons. Obviously, two historical events have been telescoped in this report: the sudden departure of Sennacherib from Palestine and his death twenty years later. It has to be stressed that, however suddenly Sennacherib left for home, he cannot have suffered any patent losses through pestilence or the like, because the entire region would have rebelled immediately, and we know nothing about unrest in that part of the Assyrian Empire. The entire incident, and especially the story of the sudden death of the large Assyrian army, is, curiously

enough, reflected in Herodotus' report (II.141) on the conquest of Egypt by Ashurbanipal, whom the father of history insists upon calling Sannacharibos, when mice ate up the leather parts of the equipment of the Assyrian soldiers and thus compelled the invading army to retire. There are, of course, a number of difficulties in connection with Sennacherib's campaign in Palestine, such as the fact that the Bible mentions Tirhakah as pharaoh instead of his predecessor Shabaka, and the absence of any campaign reports of Sennacherib after the destruction of Babylon (689 B.C.). Still, from the extant cuneiform evidence, there was only one campaign of that king into Palestine. Figs. LAC 1-2.

Meanwhile, the Assyrian puppet Bel-ibni was no match for the wily Merodach-baladan, who set up a certain Shūzubu as king of Babylon and incited the inhabitants of that city, as well as the Aramaic tribes along the rivers, to rebellion. Again Sennacherib had to march as conqueror into Babylonia. He drove Shūzubu out of the capital but failed to capture Merodach-baladan, who fled again, with his family, by ship to Elam, leaving the Chaldeans to the mercy of Sennacherib, who deported a large number of them. Apparently with the intention of winning over Babylon by granting the city a special political position, Sennacherib made his own son Adadnadinshumi king of Babylon (700).

Six years later—rather peaceful years, with minor campaigns—Sennacherib realized the necessity of turning against Elam with drastic steps, caused most likely by the incessant attempts of the exiles in Elam to meddle in Babylonian affairs. Since Elam was always ready to support any insurrection in Babylonia with military forces and to offer asylum to defeated rebels, Sennacherib's intention was politically sound. In order to be able to attack the coastal cities on the Elamite side of the Persian Gulf, where most of the exiles lived, Sennacherib had sailors from Tyre, Sidon, and Cyprus build ships on the upper Euphrates, and on the Tigris near Nineveh. These were to float down the rivers, but those on the Tigris had to be transferred overland to the Arahtu Canal, obviously because the lower course of the Tigris was in enemy hands. Eventually these boats were to carry Sennacherib and his army across the gulf. In spite of a heavy storm, the coastal cities were attacked and taken, after heavy fighting. As we know only from the Babylonian Chronicle, the Elamite king, Hallushu, counterattacked swiftly, striking at Sennacherib's overextended supply lines. He took Sippar in the N and advanced downstream, took Sennacherib's son prisoner in Babylon, and made a certain Nergal-ushezib king of that city. Upon the Elamite's return, the new king was defeated by Sennacherib himself (693), who had turned back, conquered Uruk, and met the rebels near Nippur. Sennacherib, however, could not turn against Babylon, where Mushēzib-Marduk became king, but moved against Elam. Here, Hallushu's defeat had caused a rebellion; and the new king, Kudur-Nahhunde, avoided an engagement with the Assyrian army.

After having destroyed a number of smaller cities, Sennacherib was compelled by the bad weather of the advanced season to retreat (692). The new king of Babylon showed special skill in procuring Elamite

military help—Sennacherib accused him of having handed over all the treasures of Esagila to buy this assistance—and a large army of Elamites, Babylonians, and their confederates from among the tribes of the mountains and the plains faced Sennacherib, when he returned to restore Assyrian prestige. The battle took place near Babylon at Hallule, and the Babylonian Chronicle calls it a defeat of Assyria—an impression which the excessively poetic and vague language used by Sennacherib in his description of the engagement underlines.

Although Sennacherib captured at Hallule the son of his old foe Merodach-baladan, the Babylonian king remained in power, and it took Sennacherib two years to prepare his revenge. Because of internal troubles in Elam, Babylon had to face the enraged Sennacherib alone, and he destroyed the city after a short siege on his eighth campaign (689). We know of this destruction only from the Bavian inscription of Sennacherib, in which as few as ten lines are devoted to this unparalleled act. The wording shows the still unabated angry mood of the king; he tells in the first person that he tore down the walls, the houses, palaces, temples, and temple towers of the city to their very foundations, including the earthen core of the towers; that he filled the Arahtu Canal with the rubble; and that he finally let the Euphrates flow over the city, so that no one should ever be able to discover its location. Only when Sennacherib reports that even the images of the gods were broken to pieces, does the style change from the first to the third person plural, and it is said that the soldiers committed this sacrilege.

For the eight remaining years of the king's reign we have no reports on warlike activities, except for a few lines on a broken alabaster slab which speak of a campaign against some Arab rulers. This reference does not entitle us to assume that Sennacherib went via Arabia to Lachish to receive tribute from Hezekiah.

On the fronts toward the N and the NW, Sennacherib's position was evidently consolidated, so that his reign represents a period of relative peace but for the Babylonian problem. His building activities were concentrated in the new capital of Nineveh, for which he erected an aqueduct unique of its kind and dimensions in the ancient Near East. His per-

sonal interest in technology is reflected in many of his inscriptions and shows also in his military planning.

His end is still shrouded in mystery. According to the Babylonian Chronicle, he was murdered in 681 by one of his sons. The Bible (II Kings 19:37) speaks of two sons, named Adrammelech and Sharezer, and localizes the crime in the "temple of Nisrokh." From Esarhaddon's inscription we learn that he was made crown prince over the opposition of the elder sons of Sennacherib, and from some indications in the inscriptions of Ashurbanipal (grandson of Sennacherib) it seems that Babylonians were implicated in the conspiracy. All this sheds suspicion on a number of people but is not definite enough simply to accuse Esarhaddon, who profited by the crime.

A. L. OPPENHEIM

SENTRY [בעל פקדת, lord of oversight]. A guard, usually armed, stationed at a specific point to oversee the passage of persons to and from that point. Irijah, son of Shelemiah, son of Hananiah, alone is called sentry in the Bible (Jer. 37:13-14). J. A. SANDERS

SENUAH. KJV form of HASENUAH in Neh. 11:9.

SEORIM סְעוּרִים [שְׁעוּרִים] (I Chr. 24:8). A priest to whom the fourth lot fell, supposedly in David's organization of the temple. The lots separated the priesthood into twenty-four divisions, each serving in succession for a stated period. Actually the temple organization reflected is that in effect from the time of the Chronicler until A.D. 70. See PRIESTS AND LEVITES. E. R. ACHTEMEIER

SEPHAR סֶפְרָא [סֶפֶר]. A place mentioned as one of the limits of the settlements of the Joktanites, "from Mesha in the direction of Sephar to the hill country of the east" (Gen. 10:30). Since the former locality was in the N of Arabia (see MESHHA 1), the latter must be sought somewhere to the S of the peninsula. Two cities, one in the interior of Yemen, the other on the coast of Mahra, have been identified with Sephar, but this equation is made difficult by the fact that both are written סֶפֶר. In postbiblical Hebrew, סֶפֶר means "border country," and it is possible that the phrase in Genesis does not mean a locality at all, but is to be rendered: "as far as the border country, that is, the hill country of the east." S. COHEN

***SEPHARAD** סֶפְרָדָא [סֶפְרָד] (Obad. 20). Probably to be identified as Sardis, the capital of Lydia in Asia Minor. Obad. 20 refers to Jewish exiles in Sepharad. Linguistically the equation of סֶפְרָד with SARDIS is unobjectionable, since the Aramaic name of Sardis is spelled identically in a bilingual inscription found at Sardis itself. The name of Sardis contained a labial sound. It appears as *sparda* in Old Persian, *sapardu* in Babylonian.

The interpretation of Obad. 20 depends upon chronological problems. If the passage is of mid-fifth-century origin, it is an early indication of the presence of a Jewish colony at Sardis. The Aramaic

Courtesy of the Trustees of the British Museum

41. Sennacherib (705-681 B.C.) receives booty as he sits on his throne, at Lachish; from the Lachish Relief

text of the bilingual from Sardis may have been added to the Lydian version for the benefit of Jewish residents, but its date is disputed (455 or 394 or 349 B.C.), and Aramaic was current as the administrative language in W Asia Minor. Sardis as an oriental trade center, however, qualifies as a probable location for an early Jewish colony.

Bibliography. C. C. Torrey, "The Bilingual Inscription from Sardis," *AJSL*, 34 (1917-18), 185-98; P. Kahle and F. Sommer, "Die lydisch-aramäische Bilingue," *Kleinasiatische Forschungen* (1930), pp. 18-86; J. Friedrich, *Kleinasiatische Sprachdenkmäler* (1932), pp. 109-10. M. J. MELLINK

***SEPHARVAIM** səf'ər vā'əm [ספראים]; **SEPHARVITES** səf'ər vīts [ספראיים]. A city of an unknown location, in Syria or Mesopotamia.

After the fall of the city of Samaria in 722 B.C., the Assyrian king Sargon II brought people from different places, including Sepharvaim, to the province (II Kings 17:24; 18:34; 19:13; Isa. 36:19; 37:13). It is told that they used to burn their children in the fire to **ADRAMMELECH** and **ANAMMELECH** (II Kings 17:31). There may be a confusion with Sippar in Babylonia, but more probably it is here a distorted form of the Assyrian "Shabarain," the Hebrew equivalent of which is "Sibraim" (Ezek. 47:16). This town was situated between Hamath and Damascus, probably near Hums.

SEPHELA. KJV Apoc. form of **SHEPHELAH.**

***SEPTUAGINT** səp'tōō ə jīnt, —chōō—. The name traditionally applied to the oldest Greek version of the OT. This name is apparently a shortened form of the title *Interpretatio secundum* (or *iuxta septuaginta seniores*). The term *septuaginta*, or "seventy," is based on the ancient tradition (Exod. 24:1, 9) that seventy elders accompanied Moses up the Mount and saw the God of Israel, whereupon God gave the tables of the law to Moses. It was only fitting that seventy elders should in turn be responsible for translating the Torah into Greek. Aristeas increased the number to seventy-two in order to make six times twelve (tribes). The term "Septuagint," commonly abbreviated "LXX," should apply, strictly speaking, only to the Greek Pentateuch, but later the name served to embrace the whole OT. MSS commonly abbreviated the term οἱ ο'. Ancient Greek writers often refer to the LXX as ἡ κοινή (ἑκδοσις), or as ἡ ἐκκλησιαστικὴ ἑκδοσις.

1. **Extent of the LXX.** Besides a translation of the Hebrew OT canon, the LXX contained a number of other works. Though some variations do exist in the MSS, the following are usually found: I Esdras, Wisdom of Solomon, Wisdom of Jesus ben Sirach, Judith, Tobit, Baruch, the Letter of Jeremiah, and the four books of Maccabees. A number of cursives also include the Psalms of Solomon.

Certain canonical books also include a number of additions not found in the traditional Masoretic Text (MT). Some uncial MSS (A R T) as well as quite a few cursives append a number of canticles at the end of the Psalter. Greek Esther has also been considerably embellished; in fact, the Greek text is over twice as long as the MT. The book of Daniel (both LXX and Theod.) contains three extensive passages without MT counterpart. These are the story of Susanna, the story of Bel and the Dragon, and finally the Prayer of Azarias and the Song of the Three Children.

2. **Date of translation.** Just when the LXX was composed is not known, though it is probable that the Pentateuch was translated in Alexandria by the middle of the third century B.C.

a. *The Aristeas romance.* Traditionally the LXX was written during the reign of Ptolemy II Philadelphus (285-247 B.C.); this view is based on a work by a certain **ARISTEAS** written to a friend named Philocrates. The work, bearing the simple superscription Ἀριστεῖος Φιλοκράτει, is in the form of a narrative dealing with the "translation of the Law of the Jews" (Euseb. *Preparation for the Gospel* 9.38). It purports to give an eyewitness account written by a highly placed courtier in the court of Philadelphus of the translation of the Torah into Greek by seventy-two savants (six from each Hebrew tribe) sent by Eleazar the high priest at the request of the king.

The work tells of Demetrius of Phalerum, the royal librarian, reporting to the emperor that over 200,000 books had already been collected but that he was hoping to expand the collection to half a million volumes. Unfortunately, however, no translation of the Jewish Laws was contained in the library. Immediately the king addressed a letter to the high priest in Jerusalem (9-12). After a lengthy digression on the king's magnanimity in ordering the release of over 100,000 Jewish slaves in Egypt (13-28), the author continues with the text of a memo from Demetrius to the king setting forth the particulars which might be used for a letter to the high priest (29-32). The text of the actual letter follows (35-40), in which the king requests elders of blameless life, having experience in the law, and being able translators—six from each tribe—to be sent to his court in order to produce this work for his library. Aristeas and Andreas were sent by the king to deliver this letter, as well as numerous sacrifices and a hundred talents of silver. Eleazar the

high priest responded courteously by a return letter (41-46), to which was appended a list of the names of the seventy-two elders (47-51). It might be noted that a few of the names are Hellenic (e.g., Theodosius *tris*, Theodotus, Dositheus), but the majority are typically Hebrew.

Detailed descriptions follow of the king's gifts to the temple, of the city, of parts of the temple and its service, of the citadel, of the city streets, and of general conditions of the country (52-120). The excellence of the elders selected by Eleazar is then set forth (121-27). After a lengthy statement by the high priest on the character of their religious beliefs and customs (128-71), it is related that Aristeas and Andreas returned to Alexandria along with the seventy-two elders, who were immediately received at court (contrary to royal custom), whereupon they showed the king the Hebrew parchments written with letters of gold. After seeing them the king bowed down seven times and assigned to them the finest of lodgings (172-81). Seven days of banqueting followed for the honored guests, in the course of which the king asked each of the seventy-two sages various ethical questions, the elders acquitting themselves in very fine fashion (182-300).

After a three-day interval Demetrius took the savants to the island of Pharos, where in a secluded but well-appointed house they set to work. The work of translation was finished in seventy-two days (301-8). Then Demetrius called the Jewish community together and had it read out to them; the LXX was received with a tremendous ovation, and copies were requested. Since it was so well and accurately done, no revision would ever be permitted, a curse being pronounced on anyone who would revise, add, or excise anything in the translation (309-11). Finally the king heard it read also, fittingly marveled at it, and urged that reverent care be exercised over the books and that the translators be dismissed with princely gifts (312-22).

b. Later embellishments. Later writers fit the story with certain miraculous elements. Philo, as well as later writers such as Pseudo-Justin, Irenaeus, and Clement of Alexandria, insist that the translators worked independently. When each had completed the entire translation the efforts of the several translators were compared and found to be completely identical. Even more fantastic is the story of Epiphanius (*On Weights and Measures*), in which the account has grown to include the entire OT and twenty-two books of the Apoc. In general it may be said, however, that all these accounts seem to go back to the Aristeas narrative, or at least to a closely related version of the same tale. This is particularly likely in view of the great popularity the Aristeas account had among Jews and Christians alike.

c. Critical evaluation. The Aristeas story is a historical romance written in the latter half of the second century B.C. or the first years of the first, by an unknown Jewish writer of Alexandria under the guise of a pagan member of Philadelphus' court. Ever since the conclusive statement of H. Hody in his *Contra historiam LXX interpretum Aristee nomine inscriptam* (1705), it has been accepted that the author is not the person he presents himself as being. That he is a Jew is apparent from his devotion to Judaism,

his interest in Jerusalem's topography and in the temple and its rituals and furnishings, and his obvious subscription to Jewish religious customs and ethical outlook.

Furthermore, the narrative contains a number of inaccuracies impossible to an Alexandrian writer of Philadelphus' day. The most glaring error is the mention of Demetrius of Phalerum as chief librarian, which position he never occupied. Nor was he a member of Ptolemy II's court, since the latter, on his accession, banished Demetrius to exile—Demetrius was unfortunate enough to have supported the wrong son of Soter for the succession. Another lapse is the representation of Menedemus of Eretria as being present at the banquet though he had died *ca.* two years before the end of Ptolemy I Soter's reign. The work also contains a number of archaizing anachronisms. And the use of LXX phraseology throughout the description of the temple furnishings and ritual indicates that the LXX had been in use for a long time.

Finally, the whole tone of the work militates against its historicity. That the bibliophile king should have been interested in adding a translation of the Jewish law is not unlikely in itself, but that he should have elaborately honored the translators, engaged in theological speculations with them, and admitted the superiority of Jewish monotheism is most improbable. The actual origins of the LXX are rather to be seen in the linguistic needs of the Diaspora in Alexandria in the century following Alexander.

P. Kahle has suggested that Aristeas' work reflects Jewish propaganda for a recension of the LXX rather than for the original translation. He maintains that the *raison d'être* for the work was an official revision of the text carried out in the latter half of the second century. Propaganda is made only for something that is contemporary; thus the date of Aristeas would automatically give one the date of the LXX recension. Furthermore, Demetrius reports to the king (30) that the library does not contain a copy of the Jewish Laws. The reason for this is that they "are written in the Hebrew characters and language and ἀμελέστερον σεσήμανται καὶ οὐχ ὡς ὑπάρχει. . . ." This obscure passage could be interpreted to presuppose the earlier existence of unsatisfactory translations, though it would be dangerous to press the point.

One objection to Kahle's reconstruction which apparently has never been raised is the unlikelihood of such a revision made *ca.* 130 B.C. being limited to the Pentateuch. Were Aristeas actually referring to an official or standard revision of the Greek text, it would almost certainly have contained the Prophets, as well as some of the Writings, at that late date. The canon for Alexandrian Jews in the latter half of the second century B.C. would hardly have been limited to the Torah.

Kahle's pupil A. Sperber has gone far beyond him in assessing differences between MSS obviously recensional or copyist in origin as evidence for different Greek translations or Targums. Kahle's thesis has found little acceptance among most contemporary LXX scholars, who are in the main continuing in the Lagarde tradition, for which see § 5 below.

3. Minor Greek versions. a. Aquila. By 132 B.C., when the grandson of Ben Sirach wrote the Prologue to the Ecclesiasticus, "the law and the prophets and the rest of the Bible" existed in Greek translation. The LXX soon became very popular among the Jews of the Diaspora for whom Greek was the familiar spoken language. When the Christian church began to spread beyond Jewish borders, it adopted the LXX as its Bible. By the end of the first Christian century the Jews were reacting against the use of the LXX, partly because it was not based on contemporary forms of rabbinic exegesis, and partly because of Christian apologetics against Judaism based on faulty LXX renderings. More and more the LXX became identified as the Bible of the Christians. To meet the growing need for a Jewish version, Aquila, a Jewish proselyte of Pontus and a relative of Hadrian, produced in A.D. 128 his version based on strict rabbinic laws of interpretation and slavishly literal to the Hebrew text. In fact, Aquila's text can be understood only by one who is familiar with the Hebrew. See AQUILA'S VERSION.

b. Theodotion. Possibly somewhat earlier (though this is by no means certain) was the LXX revision of THEODOTION. Nothing is certainly known of Theodotion except that he probably came from Ephesus. His revision is of great importance, since it was widely used and strongly influenced LXX MSS. In fact, in one case, the book of Daniel, Theod. became the official version. Theod., however, apparently revised a text somewhat different from the LXX; a pre-Theodotionic text existed already in NT times, since the writer of Revelation liberally quotes from Daniel according to Theod. rather than the LXX. This Theod. (or pre-Theod.) was a revision based on a consultation of the Hebrew.

c. Symmachus. A third Greek version was produced somewhat later than Aq. (toward the end of the second century) by the Ebionite SYMMACHUS. The work of Symmachus can easily be recognized by its elegant and bombastic style. Its periphrastic character renders it somewhat less useful than those of Aquila and Theodotion.

Other Greek versions are known to have existed, but of their origins nothing is known. Even Origen, who used three such others, simply called them *Quinta*, *Sexta*, and *Septima*. Only a few fragments of these are extant.

4. Recensions of the LXX. a. The work of Origen. Modern LXX criticism inevitably goes back to the prodigious work of Origen (d. 254), the father of LXX criticism. By the beginning of the third century the history of the Greek text was already complex. Origen accordingly determined to make a critical edition of the LXX. To this end he studied Hebrew already early in life. By 240 he had collected immense amounts of materials and began active work on his mammoth Hexapla, so named from the six columns of texts it contained. Column I contained the Hebrew text which served as the basis for his textual studies. The other columns contained the following texts: II—the Hebrew text in Greek transcription; III—Aq.; IV—Symm.; V—LXX; VI—Theod.

Of most interest is the fifth column. Origen realized that the LXX and the Hebrew frequently

diverged. The LXX had numerous words, phrases, or even whole paragraphs with no counterpart in the Hebrew. On the other hand, the reverse was also often the case. In the former instance Origen marked the beginning of the intrusive text with an obelus and its end with a metobelus. For Hebrew materials not paralleled in the LXX, Origen inserted materials from the other columns, marking the beginning of the passage with an asterisk followed by an indication of the source ($\alpha'\sigma'\theta'$ or $\text{oi } \gamma'$), and its end with a metobelus.

This huge work was completed in 245 at Caesarea. Its exact relation to the Tetrapla (the last four columns in an independent edition) is uncertain, though the latter was probably later. H. M. Orlinsky, on the other hand, maintains with some plausibility that Tetrapla was simply another name for the Hexapla, since the first two columns were of no use to monolingual Christians.

Obviously the work of Origen was too bulky to reproduce in its entirety, and so the fifth column alone was copied. In the course of time the Aristarchian signs (so called because they were used by Aristarchus in his great edition of Homer) used by Origen were no longer understood, and copyists either omitted some of them or put them into the wrong places. Origen could hardly have foreseen the textual chaos which has followed on his great work.

One of the best evidences for Origen's fifth column is the slavishly literal rendering of it into Syriac by Paul, bishop of Tella (618-19), known as the Syrohexaplar, of which substantial portions are still extant. Pamphilus and Eusebius supplied Constantine with fifty copies of Origen's column for his use in the capital. This recension is usually called the Hexaplaric or Palestinian recension.

b. Hesychius. A second recension of the LXX was made ca. the end of the third century by the bishop Hesychius (died 311). Little is known about the Hesychian or Egyptian recension. The text can be identified in part from biblical quotations in the Egyptian fathers, especially those of Cyril of Alexandria (died 444). In the Prophets it appears that Codex Marchalianus (Q) is its chief textual representative. For large parts of the LXX this text group has not yet been identified.

c. Lucian. Better known is the Lucianic recension (also known as the Antiochian), which became the accepted text throughout Asia Minor. Lucian the Martyr (died 311) was reputed to have produced this text, but it is not at all clear what he did. Any revision done by Lucian was effected, not on the LXX in any pre-Hexaplaric sense, but on an Antiochian or pre-Lucianic text. It has long been recognized that the OL sub-version is a translation of a text very similar to that of Lucian with the hexaplaric plusses omitted. One therefore suspects that Lucian's work was mainly based on a comparison with Origen's Hexapla, which he is known to have used, and that his work was mainly additive. It is not at all certain that a recovery of Lucian would bring us nearer to the original LXX; the real question, which at the moment is wholly unsolved, is what was the relation of the pre-Lucianic Antiochian text to the pre-Hexaplaric text. If the former

was a revision of the LXX, it is apparent that a fairly extensive revision of the LXX on the basis of a Hebrew text not always equal to the MT took place in or about Antioch at least 150-200 years before Lucian.

The Lucianic text can usually be identified from extensive biblical quotations found in Theodoret and Chrysostom. From these, in turn, certain MSS can be classified as Lucianic for certain books. E.g., it is clear that for the four books of the Kingdoms MSS *b b' o r c₂ e₂* are clearly Lucianic, whereas MSS *g i* and *H(olmes) P(arson)* 246 have numerous Lucianic readings. Marginal Lucianic readings are to be found in the Syro-Hexaplar and in MSS *M* and *j*. It should be carefully noted, however, that this applies only to these books. For other LXX books the textual character is quite different.

5. Modern approach to LXX criticism. Modern LXX criticism may be said to have begun with Paul de Lagarde (died 1891). He maintained that the history of all extant LXX MSS is bound to these three recensions. From citations in the Fathers known to have used these recensions, these texts can be identified. Textual criticism therefore must begin by identifying and unscrambling these strata, before any further attempt at determining the actual text of the LXX can be made. Lagarde felt that textual labor should produce critical editions of these recensions on the basis of which the Ur-text, or LXX, might be established. He himself pioneered the plan by editing (somewhat prematurely, to be sure) a first volume (Genesis to Esther) of the Lucianic text. It should be added that sub-versions must be considered as MS evidence as well; e.g., for the books of Kings the Armenian text is good MS evidence for the Hexaplaric recension, whereas for Daniel the Bohairic (Coptic) is Hesychian. When Lagarde died, the work was taken up by his former pupil A. Rahlfs, who promoted and began the Göttingen LXX, on which see § 9a below. Most later LXX scholars have followed the Lagardian principles, among the more notable of whom are Montgomery, Margolis, Kappler, Ziegler, Gehman, Orlinsky, and Katz; for bibliographies containing their works, see *bibliography* § d.

Since the early days of modern criticism a number of pre-Origenian LXX papyri have been found (such as Chester Beatty, Rylands, Scheide, and Murabba'at papyri), all of which demonstrate the complexities of the history of the text prior to Origen. The critic can evaluate these finds, however, only in the light of the later history of the text for which the Lagardian principles are sound. For the text, critical character, and value of these papyri, consult the bibliographies listed in *bibliography* § d.

6. Character of the LXX. The Greek OT as it exists today is a composite book, the work of various translators of varied ability who worked at different times. The whole OT was probably complete by the middle, certainly by the end, of the second century B.C. It is generally held that the provenance of all of them was Egypt, a likely though not fully certain presupposition. The Pentateuch was undoubtedly translated first, probably during the reign of Philadelphus, but not by a body of scholars who came to a common agreement for the entire Torah as Aristaeas and later romancers maintain, but by separate translators.

In general it is a good translation, but each book has individual translation traits and must be individually studied.

The books of the Kingdoms reflect the work of five distinct translators, each with distinct characteristics. Their works comprise I Samuel; II Sam. 1:1-11:1; 11:2-I Kings 2:11; 2:12-21:43; 22:1-II Kings. That these represent distinctly different translations can easily be seen by comparing them. E.g., the Greek of II Kings is extremely literalistic, syntactically Semitic, and often gives evidence of a lack of understanding of the Hebrew *Vorlage*. The translator of I Kings 2:12-21:43, however, is much less slavish to the Hebrew, uses on the whole much better Greek, and often paraphrases the text by haggadic additions which obviously had no textual support. These additions are similar in character to the amplifications in the Hebrew texts of Samuel found in Qumran IV.

The LXX Psalter represents the Hebrew text more or less adequately. It was probably subject to numerous revisions in the course of its history because of its common liturgical use. On the other hand, Greek Proverbs and Job are inadequate to the MT, though their Greek is quite excellent; in fact, the suggestion that one translator was responsible for both translations has much to commend itself. In both cases the Hebrew *Vorlage* seems to have been considerably different from the MT. Greek Job is about one sixth shorter than the MT, the missing verses being supplied from Theod. in modern editions of the LXX. The Proverbs text has suffered considerable expansion through revisers who felt that the free translations were not sufficiently literal and therefore added doublet renderings which now stand side by side with the older stratum. The text of Ecclesiastes is extremely Hebraic in character and is a slavishly word-for-word rendering of the Hebrew. It is probably either the text of Aquila or very strongly influenced by his work. The reasons for the adoption of such a text (it must have been almost incomprehensible to a monolingual Greek reader) by the Christian church are not at all clear.

The later prophetic books are quite varied in character as well. The text of Ezekiel represents an attempt at a literal rendering of a Hebrew text at times apparently imperfectly understood and often corrupt. Greek Jeremiah is seemingly based on a Hebrew text recensionally at variance with the MT, since not only is the text markedly different but also the order of the materials varies considerably from that of the MT. The LXX of the book of Daniel is extant in only two MSS, an eleventh-century Chigi MS and in Chester Beatty 967/8, for which the only other text evidence to be found is in a Syriac MS housed in Milan (Codex Syr-hex. Ambrosianus C.313). The Christian church substituted an Ur-Theod. text of Daniel by the beginning of the second century, if not earlier. In fact, since the NT quotes mainly from Theodotion's Daniel, it has been suggested that two variant pre-Christian texts existed side by side, and that Theodotion simply adopted the one with little or no change in his revision.

Greek Isaiah has long been a favorite field of study for LXX scholars. The history of its text, partly because of its frequent use by NT writers and partly for reasons of early Christian and Jewish

apologetics, is more complex than that of any other OT book. The translation is very free, at times almost wholly useless for MT text criticism. It remains valuable, however, as a source book for ancient Jewish exegesis. (On the Greek of the LXX, see also GREEK LANGUAGE § 4a).

7. Importance of the LXX. It is by now fully apparent that the LXX is more than simply a happy source for all kinds of proposed emendations of the MT. Its textual character constitutes a problem in itself. It is now assured that the LXX is of some use in restoring a Hebrew base (*Vorlage*) often at variance with the MT. The textual criticism of the MT will remain largely dependent on LXX studies.

But the LXX is of importance for its own sake as well. It is a translation document and as such is largely bound by its base, to be sure, but, especially in those books more freely rendered, it constitutes a valuable source for understanding the theological and ethical outlook of Alexandrian Jewry. Many of the attitudes betrayed by the writer of the Aristeas legend are clearly identical with those of some of the LXX translators, notably of Greek Isaiah.

Another point that needs continual stress is the importance of LXX research for NT studies. The LXX constitutes the bridge between the OT and the NT. It provides the thought world and vocabulary for the NT writers. Kittel's *TWNT* is an attempt to appreciate this intimate relation. NT Koine is not simply the everyday Greek of an Eastern people in the first Christian century; its religious vocabulary derives ultimately, not from the Greek world, but from the Hebrew world of the OT through the medium of LXX Greek.

8. Texts. For a discussion of the most important papyri finds since 1938, including Rylands 458, the Chester Beatty and John H. Scheide biblical papyri, and the Berlin fragments, cf. J. W. Wevers, "Septuaginta-Forschungen," in *Theol. Rundschau*, N.F. XXII (1954), 111-38. For earlier materials cf. F. G. Kenyon, *Our Bible and the Ancient Manuscripts* (4th ed., 1939), pp. 61-74.

LXX MSS are usually divided into uncials and cursives—the former, on vellum, using Greek capital letters throughout, whereas cursives are in minuscule script. Traditionally the former have, in view of their obvious costliness and importance in antiquity, been accorded a great deal of weight, whereas cursives are often by-passed. Actually the text of a cursive may be far more important than that of an uncial. For the books of Kings, e.g., the text of a_2 (Petrograd 62) is as important for establishing the earlier Egyptian text as Codex Vaticanus (B), whereas M (Codex Coislinianus) is a mixed text with a number of Lucianic readings on the margin. Obviously the cursive is here one of the most important MSS extant for establishing the text of Kings. In fact, the recovery of the Lucianic text of Kings can be made only by cursive texts (MSS b b o r c_2 e_2). The isolation of vellum or uncial texts for special consideration, though usually done, is in itself unwarranted.

For a description of all LXX MSS used by the Göttingen LXX Gesellschaft, one can consult A. Rahlfs, *Verzeichnis der griech. Handschriften des A. T. für das Septuaginta-Unternehmen aufgestellt*

(*Göttingische gelehrte Anzeigen*. Phil.-Hist. Kl.; 1914). MSS not known to Rahlfs at the time of publication are listed and used in the various editions published by the Gesellschaft. Cf. § 9b below.

9. Printed editions. a. Early editions. The early history of complete LXX editions began with the Complutensian Polyglot, published in four (plus two NT) volumes (1514-21) under the auspices of Cardinal Ximenes. Its text was taken over by later Polyglots as well—viz., Antwerp (1569-72), Heidelberg (1586-1616), Hamburg (1596), and Paris (1645). Some of the MSS used for its preparation are now no longer extant, though a few have been identified (chiefly HP 68, 108, 248).

Contemporary with the Complutensian was the Aldine edition (Venice, 1518-19), edited by Andreas Asolanus and Aldus Manutius. Its text was apparently based on the MSS housed at St. Mark's in Venice, three of which (HP 29, 68 and 121) have been identified. It appears that HP 68 was a common textual source for the Complutensian and the Aldine edition.

By far the best-known edition was published at Rome in 1586 under orders of Pope Sixtus V, and accordingly known as the Sixtine text. Its great importance lay in the fact that it was based largely on Codex Vaticanus (or B—Vatican Greek codex no. 1209), its lacunae being filled in from other MSS. Almost all editions for the next three hundred years were based on the Sixtine text, including such important editions as that of the Walton or London Polyglot (1657), of Holmes and Parsons (the first major compilation of textual variants made), five volumes (1798-1827), and those of Tischendorf (1850, 1856, 1860, 1869).

A fourth edition was based on Codex Alexandrinus (known as A) and was produced by Grabe (1707-20). Grabe's edition is not a straightforward reproduction of A, but was intended as a critical edition. He adopted Origen's system for correcting a text by marking with an obelus all passages having no parallel in MT, and with an asterisk such passages as he considered to be Hexaplaric.

b. Modern editions. Modern scholarship has continued the work of producing editions along two distinctly different lines, each of which has certain advantages as well as defects. The British, or Cambridge, school began work on the production of the "Cambridge LXX" in 1883. The Cambridge school has continued, though on a much more modest scale, the Holmes Parsons tradition by reproducing as accurately as possible a text (in this case that of B), and carefully collating for a critical apparatus the texts of selected MSS, sub-versions, and patristic quotations. No attempt is made at assessing variants; the only evaluation that is made—and this is a responsible one—is in the selection of the materials to be collated. A manual edition of the text of B, along with the variants of a few of the more important uncial texts, was produced by H. B. Swete (*The OT in Greek*, 3 vols. Vol. I first appeared in 1887; subsequent revised editions in 1895, 1901, and 1909. Vol. II was published in 1891, later editions in 1896 and 1907. Vol. III went through four editions—1894, 1899, 1905, and 1912. The last editions have all been reprinted).

Another approach to the problem has been taken by the Göttingen school. The *Societas Litterarum Göttingen* has followed Lagarde's plan of producing critical editions. The printed text is the result of careful assessment of all available texts by the editor and purports to be the true LXX. MSS are classified according to recensional families. Many textual problems are by no means solved, and new papyri finds are showing the early history of the LXX text to be quite complex; the establishment of the LXX text appears far more difficult than it did to Lagarde. A manual edition was also produced by Rahlfs in 1935 shortly before his death (*Septuaginta; id est V. T. Graece iuxta LXX Interpretes*, II Tom.). This too is intended as a critical edition based mainly on Codices Vaticanus, Sinaiticus, and Alexandrinus with recensional variants from Lucian, Origen, and the later Catenae also cited in the apparatus.

Bibliography. (a) Texts of the Aristeas romance. These may be found in P. Wendlund, *Aristeas ad Philocratem Epistula* (1900); H. St. J. Thackeray, in H. B. Swete, *An Introduction to the OT in Greek* (2nd ed., rev. by R. R. Ottley, 1914), pp. 551-606; R. Tramontano, *La Lettera di Aristeo a Filocrate* (1931); H. G. Meecham, *The Letter of Aristeas* (1935); M. Hadas, *Aristeas to Philocrates (Letter of Aristeas)* (1951). The editions of Meecham and Hadas reproduce the text of Thackeray. For a useful bibliography of Aristeas studies, cf. Hadas, *op. cit.*, pp. 84-90.

b) LXX texts. Only such texts as might be considered indispensable for LXX students are listed here. Others may be found in the bibliographies listed below. R. Holmes and J. Parsons, *V. T. Graecum cum Variis Lectionibus*, V Tomae (1798-1827). H. B. Swete, *The OT in Greek* (3 vols.; 1909, 1907, 1912). A. Brooke, N. McLean, and H. St. J. Thackeray, *The OT in Greek: Vol. I, The Octateuch* (in four parts); Vol. II, *The Later Historical Books* (in four parts); Vol. III, Pt. I, *Esther, Judith, Tobit* (1906-40). M. L. Margolis, *The Book of Joshua in Greek*, Pts. I-IV (1931-38). *Septuaginta V. T. Graecum Auctoritate Societatis Litterarum Göttingensis editum*: Band I, *Genesis*, ed. A. Rahlfs (1926); IX, Pt. I, *Maccabaeorum liber I*, ed. W. Kappler (1936); X, *Psalmi cum Odis*, ed. A. Rahlfs (1931); XIII, *Duodecim Prophetiae*, ed. J. Ziegler (1943). Ziegler also edited the following volumes: XIV, *Isaia* (1939); XVI, Pt. I, *Ezechiel* (1952); XVI, Pt. II, *Daniel, Susanna, Bel et Draco* (1954); and XV, *Jeremias, Baruch, Threni, Epistula Jeremiae* (1957). A. Rahlfs, *Septuaginta; id est V. T. Graece iuxta LXX Interpretes*, II Tom. (1935).

c) Indispensable tools for LXX research. For Hexaplaric materials, F. Field, *Origenis Hexaplorum quae supersunt; sive veterum interpretum Graecorum in totum V. T. Fragmenta*, II Tomae (1867-74).

For lexicon, I. F. Schleusner, *Novus Thesaurus philologico-criticus; sive Lexicon in LXX et reliquos Interpretes Graecos ac Scriptores apocryphos V. T.*, in five parts (1820-21), still an extremely useful, though antiquated, work. The best introduction to LXX studies is still H. B. Swete, *An Introduction to the OT in Greek* (2nd ed., rev. by R. R. Ottley, 1914).

For a concordance, E. Hatch and H. A. Redpath, *A Concordance to the LXX and the Other Greek Versions of the OT* (2 vols.; 1897), together with a supplementary volume in two fascicles (1900, 1906).

For grammars, H. St. J. Thackeray, *A Grammar of the OT in Greek According to the LXX*, I (1909), dealing with orthography and accident. Attention should also be called to R. Helbing, *Grammatik der Septuaginta, Laut- und Wortlehre* (1907); see also his *Die Kasussyntax der Verba bei dem Septuaginta; ein Beitrag zur Hebraismenfrage und zur Syntax der κοινή* (1928). J. Psychari, *Essai sur le Grec de la Septante* (1908). F.-M. Abel, *Grammaire du Grec Biblique, suivie d'un choix de papyrus* (1927), also gives some useful information.

For papyri, E. Mayser's extensive *Grammatik der griech. Papyri aus der Ptolemäerzeit, mit Einschluss der gleichzeitigen*

Ostraca und der in Ägypten verfassten Inschriften, vol. I (1936); vol. II (3 pts.; 1926-34).

For LXX and NT vocabulary, Kittel, *TWNT*.

d) Bibliographies. For the extensive literature, see the bibliographies by E. Nestle at the end of the articles on "Bible Versions A. I." in *The New Schaff-Herzog Encyclopedia of Religious Knowledge*, II, 120-21; and on "Septuagint" in *HDB*, IV, 453-54. Also extensive bibliographies in H. B. Swete, *An Introduction to the OT in Greek* (see § 10c above); G. Bertram, "Zur Septuaginta-Forschung," *Theol. Rundschau*, N.F. III (1931), 283 ff; V (1933), 173 ff; X (1938), 133 ff. A complete bibliography of all the scholarly writings of M. L. Margolis was prepared by J. Reider in *Max Leopold Margolis Scholar and Teacher* (ed. R. Gordis; 1952), pp. 63-77. SERABIT EL-KHADEM. See **ALPHABET; INSCRIPTIONS**.

SERAH sîr'ə [שרה; cf. S Arab. *shāriḥ*, the one who explains, opens, extends]; KJV SARAH sâr'ə in Num. 26:46. A daughter (and probably a clan or family) of Asher; and a sister of Imnah, Ishvah, Ishvi, and Beriah, with whom she went into Egypt with Jacob (Gen. 46:17). According to Jewish tradition Serah was named with the sons of Asher because she was the head of a great family which was included among the recognized families of Asher. Her name occurs in connection with the census which Moses took in the wilderness (Num. 26:46). The prominence of Serah in the genealogical tables led the rabbis to infer that there was something extraordinary in her history; as a consequence she became the heroine of several legends. H. F. BECK

SERAI AH sî rā'əy [שריה, Y is prince; Apoc. Σαραία, Σαραεί]; KJV Apoc. SARAIAS sə rā'yəs (I Esd. 5:5; 8:1; II Esd. 2:2); ZACHARIAS zāk'ə-rī'əs (I Esd. 5:8). 1. The secretary to King David during the time when the Davidic kingdom was at its full height and power, and afterward (II Sam. 8:17). He is called Sheva in II Sam. 20:25, Shavsha in I Chr. 18:16, and Shisha in I Kings 4:3. Probably in all three of the latter passages the original Hebrew reading was ששש.

2. The chief priest who was serving in Jerusalem at the time when the city was captured and destroyed by King Nebuchadnezzar of Babylon in 587(6) B.C. (II Kings 25:18 = Jer. 52:24). According to the narrative, he was taken before Nebuchadnezzar at Riblah and there killed, in order to make Judah's subjection complete. He is mentioned in the list of the high

priests, descendants of Levi and of Zadok, in I Chr. 6:14. There he is said to be the son of Azariah and the father of Jehozadak, who apparently escaped his father's fate at Riblah, but who nevertheless was taken into exile by Nebuchadnezzar. Ezra also claims descent from Seraiah in Ezra 7:1 (I Esd. 8:1), and thus it can be assumed that Ezra went into exile with his brother Jehozadak. However, Jehozadak was evidently Seraiah's first-born son.

3. One of the captains of Judean forces which still remained at large in the open country after the capture and destruction of Jerusalem in 587(6) B.C. (II Kings 25:23; Jer. 40:8). Upon hearing of Nebuchadnezzar's appointment of Gedaliah as governor of Judah in 586, Seraiah and his men, together with similar forces, submitted to Gedaliah at Mizpah in the assurance that Gedaliah would treat them in a wise and just manner. However, because of Ammonite intrigue, Gedaliah and his chief officials and guards were, after six months, assassinated by Ishmael of the royal Davidic house. Seraiah, the other captains, and their forces, fearful for their lives, fled to Egypt.

4. A quartermaster, the son of Neriah, who, according to the text, accompanied King Zedekiah on a journey to Babylon in 594 B.C., taking along an oracle of the prophet Jeremiah to be first read orally in Babylon and then sunk in the Euphrates (Jer. 51:59, 61). We have no certain knowledge that Zedekiah himself made this journey, but undoubtedly Seraiah was part of a caravan which made its way to Babylon to renew Zedekiah's pledge of loyalty to Nebuchadnezzar. According to Jer. 32:12, Seraiah was a brother of Jeremiah's secretary, Baruch. The oracle by the prophet which Seraiah carried with him had one purpose: to plant the Word of the Lord in Babylon, where, after many years of exile, it would take inevitable effect in the fall of Babylon. The sinking of the oracle in the Euphrates symbolized the fact that Babylon, like the written document, would never rise again.

5. The second son of Kenaz; the brother of Othniel; the father of Joab; and a member of the tribe of Judah (I Chr. 4:13-14).

6. A Simeonite; the father of Joshibiah; the son of Asiel; and the grandfather of Jehu (I Chr. 4:35). He was a prince in his tribe.

7. One of those who returned with Zerubbabel out of exile in Babylon to Judah (Ezra 2:2; I Esd. 5:8). He is called Azariah in Neh. 7:7.

8. One of those who set their seal to the covenant made between God and the people in the days of Nehemiah (Neh. 10:2).

9. One of the "chiefs of the priests" (Neh. 12:7) who returned with Zerubbabel out of exile in Babylon (11:11; 12:1, 12). Being a leader among the people, he was automatically granted residence in Jerusalem (11:1), while among the laity, lots were cast to determine who was to remain in Jerusalem and who was to dwell in the towns of the countryside. He is called Azariah in I Chr. 9:11.

10. An officer of King Jehoiakim of Judah in the days of the prophet Jeremiah (Jer. 36:26). In the winter of the year 604 B.C., he was commanded by the king to imprison Jeremiah and Baruch, after Jeremiah had caused to be read before the king a

scroll bearing his prophecy of the judgment of Yahweh upon Judah. However, Jeremiah and Baruch escaped from their would-be captors.

E. R. ACHEMEIER

SERAPHIM sēr'ə fim (שרפים, plural of שרף, seraph). Winged celestial beings, of uncertain identity; possibly, winged serpents. See ANGEL § A3.

SERED sīr'əd [סררד] (Gen. 46:14; Num. 26:26—G 26:22); **SEREDITES** sīr'ə dīts; **KJV SARDITES** sār'dīts. The oldest son of Zebulun; ancestral head of the "family of the Seredites."

SERGIUS PAULUS. See PAULUS, SERGIUS.

SERJEANT. KJV translation of ῥαβδοῦχος (RSV POLICE) in Acts 16:35, 38.

***SERMON ON THE MOUNT.** A discourse of Jesus recorded by Matthew (chs. 5-7) as having been spoken to disciples and others in the hill country of Galilee in the early part of his ministry. It begins with a group of blessings (the Beatitudes), and then deals with social duties in a series of contrasts between the teaching of Jesus and the ancient legal traditions of the Jews. It next turns to the private religious duties of almsgiving, prayer, and fasting; and finally gives instruction about the inner quality of the religious life in a number of short parables, of which the last is the parable of the two houses. The Sermon is the first of five main discourses into which the bulk of the teaching of Jesus, as recorded by Matthew, has been collected. Each discourse ends with a formal phrase of the type: "When Jesus finished these sayings . . .," and this provides the transition to the next incident or block of material.

In Luke there is a corresponding, but much shorter, discourse commonly called the Sermon on the Plain, from the statement in Luke 6:17 KJV that Jesus "stood in the plain." This also begins with beatitudes and ends with the parable of the two houses. Comparison of the two sermons suggests that they are elaborations of an earlier discourse contained in a source used by both evangelists. Study of the literary relations, and also of the form of the separate sayings, is a valuable preliminary to any discussion of the meaning of the Sermon on the Mount, which is generally held to have unique importance in disclosing the teaching of Jesus on matters of conduct and in presenting some of his most challenging demands.

 - c. The sermon in Matthew

Bibliography

1. **Literary relations.** Matthew's account of the public ministry of Jesus begins after the death of John the Baptist. Jesus left the seclusion of Nazareth and began to announce in Capernaum the near ap-

proach of the kingdom of heaven. His first public act was the choice of four disciples; then he set out on a tour of Galilee, proclaiming the kingdom both by teaching and by healing various kinds of sufferers (Matt. 4:12-25). So far, Matthew follows the pattern laid down by Mark, though reserving Mark's examples of healing for later use; but now he expands the teaching theme and, between Mark 1:39 and 40, inserts the Sermon on the Mount. The discourse is absent from Mark, though there are parallels to six of the separate sayings in different Markan contexts. The effect of Matthew's procedure is to throw into great prominence the connection between the teaching of Jesus, the proclamation of the kingdom, and the gathering of disciples.

Luke's account of the public ministry begins in Nazareth itself with a synagogue sermon announcing the imminent fulfilment of promises made through Isaiah. The narrative shows how these promises were at once taken up in exorcisms and healings, and how Jesus' interpretation of them started a growing conflict between himself and the Jewish authorities (Luke 4:14-6:11). In all this Luke follows Mark quite closely, except that he has his own remarkable account of Peter's call; and at 6:12-16 Luke comes to Jesus' appointment of the Twelve after a night spent in prayer in the hills. Then the healing theme is again mentioned but not illustrated; it is now the turn of teaching in a short discourse (Luke 6:20-49), which was no doubt intended by the author to be closely related to the hostility which Jesus had encountered. Almost all the sayings in this discourse have parallels in the Sermon on the Mount, but in different order and sometimes differently phrased. Three verses have parallels elsewhere in Matthew; only four verses are quite without parallel. One brief saying has a Markan parallel.

a. The written tradition. The Sermon on the Mount is more than three times as long as the Lukan discourse. It has roughly twenty-eight verses with parallels in Luke 6, thirty-one verses with parallels elsewhere in Luke, and the remaining forty-seven verses are peculiar to Matthew. From this it follows that the two sermons cannot be independent. It is possible to hold the view that the Sermon on the Mount is the original form of a discourse which Luke shortened by dispersing some of the material throughout his gospel and omitting the rest; but it is not easy to give plausible reasons for this suggested procedure. It is more commonly held that both Matthew and Luke had access to a source which contained a teaching discourse, beginning with beatitudes and ending with the parable of the two houses. Each evangelist made his own modifications of the source. Most Protestant scholars use the symbol "Q" to designate the material common to Matthew and Luke but not found, with some exceptions, in Mark; and hold that the Q material, whether comprising one source or several, was used with Mark in the composition of the two gospels. Some Roman Catholic scholars take a not entirely dissimilar view, but regard the Q material as forming part of the Aramaic collection of sayings of the Lord made, according to the evidence of PAPIAS, by Matthew. See Q; SYNOPTIC PROBLEM; JESUS CHRIST § A.

An attempt to reconstruct the discourse as it stood

in the source must begin with the verses common to both sermons as a nucleus, and then test the claims of the other material.

Among the materials peculiar to Luke the four woes (Luke 6:24-26) which correspond to the Lukan beatitudes are suited to the Semitic manner of speaking, but seem somewhat inappropriate when addressed to disciples, and necessitate a fresh start at Luke 6:27*a*. Hence they may have been introduced here from elsewhere or composed by Luke. The sayings of Luke 6:39-40 do not fit easily into their present context and are found separately elsewhere in Matthew. It is not easy to be certain about their proper position. The saying in Luke 6:45 is used elsewhere by Matthew in a rather forced manner; here it is not inappropriate to its context, though it makes a change of theme from actions in general to speech in particular. So it is possible that Luke slightly expanded the original discourse by a few sayings from elsewhere.

Other Lukan material in Matthew's sermon has parallels in Luke 9:51-18:14, Luke's great insertion in the Markan framework where he throws together a large number of sayings and incidents, often without any clear sequence. It is all the more notable when such a sequence does occur, as in the group of sayings on prayer in Luke 11:1-13. In Matthew, sayings from this group appear separated and in different contexts at Matt. 6:9-13; 7:7-11. Similarly, the sayings of Luke 11:33-35, joined by the catchword "lamp," appear separately at Matt. 5:15; 6:22-23. The Lukan context of these sayings seems more likely than the Matthean to represent the underlying source. The parable of the accuser (Matt. 5:25-26) seems to have been brought in from elsewhere to serve the purpose of moral instruction, whereas Luke 12:58-59 preserves its primitive eschatological meaning. Again, the saying on divorce (Matt. 5:32) is different from the other antithetical statements about the law. It does not indicate, as they do, a righteousness exceeding that of the scribes and Pharisees, but takes sides in a scribal debate (or, in the Lukan form, contradicts the law; see § 3*c* below). Further, the parallels to the sayings in Matt. 5:13; 6:19-21; 7:13-14, 22-23, are so different in wording that they seem to come from separate versions of the Q material, rather than from a common source. To these considerations must be added the fact that Luke is known (from his treatment of Mark) to handle his material in blocks, whereas Matthew often rearranges material and forms collections illustrating particular themes. Hence it is probable that the Q material with parallels in Luke 9:51-18:14 formed no part of the sermon as it stood in the source but was introduced by Matthew when he was compiling the Sermon on the Mount.

The material peculiar to Matthew comprises five beatitudes, a series of very distinctive verses relating the teaching of Jesus to the law (Matt. 5:17, 19-24, 27-28, 31, 33-39*a*, 41, 43; 6:1-8, 16-18), and a few other verses. It is not easy to be certain whether the sermon in the source contained this material or not. It may be held that the material was originally present and was omitted by Luke because its strongly Jewish interest would be uncongenial to Gentile readers. That Luke was prepared to make considera-

ble omissions from his sources is known from his use of Mark. On the other hand, it may be suggested that the special Matthean material was absent from the Q discourse but came from another sermon-discourse which also, perhaps, began with beatitudes. In compiling the Sermon on the Mount, Matthew would have combined these two sources. In making a choice between these possibilities, the decision turns on the kind of issue presented by Matt. 5:38-48. This passage contains two examples of the formula: "You have heard that it was said . . . But I say to you . . ." The citations of the old law are Matthean only; but the corresponding commandments of Jesus have parallels, more or less close, in Luke. The correspondences are shown in Table 1.

Table 1

Matthew	Luke
5:38-39a	_____
5:39b-40	6:29
5:41	_____
5:42	6:30 with a possible reminiscence in 6:34
5:43	_____
5:44	6:27-28
5:45	6:35 (in thought, not wording)
5:46-47	6:32-33 (in thought more than wording)
5:48	6:36 (with different key word)

In this passage it may indeed be that Luke performed a delicate surgery, excising some sayings, rearranging and rewriting the rest; but it seems a simpler and more understandable procedure if Matthew, in his familiar manner, was combining and reshaping material of two collections of sayings.

Thus it may probably, though not certainly, be held that Luke reproduced and slightly expanded a Q sermon whose extent is roughly indicated by the verses common to the Matthean and Lukan discourses. Matthew made a compilation from the Q sermon, other Q material, and an M discourse used only by himself. If this is so, it means that the original intention of the Q sermon should be more readily discernible in Luke than in Matthew. At least it cannot be assumed that Matthew's setting of the sayings provides the only or most important clue to their meaning. This does not imply, however, that the Matthean material and arrangement can be neglected; nor, when sayings differ considerably in wording, can it be taken for granted that the Lukan form is primary. Each saying must be judged on its own merits. There is little point in trying to decide between Matthew's "mountain" and Luke's "level place" as the scene of the discourse, since no doubt the evangelists indicated what seemed to them an appropriate location. Luke gave his sermon the character of a public manifesto (6:17; 7:1; and cf. the woes in 6:24-26), and Matthew was moved by the same impulse in his closing formula (7:28); but there are strong indications that the sermon in the source was addressed to disciples only (Matt. 5:1; Luke 6:20; and the wording of the Beatitudes, especially that on the persecuted; see § 3a below).

b. The oral tradition. It is open to question whether the sermon in Q represents a remembered discourse of Jesus or a collection of sayings preserved separately in the oral tradition from which all written sources arose. It is inherently probable that Jesus gave connected teaching; but all the Synoptic discourses are in part compilations. The Synoptic gospels are composed, largely though not entirely, of short units of teaching or narrative strung together by vague indications of time or place, by catchwords, or by common themes. The fact that some sayings in the Sermon on the Mount appear in totally different contexts in Luke shows that the evangelists lacked an authoritative tradition about their original contexts. Hence it is possible to examine the sayings in isolation, though their setting in the gospel narrative may be an important indication of their significance to the evangelist and the church tradition he reflects.

The relation of the sayings in the Sermon on the Mount to the church tradition may be studied by examining parallels in the letters.

It is clear from I Cor. 7:10-11 that a tradition of the teaching of Jesus was known to Paul, though he seldom quoted it directly. He could distinguish a commandment of the Lord (which here presupposes the form in Mark 10:11-12 rather than the variants in Matthew and Luke) from his own instructions, which were, in effect, a modification for the circumstances of Gentile life of Jesus' teaching on divorce. It may reasonably be supposed that sayings of Jesus were widely remembered throughout the early church, and were preserved (and sometimes adapted) to meet the needs of church life. They would have a semi-independent existence until written collections became authoritative.

Some sayings of Jesus were current in variant forms with identical meaning. Thus Matt. 7:16b has the same figure of trees and fruit as the differently worded Luke 6:44b; and there is a third form in Jas. 3:12, where it is used, without reference to Jesus, in a passage on control of the tongue. These are variations of a familiar proverb. Similarly, the differently worded but parallel sayings Matt. 5:48; Luke 6:36, as well as I Pet. 1:15 ("As he who called you is holy, be holy yourselves in all your conduct"), are adaptations of Lev. 11:45. Again, the thought of forbearance in judging in Matt. 7:1-2 is repeated with amplifications in Luke 6:37-38; and Paul appeals to it as a familiar principle in Rom. 2:1-3; 14:10. Hence it may be concluded that some of the sayings of Jesus existed alongside proverbial or traditional sayings and may have been influenced by them.

To some sayings, however, there are verbal parallels sufficiently close to suggest direct reminiscence. I Pet. 3:14: "Even if you do suffer for righteousness' sake, you will be blessed," echoes the distinctive words of Matt. 5:10. I Pet. 4:13-14: "Rejoice in so far as you share Christ's sufferings, that you may also rejoice and be glad when his glory is revealed. If you are reproached for the name of Christ, you are blessed," recalls the words of Matt. 5:11-12: "Blessed are you when men revile you . . . on my account. Rejoice and be glad, for your reward is great in heaven." ("Reproach" and "revile" represent the same Greek verb.) Further, I Pet. 2:12 seems to reproduce Matt. 5:16 in a form adapted to the

Gentile mission, and with a strong eschatological note, which may be original. In Rom. 12:14 the command: "Bless those who persecute you; bless and do not curse them," has words characteristic of both variant forms in Matt. 5:44; Luke 6:28. These similarities suggest that, at least in circumstances of hardship and persecution, the early Christians had for their encouragement a group of sayings of Jesus (in Greek) which could be woven into apostolic letters and recognized for what they were.

There are other possible parallels to sayings in the Sermon on the Mount which suggest greater freedom in adaptation. Thus Jas. 5:12 looks like a concise summary of Matt. 5:34-37, and may well preserve the saying: "Let your speech be, Yea, yea; Nay, nay" (ERV-ASV), in a more original form. The saying: "Repay no one evil for evil" (Rom. 12:17 and similarly I Pet. 3:9), may be said to convert Matt. 5:39; Luke 6:29 into a generalization. Possibly Phil. 4:6 generalizes the teaching against anxiety (Matt. 6:25-34; Luke 12:22-31); and it may be thought that the closing section of the sermon (Matt. 7:21-27) is summed up in: "Be doers of the word, and not hearers only" (Jas. 1:22 and similarly Rom. 2:13). The passage Jas. 5:1-3 has some verbal reminiscences of Matt. 6:19-20 and, indeed, of the Lukan woes. The setting is strongly eschatological and may be original; but it looks as if original sayings have here been, not abbreviated, but expanded. Similarly Jas. 1:5 could be an expansion of Matt. 7:7; Luke 11:9, with a more abstract version still in I John 5:14-15. The parenthetical sections of the letters provide examples of an ethical tradition that could have developed by expansion or abbreviation of sayings of Jesus.

Consequently a study of the meaning of sayings in the Sermon on the Mount needs to take into account the intentions of the evangelists, the significance of the sayings in the sources, the modification of sayings in the course of their preservation by the primitive church, and the meaning of the sayings in their original setting in the ministry of Jesus.

2. Form of the sayings. The Sermon on the Mount contains sayings of various types. Some are simple commands such as: "If any one forces you to go one mile, go with him two miles" (Matt. 5:41). Force is given to such commands simply by the moral authority of the speaker. A special case of such authority is provided by the six antitheses—e.g., "You have heard that it was said to the men of old, 'You shall not kill; and whoever kills shall be liable to judgment.' But I say to you that every one who is angry with his brother shall be liable to judgment" (Matt. 5:21-22a). The formula is undoubtedly an adaptation of a common rabbinic device which contrasted what was "heard" in a particular passage of scripture (i.e., what might be understood in a narrowly literal sense) with broader interpretations that could be urged either from other passages of scripture or by logical demonstration. The Matthean formula lacks any such demonstration or scriptural argument, and the authoritative phrase: "I say to you," is more prophetic than rabbinic. Its setting is not so much exposition of the law as the utterance of a prophetic oracle, though the difference between the words of Jesus and the rabbinic formula must not be exaggerated.

To other commands a warning is added—e.g., "Make friends quickly with your accuser, while you are going with him to court, lest your accuser hand you over to the judge . . . , and you be put in prison; truly, I say to you, you will never get out till you have paid the last penny" (Matt. 5:25-26). The first part of the saying is no more than a piece of proverbial wisdom ("It is better to settle out of court if you can"); the second part, with its strongly prophetic tone, converts it into an eschatological warning. Promise and warning are found together in the wisdom saying in Matt. 6:19-21, the Lukan form of which (12:33-34) appears in an eschatological context. The sayings on almsgiving, prayer, and fasting (Matt. 6:1-4, 5-6, 16-18), with their deliberately formal and repetitive structure, also join warnings and promises in a manner recalling wisdom sayings. Closely related to the commandment with a promise is the commandment with a purpose—e.g., "Let your light so shine before men, that they may . . . give glory to your Father who is in heaven" (Matt. 5:16).

Other commandments are provided with various kinds of argument or demonstration. The passage Matt. 6:25-34 is a complex example, containing three types of justification for the general command: "Do not be anxious." There are pieces of proverbial wisdom: life is more than food or clothing; anxiety cannot add to your span of life; there is enough trouble today without worrying about tomorrow (vss. 25b, 27, 34). Then there is a simple argument by analogy from less to greater in familiar rabbinic style, which depends for its force on a vivid awareness of God: if God feeds the birds, he will certainly feed you whom he values much more (vss. 26, 28-30). Finally, there are prophetic sayings which criticize Gentile faithlessness and promise God's kingdom (vss. 32-33). Another example of the argument from less to greater appears in Matt. 7:9-11, which is both preceded and followed by prophetic imperatives. Somewhat more complex is the section Matt. 5:43-47; Luke 6:27-35. Matthew has a commandment with a purpose—to behave as God does—followed by the argument: If you love only those who love you, how are you better than tax collectors and Gentiles? Luke has a series of simple commands, followed by the Golden Rule (widely quoted in rabbinic and other writings), and then the direct commandment of love for enemies, with a promise of acting as God does. In both passages, the basic justification of the commands is given in prophetic disclosure of the nature of God (cf. Matt. 6:7-8).

Thus examination of the commands in the Sermon on the Mount discloses a dual kinship—with prophetic speech on the one hand and with wisdom sayings (proverbial or rabbinic) on the other. These two classes, broadly understood, account for the remaining material as well.

Among wisdom sayings may be included the sayings on serving two masters (Matt. 6:24), on trees and fruit (Matt. 7:16-20), two rabbinic-type rulings (Matt. 5:22b, 34b-36), the only liturgical instruction (Matt. 6:9-13), and a dark saying or riddle (Matt. 6:22-23). Here also belong the simple comparisons and parables—e.g., the speck and the log (Matt. 7:3-5), the salt and the lamp (Matt. 5:13, 15—used differently in Mark and Luke and so handed down

without a standard application). The parable of the two houses (Matt. 7:24-27) doubtless conveys an eschatological warning, and therefore belongs to both wisdom and prophetic sayings.

So also do the BEATITUDES, a type of saying common in the Psalms (e.g., 40:4; 112:1-2). Here they are associated with future benefits (even the first) and so are akin to such oracles as Isa. 19:24-25; Dan. 12:12. Further prophetic-type sayings are found in Matt. 6:14-15; and possibly in 5:13a, 14a ("You are the salt of the earth; . . . the light of the world"), which have been compared to Isa. 61:6 but are not easy to place and are regarded by some scholars as compositions of the evangelist. The remaining prophetic sayings are dominated by the person of the speaker. They are Matt. 5:17, one of the notable "I have come" sayings which are scattered throughout the gospels, together with the appended sayings on eschatology and the law in 5:18-20; the closely allied sayings in 7:21-23, in which association with Jesus apart from performance of the known will of God is repudiated; and the closing parable, with the significance it attaches to the words of Jesus (cf. Isa. 8:16-18; Dan. 12:9-10).

Because the wisdom-type sayings can be paralleled from proverbial and rabbinic sources, it has been suggested that they may have been attributed to Jesus at an early stage in the tradition. The commandments also may have taken shape in the life of the primitive church. On this view the distinctive element in the teaching of Jesus was the prophetic utterance of immediately relevant warnings and promises, the eschatological announcement of the kingdom. Scholars who contest this view acknowledge the influence of the early Christian communities on the form of the sayings and would agree that some alien sayings have been attributed to Jesus; but they would question the exclusively eschatological emphasis. It may be forcibly argued that Jesus availed himself of familiar proverbial wisdom and simple rabbinic teaching devices in order to convey a primarily prophetic message. The wisdom sayings, as well as the commands uttered on his own prophetic authority, were drawn into the service of the proclamation of the kingdom. On either view, the speaker of the Sermon on the Mount is not so much lawgiver, teacher, or rabbi as prophet of the final will and action of God.

The Hebrew prophets frequently uttered their oracles in poetical form, with its characteristic and varied parallelism (see POETRY [HEBREW]). Examples are numerous in the sayings of Jesus. Matt. 7:7-11 is beautifully constructed in synonymous parallelism (in which one strophe balances and repeats another), together with a concluding saying in antithetical parallelism (in which one strophe is balanced by another in contrast):

Ask, and it will be given you;
seek, and you will find;
knock, and it will be opened to you.
For every one who asks receives,
and he who seeks finds,
and to him who knocks it will be opened.

Or what man of you,
if his son asks him for a loaf, will give him a stone?
Or if he asks for a fish, will give him a serpent?

If you then, who are evil,
know how to give good gifts to your children,
how much more will your Father who is in heaven
give good things to those who ask him?

There are also examples of step parallelism, in which one strophe develops the thought of the preceding one (e.g., Matt. 5:17; 6:6). From these simple but flexible devices elaborate poetical units are built up, as may be seen in the varied correspondences of Matt. 6:25-30. It is of some importance to observe that the poetic form is not always exactly reproduced in the Matthean and Lukan versions of a saying. Thus Luke 12:24 runs:

Consider the ravens:
they neither sow nor reap,
they have neither storehouse nor barn,
and yet God feeds them.

Matt. 6:26 breaks the parallelism with: "They neither sow nor reap nor gather into barns." Again, the parallelism of Luke 12:28:

which is alive in the field today
and tomorrow is thrown into the oven,

is destroyed by a slight variation of the Greek in Matt. 6:30: "which today is alive and tomorrow is thrown into the oven." Thus the poetical structure of the sayings may be used with caution as one guide to their original form.

3. Interpretation. In both gospels (and in the source) the BEATITUDES have first place and provide the keynote. A comparative study of the two forms reveals the intentions of the evangelists and the original purport of the sayings. Then it becomes possible to examine the remainder of the two sermons and their various sections.

a. The Beatitudes. The four Lukan beatitudes are balanced by four woes, and differ somewhat from the corresponding Matthean sayings in wording. Luke uses the second person plural throughout, Matthew the third person for 5:3-10 and the second person for vs. 11-12. Opinion is divided on the original form. The Lukan beatitudes give a vivid impression of hearers' being directly addressed (reinforced by the repeated "now" in vs. 21); in Matthew they read like generalizations. But blessings in the OT are commonly expressed in the third person, and there is precedent for a change of person in the last blessing of a series. It is difficult to see why Matthew should have changed an original second person when the rest of his sermon preserves so forcibly the direct address. Woes, however, are often expressed in the second person, and it may be that Luke, in adding the woes, changed third to second person to secure uniformity. The decision is not of great importance, since both forms are in the prophetic manner. It is possible to translate: "How happy are they who . . . !" and: "Alas for you who . . . !" if it is understood that the blessings and woes are not simple comments of joy and grief but prophetic words intended to bring to pass the things about which they give promises or warnings. See BLESSINGS AND CURSINGS.

The beatitude on the poor (Luke 6:20b, 24; Matt. 5:3) reflects a strong characteristic of OT religion, in which God is the vindicator of the poor and needy (Ps. 107:39-43), and the king as God's agent has responsibility for the poor (Ps. 72:1-4). In biblical

tradition the word "poor" even developed an almost technical meaning, deriving from the period of Seleucid rule, when it was poor men of firm and simple piety who maintained the faith against pagan enticements (cf. Ps. 86:1-2; Pss. Sol. 10:7). Matthew's phrase "the poor in spirit" is intended to make this fact clear. No doubt the Lukan beatitude has the same intention, though it is also closely related to Luke's familiar concern for the poor and reflects conditions in first-century Palestine, where a large class of destitute, unemployed, and landless peasants lived side by side with wealthy farmers, great landed proprietors, and rich bankers. See POOR; POVERTY.

There is no essential difference of meaning between "kingdom of God" and "kingdom of heaven," which reproduces more closely the first-century Jewish idiom. Both mean God in his sovereignty—i.e., God visibly exercising his sovereignty and the result of this exercise. The phrase "Theirs (yours) is the kingdom of heaven (God)" is of a type that implies possession of the kingdom and presupposes the double thought that God the king is actively at work and will shortly demonstrate his sovereignty with power; and that those who heed the promise and warning will share his sovereignty. See KINGDOM OF GOD.

The beatitude on the hungry (Luke 6:21a, 25a; Matt. 5:6) doubtless reflects the OT theme of God's readiness to relieve, not only physical, but also spiritual, hunger (Ps. 107:4-9; Isa. 55:1-2). In the gospels a dominant note is the importance of meals among the actions of Jesus (fellowship meals with his disciples, meals with sinners, the feeding of the multitude) and in his teaching ("A man once gave a great banquet . . ."; "Bring the fatted calf and kill it, and let us eat . . ."). It is notable that the spiritual and literal senses are held together, and neither is neglected for the other.

Matthew reads "hunger and thirst for righteousness." The word "righteousness" can mean right action on man's part, as it certainly does in Matt. 5:20; 6:1 (RSV "piety"). Some interpreters favor this meaning here and elsewhere in the sermon. By it the phrase would perhaps refer to an intense longing for an ideal of perfection surpassing the Jewish moral ideal and going beyond any conformity to rules of conduct. But "righteousness" can also mean right action on God's part, and in the later chapters of Isaiah often means the divine vindication and salvation. Such a meaning is appropriate in the present context: the phrase would refer to those who long intensely for the divine vindication. This interpretation would thus draw out the wider meaning of the Lukan phrase while maintaining its eschatological tone (cf. Matt. 6:33; and see RIGHTEOUSNESS IN THE NT).

The beatitude on the unhappy (Luke 6:21b, 25b; Matt. 5:4) may perhaps be illustrated in the OT poetry of the Exile and the return, where grief is turned into joy (e.g., Ps. 137 for the grief; Ps. 126 for the rejoicing). The Beatitudes as a whole are close to the promises of Isa. 61:1-2 (which Jesus expounded in the synagogue at Nazareth, according to Luke 4:16-21); and the Matthean beatitude, with similar meaning but different wording, reflects Isa. 61:2b. Its primary reference was wider than per-

sonal bereavement. This beatitude must be seen against the actual distress of an occupied country, and the devout Jewish expectation of the "consolation of Israel" (Luke 2:25) in the forthcoming mighty act of God. See also MOURNING.

The beatitude on the persecuted (Luke 6:22-23, 26; Matt. 5:10-12) predicts suffering for the disciples and draws an analogy with the fate of the prophets with whom they are compared. Since the mission charge in the Markan and Lukan traditions, though not in the Matthean (Mark 6:7-11; Luke 10:1-16; Matt. 10:5-11:1), lacks this note of suffering, it has been suggested that the beatitude belongs to a later stage in the ministry of Jesus when, according to Mark, the theme of suffering was uppermost in his mind. The argument is not decisive, since every version of the mission charge anticipates rejection of the messengers; though, indeed, the wording of the beatitude may have been influenced by later Christian experiences. Matthew's phrase "on my account" is perhaps a simplification (such as is found at Matt. 16:21 when compared with Mark 8:31; Luke 9:22) of Luke's "on account of the Son of man." This phrase brings to mind the eschatological figure in Dan. 7:13, who represents the saints of the Most High and receives a kingdom after experience of suffering (vss. 21-22, 25-27). Matt. 5:10 appears to be an alternative version of this beatitude, in which "for righteousness' sake" could mean either "for your loyalty to the law" (as of the Maccabean martyrs) or "for your reliance on God's vindication" (see above). The content of the blessing is a great reward in heaven (vs. 12), where "heaven" is a substitute for the divine name and not the future state of the righteous. It means that God will give a great reward to those who suffer, when his kingship is fully manifested; and this is essentially the same as the promise of vs. 10 that they will share the kingdom of God. For the theme of reward, see §§ 3b-c below.

When these four beatitudes are regarded as a whole, it can be seen that they are addressed to people who are poor, hungry, and miserable and who expect to be harshly treated. To them is promised a share in the divine sovereignty, which will be their happiness and satisfaction. Both physical and spiritual senses must be included in these promises; and the whole forms a revolutionary messianic proclamation of the kind announced in Isa. 61:1-2 and in the Magnificat, Luke 1:50-53. The teaching thus introduced is not inaptly called an ethic of grace.

The remaining beatitudes in Matthew are spoken, not to people in certain situations such as poverty or persecution, but to people of certain character—i.e., who are humble, merciful, purehearted, and peace-making. These are common themes in Jewish teaching. Matt. 5:5, a commendation of humility, is taken from Ps. 37:11. Matt. 5:7 could be a rephrasing of Prov. 19:17. The purity of heart required in Matt. 5:8 for seeing God (which, in Palestinian speech, is another way of saying "appearing before God") is required in Ps. 24:3-4 for appearing before God in the temple. Matt. 5:9 commends the peaceable character, as does Ps. 34:14, and says that God recognizes peacemakers as sharing his own character (being sons of God).

Only in the first of these beatitudes is there any

immediate suggestion of the reversal of situation characteristic of the Q beatitudes. It is true that the theme of inheriting (i.e., possessing) the land, which derives from the possession of Canaan, provided an eschatological image; and that the mercy, vision, and peace of God were regarded as complete only in the new age. But they were not confined to it; and the promises of these beatitudes cannot easily be pressed into the same mold as that of the prophetic beatitudes of Q. The M beatitudes are wisdom sayings which sum up a number of themes prominent in the teaching of Jesus. The Matthean beatitudes as a whole, with added sayings and changes of wording, lean somewhat heavily toward wisdom teaching and must be balanced by the eschatological proclamation in Luke; but neither can easily be discarded. One sort helps to interpret the other: both together make up the teaching of Jesus. The ethical instruction of Jesus cannot be divorced from his prophetic announcement of the kingdom of God, and his eschatological proclamation does not stand apart from his fargoing teaching on conduct.

b. The sermon in Luke. This passage may be analyzed as follows:

6:27-35, the radical demands of love

Vss. 36-45, consequences in word and deed

Vss. 46-49, the call to decision

The radical demands of love are stated with sharp clarity in vss. 27-28. These words, spoken first to peasants familiar with ill-treatment and robbery from soldiers and guerrilla bands, were easily adapted to Christian communities facing religious hostility. They are more than counsels of prudence for the weak before the strong. They require the positive action of love: praying for opponents and blessing them—i.e., counteracting the atmosphere of contempt, malice, bitterness, and hatred that marked relations in first-century Palestine. In vss. 29-30 there are illustrations of what could happen: a blow on the face and forcible theft of clothing and possessions. (The parallel verses in Matthew rephrase the illustrations so that they refer to court proceedings; see § 3c below.) In these illustrations there is a touch of familiar proverbial exaggeration, in order to state with maximum emphasis the negative aspect of vss. 27-28—i.e., the principle of nonretaliation in injurious personal encounters. Then is stated the Golden Rule (vs. 31), not because it applies with any exactness to the preceding, but because anyone who acts accordingly must try to put himself in another person's place. It is, as it were, the minimum condition of a properly personal relationship; and it would appear that love demands a personal relationship even with a hostile opponent.

The argument in vss. 32-34 suggests that the original context of this group of sayings was in an exposition of the commandment: "Love your neighbor as yourself" (cf. Luke 10:25-37). If men do good only to their own circle of friends and lend only to those who can do them favors, they are no better than sinners ("Gentiles" is probably meant; cf. Matt. 5:46-47) who act on the basis of mutual interest. Love for neighbor is to be so conceived that men do their acts of kindness without expecting any return. Their sufficient reward is that they are acting like God, who is kind to ungrateful and wicked men (cf. the

vivid illustration in Matt. 5:45). The concept of reward, as it is used here, does not imply receiving something, but becoming something—namely, sons of God, who share and reflect his character.

This extension of the meaning of "neighbor" also transforms the meaning of "love." In the teaching, and indeed the practice, of Jesus, love is not called forth by worth in the loved object, but is simply the overflowing of the divine nature which men are to share. Love of this kind is distinguishable from a love called forth by the inherent worth of the object, love which desires to possess and enjoy its object for its own self-satisfaction and fulfilment. Since God is absolutely sovereign, his love cannot proceed from self-interest, but is always outward-flowing in kindness and blessing to those who need it most. See LOVE IN THE NT.

Certain consequences in word and deed follow from the command to be merciful as God is merciful (vs. 36). They are illustrated in an assorted group of sayings which give the impression of having been collected with an eye on the inner life of the early Christian communities, but which may originally have been spoken to Pharisaic opponents. In vss. 37-38 four prohibitions (in the present tense) are matched by four passive verbs which, in the original Aramaic, would probably be understood as referring to God ("Judge not, and God will not judge you . . ."). The sayings are similar in meaning to Matt. 6:14-15 and were probably spoken in answer to Pharisaic criticisms of Jesus' association with and promises to sinners. The picture, typically Palestinian, of grain being measured out is an illustration of the overflowing mercy of God, which is neither arbitrary nor limited. The presupposition of these sayings, that men who have received God's mercy are bound to share and exercise it (cf. Matt. 18:23-35), made them readily adaptable for the Christian communities. They were probably understood as prohibiting censoriousness and encouraging generous forgiveness.

The proverbial parable in vs. 39 is used in Matt. 15:12-14 to characterize the Pharisees as "blind guides." Here it has the general meaning that men do not see the way sufficiently well to be able unerringly to condemn others. The saying of vs. 40 is used differently in Matt. 10:24-25, and the original meaning cannot be certainly decided. Its general sense is that men cannot expect to teach others to see further than they themselves see; and it may have had an application to teachers in the Christian communities. The parable of the speck and the log (vss. 41-42) betrays its polemical origin in the word "hypocrite," and means that men are not sufficiently free from prejudice and self-concern to correct others. The parable shows that a "hypocrite" is primarily, not someone who pretends to be godly, but someone sincere about his religion and blind to his faults. See also § 3c below.

The parable of trees and fruit (vss. 43-44) appears at Matt. 7:15-20 as a test for false prophets (and looks like an adaptation to later church life), and at Matt. 12:33-35 as a test between Jesus and his opponents. Its more general meaning in the Lukan context is that as the fruit of a tree depends on the nature of the tree, so a man's actions depend on the

"treasure of his heart"—i.e., the inner resources of his nature. As he is, so he speaks. A man's speech, harsh or charitable, demonstrates his own character (assuming some link in thought with vs. 37-39).

The question of vs. 46 introduces the call to decision. If men address Jesus respectfully as "Lord," they presumably assent to his teaching even though they do not put it into practice. They must therefore decide, under the pressure of a forthcoming crisis, whether they will allow his words to influence their inner life or not. The parable of the two houses dramatizes the decision and its consequences. Matthew's version is more rhythmical than the Lukan and corresponds well with the Palestinian scene. The point is that, in the Deluge, men who hear the words of Jesus and do them will be saved; those who hear and fail to perform will be lost. It is remarkable that this supreme position is given, not to scripture or scribal tradition, but to the words of Jesus.

The Sermon on the Plain begins and ends with the note of forthcoming crisis. The beatitudes and woes, with their reversal of fortune, are spoken in prophetic manner as words which go forth to effect what they promise. The concluding parable calls men to decide whether or not they will take their stand on the words of Jesus. This eschatological conception springs from the conviction that the kingdom of God is at hand, that the divine sovereignty is moving toward its full manifestation. Yet although this is the framework of the sermon, it is not its heart. The central teaching is a description of God's sovereignty as absolute love. In the conviction that the powers of the kingdom were already at work, Jesus bade men practice such love in the difficult relations of daily life. This central teaching confronts men with the kingdom of God as something to be shared and shown forth. In the sermon as a whole there is a duality which corresponds to the presentation of the kingdom elsewhere as "already here and still to be consummated." Even though the sermon is composite, with sayings taken from discussions about the law and controversy with the Pharisees adapted to Christian community use, there can be little doubt that it conveys the double emphasis of Jesus' teaching.

c. The sermon in Matthew. This may be analyzed as follows:

- 5:13-16, address to the new community
- 5:17-48, six antitheses on the fulfilment of the law
- 6:1-18, on almsgiving, prayer, and fasting
- 6:19-7:12, on possessions, anxiety and trust, behavior to neighbors
- 7:13-27, concluding challenge

The salt metaphor, handed down with different phrasings and applications (cf. Mark 9:50), was originally a warning to Israel (in Luke 14:25, 34-35, it is addressed to the multitude) and has been re-applied to the community of disciples. SALT was an essential constituent of Jewish meals and sacrificial offerings, and the parable means that Israel (or the new Israel) is essential to the world only so long as it performs its proper duty. The sense in which this is understood is given in 5:14-16. By mutual regard and practical kindness, the community is to demonstrate a quality of life which will prompt men to glorify God. (The perils inherent in such counsel are

in mind in 6:1-18.) The association of the light of the world and the hill city is perhaps explained by a similar combination in OT imagery of the community of the new age (e.g., Isa. 2:1-5; 60:1-3, 14, 19-20). The lamp parable has also been variously transmitted. The Matthean wording suggests the conversion of those within Judaism, the Lukan form (11:33) the conversion of the Gentiles. The odd wording in Mark 4:21 (lit., "Does a lamp come to be put . . . ?") suggests a reference to the Servant of God as light to the Gentiles (Isa. 42:6; 49:6). The original use of the parable by Jesus may therefore have been in answer to rebukes for making his message known indiscriminately.

This short complex of sayings from various contexts provides an introduction to the social duties of the new community.

There is clear evidence that Jesus disputed the oral tradition of the law, distinguished between one part of the written law and another, and uttered sayings that had the effect of undermining large sections of it (examples in Matt. 12:1-8; 19:3-9; 15:11-13; respectively). It is natural that some should have accused him of destroying the law, while others took advantage of its relaxation. Matt. 5:17-20, which introduces the antitheses, appears to rebuke those who thought that Jesus' chief intention was to relax the harshness of the law and modify the rigidity of the Pharisees. The passage is difficult to interpret, for it uncompromisingly asserts the validity of the law. Even minute details of the tradition are essential in this age, and entrance into the new age is by a loyalty to the law more intense than that of the Pharisees. One solution of this problem is to regard the passage, in whole or part, as a creation of the primitive Jewish Christian community either defending itself against Jewish criticism or, more probably, attacking teachers in the Hellenistic Christian communities. It is not easy, however, to suppose that Matthew was unaware of or indifferent to the contradiction between sayings of Jesus that rigidly maintain and that vigorously criticize the law. Also, even the Q tradition has sayings asserting the validity of the law. Matt. 5:18 appears more bluntly at Luke 16:17. And at Matt. 23:23; Luke 11:42, both the weightier matters of the law and the supererogatory practices of the Pharisees are commended. Hence it is permissible to look for an interpretation which will resolve the conflict (even though it cannot be confidently asserted that the sayings in their present form go back to Jesus).

Apart from vs. 17, the passage is dominated by eschatological language and seems to reflect a debate about the relation of the law to the age to come, which has also left traces at Matt. 11:12-15; Luke 16:16-17. The primary purpose of the (prophetic) coming of Jesus was to announce the nearness of the kingdom of God and so to confront men with God in his sovereignty. For the present age the law mirrors the holiness and sovereignty of God; the inauguration of the new age would mean that the grand design to which the law prophetically pointed (in ancient Hebrew tradition Moses was prophet, not scribe; Deut. 18:18) was brought to completion. The righteousness of the Pharisees set before men an elaborate and extensive but finite obligation; the proclamation of

the kingdom set before them an infinite obligation. According to the outlook of Pharisaic righteousness it was possible, in principle, to satisfy God by keeping his law perfectly; according to the teaching of Jesus, God is not satisfied until men "enter the kingdom of heaven" and so share the divine sovereignty.

In the antitheses the teaching is given in a series of interpretations (not contradictions) of the law, though at each stage an attitude is indicated which cannot be prescribed by law at all. There is no reason to deny that Jesus taught in this manner, though the Matthean arrangement has been artificially elaborated. It is likely that an original nucleus contained simple antitheses to which illustrations and other relevant materials were later added.

The opening of the first antithesis (5:21-22a) can be understood in rabbinic manner to mean: "You have heard . . . 'You shall not kill,' and have understood that only he who kills is liable to judgment." When anger is classed with murder, not only the external act but also the springs of emotion are subjected to judgment. The meaning of vs. 22b is not certain. It is best understood as a scribal ruling with comment: the rule is that a man who insults his brother is liable to prosecution, but the truth is that he is in danger of destruction (*see RACA; FOOL*). Matt. 5:23-24 appropriately introduces the theme of reconciliation as a prerequisite for worship (cf. Matt. 6:14-15), and the same theme colors the interpretation of 5:25-26 as practical counsel for reconciliation within the community. In Luke 12:57-59 it is an eschatological parable.

The antithesis on adultery (5:27-28) asserts that the marriage bond is injured even by the thought of unchastity, so that MARRIAGE is judged by its inner quality as much as by its legal form. The sayings on renunciation (vss. 29-30) appear again at Matt. 18:8-9, with more consistent eschatological language. Here the offending hand or eye refers to natural desires that become uncontrolled and destroy the "whole body"—i.e., ruin the whole personal life.

The antithesis on divorce in vss. 31-32 has parallels in Matt. 19:9; Mark 10:11; Luke 16:18, though the statements are not identical and present a delicate critical problem. Only in the Matthean versions is the excepting clause for unchastity present, and its effect is to rule that divorce is permissible for one cause. This is in harmony with the interpretation currently given by the school of Shammai and repudiated by the school of HILLEL. The Markan and Lukan forms of the saying do not recognize divorce for any cause, and must be original. The Matthean form is either an attempt to avert a direct conflict between the teaching of Jesus and the law, or the first stage in transforming an absolute statement about the divine intention of marriage into a rule of limited obligation.

The antithesis on oaths (5:33-34a) begins with the legal principle that a man who has taken an oath (i.e., called God as witness to the truth of his statement or promise) must not break his word. This opens up a wide area of debate (cf. Matt. 23:16-22), including the question whether all oaths—those made on the name of God and those in some other form—are equally binding. Jesus' ruling is that all equally involve God and his sovereignty; but his

fundamental judgment is against taking oaths at all. He teaches men to be so aware of the presence of God that they are totally committed by "Yes" or "No." *See OATH*.

The antithesis on retaliation (5:38-39a) deals in fact with the law of compensation for injury. In the time of Jesus, and perhaps from early times, Exod. 21:24 was understood as allowing an injured man to claim damages. Jesus replaced this reasonable practice by the command: "Do not stand out for damages against the man who injures you" (to paraphrase vs. 39a; the KJV "resist not evil" is misleading). The principle is illustrated by four examples: the backhanded smack on the face (only Matthew has "the right cheek"), which the rabbis regarded as a very insulting assault punishable by a heavy fine; a lawsuit claiming clothing; compulsory service as baggage carrier for the army of occupation; and begging and borrowing. (All except the third have differently applied parallels in Luke.) Every injury or demand has its legal remedy or limitation. Jesus instructs men not to insist on their rights but to give more than is demanded of them.

The antithesis on love of neighbor (5:43-45) provides the climax and is elaborated, as the last member of a series, with a clause of purpose—namely, sharing God's nature in sonship. The Matthean section is similar to the Lukan version in purport (*see § 3b above*). The opening formula can be understood in rabbinic manner to mean: "You have heard . . . 'You shall love your neighbor,' and have concluded that you should hate your enemy." There is no explicit command in Jewish literature to hate enemies.

The final and summarizing sentence (vs. 48) means that men are to be all-inclusive in their love, as God is. The word translated "perfect" goes back to an Aramaic idea of wholeness or completion. *See PERFECTION*.

This section of the sermon has a number of absolute demands together with immediately practical applications, though sometimes stated in nonliteral and exaggerated forms. The author has used sayings and parables from various contexts, often eschatological, to serve this practical purpose. He portrays Jesus as consistently pressing behind the legal ruling to fundamental questions of personal relations raised by anger, contempt, infidelity, mistrust, revenge, and hatred. In all this there is nothing repugnant to rabbinic teaching at its best. The antitheses themselves are modified rabbinic formulas, and most of the sayings can be paralleled from rabbinic tradition which may reach back to the early first century. Jesus does not here contradict the law; nor does he make it more profound or more difficult. He is not fundamentally concerned with law at all, but with God's sovereign will, mediated directly by himself, and encountered in personal relations. The fundamental sanction is sharing the nature of God himself. This is the eschatological challenge, presented in the authoritative "I say to you" of Jesus.

The self-contained section 6:1-18 gives three examples of the general instruction (in agreement with the best rabbinic teaching) that religious duties are to be performed, not to impress people, but to please God. Jesus is not here criticizing contemporary teachers, but exposing the corruption of motives.

Religious duties, sincerely undertaken, can conceal an unacknowledged desire for human approval. This is the character of the hypocrite, the man who sincerely plays his part but is untouched in his real nature (see § 3*b* above). In the duties of almsgiving, prayer, and fasting, men must encounter the "Father who sees in secret"—i.e., who unerringly discerns the inner motive. Jesus employs the language of reward (see §§ 3*a-b* above), possibly in the sense that God will reward men at the judgment though his intention is far removed from an arbitrary future reward for piety. If the danger of religious duties conscientiously performed is the substitution of an abstraction for personal encounter, the reward promised by Jesus is the restoration of personal encounter with the Father. It is perhaps not accidental that in these verses God is frequently spoken of as "your (our) Father." See ALMS; FASTING; PRAYER.

The original simple scheme has been augmented by additional sayings on prayer. Matt. 6:7-8 warns, not against the repetition of familiar prayers (as the traditional "vain repetitions" might suggest; see the RSV translation), but against the Gentile custom of addressing many gods and using magical and meaningless formulas. (It can only be conjectured whether this saying originally took shape among the mixed population of Galilee or in the Gentile mission field.) A Christian, when he prays, relies on the sole sovereignty of God, who knows his need before he asks (cf. Matt. 6:32).

The LORD'S PRAYER, with an appended saying on forgiveness as a commentary on 6:12, is also an addition to the simple scheme. The prayer is found in a different context and with different wording at Luke 11:2-4. Yet it may be remarked how aptly the longer Matthean form suits the sermon as a whole. Every phrase of the prayer represents a theme of the discourse, and vs. 10:

Thy kingdom come,
Thy will be done,
On earth as it is in heaven

(the italicized words are in Matthew only), may be said to express the central motif of the sermon.

The section 6:19-7:12 consists largely of material found elsewhere in Luke, and lacks the clear arrangement of earlier sections, though some groupings can be discerned.

The sayings of 6:19-24 are loosely held together by the thought of possessions. A link with the preceding section is provided by vs. 21 ("What you value most determines your thinking"), and the same theme is carried on by the obscure saying in vs. 22-23, well translated in the RSV. By the unsound eye Matthew evidently meant greed or envy, though Luke's application is different. The choice between God and MAMMON in vs. 24 is followed by a section on ANXIETY and trust (vss. 25-34). It mixes earthy common sense with an insistence on God's providential care for ephemeral flowers and unclean birds (if Luke's word "ravens" is preferable to Matthew's "birds of the air"; cf. Ps. 147:9); but its distinctive note is a vivid awareness that the divine sovereignty and vindication are within the grasp of faithful men. (For an analysis of this section, see § 2 above; for "and his righteousness," in Matthew only, see § 3*a* above.)

The section 7:1-12 is an oddly assorted group of sayings of which vs. 6 is peculiar to Matthew; vss. 1-5, 12, appear in Luke's sermon; and vss. 7-11 elsewhere in Luke. It may tentatively be suggested that Matthew intended a balanced paragraph on the wrong and right attitudes toward one's neighbor. A censorious attitude is condemned, and illustrated by a parable, in vss. 1-5; while vs. 6, clearly a proverbial expression, may be an ironical comment on pious readiness to put others right though despising them. Some scholars regard this verse as a piece of apocalyptic Jewish exclusiveness adopted by extreme Jewish Christians and incorporated among the sayings of Jesus. The meaning of vss. 7-11, in their present setting, must be determined by the Golden Rule in vs. 12, which reads like a commentary on them. In Luke they illustrate the theme of diligent petition; but it is possible that they were originally directed against critics of Jesus who objected to his giving God's good things to unworthy people. His reply is that we should not attribute to God conduct that we should think monstrous in a father. Matthew uses this teaching about God to describe a right attitude toward one's neighbor.

The conclusion seems to have been carefully and deliberately arranged (mostly out of material from Luke 6; 13) to present a repeated call to decision. The theme of the two ways (7:13-14) is familiar in Greek and Jewish writing (e.g., Deut. 30:15-20; Jer. 21:8); and this saying may have grown out of Luke 13:23-24, which is an encouragement to enter the narrow door of the kingdom while it is open. The Matthean form, though it is despondent about men's response to the proclamation of the kingdom, may be understood as an invitation to "choose life," rather than an intimation that a few have life chosen for them. The trees-and-fruit parable assumes in Matthew the probably secondary form of a test of true and false prophets (see § 3*b* above), and is immediately followed by a qualification in vs. 21-23. The ability to prophesy and work miracles is no proof of genuine discipleship, but only a resolute determination to do the Father's will made known in the words of Jesus. The parable of the two houses (see § 3*b* above) presents the fundamental decision and leads neatly to the closing formula with its acknowledgment of the authority of Jesus.

This conclusion of the sermon—the call to decision and the portrayal of Jesus as prophet and teacher (rabbi)—is in accord with the adaptation of sayings to the needs of the early Christian communities. Yet it is not adequate to describe the sermon as the announcement of the new law, for by an interpretation of the law it overthrows a legalist attitude. It would be truer to say that the teaching of Jesus, just as much as his miracles and apocalyptic sayings, confronted men prophetically with the sovereignty of God. The sayings are signs of the kingdom. To discuss whether the sermon contains a practical rule of conduct or an ideal is beside the point; it brings men in decision before God and their neighbor, and so begins the process of setting them free to share God's sovereignty and do his will.

Bibliography. For commentaries see the bibliography under MATTHEW, GOSPEL OF; LUKE, GOSPEL OF. For the common critical view of the literary problem, see B. H. Streeter, *The*

Four Gospels (1924), pp. 249-54. For Roman Catholic views, see B. C. Butler, *The Originality of St. Matthew* (1951), ch. 3; J. Dupont, *Les Béatitudes* (1958), pt. 1, which is a rich critical and theological study. Different views on the forms of the sayings may be found in R. Bultmann, *Die Geschichte der synoptischen Tradition* (3rd ed., 1957-58); W. Manson, *Jesus the Messiah* (1943), especially ch. 5. Of value for exegesis are: H. Windisch, *Der Sinn der Bergpredigt* (1929); *The Meaning of the Sermon on the Mount*, English trans. S. M. Gilmour, 1951); M. Dibelius, *The Sermon on the Mount* (1940); T. W. Manson, *The Sayings of Jesus* (1949); A. N. Wilder, *Eschatology and Ethics in the Teaching of Jesus* (rev. ed., 1950). A good popular exposition is A. M. Hunter, *Design for Life* (1953). For rabbinic teaching, see B. H. Branscomb, *Jesus and the Law of Moses* (1935); D. Daube, *The NT and Rabbinic Judaism* (1956).

K. GRAYSTON

SERON sîr'ôn [Σήρων] (I Macc. 3:13, 23). Governor of Coele-Syria and general of the Syrian army. He boasted that he would make a name for himself in battle against Judas Maccabeus. He was defeated by Judas at the ascent of Beth-horon, ca. 12 miles NW of Jerusalem. With the defeat of Seron, Judas' military prowess was recognized as posing a serious threat to Syria.

1. Names and identification. Serpents are mentioned often in the Bible, and a number of names are used for them. None of these names can be identified with precision from a zoological standpoint.

a) נחש (*nāḥāsh*) is the general word for all serpents, corresponding to ὄφις.

b) Two snakes of the Bible can only be regarded as legendary. These are the שרף (*sārāph*), the flying serpent of Num. 21:8; Deut. 8:15, which in the Sinai wilderness could have been identical with the אפעיה noted below; and certainly שרף בעופף (*sārāph me'ophēph*), the fiery flying serpent of Isa. 14:29; 30:6 (see SARAPH; SERAPHIM). Either a legendary or an indeterminate snake is תנין (*tannîn*) of Exod. 7:9, in the incident where rods were transformed into snakes before Pharaoh; the same word is used to designate serpents in Deut. 32:33; Ps. 91:13, and the serpent DRAGON in Gen. 1:21; Ps. 74:13; 148:7; Isa. 27:1; 51:9; Jer. 51:34; Ezek. 29:3; etc.

c) Various other words are synonymous with "serpent." On זחל (Deut. 32:24), see CRAWLING THINGS. On ἐρπετόν (Jas. 3:7), see CREEPING THINGS.

"Viper" is used to render שפיץ (*sh'phîphôn*; Arabic *siff*, Akkadian *šippu*; Gen. 49:17; KJV "adder"), identified with *Cerastes*; and אפעיה (*'eph'ê*; Arabic *'af'ā*) = ἔχιδνα, identified with *Echis carinatus* Schw., a viper living in sandy plains. Another word has been translated "viper" by error: עכשוב (*'akhshūbh*; Ps. 140:3—H 140:4; KJV "adder"), rendered in the quotation in Rom. 3:13 as ἄσπις, "asp." According

to Tur-Sinai, עכשוב is an anagram (accidental transposition of consonants) from עכביש (*'akkabhîsh*), "spider," certainly also regarded as poisonous.

"Adder" is the translation of צפע (*sepha'*; Isa. 14:29; KJV "cockatrice") and צפעני (*siph'ônî*; Prov. 23:32; Isa. 11:8; 59:5; Jer. 8:17; KJV usually "cockatrice"). This name is applied today to the big viper, *Vipera palaestinae* Wern., which is the only poisonous snake in N and central Palestine, being less common in the hills.

"Asp" is the usual translation of פתן (*pethen*). This is the ἄσπις of the NT (Rom. 3:13).

Thirty-six species of snakes are known in Palestine today, very few of which could have been assumed to have been known specifically to the ancient Hebrews. The common name *nāḥāsh* was probably applied to all snakes, but especially to the bigger species of *Coluber*, such as the common Syrian Black Snake (*Coluber jugularis* L.), the Diced Water Snake (*Natrix tessellatus* Laur.), the Montpelier Snake (*Malpolon monspessulanus* L.), or the Cat Snake (*Tarbophis fallax*). But there is no definite way to identify the poisonous species. Yet it is by no means sure that the present use is identical with the biblical usage, if in Bible times the species were separated at all. In Greek antiquity this was definitely not the case. The *sh'phîphôn*, if the interpretation is correct, would embrace the *Cerastes* vipers, *Cerastes cerastes* L., *Cerastes vipera* L., and *Pseudocerastes fieldi* Schm. Finally, there is the *pethen*, which is usually identified with the *Naja haje* L., the uraeus snake of ancient Egypt, the snake of the Egyptian snake charmers which inflates its neck when excited. This snake has not thus far been found in Palestine, but it could well be a memory from the early Egyptian associations of the Hebrews.

Serpents must have been held in abhorrence in general. Probably, as is often the case, all serpents were thought to be poisonous. F. S. BODENHEIMER

2. Literal usage. Many of the serpent references call for no special comment: the bite of a serpent (Eccl. 10:8; Amos 5:19; fatal in M. Yeb. 16:6; Sanh. 1.4); the movement of a serpent over rocks (Prov. 30:19); the charming of serpents (Ps. 58:5—H 58:6; Eccl. 10:11; Jas. 3:7); the serpents sent by the Lord to afflict Israel in the wilderness (Num. 21:6-7; Deut. 32:24; Wisd. Sol. 16:5-14; I Cor. 10:9); etc. The "flying serpent" of Isa. 14:29; 30:6, if a real animal, is presumably a desert viper (*Echis carinata*), which popular imagination graced with the power of flight (cf. the "winged serpents" of Arabia mentioned by Herodotus II.75). The serpent in the sea, to which Amos 9:3 refers, is probably a large aquatic animal, perhaps credited with fabulous powers, though subject to Yahweh's will (cf. Ps. 139:9-10). The expectation that dust will be the serpent's food in the messianic age (Isa. 65:25; cf. Gen. 3:14), indicates that the serpent will have become innocuous and no longer a danger to man.

3. Figurative use. Although thirteen of the eighteen species of Palestinian snakes which Tristram mentions are in fact harmless, biblical writers usually treat the snake as dangerous and wicked (so also M. B.K. 1.4). Thus the serpent is used to represent evil men (Ps. 58:4), the Assyrians (Isa. 14:29), the Babylonians (Jer. 8:17), Israel's enemies (Deut. 32:

33), the effects of wine (Prov. 23:32), danger in general (Ps. 91:13), the scribes and Pharisees (Matt. 23:33; see VIPER), etc. The reference to the nations' eating dust like a serpent (Mic. 7:17) points to their impending humiliation. A more favorable side of the serpent is its reputed shrewdness (cf. Gen. 3:1); hence the admonition to Jesus' disciples: "Be wise as serpents" (Matt. 10:16; cf. Midrash Rabba on Song of S. 2:14: "God saith of the Israelites: Towards me they are sincere as doves, but towards the Gentiles they are prudent as serpents"). The metaphor involving Dan in Gen. 49:17 is complimentary: Dan, though small and weak, can advance his cause by discreet, vigorous action (cf. Deut. 33:22; Judg. 18).

4. Magical or supernatural occurrence. The turning of a rod or staff temporarily into a serpent occurs only in connection with Israel's departure from Egypt (Moses in Exod. 4:3; 7:15; Aaron in 7:9-10; the Egyptian magicians in 7:12).

5. In mythology. The familiar mythology of the ancient Near East, with its primeval struggle between two opposing powers, has numerous echoes in the OT, where, of course, the contest is between Yahweh and his antagonist. One of the terms for the latter is the "fleeing serpent" (Job 26:13; cf. Pss. 74:13-14; 89:9-10; etc.; Isa. 51:9); cf. the words of Mot in the Ugaritic text (I AB[i], lines 2-4):

If thou smite Lotan, the serpent slant,
Destroy the serpent tortuous,
Shalyat (*šlyt*) of the seven heads
(ANET 138).

See DRAGON; LEVIATHAN; RAHAB.

While the unique narrative of man's expulsion from Eden (Gen. 3) reflects Israel's basic theism, some of its details and undertones suggest connections with the mythology of Western Asia; the Sumerian tale of Enki and Ninhursag, the Adapa story, the Gilgamesh Epic, all offer at various points parallels to the biblical tradition. In the Gilgamesh Epic, e.g., in Tablet XI, Utnapishtim and his wife have the prospect of being like the gods (lines 193-96); there exists a life-giving plant (lines 266-70); a snake snatches this plant from Gilgamesh (lines 285-89).

In Gen. 3 the serpent is not only one of the Lord God's creatures, but it is also one of the craftiest (vs. 1) and best informed (vss. 4-5). For some unstated reason (a major theological problem is here evaded), the serpent opposes the Creator's purposes (cf. II Cor. 11:3), and the results (Gen. 3:14-19) are disastrous for all concerned, including the serpent. It is implied in vs. 14 that theretofore the serpent had not moved on its belly, though how it did get about is not indicated. In Enoch 69:6 (which R. H. Charles thinks is pre-Maccabean, but which C. C. Torrey places in the first century B.C.), an angel, Gadreel, is said to have led Eve astray; Wisd. Sol. 2:24 reads: "Through the devil's envy death entered the world," which some interpret as marking the identification of the serpent with the devil. Philo takes the serpent to be a symbol of passion and sensual pleasure (*Questions and Answers on Genesis* I.31). See EDEN, GARDEN OF; PARADISE.

6. Cultic significance. It is abundantly clear from a wide range of evidence that the snake was a sym-

bol of deity and of fertility powers in the ancient Near East. In Egypt, where the veneration of serpents in one form or another was common (some serpents being good, and others harmful), the ancient serpent-goddess of Lower Egypt was the beneficent Buto or Wazit. In the form of a uraeus or cobra she became the symbol of royalty, and she was later attached to the royal crown as protectress of the king. On the other hand, the most important of all Egyptian demons (or evil gods) was Apophis, the supreme opponent of Re, and he also was represented by a serpent.

In Mesopotamia, too, the snake served as a religious symbol (for a group of such symbols, see *bibliography*). It was, e.g., associated with the god Ningizzida, a minor deity. See *bibliography*.

In late Canaanite and early Hebrew Palestine, evidence of the worship of a serpent-goddess has been uncovered at Beth-shan, Beth-shemesh, Gezer, Hazor, Shechem, and Tell Beit Mirsim. See *bibliography*.

In the account of Hezekiah's reforms in II Kings 18:4, we are told that "he broke in pieces the bronze serpent that Moses had made" (cf. Num. 21:8-9, where it is called a "fiery serpent"; John 3:14). Whatever the origin of this brazen object, in the eighth century it was looked upon by the prophetic party as idolatrous, and it was destroyed. That it should ever have been made by Moses is doubtful. It is more probable that this serpent was of Canaanite origin, representing a fertility deity recognized in Jerusalem long before David's time, and whose veneration continued under the Hebrew regime down to the reign of Hezekiah. See *bibliography*. See also NEHUSHTAN; SERPENT, BRONZE; SERPENT'S STONE.

7. In eschatology. As early as Isa. 27:1 a mythological motif is used for an eschatological purpose: in this passage "Leviathan the fleeing serpent" stands for the Lord's enemies, who "in that day" will be overthrown. It is not clear whether these enemies are terrestrial, celestial, or cosmic. See *bibliography*.

It remains for the Christian author of Revelation to identify "that ancient serpent" with the Devil or Satan (Rev. 12:9-15; 20:2). Thus the serpents of the primeval cosmic struggle, of the Garden of Eden, and of the ancient fertility cult are united with all that the Jewish SATAN had come to stand for, though this composite creature's ultimate end is to be cast forever into the lake of fire and brimstone (20:10; cf. Matt. 25:41).

Bibliography. For snakes as religious symbols, see: G. Contenau, *Everyday Life in Babylon and Assyria* (1954), plate XXIII. On the god Ningizzida in particular, see E. D. Van Buren, "The God Ningizzida," *Iraq*, I (1934), 89. In *Symbols of the Gods in Mesopotamian Art* (1945), p. 40, Van Buren says of the device of two serpents twisted together: "All the evidence tends to prove that the motive was a symbol, not of any particular divinity, but of the blessings of fertility ensured by the union of male and female."

On archaeological evidence of the worship of serpents, see: W. C. Graham and H. G. May, *Culture and Conscience* (1936), pp. 81-90. J. Finegan, *Light from the Ancient Past* (1946), pp. 139-46; Y. Yadin, "Further Light on Biblical Hazor," *BA*, XX (May, 1957), 43-44.

On the bronze serpent of II Kings 18:4, see: H. H. Rowley, "Zadok and Nehushtan," *JBL* (June, 1939), pp. 113-41.

For a possible astronomical meaning of Isa. 27:1, involving

the constellations Serpens, Draco, and Hydra, see: J. Skinner, *Isaiah I*, Cambridge Bible (1915), 212.

W. S. McCULLOUGH

SERPENT, BRONZE. The bronze figure of a snake made by Moses and erected by him in the wilderness (Num. 21:8-9). While in the wilderness on the way from Mount Hor, many of the wanderers were bitten by fiery serpents (vss. 4-7; see FIERY SERPENT). The ones who had been bitten were urged to look to the bronze serpent, that their wounds might be healed. A number of problems emerge from the story.

The KJV regularly speaks of brass, but brass is a carefully compounded alloy of copper and zinc, a combination not known to the ancients. The KJV is therefore incorrect in the use of the term "brass." Bronze is a common mixture of copper and tin, which are frequently found in proximity to each other.

The story comes from one of the early sources, probably E, in which the use of magic and magical cures are prominent, but the story is used by the later compiler to emphasize the importance of faith in God.

The snake was a well-known reptile of the wilderness, and was, in fact, worshiped by many of the neighbors of the Hebrews, and, indeed, later by at least one Christian sect, the Ophites (see NEHUSH-TAN). The snake represented evil and destruction, but also healing and creativity. The symbol of the healing snake is still preserved in the physician's caduceus, which shows the snake entwined about the wand of Mercury.

The fact that the Hebrews continued to worship or venerate the symbol (see II Kings 18:4) indicates that the image had, or came to have, more than temporary healing properties. The biblical record is careful to emphasize that healing came from God, not from the bronze snake. The Fourth Gospel quotes Jesus as paralleling his own forthcoming experience with this incident in the wilderness (John 3:14). The Synoptics make no mention of this.

W. G. WILLIAMS

SERPENT'S STONE [אבן הזוחלת, stone of the creeping one]; KJV STONE OF ZOHELETH zō'ā lēth. A rock or stone near EN-ROGEL, by which Adonijah sacrificed victims in view of his clandestine coronation (I Kings 1:9). The name may either represent an indifferent toponym or suggest that the ground where the stone stood was consecrated to a divinity having the serpent as emblem. The figure of the serpent is found repeatedly on religious monuments or utensils in ancient Palestine (see SERPENT § 5). An alternate explanation of the name זחלה by means of a dialectal Arabic form *zahueileh*, "slippery scarp of rock," is most questionable.

G. A. BARROIS

SERUG sîr'ūg [שרוג; LXX and NT Σερουξ; for traditional etymologies, see Jub. XI.1-2, 6]; KJV NT SARUCH sâr'āk. Son of Reu, of the line of Shem. Serug became father of Nahor at age thirty and then lived two hundred years longer and had other sons

and daughters (Gen. 11:20-23; I Chr. 1:26; Luke 3:35). The name is identified with that of the Akkadian city and district Sarugi, situated W of Haran.

L. HICKS

SERVANT. A person of either sex who is in the service of a master. He is under obligation to obey, to work for the benefit of his master. He usually receives some protection in return. There are both voluntary and involuntary servants. There are native and foreign-born slaves, but the two are not to be equated with the previous grouping. The terminology of the Bible does not consistently distinguish "servant" from "slave" or "bondmaid." See SLAVERY.

The word נָעָר refers to a boy and so an attendant (Num. 22:22). Joshua is Moses' helper (Exod. 33:11). Elisha has an attendant who is probably a voluntary follower (II Kings 4:12). The term מְשָׁרֵת is also used for both Joshua and the servant of Elisha. The נְעָרִים may be followers of a leader (Gen. 14:24; I Sam. 25:5; II Kings 19:6; etc.). The feminine form of this word, "maiden," is also used (see MAID; Gen. 24:16; Ruth 2:5; Esth. 2:9; etc.).

The term מְשָׁרֵת perhaps most closely approximates our concept of a free servant who ministers to another. The Levites are ministers of the Lord (Ezra 8:17; Isa. 61:6; Ezek. 44:11). So are the priests (Exod. 28:35; Joel 1:9; 2:17; cf. false priests in Ezek. 20:32). Officers are ministers of the king (I Chr. 27:1; Prov. 29:2). Angels also minister before the Lord (Ps. 103:21; 104:4).

The שָׂכִיר is the hired servant, or HIRELING (Exod. 12:45; Job 7:1; Mal. 3:5; etc.). Unlike the slave, the hired servant could refuse to perform a task.

The Aramaic פִּלְחָא in Ezra 7:24 is for the servant of God only, the priest who reveres God (Akkadian *palāhu*, "revere").

In the KJV the most frequent use of "servant" is for עָבֵד, but this is more properly "slave" (Gen. 9:25; Exod. 21:2; Deut. 5:15; etc.). The sense is neither complete nor correct when the word is translated "servant." See SERVANT OF THE LORD.

The Greek word παῖς is primarily "child" and so related to the Hebrew נָעָר. By extension and use in the LXX it has the meaning of "worshiper" and "slave" (Acts 4:27, 30). Thus in Matt. 8:6, 8-9, 13, this word is used interchangeably with δούλος. He is a king's attendant (Matt. 14:2) as well as a worshiper of God (Luke 1:54, 69).

Διάκονος is one who obeys and serves another. He is the king's servant or minister (Matt. 20:26; 22:13; 23:11; Mark 9:35; etc.). The magistrates and the teachers as well as all the followers of Christ are such ministers (Rom. 13:4; II Cor. 6:4; Col. 1:7; etc.). See DEACON.

In the LXX, θεράπων is used for the Hebrew עָבֵד. Moses is such a servant of God (Exod. 14:31; Num. 12:7; cf. Heb. 3:5). The verb is frequently used of restoring someone to health (Matt. 12:10, etc.).

A domestic servant having a close relationship to the master's family is designated by the Greek word οἰκέτης. He probably lived with the family but need not be a slave, although this word also is used in the LXX for slave. It is obvious that such a servant, who lives in, cannot have two masters (Luke 16:13; cf. I Pet. 2:18). Cornelius had such servants (Acts 10:7).

This servant is accountable only to his own master (Rom. 14:4).

The ὑπηρέτης is the "under rower," hence an attendant servant or minister. The word is used of magistrates, executioners, and officers of king and Sanhedrin. It is almost a synonym for "deacon."

The hired servant similar to שָׂכִיר is in Greek μίσθιος, μισθατός (Luke 10:7; LXX for שָׂכִיר). He worked for daily wages (Luke 15:17 ff). The sons of Zebedee had such servants in their fishing business (Mark 1:20). The parable of the wolf and the hireling has made this word a classic (John 10:12 ff).

In the LXX and the NT, δουλός is the direct equivalent of עֶבֶר. It really means "slave." He is completely in the service of another and has no freedom save to obey. It is unnecessary to indicate the frequency with which this concept is used in the Bible. The fellow slave or associate is rendered by the term σύνδουλός (Col. 1:7; Rev. 6:11; etc.).

In the OT covenant servants were to be protected (Lev. 25:42-55; Deut. 5:15; 15:15; etc.). There are no regulations about the hired servant in the Book of the Covenant (Exod. 21-23). The law tried to discourage voluntary servitude on the part of Hebrews. The distinction between the limited type of service and complete slavery is not clear, except that the duration of voluntary bondage is limited (Exod. 21:2; Lev. 25:39).

A servant could be trusted to seek out a wife for one's son (Gen. 24). Female servants or maids could become concubines and bear children for the master (ch. 16). They could also inherit property (15:2; cf. Nuzi). They could marry into the family (I Chr. 2:35). The hired servant was to be paid at the end of each day's work (Deut. 24:15; cf. Luke 15:17, 19).

The image of the servant of God as a worshiper (Lev. 25:55; Num. 12:7; Ps. 105:42; Jas. 1:1; etc.) is best understood in relation to עֶבֶר the "slave" of God; and to עֲבֹדָה, "slavery," or "divine service." So also is the Suffering Servant of Isaiah. C. U. WOLF

SERVANT OF THE LORD, THE [עֶבֶר יְהוָה]. A title given to the figure whose call and mission, sufferings, death, and exaltation are depicted in Isa. 53 and related passages; sometimes called the "Suffering Servant." The expression "servant of Yahweh" is not actually used, but Yahweh calls him "my servant" (42:1; 49:3, 6; 52:13; 53:11), and he speaks of himself as "his [Yahweh's] servant" (49:5).

- Bibliography

1. The title "servant(s) of Yahweh." The word "servant" (עֶבֶר) properly means a slave (cf. NT Greek δούλος), but a slave need not have been contemptible to his master. We may compare the modern connotation of "knight," which in Old English denoted a menial (cf. German *Knecht*). Any servant of Yahweh was a privileged person. In general the word עֶבֶר expressed the relationship of the weaker to the stronger party in a covenant (בְּרִית); the servant

was entitled to look to his lord for protection and—what is implied in the word חַסָּד, the emotional bond which united the two parties to a covenant—"steadfast love" (e.g., Ps. 103:4; KJV usually "loving kindness" or "mercy").

The worshippers or devotees of any god were his "servants." (It is probable that the distinction between the 'ōbhēdhē, "worshippers of" Baal, and the 'abhdē, "servants of" Yahweh, in II Kings 10:23 is artificial and that the original was "servants of Baal"; so LXX and some Hebrew MSS.) In any case, individual Israelites were the "servants" and collective Israel the "servant" of Yahweh (Ps. 136:22; and note the association with "steadfast love").

Various classes of people, as well as individuals, are called "servant(s) of Yahweh." Prominent among the former are the prophets (II Kings 9:7; Ezra 9:11; Amos 3:7; seventeen times in all), and specifically Ahijah (I Kings 14:18), Elijah (II Kings 9:36), Jonah (II Kings 14:25), and Isaiah (Isa. 20:3). Others distinguished by the title are the patriarchs (Abraham [Gen. 26:24], Isaac [Gen. 24:14], Jacob [Ezek. 28:25]), Moses (Exod. 14:31; some thirty-six times), Joshua (Judg. 2:8), Caleb (Num. 14:24), Job (Job 1:8); and of kings, David (II Sam. 3:18; about thirty times), Hezekiah (II Chr. 32:16), and Zerubbabel (Hag. 2:23; cf. Zech. 3:8; 6:12, where the messianic צֶמַח, or "Branch," refers to Zerubbabel). Even Nebuchadrezzar, king of Babylon, is called "my servant" in Jer. 25:9; 27:6; 43:10.

2. The Servant Songs. It is usual to denote certain passages in Deutero-Isaiah as the "Servant Songs." They are 42:1-4[9]; 49:1-6[13]; 50:4-9[11]; 52:13-53:12. (The figures in brackets indicate the extreme limits of the Songs; most scholars limit them to the unbracketed figures.) This is not to say that the Songs are from a different author: the majority opinion today is that they were composed by Deutero-Isaiah himself, though they may be later than the rest of his work. The first three are very similar in vocabulary to Deutero-Isaiah; the fourth is *sui generis* but more similar to Deutero-Isaiah's work than to that of any other writer. Isa. 42:5-9; 49:7-13; 50:10-11 may have been composed, or adapted, to relate the original Songs to their following contexts.

a) 42:1-4: Yahweh introduces his Servant as his chosen one, endowed with his spirit to bring forth "justice" (KJV "judgment") to the nations. (The Hebrew מִשְׁפָּט appears here to mean something like "true religion.") He will work quietly and unobtrusively, and will not fail or be discouraged until he has established מִשְׁפָּט in the earth.

b) 49:1-6: The Servant announces himself to the distant peoples as called by Yahweh from birth and kept in readiness for his mission. He is "Israel," in whom Yahweh will be glorified. So far he has labored in vain, but he is confident that his recompense is with his God. Now, he continues, Yahweh has assured him that it is not enough that he should be his servant to restore Israel; he is to be a light to the nations, that Yahweh's salvation may reach to the end of the earth.

c) 50:4-9: This passage does not contain the word "servant" (though cf. vs. 10), but it seems necessary to include it in the servant cycle as a middle term between the second song and the last. The speaker

is the Servant. He describes how Yahweh wakens him morning by morning to hear as disciples hear. He has not turned back from his task, even though he has had to suffer violence and ignominy. But he is confident in the nearness of his divine vindicator; none shall be able to secure a verdict of guilty against him.

d) 52:13-53:12: This passage begins (52:13-15) and ends (53:11-12) with words of Yahweh. The "we" of 53:1-10 must be either Israelites or the Gentile nations, probably the latter. After Yahweh has announced the coming exaltation of his Servant, the "we" exclaim that the unbelievable has come to pass. The Servant had been disfigured and despised, and they supposed him stricken by God. They see now that it was for their sins, not his own, that the Servant died and was laid in a felon's grave. The resurrection of the Servant is more hinted at than described, but in the closing scene Yahweh recurs to the theme of the beginning: the "many" who were appalled at the Servant, the "many" whose sins he bore, will be apportioned to him as his "spoils." The meaning is in places obscure; this may be due in part to textual corruption.

3. **The problem.** It is not surprising (see § 1 above) that many answers to the question, Who was the Servant? have been proposed. The Servant could be Israel, or he could be an individual. If he is an individual, is he king or prophet? Again, if king or prophet, is he a historical individual, or someone still to come?

In the wider context, Israel is called "my servant" (41:8 ff), and in 49:3 the Servant is called "Israel." But since in the following context the Servant has a mission to Israel, he may be an individual or group in whom, so to speak, Israel is incorporated, as the king might be said to embody his people.

4. **History of interpretation.** The servant passages were understood by NT writers as prophesying Christ, and the general opinion is that Jesus regarded himself as their fulfilment. It is true that he nowhere quotes directly from the passages which modern scholars delimit as the Servant Songs, though he did say of Isa. 61:1-2a, which is so similar in spirit to the Songs that some scholars have included it in the song cycle: "Today this scripture has been fulfilled in your hearing" (Luke 4:21). It is clear that Jesus thought of his sufferings as having been "written of him" (Matt. 26:24, 54, 56; Mark 9:12; Luke 18:31; 24:25-27, 46), and it would be hypercritical not to include Isa. 53 and the related passages among "the scriptures" to which he referred. The "many" of Mark 10:45 is strongly reminiscent of the fourfold "many" in Isa. 52:14-15; 53:11-12. At the beginning of the Christian era there were also Jews who thought the Servant was the messiah, but since they found difficulty in conceiving of a suffering messiah, this interpretation was always qualified—e.g., in Targ. Isaiah the exaltation of the Servant is applied to the messiah, but his sufferings fall in part upon Israel, in part upon the Gentiles. Later, as Christians pressed the messianic interpretation, most Jews adopted the collective theory, that the Servant was Israel.

Few Christians dissented from the messianic interpretation until the end of the eighteenth century,

when the Jewish view began to gain increasing currency. The full collective theory presents serious difficulties, since the character of the Servant in the Songs is different from that of Israel elsewhere in Deutero-Isaiah. Reaction from it began at the end of the nineteenth century; since then numerous "historical individual" theories have been put forward. Of kings, Hezekiah, Uzziah, Jehoiachin, Zerubbabel, and even Cyrus have been suggested; of prophets, Isaiah, Jeremiah, and even Deutero-Isaiah himself (the "autobiographical" theory). Moses was both ruler and prophet, but it is as the former that he has been named. Others have seen in the Servant an unknown contemporary of Deutero-Isaiah.

None of the historical individual theories has any wide following today. The Servant is not a direct portrait from life. The most attractive form of the collective theory is that associated with the concept of "corporate personality," according to which Israelite thought could pass easily from nation to individual and vice versa. "Israel" could have a mission to Israel, and the real mission of the Servant could even be concentrated in a single person, the prophet himself. One current form of the messianic interpretation is that which would see in the Servant the future messiah depicted in the role of the pre-exilic king, who, there is some reason to believe, annually "suffered" certain ritual penalties as the representative and embodiment of the people he ruled. In general, it may be said that the disjunctives collective *or* individual, prophet *or* king, are no longer so vigorously pressed as formerly. The Servant is too complex a figure to be fitted into any single category.

5. **Who was the Servant?** Assuming that the Songs are from Deutero-Isaiah, or, what is otherwise reasonably certain, from an intimate member of his circle; since, in Deutero-Isaiah, Israel is called Yahweh's servant, we must start from the equation the Servant = Israel. But since (except in 49:3-5, where "Israel" has a mission to Israel) the Servant of the Songs is anonymous, and since the anonymity of the Servant is accompanied by a progressively heightened individualization in the portrait of him, it is probable that the prophet looked for the coming of one who would more perfectly embody the ideal of what Yahweh's servant should be. (He is quite outspoken about the imperfections of Israel, and there is also every reason to believe that his expectations of Cyrus were only partially realized.) It is true that the Servant's sufferings are in the past (Isa. 53:1-10a), but the past is from the standpoint of speakers who are living in the future (52:13-15). This return to what is substantially the traditional Christian interpretation has met with increasing support in recent years. The Servant bears more the features of a prophet than those of a king, but much in the portrait could apply to both prophet and king, and he manifests exactly those qualities which accorded with messiahship as Jesus understood it. In this sense he is a messianic figure, although we should not attempt to apply every detail in the description of him.

6. **Religious significance of the Servant.** More important even than who the Servant was is the question, What was the Servant to do? Suffering is the great purifier, when it is accepted without bitterness. A prophet may encounter suffering in the

course of his work; so Hosea and Jeremiah. The uniqueness of the Servant lies in this: he not only encountered and accepted suffering in the course of his work; in the final phase suffering became the means whereby he accomplished his work, and was effective in the salvation of others. He made himself an "offering for sin" (צָבַח; 53:10). This is vicarious suffering, but it is not crude substitution. What happens is that the "we" are moved to repentance, confession, and amendment: "Upon him was the chastisement that made us whole, and by means of his stripes there is healing for us" (53:5 orig. tr.). The Servant accomplishes this, not only for Israel, but also for "many nations," the Gentiles. There remained nothing more to be said about the vocation of suffering until Christ came and "served himself heir" to this, the sublimest utterance of prophecy. On all hands it is agreed that whoever was the original of the Servant, none except Christ was its fulfillment.

Bibliography. The literature on the subject is enormous, Of the Commentaries listed under ISAIAH, those by Duhm, Levy, Skinner, and Volz are important. Of articles and monographs the following are only a selection: S. R. Driver and A. Neubauer, *The Fifty-third Chapter of Isaiah According to the Jewish Interpreters*, vol. II (1877). K. Budde, "The So-called 'Ebed-Jahweh-Songs' and the Meaning of the Term 'Servant of Yahweh' in Isaiah Chaps. 40-55," *AJT* (1899), pp. 499-540. E. SESI. KJV Apoc. form of SHASHAI.

SESTHEL sēs'thēl. In I Esd. 9:31 for BEZALEL 2.

SETH sēth [שֵׁט, see below; Σηθ]; KJV SHETH shēth in I Chr. 1:1. In the Yahwistic genealogy, the third son of Adam and Eve (Gen. 4:25). However, the Priestly genealogy, not mentioning Cain or Abel, allows the inference that Seth was Adam's first son (5:3-8; supported by I Chr. 1:1; Ecclus. 49:16-17; Luke 3:38; see PENTATEUCH § A3, 5). The latter source furnishes the few statistics of Seth's life. Since both genealogies have Seth, Enosh, and Noah in common and exhibit other parallels, they may represent two versions of an earlier traditional list. But in the present

J narrative Seth appears as God's gracious gift to Eve as restitution for slain Abel.

Eve named him "Seth" (shēth), saying: "God has appointed [shāth] for me another child instead of Abel" (Gen. 4:25). Etymologically this explanation is inadequate, raising also grammatical questions, and may originally have rested merely on assonance (cf. 4:1b). The correct etymology is uncertain, though it may possibly be connected with the nomadic, Aramean *Suti*. But the theological importance for the Yahwist of the traditional etymology ensured its continuance. L. HICKS

SETHUR sē'thər [שֵׁתוּר, concealed (by the deity)] (Num. 13:13). A member of the tribe of Asher sent to spy out the land of Canaan; son of Michael.

SEVEN, SEVENTH, SEVENTY. The number seven was sacred among the various Semitic peoples, as well as among many other peoples.

Among the Egyptians, seven gradually succeeded four as the favorite holy number. The deceased was met in the nether world by seven cows and one bull, and seven gods and seven serpents gave him audience. Isis was accompanied to the Delta by seven scorpions. The newborn's fate was told by seven Hathors. In magic and medicine seven was a potent number. Seven gods are invoked in incantation. Holy oils and ointments were seven. Seven was the correct dosage of pills, and seven stones were used in certain cures. Multiples of seven—fourteen, twenty-one, forty-two, seventy, seventy-seven—were also important.

In Mesopotamia seven was holy from earliest times, but the origin of its sacred character is problematic. It has been assumed generally that the observation of the moon's phases led to the hebdomadal division of the month. The lunar month, however, never has a whole number of days, so that the month and the seven-day week are actually incompatible systems of reckoning. The oldest reference to seven-day periods in cuneiform dates from the twenty-third century B.C. and has reference to seven-day religious festivals and observances and not to the division of the month. It appears that in Mesopotamia the seven-day week had its origin in the cult and was independent of the lunar month, which was the basis of time-reckoning in civil life. It has been suggested that the seven-day week had its beginning in the heptads of Sumeru-Akkadian theology and cosmology. The seven planets were doubtless a factor in the sanctity of the number. The matter is too involved to be discussed here, and it must suffice simply to note the important role of seven in Mesopotamian religion.

Seven plays such an important role in the OT that only the chief features of its use can be noted here. Its symbolic use is so extensive that it is difficult to tell when it is intended merely as an ordinary specific number. As in Mesopotamia, seven days was the period for certain important festivals and cult procedures. Passover and Tabernacles are seven-day festivals. The New Year, the Day of Atonement, and Tabernacles all occur in the seventh month. The

Feast of Weeks (Deut. 16:9) and the Jubilee (Lev. 25:8-10) were based on the square of seven. Seven pervades every aspect of the cult. Seven days is the period for ordination of priests and consecration of altars (Exod. 29:35-37). The victims for sacrifice are often seven (Gen. 7:2; 8:20; 21:28-30; Num. 28:11; I Chr. 15:26; Job 42:8); the number of altars seven (Num. 23:1-2, 4, 14, 29; II Chr. 29:21). The sacrificial blood is sprinkled seven times (Lev. 4:6, 17; 14:7; 16:14; Num. 19:4), and so too the anointing oil (Lev. 8:11).

The furnishings and decorations of the temple were often in sevens (I Kings 7:17 [if the MT is retained]; Ezek. 40:22, 26; cf. Prov. 9:1). The seven-branched candlestick (Exod. 25:31-37; I Kings 7:49; Zech. 4:2, 11), except for the ark of the covenant, was the most sacred object in the temple. The OATH is connected with seven, and seven human victims atone for a broken covenant (II Sam. 21:6, 9). The seven locks of Samson's hair (Judg. 16:13, 19) were probably connected with the Nazirite vow. Seven was also a factor in vengeance and punishment (Gen. 4:24; Exod. 7:25; Lev. 26:18; Prov. 6:31; Dan. 4:16, 23, 25). Seven had special importance in connection with angels (Ezek. 9:2; Zech. 4:10b; Rev. 15:1, 6-8; see ANGEL). Evil spirits and infirmities also came in heptads (Luke 8:2; 11:26). Seven was effective in magic, as seen in Joshua's reduction of Jericho by means of a potent combination of sevens (Josh. 6:4, 8, 13) and Naaman's cure by seven baths in the Jordan (II Kings 5:10). Seven rawhide bowstrings, however, were not enough to hold Samson (Judg. 16:7). The sneezes of the resuscitated child (II Kings 4:35) were a good omen, whether the exact number seven was important or not. The ideal number of sons was apparently seven (Ruth 4:15; Job 1:2; II Macc. 7; Acts 19:14). Seven-day and seven-year periods are mentioned in numerous miscellaneous connections. Famine and plenty come in seven-year cycles (Gen. 41; II Kings 8:1). The common period for waiting is seven days (Gen. 7:3-4, 10; 8:10, 12; I Sam. 10:8; 11:3; Ezek. 3:16-17). Wedding festivals were celebrated for seven days (Judg. 14:12, 17; Tob. 11:19). Serious ritual defilements lasted seven days (Lev. 15:19, 28; Num. 19:11, 14, 16). In Deut. 7:1, seven is used as synonymous with "many," and in a number of cases it appears to be a round figure for a moderately large number (Gen. 31:23; Job 1:2; Ps. 12:6; Prov. 26:16, 25; Isa. 4:1; 11:15; 30:26; Jer. 15:9; Matt. 12:45; Luke 11:26; Acts 20:6; 21:4; 28:14). Jacob's seven prostrations before Esau may not be intended as an exact figure (Gen. 33:3). In the Amarna Letters and in an Ugaritic letter suppliants speak of prostrating themselves seven times and seven times. The "seven ways" in which Israel's enemies will flee (Deut. 28:7, 25) perhaps harks back to the ancient Sumerian seven-direction system, which was superseded by the four-direction system.

Seven-year periods of tribulation are interrupted in the middle by divine intervention (Dan. 7:25; 9:27; 12:7; Luke 4:25; Jas. 5:17; Rev. 11:2). Multiples of seven are common. Seven is doubled for good measure (Gen. 46:22; Lev. 12:5; Num. 29:13; I Kings 8:65; Tob. 8:19). The neat division of time between Abraham and Christ into three periods of fourteen generations (Matt. 1:17) is clearly artificial. Seventy

is often an approximate figure (Gen. 46:27; Exod. 1:5; 15:27; 24:1, 9; Num. 11:16, 24; II Sam. 24:15; II Kings 10:1; Ps. 90:10; Isa. 23:15; Jer. 25:11; 29:10; Ezek. 8:11; Dan. 9:2, 24; Zech. 1:12; 7:5; Luke 10:1). The Egyptians mourned Israel for seventy days (Gen. 50:3). The funerary offerings for Baal in Ugaritic myth were a series of seventy animals. The gods of Ugarit are collectively designated as the "seventy children of Asherah." The seventy-sevenfold vengeance of Lamech (Gen. 4:24) and the forgiveness seventy times seven which Jesus enjoined (Matt. 18:22) are intended figuratively for a practically unlimited number. The seven thousand who never bowed knee to Baal (I Kings 19:18; Rom. 11:4) represent only a fraction of the number of apostates. In Rev. 11:13 the figure is explicitly designated as a tithe. In the Moabite Stone it comprises the total Israelite population of Nebo who were sacrificed to Meshah's god.

Besides the numerous explicit heptads in the OT and the NT, there also are many latent cases where one may count seven items—e.g., the seven characteristics of the Lord's spirit in man (Isa. 11:2); the seven petitions of Solomon's prayer (I Kings 8:29-53) and of the Lord's Prayer (Matt. 6:9-13); the seven parables of Matt. 13; the seven woes of Matt. 23; the seven utterances of Christ on the cross; a postresurrection appearance to seven disciples (John 21:2); seven afflictions (Rom. 8:35) and seven gifts (Rom. 12:6-8); seven qualities of heavenly wisdom (Jas. 3:17); seven virtues that supplement faith (II Pet. 1:5-8). The book of Revelation is especially rich both in explicit heptads (Rev. 1:4, 20; 3:1; 4:5; 5:1-6; 8:2; 10:3-4; 12:3; 13:1; 15:1; 17:7) and in latent ones (5:12; 6:15; 7:12; 19:18; 21:8).

It is hard to say what the numerous symbolic uses of seven in the Bible have in common. Perhaps the simplest and most comprehensive generalization that can be made is that seven denotes completeness, perfection, consummation.

M. H. POPE

SEVEN, THE. A name given in Acts 21:8 to the group ordained by the Twelve (see TWELVE, THE) to assist them in "serving tables" and distributing charitable offerings to the widows of the HELLENISTS (cf. 6:1-6). The narrative of their selection and ordination has commonly been taken, mistakenly perhaps, as the institution of the order of deacons. See DEACON.

The Seven all bore Greek names, and one of them was a proselyte from heathenism. It may be assumed that they were themselves Hellenists—i.e., Jews whose native tongue was Greek, and who tended to adapt themselves to Greek habits and ways of life. Their special appointment came about as a result of the difficulty of orthodox Jews, even though Christian believers, in sharing a common table with those of lax standards regarding the Jewish law. The charges of heterodoxy respecting the temple and the law, leveled against Stephen by Pharisaic rigorists, would seem to bear out this interpretation.

Acts tells us only about the activities of Stephen and Philip, whom it represents as preachers and evangelists (see EVANGELIST), rather than as agents of charity (cf. 21:8). Little more is known of these men. Philip and his daughters finally settled in Hierapolis in Asia Minor (Euseb. Hist. III.31.3-4; V.24.2). Clement of Alexandria (Misc. III.4.25-26) knew a story about the proselyte Nicolas and his jealousy over his beautiful wife; but Clement was kind enough to spare him the charge made by other church fathers of being the founder of the sect of Nicolaitans, first mentioned in Rev. 2:6, 15. Byzantine tradition made PROCHORUS the amanuensis of the Fourth Evangelist.

The number seven was probably symbolic, like the number twelve, and may have been associated in the mind of the Third Evangelist with his peculiar account of the sending forth of the Seventy (Luke 10:1 ff), which is parallel to the sending forth of the Twelve (Luke 9:1 ff). As the latter represents the twelve tribes of Israel, so seventy may represent the Hebrew numbering of the nations of the earth (cf. Gen. 10:32). If this be the case, there is greater plausibility to the view of certain critics that the Hellenists were not Jews at all, but Gentiles (cf. the variant "Hellenists" for "Hellenes" in some MSS of Acts 11:20).

M. H. SHEPHERD, JR.

SEVEN CHURCHES [οἱ ἑπτὰ ἐκκλησίαι]. "Seven churches" in cities of the Roman province of Asia are mentioned collectively in Rev. 1:4, 11, 20, and separately in chs. 2-3 as the recipients of the scroll of Revelation (cf. also 22:16). The theory is widely held that just these cities were selected for mention because they were the heads of postal and judicial districts; accordingly, they would be salient points of influence for the distribution of the book in the province. Another—and complementary—suggestion would be that the order of their mention in 1:11 is intended to suggest the lamps (λυχνία; cf. vs. 20) of the seven-branched LAMPSTAND (מְנוֹרָה; LXX λυχνία) of the tabernacle (Exod. 25:31 ff).

Bibliography. In addition to the Commentaries listed in the bibliography under REVELATION, BOOK OF, see: W. Ramsay, *Letters to the Seven Churches* (1904), p. 191; J. W. Bowman, *The Drama of the Book of Revelation* (1955), p. 23.

J. W. BOWMAN

SEVEN WORDS FROM THE CROSS; SEVEN LAST WORDS. The sayings attributed to Jesus, by the canonical evangelists, during the hours of his CRUCIFIXION. The number seven is accidental, for only one of the sayings appears in as many as two gospels, and no gospel gives more than three. The traditional order, which depends on harmonizing at least three varying accounts (Matthew-Mark, Luke, John), is as follows:

a) "Father, forgive them; for they know not what they do" (Luke 23:34). This is absent from many of the best MSS. If authentic, it was apparently spoken early during the Crucifixion—perhaps, as often pictured, while Jesus was prone on the ground, his hands being nailed to the crosspiece. Cf. the words of Stephen (Acts 7:60).

b) "Truly, I say to you, today you will be with me in Paradise" (Luke 23:43). This was spoken to

that one of the two felons, crucified with him, who had said: "Remember me when you come in your kingly power." The other felon had joined in the derision of Jesus, and Matthew and Mark say that both had done so. Even in Luke, the thief's words may have been derisive, being transformed by Jesus' reply. The name Dismas, traditionally given the repentant criminal, has no sufficient historical warrant.

Some would punctuate: "I say to you today, you will be with me"—i.e., at some future time—on the ground that Jesus nowhere else taught the immortality of the soul apart from the body. The change, however, strains the Greek.

c) "Woman, behold your son! . . . Behold your mother!" (John 19:26-27). This was spoken to Jesus' mother and to the "disciple whom Jesus loved." Mary is never named in the Fourth Gospel. The identity of the Beloved Disciple is obscure (see JOHN, GOSPEL OF). Here, he takes Jesus' mother to his own home. Yet at Acts 1:14 she is apparently lodging with the whole group of Jesus' followers at Jerusalem.

d) "My God, my God, why hast thou forsaken me?" (Matt. 27:46; Mark 15:34), a quotation of Ps. 22:1. Several lines of this psalm recall the crucifixion story (see vs. 7-8, 15, 18), and the whole describes the agony of a man innocent of sin. It would naturally be in Jesus' mind as he was dying. This in no way lessens the desolation of his words.

e) "I thirst" (John 19:28). In response to the cry, a sponge full of vinegar was held to Jesus' mouth, and he apparently accepted it. This may conflict with Luke 22:18, where Jesus vows to drink nothing until the kingdom comes.

f) "It is finished" (John 19:30).

g) "Father, into thy hands I commit my spirit" (Luke 23:46). This prayer, based on Ps. 31:5, had long been used by Jews at evening. The whole of Ps. 31 expresses trust in God in the face of persecution and death.

PIERSON PARKER

SEWING. Sewing of garments must have been practiced from MB, to judge from the needles and awls found in Palestinian sites. Words which refer to sewing are:

a) שָׂפַל (Job 14:17), "cover over" (KJV "sew up").

b) תָּפַר (Gen. 3:7; Job 16:15; Eccl. 3:7; Ezek. 13:18), "sew." In light of the LXX ῥάπτω (συρράπτω), "to stitch together," it probably means to sew together a rent or two pieces of cloth, rather than to sew on a patch.

c) Ἐπι(ρ)ράπτω (Mark 2:21), "sew on" (with ἐπι), used of sewing on a patch.

J. M. MYERS

***SEX, SEXUAL BEHAVIOR.** Although there are many manifestations of sex in the Bible, there is no single word for it. Its importance is indicated, however, by the role it plays in the life of biblical people.

The centrality of religious faith in the Bible, as well as the prominence of sexuality in the pagan cults that competed with it, made inevitable the effort to work out a theology of sex. This theology has considerable biblical documentation. The long history covered by our sources provided for those inner and outer pressures upon biblical culture which resulted in certain changes in the patterns of sexual behavior that are noted in the Bible.

1. Place and role of sex in the Bible
 2. Meaning of "male" and "female"
 - a. Vocabulary
 - b. Summary of meanings
 3. The organs of sex
 - a. Male organs of generation
 - b. Female organs of generation
 - c. The sacredness of sex organs
 4. Sex taboos
 5. Regulation of sexual behavior by law
 6. Sex segregation and discrimination
 7. Sexual intercourse
 8. Sexual traits
 9. Theology and ethics of sex
 10. Changing patterns of sexual behavior
- Bibliography

1. Place and role of sex in the Bible. While the Bible is not concerned with sex as such, allusions to it may be found on many pages. These allusions are expressed with considerable candor and freedom, although, paradoxically, circumlocutions are sometimes used in order to avoid a direct reference to a sexual act or organ (*see below*). The importance of reproduction, and therefore of sexual intercourse, constitutes one reason for the biblical emphasis. Sons are needed in order to preserve the father's name and personality. Thus sex relations are important to the entire family or clan group, even as the birth of a child is hailed by the entire community (Ruth 4:14, 17). One finds no condemnation of sex in the sources, for it is viewed as fundamentally good in serving an essential social purpose which is at the same time deeply personal (*see MARRIAGE* § 5). The function of sex in preserving and perpetuating the family name motivates a vigorous biblical rejection of its abuse and perversions. *See BESTIALITY; SODOMITE; PROSTITUTION.*

Sex on the animal level was recognized as the means of providing increase in flocks and herds (Gen. 30:35, 39), on which the population depended for clothing, shelter, food, and offerings to their God.

A third reason for the prominence of sex in the Bible is to be found in the threat to the integrity of Israel's life which the ancient Near Eastern cult of sex continuously posed. Some biblical writers were intensely conscious of this threat and sharply attacked the premises and practices which were seducing the men of Israel. The language of this attack therefore contains many specific references to the widespread sexuality which was popularly viewed as divine and as the source of man's salvation. *See* § 10 *below*.

2. Meaning of "male" and "female." The word "sex" refers primarily to the physical differences between male and female, to the character of being male or female. The word is therefore the symbol of a distinction which is universal.

a. Vocabulary. An ancient poetic oracle records the belief, which may have been widely held, that the words for "man" and "woman" in the Hebrew language are closely related—the second comes from the first:

She shall be called Woman [אִשָּׁה],
because she was taken out of Man [אָדָם]
(Gen. 2:23).

Actually the words do not derive from the same root, although their origin is uncertain. The origin of אִשָּׁה, "woman" or "female," can only be conjectured. One theory bases it upon the Assyrian root *isanu*, "strong," but this is improbable. Another, which is more generally accepted, bases this word on the root אָנַשׁ (Assyrian *anašu*), "to be weak, sick"; or a root with the same spelling which means "to be inclined to, to be friendly, social" (Arabic *aniša*). A third root, the Arabic of which carries the meaning "soft, delicate," has the above Hebrew spelling. In favor of one of these possible roots is the plural form of אִשָּׁה, אִשָּׁוֹת, "women," and the collective word for "man" or "man-kind," אֲנָשִׁים.

While usually used to designate "man" in opposition to "woman," אִשָּׁה sometimes refers to the male of animals (Gen. 7:2). In its primary meaning its emphasis on the sexual distinction between man and woman can be seen in a number of passages (Gen. 19:8; 24:16; 38:25; Exod. 22:16; Lev. 15:16; 20:10-11; Num. 5:13-14; Deut. 22:22—H 22:15; etc.). Man is set over against women by the term אִשָּׁה also (Gen. 2:23-24; Lev. 20:27; Num. 5:6; Deut. 17:2-3; Josh. 6:21; 8:25; Jer. 40:7). Thus the word identifies a member of a class which is set over against another class on the basis of the possession of certain sexual characteristics and functions and which is distinguished as male or masculine.

Derived perhaps from אָנַשׁ, with the root meaning of "soft, delicate," the word for "woman" is אִשָּׁה. It may be translated "woman, female, wife." It too may designate female animals, as in Gen. 7:2-3. Elsewhere it appears to describe men who are feeble and timid (Jer. 50:37; 51:30). It particularly refers to woman in her sexual function of reproduction, as conceiving, bearing, and nursing children (Exod. 2:2; Lev. 12:2; Judg. 13:24; II Sam. 11:5; I Kings 3:18; Isa. 49:15; etc.). But the term may also indicate a harlot (Josh. 2:1; 6:22; Judg. 11:1; etc.; *see PROSTITUTION*) or a concubine (Judg. 19:1, 27), when the proper descriptive word is added to אִשָּׁה. Woman's status as belonging to a man is likewise expressed by this word. A man takes a woman to wife (Gen. 12:19; 16:3; 20:12; Num. 36:3; etc.). *See MARRIAGE.*

Also used in juxtaposition to distinguish the two sexes are the words זָכָר, "male," and נְקִיבָה, "female." The origin of the first of these is obscure. The word is set over against אִשָּׁה "woman," in the command against sodomy (Lev. 18:22; 20:13). It appears in contrast to נְקִיבָה several times (Gen. 6:19; 7:3, 9, 16; Lev. 3:1, 6; Deut. 4:16). Referring to animals, especially for sacrifice, it identifies the male of the species (Exod. 34:19; Lev. 1:3, 10; 4:23; 22:19; Mal. 1:14). The second word, נְקִיבָה, "female," is related to the root נָקַה, "pierce," in the judgment of many scholars, based possibly upon the nature of the act of copulation. Both women and female animals are designated by this term (Gen. 1:27; 5:2; Lev. 12:5, 7; 15:33; 27:4-5, 6-7; Num. 5:3; 31:15; cf. Gen. 6:19; 7:3, 9, 16; Lev. 3:1, 6; 4:28, 32; 5:6).

The words for "male" and "female" in the NT do not represent any departures from the meanings of terms found in the OT sources. The word ἀνήρ identifies the need of the male in causing pregnancy (Luke 1:34; cf. Matt. 14:21; 15:38). The word γυναῖκα is commonly used for "woman," "wife," and "bride."

The meaning "wife" occurs most commonly (Matt. 5:28, 31-32; 14:3; 18:25; Luke 1:5, 13, 18, 24; I Cor. 7:2 ff; 9:5; Eph. 5:22-23; Col. 3:18-19). Where the distinction between the sexes follows the stereotype set by Gen. 1:27, the Greek makes use of *θηλυς*, "female" or "woman" (Matt. 19:4; Mark 10:6; Rom. 1:26-27; Gal. 3:28).

b. Summary of meanings. The Bible contains terms which clearly distinguish the sexes from each other, on the human and also on the animal levels. While the origin of the terms used must be regarded as uncertain, the use to which they are put in the Bible reveals that they have distinctive meanings. They stress both the differentiation and the relation between the sexes which lie at the root of biblical society and which constitute its assurance of survival in history. This is true of the terms translated "man" and "woman," "male" and "female," "husband" and "wife."

3. The organs of sex. The literature of the Bible records a strange combination of frankness and reticence in its discussion of sex. This was due partly to powerful sex taboos (see § 4 below) and partly to the limitations of the Hebrew language and the peculiar nature of Hebrew psychology. Precise words for physical organs may be identified, but they carry a broader connotation than may be found in modern usage. The language is poetic and imaginative; the psychology is that of the whole man, who manifests his total self through each of his physical acts. Euphemisms are used to conceal in language what must not be exposed in fact—the male and female organs of sexual intercourse and reproduction. Exposure of these organs was held to be shameful.

a. Male organs of generation. The word *בשר* is a general term which sometimes simply indicates the male organ of generation. Literally it means "flesh," deriving perhaps from a root in Assyrian, *bišru*, "blood relation." It may be used of the bodies of animals (Gen. 41:2-19; Exod. 21:28; Num. 12:12; etc.) and of the bodies of human beings (Exod. 30:32; Lev. 6:10—H 6:3; 14:9; 15:13, 16; 16:4, 24, 26, 28; 17:16; Num. 19:7-8; Job 14:22; Isa. 10:18; etc.). It specifically refers to the male organ, however, in a number of instances (Gen. 17:11, 14, 23-25; Exod. 28:42; Lev. 15:2-18; Ezek. 16:26; 23:20; 44:7, 9). An example of the language of this euphemism is as follows: "You shall be circumcised in the flesh of your foreskins" (Gen. 17:11). Another passage whose meaning is equally clear reads: "You shall make for them linen breeches to cover their naked flesh; from the loins to the thighs they shall reach" (Exod. 28:42). *בשר* is never used in connection with the female organs of reproduction.

In the NT the Greek term *σάρξ* may be translated "flesh." Thus it appears to be equivalent to *בשר* of the OT. It never, however, specifically singles out the male sex organ. As the term is used in Matt. 19:5-6; Mark 10:8a-b; I Cor. 6:16; Eph. 5:31, it refers to the union of a man and a woman through the act of sex, whereby they become "one flesh." It is the source of the sexual urge, however, in one instance (John 1:13): "born, not of blood nor of the will of the flesh [*σάρκα*]." The word connotes the bearer of sinful feelings and desires and the means of sensual enjoyment, in various books of the NT and the Apoc.

(Rom. 8:3b; Gal. 5:16; Col. 2:18; II Pet. 2:18; I John 2:16; Ecclus. 23:17). Another word, *σῶμα*, means "body," viewed as the seat of the sexual function (Rom. 4:19; I Cor. 7:4a-b). As is evident from the references cited above, the Greek words for "flesh" and "body," while having a sexual significance at times, do not apply to the male sex only.

The term *ליון* has the meanings "thigh," "loin," "side," and is one of the general terms for the male organ of sex as well. It is so used in Gen. 24:2, 9 (some translate here "thigh"); 46:26; 47:29; Exod. 1:5; Judg. 8:30. The Hebrew word denotes the seat of procreative power, so that we may translate the last-named reference "springing from his loins" for the RSV "his own offspring." The writer of the Letter to the Hebrews uses the Greek term *δορυς* when he names those who are descended from (the loins of) Abraham (Heb. 7:5). The LXX uses this Greek word also in translating the Hebrew *ליון* and related terms (Gen. 35:11). The meaning of "belly," "womb," or "body" is found in the Hebrew *בטן* in connection with men (Job 19:17; Ps. 132:11; Mic. 6:7). A related word is *חלץ*, which also means "loins" as the seat of virility (Gen. 35:11; I Kings 8:19; II Chr. 6:9).

Primarily associated with the male sex organs, another Hebrew root, meaning "feet," recurs in the OT. According to Exod. 4:25, Zipporah cut off her son's foreskin and touched Moses' genitals (RSV "feet") with it. Ruth uncovered the "feet" of her husband's kinsman Boaz and lay down (Ruth 3:7b), following the instructions of Naomi (vs. 4). Each of the seraphim in Isaiah's vision had six wings, with two of which he covered his "feet" (Isa. 6:2). The complete desolation of Judah by the Assyrian armies is compared to completely shaving the hair of a man's "feet"—pubic hair (7:20). Used of women, the word has a similar connotation (Deut. 28:57; Ezek. 16:25).

Other words occurring occasionally or only once include the term *שפכה*, from a root "to pour out," the male organ as a fluid duct (Deut. 23:1—H 23:2), and *זרע*, "seed" or "semen" (Lev. 22:4c [flow of semen]; Num. 5:28 [a woman made pregnant with semen; RSV "shall conceive children"]; Jer. 31:27 ["the seed of man and the seed of beast"]). The NT uses *σπέρμα*, which has the same meaning as the Hebrew word (John 7:42; Rom. 1:3, where the Greek reads "from the seed of David"; II Tim. 2:8; Heb. 11:11). Once in the statement of a law prohibiting the violent seizure by a woman of a man's sex organs (Deut. 25:11), they are referred to by a Hebrew expression meaning "that which excites shame," from the root *מבוש*.

b. Female sex organs. In addition to the euphemism "feet" to identify the female sex organs, a general term translated "nakedness" is also found. It is used in the context of shameful exposure, especially of woman's sex organs (Lev. 18:6-19; 20:17-21; I Sam. 20:30; Lam. 1:8; Ezek. 16:37; 23:10, 29). In Leviticus this word occurs in the phrase "uncover the nakedness of" and connotes sexual intercourse which is preceded by exposing the woman's sex organs (cf. Isa. 3:17). Used similarly only in Hosea is *גבלתי*: "I will uncover her lewdness" (2:10—H 2:12). The LXX uses the term *αἰδοῖον*, "private parts," as a more precise translation of the Hebrew. The idea of disgraceful nakedness is indicated by the Greek

γυμνοτής (Rev. 3:18). Paul refers to the sex organs (both male and female) when he speaks of "our unrepresentable parts," which are to be treated with greater modesty than is called for in connection with the more "presentable parts" (I Cor. 12:23-24).

A more specific word, *remu*, "be wide," or Arabic "be soft"), refers to the uterus or womb. With the meaning "go forth from the womb in birth," it appears in Num. 12:12; Job 38:8; Jer. 1:5; 20:18; while it is found in connection with opening the womb in order to give birth in Gen. 29:31; 30:22; Exod. 13:12; 34:19; Num. 18:15; Ezek. 20:26. The same root has likewise a figurative use, "compassion" or "to have compassion" (see § 9 below). As already noted, *remu* sometimes means "womb" (Gen. 25:23-24; 38:27; Hos. 12:3).

The female breast is identified by *ru* occurring most often in the Song of Songs (1:13; 4:5; 7:4, 8-9; 8:8, 10). It appears with *ru*, "to give suck" (Job 3:12; Song of S. 8:1; Joel 2:16). With a sexual emphasis it is encountered in Hos. 2:2; and notably in Ezek. 16:7; 23:3, 21. *μαστός* refers to a woman's breast (Test. Naph. 1:7), and to the breast of animals in I Clem. 20:10; but in Luke the word *μαστός* is used (11:27; 23:29), where it appears in relation to the breasts that give suck.

c. The sacredness of sex organs. The male sex organs were used in the making of an oath. Abraham commanded the oldest servant of his house to put his hand under his thigh and to swear by the Lord (Gen. 24:2-3, 9). When Jacob was about to die, he requested his son Joseph to put his hand under his thigh and to promise to deal truly with him (47:29). It is conceivable that the rite of CIRCUMCISION originally had a sexual significance. The rite performed upon Ishmael suggests a puberty rite preparatory to marriage. The fact that circumcision constituted a covenant bond between Yahweh and his people does not deprive it of this sexual significance. See § 10c below.

4. Sex taboos. Deeply entrenched attitudes toward forms of sexual behavior may take the form of taboos, whether crystallized into law or not. The exposure of one's private parts (nakedness) was one of these. It was shameful and abhorrent to the Hebrews to display the human sex organs except under rather strictly defined circumstances. A son of Noah violated this taboo when he beheld the nakedness of his drunken father (Gen. 9:21-23); David was denounced by his wife for exposing himself as he danced before the Lord (II Sam. 6:20); Hanun humiliated the servants of David by cutting off their garments at the hips, "in the middle" (II Sam. 10:4), with the result that the victims of this mistreatment "were greatly ashamed" (vs. 5). Nakedness was therefore a sign of humiliation and degradation. As such, war captives were compelled to submit to it (Isa. 20:2-4). A hated nation is taunted; she is thought of as a virgin whose nakedness will be displayed to all (47:3). One of the Dead Sea Scrolls refers to a fine that is levied for exposing one's nakedness (1QM VII.14).

Taboos against incestuous relations with women are formulated into law in the OT (see INCEST). They lie deeper than law, however. Intercourse with a woman in the kin group, with a woman in her menstrual period, with an animal (see BESTIALITY),

with a member of the same sex (see SODOMITE; HOMOSEXUALITY) is repugnant to the feelings of biblical man (Lev. 15:24; 18:23; 20:13; Deut. 27:20). There is horror at maimed or deformed sex organs (Lev. 21:20; Deut. 23:1). A woman must not wear male garments, nor must a man wear female garments (Deut. 22:5).

5. Regulation of sex behavior by law. The laws pertaining to sex are usually not concentrated in one portion of a biblical book. The various codes may repeat the same regulation (see LAW IN THE OT) on a number of subjects, including that of sex control.

Adulterous interest in another man's wife is prohibited (Exod. 20:14, 17; Lev. 18:20; 20:10; Deut. 22:22-29). The codes note further the seduction of a virgin (Exod. 22:16); treatment of a female captive taken as war booty (Deut. 21:11-14); incest (Lev. 18:6-18; 20:11-12, 14, 20; Deut. 27:20, 22); causing one's daughter to become a harlot (Lev. 19:29); intercourse with a betrothed slave (19:20), with a menstruating woman (15:24; 18:19; 20:18); menstruation (15:19-24); a woman's abnormal hemorrhage (15:25-30); the discharge of semen (15:16; 22:4). Also included are laws against homosexuality (18:22; 20:13); intercourse with a beast by members of either sex (18:23; 20:15-16); a woman's intervention in a quarrel between her husband and another man by seizing the latter's sex organ (Deut. 25:11); prohibition against the use of earnings from homosexual practices in the temple (23:18); laws in case of an amputated male sex organ (23:1), of crushed testicles (Lev. 21:20 [with respect to a priest]; Deut. 23:1); prohibition of cult PROSTITUTION among the sons and daughters of Israel (Deut. 23:17); and the treatment of a bastard (23:2). For laws pertaining to marriage, see MARRIAGE.

6. Sex segregation and discrimination. There is little direct evidence of the segregation of women in the biblical community. Susanna sought to bathe in privacy, when the elders tried to seduce her (Sus. 18-20). David's vantage point from his roof gave him the opportunity to observe what was doubtless intended to be a woman's private bath (II Sam. 11:2). Women seem to have had their own living quarters (see the expression "go in" to a woman's tent or apartment; Gen. 6:4; 16:2; 30:3; 38:8-9; 39:14; Deut. 22:13; Judg. 15:1; 16:1; II Sam. 12:24; 16:21; 20:3; Prov. 6:29; Ezek. 23:44). Noteworthy also is the clear indication in the book of Esther of the segregation of the women of the palace (1:9; 2:3, 9, 11, 14; etc.).

As to discrimination between the sexes in conduct covered by the law, there is more evidence for a definite conclusion. Because of her sexual function in a patriarchal society, a woman's violation of law and custom received harsher treatment than that of her male counterpart who might be involved in the same situation. Sexual infidelity was punished more severely (Deut. 22:13-21). The period of uncleanness after childbirth was seven days for a male child and two weeks for a female (Lev. 12:2-5). In making a special vow of persons to the Lord, there was a pronounced difference in the money value of a male and a female (Lev. 27:1-7). The differential narrows for the aged and the very young. Daughters did not automatically inherit from their father; they might do so only under special conditions (Num. 27:1-8; see INHERITANCE).

The force of a vow made by a woman depended upon the approval of her father or her husband; a man's vow must be kept regardless of the attitude of others (30:2-8). See WOMAN for other examples of her place in the community.

7. Sexual intercourse. Sexual intercourse took place principally for the procreation of children, but also for the sake of monetary gain (see PROSTITUTION § 2) and mutual pleasure. It had a further function in connection with the sanctuary of the fertility cult (see PROSTITUTION § 3). Sexual irregularities of the male were not condemned in themselves, provided ancient taboos and social customs were not violated.

The love of a man for a woman based on sexual attraction is indicated often by the root אהב in the OT. This "love" may relate to marriage or only to sexual intercourse (Gen. 24:67; 29:20, 30; Deut. 21:15-16; Judg. 14:16; 16:15; I Sam. 1:5; 18:20; II Sam. 13:1, 4, 15; I Kings 11:1; II Chr. 11:21; Esth. 2:17; Eccl. 9:9; Song of S. 1:2, 4, 7; 3:1-4; Isa. 57:8; Jer. 2:25; Ezek. 16:37; Hos. 3:1). Sexual passion may change to hate when resistance to the act of love is encountered (II Sam. 13:15). Sexual longing and love are capable of producing personal companionship which transcends its physical basis. The beloved is called a companion in the Song of Songs (1:9, 15; 2:2, 10, 13; 4:1, 7; 5:2; 6:4). The longing of a woman for a man (Gen. 3:16) is determined by God.

Sexual love in the NT is defined largely in the category of lust (Matt. 5:28; Rev. 14:8). Paul declares that the desires of the flesh must not be gratified (Rom. 13:14); it is well for a man not to touch a woman, but if he must, he should take a wife so as to avoid immorality (I Cor. 7:1-2). Thus strong passions will have a legitimate outlet. Self-control is best of all, for "the form of this world is passing away" (7:31). Younger men need this especially (Tit. 2:6). Husbands are to love their wives as they love their own bodies (Eph. 5:25, 28). This connotes the sexual union, which is described as becoming "one flesh" (Gen. 2:24; see LUST). The intimate relation that this union identifies is expressed by the word ידע with particular force, for the term means "to know" in a sexual and personal sense as used in this connection (Gen. 4:1, 17, 25; 24:16; 38:26; Judg. 19:25; I Sam. 1:19; I Kings 1:4; cf. Gen. 19:8; Num. 31:17; Judg. 11:39; 21:11). This meaning is emphasized in the account of the tree in the midst of the garden, the fruit of which would cause man to know good and evil. The Dead Sea Scrolls indicate that knowing good and evil signifies the entire range of sexual experience. See bibliography.

8. Sexual traits. Drawn from the experience of sex and of sex differences, descriptive terms of a general nature entered the biblical vocabulary. We may note "man's courage" as applied to the mother of the seven martyred sons (II Macc. 7:21). By far the most common term in biblical usage, which is drawn from the name for "womb" in Hebrew, is רחמים, "COMPASSION." While there is a question as to whether this comes from the idea of brotherly or of motherly feeling, the latter seems more likely. The word appears in relation to God (I Chr. 21:13; Neh. 9:19, 27, 31; Pss. 51:1—H 51:3; 77:9—H 77:10; 79:8; 103:4; 119:77, 156; Isa. 63:7, 15; Jer. 16:5; 42:12;

Lam. 3:22). It is also used of man (Gen. 43:14, 30; I Kings 8:50; II Chr. 30:9; Neh. 1:11; Ps. 106:46; Prov. 12:10; Isa. 47:6; Dan. 1:9; Amos 1:11; Zech. 7:9). There is also a cognate verb, "to have compassion" (Deut. 13:17—H 13:18; Ps. 103:13; Isa. 9:17—H 9:16; 49:15). Other words serving to characterize the apostate people addressed by the prophets in particular are taken from the sex vocabulary of the Bible. See MARRIAGE; PROSTITUTION; FAMILY; ADULTERY. See also such proper names as JERAHMEEL; JEROHAM; REHUM.

9. Theology of sex. The biblical interpretation of sex took the form of a reaction, not only to its abuse within the community, but also to its glorification in the culture that surrounded it. The reaction was presented in terms of biblical faith and the idealized pastoral life in which it was thought to have originated (Jer. 2:1). The principle of sex was embodied in the various fertility cults which confronted the people of the Bible. Sexual intercourse at the shrine was a part of the ritual related to the cycle of the seasons and the rebirth of vegetational and animal life (see PROSTITUTION § 3). This sensuality at the shrine was sternly condemned because of its threat to the ethical demands of Israel's faith (Amos 2:6-8). Yet its positive effect can also be seen in biblical theology: the God of Israel, not the gods and goddesses of the cult, is the source of fertility and fructification (Hos. 2:8). But God is Father and Creator without the aid of a female counterpart (Isa. 45:18; 63:16c). He is the source of sexuality and demands its use for the perpetuation of his people and the glory of his name. Maleness and femaleness reflect the image of God (Gen. 1:27). Man and woman become one flesh because of God's creative action (Gen. 2:21-24). When they use their sexuality apart from his relation to it, a curse falls upon them and upon their children (ch. 3). God creates and judges his people as Father (see above); he also loves them with the compassion symbolized by the womb of a mother. And man must turn to him with the personal, spiritual knowledge expressed in Hebrew by the word "to know," which is also used for sexual intercourse. See Isa. 11:2; Jer. 22:16; Hos. 4:1, 6, where there is a hint that the sexual "knowledge" of the Canaanite cult is undergoing a transformation under the influence of prophetic faith and teaching.

10. Changing patterns of thought and conduct. The developing biblical rejection of nature religions (fertility cults), as their threat to biblical faith became clear, involved also a development in the patterns of sexual control. Unlimited sex indulgence and pressures to restrict it, under the influence of both sociological and theological factors, created tensions that appear in the biblical records and in related writings. The powerful prophetic attack upon the abuse of sex has been noted; the demand for self-control in later writings can also be seen. To this end Gnostic asceticism is of no avail (Col. 2:23); only the life which is hidden with Christ can achieve this result. The control of sexual impulses through self-discipline is emphasized (Test. Naph. 8:8; I Cor. 7:9; Tit. 2:5-6). The entire book of IV Maccabees is devoted to a eulogy of the restraining power of reason over all of life; note especially how Joseph overcame sexual

passion by reason (2:3). To look at a woman with lust in the heart may condemn a man to hell (Matt. 5:28-29). Yet the consummation of the meaning of sex in marriage provided an opportunity for Jesus to manifest his glory by his presence at a wedding feast (John 2:1-11).

Bibliography. Jos. Antiq. I.xii.2: evidence of circumcision among the Arabs at age thirteen; G. Aicher, "Mann und Weib, ein Fleisch," *BZ*, 5 (1907), 159-65; J. A. Montgomery, "Ascetic Strains in Early Judaism," *JBL*, 51 (1932), 183-213; W. A. Barton, *Archaeology and the Bible* (1941), pp. 365-66: "The Tale of the Two Brothers"; O. O. J. BAAB

SHAALBIM *shā āl'bīm* [שעלבים, place of foxes] (Judg. 1:35; I Kings 4:9). Alternately: **SHAALAB-BIN** *shā'ō lāb'ōn* [שעלבין] (Josh. 19:42). An Amorite city which was assigned to Dan but which the Danites were unable to occupy. In time, however, the residents of Shaalbim became subject to forced labor for the house of Joseph. The city was finally occupied by Israelites and became a part of Solomon's second administrative district. Possibly **SHAALBON** and **SHAALIM** refer to the same place.

The Salaba in the territory of Samaria, mentioned by Josephus, may be identified with Khirbet Salhab at the head of the wadi of the same name, but not with Shaalbim. Jerome mentions a Selebi (Shaalbim?) along with Beth-shemesh and Aijalon. It is suggested that the name remains in modern Selbit, three miles NW of Aijalon and eight miles N of Beth-shemesh. Pottery picked up on the site indicates occupation during the period in question. For the present, most scholars identify Shaalbim with Selbit.

V. R. GOLD

SHAALBON *shā āl'bōn* (II Sam. 23:32; I Chr. 11:33); **KJV SHAALBONITE** —בֹּנֵי שְׁעֵלְבָנִי [שעלבני]. The home of Eliahba, one of David's Mighty Men. Possibly it is to be identified with **SHAALBIM**.

V. R. GOLD

SHAALIM *shā'ā līm* [שעלים] (I Sam. 9:4); **KJV SHALIM** *shā'līm*. A region traversed by Saul in his search for the lost asses. Most scholars have sought its location in the territory of Benjamin. It has been conjectured that it may be an error for **SHAALBIM** or for **SHUAL** 2.

W. L. REED

SHAAPH *shā'āf* [שעף]. The name of two descendants of Caleb, the brother of Jerahmeel:

1. The last-born son of Jahdai (I Chr. 2:47).
2. A son of Caleb and his concubine Maacah; the father of Madmannah (I Chr. 2:49).

E. R. ACHEMEIER

SHAARAIM *shā'ō rā'ēm* [שערים, double gate]; **KJV SHARAİM** *shō rā'ēm* in Josh. 15:36. 1. A city of

Judah in the Shephelah district of Azekah (Josh. 15:36). The pursuit of the Philistines after David's slaying of their hero, Goliath, reached from Shaaraim to Gath and Ekron (I Sam. 17:52 ff). Thus Shaaraim must be in or near the Wadi es-Sant (see **ELAH, VALLEY OF**), probably near Azekah. Eusebius mentions Σαρραϊν (Saraein) but gives no identification.

2. A city of Simeon (I Chr. 4:31) which appears as **SHARUHEN** in the parallel list (Josh. 19:6).

V. R. GOLD

SHAASHGAZ *shā āsh'gāz* [שעשגז] (Esth. 2:14). The eunuch in charge of King Ahasuerus' concubines.

Bibliography. On etymology, see L. B. Paton, *Esther*, ICC (1908), p. 69.

SHABBETHAI *shāb'ē thī* [שבתי, possibly from שבת, sabbath; Akkad. *šabbata'a*; Apoc. Σαββαταίος]; **KJV Apoc. SABATEAS** *sāb'ō tē'ās* in I Esd. 9:48; **SAB-BATHEUS** —*thē'ōs* in I Esd. 9:14. A Levite who assisted Ezra in the execution of the edict against having foreign wives (Ezra 10:15; I Esd. 9:14) and who was present at the reading of the law (Neh. 8:7; I Esd. 9:48). In Neh. 11:16 the same(?) man is called a "chief of the Levites."

J. M. WARD

SHACHIA. **KJV** form of **SACHIA**.

SHADDAI *shād'ī* [שדי, the Mountain One]. See **ALMIGHTY; GOD, NAMES OF**, § C2a.

SHADE. See **SHADOW**.

SHADES. The belief that the shades of the dead were endowed with some vitality and that they possessed the power to inflict harm was widely held in the ancient Near East. Particularly feared were the shades of those who had been neglected by their kin or failed to receive the last rites of burial. Such shades could rise from the nether world to wreak vengeance upon the living, and great care had to be taken to nullify their malevolence.

The general term for "shades" in the OT is רפאים (to be distinguished from the other רפאים, which is an ethnic designation of the prehistoric inhabitants of Canaan; see **REPHAIM**). This word is used with the same connotation in Phoenician (*rp'm*) and in Ugaritic (*rp'um*). According to H. L. Ginsberg, the original meaning of the root *rp'* is "to mend, join," and hence the *rp'um* are a community of shades massed together in the nether world (cf. קהל רפאים, "the assembly of the shades," in Prov. 21:16; RSV "the assembly of the dead"). Rare terms for "shades" are אשים, איוב, רוח, and אלהים. The first of these is mentioned only once, in Isa. 19:3, and it is obviously the Akkadian *ētimmu*, "the ghost of a dead person"; the word *'utm* is found also in Ugaritic and may be rendered "funeral meats." The term איוב, mentioned many times and usually translated "medium," has the meaning of "shades, ghost," in Isa. 29:4. The רוח in Eccl. 3:21 has the sense of "shades," and the אלהים seen by the witch of Endor (I Sam. 28:13) was clearly the apparition of the deceased Samuel. See **FAMILIAR SPIRIT**.

The aspect of fear of the "evil ghosts" (Akkadian

etimmu limnu), so prevalent in Babylonia, is not reported in the biblical literature. The shades are huddled together in שְׁאוֹל, "the nether world" (cf. Job 26:5-6; Prov. 9:18; Isa. 14:9; see SHEOL). They are called צְהַל רְפָאִים, "the community of the shades" (Prov. 21:16; RSV "the assembly of the dead"); and the place is referred to as אֶרֶץ רְפָאִים, "the land of the shades" (Isa. 26:19), or simply תַּחְתִּיּוֹת, "the nether world" (Ezek. 26:20, etc.). Euphemistically שְׁאוֹל is called בּוֹר, "the Pit" (Isa. 14:15; Ezek. 32:23-31; etc.), or דְּוִמָּה (derived from דָּמָם, "to be silent")—i.e., the abode of silence (Pss. 94:17; 115:17). It is a place of "darkness" (חֹשֶׁךְ), "forgetfulness" (נִשְׁיָה), and "destruction" (אֲבֵדוֹן; Job 26:6; Ps. 88:11-12—H 88:12-13).

In summary, the OT view is that the shades are lifeless, without any power to do good or evil.

See also IMMORTALITY.

I. MENDELSON

SHADOW צֶל (*alternately SHADE*); KJV טֵל (RSV SHADE), צֶלֶל (RSV SHADE); ἀσσκίασμα, σκιά]. The shade of foliage (Jonah 4:6), clouds (Isa. 25:5), or a rock (Isa. 32:2) is welcome protection against the Near Eastern sun at midday, whose intensity was thought to be the work of demonic powers (cf. Pss. 91:6; 121:6). Consequently, צֶל may mean the shelter itself (Gen. 19:8), or, metaphorically, the protective power afforded by a man, a city, or a kingdom (under the metaphor of a tree: Song of S. 2:3; Ezek. 17:23; 31:6, 12, 17; cf. Isa. 30:2; of other foliage: Judg. 9:15; Ps. 80:8 ff; of a city: Jer. 48:45; of a rock: Isa. 32:2).

In other passages the shadow signifies transience and vanity (Job 8:9; 14:2; Pss. 102:11; 109:23; cf. I Chr. 29:15; Job 17:7; Eccl. 6:12; 8:13) or portends the coming night (Job 7:2; Jer. 6:4) or day (Song of S. 2:17; 4:6). For other, nonfigurative uses, cf. Judg. 9:36; II Kings 20:9-11; Isa. 38:8.

The CANOPY over Yahweh's GLORY will offer shade from the deadly rays of the sun (Isa. 4:6), and in his shadow the pious man is safe from mysterious, as well as familiar, threats (including the demon of noonday: Ps. 91:1, 6; cf. Ps. 121:5-6; Isa. 25:4-5). The shadow of Yahweh's hand (Isa. 49:2; cf. 51:16) and the shadow of his wings (Pss. 17:8; 36:7; 57:1; 63:7; cf. Ps. 91:1; Lam. 4:20; Hos. 14:7; see REFUGE; WINGS) are metaphors of his sovereign protection, the latter occasionally implying the temple at Jerusalem (cf. Ps. 63:7; see TEMPLE, JERUSALEM).

The familiar KJV phrase "shadow of death" is based upon a popular etymology of צֶל, "shadow," plus מוֹת, "death"), whereas the word is now seen as a form derived from צֶלֶם (unused in Hebrew; Akkadian *ṣalāmu*, "grow black") and should be translated with the RSV: "gloom," "deep darkness" (the RSV retains "shadow of death" in Ps. 23:4 for the sake of the traditional phrase, which is not seriously misleading in this verse; see also LIGHT). The error probably goes back to very ancient homiletical interpretation of the word, which is accepted by the Greek translations (σκιά θανάτου, "shadow of death") and appears in free adaptations of Isa. 9:2—H 9:1 in the NT (Matt. 4:16; Luke 1:79).

Except for Mark 4:32, which also recalls OT passages (cf. Ps. 104:12; Ezek. 17:23; 31:6; Dan. 4:11,

21), the NT usage reflects Greek, rather than Hebrew, thought. Col. 2:17; Heb. 8:5; 10:1 use the typically Hellenistic concept of a shadowy likeness which is the counterpart of true reality. The "shadow of turning" (Jas. 1:17 KJV; RSV "shadow due to change") refers somewhat obscurely to astronomical changes (perhaps eclipses or moon phases) by contrast to the constancy of God.

For "shades," see DEATH; IMMORTALITY.

J. A. WHARTON

SHADRACH, MESHACH, ABEDNEGO šāḏ'rāk, mē'shāk, ʾā bēd'nī gō [מִשְׁרַח, מִשְׁכַּח, אֲבֵדְנֵגוֹ (in Dan. 3:29 עֶבֶר נְגוּ, נְגוּ), עֶבֶר נְגוּ; see below]. The three companions of DANIEL. The names always occur together and in the same order (Dan. 1:7; 2:49; 3:12-30).

The youths were assigned these Babylonian names by Nebuchadnezzar's chief eunuch (Dan. 1:7), their Hebrew names being respectively Hananiah (חַנַּנְיָה, "Yahu has been gracious"), Mishael (מִישַׁאֵל, possibly "Who is what God is?"), and Azariah (עֲזַרְיָה, "Yahu has helped"). Cf. Dan. 1:6-7, 11, 19; 2:17; I Macc. 2:59; Song Thr. Ch. 1, 66; IV Macc. 16:3, 21; 18:12.

The etymology of the Babylonian names, as distinguished from the Hebrew, is obscure. The usual supposition is that the author of Daniel, or the tradition behind him, has with sardonic intent corrupted the forms of the names, each of which had originally contained the designation of a Babylonian deity as one of its constituent elements. "Shadrach" is conjecturally derived from the Akkadian *Shudur-Aku*, "Command of Aku [Sumerian moon god]," but it has also been read as a corruption of "MARDUK." "Meshach" has been dubiously explained as equivalent to the Akkadian *Mishaaku*, "Who is what Aku is?" (cf. "Mishael," above). "Abednego" is generally read with more assurance as a corruption of *Abed-nebo* = Akkadian *Abdi-nabu*, "Servant of Nabu [Babylonian god of wisdom]." But it is possible that the present form of the last of the names represents a merely philological dissimilation of consonants rather than intentional corruption for polemical purposes, which, if true, argues against the latter sort of motivation operating in the formation of the names Shadrach and Meshach as well. See *bibliography*.

The story of these companions of Daniel was eminently suited for inclusion in a work written to undergird the faith of beleaguered Palestinian Jews of 165 B.C. under the Seleucids (see DANIEL § 2; MACCABEES). The three men are presented as "youths without blemish, handsome and skilful in all wisdom, endowed with knowledge, understanding learning, and competent to serve in the king's palace" (Dan. 1:4). Consistent with the purpose of the writer of Daniel, the youths, with their more famous comrade, Daniel, demonstrate in their persons the superiority of traditional Jewish ways and convince their alien ruler of this by the excellence of their talents and by signs of divine favor toward them (1:19-20; 2:17, 47; 3:28-30). They are of stalwart faith and piety, withstanding all pressures to worship the pagan image

set up by Nebuchadnezzar, even preferring the ordeal of the king's fiery furnace to apostasy (ch. 3). The apocryphal SONG OF THE THREE YOUNG MEN represents the heroes (vs. 1) as walking "in the midst of the flames, singing hymns to God and blessing the Lord," and engaging in prayer. The caliber of their faith is manifested with vigor and force, yet not without humility, in their classic reply to Nebuchadnezzar (in the canonical Daniel, 3:17-18): "If it be so, our God whom we serve is able to deliver us from the burning fiery furnace; and he will deliver us out of your hand, O king. But if not, be it known to you, O king, that we will not serve your gods or worship the golden image which you have set up."

The three friends' Hebrew names, as distinguished from their Babylonian names, occur separately in the OT elsewhere than in the passages cited above, but the persons who bear them cannot be identified with any of the three heroes in Daniel. The absence of genealogical data for the latter, beyond their association with the tribe of Judah (Dan. 1:6), points to the legendary framework in which the present tradition holds them. The renaming of the men (vs. 7) upon their entrance to a new position of status follows a pattern familiar from other personal histories in the Bible—the example of Joseph in the court of Pharaoh is directly analagous (Gen. 41:45; cf. also II Kings 23:34; 24:17). However, except for Dan. 1:7, the Hebrew names in the Daniel passages cited above are nowhere clearly associated with the Babylonian, and each self-contained narrative section uses one set of names to the exclusion of the other. It is possible, therefore, that in 1:7 the author explicitly identifies the one triad with the other in order to fuse two originally independent traditions, and this might be enough to account for the renaming of the young men.

Bibliography. J. A. Montgomery, *Daniel* (1927), pp. 119-25, 127-30, 193-219; R. H. Charles, *Commentary on Daniel* (1929), pp. 18-19; E. W. Heaton, *Daniel* (1956), pp. 116-21, 137-44; A. B. T. DAHLBERG

SHAGEE shā'gī [שג] (I Chr. 11:34); KJV SHAGE. A Hararite; the father of Jonathan, one of the company of the Mighty Men of David known as the "Thirty." However, if in the parallel text (II Sam. 23:32b-33a) the word "son," which appears to have accidentally fallen out of the text after "Jonathan," is supplied in accordance with the Chronicler, the name of the father of Jonathan would be Shammah the Hararite (see SHAMMAH 3; cf. II Sam. 23:11), which appears preferable.

E. R. DALGLISH

SHAHAR shā'hār. KJV translation of שחר in the title of Ps. 22 (RSV DAWN, as in several other occurrences of this word; alternately MORNING). Shahar is the Venus Star at dawn, in Canaanite mythology (cf. SHALEM [GOD], the Venus Star at

close of day). The *locus classicus* for Shahar as a god is the Ras Shamra myth which describes the birth of Shahar and his twin Shalem to El, the senior god of the Canaanite pantheon.

The references to "eyelids of שחר" in Job 3:9; 41:18 are probably not personifications of the dawn, but reflections of the Canaanite myth. The phrase "wings of שחר" in Ps. 139:9 is possibly a similar instance, though the reading שחר is less certain; the Syr. suggests that "as an eagle" (כנשר) should be read here.

Bibliography. C. H. Gordon, *Ugaritic Literature* (1949), pp. 60-62 (translation of Ras Shamra text); J. Gray, "The Desert God Attr in the Literature and Religion of Canaan," *JNES*, VIII (1949), 72-83; T. H. Gaster, *Thespis* (1950), pp. 249-54; G. R. Driver, *Canaanite Myths and Legends* (1956), pp. 22-23, 123.
J. GRAY

SHAHARAIM shā'ō rā'ōm [שהררים] (I Chr. 8:8). A descendant of Benjamin. He had three wives, but banished two of them.

SHAHAZUMAH shā'ō zōō'mō [שהזומה] (Josh. 19:22); KJV SHAHAZIMAH —zī'mō. A border town in Issachar. No positive identification of the site of this town has been made. Tell el-Muqarqash, a mound situated on the promontory formed by the confluence of wadies Sirin and esh-Sherrar, approximately five miles E-SE of Mount Tabor, has been suggested. The site was occupied in the MB, LB, Iron I, and Byzantine periods, as shown by surface exploration. But others have tentatively proposed the identification of this mound with KISHION. It is possible that the Masoretic reading, "Shahazumah," is a conflation of two place names, Shahaz and Yammah.

Bibliography. W. F. Albright, "The Topography of the Tribe of Issachar," *ZAW*, 3 (1926), 232-33; A. Saarisalo, *The Boundary Between Issachar and Naphtali* (1927), pp. 68-69; A. Alt, "Die Reise," *P7*, 24 (1928), 51.

G. W. VAN BEEK

SHALEM. KJV translation of שלם ("peace"), a word used only in Gen. 33:18. Commentators have taken it variously as the name of a city near Shechem (so KJV, after LXX; cf. versions), another name for Shechem, and a term describing Jacob's arrival at Shechem ("safely, in peace"; RSV "safely"). The context favors the RSV translation (cf. Gen. 28:21). It is not to be confused with SALEM (Gen. 14:18).

W. L. REED

***SHALEM (GOD)** shā'lēm [שלם, he who brings to completion]. A deity now definitely known from the Ras Shamra Texts, especially that one describing the birth of Shalem and his twin, SHAHAR. The latter is the DAY STAR, and the pair are the Venus Star, which was regarded also by the Romans as a pair of twins. It has been suggested that Shalem signifies "the peace" of evening, but Shalem should be taken in its primary sense of "completion," signifying the star which completes the day, the Venus Star at evening, while Shahar is the Venus Star at DAWN.

In the OT, though Shalem is not recognized as a god, his name is compounded in the place name Jerusalem, which appears first in the Egyptian Execration Texts from Luxor (ca. 1850 B.C.) as 'urushalimma (suggested vocalization). This place name is

abbreviated to Salem in Gen. 14:18 and in Ps. 76:2, where it is parallel to Zion. It seems likely that Shalem was the local god of pre-Israelite Jerusalem, and it may well be that the name Solomon was given to, or assumed by, the son of David (otherwise known as Jedidiah) out of respect to the local deity of Jerusalem. A dialectic variant of this name is Shalamanu, the name of a Moabite king mentioned by Tiglath-pileser III (743-726 B.C.). This suggests that Shalem, the evening manifestation of the Venus Star, was identical with Athtar, well known in Arabian mythology as the Venus Star. In the inscription of Mesha of Moab, Athtar is compounded with the national god CHEMOSH as Athtar-Chemosh. Further, in Judg. 11:24 the god of Ammon, Melech-ma ("the king"), distorted by Jewish scribes to "Milcom," is given as Chemosh. If these identifications are correct, the worship of MOLECH at Jerusalem was probably a relic of the pre-Israelite cult of the local god Shalem.

Gray, "The Desert God Attar in the Literature and Religion of Canaan," *JNES*, VIII (1949), 72-83; C. H. Gordon, *Ugaritic Literature* (1949), pp. 59-65 (translation of Ras Shamra text); G. R. Driver, *Canaanite Myths and Legends* (1956), pp. 22-23, 123 (translation of Ras Shamra text and introduction); J. Gray, *The Legacy of Canaan* (1957), pp. 136-37. J. GRAY

SHALIM. KJV form of SHAALIM.

SHALISHAH shāl'ō shā [שלשח] (I Sam. 9:4); KJV SHALISHA. A region through which Saul passed in his search for the lost asses. Scholars have assumed that Saul was traveling N from Gibeah and that the listing of the land of Shalishah directly after the hill country of Ephraim indicates that Shalishah was either in or directly N of the territory of Ephraim. The reference to Benjamin at the end of the verse complicates ascertaining the direction of Saul's journey.

The city of BAAL-SHALISHAH (II Kings 4:42) may have been located in the land of Shalishah, which is perhaps to be sought in the vicinity of Kefr Thilth, SW of Shechem.

W. L. REED

SHALLECHETH, GATE OF shāl'ō kēth [שלכח] (I Chr. 26:16). A gate in the W section of the temple enclosure in Jerusalem; a causeway led up to it from the city. This gate is tentatively identified with an ancient entrance twenty feet S of Bab el-Mutawada.

G. A. BARROIS

SHALLUM shāl'ōm [שלום, שָׁלוֹם; Apoc. Σελλούμ, Σελλήμ, Σελώμ]; KJV SHALLUN —on in Neh. 3:15; SALLUMUS sā'l'ō mās (I Esd. 9:25); SALOM sā'lōm (Bar. 1:7); SALUM (I Esd. 5:28). 1. A son of Jabesh, apparently from Ibleam in the Plain of Esdraelon. He reigned as king over the N kingdom of Israel for one month in the year 747 B.C. (II Kings 15:10, 13-15).

He gained the throne by assassinating his predecessor, Zechariah, but was then in turn murdered by his successor, Menahem. Such royal murders were symptomatic of the deep decay which ate at the heart of the N kingdom from the time of Jeroboam II on, and which eventually led it to fall easy prey to the

Assyrian conqueror Sargon II in 721 B.C.—the date which marks the end of Israel. Both Amos and Hosea prophesied that the sins of Israel would result in such downfall; Hosea was actively engaged in preaching during Shallum's reign, or shortly thereafter.

2. Son of Tikvah (called Tokhath in II Chronicles), and husband of Huldah the prophetess (II Kings 22:14 = II Chr. 34:22).

3. The fourth son of King Josiah of Judah, and successor to his father in 608 B.C. (Jer. 22:11; I Chr. 3:15). He is usually called Jehoahaz.

4. An uncle of the prophet Jeremiah (Jer. 32:7). Shallum sent his son to the prophet, who was imprisoned in the king's court of the guard, in order to give Jeremiah the right to redeem a family field which had fallen to him at Anathoth. The prophet used the occasion to symbolize the fact that houses and fields and vineyards would in the future once again be bought in Judah, beleaguered though that country was by the Babylonians in the time of Jeremiah.

5. The father of Maaseiah, one of the keepers of the threshold of the temple in the time of the prophet Jeremiah (Jer. 35:4).

6. Son of Sismai; the father of Jekamiah; and a descendant of Jerahmeel of Judah (I Chr. 2:40-41).

7. A descendant of Simeon; son of Shaul; and the father of Mibsam (I Chr. 4:25).

8. The fourth-born son of Naphtali by his wife Bilhah (I Chr. 7:13).

9. A high priest; son of Zadok; and the father of Hilkiah (I Chr. 6:12-13; Ezra 7:2). Ezra claims to be descended from him. He is perhaps identical with Meshullam in I Chr. 9:11; Neh. 11:11; 12:13, although distinctions here are obscure.

10. A Levitic gatekeeper in the camp of the Levites, and one of the first to return to Judah from exile in Babylon (I Chr. 9:17). He is perhaps identical with Shallum the Korahite, son of Kore, mentioned in vss. 19, 31. According to Ezra 2:42 = Neh. 7:45, he was also the head of a family of gatekeepers in postexilic Judah. He is called Shelemiah in I Chr. 26:14, Meshullam in Neh. 12:25, and Meshelemiah in I Chr. 9:21. According to Ezra 10:24, he was also one of those who had married a foreign wife while in exile, but who, by the law of the new, postexilic community, was forced to put her away.

11. A member of the tribe of Ephraim, and the father of Jehizkiah (II Chr. 28:12).

12. An Israelite who had married a foreign wife while in exile (Ezra 10:42).

13. The son of Hallohesh, and one of those who helped to rebuild the wall of Jerusalem in the time of Nehemiah (Neh. 3:12). He had charge of half of one of the five governmental districts into which postexilic Judah was divided (the Jerusalem district formed the middle area). It can therefore be assumed that he belonged to a family which had remained in Judah after the downfall of the southern kingdom in 586 B.C.

14. Son of Colhozeh (Neh. 3:15). He repaired the Fountain Gate.

E. R. ACHEMEIER

SHALMAI shāl'mī [שלמי, perhaps hypocoristic for (Yahu is) well-being] (Neh. 7:48). Alternately: SHAMLAI shām'li [שמלי] (*Kethibh*), probably an error for שלמי (*Qere*); Apoc. Σουβαί (Ezra 2:46; I Esd. 5:

30); KJV Apoc. SUBAI sōō'bī. Eponym of a family of Nethinim, or temple servants, among the exiles returned from Babylon.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 165. B. T. DAHLBERG

***SHALMAN** shāl'mən [שָׁלְמָן] (Hos. 10:14). An unidentified foreign king; customarily considered an "abbreviation" of the name of an Assyrian king, SHALMANESER.

SHALMANESER shāl'mə nē'zər [שַׁלְמַנְאֶסֶר; Akkad. *Šulmānu-ašarid*, Šulmānu is leader]. 1. Shalmaneser I (1274-1245 B.C.), son of Adad-nirari I. The first Assyrian king to leave detailed accounts of his campaigns, Shalmaneser I fought against the mountain people of the Zagros as far as Urartu, as well as against Shattuara of Hanigalbat and the Arameans along the Euphrates as far as Carchemish. His victories mark the return of Assyria to power after the Dark Age.

2. Shalmaneser II (1031-1020 B.C.). Nearly nothing is known of this king, who was one of the weak rulers who followed Tiglath-pileser I to the throne.

3. Shalmaneser III (858-824 B.C.), son of Ashurnasirpal II. Shalmaneser III represents one of those rulers who laid the foundations of the Neo-Assyrian Empire. He also was the first Assyrian king to come in contact with the kings of Israel. The three-front war which any Assyrian king of stature had to wage seems to have caused Shalmaneser III an immense amount of trouble. His wars against the kingdom of Urartu in the N were primarily defensive as to their goal, though necessarily offensive in manner. On the W front his motive was one of conquest. His stubborn push in that direction apparently took up most of his military effort, but failed to reach its ultimate objective, Damascus. For three years (858-856) Shalmaneser III struggled with the Aramean Ahuni to dislodge him from the left bank of the Euphrates and to establish Assyrian domination and administration again in the lands up to this river. The repercussions of these events made the rulers in Syria realize that only an alliance could muster enough military power to check the advance of the Assyrian army to the coast, and Irhuleni of Hamath and Adad-'idri of Damascus (called Ben-hadad in the OT) succeeded in forming such an alliance, a very rare feat in the history of that region. The kings of territories from Cilicia (Qu'e) to Ammon mustered an army of 63,000 men, not counting the pertinent chariotry and cavalry; and among these were 10,000 foot soldiers and 2,000 chariots sent by King Ahab of Israel. In spite of Shalmaneser III's claim of victory, he had to retreat (853) after having advanced as far as Qarqar, where the battle took place, though Aleppo had surrendered to him. In 848 the Syrian allies were again able to stand their ground against Shalmaneser III at Ashtamaku. In view of the danger implied in having to fight formidable adversaries in the N, as well as in the SW—adversaries that were bound to concert their efforts one day and to destroy Assyria—Shalmaneser III seems to have made extensive preparations up to 845 to assemble an immense army of

125,000 men. Even this effort did not suffice to crush the enemy. In addition to all these campaigns, Shalmaneser III and his officers were able to take Carchemish, thus bringing the Euphrates completely under Assyrian control, to be sufficiently active on the mountain front to keep Assyrian territory intact and protected, and furthermore to interfere in a fight for the Babylonian throne. There Shalmaneser III honored a treaty concluded with the Babylonian king, Nabuaplaiddin (885-852), by helping secure the throne for the son (Mardukzakirshumi) of the latter against the claim of a younger brother. In two small campaigns he defeated the pretender, pursuing him into the coastal regions of Chaldea. He entered Babylon as a welcome ally, participating in the rites of Marduk and Nabu. In the meantime, time and the ravages of continual warfare had changed the situation in Syria in Shalmaneser III's favor. The kings who had supported the alliance had died, and Hazael of Damascus had to face Shalmaneser III alone, at Mount Hermon, and was defeated. Although Jehu of Israel and the kings of Tyre and Sidon brought tribute to Shalmaneser III, he was still not able to conquer Damascus. In the remaining years of his reign, Shalmaneser III extended Assyrian domination deep into Cilicia and the regions to the N of it. A widespread rebellion in Assyria against his chosen heir, Shamshi-Adad V, marred the end of his reign.

Fig. LEB 23.

4. Shalmaneser IV (782-772 B.C.), son of Adad-nirari III. Throughout the duration of his reign, Shalmaneser IV had to fight a defensive war against the growing power of Urartu under its king, Argistis I. He was able to maintain only a foothold in that region, and he constantly had to yield territory to the enemy.

5. Shalmaneser V (727-722 B.C.), son of Tiglath-pileser III. His reign was short, and he left only one historical inscription. He ruled in Babylon under the name of Ululai and laid siege to Samaria when Hosea rebelled against Assyria upon the instigation of Egypt. We know of this event only from a mention in the Babylonian Chronicle. This siege may have lasted three years, if a quotation by Josephus of Menander of Tyre is to be believed, which speaks of a siege of Tyre lasting that long. At any rate, Shalmaneser V apparently died or was murdered during the siege, and the Assyrian army had to retreat quickly. Shalmaneser's brother, Sargon II, ascended the Assyrian throne.

A. L. OPPENHEIM

SHAMA shā'mə [שָׁמָא] (I Chr. 11:44). One of the two sons of Hotham the Aroerite who were included among the members of the Mighty Men of David known as the "Thirty."

SHAMARIAH. KJV form of SHEMARIAH 2.

SHAME [chiefly בֹּשֶׁת and other derivatives of בּוֹשׁ (be ashamed), חִרְפָּה (reproach, sexual shame), כְּלָמָה (humiliation), ἀσχύνη (shame), ἐπαισχύνουμαι (be ashamed), and κατασχύνω (be disgraced); also חֲסֵד (derision), חָסַר (be abashed), עֲרוּהָ (nakedness), קָלוֹן (disgrace), ἀτιμία (dishonor), ἐντροπή (misgiving), δνειδος and δνειδισμος (reproach), and παραδειγματ-

ζω (hold up to public disgrace)]. The painful consciousness of guilt, unworthiness, or failure, and the ignominy often connected with it.

In the objective sense, shame is the disgrace which a sinner brings upon himself and those associated with him (Lev. 20:17; Prov. 14:34); or it may be the result of such natural calamities as barrenness (Gen. 30:23; Isa. 4:1; Luke 1:25) or widowhood (Isa. 54:4). Otherwise it is the opprobrium brought by one's enemies (Ps. 69:19—H 69:20; Mark 12:4), who often put outward marks of derision on their victims, either by exposure of their nakedness, which was a particularly painful form of disgrace for the Hebrews (cf. Isa. 3:17; 47:3; Ezek. 16:37), or by mutilation (Judg. 1:6-7; I Sam. 11:2; II Sam. 10:4-5; cf. also Jesus' abuse by his executioners). Shame comes as a divine judgment upon sinners (Ps. 44:9—H 44:10) and particularly upon Israel's foes (Isa. 7:20; Jer. 46:24; 50:2; etc.). The devout soul prays for the shame of the wicked (Ps. 6:10—H 6:11; 31:17—H 31:18; 109:29). A frequent OT expression, adopted by NT usage, is "to be put to shame"—i.e., "disgraced, disappointed" (Ps. 35:26; Isa. 54:4; etc.; cf. Luke 13:17; II Cor. 7:14; Tit. 2:8). The cross on which Christ died was the symbol of his bitter shame (Heb. 6:6; 12:2).

Subjectively, shame is experienced as guilt for sin (Ezra 9:6; Prov. 6:33; Jer. 2:26; 31:19; Zech. 13:4), as a sense of defeat or failure (II Chr. 32:21; Jer. 9:19—H 9:18; Mic. 3:7), as a violation of one's honor and modesty (II Sam. 10:5; 13:13; I Cor. 11:6 [contrast vs. 14]; 14:35), as embarrassment or exposure (Judg. 3:25; II Kings 2:17; Ezek. 36:30; Luke 14:9), or simply as the result of disappointment (Jer. 2:36; 14:3-4; 48:13; Hos. 10:6; and often). One may be ashamed of others, as some are of Christ (Mark 8:38), but true believers are not ashamed of him and his gospel (Rom. 1:16; cf. Gal. 6:14), any more than he is of them (Heb. 2:11; cf. 11:16).

The experience of shame may be very painful (II Sam. 13:13; Ps. 69:20—H 69:21), and among the Hebrews it was manifested in face, bearing, and dress (II Sam. 13:19; 15:30; 19:5—H 19:6; Jer. 14:3). Nonetheless it may lead to great good through repentance (I Cor. 4:14; 6:5; 15:34; II Thess. 3:14). There are always some, however, who are so depraved that they refuse to be ashamed (cf. Jer. 3:3; 6:15; Zeph. 3:5).

This word may also indicate the object of shame, thus nakedness and especially the pudenda (Gen. 9:22-23; Rev. 3:18; 16:15); sin (Rom. 6:21; Eph. 5:12; Phil. 3:19; Jude 13); or idols and heathen gods, particularly Baal (Jer. 3:24; 11:13; Hos. 9:10). The scribes have substituted the word "shame" (*bosheth*) for "Baal" in the names Ishbosheth and Mephibosheth (cf. II Sam. 2:8; 4:4 with I Chr. 8:33-34).

S. J. DE VRIES

SHAMER. KJV alternate form of **SHEMER** 2-3.

SHAMGAR shām'gār שַׁמְגָר; Hurrian *Shimig-ar(i)*, (the god) Shimike gave]. The "son of Anath," in whose days travel almost ceased in Israel because of the danger of marauding bands (Judg. 5:6), and who was said to have delivered Israel by killing six hundred Philistines with an oxgoad (3:31).

Although the non-Israelite name Shamgar has been explained variously as being originally Assyrian, Hittite, or Phoenician, it is most likely from the Hurrian equivalent mentioned above.

A certain Ben-Anath, "son of Anath," mentioned by Egyptian pharaoh Ramses II as a Syrian sea captain with whom he was allied, was at least a century too early to be Shamgar. "Son of Anath" probably refers, not to Shamgar's parentage, but to his community. He was "of Beth-anath," a Canaanite town in the Galilee area. The town itself bore the name of a Canaanite goddess ANATH.

The reference to Shamgar in the Song of Deborah should be of unique value because probably almost contemporary with the hero himself (Judg. 5:6). But unfortunately its only clear meaning is to date the dangerous public travel because of a menacing enemy as being in the pre-Deborah "days of Shamgar." Precisely opposite views as to Shamgar's role have therefore been understood of this passage.

One view is that Shamgar's anti-Philistine exploit was a campaign to clear the roads for resumption of travel. This interpretation is doubtful both because, although the Philistines had previously entered S Palestine, there was no Philistine menace in N Israel as early as 1125 B.C., and because the clear inference from the Song is that the time was one of continuous danger which was cleared up only by Deborah's action.

The other view is that Shamgar was therefore the cause of the serious travel conditions, being either a Canaanite chieftain or perhaps a Hurrian or Horite lord menacing the whole countryside. This is problematical because in the balance of the Song it is Sisera, not Shamgar, never again mentioned, who is the enemy, and the poetic parallel is with Jael, clearly pro-, not anti-, Israelite (unless the mention of Jael is a late metrical intrusion into the text).

The brief mention of Shamgar's deliverance of Israel by killing six hundred Philistines (Judg. 3:31) not only omits the customary statements about his judging and giving the land peace for so many years, but also it is apparently awkwardly inserted into the narrative at this point, for the beginning of the Deborah account (4:1) clearly implies that there was no deliverer between Ehud and Deborah. Some LXX MSS, however, omit the reference to Ehud in Judg. 4:1 and repeat this reference to Shamgar after the similar anti-Philistine exploits of Samson (i.e., after 16:31).

The instrument used by Shamgar was perhaps an eight-foot metal-tipped pole. His adventure is strikingly similar to the story of Samson and the ass's jawbone (Judg. 15:14-16), and his name as well to one of David's heroes, Shammah, also a slaughterer of Philistines (II Sam. 23:11-12).

On account of these similarities and the uncertainties concerning Shamgar, some scholars regard him as the invention of a later editor who substituted him for dishonorable Abimelech in order to complete the number of judges as twelve. Yet it is not unlikely that Shamgar was a local Galilean person of the middle twelfth century B.C. who was victorious, possibly not over Philistines, but more likely over some unknown foe. He may have been a tyrant plundering

the caravans of prosperous foreign merchants and so regarded as a hero by the Israelites because he repulsed some of their enemies.

SHAMHUTH shām'hūth [שמח'ות]. An Izrahite or, preferably, a Zerahite (cf. I Chr. 2:6), who was the commander of a division of the Davidic militia for the fifth month (I Chr. 27:8). The name should, no doubt, be read as "Shammoth." See SHAMMAH 4.

SHAMIR shā'mār [שמיר, thorn]. 1. A Levite, son of Micah (I Chr. 24:24).

2. A village of Judah in the hill-country district of Debir (Josh. 15:48). Though Khirbet Somerah, ca. thirteen miles W-SW of Hebron, preserves the name, Shamir is probably el-Bireh, ca. a mile farther N.

3. A village in the hill country of Ephraim which became the home of the judge Tola, a man of Issachar (Judg. 10:1-2); possibly at or near the later site of Samaria. V. R. GOLD

SHAMLAI. Alternate form of SHALMAI.

SHAMMA shām'ā [שמת] (I Chr. 7:37). A member of the tribe of Asher, and the eighth son of Zophah.

SHAMMAH shām'ā [שמה]. Alternately: SHIMEAH shīm'ā [שמעא] (I Chr. 2:13; 20:7); SHIMEAH [שמעה] (II Sam. 13:3, 32); SHIMEI shīm'ī [שמעי] (*Kethibh*), שמעא (*Qere*) (II Sam. 21:21). 1. An Edomite chief whose father, Reuel, was the son of Esau and Basemath daughter of Ishmael (Gen. 36:13, 17; I Chr. 1:37).

2. The third son of Jesse the Bethlehemite; the father of the wily Jonadab, the dubious friend of Ammon (II Sam. 13:3, 32), and of Jonathan the slayer of a Philistine giant (II Sam. 21:21; I Chr. 20:7). Shammah was present at the sacrificial meal when Samuel was to anoint one of the sons of Jesse as king of Israel, but was not chosen by the prophet for the regal office (I Sam. 16:9). With his two elder brothers, Shammah was in the army of Saul during the Philistine campaign, and witnessed the defeat of the giant at the hands of his youngest brother (17:13 ff.).

3. A Hararite, son of Agee, who achieved the unusual distinction of being the third in the high command of David, known as the "Three." An illustration of his heroism is preserved in the exploit when he defended singlehandedly a field of lentils from a foraging raid of the Philistines and egregiously defeated them (II Sam. 23:11-12; cf. I Chr. 11:12-14, where Shammah is omitted and where his feat is attributed in a garbled form to Eleazar the son of Dodo). His son Jonathan appears among the com-

pany of Davidic heroes known as the "Thirty" (II Sam. 23:32; I Chr. 11:34). See *bibliography*.

Bibliography. Cf. S. R. Driver, *Notes on the Hebrew Text of the Books of Samuel* (2nd ed., 1913), pp. 362 ff.

4. A Harodite who was a member of the Mighty Men of David known as the "Thirty" (II Sam. 23:25). He was also commander of the 24,000 men of the Davidic militia, which served for the fifth month (I Chr. 27:8). His name is variously given as Shammoth of Harod (11:27) and Shamhuth, the Izrahite (27:8). "Shamhuth" appears to be a combination of the variants "Shammah" and "Shammoth," while "Izrahite" is read by Rudolph as "Zarhite."

E. R. DALGLISH

SHAMMAI shām'ī [שמי]. 1. A descendant of Jerahmeel of Judah (I Chr. 2:28, 32); son of Onam; father of Nadab and Abishur; brother of Jada.

2. A descendant of Caleb of Judah (I Chr. 2:44-45); son of Rekem; father of Maon.

3. A descendant of Judah, and son of Mered by his Egyptian wife Bithiah (I Chr. 4:17).

E. R. ACHEMEIER

SHAMMOTH shām'ōth [שמות] (I Chr. 11:27). A Harodite who was among the Mighty Men of David known as the "Thirty." In the parallel catalogue his name appears as "Shammah the Harodite" (II Sam. 23:25; see SHAMMAH 4), which may be presumed to be correct. The form "Harorite" (I Chr. 11:27) appears to be an error.

SHAMMUA shā mū'ā [שמוע]; KJV SHAMMUAH in II Sam. 5:14. 1. One of the sons of David who was born to him in Jerusalem by a concubine or wife. When David moved his capital to Jerusalem, he enlarged his harem from the residents of that city as a mark of his increased power and after the manner of oriental monarchs. Shammua here is identical with the Shimea mentioned in I Chr. 3:5.

2. A Reubenite; son of Zaccur (Num. 13:4). He was one of the twelve men sent out by Moses from the wilderness of Paran to spy out the land of Canaan before the conquest of that country by the Israelites.

3. A Levite; the father of Abda, and son of Galal (Neh. 11:17). He is called Shemaiah in I Chr. 9:16.

4. A priest; son of Bilgah; and the head of a priestly house (Neh. 12:18). There is some possibility that he is identical with 3 above.

E. R. ACHEMEIER

SHAMSHERAI shām'shə rī [שמשרי] (I Chr. 8:26). A Benjamite; the first-born son of Jeroham.

SHAPHAM shā'fām [שפם] (I Chr. 5:11-12). A Gadite dwelling in Bashan. He was second in authority in his tribe.

SHAPHAN shā'fan [שפן, rock badger, cony]. 1. The head of a family that figured prominently in the events of Josiah's reign and the last days of the Judean monarchy as well as the life of Jeremiah. He was secretary-financial officer to Josiah and was the bearer of the new-found "book of the law" from Hilkiah the priest to Josiah (II Kings 22:3-13; II

Chr. 34:8-20; see JOSIAH; DEUTERONOMY). He was also one of those sent by the king to consult Huldah the prophetess concerning the new book (II Kings 22:14). Shaphan and his sons seem to have been friends of the Josianic reform and were strong supporters of Jeremiah. Ahikam, one of the sons, who was also a court official and participant in the events surrounding the lawbook discovery (vss. 11, 14), saved Jeremiah from death at the hands of the mob during the critical days of King Jehoiakim (Jer. 26:24). The prophet sent his famous letter to the exiles (ch. 29) via Elasah, another of Shaphan's sons (vs. 3). And it was from the house of yet another, Gemariah, that the scribe Baruch read Jeremiah's scroll to the people in Jehoiakim's reign (36:10-12). The family's sympathy with the prophet was further evidenced by the fact that Jeremiah was put under the guardianship of Shaphan's grandson, Ahikam's son Gedaliah, who was appointed governor of fallen Judah by the Neo-Babylonian captors of Jerusalem (39:14; 40:5). Some scholars question the identification of all these men as sons of the same Shaphan, but their contemporaneity and their common prominence in the life of the nation strongly imply that they belonged to the same family.

2. The father of the Jaazaniah whom one of Ezekiel's visions disclosed as an inciter of the people to idolatry (Ezek. 8:11).

J. M. WARD

SHAPHAT shā'fāt [שפט, judged]. 1. A Simeonite; son of Hori (Num. 13:5). He was one of the twelve men sent out from the wilderness of Paran by Moses to spy out Canaan before the Israelite entrance into the land.

2. The father of the prophet Elisha. He is reported to have been from Abelmeholah, a town now thought to have been located on the E border of the territory of Manasseh, near the Jordan River. However, the site of the town is uncertain. Shaphat was living at the time Elisha was appointed the successor of Elijah (I Kings 19:16, 19; cf. vs. 20; II Kings 3:11; 6:31).

3. The last-born of the six sons of Shemaiah, and the grandson of Zerubbabel; a descendant of the royal line of David (I Chr. 3:22).

4. A Gadite chief who dwelt in the land of Bashan (I Chr. 5:12).

5. Son of Adlai. He was in charge of King David's herds in the valleys (I Chr. 27:29).

E. R. ACHTEMEIER

SHAPHER. KJV form of SHEPHER.

SHAPHIR shā'fār [שפיר, beautiful] (Mic. 1:11); KJV SAPHIR sā'—. A place mentioned in the wordplay section of Micah's prophecy in alliteration with *shōfār*, "trumpet" (proposed textual restoration).

Eusebius mentions a Shafir between Eleutheropolis and Ashkelon, which has led many to suggest an identification with one of three neighboring villages called es-Suwafir ca. 6½ miles NE of Ashkelon, and 3½ miles SE of Ashdod. The identification with es-Suwafir would put Shaphir in Philistine territory, rather than Judean as the text seems to require. The LXX simply translates the word καλῶς, "beautiful."

A more likely tentative identification is a place W

of Hebron, Khirbet el-Kom, on a hill ca. 3 miles E of Dawa'imeh, dominating the Wadi es-Saffar, which name would be an Arabic adaptation of Shaphir.

Bibliography. F.-M. Abel, *Géographie de la Palestine*, II (1938), 448; L. H. Grollenberg, ed., *Atlas of the Bible* (1957), p. 162. V. R. GOLD

SHARAI shâr'î [שרי] (Ezra 10:40). One of the returned exiles, contemporaries of Ezra, who had married foreign wives. The name is absent from the parallel I Esd. 9:34.

SHARAİM. KJV form of SHARAİM I in Josh. 15:36.

SHARAR shâr'är [שרר] (II Sam. 23:33). The father of Ahiam, who was one of the Mighty Men of David known as the "Thirty." In I Chr. 11:35 he is called Sachar. See SACHAR I.

***SHAREZER** shâ rē'zôr [שרעצר]. 1. A god mentioned beside Regem-melech (Zech. 7:2).

2. A son of Sennacherib who, according to II Kings 19:37 (= Isa. 37:38; שרעצר in Isa. A 37:38), with Adrammelech murdered his father in the "temple of Nisroch"; probably abbreviated from Akkadian DN-šar-ušur, "(name of a god) protect the king!"

A. L. OPPENHEIM

SHARON shâr'ân [שרון, plain or level country(?); Σαρόν, Σαρόννα]; KJV NT SARON sâr'ân. The maritime plain extending approximately from Joppa to S of Mount Carmel.

1. Geographical features
 2. In disputed passages
 3. History
 4. Figurative usage
- Bibliography

1. **Geographical features.** The plain extends from a point near Joppa N to the Crocodile River (Nahr Zerqa), the S border of the Plain of Dor. It is ca. 50 miles long and varies from 8 to 12 miles in width. It is a well-watered region and is traversed by five streams, three of which—Nahr Zerqa, Nahr Iskanderunch, and Nahr Mifjar—are perennial. The central part of the plain is characterized by an outcrop of Mousterian Red Sand, which rises to ca. 180 feet above the sea and causes the streams to flow to the N and to the S of it. The extensive sand dunes in the plain are a part of the Pleistocene hills which extend in places to the shore of the Mediterranean. The absence of any natural ports, and the presence of both marshes and sand dunes in the plain, made it a difficult area to colonize in OT times.

There were some small settlements in Sharon, such as that disclosed by the excavations N of Joppa at Tell Qasile, founded ca. 1200 B.C. However, the area was better known for its marshes and forests than for its cities during the early period of Israelite history. The reputation for fertility which the plain has enjoyed was doubtless the result of the presence of a forest of oak trees in the elevated areas, and of pastures and farming in the lower districts during years when the rainfall did not result in a seasonal flooding.

2. In disputed passages. There are three passages which have sometimes been interpreted as referring to a Sharon other than the maritime plain (Josh. 12:18; I Chr. 5:16; Acts 9:35).

A city named Sharon is probably not meant by "LASHARON" in Josh. 12:18, where the reference is to the city of Aphek located in Sharon.

The "pasture lands of Sharon" in I Chr. 5:16 are mentioned in a context with Bashan and Gilead, E of the Jordan River. Since the Chronicler alone refers to a Sharon in this region, some scholars have questioned this reference to Sharon, which elsewhere in the same source (I Chr. 27:29; see below) designates the maritime plain. One interpretation emends שרון (with support from one LXX MS), "SIRION" (an alternate name of Mount Hermon, and so referring to the pasture lands of Mount Hermon; see HERMON, MOUNT). Another alternative is that שרון is a corruption of מישר, "tableland," as a designation of the S territory of the tribe of Gad between the River Arnon and Heshbon (cf. Josh. 13:9, 17, 21). In view of this uncertainty, and since no other source knows of a Sharon E of the Jordan, it is probable that the word was used exclusively to designate the maritime plain.

"Sharon" (Σαρῶνα) in the phrase "all the residents of Lydda and Sharon" (Acts 9:35) also refers to the coastal plain.

3. History. The armies of Thut-mose III probably skirted the plain at the E in order to avoid the difficult terrain near the shore (see EGYPT § 2b). There is no reference to an association with Sharon on the part of the Hebrews until the time of David; Shitrai the Sharonite was in charge of the herds that pastured in Sharon (I Chr. 27:29). This is perhaps based upon an old record which represented David as extending his influence over the Plain of Sharon. These pastures were most likely used only during dry seasons when pasture was scarce in the hills.

4. Figurative usage. Either the fertility or the somewhat forbidding nature of the plain may be implied in the figurative use of "Sharon" in the OT. The rose (a type of crocus which grows profusely in the area of Sharon) in Song of S. 2:1 may be interpreted in either way. The parallelism of vss. 1-2, especially the phrase "as a lily among brambles," may indicate that the author had in mind the image of a beautiful flower in the midst of a jungle. A similar interpretation may be placed upon the references in Isaiah, where the allusions may be to the forests rather than to the fertility of the plain. The phrases "Sharon is like a desert" (Isa. 33:9), "the majesty [הדר]; cf. Lev. 23:40, where the word is used to refer to ornamental or goodly trees] of Carmel and Sharon" (Isa. 35:2), and "Sharon shall become a pasture for flocks" (Isa. 65:10) may be understood as having reference to the forests of the plain rather than to its fertility or productivity of crops. The use of ἐν τῷ ὄρει δρυμῶν in the LXX to render השרון of Isa. 65:10, and possible references by Josephus to the wooded area of the plain (see "Drymus" in War I.xiii.2 and "Drymi" in Antiq. XIV.xiii.3) can be cited as further evidence that the ancients thought of Sharon as a forbidding forest rather than an attractive farming area.

W. L. REED

SHARONITE shâr'ot nî [שרוני] (I Chr. 27:29). A term applied to Shitrai, the person in charge of David's herds in the Plain of Sharon. See SHARON 3.
W. R. REED

SHARUHEN shā rōō'ən [שריהן] (Josh. 19:6). A city of Simeon located in the SW part of Judah. In the parallel lists of cities the name is given as Shilhim (Josh. 15:32) and Shaaraim (I Chr. 4:31).

Sharuhēn is the same as the city of Š'rahūna, mentioned in Egyptian records as a town of the Hyksos, to which they retreated after the fall of their fortress at Avaris and their expulsion from Egypt. According to the memoirs of Ah-mose, the son of Ebana, inscribed in his tomb, this fortress was besieged for three years by Pharaoh Ah-mose I before being taken (ca. 1570 B.C.). Ca. ninety years later, when Thutmose III was invading Palestine to suppress a revolt, a civil war broke out in Š'rahūna between those who were favorable to the revolt and those who were loyal to the pharaoh; the latter won. The city was destroyed in the invasion of Shishak (ca. 925 B.C.) and does not seem to have been rebuilt.

Opinions have differed as to the location of Sharuhēn. One of the most popular has placed it at Tell esh-Sheri'ah, ca. seventeen miles SE of Gaza. However, this identification is based on the similarity of the names, and Sheri'ah is an Arabic word that means "watercourse." In 1928 Flinders Petrie excavated Tell el-Far'ah, eighteen miles S of Gaza on the Wadi Ghazze, under the impression that this was the site of BETH-PELET. He found a fortress there protected by walls of rammed earth, a trench, and a counterscarp with a sloping glacis, typical of Hyksos defense works, as well as numerous articles characteristic of the people, including 114 scarabs, one of which bore the name of the Hyksos king Khian. Practically all the archaeologists have, therefore, identified Tell el-Far'ah with Sharuhēn; and the government of Israel, in assigning names to localities in the country, changed the name of Tell el-Far'ah to Tell Sharuhēn.

Bibliography. The Egyptian records are found in J. H. Breasted, *Ancient Records of Egypt*, II (1905), 13, 416. For the researches at Tell el-Far'ah, see *Beth-Pelet*, I (1930), and II (1932).

SHASHAI shā'shāi [ששי; Apoc. Σείσις] (Ezra 10:40; I Esd. 9:34); KJV Apoc. SESIS sē'sis. One of the returned exiles, contemporaries of Ezra, who had married foreign wives.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 41; R. A. Bowman, *Exegesis of Ezra, IB*, III (1954), 660-61.
B. T. DAHLBERG

SHASHAK shā'shāk [ששק] (I Chr. 8:14, 25). A son of Elpaal of Benjamin. He had eleven sons.

SHAUL shōl [שׂאול, traditionally asked for, but perhaps dedicated (to God); same as SAUL; cf. שׂאול, שׂאול];

KJV SAUL sōl in Gen. 36:37-38; SHAULITES shōl'its. 1. The sixth king in Edom "before any king reigned over the Israelites" (Gen. 36:37-38; I Chr. 1:48-49). The identification of his territory is uncertain. Either "Rehoboth on the Euphrates" (RSV) or the less specific "Rehoboth by the river" (LXX and KJV) can be read. Mesopotamian *Rahba*; the Palestinian REHOBOTH, ca. twenty miles SW of Beer-sheba; or probably an Edomite site now unknown may be indicated.

2. An Israelite; son of Simeon and a Canaanite woman (Gen. 46:10; Exod. 6:15; I Chr. 4:24); head of a clan of Shaulites (Num. 26:13).

3. A Levite, of the sons of Kohath (I Chr. 6:24—H 6:9; cf. Joel in vs. 36—H 21).

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), pp. 136, 216. L. HICKS

SHAVEH, VALLEY OF shā'və [עמק שוה, *from* שוה, to be even] (Gen. 14:17). The valley in which Abraham, victorious over Chedorlaomer and his confederates, was met by the king of Sodom and by Melchizedek king of Salem, according to Gen. 14:17-18, where Shaveh is glossed as the "King's Valley" (KJV "King's Dale"). The mention of the "King's Valley" in II Sam. 18:18 points to a location in the immediate vicinity of Jerusalem, in relation to the royal estate known as the KING'S GARDEN. Hence the Valley of Shaveh, or King's Valley, can be regarded as synonymous with the Kidron. See KIDRON, BROOK.

Bibliography. F.-M. Abel, *Géographie de la Palestine*, I (1933), 402-3. J. Simons, *Jerusalem in the OT* (1952), pp. 14-15, endeavors to locate the King's Valley N of the city.

G. A. BARROIS

SHAVEH-KIRIATHAIM shā'və kīr'īə thā'əim [שוה קרייתים, the plain of Kiriathaim]. The location in Transjordan where CHEDOR-LAOMER subdued the EMIM (Gen. 14:5). Apparently it was the plain around KIRIATHAIM. Kiriathaim has frequently been identified with modern el-Qereiyat, 5½ miles W-NW of Dibon, but no remains have been found there from earlier than the first century B.C.

E. D. GROHMAN

SHAVING. The custom of shaving the face and head was less common among the Hebrews than among the Egyptians and Romans (see BALDNESS; BEARD; HAIR; RAZOR). However, shaving was practiced by the Hebrews under certain circumstances. As a sign of mourning Job shaved his head (Job 1:20; the verb here is גז; it is used in Jer. 7:29; Mic. 1:16; in referring to the cutting of human hair and frequently in describing the "shearing" of sheep [Gen. 31:19; Deut. 15:19; etc.]). A more common term for shaving (lit., "to make bald") was הלל, rendered in the LXX as ξυράω (cf. Acts 21:24; I Cor. 11:5-6). Levites were instructed to "go with a razor over all their body" (Num. 8:7; KJV "shave all their flesh"). It was considered appropriate that Joseph should shave before appearing in the court of Pharaoh (Gen. 41:14). A person detected with leprosy of the head was instructed to shave, but avoiding the infected place (Lev. 13:33; 14:8-9). Priests were warned against shaving off the edges of their beards (Lev. 21:5). Nazirites (see NAZIRITE) were to let their hair

grow, but in case of defilement by contact with a dead body, and at the termination of the Nazirite vow, they shaved their heads (Num. 6:9, 18). Women taken captive in war, and before being married to an Israelite, were required to shave their heads, doubtless as a sign of mourning for their parents (Deut. 21:12-13). The shaving of Samson's head was a mark of his humiliation (Judg. 16:17, 19, 22), as was the case with the servants of David whose beards were shaved on one side by the Ammonites (II Sam. 10:4-5; I Chr. 19:4). The prophets saw the shaven head as a symbol of impending doom (Isa. 6:10; Jer. 41:5; 48:37); Levitical priests were forbidden both to shave their heads and to let their hair grow long (Ezek. 44:20).

Fig. RAZ 6.

W. L. REED

SHAVSHA shāv'shə [שושא] (I Chr. 18:16). Alternately: SERAIAH sī rā'yə [שרייה] (II Sam. 8:17); SHEVA shē'və [שיא (*Kethibh*), שוי (*Qere*)] (II Sam. 20:25); SHISHA shī'shə [שישא] (I Kings 4:3). A high official who discharged the office of scribe (סופר; cf. Akkad. *sepēru*) in the royal court of David (II Sam. 8:17; 20:25; I Chr. 18:16). His sons ELIHOREPH and AHIJAH served in the same capacity during the reign of Solomon (I Kings 4:3).

Of the four variant forms of this name, the weight of the textual evidence inclines toward the assumption that Shavsha or Shisha is the original name. However, whether the name is of Babylonian origin (Shawshu = Shamshu, "sun") or is a hypocoristic of an irrecoverable name is a presently unanswerable question. On the other hand, the secretariat of the united kingdom under David and Solomon assumed increasingly an international complexion.

E. R. DALGLISH

SHEAL shē'al [שאל, possibly an error for לאל, May (God) grant! Apoc. Ἀσάηλος] (Ezra 10:29; I Esd. 9:30); KJV Apoc. JASAEEL jā'sī əl. One of the returned exiles, contemporaries of Ezra, who had married foreign wives.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 257, no. 1295 (cf. p. 209); R. A. Bowman, *Exegesis of Ezra, IB, III* (1954), 659-60. B. T. DAHLBERG

SHEALTIEL shē əl'tī əl [שאלתיאל, שאלתיאל (*probably the original form; see bibliography*), perhaps God is a shield, or God is victor; Σαλαθιήλ]; KJV SALATHIEL sə lā'thī əl in I Chr. 3:17; Matt. 1:12; Luke 3:27; Apoc. SALATHIEL (II Esd. 3:1). A son of King Jeconiah (Jehoiachin; cf. I Chr. 3:17; Matt. 1:12), not of Neri (cf. Luke 3:27; *see bibliography*); the father of Zerubbabel the governor in postexilic Judah under the Persian king, Darius I according to all references (Ezra 3:2; Neh. 12:1; Hag. 1:1; etc.) except I Chr. 3:17-19, where he appears as his uncle. For various theories to account for the latter discrepancy, see ZERUBABEL.

In II Esd. 3:1 he is identified with Ezra, but this is chronologically impossible (*see bibliography*) and is due probably to a redactor's gloss.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 63n. On the passage in II Esd. 3:1, see G. H. Box, "IV Esra," in R. H. Charles, *Apoc. and Pseudep. of the OT*,

II (1913), 549-50 (cf. p. 561n). On the ancestry of Shealtiel according to Luke 3:27, see J. Gabriel, *Zorobabel* (1927), pp. 37-38.
B. T. DAHLBERG

SHEARIAH shē'ar rī'ə [שעריה] (I Chr. 8:38; 9:44). One of the six sons of Azel of Benjamin.

SHEARING-HOUSE. KJV translation of בית עקד (RSV BETH-EKED) in II Kings 10:12, 14.

SHEAR-JASHUB shē'ar jā'shub [שאר ישוב] (Isa. 7:3). The symbolic name of the first-born son of Isaiah (cf. Isa. 8:18). Its meaning could be either "(Only) a remnant will return (from exile)" or "A remnant will return (to God)" (cf. Jer. 3:7; Hos. 6:1). Contexts and the emphatic position of "remnant" indicate the former, though there are suggestions of both meanings: it will be a purified remnant that returns. Isaiah's doctrine of the remnant conveys both judgment and promise. It must have taken shape in his mind early in his ministry, since Shear-jashub was born by 737/736 B.C.

See also REMNANT; IMMANUEL § 1.

C. R. NORTH

SHEATH [גדר, תער, SCABBARD in Jer. 47:6; cf. Ugar. *t'rt*; θήκη]. The case or covering of a sword. The sheaths for the swords of David, Joab, and Peter (I Sam. 17:51; II Sam. 20:8; John 18:11) are mentioned; and figuratively, that for the sword of the threatening judgment of God (I Chr. 21:27; Jer. 47:6; Ezek. 21:3-5—H 21:8-10; cf. Ezek. 21:30—H 21:35). Stripping the bow naked in Hab. 3:9 (cf. KJV) is paraphrased as stripping it from its sheath in the RSV.

J. A. SANDERS

SHEBA shē'bā [שבא]. 1. The progenitor of a family in the tribe of Gad. He was descended from Abihail. According to the Chronicler the family was enrolled in the genealogical registry of the days of Jotham, king of Judah, and Jeroboam II, king of Israel (I Chr. 5:13).

2. A Benjaminite of the hill country of Ephraim; a member of the clan of the Bichrites (see BICHRIT). He perished in an unsuccessful attempt to overthrow the throne of David (II Sam. 20:1-22).

In the troubled period that followed the suppression of the revolt of Absalom, when the ambiguous attitude of the king (II Sam. 19:1 ff), the jealousy between Judah and Israel (II Sam. 19:41-43), and the powerful faction that had anointed Absalom king (II Sam. 19:8, 10) provided the tinder for another political conflagration, Sheba became the spark for the new revolution against the house of David. As a Benjaminite he was, no doubt, able to secure the loyalties formerly attached to the house of Saul, and as an opponent of David he gave expression to the deep-seated hatred between the royal houses.

The utter seriousness of this extradynastic upheaval was immediately perceived by David, who ordered Amasa, the new commander of the army, to gather the Judean forces within three short days. When Amasa failed to appear on the third day, David commissioned Abishai to lead the royal guards in an attack upon Sheba. Joab, who appears to have

been biding his time, accompanied his brother Abishai, but when an opportunity presented itself to liquidate his rival, he slew Amasa at Gibeon, where the latter had met up with his forces. Sheba had established himself in the meantime in Abel of Bethmaacah with a force of Bichrites. Joab, who now assumed command, besieged the city and spared it from destruction only because the inhabitants cast the head of Sheba over the wall.

E. R. DALGLISH

3. A town of Simeon in the S of Judah (Josh. 19:2). In the passage in which the name occurs, the sum of the cities is mentioned as thirteen, but there are actually fourteen names. To account for this, some scholars have supposed that the words "and Sheba" are due to a scribal error from the preceding name, Beer-sheba. Others consider Sheba to be the same as Shema in the parallel passage in Josh. 15:26; the latter name could easily have arisen as a scribal error from Sheba. On this basis, it is plausible to suppose that Sheba and Beer-sheba (lit., "well of Sheba") were two parts of the same city, the former being the first settled and deriving its name from the seven (Hebrew *shebha'*) lambs with which Abraham made a covenant with Abimelech of Gerar (Gen. 21:28-29). Sheba would therefore be Tell es-Saba', where there are indications of settlement beginning with the Middle Bronze period (2100-1600 B.C.); it is located about two miles E of the modern Bir es-Saba'. See also SHIBAH.

S. COHEN

4. See SABEANS.

SHEBA, QUEEN OF shē'bā [שבא; Old S Arab. سبأ] (I Kings 10:1-13). A queen who, having heard the fame of Solomon's wisdom, "came to test him with hard questions," and found that his wisdom and prosperity were such as to "surpass the report" which she had heard. She presented the king with gold, spices, and precious stones, received gifts in return, and "went back to her own land, with her servants." The exchange of goods mentioned in this account seems highly probable. The Assyrian Tiglath-pileser IV records tribute from an Arabian queen in his campaign of 732-731 B.C. and lists Sheba among the tribes of NW Arabia, while S Arabic inscriptions give evidence for Sabeans in S Arabia identical with those of the NW. The Sheba in the S was a center for overland trade, and the gifts described in Kings are ones which would come from the S. There is every indication that trading operations such as this were an important part of Solomon's economic wisdom (cf. I Kings 9:26-28; 10:11-12, 22-29). It is true that the recounting of riddles and stories was part of any cultured conversation among the Arabs, and that negotiation involved a great deal of such apparently unrelated conversation. The primary, although not necessarily so stated, objective of the meeting of Solomon and the Queen of Sheba was probably trade.

Josephus connects the Queen of Sheba with Ethiopia (Antiq. II.x.2; VIII.vi.5-6), and Arabic legends give considerable detail about the queen who married Solomon. It is true that the Sabeans founded colonies in Ethiopia. However, the tradition, apparently passed on from the Arabs to the Abyssinians, that the Abyssinian royal line has its direct descent

from Solomon and the Queen of Sheba, is difficult to substantiate.

D. HARVEY

SHEBAH. KJV form of SHIBAH.

SHEBAM. KJV form of Sebam. See SIBMAH.

SHEBANIAH shēb'ā nī'ō [שבניהו, שבניה]. 1. One of the priests appointed to "blow the trumpets before the ark of God" as it was brought into Jerusalem during David's reign (I Chr. 15:24).

2. One of the Levites leading the worship at the public fast associated with Ezra's reading the Law (Neh. 9:4-5), and perhaps to be identified with one of the Levites of this name signatory to the covenant of Ezra (Neh. 10:10—H 10:11).

3. Another Levite signatory to the covenant of Ezra (Neh. 10:12). There is some MS evidence for reading "Shecaniah" (שכניה) either here or for 2 above.

4. A priestly house in the postexilic period (Neh. 12:14), a representative of which was among those signatory to the covenant of Ezra (Neh. 10:4—H 10:5). Numerous MSS, as well as the related list of Neh. 12:3, suggest the possibility that "Shebaniah" may in this case be a misreading for "Shecaniah" (שכניה).

B. T. DAHLBERG

SHEBARIM shēb'ā rīm [השברים, quarries, from שבר, to break(?)]. A place between Ai and Jericho to which the men of Ai pursued the Israelites (Josh. 7:5). Alternately the word has been translated "the quarries" rather than as a proper name.

SHEBAT shē'bāt [שבט; Apoc. Σαβάρ] (Zech. 1:7; I Macc. 16:14); KJV SEBAT sē'—; KJV Apoc. SABAT sā'—. The eleventh month in the Hebrew CALENDAR (January-February); the same as Akkadian *shabātu*.

SHEBER shē'bər [שבר, lion(?)] (I Chr. 2:48). Son of Caleb and his concubine Maacah, listed in the genealogy of the descendants of David.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 230.

SHEBNA shēb'nā [שבנא, abbreviation of return now, O Yahweh!]. Alternately: SHEBNAH [שבנה]. State secretary in the court of King Hezekiah (II Kings 18:18 ff; Isa. 36:3 ff), and, if the man referred to in Isa. 22:15 ff is the same Shebna, at one time palace governor. The full form of the name was held by others in the OT—i.e., Shebaniah (שבניהו; Neh. 9:4, etc.). It was a common Palestinian name and occurs on seals from Lachish and elsewhere.

When Sennacherib of Assyria had captured most of the cities of rebellious Judah in 701 B.C. and, apparently unmoved by Hezekiah's tribute composed of the temple treasures, sought the capitulation of Jerusalem, Shebna was one of three emissaries sent by Hezekiah to negotiate with the Assyrians. Incensed by the Assyrian disdain for the power of Israel's God, these statesmen reported to Hezekiah (II Kings 18:37) and were then sent to the prophet Isaiah for the counsel of the Lord (19:1 ff). Isaiah prophesied severe chastisement for the city, as a consequence of its re-

fusal to heed the divine injunction against involvement in international power politics (Isa. 37:21-32; cf. ch. 7), but he also predicted the failure of the Assyrian siege (37:33 ff). There is an apparent condemnation of Shebna and the other officials in this oracle because of their counsel of an anti-Assyrian rebellion. It is possible that this attitude was one of the causes of Isaiah's earlier denunciation of Shebna (22:15-25).

According to some scholars, Jerusalem's immunity from Sargon's campaign of 711 B.C., when rebellious Ashdod was punished (Isa. 20:1), was due to the shift in Judean policy which accompanied the demotion of Shebna from palace governor to state secretary—i.e., the government returned to an attitude of submission. The oracle in Isa. 22:15 ff would then have been delivered prior to 711. But Shebna did not fall very far from his earlier post. The state secretary was second only to the "officer-over-the-year," according to the organization of Solomon's government (I Kings 4:2 ff), and, according to the account of the 701 episode, a ranking official in the later hierarchy as well. And further, Shebna's rebellious counsel was obviously still effective in 701 (Isa. 37:23 ff).

Some scholars have insisted that the Shebna of Isa. 22 and that of chs. 36-37 are different men. The stated cause of Isaiah's denunciation in the former passage is the official's preoccupation with the building of his own tomb, presumably to the neglect of his state duties.

Isa. 22:21-22 implies that the palace governor had broad powers over the nation at large (cf. Joseph's position in the Egyptian government in Gen. 45:8). He was apparently the king's chief lieutenant. The office referred to in Isa. 36-37 (II Kings 18-19) was also very important. The story shows that the state SCRIBE was one of the principal statesmen in Judah. He was not merely the "recorder," a title used in some English translations. Several commentators have preferred the translation "remembrancer" as an indication of the secretary's intimate role at the front of the king's retinue.

J. M. WARD

SHEBUEL shī bū'əl, shēb'yōōl [שבואל]. Alternately: SHUBAEL shōō'bī'əl [שבואל]. 1. Son of Gershon; a descendant of Moses; and a Levite in the temple. He assisted the priests in the temple service, the division of duties (I Chr. 26:26-32) reflecting the usage of the third century B.C. He also had charge of the temple treasuries (I Chr. 26:24). He is called Shubael in I Chr. 24:20.

2. A son of David's seer Heman (I Chr. 25:4). A Levite, he assisted with the temple music. He is called Shubael in vs. 20.

E. R. ACHTEMEIER

SHECANIAH shēk'ā nī'ō [שכניהו, שכניה], Y has taken up his abode]; KJV SECHENIAS sēk'ā nī'ō (I Esd. 8:29, 32), JECHONIAS jēk'— (I Esd. 8:92). 1. A descendant of David, of the exiled King Jehoiachin (Jeconiah), and of Zerubbabel (I Chr. 3:21-22); father of SHEMAIAH 10. Cf. 3 below.

2. A priest in the time of Hezekiah who assisted in distributing the temple offering among his fellow clergymen (II Chr. 31:15).

3. The father of HATTUSH 1, who returned to Judah with Ezra from the Exile (Ezra 8:3; I Esd. 8:29); probably to be identified with 1 *above*. See SHEMAIAH 10.

4. Son of Jahaziel, and one of those who returned to Judah with Ezra from the Exile (Ezra 8:5; I Esd. 8:32).

5. Son of Jehiel, and one of those who had married a foreign wife while in exile in Babylon (Ezra 10:2; I Esd. 8:92). It was he who suggested to Ezra that the returned exiles put away the foreign wives and children in the midst of the company of Israel, according to the commandments of the law.

6. The father of SHEMAIAH 22, one of those who helped to repair the wall of Jerusalem in the days of Nehemiah (Neh. 3:29).

7. The father-in-law of Tobiah the Ammonite (Neh. 6:18).

8. A priest who returned with Zerubbabel out of exile in Babylon (Neh. 12:3; I Chr. 24:11). He is probably identical with SHEBANIAH in Neh. 10:4; 12:14.

E. R. ACHEMEIER

SHECHEM shék'əm [שכם]; **SHECHEMITES** — שְׁכֵמִי [שכמי]. 1. Son of Hamor the Hivite. His rape of Jacob's daughter DINAH was avenged by her brothers Simeon and Levi (Gen. 34; Josh. 24:32; Judg. 9:28). See also SHECHEM (CITY) §§ 1, 3.

2. One of the descendants of Joseph and of Manasseh, Joseph's first-born son (Num. 26:31; Josh. 17:2). The Shechemites derive their name from him as their progenitor.

3. The second-born son of Shemida of the tribe of Manasseh (I Chr. 7:19), perhaps identical with 2 *above*.

E. R. ACHEMEIER

***SHECHEM (CITY)** shék'əm [שכם, shoulder or slope?; Συχεμ]; KJV alternately **SICHEM** sī'kəm (Gen. 12:6); **SYCHEM** (Acts 7:16). An ancient

Canaanite city in the hill country of Ephraim (Josh. 20:7) near Mount Gerizim (Judg. 9:7); an important Israelite religious and political center.

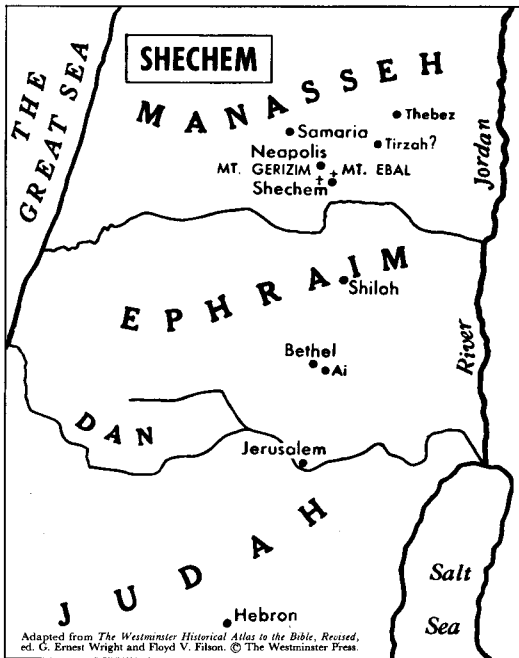

1. **The name.** Since the time of Eusebius many have thought that the city received its name from Shechem son of Hamor (Gen. 33:18-19). It now seems more probable that the word meant "shoulder" or "slope" and that it derived from the geographical setting of the city, where the terrain can be thought of as the slope of Mount Gerizim* and Mount Ebal. (See Gen. 48:22, alluding to Shechem as one shoulder [שכם אחד; RSV "one mountain slope"; KJV "one portion"].) Further evidence of an early Hebrew practice of designating a geographical feature near Shechem by means of anatomical terminology is the expression שְׁכֵמֵי הָאָרֶץ, "navel of the land" (Judg. 9:37; RSV "center of the land"). The phrase refers either to one of the mountains overlooking Shechem—possibly Mount Gerizim—or to the plain W of the city. Fig. GER 24.

The appearance of the name in Egyptian texts which are usually dated in the nineteenth century B.C. makes it certain that the Hebrews acquired it from the Canaanites. The name designates the Canaanite city and its vicinity in two texts from the Twelfth Egyptian Dynasty and in one of the Amarna Letters, and is vocalized variously as Sakmami, Sakmami, and Sekmem. Shechem is also mentioned on one of the early-eighth-century ostraca from Samaria in a context which suggests that the people of Shechem sent wine to the king of Samaria.

The Shechemites (השכמי; Num. 26:31) are said to be the family of SHECHEM (2), a descendant of Manasseh. The poetical form of Hos. 6:9 has made it difficult to translate the expression דרך ירצחו שכמה (KJV "murder in the way by consent"; mg. "with one shoulder," or "to Shechem"), although most modern translations render it "murder on the way to Shechem." "SYCHAR" is thought by some scholars to be an error for "Shechem" (John 4:5); the Old Syriac gospels read "Shechem."

2. **Location.** Shechem is located ca. forty miles N of Jerusalem at the pass between Mount Gerizim and Mount Ebal where the main N-S and E-W highways converge. The many OT references to the city do not make it clear whether the city was located in the pass or near its E end. Following Josephus, who reports a visit by Vespasian to Shechem, which is also called Neapolis (War IV.viii.1), many geographers have placed the city in the pass where Nablus (modern form of "Neapolis") is located. However, as a result of a series of excavations at Tell Balatah, ca. 1½ miles E of Nablus, near the famous "Jacob's Well" at the E end of the pass, it is now certain that this mound is ancient Shechem. Fig. EBA 2.

The first excavations were conducted by German archaeologists who worked at various periods between 1913 and 1934. Beginning in 1956 with a preliminary re-examination of the site, the Drew-McCormick Expedition working in collaboration with the American School of Oriental Research, conducted a major campaign in 1957, and announced plans to continue the excavations. Significant discoveries have been made which supplement and clarify the biblical history of the city and leave no doubt that the great city walls, the temple (see SHECHEM, TOWER OF), and

Adapted from *The Westminster Historical Atlas to the Bible*, Revised, ed. C. Ernest Wright and Floyd V. Filson. © The Westminster Press.

the houses were those of ancient Shechem. The excavations have demonstrated that the city reached its height during the Hyksos period, *ca.* the latter half of the seventeenth century B.C., in the patriarchal period. Although the chronology of Tell Balatah, especially during the Chalcolithic and Early Bronze periods (*ca.* 4000 to 2000 B.C.) and during the eighth to the fourth centuries B.C., is uncertain, archaeology has demonstrated the importance of the city, whose fortunes fluctuated with the political conditions operating in Canaan. It suffered a moderate decline at the time of the Hebrew conquest, a major destruction about the time of Abimelech (Judg. 9:45-46), and possibly a period of abandonment after the fall of the N kingdom, but was rebuilt in the Hellenistic period and occupied until *ca.* 100 B.C. See § 4 below.

A good water supply, a fertile plain directly E of the city, and control of the converging highways, especially the only E-W road through the mountains of N Canaan, combined to make Shechem a wealthy and powerful city. The fact that the city was not built on elevated terrain put it at a disadvantage from a military viewpoint, exposed as it was on the E and the W and overshadowed by Mount Ebal on the N. Large stone walls were constructed for the purpose of defending the city against attack. Their strength is attested by the fact that on one occasion the city was conquered by ambush (Judg. 9:35) rather than frontal attack, although the latter was possible with the use of siege methods.

3. History. Scholars do not agree on the dating of the OT sources which mention Shechem, but there is a trend toward the view that some must be dated as early as the ninth century B.C. and that they rest upon still earlier oral or written traditions. The city is referred to frequently in the patriarchal narratives. Abraham visited the place (שֵׁכֶם) of Shechem when the Canaanites were in the land (Gen. 12:6-7). The report of a theophany and the building of an altar, probably at the oak of MOREH nearby, suggest that the Shechem area, if not the city itself, was a religious center for Abraham.

Jacob, on his return from Paddan-aram, also visited Shechem and was kindly received by the inhabitants, who sold him land and permitted the building of an altar to honor his God, El-Elohe-Israel (Gen. 33:18-20). A part of the same tradition is the report of Jacob's return to the oak near Shechem, where he hid the foreign gods and earrings after a theophany at Bethel. An independent tradition in Gen. 34 reports the rape of Dinah by Shechem, the son of Hamor, followed, after a period of negotiation, by a surprise attack on the city by Jacob's sons, Simeon and Levi. The report of the killing of all the males and the plundering of the city has the appearance of a later embellishment, especially in view of Joseph's visit to Shechem, where his brothers were pasturing the flocks (Gen. 37:12-14). However, the peaceful intentions of Jacob and his desire to preserve amity with the Canaanites of the Shechem area are evident in all the narratives. Further indication of the importance of Shechem in the patriarchal period is the report that the bones of Joseph were buried there (Josh. 24:32; in the speech of Stephen there is an error in locating the burial place of all the patriarchs at Shechem rather than Hebron [Acts 7:16]).

Joshua is pictured as calling an assembly of the tribes at Shechem following the initial successes in the conquest of Canaan (Josh. 24:1). Because of the reports that assemblies were also held at SHILOH (18:1), there is some question of the relationship of the two cities. It has been argued that Shechem was a military-political center and Shiloh a religious center in the early period of tribal history. However, it is more probable that both cities served as headquarters and shrines for the tribes prior to the establishment of the capital at Jerusalem, although it is not possible to determine their relative importance. The covenant concluded by Joshua at Shechem, resulting in a twelve-tribe confederacy, rests on an authentic tradition and was an important factor in the survival of the tribes during the following centuries. Recollection of the religious significance of Shechem is preserved in the statement that after making the covenant there and recording the laws, Joshua placed a great stone under the oak "in the sanctuary of the LORD" (Josh. 24:26). The exact nature of the laws mentioned is uncertain, but it is thought that some of them, together with ancient Shechemite liturgies, have been preserved in Deut. 11:26-32; 27.

Aside from brief references to Shechem's place in the division of the land (Num. 26:31; Josh. 17:2, 7; 20:7) and its designation as one of the cities of refuge (Josh. 21:21; see CITY), it is not mentioned again until *ca.* 1100 B.C., the time of Abimelech. Although Shechem was his birthplace (Judg. 8:31) and the place where he was made king (9:6), he was not able to control the city. After ambushing its defenders he destroyed the city and sowed it with salt (9:45). It was to the men of Shechem that Jotham delivered his famous parable (9:7-20).

During the United Monarchy, Shechem is not mentioned, but it doubtless continued in a minor role. At the death of Solomon, Rehoboam went to Shechem to be crowned king (I Kings 12:1)—an indication of its political importance. After Rehoboam's failure to win support, Jeroboam "built Shechem" (vs. 25)—i.e., added to its buildings. However, he did not rule there long, doubtless because of difficulty in defending the city and a desire for a capital less accessible to Judean attack.

Other references to Shechem indicate only that the city continued to be occupied until the time of Jeremiah (Jer. 41:5); mention of it in alluding to the territory of Ephraim suggests that it had some importance both directly before and after the fall of the N kingdom (Pss. 60:6; 108:7; Hos. 6:9). The fate of Shechem during the Assyrian and Babylonian invasions is not described, and there is no mention in the OT of the city during the postexilic period. However, Josephus records that it was the home of the Samaritans (Antiq. XI.viii.6) and that it was destroyed by John Hyrcanus (Antiq. XIII.ix.1). The inhabitants of Shechem are called the "foolish people" (Ecclus. 50:26), and most scholars think that Bethulia in the book of Judith (4:6) is Shechem. A small community of Samaritans continue to dwell in the region; their synagogue is located on the S of Nablus *ca.* three miles from Shechem.

42. The excavations at Shechem after the 1960 season: I, the E gate; IV, the NE gate; V, the temple

camp sites (ca. 4000 B.C.), succeeded by a gap in occupation in the excavated areas until ca. 1800 B.C., although pottery of the intervening centuries was present. Soon after 1800 B.C. formidable defenses were erected and a palace, enclosed by a strong wall (formerly erroneously called the "temenos wall" on the assumption that it was primarily associated with the temple), dominated the city. The palace was rebuilt at least three times during the Hyksos period, and the street which skirted the temple inside the enclosure wall was rebuilt nine times. Ca. 1650 B.C. the palace area was filled over, the line of the city wall was moved to the N (the Cyclopean wall), and the great temple of Shechem was built over the buried palaces. Destroyed ca. 1550 B.C. during the Egyptian campaigns, the temple was rebuilt on a smaller scale and with a different orientation. This second and smaller temple, the existence of which was unrecognized before the 1960 excavations, was standing when the city passed peacefully into the hands of the invading Israelites and became the center of their tribal confederacy. Abimelech's destruction of the temple left the building a ruin and the site a place for storage pits until in the restoration of the city during the period of the monarchy a granary was built over the remains of the temple. The excavations have established a twelfth-century date for the period of the origin of the Abimelech story. There was no radical destruction of the city in the thirteenth century as was the case with Hazor and other N cities. Shechem enjoyed considerable prosperity in the ninth-eighth centuries, and the houses of the period were substantial structures. However, the Assyrian invasions of 724-721 B.C. totally destroyed the city, and left masses of fallen bricks and burned beams in all buildings excavated. Shechem reverted to the status of a village until the

Samaritan period, the houses of which showed that between ca. 325 and 100 B.C. Shechem was a prosperous city, probably rebuilt with the deliberate intent of making it a religious, if not political, rival of Jerusalem. The coin series found in the excavations ranges from the fourth century to ca. 110 B.C., and abruptly stops. This suggests the final destruction of Shechem may be attributed to John Hyrcanus, perhaps on the occasion of his destruction of Samaria in 107 B.C.

L. E. TOOMBS

SHECHEM, TOWER OF [מגדל שכם, *migdal shekhem*, Migdal (Tower) of Shechem; see TOWER]. A place destroyed by Abimelech, whose attack resulted in the destruction of the stronghold of the house of El-berith and the death of ca. one thousand men and women who defended it (Judg. 9:46-47).

It was formerly thought that the Tower of Shechem was located some distance from Shechem, because of the statement that its people entered the stronghold only after hearing of the destruction of the city (vs. 46). It is more probable that the *Migdal* was on the acropolis in Shechem, where there was located the stronghold, or temple-fortress, of El (cf. 9:4, 6: "the house of Baal-berith" and "Beth-millo"). In the excavations at SHECHEM (Tell Balatah) a large building measuring ca. sixty-eight by eighty-four feet, with walls ca. seventeen feet thick, has been identified as the temple-fortress and the Tower. W. L. REED

SHEDEUR שְׁדַיִם [שְׁדַיִם, Shaddai is light, or Shaddai is fire]. The father of Elizur, who was the leader of Reuben in the wilderness (Num. 1:5; 2:10; 7:30, 35; 10:18). The spelling of the name could suggest a derivation from either 'ôr, "light," or 'ûr, "fire." The former is the more probable in view of OT references to the light of the deity (e.g., Ps. 36:9—H 36:10; Isa. 2:5).

For the meaning of "Shaddai," see GOD, NAMES OF, § C2a.

SHEEP [צֹן, small cattle; πρόβατον]; SHEPHERD [רֹעֶה; ποιμήν]. References to sheep in the Bible occur more than five hundred times, if one includes also allusions to LAMB and RAM. That the sheep was early domesticated in Palestine is suggested by the Cain-Abel story in Gen. 4. Sheep represented the chief wealth and the total livelihood of pastoral peoples, providing the peoples of the Bible with food to eat (e.g., I Sam. 14:32), milk to drink (e.g., Isa. 7:21-22), wool for the weaving of cloth (e.g., Lev. 13:47-48; Job 31:20; Ezek. 34:3), and even rough clothing (Heb. 11:37; cf. Zech. 13:4; Matt. 7:15) and covering for tents (Exod. 26:14). Inevitably also sheep served as a medium of exchange (see II Kings 3:4; Ezek. 27:18-19) and figured centrally in the sacrificial system (Exod. 20:24; Num. 22:40; John 2:14), being offered for a burnt offering (Lev. 1:10), a sin offering (4:32), a guilt offering (5:15), and a peace offering (22:21). Fig. SHE 43.

The chief Palestinian breed of sheep is today, and doubtless has been from the beginning, the so-called broad-tailed sheep (*Ovis laticaudata*). The tails, which commonly weigh ten pounds and even as

43. Lower register shows shepherds driving a sheep and a goat; from Nippur

much as fifteen pounds, have always been regarded as a delicacy, and, for their very choiceness, are called for on occasion as a sacrifice (see, e.g., Exod. 29:22-25).

In view of the very nature of the sheep—affectionate (II Sam. 12:3), unaggressive (Isa. 53:7; Jer. 11:19; John 10:3-4), relatively defenseless (Mic. 5:8; Matt. 10:16), and in constant need of care and supervision (Num. 27:17; Ezek. 34:5; Matt. 9:36; 26:31)—and the corresponding relationship between the sheep and the shepherd, it is not at all surprising that in figurative-theological language the sheep and the shepherd are repeatedly, and often movingly, employed. In the OT one thinks at once of such lines as these: “The LORD is my shepherd, I shall not want” (Ps. 23:1); or of Ezekiel (37:24 ff), looking forward to Israel’s reconstitution: “They shall all have one shepherd. . . . They shall dwell in the land where your fathers dwelt I will make a covenant of peace with them . . . ; and I will bless them”; or of Jeremiah, earlier, looking in faith toward the same event of Israel’s re-creation: “I will gather the remnant of my flock out of all the countries where I have driven them, and I will bring them back to their fold I will set shepherds over them who will care for them, and they shall fear no more, nor be dismayed, neither shall any be missing, says Yahweh” (23:3-4); or of the Second Isaiah, announcing that very same redemptive event, and seeing Yahweh in the role of a shepherd:

He will feed his flock like a shepherd,
he will gather the lambs in his arms,
he will carry them in his bosom,
and gently lead those that are with young.

In the NT the figure of the shepherd and the sheep finds in Christian faith its most profound application in Christ as the good Shepherd of all sheep. This is boldly articulated in the closing benediction of Hebrews in the simple phrase “our Lord Jesus, the great shepherd of the sheep” (13:20). The shepherd/sheep relationship between Christ and men is briefly but powerfully expressed again in Mark 6:34, when Jesus “saw a great throng, and he had compassion

on them, because they were like sheep without a shepherd; and he began to teach them many things.”

The two most extended biblical allegories of the shepherd are in Ezek. 34; John 10. The OT passage opens with the prophetic condemnation of the shepherds of Israel who have been feeding, not their sheep, but only themselves, and moves on to the declaration of Yahweh’s own compassionate assumption of the role of shepherd over Israel: “I, I myself will search for my sheep, and will seek them out. As a shepherd seeks out his flock when some of his sheep have been scattered abroad, so will I seek out my sheep; and I will rescue them” (vss. 11-12). And this, of course, recalls the more moving parable of the ninety-nine sheep safely together and the one sheep lost; and again the role of Christ as the Good Shepherd (Matt. 18:10-14; Luke 15:3-6).

The allegory in Ezekiel continues: “I will feed them on the mountains of Israel, by the fountains I will feed them with good pasture . . . ; there they shall lie down in good grazing land, and on fat pasture they shall feed on the mountains of Israel. I myself will be the shepherd of my sheep I will seek the lost, and I will bring back the strayed, and I will bind up the crippled, and I will strengthen the weak, and the fat and the strong I will watch over; I will feed them in justice” (Ezek. 34:13-16).

In the NT passage Christ is the shepherd, who saves, sustains, and redeems the life of all who will come into his fold. “I am the door of the sheep If any one enters by me, he will be saved, and will go in and out and find pasture.” (John 10:7-9.)

But for what follows, the OT has no precedent. Prophetic faith can conceive of Israel or the Servant of Yahweh dying on behalf of the cause of the knowledge and reign of God in the world, but not God himself, or the Son of God. Prophetic allegory never sees the Shepherd dying for his sheep. The NT allegory of John 10 is unequivocal: “I am the good shepherd. The good shepherd lays down his life for the sheep. . . . So there shall be one flock, one shepherd” (vss. 11-18).

B. D. NAPIER

SHEEP GATE [שַׁעַר הַצֶּמֶח] (Neh. 3:1, 32; 12:39). A city gate on the N side of Jerusalem, restored by Nehemiah; implicitly referred to in John 5:2: “Ἔστιν . . . ἐπὶ τῇ προβατικῇ κολυμβήθρα, “There is . . . by the sheep (gate) a pool.” Fig. NEH 13.

See also JERUSALEM §§ 7b, 11. G. A. BARROIS

SHEEPFOLD [גֵּרְתָּה, מַכְלָה; αὐλή]. An enclosure for sheep against the night hazards of weather, beasts, and robbers (e.g., Gen. 31:39; I Sam. 17:34); sometimes jointly used by a number of shepherds for a plurality of flocks and supervised by a single attendant through the night, each shepherd then calling forth again his own flock in the morning (John 10:1 ff). Such permanent enclosures are entered by a gate (John 10:2) and may be an area enclosed by stone walls, representing an effort comparable to that of building a city (see Num. 32:16).

See also SHEEP.

B. D. NAPIER

SHEEPSKIN [שֶׁמֶט] (Num. 4:25; KJV BADGERS’ SKINS), see below; μηλωτή (Heb. 11:37), from μίλον,

sheep or goat]. The skin of a sheep, presumably tanned. As sheepskin must have been one of the commonest leathers of biblical Palestine, the paucity of references to it in the Bible is remarkable (cf. "tanned rams' skins" in Exod. 25:5; 26:14; 35:7, 23; 36:19; 39:34).

The RSV usually translates שחיה as "GOATSKIN," and there is no reason for translating it differently in Num. 4:25.

In Heb. 11:37 being clothed "in skins of sheep and goats" is cited as illustrative of the destitution which the saints of the past had to endure.

W. S. McCULLOUGH

SHEERAH shē'ə rə [שֵׁרָה, blood relationship, or a female relative] (I Chr. 7:24); KJV SHERAH shir'ə. Either the daughter of Ephraim and the sister of Beriah or the daughter of Beriah, the son of Ephraim. According to the MT, she or her descendants built LOWER and Upper BETH-HORON and UZZEN-SHEERAH.

SHEHARIAH shē'ə rī'ə [שְׁחַרְיָה] (I Chr. 8:26). A son of Jeroham of the tribe of Benjamin. He was a chief in his tribe, dwelling in Jerusalem.

SHEKEL shēk'əl [שֶׁקֶל, from root to weigh]. A weight; later a coin. In early Babylonian times the shekel weight varied from 8.3 grams to 16.7 grams or ca. 0.3 ounce to 0.62 ounce. In Israelite times the shekel seems to have averaged ca. 11.424 grams or 0.403 ounce. At the time of the First Jewish Revolt (66-70) there was a silver shekel coin averaging ca. 14.27 grams, a little less than half an ounce.

SHEKINAH shə kī'ə nā [שְׁכִינָה, that which dwells, or dwelling, from שָׁכַן, to dwell]. The word used in the Targums and rabbinic writings as a circumlocution to express the reverent nearness of God to his people. The word is not found in the Bible, but it is rooted in the OT, which frequently speaks of God's presence on earth, and is reflected in the NT, especially in the belief that God came to dwell in the flesh of Jesus Christ. The OT represents the presence of God in many ways, but the general idea is related to the teaching that Yahweh chooses to dwell with Israel by putting his "name" in a special place (Deut. 12:5, 11, 21). God, of course, also dwells in heaven and at times withdraws his presence.

The places chosen by Yahweh are also many, but a few are of special importance. In the time when Yahweh was described as a God of battle, the ark is represented as his place of abode (see ARK OF THE COVENANT). Num. 10:35-36 preserves this view in a vivid manner: "Whenever the ark set out, Moses said, 'Arise, O LORD, and let thy enemies be scattered; and let them that hate thee flee before thee.' And when it rested, he said, 'Return, O LORD, to the ten thousand thousands of Israel.'" Long before its removal to Jerusalem the ark was taken forth from Shiloh in the war against the Philistines. Yahweh's presence was so clearly associated with the ark that its capture was felt to be the departure of God (I

Sam. 4). One of the early narratives speaks of the ark guiding Israel through the wilderness (Num. 10:33 E), but Yahweh comes down in a cloud to talk with Moses in the tent (Exod. 33:7-11 E). The earliest narrative tells how the cloud led Israel to Sinai (13:21-22 J) and continued with the Israelites toward Canaan (33:1, 3). Both the ark and the cloud drop into the background as the place of Yahweh's presence after Israel is settled in the land and Jerusalem becomes the central sanctuary. In place of sanctuaries at Shechem (Gen. 12:6-7), Beer-sheba (21:33), Bethel (28:19), Peniel (32:30), and Shiloh, Jerusalem becomes the central sanctuary and the special abode of Yahweh.

The most frequent forms by which God makes his presence known are the ANGEL of the Lord, the face of God, and the glory of God. The relation between Yahweh and the angel of Yahweh is clearly indicated by the fact that Exod. 13:21 represents Yahweh as going before Israel, while 14:19 says it was the angel. Yahweh's name is in the angel (23:20-21). When Jacob saw the face of God, he met God himself (Gen. 32:30), and all who come to the sanctuary to worship seek the face of God (Ps. 24:6). Isa. 63:9 unites angel and face in the phrase "angel of his presence." However, the form that came to be most closely associated with the Shekinah was the glory of God. Ezekiel, who first introduced the term, saw the "appearance of the likeness of the glory of the LORD" (Ezek. 1:28), and in this form Yahweh moved from the temple to his people in Babylon (11:23). The priestly writers related this to the cloud.

The principal powers used to designate the presence of God are spirit, word, and wisdom. God takes his holy Spirit from those who are cast from his presence (Ps. 51:11), and it was by his holy Spirit that he dwelt with his people in the days of Moses (Isa. 63:10-11). God's word is at times the power by which God heals his people and delivers them from destruction (Ps. 107:20), but it is also personified as the strange power sent forth to accomplish Yahweh's purpose (Isa. 55:10-11). Prov. 8 presents wisdom both as the practical knowledge which guides men (vss. 5-11), governs society (vss. 12-16), and gives rewards (vss. 17-21), and as the personified power of God's creative activity (vss. 22-30).

The Targums first used "Shekinah," along with *yekara* ("glory") and *memra* ("word"), as a designation for God himself in his earthly dwelling. The Targ. of Onkelos, the Aramaic version of the Pentateuch arranged at Jabne ca. A.D. 100-130, replaces "name" in Deut. 12:5 with "Shekinah": "To the place which the Lord your God shall choose that his Shekinah may dwell there, unto the house of his Shekinah shall you seek." The Jerusalem Targ., a Palestinian version of the Pentateuch called Pseudo-Jonathan, relates "Shekinah," *yekara*, and *memra* to the "name" in Lev. 26:11. The Targ. of Onkelos identifies the Shekinah with the angel in the story of Hagar in Gen. 16:13 and with the face of Yahweh in Num. 6:25; Deut. 31:18. It is the Shekinah that passes before Moses in Exod. 34:6, and the Jerusalem Targ. speaks of the "glory of the Shekinah of Yahweh" in Lev. 9:6. In Num. 11 the Shekinah and the Spirit, though not identical, are closely associated.

The Aramaic for "tabernacle" is *mashkan*, formed from the same Hebrew verb (נשן) as that from which "Shekinah" comes, and George A. F. Knight links the idea of the "tabernacling presence" with that of the creative word or wisdom of God.

The TALMUD contains numerous references to the Shekinah, yet an interesting distribution is discovered. The Mishna, the oldest part of the Talmud compiled by Rabbi Judah the Patriarch (ca. A.D. 135-220), contains only two references to the Shekinah. The first says: "R. Meir said: When man is sore troubled, what says the Shekinah? My head is ill at ease, my arm is ill at ease" (Sanh. 6.5). Herbert Danby, before calling attention to the fact that the word "Shekinah" does not appear in some texts, remarks in a note that this is "an interpolated Haggadah." The second reference is: "If two sit together and words of the Law [are spoken] between them, the Shekinah rests between them" (Ab. 3.2). This raises the difficult question as to the relation between this statement and the statement of Jesus in Matt. 18:20 ("Where two or three are gathered in my name, there am I in the midst of them"), but it clearly has reference to God's presence.

Most of the references to the Shekinah are found in the HAGGADAH, the nonlegal portion of rabbinical literature, and it is here that a comprehensive expression of the immanence of the transcendent God is found. The presence of the idea in the popular literature of the Jewish people perhaps reflects the usage at the time of NT writings, especially when it is remembered that the Targums made appeal to the same type of people. God's nearness to man in a world of struggle and perplexities is stated both in a universal way and in particular ways. The universal presence of God is compared to light, a light that is said to be the food of angels (Num. Rabbah 21.16). The light is none other than God himself (15.5). In the same way that the sun in the sky illuminates the far corners of the earth, God, who dwells in the seventh heaven far above the limitations of the finite world, makes his presence known everywhere through the Shekinah (Sanh. 39a). If the earth shines with the glory of God, it is said to be the "face of the Shekinah" (ARN II), and the priestly benediction (Num. 6:25) is interpreted in a manner that identifies the face of the Lord with the "light of the Shekinah" (Num. Rabbah 11.5). When man is in trouble, there is heaviness in the head and arms of the Shekinah (Hag. 15b; cf. Sanh. 46a).

The particular presence of God is experienced most vividly in the sanctuary. God at first through the Shekinah spoke to Moses out of the burning bush (Exod. Rabbah 2.5), but he commanded Moses to make the tabernacle in which God could dwell (34.1). This special dwelling of God with his people was the supreme purpose for which the tabernacle was built (Num. Rabbah 13.6), and the candelabrum that burned "outside the veil" (Lev. 24:3) was a witness "that the Shekinah abides in the midst of Israel" (Shab. 22b). The statement that the day of the tabernacle's consecration was the first day of the Shekinah's existence in the universe (Shab. 85b) has reference to this special abiding of God, not to an idea that the Shekinah did not exist at all before that time.

The temple of Solomon also becomes a particular dwelling place for God. Even if God fills all space and the "heaven and the highest heaven" (I Kings 8:27) is unable to contain him, God can still descend and restrict his "Shekinah within a square cubit" (Exod. Rabbah 34.1). The windows of the temple were "narrow within but wide without" to let the light of the Shekinah illumine the world (Num. Rabbah 15.2). After the destruction of the temple the synagogue as a place of prayer and the study of the Torah is regarded as a special place for God to dwell. If ten assemble for prayer, or three sit to judge, or two sit, or even one sits, to study the Torah, "the Shekinah is in their midst" (Ber. 6a). Rabbi Simeon ben Jochai says: "Wherever the righteous go, the Shekinah goes with them" (Gen. Rabbah 86.6). And again: "Come and see how beloved are the Israelites before God, for whithersoever they journeyed in their captivity the Shekinah journeyed with them" (Bar. Meg. 29a). The Shekinah draws near to the righteous, but it departs from the sinful. At first the Shekinah dwelt in the lower regions, but between Adam and the time of Abraham it ascended, as sin increased, until it dwelt in the seventh heaven; however, because of the righteous, it descended to earth again between Abraham and Moses (Gen. Rabbah 19.7). Secret sins, pride, and pains caused to parents continue to drive the Shekinah away (Kid. 31a). Along with the concepts of *Ruach Hakodesh* ("Holy Spirit") and *Bath Kol* ("daughter of the voice"), the presence of God in the world and his nearness to his people was powerfully expressed by the idea of the Shekinah. It seems only a step from this belief that God could dwell in a particular place to the Christian belief that God dwelt in his fulness in Jesus Christ, but the employment of Greek terminology by the church fathers and the Jewish identification of Christians with the *Minim* (heresies) made it impossible for most Jews to take the step. The term *Minim* originally referred to the polytheism of Gnostic dualism, a heresy repeatedly condemned in early christological controversy.

The identification of CHRIST with the Shekinah is suggested in several places in the Pauline letters. In Colossians, God not only dwells in the fleshly body of Christ (1:19; 2:9), but the dwelling of Christ in the saints constitutes a spiritual body of Christ (1:18, 24; 2:19; 3:15). This dwelling of Christ in the saints described as the "riches of the glory" and as the "hope of glory" (1:27) may have reference to the Shekinah, although Lightfoot has suggested for the first phrase the "wealth of the glorious manifestation" (cf. Rom. 9:23; Eph. 1:18; 3:16). In Eph. 1:17 the "God of our Lord Jesus Christ" is parallel to the "Father of glory" to suggest "glory" as a title for Christ. Even if the genitive is here used adjectively to permit the translation "glorious Father," the term "Lord of glory," used nine times in Enoch, appears in I Cor. 2:8 as a title for Christ as the one in whom the wisdom of God is hidden. The Spirit, who makes known God's wisdom in the crucified Christ, brings freedom to those who turn to behold the "glory of the Lord" and are transformed "from one degree of glory to another" (II Cor. 3:18), and the rabbinical exegesis of Exod. 34:29-35 strongly suggests the Shekinah. Paul preached the "gospel of the glory of

Christ" (II Cor. 4:4), because God had made the light to shine out of the darkness "to give the light of the knowledge of the glory of God in the face of Christ" (vs. 6). In Romans the entrance of sin into the world causes man to "fall short of the glory of God" (3:23), but those who are justified by faith "rejoice in [the] hope of sharing the glory of God" (5:2). It was "by the glory of the Father" (6:4) that Jesus was raised from the dead, and those who live the spiritual life find the sufferings of the present unworthy to compare "with the glory that is to be revealed" (8:18). The glory which belonged to Israel (9:4) now belongs to all who are the children of Abraham by faith, because the Messiah has come and the glory of the Lord has already dawned (cf. II Macc. 2:8).

Some events in the Lukan writings are interpreted in language associated with the Shekinah. In the infancy narrative the angel Gabriel announced to Mary:

The Holy Spirit will come upon you,
and the power of the Most High will overshadow you
[ἐπισκιάσει] (Luke 1:35).

The LXX uses ἐπεόκλασεν in Exod. 40:35 to describe the glory of the Lord in the tabernacle. The "glory of the Lord" shone round about the shepherds in the field when the angel appeared to them (Luke 2:9). At the Transfiguration "they saw his glory," Peter suggested that three tabernacles be built, and "a cloud came and overshadowed [ἐπεόκλασεν] them," before "they entered the cloud" and "a voice came out of the cloud" (Luke 9:32-35). The departure (ἔξοδος), about which Moses and Elijah spoke (vs. 31), was accomplished when Christ entered "into his glory" (24:26; cf. 9:26, 32) after his sufferings in Jerusalem. On the Damascus Road, Paul saw a "light from heaven, brighter than the sun," that blinded him with its radiance, and out of it a voice spoke (Acts 26:12-18; cf. 9:3-9; 22:6-11). It is not possible to demonstrate beyond doubt that the idea of the Shekinah colors the content of these narratives, but it is difficult to resist the conclusion that Hebraic roots are far deeper than the Hellenistic.

The Fourth Gospel has so many echoes of the Shekinah glory that it has been called the "Gospel of the glory." At first the theme of the tabernacling presence is prominent. Three terms found in the Targums appear in John 1:14: "The Word [*memra*] became flesh and dwelt [*Shekinah*] among us . . . ; we have beheld his glory [*yekara*]." The event of the Incarnation is nothing less than the glory of God pitching a tent (ἐσκήνωσεν) in human flesh. In the picture of Jesus as the dwelling place of the Spirit which descends and abides, the *Ruach Hakodesh* ("Holy Spirit") is associated with the tabernacle theme (John 1:33-34). The first of the seven signs (2:1-11; 4:46-54; 5:2-9; 6:4-13; 9:1-7; 11:1-14) in John's Gospel is an occasion for Jesus to manifest the glory that tabernacled in his flesh (2:11), and this is linked with the prediction of the destruction of the temple interpreted as the body of Jesus (2:21). Even if the temple of Jerusalem, long looked upon as a special dwelling for God, is destroyed, the true temple of God, the perfect presence of the Shekinah, is the body of Jesus. Later suggestions of the Shekinah

emphasize the idea of light. Num. Rabbah 15.5 bursts forth in praise of God with the words: "Thou art the light of the world." Jesus told his disciples: "I am the light of the world" (John 8:12). Readers familiar with the rabbinical ideas would not fail to make the connection. Direct evidence for a relation to the Targums is found in John 12:40-41. After the quotation of Isa. 6:10 the comment is made: "Isaiah said this because he saw his glory and spoke of him." The Targums on Isa. 6:1, 5, say: "I saw the *yekara* [glory] of the Lord resting on his throne—My eyes have seen the *yekara* [glory] of the Shekinah of the king of the ages." The very heart of the Fourth Gospel is the prayer of consecration in John 17, and there the glory of the Father in the Son comes to a climax with the petition that the disciples may behold the glory which the Father gave the Son before the foundation of the world (vs. 24). This gospel is seen in a new light when viewed against the Aramaic background.

The rest of the NT also reflects the idea of the Shekinah. Jas. 2:1 warns: "My brethren, show no partiality as you hold the faith of our Lord Jesus Christ, the Lord of glory." Christ is the Shekinah in the midst of the worshiping congregation, and his presence makes class distinctions absurd. Those who are reproached for the name of Christ are assured that the Spirit "of glory and of God" rests on them (I Pet. 4:14). On the Mount of Transfiguration, Jesus "received honor and glory from God the Father and the voice was borne to him by the Majestic Glory" (II Pet. 1:17). In the Old Covenant there was a "cherubim of glory overshadowing the mercy seat" (Heb. 9:5), but in the New Covenant the perfect revelation and the eternal purification for sin came through the Son of God who is the radiance of the glory of God (Heb. 1:3).

D. MOODY

SHELAH shē'lā [שֶׁלַח (*in 1 below*), apparently javelin, LXX and NT Σαλα; שֶׁלַח (*in 2 below*), LXX Σηλωμ]; KJV OT SALAH sā'lā, NT SALA, *in 1 below*; SHELANITES shē'lā nīts. 1. A Shemite; father of Eber, and son of Arpachshad (Gen. 10:24; 11:12-15; I Chr. 1:18, 24); listed in Luke 3:35-36 as son of Cainan (Καιναμ; cf. LXX at OT passages; see KENAN).

2. The third son of Judah (Gen. 38:5, 11, 14, 26; 46:12; I Chr. 2:3); ancestor of the Shelanites (Num. 26:20; I Chr. 4:21).

L. HICKS

SHELAH, POOL OF [בֵּרֶת הַשֶּׁלַח, pool of the aqueduct]; KJV SILOAH sī'lō'ā. A reservoir of the King's Garden in Jerusalem (Neh. 3:15), presumably the same as the King's Pool (2:14), in the lower tract of the Tyropoeon, toward the junction of this valley with the Kidron (see KIDRON, BROOK). It received

the waters from Gihon (see GIHON, SPRING), by means of an aqueduct along the right bank of the Kidron. When the aqueduct was sealed off in view of the Assyrian threat, the pool was transformed so as to accommodate the water flowing from the tunnel of Hezekiah.

See also POOL; SHILOAH, WATERS OF; SILOAM; JERUSALEM § 7b. See map under SILOAM.

G. A. BARROIS

SHELEMIAH shēl'ō mi'ō [שְׁלֵמִיָּהוּ, שְׁלֵמִיָּה, Y has recompensed, or Y has restored; Apoc. Σελεμίας]; KJV Apoc. SELEMIAS sēl'ō mi'ōs (I Esd. 9:34). Alternately: MESHELEMIAH mō—[מִשְׁלֵמִיָּהוּ]. 1. A Korahite, of Levitical descent, chosen to be a gatekeeper of the sanctuary in I Chr. 23–26, which professes to give the arrangements made by David for temple officials (26:14). In 26:1 (cf. 9:21) he is called Meshelemiah.

2. Son of Cush, and ancestor of Jehudi (Jer. 36:14).

3. Son of Abdeel; one (LXX omits) of three men Jehoiakim sent to take Baruch and Jeremiah after the reading of the first scroll of Jeremiah's prophecies (Jer. 36:26).

4. The father of Jehucal (Jer. 37:3) or Jucal (38:1).

5. Son of Hananiah, and the father of Irijah (Jer. 37:13).

6. A son of Binnui in a list of those who put away foreign wives and their children, according to Ezra's reform (Ezra 10:39; cf. I Esd. 9:34).

7. Another son of Binnui in the list mentioned in 6 above (Ezra 10:41).

8. The father of Hananiah (Neh. 3:30).

9. A priest, one of three men appointed by Nehemiah to be in charge of the distribution among the Levites of tithes of produce brought to the temple (Neh. 13:13). These appointments were part of Nehemiah's action to restore cultic practice: the Levites thus were enabled to devote themselves again to the service of the temple.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 174; A. C. Welch, *The Work of the Chronicler* (1939), pp. 81–96. T. M. MAUCH

SHELEPH shē'lif [שֵׁלֶפֶחַ]. A son of Joktan, and hence the name of an Arabian tribe (Gen. 10:26; I Chr. 1:20). Since the name is mentioned just before Hazaramaweth (Hadramaut), it was evidently located in S Arabia. The word is the same as the Arabian Salaf or Salif, and occurs in Sabeian inscriptions as the name of a Yemenite district. There is also a Sulaf, sixty miles N of Sanaa, the capital of Yemen. Thus, while it is impossible to fix the exact location of Sheleph, it is certain that the tribe lived somewhere in Yemen. S. COHEN

SHELESH shē'lish [שָׁלֹשׁ, third(?), triplet(?); obedient or gentle, according to Arab. *salisun*(?)] (I Chr. 7:35). A head of a father's house in the tribe of Asher.

SHELOMI shī lō'mī [שְׁלֹמִי, peace(?)] (Num. 34:27). The father of the Asherite leader Ahihud, who was selected to help superintend the distribution of W

Jordanian Canaan among the tribes to occupy that territory.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 165. R. F. JOHNSON

SHELOMITH shī lō'mīth [שְׁלֹמִית, feminine of שְׁלֹמִי, complete, or at peace]; KJV Apoc. ASSALIMOTH ə sā'l'ə mōth. A name apparently sometimes confused with SHELOMOTH (שְׁלֹמֹת), as illustrated in two instances: (a) the same man is called Shelomith in I Chr. 23:18 and Shelomoth in 24:22; (b) both names appear in reference to the same man in I Chr. 26:25–28. Noth suggests, with textual support in each case, that when the name refers to a man, Shelomoth is correct and Shelomith a textual error.

1. A Danite, daughter of Dibri, during the time of the wandering in the wilderness; the mother, by an Egyptian, of an unnamed man who as a sojourner went out among the Israelites and in a quarrel with an Israelite "blasphemed the Name, and cursed." He was stoned since repudiation of God whether by Israelite or by SOJOURNER was to be purged from the community (Lev. 24:11).

2. Daughter of Zerubbabel (I Chr. 3:19).

3. A Levite, the chief son of Izhar (I Chr. 23:18); called Shelomoth in I Chr. 24:22.

4. A son or daughter of Rehoboam, by his wife Maacah the daughter of Absalom (II Chr. 11:20).

5. Son of Josphiah, head of a father's house that returned with Ezra from Babylon (Ezra 8:10, where the RSV reads, with the LXX and I Esd. 8:36, that he was of the family of Bani).

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), pp. 39, 165. T. M. MAUCH

SHELOMOTH shī lō'mōth [שְׁלֹמֹת, see SHELOMITH]; KJV SHELOMITH —mīth except in I Chr. 24:22.

1. A Gershonite Levite, head of a father's house (I Chr. 23:9).

2. A Levite, son of Izhar (I Chr. 24:22). He is called Shelomith in I Chr. 23:18.

3. A descendant of Moses through Eliezer. In the account of David's arrangements for temple officials in I Chr. 23–26, Shelomoth and his brethren were in charge of all the dedicated treasures from the war spoil of Samuel, Saul, Abner, Joab, and David (26:25–26, 28; the MT reads "Shelomith" in vs. 28).

Bibliography. A. C. Welch, *The Work of the Chronicler* (1939), pp. 81–96. T. M. MAUCH

SHELUMIEL shī lō'mī'el [שְׁלֹמִיָּעַל; LXX Σαλαμηνελ, God is peace(?), or at peace with God(?), or my friend is God(?)]. Alternately: SALAMIEL sə lā'mī'el [Σαλαμηνελ, God is friendly(?)] (Jth. 8:1); KJV SAM-AEL sām'ī'el. Leader of Simeon; son of Zurishaddai (Num. 1:6; 2:12; 7:36, 41; 10:19). He was one of twelve tribal leaders or deputies who assisted Moses in taking a census of Israel and in other tasks in the wilderness.

The ancestry of JUDITH is traced in Jth. 8:1 to this same person, whose name is given as Salamiel and whose father's name, as Sarasadai.

See also PRINCE.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 165. R. F. JOHNSON

SHEM shēm [שם, see § 1 below; Σημ; Vulg. *Sem*]; KJV NT SEM sēm. Eldest son of Noah (Gen. 5:32; I Chr. 1:4; Luke 3:36).

1. **Etymology.** The meaning of the name is uncertain. If originally Hebrew, it would seem to be the noun "name," "reputation," "fame." It might be a shortened form, lacking a verb or another noun as the second element (cf. personal names שמירע, שמואל, שמירע, שמירע). If originally Mesopotamian, it might be Babylonian *šumu*—"name," also used for "son."

The theory that Shem was a divine name or appellation is nowhere supported by the Genesis story.

2. **In the J tradition.** From the Yahwist (see PENTATEUCH § A) come an etiology of considerable antiquity and importance (Gen. 9:20-27) and a Shemite genealogy (10:21, 24-30).

When Noah became drunk and lay uncovered in his tent, "his youngest son" (Gen. 9:24) brought shame upon himself by seeing his father's nakedness. Shem and Japheth, by walking backward, covered their father without dishonoring themselves (vss. 20-23). When he awoke, Noah cursed Canaan—not HAM. Then he blessed "Yahweh, the God of Shem" (so MT, LXX, Targ., Pesh., Vulg., KJV), asked favor for JAPHETH (see §§ 1-2), and condemned Canaan to the menial service of the two brothers (vss. 24-27).

This etiological story indicates strongly that an earlier tradition knew Noah's three sons as Shem, Japheth, and Canaan, and that, to harmonize this version with the later tradition used by P, Ham was listed as the father of Canaan in vss. 18, 22. Further, the Shem of this story, rooted in Palestinian soil, seems quite different from the ancestor of the Mesopotamian families listed by P in 10:22.

9:25-27 is best viewed as an old ethnological piece used by J to explain why the Israelites (Shem) have to share the Promised Land (Canaan) with the Philistines (Japheth). Such was the divine will, as Noah had foreseen. The ancient ethnology thus received a valuable place in Israel's early history.

In the J genealogy Shem is the "father of all the children of Eber" (10:21; cf. vss. 25-30). He stands, therefore, as the eponymous ancestor of the Semites generally and the Hebrews specifically. See SEMITE; HEBREW.

3. **In the P tradition.** P's contribution consists primarily in linking Shem firmly to the Noah of the Flood, furnishing the statistics of his life, and expanding his narrow Palestinian locale into the arena of world history. Here Shem and his two younger brothers, Ham and Japheth, accompanied by their wives, join Noah in the ark (Gen. 5:32; 6:10; 7:13-15). After the Flood the sons share with their father in the divine covenant (9:1-17; see NOAH § 1). At the age of a hundred Shem begat Arpachshad, then lived five hundred years longer and had other children (11:10-11); Elam, Asshur, Lud, and Aram (10:22; I Chr. 1:17 adds Uz, Hul, Gether, and Meshech; but cf. Gen. 10:23 and the LXX).

SHEMA shē'mā [שמע, he (God) has heard; Apoc. Σαμουός; KJV Apoc. SAMMUS sām'os. 1. Listed

as part of the tribe of Judah in the genealogies of the Calebite-Jerahmeelite families: a son of Hebron and descendant of Caleb (I Chr. 2:43-44); possibly a geographical name: a town in the neighborhood of Hebron, perhaps the same as Eshtemoa (derived from the same stem).

2. A Reubenite, a son of Joel (I Chr. 5:8); possibly the same as Shimei or Shemaiah in vs. 4.

3. A Benjaminites, head of a father's house in Aijalon (I Chr. 8:13). In vs. 21 he is called Shimei.

4. One of the men, named without title or paternity, who stood with Ezra at the public reading of the law (Neh. 8:4; I Esd. 9:43). T. M. MAUGH

5. A town in S Judah; probably the same as SHEBA.

SHEMA, THE shə mā' [שמע, hear thou!]. The first word of Deut. 6:4: "Hear, O Israel . . ." which became Judaism's confession of faith. The phrase, which probably originated during the time of Josiah (ca. 640-609), consists of six Hebrew words: שמע יהוה יהוה אלהינו יהוה אחד. The dilemma of the translator is clear in the RSV, where four possibilities are suggested. Generally speaking, the alternative lies between an emphasis upon Yahweh's uniqueness and exclusiveness (cf. Deut. 4:39) and an emphasis upon Yahweh as an integral person, not divisible into a number of other gods or forces (cf. the Baal of Peor in Num. 25:2-3; the Baal of the covenant of Shechem in Judg. 8:33; 9:4; the Baal of Zebub, god of Ekron in II Kings 1:2-3 [NT βαελαζεβουλλ!]; the Baal of Tyre in I Kings 16:31-32). It is not impossible that both these distinctions are contained in the phrase. For a discussion of monotheism, see GOD, OT VIEW OF.

According to rabbinical tradition, the Shema originally contained only vs. 4, but was later expanded to include not only vss. 5-9 but also a second part (Deut. 11:13-21) and a third part (Num. 15:37-41). The first section includes the twofold injunction to love Yahweh utterly and to manifest this by perpetually calling to mind and inculcating his commandments. The addition of Deut. 11:13-21 serves to place this demand for obedience within the framework of blessing for its fulfillment and curse for its neglect. Num. 15:37-41 adds to the PHYLACTERIES of the first two sections the tassels (see TASSEL), which are also to aid in remembering the law, and concludes the whole with a statement derived from the introduction to the Decalogue (vs. 41; cf. Exod. 20:2; Deut. 5:6; see TEN COMMANDMENTS). Rabbinic law establishes the ancient ritual of reciting the Shema morning and evening (Deut. 6:7: ". . . when you lie down, and when you rise"), and Jewish literature contains a great deal of discussion about the forms of its use. As the classic statement of monotheism and the highest confession of Judaism, it has become a martyr's cry and an identifying mark of Jews through the centuries.

The dispute about which of the more than six hundred commandments of the Law was most important is characteristic of first-century rabbinical discussions. It was in this context that the delicate question about the "greatest commandment" was put to Jesus (Matt. 22:34-40; Mark 12:28-34). He answered with the unassailable Shema (the fuller form is in Mark 12:29-34), combining it with Lev. 19:18: "You shall

love your neighbor as yourself," thus summarizing the "second table of the law"—i.e., the commandments of the Decalogue dealing with man's responsibility toward his fellows. For the complicated literary problem posed by Luke 10:27-28, see Commentaries.

Bibliography. *The Jewish Encyclopedia*, XI (1905), 266; W. Eichrodt, *Theologie des Alten Testaments*, I (1933), 85, 113; G. E. Wright, *Exegesis of Deuteronomy*, IB, II (1953), 372-75. J. A. WHARTON

SHEMAAH *shī mā'ā* [שמעא] (I Chr. 12:3). The father of Ahiezer and Joash, who were among the disaffected Benjaminite warriors who joined the proscribed forces of David at Ziklag.

SHEMAIAH *shī mā'yā* [שמעיה, שמעיה, Y has heard; Apoc. Σαμαίας, Σάματος, Σαμαίος]; KJV Apoc. MAMAIAS *mā mā'yās* (I Esd. 8:44); SAMAIAS *sā mā'yās* (I Esd. 8:39); SAMATUS —*tās* (I Esd. 9:34); SAMEIUS *sā mē'yās* (I Esd. 9:21). Alternately: SABBAIAS *sā bā'yās* [Σαββαίας] (I Esd. 9:32); KJV SABBESUS *sā bē'ās*. 1. A chief of the tribe of Simeon (I Chr. 4:37).

2. Eponym of a Reubenite family (I Chr. 5:4).

3. Head of one of the fathers' houses of the Levites; chief of the sons of Elizaphan. In the account of the bringing of the ark from the house of Obed-edom to Zion in I Chr. 15:1-16:3, 43 (cf. II Sam. 6:12-19), he and two hundred of his brethren were among the Levites (see PRIESTS AND LEVITES) whom David charged with the transportation of the ark (I Chr. 15:8).

4. A Levite; son of Nethanel. He was the scribe who recorded the assignment by lot of twenty-four divisions of priests, in the account (I Chr. 23-26) of David's organization of the Levites according to their duties in the coming temple (24:6). See PRIESTS AND LEVITES.

5. A Levite; the eldest son of Obed-edom, and the father of valiant sons: a group of gatekeepers in David's temple arrangements (I Chr. 26:4, 6-7).

6. A prophet in the reign of Rehoboam who forbade the king to fight in order to suppress the revolt of the ten N tribes and reclaim them. The assembled warriors were to return to their homes, for Yahweh favored the revolt (I Kings 12:22; II Chr. 11:2). Since civil war continued throughout the reign of Rehoboam (I Kings 14:30), Shemaiah and his action probably are fictional. In a long insertion attached after I Kings 12:24, the LXX includes a brief version of the story of Ahijah the prophet and Jeroboam (cf. I Kings 11:29-39) and ascribes the prophetic activity to Shemaiah. The name occurs again in II Chr. 12:5, 7, in an elaboration (vss. 1, 2aβ, 3-8) inserted into the account in I Kings 14:25-28. In this elaboration the Deuteronomist interpretation of events, indicated in part by the juxtaposition of I Kings 14:22-24 and vss. 25-28, is stated explicitly in the words of the prophet Shemaiah: Judah sinned against Yahweh, so Yahweh permitted the invasion of Shishak; and when the king and princes repented, Yahweh exercised his grace by making the affliction lighter. The Chronicler concludes his account of Rehoboam by citing a history written by Shemaiah the prophet and Iddo the seer (II Chr. 12:15).

7. One of the nine Levites (cf. Deut. 6:6-9; see also the work of A. C. Welch in the *bibliography*) in a commission of sixteen men (of which only two were priests) sent by Jehoshaphat to teach the law in the towns of Judah (II Chr. 17:8). The story appears only in Chronicles.

8. A Levite of the family of Jeduthun; one of fourteen Levites who played a leading part in the cleansing of the temple during the reign of Hezekiah (II Chr. 29:14).

9. A member of a commission, composed of Levites and possibly priests, which distributed the first fruits, tithes, and offerings to the priests and Levites during Hezekiah's reign, according to the account in II Chr. 29-31.

10. One of the six sons of Shecaniah in a list of the descendants of David (I Chr. 3:21-22). Omit "and the sons of Shemaiah" (cf. Ezra 8:2-3), thus accounting for the number six at the end of vs. 22.

11. The father of Uriah the prophet (Jer. 26:20).

12. A leader in Babylonia; a Nehelamite; one of those among the exiles who proclaimed a speedy return from captivity. He wrote to the people in Jerusalem and to Zephaniah the priest, who was overseer of the temple, opposing Jeremiah for writing to the exiles as he had (see Jer. 29:4-7) and demanding that Jeremiah be imprisoned. Jeremiah denounced Shemaiah as a false prophet and foretold that neither he nor his descendants would live to see the Return (vss. 24, 31-32).

13. The father of Delaiah (Jer. 36:12).

14. A Levite, descendant of Merari, among those repopulating Jerusalem after the Exile (I Chr. 9:14; Neh. 11:15). According to Neh. 11:15-16, in Nehemiah's time he was one of the overseers of the non-cultic affairs of the temple, such as maintenance. In the list in vss. 15-18, probably originally identical with I Chr. 9:14-16, he is called incorrectly a descendant of Bunni.

15. Another Levite who returned to Jerusalem after the Exile; a descendant of Jeduthun; the father of Obadiah (I Chr. 9:16). Perhaps he is identical with Shammua father of Abda in Neh. 11:17; the difference in names may be due to abbreviation, the longer forms having "iah" at the end: "Shammua" for "Shemaiah," and "Abda" for "Obadiah."

16. One of the chiefs of the Levites who liberally donated animals to the Levites for the celebration of the Passover held by Josiah (II Chr. 35:9).

17. A son of Adonikam; head of a father's house that returned with Ezra from the Exile (Ezra 8:13; I Esd. 8:39).

18. A leading man, one of a delegation sent by Ezra to Iddo at Casiphia to obtain Levites, when it was discovered en route that they were lacking in the group returning from Babylon (Ezra 8:16; I Esd. 8:44).

19. A priest, descended from Harim, in a list of those who put away foreign wives and their children according to Ezra's reform banning foreign marriage (Ezra 10:21; I Esd. 9:21).

20. A layman, descended from Harim, in the list mentioned in 19 above (Ezra 10:31; I Esd. 9:22).

21. One of the "sons of Ezora" listed among the laymen with foreign wives (I Esd. 9:34).

22. Keeper of the EAST GATE, and thus probably a Levite; son of Shecaniah. He repaired part of the

wall of Jerusalem in Nehemiah's time (Neh. 3:29).

23. Perhaps a prophet but probably a priest, since apparently he had access to the temple; son of Delaiah and descendant of Mehetabel. A prominent Jerusalemite, he was hired by Tobiah and Sanballat to fill Nehemiah with such fear of assassination that Nehemiah would go with him into the temple itself for refuge. The plot was intended to discredit Nehemiah as a coward and weaken him by the certain charge of sacrilege for intruding where only priests were allowed (Neh. 6:10).

24. The name of a priestly family occurring in three lists almost identical in outline and comparable in composition, citing: the priests who sealed the covenant in the days of Nehemiah (Neh. 10:8), the priests who returned with Zerubbabel (12:6), and the priests in the time of Joiakim (12:18).

25. A priest in the counterclockwise procession on the walls of Jerusalem during their dedication (Neh. 12:34).

26. Probably a Levite; a descendant of Asaph (Neh. 12:35).

27. A Levite musician in the counterclockwise procession on the walls of Jerusalem during their dedication (Neh. 12:36).

28. A Levite musician in the clockwise procession on the walls of Jerusalem during their dedication (Neh. 12:42).

SHEMARI AH shēm'ā rō'ā [שמריהו, שמריה, Y has kept, preserved]; KJV SHAMARIAH shām'— in II Chr. 11:19. 1. One of the mighty Benjaminite warriors who joined David at Ziklag (I Chr. 12:5).

2. A son of Rehoboam (II Chr. 11:19).

3. A son of Harim in a list of those who put away foreign wives and their children according to Ezra's reform banning foreign marriage (Ezra 10:32).

4. A son of Binnui in the list mentioned in 3 above (Ezra 10:41). T. M. MAUCH

SHEMEBER shēm ē'bār [שמאבר, in form resembles West Semitic names occurring in Hammurabi's time; cf. *Su-mu-ebuḫ* in Mari Texts (ARM I, 24, 8); Samar. שמאבר; Dead Sea Genesis Apocryphon שמאבר; Syr. שמאבר] (Gen. 14:2). King of Zebouim; one of the five rebels defeated in the Valley of Siddim by a coalition of Eastern kings. See ABRAHAM. L. HICKS

SHEMED shē'mīd [שמד, destruction, or extermination; many MSS read שמר, Shemer] (I Chr. 8:12); KJV SHAMED shā'— Head of a father's house of the tribe of Benjamin, descended from Shaharaim by Hushim. He built, or rather repopulated, the towns of Ono and Lod after the Exile. T. M. MAUCH

SHEMER shē'mār [שמר, watch(?)]. Alternately: SHOMER shō'— (I Chr. 7:32); KJV SHAMER shā'— (I Chr. 6:46; 7:34). 1. The original owner, or owners (i.e., the name may be that of a clan), of the hill upon which Omri built Samaria (I Kings 16:24).

The city was named after this clan (*shōmerōn*, "belonging to Shemer").

2. An ancestor of a Levitical singer in the Jerusalem temple (I Chr. 6:46—H 6:31).

3. A remote descendant of Asher (I Chr. 7:32, 34).

J. M. WARD

SHEMIDA shī mī'ḏō [שמידע, Eshmun (the Phoenician God) has known(?)]; SHEMIDAITES —dī-its. Descendant of Manasseh, a Gileadite enumerated in the list of the second census taken by Moses in the wilderness (Num. 26:32; Josh. 17:2; I Chr. 7:19). The father of Ahian, Shechem, Likhi, and Aniam, he was the eponymous ancestor of the Shemidaites, one of the families of Manasseh to whom land was allotted by Joshua. The name has been found on eighth-century ostraca from Samaria.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), pp. 123-24, 181; W. F. Albright, "The Site of Tirzah and the Topography of Western Manasseh," *JPOS*, XI (1931), 241-51. R. F. JOHNSON

SHEMINITH shēm'ā nīth. See MUSIC § B1.

SHEMIRAMOTH shī mīr'ā mōth [שמירמות, name of heights or heavens(?); Akkad. *Sammurāmat*, goddess(?); cf. Σμύραμος]. 1. A Levite harpist among those whom David charged to provide music during the transportation of the ARK OF THE COVENANT from the house of OBED-ĒDOM to Zion (I Chr. 15:18, 20) and to maintain musical worship before the ark thereafter (16:5).

2. A Levite in a commission sent by JEHOSEPHAT to teach the law in the towns of Judah (II Chr. 17:8).

T. M. MAUCH

SHEMUEL shēm'yōō [שמואל, same as SAMUEL]. 1. Son of Ammihud; the leader representing the tribe of Simeon in the commission appointed to divide the land of Canaan (Num. 34:20).

2. A son of Tola; head of a father's house in the tribe of Issachar (I Chr. 7:2).

3. KJV form of SAMUEL in I Chr. 6:33.

T. M. MAUCH

SHEN. KJV translation of השן (RSV JESHANAH).

SHENAZZAR shī nāz'ar [שנאצר, probably an error due to haplography for שנאנאצר; Akkad. *Sin-ab-usur*, may Sin (moon deity) protect the father] (I Chr. 3:18). The fourth son of the exiled King Jehoiachin; probably to be identified with SHESHBAZZAR.

Bibliography. W. F. Albright, "The Date and Personality of the Chronicler," *JBL*, XL (1921), 108-10.

B. T. DAHLBERG

SHENIR. KJV alternate form of SENIR.

SHEOL shē'ōl. See DEAD, ABODE OF THE.

SHEPHAM shē'fām [שפם] (Num. 34:10-11). A place not far from Riblah on the Upper Orontes, in the NE borderland of Canaan.

SHEPHATIAH shēf'ā tī'ā [שפטיהו, שפטיה, Y has judged; Apoc. Σαφατία, Σαφαθι]; KJV Apoc. SA-

PHAT sā'fāt (I Esd. 5:9); SAPHATIAs sā'f'ā tī'ōs (I Esd. 8:34); SAPHETH sā'f'ith (I Esd. 5:33). 1. One of the sons born to David at Hebron by one of his wives, Abital (II Sam. 3:4; I Chr. 3:3).

2. A Haruphite, one of the mighty Benjaminite warriors who joined David at Ziklag (I Chr. 12:5).

3. The leader of the tribe of Simeon during David's reign; son of Maacah (I Chr. 27:16).

4. A son of King Jehoshaphat (II Chr. 21:2).

5. A prince, son of Mattan. During the siege of Jerusalem by Nebuchadrezzar, he was one of four pro-Egyptian officials who charged Zedekiah to put Jeremiah to death because his prophecies were weakening the defenders of Jerusalem and his motives were traitorous. Unable to oppose them, Zedekiah handed Jeremiah over to them, and they tried to eliminate Jeremiah by leaving him to die in the bottom of a cistern (Jer. 38:1).

6. Founder of a family, of which 372 members returned from Babylonia with Zerubbabel (Ezra 2:4; Neh. 7:9), and 81 more with Ezra (Ezra 8:8). In I Esdras the respective numbers are 472 (5:9) and 71 (8:34).

7. Head of a family of SOLOMON'S SERVANTS which returned from Babylonia with Zerubbabel (Ezra 2:57; Neh. 7:59).

8. An ancestral eponym of the family of Meshulam, in a list of the Benjaminite families repopulating Jerusalem after the Exile (I Chr. 9:8).

9. An ancestral eponym of a Judahite family, descended from Perez, inhabiting Jerusalem in the time of Nehemiah (Neh. 11:4). T. M. MAUCH

SHEPHELAH shī fē'le [שֶׁפְּלָא, lowland; Apoc. Σεφηλά]; KJV Apoc. SEPHELA sī—. Alternately: **LOWLAND**. A foothill region between the Philistine plain and the Judean highlands, severed from the latter by a series of longitudinal valleys.

The term designating this district appears twenty times in the Hebrew text of the OT. Ten times in the RSV it is transliterated "Shephelah"; in Joshua (seven times) and in Deut. 1:7; Judg. 1:9; Zech. 7:7 it is translated "lowland." The KJV translates it variously by "vale," "valley," "plain," "low plains," and "low country."

Despite this variety in translation, however, with the exception of Josh. 11:2, 16b (which seem to designate a similar "Israelite Shephelah" of low, rocky hills situated between the headlands of Carmel and the edge of the highlands of Samaria), all appearances of the term refer to the foothill district W of the Judean highlands. That a specific region is intended is indicated by the frequent OT reference to the Shephelah in company with the Negeb and the hill country, as one of the major geographical divisions of Judah (Deut. 1:7; Josh. 10:40; 12:8; 15:33; Judg. 1:9; Jer. 17:26; 32:44; 33:13). Further definiteness is given to this regional significance by references which distinguish between the Shephelah and the plain (II Chr. 26:10) or the seacoast (Deut. 1:7), or between the Shephelah and the coastal territory normally occupied by the Philistines (II Chr. 28:18; Obad. 19). This distinction is recognized in I Maccabees, which in one reference locates the town of Adida (see HADID) in the Shephelah (12:38) and in another describes it as "facing the plain" (13:13), and is also corroborated in the Mishna (Jerusalem

Sheb. IX.2), which locates LYDDA on the line of separation between the two sections.

The cities listed by the OT in the Shephelah (Josh. 15:33-42; II Chr. 28:18), insofar as they have been definitely located, are appropriately situated in this foothill district, with only Josh. 15:45-47 raising any question at this point. These latter verses refer exclusively to the Philistine coastland and have neither introduction nor summary characteristic of the regional listings which precede and follow them. This disruption of the general pattern of presentation, and their obvious and direct disagreement with the import of other passages, suggests that these verses either are out of place or imply an elasticity in regional definition which was not followed in other periods.

The extent of the Shephelah in the *Onomasticon* of Eusebius includes "all the low country about Eleutheropolis [Beit Jibrin] toward the north and west." The OT permits more definiteness and requires more inclusiveness. From the OT lists of cities ascribed to the region, its N and S limits are approximately defined by the Valley of Ajalon and the Wadi el Hesi, the latter leading past the great fortress of Eglon toward Debir in the hill country. However, for all practical purposes, Lachish on the Wadi Qubeiba became the chief fortress on the S frontier of the district. The northernmost Shephelah town cited is Adida (I Macc. 12:38), which served as a guardian of a N approach to the Valley of Ajalon.

A series of longitudinal valleys forming a "moat" of Senonian chalk severed the Shephelah's broad Eocene hills from the Cenomanian bulwark of the Judean mountains and made this a distinct district. Compared with the Judean highlands, which commonly range in height from two thousand to three thousand feet, this is a "lowland" region—its hills averaging from five hundred to eight hundred feet, but reaching a maximum of fifteen hundred feet in the S. The Shephelah, therefore, was not an integral part of the Judean highlands.

As a detached buffer zone between mountain ridge and coastal plain, it served as Judah's first line of defense against the Philistines and all who sought to attack the country from the W. Conquest of this region, however, was but a necessary preliminary to assault on the longitudinal moat and steep mountain scarp which served as the chief barrier to ascent into the hill country. This narrow zone of demarcation was Judah's true defense and, in keeping with its destiny, was dotted with a line of fortified towns.

A series of wide valleys cross the Shephelah horizontally and, as narrow defiles, ascend into the mountains beyond. These valleys form the natural routes by which access is gained into the Judean range. They were the avenues along which moved the tides of commerce and conquest, and near their termini were located some of the country's strongest fortresses; apart from them the history of Judah is not intelligible. From N to S they are Ajalon, Sorek, Elah, Zephathah (Zeita), and Qubeiba (Josh. 10:12; Judg. 16:4; I Sam. 17:2; II Chr. 14:10).

In addition to its strategic significance, the Shephelah was agriculturally important. The rich, red soil of its cross-valleys produced grain in abun-

dance, and on its intervening slopes flourished olive and sycamore trees. So numerous were the latter that mere reference to their quantity served as a simile for a great plenty (I Kings 10:27; II Chr. 1:15; 9:27; see also I Chr. 27:28). Grapes also flourished, and in some areas there was grass sufficient for grazing considerable herds (II Chr. 26:10). All in all, it was a very pleasant and temperate region, dotted with cities, and having neither the oppressive heat of the coastland in summer nor the penetrating chill of the highlands in winter.

W. H. MORTON

SHEPHER, MOUNT *shē'fār* [הַר שֶׁפֶר] (Num. 33:23-24); KJV SHAPHER *shā'* —. A stopping place of the Israelites in the wilderness. The location is unknown.

SHEPHERD. See SHEEP.

SHEPHERD OF HERMAS. See HERMAS, SHEPHERD OF.

SHEPHO *shē'fō* [שֶׁפּוֹ; LXX B Σωφ, LXX E Σωρ] (Gen. 36:23). Alternately: SHEPHI —fi [שֶׁפִי; LXX A Σωφρ, LXX B Σωβ] (I Chr. 1:40). Ancestor of a Horite subclan in Edom; fourth son of clan chief Shobal.

SHEPHUPHAM *shī fū'fām* [שֶׁפּוּפָם, serpent?] (Num. 26:39); KJV SHUPHAM *shōō'fām*. Alternately: SHEPHUPHAN *shī fū'fān* [שֶׁפּוּפָן] (I Chr. 8:5); SHUPPIM *shūp'im* [שֶׁפִים, שֶׁפִים] (I Chr. 7:12, 15); SHUPHAMITES *shōō'fō mīts* [שֶׁפּוּפָיִם] (Num. 26:39). A Benjaminite. The complicated and evidently disarranged Benjaminite genealogies in Gen. 46; Num. 26; I Chr. 7-8 present a varied pattern in respect to the name Shephupham. Although the name occurs in this form only in Num. 26:39, where it is the name of a son of Benjamin, the almost identical name Shephuphan appears in I Chr. 8:5, but here as a descendant, not a son, of Benjamin. In addition to this resemblance, the Benjaminite genealogies exhibit a striking pattern of "twin names" which incorporate some of the syllables of "Shephupham": Muppim, Huppim (Gen. 46:21); Shephupham, Hupham (Num. 26:39); Shuppim, Huppim (I Chr. 7:12); Shephuphan, Hupham (I Chr. 8:5). These and other observations have led some scholars to conclude that the name Shupham (שֶׁפּוּפָם) stood originally in the Benjaminite genealogies in Gen. 46; Num. 26; I Chr. 8, either as a son or as a grandson of Benjamin. The occurrence in I Chr. 7:12 is the result of alterations in what was once a Zebulunite list.

SHERAH. KJV form of SHEERAH.

SHERD. See POTSHERD; POTTERY.

SHEREBIAH *shēr'ō bī'ō* [שֶׁרְבִיָּה, Yahu has sent scorching heat(?); Akkad. *išribijama* (a proper name), *šarrabu* (a demon)]; KJV Apoc. ASEBEBIA *ə sēb'ō-bī'ō*; ESEBRIAS *ē'sə brī'əs*; SARABIAS *sār'ō bī'əs*.
1. The "man of discretion," son of Mahli, who was provided for temple service during Ezra's encampment, and to whom the vessels of the sanctuary were entrusted (Ezra 8:18, 24; I Esd. 8:47, 54).

2. A Levite (according to I Esd. 9:48 and the Vulg.) who attended Ezra's public reading of the law (Neh. 8:7), shared in its exposition (9:4-5), and was a witness to the covenant renewal (10:12—H 10:13).

3. A Levite who accompanied Zerubbabel in the return from exile (Neh. 12:8) and became a chief of that rank (vs. 24). Some scholars believe that the name does not belong in this period but has been misplaced from Nehemiah's to Zerubbabel's time.

J. M. WARD

SHERESH *shīr'ēsh* [שֶׁרֶשׁ, root(?); cf. Arab. *sarison*, clever, or weak(?)] (I Chr. 7:16). A family of the tribe of Manasseh.

SHEREZER. KJV form of SHAREZER in Zech. 7:2.

SHESHACH *shē'shāk*. KJV translation of שֶׁשַׁח, which is probably a cryptogram for BABYLON (so RSV; Jer. 25:26; 51:41). See ATHBASH.

SHESHAI *shē'shī* [שֶׁשַׁי]. One of the three sons of Anak, or "giants," residing in Hebron when the Israelite spies reconnoitered the land (Num. 13:22; Josh. 15:14; Judg. 1:10). Named together with Ahiman and Talmai as a descendant of Anak, Sheshai was defeated in Hebron by the invading Israelites. The name Sheshai may be an abbreviated form of a once complete name, now reduced to a single reduplicated consonant.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 41.

R. F. JOHNSON

SHESHAN *shē'shān* [שֶׁשָׁן, a short name formed by duplicating an abbreviation of a full name now unidentifiable; probably a name of endearment (cf. bibliography)]. Head of a family in a genealogical list of the families descended from Jerahmeel, presented within a list of the descendants of Judah (I Chr. 2:31). According to subsequent verses, Sheshan had only daughters, one of whom he gave in marriage to his Egyptian slave Jarha (I Chr. 2:34-35). In vss. 34-41 the descent of Elishama (vs. 41) is being traced; his ancestor Sheshan is identified with Sheshan the Jerahmeelite, and this places Elishama in the line of Judah.

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), pp. 40-41.

T. M. MAUCH

SHESHBAZZAR *shēsh bāz'ər* [שֶׁשֶׁבַצַר, apparently corrupted from שֶׁשֶׁבַצַר שֶׁשֶׁבַצַר; Akkad. *Sin-ab-ušur*, Sin (the moon deity) protect the father; Apoc. Σααβάζαρος]; KJV Apoc. SANABASSAR *sān'ō bās'ər* (I Esd. 2:12, 15); SANABASSARUS —ə rās (I Esd. 6:18, 20). A Babylonian Jew and "prince [*nāšī*] of Judah" (Ezra 1:8) with whom the first exiles returned to Jerusalem from Babylonia under the edict of Cyrus (538 B.C.; Ezra 1:11; cf. vss. 1-4). The

"treasures of the house of the LORD" which had been carried off by Nebuchadnezzar (II Kings 24:13) were consigned to Sheshbazzar to be taken back with him to Jerusalem (Ezra 1:7-11). He was, moreover, the first "governor" (*pehâ*; 5:14) of re-established Judah, now a province in the Persian Empire, and made an initial attempt—evidently abortive—at rebuilding the Jerusalem temple (vs. 16). If, as seems probable, he is to be identified with the "Shenazzar" of I Chr. 3:18 (see *below and bibliography*)—a son of the exiled king of Judah, Jehoiachin—he was then a prince of the Davidic line and an uncle of Zerubbabel, who succeeded him as "governor" of Judah (cf. Ezra 5:1-2; Hag. 1:1; the political denotation of the title *pehâ* is somewhat ambiguous; see GOVERNOR). An inscription from the reign of Nebuchadnezzar refers to "the 5 sons of the king of Judah [Jehoiachin]," one of whom presumably would be *Sin-ab-usur* (Sheshbazzar), but unfortunately the sons are not mentioned there by name. See *bibliography*.

Beyond the foregoing account nothing else is presently known of Sheshbazzar. In the tradition⁹ his career has been overshadowed by that of his nephew and successor, ZERUBBABEL, who completed the rebuilding of the temple and became also the object of messianic expectations in Judah (Hag. 2:20-23; Zech. 4:6-10).

Zerubbabel's public career, which certainly began under Darius and not under the earlier Cyrus (Ezra 5:1-2; Hag. 1:1), is represented nevertheless by the self-contradictory and confusing narratives of the Chronicler in the book of Ezra as commencing under Cyrus (Ezra 3:1-4:4; cf. 2:2). Such confusion must represent the author's ignorance of the true chronology of Zerubbabel's work, or else his intentional disregard for it; or it suggests, even further, that he wrongly assumed Sheshbazzar and Zerubbabel to be the same person. In fact, many biblical interpreters down to the present time have argued that the two names belonged to one individual (see *bibliography*). The Jewish historian Josephus (ca. A.D. 100) scarcely relieves the confusion, associating the two names ambiguously in the same contexts but offering no indication of the relationship between them (Antiq. XI.i-iv).

Initially there seems to be reason for identifying Sheshbazzar with Zerubbabel. Both were called "governor" of Judah (Ezra 5:14; Hag. 1:1); both are identified with the return under Cyrus, if the account in Ezra is read uncritically (Ezra 1:11; 2:2; cf. 3:1-2); both are described as initiating the temple reconstruction (cf. Ezra 5:16 with 3:2, 8; 5:2; Hag. 1; Zech. 4:9); and while I Esd. 6:18 relates that the temple vessels were consigned "to Zerubbabel and Sheshbazzar," thus clearly distinguishing between them, some MSS render this passage without an "and" between the names, supplying argument again for their identification. It has been supposed that Sheshbazzar was this individual's Babylonian name and Zerubbabel his Jewish name, after the analogy of Daniel and his three friends (Dan. 1:7).

A greater degree of probability attaches itself, however, to arguments for distinguishing between Sheshbazzar and Zerubbabel as two separate persons. Inscriptions from the neo-Babylonian period show that the relatively common name Zerubbabel is Baby-

lonian, while at the same time its syntactical form is not typical to Hebrew names generally. That the Jew Zerubbabel should have had two Babylonian names is therefore puzzling. Moreover, the books of Haggai and Zechariah are on critical grounds more trustworthy historically than the work of the Chronicler in Ezra-Nehemiah, and the former books clearly associate the public career of Zerubbabel with the reign of Darius, making no reference of any work of his earlier under Cyrus. Even the passages in Ezra 2:2; 4:1-4:4 do not explicitly place the beginning of Zerubbabel's work in the reign of Cyrus, while the material there seems clearly to describe events under Darius. More puzzling is it, if the two were really one, that no explicit identification of the two is made anywhere (unless I Esd. 6:18 be so emended; see *above*). There is, finally, the strong probability that the name Sheshbazzar is a corruption of "Shenazzar" due to a plausibly explained scribal error (see *bibliography*), which would identify Sheshbazzar as a son of the captive king, Jehoiachin (I Chr. 3:17-18), and therefore as an uncle of Zerubbabel, grandson of Jehoiachin. The LXX form, Σαναβάσσαρος (I Esd. 2:12, 15; 6:18, 20), reflects the original full Hebrew transliteration of the Akkadian (i.e., Babylonian, in this case) *Sin-ab-usur*, from which "Shenazzar" (שנאצר; I Chr. 3:18) is written defectively.

Accordingly, the major significance of Sheshbazzar lies in the fact that Cyrus the Persian ruler delegated authority again in Judah to a scion of the house of David, thus helping to prepare the way for hope in the restoration of the old kingdom, a hope which did indeed flourish in the days of Zerubbabel his successor.

Bibliography. On the identity of Sheshbazzar and the etymology of his name, see W. F. Albright, "Date and Personality of the Chronicler," *JBL*, XL (1921), 108-10; cf. also R. H. Charles, Introduction to I Esdras, *Apoc. and Pseudep. of the OT*, I (1913), 15-17. For a careful textual history of the name, see C. C. Torrey, *Ezra Studies* (1910), pp. 136-38. Detailed arguments in favor of the identification of Sheshbazzar with Zerubbabel are given in J. Gabriel, *Zerubbabel* (1927; in German), pp. 48-79.

The inscription referring to Jehoiachin and his sons has been published by E. F. Weidner, "Jojachin, König von Juda," *Mélanges Syriens offerts à Monsieur René Dussaud*, II (1939), 925-26.

B. T. DAHLBERG

SHETH shēth [שֶׁת], sons of tumult, or sons of pride (*reading* שֶׁתָּ). 1. The term "sons of Sheth" (Num. 24:17) is a descriptive term for Moabites. Their defeat at the hands of an expected Israelite ruler is foreseen in the oracle of Balaam (Num. 24:15-19).
2. KJV form of SETH in I Chr. 1:1.

SHETHAR shē'thār [שֶׁתָּר] (Esth. 1:14). One of the seven princes of Persia under King Ahasuerus, and next to him in rank. The (Aramaic) Second Targum of Esther represents this individual as "from India." See *bibliography*.

Bibliography. On text, etymology, etc., see L. B. Paton, *Esther*, ICC (1908), pp. 68, 152-53. B. T. DAHLBERG

SHETHAR-BOZENAI shē'thār böz'ə nī [שֶׁתָּר בֹּזְנַי], possibly delivering the kingdom (see *bibliography*); KJV SHETHAR-BOZNAI —böz'nī. Alternately: Apoc. SATHRABUZANES sāth'rə bū'zə nēz [Σαθραβουζάνης] (I Esd. 6:3-7:1). An official, perhaps a royal scribe, in the Persian government for the province "Beyond the River" (Trans-Euphratia), which included Palestine. With Tattenai the governor, he wrote to the Persian king Darius inquiring about the authority given to the Jews to rebuild the temple at Jerusalem. The king's reply contained a decree admonishing them to encourage and assist this work (Ezra 5:3-6:13; cf. I Esd. 6:3-7:2).

Bibliography. On etymology, see R. A. Bowman, *Exegesis of Ezra, IB, III* (1954), 608. B. T. DAHLBERG

SHEVA shē'və [שׂוּא, vanity(?); or like—*i.e.*, like the father, or like the brother (cf. Arab. *sawā'un*)]. 1. The secretary in the list of David's administrative officials. He was in charge of the drafting and custody of official documents and perhaps court records of events (II Sam. 20:25). Each time this secretary appears, the name is different: Seraiah (II Sam. 8:17), Shavsha (I Chr. 18:16), Shisha (I Kings 4:3). The names in the LXX present another set of variations.

2. A man or family in the genealogy of Caleb; founder of Machbenah and Gibeon (I Chr. 2:49).

Bibliography. M. Noth, *Die israelitischen Personennamen* (1928), p. 222; G. B. Caird, *Exegesis of II Samuel, IB, II* (1953), 1091, 1154-55. T. M. MAUCH

SHEWBREAD. See BREAD OF THE PRESENCE.

SHIBAH shī'bə [שִׁבְעָה, oath] (Gen. 26:33); KJV SHEBAH shē'bə. A supposed name of a well dug by Isaac; the source of the name Beer-sheba. This tradition is in contrast to the account in Gen. 21:25-31; in both cases a patriarch makes a covenant with the king of Gerar, but in the case of Abraham the name is derived from the seven lambs that were given to seal the bargain, and in the latter from the oath that Isaac and Abimelech took. Apparently there were two cities which became one: SHEBA and BEER-SHEBA; they are represented by the modern Tell es-Saba' and Bir es-Saba', two miles apart. Since Beer-sheba eventually became famous as the name of the site, it was connected with both stories; but obviously it fits in better with the Isaac account.

S. COHEN

SHIBBOLETH shīb'ə līth [שִׁבְלֵת, flowing stream, or ear of grain; Ugar. *šblt*; Akkad. *šubultu*, see below] (Judg. 12:6). The password whose mispronunciation was used by the Gileadite sentries of Jephthah at the fords of the Jordan to detect enemy Ephraimites.

This word or a cognate form is found in Ugaritic, Phoenician, Judeo-Aramaic, and Syriac. Its meaning was either "river" (Isa. 27:12; Eccles. 4:26), "flood" (Ps. 69:2, 15—H 69:3, 16), "ear of grain" (Job 24:24; שִׁבְלֵים in Gen. 41:5-7, 22-24, 26-27; Ruth 2:2; Isa. 17:5), or "branches (or) bunch of twigs (of olive trees)" (שִׁבְלֵי in Zech. 4:12).

In the story the word could have been chosen for either meaning. The meaning "flood" would have been appropriate, although "ear of grain" as a symbol of an agricultural goddess or a sign of the

zodiac could have been meant. Even so, it was the pronunciation which was most significant. In Gilead, Jephthah's army had defeated the Ephraimites. Then in order to prevent these one-time W Jordan soldiers from escaping, every person was stopped as he attempted to cross the river and was asked by a Gileadite sentry whether he was an Ephraimite. Pretending to be a Gileadite or perhaps a Canaanite—anything but what he was—each Ephraimite would reply, "No." Then, required to say "Shibboleth" (שִׁבְלֵת), if instead he said "Sibboleth" (סִבְלֵת) because "he could not pronounce it right," he had betrayed himself as an Ephraimite and was slain on the spot.

That difference in dialect is the basis of the story is clear, but exactly what phonetics is involved may still be an unsolved problem. On the face of it, the distinction is simply between "sh" and "s." The Ephraimites pronounced words beginning with "sh" as though they began with "s," according to custom common—e.g., in Arabic pronunciation of Hebrew words (or cf. common Greek and English rendering of Hebrew names—e.g., שִׁמְשׁוֹן [shimshôn] becomes Σαμψών and "Samson"). In the Hebrew writing of the time this change could be expressed only by writing the consonant *Sameq* (ס), "s," instead of *Shin* (ש), "sh," for the system of pointing had not yet been invented by which *Shin* (ש), "sh" may be written *Sin* (שׁ), "ś." While there is real phonetic distinction between these two unvoiced sibilants, the palatal *Sin*, "ś," and the coronal-alveolar *Sameq*, "s," it would be much less distinguishable than that between either of these "s" sounds and "sh."

The point of the story may not be, however, that the Ephraimites betrayed themselves by unwarily saying "s" for "sh." Since both sounds were known to all W Semites, under the circumstances the fugitives would have carefully imitated the sentry's word. The point is that they could not pronounce it right. Therefore, it is possible that whereas the Gileadites in this case pronounced the "sh," unvoiced palato-alveolar sibilant, as "th," unvoiced coronal-alveolar spirant or fricative, the Ephraimites could not say "th." Evidence from Phoenician, Aramaic, Old Akkadian, and elsewhere suggests both that these two sounds were occasionally merged or alternatively used and also that "th" was written as "sh." Thus what is written as "sh" may have been pronounced by the E Jordan peoples as "th," but, as the "th" sound had been lost by the W Jordan peoples, they could pronounce it only as "s," a phonetic difficulty familiar today when Turks or Persians pronounce Arabic *thalith* as *salis*.

This story constitutes evidence for early dialect differences between E and W Jordan Israelites. Such differences between N and S Palestinian Hebrew dialects are known from comparison of the Samaritan Pentateuch and Israelite ostraca with the primarily Judean MT. The Danites recognized Micah's Levite by his accent (Judg. 18:3; cf. Peter's Galilean accent in Matt. 26:73).

The use in wartime of speech peculiarities to detect fellow countrymen has been noted in Syrians' replying "Jemel" instead of "Gamel," and their use to discern enemies, in Frenchmen betraying themselves to Sicilians by pronouncing *ceci e ciceri* as *sesi e siseri*.

This story is the origin of the word "shibboleth" as an English common noun meaning a criterion or test, as (a) a word or saying distinguishing adherents of a party or sect, or as (b) a sound in a given word which distinguishes persons of a particular nationality or district, or as (c) a peculiarity of speech distinguishing certain clans or groups.

SHIBMAH. KJV form of SIBMAH.

SHICRON. KJV form of SHIKKERON.

SHIELD. See WEAPONS AND IMPLEMENTS OF WAR § 4a.

SHIELD-BEARER [נשׂא הַמִּגָּן] (I Sam. 17:7, 41). A warrior's attendant having the duty of carrying his master's shield. See ARMOR-BEARER.

SHIGGAION shī gā'yōn, **SHIGIONOTH** shīg'ī-ō'nōth. See MUSIC § B1.

SHIHON. KJV form of SHION.

SHIHOR shī'hôr [שׁוֹר, שׁוֹר, שׁוֹר]; KJV alternately SIHOR sī'—. A body of water in NE Egypt.

The term occurs four times in the MT as a geographical designation, intimately related to Egypt. A comparison of the LXX and the MT shows clearly that the name was not understood (if one accepts the MT as correct) by the translators of the LXX: (a) in Josh. 13:3 the LXX reads ἀοικητου, "uninhabited"; (b) in I Chr. 13:5 the LXX has ὁριων, "boundaries"; (c) in Isa. 23:3 comparison of the MT and the LXX requires special study; (d) in Jer. 2:18 the LXX has Γηων, which is known elsewhere (Gen. 2:12) as a transcription of Hebrew *Gihôn*.

Shihor, which is localized in the passages cited above as being E of Egypt or belonging to Egypt, is thus generally identified with Egyptian *Pi-ṣ-Hr*, the Pool of Horus. The precise location of this Egyptian body of water is difficult, since it is closely connected to the problem of Per-Rameses (see ZOAN; PITHOM). Papyrus Anastasi III contains an encomium on this frequently mentioned residence of Ramses II in which *Pi-ṣ-Hr* is mentioned in parallelism with *Pi-twyf*, the Papyrus Marshes. Gardiner suggests that the latter name refers either to the swamps between Panamun (Diospolis Inferior, Tell el-Balamun) and the sea or to the neighborhood of Lake Menzaleh. If one accepts the identification of Per-Rameses with Tanis, or even the alternative site of Qantir ca. 12½ miles to the S, the approximate location of Shihor is secured. More specifically, Shihor (= *Pi-ṣ-Hr*) probably refers to the lower reaches of the Bubastite or Pelusiac Nile arm.

Bibliography. A. H. Gardiner, "The Delta Residence of the Ramessides," *JEA*, 5 (1918), 251-52; "The Geography of the Exodus," *JEA*, 10 (1924), 93. T. O. LAMBDIN

SHIHOR-LIBNATH shī'hôr līb'nāth [שׁוֹר לִבְנַת]. A place on the S boundary of Asher (Josh. 19:26).

It is sometimes identified with the Crocodile River, the Nahr ez-Zerqa, which flows into the Mediterranean six miles S of Dor. It is also possible that two sites, Shihor and Libnath, are intended, both of which remain unidentified. G. W. VAN BEEK

SHIKKERON shīk'ō rōn [שׁכְּרוֹן, drunkenness; or possibly the plant, Syr. שׁכְּרוֹנָא, henbane; σάκχαρον (cf. Jos. Antiq. III.vii.6; Vulg. *Sechrona*)]; KJV SHICRON shīk'rōn. A village on Judah's N border, rather near the Mediterranean Sea (Josh. 15:11). The site is probably Tell el-Ful, just N of the Valley of Sorek (see SOREK, VALLEY OF) and ca. three miles NW of Khirbet el-Muqanna (EKRON).

Bibliography. Y. Aharoni, "The Northern Boundary of Judah," *PEQ* (1958), pp. 27-31. V. R. GOLD

SHILHI shīl'hī [שׁוֹלֵי, javelin-thrower(?)] (I Kings 22:42; II Chr. 20:31). The maternal grandfather of King Jehoshaphat of Judah.

SHILHIM shīl'hīm [שׁלְחִים] (Josh. 15:32). A city in the S of Judah, not far from Ziklag. In the parallel passage in Josh. 19:6 it is called SHARUHEN and assigned to Simeon; in I Chr. 4:31 it is called Shaaraim. Since Egyptian texts invariably represent the Canaanite "l" by "r," it is possible that Shilhim is the Canaanite form of the name. S. COHEN

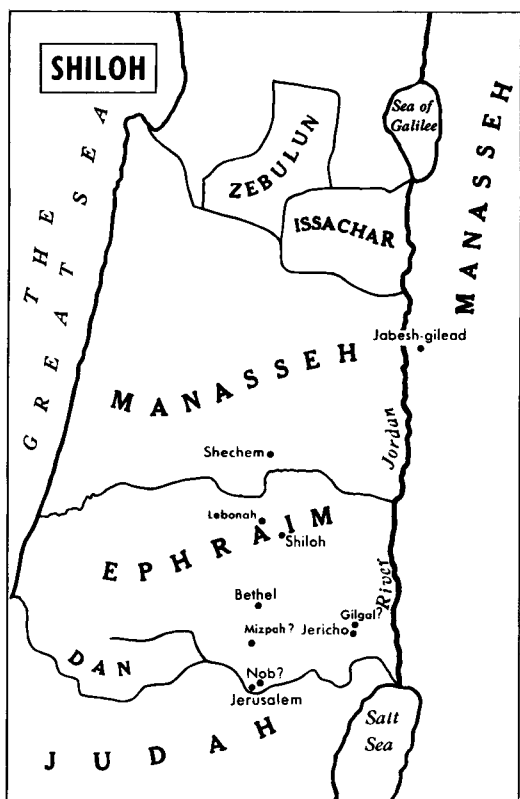

SHILLEM shīl'am [שׁלֵם, requited, recompensed (after the death of an older child?); see below] (Gen. 46:24; Num. 26:49); SHILLEMITES —→ mīts (Num. 26:49). The fourth son of Naphtali; ancestral head of the Shillemites. The form of the name varies: Samar. שׁוֹלֵם; LXX Σουλλημ, Σελλημ, Σελλη; Syr. שׁוֹלֵם, שׁוֹלֵם (I Chr. 7:13; see SHALLUM).

SHILOAH, WATERS OF shī lō'ā [מֵי הַשִּׁלּוֹחַ]; LXX Σ(ε)ιλωάμ, Σιλωά (Isa. 8:6). An aqueduct in Jerusalem. See SILOAM.

***SHILOH** shī'lō. 1. הַשִּׁלּוֹחַ, שׁוֹלֵם, שׁוֹלֵם. A city in Ephraim located N of Bethel and E of the main road from Shechem to Jerusalem (Judg. 21:19). It was an important Israelite center where the ark of the covenant and the tabernacle remained from the time of Joshua until the days of Samuel. A resident of Shiloh was a SHILONITE. A village N of Shiloh bore the name TAANATH-SHILOH.

Shiloh was identified with Khirbet Seilun,* ca. ten miles NE of Bethel, by E. Robinson, who visited the place in 1838; Eusebius, Jerome, and other early sources made the same identification. This identification, based upon surface exploration and the similarity of the ancient and modern names, was confirmed by the excavations of a Danish expedition at Seilun in 1926, 1929, and 1932. Although the excavations were never completed and much remains to be done, evidence of occupation by the Hebrews, during the periods when the OT refers to such occupation, was found. There were traces of occupation in the Middle Bronze period (ca. 2100-1600), but the archaeologists uncovered no evidence of a Canaanite city during the Late Bronze period (ca. 1600-1200).

The Israelites were the first to build extensively at this site, although a primitive Canaanite high place may have once existed there. The temple (I Sam. 1:9; 3:3) could not be located, but traces of a city wall and the remains of a synagogue and an early Christian church suggest that the traditions concerning Joshua, Eli, and Samuel at Shiloh were kept alive by pilgrimages to the city in later periods. Fig. SHI 44.

Shiloh was a suitable location for the Hebrews on their entrance into the land of Canaan, but less desirable in later periods when strategy required a control of the highways and more extensive farming areas. It is located on a low elevation overshadowed by hills on all sides except at the SW. Pastures and a water supply nearby were available, but the terrain prevented it from being easily defended against enemies.

The reasons for Joshua's choice of Shiloh as a headquarters following the residence at Gilgal are not clear (Josh. 14:6; 18:1); attempts to explain the move in terms of Jacob's remark in Gen. 49:10 are not convincing. Unlike Shechem and Bethel, which had figured in the traditions of the patriarchs, Shiloh appears to have had no significance prior to the Conquest. Its comparative remoteness and the absence of Canaanite occupation at the time may have recommended it as a political and religious center for the Israelite invaders.

In the time of Joshua, Shiloh was the scene of an assembly, and the tent of meeting was set up there (Josh. 18:1). From it representatives of the tribes set out to survey the land, and after they had returned to Shiloh with a written description of the region,

44. Setting of Shiloh (modern Seilun)

Joshua cast lots to apportion the territory (Josh. 18:8-10; 19:51; for Shiloh as both a military and a religious center, see Josh. 22:9, 12, 29). Joshua's dates are uncertain, but there is archaeological evidence of the occupation of Shiloh as early as 1200 B.C. and continuing until ca. 1050 B.C., when the city was probably destroyed by the Philistines.

During the period of the judges, cities other than Shiloh began to assume importance, although the reference to the ark of the covenant as located at Bethel is either a late tradition or may indicate merely that the ark had been removed temporarily from Shiloh (Judg. 20:26-27). Judg. 18:31 implies that the temple remained at Shiloh for a long time. It was a shrine to which regular pilgrimages were made: "Behold, there is the yearly feast of the LORD at Shiloh" (Judg. 21:19). References to the dances of the daughters of Shiloh, and to the action of the Benjaminites who came from the vineyards nearby to seize them as wives, suggest the existence of some type of fertility cult at the city (vs. 21). The report of the bringing of four hundred young virgins to Shiloh following the defeat of Jabesh-gilead is also suggestive of such a cult, although the purpose of the narrative in both instances is to explain how the men of Benjamin were able to secure wives after their own had been killed in battle with other Israelites.

Further information about Shiloh can be gleaned from the traditions concerning the visit of Elkanah and Hannah to the city (I Sam. 1:1-2). It is not clear whether the man's custom of going to Shiloh "year by year" for the purpose of worship and to sacrifice implies an annual festival at Shiloh, or merely a pilgrimage that might occur at any time of the year. However, the references to Hannah's desire for a child (I Sam. 1:11), Eli's suspicion that she was drunk (vs. 13), her anxiety lest she be regarded as a base woman (בַּת־בַּלְיִעַל; vs. 16), and the conduct of Eli's sons with the women who served at the shrine (2:22) suggest the presence of a Canaanite type of fertility cult at Shiloh.

The traditions concerning Eli's virtue, the Nazirite vow of Hannah (I Sam. 1:11), the theophany of Samuel (3:1-19), and the designation of Samuel as a prophet (נָבִיא; 3:20), at Shiloh make it seem probable that Shiloh was the scene of an early struggle on the part of the Israelites, who had an austere desert background, against the fertility cult of the Canaanites, which threatened to shape the Hebrew cult. With the

loss of the ark of the covenant and defeat at the hands of the Philistines, Shiloh ceased to be an Israelite shrine, although a description of its destruction by the Philistines has not been preserved.

The priests of Shiloh settled at Nob (cf. I Sam. 14:3; 22:11). The report of the visit of Jeroboam's wife to the house of the prophet Ahijah at Shiloh (I Kings 14:2, 4) is evidence for the existence of a shrine there as late as 922 B.C., although the Danish excavations uncovered no extensive traces of occupation for this period. Shiloh never again regained its former importance. God had forsaken "his dwelling at Shiloh, the tent where he dwelt among men" (Ps. 78:60). The ruins at Shiloh were evidently well enough known to give meaning to Jeremiah's warning that the temple in Jerusalem would suffer a fate similar to that which befell the Lord's place in Shiloh (Jer. 7:12, 14). Although Jer. 26:6, 9, seems to imply that the city of Shiloh was a symbol of desolation, and itself in ruins, the reference may be merely to the ruins of the Shiloh temple. The city seems to have been occupied as late as the time of Gedaliah (41:5), although the report of eighty men coming from Shechem, Shiloh, and Samaria may refer merely to the region rather than to the city.

2. KJV translation of שִׁילֹה, in the phrase "until Shiloh come," occurring in the Blessing of Jacob (Gen. 49:10) as a part of the oracle proclaiming the ascendancy of the tribe of Judah. The reference is probably to David, but it is hardly a proper name.

Shiloh is traditionally understood as a name of the MESSIAH, but the first evidence of such a title is late (Talmud Sanh. 98b), and the supposed derivation from *shālā*, "to be at ease," makes doubtful sense. If the N city is intended (see SHILOH 1)—i.e., "until it [Judah or Judean rule] comes to Shiloh"—then the phrase might speak of the extension of Judean sovereignty over Israel, as actually occurred under David. Identification of the cryptic name as Shelah, third son of Judah (Gen. 38:5), is without basis.
